The bill would require the department to conduct a study of the actual impact and projected impact of the transition from a cost-based reimbursement system to a prospective payment system for federally qualified health centers and rural health clinics.

Existing law provides that the board of supervisors of a county that contracted with the State Department of Health Services pursuant to a specified provision of law during the 1990-91 fiscal year and any county with a population under 300,000, as determined in

accordance with the 1990 decennial census, by adopting a resolution to that effect, may elect to participate in the County Medical Services Program for state administration of health care services to eligible persons in the county.

This bill would provide that the contract between the department and the County Medical Services Program Governing Board may include provisions for the administration of a pharmacy benefit program and, pursuant to these provisions, would authorize the department to negotiate, on behalf of the County Medical Services Program, rebates from manufacturers that agree to participate. The bill would revise, for the 2001–02 fiscal year, state and counties financial responsibilities for certain increases in costs in the County Medical Services Program. It would also require the governing board to reimburse the department for staff costs associated with these provisions.

Existing law imposes various functions and duties on the State Department of Health Services with respect to the administration and oversight of various health programs and facilities, including the Medi-Cal program.

This bill would authorize the department to issue a benefits identification card for persons who are eligible for Medi-Cal benefits or benefits under another health care program administered by the department.

This bill would require the department to issue an all-county letter to clarify, among other things, procedures for removing any indication of other health coverage, other than Medi-Cal, from a foster child's Medi-Cal eligibility information, and to provide the fiscal and policy committees of the Legislature and the local Los Angeles County 1115 Waiver Outright Committee with copies of all reports and updates provided to the federal Centers for Medicare and Medicaid Services as contained in the Los Angeles County waiver document. It would also revise the rulemaking authority of the department with respect to certain managed health care plan services to Medi-Cal recipients.

The bill would require the Director of Health Services to report to the Legislature, on or before March 31, 2002, regarding any changes in federal law permitting the state to expand the state program for ensuring cancer treatment availability for low-income uninsured women, specifically as it relates to noncervical gynecological cancers.

Existing law establishes various programs with respect to tobacco use prevention. The annual Budget Act provides that appropriations made by that act are appropriated for the use and support of the state for one fiscal year.

This bill would instead provide that funds appropriated by the Budget Act of 2001 for specified tobacco prevention programs shall be available for encumbrance and expenditure without regard to fiscal years for 2 years beyond the date of the appropriation, or until July 1, 2003, whichever is later. By extending the time for which an appropriation may be encumbered and expended, this bill would make an appropriation.

This bill, commencing August 1, 2001, would authorize local educational agencies (LEAs) participating in the Medi-Cal billing option to contribute funds to the department in order to fund a contract for a rate study for the LEA Medi-Cal billing option, and would require the department to match the contributed funds with the appropriate share of federal funds. It would require the department to contract for the study unless insufficient funds are received by the department by June 30, 2004, in which case the study would not be undertaken and funds would be returned to the contributing LEAs.

This bill would require the State Department of Developmental Services to submit a report on statistical data and an update on special incident information, would require the State Department of Health Services to submit a report on the state's Home and Community Based Waiver, to certain committees of the Legislature.

This bill would require the State Department of Health Services to convene a workgroup and report to the appropriate committees of the Legislature by March 1, 2002, on the availability and cost trends for general liability and professional liability insurance for long-term care providers in California.

The bill would specify that certain emergency regulations adopted for the administration of certain Medi-Cal programs prior to the repeal of the authorization to adopt emergency regulations shall remain valid until amended or repealed.

The bill would authorize the State Department of Health Services to adopt emergency regulations for the purposes of this bill.

Existing law creates the Cigarette and Tobacco Products Surtax Fund, composed of various accounts, with these moneys being available for specified purposes upon appropriation by the Legislature.

Existing law creates the California Health Care for the Indigent Program and the Rural Health Services Program, administered by the State Department of Health Services, under which moneys may be allocated to specified counties to cover the cost of uncompensated care.

This bill would require the department to allocate \$24,803,000 from money appropriated to the General Fund from the Cigarette and Tobacco Products Surtax Fund, for the 2001–02 fiscal year, for the cost of uncompensated emergency services under the California Health Care for the Indigent Program and the Rural Health Services Program, as prescribed.

This bill would also make technical, clarifying changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 172 (SB 37) Speier. Health insurance: coverage for clinical trials.

Existing law provides for the regulation and licensing of health care service plans by the Director of the Department of Managed Health Care and for the regulation of disability insurers by the Insurance Commissioner. Existing law provides that a willful violation of provisions governing health care service plans is a crime.

Existing law requires health care service plans and certain disability insurers to provide an external review process to examine coverage decisions regarding experimental or investigational therapies under certain conditions.

This bill would require health care service plans and certain disability insurers to provide coverage for specified health care services related to the treatment of an enrollee or insured diagnosed with cancer and accepted in a clinical trial meeting specified requirements. The bill would require copayments and deductibles for those services delivered in a clinical trial to be the same as for the services not delivered in a clinical trial.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. Pursuant to existing law, County Organized Health Systems are systems that contract with the State Department of Health Services to provide comprehensive health care to all eligible Medi-Cal beneficiaries residing in a county, and that are operated directly by a public entity established by a county government.

This bill would require the Medi-Cal program and County Organized Health System plans to provide coverage for specified health care services related to the treatment of an enrollee or beneficiary diagnosed with cancer and accepted in a clinical trial meeting specified requirements. By modifying the eligibility determination process under the Medi-Cal

program, the bill would increase the responsibilities of counties in the administration of the Medi-Cal program and would result in a state-mandated local program.

Because a willful violation of the bill's requirements with respect to health care service plans would be a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 173 (SB 50) Machado. Speech-language pathology assistants.

Existing law requires the Speech-Language Pathology and Audiology Board to adopt regulations that include standards for approval of Associate Degree Speech-Language Pathology Assistant training programs. Existing law requires a person applying for approval as a speech-language pathology assistant to have graduated from a speech-language pathology assistant associate of arts degree program, or equivalent course of study, approved by the board, except that on or before January 1, 2001, a speech-language pathology aide who has worked in that capacity for at least 12 months may apply for registration as a speech-language pathology assistant.

This bill would require the board to adopt regulations establishing standards for accreditation of a training program's institution. The bill would also authorize until June 1, 2003, a person who has performed the functions of a speech-language pathology aide for a specified amount of time within the last 5 years to apply for registration as a speech-language pathology assistant.

Existing law continuously appropriates the money in the Speech-Language Pathology and Audiology Board Fund.

Because this bill would increase the amount of money deposited in the fund by way of application fees from speech-language pathology assistants, the bill would make an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 174 (SB 63) Scott. Insurance.

Existing law authorizes a fire and casualty licensee to act as an insurance agent, broker, or solicitor, and to transact 24-hour care coverage, as defined.

This bill would also authorize a fire and casualty licensee to transact the coverages that a personal lines licensee is authorized to transact.

Existing law, operative January 1, 2002, requires the examination and licensure of a person to act as a personal lines licensee, as defined. Existing law, operative January 1, 2002, authorizes the Insurance Commissioner to exempt an applicant for a personal lines license from having to fulfill the examination requirement if the applicant has been continuously employed by an admitted insurer or licensed fire and casualty broker-agent in a full-time position for at least 3 years prior to January 1, 2001.

This bill would instead authorize the commissioner to exempt an applicant for a personal lines license from having to fulfill the examination requirement if the 3 years of required employment were immediately prior to January 1, 2001. The bill would provide that a personal lines licensee includes a person authorized to transact recreational vehicle and inland marine insurance. The bill would also specify the preclicensing education and other

requirements for a personal lines agent who applies to become a fire and casualty broker-agent.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 175 (SB 106) Sher. Service authority.

Existing law authorizes the establishment of a service authority and the imposition of a \$1 service fee in a county if the county board of supervisors, by a $\frac{2}{3}$ vote, and a majority of the cities having a majority of the incorporated population within the county, adopt a resolution establishing the authority and the imposition of a service fee on vehicles, as specified. Existing law requires the Department of Motor Vehicles to collect the fee at the time of vehicle registration, renewal of registration, or when renewal becomes delinquent. The net amount of fees collected for these fees is required to be deposited in the Abandoned Vehicle Trust Fund, which is continuously appropriated to the Controller for allocation to participating service authorities, as specified. Under existing law, if any funds received by a service authority are not expended to abate abandoned vehicles within 90 days of the close of the fiscal year in which the funds were received and the amount of those funds exceeds the amount expended by the service authority for the abatement of abandoned vehicles in the previous fiscal year, the fee for that authority is suspended for one year, commencing the following January 1. These provisions are currently required to terminate not later than 10 years from the date the actual collection commenced.

This bill would limit the authority to suspend the service fee to abatement programs that have been in existence for at least 2 full fiscal years and would require every service authority that imposes a service fee to issue a fiscal yearend report, as specified, to the Controller on or before October 31 of each year. The bill would require each service authority that fails to submit the annual report by November 30 of each year to have its fee suspended for one year.

The bill would require the Controller, on or before January 1, 2003, and on or before January 1 annually thereafter, to submit a report to the Legislature providing specified information and to review the fiscal yearend reports submitted by each service authority. The bill would require the Controller to determine whether a service authority fee is to be suspended for one year. The bill would require the suspension to commence on July 1, rather than January 1, following the Controller's determination. The bill would require the Controller to instruct the Department of Motor Vehicles on or before January 1, 2003, and on or before January 1 annually thereafter, as to the suspension of the service authority's fee. The bill would authorize the extension of the fee collection in increments of up to 10 years each, and would thereby extend the fee and the continuous appropriation, thereby making an appropriation.

Ch. 176 (SB 210) Committee on Local Government. Local Government Omnibus Act of 2001.

(1) Existing law allows the board of supervisors to designate the place for payment of the principal and interest of school bonds.

This bill would authorize those places to include any office of a trustee or paying agent, as specified.

(2) Existing law authorizes the oath of a disaster service worker to be destroyed 5 years after termination of his or her employment by a county.

This bill would authorize the destruction of the oath 5 years after the termination of any disaster service worker's service or, in the case of a public employee, 5 years after the termination of employment.

(3) Existing law authorizes the Controller to offset or deduct certain amounts due a city or county to satisfy certain state claims, and requires the assessor to notify the appropriate assessee, as specified.

This bill would transfer that notification duty to the tax collector.

(4) Existing law requires the county auditor to examine the books of the county treasurer, as specified.

This bill would require the auditor to reconcile the accounts on those books, as specified.

(5) Existing law authorizes a county board of supervisors to delegate to an appropriate county official the authority to lease property not to exceed \$2,500 per month.

This bill would increase that amount to \$7,500 per month.

(6) The existing Subdivision Map Act provides that a conveyance of land to, among other entities, a governmental agency, including a fee interest, easement, or license, is not considered a division of land for purposes of computing the number of parcels, and provides that a parcel map is not required except under specified conditions.

This bill would include the conveyance of a leasehold interest to a governmental agency within those provisions.

(7) Existing law authorizes certain documents to be recorded without acknowledgment, certificate of acknowledgment, or further proof.

This bill would include a certificate of correction for a subdivision final map or parcel map within those provisions.

(8) Existing law authorizes the treasurer of a local agency under specified conditions to deposit money in a bank to pay the principal and interest on bonds.

This bill instead would authorize those deposits to pay any warrant or to fund any electronic disbursement of funds from the local agency's treasury.

(9) Existing law prescribes certain procedures, applicable until January 1, 2002, to the detachment of territory from the Broadmoor Police Protection District.

This bill would extend the operation of those provisions until January 1, 2004.

(10) Existing law authorizes members of the governing board of the Fairfield-Suisun Sewer District to receive \$50 for each day's attendance at board meetings, not to exceed \$100 per month.

This bill would increase that daily amount to \$100, include additional days of service, and authorize the amount to be increased, as specified.

(11) Existing law prescribes procedures for emergency expenditures by a fire protection district.

This bill would substitute for those provisions other emergency contracting procedures that apply to public agencies generally.

(12) The existing Uniform Public Construction Cost Accounting Act authorizes public projects of \$75,000 or less to be let to contract by informal procedures, as specified.

This bill would increase that maximum amount to \$100,000.

(13) The existing County Water District Law requires each district to have a board of 5 directors, as specified.

This bill would require the Board of Directors of the Sawyers Bar County Water District to adopt a resolution ordering the number of directors to be reduced to 3 if the board receives a petition that meets prescribed requirements.

(14) This bill would also delete obsolete provisions relating to cancellation of Williamson Act contracts, approval of a final subdivision map for a land project, and formation of fire protection districts. The bill would make conforming changes relating to the designation of a clerk of the court rather than the county clerk to perform prescribed duties, and allocation of funds for snow removal, and would correct cross-references and make other clarifying changes.

This bill would delete the authority for a specified member of the Board of Directors of the Southgate Recreation and Park District to continue on that board, as proposed by SB 707, if that bill is enacted.

Ch. 177 (SB 637) McPherson. Bar pilots: Monterey Bay.

(1) Existing law provides for the regulation and licensing of pilots for the Bays of San Francisco, San Pablo, and Suisun.

This bill would apply those provisions also to persons who pilot vessels into or out of any harbor or port of the bay of Monterey Bay.

(2) Existing law authorizes the board of a harbor district to borrow money by issuance of promissory notes, or execute conditional sales contracts to purchase personal property, up to a specified amount, for the purposes of acquiring land for, and constructing or operating, any work, project, or facility, and prohibits any money borrowed pursuant to this provision from exceeding a term of five years. Existing law also requires, before the board may borrow money pursuant to this provision, that the board approve by resolution, and have on file, a specified report on the engineering and economic feasibility relating to the project.

This bill would exclude, from those requirements, any money borrowed from any agency or department of the United State government or of the State of California.

(3) Under existing law, any person who does not hold a license as a pilot or as an inland pilot and who pilots any vessel into or out of any harbor or port of the Bays of San Francisco, San Pablo, or Suisun, or who acts as a pilot for ship movements or special operations upon the waters of any of those bays, is guilty of a misdemeanor. By expanding the scope of persons subject to that law to include pilots in Monterey Bay, the bill would impose a state-mandated local program by creating a new crime.

(4) Existing law requires all moneys received by the Board of Pilot Commissioners pursuant to any statute to be deposited in the Board of Pilot Commissioners' Special Fund. The fund is continuously appropriated for the payment of the compensation and expenses of the board, its officers and employees, and the pilot training programs. Existing law specifies the rates for pilotage for vessels entering or leaving the Bays of San Francisco, San Pablo, and Suisun. Existing law also imposes a surcharge of 7.5% of pilotage fees, to be deposited in the fund and used to support the board, and imposes an additional charge for pension benefits payable to a fiduciary agent, as specified. Because this bill would increase the amount of money deposited in a continuously appropriated fund, the bill would make an appropriation.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 178 (SB 916) Ackerman. Discount buying organizations.

Existing law regulates membership contracts for discount buying organizations, as defined. Certain discount buying organizations are exempted from these provisions, including organizations that provide a full refund of membership fees, as specified, maintain a bond of \$20,000, and comply with certain other requirements.

This bill would additionally exclude certain discount buying organizations from these provisions if they establish, maintain, and file with the Secretary of State specified information regarding an escrow account in the amount of \$50,000 used to provide members with membership fee refunds, provide members with proof, in a specified form, of the creation of the escrow account and membership refund information, issue a refund within 10 days after the escrow trustee receives a member's request, provide the Attorney General and every prospective member with specified documents relating to membership cancellation and refund terms, possess an unrevoked acknowledgment from the Attorney General of compliance with the requirements of the exclusion provisions, and comply with other specified requirements.

Ch. 179 (AB 11) Dickerson. Olive pests.

Existing law establishes the Stone and Pome Fruit Pest District Control Law, the purpose of which is to organize and govern districts for the eradication of stone and pome fruit pests.

This bill would change the name of that act to the Olive, Stone, and Pome Fruit Pest District Control Law.

This bill would make various changes so as to provide for organization, operation, government, and dissolution of districts for the control and eradication of olive fruit pests. It would allow districts to eradicate, remove, or prevent the spread of any and all olive fruit pests by entering into or upon land within the boundaries of the district for the purpose of inspecting and treating olive trees and other host plants and fruit, removing trees, and levying annual assessments of parcels in the district with 10 or more olive trees.

Because this bill would require a local agency to perform an increased level of service it creates a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 180 (AB 202) Corbett. Joint Enforcement Strike Force on the Underground Economy.

Under existing law the Joint Enforcement Strike Force on the Underground Economy is comprised of specified members representing various state agencies.

This bill would include representatives of the Department of Insurance within that membership group.

Ch. 181 (AB 263) Correa. Bonds: public works contracts.

Existing law, the Bond and Undertaking Law, provides a comprehensive system for the execution and approval of bonds and undertakings. Existing law provides that a bond shall be executed by 2 or more sufficient personal sureties, or by one sufficient admitted surety insurer, or by any combination of sufficient personal sureties and admitted surety insurers, unless the statute providing for the bond requires execution by an admitted surety insurer.

This bill would provide that any bond required on a public works contract, as defined, shall be executed by an admitted surety insurer. This bill would require a public agency approving the bond on a public works contract to verify that the bond is being executed by an admitted surety insurer, and would provide that the public agency may fulfill this duty by either obtaining specified information from the Department of Insurance website or from the county clerk and attaching it to the bond. By increasing the duties of local agencies, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 182 (AB 274) Committee on Agriculture. Livestock.

Existing law allows an inspector or police officer who finds any animal, hide, carcass, or portion of a carcass in the possession of any person that he or she has reason to believe is not the legal owner or entitled to the possession of it to take possession of it or to direct the person in possession where to leave it pending investigation. A hide or carcass will not be held for more than 30 consecutive days unless the notice of seizure is renewed.

This bill would provide that an animal, a hide, or a carcass may not be held for more than 30 consecutive days unless the notice of seizure is renewed.

Existing law provides that a brand recording shall not be granted for a V brand on the left shoulder of an animal.

This bill would repeal this provision.

Existing law allows the owner of a recorded brand to renew that brand for a number of years by paying, in advance, \$25 per year to the Bureau of Livestock Identification, as specified.

This bill would call for biennial advance renewal payments of \$50.

Existing law requires that cattle undergo brand inspection at various times, as specified.

This bill would require brand inspection of cattle prior to their movement out of specified locations and upon movement out of the state.

Existing law provides that it is unlawful for any person who owns or has custody of cattle to transport them without the required brand inspection, as specified.

This bill would provide that movement of cattle by any person that owns or has possession of cattle without required inspection, as specified, is unlawful. Because this bill changes the definition of a crime, it would create a state-mandated local program.

Existing law authorized the chief to issue an annual permit to allow cattle to be transported out of this state without the brand inspections required under specified conditions, including, among other things, that the cattle are transported for pasture purposes and that the cattle are transported a distance of not more than 50 miles from the point of origin to the point of destination.

This bill would change the word transported to moved in these specified conditions.

Existing law provides that, under certain circumstances, a 90¢ fee be paid for brand inspection of each head of cattle shipped from another state into this state for slaughter.

This bill would repeal this provision leaving in place another provision which exempts out-of-state cattle from inspection when accompanied by proper documents.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 183 (AB 737) Oropeza. Disabled veteran business enterprises.

The Small Business Procurement and Contract Act permits a state agency to award a contract for goods, services, or information technology with a value of between \$5,000 and \$100,000 to a small business without complying with specified competitive bidding requirements.

This bill would allow the award of a contract under this exemption to a certified disabled veteran business enterprise, and would require small businesses to be certified to contract under this exemption.

Ch. 184 (AB 740) Aanestad. Public health: hospitals.

Existing law provides for local health care districts which govern certain health care facilities. Each health care district has specific duties and powers respecting the creation, administration, and maintenance of the districts.

This bill would, until January 1, 2008, authorize the Eastern Plumas Health Care District to obtain or be issued a consolidated license to operate a separate physical plant as a skilled nursing facility or an intermediate care facility on the campus of the Sierra Valley District Hospital.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 185 (AB 824) Cohn. Public employees' long-term care insurance.

Existing law requires the Board of Administration of the Public Employees' Retirement System to contract for long-term care insurance plans, authorizes the board to develop and administer self-funded long-term care insurance plans, and specifies that active and retired members and annuitants of specified public retirement systems and their spouses, their parents, and their spouses' parents shall be eligible to enroll in those plans. Premiums for any

self-funded long-term care plan developed by the board are required to be deposited in the Public Employees' Long-Term Care Fund, a continuously appropriated special fund.

This bill would provide that adult siblings of eligible active and retired members and annuitants shall also be eligible to enroll in those plans. By expanding the class of persons making deposits into a continuously appropriated fund, the bill would make an appropriation.

Ch. 186 (AB 837) Briggs. Joint powers agencies.

Existing law authorizes 2 or more public agencies, which include the federal government, the state, another state or any federal department or agency or any local agency, to make an agreement to jointly exercise any power common to the contracting parties and authorizes these parties to issue bonds, notes, or other evidence of indebtedness.

This bill would provide that the Treasurer is designated as an elected representative for federal tax purposes of a joint powers agency created pursuant to this law. The bill would provide that, in the discretion of the joint powers agency, the Treasurer is authorized to approve or certify the issuance of bonds, notes, or other evidence of indebtedness issued by or on behalf of the joint powers agency to the extent approval is required by federal tax law.

Ch. 187 (AB 844) Chan. School dropouts.

(1) Existing law authorizes a school district to establish an alternative education and work center for dropouts, as specified. The program includes certain administrative duties for the Superintendent of Public Instruction. The authorization becomes inoperative on June 30, 2001, and is repealed on January 1, 2002.

This bill would extend the effective date of these provisions to January 1, 2007. The bill would require the State Department of Education to submit a report to the Legislature on or before January 1, 2003, evaluating the centers, as specified.

(2) Existing law provides for various experimental school programs including, among others, individualized instruction based upon performance criteria, alternative schools, demonstration programs in intensive instruction, and gang risk intervention.

This bill would reenact provisions relating to educational clinics that became inoperative on June 30, 2000, and were repealed on January 1, 2001. The bill would authorize certification of educational clinics that would, among other things, recruit or receive referral of high school dropouts, provide instruction in basic academic skills, provide employment orientation or reentry orientation, operate on a clinical client-centered basis, and conduct courses of instruction. The bill would make the provisions inoperative on July 1, 2003, and repeal them as of January 1, 2004.

(3) This bill would declare that the aforementioned provisions shall be operative only to the extent funds are appropriated in the annual Budget Act.

(4) This bill would further declare that it is to take effect immediately as an urgency statute.

Ch. 188 (AB 950) Wright. Developmentally disabled persons: community care facilities: direct care staff training.

Under existing law, the State Department of Developmental Services contracts with regional centers for the provision of services and supports to persons with developmental disabilities.

Existing law provides, pursuant to an Alternative Residential Model (ARM), that the State Department of Developmental Services establish separate reimbursement rates for residential services to persons with developmental disabilities residing in community care facilities, in accordance with specified requirements.

Existing law specifies competency training and testing requirements that must be met by direct care staff at these ARM facilities.

This bill would make the training and testing requirements apply to direct care staff persons employed in any licensed community care facility that receives regional center funding

instead of ARM facilities. The bill would require the department to adopt emergency regulations to implement this provision.

Ch. 189 (AB 968) Chan. Technology, Trade, and Commerce Agency: organization.

Existing law sets forth the various offices and divisions within the Technology, Trade, and Commerce Agency, including the Office of Foreign Investment, the Office of Trade Policy and Research, the Office of California-Mexico Affairs, and the California State World Trade Commission. Within the California State World Trade Commission are the international trade and investment offices, also known as overseas trade offices, the Office of Export Development, and the Export Finance Office.

This bill would revise and recast those provisions and would provide that the Office of Foreign Investment, the Office of Trade Policy and Research, the Office of California-Mexico Affairs, the California State World Trade Commission, the international trade and investment offices, the Office of Export Development, and the Export Finance Office are within the International Trade and Investment Division within the agency. It would delete the references to overseas trade offices and instead refer to international trade and investment offices. The bill would make other related changes and make additional technical, nonsubstantive changes.

Ch. 190 (AB 1024) Nakano. Armories.

Existing law authorizes the Adjutant General to build and construct armories, if appropriations have been made by the Legislature.

This bill would authorize the Adjutant General to cooperate and contract with representatives of the United States in carrying out that authority. The bill would also require the Adjutant General, in connection with contracting on that basis, to make written findings based on specified criteria.

Ch. 191 (AB 1116) Committee on Revenue and Taxation. Income taxes: bank and corporation taxes.

Existing law defines “deficiency” for purposes of the Personal Income Tax Law and the Bank and Corporation Tax Law.

This bill would revise that definition to delete the provision specifying that “deficiency” includes the amount by which a credit subject to carryover is reduced by any action of the Franchise Tax Board.

This bill would specify the applicable administrative procedures if the Franchise Tax Board determines that the amount of a carryover disclosed by the taxpayer on an original or amended return is more than the amount of the carryover disclosed by its own examination.

This bill also would make changes with respect to the operative date of provisions effecting changes in withholding.

Ch. 192 (AB 1463) Longville. Litigation expenses.

Existing law requires a court in an eminent domain action to award the defendant his or her litigation expenses whenever the proceeding is wholly or partly dismissed or when the final judgment is that the plaintiff cannot acquire the property sought.

This bill would specify that where the plaintiff files a notice of abandonment as to a particular defendant, or a request for dismissal of a particular defendant, and the court determines that the defendant did not own or have any interest in the property at the time the action commenced, the court is required to award that defendant only those litigation expenses incurred up to the time of the filing of the notice of abandonment or request for dismissal.

Ch. 193 (AB 1533) Migden. Rehabilitation services.

Existing law establishes the Rehabilitation Revolving Loan Guarantee Fund, administered by the Department of Rehabilitation, to be used to guarantee loans made by eligible lenders to eligible persons for the purchase of vans, automobiles, and other special equipment to facilitate transportation of the physically handicapped. Existing law also establishes the Supported Employment and Adaptive Technology Revolving Loan Guarantee Account within the fund to assist private employers and employees with disabilities to purchase durable equipment, adaptive aids, and assistive devices.

This bill would establish a borrower's interest rate in accordance with a specified formula and would require the interest on these loans to be prepaid by the department to the participating lender out of the Supported Employment and Adaptive Technology Revolving Loan Guarantee Account, and if the borrower defaults on any loan guaranteed by this program, the participating lender would be required to reimburse the department for any interest not accrued, after deduction for any unavoidable loss suffered by the lender.

Existing law prohibits any loan in excess of \$20,000 to be made to any eligible person under the above provisions.

This bill would increase the maximum loan amount from \$20,000 to \$35,000.

Existing law establishes the State Rehabilitation Advisory Council to advise and assist the Director of Rehabilitation in carrying out certain vocational rehabilitation provisions.

This bill would rename this entity the State Rehabilitation Council and would make various technical, nonsubstantive changes.

Ch. 194 (AB 1558) Leach. School facilities: maintenance.

Existing law, the Leroy F. Greene School Facilities Act 1998 (Greene Act), provides funding to school districts to finance the construction and modernization of school facilities. The Greene Act requires applicants to make all necessary repairs, renewals, and replacements to ensure that a project is at all times kept in good repair. Existing law requires an applicant to establish a restricted account within the school district's general fund for the exclusive purpose of providing moneys for ongoing and major maintenance, and to agree to deposit prescribed amounts into the account for this purpose. Existing law requires the applicant school district to certify that it has publicly approved an ongoing and major maintenance plan.

This bill would define major maintenance for this purpose, would require, commencing January 1, 2002, any school district applying for funding pursuant to the Greene Act to annually review the plan, update it as needed, and certify that it is in compliance with the plan. The bill would require applicants to certify that the plan includes prescribed criteria, including, but not limited to, identification of the major maintenance needs of the project, and specification of a schedule for completion of the major maintenance.

Ch. 195 (AB 1657) Hertzberg. County health care.

Existing law creates various county health care services programs.

This bill would require the State Auditor to evaluate the financial capacity of the Los Angeles County Department of Health Services to render necessary health care services to the residents of Los Angeles County and, to the extent possible, to coordinate audit and review activities with the State Department of Health Services and the Los Angeles County Auditor-Controller and Department of Health Services.

Ch. 196 (AB 1690) Committee on Human Services. Elder and dependent abuse reporting: training.

Existing law requires mandated reporters to report instances of abuse of elder or dependent adults. Existing law also specifies that long-term health care facilities or community care facilities that provide care to adults shall provide training to their staff in recognizing and reporting elder and dependent adult abuse.

This bill would also make residential care facilities for the elderly subject to the requirement to provide training to staff in recognizing and reporting elder and dependent adult abuse, and would require compliance by July 1, 2002.

Ch. 197 (AB 440) Cardoza. Budget Act of 2001.

This bill would appropriate \$5,400,000 in addition to the amount appropriated in the Budget Act of 2001 for grants for specified law enforcement agencies. The bill would increase the minimum amount of each law enforcement grant from \$20,000 to \$30,000.

This bill would appropriate \$75,000,000 in addition to the amount appropriated in the Budget Act of 2001 for tax relief for senior citizens' property tax assistance and senior citizen renters' tax assistance.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 198 (AB 471) Hertzberg. Horse racing.

(1) Existing law authorizes wagering on the result of live and simulcast horse races, subject to the regulation and oversight of the California Horse Racing Board, and requires the licensure of various persons and entities associated with this industry. Existing law also imposes specified requirements on the operation of racetracks, backstretch facilities, and stabling and vanning services, and establishes pension funds and welfare funds for the benefit of backstretch personnel and horsemen.

This bill would state findings and declarations of the Legislature regarding the employment rights of racetrack backstretch employees, and direct the California Horse Racing Board to oversee the conduct of a union and multiemployer collective bargaining agent recognition procedure subject to specified conditions and procedures, provide for resultant labor agreements to be binding on the parties, and establish reasonable rules to regulate the time, place, and manner of representational meetings within the racetrack enclosure. This bill would also authorize individual trainers to opt out of the multiemployer bargaining process, subject to specified conditions, and require each trainer to keep accurate payroll records for all of his or her employees, subject to audit by the Labor Commissioner as specified, containing specified information which would be available for inspection by, or furnished to, the employee, his or her authorized representative, the board, the administrators of specified pension and health and welfare funds, or the Division of Labor Standards Enforcement of the Department of Industrial Relations.

(2) Existing law provides that every license granted under the Horse Racing Law is subject to suspension or revocation in any case where the board has reason to believe that any condition regarding the license has not been complied with, or that any provision of law or any rule or regulation of the board affecting it has been broken or violated.

This bill would expand this suspension and revocation authority to expressly include violations of the Labor Code and regulations adopted thereunder. This bill would also provide that upon a finding by the Labor Commissioner that a violation of any provision of the Labor Code under his or her jurisdiction has been committed by a person licensed under the Horse Racing Law, that upon expiration of the applicable period for appeal he or she shall notify the board of that finding.

(3) Existing law provides that no license to conduct a horse racing meeting shall be issued unless the track has been inspected and approved by the board as to specified racetrack safety standards within 30 days prior to the date of application.

This bill would additionally provide that the board shall, within 120 days of the effective date of this act, adopt emergency regulations, as specified, to establish employee housing standards at licensed racetracks, which shall be replaced by final, permanent regulations with 18 months thereafter, which racing associations shall be in compliance with by January 1, 2004, and as of that date would require the board, in conjunction with the Department of Housing and Community Development or a local housing authority in that jurisdiction, to annually inspect the living conditions of backstretch employee housing and submit these

findings to the board. The bill would provide that no license to conduct a horse racing meeting shall be issued to a racing association unless the board has inspected the housing conditions that exist on that track's backstretch and determined them to be in compliance with these standards.

(4) Existing law permits any racing association in this state, with the approval of the California Horse Racing Board, to accept out-of-state wagers on a race or races conducted by or disseminated by that association and to transmit live audiovisual signals of the race or races to locations out of state. Existing federal law, the Federal Interstate Wire Act, generally prohibits the transmission in interstate commerce of wagers using a wire communication facility, but allows for the transmission of wagering information as specified.

This bill would state findings and declarations of the Legislature regarding online wagering and account wagering.

This bill would authorize any racing association or fair to accept advance deposit wagers, or to allow these wagers through a betting system or multijurisdictional wagering hub, during the calendar period of its live racing meeting upon approval by the board, and to form partnerships, joint ventures, or any other affiliation to further this purpose. The bill would provide that an advance deposit wager is a method of making a parimutuel wager in which a person in California or elsewhere establishes an account with a licensee, betting system, or multijurisdictional wagering hub, and subsequently issues wagering instructions concerning the funds in this account, thereby authorizing the entity holding the account to place wagers on the account owner's behalf. The bill would provide that wagering instructions may be communicated by telephone call or through other electronic media, and that the entity holding the account shall ensure the identification of the account's owner by utilizing methods and technologies approved by the board. The bill would require entities holding advance wagering accounts to provide a full accounting of deposits and wagers, as specified, and after the payment of winning wagers and the deduction of contractual compensation and a host fee, where applicable, to pay the remaining amount to various racing entities in California, with specified percentages based on the amount handled on advance deposit wagers that originate in California for each race meeting to be dedicated to the Kenneth L. Maddy Fund for equine health, payment of auditing costs incurred pursuant to (1), reimbursement of the State Mediation and Conciliation Service for costs incurred pursuant to this act the augmentation of compulsive gambling prevention programs, and the augmentation of an existing welfare fund and existing pension plans benefiting backstretch personnel, with the remaining funds to be distributed as commissions, purses, and incentive awards, as specified. The bill would require the board to develop and adopt rules to regulate and license advance deposit wagering operations, security, and advertising, and would require that entities conducting advance deposit wagering conducted in California enter into contractual agreements with labor organizations, as specified. This bill would repeal these provision on January 1, 2008.

(5) Existing law defines "parimutuel wagering" as wagering where bettors purchase tickets, and provides that lawful parimutuel wagering shall only be conducted within the enclosure of a licensee.

This bill would provide that the term "parimutuel wagering" includes the issuance of wagering instructions leading to the placement of wagers, and that wagering instructions concerning funds held in an advance deposit wagering account shall be deemed to be issued within the licensee's enclosure, in accordance with (1).

This bill would repeal this provision on January 1, 2008.

(6) Existing law requires each licensed racing association to designate a certain number of racing days to be conducted as charity days for the purpose of the distribution of the net proceeds therefrom to beneficiaries, and requires that at least 20% of the distributions therefrom to be made to charities associated with the horse racing industry.

This bill would specify that an existing specified backstretch employee welfare fund shall be a health and welfare trust fund administered without prejudice for the benefit of every

eligible person, that the fund and benefits shall be administered in accordance with specified standards established in federal law, subject to oversight and regulation of the board, and that the welfare fund board be expanded, by March 1, 2002, to include 2 additional groom and stable employee licenses, also would be replaced by designees of a labor union with 60 days of that union having been chosen as the exclusive collective bargaining agent of a statewide majority of backstretch workers.

(7) Existing law provides that racing associations and fairs shall pay, from the portion deducted for purses, an amount equal to 1% of that portion for a pension plan for backstretch personnel to be administered by the respective trainers' organizations.

This bill would provide that within 60 days of a union having been chosen as the exclusive collective bargaining agent for a statewide majority of backstretch workers these funds shall instead be directed to a pension plan for backstretch personnel established by a plan submitted by trainers' organizations as specified which shall be administered by a committee that shall include 2 representatives designated by the bargaining agent.

(8) This bill would provide that its provisions are severable as specified.

Ch. 199 (AB 603) Dutra. Home furnishings.

(1) The Home Furnishings and Thermal Insulation Act, which establishes the Bureau of Home Furnishings and Thermal Insulation, requires, among other matters, that all mattresses manufactured for sale in this state as well as specified furniture sold or offered for sale for use in a place of public accommodation in this state and specified reupholstered furniture be fire retardant. Under the act, the failure to comply with these provisions is a crime.

This bill would require, on and after January 1, 2004, that all mattresses and box springs manufactured for sale in this state, except in specified establishments with automatic fire extinguishing systems, be resistant to an open flame under a standard specified by the bureau. The bill would require that this requirement be made applicable to other bedding if the bureau concludes that they contribute to mattress fires. The bill would make these regulations inoperative if a flame resistance standard for these products is adopted under federal law and would require the bureau to report to the Legislature summarizing its regulatory findings.

(2) Existing provisions of the act authorize the chief of the bureau to set license fees not exceeding specified amounts for licenses under the act.

This bill would increase the maximum fees that could be set for an importer's license and a furniture and bedding manufacturer's license under the act.

(3) Because a violation of the bill's expanded fire protection standard applicable to mattresses would be a crime, this bill would impose a state-mandated local program by expanding the scope of an existing crime.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 200 (AB 1003) Frommer. Criminal restitution.

Pursuant to existing law, any compensatory or punitive damages awarded by trial or settlement to a prisoner in connection with a civil action brought against a federal, state or local jail, prison, or correctional facility, or its official or agent, excluding reasonable attorney's fees and litigation costs approved by the court, must be paid directly to satisfy any outstanding restitution orders or fines. The Director of Corrections is permitted to deduct and retain an administrative fee in specified circumstances.

This bill would allow the director to deduct and retain an administrative fee of 5% of the amount paid from a settlement or trial award of a parolee to satisfy an outstanding restitution order. Because the bill would increase revenue deposited in the Restitution Fund, a continuously appropriated fund, the bill would make an appropriation.

Ch. 201 (AB 527) Kehoe. Special interest license plates and decals: veterans' organizations.

Existing law authorizes private organizations, including veterans' organizations, to participate in special interest license plate programs in which the Department of Motor Vehicles issues license plates with a participating organization's distinctive design or decal, and specifies the various fees concerning the issuance of, renewal of registration of, and replacement of damaged or unserviceable, plates and decals.

This bill would, operative July 1, 2002, reduce the fee for a replacement decal issued to a member of the veterans' organization from \$35 to \$10.

Ch. 202 (AB 1044) Migden. California Housing Finance Agency: bonds.

Existing law sets forth various powers and duties of the California Housing Finance Agency in conjunction with the financing of housing. Under existing law, the agency is authorized to issue revenue bonds not exceeding a specified amount outstanding at any time, exclusive of indebtedness incurred to refund or renew bonds previously issued by the agency, the proceeds of which are used to finance housing developments and other residential structures.

The bill would make an appropriation by increasing by \$2,200,000,000 the authorization of bonds to be issued by the agency, the proceeds of which under existing provisions of law are required to be deposited in the continuously appropriated California Housing Finance Fund.

Ch. 203 (SB 982) O'Connell. Special education.

Existing law requires, if the Commission on State Mandates determines that an act contains costs mandated by the state, that reimbursement to local agencies and school districts for those costs be made, as specified.

Under existing law, every individual with exceptional needs, who is eligible to receive educational instruction, related services, or both, is required to receive educational instruction, services, or both, at no cost to his or her parents or, as appropriate, to him or her.

This bill would require the Superintendent of Public Instruction to perform specified computations with respect to special education local planning areas and affected pupils and to permanently increase the amount per unit of average daily attendance for those areas. The bill would also state that, commencing with the 2001–02 fiscal year, to the 2010–11 fiscal year, \$25,000,000 shall be appropriated, on a one-time basis each fiscal year, for allocation to school districts pursuant to a prescribed calculation.

The bill would appropriate \$100,000,000 in augmentation of Item 6110-161-0001 of Section 2.00 of the Budget Act of 2001 for the purposes of the actions taken by the superintendent, as stated above. The bill would appropriate \$270,000,000 to the Superintendent of Public Instruction for allocation on a one-time basis to school districts, county offices of education, and special education local plan areas. The bill would also appropriate \$25,000,000 in augmentation of Item 6110-161-0001 of Section 2.00 of the Budget Act of 2001 for purposes of making the first one-time allocation in each fiscal year for the 2001–02 fiscal year to school districts, as provided for above. The bill would state that the allocation of certain of those funds is in full satisfaction and in lieu of any reimbursable mandate claims relating to special education programs and services, as specified.

Section 8 of Article XVI of the California Constitution (Proposition 98) sets forth a formula for computing the minimum amount of General Fund revenues that the state is required to appropriate for the support of school districts, as defined, and community college districts for each fiscal year. That formula is adjusted in certain fiscal years for changes in pupil enrollment, as specified. Certain funds appropriated by this bill would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 204 (AB 187) Liu. Food labeling and safety.

Existing law, the Sherman Food, Drug, and Cosmetic Law, contains various provisions regarding the packaging, labeling, and advertising of food, drugs, and cosmetics. A violation of any of these provisions is punishable as a misdemeanor.

This bill would require all manufacturers of Korean rice cakes to place labels issued by the Korean Rice Cake Association Corporation on the rice cakes that indicate the date of manufacture and would also be required to include a warning that the rice cake must be consumed within one day of manufacture.

Existing law, the California Uniform Retail Food Facilities Law, establishes uniform health and sanitation standards for retail food facilities as defined. The law requires the State Department of Health Services to adopt regulations to implement and administer those provisions, and delegate primary enforcement duties to local health agencies. A violation of any of these provisions is punishable as a misdemeanor.

This bill would permit the sale of Korean rice cakes that have been at room temperature for no more than 24 hours.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 205 (AB 443) Aanestad. Law enforcement funding.

Existing law provides specified funding for local law enforcement through the Local Public Safety Fund and local supplemental law enforcement services funds.

This bill would appropriate \$18,500,000 annually from the General Fund to the Controller for allocation to specified rural and small county sheriffs' departments to enhance law enforcement efforts in those counties. The bill would restrict, as specified, the use of these and other specified law enforcement funds for surveillance or monitoring of persons.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 206 (AB 113) Pavley. California Poet Laureate.

Existing law establishes the Arts Council and sets forth the duties of the council in promoting the arts in the state.

This bill would establish the position of California Poet Laureate, who would be appointed for a specified term by the Governor and confirmed by the Senate from a list of nominees garnered by the council through a specified process, and who would perform specified duties. It would authorize the council to pay an appropriate stipend to the California Poet Laureate and would require the council to provide for the payment of his or her expenses, as specified.

This bill would authorize the council to solicit and receive gifts, donations, bequests, grants of funds, or any other revenues, from public or private sources and to expend those moneys to increase the stipend of the California Poet Laureate and for any other purpose it deems necessary to implement this bill.

Ch. 207 (AB 395) Briggs. Alcoholic beverages: tied-house restrictions: signs.

The Alcoholic Beverage Control Act provides that any manufacturer, winegrower, manufacturer's agent, rectifier, distiller, bottler, importer, or wholesaler, or any officer, director, or agent of any of those persons, may furnish, give, lend, or rent specified types of signs, including signs relating to advertising beer.

This bill would revise these provisions by specifying that the interior signs advertising beer shall remain the property of the beer wholesaler who authorized and furnished them, unless the signs are given or sold to the retail licensee.

Ch. 208 (AB 532) Cogdill. Health care service plans: operation in rural areas.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires the Legislative Analyst, among other matters, to study various issues and to report its findings to the Legislature.

This bill would require the Legislative Analyst to study the operation of health care service plans in rural areas of this state and to report to the Legislature and the Department of Managed Health Care on or before July 1, 2002, regarding the reasons plans have discontinued operating in those areas and incentives for plans to resume operating there.

Ch. 209 (AB 810) John Campbell. California water districts: Irvine Ranch Water District and Santa Margarita Water District.

The California Water District Law authorizes a California water district to acquire, plan, construct, maintain, improve, and operate the necessary works for the production, storage, transmission, and distribution of water for irrigation, domestic, industrial, and municipal purposes, and any related drainage or reclamation works.

This bill would authorize the Irvine Ranch Water District and Santa Margarita Water District to acquire, construct, operate, maintain, and furnish facilities for the diversion of urban runoff from drainage courses within the district, the treatment of the urban runoff, the return of the water to the drainage courses, or the beneficial use of the water.

Ch. 210 (AB 929) Frommer. Child abuse.

Under existing law, there is within the Office of Criminal Justice and Planning the Child Abuser Prosecution Program. This program provides financial and technical assistance to district attorneys' offices. Existing law provides that each district attorney's office establishing a child abuser prosecution unit shall receive funds under this program, as specified, to concentrate enhanced prosecution efforts and resources on individuals who are under arrest for sexual assault of a child. Existing law also requires the Office of Criminal Justice Planning to report annually to the Legislature concerning this program.

This bill would make willful infliction of suffering or unjustifiable pain, injury or endangerment of person or health, assault resulting in death, as specified, cruel or inhumane corporal punishment, injury resulting in traumatic condition, and distribution of harmful matter with the intent of seducing a minor, when committed in conjunction with any of the other violations listed, offenses eligible for enhanced prosecution efforts.

This bill would also require the Office of Criminal Justice Planning to submit an evaluation of the Child Abuser Prosecution Program, as specified, using outcome measures to determine its effectiveness.

Ch. 211 (AB 942) Cedillo. Highway 101: pedestrian overhead crossing, walkway, or deck.

Existing law prescribes whether pedestrians or vehicles are to yield the right-of-way when a pedestrian crosses a roadway.

This bill would request the City of Los Angeles to consider the benefits of developing a pedestrian crossing, walkway, deck, or similar structure linking the areas of downtown Los Angeles separated by State Highway Route 101, consider potential funding sources for those alternatives, as well as the features, amenities, and other details of that development, and provide a report on the city's findings to the Los Angeles County Metropolitan Transportation Authority, for consideration in the regular local project selection, approval, and funding process.

Ch. 212 (AB 952) Kelley. Income taxes: exclusion.

The Personal Income Tax Law provides an exclusion from gross income for any amount received as a rebate from a local water agency or supplier for the purchase of a water conservation water closet.

This bill would allow the exclusion with respect to vouchers received from energy agencies or suppliers, and would extend the exclusion to energy efficient clothes washers, as provided, and plumbing devices, as specified.

This bill would take effect immediately as a tax levy.

Ch. 213 (AB 970) Dutra. Mobilehomes and manufactured housing.

Existing law requires the Department of Housing and Community Development to establish a permanent title record for each registered manufactured home, mobilehome, commercial coach, truck camper, and floating home and to issue a certificate of title and registration card. Existing law prescribes procedures for the transfer of title or interest in, and the creation and satisfaction of security interests in, a manufactured home, mobilehome, commercial coach, truck camper, or floating home.

This bill would authorize the department to electronically transmit or receive specified certificates of title pursuant to these provisions when the department determines that this is economically and technologically feasible and the appropriate state control agencies approve this determination. The bill would also authorize the department to establish electronic programs to facilitate improved business practices between the department and qualified private industry partners. These programs may include, but are not limited to, programs for the electronic processing of ownership and title documents for manufactured homes, mobilehomes, commercial coaches, truck campers, and floating homes, and the payment of related fees.

Ch. 214 (AB 973) Chan. County children and families commissions: information disclosure.

(1) Under the existing California Children and Families Act of 1998, a county may elect to participate in the California Children and Families Program, by forming a county children and families commission, in accordance with the provisions of the act, to promote, support, and improve the early development of children from the prenatal stage to 5 years of age.

This bill would provide that specified information regarding a child or a child's parent, legal guardian, or other family member, that is provided to a county commission by specified persons shall be considered confidential, and may be disclosed only to a person, agency, or entity that receives funding from the county commission by way of a grant award, contract, or as a service provider for early childhood services unless further disclosure is authorized by written consent of the parent or legal guardian or where disclosure is required by state or federal law.

(2) An initiative measure, the act provides that it may be amended only by a vote of $\frac{2}{3}$ of the membership of both houses of the Legislature and that all amendments to the act shall be to further the act and must be consistent with its purposes.

This bill, in conformance with those requirements, would declare that its provisions further the act and are consistent with its purposes.

(3) Existing law provides for access to information, including inspection or copying of any public record within control of a state or local agency, concerning the conduct of people's business under the California Public Records Act. Existing law also makes specified public information exempt from disclosure.

This bill would add to the list of exemptions records of county children and families commissions.

Ch. 215 (AB 992) Papan. Special education: nonpublic, nonsectarian schools and agencies. Existing law prohibits reimbursement by the state for special education and related services provided by a nonpublic, nonsectarian school or agency by an individual who is or was an employee of a contracting local educational entity within the last 365 days, with specified exceptions.

This bill would delete the prohibition against reimbursement by the state for special education and related services provided by a nonpublic, nonsectarian school by an individual who is or was an employee of a contracting local educational entity within the last 365 days, but would not delete the prohibition as it applies to nonpublic, nonsectarian agencies.

Ch. 216 (AB 1009) Wyland. Partnership academies.

Existing law provides for the establishment of partnership academies by participating school districts and establishes criteria qualifying “at-risk” students for enrollment in the academies. Under existing law, students not meeting the at-risk criteria may participate in an academy program and be considered qualified if they meet other criteria, but these students may not exceed $\frac{1}{3}$ of the participating students.

This bill would instead authorize a school district operating a partnership academy to enroll students that do not meet the at-risk criteria but meet other criteria and would limit the enrollment of these non-at-risk students to $\frac{1}{2}$ of students enrolled in the academy.

Ch. 217 (AB 1066) Dutra. Santa Clara Valley Transportation Authority.

Existing law, the Santa Clara Valley Transportation Authority Act, creates the Santa Clara County Transportation Authority and prescribes the powers and duties of that authority, including the power to construct and operate or acquire and operate transit works and facilities, as specified.

This bill would revise the powers and duties of the authority to permit it (1) to construct and acquire transportation facilities, as defined, (2) to provide facilities for the movement of vehicles, bicycles, and pedestrians, subject to the concurrence and oversight of the Department of Transportation with regard to the development and implementation of installations in state highways, and (3) to acquire and construct facilities necessary or convenient for vehicular and pedestrian transportation. This bill would also make conforming changes in this regard, including, but not limited to, granting the authority the right to exercise any power with respect to highways that is granted to counties, as specified.

Ch. 218 (AB 1161) Papan. Grand jurors: compensation.

Existing law provides that unless a higher fee or rate of mileage is otherwise provided by statute or county or city and county ordinance, the fees for grand jurors are \$10 a day for each day’s attendance as a grand juror, and 15¢ a mile, in going only, for each mile actually traveled in attending court as a grand juror.

This bill would provide, instead, that unless a higher fee or rate of mileage is otherwise provided by statute or county or city and county ordinance, the fees for grand jurors are \$15 a day for each day’s attendance as a grand juror and the mileage reimbursement applicable to county employees for each mile actually traveled in attending court as a grand juror.

This bill would be operative July 1, 2001.

Ch. 219 (AB 1719) Committee on Higher Education. Public postsecondary education.

(1) Existing law establishes the California State University and its various campuses under the administration of the Trustees of the California State University. Existing law provides that the name “California State University” is the property of the state, and prohibits the use of this name or any abbreviation of it or any name of which these words are a part without the permission of the trustees. Violation of this provision is punishable as a misdemeanor.

This bill would specify that the names of various campuses of the California State University, and abbreviations of those names, are the property of the state. The bill would also specify that permission of the trustees is required before any of these names may be used for any commercial purpose. This bill would impose a state-mandated local program by expanding the scope of a crime.

(2) Under existing law, the trustees are authorized to enter into agreements with any public or private agency, officer, or institution for the performance of acts or for the furnishing of services, facilities, materials, or equipment.

This bill would require the trustees to prescribe policies and procedures for the acquisition of services, facilities, materials, goods, supplies, or equipment. The bill would also require

these policies and procedures for the acquisition of materials, goods, supplies, or equipment to include competitive means for obtaining best value, and would authorize the policies and procedures to include financing arrangements.

(3) Existing law requires the Trustees of the California State University to establish an internal audit staff with prescribed duties, including auditing, reviewing, cost and systems analysis, analyzing, and recommending operating procedures for the university. Existing law also requires the university's internal audit staff to perform audits, at least once every 5 years, of the activities of the university pursuant to specified statutes.

This bill would add a reference to the statute authorizing the trustees to enter into agreements for the performance of acts or for the furnishing of services, facilities, materials, or equipment. The bill would delete references to 3 of these statutes contained in the Public Contract Code.

(4) Existing law authorizes the Trustees of the California State University to perform certain functions without prior approval of any other state department or agency when necessary to carry out the purposes of the university. These functions include the sale or exchange of personal property belonging to the university and the leasing of real property for the use of the university.

This bill would also authorize the trustees to lease personal property belonging to the university and to lease personal property for the use of the university.

(5) An existing provision of the Government Code defines "state civil service" to include all personnel appointed or employed at the state nautical school except personnel whose duties consist of instructing students or supervising instructional personnel and except for students enrolled at the school who are working part-time as student assistants.

This bill would delete this provision.

(6) Existing provisions of the Public Contract Code generally govern the procurement of materials, supplies, equipment, and services by state agencies. These provisions do not apply to the Regents of the University of California.

This bill would provide that these provisions also do not apply to the Trustees of the California State University.

(7) Existing law, known as the California State University Contract Law, provides, among other things, that, when, in the opinion of the Trustees of the California State University, the work does not require the application of that law, the trustees may carry out the project if the estimated cost does not exceed \$250,000.

This bill would instead provide that this estimated cost may not exceed the value of a minor capital outlay project for which, pursuant to a prescribed provision of the State Contract Act, the services of the Department of General Services are not required and a state agency or department is authorized to carry out its own project.

(8) An existing provision of the California State University Contract Law prohibits the trustees from awarding annual contracts for repair or other repetitive work, or renovation or modification, on capital outlay projects where the total cost of the project exceeds \$250,000.

This bill would instead provide that this total cost may not exceed the value of a minor capital outlay project for which, pursuant to a prescribed provision of the State Contract Act, the services of the Department of General Services are not required and a state agency or department is authorized to carry out its own project.

(9) An existing provision of the California State University Contract Law requires the trustees to obtain specified financial information from prospective bidders for contracts estimated to exceed \$300,000.

This bill would raise that limit to \$400,000.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 220 (SB 164) Johannessen. California Veterans Board: operation.

(1) Existing law requires the board to report to the Legislature by August 1 of each year regarding the activities, accomplishments, and expenditures of the board during the preceding calendar year.

This bill would require the board to report to the Legislature by October 1 of each year, and in addition would require the report to be prepared in sufficient detail so that Members of the Legislature may clearly understand the activities, accomplishments, and expenditures of the board that occurred during the report period.

(2) Existing law provides that state agencies shall annually submit a budget to the Department of Finance setting forth proposed expenditures and estimated revenues for the ensuing fiscal year.

This bill would provide that the department shall, in its budget, separately state the budget for the board, which shall be expended as the board determines necessary.

(3) Existing law provides for the appointment of an executive officer by the board, with specified duties.

This bill requires the chairperson of the board, with the concurrence of a majority of the members of the board, to appoint the executive officer. The bill would also require the Department of Veterans Affairs to provide the board with adequate office and meeting space.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 221 (SB 612) Soto. Office of Adjutant General.

Existing law specifies the membership of the office of the Adjutant General.

This bill would specifically include an officer who may be of the rank of brigadier general who is the Deputy Adjutant General, Joint Staff Division, within that membership.

Ch. 222 (SB 738) Peace. Budget Act of 2000: Contingencies or emergencies.

The Budget Act of 2000 appropriated \$5,000,000 from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies or emergencies upon written authorization from the Director of Finance. The Budget Act of 2000 also appropriated \$2,500,000 for loans to state agencies for contingencies or emergencies.

This bill would appropriate \$528,772,000, as scheduled, in augmentation of these Budget Act appropriations. This bill would authorize the Director of Finance to withhold authorization for the expenditure of funds appropriated in the bill until preliminary estimates of potential deficiencies are verified.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 223 (SB 779) Karnette. Vehicles: preferential parking: school personnel.

Existing law authorizes a local authority by ordinance or resolution, to authorize preferential parking for members of organizations, professions, or other designated groups to park on specified streets if the local authority determines that the use of the permits will not adversely affect parking conditions for residents and merchants in the area.

This bill would specify that the category of persons eligible to be granted those permits includes school personnel.

Ch. 224 (SB 1192) Figueroa. Sex offender registration.

Existing law requires persons convicted of specified sex offenses to register with local law enforcement agencies upon their discharge, parole, or release from confinement and to update that registration annually or upon a change of residence address, and makes any willful violation of the registration requirements a crime. Existing law further requires every person required to register as a sex offender, who applies or accepts a position as an employee or volunteer with any person, group, or organization, where the registrant would be working directly and in an unaccompanied setting with minor children on more than an incidental and

occasional basis, or have supervision or disciplinary power over minor children, to disclose his or her status as a registered sex offender, as specified. Failure to comply with this requirement is a misdemeanor.

This bill would additionally prohibit a person who is required to register as a sex offender because of a conviction for a crime where the victim was a minor under 16 years of age, from serving as an employee or volunteer with any person, group, or organization, where the registrant would be working directly and in an unaccompanied setting with minor children, as specified. By creating a crime this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 225 (AB 553) Runner. Castaic Lake Water Agency.

(1) The Castaic Lake Water Agency Law creates the Castaic Lake Water Agency and requires the board of that agency to be comprised of 7 elected directors and 4 appointed directors that are nominated by specified retail water distributors.

This bill would require the term of office of a director appointed by a private water purveyor that is acquired by the agency to terminate at 12 o'clock noon on the first Monday after January 1 of the year following the acquisition, and would provide for the election of the successor to that director by agency voters at the statewide general election held in November of the even-numbered year following the acquisition. The bill would require the successor to hold that office for the term of 2 years and each director elected thereafter to that office to hold that office for the term of 4 years. The bill would provide for the abolishment of that office under prescribed circumstances. By imposing election-related responsibilities on the agency and other local officials, the bill would impose a state-mandated local program. The bill would make conforming changes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 226 (AB 678) Papan. Contractors.

Existing law prohibits any unlicensed contractor from bringing or maintaining an action to recover compensation in any court in this state.

This bill would authorize a person who utilizes an unlicensed contractor to bring an action in any court of competent jurisdiction in this state for recovery of compensation paid to the unlicensed contractor for performance of any act or contract.

Ch. 227 (AB 723) Vargas. Off-highway vehicles.

Existing law, the Off-Highway Motor Vehicle Recreation Act of 1988, provides for the acquisition, operation, and funding of state off-highway vehicular recreation areas and trails. Specified taxes imposed upon the distribution of motor vehicle fuel and certain fees, fines, forfeitures, and reimbursements are required to be deposited in the Off-Highway Vehicle Trust Fund for allocation, upon appropriation by the Legislature, by the Off-Highway Motor Vehicle Recreation Commission.

All of the above provisions in existing law are to be repealed on January 1, 2003.

This bill would extend that repeal date until January 1, 2007, and would similarly extend a January 1, 2003, repeal date, currently applicable to the collection and disposition of certain related fees, to January 1, 2007.

Ch. 228 (AB 832) Corbett. Health facilities: seismic safety.

Existing law requires the Office of Statewide Health and Planning and Development to allow any general acute care hospital facility that needs to relocate facilities on an interim

basis as part of its approval plan for compliance with the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983, flexibility in achieving compliance with, or in substantial satisfaction of, the objectives of specified building materials.

This bill would provide that the above compliance provisions relate only to specified provisions of the act.

The existing Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983 establishes, under the jurisdiction of the office, a program of seismic safety building standards for certain hospitals built on and after March 7, 1973. The existing act also requires owners of all general acute care hospitals to conduct seismic evaluations in accordance with specified criteria.

This bill would revise existing seismic evaluation criteria and would also provide that until January 1, 2008, all regulatory submissions to the California Building Standards Commission made by the office pursuant to specified provisions of the act are deemed, and shall be adopted as, emergency regulations.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 229 (AB 1194) Correa. Workers' compensation: physician assistants and nurse practitioners.

Existing law requires the physician first treating a workers' compensation claimant for injuries to submit a report ("Doctor's First Report of Occupational Injury or Illness") to the employer within 5 working days from the date of the initial examination.

This bill would, until January 1, 2006, authorize a physician assistant or nurse practitioner to cosign the Doctor's First Report of Occupational Injury or Illness and to authorize a workers' compensation claimant for injuries to receive time off from work for a period not to exceed 3 calendar days if that authority is included in standardized procedures or protocols. The bill would require the treating physician to sign the report and to make any determination of temporary disability.

Ch. 230 (AB 1278) Wayne. Health care decisions.

Existing law permits a person to authorize another to make certain decisions on their behalf pursuant to a power of attorney or pursuant to an advance health care directive, as specified.

This bill would exclude health care decisions from the authority of an attorney-in-fact under a general power of attorney. The bill would revise certain provisions with respect to the following: the duties and liabilities of an agent under a power of attorney for health care with respect to funeral decisions; the definition of "capacity" with respect to a person's ability to understand, make, and communicate decisions, including health care decisions; the person who may be designated to make health care decisions as an agent or surrogate; the authority of a surrogate, rather than an agent, to make health care decisions, if both have been designated; and the use of petitions in court to honor individual health care instructions or to enforce health care decisions by an agent or surrogate.

Ch. 231 (AB 1304) Rod Pacheco. Criminal procedure.

Under existing law, a defendant in a misdemeanor case may move for the return of property or to suppress as evidence any tangible or intangible thing obtained as a result of a search or seizure based on specified grounds. Under existing law, if the defendant's motion is denied, the defendant may appeal that decision. Existing statutory law does not specify whether the trial court has discretion to stay the trial pending disposition of the defendant's appeal, although case law has interpreted existing law to grant the trial court that discretion.

This bill would amend statutory law to specify that if a defendant in a misdemeanor case appeals denial of his or her motion for the return of property or to suppress evidence, the trial court has discretion to grant a stay of the trial pending disposition of the appeal.

Ch. 232 (AB 1517) Canciamilla. Public guardian.

Existing law provides that if any person domiciled in the county requires a guardian or conservator and there is no one else who is qualified and willing to act and whose

appointment as guardian or conservator would be in the best interest of the person, the public guardian may apply for appointment as guardian or conservator of the person, the estate, or the person and the estate, as specified. Existing law authorizes a public guardian who is authorized to take possession or control of property to issue a written certification of that fact. The written certification is effective for 5 days after the date of issuance.

This bill would make that certification effective for 15 days, rather than 5 days. The bill would specify the form of that certification.

Existing law requires that a guardian or conservator make a periodic accounting to the court for settlement and allowance and, as part of each of these accountings, submit copies of specified accounting statements from financial institutions in which estate money is deposited.

This bill would require guardians and conservators to file original account statements received from institutions, as defined, including account statements of their wards or conservatees, as part of the periodic accounts filed by the guardians or conservators with the court. The bill would require that certain personal information concerning the ward or conservatee be kept confidential.

Existing law authorizes a public guardian, upon receipt of a declaration from a peace officer indicating that an elder person is substantially unable to manage his or her financial resources or to resist fraud or undue influence, among other specified factors, to rely on that information and take immediate possession and control of the property of the elder person. Existing law authorizes the public guardian to issue a certification of that fact, as specified.

This bill would define the property of the elder person for these purposes as real or personal property belonging to the elder person, including any property that is held jointly between the elder person and a 3rd party that is subject to loss, injury, waste, or misappropriation. The bill would provide for a form entitled "Certificate of Authority" to be used by the public guardian when issuing this certification, would authorize the public guardian to deny use of, access to, or prohibit residency in, the home of the elder person, would require the public guardian to serve the elder person with a copy of the certification, and would provide that receipt of a certification constitutes sufficient acquittance to financial institutions and others in possession of an elder person's property to provide information and surrender property to the public guardian. The bill would provide that this certification is valid for 15 days after the date of issuance, and that the public guardian may seek additional certifications, as specified. The bill would make other conforming changes.

Ch. 233 (SB 85) Murray. Contracts: health studios.

Existing law regulates contracts for health studio services, defined to include contracts for instruction, training, or assistance in exercising, body building, and any other such physical skills. The law provides that the length of the term of these contracts may not exceed 3 years, nor may they require payments or financing over a period of more than 3 years.

This bill would prohibit a contract for health studio services from requiring payments or financing that exceed the term of the contract. This bill would also require a contract for health studio services to make specified disclosures about the length of the term of the contract.

Ch. 234 (SB 1224) Committee on Agriculture and Water Resources. Farmland conservancy.

Existing law, the California Farmland Conservancy Program Act, establishes a program for grants from the Department of Conservation to local governments and nonprofit organizations, subject to prescribed requirements and in accordance with procedures set forth in the act, for the acquisition of agricultural conservation easements, as defined, and for incidental costs. If a proposed agricultural conservation easement meets the eligibility criteria of the act, the department reviews the proposal based on selection criteria, which take

into consideration the amount of matching funds and in-kind services contributed by local governments.

This bill would expand the selection criteria to consider matching funds and in-kind services contributed by sources other than local governments.

Existing law establishes supplemental requirements, as specified, for contracts entered into by any state agency for the procurement of materials, supplies, equipment, and services.

This bill would exempt grant awards made pursuant to specified grant programs by the Department of Conservation from the requirements pertaining to public contracts.

Ch. 235 (AB 78) Alquist. Criminal procedure: evidence.

Existing law provides that, notwithstanding other limitations periods, a criminal complaint may be filed within one year of a report to a California law enforcement agency by a person under 18 years of age, that he or she was, while under 18 years of age, a victim of certain sex crimes if certain requirements are met.

This bill would provide in addition that, notwithstanding other limitations periods, a criminal complaint may be filed within one year of a report to a California law enforcement agency by a person under 21 years of age, that he or she was, while under 18 years of age, a victim of certain sex crimes if certain other limitations periods have expired, the crime involved substantial sexual conduct, and there is independent evidence corroborating the victim's allegation, as specified.

Ch. 236 (AB 488) Kehoe. Consumer credit reporting agencies: information: disclosure.

Existing law, operative July 1, 2001, governs the collection and disclosure of consumer credit reports. A consumer credit reporting agency must disclose the recipients of any consumer credit report regarding a consumer which the agency has furnished under specified circumstances. A consumer credit reporting agency must also make specified disclosures of, or provide notice regarding, information contained in a consumer credit report upon request of the consumer.

This bill, operative January 1, 2003, would require a consumer credit reporting agency to disclose, upon request of the consumer, the addresses and, if provided by the sources and recipients of the consumer's credit information, telephone numbers identified for customer services for the sources and recipients. This bill would exempt any consumer credit reporting agency that procures a credit report from another credit reporting agency for the purpose of reselling the report from requirements that they provide to the consumer upon request the address and telephone number of the source and recipient of the consumer credit information, and a record of specified inquiries not initiated by the consumer. This bill would also exempt any consumer credit reporting agency that provides a consumer credit report to another consumer credit reporting agency that procures the consumer credit report for the purpose of resale from requirements that they provide to the consumer upon request the address and telephone number of the prospective user of the consumer credit information.

Existing law also provides that any person who, for monetary fees, dues, or on a cooperative nonprofit basis, regularly engages in the practice of assembling, evaluating, or disseminating information on the checking account experiences of consumer customers is subject to the same laws that govern consumer credit reporting agencies.

This bill, operative January 1, 2003, would exclude this person from the proposed requirements upon consumer credit reporting agencies to provide the address and, if available, the phone number of sources and recipients of consumer credit information to the consumer upon request.

Ch. 237 (AB 369) Dutra. Affordable housing development projects.

Existing law requires local agencies to make specified findings before disapproving or conditionally approving certain housing development projects affordable to very low, low-,

or moderate-income households, as that term is defined, and authorizes a court to order compliance with that requirement.

This bill would delete the term “affordable” from those provisions and make the provisions applicable to housing for very low, low-, and moderate-income households. The bill would revise the provisions for enforcement to authorize the court to award specified costs and attorney fees.

Ch. 238 (AB 645) Horton. Property taxation: audits and equalization.

Existing property tax law requires the assessor to audit the books and records of a profession, trade, or business at least once every 4 years in the case of a taxpayer, engaged in a profession, trade, or business, who owns, claims, possesses, or controls locally assessable trade fixtures and business tangible property with a full value of at least \$400,000, and permits an audit of the personal property valued at less than \$400,000.

Existing law further provides, in the case of a mandatory audit of a taxpayer engaged in a profession, trade, or business, for specified procedures and conditions with respect to escape assessments and for certain duties on the part of the assessor.

This bill would apply these procedures, conditions, and duties to both mandatory and discretionary audits. By imposing new duties upon local agencies, this bill would impose a state-mandated local program. This bill would also make technical, conforming changes.

Existing property tax law generally requires, with respect to each assessment year, that an application for reduction in an assessment be filed within the period from July 2 to September 15, inclusive.

This bill would provide, for certain assesseees not receiving notice of their assessed value prior to August 1, that the application for reduction may be filed no later than November 30.

By requiring county boards of equalization to provide a higher level of service, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 239 (AB 1071) Canciamilla. County employee retirement benefits: cost-of-living adjustments.

Existing law provides that retirement and death allowances payable by a retirement system subject to the County Employees Retirement Law of 1937 shall be increased or decreased annually according to changes in a specified Consumer Price Index; however, those annual adjustments may not exceed a specified percentage and the percentage change in the index that exceeds that specified maximum is required to be accumulated and met by increases or decreases in allowances in future years, as specified.

This bill would modify the method for computing those accumulations, as specified. The bill’s provisions would be subject to adoption by the county board of supervisors and, upon adoption, would be applied to accumulations of retired members retroactively to the member’s date of retirement.

Ch. 240 (AB 1179) Calderon. Workers’ compensation: billing or utilization review procedures.

Existing law relating to workers’ compensation requires an employer to notify the treating physician of an injured worker within 30 days if the billing for services submitted by the physician is going to be contested, denied, or determined to be incomplete. Existing law also

requires that notice to state all additional information necessary for the employer to make a decision concerning the billing.

This bill would require any employer or insurer that employs an individual or contracts with an entity to conduct a review of a workers' compensation billing submitted by a physician or medical provider to provide that individual or entity with all documentation submitted by the physician or medical provider, along with a copy of the billing and any preauthorization for services. The bill would also prohibit the individual or entity conducting the review from altering the procedure codes billed or recommending reduction of a bill unless the submitted documentation has been reviewed by that individual or entity, and would require the reviewer to provide the physician or medical provider with certain information in that regard.

Ch. 241 (SB 34) Burton. Political Reform Act of 1974.

The Political Reform Act of 1974 was amended by Proposition 34, a legislative initiative amendment adopted by the voters at the November 7, 2000, statewide general election. The changes enacted by Proposition 34 became operative on January 1, 2001, with the exception of certain provisions pertaining to candidates for statewide elective office that become operative on or after November 6, 2002.

This bill would limit this exception to those provisions of Proposition 34 that impose limitations on campaign contributions to, and voluntary expenditures by, candidates and that require the inclusion of candidates who accept voluntary expenditure limits in the statewide ballot pamphlet, except as specified.

Existing law requires a candidate or committee that makes a defined late independent expenditure to report the expenditure within 24 hours of the time it is made.

This bill would provide that this requirement applies only to committees.

Existing law requires a statewide elected officer, including members of the Board of Equalization, to file the original and one copy of his or her campaign statement with the Secretary of State, 2 copies with the Registrar-Recorder of Los Angeles County, and 2 copies with the Registrar of Voters of the City and County of San Francisco.

This bill would instead require members of the State Board of Equalization to file the original and one copy with the Secretary of State and 2 copies with the clerk of the county with the largest number of registered voters in the district affected.

Existing law requires an individual who appears in an advertisement to support or oppose the qualification, passage, or defeat of a ballot measure and who has been paid or promised payment of \$5,000 or more for that appearance to disclose that payment or promised payment as prescribed by the Fair Political Practices Commission.

This bill would instead require a committee that makes an expenditure of \$5,000 or more to an individual for his or her appearance in an advertisement to support or oppose the qualification, passage or defeat of a ballot measure to file a report within 10 days of the expenditure. The bill would also require the report to identify the measure, the date of the expenditure, the name of the recipient, and the amount expended.

Existing law establishes certain limits on the amount of contributions that a person or group can make to a candidate for elective state office, or to a committee.

This bill would provide that the contribution limit applies to contributions made to a political party used for the purpose of making expenditures at the behest of a candidate for elective state office for communications to party members related to the candidate's candidacy for elective state office.

Existing law requires specified committees primarily formed to support one or more state ballot measures to file online or electronically with the Secretary of State, within 24 hours of receipt of a contribution of \$1,000 or more received during an election cycle, a report disclosing the receipt of the contribution.

This bill would apply this provision to specified committees primarily formed to oppose, as well as support, one or more state ballot measures. The bill would require these committees

to file online or electronically with the Secretary of State, within 10 business days of receipt of a contribution of \$5,000 or more received at any time other than during an election cycle, a report disclosing receipt of the contribution. The bill would also require specified candidates for elective state office to file online or electronically with the Secretary of State, within 10 business days of receipt of a contribution of \$5,000 or more received at any time other than during an election cycle, a report disclosing the receipt of the contribution.

Existing law provides that, for the purposes of contribution limits imposed by the Political Reform Act of 1974, payments for communications to an organization's members, employees, shareholders, or their family members, to support or oppose a candidate or ballot measure are not contributions or independent expenditures if not made for general public advertisements, such as broadcasting, billboards, or newspaper ads.

This bill would delete the exception of the above payments as independent expenditures. It would require that payments by a political party for communications to registered party members that would otherwise qualify as contributions be reported in accordance with provisions governing the filing of periodic campaign reports, and governing the filing of reports online or electronically with the Secretary of State.

Existing law authorizes a candidate for elective state office to raise contributions for a general election prior to the primary election for the same elective state office if the candidate sets aside these contributions and uses these contributions for the general election. Under existing law, if the candidate for elective state office is defeated in the primary election or otherwise withdraws from the general election, he or she is required to refund the general election funds to the contributors on a pro rata basis less any expenses associated with the raising and administration of general election contributions.

This bill would apply these provisions to special primary and special general elections, and would authorize candidates for elective state office to establish separate campaign contribution accounts for the primary and general elections or special primary and special general elections.

Existing law establishes specified contribution limitations with regard to candidates for elective state office and statewide elective office.

This bill would provide that if a candidate for elective state office or the candidate's controlled committee had net debts resulting from an election held prior to January 1, 2001, contributions to that candidate or committee for that election are not subject to specified contribution limitations.

Existing law requires specified committees that make independent expenditures of \$1,000 or more during an election cycle in connection with a candidate for elective state office to file online or electronically a report with the Secretary of State disclosing the making of the independent expenditure, within 24 hours of the time the independent expenditure is made. Existing law provides that an expenditure may not be considered independent, and shall be treated as a contribution from the person making the expenditure to the candidate on whose behalf, or for whose benefit, the expenditure is made, if the expenditure is made under specified circumstances.

This bill would include a committee that makes independent expenditures in connection with a state ballot measure in the online or electronic reporting requirement, and revise the circumstances under which an expenditure may not be considered independent for purposes of the provisions described above.

Existing law prohibits a controlled committee of a candidate from making independent expenditures and contributing funds to another committee for the purpose of making independent expenditures.

This bill would revise this provision to prohibit a controlled committee of a candidate from making independent expenditures and contributing funds to another committee for the purpose of making independent expenditures to support or oppose other candidates.

Existing law requires the Secretary of State and local election officers to designate in the ballot pamphlet those candidates for elective state office who have voluntarily agreed to specified expenditure limitations.

This bill would instead require the Secretary of State to designate in the state ballot pamphlet those candidates for statewide elective office who have voluntarily agreed to those expenditure limitations. The bill would also require local elections officers to designate in the voter information portion of the sample ballot those candidates for State Senate and Assembly who have voluntarily agreed to the expenditure limitations, thereby imposing a state-mandated local program.

Existing law authorizes a candidate for elective state office who accepts voluntary expenditure limits to purchase the space to place a statement in the ballot pamphlet that does not exceed 250 words.

This bill would instead authorize a candidate for statewide elective office who accepts specified voluntary expenditure limitations to purchase the space to place a statement in the state ballot pamphlet that does not exceed 250 words. This bill would prohibit the Secretary of State, on and after November 6, 2002, from including in the state ballot pamphlet a statement from any candidate who has not voluntarily agreed to specified expenditure limitations. This bill would also authorize a candidate for State Senate or Assembly who accepts specified voluntary expenditure limitations to purchase the space to place a statement in the voter information portion of the sample ballot that does not exceed 250 words.

Existing law requires a candidate or committee to return within 60 days any contribution of \$100 or more for which the candidate or committee does not have specified donor information on file.

This bill would require the return of the contribution not later than 60 days of receipt by the candidate or committee, and would clarify that a contribution may be returned after it has been reported under any provision of the act.

Existing law requires prescribed disclosure of a campaign contribution made to a committee on the condition that it be used to make a contribution to a particular candidate.

This bill would require that loans made to a committee for contribution to a particular candidate be disclosed as well.

Under existing law, a candidate may only accept contributions in accordance with specified provisions of law concerning campaign contribution and voluntary expenditure limitations, and all contributions deposited into the campaign account are deemed to be held in trust for the purposes set forth in those provisions of law.

This bill would instead provide that a candidate for elective state office may only accept contributions within the limits provided in those specified provisions of law concerning campaign contribution and voluntary expenditure limitations, and that all contributions deposited into the campaign account are deemed to be held in trust for expenses associated with the election of the candidate or for expenses associated with holding office.

This bill would make related changes.

Existing law makes a violation of the Political Reform Act of 1974 subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these criminal penalties on persons who violate the provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $2/3$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $2/3$ vote.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 242 (AB 68) Migden. Health care providers: private duty nursing agencies.

Existing law contains provisions governing the licensure of home health agencies, defined to include certain entities within the state that provide, or arrange for the provision of, skilled nursing services to persons in their temporary or permanent place of residence. Existing law provides for the administration of these provisions by the State Department of Health Services. A violation of these provisions or the rules and regulations promulgated under these provisions is a misdemeanor.

This bill would similarly provide for the licensure of private duty nursing agencies, defined to include certain entities within the state, that provide, or arrange for the provision of, private duty nursing services, as defined. The bill would make related changes in other programs concerning the provision of private duty nursing services.

This bill would make it a crime to violate the private duty nursing agency licensure provisions, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 243 (AB 192) Canciamilla. State bodies: open meetings.

(1) The Bagley-Keene Open Meeting Act requires, with specified exceptions, that all meetings of a state body be open and public and all persons be permitted to attend any meeting of a state body.

This bill would reorganize and recast the definition of "state body" for the purposes of the act. The bill would make conforming changes in this regard.

(2) The act defines the term "action taken" to mean, among other things, a collective decision made by members of a state body, but does not define the term "meeting." The act does not prohibit a state body from holding an open or closed meeting by teleconference if the convening at one location of a quorum of the state body is difficult or impossible, subject to specified conditions.

The bill would define "meeting" for the purposes of the act to include any congregation of a majority of the members of a state body at the same time and place to hear, discuss, or deliberate upon any item that is within the subject matter jurisdiction of the state body in which it presides.

This bill, with the exception of teleconferencing, would prohibit any use of direct communication, personal intermediaries, or technological devices employed by a majority of the members of the state body to develop a collective concurrence as to action to be taken on an item by the members of the state body. The bill would not prohibit a state body from holding an open or closed meeting by teleconference for the benefit of the public and state body provided the meeting or proceeding complies with all applicable requirements or law relating to a specific type of meeting or proceeding. The bill would require a state body electing to conduct a meeting or proceeding by teleconference to post agendas at all teleconference locations and to conduct teleconference meetings in a manner that protects the rights of any party or member of the public appearing before the state body.

(3) Existing law authorizes a state body to take action on items of business not appearing on the posted agenda under a determination by a vote of the state body that an emergency situation exists or that there exists a need to take immediate action and that the need for the immediate action came to the attention of the state body subsequent to the agenda being posted. The act specifies the manner in which notice of the additional item to be considered by the state body is to be posted.

This bill would require notice to be made available on the Internet as soon as is practicable after the decision to consider additional items at a meeting has been made.

Ch. 244 (AB 326) Dutra. Fire safety: roof covering materials.

Existing law prohibits the sale of wood roofing materials in the state on and after January 1, 2001, unless the materials have passed at least 5 years of a 10-year natural weathering test.

This bill instead would prohibit on July 1, 2002, the sale or application of wood roof covering materials in the state unless the materials have been approved and listed by the State Fire Marshal as complying with state law governing those materials and have passed at least 5 years of the 10-year natural weathering test.

Ch. 245 (AB 405) Salinas. Transportation funding: Amtrak: bus feeder service: exemptions.

Existing law prohibits the Department of Transportation from providing funding to Amtrak for the purpose of entering into a contract with a motor carrier of passengers for the intercity transportation of passengers by motor carrier over regular routes unless prescribed conditions are met, including a requirement that service be provided only for passengers on trips where the passengers have had prior movement by rail or will have subsequent movement by rail, evidenced by a combination rail and bus one-way or roundtrip ticket. Existing law exempts from the requirement, until a specified date, service provided for disabled passengers who rely substantially on the use of wheelchairs and travel by motor carrier over any regular route that operates on a particular portion of State Highway Route 17.

This bill would expand the exemption to apply to service provided for disabled passengers who rely substantially on the use of wheelchairs and travel by motor carrier over any regular route that operates on the portion of the Capitol Corridor route between San Jose and Monterey County, including specific rail service between San Jose and Salinas and specific rail service between San Jose and California State University, Monterey Bay.

The bill would require the department to encourage certain transportation entities to develop and execute a memorandum of understanding that addresses long-term solutions to the transportation needs of passengers traveling by bus on the specified route.

The bill would provide that its provisions shall remain in effect only until January 1, 2004, or until all motor carriers of passengers that operate regular service on the specified route operate only vehicles that are fully accessible to disabled passengers who rely substantially on the use of wheelchairs on that route, whichever occurs first.

Ch. 246 (AB 480) Robert Pacheco. Cancer.

Under existing law, the State Department of Health Services is responsible for the administration and oversight of various health care programs.

Existing law establishes the Cancer Research Fund in the State Treasury, and provides that the moneys in the fund shall be available for expenditure by the department. Existing law also provides that it is the intent of the Legislature that after the initial appropriation to the fund, that the fund be enhanced by annual allocations as determined in subsequent budget acts.

This bill would provide that the fund consist of money accepted by the department from grants and donations from private entities and of public moneys transferred to the fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 247 (AB 656) Chan. Health facilities: seismic safety requirements.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983, after January 1, 2008, general acute care hospital buildings that are determined to pose certain risks are required to be improved or only used for nonacute care hospital service, and after January 1, 2030, all acute care inpatient hospital buildings that are not in substantial compliance with certain seismic safety regulations and standards developed by the Office of Statewide Health Planning and Development are required to be demolished, replaced, or changed to nonacute use or seismically retrofitted so that they are in substantial compliance.

Existing law authorizes any hospital, with regard to a general acute care hospital building located in Seismic Zone 3, to request an exemption from Non-structural Performance Category-3 requirements provided by regulation, if the hospital building complies with certain year 2002 nonstructural requirements provided by regulation.

This bill would authorize, for a county-owned general acute care hospital building, an extension of the Non-structural Performance Category-2 requirements provided by regulation if the county complies with certain conditions, and specifically would authorize such a building to receive a one-year extension of the January 1, 2002, deadline for Non-structural Performance Category-2 requirements if the existing hospital building is removed from general acute care service and the construction of a specified replacement building is completed by January 1, 2003.

Ch. 248 (AB 659) Correa. Inmates.

Existing law provides that, while in jail, persons committed on criminal process and detained for trial may be kept or put in the same room with persons convicted and under sentence, for specified purposes.

This bill would, in addition, require inmates classified as sexually violent predators to be administratively segregated in jail, and provide that those persons may waive administrative segregation, as specified.

Ch. 249 (AB 668) Chan. California Dentist Loan Forgiveness Program.

Existing law requires the Office of Statewide Health Planning and Development to perform various functions and duties with respect to health policy and planning and health professions development, including administering the federal National Health Service Corps State Loan Repayment Program.

Under the existing program, federal funds are provided to states for the purpose of repaying qualifying educational loans of specified health care professionals who commit to provide full-time primary medical care or dental services for at least 2 and up to 4 years, at practice sites in designated Health Professional Shortage Areas. Under the existing program, the practice site is also responsible for repaying a portion of the health care professional's outstanding loan amount.

This bill would require the office to report to the Legislature on or before June 30, 2002, on the feasibility of establishing a California dental loan forgiveness program.

Ch. 250 (AB 722) Corbett. Educational counseling.

Existing law authorizes the governing board of any school district to provide a comprehensive educational counseling program for all pupils enrolled in the schools of the district.

This bill would require the State Department of Education to conduct a study of pupil support, defined to include school counselors, school psychologists, and school social workers, in the schools, as specified. The bill would require the State Department of Education to report the results of the study to the Governor and the Legislature by January 1, 2003. The bill would appropriate \$125,000 from the General Fund to the State Department of Education to conduct the study.

Ch. 251 (AB 1123) Committee on Revenue and Taxation. Taxation: sales and use taxes: transactions taxes: special taxes and fees.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The State Board of Equalization collects and administers a variety of tax and fee programs with respect to matters including, but not limited to, vehicle fuels, timber, cigarettes and tobacco products, alcoholic beverages, emergency telephone services, integrated waste management, oil spills, hazardous materials, underground storage systems, and private railroad cars.

This bill would make technical, nonsubstantive changes to the provisions under which the board administers these tax programs.

Existing law requires certain taxes administered by the State Board of Equalization to be paid by electronic transmission when the tax liability meets a specified threshold, and allows payment by electronic transmission if the tax liability is below that threshold.

This bill extends the electronic transmission requirements to payments of the motor vehicle fuel tax.

This bill would incorporate additional changes to Section 25205.6 of the Health and Safety Code, proposed by AB 664, to be operative only if AB 664 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

This bill would incorporate additional changes to Section 7657 of the Revenue and Taxation Code, proposed by AB 309, to be operative only if AB 309 and this bill are both chaptered and become operative on or before January 1, 2002, and this bill is chaptered last.

Ch. 252 (AB 1177) Calderon. Workers' compensation: official medical fee schedule.

Existing law provides for administration of the workers' compensation system by the Director of the Division of Workers' Compensation of the Department of Industrial Relations, who is referred to as the administrative director.

This bill would authorize a health care provider or licensed health facility and a contracting agent, employer, or carrier to contract for reimbursement rates that are different from the official medical fee schedule. The bill would provide that the December 31, 2001 termination date contained in the California Code of Regulations for specified regulations be extended until new regulations on the medical fee schedule adopted by the administrative director become effective.

Ch. 253 (AB 1193) Steinberg. Insurers: hate crimes: cancellation or refusal to renew.

(1) Existing law provides for the regulation of insurers by the Insurance Commissioner. Existing law imposes various limitations on insurers relative to cancellation or nonrenewal of policies protecting against certain residential, liability, and commercial risks.

This bill would provide that an insurer issuing policies protecting against certain residential, liability, and commercial risks may not cancel or refuse to renew a policy solely on the basis that one or more claims have been made against the policy during the preceding 60 months for a loss that is the result of a hate crime committed against the person or property of an insured, if the insured is a religious or educational organization or other nonprofit organization organized and operated for religious, charitable, or educational purposes. This bill would authorize a law enforcement agency, using specified guidelines, to determine if the action in question was a hate crime. This bill would require an insurer to report to the commissioner the cancellation or nonrenewal of a policy subject to these provisions after an insured has submitted a claim to the insurer that is the result of a hate crime.

(2) Existing law provides that certain actions are defined as unfair methods of competition and unfair and deceptive acts or practices in the business of insurance, and specifies certain penalties and powers of the commissioner in this regard.

This bill would provide that a violation of the bill's requirements would be subject to these provisions.

Ch. 254 (AB 1217) Briggs. Gambling establishments.

Existing law permits the California Gambling Control Commission to make a list of persons who licensees are to exclude or eject from their gambling establishments. Existing law also permits a licensee to exclude various persons, as specified, from their licensed premises.

This bill would grant immunity from civil liability for a mistake as to the grounds for ejecting or excluding a person to gambling establishments that exclude or eject an individual from their premises, if the ejection or exclusion was based on a reasonable and good faith belief, after a reasonable investigation, that they may do so under the law. The bill would provide, however, that a gambling establishment shall not be relieved from liability for any damages arising from the means of ejection or exclusion.

Ch. 255 (AB 1537) Horton. Unemployment insurance: Indian tribes.

The Federal Unemployment Tax Act provides that services performed in the employ of state and local governments are excluded from the definition of employment for purposes of the federal act. Those entities are subject to California's unemployment insurance laws. Recent changes in federal law treat Indian tribes in the same manner as state and local governments.

This bill would revise and recast various provisions of the state unemployment insurance law with regard to Indian tribes in order to meet federal funding requirements contained in the Federal Unemployment Tax Act. The bill would provide that its provisions shall have a retroactive effect from December 21, 2000, the effective date of the changes in federal law.

Ch. 256 (AB 1608) Committee on Agriculture. Plant quarantine and pest control.

Existing law authorizes the Department of Food and Agriculture to provide, upon request, nonregulatory accreditation, analytical certification, diagnostic, inspection, quality assurance, testing, and other nonregulatory services relating to nursery stock, plants, seed, or other plant pest and diseases on a charge-for-service basis, or to accredit private persons or business entities to perform those services and adopt regulations to establish accreditation criteria.

The bill would require each governmental agency within the state that governs and conducts activities related to plant quarantine or conducts a program to control the pests or diseases of nursery stock, plants, or seed to accept the test results of any laboratory accredited as being valid, unless the agency establishes specific criteria and standards for rejecting those results prior to the rejection and provides written justification to the state accrediting entity and the laboratory stating the reasons the laboratory results do not meet the quarantine or disease or pest control program requirements under the jurisdiction of the agency.

This bill would also require any agency wishing to reject the accreditation of any laboratory or the test results of any laboratory accredited under this section to first obtain approval from the Secretary of Food and Agriculture, in writing.

Ch. 257 (AB 1709) Migden. Animals: mischievous: great bodily injury.

Existing law makes it a felony for any owner of a mischievous animal, knowing its propensities, to willfully suffer the animal to go at large, or to keep the animal without ordinary care, if the animal, while at large or not kept with ordinary care, kills any human being who has taken all the precautions which the circumstances permitted, or which a reasonable person would ordinarily take in the same situation.

This bill would revise the above provision to also make subject to its proscription any person having custody or control of a mischievous animal, and would, in addition, make it a misdemeanor or a felony if the mischievous animal causes serious bodily injury to any human being who has taken all the precautions which the circumstances permitted, or which a reasonable person would ordinarily take in the same situation. Because the bill increases the scope of an existing crime with respect to the perpetrator and what is perpetrated, and

because it increases the duties of local animal control officers with respect to mischievous animals, it would impose a state-mandated local program upon local governments.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 258 (AB 1738) Committee on Budget. Judgments and settlement claims against the state: appropriation.

Existing law requires the Attorney General to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state.

This bill would appropriate \$9,232,611.98 from the General Fund to the Attorney General to pay judgments and settlement claims in accordance with a specified schedule.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 259 (AB 132) Horton. Meyers-Milias-Brown Act: agency shop agreements.

The Meyers-Milias-Brown Act authorizes a local public agency and a recognized employee organization that has been recognized as the exclusive or majority bargaining agent to negotiate an agency shop agreement. Under the act, an agency shop arrangement is required to be placed in effect, without a negotiated agreement, upon (1) a signed petition of 30% of the employees of the applicable bargaining unit requesting an agency shop agreement and an election to implement an agency fee arrangement, and (2) the approval of a majority of employees who cast ballots in a secret ballot election in favor of the agency shop arrangement. Existing law provides that the petition may only be filed after good faith negotiations, not to exceed 30 days, have taken place between the parties in an effort to reach agreement.

This bill would permit the petition to be filed only after the recognized employee organization has requested the public agency to negotiate on an agency shop arrangement and, beginning 7 working days after the public agency received the request, the two parties have had 30 calendar days to attempt good faith negotiations in an effort to reach agreement.

Ch. 260 (AB 449) Firebaugh. Classified school employees: leaves of absence: service credit.

Under existing law, classified employees of schools and community colleges are school members of the Public Employees' Retirement System. Service retirement benefits for those members are based, in part, upon years of service credit, as defined. Certain provisions of existing law provide that classified employees of schools and community colleges shall receive service credit for periods of time during which they are on an approved leave of absence to serve as an elected officer of an employee organization, up to a maximum of 8 years, subject to specified conditions.

This bill would increase the maximum amount of service credit under those provisions to 12 years.

Ch. 261 (AB 587) Firebaugh. Civil rights.

Existing law provides that all persons in this state shall have full and equal access to the facilities, privileges, and services of business establishments of all kinds without regard to sex, race, color, religion, ancestry, national origin, disability, or medical condition. Existing

NOTE: Superior numbers appear as a separate section at the end of the digests.

law further prohibits a business establishment from, among other things, boycotting, blacklisting, refusing to contract with, sell to, or trade with a person based on the criteria described above, and from discriminating on the price charged for similar or like services on the basis of a person's gender. A person who contravenes these provisions is liable for actual damages and any additional amount determined by a jury or the court up to a maximum of 3 times the amount of actual damages but not less than \$1,000.

This bill would increase the minimum additional amount that may be awarded in the cases described above to \$4,000.

Existing law provides that if a person or persons, whether or not acting under color of law, interferes by threats, intimidation, or coercion, or attempts to interfere by threats, intimidation, or coercion, with the exercise or enjoyment by any individual or individuals of rights secured by the Constitution or laws of the United States, or of the rights secured by the Constitution or laws of this state, the Attorney General, any district attorney, or any city attorney may bring a civil action for injunctive and other appropriate equitable relief in the name of the people of the State of California, in order to protect the peaceable exercise or enjoyment of the right or rights secured.

This bill would specify that in an action brought by the Attorney General, any district attorney, or any city attorney, the Attorney General, or any district attorney or city attorney, may seek a civil penalty of \$25,000. This bill would also specify that if this civil penalty is requested, it shall be assessed individually against each person who is determined to have violated the right or rights of any individual or individuals secured by law and the penalty shall be awarded to each individual whose right or rights are determined to have been violated.

Ch. 262 (AB 826) Cohn. Pharmaceutical practice: prescriptions.

Under existing law, a pharmacist may authorize initiation of a prescription and provide clinical advice or information or patient consultation from outside a pharmacy premises if certain conditions are met, and may adjust the drug regimen of a patient for care provided by specified facilities. Existing law makes a knowing violation of the Pharmacy Law a crime.

This bill would, with respect to the requirements for initiation of prescriptions and providing clinical advice or information or patient consultation, delete the restriction that the transaction occur outside of a pharmacy premises. The bill would require that a pharmacist's initiation of a prescription be pursuant to specified provisions.

This bill would revise the requirement for the providing of clinical advice, information, or client consultation to specify that the advice, information, or consultation be provided to a health care professional or a patient. The bill would also authorize a pharmacist to initiate the drug regimen of a patient in specified facilities pursuant to a written order or authorization by the patient's prescriber and would require the pharmacist to provide written or electronic notification of that action.

This bill would incorporate additional changes in Section 4052 of the Business and Professions Code proposed by SB 1169, to be operative only if SB 1169 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

This bill would impose a state-mandated local program by changing existing crimes and creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 263 (AB 863) Thomson. Transactions and use tax: City of West Sacramento.

Existing law authorizes various local governmental entities, subject to certain limitations and approval requirements, to levy transactions and use taxes in accordance with the procedures and requirements set forth in the Transactions and Use Tax Law.

This bill would additionally authorize the City of West Sacramento, subject to the approval of $\frac{2}{3}$ or a majority of the voters voting on the issue at an election, to levy a tax pursuant to the Transactions and Use Tax Law at a rate of 0.25% or 0.5%.

This bill would make legislative findings and declarations as to the necessity of a special statute.

Ch. 264 (AB 1048) Frommer. Securities.

The Corporate Securities Law of 1968 provides for the licensing of agents and broker-dealers and the registration of investment advisers and investment adviser representatives by the Department of Corporations, subject to certain exceptions. Existing law requires these persons to pay certain fees and assessments to the department.

This bill would delete a provision that exempts from certification requirements a licensed broker-dealer who acts as an investment adviser. The bill would require the Commissioner of Corporations to make certain information concerning investment advisers that is in the possession of the commissioner available to the public on request. The bill would revise various fee provisions and would make other related changes.

Existing law prohibits a state or local public agency from asking or requiring an applicant for a license, certificate, or registration to reveal a record of arrest that did not result in a conviction or plea of nolo contendere.

This bill would provide that this prohibition is not applicable to the department relative to persons regulated by the department when using a national, uniform application that is required by the Securities and Exchange Commission and other entities for participation in certain national registration depositories. The bill would authorize the department to participate in those depositories.

Existing law prohibits the Commissioner of Corporations and his or her assistants, clerks, or deputies from having certain interests in entities regulated by the department. Existing law authorizes the holding or purchasing of securities by these public officials under certain conditions.

This bill would revise the provisions governing the holding or purchasing of securities by the commissioner, as specified.

Existing law requires that the Department of Corporations' administration be supported from the State Corporations Fund.

This bill would instead require that the administration and enforcement of, and the education of the public relative to, the laws and programs of the department be supported from the fund.

Ch. 265 (AB 1060) Negrete McLeod. Department of Veterans Affairs: homeless veterans.

Under existing law, the Department of Veterans Affairs has various functions relating to the well-being of veterans.

This bill would require the department, in collaboration with the State Department of Health Services, to study the status of homeless veterans in California and to establish a proposal on how to provide adequate housing for California's homeless veterans. On or before March 15, 2002, the department shall report the findings of the study to the Legislature and the Governor.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 266 (AB 1370) Wiggins. Tax forms: taxpayers 65 or older: study: property tax assistance.

Existing income tax laws require the use of various tax forms.

This bill would require the Franchise Tax Board to conduct a study of those forms relative to taxpayers who are 65 years of age or older, and to make a report on the results of that study to the Legislature, as provided.

The Gonsalves-Deukmejian-Petris Senior Citizens Property Tax Assistance Law provides for payment of assistance by the Franchise Tax Board to claimants, whether those claimants own or rent their residences, in accordance with schedules that reduce the amount of assistance provided as the amount of a claimant's household income increases along a specified scale of household income amounts. The amount of assistance for a claimant owning his or her residential dwelling is a specified percentage, based on household income, of tax on the first \$34,000 of full value. The amount of assistance for a claimant renting his or her residence is a specified percentage, based on household income, of the statutory property tax equivalent of \$250. For the 2001 calendar year and each year thereafter, the household figures used to calculate the assistance payments were to be increased by 45%.

This bill would eliminate the provisions increasing the household income figures used to calculate the assistance payments by 45% and would instead increase the property tax assistance payments by 45% for the 2001 calendar year and each calendar year thereafter.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 267 (AB 1442) Pescetti. Contract specifications: substitutions.

Existing law provides that a state agency, political subdivision, municipal corporation, district, or public officer responsible for letting public works contracts may not draft bid specifications in a manner that limits the bidding to any one concern or product, except under certain circumstances. Specification of a certain product is allowed if the specification lists at least 2 brands or trade names of comparable quality and is followed by the words "or equal" so that bidders may furnish any equal products.

This bill would revise these provisions so that the restrictions on the manner of drafting bid specifications would not apply if an awarding authority, either state or local, makes a finding that a particular material or service is designated by a brand name, either to make a field test or to match a material or service in use on a particular public improvement.

Existing law governing state agencies provides that if no time period is specified for submission of data substantiating a request for a substitution of "an equal" item, data may be submitted for 35 days after the award of the contract.

The bill would also make this provision applicable to local governments.

Ch. 268 (AB 1499) Negrete McLeod. Teachers: Teaching As A Priority Block Grant.

Existing law establishes the Teaching As A Priority Block Grant to be administered by the State Department of Education with the approval of the State Board of Education for the purpose of awarding block grants to school districts on a competitive basis to provide incentives to attract credentialed teachers to be employed and retained in low-performing schools. Block grant funds may be used at the discretion of a school district for teacher recruitment and retention incentives, with the target of reducing the number of teachers on emergency permits. Incentives may include signing bonuses, improved work conditions, teacher compensation, and housing subsidies.

This bill would authorize a school district receiving block grant funds to offer incentives to recruit and retain credentialed teachers interested in attaining cross-cultural, language, and academic development certification (CLAD) or bilingual, cross-cultural, language, and academic development certification (BCLAD). The bill would authorize incentives to include stipends to cover the costs of examinations necessary to attain CLAD or BCLAD certification and coursework necessary for preparation programs offering CLAD and BCLAD emphasis.

Ch. 269 (SB 57) Scott. Teacher credentialing.

(1) Existing law requires the Commission on Teacher Credentialing to ensure that each candidate for a teaching credential has demonstrated ability and sets forth programs for professional preparation that satisfy this requirement.

This bill would require the commission to waive components of these requirements for individuals meeting prescribed criteria regarding private school teaching experience.

(2) Existing law, the Teacher Education Internship Act of 1967, authorizes school districts, in cooperation with an approved college or university, to establish teacher education internship programs. Existing law also authorizes school districts, in consultation with an approved program of pedagogical teacher preparation to employ persons authorized by the Commission on Teacher Credentialing to provide service as district interns and requires these school districts to develop and implement a professional development plan for district interns.

This bill would authorize an intern to choose an early program completion option if the intern passes certain assessments and meets the requirements for teacher fitness.

Ch. 270 (SB 128) Burton. Trial court: employees.

Existing law establishes a trial court employee personnel system, as specified, governing, among other things, the authority to hire trial court personnel, and to regulate their classification and compensation, labor relations, personnel selections and advancement, employment protection, retirement, and personnel files.

This bill would make various technical and clarifying changes in these provisions. The bill would also require specified agency shop elections to be conducted by the Division of Conciliation of the Department of Industrial Relations if the parties fail to select a neutral person or entity to conduct the election within 10 days of the election petition. The bill would specify, as to an agency fee agreement other than in an agreement that is in effect on January 1, 2002, the recognized employee organization shall hold the court harmless and defend and indemnify the court, as specified.

The bill would provide for specified procedures for the release of budget and management information by the trial courts and the Judicial Council, including a hearing and appeal process.

Ch. 271 (SB 148) Oller. Preston Castle: lease and transfer of ownership.

Existing law authorizes the Director of General Services, with the consent of the state agency concerned, to let for a period not to exceed 5 years, any real or personal property that belongs to the state, if the director deems the letting to be in the best interest of the state.

This bill would direct the director to lease upon terms and conditions deemed in the best interest of the state, any or all of the Preston Castle portion of the Ione Youth Facility as agreed to and designated by the Department of the Youth Authority. The bill would require the Preston Castle portion of the Ione Youth Facility to be let in its "as is" condition and to be let for a term not to exceed 55 years for consideration of \$1 per year to the Preston Castle Foundation for specified uses. The bill would permit the director under specified conditions to transfer ownership and control of the Preston Castle at any time during the lease to the foundation at no cost.

Ch. 272 (SB 162) Committee on Local Government. Validations.

This bill would enact the Second Validating Act of 2001, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 273 (SB 163) Committee on Local Government. Validations.

This bill would enact the Third Validating Act of 2001, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

Ch. 274 (SB 215) Burton. California Peace Officer Memorial Foundation: contributions: income tax return.

Under existing law regulating the administration of personal income taxes and bank and corporation taxes, individual taxpayers are allowed to contribute amounts in excess of their tax liability for the support of specified funds or accounts, including, among others, the California Peace Officer Memorial Foundation.

Existing law provides that all money transferred to the California Peace Officer Memorial Foundation Fund shall, upon appropriation by the Legislature, be allocated, after reimbursement to the Franchise Tax Board and the Controller for their costs, to the California Peace Officer Memorial Commission for building and maintaining the California Peace Officer Memorial.

This bill instead would require that moneys appropriated from the fund, after reimbursement to the Franchise Tax Board and the Controller, be allocated to the California Department of the Highway Patrol for allocation to the California Peace Officer Memorial Commission. The bill would also appropriate money transferred to the fund prior to the enactment of this bill in the same manner.

This bill would also require the California Peace Officer Memorial Commission to report to the Legislature on or before December 31, 2003, in accordance with either of certain specified procedures.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 275 (SB 313) Alpert. Highway tolls: transit service: program.

Existing law authorizes the San Diego Association of Governments (SANDAG), in cooperation with the Department of Transportation, to conduct a demonstration program pursuant to which single-occupant vehicles are allowed to use the high-occupancy vehicle (HOV) lane on a specified portion of the Interstate Highway Route 15 (I-15) for a fee. Existing law requires the department to annually audit the level of operating services during peak traffic hours. Existing law requires SANDAG to submit a report to the Legislature and repeals all of these provisions on January 1, 2002.

This bill would delete reference to "demonstration," would delete the requirement that SANDAG report to the Legislature, would delete certain obsolete provisions, and would delete the repeal date, thereby continuing the program indefinitely.

The bill would require the department to report the audit results at meetings of the program management team and would require program agreements to be consistent with agreements between the department and the United States Department of Transportation.

Ch. 276 (SB 344) Ortiz. Health care data reporting.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

This bill would require the State Department of Health Services to place on its Internet Web site, in a format that may be easily understood by the general public, certain data relating to program enrollment and other program data.

Ch. 277 (SB 454) Committee on Insurance. Insurance.

Existing law defines disability insurance to include insurance appertaining to injury, disablement, or death resulting from accidents or sickness.

This bill would define the term "health insurance" as a disability insurance policy that provides coverage for hospital, medical, or surgical benefits but does not include certain kinds of insurance. The bill would also make a related change.

Existing law authorizes secret fraternal societies meeting certain requirements to form insurers by association of their members. Existing law authorizes the association to insure against a specified list of losses, including vandalism or malicious mischief, ice, snow, and freezing, and collapse.

This bill would add to the list of insured losses burglary and theft and mysterious disappearance.

Ch. 278 (SB 477) Costa. Parks and recreation: California SNO-PARK program.

Existing law establishes the California SNO-PARK program, whereby winter recreationists purchase a windshield sticker that allows them to park in any of the roadside parking areas to be established and plowed for that purpose. Existing law requires the Department of Parks and Recreation, after consultation with the State Parks and Recreation Commission, the Department of Transportation, the Department of the California Highway Patrol, the appropriate boards of supervisors, and any local public or private persons owning lands adjacent to each site, to designate winter recreation parking locations throughout the state and include the sites as an element of the California outdoor recreation plan.

This bill would require the Director of Parks and Recreation to appoint a committee, which shall be known as, the "Winter Recreation Committee," to advise the director on the location of designated parking areas, and would authorize the department to enter into long-range agreements for the utilization of private and public lands for the program.

Existing law authorizes the department to contract directly for snow removal, provision of sanitary facilities, and other services.

This bill would authorize the department to contract with the appropriate public and private entities for those services and would additionally authorize the department to contract for signage, trash removal, and parking lot repairs. The bill would also authorize the department to contract with appropriate agencies for law enforcement.

Existing law requires that proceeds from the sale of SNO-PARK parking permits be paid to the State Treasury, to the credit of the Winter Recreation Fund, and requires that moneys in the fund be allocated, when appropriated, for specified purposes, including, among other things, snow removal, administrative costs, the acquisition, lease, development, and maintenance of additional designated parking areas, and for grants to counties for the actual and necessary costs incurred in the removal of snow from designated parking areas.

This bill would additionally permit the expenditure of moneys from the fund to inform and educate the public about the program.

Ch. 279 (SB 624) Soto. Vehicles: garbage: cover.

(1) Existing law prohibits a vehicle loaded with garbage, swill, cans, bottles, wastepapers, ashes, refuse, trash, or rubbish, or any other noisome, nauseous, or offensive matter, or anything being transported to a dumpsite for disposal from being driven or moved upon any highway unless the load is totally covered, as specified.

This bill would recast this prohibition to prohibit a vehicle from transporting, rather than prohibiting a vehicle loaded with, the materials specified above, and would include waste cardboard as one of the materials that would be required to be totally covered while being transported. The bill would also include transporting the matter for recycling, and would delete reference to a dumpsite. The bill would provide that vehicles transporting wastepaper, waste cardboard, or used cans or bottles, are in compliance with these provisions if appropriate binders including, but not limited to, bands, wires, straps, or netting are used to prevent the load, or any part of the load, from spilling or falling from the vehicle. The bill would exempt any vehicle transporting wet waste fruit or vegetable matter, or waste products to or from a food processing establishment, from application of its provisions.

Because this bill would expand the scope of an existing crime, it would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 280 (SB 655) Machado. Transportation: transit districts: property acquisition.

Existing law authorizes the Sacramento Regional Transit District to take by gift, or take or convey by grant, purchase, devise, or lease, and hold and enjoy, real and personal property of every kind within or without the district necessary to the full or convenient exercise of the district's powers.

This bill would authorize those powers for the district, with regard to real and personal property of every kind within the district, as necessary for, incidental to, or convenient for, transit-oriented joint development projects, as defined, that are consistent with the general plan, any applicable specific plan, any applicable transit village plan, and the land-use and development ordinances of the city or county in which the project is located.

The bill would prohibit the district from exercising its power of eminent domain in order to make an acquisition related to transit-oriented joint development projects.

The bill would require the district, prior to exercising the authority granted under the bill, to prepare, and adopt at a public hearing, written policies and procedures implementing the provisions of the bill. The bill would require the district to invite public comment during the preparation and adoption of the specified policies and procedures.

The bill would specify that the provisions of the bill apply only to acquisitions related to transit-oriented joint development projects and do not expand the district's existing powers.

Ch. 281 (SB 781) Knight. Veterans' homes.

Existing law provides for the establishment and operation of the Veterans' Home of California at various sites for aged and disabled veterans who meet certain eligibility criteria.

This bill would authorize the Department of Veterans Affairs to accept and process applications from veterans who are seeking residency at a home, beginning on the start date of construction of that particular home.

Ch. 282 (SB 923) McPherson. Bribery: punishment.

Existing law makes it a crime punishable by imprisonment in the state prison for 2, 3, or 4 years for any executive or ministerial officer, employee or appointee of the State of California, county or city or political subdivision of this state or any member of either of the houses composing the Legislature of this state or any judicial officer, juror, referee, arbitrator, or umpire, and any person authorized by law to hear or determine any question or controversy to ask, receive, or agree to receive, any bribe under specified circumstances.

This bill would include in this punishment, in cases in which no bribe has been actually received, a restitution fine of not less than \$2,000 or not more than \$10,000 or, in cases in which a bribe was actually received, a restitution fine of at least the actual amount of the bribe received or \$2,000, whichever is greater, or any larger amount of not more than double the amount of any bribe received or \$10,000, whichever is greater. In each case, the bill would require the court to consider the defendant's ability to pay the restitution fine.

Ch. 283 (SB 933) Margett. Veterans' home: eligibility.

Existing law provides for the establishment and operation of the Veterans' Home of California for aged and disabled veterans, eligible for hospitalization or domiciliary care in a veterans' facility in accordance with the rules and regulations of the United States Department of Veterans Affairs, and for spouses of these persons if specified conditions are met. The home is under the management and control of the Department of Veterans Affairs.

This bill would give priority to recipients of the Medal of Honor for eligibility for residence in the Veterans' Home of California, and would make widows and widowers of Medal of Honor recipients eligible for residency.

Ch. 284 (SB 1065) Perata. Highways: trees and shrubs.

(1) The Outdoor Advertising Act prohibits an advertising display from being placed or maintained in certain conditions. A violation of these provisions is grounds for the removal of the display and is a crime.

This bill would make it a violation of that act for the owner of a display or anyone acting on the owner's behalf to remove, cut, cut down, injure, or destroy, without a permit issued by the department any tree, shrub, plant, or flower growing on property owned by the Department of Transportation if that conduct is undertaken in order to enhance the display's visibility, thereby creating grounds for the removal of the display. Because this would also expand the scope of an existing crime, the bill would impose a state-mandated local program.

(2) Existing law provides a penalty of \$100 for each tree damaged on any state highway and allows for the collection of the costs and expenses incurred in a court action brought against a person who willfully and maliciously digs up, cuts down, destroys, or otherwise injures any shade or ornamental tree on any state highway.

This bill would recast this provision by additionally prohibiting a person from pruning or trimming any tree or shrub on any state highway without a permit issued by the department. The bill would increase the penalty as to a damaged tree to \$10,000 and to \$1,000 as to a damaged shrub; and the bill would allow the department to recover attorney and expert witness fees and the amount of actual damages to any tree or shrub.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 285 (SB 1187) Costa. Local transactions and use taxes: Fresno zoo.

Existing law authorizes various local entities to impose local transactions and use taxes for various purposes.

This bill would authorize the Board of Supervisors of the County of Fresno to establish an authority for zoological purposes in that county. This bill would authorize any authority that is so established to impose a transactions and use tax at a rate of 0.1%, if the tax is proposed by an ordinance that is approved by $\frac{2}{3}$ of the governing body of that authority, and by $\frac{2}{3}$ of the voters of the county voting on that ordinance.

This bill would make legislative findings and declarations as to the necessity for a special statute.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 286 (SB 78) Kuehl. Premarital agreements.

Existing law provides that a premarital agreement is not enforceable if the party against whom enforcement is sought proves either that he or she did not execute the agreement voluntarily or that the agreement was unconscionable at the time it was executed, as specified.

This bill would set forth specified findings that the court is required to make in order to find that the agreement was executed voluntarily.

Existing law provides that the parties to a premarital agreement may contract with respect to any matter not in violation of public policy or a statute imposing a criminal penalty.

This bill would provide that a provision in a premarital agreement regarding spousal support, including, but not limited to, a waiver of it, is not enforceable if the party against whom enforcement of the spousal support provision is sought was not represented by independent counsel, as specified, or if the provision regarding spousal support is unconscionable at the time of enforcement. The bill would also provide that an otherwise unenforceable provision in a premarital agreement regarding spousal support does not become enforceable solely because the party against whom enforcement is sought was represented by independent counsel.

Ch. 287 (SB 281) O'Connell. Vehicle conditional sale and lease contracts.

Existing law requires every conditional sale contract for a motor vehicle to contain a disclosure of all amounts financed, including various fees and taxes.

This bill would delete an obsolete reference and additionally require conditional sale contracts to include in the disclosure the California tire fee.

Existing law requires every lease contract for a motor vehicle to be in writing and contain specified information.

This bill would revise the information required to be contained in a motor vehicle lease contract. This bill would exclude from these provisions documents and agreements relating to an express warranty, titling or titling transfer, insurance policies, or documents regarding the sale or lease of specified goods or services.

This bill also would require a vehicle lease contract to be printed in a specified form.

Ch. 288 (SB 282) Dunn. Controller: reports of special districts.

Existing law provides that whenever, in the opinion of the Controller and an advisory committee of local governmental officers, the public welfare demands that reports of the financial transactions of a district other than a school district be published, the Controller shall notify the district that reports of its financial transactions are required to be furnished to the Controller. The Controller is required to compile and publish these reports.

This bill would require the Controller to make available annually, in a separate report, published in an electronic format on the Controller's Web site specified information regarding the assets, liabilities, and equity of the selected special districts.

Ch. 289 (SB 298) Figueroa. Certified nurse-midwives: drugs and devices.

Existing law permits a certified nurse-midwife who meets certain qualifications, to furnish drugs or medical devices pursuant to standardized procedures. Existing law does not authorize a certified nurse-midwife to order drugs or devices and prohibits him or her from furnishing controlled substances.

This bill would authorize a certified nurse-midwife to furnish or order controlled substances under certain conditions. The bill would define the term "furnishing" to include the ordering of a drug or device pursuant to a standardized procedure or protocol and the transmitting of an order of a supervising physician and surgeon.

Because a willful violation of the bill's requirements with respect to the ordering of dangerous drugs or devices would be a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 290 (SB 813) Dunn. Children's hospitals.

Existing law defines "children's hospital," for purposes of state administration of health care services and medical assistance, to include a list of specified hospitals.

This bill would additionally define "University of California children's hospital," for specified purposes, to mean each of the University of California children's programs within the 5 University of California academic medical center campuses and would define the purposes for which the term "children's hospital" could be used.

Ch. 291 (SB 866) Costa. California Beef Council.

(1) Existing law establishes the California Beef Council, and specifies the entities eligible for membership on the council.

This bill would change references from "slaughterers" to "packers and processors." The bill would eliminate a provision for a \$10 per diem payment, and would prohibit members of the council from receiving compensation, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law prohibits the expenditure of beef council funds for the advertising of brand name beef products.

This bill would permit the advertising expenditures if approved by a 2/3 vote of the council with the concurrence of the secretary.

(3) Existing law provides that a fee of \$1 per head shall be paid on each sale of cattle and calves, except as specified.

This bill would make an additional exception to this fee for the sale of any calves weighing less than 300 pounds.

(4) Existing law provides that a fee greater than \$1 per head on the sale of cattle and calves shall not be charged unless the secretary finds, as specified, that the producers in this state have approved the greater fee.

This bill would specify that the secretary shall find that the producers in this state have approved the greater fee if he or she finds that 60% of the producers voting in the referendum voted in favor of charging the greater fee. The bill would make a conforming change to a related provision.

Ch. 292 (SB 1186) Chesbro. Transactions and use tax: City of Sebastopol.

Existing law authorizes various local governmental entities, in accordance with certain limitations and approval requirements, to levy transactions and use taxes in accordance with the procedures and requirements set forth in the Transactions and Use Tax Law. Existing law authorizes the City of Sebastopol, subject to the approval of $\frac{2}{3}$ of the voters voting on the issue at an election, to levy a transactions and use tax pursuant to the Transactions and Use Tax Law at a rate of 0.125% for general revenue purposes.

This bill would authorize the City of Sebastopol, subject to the approval of a majority of the voters voting on the issue at an election, to levy a transactions and use tax pursuant to the Transactions and Use Tax Law at a rate of 0.125% for general revenue purposes.

This bill also would make legislative findings and declarations as to the necessity of a special statute.

Ch. 293 (SB 1221) Romero. Spousal support: domestic violence.

Existing law governs the award of spousal support. Existing law sets forth criteria to be considered in determining spousal support.

This bill would revise those criteria, as specified, and provide that in any proceeding for dissolution of marriage where there is a criminal conviction for an act of domestic violence perpetrated by one spouse against the other spouse entered by the court within 5 years prior to the filing of the dissolution proceeding, or at any time thereafter, there shall be a rebuttable presumption affecting the burden of proof that any award of temporary or permanent spousal support to the abusive spouse otherwise awardable pursuant to the standards of the provisions governing the award of spousal support should not be made. The bill would authorize the court to consider a convicted spouse's history as a victim of domestic violence as a condition for rebutting this presumption. The bill would make related changes.

Ch. 294 (AB 521) Koretz. Credit cards: student credit cards: credit card marketing practices.

(1) Existing law, known as the Song-Beverly Credit Card Act of 1971, prohibits the issuance of a credit card, as defined, except in response to an oral or written request or application, or as a renewal of, or in substitution for, an accepted credit card.

This bill would define a student credit card as a credit card that is provided to a student at a public or private college or university, and that is provided to that student solely based on his or her enrollment in a public or private university, or is provided to a student who would not otherwise qualify for that credit card on the basis of his or her income. The bill would provide that a student credit card does not include a credit card issued to a student who has

a cocardholder or cosigner who would otherwise qualify for a credit card other than a student credit card.

(2) Existing law establishes the various segments of the higher education system in the state. These segments include the University of California, which is administered by the Regents of the University of California, the California State University, which is administered by the Trustees of the California State University, the California Community Colleges, which is administered by the Board of Governors of the California Community Colleges, and various private and independent colleges and universities.

This bill would request the regents and the governing body of each accredited private or independent college or university in the state, and require the trustees and the board of governors, to adopt policies to regulate the marketing practices used on campuses by credit card companies.

Ch. 295 (AB 800) Wesson. Employment: Workplace language policies.

Existing provisions of the California Fair Employment and Housing Act define and prohibit various discriminatory employment practices.

This bill would make it an unlawful employment practice for an employer to adopt or enforce a policy that prohibits the use of any language in the workplace unless the policy is justified by business necessity, as defined, and prescribed notice of the policy and consequences for violation of the policy is given to employees. The bill would also make a statement of legislative intent regarding its provisions.

Ch. 296 (AB 1183) Calderon. California Insurance Guarantee Association.

Existing law provides for the creation of the California Insurance Guarantee Association in order to provide insolvency insurance for its member insurers. Existing law requires certain insurers to be members of the association as a condition of doing business. Existing law, in the event an insurer becomes insolvent, provides for the association to collect premium payments from its members in an amount sufficient to pay covered claims of the insolvent insurer and the associated adjustment costs. Existing law provides that the premium charged to any member insurer in that event for any of certain categories shall not be more than 1% of the net direct premium written in the category in this state by that member.

This bill would increase this amount for a time period of one year after its effective date from 1% to 2%. The bill would require the association annually to have an independent auditor perform a financial audit of the association and would require the Insurance Commissioner to conduct an examination of the association and to provide a copy of the examination report to the Chairpersons of the Senate and Assembly Committees on Insurance.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 297 (SB 521) Alpert. Transportation.

(1) Existing law requires the San Diego Metropolitan Transit Development Board to provide a system of specified regional transit operating services and support activities, to be funded from the regional transit fund that the board is required to create. Under existing law, the board is required to determine the routes, fares, frequency of service, and hours of operation of regional service. Existing law also authorizes the board to adopt and amend, on an annual basis, an assessment formula for funding regional services.

This bill would delete these provisions.

(2) Existing law authorizes the board to receive federal funds for mass transit purposes and to reallocate the funds for these purposes in accordance with federal law.

This bill would prohibit any other public entity within the area of the board's jurisdiction from filing an application for funds for public transportation under specified provisions relating to transportation development. This bill would require the board to consolidate all available local, state, and federal transit financial resources for public mass transit operators

and systems within its jurisdiction and, in coordination with the various operators, adopt a policy for annually prioritizing the use of those funds for specified purposes.

To the extent that these provisions would increase the level of service required of the board, the bill would impose a state-mandated local program.

(3) Existing law establishes the San Diego County Regional Transportation Commission in the County of San Diego and authorizes the commission to impose a retail transactions and use tax by ordinance in the county, upon approval of the proposal by the voters at a special election called for that purpose and compliance with certain other requirements.

This bill would authorize the commission to extend or expand, as defined, the tax imposed as specified above, upon approval of the proposal by the voters at a special election called for that purpose and compliance with certain other requirements.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 298 (SB 871) Burton. Commercial vehicles: compliance with drug and alcohol regulations.

(1) Existing law requires motor carriers and drivers to comply with the controlled substances and alcohol use, transportation, and testing requirements of the United States Secretary of Transportation, as specified. Existing law requires every motor carrier to make available for inspection, upon request of an authorized employee of the Department of the California Highway Patrol, copies of all results and other records pertaining to controlled substances and alcohol use and testing conducted pursuant to federal law, including those records contained in individual driver qualification files. Existing law grants the department exclusive jurisdiction for the regulation of safety of operation of motor carriers of property, and provides for the Department of Motor Vehicles to suspend the motor carrier permit of a motor carrier of property on specified grounds.

This bill would permit any person who suffers injury that is proximately caused by the driver of a commercial motor vehicle to recover treble damages from the driver's employer where it is shown that the driver of a commercial motor vehicle was under the influence of alcohol or a controlled substance at the time that the injury was caused and that the driver's employer willfully failed, as defined, at the time of the injury to comply with specified federal law requirements.

This bill would require the suspension of the motor carrier permit of a motor carrier of property for failure to comply with the above regulations with respect to controlled substances and alcohol use, or for failure to make available for inspection the results and other records pertaining to alcohol use and testing pursuant to federal law. The bill would require suspensions for serious violations for specified periods of time, as specified.

This bill would prohibit an applicant for employment as a commercial driver or owner-operator seeking to provide transportation services from being placed on duty by the motor carrier, until compliance with certain federal regulations concerning controlled substance and alcohol use and employment history has occurred, as specified. The bill would require every motor carrier to document all activities regarding the making or receiving of drivers' employment histories.

The bill would provide that a motor carrier that utilizes a preemployment screening service to review applications for purposes of the above is in compliance with the employer duties under those provisions if the preemployment screening services that are provided satisfy the requirements of state and federal law and the motor carrier abides by any findings that would, under federal law, disqualify an applicant from operating a commercial vehicle.

Because a violation of these provisions would be a crime under current law, this bill would impose a state-mandated local program, by expanding the scope of a crime.

(2) Existing law requires a person who is self-employed as a commercial motor vehicle driver to comply with the commercial motor vehicle safety program and the statutes pertaining to employees.

This bill would provide that any motor carrier that engages an owner-operator meeting specified statutory requirements to provide transportation services under the direction and control, as defined, of that motor carrier is responsible for the compliance of that owner-operator with the provisions of the motor carrier safety program and for purposes of certain safety regulations adopted by the Department of the California Highway Patrol during the period of that direction and control.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 299 (AB 120) Havice. Discrimination: California National Guard and State Military Reserve personnel: loans and financing.

Existing law provides that any person who violates specified provisions prohibiting discrimination against a member of the military or naval forces of this state or the United States is guilty of a misdemeanor.

This bill would prohibit a person who provides lending or financing from discriminating against any person with respect to the terms of a loan or financing based on that person's membership in the military or naval forces of this state or of the United States. By expanding the definition of a crime, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 300 (SB 237) Vincent. Streets and highways: abandoned animals.

(1) Existing law requires the Department of Motor Vehicles to include within the California Driver's Handbook language regarding rail transit safety.

This bill would additionally require the department to include in the handbook language regarding the abandonment or dumping of any animal on a highway, and would provide that, in order to minimize the costs, this new language shall be initially included at the earliest opportunity when the handbook is otherwise revised or reprinted.

(2) Existing law requires the department to administer a written test of those persons seeking driver's licenses or certificates of renewal.

This bill would require the department to include, on a rotating basis, at least one question, in at least 20% of the tests of an applicant's knowledge and understanding of the provisions, to verify that the applicant has read and understands that the abandonment or dumping of any animal is a criminal offense that can create a severe traffic safety hazard.

(3) Existing law requires the Department of Transportation and local authorities in their respective jurisdictions, to place and maintain, or cause to be placed and maintained, appropriate signs, signals, and other traffic control devices. Under various provisions of existing law, the abandonment of animals is prohibited.

This bill would require the Department of Transportation to place and maintain on major state highways entering the state, as specified, a sign that states that the abandonment or dumping of any animal is a crime punishable by a fine of up to \$1,000 or by confinement in a county jail of up to 6 months, or both.

Ch. 301 (SB 333) Escutia. Elder death review teams.

Existing law imposes penalties for the abuse of elders.

This bill would authorize any county to establish an interagency elder death team to assist local agencies in identifying and reviewing suspicious elder deaths and facilitating communications among persons who perform autopsies and persons involved in the investigation or reporting of elder abuse or neglect.

This bill would specify that the county elder death review teams would be comprised of certain state and local agency staff and private entities.

The bill would establish procedures for the sharing or disclosure of information by elder death review teams.

Ch. 302 (SB 364) Alpert. Mortgages and deeds of trust: accrual of interest.

Existing law provides that interest on the principal obligation of a promissory note secured by a mortgage or deed of trust on real property improved by one to 4 residential dwelling units shall not commence to accrue prior to close of escrow if the loan proceeds are paid into escrow or, if there is no escrow, the date upon which the loan proceeds have been made available for withdrawal as a matter of right. This provision does not apply if the funds are paid or made available from a federally insured financial institution with an office in this state.

This bill instead would provide that a borrower may not be required to pay interest on a principal obligation under a promissory note secured by a mortgage or deed of trust on real property improved with between one to 4 residential dwelling units for a period of more than one day prior to recording the mortgage or deed of trust, if the loan proceeds are paid into escrow or, if there is no escrow, the date upon which the loan proceeds have been made available for withdrawal. The bill would additionally provide that interest may begin accruing on the business day immediately preceding the day of recording, if the borrower requests and the lender agrees that the recording will occur on Monday or a day immediately after a bank holiday, and if the lender makes specified disclosures. This bill would also delete the limitation for federally insured financial institutions within an office of this state thereby applying these provisions to those institutions. The bill would also exempt specified loans from these provisions.

Ch. 303 (SB 1178) Burton. Automotive repair.

Existing law, the Automotive Repair Act, provides for regulation by the Bureau of Automotive Repair in the Department of Consumer Affairs of the registration and licensing of automotive repair dealers.

This bill would require the Department of Consumer Affairs, in consultation with the Department of Insurance and other interested parties, to conduct a study in order to determine the best process for certifying crash parts. The bill would require the study to consider the appropriate standards or criteria for certifying crash parts and to include a recommendation as to which agency should oversee crash parts certification. The results of this study would be required to be reported to the Legislature by January 1, 2003.

This bill would appropriate \$125,000 from the Vehicle Inspection and Repair Fund to the Department of Consumer Affairs for allocation to the Bureau of Automotive Repair for purposes of this study. The bill would require that any funds not used for the study be returned to the Vehicle Inspection and Repair Fund.

Ch. 304 (SB 1194) Romero. Legal services: attorneys and immigration consultants.

(1) Existing law, the State Bar Act, prohibits a person from practicing law in California without being an active member of the State Bar, and makes it a crime for a person to hold himself or herself out as a practicing lawyer without an active membership in the State Bar.

This bill would allow a person who obtained services provided in violation of these prohibitions, or who purchased goods, services, or real or personal property in connection with services provided in violation of these prohibitions, to be awarded relief, including

damages in the amount that he or she suffered loss and equitable relief, from an individual practicing law without an active State Bar membership or an individual who sold the goods, services, or property, in an enforcement action brought in the name of the people of the State of California by the Attorney General, a district attorney, or a city attorney acting as a public prosecutor. The bill would also require the court to award reasonable attorney's fees and costs and authorize the court to award exemplary damages to the prosecuting agency.

(2) Existing law requires a person engaging in the business or acting in the capacity of an immigration consultant to have filed a bond of \$50,000 with the Secretary of State.

This bill would make it unlawful for a person to disseminate a statement indicating that he or she acts or proposes to act as an immigration consultant without having filed a bond. The bill would also delete obsolete references to making a deposit in lieu of filing a bond.

Because a violation of the provisions regarding representation as an immigration consultant without a bond would be a misdemeanor, the bill would impose a state-mandated local program.

(3) Existing law, until January 1, 2002, authorizes a person who is awarded damages in an action or proceeding for injuries caused by the acts of a person acting as an immigration consultant to recover damages from the bond and also provides that when any claim or claims against a bond have been paid, the immigration consultant shall cease to conduct any business unless and until the bond has been reinstated bringing the balance available for the payment of claims up to the minimum amount required.

This bill would extend these provisions indefinitely.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 305 (AB 408) Correa. Funeral, cemetery, and crematory establishments.

Existing law requires an officer of a corporation or association or a partner of the partnership appearing for an applicant for a funeral establishment license to be at least 18 years of age and to have not committed acts or crimes constituting grounds for denial of licensure.

This bill would require all officers of a corporation or association or all general partners of a partnership appearing for an applicant for a funeral establishment license to be at least 18 years of age and to have not committed acts or crimes constituting grounds for denial of licensure.

Existing law requires a funeral director to obtain a separate license for each funeral establishment the director operates.

This bill would require the funeral establishment to obtain a separate license for each funeral establishment operated.

Existing law allows the assignment of a funeral establishment's license if, among other things, a licensed funeral director manages, directs, or controls the business of the funeral establishment.

This bill would authorize the assignment of a funeral establishment's license upon receipt of a satisfactory audit, performed by a licensed certified public accountant or public accountant, that verifies the accuracy of the establishment's trust fund balances and reports the establishment's compliance with certain provisions of the Funeral Directors and Embalmers Law.

Existing law authorizes a crematory to be established, operated, or maintained by corporations, partnerships, or individuals that have a valid crematory license issued by the Cemetery and Funeral Bureau.

This bill would delete the cemetery authority exemption from the crematory license requirement and would provide that any existing crematory operated by a licensed cemetery authority on January 1, 2002, shall have until January 1, 2003, to submit an application for

a crematory license. The bill would require the bureau to be notified of any change of equitable interest of 50% or more in a crematory and would require that a new owner obtain a new crematory license from the bureau.

Because this bill would lead to an increase in certain fees and fines that are deposited in the Funeral Directors and Embalmers Fund and the Cemetery Fund, both of which are continuously appropriated, the bill would make an appropriation.

Ch. 306 (AB 446) Committee on Business and Professions. Professions and vocations.

(1) Existing law provides for the licensure of persons in various professions and vocations and requires payment of a renewal fee upon the renewal of an expired license. Under existing law, these renewal fees are deposited into funds that are continuously appropriated.

This bill would require, instead, that all accrued and unpaid renewal fees be paid at the time of renewal of an expired license unless the license or registration was designated as inactive or retired. Because this bill would increase the amount of renewal fees paid into a number of continuously appropriated funds, the bill would make an appropriation.

(2) Existing law establishes the Registered Veterinary Technician Examining Committee Fund.

This bill would change the name of that fund to the Registered Veterinary Technician Committee Fund.

(3) The Private Security Services Act authorizes the Director of Consumer Affairs to enforce and administer its provisions, and authorizes the director to adopt and enforce reasonable rules in connection with this function, including establishing the qualifications a uniformed employee of a licensee who operates as a private patrol operator is required to meet as a condition of handling guide dogs.

This bill would delete this particular provision from the rules that the director is authorized to adopt and enforce.

(4) The Electronic and Appliance Repair Dealer Registration Law provides for the registration and regulation of service dealers, a business which includes the repairing, servicing, or maintaining of an electronic set. Under that law, an electronic set is defined as including various types of electronic equipment, including cellular telephones.

This bill would delete cellular telephones from the list of equipment included in the definition of an electronic set.

(5) Existing law provides for the regulation and licensure by the Structural Pest Control Board of a structural pest control applicator and defines this term as including an individual who applies a specified chemical substance for various purposes, including for wood roof cleaning and treatment.

This bill would delete this particular purpose from the definition of a structural pest control applicator and would make related, conforming changes.

(6) Existing law requires a person engaged in a trade or business who negotiates primarily in the Spanish language to provide a Spanish-language translation of specified agreements to the contracting party. Under existing law, the translation may be submitted to the Department of Consumer Affairs to verify its accuracy.

This bill would delete these terms providing for the department's review of these translations.

Ch. 307 (AB 452) Correa. Real estate: subdivisions.

Existing law requires the Real Estate Commissioner to examine a proposed subdivision and to issue, unless grounds for denial exist, the subdivider a public report authorizing the sale or lease of the lots or parcels within the subdivision.

This bill would require, if the subdivision is used for residential purposes, the commissioner's report to disclose that a prospective buyer or the buyer's designee has the

right to negotiate property inspections with the seller under terms mutually agreeable to both parties.

Ch. 308 (AB 564) Lowenthal. Dentistry: oral conscious sedation.

The Dental Practice Act regulates and licenses the practice of dentistry, including the use of oral conscious sedation by licensees for pediatric patients.

This bill would require the Dental Board of California to submit a report to the Assembly Committee on Health and the Senate Business and Professions Committee on or before January 1, 2003, regarding reports it has received on deaths or hospitalizations as a result of dental treatment.

This bill would make it unprofessional conduct for a dentist to fail to notify the board in writing within 7 days of any patient that was removed to a hospital or emergency care center for medical treatment for more than 24 hours as a result of the administration of oral conscious sedation, conscious sedation, general anesthesia, or any dental treatment, unless the removal to a hospital or emergency care center is normal or expected based on the underlying dental condition, and would allow the board to inspect a dental office upon receipt of a report if the board finds it necessary. The bill would also give the board the authority to conduct an inspection of a dental office upon receipt of a report of an incident involving oral sedation that required medical assistance. The bill would make conforming changes.

This bill would also make legislative findings and declarations and express legislative intent regarding the use of sedatives in dentistry.

Ch. 309 (AB 761) Maddox. Private investigators: continuing education.

Existing law, the Private Investigator Act, authorizes the Director of Consumer Affairs to require an applicant for a private investigator's license, or his or her manager, to demonstrate the applicant's qualifications by a written or oral examination, or combination of both. Existing law also requires an applicant for licensure to meet certain experience requirements.

This bill would require the Bureau of Security and Investigative Services to consider including on the licensure examination questions on the subject of laws relating to privacy and professional ethics and to consider supplementing the examination with a separate professional ethics examination. If the bureau determines to supplement the examination with a professional ethics examination, the bill would require the bureau to require that current licensees take the examination if this requirement is appropriate. The bill would also authorize the bureau to require an applicant for licensure to submit proof of satisfactory completion of a course in professional ethics, and would authorize the bureau to specify which courses and course providers would satisfy the requirement. The bill would authorize the bureau to require a licensee who violates any provision of the act to either satisfactorily complete relevant coursework or retake the licensing examination.

Ch. 310 (AB 809) Salinas. Automated drug delivery systems.

Existing law provides for the licensing and regulation of pharmacies by the California State Board of Pharmacy in the Department of Consumer Affairs.

This bill would authorize automated drug delivery systems to be located in specified clinics. The bill would require clinics with automated drug delivery systems to develop and implement written policies and procedures. The bill would also require patient consultation with a pharmacist via a telecommunications link with 2-way audio and video capabilities, and would require that the pharmacist review the prescription and the patient profile, that he or she be located in California, and that he or she authorize the release of the dangerous drugs or devices from the automated drug delivery system. The bill would further require a pharmacist to perform the stocking, inventory maintenance, and review of the operation and maintenance of the system.

Because this bill would provide additional penalties that would be deposited into the Pharmacy Board Contingent Fund which is continuously appropriated, the bill would make an appropriation.

Existing law generally makes it a misdemeanor to knowingly violate the Pharmacy Law.

Because operating an automated drug delivery system in violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 311 (AB 1083) Bates. Paralegals.

Existing law defines the term "paralegal," establishes qualifications for a paralegal, and sets forth activities that paralegals are prohibited from performing.

This bill would require that a person hold himself or herself out to be a paralegal in order to be considered a paralegal and that, among other things, the person be qualified by education, training, or work experience to be a paralegal.

Existing law prohibits, with specified exceptions, a paralegal from performing services for a consumer unless those services are performed under the direction and supervision of an attorney, law firm, corporation, government agency, or other entity that employs or contracts with paralegals.

This bill would make a clarifying change in those provisions.

Ch. 312 (AB 1088) Jackson. Civil rights: gender discrimination.

Existing law provides that no business establishment may discriminate, with respect to the price charged for services of similar or like kind, against a person because of the person's gender. Existing law specifies however that it does not prohibit price differences, specifically based upon the amount of time, difficulty, or cost of providing the services.

This bill would require specified business establishments to disclose in writing the pricing for each standard service, as defined, to display, in a specified manner, a sign stating that it is illegal to base pricing on gender and that a complete price list is available upon request, and to display, in a specified manner, a price list, and to provide the customer with a copy of the complete price list upon request. The bill would provide that a business establishment failing to correct a violation of these requirements within 30 days of receiving written notice of a violation is liable for a civil penalty of \$1,000.

Ch. 313 (AB 1144) Bates. Architectural services.

Existing law provides for the licensing and regulation of the practice of architecture by the California Architects Board in the Department of Consumer Affairs.

This bill would require a person holding a license to practice architecture to file with the board a current mailing address and the name and address of the entity through which he or she provides architectural services.

Ch. 314 (AB 416) Strom-Martin. Fish.

Existing law, until January 1, 2002, requires every person who is required to pay a landing tax for abalone to pay, in addition to that landing tax, an additional tax of 19½ cents for each pound, or fraction thereof, of abalone.

Existing law requires that the additional landing tax be deposited in the Fish and Game Preservation Fund, a continuously appropriated fund, for specified purposes. Existing law establishes the Commercial Abalone Advisory Committee and provides for the composition and duties of the committee. These provisions will be repealed on January 1, 2003.

This bill would extend to January 1, 2007, the law requiring the additional landing tax. The bill would extend to January 1, 2008, the law governing the advisory committee. Because

the bill would provide for a source of funding for the continuously appropriated Fish and Game Preservation Fund for an extended period of time, and would impose duties on the department, the costs of which are payable from that fund, the bill would make an appropriation.

Ch. 315 (AB 946) Kelley. Water rights.

(1) Existing law specifies procedures under which a person may be subject to administrative civil liability for unauthorized diversion or use of water. Existing law specifies procedures under which the State Water Resources Board may order a reconsideration of any of its decisions or orders on the filing of a petition for writ of mandate by any interested person.

This bill would expand these procedures to apply to any person or entity.

(2) Existing law authorizes any party aggrieved by any decision or order of the board to file a petition for a writ of mandate in accordance with specified provisions and, in this connection, provides that unless reconsideration makes available a higher level of review of a decision or order issued under authority delegated to an officer or employee of the board, that the right to petition is not affected by the failure to seek reconsideration before the board. Existing law provides that, except as otherwise provided, prescribed provisions of the Code of Civil Procedure govern the judicial proceedings and requires the court to exercise independent judgment on the evidence in specified cases relating to the appropriation of water.

This bill would provide that, except in cases where the decision or order is issued under that delegated authority, reconsideration is not required to be exhausted before filing a petition for writ of mandate.

(3) Existing law requires that the time for filing the petition for a writ of mandate described in (2) above be extended for any person who seeks reconsideration of the decision or order of the board.

Existing law, the California Environmental Quality Act (CEQA), requires that any action or proceeding to challenge certain acts or decisions of a public agency on the grounds of noncompliance with the act be commenced within certain time limits.

This bill would require that the time for filing any of these CEQA actions or proceedings against the board be extended for any person who seeks reconsideration of any decision or order of the board. The bill would provide that the amendment made by this bill, with respect to this provision, does not constitute a change in, but is declaratory of, existing law.

(4) Existing law requires the owner of any wastewater treatment plant to obtain approval of the board for any change in the point of discharge, place of use, or purpose of use of treated wastewater.

This bill would provide that this requirement does not apply to changes in the discharge or use of treated wastewater that do not result in decreasing the flow in any portion of a watercourse.

(5) Existing law authorizes an applicant to appropriate water, or a permittee or licensee, to petition to change the point of diversion, place of use, or purpose of water from that described in the application, permit, or license, as applicable.

This bill would require a petition for change filed in connection with an application, permit, or license, to include prescribed information and would authorize the board to request additional information regarding the petition, as specified. The bill would authorize any interested person to file with the board a written protest against the approval of the petition and would impose requirements in connection with the filing of that protest. The bill would authorize the board to request additional information regarding the protest, as prescribed. The bill would authorize the board to cancel a protest or petition for failure to provide information requested by the board in accordance with specified provisions.

The bill would authorize the board, after holding a hearing, to approve with conditions or deny a petition. The bill would authorize the board, under certain circumstances, to approve or deny a petition without holding a hearing.

Ch. 316 (AB 1187) Simitian. Solid waste: recycling: tires: used oil.

(1) Existing law, the California Integrated Waste Management Act of 1989, establishes an integrated waste management program administered by the California Integrated Waste Management Board.

Under the act, each operator of a solid waste disposal facility is required to pay a quarterly fee to the State Board of Equalization, based upon the amount of solid waste disposed of at each site, and the revenue from the fee is required to be deposited in the Integrated Waste Management Account in the Integrated Waste Management Fund. The board is authorized to expend the revenues in the account, upon appropriation by the Legislature, for specified purposes, including issuing grants to cities, counties, or other local agencies for specified purposes with regard to preventing the disposal of hazardous waste at solid waste disposal sites. Existing law prohibits the total amount of grants made by the board pursuant to this grant program from exceeding, in any one fiscal year, \$3,000,000.

This bill would allow the total amount of grants made by the board pursuant to the grant program to exceed that amount, but would prohibit the amount from exceeding \$5,000,000, in any one fiscal year, if sufficient funds are appropriated from the Integrated Waste Management Account.

(2) Existing law, which is part of the act, requires any person who stores, stockpiles, or accumulates waste tires in a specified manner, to clean up those waste tires or abate the effects thereof, or in the case of threatened pollution or nuisance, as defined, take other necessary remedial action, upon the order of the board. If a person fails to comply with such an order, the Attorney General, district attorney, or county counsel is required to file a petition within 45 days of the discovery of the failure to comply with the board's order, at the request of the board.

This bill would instead require the Attorney General to make such a petition, at the request of the board, and would authorize the district attorney or county counsel to file a petition within 45 days of the board's request, if the Attorney General declines, or is unable, to file a petition.

(3) Existing law requires every person who engages in the transportation of used and waste tires to hold a valid waste tire hauler registration.

This bill would define the term "waste and used tire hauler" for purposes of those provisions.

(4) Existing law authorizes a generator, waste and used tire hauler, or operator of a waste tire facility that is subject to prescribed requirements to submit an electronic report that includes all information required to be on the California Uniform Waste and Used Tire Manifest, if this submission is approved by the California Integrated Waste Management Board.

This bill would delete the provision in which this authority is granted in existing law, and would instead move this authority to another provision. The bill would also make related technical and conforming changes.

(5) Existing law, the California Oil Recycling Enhancement Act, requires an oil manufacturer to pay the board a specified amount for every gallon of lubricating oil sold or transferred in the state, or imported into the state for use in the state. These amounts are required to be deposited in the California Used Oil Recycling Fund, which is continuously appropriated for specified purposes, including the payment of recycling incentives to certified used oil collection centers. Existing law requires a used oil collection center to operate in a specified manner and prohibits a used oil collection center from accepting more than 20 gallons of used lubricating oil from a person each day.

This bill would repeal that prohibition.

Ch. 317 (AB 1201) Pavley. Stormwater pollution: used oil recycling fund.

Under existing law, certain fees imposed on lubricating oil sold or transferred into this state are deposited in the California Used Oil Recycling Fund. Existing law continuously appropriates the money in the fund for specified purposes and authorizes the money in the fund to be used for the costs of administration of the California Oil Recycling Enhancement Act, inspections and reports required by the act, contracting for certain enforcement and investigation purposes, hazardous materials contamination disposal costs, and other designated uses, including grants and loans to local governments and nonprofit entities for specified activities or projects relating to used oil collection.

This bill would additionally continuously appropriate the money in the fund to the California Integrated Waste Management Board to issue grants or loans to local governments or nonprofit entities to pay for education and mitigation projects relating to stormwater pollution, as defined, from oil and oil byproducts. The bill would prohibit a local government from receiving a grant or loan for these purposes unless the local government certifies that it has a stormwater management program approved by the appropriate California regional water quality control board and the project is consistent with that program.

The bill would specify that final approval of applicant and project eligibility standards, scoring and evaluation processes, and awarding of loans or grants under the act shall be made in a public meeting of, and pursuant to a vote of, the board.

Ch. 318 (SB 209) Sher. Commercial fishing: market squid.

(1) Existing law required the Director of Fish and Game, on or before April 1, 2001, to submit a report to the Legislature on the status of the market squid fishery with recommendations for a market squid conservation and management plan.

This bill would require the Fish and Game Commission, after considering that report, and after public hearings, to adopt a market squid fishery management plan on or before December 31, 2002. By imposing these duties on the commission, the bill would make an appropriation.

(2) Under existing law, until April 1, 2003, the fee for a commercial market squid vessel permit and the fee for a commercial squid light boat owner's permit is \$400.

This bill would require the commission to establish fees for commercial market squid vessel permits and commercial squid light boat owner's permits annually commencing April 1, 2003.

(3) The bill also would prohibit each person who is issued a commercial squid light boat owner's permit from selling, trading, or transferring the permit to another person. Because existing law would make a violation of this provision a crime, the bill would impose a state-mandated local program.

(4) Existing law specifies that the above provisions will become inoperative on April 1, 2003, and repealed as of January 1, 2004.

This bill would provide that specified provisions will become inoperative upon the adoption by the commission of a market squid fishery management plan and the adoption of implementing regulations and will be repealed 6 months thereafter.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 319 (SB 271) O'Connell. Hazardous waste: transportation: manifests: information.

(1) Existing law requires any person generating hazardous waste that is transported, or submitted for transportation, for offsite handling, treatment, storage, disposal, or any combination thereof, to complete a manifest prior to the time the waste is transported or offered for transportation and to submit the manifest to the Department of Toxic Substances

Control. Existing law requires any person who transports hazardous waste in a vehicle to have a manifest in his or her possession and requires the manifest to be shown upon demand to any representative of the department, any officer of the California Highway Patrol, any local health officer, or any local public officer designated by the director. A violation of the laws regulating hazardous waste is a crime.

This bill would additionally require the manifest to be shown, upon demand, to any certified unified program agency. Since a violation of this requirement would be a crime under existing law, the bill would impose a state-mandated local program.

(2) Existing law provides a modified manifesting procedure, which may be used only for non-RCRA waste or for RCRA waste that is not required to be manifested pursuant to federal law, and may be used only with the consent of the generator. Existing law allows used oil, antifreeze, oil/water separation sludge, and parts cleaning solvent to be manifested for transportation under this modified manifesting procedure.

This bill would repeal the current modified manifesting procedure and would establish a procedure for a consolidated manifest, as defined, to be used only for non-RCRA hazardous waste or for RCRA hazardous waste that is not required to be manifested pursuant to federal law, and to be used only with the consent of the generator. This bill would define the terms “consolidated transporter” and “consolidated manifest” for purposes of this consolidated manifesting procedure.

The bill would include, as eligible for the consolidated manifesting procedure, in addition to the materials currently subject to the modified manifesting procedure, solids contaminated with used oil, brake fluid, paint-related waste, spent photographic solutions, hydroxide sludge contaminated with metals from a wastewater treatment process, dry cleaning solvents and related wastes, asbestos, inks, chemical and laboratory lab packs collected from elementary and secondary schools, filters from dispensing pumps for fuels, disabled vehicle wastes, as defined, and any other waste, as specified, in regulations adopted by the department pursuant to specified requirements. The bill would require a transporter using the consolidated manifesting procedure to submit specified quarterly reports to the department, and would impose new requirements concerning the retention of receipts and manifests under the consolidated manifesting procedure. The bill would also make conforming changes.

(3) Existing law requires any application for a hazardous waste transporter’s application for an original or renewal registration received on or after January 1, 2000, from a transporter that transports or intends to transport used oil, antifreeze, oil/water separation sludge or parts cleaning solvent pursuant to the modified manifesting procedure to include a statement by the transporter notifying the department of that transportation.

This bill would require an application for an original or renewal registration received on or after January 1, 2002, from a transporter that transports or intends to transport any waste stream pursuant to the consolidated manifesting procedure established by this bill to include the notification statement by the transporter and to list the specific category or categories of waste streams to be transported using the consolidated manifesting procedure. The bill would also authorize the department to revoke or suspend an authorization to operate, as specified, and would require that revocation or suspension to be based upon a finding of specified factors.

(4) Existing law requires the department to adopt regulations that eliminate the requirement that generators who generate 100 kilograms or less of hazardous waste per month and are engaged solely in used oil or solvents milk run activities obtain a California EPA number.

This bill would repeal that requirement.

(5) Existing law authorizes the department to impose an annual verification fee upon all generators, transporters, and facility operators with 50 or more employees that possess a valid identification number issued either by the department or by the Environmental Protection Agency. Existing law requires the department to establish an identification number

certification system to biennially verify the accuracy of information related to generators, transporters, and facilities authorized to treat, store, or dispose of hazardous waste and requires the system to only include the verification of specified information.

This bill would require each entity issued an identification number to provide or verify this information and would revise the information required to be provided, thereby imposing a state-mandated local program by creating a new crime. The bill would also make conforming changes.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 320 (SB 672) Machado. California Water Plan: urban water management plans.

(1) Existing law requires the Department of Water Resources to update every 5 years the plan for the orderly and coordinated control, protection, conservation, development, and use of the water resources of the state, known as the California Water Plan.

This bill would require the department to include in the California Water Plan a report on the development of regional and local water projects within each hydrologic region of the state to improve water supplies to meet municipal, agricultural, and environmental water needs and minimize the need to import water from other hydrologic regions.

(2) Existing law requires every urban water supplier to prepare and adopt an urban water management plan.

This bill would require an urban water supplier to describe in the plan water management tools and options used by that entity that will maximize resources and minimize the need to import water from other regions.

Ch. 321 (AB 289) Oropeza. Healing arts.

Existing law requires the State Department of Alcohol and Drug Programs to license and regulate narcotic treatment programs. The Medical Practice Act restricts the employment of licensed physicians and surgeons and podiatrists by a corporation or other artificial legal entity, subject to specified exemptions.

This bill would exempt a narcotic treatment program regulated by the department from these restrictions on the employment of licensed physicians and surgeons and podiatrists, provided that the program does not interfere with, control, or otherwise direct the professional judgment of a physician and surgeon.

Ch. 322 (AB 734) Chan. California Children and Families Program: trust fund and state commission.

(1) The California Children and Families Act of 1998 requires that the California Children and Families Program, established by the act, be funded by certain surtaxes imposed on the sale and distribution of cigarettes and tobacco products and deposited into the California Children and Families Trust Fund, and that the fund be used for the implementation of comprehensive early childhood development and smoking prevention programs. Existing law further requires that the 6% of funds deposited in a Mass Media Communications Account in the fund be used for, among other things, the prevention of tobacco, alcohol, and drug use by pregnant women.

This bill would require that these funds also be used for the cessation of tobacco, alcohol, and drug use by pregnant women.

(2) The existing California Children and Families Act of 1998 establishes a California Children and Families Commission, composed of 7 voting members and 2 ex officio members.

This bill would provide that, for purposes of mass media communications and statewide dissemination of public information and educational materials, the commission may also be identified as the California Children and Families Partnership.

(3) An initiative measure, the act provides that it may be amended only by a vote of $\frac{2}{3}$ of the membership of both houses of the Legislature and that all amendments to the act shall be to further the act and must be consistent with its purposes.

This bill, in conformance with those requirements, would declare that its provisions further the act and are consistent with its purposes.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 323 (AB 1142) Runner. Sexually violent predators: evaluators.

Existing law establishes procedures under which a person under the jurisdiction of the Department of Corrections may be referred for evaluation at least 6 months prior to the person's scheduled date for release from prison if the director determines that the person may be a sexually violent predator, as defined. Existing law provides, under certain circumstances, that this person may be required to stand trial and, if found beyond a reasonable doubt to be a sexually violent predator, may be committed to the custody of the State Department of Mental Health for treatment and confinement in a secure facility until his or her diagnosed mental disorder has so changed that he or she is not likely to commit an act of sexual violence.

Existing law provides that if the attorney petitioning for commitment determines that updated evaluations are necessary in order to properly present the case for commitment, the attorney may request the State Department of Mental Health to perform updated evaluations. Existing law further provides that if one or more of the original evaluators is no longer available to testify in court proceedings, the attorney petitioning for commitment may request the State Department of Mental Health to perform replacement evaluations.

This bill would provide that if one or more of the original evaluators is unable to testify in court proceedings for the petitioner, the petitioning attorney may request the State Department of Mental Health to perform replacement evaluations. This bill would also define "no longer available to testify for the petitioner in court proceedings," for purposes of the above provision, to mean that the evaluator, for any of specified reasons, is no longer authorized by the Director of Mental Health to perform evaluations regarding sexually violent predators.

Existing law requires that any updated evaluation be provided to the petitioning attorney.

This bill would require that any updated evaluation performed be provided, in addition, to counsel for the person evaluated.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 324 (AB 1263) Migden. AIDS: HIV: rapid testing programs.

Existing law makes provision for various programs relating to treatment of persons with the human immunodeficiency virus (HIV) and the acquired immune deficiency syndrome (AIDS).

This bill would authorize the State Department of Health Services to participate in a rapid immunodeficiency virus test research program conducted with the federal Centers for Disease Control and Prevention, involving innovative HIV testing and counseling programs.

The bill would additionally authorize the department to implement a rapid HIV test program in testing sites designated by the department, using specified tests, and in accordance with specified criteria.

Ch. 325 (AB 1311) Goldberg. Medical records: access.

Existing law requires that, within 30 days of receiving a written request, a health care provider shall provide a patient or his or her representative of all or any portion of the patient's

medical records that the patient has a right to inspect, subject to the payment of a specified fee. A willful violation of this requirement by certain health care providers is an infraction.

This bill would require a health care provider to provide, within 30 days of receiving a written request from a patient or former patient or the patient's or former patient's representative, a copy, at no charge, of the relevant portion of the patient's records, as defined, upon presenting to the provider proof that the records are needed to support an appeal regarding eligibility for a public benefit program, under specified circumstances. The bill would not apply these provisions to a patient represented by a private attorney, as defined, who is paying the patient's appeal costs pending the outcome of that appeal.

Because the bill would change the definition of an infraction, it would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 326 (AB 1643) Negrete McLeod. Long-term care facilities: temporary staff.

Existing law, the Employment Agency, Employment Counseling, and Job Listing Services Act, governs employment agencies, including nurses' registries. The provisions governing nurses' registries require, among other things, that a nurse's registry maintain a surety bond and regulate continuing contracts between private duty nurses and nurses' registries. A violation of the act is a misdemeanor.

This bill would prohibit an employment agency that procures temporary employment for long-term health care employers from referring a certified nurse assistant or licensed nursing staff, as defined, for employment without first conducting a personal interview of the individual, verifying the experience, training, and references of the individual, and verifying that the individual is in good standing with the appropriate licensing or certification board, including verification that the person has successfully secured a criminal record clearance.

The bill would regulate the temporary assignment of licensed nursing staff or certified nurse assistants rendering service to a patient who is a resident of a long-term care facility. Among other things, the bill would require an employment agency that refers licensed nursing staff or a certified nurse assistant for temporary employment in a licensed long-term care facility to provide written verification to the facility that the person referred is in good standing with the applicable registry or licensing board, and has had a recent health examination. The bill would also require the agency to provide an employer with a statement that a certified nurse assistant referred by the agency has at least 6 months' experience working in a long-term health care facility. The employment agency would also be required to provide written verification that the certified nurse assistants or licensed nursing staff referred by the agency do not have any unresolved allegations against them involving the mistreatment, neglect, or abuse of a patient. The bill would enact other requirements related to advertising by employment agencies with respect to employment in long-term health care facilities.

Since a violation of these provisions would be a misdemeanor, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 327 (SB 87) Soto. Blind Vendor Revolving Loan Fund.

Existing state and federal laws provide for the establishment of vending facilities to be operated by blind vendors on state and federal property. The program is administered by the

Director of Rehabilitation, and requires the director to establish the Business Enterprises Program for the Blind, and to encourage and establish these vending facilities.

This bill would create the Blind Vendor Revolving Loan Fund in the State Treasury and would continuously appropriate moneys in the fund to the Department of Rehabilitation, for the purpose of providing loans for the purchase of inventory and equipment by existing blind vendors, in accordance with specified criteria. The bill also would appropriate \$100,000 from the Rehabilitation-Huelsman Trust Special Deposit Fund to the department for deposit in the Blind Vendor Revolving Loan Fund.

Ch. 328 (SB 455) Committee on Insurance. Health care.

(1) The Medical Practice Act provides that any type of business organization that holds itself out to the public as an organization practicing medicine, or that a reasonably informed person would believe is engaged in the practice of medicine, shall only be owned and operated by one or more licensed physicians and surgeons, except as otherwise provided, and further provides that a physician and surgeon who knowingly practices medicine with a business organization in violation of this requirement shall have his or her license to practice permanently revoked by the Medical Board of California.

This bill would repeal this provision of the Medical Practice Act.

This bill would require the Department of Insurance to report, based on evidence, to the appropriate regulatory agency, a suspected violation by physicians and surgeons, and organizations being operated in violation of provisions governing clinics, professional corporations, and physicians and surgeons, relative to potential insurance fraud. The bill would require the appropriate regulatory agency, upon receiving a report from the department, to conduct an investigation. The bill would also require the permanent revocation of the license of a physician and surgeon who practices medicine with a business organization that is in violation of the above provisions.

(2) Existing law requires under specified circumstances that a health care service plan provide or authorize a 2nd opinion by an appropriately qualified health care professional. Existing law defines an “appropriately qualified health care professional” as a primary care physician, specialist, or other health care provider acting under certain conditions.

This bill would delete health care providers other than primary care physicians and specialists from that definition except for specialized health care service plans.

(3) Existing law, with regard to Medicare supplement insurance policies, provides that all insurers, brokers, agents, and others engaged in the business of insurance owe a policyholder a duty of honesty, and a duty of good faith and fair dealing.

This bill would provide that these duties are also owed to prospective policyholders.

(4) Existing law, with regard to Medicare supplement insurance policies, imposes limitations on the amount of premiums that may be collected by an issuer of a policy prior to the time that the policy is delivered to the applicant, and imposes other related requirements.

This bill would provide that these provisions also apply to insurers that issue long-term care insurance policies.

Ch. 329 (SB 751) Speier. Hospitals: surrogate decisionmakers.

Existing law provides for the designation by a patient of a surrogate to make certain health care decisions in accordance with the patient’s individual health care instructions, or other wishes.

This bill would provide that, except under specified circumstances, within 24 hours of the arrival in the emergency department of a general acute care hospital of a patient who is unconscious or otherwise incapable of communication, the hospital shall make reasonable efforts to contact the patient’s agent, surrogate, or a family member or other person the hospital reasonably believes has the authority to make health care decisions on behalf of the patient.

Ch. 330 (AB 184) Liu. Seismic improvements.

The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, “full cash value” is defined as the assessor’s valuation of real property as shown on the 1975–76 tax bill under “full cash value” or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. The California Constitution authorizes the Legislature to exclude from classification as “new construction” requiring reappraisal the construction or installation in existing buildings of certain seismic retrofitting improvements or improvements utilizing earthquake hazard mitigation technologies.

This bill would revise the definitions of “seismic retrofitting improvements” and “improvements utilizing earthquake hazard mitigation technologies” and would revise the time period for filing the certificate of compliance issued by a local agency, specifying that the reconstruction or improvement is in accordance with a seismic safety ordinance.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

This bill would take effect immediately as a tax levy.

Ch. 331 (AB 197) Correa. Volunteer firefighters: death benefit.

Existing law provides for the Volunteer Firefighters Length of Service Award System Fund, which is administered by the Board of Administration of the Public Employees’ Retirement System and funded by contributions from contracting departments. Volunteer firefighters may receive from the fund up to \$100 per month for life, based on their length of service, and a supplemental amount not to exceed \$50, based on an actuarial analysis of the condition of the fund as determined by the board.

This bill would additionally require the board to pay a lump-sum benefit of \$3,000 upon the firefighter’s death to his or her designated beneficiary or estate, if the firefighter has accrued 10 years of service.

Ch. 332 (AB 378) Calderon. Water quality: cleanup.

Existing law authorizes a California regional water quality control board, by itself or with the cooperation of any other governmental agency, to clean up or abate the effects of waste and provides that the person who discharges the waste is liable to that regional board or other governmental agency for reasonable costs actually incurred in cleaning up or abating the effects of the waste. Existing law provides that those costs are recoverable in a civil action and that the amount of those costs constitutes a lien on the affected property.

This bill would authorize a regional board to contract with a water agency to perform, under the direction of the regional board, investigations of existing or threatened groundwater pollution or nuisance.

The bill would require a groundwater cleanup system that commences operation on or after January 1, 2002, and that is required to obtain a discharge permit from the regional board, and that discharges treated groundwater to surface water or groundwater, to treat the groundwater to standards approved by the appropriate regional board, as prescribed.

The bill would require the appropriate regional board to consult with various specified entities in making its determination of the applicable water quality standards to be achieved by the operator of a groundwater cleanup system that commences operation on or after January 1, 2002, that draws groundwater from an aquifer that is currently being used or has been used at any time since 1979 as a source of drinking water supply by the owner or operator of a public water system, and that discharges treated groundwater to surface water or groundwater from which a public water system draws drinking water.

Ch. 333 (AB 437) as amended, Committee on Budget. Rural Transit System Grant Program.

Existing law provides for funding of public transit under various programs, including the Mills-Alquist-Deddeh Act, also known as the Transportation Development Act.

This bill, until July 1, 2002, would require the Department of Transportation and the California Transportation Commission to establish a Rural Transit System Grant Program to purchase, construct, and rehabilitate transit facilities, vehicles, and equipment, including energy efficiency retrofits, and to purchase rights-of-way for transit systems. The bill would require the department to submit a report describing the projects funded under the program to the Legislature on or before June 30, 2002.

This bill would not become operative unless funds for the program are appropriated by the Budget Act of 2001.

Ch. 334 (AB 701) Dickerson. Juveniles: booking and fingerprinting.

Existing law authorizes a peace officer to take into temporary custody a minor for whom there is reasonable cause to believe he or she has committed a crime, and provides for the disposition of the minor, as specified.

This bill would provide that if the minor is released upon written notice to appear, the written notice to appear may require the minor to be fingerprinted, photographed, or both, upon appearance before the probation officer under certain circumstances.

Ch. 335 (AB 854) Briggs. Air pollution: smog check.

Existing law establishes a motor vehicle inspection and maintenance (smog check) program, that among other things, requires all motor vehicles, except for certain exempted vehicles, that are registered in designated areas of the state to biennially obtain a certificate of compliance or noncompliance with motor vehicle emission standards.

(1) Existing law, until January 1, 2002, also provides that a certificate of compliance or noncompliance issued to a licensed automobile dealer is valid for 2 years, or until the vehicle is sold and registered to a retail buyer, whichever occurs first.

(2) Effective January 1, 2002, a certificate of compliance or noncompliance issued to a licensed automobile dealer is 180 days.

This bill would extend the operation of the provision described in (1) indefinitely and would repeal the provision described in (2).

Ch. 336 (AB 931) Frommer. Insurance Commissioner: restriction on travel payments or reimbursements.

Existing law regulates the business of insurance in California and provides for the election of an Insurance Commissioner who, among other things, is charged with the duty of enforcing the laws regulating the business of insurance. Under existing law, the commissioner is authorized to incur traveling and other expenses as are necessary, convenient, or advisable for the performance of his or her duties.

This bill would prohibit the commissioner from accepting, using, or benefiting from travel reimbursements or payments made to the Department of Insurance from an entity or a private attorney or law firm with a client subject to regulation by the commissioner, from a private attorney or law firm that is under contract or consideration for a contract to represent either the department or commissioner in his or her official capacity, or from a private attorney or law firm seeking attorney's fees under a specified provision of existing law. The bill would authorize the Attorney General or any other person in this state to file a civil action for a violation of these provisions and would provide for assessment of a civil penalty in that action.

Ch. 337 (AB 1031) Canciamilla. Natural gas supplies.

Existing law requires the State Energy Resources Conservation and Development Commission to publish and submit to the Governor and the Legislature, every 2 years, a

comprehensive report describing emerging trends relating to the use, availability, and pricing of various fuels, including natural gas.

This bill would require the report to include, with respect to long range forecasts of the demand for natural gas, an evaluation of average conditions, as well as best and worst case scenarios, and an evaluation of the impact of increasing renewable resources on natural gas demand.

Ch. 338 (AB 1334) Harman. Caulerpa species.

(1) Existing law makes it unlawful for any person to receive, bring, or cause to be brought into this state, for the purpose of propagation, any fish, reptile, amphibian, or aquatic plant from any place wherein any infected, diseased, or parasitized fish, reptile, amphibian, or aquatic plants are known to exist.

This bill would prohibit the sale, possession, importation, transportation, transfer, releasing alive in the state, or giving away without consideration the salt water algae of enumerated Caulerpa species, except the bill would authorize the possession of salt water algae of enumerated Caulerpa species for bona fide scientific research upon authorization by the Department of Fish and Game. The bill would authorize the imposition of a civil penalty for violation of the provisions of the bill, in addition to any other penalty provided by law.

Because existing law would make a violation of these provisions a crime, the bill would impose a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare it is to take effect immediately as an urgency statute.

Ch. 339 (AB 1347) Pescetti. Dementia caregiver training.

Under existing law, the various requirements have been established for skilled nursing facilities and intermediate care facilities that provide care for elderly and disabled citizens. Existing law also specifies the training requirements for persons employed in these facilities.

This bill would establish dementia-specific training and education requirements for the certified nurse assistant staff of skilled nursing facilities and intermediate care facilities.

Ch. 340 (AB 1550) Wiggins. Farmworker housing.

The existing Farm Labor Center Law authorizes, among other things, a housing authority to arrange and contract for the furnishing of services, works, or facilities for or in connection with a farm labor center within the authority's area of operation.

Existing law authorizes the establishment of county service areas to provide prescribed services within the area.

This bill would authorize formation of a county service area in Napa County for the sole purpose of acquiring, constructing, leasing, and maintaining farmworker housing. It would authorize the Napa County Board of Supervisors to impose an annual assessment not to exceed \$10 per planted vineyard acre for this purpose.

Ch. 341 (SB 86) Oller. Veterans: memorial district.

Existing law requires that the board of directors of a memorial district established to maintain veterans' buildings or memorials consist of 5 members.

This bill would require that a majority of the board of directors be composed of veterans, as provided.

Ch. 342 (SB 299) Scott. Teacher credentialing.

(1) Existing law requires that each allegation of an act or omission by an applicant for, or holder of, a credential for which he or she may be privately admonished, publicly reprovved, or for which his or her application or credential may be denied, suspended, or revoked be

presented to the Committee of Credentials. Existing law defines “credential” to mean a document issued by the State Board of Education or the Commission for Teacher Preparation and Licensing, authorizing a person to engage in the service specified by the credential.

This bill would instead require that each allegation of an act or omission by an applicant for, or holder of, a credential for which he or she may be subject to an adverse action be presented to the Committee of Credentials, and would define “adverse action” to include all of the circumstances in existing law that currently require presentation to the Committee of Credentials. The bill would delete the existing definition of “credential” and would instead define it to include a credential, certificate, life document, life diploma, permit, certificate of clearance, or waiver issued by the commission.

(2) Existing law defines the term “sex offense” as used in provisions relating to school employees, in part, by referring to Penal Code provisions of law and includes in that definition any offense committed or attempted in any other state which if committed or attempted in this state would have been punishable as one of the offenses referred to in the Penal Code provisions.

This bill would include in the definition of “sex offense” any offense against the laws of the United States which if committed or attempted in this state would have been punishable as one of the offenses referred to in the cited Penal Code provisions.

(3) Existing law requires the Commission on Teacher Credentialing to report, by January 10 of each year, to the Legislature and the Governor on the number of classroom teachers who received credentials, internships, and emergency permits in the previous fiscal year.

This bill would require the report to be made by April 15 of each year.

(4) Existing law requires the Commission on Teacher Credentialing to conduct a study of teacher preparation programs to assess the extent to which those programs prepare candidates for teaching credentials to teach critical thinking and problem solving skills and to make a written report, based on the results of the study, on or before November 1, 1995.

This bill would repeal these provisions.

(5) Existing law authorizes the commission to approve for credit any coursework completed for credential purposes or for step increases in programs offered in California by out-of-state institutions of higher education that meet prescribed requirements only if the program of courses is offered by a regionally accredited institution and evidence of satisfactory evaluation by both that accrediting body and the Western Association of Schools and Colleges is submitted by the out-of-state institution.

This bill would delete the requirement that the Western Association of Schools and Colleges submit evidence of satisfactory evaluation.

(6) Existing law requires the commission to complete a program approval process concerning bilingual education training programs offered by private postsecondary educational institutions within a prescribed timeframe and provides for an appeal process when approval is denied. Provisions of law authorizing the program approval process were repealed.

This bill would repeal provisions regarding the time within which the program approval process was to have been completed and the provisions regarding the appeal process.

(7) Existing law requires the Commission on Teacher Credentialing to maintain for public record certain enumerated information and authorizes the commission to disclose that information.

This bill would, notwithstanding any other provision of law, prohibit the disclosure by the commission of information other than the information maintained for public record absent an order from a court of competent jurisdiction.

(8) Existing law requires the commission to continue to administer all regulations that were in effect on December 31, 1988, until the commission amends or repeals those regulations to implement the provisions of this chapter.

This bill would repeal this provision.

(9) Existing law gives jurisdiction to the Committee on Credentials to commence an investigation under specified circumstances, including, but not limited to, notice from the employer of a credential holder that the credential holder has been suspended for more than 10 days or has otherwise left employment because of the allegation of misconduct.

This bill would instead authorize the committee to commence an initial review, as specified, and would authorize the commission to seek information, excluding personnel records, to determine whether jurisdiction exists to conduct the initial review.

The bill would require that the employer provide notice to the commission not later than 30 days after suspension for more than 10 days, placement on unpaid administrative leave for more than 10 days, or other departure of the employee, as specified, thereby imposing a state-mandated local program. The bill would authorize the committee to conduct an initial review upon the receipt of an affirmative response as to any conviction, adverse action on, denial of, or pending investigation into criminal or noncriminal conduct, by any governmental licensing agency on any application submitted to the commission.

The bill would require the committee to investigate all alleged misconduct and the circumstances in mitigation and aggravation upon commencement of a formal review. The bill would require that the formal review be held no later than 6 months after the commencement of the initial review.

(10) Existing law continuously appropriates and makes available for expenditure without regard to fiscal year, upon the order of the Superintendent of Public Instruction, funds reimbursed to the State Department of Education by the Commission on Teacher Credentialing for the purposes of paying costs incurred in the process of adopting the assessment instrument and overseeing the implementation of the provisions relating to basic skills proficiency testing.

This bill would repeal this provision.

(11) Existing law authorizes the holder of a multiple subject teaching credential, or a standard elementary credential, who is employed by the San Diego City Unified School District to be assigned to teach any subject in grades 1 to 6, inclusive, in a departmentalized setting until the Commission on Teacher Credentialing completes a study of teacher assignments in kindergarten and grades 1 to 6, inclusive.

This bill would repeal this provision.

(12) Existing law authorizes a specified language development requirement to be satisfied by the completion of a commission-approved program of study or passage of an appropriate examination or assessment that has been adopted for this purpose by the commission.

This bill would repeal this provision.

(13) Existing law requires the commission to issue a 5-year preliminary multiple subject teaching credential authorizing instruction in a self-contained classroom or a 5-year preliminary single subject teaching credential authorizing instruction in departmentalized classes to any experienced out-of-state prepared teacher who meets certain requirements. Existing law also requires the commission to issue a 5-year preliminary education specialist credential authorizing instruction of special education pupils to an applicant who has not been awarded a specified credential and fulfills certain requirements.

This bill would delete the provisions regarding the issuance of a 5-year preliminary education specialist credential authorizing instruction of special education and would instead require the commission to issue that type of credential to any experienced out-of-state prepared teacher who meets specified requirements.

(14) Existing law requires the commission to issue a 5-year preliminary education specialist credential to a teacher prepared in a state other than California or a country other than the United States who meets certain requirements. Existing law requires that the area of concentration of the special education credential program completed in a state other than California or a country other than the United States correspond with the areas of concentration for the California credential awarded.

This bill would delete the latter provision and would instead require the commission to determine the area of concentration for the California education specialist credential based on the special education program completed out of the state or country.

(15) Existing law authorizes a preintern teaching certificate to be renewed for an additional year if the holder takes the appropriate subject matter examination.

This bill would also authorize that renewal if the holder is enrolled in a subject matter program.

(16) Existing law authorizes the professional preparation requirements for a teaching credential to be met by certification by the Director of the Peace Corps of the United States if the applicant meets certain conditions.

This bill would authorize the Peace Corps Country Director also to make the certification.

(17) Existing law requires the Commission on Teacher Credentialing to deny an application for the issuance of a credential made by an applicant who has been convicted of a violent or serious felony, as defined, or certain other enumerated crimes, or whose employment has been denied or terminated because of a conviction of a violent or serious felony. Existing law prohibits the denial of a credential solely on the basis that the applicant was convicted of a violent or serious felony if the person has a certificate of rehabilitation and pardon.

This bill would authorize, but not require, the commission to grant a credential to an applicant who was convicted of a violent or serious felony if the person has a certificate of rehabilitation and pardon.

(18) Existing law establishes the California School Paraprofessional Teacher Training Program under which a participating school district or county office of education is required to certify that it has received a commitment from each participating paraprofessional it recruited that he or she will complete one school year of classroom instruction in the district or county office of education for each year that he or she receives assistance for books, fees, and tuition while attending an institution of higher education under the program.

This bill would require a participating school district or county office of education to certify that it has received a commitment from each participating paraprofessional it recruited that he or she will also graduate from an institution of higher education with a bachelor's degree and obtain a multiple, single subject, or education specialist teaching credential.

(19) Existing law establishes the National Board for Professional Teaching Standards Certification Incentive Program for the purpose of providing awards to teachers who are employed by school districts or charter schools, are assigned to teach in California public schools, and have attained certification from the National Board for Professional Teaching Standards.

This bill would require the commission to issue a professional clear credential to the holder of a preliminary multiple or single subject teaching credential who attains certification from the National Board for Professional Teaching Standards.

(20) Existing law requires the Commission for Teacher Preparation and Licensing to suspend the credentials of any person employed by a school district in a position requiring certification qualifications if that person refuses, without good cause, to fulfill a valid contract of employment with the district or leaves the service of such district without the consent of the superintendent, as specified.

This bill would authorize the commission to take an adverse action on the credential holder but not suspend the credential for more than a year or revoke the credential.

(21) Existing law requires that all meetings and hearings to consider the suspension or revocation of credentials be executive and closed sessions.

This bill would require all final actions taken to consider an adverse action or reduction in penalty to be made public, except for private admonitions, as specified.

(22) Existing law sets forth the requirements for admission to internship programs governed by the Teacher Education Internship Act of 1967.

This bill would revise those requirements.

(23) Existing law contains obsolete references to the Commission for Teacher Preparation and Licensing.

This bill would update those references by instead referring to the Commission on Teacher Credentialing.

(24) The bill would make other technical changes.

(25) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 343 (SB 394) Sher. Internet Tax Freedom Act: continuation.

The California Internet Tax Freedom Act prohibits, with specified exceptions, the imposition, assessment, or attempt to collect (1) a tax on Internet access, Online Computer Services, or the use of the Internet or Online Computer Services, (2) a bit or bandwidth tax, or (3) any discriminatory tax on Online Computer Services or Internet access. This act provides that it is to become inoperative on January 1, 2002.

This bill instead would, on the basis of whether certain conditions are met, provide that the act shall remain in effect only until January 1 of either 2003 or 2004, and as of the applicable date is repealed.

Ch. 344 (SB 675) Poochigian. Charter schools: audits.

Existing law prohibits the governing board of a school district from denying a petition for the establishment of a charter school unless it makes written factual findings to support one or more specified findings, including that the petition does not contain a reasonably comprehensive description of the manner in which annual, independent, financial audits will be conducted. Existing law requires, not later than the first day of May of each fiscal year, each county superintendent of schools to provide for an audit of all funds under his or her jurisdiction and control and the governing board of each school district to either provide for an audit of school district income and expenditures by source of funds, or make other prescribed arrangements.

This bill would require a charter school to transmit a copy of its annual, independent, financial audit report for the preceding fiscal year to its chartering entity and the State Department of Education by December 15 of each year. The bill would not require the charter school to transmit the audit report if the school is encompassed in the audit of its chartering entity.

Ch. 345 (SB 912) Chesbro. Employment of minors: agricultural packing plants.

Existing law prescribes limits on the hours of employment of minors, but authorizes the Labor Commissioner to grant an exemption to employers operating agricultural packing plants for employment of minors 16 and 17 years of age for up to 10 hours per nonschool day during peak harvest season. Under existing law, which will be repealed on January 1, 2002, that exemption may additionally authorize employment of a minor who is enrolled in a school in Lake County to be employed for more than 48, but not more than 60, hours a week upon prior written approval by the Lake County Board of Education.

This bill would extend that repeal date to January 1, 2005, and would require the Labor Commissioner, prior to issuing the Lake County exemption or renewing an exemption, to inspect an affected agricultural packing plant. The bill would also require an affected employer, on or before March 1 of each year, as a condition of receiving that exemption or a renewal of that exemption, to file a written report to the Labor Commissioner, as specified.

The bill would additionally require the Labor Commissioner to file a written report with the Legislature on or before March 1 of each year describing the general working conditions of minors employed in the agricultural packing industry during the past year, as specified.

Ch. 346 (SB 551) Machado. Victims of crime.

Existing law provides for the indemnification of victims and derivative victims of specified types of crimes for specified expenses that become necessary as a direct result of the crime. Indemnification is made under these provisions from the Restitution Fund, which is continuously appropriated to the California Victim Compensation and Government Claims Board for these purposes.

This bill would, until January 1, 2004, authorize the board to provide reimbursement up to a specified amount to county boards of supervisors for specified services provided as a result of specified crimes of terrorism, and authorize the board to expand the scope of assistance to specified derivative victims, to provide reimbursement for mental health services for members of California trauma or search and rescue teams, and to allocate a specified amount to the victim compensation program in the State of New York, as a result of the 4 terrorist attacks that occurred on September 11, 2001. By authorizing new uses for a continuously appropriated fund, this bill would make an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 347 (SB 311) Chesbro. Public postsecondary education: excuse of tuition and fees.

Existing law requires the Regents of the University of California, the Board of Directors of the Hastings College of the Law, and the Trustees of the California State University to excuse the mandatory systemwide tuition and fees of any surviving spouse or surviving child, natural or adopted, of a deceased person who was a resident of the state, who was employed by a public agency, as defined, whose principal duties consisted of active law enforcement service or active fire suppression and prevention, and who was killed in the performance of active law enforcement or active fire suppression and prevention duties. This provision is applicable to the Regents of the University of California only if the regents, by resolution, make it applicable.

Until January 1, 2002, these provisions also apply to the surviving spouse or surviving child of a person who died while performing these duties, and who was employed as a contractor, or as an employee of a contractor, performing services for a public agency, as defined.

This bill would extend until January 1, 2004, the application of these provisions to the surviving spouse or surviving child of a person who died while performing these duties, and who was a contractor, or an employee of a contractor, performing services for a public agency.

Ch. 348 (AB 632) Cedillo. Redistricting: Senate and congressional districts.

The California Constitution requires the Legislature to adjust the boundary lines of Senate, Assembly, Board of Equalization, and congressional districts in the year following the year in which the national decennial census is taken and requires the districts be redrawn in accordance with specified standards.

This bill would provide that the Senate and congressional districts consist of specified elements.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 349 (SB 802) Perata. Redistricting: Assembly and Board of Equalization districts.

The California Constitution requires that the boundary lines of Senate, Assembly, congressional, and Board of Equalization districts be adjusted in the year after which the federal decennial census is taken in accordance with specified standards.

This bill would provide that Assembly and Board of Equalization districts are to consist of specified counties, districts, census tracts, and census blocks.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 350 (AB 161) Maddox. Dog breeders.

Existing law establishes regulations with respect to dog breeders.

This bill would revise the definition of a dog breeder, for those purposes.

Existing law establishes various requirements a dog breeder is required to do with respect to housing and maintaining dogs.

This bill would revise those requirements.

Ch. 351 (AB 479) Shelley. Guardians: conservators: charitable corporations.

Existing law generally provides that the court has discretion in determining compensation to conservators or guardians of an estate for services rendered; however, if a nonprofit charitable corporation that has been providing care, counseling, or financial advice to the proposed ward or conservatee under the care of a registered social worker is appointed guardian or conservator, the compensation to the corporation, and any fee for an attorney for the corporation, is required to be for services actually rendered and may not be based on the value of the estate. Existing law also permits a nonprofit charitable corporation to be appointed as trustee of a trust under specified conditions, and permits representation of the corporation by counsel, but limits compensation to the corporation, and the fee charged by counsel, to compensation or fee for services actually rendered and prohibits a court from basing the compensation or fee on the value of the estate.

This bill would delete these prohibitions on basing compensation and fees upon the value of the estate.

Ch. 352 (AB 536) Bates. Pharmacy technicians.

The Pharmacy Law authorizes a pharmacy technician to perform nondiscretionary tasks only while assisting, and while under the direct supervision and control of, a pharmacist. Existing law requires any pharmacist responsible for a pharmacy technician to be on the premises at all times and requires the pharmacy technician to be within the pharmacist's view, except when the pharmacy technician is employed to assist in the filling of prescriptions for an inpatient of a hospital or for an inmate of a correctional facility. Existing law provides that the ratio of pharmacy technicians to pharmacists shall not exceed one to one when the pharmacy technician is assisting the pharmacist by the performance of nondiscretionary tasks. Existing law also authorizes a minimum ratio of pharmacy technicians to pharmacists of at least one technician for each pharmacist when the technician is performing nondiscretionary tasks in connection with filling prescriptions for an inpatient of a licensed health facility and for a patient of a licensed home health agency.

This bill would provide that, except for clerical functions, a pharmacy with one pharmacist may have only one pharmacy technician when the technician is assisting the pharmacist by the performance of nondiscretionary tasks and that the ratio of pharmacy technicians assisting any additional pharmacist by the performance of nondiscretionary tasks may not exceed a 2 to one ratio. This bill would also authorize at least one pharmacy technician for a single pharmacist in a pharmacy, and at least 2 technicians for each additional pharmacist, when the technician is performing nondiscretionary tasks in connection with filling prescriptions for an inpatient of a licensed health facility and for a patient of a licensed home health agency. The bill would allow a pharmacist assigned to supervise a 2nd pharmacy technician to refuse to supervise the technician in specified circumstances, and would prohibit an employer from discharging, disciplining, or discriminating against a pharmacist for doing so.

Existing law generally makes it a misdemeanor to knowingly violate the Pharmacy Law. Because violations of this bill would be a misdemeanor, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 353 (AB 538) Cardoza. Adoption.

Existing law provides that a child, the child's natural mother, or a man presumed to be the child's father, among other specified persons, may bring an action to determine the existence or nonexistence of the father and child relationship, as specified. Existing law requires that action to be consolidated with an action to terminate the parental rights of the father in an adoption proceeding.

This bill would require a paternity action that is consolidated with an action to terminate the parental rights of the father in an adoption proceeding, to be heard in the county in which the action to terminate parental rights is filed, unless the court in the paternity action finds, by clear and convincing evidence, that transferring the paternity action to the other county poses a substantial hardship. If the court determines that there is a substantial hardship, the bill would require that the consolidated action be heard in the county in which the paternity action is filed.

Existing law requires each state resident who adopts a child through an intercountry adoption that is finalized in a foreign country to readopt the child in this state if it is required by the Immigration and Naturalization Service.

This bill would provide that each state resident who adopts a child through an intercountry adoption which is finalized in a foreign country may obtain a birth certificate in the State of California, as specified.

Existing law authorizes the probation officer, qualified court investigator, or, at the option of the board of supervisors, the county welfare department in a county in which an adoption proceeding is pending, to conduct an investigation of each case of stepparent adoption, and provides that the court may not make an order of adoption until after the probation officer, qualified court investigator, or county welfare department has filed its report and recommendation and they have been considered by the court.

This bill would additionally authorize a licensed clinical social worker or licensed marriage family therapist to engage in the above investigation, and to prepare and file a report and recommendation regarding the stepparent adoption to be considered by the court.

Existing law requires that, as soon as possible, but not later than 30 days after initial placement of a child into foster care, the child protective agency provide the caretaker with the child's current health and education summary, as specified, and for each subsequent placement, the child protective agency shall provide the caretaker with a current summary, as specified, within 48 hours of the placement.

The bill would provide that the child protective agency may disclose information, as specified, to prospective caretakers prior to placement of a child if the child protective agency intends to place the child with the prospective caretaker or caretakers and the prospective caretaker or caretakers are willing to become the adoptive parent or parents of the child and meet other specified criteria. The bill would also provide that the child protective agency may disclose to the prospective caretaker the child's placement history or underlying source documents, as specified.

The bill would require that siblings be assigned to the same social worker when there is a prospective adoptive family that intends to adopt the children as a sibling group, except as specified.

Because this bill would increase certain duties of a child protective agency, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 354 (AB 655) Wright. Personal identifying information: identity theft.

Existing law requires consumer credit report agencies to allow a consumer to elect to have his or her name removed from any list provided by the consumer credit reporting agencies for firm offers of credit that are not initiated by the consumer, as specified.

This bill would permit a consumer to specify, either verbally or in writing, that his or her name shall be removed from lists that a consumer credit reporting agency furnishes for credit card solicitations for a minimum of two years, and that consumer credit reporting agencies would be required to inform a consumer of this option, as specified.

Existing law provides a process by which a consumer may dispute the accuracy of information in a consumer credit report. Existing law requires a consumer credit reporting agency to promptly and permanently block certain information when a consumer provides a valid copy of a police report indicating that another person has unlawfully used the consumer's personal identifying information.

This bill additionally would require a consumer credit reporting agency to promptly and permanently block certain information when a consumer provides a valid copy of a Department of Motor Vehicles investigative report indicating that another person has unlawfully used the consumer's personal identifying information. The bill would set forth requirements regarding the unblocking of certain information by a consumer reporting agency after an allegation of identity theft by a consumer, and would permit a consumer reporting agency to disregard a consumer's version of disputed information, as specified. This bill would also require that a consumer credit reporting agency delete from a consumer credit report inquiries for credit reports that were initiated as the result of identity theft.

Existing law places certain requirements on users of consumer credit reports, including the right of the consumer to prohibit the use of information in a consumer's files in connection with credit transactions not initiated by the consumer.

This bill would require any person who uses a consumer credit report in connection with a credit transaction and who discovers that the address on the consumer credit report does not match the address of the consumer requesting or being offered credit to take reasonable steps to verify the accuracy of the consumer's address, as specified, and confirm that the credit transaction is not the result of defined identity theft. This bill would create similar requirements for any person who uses a consumer credit report in connection with a credit transaction and who receives specified notification from a consumer credit reporting agency that information in the report has been blocked as the result of an identity theft. This bill would provide that a consumer damaged by a failure to fulfill the above described requirements would have a claim against the person using the report, as specified.

Existing law restricts the dissemination of certain types of personal identifying information by specific professions and businesses. Existing law also provides, generally, that a consumer is not liable on debt incurred by a 3rd party, and limits a consumer's liability on the unauthorized use of a credit card, as defined.

This bill would allow a person to bring a cause of action against a claimant to establish that the person is a victim of identity theft, as defined; or if the claimant has brought a cause of action to recover on its claim, the bill would allow the person to file a cross complaint to establish that the person is a victim of identity theft in connection with the claim. This bill would allow the victim to obtain a judgment that, among other things, declares the victim

is not obligated on these claims, that declares void any security interests in the victim's property, that provides for an injunction restraining attempts to collect on these claims, that may include actual damages and equitable relief as the court deems appropriate, that may include a civil penalty up to \$30,000 and that awards reasonable attorney's fees and costs. This bill would allow the victim to join any person purporting to have a claim that the victim maintains arises from identity theft in the action regardless of whether those claims arise out of the same transaction or occurrence. The bill would also provide for continuing jurisdiction in these actions and the limitation on bringing actions or joining defendants with respect to the action.

Existing law regulates the activities of investigative consumer reporting agencies, as specified.

This bill would revise and recast various provisions governing the activities of investigative consumer reporting agencies. Among other things, it would expand the definition of "investigative consumer reporting agency," increase disclosure requirements, eliminate certain exemptions, increase penalties for violations, and would make related changes.

The bill would prohibit creditors from selling a consumer debt to a debt collector, except as specified, if the consumer's file with a consumer credit reporting agency is blocked or the creditor has reason to believe the consumer is a victim of identity theft. The bill would also prohibit persons who gather specified information on a consumer in lieu of using the services of an investigative consumer reporting agency to provide that information to the consumer.

This bill would incorporate additional changes in Section 1785.10 of the Civil Code proposed by AB 488 to become operative only if this bill and AB 488 are both enacted on or before January 1, 2002, each bill amends Section 1785.10 of the Civil Code, and this bill is enacted last.

Ch. 355 (AB 1014) Papan. California Public Records Act: disclosure procedures.

(1) Existing law, the California Public Records Act, requires state and local agencies to make public records available upon receipt of a request that reasonably describes an identifiable record not otherwise exempt from disclosure, and upon payment of fees to cover costs.

This bill would require, when a member of the public requests to inspect or to obtain a copy of a public record, that, in order to assist the individual to make a focused and effective request that reasonably describes an identifiable record, the agency shall assist the member of the public to identify records and information that may be responsive to a request, describe the information technology and physical location in which the records exist, and provide suggestions for overcoming any practical basis for denying access to the records or information sought. The bill would specify that these requirements to assist a member of the public do not apply if the agency makes available the requested records, determines that the request should be denied based solely on an express exemption listed in the act, or makes available an index of its records.

The act provides that, upon a request for a copy of records, an agency has 10 days to determine whether the request seeks disclosable public records and to notify the requester of this determination and the reasons therefor. The act further provides that, in unusual circumstances, as defined, the agency may extend this time limit by written notice, which shall specify the reasons for the extension and the date on which a determination is expected to be dispatched.

This bill would require that, when the agency dispatches the determination of whether the request seeks disclosable public records, it state the estimated date and time when the records will be made available.

By imposing additional duties and responsibilities upon local agencies in connection with requests for inspection of records, this bill constitutes a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 356 (AB 1318) Correa. Multi-unit manufactured housing: construction standards.

(1) The existing Mobilehomes-Manufactured Housing Act of 1980 requires multi-unit manufactured housing to meet specified handicap accessibility and adaptability requirements applicable to dormitories, hotels, and apartment houses when the multi-unit manufactured housing is constructed for those purposes. The act provides that all provisions of law that apply to manufactured homes also apply to multi-unit manufactured homes.

This bill would require multi-unit manufactured housing to meet specified egress and fire separation requirements applicable to dormitories, hotels, apartment houses and structures that contain 2 dwelling units when the multi-unit manufactured housing is constructed for those purposes. It would require multi-unit manufactured housing containing 3 or more dwelling units to meet specified accessibility and adaptability requirements applicable to dormitories, hotels, and apartment houses.

(2) Existing law authorizes placement upon a foundation system any manufactured home originally sited on or after January 1, 1985, in a mobilehome park constructed prior to January 1, 1982, subject to certain requirements.

This bill would prohibit any single structure from exceeding 2 stories or containing more than 4 dwelling units. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 357 (AB 1560) Nation. Automotive repairs: emissions.

(1) Existing law provides that it is an infraction for an individual to act as an automotive repair dealer unless that person has a properly issued and valid registration. Existing law also provides, with certain exceptions, that any person who fails to comply with any automotive repair provision is guilty of a misdemeanor.

This bill would delete the provision that makes a violation of that provision an infraction and thus, under existing law, any violation would therefore be a misdemeanor.

(2) Existing law relating to the motor vehicle inspection and maintenance (smog check) program specifies a statute of limitations period for filing accusations against licensees for conduct involving fraud or misrepresentation that could result in disciplinary action.

This bill would revise this provision to allow any act involving fraud or misrepresentation resulting in injury to be filed within 2 years after the discovery of the facts constituting the fraud or misrepresentation.

(3) Existing law, the Automotive Repair Act, specifies a statute of limitations period for filing accusations against licensees for conduct involving fraud or misrepresentation that could result in disciplinary action.

This bill would revise this provision to allow any act involving fraud or misrepresentation resulting in injury to be filed within 2 years after discovery of the facts constituting the fraud or misrepresentation.

Because this bill would increase penalties for existing crimes, it would impose a state-mandated local program.

(4) Existing law requires the smog check program to be administered by the Department of Consumer Affairs and the State Air Resources Board. The smog check program is required to provide for inspection of motor vehicles upon registration, biennially upon renewal of registration, upon transfer of ownership, and in certain other circumstances. Existing law requires all smog check stations to utilize monitoring equipment certified by the department.

Existing law also requires manufacturers of monitoring equipment used at smog check stations to furnish to the department and install software updates on monitoring equipment used at smog check stations, and provides that the failure to furnish or install software updates is cause for the department to decertify the equipment or to issue a citation to the manufacturer, which may include a penalty of up to \$1,000.

This bill would expand that requirement to require equipment manufacturers to also install hardware updates on monitoring equipment and furnish those updates to the department. The bill would also permit the department to establish hardware specifications, performance standards, and operational requirements for the certification of monitoring equipment, and would provide that a failure to meet those specifications, standards, or requirements is also cause for the department to decertify the equipment or to issue a citation to the manufacturer, including a penalty of up to \$1,000.

(5) Existing law prescribes the area of the state in which the smog check program is to be implemented, requires vehicles subject to the program to have a biennial inspection, requires the department to ensure that vehicle emissions of specified pollutants are reduced by specified percentages through the program, and establishes a review committee to analyze the effect of the program. Existing law requires the department to issue a citation to a smog check station licensee if any fraudulent certification of vehicles occurs on the premises of the station. Existing law also requires the department, pending a hearing, to temporarily suspend any smog check station or technician's license for a period not to exceed 60 days, if, within 2 years of the issuance of a citation, any fraudulent certification of vehicles occurs at the station.

This bill would repeal those provisions.

Existing law also requires the department to revoke the license of any smog check technician or station licensee who participates in the fraudulent certification of vehicles, as specified.

This bill instead would require that the department revoke the license of those licensees if they participate in the fraudulent inspection, rather than fraudulent certification, of vehicles, and would add an additional ground as the basis for that revocation.

This bill would revise this provision to allow any act involving fraud or misrepresentation resulting in injury to be filed within 2 years after discovery of the facts constituting the fraud or misrepresentation.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 358 (SB 111) Alpert. Medical assistants.

Existing law authorizes a medical assistant to perform specified services relating to administration of medication, performance of skin tests and simple routine medical tasks and procedures, and performance of venipuncture or skin puncture for withdrawing blood upon specific authorization from and under the supervision of a licensed physician and surgeon, podiatrist, or a physician and surgeon or podiatrist group or corporation. Pursuant to existing law, the specific authorization is required to come from a supervising physician and surgeon or podiatrist, and supervision by a licensed physician and surgeon or podiatrist is required to be within the scope of his or her practice.

This bill would also authorize a medical assistant to perform the above services in specified clinics for a physician assistant, nurse practitioner, or nurse-midwife. In those cases, the bill would require that specific authorization for the services be given by a physician assistant, nurse practitioner, or nurse-midwife, and that supervision over the services be performed by a physician assistant, nurse practitioner, or nurse-midwife. The bill would authorize a physician and surgeon in these specified clinics to provide written instructions for medical assistants, regarding the performance of tasks or duties, which may allow a nurse practitioner, nurse-midwife, or physician assistant to supervise tasks authorized by a physician and surgeon and may allow the tasks to be performed when the supervising physician and surgeon is not onsite, so long as certain conditions are met.

Ch. 359 (SB 140) Bowen. Guardians and conservators.

Existing law requires that every person appointed as a guardian or conservator shall give a bond of a specified amount that is approved by a court before letters of guardianship and conservatorship are issued, except as specified. Existing law also provides that the guardian or conservator may be required to furnish an additional bond upon the sale of real property or the borrowing of money secured by the real property of the estate.

This bill would provide that when the guardian or conservator has knowledge of facts from which he or she knows or should know that the bond posted is less than the required amount, he or she must apply for an order increasing the bond to the required amount. The bill would create an exception to the provision requiring the guardian or conservator to furnish an additional bond upon the sale of real property or the borrowing of money secured by the real property of the estate if the court makes a specified finding. The bill would also require that if a bond or an additional bond is required, the bond be posted before a court order confirming the sale or borrowing of money is effective and may be filed. The bill would also provide that if an additional bond is required by the court when the account is heard, the order approving the account and related matters would not be effective and the court would be prohibited from filing the order until the additional bond is filed.

Existing law requires a conservator or guardian to present an account of the estate of the conservatee or ward to a court for settlement and allowance within a specified time period, as specified.

This bill would provide that, when a conservator or guardian does not file an account and set the account for hearing within a specified time period, a court would be required to do one or more of the following: (1) punish or remove the conservator or guardian, as specified; (2) order that money or personal property in the estate be deposited into an account to be subject to withdrawal only upon authorization of the court; (3) suspend the powers of the conservator or guardian and appoint a temporary conservator or guardian; (4) appoint legal counsel to represent the ward or conservatee, who shall be ordered to perform one or more specified activities; (5) grant an extension of time not to exceed 60 days, as specified, in which to file the account. The bill would also make a related change.

Ch. 360 (SB 197) Chesbro. Building standards: marinas.

Existing law requires the State Fire Marshal, the chief of any city or county fire department or of any fire protection district, and their authorized representatives to enforce in their respective areas building standards and other regulations of the State Fire Marshal, except under certain conditions. Existing law also requires annual inspections of all buildings, and structures accessory thereto, except dwellings, by designated local officials for compliance with building standards and other regulations of the State Fire Marshal.

This bill would require each marina, as defined, that is developed or improved with funds loaned by the Department of Boating and Waterways pursuant to specified provisions of existing law to have all of its electrical systems that extend into or over water inspected biennially, during the term of the loan, by a licensed electrical contractor or electrical engineer, for compliance with the safety-related provisions of the California Electrical Code

in effect at the time the marina is developed. If the marina is improved with a loan, the bill would require the areas of the marina in which electrical improvements were made, to comply with all of the California Electrical Code provisions in effect at the time of the improvement.

Ch. 361 (SB 341) Perata. Acupuncture.

Existing law, the Acupuncture Licensure Act, lists certain techniques and modalities that a licensed acupuncturist may use on patients.

This bill would expand the modalities available for use by a licensed acupuncturist and specifically authorize the use of heat, cold, diet, magnets, plant, animal, and mineral products, and dietary supplements to promote, maintain, and restore health. The bill would define “magnet,” “plant, animal, and mineral products,” and “dietary supplement.”

Ch. 362 (SB 475) Escutia. Dispute resolution: referees and arbitrators.

Existing law provides that when the parties to an action do not consent, the court may, upon the written motion of any party, or of its own motion, appoint a referee in certain cases.

This bill would specifically provide that the appointment shall be subject to the procedures specified in a provision of existing law.

Existing law requires the Judicial Council to collect specified information on the use of referees in certain cases in which the parties do not consent to the appointment of a referee and to make a specified report thereof to the Legislature by January 1, 2003.

This bill would also require the Judicial Council to collect specified information from the trial courts on the use of referees in discovery matters whether appointed upon agreement of the parties or when the parties do not consent. Further, this bill would extend the period to collect information and would require the Judicial Council to report thereon to the Legislature by July 1, 2003.

Existing law establishes standards for arbitration.

This bill would require arbitrators to comply with ethical standards adopted by the Judicial Council beginning July 1, 2002. This bill would also require the Judicial Council, consistent with the standards established for arbitrators in the judicial arbitration program, to adopt ethics standards that address the disclosure of conflicts of interest, including prior service as an arbitrator or other dispute resolution neutral entity, disqualifications, the acceptance of gifts, and the establishment of future professional relationships. The bill would also specify the grounds upon which a proposed neutral arbitrator may be disqualified and the procedure to do so including the form of the petition to disqualify.

Existing law requires the court to vacate an arbitration award if the arbitrator, upon receipt of a timely demand, fails to disqualify himself or herself from the proceedings.

This bill would also require the courts to dismiss an arbitration award if the arbitrator failed to disclose, within the time required for disclosure, grounds for disqualification of which the arbitrator was then aware.

This bill would also make a declaration of legislative intent regarding the grounds for vacating arbitration awards.

Ch. 363 (AB 606) Negrete McLeod. State employees: memorandum of understanding.

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of a memorandum of understanding entered into between the state employer and State Bargaining Unit 7, the California Union of Safety Employees, and would provide that the

provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that provisions of the memorandum of understanding approved by this bill that require the expenditure of funds shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer, and the affected employee organization shall meet and confer to renegotiate the affected provisions.

Existing law prescribes contribution rates for state employees who are state miscellaneous, state industrial, or state safety members of the Public Employees' Retirement System.

This bill would reduce the contribution rates by 2¹/₂% during the period from August 31, 2001, to June 30, 2002, inclusive, and by an additional 2¹/₂% during the period from July 1, 2002, to June 30, 2003, inclusive for state employees who are state miscellaneous, state industrial, and state safety members of the Public Employees' Retirement System in State Bargaining Units 7 and 8.

Existing law provides that the home address of any of a list of state officers and employees that appears in any record of the Department of Motor Vehicles is confidential if requested by the officer or employee.

This bill would add to that list state employees employed as Museum Security Officers and state employees in specified job classifications within the Department of Motor Vehicles and California Highway Patrol.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 364 (AB 649) Negrete McLeod. State employees: memoranda of understanding: State Bargaining Units 5 and 8.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of memoranda of understanding entered into between the state employer and State Bargaining Units 5 (California Association of Highway Patrolmen) and 8 (California Department of Forestry Employees Association), and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would also provide that provisions of the memoranda of understanding approved by this bill that require the expenditure of funds shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer, and the affected employee organization shall meet and confer to renegotiate the affected provisions.

(2) Existing law provides that in any case where specified provisions of the State Civil Service Act and the Public Employees' Retirement System and related statutory provisions are in conflict with the provisions of a memorandum of understanding reached between the state employer and a recognized employee organization, the memorandum of understanding shall be controlling without further legislative action.

This bill would specify additional statutory provisions to which this provision would apply with respect to state employees in State Bargaining Units 8, 12 (International Union of Operating Engineers), and 13 (International Union of Operating Engineers).

(3) Existing law requires that for each class of state employees there shall be a general reemployment list; however, there are different requirements for the general reemployment list for State Bargaining Units 5 and 8.

This bill would delete the different requirements for general reemployment lists for those units.

(4) Existing law provides that a probationary period for state employees in State Bargaining Units 5, 6, and 8 may extend from 6 months to 2 years, while the general probationary period is from 6 months to one year.

This bill instead would apply the general probationary period to state employees in State Bargaining Units 5 and 8.

(5) Existing law provides that if discrimination, as defined, has occurred against a state employee in State Bargaining Unit 6 or 8, seniority may be added by the State Personnel Board.

This bill would make that provision inapplicable to State Bargaining Unit 8.

(6) Existing law establishes certain procedures for layoffs of state employees and makes specific procedures for transfers, layoffs, and demotions, in lieu of layoffs, of state employees in State Bargaining Units 5, 6, and 8.

This bill would make those specific procedures inapplicable to State Bargaining Units 5 and 8.

(7) Existing law establishes procedures for the adoption of regulations by the Department of Personnel Administration applicable only to state employees in State Bargaining Units 5, 6, or 8.

This bill would make those provisions inapplicable to State Bargaining Units 5 and 8.

(8) Existing law makes specific provisions for salary adjustments for state employees in State Bargaining Units 5 and 8, and exempts them from other provisions relating to automatic salary adjustments.

This bill would delete those specific provisions and exemptions.

(9) Existing law authorizes a state agency appointing power, with approval of the Department of Personnel Administration, to authorize payment at any step above the minimum salary limit to classes or positions of state employees in State Bargaining Unit 8 to correct salary inequities.

This bill would repeal that authority.

(10) Existing law prescribes contribution rates for state employees who are state peace officer/firefighter members of the Public Employees' Retirement System.

This bill would reduce the contribution rates by 2¹/₂% during the period from August 31, 2001, to June 30, 2002, inclusive, and by an additional 2¹/₂% during the period from July 1, 2002, to June 30, 2003, inclusive, for certain of those employees excluded from collective bargaining or civil service.

(11) The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 365 (AB 906) Salinas. State employees: memorandum of understanding: State Bargaining Units 10, 12, 13, 16, 18, and 19.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of memoranda of understanding entered into between the state employer and State Bargaining Units 10, 12, 13, 16, 18, and 19 and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would also provide that provisions of the memoranda of understanding approved by this bill that require the expenditure of funds shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer, and the affected employee organization shall meet and confer to renegotiate the affected provisions.

(2) Existing law prescribes contribution rates for state employees who are members of the Defined Benefit Program of the State Teachers' Retirement Plan and for state employees who are state miscellaneous, state industrial, or state safety members of the Public Employees' Retirement System.

This bill would reduce the contribution rates by 2¹/₂% during the period from August 31, 2001, to June 30, 2002, inclusive, and by an additional 2¹/₂% during the period from July 1, 2002, to June 30, 2003, inclusive, for state employees who are members of the Defined Benefit Program of the State Teacher's Retirement Plan; state miscellaneous, state industrial, and state safety members of the Public Employees' Retirement System in State Bargaining Units 10, 12, 13, 16, 18, and 19; and excluded, as defined, and specified non-civil service state miscellaneous, state industrial, and state safety members of the system, as specified.

(3) Existing law establishes personnel and retirement system classifications and salary ranges that are applicable only to state employees in State Bargaining Unit 19.

This bill would delete those provisions.

(4) Existing law establishes procedures relating to state employee discipline and merit awards.

This bill would provide that those discipline procedures, as they apply to members of State Bargaining Units 8, 12, and 13, would be subject to modification pursuant to the terms of a memorandum of understanding between the state employer and that bargaining unit, as specified; and those provisions relating merit awards, as they apply to members of State Bargaining Unit 16, would be subject to modification pursuant to the terms a memorandum of understanding between the state employer and that bargaining unit. The bill would also make certain other employee discipline provisions inapplicable to State Bargaining Unit 16, as specified.

(5) The Public Employees' Retirement Law prescribes increased death or disability benefits for certain state miscellaneous or state industrial members whose death or disability arises out of and in the course of employment, as specified.

This bill would provide that state miscellaneous members employed by the State Department of Developmental Services at Porterville Developmental Center would be eligible for those benefits in specified circumstances.

(6) Under the Public Employees' Retirement Law, specified employees of the Department of Corrections have been classified as state safety members. Existing law provides that when those officers or employees become safety members, they may, within 90 days after notification by the board, elect to remain state industrial members.

This bill would authorize employees of the Department of Corrections in the job classifications of dentist, physician and surgeon, staff psychiatrist, or podiatrist, who previously elected to remain state industrial members, to elect, during a specified period, to become state safety members.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 366 (AB 933) Migden. State employees: compensation.

The annual Budget Act appropriates specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for state employee compensation.

This bill would appropriate \$69,515,000 from those funds for state employee compensation, in augmentation of the Budget Act of 2001.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual and current expenses of the state.

Ch. 367 (AB 328) Salinas. Mental health realignment: reports.

Existing law establishes various programs providing mental health services administered by counties and funded through several state and local revenue sources.

This bill would require the State Department of Mental Health, in collaboration with the California Mental Health Directors Association and other relevant parties, to submit specified data on the current status of county mental health programs. This bill would require the department to submit the data to the Legislature by April 1, 2002.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 368 (AB 533) Cedillo. Landlord-tenant: payments.

Existing law regulates the relationship between landlord and tenant, as specified.

This bill would provide, with respect to commercial leases and nonresidential tenancies, that it is unlawful for any person (1) to require, demand, or cause to make payable any payment of money, including, but not limited to, "key money," however denominated, or the lessor's attorney's fees, as a condition of initiating, continuing, or renewing a lease or rental agreement unless the amount of the payment is stated in the written lease or rental agreement. Any payment in violation of this provision would be subject to a civil penalty of 3 times the amount of actual damages proximately suffered by the person seeking to obtain the lease of the real property, and the person so damaged would be entitled to an award of costs, including reasonable attorney's fees, reasonably incurred in connection with obtaining the civil penalty. The bill would also contain clarifying provisions.

Ch. 369 (AB 708) Bill Campbell. Retail food facilities: internal food temperatures.

Existing law, the California Uniform Retail Food Facilities Law, provides for the regulation of health and sanitation standards for retail food facilities by the State Department of Health Services. Violation of any of these provisions is a crime. Under existing law, pork shall be heated to an internal temperature of 68 degrees C (155 degrees F), and foods containing certain raw or incompletely cooked animal tissue that is heated in a microwave shall be heated at a minimum internal temperature of at least 14 degrees C (25 degrees F) above specified minimum cooking temperatures.

This bill would instead require pork to be heated to an internal temperature of 63 degrees C (145 degrees F), and would require microwaved foods containing raw or incompletely cooked animal tissue to be heated to an internal temperature of 74 degrees C (165 degrees F).

This bill would require that when any potentially hazardous food, as defined, that has been prepared, cooked, cooled, and is reheated by a food facility, for hot holding, it shall be reheated to a minimum internal temperature of 74 degrees C (165 degrees F).

The bill would also require that when any potentially hazardous food, as defined, is taken from a commercially processed, hermetically sealed container or other intact package from a regulated food processing plant and is thereafter heated by a food facility for hot holding, the minimum internal temperature must be at least 60 degrees C (140 degrees F).

Existing law requires each food facility, as defined, to have an owner or employee who has successfully passed an approved and accredited food safety examination, on or before January 1, 2000.

This bill would exclude from the definition of a food facility for these purposes any food facility that handles only unpackaged, nonpotentially hazardous foods.

Existing law defines an "open-air barbecue facility" for purposes of retail food sales, and exempts these facilities from existing enclosure requirements, in accordance with specified criteria.

This bill would recast and revise the definition of an open-air barbecue facility, and the related enclosure requirements.

Under existing law, enforcement officers are charged with the enforcement of the California Uniform Retail Food Facilities Law.

This bill would revise the provisions relating to the duties of enforcement officers, and would make it a violation of the retail food facilities provisions for any person to refuse to permit specified activities relating to the inspection of premises or records, or the taking of evidence.

Existing law requires all utensils and equipment to be scraped, cleaned, or sanitized as circumstances require.

This bill would revise the existing cleaning and sanitization requirements for equipment food-contact surfaces and utensils.

Under existing law relating to mobile food facilities, a tamale is considered prepackaged if it is distributed to customers in its original, labeled, inedible wrapper.

This bill would delete the requirement that the tamale wrapper be labeled, in order for it to be designated prepackaged.

This bill would also recast and revise the requirements relating to the maintenance and storage of potable and wastewater tanks for mobile food facilities.

This bill would exempt mobile food facilities approved prior to January 1, 2002, that are limited to the portioning and dispensing of nonprepackaged, nonpotentially hazardous food, from specified hand and utensil washing sink requirements, under certain circumstances.

By changing existing requirements and creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 370 (AB 1046) Migden. Sharps injury prevention.

Existing law requires the Occupational Safety and Health Board to adopt specified regulations regarding bloodborne pathogens that shall include standards and practices related to sharps injury prevention technology.

This bill would make clarifying changes to this provision and would require the Department of Health Services to maintain a Sharps Injury Control program that shall, among other things, maintain a continuously updated list of existing needleless systems and needles with engineered sharps injury prevention.

The bill would also declare the intent of the Legislature to appropriate \$300,000 to implement this act.

Ch. 371 (AB 1426) Wright. Child support: earnings assignment.

Existing law provides for the enforcement of child support. Employers are required to withhold child support payments from employees' earnings that are subject to an earnings assignment order. If an employer withholds support pursuant to an earnings assignment order, but fails to forward the support to the obligee, the local child support agency is required to take appropriate action to collect the withheld sums.

This bill would provide that the child support obligee or the local child support agency upon application may obtain an order requiring payment of support by electronic transfer from the employer's bank account when the employer has willfully failed to comply with the assignment order or when the employer has otherwise failed to comply with the assignment order on 3 separate occasions within a 12-month period. The bill would also provide that the court may impose a civil penalty on the employer of up to 50% of the support amount that has not been received by the obligee under specified circumstances. In addition, the

employer would be liable to the obligee for any interest incurred as a result of the employer's failure to forward the payment pursuant to the assignment order.

Ch. 372 (AB 1452) Cox. Vaccinations: meningococcal disease.

Existing law makes provision for the administration of vaccinations to children and certain college students.

This bill would require the State Department of Health Services to develop information regarding meningococcal disease. This bill would require the department to make the information available to requesting school districts and degree-granting postsecondary educational institutions. This bill would require that the information be provided by each degree-granting public postsecondary educational institution that provides on-campus housing, to each incoming freshman who has been accepted for admission and will be residing in on-campus housing. Each degree-granting public postsecondary educational institution that provides on-campus housing would be required to require each incoming freshman of each public postsecondary institution to return to the institution a completed response form indicating whether the incoming freshman received the information and whether or not he or she chooses to receive the vaccination. Each public postsecondary institution would be required by this bill to maintain the records in the same manner as it maintains other confidential student records.

This bill would require each degree-granting private postsecondary educational institution that provides on-campus housing to adopt a policy to notify all incoming students about meningococcal disease and the availability of the vaccination, beginning with the 2002-03 school year.

This bill would apply to the University of California only to the extent that the regents make it applicable.

Because this bill would require community colleges to comply with its requirements, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 373 (AB 1552) Committee on Agriculture. Agricultural products.

Existing law establishes the biomass-to-energy incentive grant program administered by the Department of Food and Agriculture.

This bill would provide that procedures, forms, and guidelines implementing environmental grant programs of the department are exempt from submission to the Office of Administrative Law.

Existing law generally regulates direct marketing of agricultural products, including marketing in farmers' markets.

This bill would, in addition, impose additional requirements relating to sales, transport, packaging, and labeling of products sold at farmers' markets and would permit various inspections by enforcing officers. Violation of these provisions would be a misdemeanor, pursuant to existing law.

By creating new crimes, this bill would impose a state-mandated local program.

Existing law authorizes the Secretary of Food and Agriculture or the county agricultural commissioner to assess civil penalties for violations relating to certified farmers' markets.

This bill, in addition, would authorize the secretary and county agricultural commissioners to administer civil penalties and certificate suspensions irrespective of the county in which the violation occurred or the county in which the certificate was issued.

Existing law creates the California Tomato Commission in state government, and prescribes the membership, functions, and duties of the commission.

For the purpose of those provisions, existing law defines “tomatoes” to mean all tomatoes that are produced for commercial purposes and are handled within the state in fresh form, except cherry tomatoes, tomatoes grown in a greenhouse either under glass or plastic, and hydroponically grown tomatoes, as defined.

This bill would recast those provisions to define “tomatoes” to mean all tomatoes that are produced for commercial purposes and are handled within the state in fresh form, except cherry tomatoes, and tomatoes grown in a greenhouse, as specified.

Existing law specifies the powers and duties of the California Tomato Commission, including, among other things, the authority to accept contributions of funds for purposes of promoting and maintaining the tomato industry.

This bill would, in addition, authorize the commission to solicit contributions for these purposes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 374 (SB 212) Oller. Meningococcal disease.

Existing law contains various vaccination requirements related to school attendance.

This bill would require the State Department of Health Services to develop a Meningococcal Disease Strategic Prevention Plan. In developing the plan the department would be required to review various scientific and medical references, other governmental disease prevention programs, and health coverage programs.

This bill would also require the department to involve and receive input from victims of meningococcal disease and their families in the development of the plan.

This bill would require the department to have the plan completed and made available to the Legislature on or before June 30, 2002.

This bill would appropriate \$100,000 from the General Fund to the State Department of Health Services for the purposes of the bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 375 (SB 322) Ortiz. Tobacco.

Existing law regulates the distribution and sales of various types of tobacco products in the state, and specifies civil and criminal sanctions for violations of that regulatory scheme.

This bill would prohibit any person from selling, offering for sale, distributing, or importing a tobacco product referred to as bidis or beedies unless the product is sold, offered for sale, or intended to be sold in a business that excludes minors from its premises. This bill would make a violation of this prohibition a misdemeanor or would make that person subject to civil action.

By revising the definition of existing crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 376 (SB 757) Ortiz. Tobacco control.

Existing law vests with the State Department of Health Services primary responsibility for enforcement of tobacco control laws, and requires the department to conduct random onsite inspections at retail sites and to enlist the assistance of persons under the age of 18 in conducting the enforcement activities.

This bill would authorize the department to conduct onsite sting inspections in response to public complaints regarding the sale of tobacco products to minors or at retail locations where previous violations have occurred. This bill would also authorize the department to investigate illegal sales of tobacco products to minors by telephone, mail, or the Internet.

This bill would also provide that a peace officer is required to identify to the seller the identity of the person under 18 years of age who engaged in the sale of tobacco products. This bill would also require the department to notify the retail establishment of the inspection following an attempted sale.

Under existing law, it is unlawful to sell tobacco products from a vending machine or appliance except vending machines located at least 15 feet from the entrance of a public premise licensed to sell alcohol.

This bill would make it unlawful for any person engaged in the retail sale of tobacco products to sell, offer for sale, or display cigarettes by self-service display, as defined, except in specified circumstances, and would impose civil penalties for violation of this prohibition. It would authorize the Attorney General, a city attorney, a county counsel, or a district attorney to bring a civil action to enforce this provision.

Under existing law, it is unlawful for any person, agent, or employee of a person in the business of selling or distributing smokeless tobacco or cigarettes to engage in the nonsale distribution of tobacco in certain public areas, as defined.

This bill would include within the prohibition the nonsale distribution of smokeless tobacco or cigarettes on any private property that is open to the public, except as specified.

Existing law provides that every person, firm, or corporation that knowingly sells, gives, or in any way furnishes to another person under 18 years of age, any tobacco or prescribed tobacco-related product, is subject to either a criminal action for a misdemeanor or to a civil action to be brought by a city attorney, a county counsel, or a district attorney.

This bill would make a person, firm, or corporation who knowingly, or under circumstances in which it has knowledge, or should have had knowledge of the person's minority age, subject to criminal prosecution. By expanding the scope of existing crimes, thus imposing new duties upon local agencies, this bill would impose a state-mandated local program.

Existing law imposes an infraction on a person who sells cigarettes that are not contained in a sealed and properly labeled package, as defined.

This bill would impose an infraction or civil penalty for the manufacturing, distribution, sale, or offering of a package of cigarettes that does not contain at least 20 cigarettes or a package of roll-your-own tobacco that does not contain at least 0.60 ounces of tobacco. Because this bill would create a new infraction, thus imposing new duties upon local agencies, the bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 377 (SB 769) Figueroa. Sentry dogs.

Existing law establishes limitations and procedures with respect to the use of sentry dogs.

This bill would require any person, firm, partnership, association, or corporation that operates or maintains a business to sell, rent, or train any attack, guard, or sentry dog to obtain a permit from the local public agency or private society or pound contracting with the local public agency for animal care or protection services. The bill would also require each local public agency to adopt and implement a permit program for the administration of the permit

requirement by the local public agency or private society or pound contracting with the local public agency for animal care or protection services and would permit the local public agency to pass an ordinance establishing standards for the care of animals under this bill. This bill would also give the local agency the authority to revoke, in specified circumstances, any permit it has issued. This bill would also require microchipping of animals subject to this bill for identification purposes, and would also require certain immunizations of the animals. This bill would also establish civil penalties for violation of its provisions.

To the extent this bill would increase the responsibilities of local agencies, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 378 (SB 819) Johnson. Child day care facility.

Existing law requires that if a death or injury occurs to a child while in the care and control of a child day care provider because of abuse or willful neglect by the personnel of the facility, the local child protective agency must be notified.

Under existing law, within 2 days of receipt of evidence that the death or serious injury occurred at a child day care facility, the department shall temporarily suspend the license, registration, or special permit of the facility. The Director of Social Services is required to request that the law enforcement agency responsible for investigating the death or serious injury expedite the investigation and provide evidence as long as it will not affect the criminal prosecution.

This bill would require that the department reopen an investigation into a licensed child day care facility when any person provides the department with a certified copy of a court record in which a judicial officer has determined that a child's injury may have been inflicted while in the custody of the day care facility.

Ch. 379 (SB 1177) Polanco. Cornfield rail yards.

Existing law requires the Department of Parks and Recreation to develop, operate, and maintain units of the state park system.

This bill would authorize the department to use \$36,000,000 appropriated by specified items of the Budget Act of 2001 for the acquisition, planning, design, environmental assessment, and environmental cleanup of the 32-acre parcel known as the "Cornfield" rail yards in the City of Los Angeles.

The bill would require the Director of Parks and Recreation, not later than February 1, 2002, to establish the Cornfield State Park Advisory Committee, which would be responsible for assisting the department, in an advisory capacity, to plan for interim and permanent land uses and facilities through the general planning process for the Cornfield site. The bill would also require the department to take specified actions with respect to the development of a state park at the Cornfield site.

Ch. 380 (SB 1219) Romero. Health coverage: cervical cancer screening test.

Existing law provides for the licensure and regulation of health care service plans by the Department of Managed Health Care and for the regulation of policies of disability insurance by the Insurance Commissioner. Under existing law, a health care service plan contract and a disability insurance policy that include coverage for the treatment or surgery of cervical

cancer are required to provide coverage for an annual cervical cancer screening test. Existing law makes a willful violation of the provisions pertaining to health care service plans a crime.

This bill would require a health care service plan contract and a disability insurance policy issued, amended, or renewed on or after January 1, 2002, that include coverage for the treatment or surgery of cervical cancer to provide coverage for an annual cervical cancer screening test in accordance with deductible or copayment provisions contained in the plan contract or policy that includes the conventional Pap test and the option of any cervical cancer screening test approved by the federal Food and Drug Administration, upon the referral of the patient's health care provider. The bill would provide that, in regards to a disability insurance policy, it would not apply to vision only, dental only, Medicare supplement, CHAMPUS supplement, long-term care, or disability income insurance nor would it impose a new benefit mandate on accident only, hospital indemnity, or specified disease insurance.

Because this bill would change a requirement pertaining to the regulation of a health care service plan, the willful violation of which would be punishable as a criminal offense, it would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 381 (AB 169) Wiggins. Property tax revenue allocations: audits.

Existing property tax law establishes various procedures and requirements with respect to the annual apportionment and allocation of ad valorem property tax revenue. Existing law requires the Controller to regularly audit the apportionment and allocation by counties of property tax revenue in accordance with a specified formula and to submit an annual report to the Legislature containing a description of the audit findings along with recommendations to correct any errors.

This bill would deem to be correct any allocation of property tax revenue that was subject to a prior, completed audit by the Controller under a specified statute, and those legislation implementation guidelines issued by the State Association of County Auditors with the approval of state officials. This bill would also prohibit, with regard to any error in property tax revenue allocation methods, a cumulative reallocation or adjustment that exceeds 1% of the current year's original secured roll tax levy. This bill would require any reallocation or adjustment to be completed in equal increments within the following 3 fiscal years or as negotiated with the Controller in the case of reallocation to the Educational Revenue Augmentation Fund or to schools, and would require the subject county auditor to correct the allocation method in the fiscal year following the fiscal year in which the error is discovered.

Ch. 382 (AB 174) Oropeza. Pupil performance: Compton Unified School District.

Existing law requires, until January 1, 2002, the State Department of Education to identify the three lowest performing elementary schools in the Compton Unified School District for purposes of extending the school year for certain pupils who are performing in mathematics or English language arts at 2 or more grade levels below the grade level in which they are enrolled and authorizes, until January 1, 2002, the Compton Unified School District to identify additional schools in the district and extend their school year instruction. Existing law requires, until January 1, 2002, that the attendance of those pupils subject to the extended school year shall be excluded from the determination of average daily attendance. Existing law requires, until January 1, 2002, the district to test specified pupils at certain times and the department to review teacher compensation in certain low performing schools and, in

conjunction with the Legislative Analyst, to contract for an independent evaluation to determine the effectiveness of the extended school year curriculum and related matters.

This bill would extend the repeal date of these provisions to January 1, 2003, thereby extending the application of these provisions and imposing a state-mandated local program. The bill would, in addition to the evaluation required pursuant to existing law, require a second independent evaluation to further determine the effectiveness of the extended school year curriculum and related matters. The bill would require that the results of the second evaluation be reported on or before January 1, 2003, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 383 (AB 180) Cedillo. Sales and use tax exemption: charitable thrift stores.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from this tax, including an exemption for retail items sold by thrift stores operated by a nonprofit organization, if the purpose of that thrift store is to obtain funding for medical and social services provided to individuals with HIV disease or AIDS by the nonprofit organization. This exemption will be repealed on January 1, 2002.

This bill would revise the definition of a nonprofit organization eligible for this exemption to include organizations that provide hospice services to persons with HIV disease or AIDS. This bill would extend the repeal date of the exemption to January 1, 2007.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from the state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 384 (AB 236) Kelley. Agriculture: the Egg Commission: agricultural markets.

(1) Existing law establishes the Egg Commission and provides a definition of "handler" for purposes of the provisions governing the Egg Commission. The definition provided under existing law, among other things, specifies that when the handler is a corporation, all of the directors and officers of the corporation in their capacity as individuals shall be included within the definition.

This bill would additionally provide that any handler that owns, controls, or is affiliated with any other person engaged in the handling of eggs in any marketing year shall be considered to be the handler of all eggs handled by that person. The bill would provide a definition of the term "person" for purposes of the provisions governing the Egg Commission.

(2) Existing law sets out various powers and duties of the California Egg Commission, including the promotion and sale of eggs and egg products by advertising and other

promotional means, to maintain and expand present markets and create new and larger intrastate, interstate, and foreign markets for eggs and egg products, and to educate and instruct the public, as specified.

This bill would also authorize the commission to petition the Secretary of Food and Agriculture to adopt and administer any activity authorized by the California Marketing Act of 1937 relating to the commodity covered by the commission, as specified.

Ch. 385 (AB 319) Salinas. Mail ballot elections.

Under existing law, any local, special, or consolidated election may be conducted wholly by mail under specified circumstances.

This bill would provide that any election in Monterey County may be conducted wholly by mail, subject to specified conditions.

Ch. 386 (AB 458) Rod Pacheco. Honors courses.

Existing law requires the governing board of every school district to enforce in its schools the courses of study and the use of textbooks and other instructional materials prescribed by the proper authority.

This bill would prohibit a school district, when calculating a pupil's grade point average, from assigning extra grade weighting to a course that covers a subject required for admission to the University of California or the California State University unless the University of California approves the course for extra grade weighting.

Ch. 387 (AB 706) Firebaugh. Campaign literature: use of official seals.

Existing law provides that every person who maliciously or for commercial purposes uses or allows to be used any reproduction or facsimile of the Great Seal of the State in any manner whatsoever is guilty of a misdemeanor.

This bill, in addition, would provide that a person who uses or allows to be used any reproduction or facsimile of the Great Seal of the State in any campaign literature or mass mailing, as defined, with intent to deceive the voters, is guilty of a misdemeanor.

Existing law authorizes a county board of supervisors to adopt a county seal, and authorizes a city council of a general law city to adopt a city seal.

This bill would provide that any person who uses or allows to be used any reproduction or facsimile of the seal of a county or a city in any campaign literature or mass mailing, as defined, with intent to deceive the voters, is guilty of a misdemeanor.

Existing law requires that each court in this state have an official seal and that the clerk of the court keep the official seal of the court.

This bill would provide that a person who uses or allows to be used any reproduction or facsimile of the seal of the California Supreme Court, an appellate court, or the seal of any superior court in any campaign literature or mass mailing, as defined, with intent to deceive the voters, is guilty of a misdemeanor.

This bill would provide that, for purposes of this bill, the use of a reproduction or facsimile of a seal in a manner that creates a misleading, erroneous, or false impression that the document is authorized by a public official is evidence of intent to deceive.

This bill, by adding to the definition of the crime of misdemeanor, would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 388 (AB 720) Committee on Local Government. Local agency formation.

The Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 governs the procedures for the formation, change of organization, and reorganization of cities and special districts. The act provides that the county board of supervisors may authorize payment of a

per diem to local agency formation commission members and alternates for each day while they are in attendance at meetings of the commission.

This bill would make numerous technical and conforming changes in provisions of that act and repeal an obsolete provision. The bill would provide instead that the local agency formation commission may authorize payment of a per diem to its members and alternates.

This bill would incorporate additional changes in Section 56985 of the Government Code proposed by AB 1495 and additional changes in Section 57114 of the Government Code proposed by AB 948 that would become operative if those bills and this bill are enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 389 (AB 795) Dutra. Real estate.

Existing law, the Real Estate Law, requires the licensure of a person by the Real Estate Commissioner to engage in the business of, act in the capacity of, or advertise or assume to act as, a real estate broker or a real estate salesman within this state. Existing law authorizes the commissioner to suspend or revoke the license of a licensee, or deny the issuance of a license to an applicant, who has committed certain acts. Existing law requires a real estate broker to file certain information with the commissioner relative to the conducting of a transaction that involves the sale of or offer to sell a series of notes secured directly by an interest in real property, or the sale of undivided interests in a note secured directly by real property equivalent to a series transaction, otherwise known as a multilender transaction, as specified. Existing law requires a real estate broker who negotiates a loan to be secured by real property to deliver to the borrower a statement in writing containing certain information about the terms and costs of the loan unless, in the case of a federally regulated residential mortgage loan, the borrower is provided with a good faith estimate prepared pursuant to the federal Real Estate Settlement Procedures Act, applicable disclosures required by the federal Truth in Lending Act, and other disclosures with respect to loans with balloon payment provisions. Existing law provides that a violation of the Real Estate Law is a crime.

This bill would authorize the commissioner to suspend or revoke the license of a licensee, or deny the issuance of a license to an applicant, who has failed to comply with the filing requirement imposed on those transactions secured directly by an interest in real property. The bill would require a broker or person who becomes the servicing agent for certain notes or interest that have been sold to file a certain notice with the commissioner and file a specified annual report. The bill would require a borrower to acknowledge, in writing, receipt of the good faith estimate and the disclosures required by the Truth in Lending Act prior to becoming obligated on a loan. The bill would require a broker to retain a copy of the written acknowledgment of the borrower for a period of 3 years. Because a violation of the bill's requirements would be a crime, this bill would impose a state-mandated local program by expanding the definition of a crime.

Existing law provides for creation of the Recovery Account in the Real Estate Fund, which is funded by fees imposed on licensees. Existing law provides that when an aggrieved person obtains a final judgment in a court of competent jurisdiction or an arbitration award against a defendant based upon the defendant's fraud, misrepresentation, or deceit, made with intent to defraud, or the defendant's conversion of trust funds, arising directly out of any transaction in which the defendant, while a real estate licensee, performed acts for which his or her license was required, the aggrieved person may file an application with the Department of Real Estate for payment from the Recovery Account of the amount unpaid in the judgment that represents an actual and direct loss to the claimant in the transaction. Upon payment of the application, the affected licensee's license is suspended until the Recovery Account is reimbursed.

This bill would provide that a final judgment in a court of competent jurisdiction for these purposes includes a judgment in a federal court but does not include a judgment in the court of another state. The bill would also revise the procedures for filing an application for a claim against the Recovery Account with the Real Estate Commissioner, for contesting payment,

and for obtaining judicial review of the commissioner's decision. The bill would enact other related provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 390 (AB 864) Thomson. Sanitation districts: City of West Sacramento.

Existing law provides for the composition of the board of directors of a sanitation district in the County of Sacramento, but specifies that if the district includes territory that is within a city, the board of directors shall be composed of the county board of supervisors and the presiding officer of the governing body of each of these cities.

This bill would provide that if the sanitation district also includes territory in the City of West Sacramento in Yolo County, the sanitation district board of directors shall also include the presiding officer of the governing body of the City of West Sacramento and, until January 1, 2005, or specified conditions are met, a member of the Yolo County Board of Supervisors whose district includes all, or the greater portion, of the population of the City of West Sacramento. It would also specify the extent of the voting powers of the member of the Yolo County Board of Supervisors on all sanitation district matters that come before the sanitation district board of directors.

Ch. 391 (AB 898) Leach. Income taxes: LLCs: fee adjustment.

The Personal Income Tax Law provides that a limited liability company doing business in this state shall pay annually a specified tax for the privilege of doing business in this state. In addition, that law requires that any limited liability company subject to that tax shall pay a fee, based upon total income from all sources reportable to this state, which is subject to adjustment pursuant to a study and determination by the Franchise Tax Board.

This bill would increase these fees, as specified, and would delete those provisions relating to the adjustment of that fee, as provided.

This bill would take effect immediately as a tax levy.

Ch. 392 (AB 1230) Papan. Finance lenders.

Existing law, the California Finance Lenders Law, requires the licensure of a person by the Commissioner of Corporations to engage in the business of a finance lender or broker. Existing law requires the commissioner to investigate specified individuals if an applicant for licensure is a corporation, trust, or association.

This bill would require the commissioner, if an applicant is a corporation, trust, or association, to investigate the applicant's principal officers, as defined.

Ch. 393 (AB 1249) Daucher. Railroad crossings: pilot projects.

Existing law requires that an audible warning device be sounded from a locomotive engine at least 1,320 feet before the intersection of the railroad and a street, road, or highway, with certain exceptions. Existing law imposes a civil fine on a railroad corporation that violates this provision and makes it a misdemeanor for a person in charge of a locomotive engine to fail to sound the warning. Existing law authorizes the commission to authorize on an application by application basis, and supervise, the operation of pilot projects to evaluate proposed crossing warning devices or new technology, and states the intent of the Legislature that the commission may authorize pilot projects to test the utility and safety of stationary, automated audible warning devices in the communities of Roseville and Lathrop.

This bill would also authorize the commission to authorize pilot projects to evaluate other additional safety measures. The bill would modify the statement of legislative intent to include pilot projects to test the utility and safety of stationary, automated audible warning devices in additional specified communities and in any other location determined to be

suitable by the commission, and to authorize, until January 1, 2003, supplementary safety measures, as defined, for use on rail crossings.

Ch. 394 (AB 1302) Committee on Education. Kindergarten readiness.

(1) Existing law establishes the Kindergarten Readiness Pilot Program. Existing law, for the 2001–02 school year, and each school year thereafter in which a school district continues to participate in the program, requires a school district to offer admission to first grade at the beginning of the school year, or at a later time in the same school year, only to children who will have their 6th birthday on or before September 1 of that school year.

This bill would delay the above provision to the 2002–03 school year and would specifically allow charter schools to participate in the program. The bill would permit school districts to implement the program in selected schools or on a districtwide basis.

(2) Existing law, for the 2002–03 school year, and each school year thereafter in which a school district participates in the Kindergarten Readiness Pilot Program up to and including the 2007–08 school year, requires the Superintendent of Public Instruction to allocate a grant of funds for developing and operating the program and funding necessary to fully mitigate the financial impact upon the district of the reduced attendance that results from the implementation of the program and states the intent of the Legislature to establish a mechanism to provide sufficient funding in future years to ensure that participating school districts are annually provided funding to fully mitigate any ongoing financial consequences from reduced enrollment due to participation in the program for every school year up to and including the 2013–14 school year.

Existing law appropriates \$100,000 from the General Fund to the Office of the Superintendent of Public Instruction for a statewide public information campaign to notify school districts and parents of the availability and goals of the Kindergarten Readiness Pilot Program.

This bill would delete from the grant of funds those funds required to fully mitigate the financial impact upon the district of the reduced attendance that results from the implementation of the program, delete the above statement of legislative intent, annually adjust the per-pupil funding amounts for inflation, and revise the method of calculating the amount of program funding a school district would receive. The bill would make the \$100,000 appropriation also available for other state operations costs to implement the Kindergarten Readiness Pilot Program in a timely manner, thereby making an appropriation.

(3) Existing law requires that in calculating changes in enrollment for purposes of calculating the state's minimum funding obligation for the public schools that the 2001–02 average daily attendance for school districts participating in the Kindergarten Readiness Pilot Program be calculated with each unit of participating kindergarten attendance counting as $1\frac{1}{3}$ unit of average daily attendance.

This bill would delete that provision.

(4) Existing law requires the Kindergarten Readiness Pilot Program to become inoperative on June 1, 2010, and repeals the program on January 1, 2011.

This bill would change those dates to July 1, 2009, and January 1, 2010, respectively.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 395 (AB 1359) Lowenthal. Housing: Predevelopment Loan Fund.

Existing law creates the Rural Predevelopment Loan Fund and the Urban Predevelopment Loan Fund, which are continuously appropriated to the Department of Housing and Community Development to make loans for specified housing purposes.

This bill would repeal the provisions relating to the Rural Predevelopment Loan Fund, except as specified, rename the Urban Predevelopment Loan Fund as the Predevelopment Loan Fund, transfer the balance of specified funds into that fund, and revise various criteria for expenditure of money under the Predevelopment Loan Program, thereby making an

appropriation. The bill would repeal obsolete provisions relating to the State Home Retention Account in the Rental Housing Construction Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 396 (AB 1367) Wiggins. Land use: school siting.

(1) Existing law authorizes the governing board of a school district, by a $2/3$ vote of its members, to render a city or county zoning ordinance inapplicable to a proposed use of school district property except when the proposed use is for nonclassroom facilities. The board is also required to give notice to the city or county within 10 days of taking the proposed action.

This bill would modify this authorization to also require the governing board of the school district to take this action only after the planning commission or other local planning agency of the city or county has received notice and copies of any relevant and available information, master plan, or other long range plan, including, if available, any proposed school facility needs analysis, that relates to the potential expansion of existing school sites or the necessity to acquire additional school sites, at least 45 days prior to completion of the needs analysis, master plan, or other long range plan.

(2) Existing law requires a local planning agency, prior to action by a legislative body to adopt or substantially amend a general plan, to refer the proposed action to, among other entities, any elementary, high school, or unified school district within the area covered by the proposed action.

This bill would provide that upon notification of the proposed action specified above, any elementary, high school, or unified school district may request a meeting within 15 days with the local planning agency on new school facilities and school sites to review and consider specified issues. The bill would also require the governing board of a school district to notify a city or county with land use jurisdiction within 45 days prior to the completion of a school facility needs analysis, as specified, and to meet with the city or county within 15 days following notification if a meeting is requested.

Because the bill would impose new duties on local planning officials, it would create a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 397 (AB 1548) Committee on Agriculture. Agriculture: commercial feed: agricultural commissions and councils.

(1) Existing law provides that it is a misdemeanor for any person to manufacture or distribute in this state any commercial feed without complying with the statutory and regulatory provisions relating to commercial feed, including a requirement that any commercial feed distributed within this state shall have affixed to it, or be accompanied by, a label containing, among other things, adequate directions, warnings, and caution statements that may be necessary for the safe use of any feed.

This bill would in addition provide that it is a misdemeanor for any person to use any commercial feed containing drugs or food additives except in compliance with all directions for use stated on any tag or label affixed to or accompanying the commercial feed. By creating a new crime, this bill would impose a state-mandated local program upon local governments.

(2) Existing law provides that the person having control of a seized or held lot of commercial feed found to be in violation may appeal the result of analysis to the Secretary of Food and Agriculture in writing within 5 days of receiving the notice of violation; upon receipt of the appeal, the secretary shall take a further sample of the lot of commercial feed in question for analysis; the cost of sampling and analysis shall be at the expense of the person that requests the appeal sample; and the findings from the appeal analysis are conclusive.

This bill would revise these provisions to instead provide that the manufacturer or guarantor of a seized or held lot of commercial feed found to be in violation may appeal the result of analysis to the secretary in writing within 10 days of receiving the notice of violation; upon receipt of the appeal, the secretary shall perform an additional analysis of the official sample representing the lot of commercial feed in question; the cost of analysis shall be at the expense of the person that requests the appeal; and the findings from the appeal analysis are final.

(3) Under existing law, one of the duties and powers of the California Sheep Commission is to promote the sale of lamb, wool, and their products throughout the state, nation, and world. The commission has the authority to establish an assessment rate to defray the operating costs of the commission and has done so with respect to all wool marketed by producers, as specified. "Wool" is defined for the purposes of these provisions as the shorn fiber of live sheep in the grease basis, including wool tags in the natural state before cleaning or scouring.

This bill would instead define "wool" for the purposes of these provisions as the shorn fiber of live sheep in the grease basis, including offsort wool or offsorts in the natural state before cleaning or scouring. The bill would define "offsort wool or offsorts" as wool which has become discolored from urine or feces, dung locks, or floor sweepings, wool which has been shorn from the belly of the sheep, or wool which has been shorn from the crotch area of a sheep. The bill would also authorize the commission to establish an assessment rate that is different for offsort wool or offsorts than for other wool, provided that the rate does not exceed the maximum assessment authorized.

(4) The bill would, with respect to the provisions relating to the production and marketing of sheep and wool, (A) revise the definitions of "handler," "marketing year," and "producer," as specified; (B) provide that the results of any research conducted by or on behalf of the Sheep Commission may be used by the commission in any way it deems appropriate and may be maintained in confidence by the commission and not disseminated to any person not subject to the provisions relating to the production and marketing of sheep and wool; (C) authorize the Sheep Commission to collect information, including, but not limited to, industry statistics; and (D) make it a misdemeanor to fail or refuse to render or furnish a report, statement, or record required by the Sheep Commission. By creating a new crime, this bill would impose a state-mandated local program upon local governments.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 398 (AB 1671) Committee on Water, Parks and Wildlife. Fish and game.

(1) Existing law, which is to be repealed on January 1, 2003, delineates the general regulatory powers of the Fish and Game Commission, including, among other things, the authority to establish, extend, shorten, or abolish open seasons and closed seasons, establish, change, or abolish bag limits and possession limits, and establish and change areas of territorial limits for the taking of any or all species or subspecies. That law also authorizes any regulation adopted pursuant to those provisions to supersede any section of the Fish and Game Code under specified circumstances.

This bill would extend those provisions indefinitely by repealing their repeal date. Since a violation of a regulation adopted by the commission is a misdemeanor under existing law,

the bill would impose a state-mandated local program by continuing in existence indefinitely crimes that otherwise would be repealed.

(2) Existing law imposes various duties on the Fish and Game Commission with respect to the implementation and enforcement of laws regulating the taking of fish and game in the state.

This bill would establish the Wildlife Violator Compact, the purposes of which would be to provide a means through which participating states, as defined, may join in a reciprocal program to effectuate specified policies regarding the protection and taking of fish and game in a uniform and orderly manner, and to provide for the fair and impartial treatment of wildlife violators operating within participating states in recognition of the violator's right to due process and the sovereign status of participating states. The bill would prescribe procedures for the administration and enforcement of the compact, as provided.

(3) Existing law establishes the Suisun Marsh Wetlands Enhancement and Mosquito Abatement Demonstration Program, until December 31, 2005, for the purpose of devising and evaluating methods by which wetland management techniques in the Suisun Marsh can be better integrated with mosquito abatement programs, and requires the Department of Fish and Game to award grant funds for the program to the Suisun Resource Conservation District until December 31, 2004.

This bill would change the repeal date of those provisions to June 30, 2005, and would also extend to June 30, 2005, the date until which those grant funds for the program would be required to be awarded to the district.

(4) Existing law requires the Suisun Resource Conservation District to submit a final report to the department on the program by March 1, 2005.

This bill would, instead, require that the final report be submitted to the department by June 1, 2005.

(5) Existing law requires that the sum of \$140,000 be appropriated from the General Fund to the department for allocation to the Suisun Resource Conservation District for the purpose of implementing the program, and requires the department to allocate the sum of \$35,000 to the conservation district in each of the 2000–01, 2001–02, 2002–03, and 2003–04 fiscal years, as prescribed.

This bill would additionally require the department to allocate the sum of \$35,000 to the conservation district for the 2004–05 fiscal year, thereby making an appropriation.

(6) Existing law requires the department to impose and collect a filing fee of \$850 to defray the cost of identifying streams and providing studies pursuant to specified provisions governing streamflow protection standards, but provides that the fee shall not be imposed on certain types of permit applications filed with the State Water Resources Control Board.

This bill would include within those types of applications exempt from the payment of the fee, water applications or petitions, the primary purpose of which is to benefit fish and wildlife resources, as determined by the department.

The bill would require that only one filing fee be required for applications or petitions for the same appropriation transfer, extension, or change, if an applicant or petitioner files multiple applications or petitions for the same appropriation, and the State Water Resources Control Board reviews and considers the applications or petitions together.

(7) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the Department of Fish and Game to carry out the Fish and Game Code and to the commission for the payment of the compensation and expenses of the commissioners and employees of the commission. Because this bill would continue indefinitely existing duties imposed on the commission that otherwise would be repealed, the bill would make an appropriation.

(8) The bill also would correct an erroneous cross-reference.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 399 (AB 1720) Committee on Higher Education. Private postsecondary and vocational education: Joint Legislative Sunset Review Committee: Bureau for Private Postsecondary and Vocational Education: California Postsecondary Education Commission: report.

The existing Private Postsecondary and Vocational Education Reform Act of 1989, which is administered by the Bureau for Private Postsecondary and Vocational Education in the Department of Consumer Affairs, generally effectuates legislative intent to ensure minimum standards of instructional quality and institutional stability in private postsecondary educational institutions. Existing law establishes the California Postsecondary Education Commission as the statewide postsecondary education planning and coordinating agency and as an adviser to the Legislature and the Governor.

Existing law establishes the Joint Legislative Sunset Review Committee, and specifies its duties with respect to the review of various boards and commissions. Existing law requires the committee, in 2002 and every 4 years thereafter, to hold a public hearing to receive testimony from the Director of Consumer Affairs, the Bureau for Private Postsecondary and Vocational Education, private postsecondary educational institutions regulated by the bureau, and students of those institutions.

Existing law establishes the California Postsecondary Education Commission for, among other purposes, the collection of data pertinent to the planning and coordination of the higher education system of the state.

This bill would require the committee to conduct the public hearing in cooperation with the commission. The bill would also require the committee, in cooperation with the commission, to review and evaluate the effectiveness and efficiency of the bureau based upon specified factors and standards of performance.

The bill would require the committee to report its findings and recommendations to the Department of Consumer Affairs in accordance with a prescribed statute. The bill would also require the bureau to prepare an analysis and submit a report to the committee in accordance with prescribed criteria.

Ch. 400 (AB 1737) Committee on Budget. Budget Act of 2001.

Existing law, as set forth in the Budget Act of 2001, makes various appropriations for the support of state government for the 2001–02 fiscal year.

This bill would revise the Budget Act of 2001 by augmenting, reappropriating, making technical changes, and correcting references to certain appropriations, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 401 (SB 214) Alpert. School districts: boards of education: community college districts.

Under existing law, every school district is required to be under the control of a board of school trustees or a board of education. Existing law prescribes the powers and duties of boards of education as well as the procedures for electing or appointing a member to a board of education. Existing law establishes the California Community College system, under which community college districts throughout the state are administered by governing boards. Existing law establishes the amount of compensation a member of a county board of education and a member of a governing board of a school district or community college district may receive for attending board meetings. For a member of a county board of education, the amount of compensation varies according to the classification of the county based on its average daily attendance. For a member of a school district or community college governing board, the amount varies based on the average daily attendance of the school district for the prior school year.

This bill would authorize the county board of education, the governing board of a school district, and the governing board of a community college district to increase the compensation of individual board members of the county board of education, the governing board of a school district, and the governing board of a community college district, respectively, beyond the limits provided by those provisions by an amount not to exceed 5% based on the present monthly rate of compensation, to be effective upon the approval of the county board of education, governing board of the school district, or governing board of the community college district, respectively, but subject to rejection by a majority of the electors in that district voting in a referendum established for that purpose.

Ch. 402 (SB 323) O'Connell. California State University: real property exchange.

Existing law establishes the various campuses of the California State University under the administration of the Trustees of the California State University.

This bill would, notwithstanding any other provision of law, authorize the trustees to exchange a portion of a prescribed parcel located approximately 8 miles from, and maintained by, the California State University, Channel Islands, for land, or for a combination of land and money, in accordance with prescribed criteria. The bill would provide that any funds received from the transaction authorized by the bill would be appropriated to the trustees for expenditure, without regard to fiscal year, for construction and capital development of projects that are eligible for state support, following review and approval by the Department of Finance. The bill would require that the expenditure of funds received under the bill be consistent with the master plan of the campus for which the project is proposed. The bill would also require that any funds received under the bill that are not encumbered prior to January 1, 2007, revert to the General Fund.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 403 (SB 327) Scott. California State University: Program for Education and Research in Biotechnology.

Existing law establishes the California State University and its various campuses under the administration of the Trustees of the California State University. Existing law expresses legislative findings and declarations regarding the Program for Education and Research in Biotechnology, which was established to provide a coordinated and amplified development of biotechnology research and education within the university, to foster competitiveness in the industry on both the state and national levels, to facilitate training of a sufficient number of biotechnology technicians and scientists, to catalyze technology transfer and enhance intellectual property protection, and to facilitate the acquisition and long-term maintenance of state-of-the-art biotechnology resource facilities.

This bill would express legislative intent to provide additional state funding to the California State University for development of a bioscience center in Pasadena that would integrate research and innovation, applied workforce training, and incubation of new bioscience enterprise, as prescribed.

Ch. 404 (SB 346) Perata. Transportation: San Francisco Bay Area Water Transit Authority.

Existing law establishes the San Francisco Bay Area Water Transit Authority in state government and specifies the membership of the authority's governing board and the powers and duties of the authority, including a requirement that the authority prepare and adopt a San Francisco Bay Area Water Transit Implementation and Operations Plan, to be submitted to the Legislature on an unspecified date.

This bill would require the specified implementation and operations plan to be submitted to the Legislature for statutory approval, in accordance with a specified procedure.

The bill would specify the types of alternative fuels that may be included in a feasibility analysis and proposal required under the plan.

Ch. 405 (SB 1105) Margett. Special education.

(1) Existing law requires that each meeting to develop, review, or revise the individualized education program of an individual with exceptional needs be conducted by an individualized education program team and include certain representatives.

This bill would delete this provision and replace it with another similar provision, pertaining to the individualized education program team, but would include the pupil's regular education teacher. The bill would revise other requirements relating to the individualized education program.

The bill would require the individualized education program team to consider specified criteria when developing each pupil's individualized education program, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 406 (SB 1127) Karnette. Recycling: trash bags: rigid plastic containers: polystyrene.

(1) The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. The act requires every manufacturer that manufactures plastic trash bags of 0.75 mil or greater thickness to ensure that a trash bag intended for sale in this state contains a quantity of recycled plastic postconsumer material equal to at least 10% of the weight of the bag, or that at least 30% of the weight of the material used in all of the manufacturer's plastic products intended for sale in this state is recycled plastic postconsumer material. The board was required, until January 1, 2001, to credit a manufacturer, for purposes of compliance with those requirements, with having used 1.2 pounds of recycled plastic postconsumer material for each pound of recycled plastic postconsumer material purchased from a source of recycled plastic postconsumer material.

This bill would delete the January 1, 2001, limitation on the use of that credit, thereby reenacting the requirement upon the board to provide that credit with regard to the purchase of recycled plastic postconsumer materials.

(2) The act requires, except as specified, every rigid plastic packaging container, as defined, that is sold or offered for sale in the state to meet on average at least one of 5 criteria, including being made from 25% postconsumer material or having a prescribed recycling rate, based on annual reports published by the board.

Existing law imposes specified criminal fines and civil penalties upon a person who violates these manufacturing criteria, and requires the board to deposit the fines and penalties into the Rigid Container Account in the Integrated Waste Management Fund in the State Treasury. The board is required to use the moneys deposited in the Rigid Container Account, upon appropriation by the Legislature, to assist local governmental agencies to develop and implement collection and processing systems for the recycling of the materials subject to these manufacturing criteria.

This bill would additionally authorize the funds in the Rigid Container Account to be expended for the development of markets for those materials and for the board's costs of implementing these manufacturing requirements.

(3) The bill would require the board to conduct a study, by January 1, 2003, on the use and disposal of polystyrene in the state and to report to the Governor and the Legislature on the findings and recommendations made by the study.

Ch. 407 (SB 1181) Committee on Revenue and Taxation. Taxation.

(1) Existing law requires the county assessor to reassess any rezoned parcel in a timberland production zone on the basis of the value of the property in its rezoned use. Existing law allows the owner of the parcel to appeal this new valuation.

This bill would require the application for an appeal to be filed no later than 60 days after the date of the mailing of the notice certifying the new valuation.

Existing law imposes a tax recoupment fee upon the owner of a parcel in a timberland reduction upon the immediate rezoning of that parcel.

This bill would provide that the tax recoupment fee is due 60 days after mailing of notice of the amount due, instead of 60 days after receipt of the notice.

(2) Existing property tax law provides for supplemental tax assessments if a change in ownership occurs, or new construction is completed, between property tax lien dates. Existing property tax law specifies different limitation periods for making of supplemental assessments, depending upon the circumstances of the assessment, including, among others, 4-year and 6-year limitation periods.

This bill would require these limitation periods to be measured from the year in which the event giving rise to the supplemental assessment occurred, rather than from the year in which any of certain filings was made with respect to that event.

(3) Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the board's approval, where the value of the damage or destruction exceeds \$5,000. Existing law requires the application to be fixed within the time specified in the ordinance, or if no time is specified, within 60 days of the misfortune or calamity.

This bill would allow counties to grant assessors additional powers to initiate reassessment, increase the required value of the damage or destruction to a minimum of \$10,000, extend the 60-day period in which an applicant may file for reassessment to one year, and make related changes. By requiring local tax officials to provide a higher level of service with respect to reassessment appeals, this bill would impose a state-mandated local program.

(4) The California Constitution requires the State Board of Equalization to annually value and assess specified unitary property that is located in 2 or more counties, as well as property owned and used by regulated railways, telegraph and telephone companies, car companies operating on railways in this state, and companies selling or transmitting electricity in this state.

Existing property tax law requires a state assessee, upon the board's request and in compliance with the applicable of certain deadlines, to file a property tax statement relating to its state-assessed property. Existing law imposes penalties upon a taxpayer's failure to timely file a required property statement, including a penalty of 10% of unitary value with respect to that part of the property statement relating to the development of the unitary value of operating property, and a penalty of 10% of the allocated value of property with respect to that part of the property statement that lists or describes specific operating property.

This bill would, for purposes of imposing these penalties, clarify that "specific operating property" does not include "property relating to the development of the unit value of operating property."

Existing property law allows a state assessee, upon a showing of good cause, to receive a 45-day extension for filing the portion of a property statement relative to "property relating to the development of the unit value of operating property," and a 30-day extension of time for filing on the portion of a property tax statement relating to "specific operating property."

This bill would clarify that the category "specific operating property" does not include "property relating to the development of the unit value of operating property."

This bill would make legislative findings and declarations that the clarifications made by these provisions are declaratory of existing law.

(5) Existing property tax law provides, pursuant to the authorization of the California Constitution, for the exemption from property taxation of the home of a disabled veteran, or a veteran's spouse in the case in which the veteran has, as a result of a service-connected disease or injury, died while on active duty in military service. Existing property tax law specifies an exemption amount of \$40,000 and increases that amount to \$100,000 in the case in which the disabled veteran is completely disabled. Existing law increases these amounts to \$60,000 and \$150,000, respectively, if the exemption claimant's income does not exceed \$40,000 as adjusted by a specified inflation factor.

This bill would revise and recast this inflation factor to be derived from price index changes over a different annual period.

(6) Existing law provides that all assessment information required by the State Board of Equalization from an owner of state-assessed property, or furnished in a property statement to that board, is required to be held secret by the board.

This bill would require county assessors and auditors that receive the assessment information from the board to hold that information secret.

(7) Existing property tax law provides for the exchange of information between the parties to an assessment appeals hearing, and sets forth procedures for that exchange.

This bill would revise these procedures by, among other things, requiring the initiating party to submit the requisite data to the other party and the clerk at least 30 days before the commencement of the hearing date, and requiring the responding party to provide the requisite information at least 15 days prior to the hearing.

(8) Existing law establishes procedures for challenging the assessment of private railroad cars, including a procedure that requires an owner or lessee, prior to filing a petition for reassessment, to file a declaration of intent to file that petition.

This bill would delete the requirement that an owner or lessee file a declaration of intent to petition for reassessment prior to filing that petition. This bill would also allow a petition for reassessment, with respect to an assessment made outside the regular assessment period, to be filed on or before the 50th day, rather than the 30th day, following the date of the notice of assessment.

(9) Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 408 (SB 1198) Romero. Agricultural employees.

Existing law establishes the Agricultural Labor Relations Board to enforce state agricultural labor laws governing wages, hours, and related topics. Existing law permits the board to, under certain conditions, order employers who violate agricultural labor laws to pay monetary damages to employees.

This bill would require the board to collect, on behalf of employees, all monetary relief the board orders paid by employers who violate agricultural labor laws. The bill would require

the board to locate and pay the employees on whose behalf the board has collected moneys. The bill would also establish and continuously appropriate the Agricultural Employee Relief Fund. The bill would require that if, after 2 years, the board is unable to locate an employee on whose behalf the board has collected moneys, the monetary damages collected on the employee's behalf be deposited in the fund. The bill would require the moneys deposited in the fund to be used to pay aggrieved employees the unpaid balance of any monetary relief the board has ordered and that the board, after making reasonable efforts to collect the moneys from the employer, deems impossible to collect.

Ch. 409 (SB 40) Alarcon. Unemployment insurance: benefits: compensation.

(1) Under existing law, an unemployed individual is not disqualified for eligibility for unemployment compensation benefits solely on the basis that he or she is a student.

This bill would eliminate this provision and instead provide that an unemployed individual is not disqualified for eligibility for unemployment compensation benefits solely on the basis that he or she is only available for part-time work.

Because this provision would increase the amount of unemployment compensation paid, it would increase the amount payable from the Unemployment Fund, a continuously appropriated special fund, and thereby would make an appropriation.

(2) Existing law specifies that a person is "unemployed" in any week during which he or she performs no services and with respect to which no wages are payable to him or her.

This bill would require that payments received from an employer, that has failed to provide advance notice of facility closure required by the federal Worker Adjustment Renotification and Training Act, not be construed to be wages or compensation for personal services for purposes of determination of eligibility for unemployment compensation benefits.

(3) Under existing law, unemployment compensation benefits are based on wages paid in a base period that is calculated according to the month within which the benefit year begins.

This bill would, as specified, revise the calculations for these base periods.

(4) Under existing law, the weekly unemployment compensation benefit for an individual whose highest wages in the quarter of his or her base period exceeded a specified amount is 39% of those wages divided by 13, but may not exceed \$230.

This bill would, for new claims filed with an effective date after January 1, 2002, specify a weekly benefit for an individual whose highest wages in the quarter of his or her base period exceeded a specified amount, of a certain percentage, of those wages divided by 13, and would also increase, in accordance with a certain schedule, the maximum weekly benefit to a specified dollar amount.

Because this provision would increase the amount of unemployment compensation paid, it would increase the amount payable from the Unemployment Fund, a continuously appropriated special fund, and thereby would make an appropriation.

The bill would require the Employment Development Department to contract with an independent research organization to study the most effective and efficient means of establishing eligibility for employment insurance benefits.

Ch. 410 (AB 110) Zettel. Personal income taxes: credit: credentialed teachers.

The Personal Income Tax Law authorizes various credits against the taxes imposed by those laws, including a credit against taxes imposed by those laws for credentialed teachers in an amount equal to specified amounts, depending upon years of service as a teacher.

Existing law requires the Franchise Tax Board to impose an accuracy-related penalty equal to 20% of the amount of tax underpaid, if the underpayment is attributable to negligence or results from a substantial understatement or undervaluation of specified categories of income subject to tax.

This bill would provide that the accuracy-related penalty does not apply to tax credits authorized for credentialed teachers claimed on tax returns filed for taxable years beginning on or after January 1, 2000, and before January 1, 2001.

Ch. 411 (AB 146) Wayne. State attorneys and administrative law judges: service on governmental bodies.

Existing common law and case law prohibits a state officer, including an attorney employed by the state and administrative law judge, from engaging in activities that may be incompatible with their duties to the state and results in the automatic vacation of the former office. Existing law provides that service on an appointed or elected governmental body by an attorney employed by a local agency in a nonelective position shall not, by itself, be deemed to be an incompatible activity and shall not result in the automatic vacation of either of the offices.

This bill would provide that service on a local appointed or elected governmental board, commission, committee, or other body or as an elected local official by an attorney employed by the state in a nonelected position or by an administrative law judge shall not, by itself, be deemed to be an incompatible activity and shall not result in the automatic vacation of either office. This bill would also provide that it shall not be construed to prohibit an administrative law judge or an attorney employed by the state in a nonelected position from serving on any other appointed or elected governmental board, commission, committee, or other body, consistent with all applicable conflict-of-interest statutes and regulations and judicial canons of ethics.

Ch. 412 (AB 185) Wright. Local agency military base recovery areas.

(1) The Local Agency Military Base Recovery Area Act provides, among other things, that whenever the state prepares an invitation for bid for a contract for goods in excess of \$100,000, with a specified exception, the state shall award a 5% preference to California-based companies who certify under penalty of perjury that no less than 50% of the labor required to perform the contract shall be accomplished at a worksite or worksites located in a local agency military base recovery area. In evaluating proposals for contracts for services in excess of \$100,000, with a specified exception, the state is required to award a 5% preference on the price submitted by California-based companies who certify under penalty of perjury that they shall perform the contract at a worksite or worksites located in a local agency military base recovery area.

This bill instead would provide that whenever the state prepares a solicitation for a contract for goods in excess of \$100,000, with that specified exception, the state shall award the 5% preference to California-based companies who demonstrate and certify under penalty of perjury that of the total labor hours required to manufacture the goods and perform the contract, at least 50% of the hours shall be accomplished at an identified worksite or worksites located in a local agency military base recovery area. It would also provide that, in evaluating proposals for contracts for services in excess of \$100,000, with that specified exception, the state shall award a 5% preference on the price submitted by California-based companies who demonstrate and certify under penalty of perjury that not less than 90% of the labor hours required to perform the contract shall be accomplished at an identified worksite or worksites located in a local agency military base recovery area.

By expanding the scope of a crime, this bill would impose a state-mandated local program.

(2) The act also provides that where a bidder complies with the provisions set forth above, the state shall award a 1% preference for bidders who shall agree to hire persons living within a local agency military base recovery area equal to 5 to 9% of its workforce during the period of contract performance.

This bill instead would provide that the state shall award a 1% preference under these provisions for bidders who certify under penalty of perjury to hire persons meeting these criteria.

By expanding the definition of a crime, this bill would impose a state-mandated local program.

(3) The act further provides that a business that requests and is given the preference provided for under these provisions by reason of having furnished a false certification, and that by reason of this certification has been awarded a contract to which it would not otherwise have been entitled, shall, among other things, be ineligible to transact any business with the state for a period of not less than 3 months and not more than 24 months.

This bill instead would state that the business would be ineligible to directly or indirectly transact any business with the state for this period.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 413 (AB 220) Strom-Martin. Vehicles: limitations of access.

Existing law exempts from established limitations of access, licensed carriers of livestock when engaged in travel necessary and incidental to the shipment of livestock on specified portions of State Highway Route 101. This exemption is repealed on January 1, 2002. Existing law requires the Department of the California Highway Patrol, in consultation with the Department of Transportation, to conduct a study of the effect that the exemption has on public safety and report to the Legislature on or before July 1, 2001.

This bill would extend the January 1, 2002, repeal date to January 1, 2004, thereby continuing the exemption until January 1, 2004.

The bill would require the Department of the California Highway Patrol, in consultation with the Department of Transportation, to conduct a comprehensive study of the effect that the exemption has on public safety during the entire effective period of the exemption, and would require the findings of the study to be reported to the Legislature on or before May 1, 2003.

Ch. 414 (AB 472) Cedillo. Real property: substandard conditions.

(1) Existing law provides for abatement of substandard conditions in buildings, and authorizes a court to appoint a receiver in specified cases involving real property.

This bill would provide procedures for a receiver of real property containing rental housing to obtain a court order to assist in the abatement of substandard conditions. The bill would authorize specified persons to file a motion in a receivership action for the purpose of seeking further instructions to the receiver. The bill would prescribe procedures whereby the owner of property or designated agent would be required to pay relocation benefits to tenants who are displaced or subject to displacement by local enforcement activities.

(2) The State Housing Law authorizes a city, county, or city and county enforcement agency to issue an order or notice to repair a building to the owner if the building is maintained in a manner that violates any provisions of this law, the building standards published in the State Building Standards Code, or any other rule or regulation promulgated pursuant to the law, and the violations are so extensive and of a nature that the health and safety of the residents or the public is substantially endangered.

This bill would extend the applicability of these provisions to the violation of any provision in a local ordinance that is similar to a provision in the State Housing Law, and would authorize the issuance of an order or notice to abate.

(3) Under the State Housing Law, if the owner does not correct the condition that caused the violation within a reasonable time after the issuance of a notice or order to repair by a court as part of a civil or criminal judgment against the owner, or in a specified stipulation to a judgment by the owner, a court may impose criminal penalties upon the owner, and is authorized to order an owner not to claim any deduction with respect to state taxes for interest, taxes, expenses, depreciation, or amortization paid or incurred with respect to the

cited structure, as well as the appointment of a receiver for a substandard building if certain conditions are met.

This bill would revise this provision to authorize the enforcement agency, if the owner does not correct the condition that caused the violation within a reasonable time after the issuance of a notice or order to repair by the enforcement agency, to seek the imposition of criminal penalties upon the owner, as well as an order to prohibit the owner from claiming any deduction for the above described state taxes. It would also authorize, if the owner does not correct the condition that caused the violation within a reasonable time after the issuance of a notice or order to repair by the enforcement agency, a court to order the appointment of a receiver.

(4) This bill would incorporate additional changes in Section 17980.7 of the Health and Safety Code proposed by AB 1467, to be operative if AB 1467 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 415 (AB 584) Cox. Alien insurers: issuance of securities: exemption from requirements.

Existing law provides for regulation of insurers by the Insurance Commissioner. Existing law imposes certain requirements relative to issuance of securities by insurers, and provides certain exemptions from these requirements.

This bill would additionally exempt from these requirements the offer or sale of stock by a foreign or alien insurer to fire and casualty broker-agents under certain conditions.

Ch. 416 (AB 647) Horton. Whistleblower protection: Reporting by Community College Employees of Improper Governmental Activities Act.

Existing law, the California Whistleblower Protection Act, sets forth the circumstances and procedures under which a state employee may report improper governmental activities or make a protected disclosure to the State Auditor, and prohibits retaliation or reprisal against a state employee for these acts. Existing law defines any employee of the California State University as a state employee and the California State University as a state agency for some provisions of this act. Existing law authorizes a California State University employee to file a written complaint with his or her supervisor or manager, or any other designated university officer alleging actual or attempted acts of reprisal, retaliation, threats, coercion, or similar improper acts for having made a protected disclosure. It is a misdemeanor for any person to intentionally engage in acts of retaliation, reprisal, threats, coercion, or similar acts against an employee of the California State University for having made a protected disclosure under these provisions.

Existing law establishes the Reporting by Community College Employees of Improper Governmental Activities Act, which enacts provisions similar to the California Whistleblower Protection Act, that are applicable to community college campuses.

This bill would amend the Reporting by Community College Employees of Improper Governmental Activities Act to include procedures for the investigation and determination of complaints by the State Personnel Board that are currently contained in the California Whistleblower Protection Act.

Ch. 417 (AB 873) Harman. Nonprobate transfers: former spouses.

Existing law provides for the transfer of property upon death by various means, including wills, trusts, joint tenancies, insurance policies, and retirement death benefits, among others. Existing law permits a trustee with a power of appointment to distribute property to beneficiaries according to the terms of the trust. Existing law permits the structuring of certain financial accounts so that they will be payable to one person upon the death of another. Existing law permits vehicles to be owned in joint tenancy and, upon death of one of the parties, that ownership may pass to another joint tenant. Existing law provides that dissolution of a marriage revokes a bequest of property made in a will to a former spouse,

and revokes a beneficiary designation to a former spouse under the Public Employees' Retirement System, as specified. Existing law provides that dissolution of marriage prohibits a former spouse from receiving the spouse's share under intestate succession.

This bill would provide that specified property transfers to a transferor's spouse upon death would fail if, at the time of death, that person is no longer the transferor's surviving spouse, due to annulment or dissolution of marriage, except where the transfer is not subject to revocation at time of death, or where there is clear and convincing evidence that the transferor intended to preserve the transfer to the former spouse. This bill would except provisions in life insurance policies from the definition of specified property transfers subject to the provisions described above. The bill would provide that a joint tenancy created between a decedent and the decedent's former spouse is severed if it was created before or during marriage and, at the time of death, the former spouse is not the decedent's surviving spouse, due to annulment or dissolution of marriage, except as specified.

The bill would also provide for the property rights of a person who subsequently purchases or encumbrances property in good faith, and would provide that a specified affidavit or declaration in this regard may be recorded. By increasing the duties of local officials processing these documents, this bill would create a state-mandated local program.

The bill would additionally provide that holders of certain property may transfer the property in accordance with provisions of specified instruments despite possible inconsistencies with the rights of a person named as a beneficiary, except as specified. The bill would permit a court to award damages and fees when a notice of a person claiming an interest in certain property is determined to have been filed in bad faith. The bill would delete the definition of spouse from the California Statutory Will. The bill would also make related and conforming changes. The bill would be operative on January 1, 2002, but would provide that specified provisions do not apply if the decedent making the nonprobate transfer or creating the joint tenancy dies, or if the dissolution of a marriage terminating the status of a beneficiary occurs, before that date.

Chapter 49 of the Statutes of 2001, operative January 1, 2002, revised, recast, and consolidated provisions regarding the determination of claims brought to determine ownership of real or personal property claimed by an estate, a ward or conservatee, or a trustee, as specified.

This bill would require a court, acting under those provisions, to deny a petition, if the court determines that the matter should be determined by a civil action. This bill would also make related technical changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 418 (AB 967) Chan. Building standards: military bases.

Existing law authorizes until January 1, 2007, the governing body of a local agency to adopt an ordinance permitting certain buildings or other structures located on military bases, including specified buildings at the Oakland Army Base and the Alameda Naval Air Station, to comply with specified provisions establishing state building standards and state standards of fire safety, or any regulations or standards adopted pursuant to state building standards, in a graduated manner over a period of no more than 7 years from the date that the property has been transferred by the federal government to the local agency, if specified conditions are met, including the adoption of a graduated compliance plan by January 1, 2000.

This bill would include additional specified buildings at the Oakland Army Base and the Alameda Naval Air Station, within that authority.

Ch. 419 (AB 1019) Corbett. Victims of crime.

Existing law provides for the indemnification of victims of specified types of crimes, including an adult victim of domestic violence, and a minor victim of sexual assault, for specified expenses that become necessary as a direct result of the crime. Indemnification is made under these provisions from the Restitution Fund, which is continuously appropriated to the California Victim Compensation and Government Claims Board for these purposes.

Existing law, until January 1, 2003, provides for specified conditions on the reimbursement for mental health counseling for certain derivative victims of crime.

This bill would provide for the indemnification of any victim of sexual assault or domestic violence for specified expenses under those provisions. It would extend until January 1, 2004, the operation of the provisions specifying conditions on the reimbursement for mental health counseling for certain derivative victims of crime. By authorizing new uses for, and extending the period of time for expending moneys from, a continuously appropriated fund, this bill would make an appropriation.

The bill would incorporate additional changes in Section 13965 of the Government Code proposed by AB 1017, to be operative if this bill and AB 1017 are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 420 (AB 1253) Matthews. Nursing.

(1) Existing law, the Nursing Practice Act, requires that a nurse satisfy specified requirements in order to practice as a clinical nurse specialist. Various other provisions of law include within their application a registered nurse with education or experience in psychiatric-mental health nursing.

This bill would recast those provisions, including within their application an advanced practice registered nurse certified as a clinical nurse specialist who participates in expert clinical practice in the specialty of psychiatric-mental health nursing.

(2) Existing law provides for the indemnification of crime victims, as specified, for certain expenses including counseling related fees if the counseling services are provided by a designated professional.

This bill would include within these designated professionals a person licensed as a registered nurse who meets specified requirements and an advanced practice registered nurse who meets the requirements described in paragraph (1). The bill would specify that these provisions become inoperative and are repealed on January 1, 2002, if AB 1017 is enacted and becomes effective on or before that date.

(3) This bill would also incorporate additional changes in Section 1010 of the Evidence Code proposed by SB 716, to be operative on January 1, 2002, only if that bill and this bill are enacted and become effective on or before January 1, 2002.

(4) This bill would declare that its provisions would become effective immediately as an urgency statute.

Ch. 421 (AB 1402) Simitian. Public works: design-build contracts.

Under existing law, a school district governing board is required to let any contract for a public project that costs \$15,000 or more to the lowest responsible bidder.

Existing law also requires school districts constructing school facilities to meet various requirements, including requirements pertaining to seismic safety, the contents of plans for school construction, use of factory-built school buildings, and the acquisition of proposed schoolsites.

This bill would authorize school district governing boards to enter into a design-build contract, as defined, in which factors in addition to price and cost may be considered in awarding a contract for the design and construction of a school facility that exceeds

\$10,000,000. The bill would require the Superintendent of Public Instruction to develop guidelines for design-build projects within 6 months after the operative date of the bill. The bill would require each contract to prohibit construction or alteration of any school building without the prior written approval of the plans by the Department of General Services, and would prescribe related matters. The bill would require a school district that elects to use the design-build process to submit its report to the Legislative Analyst, and would require the Legislative Analyst to submit an interim report to the Legislature by January 1, 2004, and a final report by January 1, 2006. The provisions of the bill would be repealed on January 1, 2007.

Ch. 422 (AB 1478) Salinas. School construction approval.

Existing law establishes various requirements regarding the siting and construction of school facilities, including, but not limited to, the requirement that prescribed geological and soil engineering studies be conducted for the construction of any school building, as defined, within the boundaries of special studies zones or if the costs of construction exceeds \$20,000.

This bill would increase that amount to \$25,000, would require an annual inflation adjustment for this amount, and would make technical, nonsubstantive, changes in related provisions.

Ch. 423 (AB 1628) Committee on Agriculture. Fairs.

Existing law provides the Department of Food and Agriculture with regulatory authority over district agricultural associations, and authorizes the department to delegate approval authority for such matters as the department may determine to the board of directors of the association. Existing law permits the board of directors of district agricultural associations and the board of directors of the California Exposition and State Fair to enter into agreements to secure donations, memberships, sponsorships, and marketing and licensing agreements for the receipt of money, or services, or products in lieu of money. Existing law permits the board to employ or enter into an agreement with an entity or person to develop, solicit, sell, and service these agreements.

This bill would also authorize the boards to create and participate in an entity to develop, solicit, sell, and service these agreements. This bill would place additional requirements on the district agricultural association boards by requiring them to give written notification to the Department of Food and Agriculture before entering these agreements if the agreements, among other things, exceed a specified amount and prior to creating an entity. This bill would also prohibit an association from entering into a settlement for an amount greater than \$10,000 without prior approval of the department.

Ch. 424 (SB 88) Costa. Air pollution: odors.

(1) Existing law prohibits the discharge of any air contaminant or other material that causes injury, detriment, nuisance, or annoyance to, or that endangers, the public. Existing law exempts from that prohibition, among other things, all odors emanating from agricultural operations necessary for the growing of crops or the raising of fowl or animals and also exempts odors emanating directly from a facility or operation that produces, manufactures, or handles compost, as defined. Existing law also requires an air pollution control district or air quality management district that receives a complaint regarding an odor emanating from an exempt composting operation to refer the complaint to an enforcement agency with jurisdiction pursuant to the California Integrated Waste Management Act of 1989, and requires that agency to take appropriate enforcement action. Existing law also provides for the repeal of those provisions on January 1, 2002.

This bill would instead make those provisions inoperative on April 1, 2003, and after that date would exempt from that prohibition all odors emanating from agricultural operations necessary for the growing of crops or the raising of fowl or animals, unless the California Integrated Waste Management Board adopts and submits to the Office of Administrative

Law on or before that date, regulations governing the operation of organic composting sites that include specified provisions. By extending the operation of the requirement that the district and the enforcement agency take appropriate action, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would provide that it is to take effect immediately as an urgency statute.

Ch. 425 (SB 263) Johnson. Limited liability partnerships: limited liability companies.

Existing law provides for the creation of various forms of business organizations, including limited liability partnerships and limited liability companies. Existing law requires the Secretary of State to prescribe a form relative to filing with the Secretary of State of a certificate of registration by limited liability partnerships and articles of organization by limited liability companies.

This bill would require the Secretary of State to include with instructional materials provided in conjunction with these forms a notice that filing the registration will obligate the limited liability partnership or limited liability company to pay an annual tax for that calendar year to the Franchise Tax Board. The bill would require the notice to be updated annually to specify the dollar amount of the tax.

Ch. 426 (SB 312) Alpert. Cigarette and tobacco products taxes: returned products.

The Cigarette and Tobacco Products Tax Law imposes a tax on every distributor of cigarettes at specified rates. For purposes of that law, "untaxed tobacco product" is defined as any tobacco product that has not yet been distributed in a manner that results in a tax liability.

This bill would include as an "untaxed tobacco product" any tobacco product that was distributed in a manner that resulted in a tax liability, but that was returned to the distributor after the tax was paid and for which the distributor claimed a deduction, refund, or credit.

The Tobacco Tax and Health Protection Act of 1988 (Proposition 99), which was adopted by the voters at the general election held on November 8, 1988, imposes a surtax on the distribution of cigarettes in addition to the tax imposed pursuant to the Cigarette Tax Law as of the effective date of the adoption of Proposition 99, and imposes a tax on the distribution of certain tobacco products at an equivalent total rate determined pursuant to specified criteria.

The California Families and Children Act of 1998 (Proposition 10), which was adopted by the voters at the general election held on November 3, 1998, imposes a surtax on the distribution of cigarettes in addition to the tax imposed pursuant to the Cigarette Tax Law and the Tobacco Tax and Health Protection Act of 1988 as of the effective date of the adoption of Proposition 10, and imposes a tax on the distribution of certain tobacco products at an equivalent rate.

This bill would provide that the wholesale cost used to calculate the amount of those taxes does not include the wholesale cost of tobacco products that were returned by a customer during the same reporting period in which the tobacco products were distributed, when the distributor refunds the amount paid in cash or credit.

The bill would also make changes with respect to refunds and credits, related to the other provisions of this bill.

The Tobacco Tax and Health Protection Act of 1988, an initiative measure, and the California Families and Children Act of 1998, another initiative measure, each require that amendments to their provisions be consistent with the act's purposes, and be approved by either a $\frac{4}{5}$ or $\frac{2}{3}$ vote of both houses of the Legislature.

This bill would declare that it amends those measures in a manner that furthers and is consistent with the purposes of those measures, and that it would require a $\frac{4}{5}$ vote for passage.

This bill would take effect immediately as a tax levy.

Ch. 427 (SB 1007) Machado. State Payment Card Act.

(1) Existing law requires all state agencies, with limited exceptions, to accept payments made by credit card or payment device and authorizes the Director of General Services, or his or her designee, to negotiate and enter into contracts necessary to implement or facilitate the acceptance of credit cards. Existing law also authorizes the director to seek to negotiate master contracts or other contracts that allow the cost-effective acceptance of payment by credit card or payment device.

This bill would authorize the director to negotiate master contracts or other contracts in this regard, and would require the director, in consultation with the Director of e-Government, to take steps to encourage the adoption of standard payment policies and procedures for all state agencies. The bill would authorize a state agency to enter into an interagency agreement with another state agency for the purposes of establishing uniform policies and acquiring equipment to support payment by credit card or other payment device.

(2) Existing law generally requires all state agencies to accept payment made by means of a credit card or payment device, but permits the Director of General Services to grant an exemption from this requirement upon the request of a state agency if the agency makes specified findings.

This bill would, subject to these exemption provisions, require all state agencies to accept these means of payment. The bill would authorize the director to request that an exemption be renewed on a periodic basis and that the agency provide a plan for implementing the requirement that it accept payment by means of a credit card or other payment device.

Ch. 428 (AB 237) Papan. Eminent domain.

Existing law, the Eminent Domain Law, provides a procedure to exercise the power of eminent domain to acquire property for a public use. It details the rules for the commencement of such a proceeding and for compensation of the owner of the property. Existing law requires the plaintiff, at least 20 days prior to the date of the trial on the issues relating to compensation, to file with the court and serve on the defendant its final offer of compensation in the proceeding and requires the defendant to file and serve on the plaintiff its final demand for compensation in the proceeding.

This bill would require the final offer and demand to include all elements of required compensation, including compensation for loss of goodwill, and to indicate whether or not interest and costs are included.

The bill also would provide that the parties may by agreement refer a dispute that is the subject of an eminent domain proceeding for resolution by mediation or binding or nonbinding arbitration, as specified; and, if a judgment in eminent domain is not more favorable to the moving party following nonbinding arbitration, would require the court to order that party to pay to the other parties, specified nonrefundable costs and fees unless the court finds in writing and on motion that the imposition of costs and fees would create such a substantial economic hardship as not to be in the interest of justice.

The bill would provide that, upon motion of a party, the court may postpone the date of trial in an eminent domain proceeding for a period that appears adequate to enable resolution

of a dispute pursuant to alternative resolution procedures provided that the court is satisfied that certain conditions are met, as specified.

Existing law provides that at any time before entry of the judgment, the plaintiff may deposit with the State Treasury the probable amount of compensation, based on an appraisal, that will be awarded in the proceeding. Existing law requires the plaintiff, prior to making the deposit, to have an expert qualified to express an opinion as to the value of the property make an appraisal of the property and prepare a written statement of, or summary of, the basis for the appraisal.

This bill would require the statement or summary to contain detail sufficient to clearly indicate the basis for the appraisal, including the highest and best use and applicable zoning of the property, the principal transactions, reproduction or replacement cost analysis, or capitalization analysis, supporting the appraisal, and if the appraisal includes compensation for damages to the remainder, the compensation for the property and for damages to the remainder stated separately, and the calculations and a narrative explanation supporting the compensation, including any offsetting benefits.

Existing law requires the court, upon motion, to determine or redetermine whether the amount deposited is the probable amount of compensation that will be awarded.

This bill would specify the information necessary to support that motion.

Existing law defines the "date of exchange" for purposes of the provisions relating to the exchange of valuation data in eminent domain proceedings, as the date agreed to by the parties for the exchange of their lists of expert witnesses and statements of valuation data by the party who served a demand and the party on whom the demand was served, or, failing agreement, a date 60 days prior to commencement of the trial on the issue of compensation, or the date set by the court on noticed motion of either party establishing good cause therefor.

This bill would provide that failing agreement, the date of exchange is a date 90, rather than 60, days prior to the above specified events, and would provide that unless otherwise agreed to by the parties, the date of exchange shall not be earlier than 9 months after the date of commencement of the proceeding.

Existing law requires the statement of valuation data to provide the name and business or residence address of the witness and to include a statement whether the witness will testify to an opinion, as specified.

This bill would require the method used to determine a loss of good will and a summary of the data supporting the opinion to be included in the exchange of valuation data. Moreover, the bill would provide that either party may move the court for a ruling on an evidentiary or other legal issue affecting the determination of compensation, and would require the motion to be made 60 days before commencement of trial on the issue of compensation. The bill would authorize the court to postpone the date of final offers and demands of the parties and the date of trial for a period sufficient to enable the parties to engage in further proceedings before trial in response to the court's ruling on the motion.

Existing law requires a public entity to establish an amount which it believes to be just compensation for the acquisition of real property and to provide the owner of real property with a written statement of, and summary of the basis for, the amount it established as just compensation. Existing law provides that where the property is owner occupied residential property and contains no more than 4 residential units, the homeowner shall, upon request, be allowed to review a copy of the appraisal upon which the offer is based.

This bill would specify the necessary detail required of the written statement and summary, and would provide that the public entity may meet the written statement, summary, and review requirements by providing the property owner with a copy of the appraisal.

The provisions of the bill would apply to any proceeding commenced on or after January 1, 2002.

Ch. 429 (AB 309) Longville. Sales and use taxes: fuel: prepayment: fuel taxes.

The Motor Vehicle Fuel Tax Law and the Diesel Fuel Tax Law impose specified taxes with respect to fuel. Both laws are administered by the State Board of Equalization.

This bill would allow the board to accept and authenticate any return, report, declaration, or statement filed under those laws using electronic media, and would also allow the board to be provided with returns filed with the Internal Revenue Service's Excise Summary Terminal Activity Reporting System (ExSTARS) if a terminal operator provides consent and authorization.

This bill would amend specified provisions of the Motor Vehicle Fuel Tax Law and the Diesel Fuel Tax Law to conform to comparable federal fuel tax laws and federal fuel regulations, including regulations authorizing one taxpayer to pay another taxpayer's tax liability on fuel removed from the terminal rack (2-party exchange agreements), operative only if authorized by the IRS.

This bill would reconcile provisions of the Motor Vehicle Fuel Tax Law and the Diesel Fuel Tax Law, revise and recast administrative provisions, incorporate additional definitions based on federal fuel regulations into the Motor Vehicle Fuel Tax Law and the Diesel Fuel Tax Law, and update specified definitions that were revised in federal fuel regulations. This bill would allow the board to recommend a refund of amounts overpaid by any person, rather than only a licensed supplier.

Under existing law, any distributor or broker of motor vehicle fuel, any aircraft jet fuel dealer who sells aircraft jet fuel, or any producer, importer, or wholesaler who makes a sale of diesel fuel is required to collect prepayment of sales tax from the person to whom the fuel is sold. Existing law also provides that when these fuels are resold, the person is entitled to claim credit for the prepayment paid to the supplier on the return for the period in which the fuel is resold.

This bill would require the sales tax prepayment on fuel at the first point of distribution, known as the rack.

Existing law provides that a person who is required to make sales and use tax prepayment with respect to motor vehicle fuel distributions may not be required to also make prepayments under the general sales and use tax provisions, if at least 75% of the gross receipts of that person are derived from the retail sale of motor vehicle fuel.

This bill would include retail sales of diesel fuel and aircraft jet fuel in that percentage calculation, in addition to retail sales of motor vehicle fuel.

This bill would incorporate additional changes in Section 60022 of the Revenue and Taxation Code proposed by AB 86 of the 2nd Extraordinary Session of the Legislature, to be operative only if AB 86 and this bill are both enacted and become effective, as specified, and this bill is enacted last.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 430 (AB 743) Robert Pacheco. Credit unions.

Existing law provides for regulation of credit unions and other financial institutions by the Department of Financial Institutions, and by various federal agencies, if the financial institutions are federally chartered. Existing law, with respect to deposit of various funds held by certain public agencies and officials, or for other finance-related purposes, specifies appropriate financial institutions that may be used for those purposes by those public agencies and officials, including county superintendents of schools, school districts, Director of Education, Treasurer, directors of overseas trade offices, and county boards of retirement for various public agency employees.

This bill would provide that credit unions may also be appropriately used for these purposes by the above-mentioned agencies and officials.

This bill would incorporate additional changes in Section 15364.77 of the Government Code, proposed by AB 968, to be operative only if AB 968 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 431 (AB 815) Havice. Controlled substances: unlawful detainer.

Existing law, scheduled to be repealed by its own terms on January 1, 2002, provides that the city prosecutor or city attorney of specified judicial districts in the County of Los Angeles may file, in the name of the people, an action for unlawful detainer against any tenant who is unlawfully engaged in specified controlled substance offenses, and shall maintain records of all actions filed, as specified. Existing law requires the court, after judgment is entered in any unlawful detainer proceeding, to submit to the Judicial Council information on the case, as specified.

This bill would provide for the continued existence of the above law until January 1, 2005 and would provide that an action for unlawful detainer may be brought if any of the specified controlled substance offenses occurs on the subject real property and is documented by the observations of a peace officer. The bill would revise the information to be collected by the city attorney and city prosecutor regarding unlawful detainer actions filed and would instead require, commencing January 1, 2002, the city attorney and city prosecutor, and not the court, to report annually information compiled on unlawful detainer actions to the Judicial Council. It would also revise the designation of Los Angeles County judicial districts to which these provisions shall apply, and would make related changes. By either continuing to impose certain duties, or by imposing new duties, on local officials, this bill would impose a state-mandated local program upon local governments.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 432 (AB 1006) Jackson. Courts: Ventura County.

Existing law authorizes a county to establish a courthouse construction fund, as specified.

This bill would authorize the County of Ventura to establish a Juvenile Justice Facilities Construction Fund to improve county juvenile justice facilities, as specified.

The bill would also provide that deposits to the courthouse construction fund established in Ventura County shall continue to and including the 25th year after the initial year in which the surcharge is collected or the 25th year after any borrowings are made for any construction, as specified.

The bill would make legislative findings and declarations as to the necessity for a special statute.

Ch. 433 (AB 1099) Havice. Judges' retirement: benefits.

(1) Existing law establishes reciprocity between specified public retirement systems, thereby allowing a member of more than one qualifying system to use the compensation earned while a member of one of those reciprocal systems to calculate benefits under the other system, subject to specified limitations. Under the Public Employees' Retirement Law, compensation earnable during any period of service as a member of specified retirement systems is considered compensation earnable as a member of the Public Employees' Retirement System for purposes of computing final compensation for the member, as specified. Under the County Employees Retirement Law of 1937, the average compensation during any period of service as a member of a reciprocal retirement system is considered compensation earnable for a member for purposes of determining final compensation, as specified.

This bill would add the Judges' Retirement System II to these provisions of the Public Employees' Retirement Law and would add both the Judges' Retirement System and the

Judges' Retirement System II to these provisions of the County Employees Retirement Law of 1937. The bill would further require a judge to have a minimum of 6 years of judicial service to be eligible for benefits provided by retiring concurrently from specified reciprocal retirement systems.

(2) Under the Public Employees' Retirement Law, specified state and local employees and legislators are eligible to participate in the Supplemental Contributions Program, as specified. Participant contributions under the program are deposited in the Supplemental Contributions Program Fund, a continuously appropriated fund.

This bill would authorize judges who are members of the Judges' Retirement System or the Judges' Retirement System II to participate in that program, thereby making an appropriation.

(3) The Judges' Retirement System authorizes a judge to elect, at any time prior to retirement, to make contributions to the system and receive service credit for all time served as a federal judicial officer, subject to specified limitations.

This bill would additionally permit a judge to elect to make contributions and receive service credit for all of the time in which the judge served as a full-time subordinate judicial officer prior to becoming a judge, as specified. By increasing the amount of money deposited into the Judges' Retirement Fund, a continuously appropriated fund, the bill would make an appropriation.

(4) Under the existing Judges' Retirement System and Judges' Retirement System II, judges may elect from among 4 optional settlements, 2 of which provide for a retirement allowance payable until the judge's death and a specified continuing allowance payable to the judge's surviving spouse for life.

This bill would provide that if a judge elected either of those 2 optional settlements to be effective after January 1, 2002, and if the judge's spouse predeceases the judge or the judge's total interest in the system is awarded to the retired judge in proceedings for dissolution of marriage, annulment, or legal separation, the judge's retirement allowance shall be adjusted to the amount that would have been paid had the judge not elected the optional settlement. The bill would also authorize those judges, at the time of electing the optional settlement, to waive the right to the adjustment that would be made upon the death of the judge's spouse or upon the dissolution, annulment, or legal separation of the judge and his or her spouse, as specified.

(5) The existing Judges' Retirement System II Law prescribes retirement benefits for judges who are first elected or appointed to judicial office on or after November 9, 1994, which benefits are based, in part, on the period of service, as defined, of the judge. During their service, those judges are required to make specified contributions to the Judges' Retirement System II Fund, a continuously appropriated special fund.

This bill would permit a judge to elect to make contributions and receive service credit for the time in which the judge served as a full-time subordinate judicial officer, subject to the payment by the judge of additional contributions and other specified conditions. By increasing the amount of money deposited into the Judges' Retirement System II Fund, the bill would make an appropriation.

Ch. 434 (SB 325) O'Connell. Mobilehome and special occupancy parks.

(1) Existing law, known as the Mobilehome Parks Act, generally regulates various classifications of mobilehome and related vehicle parks, including special occupancy parks, and imposes related duties on the Department of Housing and Community Development and local enforcement agencies.

This bill would delete provisions relating to special occupancy parks from that act and would enact separate provisions known as the Special Occupancy Parks Act that would impose generally similar duties on the Department of Housing and Community Development and local enforcement agencies with respect to special occupancy parks. The bill would create a state-mandated local program by creating new crimes. The bill would

provide that funds collected by the department pursuant to the Special Occupancy Parks Act, including provisions imposing specified fees, are to be deposited in the Mobilehome Parks and Special Occupancy Parks Revolving Fund, which the bill would create by renaming the Mobilehome Parks Revolving Fund, and from which those funds would be available, upon appropriation, to the department for purposes of the act.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would become operative on January 1, 2003, except that the Department of Housing and Community Development would be required to adopt any necessary regulations by October 30, 2002.

(4) This bill would incorporate additional changes in Section 18610.5 of the Health and Safety Code proposed by SB 339, to be operative if SB 339 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 435 (SB 349) Committee on Business and Professions. Healing arts.

(1) Existing law provides for the regulation and licensing of businesses, professions, and vocations, including the imposition of specified delinquency fees and unpaid renewal fees in connection with expired licenses and registrations.

This bill would provide that delinquency fees or accrued and unpaid renewal fees for expired licenses and registrations do not apply to licenses and registrations that have been lawfully designated as inactive or retired.

(2) Existing law, the Medical Practices Act, provides for the licensure and regulation of the practice of podiatric medicine by the California Board of Podiatric Medicine within the Medical Board of California. Pursuant to existing law, the podiatric medicine board may contract with consultants to assist the board in its enforcement program.

This bill would authorize the board to employ all personnel necessary to carry out its duties subject to the appointment of investigative personnel by the Division of Investigation in the Department of Consumer Affairs. The bill would make the contract and employment provisions affecting the podiatric medicine board inoperative as of July 1, 2003, and would repeal them on January 1, 2004.

(3) Existing law provides that in certain circumstances specified license or registration renewal fees must be paid in order to renew an expired license or registration for speech-language pathologists and audiologists, physical therapists, vocational nurses, psychologists, optometrists, physician assistants, and psychiatric technicians.

This bill would require payment of all accrued and unpaid licensure or registration renewal fees in order for an individual to renew his or her license or registration with regard to the above professions or vocations. Because this bill would increase fee revenue deposited into various continuously appropriated funds applicable to these separate professions or vocations, the bill would make an appropriation.

(4) Existing law requires a registered marriage and family therapist intern to notify the board of his or her commencement of employment and termination of employment, and to meet certain guidelines in doing so, or he or she may risk losing credit for the experience gained during the period of employment.

This bill would eliminate the requirement that a registered intern notify the board of the commencement of employment and the termination of employment as an intern.

(5) Existing law requires that the Board of Registered Nursing provide for an analysis of the practice of entry level registered nursing at least every 8 years and that the analysis be used in the determination of subjects required to be completed at nursing school for licensure as a registered nurse.

This bill would require the analysis to be of all registered nurses and to be completed no less than every 5 years. The bill would also require that the results of the analysis be utilized in determining required subjects for validation of the licensing examination and assessment of the current practice of nursing.

(6) Existing law provides that the Physician Assistant Committee, which regulates the licensure and practice of physician assistants, meet at least 4 times annually, at least once in Sacramento and once in Los Angeles, and conduct additional meetings as necessary.

This bill would remove these requirements and instead require the committee to convene as deemed necessary.

Ch. 436 (SB 542) Ortiz. Cemeteries.

Existing law regulates the business of cemeteries and defines key terminology used in the cemetery business.

This bill would make changes to the definitions used in the cemetery business in that it clarifies, amends, and eliminates various definitions.

This bill would combine the statutes, which provided for a cemetery authority's power to regulate the use, care, control, management, restriction, and protections of the cemetery land, into one statutory section and repeal other sections that duplicate the powers of the cemetery authority.

Under existing law, if the owner of a cemetery plot transferred to the owner by deed or certificate of ownership dies without making a disposition of the plot either in his or her will or by specific devise or by a written declaration filed and recorded in the office of the cemetery authority, the plot becomes inalienable upon the person's death and becomes the family plot of the owner.

This bill would provide that if the owner of a family plot dies without making disposition of the plot, the unoccupied portions of the plot would pass by the laws of intestate succession upon the owner's death. This bill would also provide that, on and after January 1, 2002, any unoccupied portions of a family plot that previously were inalienable pursuant to the above existing law provision, shall pass by the laws of intestate succession and shall become alienable. This bill would impose specific requirements on the seller and the cemetery authority with respect to the sale, transfer, or donation of any unoccupied portions of a family plot.

Ch. 437 (SB 920) Dunn. Mobilehomes.

Existing law regulates mobilehome parks and limits the fees and charges the mobilehome lot park management may charge a park resident or owner of a mobilehome within the park. Existing law requires that, if the management provides both master-meter and submeter service of utilities to residents and owners, the monthly charges shall be separately stated for each resident or owner and that the management post in a conspicuous place the prevailing residential utilities rate schedule as published by the serving utility.

This bill would require the management of a master-meter mobilehome park to give written notice by February 1 of each year to homeowners and residents in their utility billing statements about assistance to low-income persons for utility costs available under the California Alternate Rates for Energy (CARE) program. The notices would be required to include specified information regarding the CARE program.

This bill would provide that the management of a master-meter mobilehome park may accept and help process CARE program applications, and send the applications to the serving utility. This bill would also provide that the management may not deny a homeowner or resident who chooses to submit a CARE application to the utility himself or herself any park information, including a utility account number, the serving utility requires to process an application.

This bill would also require the management of a master-meter mobilehome park to pass through the full amount of the resulting CARE program discount in monthly utility billings

to homeowners and residents who have qualified for the CARE rate schedule, as defined in the serving utility's applicable rate schedule. The bill would require the management to notice the discount on the billing statements of any homeowner or resident who has qualified for the CARE rate schedule, as specified.

Ch. 438 (SB 958) Ackerman. Attorneys: mortgages and deeds of trust.

(1) Existing law, which will be repealed by its own terms on January 1, 2002, requires the State Bar of California to conduct a study, as specified, concerning the legal and professional responsibility issues that may arise as a result of the relationship between an attorney and an insurer when the attorney is retained by the insurer to represent an insured, and the attorney is subsequently retained to represent a party against another party insured by the insurer, and to submit a report of the study, with any recommendations, to the Legislature and the California Supreme Court on or before July 1, 2001.

This bill would extend that repeal date to January 1, 2003, and extend the deadline for submission of the report of the study to the Legislature and the California Supreme Court to on or before July 1, 2002.

(2) Existing law requires a person recording a notice of default of a mortgage or deed of trust to perform specified actions.

This bill would require that person recording the notice of default to provide a copy of the notice of sale to the Internal Revenue Service if a "Notice of Federal Tax Lien" has been recorded against the real property to which the notice of sale applies.

(3) Existing law limits specified trustee's or attorney's fees in connection with certain procedures required upon default in payment of obligations under a mortgage or deed of trust to \$240 with respect to any portion of the unpaid principal sum secured that is \$50,000 or less, plus additional incremental allowable percentages of the principal sum over that amount.

This bill would, operative January 1, 2002, increase the specified maximum amount of that fee to \$300 plus additional incremental percentages of a principal sum of \$50,000 or less, or \$250 plus additional incremental percentages of a principal sum in excess of \$50,000.

(4) Existing law limits specified trustee's or attorney's fees in connection with the enforcement of certain terms of obligation upon default in payment under a mortgage or deed of trust to \$350 with respect to any portion of the unpaid principal sum secured that is \$50,000 or less, plus additional incremental allowable percentages of the principal sum over that amount.

This bill would, operative January 1, 2002, increase the specified maximum amount of that fee to \$425 plus additional incremental percentages of a principal sum of \$150,000 or less, or \$360 plus additional incremental percentages of a principal sum in excess of \$150,000.

(5) Existing law limits specified trustee's or attorney's fees in connection with a sale of property, that may be deducted from the proceeds of the sale, to \$350.

This bill would, operative January 1, 2002, increase that fee limit to \$425. The bill would also make clarifying changes with respect to reconveyance fees.

(6) Existing law provides for the postponement of sales of property under the power of sale in a deed of trust or mortgage, as specified.

This bill would, operative January 1, 2002, revise the postponement of those sales that are subject to postponement pursuant to a stay imposed under federal bankruptcy law.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 439 (SB 185) Bowen. Battered women's shelters.

Existing law requires the Maternal and Child Health Branch of the State Department of Health Services to administer grants, awarded as the result of a request for application process, to battered women's shelters.

This bill would require the Maternal and Child Health Branch of the State Department of Health Services to conduct a site visit to each agency that receives funding received through

the grant program for a performance assessment and to provide technical assistance to each agency.

Ch. 440 (SB 201) Speier. Public Utilities Commission: division to represent interests of customers and subscribers.

Existing law establishes a division within the Public Utilities Commission to represent the interests of public utility customers and subscribers in commission proceedings. Existing law provides for a director of the division appointed by and serving at the pleasure of the Governor, subject to Senate confirmation. Existing law provides for the Public Utilities Commission Ratepayer Advocate Account in the General Fund and requires that money from the Public Utilities Commission Utilities Reimbursement Account in the General Fund be transferred in the annual Budget Act to the Public Utilities Commission Ratepayer Advocate Account for performance of the duties of the division. Existing law provides for the repeal of those provisions on January 1, 2002, and the replacement of those provisions on that date with provisions requiring the commission to create an organization or division within the commission to represent the interests of public utility customers and subscribers in commission proceedings.

This bill would delete the repeal of the provisions that provide for the division, the director of the division, and the Public Utilities Commission Ratepayer Advocate Account, and would repeal the provisions that were to become operative January 1, 2002. The bill would instead provide that the division represent the interests of public utility customers and subscribers, but no longer limit that representation to commission proceedings. This bill would also set forth the procedures for making and resolving objections to demands for the production or disclosure of information made by the division, as specified.

Ch. 441 (SB 481) Speier. Vehicles: dealers: licenses.

(1) Existing law requires licensed vehicle dealers to post certain notices at the dealer's established place of business.

This bill would also require each dealer to clearly and conspicuously display in its showroom at its established place of business and in a place that is easily accessible to prospective purchasers, a clear and conspicuous listing of each vehicle that the dealer has advertised for sale if the vehicle meets prescribed requirements.

Because, under existing law, a violation of the statutes governing licensed dealers is a crime, this bill would impose a state-mandated local program by changing the definition of a crime.

(2) Existing law makes it unlawful for an advertisement by a licensed vehicle dealer of a specific vehicle for sale to fail to identify the vehicle by either its vehicle identification number or license number.

This bill would exclude from this prohibition any advertisement that offers for sale a class of new vehicles, consisting of 5 or more vehicles, in a dealer's inventory that are all of the same make, model, model-year, and type. The bill would also allow a vehicle to be identified by a certain portion of the vehicle identification number.

(3) Existing law makes it unlawful for a licensed vehicle dealer to, among other things, advertise the total price of a vehicle without including all costs to the purchaser at the time of sale except certain specific exemptions (for example, taxes and registration fees). The fact that these costs are excluded from the total advertised price of a vehicle is required to be included in the advertisement.

This bill would include the costs of the California tire fee, as defined, in costs that may be excluded from the total advertised price.

The bill would require the fact that certain costs are excluded from the advertised total price to be disclosed by a specific disclosure statement. The bill would thus impose a state-mandated local program by expanding the scope of an existing crime.

(4) Existing law makes it unlawful for a licensed vehicle dealer to fail to sell a vehicle to any person at the advertised total price, which is a price exclusive of taxes, fees, and certain other authorized charges.

This bill would provide that an advertised vehicle must be sold at or below the advertised total price regardless of whether the purchaser has knowledge of the advertised total price. The bill would thereby impose a state-mandated local program by expanding the scope of an existing crime.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 442 (SB 594) Chesbro. Pest control: Pierce's disease.

Existing law creates in the Department of Food and Agriculture the Pierce's Disease Control Program. Under existing law, funds appropriated for this program shall not be allocated to a local public entity, as designated by the county's board of supervisors, until the local public entity creates a Pierce's disease work plan that is approved by the department.

Existing law, the Winegrape Pest and Disease Control District Law, authorizes the formation of winegrape pest and disease control districts to respond to the effects of winegrape plant pests and diseases, and to collect and disseminate to winegrape producers in the district all relevant information and scientific studies concerning the pests and diseases, as well as to chart and determine the extent and location of any infestations. Existing law sets forth a procedure for the formation, consolidation, reauthorization, and dissolution of the districts, and provides for their powers and duties, including the power to make assessments for the purposes of the district.

This bill would create the Napa County Winegrape Pest and Disease Control District Law and would state various findings and declarations with respect to Pierce's disease and its vector the glassy-winged sharpshooter, winegrapes, and Napa Valley's contribution to the winegrape industry. This bill would declare that it is the purpose of these provisions to, among other things, assist in the funding of the inspection, detection, and education of Pierce's disease as stated in the Napa County Glassy-Winged Sharpshooter Workplan, as specified, to prevent the spread of Pierce's disease by the glassy-winged sharpshooter. This bill would set forth procedures for the formation, consolidation, reauthorization and dissolution of the districts, and provide for their powers and duties in a similar fashion to existing law. The bill would impose duties on a county board of supervisors if a petition is filed to form a district, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 443 (SB 664) Poochigian. Nursing education.³

Existing law establishes the California Postsecondary Education Commission as the statewide postsecondary education coordinating and planning agency, which serves as a fiscal and program advisor to the Governor and the Legislature on postsecondary educational policy.

This bill would require the commission to conduct, or contract to conduct, a review and analysis of California community college districts' admission procedures and attrition rates for their 2-year associate degree nursing programs. The bill would require the commission to submit findings of the review and analysis, along with relevant recommendations, to the Governor and the Legislature on or before January 10, 2003. The bill would repeal these

NOTE: Superior numbers appear as a separate section at the end of the digests.

provisions on January 1, 2004. The bill would appropriate \$130,000 from the General Fund to the commission for purposes of the bill.

Ch. 444 (SB 683) Ortiz. Public health information: confidentiality.

Existing law relating to public health surveillance provides for the collection of information with respect to birth defects monitoring, and also with respect to determination of the incidence of cancer. Existing law further provides for the confidentiality of this information, except as specified.

The bill would specifically designate the information described above as “confidential information.” This bill would recast and revise the confidentiality requirements relating to each of the above subjects, including providing that the confidential information shall not be available for subpoena, or disclosed, discoverable, compelled to be produced, or admissible as evidence in any civil, criminal, administrative, or other proceeding. This bill would provide that individuals to whom the confidential information pertains shall have access to their own information in accordance with the Information Practices Act of 1977.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 445 (SB 884) Escutia. Dependent children.

Existing law requires, whenever a child may be placed in the home of a relative or a prospective guardian or other person who is not a licensed or certified foster parent, the county social worker to check the Child Abuse Index, as specified, to be requested from the Department of Justice. If the fingerprint clearance check indicates that the person has been convicted of a crime that would preclude that person from receiving a license or permit to operate a foster family home, the child may not be placed in the home, except that existing law authorizes the Director of Social Services, upon request from a county, to waive the application of these requirements, as specified.

This bill would revise the above-described exception to authorize a county to grant an exemption from these requirements if the Director of Social Services has granted the county permission to issue criminal records exemptions, as specified. The bill would require the State Department of Social Services to conduct an evaluation of the implementation of these provisions through random sampling. The bill also would authorize the State Department of Social Services to evaluate a request from an Indian tribe for an exemption from these requirements to allow placement into an Indian home, as specified. These provisions would remain operative only until January 1, 2005.

Operative January 1, 2005, the bill would delete the provision in existing law authorizing the Director of Social Services to waive the application of these requirements.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 446 (SB 908) Chesbro. State Coastal Conservancy: California Coastal Trail.

Existing law requires the State Coastal Conservancy to implement various coastal protection and preservation programs in coastal areas of the state.

This bill would require the conservancy, in consultation with the Department of Parks and Recreation and the California Coastal Commission, to coordinate the development of the California Coastal Trail, and would require each agency, board, department, or commission of the state with property interests or regulatory authority in coastal areas, to the extent feasible, and consistent with their individual mandate, to cooperate with the conservancy with respect to planning and making lands available for completion of the trail. The bill would authorize the conservancy to award grants and provide assistance to public agencies and nonprofit organizations to establish and expand inland trail systems that may be linked to the California Coastal Trail. The bill would require the California Coastal Trail to be developed in a manner that demonstrates respect for property rights and the proximity of the trail to residential uses, and that evidences consideration for the protection of the privacy of adjacent property owners.

The bill would also require the conservancy, not later than January 31, 2003, in consultation with the California Coastal Commission, the California Conservation Corps, and the Department of Parks and Recreation, to complete a plan for the development of the California Coastal Trail, and to submit to the Legislature a copy of the plan by that date. The provisions of the bill would be implemented only during those fiscal years for which funding is provided for the purposes of the bill in the annual Budget Act.

Ch. 447 (SB 1055) Morrow. Public Utilities Commission: customer priorities.

(1) Existing law requires the Public Utilities Commission to establish priorities among the types or categories of customers of every electrical corporation and every gas corporation, and among the uses of electricity or gas by those customers. In establishing those priorities, the commission is required, among other things, to identify those customers and uses that provide the most important public benefits and serve the greatest public need in descending order of priority.

This bill would require the commission to also include as a consideration when establishing these priorities a determination of unacceptable jeopardy or imminent danger to public health and safety that creates substantial likelihood of severe health risk requiring medical attention. The bill would also require the commission to consider the effect of providing a high priority to some customers on nonpriority customers.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 448 (SB 1136) Polanco. Insurance.

Existing law provides that it is a misdemeanor to advertise a nonadmitted insurer in this state unless the advertising is performed by a surplus line broker. Existing law provides, until January 1, 2002, certain exceptions to that prohibition on advertising a nonadmitted insurer.

Existing law provides, until January 1, 2002, that it is a misdemeanor to place certain types of insurance with a nonadmitted insurer unless placed by or through a special lines' surplus line broker, as specified.

This bill would delete the January 1, 2002, repeal of those provisions. The bill would make related changes.

Ch. 449 (SB 1154) Sher. Coastal Watershed Salmon Habitat Program.

Existing law sets forth a process to govern the expenditure of any funds received by the state from the federal government for the purposes of salmon and steelhead trout conservation and restoration.

This bill would additionally require the expenditure of funds authorized for the Coastal Watershed Salmon Habitat Program to be subject to that process.

This bill would appropriate \$7,500,000 from the Coastal Watershed Salmon Habitat Subaccount to the Department of Fish and Game for the Mill Creek acquisition project.

Ch. 450 (SB 1158) Knight. Hazardous waste: universal waste aerosol cans.

(1) Under existing law, the Department of Toxic Substances Control is required to issue hazardous waste facilities permits to use and operate hazardous waste management units. Existing law exempts, from the hazardous waste facilities requirements, the puncturing, draining, or crushing of aerosol cans if specified requirements are met by the owner or operator conducting that activity, including that the equipment used is designed to capture the gaseous and liquid contents of the cans, prevent fire, explosion, and unauthorized releases of hazardous constituents, and prevent worker exposure to hazardous materials released from the cans, and is certified by the department. A violation of the hazardous waste control law is a crime.

The bill would delete the puncturing, draining, or crushing of aerosol cans from that exemption from hazardous waste facilities requirements. This bill would define the term of "universal waste aerosol can" as a hazardous waste aerosol can while it is being managed according to specified regulations, and in a specified manner. The bill would impose

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified requirements on any person who manages aerosol cans that meet specified requirements, and would require a universal waste handler, as defined, to manage universal waste aerosol cans in a manner that prevents fire, explosion, and the unauthorized release of any universal waste or component of a universal waste into the environment. The bill would require a container used to accumulate or transport universal waste aerosol cans, or their contents, to meet specified requirements and would require a universal waste handler to accumulate universal waste aerosol cans in clearly marked or labeled containers, as specified. The bill would authorize a universal waste handler to remove and collect any contents of a universal waste aerosol can if the handler meets specified requirements, and would impose requirements on any contents of a universal waste aerosol can that exhibit a characteristic of hazardous waste. The bill would require a universal waste handler that processes universal waste aerosol cans to submit a specified notification to the Certified Unified Program Agency (CUPA) with jurisdiction over that universal waste handler, or to the agency authorized by the Secretary for Environmental Protection for that purpose. The bill would impose a state-mandated local program by creating new crimes regarding the management of universal waste aerosol cans.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 451 (SB 1180) Committee on Public Employment and Retirement. Public Employees' Medical and Hospital Care Act: protection and advocacy agency.

Existing law establishes a protection and advocacy agency that is a private nonprofit corporation, designated by the Governor pursuant to federal law, for the protection and advocacy of the rights of persons with developmental disabilities and persons with mental illness.

Existing law authorizes specified public agencies to elect, subject to certain conditions, to provide coverage for the agency's employees and annuitants, as defined, in health benefits plans under the Public Employees' Medical and Hospital Care Act and requires those agencies to make specified contributions to the Public Employees' Contingency Reserve Fund, a continuously appropriated special fund, to cover the administrative costs incurred by the Board of Administration of the Public Employees' Retirement System in providing that coverage.

This bill would authorize the protection and advocacy agency to elect to provide health benefits coverage under that act to the agency's employees and annuitants, if the agency obtains a specified opinion from the United States Department of Labor. By authorizing a new source of contributions to a continuously appropriated fund, the bill would make an appropriation.

Ch. 452 (SB 1190) Committee on Health and Human Services. Assistive dog allowance.

Existing law specifies that an individual who has a guide, signal, or service dog and who is a recipient of the federal Supplemental Security Income/State Supplementary Program for the Aged, Blind and Disabled (SSI/SSP) is eligible for a \$50 per month allowance for dog food and other costs related to the care and maintenance of the dog.

Existing law also provides that an individual who has a guide, signal, or service dog, and who is a recipient of federal Social Security Disability Insurance (SSDI) benefits whose income and resources are not in excess of the federal poverty level is eligible for a \$35 per month allowance for dog food and other costs related to the care and maintenance of the dog.

This bill would increase the allowance level for eligible SSDI recipients to \$50.

Ch. 453 (AB 297) Kehoe. Before and after school programs.

Existing law establishes the After School Learning and Safe Neighborhoods Partnerships Program to create incentives for establishing local after school enrichment programs and establishes maximum grant amounts for participating schools and serve pupils in kindergarten and grades 1 to 9, inclusive, at participating elementary, middle, and junior high schoolsites. Under existing law, every after school program established pursuant to the program is required to operate a minimum of 3 hours a day and at least until 6 p.m. on every regular schoolday.

Existing law, notwithstanding any other provision of law or regulation, permits a participating program operated by a city, county, or nonprofit organization to operate for up to 20 hours per week without obtaining a license or special permit otherwise required under prescribed provisions of law.

This bill would, until January 1, 2005, establish the Six-to-Six Before and After School Program to establish a similar program to provide local before and after school enrichment programs. This bill would permit a participating program, operated by a city or county in partnership with a community-based organization with the approval of a local educational agency and operated on a schoolsite, to operate for up to 30 hours per week without obtaining a license or special permit otherwise required under prescribed provisions of law. The bill would authorize the enrichment programs to operate only pursuant to the authorization of the governing board of a school district.

Ch. 454 (AB 334) Steinberg. Mental health funding: local grants.

Existing law provides for the allocation of state funds to counties for mental health programs. Existing law requires the State Department of Mental Health to establish service standards relating to mental health services. These standards are required to include, among other things, plans for services, evaluation strategies, coordination, and access to related medications, substance abuse services, housing assistance, vocational rehabilitation, and veterans' services. Existing law requires the department to select up to 3 counties or portions of counties for eligibility for demonstration grants to be used to provide comprehensive services to certain adults who are severely mentally ill. Existing law also requires the director to establish a methodology for awarding these grants and to establish a designated advisory committee.

This bill would make various statements of legislative findings and intent regarding the need to provide sufficient funds to counties for adult mental health and related services. This bill would define the outreach services that are part of the service planning and delivery process under the bill. This bill would provide that the outreach to adults required as part of the service standards may include adults voluntarily or involuntarily hospitalized as a result of a severe mental illness. This bill would also require that the service standards include provision for persons who have been suffering from an untreated severe mental illness for less than one year, and who do not require the full range of services but are at risk of becoming homeless unless a comprehensive individual and family support services plan is implemented. The bill would require that these persons be served in a manner that is designed to meet their needs. This bill would also make various changes in and additions to reporting requirements. This bill would also add certain training, consultation, and technical assistance requirements to existing law. This bill would also provide for services for persons who have been suffering from an untreated severe mental illness for less than one year. This bill would also provide for training for various professionals likely to come into contact with persons who may be suffering from an untreated severe mental illness. This bill would also require that proposals to be submitted to the state by a city or county be reviewed by a local advisory committee, including clients, family members, private providers of services, and other relevant stakeholders. This bill would require the advisory committee to provide to the director written comment on each of the county programs.

Ch. 455 (AB 402) Papan. Taxpayer contributions: Lupus Foundation of America, California Chapters Fund.

Provisions relating to the administration of personal income taxes allow individual taxpayers to contribute amounts in excess of their tax liability for the support of specified funds.

This bill would additionally allow taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the Lupus Foundation of America, California Chapters Fund, which would be created by this bill. However, the bill would provide that a voluntary contribution designation for this fund shall not be added on the tax return until another voluntary contribution designation is removed.

This bill would provide that all money contributed to the fund pursuant to these provisions would be subject to appropriation by the Legislature, as specified.

This bill would provide that these voluntary contribution provisions are repealed on January 1 of the fifth taxable year following the taxable year the fund first appears on the tax return. The bill would also provide that the provisions are repealed for taxable years beginning on or after January 1 of the calendar year in which the Franchise Tax Board estimates, by September 1, that the contributions made on returns filed in that calendar year will be less than \$250,000, or an adjusted amount for certain subsequent taxable years.

Ch. 456 (AB 451) Firebaugh. Air pollution: architectural paint and coatings.

(1) Existing law requires each air pollution control district and each air quality management district that has been designated a nonattainment area for ozone, carbon monoxide, sulfur dioxide, or nitrogen dioxide to submit to the State Air Resources Board a plan for attaining and maintaining the state ambient air quality standards. Existing law also requires the state board to make technical assistance available to support attainment planning.

This bill would authorize the state board to recommend for adoption by a district any suggested control measure for any architectural paint or coating, if the state board determines that the control measure will achieve a feasible reduction in volatile organic compounds emitted, and if the state board determines that adequate data exist to establish that the control measure is necessary to attain state and federal ambient air quality standards and is commercially and technologically feasible and necessary.

(2) Existing law also requires the governing board of each district to hold a noticed hearing prior to adopting, amending, or repealing any rule or regulation.

This bill also would require each district to provide at least one public workshop for any rule the district adopts regarding architectural paint or coating. By imposing an additional duty on the districts, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 457 (AB 509) Leach. Traffic violator schools.

(1) Existing law requires the Department of Motor Vehicles to license schools for traffic violators for purposes of providing traffic safety instruction to those persons referred to the schools by courts.

This bill would provide that the traffic violator schools are also licensed for purposes of providing traffic safety instruction to other persons who elect to attend. The bill would make related and conforming changes.

(2) Existing law requires the department to license driving schools and schools for traffic violators in accordance with separate provisions.

This bill would require any person who elects to attend a traffic violator school to receive from the traffic violator school and to sign a copy of a prescribed consumer disclosure statement concerning the different training, regulatory standards, and Vehicle Code requirements of licensed driving schools and licensed traffic violator schools prior to the payment of the traffic violator school fee and attending the school. The bill would specify that this requirement does not apply to persons referred to traffic violator schools by courts.

The bill would require a copy of each signed disclosure statement to be retained by the traffic violator school for a minimum of 36 months.

Because under existing law, a violation of the Vehicle Code is a crime, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 458 (AB 559) Wiggins. Emergency medical services.

(1) Existing law authorizes a pharmacy to furnish a dangerous drug or dangerous device to a licensed health care facility for storage in a specified manner.

This bill would authorize a pharmacy to furnish epinephrine auto-injectors to a school district or county office of education if certain conditions are met. The bill would require the school district or county office of education to maintain records regarding the acquisition and disposition of epinephrine auto-injectors furnished by the pharmacy for a period of 3 years from the date the records were created.

(2) Under existing law, the governing board of any school district is required to give diligent care to the health and physical development of pupils, and may employ properly certified persons for that work.

This bill would authorize a school district or county office of education to provide emergency epinephrine auto-injectors to trained personnel, and would authorize the trained personnel to utilize those epinephrine auto-injectors to provide emergency medical aid to persons suffering from an anaphylactic reaction. The bill would expressly authorize each public and private elementary and secondary school in the state to voluntarily determine whether or not to make emergency epinephrine auto-injectors and trained personnel available at its school and to designate one or more school personnel to receive prescribed training regarding epinephrine auto-injectors from individuals in specified positions. The bill would require the Superintendent of Public Instruction to establish minimum standards of training for the administration of epinephrine auto-injectors and to consult with the State Department of Health Services, organizations, and providers with expertise in administering epinephrine auto-injectors and administering medication in a school environment in developing those standards. The bill would authorize school nurses or, if the school does not have a school nurse, a person who has received training regarding epinephrine auto-injectors, to obtain prescriptions for epinephrine auto-injectors from individuals in certain positions and to immediately administer an epinephrine auto-injector under certain circumstances. The bill would require those individuals to initiate emergency medical services or other appropriate medical followup in accordance with written training materials. The bill would also require any school district or county office of education electing to utilize epinephrine auto-injectors for emergency medical aid to create a plan to address specified issues.

(3) Existing law requires the Emergency Medical Services Authority to develop planning and implementation guidelines for emergency medical service systems which address, among other things, manpower and training. Existing law requires the authority to adopt

rules and regulations as may be reasonable and proper to enable the authority to exercise its powers and perform its duties.

This bill would require the authority to establish training and standards for all prehospital emergency care personnel regarding the characteristics and method of assessment and treatment of anaphylactic reactions and the use of epinephrine, and to promulgate regulations therefor.

Ch. 459 (AB 652) Horton. University of California: Health Professions Education and Outreach.

Existing law establishes the University of California, and provides for its administration, and the provision of instruction at its various campuses, by the Regents of the University of California.

This bill would request the Regents of the University of California, on or before January 15, 2003, to report to the Legislature concerning the university's existing and planned efforts to recruit students to its schools of medicine, dentistry, and optometry from communities and populations that are dentally and medically underserved. The bill also would request the regents, to the extent possible, to use existing resources to establish dental, medical, and optometric health professions outreach and exposure programs for elementary, high school, and undergraduate students, including community college students.

Ch. 460 (AB 871) Cox. Vehicles: dealers.

(1) Existing law excludes from the term "dealer" for purposes of the Vehicle Code, among other persons and entities, public or private nonprofit charitable, religious, or educational institutions or organizations that sell vehicles if certain conditions are met, including that the proceeds of the sale of the vehicles are retained by that institution or organization for specific purposes and that the vehicles sold are donated to the institution or organization.

This bill would allow an institution or organization to sell vehicles on behalf of another qualifying institution or organization under described circumstances.

(2) Under existing law, any institution or organization described above is required to keep a record for not less than 3 years of the name and address of each vehicle donor. Existing law authorizes the Department of Motor Vehicles to inspect the records of a nonprofit institution or organization that sells vehicles in order to ascertain whether it meets the conditions described in (1).

This bill would recast this provision to require the institutions or organizations to keep additional records including, if the donated property is being sold by an institution or organization on behalf of another institution or organization, unless sold at wholesale, a described signed, written contract and separate listings and documents pertaining to the sale.

Because, under existing law, a violation of the Vehicle Code is a crime, this bill would impose a state-mandated local program by expanding the scope of that crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 461 (AB 1259) Wiggins. Hazardous waste facilities permits: suspension.

Existing law authorizes the Department of Toxic Substances Control to deny, suspend, or revoke any permit applied for, or issued, pursuant to the hazardous waste control laws, if the applicant or holder of the permit has violated, or is not in compliance with, specified laws and regulations governing hazardous wastes and substances.

This bill would require the department to suspend the permit, as defined, of any hazardous waste facility for nonpayment of specified fees, or for a failure to pay penalties imposed for a violation of the hazardous waste control laws or regulations by an administrative hearing

officer or trial court judge. The bill would also authorize the department to deny a new permit or the renewal of an existing permit, on the same grounds that the department is required to suspend a permit.

The bill would require the department, before suspending a permit, to comply with specified procedures and would specify related matters.

Ch. 462 (AB 1376) Wyman. Emergency response vehicles.

Existing law requires the Department of Transportation and local authorities in their respective jurisdictions, to place and maintain, or cause to be placed and maintained, appropriate signs, signals, and other traffic control devices.

This bill would require the department to apply, in cooperation with other interested cities with Traffic Signal Override Systems, to the United States Secretary of Transportation for federal funding to conduct a research program in one or more cities to test the effectiveness of the installation of signal emitters and sensors in emergency response vehicles in reducing accidents and injuries. It would require the department to submit a report on its findings to the budget and transportation committees of the Legislature within 6 months after the study is completed.

Ch. 463 (AB 1449) Keeley. Child support.

Existing law requires the local child support agency in each county to enforce child support orders and to collect arrearages, as specified.

This bill would require the Department of Child Support Services, in consultation with the State Department of Social Services, to establish and promulgate, by October 1, 2002, specified regulations by which the local child support agency may compromise an obligor's liability for public assistance debt in cases where the parent separated from or deserted a child who consequently became the recipient of aid under the AFDC-FC or CalWORKS programs, if specified conditions are met, and the department determines that compromise is necessary for the child's support. The bill would define "guardian" and "relative caregiver" for these purposes. The bill would also require the State Department of Social Services, in consultation with the Department of Child Support Services, by October 1, 2002, to promulgate specified regulations by which the county child welfare department, in case of separation or desertion of a parent or parents from a child resulting in aid, as specified, would determine whether it is in the best interests of the child to have his or her case referred to the local child support agency for child support services, as specified. The bill would further require the local child support agency to consult with the county child welfare department prior to compromising an obligor parent's liability for debt incurred for AFDC-FC payment provided to a child.

This bill also would require the Department of Child Support Services and the State Department of Social Services to make a report to the Governor and Legislature, by October 1, 2003, which contains specified topics addressed by this bill.

Certain provisions of this bill would not be implemented if it is determined that the provisions would reduce federal financial participation to AFDC-FC or CalWORKS programs. The bill would make other related, conforming changes.

Because this bill would impose new duties on local officials, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 464 (AB 1589) Simitian. Healing arts: electronic transmission of prescriptions.

Existing law, the Medical Practice Act, creates the Medical Board of California and requires it to perform various duties relating to the practices of physicians and surgeons and other healing arts practitioners.

This bill would require the board to consult with the California State Board of Pharmacy and commission a study that evaluates the electronic transmission of prescriptions by physicians and surgeons and report its results to the Legislature on or before January 1, 2003. The bill would specify that the board's report include recommendations on whether the electronic transmission of prescriptions should be encouraged, methods to encourage physicians and surgeons and other specified persons to use this method to transmit prescriptions, and to identify systems to protect the privacy of patients, including the issuance of a digital certification, as defined.

Ch. 465 (AB 1258) Wiggins. Vehicles: rentals.

Existing law regulates commerce relating to the sale, lease, or rental of motor vehicles.

This bill, from September 11, 2001 until January 1, 2002, upon written findings by the Director of Motor Vehicles and the Executive Officer of the State Air Resources Board, would authorize a vehicle rental company, as specified, to rent passenger vehicles in this state that are registered in another state, if the vehicles model years are 2000, 2001, or 2002.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 466 (SB 189) Bowen. Controlled substance release: notification.

Existing law requires a seller of residential property to make disclosures upon the transfer of that property, and sets forth the content and form of these disclosures.

This bill would require any owner of residential real property who knows, by receipt of a specified notice or actual knowledge, that any release of an illegal controlled substance has come to be located on or beneath that real property to give written notice of that condition to the buyer, as prescribed. The bill would also require an owner of a residential dwelling unit who knows, by receipt of a specified notice or actual knowledge, that such a release has come to be located on or beneath that dwelling unit to give written notice to a prospective tenant prior to the execution of a rental agreement, as prescribed.

The bill would repeal the changes made by the bill on January 1, 2004.

Ch. 467 (SB 297) Speier. DNA data base.

Existing law requires that the Department of Justice develop a DNA data base for all cases involving the report of an unidentified deceased person or a high-risk missing person, as defined. Existing law requires that the data base be comprised of DNA data from genetic markers that are appropriate for human identification but have no capability to predict biological function. Under existing law, the department is directed to compare DNA samples of unidentified deceased persons with those of high-risk missing persons. Existing law requires that all DNA samples extracted from a living person be destroyed after a positive identification is made and a report issued. Existing law also provides that all DNA samples are confidential and can only be disclosed to department personnel, law enforcement officers, coroners, medical examiners, and district attorneys. Under existing law, a person who collects, processes, or stores DNA samples can be civilly and criminally liable for failure to comply with the sample destruction and confidentiality requirements.

This bill would allow inclusion in the DNA data base of DNA data from genetic markers that predict gender. This bill would also provide that retained samples and DNA extracted from a living person, and profiles developed therefrom, shall be used solely for the purpose of identification of the deceased's remains. In addition, this bill would waive the requirement that a DNA sample from a living person, and any profile developed therefrom, be destroyed after a positive identification is made and a report is issued in specified situations where the

DNA sample may be required for a criminal investigation to determine whether an identified person's death has been occasioned by criminal means or where a government agency is required to retain the sample while a person is incarcerated in connection with a case for which the DNA sample was obtained. This bill would also allow disclosure of DNA samples to persons who need access to a sample for the purposes of prosecuting or defending a criminal case, and would permit a law enforcement officer to publicly disclose the fact of a DNA profile match after taking reasonable measures to first notify the family of an unidentified deceased person or the family of a high-risk missing person that there has been an identification. In addition, this bill would require that a DNA sample submitted by a living person, including the parent or guardian of a child who submits a DNA sample of the child, be removed from the DNA data base upon that person's request. This bill would eliminate the existing criminal liability provisions and would provide that any person who discloses DNA or other forensic identification information to an unauthorized individual or agency or for purposes unrelated to identification or a criminal investigation or prosecution is guilty of a misdemeanor. This bill would also exempt DNA and other identification information retained by the department from public disclosure laws.

By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 468 (SB 314) Alpert. Criminal statistics.⁴

Existing law requires the Department of Justice to present a report to the Governor annually containing the criminal statistics of the preceding year, as specified. Existing law also requires the Department of Justice to collect data pertaining to the juvenile justice system.

This bill would require the report to contain statistics on the administrative actions taken by various branches of law enforcement and the criminal justice system in dealing with minors who are the subject of a petition or hearing in the juvenile court to transfer their case to the jurisdiction of an adult criminal court or whose cases are directly filed or otherwise initiated in an adult criminal court, as specified, beginning with the report due on July 1, 2003. This bill would also require that the data collected serve to assist the department in making this report.

This bill would appropriate the sum of \$75,000 from the General Fund to the Controller for disbursement to the Department of Justice for the purpose of these provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 469 (SB 315) Alpert. San Diego Advisory Committee for Environmentally Superior Antifouling Paints.

(1) Existing law generally provides for various state and local agency activities for the prevention of contamination of the state's water systems.

This bill would establish, until January 1, 2004, the San Diego Advisory Committee for Environmentally Superior Antifouling Paints, composed of specified persons appointed by the Board of Port Commissioners of the San Diego Unified Port District for 2-year terms. By requiring the board to appoint these committee members, the bill would impose a state-mandated local program. The purpose of the committee would be to make recommendations and to advise in the preparation of a report by the University of California, subject to the agreement of the university, or a consultant, to identify incentives necessary to ensure that nontoxic alternatives to metal-based antifouling hull coatings are used for recreational vessels.

(2) Existing law authorizes the Department of Boating and Waterways to expend funds from the Harbors and Watercraft Revolving Fund, which are available upon appropriation

NOTE: Superior numbers appear as a separate section at the end of the digests.

by the Legislature, for, among other things, boating facilities development, boating safety, and boating regulation programs. Existing law also makes the money in the fund available, upon appropriation by the Legislature, to the State Water Resources Control Board for boating-related water quality regulatory activities.

This bill would appropriate \$50,000 from the Harbors and Watercraft Revolving Fund to the department to provide funds to the University of California, subject to the agreement of the university, or a consultant, for preparation of the incentives report required under the bill.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 470 (SB 432) Monteith. Parole: child abuse.

Existing law requires that whenever a person confined in prison for a violent felony as defined, is to be released upon parole, the parole authority must notify the specified local law enforcement agency and the district attorney, who has jurisdiction in the community where the parolee is to be released. The notice must be made at least 45 days prior to the scheduled release of the inmate and must include specified information relating to the parolee, including the parolee's name, whether the parolee is required to register with local law enforcement, and the community in which the parolee will reside upon release. The agencies receiving notice are authorized to provide written comment to the parole authority responding to the scheduled release and these comments must be considered by the parole authority who is authorized to modify its decision regarding the community in which the parolee is to be released.

Existing law also requires that the parole authority provide notice to the immediate family of the victim, upon request, whenever a person confined in state prison for specified crimes involving child abuse as specified, or any sex offense specified as being perpetrated against a minor, or as ordered by a court, is scheduled to be released.

This bill would add to this notice requirement the release of a person who was confined for an act of domestic violence. The bill would require that notice also be given to a county child welfare services agency that requests notification.

Existing law requires that family reunification services be provided or arranged for by county welfare department staff in order to reunite the child separated from his or her parent because of abuse, neglect, or exploitation. These services shall not exceed 12 months, except as provided.

This bill would provide that when a county child welfare services agency is providing one parent with family reunification services and the other parent is serving a prison term for the conviction of child abuse, any sex offense specified as being perpetrated against a minor, or an act of domestic violence, the agency may request that it be provided with notification that the imprisoned parent is scheduled to be released on parole, or rereleased following a period of confinement pursuant to a parole revocation with a new commitment.

Ch. 471 (SB 459) McPherson. Housing programs: eligibility.

Existing law governing housing and home finance generally defines the term "affordable housing cost" to mean, with respect to very low, lower, and moderate-income households receiving assistance on or after January 1, 1991, housing costs not exceeding the product of a specified percentage times a specified percent of the area median income. Under existing law, this definition is used for determining, among other things, the affordability of housing made available pursuant to a requirement that a redevelopment agency allocate 20% of tax-increment revenues for housing available at affordable housing cost.

This bill would separately define affordable housing cost for any redevelopment agency within Santa Cruz County, with that specified percentage increased, for purposes of the provisions requiring a redevelopment agency to allocate 20% of tax-increment revenues for

housing available at affordable housing cost. The bill also would require the Department of Housing and Community Development to adopt specified regulations relative to housing affordability for purposes of the bill. These provisions would be repealed on January 1, 2005.

This bill would also impose specified reporting requirements on those redevelopment agencies and the Controller relating to the assistance provided by those agencies in Santa Cruz County.

This bill would incorporate additional changes in Section 33334.2 of the Health and Safety Code proposed by AB 637, AB 661, or both, to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 472 (SB 465) McPherson. Santa Cruz County Regional Transportation Commission.

(1) Existing law creates and prescribes the membership and powers of the Santa Cruz County Regional Transportation Commission.

This bill would revise the membership of the governing body of the commission. To the extent that this revision would establish additional duties upon local governmental entities, the bill would impose a state-mandated local program.

The bill would revise the power of the commission, to permit it to exercise (1) the power of eminent domain, (2) the power to preserve, acquire, construct, improve, and oversee multimodal transportation projects and services on rail rights-of-ways with Santa Cruz County to facilitate recreational, commuter, intercity, and intercounty travel, and (3) the authority to contract for any services to accomplish its purposes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 473 (SB 485) Committee on Public Safety. Public safety.

(1) Existing law prescribes various duties on probation officers.

This bill would reorganize specified provisions relating to the duties and responsibilities of probation officers.

(2) Under existing law, specified reserve officers have the powers of a peace officer upon compliance with certain conditions that include, among other things, completion of the basic training course for deputy sheriffs and police officers prescribed by the Commission on Peace Officer Standards and Training. Existing law imposes upon the commission specified requirements for implementing this provision. Among these requirements is the development of a supplemental course for existing level I reserve officers desiring to satisfy the basic training course for deputy sheriffs and police officers.

This bill would delete this requirement.

(3) Existing law provides for the disposition of photographs of minors that are harmful matter, as defined, and that are used in connection with criminal prosecutions, as specified.

This bill would recast those provisions to require the court to direct that disposition of the above described photographs take place, and would specify that the determination that the material constitutes harmful matter be made by the court.

(4) Existing law authorizes a person who is a peace officer, as defined, to purchase, possess, or transport, under specified conditions, any "less lethal weapon," as defined, for official use in the discharge of his or her duties. Existing law excludes from the definition of "less lethal weapon" specified semiautomatic firearms that are designated as assault weapons.

This bill would further exclude from the definition of "less lethal weapon" additional firearms that are also designated assault weapons.

(5) Existing law requires that the Department of Motor Vehicles make all specified records relating to the registration of vehicles, other information contained on an application for a driver's license, abstracts of convictions, and abstracts of accident reports required to be sent to the department in Sacramento, open to public inspection during office hours, except as specified.

This bill would require the department to make available to the courts and law enforcement agencies any conviction of specified vehicle offenses involving alcohol and drugs.

(6) Existing law requires the department to impose various penalties if any person refuses an officer's request to submit to, or fails to complete, a chemical test or tests to determine the alcoholic content of his or her blood, as specified. Existing law enhances the penalty if the person has prior convictions of specified provisions.

This bill would specify that for purposes of these provisions, a conviction of any offense in any state, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or Canada, that if committed in this state, would constitute a violation of specified provisions, is a conviction of that particular provision in California.

(7) Existing law requires the Department of Motor Vehicles to undertake a study and report the findings of that study to the Legislature on or before January 1, 2002, on the effectiveness of specified provisions relating to ignition interlock devices and the devices themselves, and, among other things, their effect on specified vehicle offenses involving driving under the influence of alcoholic beverages or drugs.

This bill would revise the studies and reports required on ignition interlock and would require one study and report to be completed on or before July 1, 2002, and another to be completed on or before July 1, 2004.

(8) Existing law authorizes the court to require any person convicted of a first offense violation of specified vehicle offenses involving driving under the influence of alcoholic beverages or drugs, and requires the court to order a person who drives a motor vehicle when his or her license is suspended, to install a certified ignition interlock device on any motor vehicle that the person owns or operates and prohibits that person from operating a motor vehicle unless the vehicle is equipped with such a device. Existing law limits the term of this restriction to 3 years.

This bill would specify that the term of this restriction shall be 3 years from the date of conviction.

(9) Existing law creates a Joint Legislative Committee for the Revision of the Penal Code. Existing law requires the committee to study and appraise existing provisions of the penal laws and procedures and related statutes, and to prepare, for submission to the Governor and the Legislature, a revised, simplified body of substantive and procedural laws relating to crimes.

This bill would eliminate that committee.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 474 (SB 685) Costa. Fresno County Transportation Authority.

The Fresno Transportation Improvement Act provides for the establishment of the Fresno County Transportation Authority with a specified membership. Upon approval of a specified proposition by a majority vote of Fresno County voters, the authority would be authorized to impose a 1/2% retail transactions and use tax for up to 20 years to finance highway improvements and for local transportation purposes in Fresno County, with priority given to specified state highways. The authority would terminate 2 years after the tax is last collected and existing law would be repealed at that time.

This bill would revise that act to continue the Fresno County Transportation Authority. Upon approval of a specified proposition by the Fresno voters, by a 2/3 vote, the authority

would be authorized to impose a 1/2% retail transactions and use tax for up to 30 years to finance regional transportation improvements.

The bill would require the transportation planning agency to prepare a county transportation expenditure plan regarding the expenditure of the revenues expected to be derived, but that plan would not be adopted by the authority until it has been approved by the board of supervisors and the appropriate city councils. The bill would require the transportation planning agency to review the plan biennially and assess the needs for transportation improvements and would authorize the transportation planning agency to amend the plan, as specified. Because the bill would require the transportation planning agency, the Council of Fresno County Governments, to prepare and review a county transportation expenditure plan that specifies the amount and formula by which the retail transactions and use tax would be allocated, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 475 (SB 736) Poochigian. Local law enforcement funding.

This bill would declare the intent of the Legislature to make the necessary statutory changes to implement the Budget Act of 2001 relative to state and local government finance and taxation.

Existing law establishes in each county treasury a Supplemental Law Enforcement Services Fund that receives from the Controller an annual allocation of state funds. Moneys from this fund are required to be allocated by the county auditor to the county, each city located within that county, and designated districts providing law enforcement services, in accordance with specified requirements. The moneys are allocated for, among other things, frontline law enforcement services and the implementation of a comprehensive multiagency juvenile justice plan with specified components and objectives, developed by the local juvenile justice coordinating council in each county and city and county. The county board of supervisors and the Board of Corrections are required to approve these plans. These provisions will become inoperative on July 1, 2002, and are repealed as of January 1, 2003.

This bill would prohibit the county auditor from transferring moneys from the fund to a recipient agency until the county Supplemental Law Enforcement Oversight Committee certifies receipt of an approved expenditure plan from the governing board of that agency. The bill would also require the local juvenile justice coordinating council to review and modify annually its comprehensive multiagency juvenile justice plan and require the county board of supervisors and the Board of Corrections to approve the modified plan. The bill would also revise the date by which a specified annual report is to be made by the oversight committee to the Controller. The bill would also delete the inoperative and repeal dates, thereby continuing the operation of this funding program indefinitely.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 476 (SB 768) McPherson. Prisons.

Existing law creates the Department of the Youth Authority within the Youth and Adult Correctional Agency. Existing law generally commits to the Department of the Youth Authority any person convicted of a public offense who, among other things, is found to be less than 21 years of age at the time of apprehension and who has not been sentenced to specified crimes. Under existing law, the Youth Authority shall accept a person committed to it if it believes that the person can be materially benefited by its reformatory and educational discipline, and if it has adequate facilities to provide that care.

This bill would authorize the Director of the Youth Authority to transfer and cause to be confined within the custody of the Director of Corrections any person 18 years of age or older

who is subject to the custody, control, and discipline of the Department of the Youth Authority and who is scheduled to be returned, or has been returned to the Department of the Youth Authority after serving a sentence imposed for a felony that was committed while he or she was in the custody of the Department of the Youth Authority. Under this bill, the person would not be transferred unless he or she voluntarily, intelligently, and knowingly executes a consent to the transfer, which would be irrevocable. Additionally, the person would be required to meet with a parole agent or appropriate Department of the Youth Authority staff member who would be required to explain specified matters to the person prior to his or her return to the Department of the Youth Authority. The bill also would require any person housed in an institution under the jurisdiction of the Department of Corrections pursuant to these provisions who has not attained a high school diploma or its equivalent to participate in educational or vocational programs, to the extent the appropriate programs are available.

Ch. 477 (SB 824) Poochigian. Criminalists.

Existing law provides for the California Criminalistics Institute in the Bureau of Forensic Services of the Department of Justice. The purpose of the institute includes facilitation and coordination of approaches to meet the high technology and forensic science needs of crime laboratories operated by the department and local law enforcement agencies and provision of training and methodology development for all law enforcement agencies.

This bill would make findings and declarations concerning the urgent need for forensic scientists with the rigorous scientific backgrounds and the practical laboratory experiences necessary to perform DNA analysis. This bill would provide that the Department of Justice, the California State University, and upon agreement by the regents, the University of California, shall work together to enhance collaborative opportunities for DNA training of university students, graduates, and existing employees of crime laboratories. This bill would provide that through its California Criminalistics Institute, the Department of Justice would develop and create an internship program for graduate-level students designed to prepare students to meet national standards for DNA analysis, as specified.

This bill would also provide that its provisions may only be implemented to the extent that funds are provided for their purposes in the annual Budget Act.

Ch. 478 (AB 245) Wyland. Identity theft.

Existing law provides that every person who willfully obtains personal identifying information about another person without that person's consent and uses that information for any unlawful purpose is guilty of a crime punishable by imprisonment in a county jail not to exceed one year, a fine not to exceed \$1,000, or both, or by imprisonment in the state prison, a fine not to exceed \$10,000, or both.

This bill would eliminate the requirement that the person who uses another person's personal identifying information for an unlawful purpose obtain that information without the person's consent. This bill would therefore make it a crime to use another person's personal identifying information for an unlawful purpose, regardless of whether the information was obtained without the person's consent. By expanding the scope of an existing crime, this bill imposes a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 479 (AB 340) Wright. California Science Center: police and security services.

Existing law provides for the Sixth District Agricultural Association, which is known as the California Science Center and authorizes the Executive Director of the center to appoint specified security and safety personnel.

This bill instead would provide that these appointments be made by the Exposition Park Manager, a position that would be established by the center and filled by a person appointed by the Governor for the purpose of managing, scheduling, and administering all park-related events, including oversight for the police and security services of the park.

Ch. 480 (AB 360) Wesson. Vehicle impoundment.

(1) Existing law allows peace officers to impound vehicles driven by persons whose driving privileges are suspended or revoked or who have never been issued a driver's license. Under existing law, the agencies that impound vehicles are required to notify the legal owner of an impounded vehicle that his or her vehicle has been impounded. Existing law further provides that the registered owner of an impounded vehicle is entitled to a hearing regarding the validity of, and any mitigating circumstances attendant to, the storage of the impounded vehicle. Existing law also requires that, under specified circumstances, impounding agencies release impounded vehicles to registered owners within 30 days of impoundment.

This bill would require impounding agencies to have a published telephone number that provides information 24 hours a day regarding vehicle impoundment and the rights of registered owners to request a hearing regarding the storage of their vehicles. The bill would also require that an impounding agency release an impounded vehicle to the registered owner within 30 days of impoundment if the vehicle was seized for an offense that does not authorize seizure of a vehicle or if the person driving the vehicle reinstates or acquires his or her driver's license and proper insurance. Finally, the bill would direct the Department of Motor Vehicles and the California Highway Patrol to educate the public that a vehicle driven by an unlicensed driver can be impounded, even when the driver is not the vehicle's owner.

Because this bill would create new duties for impounding agencies, this bill would impose a state-mandated local program.

(2) This bill would incorporate additional changes in Section 14602.6 of the Vehicle Code proposed by AB 783, to be operative only if AB 783 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 481 (AB 398) Salinas. Highways: safety enhancement-double fine zones.

(1) Existing law, until January 1, 2004, requires the Department of Transportation, in consultation with the Department of the California Highway Patrol, to develop specified pilot projects to designate and identify certain highway segments as "Safety Enhancement-Double Fine Zones" and impose increased fines for traffic violations occurring within these zones.

This bill would require the County of Monterey, in consultation with the California Highway Patrol, to develop a Safety Enhancement-Double Fine Zone pilot project that would be administered by the county for a designated portion of Monterey County Road 16 (Carmel Valley Road). The bill thereby would impose a state-mandated local program by establishing additional duties for the county.

This bill would terminate the pilot project if the county fails to provide an evaluation to the department on or before October 1, 2002.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 482 (AB 453) Correa. Department of Justice: DNA testing: infectious disease: employee contact.

Existing law allows a court in specified circumstances to order criminal defendants and minors charged with certain offenses to provide blood samples for testing for indications of acquired immunity deficiency syndrome (AIDS) and other conditions and diseases. Under existing law, specified persons are entitled to test results.

This bill would allow specified persons who conduct forensic testing to petition the court to have the aforementioned test performed and would entitle those persons to test results, as specified.

The bill would also make conforming or technical, nonsubstantive changes to related provisions.

Ch. 483 (AB 469) Cohn. Domestic violence.

Existing law requires all law enforcement agencies to prepare a written incident report containing specified information about all domestic violence-related calls for assistance made to the department. Existing law also requires that the total number of domestic-violence calls received and the number of those cases involving weapons be compiled by the agency monthly and submitted to the Attorney General.

This bill would require a law enforcement officer who responds to the scene of a domestic violence-related incident to prepare a domestic violence incident report which includes a notation of whether he or she found it necessary, for the protection of the peace officer or other persons present, to inquire of the victim, the alleged abuser, or both, whether a firearm or other deadly weapon was present at the location, and whether the inquiry disclosed the presence of a firearm or other deadly weapon. This bill would also require officers to confiscate any firearm or deadly weapon discovered at the location of a domestic violence incident. Because this bill would require local law enforcement officers to perform additional duties, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 484 (AB 653) Horton. Crime: minors: schools.

Existing law specifies those acts for which a pupil may be suspended from school or recommended for expulsion.

This bill would, in addition, include the act of aiding or abetting the infliction or attempted infliction of physical injury to another person as an act for which a pupil may be suspended, but not expelled.

Existing law provides that an assault committed on school property against any person is punishable by a fine not exceeding \$2,000, or by imprisonment in a county jail not exceeding one year, or by both such fine and imprisonment.

This bill would authorize the court, where the assault was committed by a minor, to order the minor to undergo counseling, with the cost of counseling to be borne by the minor's parents, as specified.

Existing law provides that a battery committed on school property against any person is punishable by a fine not exceeding \$2,000, or by imprisonment in a county jail not exceeding one year, or by both such fine and imprisonment.

This bill would authorize the court, if the battery was committed by a minor, to order the minor to undergo counseling, with the cost of counseling to be borne by the minor's parents, as specified.

Existing law provides that any person who is under the age of 18 years when he or she violates any law or ordinance defining crimes, as specified, is within the jurisdiction of the juvenile court.

This bill would, in addition, provide that if persons are subject to the jurisdiction of the juvenile court by reason of the commission of an assault or battery on school grounds, as specified, the court shall, in addition to any other fine, sentence, or as a condition of probation, order the minor to attend counseling at the expense of the minor's parents, as specified.

Ch. 485 (AB 1004) Bates. Sex offenders: registration.

Existing law requires specified sex offenders to register with the chief of police, the sheriff, or chief of police of the collegiate campus, as specified, of the city in which he or she is residing, or if he or she has no residence, in which he or she is located. Existing law also requires that if the person who is registering has no residence address, he or she update his or her registration no less than once every 90 days, in addition to the previous registration requirement.

This bill would change the requirement to update the registration to no less than once every 60 days if the person who is registering has no residence address. By increasing the registration requirement, this bill would increase the duties of local officials and expand the scope of an existing crime, thereby creating a state-mandated local program.

This bill would declare the intent of the Legislature relative to certain sex offenders on probation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 486 (AB 1029) Oropeza. Confidential DMV records.

(1) Existing law makes confidential the home address of certain persons appearing in the Department of Motor Vehicles records, if the person requests it be kept confidential, with certain exemptions for information available to specified governmental agencies. Violation of the confidentiality requirements is a felony.

This bill would include any employee designated for 3-year periods by a chief of police or sheriff as being in a sensitive position. This bill, by adding persons to be covered by the confidentiality requirements, would expand the scope of the crime, thereby imposing a state-mandated local program.

(2) This bill would incorporate additional changes in Section 1808.4 of the Vehicle Code, proposed by AB 84, to be operative only if AB 84 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 487 (AB 1112) Goldberg. Substandard residential rental property: owner registration.

(1) The State Housing Law regulates buildings used for human habitation and requires specified governmental agencies to enforce building standards.

This bill would require, until January 1, 2004, a private owner of multiunit residential rental property in Los Angeles County to submit to, and maintain with, the county board of supervisors certain identifying information regarding the property where a code enforcement agency has recorded with the county recorder a notice of substandard conditions or other specified document. Failure to comply with the reporting requirements of the bill would be a misdemeanor and would allow a tenant to raise an affirmation defense in an unlawful detainer action, except as specified. By creating a new crime, this bill would impose a state-mandated local program.

The bill would require the County of Los Angeles, on or before July 1, 2004, to prepare and provide a report on the effectiveness of the reporting requirements of the bill to specified committees of the Legislature. By imposing additional duties on local officials, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 488 (AB 1298) Wesson. Alcoholic beverage control: licenses: fees.

The Alcoholic Beverage Control Act provides for the issuance of licenses for which various annual fees are charged depending upon the type of license issued.

This bill would increase these annual fees by specified amounts through 2004, and would annually permit the Department of Alcoholic Beverage Control to adjust the fees charged commencing with the 2005 calendar year by an amount not to exceed an inflation factor based on the Consumer Price Index for the west region.

Under the Alcoholic Beverage Control Act, the Department of Alcoholic Beverage Control may issue a special on-sale general license to any nonprofit theater company that has been in existence for at least 10 years and meets other specified requirements. Theater companies holding a license pursuant to these provisions may only sell and serve alcoholic beverages to ticketholders during, 2 hours prior to, and one hour after, a bona fide theater performance of the company.

This bill would require that the license issued to the theater company be for a single specified premises, and would remove the requirement that the theater company have been in existence for at least 10 years.

This bill would permit a licensed manufacturer, winegrower, manufacturer's agent, California winegrower's agent, rectifier, distiller, bottler, importer, or wholesaler, or any officer, director, employee, or agent of that person, to serve on the board of trustees of a nonprofit theater company operating a theater in Napa County licensed pursuant to these provisions.

This bill would also require the department to conduct specified studies.

Ch. 489 (AB 1389) Shelley. San Francisco waterfront: cruise ship terminal development.

Under existing law (the Burton Act), the state granted certain lands to the City and County of San Francisco in trust for purposes of commerce, navigation, and fisheries, and subject to specified terms and conditions relating to the operation of the Port of San Francisco. Existing law (the McAteer–Petris Act) establishes the San Francisco Bay Conservation and Development Commission and requires the commission to regulate fill and development within a specified area in San Francisco Bay.

This bill would declare specified areas along the San Francisco waterfront to be free from the public trust for commerce, navigation, and fisheries, as provided, and would authorize the San Francisco Port Commission to approve a cruise ship terminal development, other maritime facilities, and commercial and office space on a specified area of the San Francisco waterfront. The bill would authorize the State Lands Commission to convey to the City and County of San Francisco all of the rights, title, and interest held by the state in trust to specified lands along the waterfront, but would prescribe terms and conditions for the use of those lands in connection with the cruise ship terminal development, as provided.

Ch. 490 (AB 1541) Dickerson. Park trailers: loft areas.

Existing law defines a recreational vehicle for purposes of the existing Mobilehome Residency Law, the Recreational Vehicle Park Occupancy Law, and the Mobilehome-Manufactured Housing Act of 1980 to include a park trailer. A park trailer is defined to mean a trailer designed for human habitation for recreational or seasonal use only, that, among other requirements, contains 400 square feet or less of gross floor area.

This bill would exclude loft area space that meets specified requirements from the calculation of gross floor area in that definition.

Ch. 491 (AB 1567) Runner. Redevelopment: City of Lancaster.

The Community Redevelopment Law requires redevelopment agencies to provide a certain percentage of affordable replacement housing, as specified, in place of housing destroyed or removed as part of a redevelopment project and, until January 1, 2002, allows that requirement to be satisfied by the acquisition of certain long-term affordability covenants on multifamily units.

This bill would authorize until January 1, 2006, the Redevelopment Agency for the City of Lancaster to purchase, or otherwise acquire or cause by regulation or agreement the purchase or other acquisition of, long-term affordability covenants on mobilehome parks in which residents rent spaces and either rent or own the mobilehome occupying their spaces, that restrict the cost of renting or purchasing those units, under prescribed conditions.

This bill would become operative only if AB 637 is enacted and becomes effective on or before January 1, 2002.

Ch. 492 (SB 72) Kuehl. Storm water.

Under existing law, the State Water Resources Control Board and the California regional water quality control boards prescribe waste discharge requirements for the discharge of storm water by municipalities and industries in accordance with the federal national pollutant discharge elimination system (NPDES) permit program.

This bill would require the state board to develop, before January 1, 2003, minimum monitoring requirements for regulated municipalities that were subject to a storm water permit on or before December 31, 2001, and minimum standard monitoring requirements for regulated industries, as specified, and would require the requirements established in accordance with the bill's provisions to be included in all storm water permits on or before July 1, 2008. The bill would require the state board to make available to the public via the Internet a summary of the results obtained from the storm water monitoring conducted in accordance with the bill, in a year in which the Legislature appropriates sufficient funds for that purpose.

Ch. 493 (SB 125) Alpert. Identity theft.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that every person who willfully obtains personal identifying information, as defined, of another person without the authorization of that person, and uses that information for any unlawful purpose in the name of the other person without the consent of that person is guilty of a public offense. Existing law further provides that a person who learns or reasonably suspects that his or her personal identifying information has been used by another to commit a crime may initiate a law enforcement investigation by contacting the local law enforcement agency. Under existing law, the law enforcement agency must take a police report of the matter and provide the complainant with a copy of that report.

This bill would entitle a person who discovers that an unauthorized person has applied for a loan, credit line or account, credit card, charge card, or utility service or has opened an account with a bank, other financial institution, or utility, in his or her name to receive, or specify a law enforcement officer to receive, a copy of the application or information related to that application, loan, credit line or account, credit card, charge card, or utility service. Before receiving these copies, the bill would require the entity with which the application was filed or the account was established to inform the requesting person of the categories of identifying information that the unauthorized person used to complete the application and would require the requesting person to provide identifying information in those categories and a copy of the police report. Additionally, before the entity provides copies to a specified law enforcement officer, the entity would be permitted to require the requesting person to provide them with a signed and dated statement by which the person authorizes the disclosure, as specified.

Existing law generally prescribes procedures for the disclosure of financial records in order to ensure customers' financial privacy. Existing law provides for specified exceptions to these requirements.

This bill would include among those exceptions disclosure by a financial institution to a peace officer provided the financial institution has complied with the requirements of the above provisions.

This bill would incorporate additional changes in Section 7480 of the Government Code, proposed by AB 1286, to be operative only if AB 1286 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 494 (SB 135) Figueroa. Contractors.

Existing law, the Contractors' State Licensing Law, requires the registrar to make available to the public the nature and disposition of all complaints on file against a licensee that have been referred for legal action. Existing law prohibits the disclosure of complaints that have been resolved in favor of the contractor.

This bill would require on July 1, 2002, the registrar to make available to the public the date, nature, and status of all complaints on file that have been referred for an accusation or an investigation due to a probable violation that, if proven, would be appropriate for suspension or revocation of the contractor's license or criminal prosecution. The bill would require the board to adopt a disclaimer that would accompany the disclosure of a complaint. The bill would require the registrar to disclose on July 1, 2002, or a later date, the date, nature, and disposition of all legal actions except as specified.

Ch. 495 (SB 136) Figueroa. Professional boards.

Existing law provides for the establishment of various professional boards and professional titling and regulatory programs within the Department of Consumer Affairs, including the Board for Professional Engineers and Land Surveyors, the State Board of Guide Dogs for the Blind, and the Tax Preparer Program. Funds in the Professional Engineer's and Land Surveyor's Fund are continuously appropriated for purposes of the Board for Professional Engineers and Land Surveyors.

This bill would extend the operation of the titling provisions relating to the Board for Professional Engineers and Land Surveyors, the State Board of Guide Dogs for the Blind, and the Tax Preparer Program. The bill would authorize the Board for Professional Engineers and Land Surveyors to increase registration fees for professional engineers and would thereby make an appropriation by including fee amounts deposited in a continuously appropriated fund. The bill would modify various other provisions relating to professional engineers, interior designers, and tax preparers. Because the bill would impose crimes and penalties for an extended period of time, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 496 (SB 667) Peace. Automated enforcement system.

(1) Existing law authorizes governmental agencies, in cooperation with law enforcement agencies, to operate an automated enforcement system. Under existing law, an automated enforcement system is a system that photographically records a driver's response to a rail or rail transit signal or crossing gate, or both, or to an official traffic control signal (stoplight) and is designed to obtain a clear photograph of the vehicle's license plate and the driver of the vehicle.

This bill would require, at each intersection at which there is an automated enforcement system in operation, the minimum yellow light change intervals to be established in accordance with the Traffic Manual of the Department of Transportation. The establishment of this requirement on agencies of local government would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 497 (SB 964) Costa. Vehicles.

(1) Existing law exempts from vehicle weight limits any cotton module mover or any truck tractor pulling a semitrailer that is a cotton module mover when operated during the period of September 15 of each year and ending March 15 of the following year and, among other things, when operating laterally across a state highway at grade of the state highway or upon any county highway within certain specified counties except when limited by the county board of supervisors.

This bill would allow the described vehicles to operate on any state highway within the specified counties during the described period, if the operator is in possession of a driver's license of the class required for operation of the mover, the mover is in compliance with certain lighting and equipment statutes, the mover does not exceed specified weight limits, and, in certain cases, the operator possesses a commercial driver's license.

The bill would provide that the above provisions do not apply to those highways designated as national network routes.

Because a violation of these prohibitions would be a crime, the bill would impose a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 498 (AB 285) Wayne. Sewage system overflows: reporting.

(1) Under the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board and the California regional water quality control boards are the principal state agencies that regulate water quality.

This bill would require the state board, on or before January 1 of a year in which the Legislature has appropriated sufficient funds for this purpose, and in consultation with specified entities, to develop report forms for spills or overflows from a sanitary sewer system. The bill would require a collection system owner or operator, as defined, commencing on July 1 of a year in which the Legislature has appropriated sufficient funds for this purpose, to use those report forms to report certain spills or overflows from a sanitary sewer system. The bill would require, commencing on July 1 of a year in which the Legislature has appropriated sufficient funds for this purpose, and in the event of a spill or overflow from a sanitary sewer system that is not subject to specified reporting requirements, if certain conditions are determined to exist, the particular agency making that determination to submit a prescribed report to the appropriate regional board. To the extent that this would increase the level of services imposed on local health officers, this bill would create a state-mandated local program. The bill would require the state board, before January 1 of a year in which the Legislature has appropriated sufficient funds for this purpose, and in consultation with specified entities, to develop and maintain a sanitary sewer system overflow database.

The bill would require, commencing on July 1 of a year in which the Legislature has appropriated sufficient funds for this purpose, each regional board to coordinate with collection system owners or operators, the State Department of Health Services, and local health officers to compile the reports submitted pursuant to the bill and report that information to the state board on a quarterly basis, to be included in the sanitary sewer system overflow database. The bill would require the state board to make available to the public, information that is generated pursuant to the bill. The bill would require the state board, in a year in which the Legislature has appropriated sufficient funds for the purposes described in this sentence, to prepare a summary report of the information collected in the sanitary sewer system overflow database, and make it available to the general public. The bill would make conforming changes and related legislative findings and declarations.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 499 (AB 459) Nation. Escrow agents: fees.

Existing law provides for the collection by the Commissioner of Corporations of various fees relating to the practice of escrow agents. Under existing law, until January 1, 2002, among other fees and assessments, an annual license fee of \$2,000 is required to be paid to the commissioner by an escrow agent for each office or location for the commissioner's administration of the Escrow Law. After January 1, 2002, in place of this annual licensing fee, an escrow agent is required to pay the commissioner a pro rata share, as estimated by the

commissioner, of all costs and expenses reasonably incurred in the administration of the Escrow Law.

This bill would extend from January 1, 2002, to January 1, 2006, the operation of the current fee and assessment procedure, but would authorize the imposition of an annual license fee of up to \$2,800 for an escrow agent. The bill, correspondingly, would delay until January 1, 2006, the requirement that an escrow agent pay the commissioner an annual charge equal to its pro rata share of the administrative costs and expenses of the commissioner under the Escrow Law.

Existing law provides for examination by the commissioner of the business, accounts, and records of every person performing as an escrow agent not less than every other calendar year.

This bill would require the commissioner to conduct an examination of each licensed escrow agent as often as deemed necessary and appropriate, but not less than once every 48 months. The bill would provide for an examination of a new licensee within 2 years of the issuance of the license. The bill would make other related changes.

Ch. 500 (AB 560) Jackson. Local used oil collection programs: storm water runoff pollution.

Under existing law, certain fees imposed on lubricating oil sold or transferred into this state are deposited in the California Used Oil Recycling Fund. Existing law continuously appropriates the money in the fund for specified purposes and authorizes the money in the fund to be used for, among other things, block grants issued by the California Integrated Waste Management Board to local governments that implement used oil collection programs that include specified elements, including providing for the collection of used oil and providing a public education program.

This bill would additionally authorize a local government that has implemented the used oil collection and education elements of a local used oil collection program to also include, in the program, provisions for the mitigation and the collection of oil and oil byproducts, including other solid waste that may be mixed with oil or oil byproducts, from storm water runoff, through the use of specified devices. The bill would prohibit a local government from receiving a block grant for this purpose unless the local government certifies that it has a storm water management program approved by the appropriate California regional water quality control board and those provisions in the used oil collection program are consistent with that storm water management program. Because the bill would allow funds that are continuously appropriated to the board to be used for a new purpose, the bill would make an appropriation.

Ch. 501 (AB 586) Nation. Pharmacists: performance of routine patient assessment procedures and skin puncture.

Existing law prohibits the performance of a clinical laboratory test or examination classified as waived or of moderate complexity under the federal Clinical Laboratory Improvement Amendments of 1988 unless it is performed under the overall operation and administration of the laboratory director, as specified, and is performed by a designated healing arts practitioner, including a pharmacist. The Pharmacy Law regulates the practice of pharmacy and authorizes a pharmacist to perform skin puncture in connection with routine patient assessment procedures, defined as including waived or moderate complexity tests, subject to the existing law provisions governing the performance of those tests by a pharmacist. Existing law requires a pharmacist performing these functions to, at the direction of the patient, report the results obtained from a blood test to the patient and the patient's physician of choice.

This bill would authorize a pharmacist to perform skin puncture in the course of performing an examination classified as waived. The bill would also delete moderate complexity tests from the definition of patient assessment procedures and would make the

performance of those procedures subject to the supervision of a laboratory director. The bill would require a pharmacist performing these functions to report the results from any test to the patient and any physician designated by the patient.

A violation of the Pharmacy Law is a crime. Because a violation of this bill's requirements regarding disclosure of test results to patients would be a misdemeanor, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate additional changes in Section 1206.5 of the Business and Professions Code proposed by SB 1174, that would become operative only if SB 1174 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 502 (AB 639) Nakano. Coastal waters: contamination.

Under existing law, the State Water Resources Control Board regulates water quality in the state.

This bill would require the board, in consultation with specified entities and on or before July 1, 2003, to develop reliable, rapid, and affordable diagnostic tests for measuring indicators of contamination by pathogens in coastal waters. The bill would require the board to prepare and submit to the Legislature a progress report on or before July 1, 2003. The bill would require the board to carry out these duties only to the extent that funds are made available for these purposes.

Ch. 503 (AB 955) Florez. Agricultural disaster prevention: quarantine powers.

Existing law authorizes the Secretary of the Department of Food and Agriculture to establish regulations in connection with a quarantine of domesticated animals. Existing law also generally authorizes the secretary to establish quarantine boundaries, hold or restrict the movement of animals relative to a quarantine by the secretary, specifies the powers of the secretary in regard to a quarantine district, and authorizes the secretary to restrict importation of animals, animal products, and vegetable matter in connection with an infectious disease in domestic animals, as specified, and to administer other quarantine matters, as specified. Existing law also authorizes the State Veterinarian to impose a quarantine.

This bill would revise provisions relating to quarantine. Among other things, the bill would transfer the authority of the secretary with respect to quarantine to the State Veterinarian. The bill would also additionally require the department to periodically publish and make available a list of reportable conditions that pose or may pose significant threats to public health, animal health, the environment, or the food supply which list would serve as a basis for reporting these conditions to the department.

Existing law provides that the state may contribute toward the payment of animals ordered destroyed if the United States shares in payment, the value of which to be determined by mutually agreed upon appraisers.

This bill would instead have the value determination made by a mutually agreed upon appraisal process.

Existing law requires the secretary, in the case of certain specified diseases, to impose and administer a quarantine, as specified.

This bill would repeal those provisions and related provisions.

Existing law authorizes the Governor to proclaim quarantine regulations that are applicable to any state, territory, or foreign country relative to any animals or diseases therein, including the regulations under which animals may be imported from those areas.

This bill would repeal those provisions.

Existing law authorizes the secretary to request the Attorney General to initiate proceedings for imposition of a civil penalty, as specified, for persons violating a quarantine, or causing an existing infestation to spread beyond quarantine boundaries, as specified. Existing law exempts the movement of livestock on foot from the pasture to another across state boundaries from that provision.

This bill would transfer, to the State Veterinarian, the authority to request that the Attorney General initiate proceedings to impose the civil penalty, and would eliminate the exemption.

Existing law provides that it is unlawful for any person to move animals that are subject to a quarantine without a permit, or to resist the destruction of any animal suffering from or exposed to any one of certain specified diseases. Existing law also provides that a violation of these provisions is punishable as a misdemeanor.

This bill would expand the scope of those provisions to apply to any person who moves animals, food products from animals, vehicles, farm equipment, farm products, or other materials subject to restriction, or who resists the destruction of any animal ordered destroyed by the State Veterinarian pursuant to a quarantine. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

Existing law provides that it is unlawful for any person to hide, secrete, or fail to disclose any animal suffering from or exposed to any one of certain specified diseases, or to fail to disclose the whereabouts of that animal in order to prevent its destruction. Existing law also provides that a violation of these provisions is punishable as a misdemeanor.

This bill would expand the scope of these provisions to apply to property, and to apply to any disease that is the subject of a quarantine.

By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

This bill would make additional technical and conforming changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 504 (AB 1280) Reyes. Commercial motor vehicles.

(1) Under existing law governing commercial motor vehicle safety, the term “serious traffic felony” is defined to include specific traffic violations.

This bill would include in that definition driving a commercial motor vehicle without a commercial driver’s license, driving a commercial motor vehicle without the driver having in his or her possession a commercial driver’s license, except as specified, and driving a commercial motor vehicle when the driver has not met the minimum testing standards for that vehicle as to the class or type of cargo the vehicle is carrying.

(2) Existing law prohibits an employer to knowingly allow, permit, or authorize a driver to drive a commercial motor vehicle under specified conditions.

This bill would also prohibit an employer to require the driver to drive under the specified conditions which would be expanded to include instances where the driver or the commercial motor vehicle or motor carrier operator is subject to an out-of-service order or instances in violation of any law or regulation pertaining to a railroad-highway grade crossing.

(3) Existing law prohibits a driver of a commercial motor vehicle from operating a commercial motor vehicle for a period of one year if the driver is convicted of a first violation of specified vehicle-related offenses.

This bill would additionally include within the listed offenses driving a commercial motor vehicle when the driver’s commercial driver’s license is revoked, suspended, or canceled based on the driver’s operation of a commercial motor vehicle, when the driver is disqualified from operating a commercial motor vehicle based on the driver’s operation of a commercial motor vehicle, and when the driver causes a fatality through negligent or criminal operation of a commercial motor vehicle, as specified under federal law, resulting in a conviction.

(4) Existing law prohibits for a lifetime a driver of a commercial motor vehicle from operating a commercial motor vehicle if convicted of more than one violation of specific vehicle-related offenses.

This bill would include in those listed offenses the additional multiple offenses of driving a commercial motor vehicle when the driver's commercial driver's license is revoked, suspended, or canceled based on the driver's operation of a commercial motor vehicle, when the driver is disqualified from operation of a commercial motor vehicle based on the driver's operation of a commercial motor vehicle, and when the driver causes multiple fatalities through negligent or criminal operation of a commercial motor vehicle, as specified under federal law, resulting in a conviction.

This bill would also prohibit a driver from operating a commercial motor vehicle for not less than 60 days, 120 days, or one year, depending upon the occurrence of prior violations within specified periods, of specific offenses involving certain violations occurring at railroad-highway grade crossings.

(5) Existing law generally requires the driver of certain listed vehicles, before traversing a railroad crossing, to stop that vehicle not less than 15 nor more than 50 feet from the nearest rail of the track and while so stopped to listen, and look in both directions along the track, for any approaching train and for signals indicating the approach of a train, and not to proceed until he or she can do so safely.

This bill would revise vehicles subject to the above requirement to include farm labor vehicles and vehicles based on federal regulatory classifications.

(6) Existing law requires a vehicle operator to provide a person engaged in the loading of a container or trailer, having an actual cargo weight capacity of more than 10,000 pounds, involving agricultural products, as specified, with the tare weight of the tractor, container, or trailer to be loaded.

This bill would delete that requirement.

(7) Existing law requires a court, whenever a person, charged with a gross weight violation, shows to the satisfaction of the court that the person conducted his or her activities pursuant to a gross cargo weight verification issued in accordance with federal law and that the verification specifies a stated gross cargo weight that could be lawfully transported by the equipment on which the cargo was loaded, on request of the person so charged, to take appropriate steps to make that party a codefendant. Existing law allows the court to dismiss the charges against the person who received the gross cargo weight verification.

This bill would repeal those provisions.

(8) Existing law makes it a crime for the owner, or any other person, employing or otherwise directing the driver of any vehicle to cause the operation of the vehicle upon a highway in any manner contrary to law.

This bill would impose a fine of not more than \$10,000 on any employer who is convicted of allowing, permitting, requiring, or authorizing a driver to operate a commercial motor vehicle in violation of any law pertaining to a railroad-highway grade crossing.

(9) To the extent that this bill would expand the scope of existing crimes and would create new crimes, this bill would impose a state-mandated local program.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 505 (AB 1297) Papan. Pawnbrokers.

Existing law limits pawnbroker loan setup fees, handling and storage charges, and fees for certain notices to specified amounts. Existing law provides that a pawnbroker may collect a handling and storage charge for each article pawned and that an item smaller than one cubic foot is not subject to an additional storage charge. Furthermore, existing law provides that a broker may charge an additional fee for a vehicle larger than 6 cubic feet.

This bill would increase the amounts that may be charged for these services. The bill would also authorize an additional storage charge on all items larger than 6 cubic feet.

Because a knowing violation of the provisions of the bill would be a misdemeanor, the bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 506 (AB 1424) Thomson. Mental health: involuntary treatment.

Existing law, the Lanterman-Petris-Short Act, provides that when applying the definition of mental disorder for specified purposes, the historical course of the person's mental disorder, as determined by available relevant information about the course of the person's mental disorder, shall be considered when it has a direct bearing on the determination of whether the person is a danger to others or to himself or herself or is gravely disabled as a result of a mental disorder. Existing law authorizes the hearing officer, court, or jury to exclude from consideration evidence it deems to be irrelevant because of remoteness of time or dissimilarity of circumstances.

This bill would instead require the hearing officer, court, or jury to exclude from consideration evidence it deems to be irrelevant because of remoteness of time or dissimilarity of circumstances, and would broaden the types of information that are required to be included within the historical course of a person's mental disorder to include the patient's medical records and psychiatric records. It would also require that relevant information, including information provided by the patient's family or the patient about the historical course of a patient's mental disorder, be considered when determining whether probable cause exists to involuntarily detain a person for 72-hour treatment and evaluation.

This bill would provide that the fact that a person has been taken into custody under the Lanterman-Petris-Short Act may not be used in the determination of that person's eligibility for payment or reimbursement for mental health or other health care services for which he or she has applied or received under the Medi-Cal program, any health care service plan licensed under the Knox-Keene Health Care Service Plan Act of 1975, or any insurer providing health coverage doing business in the state.

Existing law authorizes the administration of antipsychotic medication by an agency or facility providing treatment to any person subject to detention, if that person does not refuse that medication following disclosure of the right to refuse medication as well as information required to be given to persons pursuant to specified provisions.

This bill would require the agency or facility providing treatment to any person to acquire the person's medication history, if possible, if the person is subject to detention for 72 hours on the basis he or she is a danger to himself or herself or others or is gravely disabled, or to extended periods of detention pursuant to professional evaluations of the person that he or she remains a danger to himself or herself or others or is gravely disabled or has suicidal tendencies.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health services.

This bill would prohibit a health care service plan, disability insurer, or, under the Medi-Cal program, the State Department of Health Services, from utilizing any information regarding whether a person's psychiatric inpatient admission was made on a voluntary or involuntary basis for the purpose of determining eligibility for claim reimbursement. Since a willful violation of the provisions applicable to health care service plans is a crime, this bill would impose a state-mandated local program.

This bill would incorporate additional changes to Section 5328 of the Welfare and Institutions Code proposed by AB 213, to be operative only if AB 213 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 507 (AB 1428) Aanestad. Dentistry: licensure.

Existing law, the Dental Practice Act, provides for the licensure and regulation of dentists by the Dental Board of California. The act specifies requirements for licensure to practice dentistry in this state, including successfully passing an examination before the board. Under the act, licensees are required to pay fees, including a fee for the initial issuance and renewal of their licenses, that are deposited into the State Dentistry Fund which is continuously appropriated. This act makes it a crime, among other matters, to engage in specified conduct relating to the practice of dentistry.

This bill would authorize the board to issue a license to a person who is currently licensed to practice dentistry in another state and who satisfies other specified requirements, without requiring that person to take the board examination and would require the board to supply out-of-state dentists with certain information in its application packet. The bill would also require the board to report to the Legislature by January 1, 2005, regarding the impact of these provisions on the availability of dentists in this state. The bill would provide that these provisions would become operative on July 1, 2002. Because the bill would increase the number of dentists paying license issuance and renewal fees and fines and forfeitures for violations, it would make an appropriation by adding revenue that would be deposited in a continuously appropriated fund.

Because the bill would increase the number of persons subject to criminal prosecution for engaging in conduct prohibited by the Dental Practice Act, it would expand the scope of existing crimes, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 508 (AB 1471) Diaz. Economic development.

(1) The California Small Business Development Corporation Law authorizes the formation of small business financial development corporations, subject to the approval of the California Small Business Board in the Technology, Trade, and Commerce Agency, to grant loans or guarantees for the purpose of stimulating small business development. The California Small Business Expansion Fund, created under the law, provides funds to be used to pay for defaulted loan guarantees and administrative costs of these corporations. Existing law requires each corporation to undertake a program to implement its responsibilities, which requires among other things that the corporation be independent of General Fund allocations for administrative support within 4 years.

This bill would delete this requirement.

(2) The California Small Business Development Corporation Law authorizes the Director of Finance, with the approval of the Governor, to transfer moneys in the continuously appropriated Special Fund for Economic Uncertainties to the Small Business Expansion Fund for use by the California Office of Small Business Development for the purpose of making loan guarantees, as specified. These provisions are to be repealed on January 1, 2002.

This bill would extend the operation of these provisions until January 1, 2007.

This bill would also specify that no more than \$5,000,000 may be transferred pursuant to these provisions in connection with any single declared disaster, and would require the Director of Finance to provide notice of the amount of a transfer to the chairs of specified legislative committees within 30 days of the transfer.

(3) Existing law provides that the Treasurer is the elected representative of the state to approve the issuance of bonds by the California Infrastructure and Economic Development Bank, a special purpose trust, or a sponsor pursuant to the Bergeson-Peace Infrastructure and Economic Development Bank Act.

This bill would provide that the Treasurer, Governor, or the Lieutenant Governor is an elected representative of the state to approve the issuance of those bonds.

Ch. 509 (AB 1586) Negrete McLeod. Healing arts: physicians and surgeons.

The Medical Practice Act provides for the licensure by the Medical Board of California of physicians and surgeons as well as other healing arts practitioners. The act requires each licensed physician to complete a questionnaire sent to him or her at the time of license renewal that seeks specified information.

This bill would additionally require each licensed physician to report to the board at the time of license renewal, any specialty board certification he or she holds and his or her practice status. The bill would authorize a physician to report to the board his or her cultural background and foreign language proficiency.

Ch. 510 (AB 1612) Matthews. Agricultural and seafood industries.

Existing law provides various declarations and findings regarding the commitment and support furnished by the State of California with respect to the state's agricultural and seafood industries, the success of which is attributed to state-established commissions and councils.

This bill would authorize any commission or council to petition the Secretary of the Department of Food and Agriculture to adopt and administer any activity authorized pursuant to the California Marketing Act of 1937. The bill would make related findings.

Ch. 511 (AB 1637) Dickerson. Klamath River water crisis: assistance program.

(1) Under existing law, the Budget Act of 2001 appropriated to the Technology, Trade, and Commerce Agency \$8,000,000 for the Klamath River Water Crisis Economic Assistance and Mitigation Program.

This bill would establish the Klamath River Water Crisis Economic Assistance and Mitigation Program. The bill would reappropriate those funds by requiring the Controller to allocate those funds to the Office of Emergency Services for use in accordance with a prescribed schedule. The bill would authorize the Office of Emergency Services, with approval of the Department of Finance, to transfer any unencumbered funds anticipated or remaining in any program or activity funded pursuant to that schedule to any other program or activity funded pursuant to that schedule.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 512 (AB 1705) Committee on Transportation. Transportation.

(1) Existing law requires that a regional or local agency receiving an allocation from the Traffic Congestion Relief Fund certify that it will sustain its level of expenditures for transportation purposes at a level that is consistent with the average of its annual expenditures during the 1997-98, 1998-99, and 1999-2000 fiscal years, including funds reserved for transportation purposes.

This bill, with respect to a transportation entity that imposes a retail transactions and use tax for transportation purposes in accordance with certain provisions of law and receives an allocation from the fund, would require the governing board of the entity to certify by resolution that the entity will expend the allocation for the originally programmed purpose, and that the entity will not use for other than transportation capital purposes any capital funds

NOTE: Superior numbers appear as a separate section at the end of the digests.

that were programmed, planned, or approved for transportation capital purposes on or before a specified date.

(2) Existing law authorizes the California Transportation Commission to offer to exchange state funds from the Traffic Congestion Relief Fund for federal regional surface transportation program and congestion mitigation and air quality program apportionments received as local assistance by regional transportation planning agencies. The Department of Transportation is required to repay to the fund all funds received as federal reimbursements for funds exchanged as they are received from the Federal Highway Administration.

This bill instead would require the department to repay from the State Highway Account in the State Transportation Fund to the Traffic Congestion Relief Fund all funds received as federal reimbursements, as they are received, for funds exchanged under the exchange program, except that the repayments are not required to be made more frequently than on a quarterly basis.

(3) Under existing law, the Los Angeles County Transportation Commission adopted an approved San Fernando Valley rail rapid transit route and plan, as an extension of metro rail or advanced technology transit, other than light rail, that is a deep bore subway through residential areas, unless modified through a subsequent state or federal environmental review process. Therefore, in specified areas, existing law prohibits any exclusive public mass transit rail guideway, rail rapid transit or light rail system, or other track, other than as a subway system that is covered and below grade, from being constructed.

This bill would make technical changes to these provisions.

(4) This bill would incorporate changes to Section 182.7 of the Streets and Highways Code proposed to be made by Assembly Bill 1706 that would become operative if both bills are enacted and this bill is enacted after Assembly Bill 1706.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 513 (AB 62) Migden. Sudden oak death.

(1) Prior budget acts have appropriated funds to the Department of Forestry and Fire Protection for various forestry programs throughout the state.

This bill would require the department to allocate \$3,586,000, as scheduled, from funds appropriated by the Budget Act of 2001, to develop and implement prescribed measures designed to prevent, control, and manage the condition known as sudden oak death, and to perform control work on public and private lands where sudden oak death is occurring, as determined by the State Board of Forestry and Fire Protection.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 514 (AB 87) Jackson. Community colleges: worksite-based training.

Existing law requires the Board of Governors of the California Community Colleges to review and approve all educational programs offered by community college districts and all courses that are not offered as part of an educational program approved by the board of governors. Existing law requires the board to appoint a chief executive officer, to be known as the Chancellor of the California Community Colleges, who is required to execute the duties and responsibilities delegated to him or her by the board.

This bill would require the chancellor to award grants to community college districts for the purpose of developing curricula and pilot programs that provide training to licensed nurses, including training in the nursing specialty areas of critical care, emergency, obstetrics, pediatrics, neonatal intensive care, and operating room nursing. The bill would appropriate \$1,000,000 from the General Fund to the Chancellor of the California Community Colleges for allocation as grants to community college districts for purposes of this bill and \$4,000,000 to provide for enrollment growth in community college nursing programs. The amounts allocated under the bill would be applied toward the minimum funding

requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

Ch. 515 (AB 211) Chavez. California Military Museum: World War II Oral History Program.

Under existing law, the California Military Museum is operated in the Old Sacramento State Historical Park.

This bill would appropriate \$125,000 from the General Fund to the California Arts Council for allocation to the California Military Museum for the continued operation of the World War II Oral History Program and coordination of this program with the California Center for Military History of the California State Military Reserve.

Ch. 516 (AB 322) Bill Campbell. Cemeteries: disposition of family plots.

Under existing law, if the owner of a cemetery plot transferred to the owner by deed or certificate of ownership dies without making a disposition of the plot either in his or her will or by specific devise or by a written declaration filed and recorded in the office of the cemetery authority, the plot becomes inalienable upon the person's death and becomes the family plot of the owner.

This bill would provide that if the owner of a family plot dies without making disposition of the plot, any unoccupied portions of the plot would pass by the laws of intestate succession upon the owner's death. This bill would also provide that, on and after January 1, 2002, any unoccupied portions of a family plot that previously were inalienable pursuant to the above existing law provision, would pass by the laws of intestate succession and would become alienable. This bill would impose specific requirements on the seller and the cemetery authority with respect to the sale, transfer, or donation of any unoccupied portions of a family plot.

Ch. 517 (AB 380) Wright. Evidence of prior sexual offenses.

Existing law provides that, except as specified, evidence of a person's character is inadmissible when offered to prove his or her conduct on a specified occasion. Existing law creates exceptions to that rule, including that in a criminal action in which the defendant is accused of a sexual offense, evidence of the defendant's commission of another sexual offense or offenses is not inadmissible under that rule, except as specified. Existing law defines the term "sexual offense" as conduct proscribed by various sections of the Penal Code as well as other types of conduct.

This bill would expand the definition of "sexual offense" for the purposes of the aforementioned exception to the rule against the admission of character evidence to include aggravated sexual assault of a child.

Ch. 518 (AB 487) Aroner. Medical professionals: conduct.

Existing law, the Medical Practice Act, provides for the regulation of physicians and surgeons by the Medical Board of California. Under that act, the board's Division of Licensing is required to adopt and administer standards for the continuing education of physicians and surgeons, and the board's Division of Medical Quality is required to take disciplinary action against those who are charged with committing unprofessional conduct and to report annually to the Legislature regarding those actions.

This bill would require the Division of Medical Quality to develop standards before June 1, 2002, for the investigation of complaints concerning the management, including, but not limited to, undertreatment, undermedication, and medication of pain and to include in its annual report to the Legislature a description of actions relating to that practice. The bill would also require physicians and surgeons to complete a mandatory continuing education course in the subjects of pain management and the treatment of terminally ill and dying patients by December 31, 2006, except that it would not apply to physicians practicing in pathology or radiology specialty areas. The bill would authorize the board to adopt

NOTE: Superior numbers appear as a separate section at the end of the digests.

regulations exempting physicians who do not engage in direct patient care, do not provide patient consultations, or do not reside in California.

Ch. 519 (AB 493) Migden. Public postsecondary education: cooperative educational partnerships.

Existing law establishes the California State University and authorizes the operation of its various campuses under the administration of the Trustees of the California State University. Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards and authorizes these districts to provide instruction at community college campuses throughout the state.

This bill would provide that funding for the implementation and provision of baccalaureate degree programs on the Cañada College campus, jointly offered by faculty of Cañada College and the San Francisco State University, be contingent upon an appropriation in the annual Budget Act. The bill would require Cañada College, before being allocated any of those funds, to submit an implementation plan to the Chancellor of the California Community Colleges. The bill would require the Office of the Chancellor of the California Community Colleges, in cooperation with the Chancellor of the California State University, to evaluate this program and to submit a preliminary report on its progress and a final written report to the Legislature.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 520 (AB 548) Runner. Specialty care for low-income persons.

Existing law creates various health care programs for low-income persons.

This bill would require the Office of Statewide Health Planning and Development, in consultation with the State Department of Health Services, to establish, until January 1, 2007, a specialty care access program in underserved areas. The bill would declare Legislative intent that the program be funded by private gifts and grants. Under this program, private funding obtained by the office would be deposited into the Specialty Care Fund, and used to reimburse participating out-of-area providers in underserved areas for the cost of care provided to low-income persons, upon appropriation by the Legislature.

The bill would require the office, in cooperation with interested provider organizations, to solicit, on a statewide basis, pediatric and adult specialty care providers for participation in the program on a voluntary basis.

Ch. 521 (AB 589) Wesson. Property tax: loans for property tax administration.

Existing property tax law authorizes eligible counties, as defined, to obtain a loan from the state pursuant to the State-County Property Tax Administration Loan Program for the funding of county property tax administrative costs. Existing law limits this loan program to the 1995–96 fiscal year to the 2001–02 fiscal year, inclusive, and establishes a loan amount for each county in accordance with a specified schedule.

This bill would create the State-County Property Tax Administration Grant Program which would, for the 2002–03 fiscal year to the 2006–07 fiscal year, inclusive, provide grants to electing counties to assist them in funding property tax administration costs. This bill would set forth a grant amount for each county in a specified schedule. This bill would provide that receipt of grant program funds by a county shall not result in any reduction of a county's property tax administrative costs that are otherwise reimbursable under a specified statute.

Ch. 522 (AB 599) Liu. Groundwater contamination: quality monitoring program.

Existing law declares that groundwater is a valuable natural resource in the state and should be managed to ensure its safe production and its quality. Existing law authorizes specified local agencies to adopt and implement groundwater management plans.

This bill would require the State Water Resources Control Board to integrate existing monitoring programs and design new program elements, as necessary, for the purpose of establishing a comprehensive monitoring program capable of assessing each groundwater basin in the state through direct and other statistically reliable sampling approaches, and to create an interagency task force to identify actions necessary to establish the monitoring program and to identify measures that would increase coordination among state and federal agencies that collect groundwater contamination information. The bill would require the state board to convene a described advisory committee to the task force. The bill would require the state board, in consultation with other specified agencies, to submit to the Governor and the Legislature, on or before March 1, 2003, a report that includes a description of a comprehensive groundwater quality monitoring program for the state.

Ch. 523 (AB 780) Thomson. Pesticide mill assessments.⁵

(1) Until January 1, 2003, existing law requires every registrant of a pesticide product to pay the Director of Pesticide Regulation an assessment of 17.5 mills per dollar of sales for all sales by that person of registered pesticides for use in this state. Existing law further provides that effective January 1, 2003, and thereafter, the mill assessment rate would be reduced to 9 mills per dollar of sales, for all sales of pesticide for use in this state.

This bill would specify that sales made electronically, telephonically, or by other means that result in a pesticide product being shipped to or used in the state are sales. This bill would also provide that the mill assessment rate commencing January 1, 2003, to June 30, 2004, shall be 17.5 mills per dollar of sales and commencing July 1, 2004, and thereafter, shall be 9 mills per dollar of sales for all sales of registered pesticides for use in this state.

(2) Existing law also allows the Director of Pesticide Regulation, until January 1, 2003, to collect an additional mill assessment, as specified, to fund provision of pesticide consultation to the Department of Pesticide Regulation by the Department of Food and Agriculture.

This bill would allow the director to continue to collect this assessment, as specified, until July 1, 2004.

(3) The bill would also require the Department of Pesticide Regulation, with assistance from a subcommittee of the Pest Management Advisory Committee containing members from specified groups or agencies, to prepare an analysis and report on specified issues to the Legislature by January 1, 2003, the purpose of which would be to recommend a funding solution for the department that would eliminate the need to reauthorize the mill assessment on pesticide and consumer product sales every 5 years and that would preserve the accountability of the department to the entities contributing to the financing of the department.

(4) This bill would appropriate \$7,000,000 from the General Fund to the Department of Pesticide Regulation to implement the provisions of this act.

Ch. 524 (AB 945) Wright. Lead inspections: certified industrial hygienists.

Existing law requires the State Department of Health Services to direct the Childhood Lead Poisoning Prevention Program to implement a program to identify and conduct medical followup of high-risk children, and to establish procedures for environmental abatement and followup designed to reduce the incidence of excessive childhood lead exposures.

This bill would provide that in addition to any other providers determined to be eligible by the department to provide environmental investigation services as a part of case management services under that program, a qualified certified industrial hygienist or other

NOTE: Superior numbers appear as a separate section at the end of the digests.

qualified professional who is certified by the department as an inspector/assessor shall be eligible to provide those services and those services shall be funded under that program.

Ch. 525 (AB 951) Florez. Clinics: interim license.

Existing law provides for the licensure and regulation of clinics by the State Department of Health Services. When a clinic files an application for a license, existing law requires the department to conduct an investigation of the facts in the application and the clinic's compliance with statutory requirements for licensure.

Under existing law, the department also licenses and regulates health facilities. License applications for certain health facilities are processed by the centralized applications unit in the Licensing and Certification Division of the department.

This bill would require the centralized applications unit to review, commencing July 1, 2002, all new applications for nonprofit primary care clinics, nonprofit community health centers, nonprofit community clinics, and free clinics. The bill would require the Licensing and Certification Division to designate surveyors to specialize in clinic surveys and complaint investigation.

Ch. 526 (AB 963) Cardoza. Medi-Cal reimbursement.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law authorizes the department to contract with various types of health care providers and entities in order to obtain Medi-Cal services through managed care arrangements as well as other health care providers under specified circumstances.

This bill would require that any county-operated community clinic, as defined, must be reimbursed, subject to reductions in a certain situation, for Medi-Cal services using the same methodology used for reimbursement for a licensed surgical center, to the extent federal financial participation is available.

Ch. 527 (AB 1023) Canciamilla. Animal control officers: use of batons.

Existing law provides that any uniformed security guard who successfully completes a specified course of instruction is entitled to receive a permit to carry and use a club or baton within the scope of his or her employment, issued by the Department of Consumer Affairs.

This bill would provide that an animal control officer is not prohibited from carrying any wooden club or baton if he or she has satisfactorily completed a specified course of instruction certified by the Department of Consumer Affairs. The training institution certified by the department to present the course would be authorized to charge a fee covering the cost of the training.

Ch. 528 (AB 1049) Robert Pacheco. L.A. Care Board: technical advisory committee: children's health consultant advisory committee.

Existing law authorizes Los Angeles County to establish a commission, called the L.A. Care Board, to administer a local health initiative for the purpose of implementing Medi-Cal managed care. The county has established the commission. Existing law creates a 13-member governing board for the commission. Existing law requires that the governing body establish a technical advisory committee.

This bill would expand the classes of membership of that technical advisory committee. This bill would also require the governing body to establish a children's health consultant advisory committee, which would meet on a regular basis and make recommendations and reports to the governing body.

Because this bill would require the county to incur additional expenses in creating an advisory committee, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 529 (AB 1490) Thomson. Health records: delivery of laboratory test results by Internet posting.

Existing law provides that a health care professional who orders a laboratory test shall provide a patient, upon a written or oral request, those test results in plain language deemed most appropriate by the health care professional who ordered the test. Under existing law, the reported test results will be recorded in the patient's medical record and reported to the patient within a reasonable time period after the test results are received by the health care professional. Existing law separately authorizes the disclosure of medical information by a provider of health care or a health care service plan for various purposes, including specified administrative purposes.

This bill would permit test results to be delivered in electronic form if requested by the patient and if deemed appropriate by the health care professional who requested the test. This bill would require that patient consent to receive laboratory results by Internet posting or other electronic form be obtained in a manner consistent with the administrative purposes referred to above. The bill also would prohibit the disclosure of specific laboratory test results by Internet posting or other electronic manner regardless of authorization by the patient.

This bill would prohibit the use of any patient identifiable test results and health information for any commercial purpose without consent of the patient for the administrative purposes referred to above.

This bill would provide that a patient who does not elect to obtain his or her laboratory test results through the Internet or electronic form may not be required to pay any cost, or be charged any fee as a result of making that election. It would also provide that, when a patient requests to receive laboratory test results by Internet posting, the health care professional shall advise the patient of any charges that may be assessed for the service, and that the patient may call for a more detailed explanation of the laboratory test results. The bill would authorize a patient or his or her physician to revoke any consent relating to the disclosure of the patient's laboratory tests in accordance with the bill, except to the extent that action has been taken in reliance on that consent.

Ch. 530 (AB 1495) Cox. Local agency formation.

(1) Under the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, a local agency formation commission may not approve a proposal that includes an incorporation unless it finds that revenues currently received by the transferor will accrue to the transferee and that expenditures currently made by the transferor that will be assumed by the transferee are substantially equal. However, the proposal may be approved if the commission finds that the county and all of the subject agencies agree to the proposed transfer or the negative fiscal effect of the proposal is mitigated pursuant to an agreement.

This bill would declare the intent of the Legislature that this revenue neutrality requirement be implemented in a rational and predictable process and that the financial stability of the county and other affected agencies is insured while permitting the incorporation of communities demonstrating the necessary resources and capacity for self-governance.

(2) Existing law requires the commission to hold a hearing on any proposal for a change of organization or reorganization.

This bill requires that prior to any continuance of a hearing regarding a proposal that includes an incorporation, the chief petitioners shall have an opportunity to address the commission on potential impacts or hardships for the incorporation effort that may result from a delay.

(3) Existing law requires the executive officer to prepare a comprehensive fiscal analysis for any proposal that includes an incorporation. The fiscal analysis is required to review and document the costs to the proposed city of providing public services and facilities during the 3 fiscal years following incorporation.

The bill would delineate the criteria to be followed in determining the costs to the proposed city of providing public services and facilities during the 3 fiscal years following incorporation. By imposing additional responsibilities on local agency formation commissions and county auditors, the bill would impose a state-mandated local program.

(4) Existing law requires the executive officer of the commission, upon receipt of an application to initiate proceedings for a change of organization or a reorganization, to give mailed notice to each interested agency, each subject agency, the county committee or school district organization, and each school superintendent whose school district overlies the subject area.

This bill would require the affected state and local agencies to submit data required by the executive officer when the application includes an annexation.

(5) Existing law authorizes any person or affected agency to file a written request with the executive officer requesting amendments to or reconsideration of a commission resolution making determinations. The request is required to state the specific modification that is requested and to state what new or different facts or law are claimed to warrant the reconsideration. The commission has up to 70 days to consider the request.

This bill would delete the requirement of stating what new or different facts or law would warrant reconsideration and would reduce the consideration period to 35 days.

(6) Existing law requires the commission to set the proposal for hearing within 35 days of adopting its resolution making determinations.

This bill would require that a proposal that includes an incorporation be set for hearing within 15 days following adoption of the resolution making determinations.

(7) This bill would incorporate changes to Section 56895 of the Government Code proposed by AB 720, to be operative if AB 720 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 531 (AB 1503) Nation. Health care: mental health.

Existing law provides for regulation of health care service plans by the Department of Managed Health Care. Existing law requires every health care service plan that provides group coverage to file a written policy with the department describing how the plan contract shall facilitate continuity of care for new enrollees receiving services for an acute condition from a nonparticipating provider. Pursuant to existing law, a willful violation of provisions governing health care service plans is a crime.

This bill would require, on or before July 1, 2002, when the enrollee's employer has changed health plans, a health care service plan or a specialized health care service plan that offers professional mental health services to file a written policy with the Department of Managed Health Care describing how the health plan would facilitate continuity of care for new enrollees who have been receiving services for acute, serious, or chronic conditions from a nonparticipating psychiatrist, licensed psychologist, licensed marriage and family therapist, or licensed clinical social worker. The bill would require that the health plan allow each new enrollee to continue his or her course of treatment with a nonparticipating provider for a reasonable transition period while transferring to another participating provider in order to effectuate a safe transfer. The bill would not require a health care service plan or a specialized health care service plan to cover services or provide benefits that are not already covered by the plan contract. The bill would not apply to health care service plans or

specialized health care service plans that provide out-of-network coverage to its enrollees. The bill would provide that a health care service plan or a specialized health care service plan is not liable for the negligent, malicious, tortious, or wrongful acts arising out of the provision of services from an existing provider.

Existing law provides for the regulation of policies of disability insurance administered by the Insurance Commissioner. Existing law requires that disability insurers provide coverage for certain benefits and services. Existing law requires every disability insurer that provides coverage for hospital, medical, and surgical expenses on a group basis to file a written policy with the Department of Insurance describing how the policy shall facilitate continuity of care for new enrollees receiving services for an acute condition from a noncontracting provider.

This bill would require, by July 1, 2002, a disability insurer that provides coverage for hospital, medical, and surgical benefits with providers charging alternative rates, and that provides specified mental health services, to file a written policy with the commissioner that describes how the insurer shall facilitate continuity of care for insureds who have been receiving services for acute, serious, or chronic conditions from nonparticipating mental health providers. The bill would provide that a disability insurer is not required to accept a noncontracting service provider onto its network and would not require an insurer to provide services not otherwise covered. The bill would require the written policy to describe how requests to continue services with an existing nonparticipating mental health provider are reviewed and would require the policy to consider the potential clinical effect of a change of provider. The bill would make conforming changes.

Because a willful violation of the bill's requirements with respect to health care service plans would be a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 532 (SB 134) Figueroa. Dentistry.

(1) Existing law provides that the Dental Board of California is in the Department of Consumer Affairs. Existing law provides for the licensing and regulation of dental professionals and dental auxiliaries by the Dental Board of California and the Committee on Dental Auxiliaries. The provisions creating the board, authorizing the board to appoint an executive officer, and creating the committee will become inoperative on July 1, 2002, and will be repealed on January 1, 2003.

This bill would revise the procedures for appointment of the board and would provide that the current board would be repealed on January 1, 2002. The bill would provide that a new board, vested with the same powers as the previous board, would be created on January 1, 2002, and would become inoperative on July 1, 2004. The bill would also extend the provisions creating the Committee on Dental Auxiliaries to July 1, 2004, and repeal them on January 1, 2005.

(2) Existing law provides that a person who has been issued a degree of doctor of dental medicine or doctor of dental surgery by a foreign dental school is eligible for the licensure examination if he or she has completed certain requirements. Existing law, as of January 1, 2003, revises the requirements that a person who has been issued a degree of doctor of dental medicine or doctor of dental surgery by a foreign dental school is required to complete to be eligible for the licensure examination.

This bill would change the date for revision of the requirements for the graduates of a foreign dental school to January 1, 2004.

(3) Existing law provides until January 1, 2003, that an applicant who fails to pass the licensure examination after 4 attempts is not eligible for further reexamination until he or she

has successfully completed at least 2 academic years of education at an approved dental school.

This bill would extend this provision to January 1, 2004.

(4) Existing law requires the board to conduct occupational analyses to be used in the evaluation of dentistry licensing examinations.

This bill would require the next occupational analysis to include a survey of the training and practices of oral and maxillofacial surgeons, and would require a report to be made to the Joint Legislative Sunset Review Committee.

(5) Existing law provides a licensing scheme for dentists and requires dentists to meet certain requirements in their practice. Existing law sets forth provisions for permits for oral and maxillofacial surgery.

This bill would require that the board inform all oral maxillofacial licensees of any existing statutory limitations on the services permitted under the authority of a dental license. The bill would also require that, prior to the performance of dental restoration work, a patient be provided with specified materials discussing possible health risks if the patient has not previously been provided with the materials by the dentist, and that these materials be made available to a patient upon request.

(6) Existing law provides for a licensing scheme for registered dental assistants and requires applicants to meet certain educational, experience, and examination requirements in order to be eligible for a license.

This bill would revise the licensure examination requirements. The bill would also require a registered dental assistant to provide evidence of having successfully completed a board-approved course in radiation safety and coronal polishing by January 1, 2005.

(7) Existing law requires the Committee on Dental Auxiliaries to meet at least 4 times annually, at least once in Sacramento and at least once in Los Angeles.

This bill would delete the requirements that the committee meet in Sacramento and Los Angeles.

(8) This bill would make additional changes to the composition of the board if AB 447 is enacted and becomes effective on or before January 1, 2002.

Ch. 533 (SB 198) Chesbro. Property taxation: welfare exemption: nature resources and open-space lands.

Existing property tax law provides, as specified, for a welfare exemption under which property used exclusively for religious, hospital, scientific, or charitable purposes and owned and operated by funds, foundations, or corporations meeting statutory requirements is exempt from taxation. Existing law also provides, with specified exceptions, that property used exclusively for the preservation of specified nature resources or open-space lands and meeting other specified criteria shall be deemed to be included within the welfare exemption. It further provides that this inclusion is operative to and including the lien date in 2002, and is of no further force or effect thereafter.

This bill would extend the foregoing limitation, on the inclusion of property within the welfare exemption, to and including the lien date in 2012.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy.

Ch. 534 (SB 244) Speier. Environmental quality: airport expansion and enlargement projects.

(1) Existing law, the California Environmental Quality Act, requires a lead agency to prepare an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, as defined, unless the project is exempt from the act. The act also defines a “responsible agency” as a public agency, other than the lead agency, which has responsibility for carrying out or approving a project.

This bill would provide that the carrying out or approval of a plan for a project that expands or enlarges an existing publicly owned airport by any political subdivision constitutes carrying out or approving a project for the purposes of that definition.

(2) The existing act also requires a public review period for a draft environmental impact report of not less than 30 days.

This bill would require that the public review period for a draft environmental impact report prepared for a project involving the expansion or enlargement of a publicly owned airport requiring the acquisition of any tide and submerged lands or other lands subject to the public trust for commerce, navigation, or fisheries, or any interest therein, not be less than 120 days. To the extent the bill would lengthen the public review period for a draft environmental impact report, and thereby generate additional public comment, it would impose a state-mandated local program.

(3) Existing law, the State Aeronautics Act, requires any political subdivision, prior to the acquisition of land for the purpose of expanding or enlarging an existing publicly owned airport, to submit a plan of that expansion or enlargement to the board of supervisors of the county, or the city council of the city, in which the property proposed to be acquired is located, and requires the board of supervisors to conduct public hearings and approve or disapprove the plan.

This bill would expand that requirement to include the acquisition of any lands, including tide and submerged lands or other lands subject to the public trust for commerce, navigation, or fisheries, or any interest therein, acquired by a political subdivision for the purpose of expanding or enlarging an existing publicly owned airport.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 535 (SB 409) Vincent. Income and bank and corporation taxes: credit: qualified deposits.

The Personal Income Tax Law and the Bank and Corporation Tax Law, and existing law with respect to the taxation of insurers, authorize, until January 1, 2002, an annual tax credit in an amount equal to 20% of a qualified deposit, as defined, made into a community development financial institution, as defined.

This bill would extend the expiration date of the credit to January 1, 2007, would clarify the types of investments eligible for the credit, and would modify, as specified, limits on the amount of those eligible investments. This bill would also make various technical changes.

This bill would take effect immediately as a tax levy.

Ch. 536 (SB 505) Perata. Special education.

Existing law, the federal Individuals with Disabilities Act, requires the provision of education and related services to individuals with exceptional needs.

This bill would require the State Department of Education and the California State University to enter into an interagency agreement to have the Center for the Study of Correctional Education, located on the California State University, San Bernardino campus, provide technical assistance to the State Department of Education regarding compliance with state and federal laws and regulations regarding special education at the Department of the Youth Authority, to be funded with federal funding through an appropriation made in the annual Budget Act. The bill would require, no later than one year after entering into the

interagency agreement, and then annually thereafter until termination of the agreement, the State Department of Education, with the assistance of the center, to provide interim status reports of the services received from the center to the Department of Finance and the Legislature. The bill would require the State Department of Education to submit a report to the Legislature, no later than December 1, 2006, regarding the usefulness of the services received from the center. These provisions would be repealed on January 1, 2007.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 537 (SB 516) Johnson. Local coastal programs.

(1) The California Coastal Act of 1976 requires that, after a local coastal program is certified and all implementing actions within the area affected become effective, the California Coastal Commission ceases to exercise any development review authority over any new development proposed within the area affected and delegates that authority to the local government that is implementing the local coastal program.

This bill would require the County of Orange to exercise all development review authority pursuant to the certified local coastal program over those parcels and areas within the county, generally known as the "Annexed Area," upon the effective date of any reorganization or annexation by the City of Newport Beach that includes all or part of the Annexed Area.

The bill would authorize the City of Newport Beach, at any time after that annexation, if it elects to assume coastal management responsibility for the Annexed Area, to begin preparation of a local coastal program for that area, and to adopt provisions of the County of Orange's certified local coastal program that would apply to the Annexed Area. The bill would require that specified statutes and regulations governing procedures for the preparation, approval, and certification of a local coastal program by the California Coastal Commission be applicable to the preparation, approval, and certification of a local coastal program for the Annexed Area. The bill would require the City of Newport Beach, if it obtains certification of a local coastal program for the Annexed Area pursuant to those provisions, upon the effective date of that certification, to exercise all of the authority under the act granted to a local government with a certified local coastal program, and would provide that the aforementioned provisions requiring the County of Orange to exercise all development review authority pursuant to the certified local coastal program over those parcels and areas within the county defined as the Annexed Area shall become inoperative. The bill would require the City of Newport Beach to submit to the commission for approval and certification on or before June 30, 2003, or 24 months after the effective date of the annexation of the Annexed Area, the city's local coastal program for all of the geographic area within the coastal zone and the city's corporate boundaries as of June 30, 2000. By requiring the City of Newport Beach to submit a local coastal program for specified territory that lies inside the city limits within a specified time period, the bill would impose a state-mandated local program.

The bill would provide that if the City of Newport Beach does not submit a local coastal program to the commission as specified above, it would be required to submit a late fee of \$1,000 per month for deposit into the Violation Remediation Account of the Coastal Conservancy Fund.

(2) The bill would state the findings and declarations of the Legislature that, due to unique circumstances applicable to the County of Orange, a statute of general applicability cannot be made applicable.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 538 (SB 702) Escutia. Chronic disease: environmental determinants.

Existing law makes various provisions for the prevention of disease, including chronic diseases, and the promotion of health, and imposes various requirements on the State Department of Health Services in this regard.

This bill would declare legislative intent to establish an Environmental Health Surveillance System, in accordance with the recommendations of the working group created pursuant to the bill and described below.

This bill would provide that the purpose of the EHSS shall be to establish an ongoing surveillance of environmental exposures and the diseases afflicting Californians. The bill would require the division and the office, in cooperation with the Regents of the University of California, to create a working group of technical experts with specified duties, including the development of possible approaches to establishing the EHSS, and would express legislative intent that legislation be enacted adopting one of these approaches.

Ch. 539 (SB 734) Karnette. Vehicles: trailers: registration: International Registration Plan.

(1) Existing law defines various terms for purposes of regulating and licensing vehicle dealers, distributors, franchises, and manufacturers.

This bill would include in those definitions trailers that are subject to identification.

To the extent that the inclusion of trailers within the scope of these definitions would have the effect of expanding the scope of licensing requirements, violations of which are currently crimes, this bill would impose a state-mandated local program by expanding the scope of a crime.

(2) Existing law authorizes the Reciprocity Commission, on behalf of the state, to enter into, and become, a member of the International Registration Plan Agreement developed by the American Association of Motor Vehicle Administrators. The commission is authorized to adopt rules and regulations necessary to carry out the provisions of the International Registration Plan or other apportioned registration agreements entered into under the authority of existing law. In administering the International Registration Plan, the state is authorized to collect all appropriate registration and license fees due other jurisdictions, and foreign jurisdictions that are members of the agreement are authorized to collect all appropriate registration and license fees due to California and remit those fees to the state pursuant to the terms of the agreement. The Department of Motor Vehicles is authorized to collect an administrative service fee of \$1 for each application for apportioned registration.

This bill would authorize the department to issue a permit to authorize the unladen operation of that vehicle or vehicle combination for a period of not more than 15 continuous days, if the apportioned registration for a commercial vehicle or vehicle combination that was last registered by a California resident has expired or been terminated, and the department has received a completed application, a fee of \$30, and proof of financial responsibility for the vehicle. This provision would not apply to any vehicle or vehicle combination for which any vehicle registration fees, other than those for the current year, vehicle license fees, or penalties, or any combination of those are due. Operation of a laden vehicle or vehicle combination under an unladen operation permit issued pursuant to this provision would be an infraction. The bill thereby would impose a state-mandated local program by creating a new crime.

The bill would require the department to charge interest on any underpaid fees due under the apportioned registration provisions, at the rate of 1% per month of the underpaid portion of the fees, commencing on the date the underpaid portion of the fees were originally due. Interest charged would continue to accumulate during any disputation or hearing regarding the fees, except that the registrant would be authorized to pay underpaid fees and other charges during the disputation process or hearing, in order to avoid additional interest charges, and request a refund of any overpaid fees after final review.

The bill would require the department to impose a penalty of \$50 or 10% of the underpaid fees, whichever is greater, commencing on the date the underpaid fees were determined to be due.

The bill would require the administrative service fee specified above to be at least the amount determined by the department to be sufficient to pay membership dues to the association acting as the repository for the International Registration Plan, but not more than \$2 for each application.

The bill would require the department to require a deposit in an amount determined by the department to be sufficient to ensure compliance with the apportioned registration provisions, for each application to include an additional operating area or vehicle in a registration issued under those provisions.

The bill would require the department to impose a fee in an amount determined by the department to be sufficient to cover its administrative costs under this provision, for each application for immediate telephone service for a registration issued under the apportioned registration provisions.

(3) This bill would incorporate additional changes in Section 286 of the Vehicle Code, proposed by AB 871, to be operative only if AB 871 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 540 (SB 901) Costa. State real property: Department of General Services.

Existing law requires the Department of General Services to perform various functions and duties with respect to state property. The Director of General Services is authorized to lease, lease-purchase, or lease with an option to purchase real property for the use of any state agency, but the director is prohibited from entering into an office space lease-purchase agreement or a lease with an option to purchase with an initial option purchase price over \$2,000,000, unless specifically authorized by the Legislature.

This bill would authorize the Director of General Services to enter into a joint powers agreement with prescribed governmental entities to study the infrastructure needs of downtown Fresno and the planning goals of the City of Fresno, explore financing methods, and make strategic recommendations.

Ch. 541 (SB 1058) Escutia. Teenage Pregnancy Prevention Grant Program.

Provisions of law that were repealed by their own terms on July 1, 2001, established a teenage pregnancy prevention program, targeted at pupils in elementary and secondary schools.

This bill would reenact and recast those provisions, would make those provisions inoperative on July 1, 2003, and would repeal them as of January 1, 2004.

Ch. 542 (SB 1112) Polanco. Courts: judicial holidays.

Existing law designates state holidays. Existing law adopts those state holidays, with the exception of Admission Day and Cesar Chavez Day, as judicial holidays.

This bill would include Cesar Chavez Day as a judicial holiday.

Existing law defines holidays, for purposes of the Code of Civil Procedure, to be state holidays, with specified exceptions.

This bill would revise that definition of holidays, to reference, instead, judicial holidays.

Existing law provides that if the last day for the performance of any act provided or required by law is a state holiday, excluding Martin Luther King Day and Cesar Chavez Day, and including Admission Day, then the period is extended to the next court day that is not a holiday.

This bill, instead, would provide that if the last day for the performance of any act provided or required by law is a judicial holiday, then the period is extended to the next court day that is not a holiday.

Ch. 543 (SB 1185) Committee on Revenue and Taxation. Income and corporation taxes: sales taxes: fees: administration: corporation: credits.

Existing law requires every generator of hazardous waste to pay an annual generator fee to the State Board of Equalization. Existing law provides for a refund of the generator fee paid under certain conditions and requires an application for a refund to be submitted to the board by March 31 of the fiscal year during which the generator paid the fee.

This bill would instead require that application to be submitted by the September 30 following the fiscal year during which the generator paid the fee.

Existing law provides that a taxpayer may file a claim with the State Board of Equalization for reimbursement of bank charges incurred as the direct result of an erroneous levy or notice to withhold by the board.

This bill would additionally allow reimbursement under those circumstances for any other reasonable 3rd-party check charge fees.

Under existing law, the Franchise Tax Board has adopted a policy of using electronic postmarks as the filing date of electronically filed tax returns.

This bill would codify that policy by conforming to provisions of federal income tax laws that allow electronic postmarks as proof of the date electronically filed tax returns are deemed filed.

The Bank and Corporation Tax Law imposes taxes upon income, as provided.

This bill would change the name of that law to the Corporation Tax Law and make conforming changes.

Existing income and bank and corporation tax laws allow a taxpayer to file a claim for refund or credit resulting from a federal adjustment within 2 years of the final federal determination.

This bill would allow the Franchise Tax Board to initiate an action on an overpayment resulting from a final federal determination, as provided.

Existing income and bank and corporation tax laws authorize the Franchise Tax Board to enter into voluntary disclosure agreements with specified entities.

This bill would authorize the board to also enter into those agreements with certain trusts and nonresident beneficiaries.

The Bank and Corporation Tax Law authorizes various credits against the taxes imposed by that law, including a credit against taxes imposed by that law in an amount equal to 6% of the amount paid or incurred during the taxable year for qualified property, as defined, that is placed in service in this state. The credit is required to be recaptured for dispositions of qualified property.

This bill would provide that certain sales of stock shall not be treated as a disposition of qualified property, as provided.

The Bank and Corporation Tax Law, in general, imposes a franchise tax measured by the net income from California sources of the preceding calendar or fiscal year, which is referred to as the "income year." The calendar or fiscal year for which the tax is imposed for the privilege of doing business in this state is referred to as the "taxable year."

This bill would delete references to "income year," and instead define "taxable year" as the calendar or fiscal year upon the basis of which the net income is computed.

Ch. 544 (AB 4) Bates. Sex offenders: registration.

Existing law requires certain persons, including any person convicted of specified sex offenses, for the rest of his or her life while residing or located within California, to register with the chief of police or the sheriff, as specified, and with the chief of police of a campus of the University of California, the California State University, or community college if the

person is residing or located upon the campus or in any of its facilities, within 5 working days of coming into, or changing his or her residence or location within, any city, county, or city and county, or campus. The information required to be given by the offender is determined by the Department of Justice, and includes the offender's residence address as well as the name and address of his or her employer.

This bill would apply these provisions to persons carrying on a vocation, as defined, and add a provision that would, commencing July 1, 2002, require transients, persons carrying on a vocation, and employees at university and college campuses to register and appear personally to notify the campus police department within 5 working days of changing his or her location or of ceasing to be enrolled or employed at the college or university. In cases where there is no campus police department, the registrant would be required to register with, and provide notice of changes to, the chief of police of the city in which the campus is located or the sheriff of the county where the campus is located if the campus is located in an unincorporated area or in a city that has no police department. Any violation of this registration requirement would be punishable as a misdemeanor with specified penalties based on first, 2nd, or 3rd violations. By expanding the scope of an existing crime and creating a new crime, the bill would impose a state-mandated local program.

The bill would make a conforming change.

The bill would incorporate additional changes to Section 290 of the Penal Code made by AB 349 and AB 1004 to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 2002, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 545 (AB 6) Cardenas. Before and after school programs.

Existing law establishes the After School Learning and Safe Neighborhoods Partnership Program to create incentives for establishing local after school enrichment programs and establishes maximum grant amounts for participating schools.

This bill would permit schools to establish before and after school programs under these provisions, would establish maximum grants for before and after school programs, and would revise related funding priorities.

Existing law, notwithstanding any other provision of law or regulation, permits a participating program operated by a city, county, or nonprofit organization to operate for up to 20 hours per week without obtaining a license or special permit otherwise required under prescribed provisions of law.

This bill would increase the authorization to 30 hours per week.

Ch. 546 (AB 99) Zettel. Education technology: grants.

Existing law, the Digital High School Education Technology Grant Act of 1997, provides one-time installation grants and ongoing technology support and staff training grants to school districts and county offices of education that operate high schools.

This bill would authorize a high school established after October 6, 2000, that would have been eligible for an annual technology support and staff training grant, to receive that grant and would require a high school to provide a technology plan to the Superintendent of Public Instruction before receiving a grant.

Ch. 547 (AB 119) Chavez. Securities: broker-dealers: employee criminal background checks.

Existing law provides for the licensing and regulation by the Commissioner of Corporations of broker-dealers handling transactions of securities. Existing law authorizes the Department of Justice to furnish state summary criminal history information (otherwise

known as a background check) concerning an individual to various persons and entities that are authorized to receive that information, including banks and other financial institutions.

This bill would authorize a licensed broker-dealer, or affiliate, or any officer or employee thereof, to submit to the department fingerprints of an applicant for employment for the purpose of obtaining information on whether that applicant has a conviction or an arrest for which the applicant was released on bail or on his or her own recognizance pending trial, as established by the department. The bill would provide that fingerprints includes fingerprints taken by the use of fingerprint live-scan technology.

Ch. 548 (AB 254) Frommer. Brownfields loans: CLEAN program.

(1) Under existing law, the Site Designation Committee in the California Environmental Protection Agency is authorized to designate an administering agency for oversight of a remedial action to a hazardous substance release. Existing law requires the administering agency to supervise the site investigation and remedial action conducted by the responsible party and, upon determining that the site investigation and remedial action has been satisfactorily completed, to issue a certificate of completion to the responsible party. Existing law prohibits any agency that has jurisdiction over a hazardous materials release from taking any action against a responsible party with respect to the hazardous materials release for which a certificate of completion is issued. Existing law prohibits an administering agency from taking action against a responsible party with respect to the hazardous materials release for which a certificate of completion is issued unless specified conditions apply and provides that the administering agency is the sole agency responsible for determining if any of those conditions apply to such a hazardous materials release site. Existing law authorizes an agency to petition the chairperson of the committee to review, among other things, the failure of the administering agency to act pursuant to its authority under that provision.

This bill would revise those provisions to instead expressly specify that, except with regard to that petition process, no agency other than the administering agency, may take action against a responsible party with regard to such a release site. The bill would authorize an administering agency to take such an action, but only if the administering agency determines that one of those conditions applies.

(2) Existing law requires the Department of Toxic Substances Control, with the approval of the Secretary for Environmental Protection, to establish the Investigating Site Contamination Program to provide loans to conduct preliminary endangerment assessments of brownfields and underutilized property, as defined, and the Cleanup Loans and Environmental Assistance to Neighborhoods (CLEAN) Program, to provide loans to finance the performance of actions necessary to respond to the release or threatened release of hazardous material on an eligible property. Existing law defines the terms “brownfield” and “underutilized property” as property that meets specified conditions, including being located in an urbanized area, as defined.

Existing law provides procedures for the approval of, and repayment of, a loan under these programs. Under existing law, the Cleanup Loans Environmental Assistance to Neighborhoods Account in the General Fund is continuously appropriated to the department to provide loans under those programs, except that the department and the Environmental Protection Agency are authorized to expend funds in the account for administration only upon the appropriation of funds for that purpose. Existing law requires the department to serve as the administering agency for any site that is the subject of a loan.

This bill would revise the definitions of the terms “brownfield” and “underutilized property” to instead include property that is located in an urban area, as defined. The bill would provide that the money in the account may be expended by the department, a regional water quality control board, the State Water Resources Control Board, or the California Environmental Protection Agency for implementation costs, upon appropriation by the Legislature, and would define the term “implementation costs” to include the costs of

overseeing and reviewing preliminary endangerment assessments and response actions, and certain oversight conducted by the regional board or state board.

The bill would provide that a loan recipient is not liable for paying the department's, regional board's, or state board's costs associated with the oversight of preliminary endangerment assessment preparation and approval or the oversight of a response action at a site, if the department determines there are sufficient funds in the account to reimburse the department, regional board, or state board for that oversight. If the department determines that the account has insufficient funds to pay for those oversight costs, the bill would require the loan recipient to pay the department the amount of those costs.

The bill would also authorize the recipient of a loan to finance a response action to also use those loan funds to pay a premium for a specified environmental insurance product from any insurance company that meets specified requirements.

The bill would also make various technical changes regarding the approval and repayment of the loans and the agreement required to be executed by the loan recipient with the department.

The bill would provide that the administering agency for a site that is subject to a release from a leaking underground fuel tank where the release from that tank is the principal threat at the property, is to be a regional board, the state board, or a specified local oversight program. The bill would require the department to notify the regional board and the state board with regard to certain loan applications. The bill would specify procedures for the selection of an oversight agency for such a site and would require the regional board or state board to provide specified information to the department regarding the status of a response action subject to this procedure.

(3) Existing law authorizes the department to adopt emergency regulations to implement the CLEAN program and requires the regulations to be repealed 180 days after their effective date.

This bill would authorize the department to adopt emergency regulations to implement the changes made by the bill and would repeal the regulations 180 days after their effective date unless the regulations are readopted. The bill would require the Office of Administrative Law to consider those regulations to be necessary for the immediate preservation of the public peace, health and safety, and general welfare.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 549 (SB 468) Sher. Hazardous materials response actions: brownfields: insurance.

(1) Existing law requires the Department of Toxic Substances Control, with the approval of the Secretary for Environmental Protection, to establish the Investigating Site Contamination Program to provide loans to conduct preliminary endangerment assessments of brownfields and underutilized property, as defined, and the Cleanup Loans and Environmental Assistance to Neighborhoods (CLEAN) Program, to provide loans to finance the performance of actions necessary to respond to the release or threatened release of hazardous material on an eligible property. Existing law defines the terms "brownfield" and "underutilized property" as property that meets specified conditions, including being located in an urbanized area, as defined.

Existing law provides procedures for the approval of, and repayment of, a loan under these programs. Under existing law, the Cleanup Loans And Environmental Assistance to Neighborhoods Account in the General Fund is continuously appropriated to the department to provide loans under those programs, except that the department and the California Environmental Protection Agency are authorized to expend funds in the account for administration only upon the appropriation of funds for that purpose. Existing law requires the department to serve as the administering agency for any site that is the subject of a loan.

This bill would revise the definitions of the terms "brownfield" and "underutilized property" to instead include property that is located in an urban area, as defined, and would

define other terms for purposes of the CLEAN Program. The bill would revise the definition of "eligible property" to include certain property owned or operated by a small business, as defined, a specified nonprofit corporation, or a small business incubator. The bill would additionally, continuously appropriate the money in the account to provide subsidies for environmental insurance pursuant to the FAIR Program specified in (2) below, thereby making an appropriation. The bill would also provide that the money in the account may be expended by the department, a California regional water quality control board, the State Water Resources Control Board, or the California Environmental Protection Agency for administration and implementation costs, upon appropriation by the Legislature, and for administering and implementing the FAIR Program. The bill would define the term "implementation costs" to include the costs of overseeing and reviewing preliminary endangerment assessments and response actions, and certain oversight conducted by the California regional water quality control board.

The bill would also make various technical changes regarding the agreement required to be executed by the CLEAN loan recipient with the department. The bill would provide that a loan recipient is not liable for paying the department's, regional board's, or state board's costs associated with the oversight of preliminary endangerment assessment preparation and approval or the oversight of a response action at a site, if the department determines there are sufficient funds in the account to reimburse the department, regional board, or state board for that oversight. If the department determines that the account has insufficient funds to pay for those oversight costs, the bill would require the loan recipient to pay the department the amount of those costs.

(2) This bill would establish the Financial Assurance and Insurance for Redevelopment Program (FAIR), which would require the secretary to solicit proposals for a package of environmental insurance products from insurance companies through a competitive bidding process. The selected insurance company or companies would be the exclusive state-designated provider of environmental insurance under the FAIR Program for a period of 3 years. The secretary would be required to evaluate the proposals based on specified factors. The bill would require an insurance company selected by the secretary to offer a prenegotiated package of environmental insurance products to any interested recipient of a loan under the CLEAN Program and to any other person who conducts a response action in the state.

The bill would require the secretary to expend the funds from the Cleanup Loans and Environmental Assistance to Neighborhoods Account that are made available in the annual Budget Act for expenditure to subsidize the cost of those environmental insurance products. The bill would require the secretary to provide from those available funds a subsidy of up to 50% of the cost of the premiums for the environmental insurance products provided under the FAIR Program and up to 80% of the self-insured retention amount of the cost overrun insurance, up to a maximum of \$500,000, under specified conditions. The bill would authorize any person who is conducting a response action to an eligible property under the CLEAN Program under the oversight of the department or a regional board to apply to the secretary for a subsidy.

The bill would require a recipient of a CLEAN Program loan to obtain secured creditor insurance, as defined, from the insurance company selected by the secretary pursuant to the FAIR Program, or comparable insurance, unless the secretary waives this requirement.

The bill would authorize the agency to adopt emergency regulations to implement the FAIR Program.

Ch. 550 (AB 284) Jackson. Public health: fungal contamination in indoor environments.

Existing law provides that the State Department of Health Services is vested with the duties, powers, purposes, responsibilities, and the jurisdiction of the department as they

relate to public health. The department has various duties to ensure that the most appropriate methods are being used to protect the public health.

This bill would require the California Research Bureau, which is part of the California State Library, in consultation with the State Department of Health Services, to perform a study of, and publish findings on, fungal contamination in indoor environments, and to organize meetings of a review panel to assist in the preparation of appropriate content for the study. This bill would require the California Research Bureau to submit, no later than January 1, 2003, the findings of the study to both the Legislature and the Director of Health Services.

Ch. 551 (AB 303) Dickerson. Special education: necessary small special education local plan areas.

Existing law authorizes certain special education local plan areas to request designation as necessary small special education local plan areas if their total reported units of average daily attendance in kindergarten and grades 1 to 12, inclusive, are less than 15,000 including all of the school districts located in the county or counties participating in the local plan, except those districts participating in a countywide special education local plan area located in an adjacent county that also meets certain criteria.

This bill would authorize a necessary small special education local plan area that experiences a reduction in its funding compared to the prior year, to claim, in addition to the current year funding, an amount equal to 40% of the reduction.

Ch. 552 (AB 409) Correa. Victims of crime: extension of filing period.

Existing law provides for the indemnification of victims and derivative victims of specified types of crimes from the Restitution Fund, which is continuously appropriated to the California Victim Compensation and Government Claims Board for these purposes. A victim or derivative victim is generally required to file an application for assistance with the board within one year of the crime or the date the victim attains 18 years of age, whichever is later, unless that deadline is extended for good cause to a 3-year period under certain circumstances. Existing law authorizes, until January 1, 2003, an additional extension to be granted for good cause under certain circumstances.

This bill would also authorize an additional extension for filing an application when it is filed by a victim or derivative victim of a crime for which the perpetrator or perpetrators received a sentence of death or life without possibility of parole, and certain other conditions are met. It would also extend the effective date of the provisions regarding the additional extension to January 1, 2004. By providing for expanded and continued uses of a continuously appropriated fund, this bill would make an appropriation.

Ch. 553 (AB 760) Shelley. School athletics: safety.

Existing law requires the governing board of any educational institution to provide for each member of an athletic team insurance protection for medical and hospital expenses. Existing law authorizes the governing board of any school district to make available ambulance service for athletic events. Existing law requests the University of California to design and conduct a study of pupil injuries resulting from participation in high school athletic events.

This bill would, subject to an appropriation in the 2001–02 Budget Act, provide grants to fund pilot projects that enter into partnerships to support safety in high school interscholastic athletics. This bill would authorize the department to contract with statewide nonprofit organizations to administer the program and would require the department or that organization to request and review proposals from grant applicants. The bill would require the department, or its administering nonprofit organization, to report to the Legislature.

Ch. 554 (AB 783) Kelley. Repossession agencies.

(1) Existing law, the Collateral Recovery Act, requires a licensed repossession agency to serve a debtor with a notice of seizure as soon as possible after the recovery of collateral, and requires the notice to contain certain information. A violation of the act is a misdemeanor.

This bill would require that the notice also contain a disclosure of the charges owed to the repossession agency for storage of the collateral and personal effects from the date of repossession until release of the property from storage.

(2) Existing law authorizes a peace officer, if he or she determines that a driver was driving a vehicle with driving privileges suspended or revoked, or without a license, to cause the removal and seizure of the vehicle. Existing law authorizes a magistrate, presented an affidavit of a peace officer establishing reasonable cause to believe that a vehicle was an instrumentality used in a peace officer's presence in violation of specified provisions, to issue a warrant or order authorizing the seizure and removal of the vehicle. A legal owner or their agent is required to present specified documents to the impounding agency to secure release of the vehicle. The impounding agency is authorized to impose a charge equal to the cost of a hearing or appeal on the legal owner or their agent if the legal owner or their agent requests a hearing or appeal relating to the removal, impound, storage, or release of the vehicle.

This bill would prohibit a city, county, city and county, or state agency from requiring that a legal owner that is a motor vehicle dealer, bank, credit union, acceptance corporation, other licensed financial institution legally operated in this state, or other person holding a security interest in the vehicle who is not the registered owner, or the legal owner's agent request a poststorage hearing as a requirement for release of the vehicle to the legal owner or the legal owner's agent. The bill would also revise the documents that a legal owner or agent is required to present to the impounding agency for release of the vehicle and would prohibit the agency from requiring documents other than those specified. The bill would provide that the impounding agency is not liable to the registered owner for improper release of the vehicle to the legal owner or the legal owner's agent so long as the release complies with the bill.

(3) Because the bill's provisions would expand the definition of a crime by expanding the notice requirement, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) This bill would incorporate additional changes in Section 14602.6 of the Vehicle Code proposed by AB 360, to be operative only if AB 360 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 555 (AB 807) Salinas. Farmworker housing.

The existing Joe Serna, Jr. Farmworker Housing Grant Program requires the Department of Housing and Community Development to make grants from the Joe Serna, Jr. Farmworker Housing Grant Fund, a continuously appropriated fund, to local public entities and nonprofit corporations for the construction or rehabilitation of housing for agricultural employees and their families. Grants may also be made for the purchase of the land in connection with the housing and for the construction and rehabilitation of related support facilities necessary to the housing.

This bill would authorize the department to make grants and loans from the Joe Serna, Jr. Farmworker Housing Grant Fund to local public entities and nonprofit corporations to establish capitalized operating reserves for short-term occupancy housing for migrant farmworker households. By expanding the purposes of a continuously appropriated fund, this bill would make an appropriation.

This bill would incorporate additional changes to Section 50517.5 of the Health and Safety Code proposed by AB 1160, to be operative if AB 1160 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 556 (AB 821) Simitian. High Technology Crime Task Force.

Existing law establishes the High Technology Theft Apprehension and Prosecution Program Trust Fund, and specifies the purposes for which the moneys in the fund may be used. Funding is contingent upon appropriation by the Legislature, as provided.

This bill would, in addition, permit the Executive Director of the Office of Criminal Justice Planning to allocate and award up to 5% of the funds available from the trust fund to public agencies or private nonprofit organizations for the purposes of establishing statewide programs of education, training, and research for public prosecutors, investigators, and law enforcement officers relating to deterring, investigating, and prosecuting high technology-related crimes.

Existing law establishes the High Technology Crime Advisory Committee, composed of members representing various governmental agencies and professional organizations, appointed by the Executive Director of the Office of Criminal Justice Planning.

This bill would in addition provide for the appointment by the executive director to the committee of a representative of the California banking industry.

Ch. 557 (AB 842) Diaz. International Baccalaureate Program.

Existing law states that the Legislature finds and declares that the International Baccalaureate Diploma Program is a comprehensive and rigorous 2-year curriculum, leading to examinations for high school pupils. Existing law requires, from funds appropriated for this purpose, the Superintendent of Public Instruction to annually allocate to each school district on behalf of each public high school in the district that offers the International Baccalaureate Diploma Program, up to \$25,000 to cover the ongoing costs of professional development required by the program.

This bill would delete the term "Diploma" from the International Baccalaureate Diploma Program. The bill would make participating middle schools eligible for funding as specified. The bill would also authorize funding to be expended to help pay the test fees for low- and middle-income pupils in need of financial assistance, as specified. The bill would require an annual cost-of-living adjustment to the amount of funding provided on an annual basis, as specified.

The bill would reappropriate \$140,600 from the unexpended balance of a specified statutory item relating to the International Baccalaureate Program to the Superintendent of Public Instruction for allocation to school districts for the purposes of the program, as specified. To the extent that funds appropriated by this bill are allocated to a school district or a community college district, those funds would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

Ch. 558 (AB 876) Wyland. Pupil reading programs.⁶

Existing law provides for various reading programs for pupils in specified grades, including the Comprehensive Reading Leadership Program Act of 1996, the Elementary School Intensive Reading Program, and the Governor's Reading Award Program.

This bill would appropriate \$100,000 from the General Fund to the State Department of Education for the purpose of contracting for a study that identifies reading programs in schools that maintain kindergarten or any of grades 1 to 6, inclusive, where the performance of 75% of the pupils was at or above the 80th percentile on the reading portion of the achievement tests administered pursuant to the Standardized Testing and Reporting Program.

Ch. 559 (AB 1012) Corbett. Child Pornography.

Under existing law, possession of child pornography is an offense generally punishable as a misdemeanor. Possession of child pornography is a felony under existing law if the defendant has previously been convicted of possession of child pornography.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would also make possession of child pornography a felony if the defendant had a prior conviction either for sale, distribution, or production of matter depicting sexual conduct by a minor for commercial purposes, or for use of a minor to produce matter depicting sexual conduct by a minor for commercial purposes.

By making a misdemeanor a felony based upon a prior conviction for any of the specified offenses, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 560 (AB 1090) Hertzberg. Real property.

Existing law provides that when an obligation secured by a deed of trust has been satisfied, the beneficiary, or its assignee, shall execute and deliver to the trustee the original note, deed of trust, request for a full reconveyance, and other documents as may be necessary to reconvey, or cause to be reconveyed, the deed of trust. Existing law provides that the trustee shall deliver a copy of the reconveyance to the beneficiary if known. Existing law provides that the trustee, beneficiary, or mortgagee may charge a reasonable fee to the trustor or mortgagor, or the owner of the land, as the case may be, for all services involved in the preparation, execution, and recordation of the full reconveyance. If the fee does not exceed \$65 it is conclusively presumed to be reasonable. Existing law also provides that the mortgagee or trustee may not record or cause the certificate of discharge or full reconveyance to be recorded under specified circumstances. A person who violates these provisions is liable to the person affected by the violation for all damages the person affected may sustain and forfeits to the person affected the sum of \$300.

This bill would require the beneficiary or the assignee of the beneficiary to execute and deliver to the trustee the original note, deed of trust, request for full reconveyance, and other documents as may be necessary to reconvey, or cause to be reconveyed, the deed of trust within 30 calendar days after the obligation secured by any deed of trust has been satisfied. This bill would also provide that, instead of delivering the original note and deed of trust to the trustee within 30 days of loan satisfaction, the beneficiary may, within 120 days of loan satisfaction, deliver the original note and deed of trust to either the trustee or trustor and would require that upon satisfaction, the note and deed of trust be altered to indicate that the obligation is paid in full.

This bill would also require the reconveyance instrument to specify the trustor as the person to whom the recorder will deliver the recorded instrument.

This bill would also require a beneficiary, upon satisfaction of an obligation secured by a deed of trust, to mark the note "paid in full" and, within 120 days of satisfaction, either deliver the note to the trustee or mail it to the trustor.

This bill would also require that, if the note, or deed of trust, or any copy of the note or deed of trust, is electronic, upon satisfaction of an obligation secured by a deed of trust, any electronic original, or electronic copy which has not been previously marked solely for use as a copy, of the note and deed of trust, shall be altered to indicate that the obligation is paid in full.

This bill also would change the amount of the fee for preparation, execution, and recordation of a full reconveyance to \$45 and would prohibit the fee from being charged unless demand for the fee was included in the payoff demand statement. This bill would also provide that a beneficiary may, at its discretion but subject to a specified procedure, substitute as trustee the title company conducting the escrow through which the obligation is satisfied, and that the title company must comply with the requirements of a trustee and may collect applicable trustee fees. The bill also would increase the sum forfeited by a person who violates these provisions from \$300 to \$500.

This bill also would provide that no other fee or charge may be imposed on the trustor in connection with, or relating to, these provisions, except as specified.

The bill also would delete the provision specifying the circumstances in which a mortgagee or trustee shall not record or cause the certificate of discharge or full reconveyance to be recorded.

Existing law requires a mortgagee or beneficiary of a mortgage or deed of trust, or his or her designees, to prepare and deliver specified documents upon demand, including a beneficiary statement and a payoff demand statement. A beneficiary who provides those documents pursuant to this provision is authorized to impose a charge not to exceed \$60 for furnishing each required statement, except as specified.

This bill would reduce that maximum charge for the statement to \$30 and would require a beneficiary, who collects a fee for reconveyance and thereafter discovers that the release of obligation had already been recorded, to refund the fee.

This bill also would provide specified rules regarding the refiling of, and costs and attorney's fees for, claims dismissed as a result of certain changes made to existing law by this bill.

This bill would make specified legislative findings regarding changes to, and interpretation of, existing law.

Ch. 561 (AB 1189) Aanestad. School finance.

Existing law provides that a unified school district that meets certain criteria is eligible to receive apportionments pursuant to the schedules for a necessary small school and a necessary small high school, as specified. Under existing law, this provision becomes inoperative on July 1, 2002, and, as of January 1, 2003, is repealed.

This bill would extend this provision to July 1, 2004, and the date on which the provision would be repealed to January 1, 2005.

Ch. 562 (AB 1207) Longville. Small wind energy systems.

(1) Existing law prohibits the legislative body of any city or county from enacting an ordinance that prohibits or unreasonably restricts the use of solar energy systems other than for the preservation or protection of the public health and safety.

This bill would authorize until July 1, 2005, a local agency to provide, by ordinance, for the installation of small wind energy systems, as specified, and to issue a conditional use permit for this purpose. The bill would also authorize a local agency to impose conditions on the installation of these systems, as specified. This bill would also require a local agency to approve an application for a small wind energy system by right if specified conditions are met and would authorize the local agency to charge a specified fee. By increasing the duties of local agencies, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 563 (AB 1286) Rod Pacheco. Conservatorships: bonds.

Existing law permits a court in a conservatorship proceeding to dispense with the requirement of filing a bond, or permits the filing of a bond in a smaller amount than would otherwise be required, when a conservatee with sufficient capacity has waived the filing of a bond. Existing law permits a court in a guardianship or conservatorship proceeding to order separate bonds or a single bond or a combination of the 2 if the proceeding involves more than one ward or conservatee.

This bill would prohibit the court in a conservatorship proceeding from waiving the filing of a bond, without good cause, as specified. This bill would require a court in a

conservatorship proceeding to order a separate bond for each conservatee, except as specified.

Existing law requires the guardian or conservator of an estate to submit to the court that has jurisdiction over the ward or conservatee a copy of account statements with specified information.

This bill would revise and recast these provisions by requiring an institution, when a guardian or conservator pursuant to letters of guardianship or conservatorship of the estate takes possession or control of any asset of the ward or conservatee held by an institution, to file with the court a statement containing specified information. The bill would also require that certain personal information concerning the ward or conservatee be kept confidential.

This bill would require guardians and conservators to file original account statements received from institutions, as defined, including account statements of their wards or conservatees, as part of the periodic accounts filed by the guardians or conservators with the court.

This bill would incorporate additional changes in Section 7480 of the Government Code, proposed by SB 125, to be operative only if SB 125 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 564 (AB 1287) Cardenas. Higher education: University of California.

(1) An existing provision of the California Constitution establishes the University of California under the administration of the Regents of the University of California.

An existing item of the Budget Act of 2001 appropriates, among other amounts, \$44,753,000, as scheduled, for new and existing outreach programs that are aimed at improving the chances for pupils from a wide diversity of backgrounds to become eligible for the University of California.

This bill would, without changing the total amount appropriated for these purposes, adjust the amounts scheduled for these specified outreach programs, thereby making an appropriation.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 565 (AB 1307) Goldberg. Teacher credentialing.

Existing law requires the Commission on Teacher Credentialing to establish standards and procedures for the initial issuance and renewal of credentials.

This bill would require the Commission on Teacher Credentialing to adopt regulations to provide credential candidates enrolled in commission-accredited preparation programs, including internship programs, professional preparation programs, and integrated programs of professional preparation, with time of not less than 24 months to complete the programs without meeting new requirements, including, but not limited to, requirements added by statutes, regulations, or standards, after the candidates' enrollment in the programs.

The bill would provide that a credential candidate who is continuously enrolled, as defined, in an integrated program of professional preparation would be eligible for a 12-month extension to complete requirements until the repeal of this provision on January 1, 2006.

Ch. 566 (AB 1312) Nakano. The Asian Pacific Islander Anti-Hate Crimes Program.⁷

Existing law prohibits hate crimes and provides for specified programs relating to hate crimes for students and law enforcement agencies. Existing law requires each principal of a school to forward a completed report of crimes committed, including hate motivated incidents and hate crimes, on school grounds to the district superintendent or county superintendent of schools. Existing law requires those superintendents to compile the school data and submit the aggregated data to the State Department of Education. Existing law

NOTE: Superior numbers appear as a separate section at the end of the digests.

requires every law enforcement agency in the state to make available a brochure on hate crimes to victims of those crimes and the public.

This bill would appropriate \$250,000 from the General Fund to the Department of Justice to establish the Asian Pacific Islander (API) Anti-Hate Crimes Program, the functions of which would be to (1) create hard copy brochures and workbooks to provide to Asian Pacific Islander communities throughout the state that define what are hate crimes, how to report a hate crime, how hate crimes impact a community and community strategies on responding to hate crimes; and (2) conduct training seminars for community organizations in order to better train them to assist themselves or other Asian Pacific Islander communities in dealing with hate crimes.

The bill would require the Department of Justice to submit a report to the Legislature by March 1, 2004, describing the operation and accomplishments of the statewide API Anti-Hate Crimes Program.

The bill's provisions would remain in effect only until January 1, 2005, on which date they would be repealed.

Ch. 567 (AB 1429) Committee on Governmental Organization. Alcoholic beverages: licensees: tied-house restrictions: special on-sale general license.

(1) The Alcoholic Beverage Control Act authorizes a California winegrower's agent to perform or furnish on behalf of a winegrower services that the winegrower is authorized to perform under specified statutory provisions.

This bill would additionally authorize a California winegrower's agent to purchase advertising space or time from certain on-sale retail licensees.

(2) Under the Alcoholic Beverage Control Act, the Department of Alcoholic Beverage Control may issue a special on-sale general license to any nonprofit theater company that has been in existence for at least 10 years and meets other specified requirements. Theater companies holding a license pursuant to these provisions may only sell and serve alcoholic beverages to ticketholders during, 2 hours prior to, and one hour after, a bona fide theater performance of the company.

This bill would require that the license issued to the theater company be for a single specified premises, and would remove the requirement that the theater company have been in existence for at least 10 years.

This bill would permit a licensed manufacturer, winegrower, manufacturer's agent, California winegrower's agent, rectifier, distiller, bottler, importer, or wholesaler, or any officer, director, employee, or agent of that person, to serve on the board of trustees of a nonprofit theater company operating a theater in Napa County licensed pursuant to these provisions.

(3) Existing law requires each manufacturer, importer, and wholesaler of beer to file and thereafter maintain on file with the Department of Alcoholic Beverage Control a schedule of selling prices charged for beer sold and distributed to customers in California, as specified.

This bill would make those provisions applicable to certain sales of beer made under contract, and would define "contract beer manufacturer" and "beer manufacturer" for these purposes.

(4) Existing law provides that a provision in an agreement between a beer manufacturer and a beer wholesaler for the sale and distribution of beer in this state, which restricts venue to a forum outside this state, is void with respect to any claim arising under or relating to the agreement involving a beer wholesaler operating within this state.

This bill would define "beer manufacturer" for these purposes.

(5) The Alcoholic Beverage Control Act contains limitations on sales commonly known as "tied-house" restrictions, which generally prohibit a manufacturer, winegrower, manufacturer's agent, California winegrower's agent, rectifier, distiller, bottler, importer, or wholesaler from furnishing, giving, or lending any money or other thing of value to any

person engaged in operating, owning, or maintaining any on-sale or off-sale licensed premises.

Existing law provides that for purposes of these provisions, the listing of the names, addresses, telephone numbers or e-mail addresses, or both, or Web site addresses, of 2 or more unaffiliated off-sale retailers selling the products produced, distributed or imported by a nonretail industry member, defined as a manufacturer, winegrower, or distiller of alcoholic beverages, in response to a direct inquiry from a consumer received by telephone, by mail, by electronic Internet inquiry or in person does not constitute a thing of value or prohibited inducement to the listed off-sale retailer, if specified conditions are met.

This bill would extend these provisions to all wholesalers by including them within the definition of a nonretail industry member and would remove the specific exclusion from that definition for beer retailers and wholesalers.

(6) Existing law, for purposes of these provisions, prohibits a manufacturer, winegrower, manufacturer's agent, rectifier, California winegrower's agent, distiller, bottler, importer, and wholesaler, and any officer, director, or agent of any of those persons, from having specified relationships with an on-sale alcoholic beverage licensee, with limited exceptions. Existing law permits, as specified, any manufacturer, winegrower, rectifier, distiller, distilled spirits wholesaler, or any officer, director, agent, or representative of any of those entities to conduct market research and, in connection with that research, to purchase from licensed off-sale retailers data, regarding purchases and sales of alcoholic beverage products, at the customary rates that those retailers sell similar data for nonalcoholic beverage products.

This bill would define "beer manufacturer" for these purposes.

(7) Existing law generally prohibits a manufacturer of alcoholic beverages and a winegrower from paying, crediting, or compensating a retailer for advertising or paying or giving anything of value for the privilege of placing a sign or advertisement with a retail licensee. It authorizes, as an exception, a beer manufacturer, the holder of a winegrower's license, or a distilled spirits manufacturer or a distilled spirits manufacturer's agent to purchase advertising space and time from, or on behalf of, an on-sale retail licensee, subject to specified conditions.

This bill would define beer manufacturer for these purposes. The bill would also permit a California winegrower's agent, a distilled spirits manufacturer, or a distilled spirits manufacturer's agent to purchase the advertising space and time from, or on behalf of, an on-sale retail licensee subject to the existing conditions.

(8) Existing law makes it a misdemeanor for a licensee, subject to these provisions, to violate existing provisions relating to the purchase of that advertising space or time.

This bill would impose a state-mandated local program by expanding the licensees subject to these criminal provisions.

(9) Existing law generally prohibits a manufacturer, winegrower, manufacturer's agent, California winegrower's agent, rectifier, distiller, bottler, importer, or wholesaler from, among other things, holding the ownership, directly or indirectly, of any interest in any on-sale or off-sale license. Exempted from this restriction, however, is the issuance or transfer of any retail on-sale or off-sale license to any person with respect to premises which are an integral part of the operation of a hotel, motel, or marine park, as defined, which meets certain conditions, one of which is that the retail licensee not purchase any alcoholic beverages for sale in this state from any wholesale licensee that has any interest, directly or indirectly, in the premises, in the retail license, or in the retail licensee.

This bill would revise that requirement with respect to a marine park, and allow the purchase of beer or malt beverages from any wholesale licensee, as provided.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(11) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 568 (AB 1570) Pavley. Batterer's treatment programs.

Existing law prescribes terms of probation, including successful completion of a batterer's treatment program for a person convicted of a crime in which the victim is, among other persons, a spouse or former spouse, a cohabitant or former cohabitant, a person with whom the defendant is having or has had a dating or engagement relationship, or a person with whom the defendant has had a child. If a batterer's treatment program, as specified, is unavailable, the court may direct the defendant to participate in another appropriate counseling program.

This bill would require the defendant to attend consecutive weekly sessions, unless granted an excused absence for good cause by the program for no more than 3 individual sessions during the entire program, and to complete the program within a period of 18 months unless, after a hearing, the court finds good cause to modify these requirements. By increasing probation supervision duties, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 569 (AB 1611) Keeley. Higher education housing: California Educational Facilities Authority.

Existing law establishes the California Educational Facilities Authority Act, the purpose of which is to provide private institutions of higher education within the state an additional means by which to expand, enlarge, and establish dormitory, academic, and related facilities, finance those facilities, refinance existing facilities, and to provide private and public institutions of higher education within the state an additional means to assist students in financing their costs of attendance.

Existing law establishes the various segments of the public higher education system in the state. These segments include the University of California, which is administered by the Regents of the University of California, the California State University, which is administered by the Trustees of the California State University, and the California Community Colleges, which is administered by the Board of Governors of the California Community Colleges.

This bill would authorize the authority to enter into agreements with nonprofit entities, as defined, to finance the cost of constructing student, faculty, and staff housing, as defined, near the campuses of the University of California, the Hastings College of the Law, the California State University, the California Community Colleges, or a participating private college, as defined.

Because this bill would authorize the authority to expend funds for new purposes, it would make an appropriation.

The bill would incorporate amendments to several provisions of the bill proposed by this bill and SB 1209. These amendments would become operative if both bills are enacted and become effective on or before January 1, 2002, each bill amends these provisions, and this bill is enacted after SB 1209.

Ch. 570 (AB 1717) Zettel. School reports: defamation liability.

Existing law provides a cause of action for defamation, as specified.

This bill would provide a communication by any person to a school principal, or a communication by a student attending the school, as defined, to the student's teacher or to a school counselor or school nurse and any report of that communication to the school principal, stating that a specific student or other specified person has made a threat to commit violence or potential violence on the school grounds involving the use of a firearm or other deadly or dangerous weapon, is a communication on a matter of public concern and is subject

to liability in defamation only upon a showing by clear and convincing evidence that the communication or report was made with knowledge of its falsity or with reckless disregard for the truth or falsity of the communication.

Ch. 571 (AB 1721) Committee on Higher Education. California Postsecondary Education Commission: study.

Existing law imposes duties and responsibilities on the California Postsecondary Education Commission as the statewide postsecondary education planning and coordinating agency and adviser to the Legislature and the Governor, including the duty to review all proposals for changes in eligibility pools for admission to public institutions and segments of postsecondary education and to make recommendations to the Legislature, the Governor, and institutions of postsecondary education.

This bill would require the commission, in carrying out that requirement, to conduct a study periodically of the percentages of California public high school graduates estimated to be eligible for admission to the University of California and the California State University. This provision would be implemented only during those fiscal years for which funding is provided for it in the Budget Act or in another measure.

The bill would incorporate additional changes to this provision, proposed by SB 517, to be operative only if SB 517 and this bill are both chaptered and become effective on or before January 1, 2002, both bills amend this provision, and this bill is chaptered last.

Ch. 572 (SB 66) Kuehl. Domestic violence: protective orders: background checks.

Existing law, contained in the Domestic Violence Prevention Act, authorizes the court to issue a protective order, as defined, either ex parte or after a hearing, to restrain any person to prevent a recurrence of domestic violence.

This bill would require the court, prior to a hearing on the issuance or denial of a protective order to ensure that a search of specified records and data bases is or has been made to determine if the proposed subject of the order has any specified prior criminal convictions or outstanding warrants, is on parole or probation, or is or was the subject of other protective or restraining orders. The bill would further require the court, in determining whether to issue an order, to consider only specified information revealed by the search, and to release this information to the parties or, upon either party's request, to their attorneys. The bill would require the court to advise the parties that they may request the information, and to give the parties a specified admonition. The bill would require information obtained as a result of the search and relied upon by the court to be maintained in a confidential case file. The bill would require that this case file be disclosed to the court-appointed mediator assigned to the case and the child custody evaluator, as specified. The bill would require the court to order the clerk to notify appropriate law enforcement agencies of the issuance and contents of the protective order in specified circumstances. The bill would also require the court, if the results of the search indicate that the subject of the order is currently on parole or probation, to order the clerk to notify the appropriate parole or probation officer of the issuance and contents of the protective order. The bill would require officials so notified to take specified actions with respect to the restrained person.

Existing law makes it a crime for any person to commit specified acts of violence against his or her spouse, the person with whom he or she is cohabiting, the mother or father of his or her child, or any child.

This bill would require the district attorney or prosecuting city attorney, on any charge involving acts of domestic violence, to perform or cause to be performed a thorough investigation of the defendant's history, including the search of specified data bases, and to present this information for consideration by the court when setting bond or when releasing a defendant on his or her own recognizance at the arraignment, if the defendant is in custody, and upon consideration of any plea agreement.

Existing law authorizes the issuance of certain restraining orders in proceedings to declare a minor a dependent child of the juvenile court.

This bill would impose search requirements in these proceedings analogous to those that would be imposed by the bill pertaining to orders under the Domestic Violence Protection Act.

By imposing new duties upon court personnel and prosecuting attorneys, this bill would create a state-mandated local program.

This bill would incorporate additional changes in Section 213.5 of the Welfare and Institutions Code proposed by AB 1129 that would become operative only if AB 1129 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

The bill would require that its provisions be implemented in those courts identified by the Judicial Council as having resources currently available for those purposes. The bill would require that its provisions be implemented in other courts to the extent that funds are appropriated for the purposes of the act in the annual Budget Act.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 573 (SB 178) Costa. Education: instructional time requirements.

(1) Existing law requires the Superintendent of Public Instruction to apportion an amount pursuant to a prescribed formula to each school district or county office of education that certifies to the superintendent that it offers a minimum amount of instructional time, as specified, in certain fiscal years. Existing law also requires the superintendent to reduce the apportionment of a school district or county office of education pursuant to a prescribed formula if the school district or county office of education offers less than the required amount of instructional time.

This bill would require the superintendent to make certain reductions based on current formulas only for specified fiscal years. The bill would require the superintendent to withhold from the revenue limit apportionment for the average daily attendance of each affected grade level an amount pursuant to a prescribed formula based upon each instructional day less than that required that the school district or county office of education offered, or the percentage of the minimum offered minutes at each grade level that the school district failed to offer.

(2) Existing law requires the Superintendent of Public Instruction to reduce a school district's apportionment pursuant to a prescribed formula if the governing board of the district offers less instructional time than that fixed for the 1982-83 fiscal year. Existing law exempts the Loma Prieta Joint Union Elementary School District from these reduction provisions for certain kindergarten classes.

This bill would delete those provisions. This bill would also deem the Ducor Union Elementary School District to have complied with the instructional time requirements for the 1997-98 fiscal year.

(3) Existing law authorizes the State Board of Education to waive all or any portion of the fiscal penalties that may be levied for failing to maintain the prescribed minimum length of time for the instructional schoolday and year.

This bill would delete these provisions and implement new waiver provisions. The bill would authorize the board to waive the fiscal penalties for a school district or county office of education that fails to maintain the prescribed minimum length of time for the instructional

school year, minimum number of instructional days, or both, upon the condition that the school or schools in which the minutes, days, or both, were lost maintain minutes and days of instruction equal to those lost for twice the number of years that it failed to meet the requirements. The bill would authorize the board to grant a waiver without this condition to school districts that maintained certain kindergarten classes.

Ch. 574 (SB 273) Karnette. Education: instructional materials: apportionments.

Under existing law, a local educational agency may be required to repay an apportionment significant audit exception resulting from an audit or review, which may not be waived by the State Board of Education. Under existing law, the Pupil Textbook and Instructional Materials Incentive Program Act, the governing board of a school district is required to take certain actions in order to be eligible to receive funds under that act, including, among others, holding a public hearing or hearings at which the governing board is required to encourage participation by parents, teachers, members of the community interested in the affairs of the school district, and bargaining unit leaders, and to make a determination, by resolution as to whether each pupil in each school in the district has, or will have prior to the end of that fiscal year, sufficient textbooks or instructional materials, or both, as prescribed.

This bill would authorize the State Board of Education to consider and act upon requests to waive certain provisions of the Pupil Textbook and Instructional Materials Incentive Program Act, based on certain findings, to the extent that a failure to comply with those provisions would otherwise subject the school district to a repayment due to an apportionment significant audit exception, and would authorize that waiver, regardless of whether the request was received before or after the effective date of this bill.

The bill would declare that it is to take effect immediately as an urgency measure.

Ch. 575 (SB 310) Perata. Pupils: protective sun clothing.

Existing law authorizes any school district to adopt or rescind a reasonable dress code policy, as specified.

This bill would require every schoolsite to allow for outdoor use during the school day, articles of sun-protective clothing that pupils would be allowed to wear outdoors, including, but not limited to, hats, thereby imposing a state-mandated local program, and authorize schoolsites to set a policy related to that clothing.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 576 (SB 321) Alarcon. Teachers: emergency permits: training.⁸

Existing law authorizes the Commission on Teacher Credentialing to issue or renew emergency teaching or specialist permits if the applicant possesses a baccalaureate degree conferred by a regionally accredited institution of higher education, has fulfilled the subject matter requirements, and passes the state basic skills proficiency test and the commission approves the justification for the emergency permit submitted by the school district in which the applicant is to be employed. Existing law requires the holder of an emergency permit to attend an orientation to the curriculum and to techniques of instruction and classroom management, to teach only with the assistance and guidance of a teacher with 3 years of full-time teaching experience, and to participate in ongoing training, coursework, or seminars designed to prepare the individual to become a fully credentialed teacher or other educator in the subject area or areas in which he or she is assigned to teach or serve.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, until January 1, 2007, authorize the Los Angeles Unified School District, from funds allocated to it for this purpose, to develop on a pilot project basis a 30-day training program for the teachers it hires on an emergency basis and who will be assigned to schools that have 20% or more teachers on emergency permits. The bill would require the training to be delivered before a teacher hired on an emergency basis begins teaching and would require a teacher participating in the training to spend half of the training period observing experienced fully credentialed teachers in a classroom of the same grade level as the teacher being trained.

The bill would appropriate \$2,000,000 from the General Fund to the Commission on Teacher Credentialing for allocation to the Los Angeles Unified School District for purposes of implementing this pilot program. To the extent that the funds appropriated by this bill are allocated to a school district or a community college district, those funds would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

Ch. 577 (SB 442) Vasconcellos. Housing: special needs population.⁹

Existing law requires the California Statewide Housing Plan to include a housing strategy that coordinates housing assistance and activities of state and local agencies. Existing law also authorizes the State Department of Developmental Services to study and prepare a plan in cooperation with the State Council on Developmental Disabilities to consider, among other things, maximizing existing state and federal resources available to assist persons with developmental special needs to live in the least restrictive environment possible, including federal housing subsidy and assistance.

This bill would require the housing strategy in the California Statewide Housing Plan to include the provision of housing assistance for various specific population groups. For that purpose, the bill would require the Department of Housing and Community Development to consider certain information and to consult with various state departments that have information relevant to the housing needs of those population groups.

This bill would require the Director of e-Government in the office of the Governor to direct the development of, and to make operational, an interactive Internet-based information site and inventory of publicly assisted or publicly financed multiunit low-income rental housing, to be referred to as the California Affordable Housing Connection. It would require the director to designate or request a specified technology center to maintain and update the information at least biannually. It would require the director to report to the Legislature, as specified, on the development of the site.

This bill would appropriate \$150,000 from the General Fund to the Director of e-Government for the purposes of the bill, as specified.

Ch. 578 (SB 471) Sher. Proposition 65: toxic chemicals.

The existing Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) prohibits any person, in the course of doing business, from knowingly and intentionally exposing any individual to a chemical known to the state to cause cancer or reproductive toxicity without giving a specified warning, or from discharging or releasing such a chemical into any source of drinking water, except as specified.

The act imposes civil penalties upon persons who violate those prohibitions, and provides for the enforcement of those prohibitions by the Attorney General, a district attorney, or specified city attorneys or prosecutors, and by any person in the public interest, if that private action is commenced more than 60 days after the person has given notice of the violation that is the subject of the action to the Attorney General, the district attorney, any city attorney in whose jurisdiction the violation is alleged to have occurred, and to the alleged violator, and the violation is not being prosecuted, as specified. The act requires any person bringing an action in the public interest to notify the Attorney General that such an action has been filed, and requires such a person, after the action is either subject to a settlement or a judgment, to

NOTE: Superior numbers appear as a separate section at the end of the digests.

submit to the Attorney General a reporting form that includes the results of that settlement or judgment and the final disposition of the case.

This bill would require the court, in assessing the amount of a civil penalty for a violation of the act, to consider specified factors, including, among other things, the economic effect of the penalty on the violator, whether the violator took good-faith measures to comply with the act, the willfulness of the defendant's misconduct, and the deterrent effect that the imposition of the penalty would have on both the violator and the regulated community.

The bill would provide that if the notice to the Attorney General that is required to be made by a person bringing an action in the public interest alleges a violation of the act's warning requirement, the notice would be required to include a certificate of merit stating that the person executing the certificate has consulted with one or more persons with relevant and appropriate experience or expertise who has reviewed facts, studies, or other data regarding the exposure to the listed chemical that is the subject of the action, and that, based on that information, the person believes there is a reasonable and meritorious case for the private action. The bill would authorize the trial court to review the basis for the certificate, in specified circumstances, and would deem the action to be frivolous, if the court finds there is no credible factual basis for the certified belief that an exposure to a listed chemical has occurred or was threatened. The bill would authorize the Attorney General, a district attorney, or a city attorney to seek and recover attorney's fees on behalf of any person who has provided a notice and renders assistance in that action.

The bill would additionally require any person filing any action in which a violation of the act is alleged to notify the Attorney General that such an action has been filed and would require any private person filing an action in which a violation of the act is alleged, to submit a reporting form to the Attorney General that includes the results of any settlement or judgment and the final disposition of the case.

The bill would require a plaintiff, if there is a specified settlement in an action brought by a person in the public interest, to submit the settlement to the court for approval. The bill would require the court to make specified findings and would require the plaintiff to have the burden of producing evidence to support those findings.

The bill, in conformance with the requirements of Proposition 65, would make a legislative finding and declaration that these changes would further the purposes of the act.

Ch. 579 (SB 502) Ortiz. Elder abuse.¹⁰

Existing law requires specified persons to report physical injury as a result of assaultive or abusive behavior, including elder or dependent adult abuse and domestic violence, to local law enforcement. Existing law also authorizes the County of San Mateo to establish a pilot project, as specified, to create, after consultation with the Department of Justice, a standardized form for reporting violence and abuse of elder and dependent adults.

This bill would require the Office of Criminal Justice Planning to cooperate with various agencies to establish medical forensic forms fulfilling specified criteria, instructions, and examination protocol for victims of domestic violence and elder and dependent adult abuse and neglect, as specified. This bill would also require the Office of Criminal Justice Planning to determine whether it would be appropriate and forensically sound to develop separate or joint forms for medical forensic findings relating to these types of abuse.

This bill would also appropriate \$100,000 from the General Fund to the Office of Criminal Justice Planning to carry out the purposes of this act.

Ch. 580 (SB 517) Torlakson. California Postsecondary Education Commission.

Existing law establishes the California Postsecondary Education Commission as the statewide postsecondary education coordinating and planning agency.

This bill would require the commission, in consultation with the public postsecondary education segments, to consider the development of facilities to be used by more than one segment of public higher education. The bill would also require the commission to

NOTE: Superior numbers appear as a separate section at the end of the digests.

recommend to the Legislature criteria and processes for different segments to utilize bond funds for the joint-use facilities.

The bill would incorporate additional changes to this provision, proposed by AB 1721, to be operative only if AB 1721 and this bill are both chaptered and become effective on or before January 1, 2002, both bills amend this provision, and this bill is chaptered last.

Ch. 581 (SB 568) Morrow. Schoolbus seat belts.

(1) Under existing law, unless specifically prohibited by the National Highway Transportation Safety Administration, all schoolbuses manufactured on or after January 1, 2002, and purchased or leased for use in California are required to be equipped at all designated seating positions with a combination pelvic and upper torso passenger restraint system. Existing law declares the intent of the Legislature that school pupil transportation providers work to prioritize the allocation of schoolbuses purchased, leased, or contracted for after January 1, 2002, to ensure that elementary-level schoolbus passengers receive first priority for new schoolbuses whenever feasible.

This bill, instead, would require that certain schoolbuses purchased or leased for use in California be equipped at all designated seating positions with a combination pelvic and upper torso passenger restraint system, as defined, unless specifically prohibited by the National Highway Transportation Safety Administration. The bill would declare the intent of the Legislature that school pupil transportation providers work to prioritize the allocation of those schoolbuses to ensure that elementary level schoolbus passengers receive first priority for new schoolbuses whenever feasible.

Since a violation of these provisions is a crime under existing provisions of law, this bill would impose a state-mandated local program by expanding the definition of a crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 582 (SB 647) Costa. Alcoholic beverages: licensees: advertising restrictions.

Existing law generally prohibits a manufacturer of alcoholic beverages and a winegrower from paying, crediting, or compensating a retailer for advertising or pay or giving anything of value for the privilege of placing a sign or advertisement with a retail licensee. It authorizes, as an exception, the holder of a beer manufacturer's or winegrower's license, or a distilled spirits manufacturer or a distilled spirits manufacturer's agent, to purchase advertising space and time from, or on behalf of, an on-sale retail licensee, under certain conditions, if the on-sale retail licensee is the owner, manager, agent, assignee, or major tenant of a specified facility.

This bill would extend the authorized exception to a beer manufacturer, as defined, and would extend that exception to an on-sale licensee who is the owner, manager, agent of the owner, assignee of the owner's advertising rights, or the major tenant of the owner of an outdoor stadium and a fully enclosed arena with fixed seating capacities in excess of 10,000 seats located in Fresno County or an athletic and entertainment complex, as described, in Riverside County. The bill would eliminate the application of the exception to an exposition park in Alameda County and instead would extend the exception for an exposition park in San Bernardino County. The bill would also revise and clarify the conditions that are required to be met in order for the exception to apply.

Existing law makes it a misdemeanor for a licensee, subject to the provisions of the bill, to violate existing provisions relating to the purchase of that advertising space or time.

This bill would impose a state-mandated local program by modifying these criminal provisions and by expanding the licensees subject to these criminal provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 583 (SB 658) Escutia. Insurance.

Existing law provides for regulation of insurers by the Insurance Commissioner and requires that regulations adopted by the commissioner take into consideration settlement practices by classes of insurers. Existing law establishes a standard form of fire insurance policy for this state. Existing law prohibits a person from engaging in specified unfair methods of competition and deceptive acts or practices in the business of insurance.

This bill would require an insurer to provide certain insureds with information relating to unfair methods of competition and deceptive acts or practices in the business of insurance in its initial response to a claim. The bill would modify the standard form of fire insurance policy for this state relative to the obligations of the insured and insurer and to appraisals, adjusters, and loss requirements for a policy originated or renewed on and after January 1, 2002.

The bill would also require that all conditions applicable to loss requirements, appraisals, and adjusters contained in standard form fire insurance policies apply to residential property insurance policies, policies providing coverage for loss or damage caused by earthquake, and basic residential earthquake insurance policies that are originated or renewed on and after January 1, 2002.

The bill would make other related changes.

Ch. 584 (SB 732) Ortiz. Toxic mold.

Existing law provides the State Department of Health Services with various powers to enforce its regulations, to promulgate regulations to protect the public health, and to enjoin and abate nuisances dangerous to public health. The department is vested with the power to perform studies, evaluate existing projects, disseminate information, and provide training programs to enforce regulations related to public health.

This bill would enact the Toxic Mold Protection Act of 2001. The bill would require the department to convene a task force comprised of various individuals including, but not limited to, health officers, health and medical experts, mold abatement experts, representatives of government-sponsored enterprises, representatives from school districts or county offices of education, representatives of employees and representatives of employers, and affected consumers and affected industries including, residential, commercial, and industrial tenants, proprietors, managers or landlords, insurers, and builders, to advise the department on the development of permissible exposure limits to mold, standards for assessment of molds in indoor environments as well as alternative standards for hospitals, child care facilities, and nursing homes, standards for identification, and remediation of mold.

This bill would require the department to consider the feasibility of adopting permissible exposure limits to molds in indoor environments. If it is determined to be feasible, the department would be required to adopt, in consultation with the task force, permissible exposure limits to mold for indoor environments that avoid adverse health effects. The department would be required to report its progress on developing the permissible exposure limits for molds by July 1, 2003.

This bill would require that, in the process of adopting the permissible exposure limits, the department would be required to conduct studies, consider specific delineated criteria, and consult with the task force to arrive at both permissible exposure limits to mold to avoid adverse effects on health on the general public and alternative permissible exposure limits to avoid adverse health effects for hospitals, child care facilities, and nursing homes, whose primary business is to serve members of a subgroup that is a meaningful portion of the

general population. This bill would also require the department, in consultation with the task force, to develop and adopt guidelines for the identification and the remediation of toxic molds.

This bill would require that, after the adoption of permissible exposure limits to molds, the department review and revise the exposure limits at least once every 5 years and consider any new technological or treatment techniques or new scientific evidence that indicates that molds may present a different health risk than was previously determined.

This bill would also require the department to develop and adopt standards for the assessment of the health threat posed by the presence of molds, both visible and invisible or hidden, in indoor environments. The department would be required to consider specific delineated criteria in developing the assessment standard including the balancing of the protection of public health with technological and economic feasibility. The department would also be authorized to adopt alternative assessment standards for hospitals, child care facilities, and nursing homes. The department would be required to report its progress on developing the assessment standards for molds by July 1, 2003.

After the adoption of mold assessment standards, the department would review and revise the exposure limits at least once every 5 years and consider any new technological or treatment techniques or new scientific evidence that indicates that molds may present a different health risk than was previously determined.

The bill would provide for specific protocol to allow the public to be involved in the process to determine permissible exposure limits to mold, guidelines for identification and remediation of mold, and the guidelines for the assessment of molds.

This bill would require the department to develop public education materials and resources to inform the public about the health effects of molds, methods of prevention, methods of identification and remediation of mold growth, and contact information to organizations or governmental entities to assist public concerns.

This bill would, except under specified circumstances, also require that any person who sells, transfers, or rents residential, commercial, or industrial real property or a public entity that owns, leases, or operates a building who knows, or in specified instances has reasonable cause to believe, that mold is present that affects the unit or building, and the mold exceeds the permissible exposure limits to molds, would be required to provide a written disclosure to potential buyers, prospective tenants, renters, landlords, or occupants of the mold conditions. However, this bill would not require a landlord, owner, seller, or transferor to conduct air or surface tests to determine whether the presence of molds exceeds the permissible exposure limits or for mold remediation.

These disclosure duties and requirements would not apply until the January 1 or July 1 that occurs at least 6 months after the department adopts the requisite standards, and guidelines, as provided in the bill.

This bill would authorize the enforcement of all conditions of this bill, including the disclosure provisions, by designated enforcement officers.

The implementation of this bill would depend on the extent to which the department determines funds are available for its implementation.

Ch. 585 (SB 837) Scott. Teacher credentialing: emergency permits.

Existing law authorizes the Commission on Teacher Credentialing to issue or renew emergency teaching or specialist permits in accordance with regulations adopted by the Commission on Teacher Credentialing and provided that certain conditions are met, including that the school district made a diligent search for, but is unable to recruit, a sufficient number of certificated teachers.

This bill would define the requirement that a school district make a diligent search for certificated teachers by listing specific requirements.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 586 (SB 955) Alpert. Education: charter schools.

(1) Existing law requires a charter school to offer the same number of minutes of instruction per year as do noncharter schools, maintain written attendance records, and certify that its pupils participate in the state testing programs.

This bill would make these requirements a condition of the apportionment of state funds and would require a reduction in apportionment caused by an exception to these requirements to be proportional to the magnitude of the exception that caused the reduction.

(2) Existing law requires the Superintendent of Public Instruction annually to compute a categorical block grant amount for each charter school and includes the Public School Accountability Act of 1999 in the categorical programs upon which the block grant amount is computed.

This bill would exclude that categorical program from the above computation.

(3) Existing law requires a local educational agency that sponsors a charter school annually to transfer to each of its charter schools a prescribed amount of funding in lieu of funding available through property taxes.

This bill would exempt from this requirement funding for pupils who reside in, and are otherwise eligible to attend a school in, a basic aid school district, but who attend a charter school in a nonbasic aid school district. With regard to these pupils, the bill would require the sponsoring basic aid school district to transfer to the charter school an amount of funds equivalent to the revenue limit earned through average daily attendance by the charter school for each pupil's attendance, not to exceed the average property tax share per unit of average daily attendance for pupils residing and attending in the basic aid school district.

The bill would prohibit the Superintendent of Public Instruction from apportioning funds for attendance of a pupil in a charter school of a nonbasic aid school district who resides in and is otherwise eligible to attend school in a basic aid school district unless the amount transferred by the basic aid school district to the charter school is less than the revenue limit earned by the charter school, in which case the Superintendent of Public Instruction is required to apportion the difference to the charter school from state funds.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 587 (AB 46) Washington. Enterprise zones.

The Enterprise Zone Act provides for the designation of enterprise zones by the Technology, Trade, and Commerce Agency, according to specified criteria, and pursuant to which certain entities may receive regulatory, tax, and other incentives for private investment and employment. The act authorizes the designation of not more than 39 enterprise zones by the agency upon that agency's approval of applications from local jurisdictions.

This bill would authorize the designation of an additional 3 enterprise zones by the agency.

Ch. 588 (AB 242) Thomson. Wildlife conservation: oak woodlands.

The existing Wildlife Conservation Law of 1947 establishes the Wildlife Conservation Board, and requires the board, among other things, to determine the areas in the state that are most essential and suitable for wildlife production and preservation, as prescribed.

This bill would enact the Oak Woodlands Conservation Act to provide funding for the conservation and protection of California's oak woodlands. The bill would create the Oak Woodlands Conservation Fund in the State Treasury, and would authorize the expenditure of moneys in the fund, upon appropriation by the Legislature, for purposes of the act. The bill would require the board to administer the fund, as prescribed, and would provide that moneys in the fund shall be available to local government entities, park and open-space districts, resource conservation districts, private landowners, and nonprofit organizations for implementation and administration of the act, as provided.

The bill would require each city or county planning department that receives a grant for the purposes of the act to report to the city council or board of supervisors of the county, as appropriate, on the uses of those funds within one year from the date the grant is received.

The existing Safe Neighborhood Parks, Clean Water, Clean Air, and Coastal Protection Bond Act of 2000 (the Villaraigosa-Keeley Act) provides that not less than \$5,000,000 of the proceeds of bonds issued under that act be allocated, upon appropriation by the Legislature, for the preservation of oak woodlands.

This bill would provide for the transfer of not less than \$5,000,000 and not more than \$8,000,000, as determined by the Wildlife Conservation Board, to the Oak Woodlands Conservation Fund to be used for the purposes of the bill.

Ch. 589 (AB 262) Correa. Workers' compensation.

Existing law provides for the payment of death benefits to the dependents of an injured employee who has died. Existing law provides that in the case of totally dependent children, the death benefits are payable until the youngest child attains age 18. Existing law exempts local safety members and patrol members, as defined, from a specified limitation on the payment of death benefits with respect to an employee who is an active member of the Public Employees' Retirement System.

This bill would provide for the payment of death benefits in the case of a totally dependent child of a local safety member or a patrol member, as defined, if the member was killed in the line of duty before January 1, 1990, and the child is otherwise entitled to the benefits. The bill would also provide that the exemption for local safety members and patrol members from the limitation on the payment of death benefits would apply retroactively.

Ch. 590 (AB 331) Goldberg. 2002 Recycled Water Task Force.

Under existing law, the Department of Water Resources is among the principal state agencies with primary authority over water. Existing law regulates the use of recycled water.

This bill would require the department to convene the 2002 Recycled Water Task Force with specified membership to advise the department in investigating the opportunities for using recycled water in industrial and commercial applications and in identifying impediments and constraints to increasing the industrial and commercial use of recycled water, and would require a report to the Legislature with recommendations on specified topics not later than July 1, 2003. The bill would require the department to carry out these duties only to the extent that certain funds are made available for that purpose.

Ch. 591 (AB 699) Canciamilla. Instructional materials.

Existing law provides for a program for the adoption of lists of instructional materials, makes certain requirements relating to the publishers and manufacturers of instructional materials, establishes the State Instructional Materials Fund for the purposes of providing funds for the acquisition of instructional materials, sets forth local order procedures, and sets forth other requirements relating to instructional materials. Existing law requires the Instructional Materials Program to sunset on June 30, 2001.

This bill would reactivate the Instructional Materials Program commencing January 1, 2002, and would sunset the program June 30, 2006, and would provide that funding for that program in the 2002–03, 2003–04, 2004–05, and 2005–06 fiscal years shall be contingent upon funding in the annual Budget Act. The bill would require publishers to submit standards maps to local districts prior to purchase for the purpose of allowing districts to determine the extent to which instructional materials are aligned to the content standards, as specified. The bill would require the maps to be filled out using a standard form created and approved by the State Board of Education.

Ch. 592 (AB 984) Papan. Sales and use taxes: exemptions: sales and leasebacks of public passenger transportation vehicles.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax, including an exemption for sales and leasebacks of passenger transportation vehicles to the Department of Transportation.

This bill would, until January 1, 2004, exempt specified sales and leasebacks of qualified equipment, as defined, used in the provision of public transportation services. This bill would also exempt purchases of leased or subleased qualified equipment purchased by a qualified person, as defined, at the end of the term of the lease or sublease.

This bill would require the Legislative Analyst, in consultation with the State Board of Equalization and the Franchise Tax Board, to conduct a study and submit a report to the Legislature on the impact of this exemption by January 1, 2003. This bill would require the report to include a recommendation as to whether the exemption should be extended beyond the January 1, 2004 sunset date.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 593 (AB 1160) Florez. Farmworker housing.

(1) Existing law, operative until January 1, 2006, requires that if a landlord increases rent in excess of 10% of the amount of the rent charged to a tenant annually, as specified, the landlord shall provide an additional 30-days' notice, for a total of 60 days, prior to the effective date of the increase, except as specified.

This bill would create an exception to the provisions described above when the increase in rent is caused by a change in a tenant's income or family composition as determined by a recertification required by statute or regulation.

(2) The existing Joe Serna, Jr. Farmworker Housing Grant Program requires the Department of Housing and Community Development to make grants from the Joe Serna, Jr. Farmworker Housing Grant Fund, a continuously appropriated fund, to local public entities and nonprofit corporations for the construction or rehabilitation of housing for agricultural employees and their families. Grants may also be made for the purchase of the land in connection with the housing and for the construction and rehabilitation of related support facilities necessary to the housing. A grantee, for purposes of the program, may include, at the request of the public entity or nonprofit corporation, an individual homeowner receiving direct payment of a grant for rehabilitation who occupies the assisted housing and participates in the rehabilitation.

This bill would authorize the department to make grants or issue loans, or both, to local public entities, nonprofit corporations, and prescribed limited partnerships for the construction or rehabilitation of housing for agricultural employees and their families. It would also authorize, upon the request of a grantee, the department to issue loans at no more than 3% simple interest, whereby the principal and accumulated interest becomes due and payable upon completion of the loan term. The bill would revise the definition of a grantee, as specified. By expanding the purposes for which moneys in a continuously appropriated fund may be expended, this bill would make an appropriation.

(3) Existing law authorizes the director of the department to contract with specified public and private entities to procure or construct housing or shelter, to obtain services for migratory agricultural workers in the fields of education and sanitation, and to obtain daycare services for the children of those workers.

This bill would require all moneys appropriated to the department for purposes of the above-described provisions, as well as all moneys received by the department from the

occupants of housing or shelter provided pursuant to these provisions, to be deposited within the Joe Serna, Jr. Farmworker Housing Grant Fund for the purposes of these provisions, thereby expanding the purposes for which moneys in a continuously appropriated fund may be expended.

(4) Existing law, the Budget Act of 2001, requires grant assistance provided pursuant to the existing Emergency Housing and Assistance Program to be used to establish new emergency shelter or transitional housing programs, among other things.

This bill would authorize this grant assistance to be used for capital development grants.

(5) This bill would incorporate additional changes to Section 50517.5 of the Health and Safety Code proposed by AB 807, to be operative if AB 807 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 594 (AB 1467) Kehoe. Housing.

(1) The State Housing Law authorizes a city, county, or city and county enforcement agency to issue an order or notice to repair a building to the owner if the building is maintained in a manner that violates any provisions of this law, the building standards published in the State Building Standards Code, or any other rule or regulation promulgated pursuant to the law, and the violations are so extensive and of a nature that the health and safety of the residents or the public are substantially endangered. Under the State Housing Law, if the owner does not correct the condition that caused the violation within a reasonable time after the issuance of a notice or order to repair by a court as part of a civil or criminal judgment against the owner, or in a specified stipulation to a judgment by the owner, a court may order the appointment of a receiver for a substandard building if certain conditions are met. A court may not appoint a person as a receiver unless he or she has demonstrated a capacity to develop and supervise a viable financial and construction plan for the satisfactory rehabilitation of the property.

This bill would revise these provisions by permitting a court to order the appointment of a nonprofit organization or community development corporation as a receiver for a substandard building.

The bill would also authorize, with court approval, a lien to be assessed and recorded against the property for any moneys owed to a receiver for services.

(2) Existing law requires the enforcement agency within the City of Los Angeles, with respect to vacant single-family dwellings, to institute any appropriate action or proceeding to prevent, restrain, correct, or abate the violation or nuisance after 30 days' notice to abate. It also requires this agency to give preference to the repair of a vacant single-family dwelling whenever it is economically feasible to do so without having to repair more than 50% of the dwelling, as determined by the agency.

This bill would extend the applicability of these provisions to the City of San Diego and would require the agency to institute any appropriate action or proceeding to prevent, restrain, correct, or abate the nuisance after 15 days' notice to abate.

(3) This bill would incorporate additional changes in Section 17980.7 of the Health and Safety Code proposed by AB 472, to be operative if AB 472 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 595 (AB 1596) Shelley. Limited liability partnerships: architecture.

Existing law provides for the formation of various types of legal entities, including limited liability partnerships and foreign limited liability partnerships. Existing law authorizes, until January 1, 2002, the formation of registered limited liability partnerships and foreign limited liability partnerships to engage in the practice of architecture.

This bill would extend until January 1, 2007, the authorization to form limited liability partnerships and foreign limited liability partnerships to engage in the practice of architecture.

Ch. 596 (AB 1618) Matthews. Engine fuels.

(1) Existing law defines, among other things, motor vehicle fuel, automotive spark-ignition engine fuel, and compression-ignition engine fuel for purposes of regulating the sale of petroleum products.

This bill additionally would provide a definition for “developmental engine fuel.”

(2) Existing law also requires the Department of Food and Agriculture to establish specifications for gasoline or automotive spark-ignition engine fuels, sets requirements for gasoline methanol blends or gasoline-motor oil blends, and prohibits sales of those regulated petroleum products unless labeled, as specified.

This bill would authorize the department to grant a variance from these specifications for developmental engine fuels under prescribed conditions. The bill also would authorize the department to withdraw a variance if the applicant does not adhere to the prescribed conditions.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 597 (AB 1706) Committee on Transportation. Transportation: corporations: state contracting.

(1) Existing law provides for public transit and streets and highways and funding for those purposes.

This bill would make technical corrections and delete obsolete provisions in existing law relating to public transit and streets and highways.

(2) Under the Moscone-Knox Professional Corporation Act, “professional services” is defined to include, among other things, services licensed, certificated, and registered under the Yacht and Ship Brokers Act.

This bill would make a needed correction in that definition.

(3) Existing law provides that a project subject to the jurisdiction of the Department of Boating and Waterways and governed by the Harbors and Navigation Code is subject to the State Contract Act.

This bill would correct a cross-reference in that provision and delete obsolete language.

(4) Existing law defines “transit” for purposes of provisions authorizing the formation of the Santa Cruz Metropolitan Transit District.

This bill would revise the definition to specifically include rapid transit.

(5) Existing law authorizes the California Transportation Commission to offer to exchange funds from the Traffic Congestion Relief Fund for regional surface transportation program and congestion mitigation and air quality program apportionments received as local assistance by regional transportation planning agencies. The Department of Transportation is required to repay to the fund all funds received as federal reimbursements for funds exchanged as they are received from the Federal Highway Administration.

This bill instead would require the department to repay from the State Highway Account in the State Transportation Fund to the Traffic Congestion Relief Fund all funds received as federal reimbursements, as they are received, for funds exchanged under the exchange program, except that the repayments are not required to be made more frequently than on a quarterly basis.

(6) Existing law requires the California Transportation Commission to relinquish to any city or county any portion of any state highway within the city or county that has been deleted from the state highway system by legislative enactment. Existing law authorizes the relinquishment to the City of Downey of the portion of Route 19 located between Gardendale Street and Telegraph Boulevard, upon terms and conditions the commission finds to be in the best interests of the state.

This bill, instead, would authorize the relinquishment to the City of Downey of the portion of Route 19 located between Century Boulevard and Telegraph Road within that city, upon terms and conditions the commission finds to be in the best interests of the state and pursuant to the terms of a cooperative agreement between the city and the Department of

Transportation. The bill would similarly authorize the relinquishment to the City of Bellflower of the portion of Route 19 located between the southerly city limit of the City of Bellflower near Rose Avenue and Foster Road within that city. Each relinquishment would become effective immediately following the county recorder's recordation of the relinquishment resolution containing the commission's approval of the terms and conditions of the relinquishment.

(7) The bill would require the department, in consultation with the Office of Planning and Research, to conduct a statewide rail transportation assessment, that includes both a passenger and a freight rail systems portion. The bill would require, on or before October 1, 2002, the department to submit to the Legislature a report that includes, among other things, an estimate and documentation of statewide unfunded capital and operating needs over the next 10 years for each rail transportation agency.

(8) This bill would incorporate changes to Section 182.7 of the Streets and Highways Code proposed to be made by AB 1705 that would become operative if both bills are enacted and this bill is enacted after AB 1705.

Ch. 598 (AB 1725) Reyes. School board members.

Under existing law, the governing board of any school district is authorized to initiate and carry on any program, activity, or otherwise act in any manner that is not in conflict with, or inconsistent with, or preempted by, any law, and that is not in conflict with the purposes for which school districts are established.

This bill requires a school board to give official notice at a school board meeting if a public school within the district that has elected to be accredited by the Western Association of Schools and Colleges or any other chartered accrediting agency loses its accreditation status. The bill would require the school district, if it loses its accreditation status, to notify each parent or guardian of the pupils in that school, in writing, that the school has lost its accreditation status and would prescribe related matters, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 599 (SB 4) Johannessen. Veterans' Home of California.

Existing law establishes homes for veterans in several cities and authorizes the construction of other homes in specified locations if designated conditions are met. Existing law, in effect until January 1, 2002, establishes the Governor's Commission on Veterans Homes to advise the Governor and the Legislature on the establishment of veterans homes in California, including possible sites for the homes.

This bill would extend the operation of the commission until January 1, 2003, and would specifically include Shasta County, the Central Valley, and Los Angeles County within those possible sites.

The bill would incorporate changes made by AB 494 that would become operative if both bills are enacted and this bill is enacted after AB 494.

Ch. 600 (SB 10) Soto. Highways: Safe Routes to School construction program.

(1) Existing federal law contains appropriations for a number of programs related to projects for the improvement of highway safety and the reduction of traffic congestion,

including projects for bicycles and pedestrian safety and traffic calming measures in high-hazard locations. Existing state law authorizes certain state and local entities to secure and expend the federal funds for these purposes. Existing state law provides for the repeal of these provisions on January 1, 2002.

This bill would change the January 1, 2002, repeal date to January 1, 2005, after which time the federal transportation funds would be received by the state to be spent for the purposes described above except for projects for bicycle and pedestrian safety and traffic calming measures in high-hazard locations.

(2) Existing law requires the Department of Transportation, in consultation with the Department of the California Highway Patrol, to establish and administer a "Safe Routes to School" construction program pursuant to authority granted under specified federal law and to use federal transportation funds for construction of bicycle and pedestrian safety and traffic calming projects, and requires the department to make grants available to local governmental agencies under the program based on the results of a statewide competition that requires submission of proposals for funding and rates those proposals on specified factors.

These provisions would remain in effect only until January 1, 2002, and as of that date are repealed.

This bill would change the January 1, 2002, repeal date to January 1, 2005, thereby extending the program, would require the department to undertake a study regarding the program, would require the department to report the results of that study to the Legislature on or before December 31, 2003, and would require the department to provide an annual report to the Legislature listing and describing projects funded under the above.

Ch. 601 (SB 62) Morrow. Railroad crossings: automated warning devices.

(1) Under existing law, the Public Utilities Commission determines and prescribes highway-rail crossings and is authorized on an application-by-application basis to supervise the operation of pilot highway-rail crossing projects to evaluate proposed crossing warning devices or new technology and to mitigate train horn noise without compromising the safety of the public, in at least the communities of Roseville and Lathrop.

This bill would authorize the commission to authorize additional pilot highway-rail crossing projects in the Cities of Fremont and Newark.

This bill would incorporate additional changes in Section 1202 of the Public Utilities Code proposed by AB 1249, that would become operative only if AB 1249 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

(2) Existing law authorizes the Public Utilities Commission to authorize on an application-by-application basis and supervise the operation of a pilot project to evaluate proposed crossing warning devices or new technology and authorizes automatic audible warning devices that sound automatically when an approaching train is a specified distance from the place where the railroad crosses any street, road, or highway.

This bill would authorize audible warning devices that sound automatically for a specified amount of time before the approaching train crosses a street, road, or highway.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 602 (SB 351) Ortiz. Public health: drinking water: hexavalent chromium standard.

Existing law requires the department of health services to be responsible for ensuring that all public water systems are operated in compliance with both federal and state law, and the department is directed to enforce the law for all public water systems.

Existing law requires the department to determine the levels of hexavalent chromium (chromium-6) in the drinking water which is supplied by the public water systems in specified locations. The Office of Environmental Health Hazard Assessment is also required

to assess the exposures risks to the public due to the levels of hexavalent chromium determined.

This bill would require the department to adopt a primary drinking water standard for hexavalent chromium. The standard must be adopted by January 1, 2004, and a report on the progress of developing the standard must be provided to the Legislature by January 1, 2003.

Ch. 603 (SB 353) Alpert. State real property: Department of General Services: San Diego.

(1) Existing law authorizes the Director of General Services to enter into one or more agreements to acquire, construct, purchase, lease, lease-purchase, lease-purchase finance, or lease with an option to purchase, with an initial option purchase price that exceeds \$2,000,000, for the purpose of providing approximately 350,000 net usable square feet in downtown San Diego and approximately 362,100 net usable square feet in a suburban location in the San Diego region, of office and related space and parking to consolidate the operations of state agencies in and around downtown San Diego and to consolidate the operations of state agencies in the surrounding suburban area into one suburban location pursuant to specified conditions. The authorized cost for each facility may not exceed \$45,000,000. Existing law also authorizes the State Public Works Board to issue revenue bonds, negotiable notes, or negotiable bond anticipation notes to finance the acquisition of these facilities.

This bill would delete the provisions regarding the downtown facility and the consolidation of operations, and would instead authorize the Director of General Services to enter into a joint powers agreement, as specified, with the City of San Diego in connection with the development of approximately 241,000 net usable square feet of new state-owned office space and related facilities at a designated location in the City of San Diego, and would provide that the authorized costs of facilities, as specified, may not exceed \$81,000,000.

The bill would authorize the director to enter into an agreement with the joint powers authority to sell bonds and to use and expend funds and provide for other financing in connection with the development, and would authorize the joint powers authority to obtain interim financing from, among other sources, a specified General Fund loan appropriated to the Director of Finance for these purposes and from the Pooled Money Investment Account, a continuously appropriated fund. If the bonds authorized by the project are not sold, the bill would authorize the Department of General Services to repay the loans from available funds. It would continuously appropriate funds derived from the financing or refinancing of the facilities to the joint powers authority for this purpose.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 604 (SB 463) Perata. Drinking water standards: arsenic.

Existing law, commonly referred to as the California Safe Drinking Water Act, is administered by the State Department of Health Services and, among other things, requires the department to establish recommended public health levels for contaminants in drinking water.

This bill would require the department to commence the process of revising the existing primary drinking water standard for arsenic and adopt a revised standard for arsenic no later than June 30, 2004.

This bill would require the Office of Environmental Health Hazard Assessment to place a priority on the development of a public health goal for arsenic in drinking water, sufficient to allow it to adopt the goal no later than December 31, 2002.

This bill would require the Secretary of Environmental Protection, on or before December 31, 2002, to develop language, in accordance with specified requirements, regarding the health effects associated with the ingestion of arsenic in drinking water for inclusion in consumer confidence reports, and would require this language, on and after July 1, 2003, to

be included in the consumer confidence reports mailed or delivered to customers by specified water systems.

Ch. 605 (SB 470) Sher. Hazardous waste control: management: used oil.

(1) Existing hazardous waste control laws provide for a state hazardous waste program in lieu of the federal program pursuant to specified provisions of the federal Resource Conservation and Recovery Act of 1976 (RCRA). Existing law requires the Department of Toxic Substances Control to conform its standards and regulations with the federal regulations adopted pursuant to RCRA and provides that those federal regulations shall be deemed to be regulations of the department, except as specified. The term “federal act” is defined in the hazardous waste control law to mean RCRA.

This bill would make technical changes in those provisions to utilize that definition and would make other nonsubstantive technical changes.

(2) Existing law defines the term “disclosure statement,” for purposes of the hazardous waste control law, as including, in lieu of a statement containing specified information, a copy of specified periodic reports filed with the Securities and Exchange Commission.

This bill would revise the definition of “disclosure statement” for purposes of that law regarding the information required to be included in the statement.

(3) Existing law defines the term “intermediate manufacturing process stream” for purposes of those laws. A violation of the hazardous waste control laws is a crime.

The bill would revise the definition of “intermediate manufacturing process stream” to require the person producing the material to make an additional demonstration and would specify when a material is not included in that definition.

(4) Existing law exempts debris contaminated only with petroleum from the hazardous waste control laws, if the debris meets specified conditions.

This bill would instead exempt debris contaminated with crude oil from regulation and would impose additional requirements as a condition for this exemption.

(5) Under existing law, the department is authorized to exempt, until January 1, 2002, by regulation, a hazardous waste management activity from the requirements of the hazardous waste control law.

This bill would extend that authority until January 1, 2003, but would authorize the department, on and after January 1, 2002, to exempt a hazardous waste pursuant to this authority only if the regulation governs a specified type of hazardous waste, identifies the hazardous waste as a universal waste, and amends specified existing regulations of the department.

(6) Existing law requires the Department of Toxic Substances Control to deny, suspend, or revoke the registration of any hazardous waste transporter pursuant to specified formal administrative adjudication procedures, if necessary, to prevent or mitigate an imminent and substantial danger to human health and safety or to the environment, and exempts this denial, suspension, or revocation from provisions generally authorizing the department to temporarily suspend a permit, registration, or certificate, prior to a hearing, under specified circumstances.

The bill would repeal the provision requiring the department to deny, suspend, or revoke the registration of a hazardous waste transporter pursuant to those formal adjudication procedures.

(7) Existing law exempts a person who initially collects certain hazardous waste at a remote site and transports the hazardous waste to a consolidation site from complying with the requirements concerning possession of a manifest and registration as a hazardous waste transporter, if the person complies with specified conditions, including if not more than 275 gallons or 2,500 pounds, whichever is greater, of hazardous waste is transported in any shipment, except that a generator who is a public utility or municipal utility district may transport up to 500 gallons of liquid hazardous waste in a shipment.

This bill would instead authorize a generator who is a public utility, local publicly owned utility, or municipal utility district to transport up to 1,600 gallons of hazardous wastewater from the dewatering of one or more utility vaults or up to 500 gallons of any other liquid hazardous waste in a single shipment under that exemption, and would make conforming changes.

(8) Existing law requires hazardous waste facilities to operate under hazardous waste facilities permits issued by the department. The existing Wright-Polanco-Lempert Hazardous Waste Treatment Permit Reform Act of 1992 requires the department to adopt regulations for series A, B, and C standardized permits for offsite non-RCRA hazardous waste treatment or storage facilities.

This bill would require any application to use and operate a hazardous waste facility, including an applicant for a series C standardized permit, to include a specified disclosure statement, but would exempt from those requirements a person operating pursuant to a permit-by-rule, conditional authorization, or conditional exemption.

(9) Existing law provides that facilities engaging in treating solvents or thermal destruction are not eligible for a standardized permit but excludes, for purposes of this requirement, the incidental destruction of small amounts of nonmetal constituents in a specified thermal treatment unit.

This bill would instead provide that, for purposes of eligibility for a standardized permit, treating solvents and thermal destruction do not include the destruction of nonmetal constituents in a specified thermal treatment unit, if the unit is in compliance with the applicable requirements regulating air pollution.

(10) Existing law requires used oil to be managed as a hazardous waste unless the used oil meets specified requirements. Existing law exempts a person who receives used oil from consumers or other used oil generators from the hazardous waste facilities permit requirements with regard to the location where the used oil is received, and from the hazardous waste transporter registration and manifesting requirements, if specified conditions are met, including if each shipment of used oil does not exceed 5 gallons and the contents of any single container does not exceed 5 gallons. A violation of the laws regulating used oil is a crime.

This bill would increase the amount of used oil that is subject to that exemption to 55 gallons for each shipment and would instead require that the capacity of any single container not exceed 55 gallons. The bill would additionally require a person transporting the used oil to contact the destination location regarding the acceptance of used oil and would specify that these requirements do not prevent a person who receives used oil for transport from imposing smaller volume or container size limits.

The bill would exclude, from the provisions regulating the management of used oil, and would exclude from classification as a waste under the hazardous waste control laws, oil that is being managed by an automated onboard oil management system, as defined, that is applied to a mining vehicle with a gross vehicle weight capacity in excess of 200,000 pounds or a locomotive, under specified conditions, and if the State Air Resources Board, after consultation with the department, approves the system, in accordance with specified requirements, except as specified.

(11) The bill would make conforming and related changes.

(12) Because a violation of the bill's requirements would be a crime, pursuant to other provisions of law, the bill would impose a state-mandated local program.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(14) This bill would declare that it is to take effect immediately as an urgency statute but would delay the operative date of the changes made by the act to January 1, 2002, except for the exclusion from used oil regulations for automated onboard oil management systems.

Ch. 606 (SB 609) Costa. Water Omnibus Act of 2001.

(1) The County Service Area Law authorizes the formation of a county service area to provide, among other services, miscellaneous extended services, including water service.

This bill would authorize the board of supervisors of any county to contract with any state agency to finance any improvement relating to the provision of water service within a county service area that is established to provide that service.

(2) The County Sanitation District Act authorizes a county sanitation district to acquire, construct, operate, and maintain waterworks, conduits, reservoirs, storage sites, and other waterworks and facilities for the protection, treatment, storage, and distribution of a water supply for domestic and other uses.

This bill would authorize a county sanitation district to contract with any state agency to finance any district improvement authorized by these provisions.

(3) The existing Cortese-Knox Local Government Reorganization Act of 1985 generally provides for the formation and determination of local district boundaries.

This bill, notwithstanding prescribed provisions of that act, would set forth a procedure with respect to a proposal to dissolve the Newhall County Water District.

(4) Existing law establishes the Safe Drinking Water State Revolving Fund, administered by the State Department of Health Services, and continuously appropriates the money in the fund to that department to provide grants or revolving fund loans for the design and construction of projects for public water systems that will enable suppliers to meet safe drinking water standards. Existing law provides that planning and preliminary engineering studies, project design, and construction costs may be funded, in the case of public agencies, by grants or a combination of grants and loans. Existing law defines "public agency" for purposes of these and other provisions relating to the fund.

This bill would revise the definition of public agency for those purposes.

(5) The Resort Improvement District Law authorizes the formation of districts to acquire, construct, maintain, and operate property, works, and facilities for various purposes related to providing extended government services for residents of recreational resorts.

This bill would authorize the Grizzly Lake Resort Improvement District, the Napa-Berryessa Resort Improvement District, and the Lake Berryessa Resort Improvement District to contract with any state agency to finance any authorized district improvement related to the provision of water for human consumption.

(6) The Public Utility District Act authorizes a district formed pursuant to its provisions to acquire, construct, own, operate, control, or use, works for supplying its inhabitants with various services, including water. Under the act, the district may borrow money and incur or assume indebtedness up to 20% of the assessed valuation of all real and personal property within the district. Under the act, that amount may be exceeded where the district finances waterworks or sewage disposal facilities by means of a revenue bond issue or a general obligation bond issue and the district pledges all or any part of revenues received from the facilities over a period of time.

This bill would authorize the district to contract with any state agency to finance any authorized district improvement that is related to the provision of water for human consumption. The bill would also authorize the district to exceed the specified amount of indebtedness where the district finances waterworks or sewage disposal facilities by contracting with a state agency to finance any authorized district improvement related to the provision of water for human consumption.

(7) Existing law, for the purposes of the Corcoran Irrigation District, provides that every owner of real property in the district, or his or her legal representative, may vote at district elections. Existing law generally requires each director on the board of the district to be a voter and a landowner in the district and a resident of the division that he or she represents, as prescribed.

This bill would provide with respect to that district that any voter or voter's representative may be a member of the district board as long as the voter is a landowner in the division that

he or she represents, unless divisions have been abolished, and the voter resides within the boundaries of the district or the City of Corcoran. The bill would apply these requirements to board members who are elected, or appointed to fill a vacancy, on or after the effective date of this act.

(8) Existing law, with certain exceptions, requires the Department of Water Resources to submit proposed regulations to the California Water Commission for its approval. Existing law prescribes certain state funding requirements for specified flood control projects authorized by the Legislature on or after January 1, 2002, and small flood management projects for which the department makes findings on or after that date.

This bill would provide that provision relating to the adoption of regulations by the department does not apply to the adoption of regulations for the purpose of implementing those described funding requirements.

(9) The Irrigation District Law authorizes districts formed pursuant to its provisions to control, distribute, store, spread, sink, treat, purify, recapture, and salvage any water including sewage waters for the beneficial use or uses of the district or its inhabitants.

This bill would authorize the district to contract with any state agency to finance any authorized district improvement that is related to the provision of water for human consumption.

(10) The County Water District Law authorizes districts formed pursuant to its provisions to store, conserve, appropriate, and acquire water and water rights for any useful purpose.

This bill would authorize the district to contract with any state agency to finance any authorized district improvement that is related to the provision of water for human consumption.

(11) The Water Conservation District Law of 1931 authorizes districts formed pursuant to its provisions to cooperate and contract with one or more other districts or public corporations or agencies whenever desirable or advantageous to the district.

This bill would authorize the district to contract with any state agency to finance any authorized district improvement that is related to the provision of water for human consumption.

(12) Existing law provides that upon appropriation by the Legislature to the Department of Water Resources, \$3,000,000 in the Water and Watershed Education Subaccount of the Watershed Protection Account may be used by the department for allocation to the California State University, Fresno for purposes of establishing and furthering the purposes of the San Joaquin Valley Water Institute at that campus.

This bill would instead provide that the money may be allocated for the purposes of establishing and furthering the purposes of the California Water Institute at that campus.

(13) Under existing law, a court may impose a physical solution that allocates water among competing water users.

This bill would declare that entry into the stipulation in the City of Barstow v. Mojave Water Agency does not constitute a waiver of any water right or lawful priority to water held by any stipulating party as against any person not a party to the stipulation.

(14) The California Safe Drinking Water Bond Law of 1988 permits bond proceeds in the California Safe Drinking Water Fund to be used for a grant program with grants provided to prescribed entities, subject to specific approval of the Legislature.

This bill would make an appropriation by authorizing the Department of Water Resources to make grants from the fund to specified entities for the purposes of financing domestic water system improvement projects to meet state and federal drinking water standards.

(15) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 607 (SB 722) Figueroa. Security businesses.

The Private Security Services Act provides for the licensure and regulation by the Department of Consumer Affairs and its Bureau of Security and Investigative Services of persons engaged in the provision of private security services and requires, among other

matters, that a person entering the employ of a private security service take a 2-hour training class regarding the power to arrest. The act requires the department to make available a guidebook as a standard for teaching this course.

This bill would change the length of the power to arrest training class required by the act to 3 hours and would require that the majority of the courses be taught by verbal instruction. The bill would require a private patrol operator to provide a copy of the guidebook prepared by the department to each person he or she intends to employ or currently employs as a security guard.

Existing law provides for the payment of various fees and the assessment of fines for locksmith licensees, private investigators, private security services, private patrol operators, and alarm companies. Existing law requires private patrol operator licensees to meet various operating requirements.

This bill would increase the amounts of specified fees and fines. The bill would impose fines on private patrol operator licensees for violations of certain operating requirements. The bill would also delete specified provisions regarding agency regulation of fees and fines.

Because this bill would increase fee and fine revenue deposited into the Private Security Services Fund, a continuously appropriated fund, the bill would make an appropriation.

Ch. 608 (SB 784) Torlakson. Balancing jobs and growth.

The existing Jobs-Housing Balance Improvement Program requires the Department of Housing and Community Development to make grants to eligible local agencies from funds appropriated in the Budget Act of 2000 for assistance in attracting new business and jobs in 'housing rich' communities that lack an adequate employment base to match the amount and cost of housing in those communities, for the creation of economic development strike teams to target and coordinate outreach to employees who may choose to locate within the community, and for specified capital outlay projects designed to encourage the construction of housing in urbanized areas. Existing law requires, no later than December 31, 2005, the department to provide a final report regarding the achievements and expenditures by local government through the program.

This bill would provide that specified funds transferred and appropriated pursuant to the Budget Act of 2000 and the Budget Act of 2001, as well as funds appropriated thereafter for these purposes are to be used to award incentive grants to cities, counties, and city and counties to be used for any project, service, or other local need determined by the city, county, or city and county to be in the community's best interest. The bill would authorize the department to operate the program through at least one annual allocation. The bill would require the final report to be issued within 12 months following the final allocation of funds.

Ch. 609 (SB 882) O'Connell. Property taxation: welfare exemption.

Existing property tax law establishes, pursuant to the authorization of the California Constitution, a welfare exemption under which property is exempt from taxation if, among other things, that property is used exclusively for religious, hospital, scientific, or charitable purposes and is owned and operated by an entity, as provided, that is itself organized and operated for those purposes.

This bill would apply the welfare exemption to any otherwise taxable interest in real property that is leased for a term of 35 years or more by a charitable foundation, exempt from federal taxation, if, among other things, the real property is used exclusively by the lessee for operation as a public park of a uniquely governmental character, as specified, and the lessee foundation is, under the terms of the lease, to obtain fee ownership of the property on or before the end of the lease term.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

This bill would take effect immediately as a tax levy.

Ch. 610 (SB 951) Committee on Governmental Organization. State property.

(1) Existing law requires the Department of General Services to perform various functions and duties with respect to state property.

This bill would authorize the Director of General Services to sell, exchange, lease, or transfer specified parcels of state property. The bill would exempt the sale, exchange, lease, or transfer of the parcels from specified provisions of the California Environmental Quality Act. This bill would require that the net proceeds be deposited in the General Fund, as provided, and would require the reservation of mineral rights, as specified.

This bill would also rescind the authority of the director to sell other specified parcels of state property that are no longer considered surplus by the concerned state agencies. The bill would also authorize until July 1, 2004, the director to transfer a specified parcel of surplus state property to the City of Richmond.

(2) Existing law authorizes the Director of General Services, with the consent of the state agency concerned, to let for a period not to exceed 5 years any real or personal property that belongs to the state, if the director deems it to be in the best interest of the state.

This bill would, notwithstanding these provisions, require the director, with the consent of the Department of the Youth Authority, to lease a acre portion of the Lone Youth Authority Facility as designated by the Department of the Youth Authority, for a term not to exceed 30 years and at a specified rate, to the County of Amador on behalf of the Mother Lode Juvenile Facility Authority for use as a regional juvenile detention facility, subject to specified conditions.

(3) Existing law provides for the Alternative Protest Pilot Project in connection with state agency acquisition of goods and services, including the acquisition of information technology goods and services, and requires the Department of General Services to administer the project until December 31, 1999, or until the pilot project has been applied to at least 25 contracts, including at least 10 information technology contracts, whichever occurs later. Existing law also requires the department to make a report to the Legislature by July 31, 2000.

This bill would extend these provisions to December 31, 2005, and would reduce the pilot project's application from 10 information technology contracts to at least 5 major information technology acquisitions. The bill would also require that the department submit its report to the Legislature within 90 days after the termination of the pilot project.

Ch. 611 (SB 1031) Brulte. Education: California Indian Education Center Program.

(1) Existing law provides that the California Indian Education Center Program becomes inoperative on January 1, 2002.

This bill would extend the program until January 1, 2007. The bill would require each California Indian education center, as a condition of receipt of annual funding, to collect and report site evaluation data that measure prescribed items. The bill would require each center to submit an evaluation of its program to the State Department of Education on or before July 1, 2005, and would require the State Department of Education to report the consolidated results of the yearly evaluation data and self reviews, as well as recommendations for program improvement, to the Legislature on or before January 1, 2006.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 612 (SB 1054) Knight. Military base retention.

Existing law defines a single local base reuse entity for purposes of planning relating to military bases designated for closure. Under provisions known as the Military Base Reuse Authority Act, local agencies are authorized to form an authority to plan for the transition of bases from military to civilian use. Existing law also creates the California Defense Retention and Conversion Council and gives that agency and the Technology, Trade, and Commerce Agency prescribed duties relative to retaining military facilities within California.

This bill would define a single local base retention entity for purposes of retention planning relating to military bases.

Ch. 613 (SB 1184) Committee on Revenue and Taxation. Property taxation.

(1) The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975-76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. The California Constitution also excludes from the terms "purchased" and "change in ownership" the purchase or transfer of the principal residence of the transferor, or the purchase or transfer of the first \$1,000,000 of all other real property, in the case of a purchase or transfer between parents and their children, or grandparents and grandchildren as defined by the Legislature. Statutory law that implements this constitutional exclusion specifies various requirements and procedures.

This bill would, for purposes of those provisions, revise and recast signature and certification requirements, and clarify those requirements in the case in which the excluded requirements transfer involves multiple transferees.

(2) Existing property tax law permits persons over 55 years of age and persons who are severely and permanently disabled, as specified, to transfer, under certain conditions, the property tax base year value of their home to a replacement home in the same county, and if a county ordinance so providing has been adopted, to a replacement home in a different county.

This bill, would clarify, in the case of persons over 55 years of age and persons who are severely or permanently disabled, who are transferring the base year value of their home to a replacement home under circumstances where the original home has been substantially damaged or destroyed by a misfortune or calamity and the original home is not repaired or rebuilt, that the base year value of the original home is the full cash value as if the home were appraised immediately prior to the damage or destruction.

(3) Existing law, known as the California Land Conservation Act of 1965, or the Williamson Act, authorizes a city or county, by contract, to limit the uses of land to agricultural uses or as an agricultural preserve in exchange for reduced property taxes.

This bill would generally require an assessment of taxes, penalties or interest that accrue as a result of a compliance audit of records of a local assessor, conducted by, or on behalf of the Department of Conservation, on land values pursuant to the Williamson Act, to be made within 4 years after July 1 of the assessment year in which the property escaped taxation or was underassessed.

(4) Existing property tax law generally requires that an escape assessment be made within 4 years after July 1 of the assessment year in which the subject property escaped taxation or was underassessed, but specifies a 6-year limitations period for the making of an escape assessment that is subject to a statutory penalty for evasion or misrepresentation with respect to taxable personal property.

This bill would increase that 6-year limitations period to 8 years.

(5) Existing property tax law requires, where any tract of land is situated in 2 or more revenue districts, that the portion of the land in each district be separately assessed. Existing law also provides, as exceptions to that requirement, (a) that where the owner of 2 or more contiguous parcels comprising the multiple district tract is identical, and the full value of any

parcel is less than \$5,000, that parcel may for assessment purposes be combined with the contiguous parcel with the greatest assessed valuation, and (b) that where the multiple district tract, comprised of 2 or more contiguous parcels under common ownership, is being used for a single-family residence and constitutes 15,000 square feet or less, the smallest parcel therein may be combined with the largest contiguous parcel.

This bill would increase the thresholds for purposes of those exceptions from \$5,000 to \$25,000, and from 15,000 square feet to 45,000 square feet.

(6) Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 614 (SB 16) Figueroa. Peer review.

Existing law provides a procedure for the professional review of specified healing arts licentiates by a peer review body, defined as including, among other entities, a nonprofit hospital service plan. Under existing law, a peer review body is required to file with the agency having regulatory jurisdiction over the licentiate a report, designated as an "805" report, if the peer review body takes one of several specified actions against the licentiate. Existing law makes the failure to file this report punishable by a fine of not more than \$5,000, or if the failure is intentional, by a fine of not more than \$10,000.

This bill would delete a nonprofit hospital service plan from those entities included within the definition of a peer review body and would specify that disability insurers that contract with licentiates to provide services at alternative rates of payment are subject to the professional peer review process.

This bill would add to the specified actions that a peer review body is required to report, within a specified timeframe, in an 805 report to the relevant licensing agency the licentiate's withdrawal or abandonment of an initial or renewal application for staff privileges or membership after notice of an impending investigation or denial of the application for a medical disciplinary cause or reason. The bill would also increase the amount of the fine for the failure to file an 805 report to not more than \$50,000 per violation, except as specified, and to not more than \$100,000 if the failure is willful, as defined. The bill would specify that the willful failure to file an 805 report by a licensed healing arts practitioner may constitute unprofessional conduct and that a person who is alleged to have violated this requirement may assert any available legal defense. The bill would authorize the Medical Board of California, the Osteopathic Medical Board of California, and the Dental Board of California to audit, as specified, any peer review body to determine its compliance with its responsibilities to file 805 reports and to establish an electronic notification system of the filing of 805 reports.

This bill would additionally require the Medical Board of California to work with interested parties in the pursuit and establishment of a pilot program to provide specified health care professionals remedial training and education and would require the board to report its evaluation, findings, and recommendations regarding the implementation of this statewide program to the Legislature before April 1, 2003.

This bill would state the intent of the Legislature to provide for a comprehensive peer review study to be conducted by the Institute for Medical Quality that would, among other things, review and evaluate the existing peer review process in this state. The bill would require that the institute work with and be under the general oversight of the board's medical director in conducting the study and that the institute submit a written report regarding its findings and recommendations to the board and the Legislature by November 1, 2002.

This bill would also require the Division of Medical Quality of the Medical Board of California to report annually to the Legislature the total number of reports received pursuant to Section 805.

Ch. 615 (SB 26) Figueroa. Professions and vocations.

(1) Existing law provides for the Department of Consumer Affairs to regulate certain professional boards.

This bill would make additions, corrections, and deletions to the list of boards regulated by the department.

This bill would also revise licensing requirements relative to the practice of podiatric medicine.

(2) Existing law provides a procedure for the professional review of specified healing arts licentiates by a peer review body.

This bill would state the intent of the Legislature to provide for a comprehensive peer review study to be conducted by the Institute for Medical Quality that would, among other things, review and evaluate the existing peer review process in this state. The bill would require that the institute work with and be under the general oversight of the Medical Director of the Medical Board of California in conducting the study and that the institute submit a written report regarding its findings and recommendations to the board and the Legislature by November 1, 2002.

(3) Existing law requires an accusation filed against a licensed respiratory care practitioner to be filed within a specified time period, except under certain conditions.

This bill would provide for an extension of the time period to file the accusation if material evidence relevant to the determination of the accusation is unavailable due to a criminal investigation.

(4) Existing law requires the Department of Consumer Affairs to conduct a review of specific engineering branch titles and to report its findings and recommendations to the Legislature by September 1, 2001.

This bill would instead require the department to report to the Legislature by September 1, 2002.

(5) Existing law requiring the Contractors' State License Board to appoint a registrar of contractors becomes inoperative on July 1, 2001, and is repealed on January 1, 2002.

This bill would instead provide that the requirement becomes inoperative on July 1, 2003, and is repealed on January 1, 2004.

(6) Existing law imposes various requirements on court reporting schools, including, among other things, requiring the filing of a current school catalog with the Court Reporters Board of California.

This bill would prohibit a school from requiring more than one 10-minute qualifying examination for a student to be eligible to sit for the examination to be certified as a court reporter. The bill would require the board to submit various regulatory requirements by December 1, 2001, and in place by July 1, 2002. The bill would authorize the board to issue administrative citations or assess fines for the violation of the board's rules and regulations and would make an appropriation by increasing revenues deposited into the Court Reporters Fund which is a continuously appropriated fund.

(7) The Osteopathic Act, an initiative measure approved by the electors on June 2, 1913, provides for the regulation and licensing of osteopathic physicians and surgeons in this state by the Osteopathic Medical Board of California.

This bill would transfer, effective July 1, 2002, or earlier, as specified, the support of the board's budget, accounting, and personnel functions to the Department of Consumer Affairs.

(8) Existing law, the Dental Practice Act, establishes the Dental Board of California within the Department of Consumer Affairs for the purpose of licensing and regulating dental professionals and dental auxiliaries and authorizes the board to appoint an executive officer who exercises and performs specified powers and duties.

This bill would also require the department, in conjunction with the board and the Joint Legislative Sunset Review Committee, to review the scope of practice of dental auxiliaries and would require the department to report to the Legislature by September 1, 2002. The bill would also require the Director of Consumer Affairs to appoint a dental board enforcement program monitor by March 31, 2002, whose duties would include the monitoring and evaluation of the dental disciplinary system. The bill would require the monitor to report his or her findings to the department and to the Legislature, and would require the board to pay for the costs of the monitor.

Because the bill would result in the payment of the costs associated with the employment of the enforcement program monitor from the State Dentistry Fund, the bill would authorize the use of money from a continuously appropriated fund for a new purpose and thereby make an appropriation.

(9) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 616 (SB 852) Figueroa. Shorthand reporters.

(1) Existing law provides for the certification and regulation of shorthand reporters by the Court Reporters Board of California in the Department of Consumer Affairs, and provides for the regulation of shorthand reporting schools by the board.

This bill would authorize the board to administer the Transcript Reimbursement Fund.

(2) Existing law sets forth certain requirements for court reporting schools, including program requirements, recordkeeping requirements, disclosure requirements, and teacher qualification requirements.

This bill would make specified changes and additions to the requirements for court reporting schools. The bill also would require the Court Reporters Board to adopt regulations implementing certain requirements by September 1, 2002.

(3) Under existing law, the Court Reporters Board is authorized to grant provisional recognition to a new court reporting school, and may withdraw recognition for failure to comply with specified legal requirements. The board is required to conduct necessary inspections and investigations.

This bill would authorize the board to withdraw recognition from a school for failure to comply with any applicable law or regulation. The bill would also authorize the board to conduct unannounced site visits as part of its inspection duties.

(4) Under existing law, an applicant for a shorthand reporter certificate is required to satisfy certain requirements within the 5-year period immediately preceding the date of his or her application.

This bill would, effective January 1, 2004, change this time period to require, instead, that the applicant satisfy these requirements within the 3-year period immediately preceding the date of his or her application. The bill would also authorize the board to impose other disciplinary action in addition to the suspension or revocation of a certificate. The bill would require a certificate holder to report to the board any crime that he or she was convicted of committing.

(5) Because the bill would add to the existing reporting responsibilities of certificate holders and because a violation of any of the provisions regulating the practice of shorthand reporters is a misdemeanor, this bill would impose a state-mandated local program by creating new crimes.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) This bill would incorporate additional changes in Section 8027 of the Business and Professions Code, proposed by SB 26, to be operative only if SB 26 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 617 (AB 1616) Wright. Healing arts: disciplinary actions.

Existing law provides for disciplinary action to be taken against licensed health professionals, psychologists, marriage, family and child counselors, respiratory care practitioners, and clinical social workers, including revocation, suspension, limitation, or conditioning of a license, for certain conduct. A hearing to determine whether a license shall be revoked, suspended, limited, or conditioned is initiated by the filing of an accusation in an administrative adjudication action. The accusation is required to be filed within a certain time period, with specified exceptions.

This bill would establish a different time limit for an accusation alleging sexual misconduct by the licensee. The bill would also toll the limitations period (1) where material evidence necessary for prosecuting or determining whether a disciplinary action would be appropriate is unavailable to the board due to an ongoing criminal investigation and (2) in the case of an accusation against a licensed health professional, where the alleged act or omission involves a minor, until the minor reaches the age of majority.

Ch. 618 (AB 44) Wiggins. Disaster relief: earthquake.

The Personal Income Tax Law and the Bank and Corporation Tax Law provide for the carryover to specified taxable or income years of specified losses sustained as a result of various disasters occurring in California in an area determined by the President of the United States to warrant specified federal assistance, or proclaimed by the Governor to be in a state of emergency.

This bill would extend these provisions to losses sustained as a result of an earthquake occurring in September 2000, that was included in the Governor's proclamation of a state of emergency for the County of Napa.

This bill would contain legislative findings and declarations as to the statewide public purpose of this bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 619 (AB 61) Florez. Safe Drinking Water State Revolving Fund.

Existing law establishes the Safe Drinking Water State Revolving Fund, administered by the State Department of Health Services, and continuously appropriates the money in the fund to that department to provide grants or revolving fund loans for the design and construction of projects for public water systems that will enable suppliers to meet safe drinking water standards. Existing law provides that planning and preliminary engineering studies, project design, and construction costs may be funded, in the case of public agencies, by grants or a combination of grants and loans. Existing law authorizes the department to enter into contracts with applicants for grants and loans with specified terms and conditions, including the requirement that in the case of a grant, the public agency agrees to operate and maintain the water system for 20 years.

This bill would authorize planning and preliminary engineering studies, project design, and construction costs to be funded by grants or a combination of grants and loans in the case of private not-for-profit water companies. The bill would also require a private not-for-profit water company, upon entering into a contract with the department for a grant under these provisions, to agree to operate and maintain the water system for 20 years. By making these water companies eligible for those grants, the bill would make an appropriation.

Ch. 620 (AB 139) Florez. County Superintendent of Schools: fiscal duties.

Existing law requires the superintendent of schools of each county to perform prescribed duties, including, but not limited to, visiting and examining each school in his or her county.

This bill would, in addition, require that the superintendent of schools of each county annually present a report, as prescribed, regarding fiscal solvency of any district with a disapproved budget, qualified interim certification, or negative interim certification, or that has been determined at any time to be in a position of fiscal uncertainty, as specified.

Existing law authorizes the county superintendent to audit at any time and report, as prescribed, regarding the expenditures and internal controls of a school district.

This bill would, in addition, authorize a review or audit if the county superintendent has reason to believe that fraud, misappropriation of funds, or other illegal fiscal practices may have occurred that merit examination, as prescribed. The bill would make conforming changes.

Existing law requires the county superintendent of schools, among other things, to conduct a study of the financial and budgetary conditions of the school district, as necessary, to ensure that the district meets its financial obligations.

This bill would provide that the study of the financial and budgetary condition include, but not be limited to, a review of internal controls.

By establishing these additional requirements, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 621 (AB 201) Wright. Private postsecondary education: Bureau for Private Postsecondary and Vocational Education.

(1) The existing Private Postsecondary and Vocational Education Reform Act of 1989 generally sets minimum standards of instructional quality, ethical and business practices, health and safety, and fiscal responsibility for private postsecondary and vocational educational institutions, as defined. The act establishes the Bureau for Private Postsecondary and Vocational Education, which, among other things, is required to review and investigate all institutions, programs, and courses of instruction approved under the act.

The existing act sets forth standards applicable to every audit, review, statement, or financial report that the act requires to be prepared or filed.

This bill would require that any audit or financial report required to be prepared under the act contain a statement signed by the individual who has prepared the report stating that the institution has paid or has not paid to the bureau all amounts owed to the Student Tuition Recovery Fund under a prescribed provision of the act. The bill would provide that, if the institution is a corporation that is publicly traded on a national stock exchange, the submission of the corporation's annual report shall be deemed to comply with this requirement. The bill would also require an institution that has not paid all amounts owed to the bureau under this provision to report to the bureau within 30 days on its plan to become current in these payments.

(2) The act requires each institution approved to operate under its provisions to annually report prescribed data to the bureau and to provide prescribed information to its students.

This bill would add to the data required to be included in that annual report a statement indicating that the institution is current on its payments to the Student Tuition Recovery Fund. The bill would also require institutions to provide to their students prescribed data

relating to the purposes, operation, and eligibility requirements of the Student Tuition Recovery Fund.

(3) Under a portion of the act that is known as the Maxine Waters School Reform and Student Protection Act of 1989, an institution that violates those provisions in connection with an agreement for a course of instruction is required to refund all consideration paid by or on behalf of the student. Other prescribed provisions of the Private Postsecondary and Vocational Education Reform Act of 1989 also authorize the bringing of civil actions against institutions that are alleged to violate these provisions.

This bill would require a student who brings an action or asserts any claim in an existing action for recovery on behalf of a class of persons, or on behalf of the general public, under prescribed provisions of law, to notify the bureau of the existence of the lawsuit, the court in which the action is pending, the case number of the action, and the date of the filing of the action or of the assertion of the claim, within 30 days of the filing of the action or of the first assertion of the claim, whichever is later. The bill would also require the student to notify the court that he or she has notified the bureau pursuant to this provision, and would prohibit judgment from being entered pursuant to this provision until the student has thus complied.

(4) Existing provisions of the act establish the Student Tuition Recovery Fund, and continuously appropriate the money in the fund to the bureau for the purposes of the act.

This bill would require the bureau to send to each student who applies for payment from the fund a written notice specifying the rights of a student under these provisions. The bill would require that, once the bureau has determined that a student claim is eligible for payment and intends to use the fund, in whole or in part, to satisfy the eligible claim, the bureau document its negotiations with the relevant lender, holder or guarantee agency, the United States Department of Education, or the applicable state agency, as prescribed.

The bill would make an appropriation by authorizing a new purpose for expenditures from the fund.

(5) Existing law requires the bureau to assess, for the purposes of the Student Tuition Recovery Fund as prescribed, each institution that collects any moneys in advance of rendering services.

This bill would exempt from this assessment an institution that receives all of its students' total charges, as defined, from 3rd-party payers, as defined. The bill would revise, as prescribed, the formula for calculating the amount of this assessment.

(6) Existing law requires the bureau to investigate complaints from any person claiming damage as a result of any act or practice by a postsecondary or vocational educational institution or its agent, or both, that is a violation of the act.

This bill would require the bureau to adopt regulations that specify its procedures for complaint handling and complaint disclosure. The bill would specify procedures and timelines for the processing of these complaints and responses received pursuant thereto. The bill would authorize a person who claims that an institution is operating in violation of specified provisions of the act to bring an action, in small claims court or a court of competent jurisdiction, for the recovery of actual or statutory damages, or both, in accordance with specified procedures. The bill would authorize courts to order fines and other prescribed remedies against institutions found to violate these provisions of the act.

(7) The bill would require the bureau to submit an annual report on the collection and expenditure of moneys collected as special assessments under the bill, as prescribed.

Ch. 622 (AB 207) Matthews. Health insurance: prescription drug benefits: identification cards.

Existing law provides for regulation of health care service plans by the Department of Managed Health Care, and provides for regulation of insurers by the Department of Insurance. A willful violation of the provisions governing health care service plans is a crime. Existing law contains various provisions governing health care service plans and disability insurers that offer coverage for prescription drug benefits.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require certain health care service plans and disability insurers that offer coverage for prescription drug benefits and that issue identification cards to enrollees and insureds to issue a card containing uniform information necessary to process claims for prescription drug benefits by a specified date. The bill would require that, if a health care service plan or disability insurer delegates responsibility for issuing the card, the contract between the health care service plan or disability insurer and its contractor or agent require compliance with these provisions.

Because a willful violation of this provision with respect to health care service plans would be a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 623 (AB 238) Rod Pacheco. Income and bank and corporation taxes: net operating losses.

The Personal Income Tax Law and the Bank and Corporation Tax Law allow a deduction for specified portions of net operating losses that, in general, are allowed to be carried forward to specified years.

This bill would provide, for taxable years beginning on or after January 1, 2001, and before January 1, 2003, that the entire amount of any net operating loss for any taxable year beginning on or after the date that the area in which the taxpayer conducts a farming business that is directly affected by Pierce's disease and its vectors shall be a net operating loss carryover to each of the nine taxable years following the taxable year of loss, until used. This bill also would require the Department of Food and Agriculture to determine that Pierce's disease and its vectors caused the net operating loss for which a taxpayer seeks a net operating loss carryover.

This bill would take effect immediately as a tax levy.

Ch. 624 (AB 268) Wayne. Structured settlement payment rights.

Existing law permits a judgment awarded by a court for damages for personal injury in resolution of a tort claim to be paid in periodic payments as a structured settlement, rather than as a lump-sum payment. Existing law provides that a contract providing for a transfer of structured settlement payment rights entered into on or after January 1, 2000, is subject to certain disclosure and notice requirements and is prohibited from containing certain provisions.

This bill would revise, recast, and expand these provisions relative to those types of contracts entered into on or after January 1, 2002.

The bill would require the Attorney General to report to the Legislature not later than March 31, 2004, regarding this bill and including certain information.

Ch. 625 (AB 447) Firebaugh. Dental Board of California.

Existing law provides for a Dental Board of California consisting of 14 members and includes eight practicing dentists. Existing law defines a "practicing dentist" to include a faculty member of a dental college or dental department of a medical college located in the state.

This bill would require that the board's membership include a faculty member of a California dental college and a dentist who practices in a nonprofit community clinic. The bill would also provide that a new board, vested with the same powers as the previous board, would be created on January 1, 2002, if SB 134 is enacted and becomes effective on or before January 1, 2002.

Ch. 626 (AB 661) Correa. Redevelopment: project area.

The Community Redevelopment Law requires redevelopment agencies to use not less than 20% of taxes allocated to the agency for low- and moderate-income housing, as specified. These funds may be used outside of the project area upon a finding by the agency and the legislative body of the community that it will benefit the project area.

This bill would expressly authorize the Orange County Development Agency to use these funds outside of a project area and within the county or any city in the county, upon a finding by the agency and the board of supervisors that this use of funds will benefit the project area. The bill would prescribe other criteria for the use of those funds.

The bill would also repeal provisions that authorized until January 1, 2000, a donor agency and a receiving community to contract for the use of low- and moderate-income housing funds outside the territorial jurisdiction of the donor community under specified conditions.

Ch. 627 (AB 671) Strom-Martin. Timber harvesting.

Existing law authorizes the State Board of Forestry and Fire Protection, upon a determination that the exemption is consistent with the purposes of the Z'berg-Nejedly Forest Practice Act of 1973, to exempt from the provisions of that act, among other things, any person engaged in forest management whose activities are limited to the one-time conversion of less than 3 acres to a nontimber use.

This bill would prohibit a person, whether acting as an individual or as a member of a partnership or as an officer or employee of a corporation or other legal entity, from obtaining more than one exemption in a 5-year period. The bill would authorize the board to adopt regulations for a waiver of the 5-year limitation, as specified, including a process for appeal of a denial of a waiver. The bill would require the board to adopt regulations requiring documentation of a bona fide intent to complete the conversion and requiring the exemption to expire upon a change in timberland ownership.

Ch. 628 (AB 1444) Maddox. Nutritional advice.

Existing law does not prohibit a person from providing nutritional advice. Existing law contains provisions governing the practice of registered dietitians and allows a registered dietitian with a referral by an appropriate health care provider to provide nutritional and dietary counseling, assessments, and treatment. Existing law requires that the referral be accompanied by a written prescription containing specified information and signed by the health care provider.

This bill would subject other nutritional professionals to certain provisions governing registered dietitians. The bill would create an exception to the written prescription requirement where a referring physician and surgeon has established or approved a written protocol governing the patient's treatment. The bill would also authorize registered dietitians and other nutritional professionals who are not specified licensed health care providers to order, when authorized to do so by a written protocol prepared or approved by the referring physician and surgeon, medical laboratory tests related to nutritional therapeutic treatments and to accept or transmit verbal orders consistent with the established protocol or electronically transmitted orders from a health care provider in order to implement medical nutrition therapy. The bill would designate the services described above that registered dietitians and other nutritional professionals are authorized to perform as "medical nutrition therapy." The bill would authorize a dietetic technician, registered, meeting certain qualifications, to assist a registered dietitian with certain services. The bill would make conforming changes to the Insurance Code.

Existing law requires a person representing himself or herself as a dietitian to meet certain requirements, including satisfactory completion of a program of supervised clinical experience of not less than 6 months.

This bill would instead require that the person satisfactorily complete a program of supervised practice for a minimum of 900 hours.

Existing law does not impose requirements on a person representing himself or herself as a dietetic technician, registered.

This bill would require a person representing himself or herself as a dietetic technician, registered to be 18 years of age or older and to have satisfactorily completed specified education, experience, and examination requirements.

Existing law provides that it is a misdemeanor for a registered dietitian to practice in violation of certain provisions.

Because this bill would extend this provision to other nutritional professionals, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 629 (AB 1539) Pavley. Pupils: transfer of preschool information.

Existing law sets forth provisions controlling the maintenance and disclosure of pupil records, and establishes the California School Information Services system in part to build the capacity of local education agencies to implement and maintain effective pupil information systems.

This bill would require a state-funded preschool or infant and toddler program to provide a child's records to a public school when the child transfers, would require the superintendent to advise local education agencies regarding related federal Head Start requirements, and would make conforming changes.

Ch. 630 (SB 80) Speier. Insurance: Conservation and Liquidation Office.

Existing law authorizes the Insurance Commissioner to appoint personnel, including the Chief Executive Officer of the Conservation and Liquidation Office (CLO). Existing law also makes employees of the state, as specified, subject to various conflict-of-interest provisions and financial disclosure requirements, the violation of which is punishable as a criminal offense.

This bill would make the officers and employees of CLO subject to the same conflict-of-interest and financial disclosure requirements that would apply if they were employees of the Department of Insurance and would require the department prior to February 1, 2002, to adopt a Conflict of Interest Code, as specified, with respect to those officers and employees. The bill would also subject a person contracting with CLO to conflict-of-interest requirements, as specified, that would apply to the same extent as would apply to a person with a similar contractual relationship with the department. The bill would require the department to ensure compliance with its provisions.

Because this bill would add categories of persons subject to these conflict-of-interest provisions, the violation of which is punishable as a criminal offense, it would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 631 (SB 340) Speier. Pharmacies.

(1) Existing law, the Pharmacy Law, authorizes a pharmacist filling a prescription order for a drug product prescribed by the trade or brand name to substitute a generic drug product, subject to specified requirements.

This bill would also authorize a pharmacist to substitute a drug product with a different form of medication having the same active chemical ingredients of equivalent strength and duration of therapy as the prescribed drug product, when the change would improve the

ability of the patient to comply with the prescribed drug therapy. The bill would require that the patient be notified of the substitution, would not permit a substitution if the prescriber indicates that no substitution may be made, and would not permit a substitution between long-acting and short-acting forms of a medication with the same chemical ingredients or between one drug product and 2 or more drug products with the same chemical ingredients.

(2) The Pharmacy Law authorizes specified nonprofit and free clinics licensed by the California State Board of Pharmacy to purchase drugs at wholesale for administration or dispensing to patients registered for care at the clinic.

This bill would authorize specified entities, as defined by federal law, to contract with a pharmacy to provide pharmacy related services to patients of the entity. The bill would authorize a pharmacy to dispense preferentially priced drugs obtained pursuant to federal law, would require that those drugs be segregated from the pharmacy's other drug stock, and would require excess drug stock to be returned to the distributor. The bill would also require pharmacy records of acquisition and disposition of the drugs to be separate from other records. This bill would exclude covered entities and pharmacies from the requirement that they obtain a wholesaler's license for actions necessary to participate in the drug purchase program.

(3) The Pharmacy Law requires the board to take disciplinary action against any person licensed under the Pharmacy Law who is guilty of unprofessional conduct.

This bill would provide that it is unprofessional conduct for any person licensed under the Pharmacy Law to sell, trade, transfer, or furnish drugs obtained pursuant to federal law to any person a licensee knows or reasonably should know is not a patient of a covered entity, as defined by federal law.

(4) Because a knowing violation of the Pharmacy Law is a misdemeanor, this bill would expand the scope of that crime and thus would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 632 (SB 350) Alpert. Metropolitan water districts.

(1) The Metropolitan Water District Act grants to a metropolitan water district formed under the act various powers, including the authority to invest surplus funds in accordance with prescribed requirements.

This bill would require, on or before June 30, 2002, the board of directors of a district to adopt a resolution establishing guidelines, as specified, governing the intended use of unreserved fund balances. The requirements imposed by this bill on a district with regard to the development of guidelines governing unreserved fund balances would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 633 (SB 389) Alpert. Sea urchins.

(1) Existing law, until March 1, 2001, required an additional landing tax to be paid for each pound, or fraction thereof, of sea urchins landed in this state for commercial purposes and requires the revenue from that landing tax to be used for the Sea Urchin Resources

Enhancement Program and for research and management activities to monitor and maintain the sea urchin resource.

This bill would refer to the landing tax as a landing fee and would require the revenue to be used for research, enhancement, and other projects contributing to sustainable fishery management practices. Because existing provisions of law would require the revenue from the fees to be deposited in the Fish and Game Preservation Fund, which is continuously appropriated to the Department of Fish and Game to carry out the Fish and Game Code, the bill would make an appropriation.

The bill would authorize the revenue from the fees to be used to conduct a referendum to form a sea urchin marketing council or commission, if one is authorized by law.

The bill would authorize a nonprofit organization to be responsible for the duties of the department.

(2) Existing law, until January 1, 2002, provides for a 12-person Director's Sea Urchin Advisory Committee to annually submit to the Department of Fish and Game proposed projects and a budget for the existing program for incorporation in its submittal to the Governor's Budget.

This bill would create, until January 1, 2007, a 10-member Sea Urchin Fishery Advisory Committee. The bill would provide for the selection of the members, the chair of the committee, an industry representative to work with the department's coordinator, and other duties of the committee, including submitting proposed projects and a budget to the department.

Because the bill would impose new duties on the department and require funds from the landing fee to be used for different purposes, the bill would make an appropriation.

Ch. 634 (SB 446) Vasconcellos. Health care coverage: AIDS vaccine.

Existing law authorizes the Board of Administration of the Public Employees' Retirement System to contract with carriers for health benefits plans and to approve health benefits plans offered by employee organizations in order to provide health benefits coverage to specified public employees.

This bill would require a plan or contract to provide coverage for an approved AIDS vaccine.

Existing law provides for the regulation and licensing of health care service plans by the Director of the Department of Managed Health Care and for the regulation of disability insurers by the Insurance Commissioner. Existing law provides that a willful violation of provisions governing health care service plans is a crime.

This bill would provide that health care service plans and disability insurers that provide coverage for hospital, medical, or surgery expenses shall also provide coverage for an approved AIDS vaccine, as specified. The bill would not apply to specified types of disability insurance policies. Because a willful violation of the bill's requirements with respect to health care service plans would be a crime, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 635 (SB 456) Speier. Health Insurance Portability and Accountability Act of 2001: compliance activities.

(1) Existing federal law, the Health Insurance Portability and Accountability Act of 1996 (HIPAA), establishes certain requirements relating to the provision of health insurance.

This bill would enact the Health Insurance Portability and Accountability Implementation Act of 2001. The bill would require the Office of HIPAA Implementation, established by the Governor's office within the California Health and Human Services Agency, to perform

specified activities required for compliance with this federal act. The bill would require state entities subject to HIPAA to complete an assessment prior to January 1, 2002, to determine its impact on their operations and would require state entities to cooperate with the office in achieving compliance with HIPAA. The bill would require the Department of Finance to develop guidelines relating to obtaining HIPAA funding and to report to the Legislature regarding expenditures related to HIPAA implementation activities. The bill would provide that its provisions remain in effect only until January 1, 2008, and would be repealed on that date.

(2) Existing law requires the Office of Statewide Health Planning and Development to develop a plan, to prepare a progress report, and to contract for consulting services leading to recommendations related to a health data interchange between and among health facilities, health care service plans, insurers, providers, emergency medical services providers, local emergency medical services agencies, and relevant state agencies.

This bill would delete these provisions.

(3) The Budget Act of 2001 makes various appropriations for the support of state government for the 2001–02 fiscal year.

This bill would make appropriations in augmentation of that act to support the state's implementation of HIPAA.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 636 (SB 539) Committee on Local Government. Local agency assessments.

Existing statutory law provides notice, protest, and hearing procedures for the levying of new or increased assessments by local government agencies pursuant to Articles XIII C and XIII D of the California Constitution. These procedures specifically require that at the conclusion of the public hearing on a proposed assessment, the agency shall have the assessment ballots tabulated by a designated impartial person who may be the clerk of the agency. These statutory procedures supersede other statutory provisions applicable to the levying of these assessments.

This bill would provide instead that in a city, the impartial person may include, but is not limited to, the clerk of the agency. The bill would also conform a provision of the Parking District Law of 1951 to the statutory procedures for levying assessments pursuant to Articles XIII C and XIII D of the California Constitution.

Ch. 637 (SB 699) Battin. Flood control.

(1) Existing law provides for state cooperation with the federal government in the construction of specified flood control projects.

This bill, subject to appropriation of funds in the annual Budget Act, would authorize the project for flood control on the Whitewater River in Riverside County in accordance with a prescribed final report, and as authorized by a prescribed federal act, at an estimated cost to the state of the sum that may be appropriated for state cooperation by statute, upon the recommendation and advice of the Department of Water Resources. The bill would require the Coachella Valley Water District, in conjunction with the Department of the Army, to carry out the project, to give specified assurance to the Secretary of the Army, and to enter into an agreement with the department pursuant to which the district agrees to indemnify and hold and save the state harmless from any liability for damages arising out of the project, as specified. By imposing requirements on the district in connection with the project, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 638 (SB 896) Poochigian. Telecommunications services.

The United States Congress enacted the Mobile Telecommunications Sourcing Act for the purpose of establishing uniform nationwide sourcing rules for state and local taxation of mobile telecommunications services. In order to create a single, uniform sourcing rule, the federal act preempts, in part, state and local law.

Existing state law imposes taxes, surcharges, and fees on mobile telecommunications charges, including an emergency telephone surcharge.

This bill would amend the existing laws that impose taxes, surcharges, and fees, on mobile telecommunications services, including emergency telephone services, to reflect the changes made by the federal act.

This bill, in accordance with federal law, applies to customer bills issued on or after August 1, 2002.

Ch. 639 (SB 909) Chesbro. Timber harvest plans.

Existing law allows the Director of Forestry and Fire Protection 15 days from the date that the initial inspection of the submitted timber harvest plan is completed to review the plan and take public comments. Existing law allows the director 10 days after the initial review and public comment period to review the public input, consider recommendations and mitigation measures of other agencies, respond in writing to the issues raised, and determine if the plan is in conformance with law.

This bill would extend the amount of time the director has to review the plan and take public comments to 30 days, instead of 15 days, from the completion of the initial inspection of the timber harvest plan. This time period would include 10 days of public comment after the date of final interagency review. This bill would authorize the director to review the plan and public input for up to 15 days, instead of 10 days, after the final review and public comment period.

This bill would incorporate additional changes in Section 4582.7 of the Public Resources Code proposed by SB 540, that would become operative only if SB 540 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 640 (SB 1174) Polanco. Clinical laboratory technology: performance of blood glucose tests by certified emergency medical technicians and licensed paramedics.

Existing law provides for the regulation by the State Department of Health Services of clinical laboratories and of persons performing clinical laboratory tests or examinations or engaging in clinical laboratory practice, subject to designated exceptions.

This bill would exempt, as specified, from this regulation certified medical technicians and licensed paramedics providing basic life support services or advanced support services who perform blood glucose tests.

This bill would also incorporate changes to Section 1206.5 of the Business and Professions Code proposed by AB 586 if both bills are chaptered and this bill is chaptered last.

Ch. 641 (SB 1226) Committee on Health and Human Services. Environmental specialists: food safety.

Existing law, the Sherman Food, Drug, and Cosmetic Law, contains various provisions regarding the packaging, labeling, and advertising of food, drugs, and cosmetics. Violation of any of these provisions is a crime.

Existing law defines "food" for purposes of these provisions to include, among other things, any article defined as food pursuant to the Federal Food, Drug, and Cosmetic Act.

This bill would delete from this definition of "food" any article defined as food pursuant to the Federal Food, Drug, and Cosmetic Act.

Existing law defines "infant formula" and "medical food" as those terms are defined in that federal act.

This bill would require the State Department of Health Services to review all changes to the federal definition of these terms and submit a specified report to designated committees of the Legislature before the changes are incorporated by reference according to this provision. The bill would incorporate the changes one year after the effective date of the federal change unless a law specifically prohibits that incorporation.

Since this bill would change the definition of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 642 (SB 221) Kuehl. Land use: water supplies.

(1) Under the Subdivision Map Act, a legislative body of a city or county is required to deny approval of a tentative map, or a parcel map for which a tentative map is not required, if it makes any of a number of specified findings. Under the Planning and Zoning Law, a city, county, or city and county may not approve a development agreement unless the legislative body finds that the agreement is consistent with the general plan and any applicable specific plan.

This bill would prohibit approval of a tentative map, or a parcel map for which a tentative map was not required, or a development agreement for a subdivision of property of more than 500 dwelling units, except as specified, including the design of the subdivision or the type of improvement, unless the legislative body of a city or county or the designated advisory agency provides written verification from the applicable public water system that a sufficient water supply is available or, in addition, a specified finding is made by the local agency that sufficient water supplies are, or will be, available prior to completion of the project.

By increasing the duties of local legislative bodies and local planning agencies and commissions, the bill would impose a state-mandated local program.

(2) Existing law requires any person who intends to offer subdivided lands within California for sale or lease to file with the Department of Real Estate an application for a public report consisting of a notice of intention and a completed questionnaire that includes, among other things, a true statement of the provisions, if any, that have been made for public utilities in the proposed subdivision, including water, electricity, gas, telephone, and sewerage facilities.

This bill would provide that for proposed subdivisions subject to specified requirements of the Subdivision Map Act, the true statement of the provisions that have been made for water is satisfied by submitting a copy of the written verification of the availability of a sufficient water supply, obtained pursuant to specified requirements as described in (1) above.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 643 (SB 610) Costa. Water supply planning.

(1) Existing law requires every urban water supplier to identify, as part of its urban water management plan, the existing and planned sources of water available to the supplier over a prescribed 5-year period. Existing law prohibits an urban water supplier that fails to prepare or submit its urban water management plan to the Department of Water Resources from receiving drought assistance from the state until the plan is submitted.

This bill would require additional information to be included as part of an urban water management plan if groundwater is identified as a source of water available to the supplier. The bill would require an urban water supplier to include in the plan a description of all water

supply projects and programs that may be undertaken to meet total projected water use. The bill would prohibit an urban water supplier that fails to prepare or submit the plan to the department from receiving funding made available from specified bond acts until the plan is submitted. The bill, until January 1, 2006, would require the department to take into consideration whether the urban water supplier has submitted an updated plan, as specified, in determining eligibility for funds made available pursuant to any program administered by the department.

(2) Existing law, under certain circumstances, requires a city or county that determines an environmental impact report is required in connection with a project, as defined, to request each public water system that may supply water for the project to assess, among other things, whether its total projected water supplies will meet the projected water demand associated with the proposed project. Existing law requires the public water system to submit the assessment to the city or county not later than 30 days from the date on which the request was received and, in the absence of the submittal of an assessment, provides that it shall be assumed that the public water system has no information to submit. Existing law makes legislative findings and declarations concerning "Proposition C," a measure approved by the voters of San Diego County relating to regional growth management, and provides that the procedures established by a specified review board established in connection with that measure are deemed to comply with the requirements described above relating to water supply planning by a city or county.

This bill would revise those provisions. The bill, instead, would require a city or county that determines a project is subject to the California Environmental Quality Act to identify any public water system that may supply water for the project and to request those public water systems to prepare a specified water supply assessment, except as otherwise specified. The bill would require the assessment to include, among other information, an identification of existing water supply entitlements, water rights, or water service contracts relevant to the identified water supply for the proposed project and water received in prior years pursuant to those entitlements, rights, and contracts. The bill would require the city or county, if it is not able to identify any public water system that may supply water for the project, to prepare the water supply assessment after a prescribed consultation. The bill would revise the definition of "project," for the purposes of these provisions, and make related changes.

The bill would prescribe a timeframe within which a public water system is required to submit the assessment to the city or county and would authorize the city or county to seek a writ of mandamus to compel the public water system to comply with requirements relating to the submission of the assessment.

The bill would require the public water system, or the city or county, as applicable, if that entity concludes that water supplies are, or will be, insufficient, to submit the plans for acquiring additional water supplies.

The bill would require the city or county to include the water supply assessment and certain other information in any environmental document prepared for the project pursuant to the act. By establishing duties for counties and cities, the bill would impose a state-mandated local program.

The bill would provide that the County of San Diego is deemed to comply with these water supply planning requirements if the Office of Planning and Research determines that certain requirements have been met in connection with the implementation of "Proposition C."

(3) The bill would incorporate additional changes in Section 10631 of the Water Code proposed by AB 901, to be operative only if this bill and AB 901 are enacted and become effective on or before January 1, 2002, each bill amends Section 10631 of the Water Code, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 644 (AB 901) Daucher. Water supply planning.

(1) The Urban Water Management Planning Act requires urban water suppliers to prepare and adopt urban water management plans for submission to the Department of Water Resources. The act requires those plans to include specified information. The act makes findings and declarations relating to urban water management planning.

This bill would require a plan to include information, to the extent practicable, relating to the quality of existing sources of water available to an urban water supplier over given time periods, and the manner in which water quality affects water management strategies and supply reliability. The bill would require a plan to describe plans to supplement a water source that may not be available at a consistent level of use, to the extent practicable. The bill would make additional findings and declarations relating to water quality.

(2) This bill would incorporate additional changes in Section 10631 of the Water Code proposed by SB 610, to be operative only if this bill and SB 610 are enacted and become effective on or before January 1, 2002, each bill amends Section 10631 of the Water Code, and this bill is enacted last.

Ch. 645 (AB 494) Cardoza. Veterans homes.

Existing law establishes, until January 1, 2002, a Governor's Commission on Veterans Homes, consisting of 12 appointed and ex officio members, to advise the Governor and the Legislature on the establishment of veterans homes in California.

This bill would extend the operation of those provisions until January 1, 2003. The bill would also eliminate an obsolete statutory reference.

Existing law authorizes state agencies to provide staff assistance to the Governor's Commission on Veterans Homes upon its request.

This bill would instead require state agencies to provide that assistance.

The bill would incorporate changes made by SB 4 that would become operative if both bills are enacted and this bill is enacted after SB 4.

Ch. 646 (AB 79) Havice. School safety.

Existing law provides that each school district and county office of education is responsible for the overall development of comprehensive school safety plans for its schools operating kindergarten and any of grades 1 to 12, inclusive. Under existing law, a comprehensive school safety plan is required to identify appropriate strategies and programs that will provide or maintain a high level of school safety and address the school's procedures for complying with existing laws related to school safety, including the development of, among other things, child abuse reporting procedures and disaster procedures.

This bill would require the State Department of Education to develop model policies on the prevention of bullying and on conflict resolution and to make the model policies available to school districts. The bill would authorize a school district to adopt one or both of the policies for incorporation into its school safety plan.

Ch. 647 (AB 401) Cardenas. School facilities.

Existing law, the Leroy F. Greene School Facilities Act of 1998 (Greene Act), makes funding available to eligible school districts for various purposes related to school facilities, including construction and modernization. Under existing law, the State Allocation Board is required to determine the eligibility of school districts to receive apportionments under the Greene Act and to apportion funds only upon the completion of certain requirements by the applicant school district.

Existing law authorizes the board to provide additional funding for assistance in site development and acquisition if the amount of the site acquisition and development assistance does not exceed 50% of the cost of site development to the school district, plus the lesser of 50% of the site cost to the school district or 50% of the appraised value of the site at the time the complete application is submitted.

This bill would alter the calculation involving the appraised value of the site for the purposes of calculating this assistance and would authorize the board to provide funding for this assistance to a school district that uses land previously acquired by the school district in an amount equal to 50% of the cost of site development to the school district, plus 50% of the site's appraised value if certain conditions are met.

Ch. 648 (AB 495) Diaz. Health care coverage.

Existing law provides for health care coverage for children in low-income households through the Healthy Families Program and for the provision of health benefits to qualifying individuals through Medi-Cal. Existing law also provides for services for handicapped persons under 21 years of age pursuant to the California Children's Services Program. Under existing law, a county may organize a prepaid health plan, which is designated as a local initiative, to provide health care to eligible Medi-Cal beneficiaries.

This bill would create the Children's Health Initiative Matching Fund in the State Treasury, which would be administered by the Managed Risk Medical Insurance Board, in collaboration with the State Department of Health Services, for the purpose of providing matching state funds and local funds received by the fund through intergovernmental transfers to a county agency, a local initiative, or a county organized health system to provide health insurance coverage to certain children in low-income households who do not qualify for health care benefits through the Healthy Families Program or Medi-Cal. The bill would also provide for the referral of eligible children to the California Children's Services Program, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 649 (AB 574) Salinas. Medi-Cal: overpayment forgiveness.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Under existing law, the department audits providers to determine whether any overpayments have been made for Medi-Cal services and, subject to an appeals process, the department is empowered to collect overpayments determined to have been made pursuant to these audits.

This bill would provide that whenever, pursuant to an audit conducted by the department, it has been determined that an overpayment for Medi-Cal services has been made to certain categories of hospitals for services rendered from January 1, 1992, to December 31, 1997, the department may forgive a hospital the debt arising from the overpayment and interest.

Ch. 650 (AB 866) Diaz. Personal income and business and corporation taxes: credits: child care.

The existing Personal Income Tax and Bank and Corporation Tax Law provide tax credits for startup expenses for child care programs or constructing a child care facility, costs for child care information and referral services, and costs paid or incurred for contributions to a qualified care plan. Under existing law these credits are only available for certain taxable years beginning before January 1, 2003.

This bill would apply the credits to taxable years beginning before January 1, 2007.

This bill would take effect immediately as a tax levy.

Ch. 651 (AB 891) Goldberg. Child support: disabled noncustodial parents.

Existing law governs child support, and sets forth guidelines for determining the annual net disposable income of each parent for these purposes. Amounts attributable to certain items must be deducted from the annual gross income of each parent in determining the annual net disposable income. Existing law also provides that if a court has ordered a noncustodial parent to pay child support, payments for the support of the child made by the federal government pursuant to the Social Security Act or the Railroad Retirement Act

because of the retirement or disability of the noncustodial parent and transmitted to the custodial parent or other child support obligee each month are credited toward the amount ordered by the court to be paid for that month by the noncustodial parent for support of the child, unless those payments were taken into consideration by the court in determining the amount of the support to be paid. Existing law requires local child support agencies to monitor child support cases and seek modifications when needed.

This bill would revise the above described provision relating to federal payments to include benefits paid by the Department of Veterans Affairs. The bill would require a custodial parent who has been notified that the noncustodial parent is receiving any of the federal benefits described above, as specified, to contact the appropriate federal agency within 30 days of receiving that notification to verify the eligibility of the child to receive payments from the federal government on the basis of the noncustodial parent's disability. The bill would require local child support agencies to prepare and file a motion to modify a support obligation within 30 days of receiving verification from a noncustodial parent or other source of the receipt of specified benefits. By imposing additional duties on local child support agencies, the bill would create a state-mandated local program. The bill would make related changes.

Existing law provides that the Franchise Tax Board has the responsibility for accounts receivable management of child support delinquencies. The Franchise Tax Board is responsible for actions taken on any child support delinquency account transferred to that agency as necessary for recovering delinquent child support payments. Among other duties, the Franchise Tax Board is responsible for issuing and modifying earnings assignment orders on behalf of the local child support agency in order to take collection actions to recover delinquent child support payments.

Existing law establishes a state supplementary income program which provides a monthly income based on need, as specified, to aged, blind, or disabled persons.

This bill would provide that a child support delinquency may not be referred to the Franchise Tax Board and if already referred, must be withdrawn, rescinded, or otherwise recalled, if the obligor is receiving payments under the state supplementary income program for aged, blind, and disabled persons, or but for certain excess income, would be eligible for those payments, as specified. The bill would prohibit an order/notice to withhold income issued by a local child support agency in the case of a disabled obligor, as specified, from exceeding a specified amount.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 652 (AB 1692) Committee on Human Services. CalWORKs eligibility: work activities.

Existing federal law provides for allocation of federal funds through the federal Temporary Assistance for Needy Families (TANF) block grant program to eligible states. Existing law provides for the CalWORKs program for the allocation of federal funds received through the TANF program, under which each county provides cash assistance and other benefits to qualified low-income families.

Existing law requires certain participants in the CalWORKs program to participate in certain welfare-to-work activities, including community service activities.

Existing law also contains certain maximum time limits upon the receipt of CalWORKs benefits, except that individuals engaging in community service activities are exempt from these time limits.

This bill would add to the list of qualifying work activities, and for which an exemption from these time limits is provided, United States Department of Labor welfare-to-work grant program community service or work experience activities.

Because each county is required to pay for a share of the cost of aid grants and the administration of the CalWORKs program, by expanding eligibility through the addition of work activities that qualify a recipient for the receipt of aid, the bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 653 (AB 1695) Committee on Human Services. Foster care.

Existing law sets forth the California Community Care Facilities Act which regulates, among other things, residential care facilities for children, except as specified.

This bill would exempt from that act the homes of relatives and nonrelative extended family members when children are placed by the juvenile court, as specified. The bill would also revise the requirements for licensure of foster family homes, and exempt foster family homes from provisions for the temporary licensure of community care facilities, as specified.

Existing law authorizes the Department of Justice to provide subsequent arrest notification to certain public agencies for specified purposes.

This bill would add to those purposes the approval of relative caregivers and nonrelative extended family members, as defined, and would make related changes.

Existing law sets forth various placement options for children who have been adjudged dependent children of the juvenile court and removed from their homes on the basis of neglect or abuse. Existing law also specifies various placement options for children who have been declared wards of the juvenile court. Existing law establishes a preference for placement in the home of a relative.

Existing law generally requires a court to make a determination on the record at the initial petition hearing as to whether reasonable efforts were made to prevent or eliminate the need to remove a dependent child from the home. If the first contact with the family has occurred during an emergency situation in which the child could not safely remain at home, even if reasonable services were provided, the court must make a finding that the lack of preplacement preventive services was reasonable.

This bill would provide that the standards used to evaluate and grant or deny approval of the home of a relative or the home of a nonrelative extended family member for the placement of a child shall be the same standards as set forth in specified regulations for licensing foster family homes, as specified. The bill would also provide for conditional approval pending criminal history information, would delete certain status review criteria regarding the substantial probability a dependent child in foster care will return to his or her parents' safe home within 6 months, and would revise the safety requirements regarding placement in a relative's home in specified instances. The bill would impose a state-mandated local program by increasing the level of service required of county employees under an existing program.

The bill would also delete the provision requiring the court to make a finding that the lack of preplacement preventive services was reasonable if the first contact with the family of a dependent child has occurred during an emergency situation as described above. The bill

would revise the list of homes into which a dependent child who is under the care, custody, and control of a social worker, or a ward of the juvenile court who is under the care, custody, and control of a probation officer, may be placed to specifically include the home of a nonrelative extended family member, as defined. The bill would make other related changes. The bill would require the State Department of Social Services to adopt regulations to implement these provisions by July 1, 2002. The bill would also include a statement of legislative intent.

Existing law specifies the circumstances in which reunification services need not be provided to a parent or guardian from whose custody a child has been removed by the juvenile court.

This bill would revise those circumstances, as specified.

Existing law provides for Aid to Families with Dependent Children-Foster Care (AFDC-FC) for children who have been removed from their homes in certain instances.

This bill would delete specified requirements for AFDC-FC where a child was removed from his or her home during an emergency situation and there is a judicial determination that the lack of preplacement preventive efforts was reasonable, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 654 (AB 1723) Committee on Utilities and Commerce. State Library: telephonic reading systems.

Existing law authorizes the State Librarian to provide toll-free telephone services for registered patrons of the federally designated regional libraries for the blind and physically handicapped in order to enable those persons to have direct patron access to library services.

This bill would authorize the State Librarian to provide toll-free telephone access to telephonic reading systems for individuals with print disabilities who are registered patrons of the federally designated regional libraries for the blind and physically handicapped. The bill would authorize the State Librarian to operate a telephonic reading system, as defined, or fund the operation of telephonic reading systems operated by qualifying entities, as defined. The bill would appropriate \$830,000 from the California Teleconnect Fund Administrative Committee Fund to the California State Library to fund the 7 existing telephonic reading centers in specified cities, until July 1, 2002. The bill would require that any funds appropriated to the California State Library under the bill, which are not encumbered on or before July 1, 2002, revert to the fund.

The bill would make related findings and declarations.

Ch. 655 (SB 231) Ortiz. Medi-Cal: local education agency services.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. The Medi-Cal program is partially governed and funded as part of the federal medicaid program.

Under existing law, one method by which services may be provided is through the provision of services on schoolsites. Local education agencies are permitted to bill the Medi-Cal program for these services.

This bill would require the department to amend this state's medicaid plan to accomplish various goals aimed at enhancing Medi-Cal services provided on schoolsites, and access by

students to these services. It would require the department to consult with specified entities to assist in formulating these state plan amendments.

The bill would also, until January 1, 2006, require the department to compare annually school-based medicaid systems in comparable states and related activities, and to file an annual report with the Legislature on medicaid reimbursements for services for students. The bill, until January 1, 2006, would require money collected as a result of reduction in federal Medi-Cal payments allocable to local educational agencies to be deposited in the Local Agency Medi-Cal Recovery Account, which the bill would create, and used for the support of the department.

Ch. 656 (SB 633) Sher. Hazardous and solid waste: mercury.

(1) Existing law prohibits the management of hazardous waste, except in accordance with the hazardous waste laws, including laws governing the removal of hazardous waste from a major appliance, as defined. A violation of the hazardous waste control laws is a crime.

This bill would enact the California Mercury Reduction Act of 2001.

The bill would require any mercury-containing vehicle light switch, as defined, that is removed from a vehicle to be subject to the regulations adopted by the Department of Toxic Substances Control regarding the management of universal waste and other applicable regulations, and would require the department to take specified actions with regard to the safe removal and disposal of those switches. Since a violation of these requirements would be a crime, the bill would impose a state-mandated local program. The department would be required to submit a specified report, by January 1, 2004, to the Legislature regarding these requirements.

(2) Existing law, the Dry Cell Battery Management Act, regulates the sale of specified batteries and, among other things, prohibits the sale of dry cell batteries containing specified amounts of mercury.

The bill would prohibit any person, except as specified, on and after July 1, 2002, from selling at retail or supplying a mercury fever thermometer, as defined, to a consumer or patient in the state, except by a prescription. The act would also prohibit any person, on and after January 1, 2003, from manufacturing, offering for sale or use, or distributing for promotional purposes in this state a mercury-added novelty, as defined. The act would also prohibit any school from purchasing, for use in the classroom, specified devices and materials containing mercury, except measuring devices for use in school laboratories. The bill would prohibit the sale of a vehicle, after January 1, 2005, containing a mercury-containing vehicle light switch.

The bill would provide that a violation regarding mercury-added novelties is a misdemeanor, thereby imposing a state-mandated local program.

(3) Under existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, materials that require special handling are defined to include, among other things, mercury found in switches and temperature control devices in major appliances. These materials are required to be removed from major appliances and from vehicles in which they are contained prior to crushing for transport or transferring to a baler or shredder for recycling. Existing law requires any hazardous material that becomes a hazardous waste when released or removed from a major appliance to be managed pursuant to specified hazardous waste control requirements regarding discarded appliances.

This bill would additionally require any mercury-containing motor vehicle light switch that becomes a hazardous waste when released or removed from a vehicle to be managed pursuant to the requirement regarding mercury-containing vehicle light switches that would be added by this bill. The bill would also provide that a failure to comply with those removal provisions is a violation of the hazardous waste control laws, thereby imposing a state-mandated local program by creating new crimes. The bill would require the department and specified local agencies to enforce these removal requirements.

(4) Existing law requires the board to develop and submit to the Legislature, on or before January 1, 1993, a management plan for the removal of materials that require special handling from major appliances and vehicles.

This bill would repeal the above provision.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 657 (SB 1035) Perata. Alcoholic beverage control: licensees: returns.

Existing law allows a wholesaler or manufacturer to accept the return of beer following the revocation or voluntary surrender of, or failure to renew, an alcoholic beverage license to sell beer, and credit the retailer, as provided.

This bill would also allow a person in possession of a stock of lawfully acquired alcoholic beverages following the revocation or voluntary surrender of, or failure to renew, an alcoholic beverage license to sell that stock to licensees, as authorized by the Department of Alcoholic Beverage Control.

Ch. 658 (AB 67) Firebaugh. Vehicles: driver's license: length limitation.

(1) Existing law establishes the Department of the California Highway Patrol in the Business, Transportation and Housing Agency under the control of the Commissioner of the California Highway Patrol.

This bill would require the commissioner to establish a committee for the purpose of developing a public awareness and outreach campaign to educate manufacturers, sellers, and owners of house cars, as described, regarding locations where those vehicles may be legally operated within the state.

This bill would require the commissioner to report to the Legislature not later than February 1, 2003, and February 1, 2004, regarding the number of house cars that are involved in traffic collisions during the calendar year prior to the reporting date.

(2) Under existing law, an applicant for a driver's license is required to submit to an examination appropriate to the type of motor vehicle or combination of vehicles the applicant desires to drive. A class C driver's license includes authorization to operate a house car.

This bill would provide that the authority to operate a house car over 40 feet in length, excluding safety devices and safety bumpers, is conditioned on receiving an endorsement issued by the Department of Motor Vehicles on a noncommercial class B driver's license, passing a written and skills examination, submitting a specified medical form, and payment of a specified fee.

(3) Under existing law, with specified exceptions, a 40-foot limitation is imposed on the length of vehicles that may be operated on the highways.

This bill would additionally except house cars of a length of up to 45 feet from that limitation when operated on certain highways.

(4) This bill would prohibit any person from operating a house car, as defined, unless the person has in his or her possession a valid driver's license and a specified endorsement to permit operation of the house car. Because under other provisions of existing law, a violation of this prohibition would be an infraction, the bill would impose a state-mandated local program by creating a new crime.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 659 (AB 368) Cedillo. Breed Street Shul.

Under existing law, the annual Budget Act provides various items of appropriation of funds for local public capital facilities.

This bill would make findings and declarations regarding the need for renovations and improvements at the Breed Street Shul in Los Angeles.

Ch. 660 (AB 392) Maddox. Escrow agents.

Existing law subjects the escrow industry to various laws and regulations under the oversight of the Real Estate Commissioner, the Commissioner of Corporations, or the Insurance Commissioner.

This bill would require the commissioners to notify each other when taking enforcement or disciplinary action related to certain escrow services. The bill would require the Department of Real Estate, the Department of Corporations, and the Department of Insurance to each maintain a Web site that displays a database of individuals who have been subject to disciplinary action related to the escrow industry.

Ch. 661 (AB 491) Frommer. Rental vehicles: passenger vehicles.

Existing law, scheduled to become operative on January 1, 2002, establishes definitions and restrictions governing the terms of rental agreements for passenger vehicles.

This bill would revise provisions governing a renter's liability for loss due to theft, a rental company's loss of use, or damage or loss to a rental vehicle, a renter's credit card liability, the submission of insurance claims, damage waivers and damage waiver fees, and notice to a renter regarding financial responsibility and optional damage waivers; and would add provisions thereto regulating the imposition of customer facility charges, as defined, and the disclosure of those charges in advertisements, quotations, or reservations, as specified.

Ch. 662 (AB 544) Maldonado. Escrow agents.

Existing law, the Escrow Law, provides for licensing and regulation by the Commissioner of Corporations of persons engaged in business as escrow agents, unless specifically exempted. Existing law requires persons licensed as escrow agents to be members of the Escrow Agents' Fidelity Corporation, which is established as a nonprofit corporation to indemnify its members against loss, subject in certain cases to a deductible, and which is funded by fees and assessments on its members. Existing law requires employees of escrow agents and various other persons to obtain a certificate from the corporation as a condition of employment or compensation.

This bill would provide that the protection provided by the Escrow Agents' Fidelity Corporation does not extend to any transaction involving a branch or business location of a member outside of California. The bill would also increase to 100% the amount of the deductible applicable to a member who suffers a loss of trust obligations caused by a person who is required to have a certificate from the corporation but has failed to obtain one or has had a certificate denied, suspended, or revoked. The bill would make other related changes.

Ch. 663 (AB 711) Committee on Environmental Safety and Toxic Materials. Administrative orders.

(1) Under existing law, the Department of Toxic Substances Control, a unified program agency, or a designated local public officer, as prescribed, is authorized to issue an order specifying a schedule for compliance or correction and imposing an administrative penalty if there is a violation of the hazardous waste control laws, laws regulating hazardous substances, or radioactive waste, or any permit, rule, regulation, standard, or requirement issued or adopted pursuant to those laws, or if the department, agency, or officer determines there has been a release of hazardous waste or constituents from a hazardous waste facility.

Existing law specifies procedures for the conduct of a hearing, upon the request of a person served with a corrective action order, and requires the hearing to be conducted within 90 days

after receipt of the notice of defense by an administrative law judge of the Office of Administrative Hearings.

This bill would delete the authority of a local health officer or public officer to issue such an order. The bill would instead authorize the department or unified program agency to issue an order requiring the violation be corrected, in the event of a violation, and to impose an administrative civil penalty, or to issue a corrective action order, when the department or unified program agency determines there has been a release. The bill would limit the authority of a unified program agency to issue an order or impose penalties to specified violations or releases. The bill would authorize a person served with an order to request, if the order is issued by the department, that a hearing be conducted by the department pursuant to specified provisions of the Administrative Procedure Act or, if the order is issued by the unified program agency, pursuant to 1 of 2 specified hearing procedures, except under certain conditions. The bill would require, if the unified program agency conducts the hearing, that a decision be issued by the unified program agency within 60 days after the hearing is conducted by the unified program agency. The bill would provide that an order issued by the unified program agency setting a penalty pursuant to the hearing by the unified program agency is final upon issuance. The bill would make conforming changes.

The bill would impose a state-mandated local program by imposing new duties upon local agencies with regard to the enforcement of the hazardous waste control laws.

(2) Existing law requires that $\frac{1}{2}$ of the penalties collected from actions brought by unified program agencies or designated local public officers pursuant to an order for corrective action be paid to the city or county whose agency or officer imposed the penalty, if the Director of Toxic Substances Control determines that the local agency enforcement is fair and reasonable. Existing law requires that $\frac{1}{2}$ of those penalties collected from actions brought by those agencies or public officers be paid to the department and deposited in the Hazardous Waste Control Account. Existing law, which is part of the Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65), provides for the apportionment of civil and criminal penalties collected pursuant to the hazardous waste control laws in a specified manner.

This bill would instead require that all of the penalties collected from actions brought by unified program agencies pursuant to an order specified in (1) above, be paid to the city or county, and would delete the requirement that the director make a determination regarding the enforcement action. The bill would specify that the bill does not apply to any penalty subject to apportionment by Proposition 65.

(3) Existing law establishes the Rural CUPA Reimbursement Account in the General Fund, and requires the Secretary for Environmental Protection to allocate funds to eligible counties in amounts not to exceed designated percentages of the costs incurred by a CUPA in implementing a unified program.

This bill would instead provide that these allocations be made in amounts not to exceed designated percentages of budgeted costs as approved by the local governing body for implementation of the unified program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 664 (AB 729) Kehoe. Replacement Pier and Dredging Project: waste discharge permit fee waiver.

The Porter-Cologne Water Quality Control Act requires specified persons discharging waste, or proposing to discharge waste that could affect the quality of the waters of the state, to submit reports to regional water quality control boards with respect to that discharge, accompanied by specified fees. Existing law requires waste discharge permit fees to be

deposited in the Waste Discharge Permit Fund, which is used, upon appropriation, for purposes of carrying out the act.

This bill would prohibit the State Water Resources Control Board and any regional water quality control board from imposing a fee in connection with prescribing waste discharge requirements for the Replacement Pier and Dredging Project, United States Naval Station, San Diego, Milcon Project P-326.

Ch. 665 (AB 793) Cox. Municipal utility districts: purchases.

The Municipal Utility District Act generally requires the purchase of supplies and materials by a municipal utility district to be let by contract to the lowest responsible bidder when the expenditure is in excess of \$25,000, or, in any district with a population of 250,000 or more, in excess of \$50,000, with annual adjustments to those dollar limits.

If the purchase of supplies and materials by a district exceeds \$50,000, and the district determines that ratepayers reasonably can expect a net benefit in the cost of district services, this bill would authorize the board of the district to provide for the purchase of the supplies and materials by contract let in accordance with best value at the lowest cost acquisition policies adopted by the district's board. The bill would require a district that elects to purchase supplies and materials by contract let in accordance with those policies to submit a specified report to the Legislative Analyst on or before January 1, 2006, and would require the Legislative Analyst to report to the Legislature on or before April 1, 2006.

The bill would require a district to ensure that all businesses have a fair and equitable opportunity to compete for, and participate in, district contracts awarded pursuant to its provisions and would prohibit discrimination in the award and performance of those contracts.

The provisions of the bill would be repealed on January 1, 2007.

Ch. 666 (AB 941) Florez. Disabled veteran business enterprises.

Under existing law, state agencies and all other state entities contracting for materials, supplies, equipment, alteration, repair, or improvement are required to have at least 3% participation goals for disabled veteran business enterprises.

The bill would require the Department of Veterans Affairs and the awarding departments to appoint disabled veteran business enterprise advocates to assist in meeting the participation goals.

The bill would also make clarifying changes.

Ch. 667 (AB 948) Kelley. Local agency formation.

(1) Existing law prescribes generally the powers and duties of the local agency formation commission in each county with respect to the review approval or disapproval of proposals for changes of organization or reorganization of cities and special districts within that county. Existing law requires that a city or special district request and receive written approval from the commission in the affected county before providing new or extended services outside its jurisdictional boundaries.

This bill would enact provisions to govern commission proceedings to consider the exercise of new or different functions or services by special districts.

(2) Existing law authorizes the commission itself to initiate certain changes of organization when consistent with a recommendation or conclusion of a specified study.

This bill would cross-reference the requirement that the commission make certain determinations concerning the likely effects of the change of organization or reorganization.

(3) Under existing law, the commission is required, with respect to the incorporation of a new city or the formation of a new district, to determine the number of voters residing within the proposed city or special district.

This bill would require the commission, with respect to the formation of a landowner-voter special district, to determine the number of owners of land within the proposed district and

the assessed value of land in the proposed district, thereby imposing a state-mandated local program.

(4) Under existing law, the commission is required to develop and determine the sphere of influence of each local governmental agency within the county. For any sphere of influence or a sphere of influence that includes a special district, the commission is required to perform certain duties, including determining that no new or different function or class of service shall be provided by any existing district, except upon approval by the commission.

This bill would repeal that requirement.

(5) Existing law authorizes the commission to undertake proceedings for the adoption, amendment, or repeal of regulations affecting the functions and services of special districts on its own initiative or in response to the initiative of the special districts and authorizes the commission to adopt, amend, or repeal those regulations. The commission may condition the approval of the application for formation of a special district upon the adoption, amendment, or repeal of regulations concerning the functions and services proposed to be provided by the district.

This bill would limit this authority to the repeal of those regulations.

(6) Existing law requires the commission to approve or conditionally approve a proposal for the consolidation or reorganization of districts into a single local agency if a majority of the members of 2 or more legislative bodies adopt substantially similar resolutions of application proposing the consolidation or reorganization.

This bill would prohibit the commission from making a material change in such a consolidation or reorganization proposal that would add or delete districts without the written consent of the applicant local agencies.

(7) Existing law authorizes the commission to order certain changes of organization without an election but requires an election in each affected city or district if the written protests meet specified requirements.

This bill would provide that when a change of organization or reorganization includes the annexation of inhabited territory to a district and the assessed value of the land or the number of registered voters in the subject territory exceeds $1/2$ of that in the existing district, the commission may require a confirmation by the voters in the subject territory.

(8) Under existing law, within 35 days after the conclusion of a hearing on an original and an alternative proposal to form a subsidiary district, the commission is required to adopt its resolution of determination that (a) denies both proposals, (b) approves both proposals, or (c) approves one proposal and denies the other.

This bill would delete the option of the commission to approve both the original proposal and the alternative proposal.

(9) Existing law authorizes the commission to make any change of organization or reorganization subject to various terms and conditions, including the fixing and establishment of priorities of use, or right of use, of water, or capacity rights in any public improvements or facilities or any other property.

This bill would provide that these specific terms and conditions shall not modify priorities of use, or right of use, to water, or capacity rights in any public improvements or facilities that have been fixed and established by a court or an order of the State Water Resources Control Board.

(10) This bill would incorporate additional changes in Section 57114 of the Government Code proposed by AB 720, to be operative if AB 720 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 668 (SB 73) Dunn. Taxation: low-income housing.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing insurance tax law and the Personal Income Tax Law and the Bank and Corporation Tax Law authorize, for so long as corresponding provisions of federal law are in effect, a credit against the taxes imposed by those state laws for certain amounts with respect to the provision of specified low-income housing. Those laws generally provide, subject to the addition of certain other amounts, that the maximum aggregate dollar amount of the credits allowed in each calendar year may not exceed \$50,000,000 for the 1999 calendar year and each year thereafter.

This bill would, for purposes of existing low-income housing tax credits, provide a \$70,000,000 maximum aggregate dollar amount for the 2001 calendar year and each calendar year thereafter. In addition, this bill would for the 2002 calendar year, and, each calendar year thereafter, provide an adjustment for inflation measured by an increase in the Consumer Price Index. This bill would require the California Tax Credit Allocation Committee to review and evaluate the geographic apportionment methodology of the low-income housing tax credit program, as provided, and to report back to the Legislature no later than June 30, 2002.

This bill would take effect immediately as a tax levy.

Ch. 669 (SB 366) Haynes. Taxation: levy and lien: innocent investor.

The Katz-Harris Taxpayers' Bill of Rights Act provides various protections and rights to taxpayers for purposes of the Personal Income Tax Law and the Bank and Corporation Tax Law.

This bill would provide that no levy for an underpayment for any taxable year beginning on or before December 31, 2000, attributable to an abusive tax shelter, shall be made on the principal residence or proceeds from a transaction involving the principal residence of an innocent investor, as defined, and would provide that a lien on that property, or the proceeds of the sale of that property, shall be released, as provided.

Ch. 670 (SB 445) Burton. Taxation: taxpayers' bill of rights.

(1) The Bagley-Keene Open Meeting Act generally requires that the meetings of state bodies, as defined, be conducted openly. Existing law requires that public writings, pertaining to a matter subject to discussion or consideration at a public meeting, that are distributed to a majority of the members of the state body shall be made available for public inspection.

This bill would provide that, in the case of the Franchise Tax Board, prior to that state body taking final action on any item, writings pertaining to that item that are public records under the act that are distributed to members of the state body by board staff or individual members prior to or during a meeting, shall be made available for public inspection at that meeting, distributed to all persons who request notice in writing, and made available on the Internet.

(2) Under existing law, there are taxpayers' bills of rights that apply to both the State Board of Equalization and the Franchise Tax Board to ensure that these taxing agencies conduct their operations of tax assessment and tax collection in a manner that ensures the privacy and property rights of California's taxpayers. In adopting the respective taxpayers' bill of rights, the Legislature made specific findings and declarations of intent regarding the expectations and responsibilities of taxpayers and the taxing agencies.

This bill would add the Legislature's finding that the purpose of any proceeding between a taxing agency and a taxpayer is the determination of the taxpayer's correct amount of tax liability, and would set forth the Legislature's intent that, in furtherance of this purpose, the taxing agency may inquire into, and should allow the taxpayer every opportunity to present, all relevant information pertaining to the taxpayer's liability.

Ch. 671 (SB 520) Chesbro. Planning and zoning.

(1) The Planning and Zoning Law prohibits governmental action or discrimination pursuant to that law because of specified reasons.

This bill would additionally prohibit governmental action or discrimination under that law because of familial status or disability.

(2) The Planning and Zoning Law requires the housing element of a local general plan to make adequate provision for the housing needs of all economic segments of the community, to include, among other things, an analysis of the special housing needs of the handicapped, and a program to address, remove constraints to, and promote housing, as specified.

This bill would recast those provisions to refer to persons with disabilities instead of the handicapped in the requirement for that analysis and to include references to persons with special housing needs within the provisions that require that housing program.

Ch. 672 (SB 809) Ortiz. State public works: Sacramento: Capitol area.

Existing law establishes the Capitol Area Plan for the orderly development of the state's facilities in the greater metropolitan Sacramento area. The Department of General Services is required to be continuously responsible for necessary revisions to the plan and for formulating and carrying out long-range development plans. Resolution Chapter 193 of the Statutes of 1996 directs the department to undertake and complete a comprehensive environmental impact report governing the development of state offices and associated facilities on priority state-owned sites in the Capitol area, as defined.

This bill would authorize the Director of General Services to purchase, exchange, or otherwise acquire real property and construct facilities within the jurisdiction of the Capitol Area Plan for a project consisting of approximately 1,400,000 gross square feet of office space on state-owned land in the Capitol area located on blocks 204 and 203, and onsite parking and a parking garage located on block 266. The bill would authorize the department to contract for the lease, lease-purchase, lease with an option to purchase, acquisition, design, design-build, construction, construction management, and other services related to the design and construction of the office and parking facilities. The bill would authorize the State Public Works Board to issue revenue bonds, negotiable notes, or negotiable bond anticipation notes to finance these costs. The bill would also provide that the project cost shall include the cost of rehabilitating, and may include the cost of relocating the Heilbron House.

Ch. 673 (SB 1122) Poochigian. Real estate: disclosures of transfer.

Existing law requires certain disclosures to be made upon the transfer of real estate and prescribes the manner and form of the disclosures. In the case of the transfer of real property subject to a continuing lien securing the levy of special taxes pursuant to the Mello-Roos Community Facilities Act, the seller is required to make a good faith effort to notify the prospective purchaser of the lien in the manner and time provided in a prescribed disclosure form. Existing law, the Proposition 218 Omnibus Implementation Act, imposes prior notice, protest, and hearing requirements when a local government levies a new or increased assessment upon real property.

This bill would require the legislative body of a local government collecting assessment installments to secure bonds issued pursuant to the Improvement Bond Act of 1915, to designate an office to perform certain duties relating to the assessment, including furnishing to any requester or the owner of any property subject to the assessment a notice of assessment containing specified information in a prescribed form. The bill would require the seller to make a good faith effort to obtain and deliver to the prospective purchaser a disclosure notice concerning the assessment installment. The bill would require this notice to be combined with notices relating to the collection of those special taxes, to the extent feasible.

Ch. 674 (SB 1193) Polanco. Small business financial development.

Existing law requires the Technology, Trade, and Commerce Agency to establish new small business financial development corporations in San Jose, Santa Ana, the San Fernando Valley, and Ontario.

This bill would additionally require that the Secretary of the Technology, Trade and Commerce Agency establish a new small business financial development corporation in southeast Los Angeles upon an appropriation in the annual Budget Act for this purpose.

Ch. 675 (AB 333) Wright. Foster care.

Existing law requires all foster children placed in group homes by county welfare departments or county probation departments to be visited at least monthly by a county social worker or probation officer.

This bill would require each of those visits to include a private discussion between the foster child and the county social worker or probation officer. The bill would prohibit the contents of the discussion from being disclosed to the group home staff, except under specified circumstances. The bill would extend similar provisions to visits by county social workers or probation officers to foster children in licensed, certified, or approved foster homes.

Ch. 676 (AB 370) Wright. Vehicles: residence addresses.

(1) Existing law requires the Department of Motor Vehicles, until January 1, 2002, to implement a pilot program to provide residence address information to an independent institution of higher education that operates pursuant to a memorandum of understanding that permits a security officer of that institution to have arrest powers, if the institution requests the address solely for the purposes of enforcing parking restrictions. Under the pilot program, a participating institution is required to enter into a contractual agreement with the department requiring the institution to establish and maintain procedures for persons to contest parking violation notices issued by the institution and to remit fees to cover the department's costs of providing each address to the institution. Existing law requires the department to submit a report to the Legislature containing its evaluation of the pilot program on or before January 1, 2001.

This bill would extend the January 1, 2002, repeal date of this program until January 1, 2004. The bill would restrict the program to an accredited degree-granting nonprofit independent institution of higher education incorporated in the state. The bill would further require that the independent institution, under penalty of perjury, request and use the information solely for the purpose of enforcing parking restrictions, thereby creating a crime and imposing a state-mandated local program. The bill would further require the contract with the department to provide that access to confidential residence address information will only be provided through an approved commercial requester account. The bill would require the department to submit a report to the Legislature containing its evaluation of the pilot program on or before January 1, 2003.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 677 (AB 590) Vargas. Mental health: adults and older adults.

The Adult and Older Adults Mental Health System of Care Act authorizes each county to implement a mental health system of care for adults and older adults. Under the act, the State Department of Mental Health is responsible for overseeing the development and implementation of these county systems, including providing training, consultation, and technical assistance to participating counties. Existing law requires that the act be implemented only to the extent that funds are appropriated in the annual Budget Act.

This bill would encourage the department to provide a mental health care provider with training and experience in geriatrics to oversee, monitor, and provide advice to participating counties regarding services for older adults under the act.

Ch. 678 (AB 636) Steinberg. Child welfare services.

Under existing law, the State Department of Social Services oversees the administration of county public social services, including child welfare services.

This bill would enact the Child Welfare System Improvement and Accountability Act of 2001. This bill would require the department to establish, by April 1, 2003, the California Child and Family Service Review System, in order to review, commencing January 1, 2004, all county child welfare systems.

This bill would, by October 1, 2002, require the California Health and Human Services Agency to convene a workgroup comprised of representatives of specified entities and organizations, to establish a work plan by which the child and family service reviews shall be conducted. It would require the department to take various measures to assist counties in ensuring that these outcomes are met.

This bill would appropriate \$100,000 from the General Fund to the agency to convene the workgroup required under the bill.

Ch. 679 (AB 685) Wayne. Family day care homes: reporting requirements: unannounced visits.

Existing law requires family day care homes to be licensed by the State Department of Social Services.

This bill would require licensees of family day care homes to report to parents any act of violence against a child or any injury to a child, and to the department any injury to a child that requires medical treatment, the death of any child, or any unusual incident or child absence that threatens the physical or emotional health or safety of any child. This bill would also permit the department to develop the report forms to be used for reporting purposes pursuant to this bill and would require the department to maintain the reports filed pursuant to this bill in a manner that allows the department to report the data to the Legislature.

This bill would permit the department, either directly or by contract and to the extent that funds are available, to conduct an evaluation of the effectiveness of unannounced visits to licensed family day care homes.

Ch. 680 (AB 828) Cohn. Long-term care facilities.

Existing law requires the State Department of Health Services to administer provisions relating to the licensing of long-term health care facilities.

This bill would require the department to establish a centralized consumer response unit in the Licensing and Certification Division of the department.

The bill would require the unit to provide certain consumer education and information about licensing and federal certification standards, resident rights, availability of facilities, referral to other entities as appropriate, and facility compliance history; to participate in telephone conference calls to resolve disputes within the authority of the department; and to initiate onsite investigations in response to oral or written complaints, concerns, or inquiries if the unit determines that there is a reasonable basis to believe that the allegations in the complaints describe one or more violations of state law by a long-term health care facility.

Ch. 681 (AB 829) Cohn. Health care.

Existing law provides for the implementation of adult day health care center oversight by the State Department of Health Services, and authorizes that department to enter into an interagency agreement with the California Department of Aging for the administration of that program.

Existing law establishes standards for certification as an adult day health care provider and adult day health care center licensing, and certification requirements.

This bill would add to licensing and certification requirements of an adult day health care center by requiring that certain disclosures be made to the State Department of Health Services concerning ownership or control interest in, and the officers of, a center, and that evidence of sufficient financial resources be provided and that those resources be maintained.

The bill would revise and add provisions regulating the denial, renewal, suspension, and revocation of a license for an adult day health care center. The bill would require a provider or applicant to submit to the California Department of Aging a facility program plan for providing adult day health care services that includes certain elements.

This bill would also recast and make technical, clarifying changes to those provisions with respect to the administration of the program.

Existing law establishes the Mello-Granlund Older Californians Act which is administered by the California Department of Aging.

Existing law authorizes the development of Alzheimer's day care resource centers under which funding is provided to a direct services contractor who provides a program of specialized day care for participants with dementia. Direct services contractors authorized to provide services under these provisions who are not licensed are exempt from various licensure requirements under the act.

This bill would revise this exemption and provide instead that direct services contractors that are not licensed as an adult day care center, adult day support center, or adult day health care center shall be exempt from various licensure requirements under the act for purposes of operating an Alzheimer's day care resource center. The bill would specify circumstances under which the exemption shall not apply. The bill would provide that the direct service contractor's Alzheimer's day care resource center license terminates if the license as an adult day care center, adult day support center, or adult day health care center is surrendered or terminated for noncompliance with applicable standards.

Ch. 682 (AB 830) Cohn. Senior legal services.¹¹

Existing law provides for the Mello-Granlund Older Californians Act, administered by the California Department of Aging, to provide specified services to frail elderly individuals 60 years of age and older.

This bill would require the department to establish a task force of specified members to study and make recommendations to the Legislature on issues relating to legal services to seniors.

This bill would appropriate \$100,000 to the department to establish the task force.

Ch. 683 (AB 899) Liu. Rights of foster children.

Existing law establishes procedures for the placement of certain children in foster care.

Existing law provides for licensing of facilities that provide foster care for children.

Existing law requires the State Department of Social Services to license defined community care facilities, including facilities that provide foster care services for children, and to adopt regulations for this purpose. Under existing law, violation of the community care licensing provisions or related regulations adopted by the department is a misdemeanor.

This bill would require those facilities that provide foster care services for children to make certain information regarding the rights of children in foster care available to those children. By changing the definition of a crime, this bill would result in a state-mandated local program.

This bill would set forth the policy of the state that children placed in foster care have certain rights, and would require social workers and facilities providing social services for children in foster care to provide those children with information regarding those rights.

To the extent this bill would increase the responsibilities of counties in the administration of the provision of foster care benefits for children, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 684 (AB 1075) Shelley. Skilled nursing facilities: staffing ratios.

Existing law provides for the licensure and regulation of health facilities, including skilled nursing facilities, by the State Department of Health Services. Existing law specifies various minimum staff-to-patient ratio requirements in skilled nursing facilities. A violation of these provisions by health facilities is subject to criminal sanction.

This bill would require the department to develop regulations that become effective August 1, 2003, that establish staff-to-patient ratios with regard to direct caregivers, as defined, working in a skilled nursing facility.

The bill would require a skilled nursing facility to post information about staffing levels. The bill would make a violation of the regulations subject to citation and fine. The bill would make the implementation of the staffing ratio requirements set forth in the bill contingent on an appropriation in the annual Budget Act or another statute.

Because the bill would change the definition of a crime with regard to health facilities, it would impose a state-mandated local program.

The bill would require the department, no later than January 1, 2006, and every 5 years thereafter, to consult with designated entities to determine the sufficiency of the staffing standards, and would authorize the department to adopt regulations to increase the minimum staffing ratios to adequate levels.

Existing law requires the department to perform a specified review of the current Medi-Cal reimbursement system and submit a report.

This bill would, instead, require the department to implement a facility-specific rate-setting system by August 1, 2004, subject to federal approval, and to submit status reports on this implementation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 685 (AB 1212) Shelley. Health facilities.

Existing law provides for the licensure and regulation of health facilities by the State Department of Health Services. A violation of these provisions is subject to criminal sanction.

Existing law authorizes and regulates the formation and operation of limited liability companies to engage in any lawful business activity.

This bill would provide that any requirement placed upon, or reference to, a corporation in the provisions regulating health facilities shall also apply to a limited liability company.

Existing law requires applicants for licensure as a health facility, for approval as a special service, or for approval to manage a health facility currently licensed as a skilled nursing or intermediate care facility to file an application containing certain information, including evidence satisfactory to the department that the applicant possesses financial resources sufficient to operate the facility for at least 45 days.

This bill would exempt a management company from the requirement to provide this information.

Existing law requires an applicant for a license to operate a skilled nursing or intermediate care facility to disclose to the state department certain information regarding general partners, corporate directors and officers, and beneficial ownership interests upon initial application for licensure and thereafter within 30 calendar days of a change in the information.

Existing law requires that this information be made available to the public upon request, and included in the public file of the facility and the department's automated certification licensing administration information management system.

This bill would provide that the latter requirement to include the information in the department's automated system shall commence July 1, 2002.

Existing law requires that, commencing January 1, 2000, there be a minimum of 3.2 actual nursing hours per patient in skilled nursing facilities.

This bill would prescribe a minimum level of nursing hours and staffing requirements for various types of facilities, or facilities treating patients with specified diagnoses.

Existing law specifies procedures for the appointment of a temporary manager to operate a long-term health care facility.

This bill would recast the above procedures and would revise the powers and duties of the temporary manager during his or her appointment. The bill would authorize the department to use funds from the existing Health Facilities Citation Penalties Account to operate the facility after all other facility revenues are exhausted.

Existing law specifies procedures for the appointment of a court appointed receiver to manage a long-term health care facility. Existing law prohibits the management of a long-term health care facility operated by a receiver from being returned to the licensee and designated persons.

This bill would allow the facility to be returned to the licensee and the designated persons if certain conditions are met.

Under existing law, if a long-term health care facility does not agree to the appointment of a temporary manager, and the department successfully obtains a court-appointed receiver, management of the facility may be returned only if certain conditions are met.

This bill would delete this provision.

Existing law requires the department to prepare and maintain a list of approved training programs for nurse assistant certification, and requires a skilled nursing and intermediate care facility to adopt an approved precertification training program. Existing law requires that these training programs consist of a specified number of hours of classroom training and supervised on-the-job training clinical practice. Existing law requires that 4 hours of the supervised, on-the-job training clinical practice address the special needs of persons with specified developmental and mental disorders.

This bill would require that 2 hours of the classroom training address the special needs of persons with specified developmental and mental disorders. The bill would revise the supervision requirements for the supervised and on-the-job training clinical practice.

Existing law requires a long-term health care facility to post a notice of remedies imposed for violation of specified state or federal requirements.

This bill would specify the form of the above notice, which the bill would designate the "Notice of Violation Remedies."

Existing law requires the department to promote quality of care and life in long-term health care facility services through specific activities.

This bill would revise these activities.

Existing law requires the department, within 10 working days of the completion of a complaint investigation regarding a long-term health care facility, to notify the complainant in writing of the department's determination.

This bill would extend this notification requirement of the department to the licensee of the facility.

Existing law provides for the Skilled Nursing Facility Financial Solvency Advisory Board, which consists of the director and 7 members appointed by the director who are required to have training and experience in various areas or fields.

This bill would revise the training and experience requirements.

Existing law requires the department to implement a consumer information service system regarding long-term care facilities.

This bill would revise the information the system is required to contain.

Existing law authorizes the department to rescind the permanent license of designated nursing facilities, under specified circumstances, and issue a provisional license.

This bill would revise these provisions by changing references to the facilities' permanent license to refer instead to a regular license.

Existing law requires the department to provide a copy of certain citations imposed against long-term care facilities to the affected residents mentioned in the violation and to the affected residents' family or designated legal representative.

This bill would revise the list of recipients of the required notice.

Existing law requires the department to provide, on or before October 1 of each year, to the Legislature a summary of federal enforcement actions taken against nursing facilities during the previous fiscal year.

Existing law requires the department to review the effectiveness of the enforcement system in maintaining the quality of care provided by long-term health care facilities and submit a specified report to the Legislature on or before December 1, 2001, and annually thereafter.

This bill would require that the summary be provided instead on or before December 1 of each year, and would require that it also include state enforcement actions as specified under the bill. The bill would require that the summary of federal and state enforcement actions be combined with the report on the effectiveness of the enforcement system into a single report.

Existing law prohibits a licensee of a long-term care facility from discriminating or retaliating in any manner against any patient or employee in its facility based on the presentation of a grievance or complaint or activities related to a specified investigation or proceeding at the facility.

This bill would extend this prohibition to apply to discriminating or retaliating against any complainant, as defined under the bill. Because the bill would extend this prohibition applicable to long-term care facilities, it would change the definition of a crime thereby imposing a state-mandated local program.

Existing law requires the director to adopt regulations increasing the minimum number of equivalent nursing hours per patient required in specified types of nursing and care facilities.

This bill would prescribe the minimum number of nursing hours per patient day required in skilled nursing facilities except in certain types of facilities or facilities treating patients with specified diagnoses.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 686 (AB 1261) Migden. Independent Living Program.

Existing federal law provides for federal financial participation with states providing foster care and transitional independent living programs for eligible children.

Existing law provides for the administration of county transitional housing placement programs that provide transitional housing services for eligible children who are in out-of-home placement under the supervision of the county department of social services or the county probation department, and who are participating in an independent living program.

Existing law permits a child declared a ward or dependent child of the juvenile court, who is age 16 years or older and who is a participant in the Independent Living Program pursuant to federal law, to retain cash savings, not to exceed \$5,000, as a resource exemption, pursuant to the child's Independent Living Program Case Plan which money shall be for the child's use for purposes directly related to emancipation.

This bill would increase to \$10,000 the amount of this accumulated savings exemption.

This bill would also revise the requirements for retention of the cash savings to require that a child who is declared a ward of the court or dependent child of the juvenile court may retain

the cash savings pursuant to federal law regarding the foster care maintenance payments program and pursuant to the child's transitional independent living plan.

By increasing amounts of resources that will not be considered in determining eligibility to receive transitional assistance, the bill would increase the class of persons eligible to receive transitional aid assistance, and so would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 687 (AB 1409) Chan. Nursing home administrators.

Existing law, the Nursing Home Administrator's License law, which is contained in the Business and Professions Code, provides for the licensing and regulation of nursing home administrators by the State Board of Nursing Home Administrators of the State of California and specifies the duties of the board.

This bill would repeal these provisions. The bill, instead, would enact provisions in the Health and Safety Code, designated as the Nursing Home Administrators' Act, that would establish in the State Department of Health Services a Nursing Home Administrator Program (NHAP) that would license and regulate nursing home administrators. In this regard, the bill would specify the duties and authority of the program, define various terms, specify licensing requirements, including application procedures, qualifications for and content of licensing examinations, and application and examination fee requirements, provide procedures for out-of-state nursing home administrator licensees to obtain a one-year provisional license, and require the department to develop a specified administrator-in-training program and establish a designated citation and administrative fine assessment system.

This bill would also require a nursing home administrator to notify, in writing, the department's office for licensing and certification upon the occurrence of specified acts affecting the administration of the nursing home.

The bill would make it a misdemeanor to engage in certain subversive activities related to the implementation of the nursing administrator licensing examination. Because the bill would create a new crime, it would impose a state-mandated local program.

Existing law provides for the Nursing Home Administrator's State License Examining Board Fund, a continuously appropriated fund, in the Professions and Vocations Fund in the State Treasury.

Existing law specifies a schedule of fees that are charged for the application and examination of applicants for licensure as nursing home administrators and requires those fees to be deposited in the Nursing Home Administrator's State License Examining Board Fund.

This bill would rename the fund the Nursing Home Administrator's State License Examining Fund and continue the fund in existence in the State Treasury. The bill would revise the fee schedule. The bill would also require that fines collected under the citation and administrative fine assessment system required under this bill be deposited in the Nursing Home Administrator's State License Examining Fund.

Because the bill would increase the amount deposited into the Nursing Home Administrator's State License Examining Fund, as renamed by this bill, which is a continuously appropriated fund, it would make an appropriation.

This bill would incorporate additional changes in Section 101 of the Business and Professions Code proposed by SB 26 that would become operative only if SB 26 and this

bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 688 (SB 104) Scott. Adoption.

Existing law provides that, after a consent to an adoption is signed by the birth parent or parents, the birth parent or parents have a 90-day period in which to either sign and deliver to the department or delegated county adoption agency a written statement revoking the consent and requesting the child to be returned to the birth parent or parents, or to sign a waiver of the right to revoke consent on a form prescribed by the department in the presence of a representative of the department or delegated county adoption agency. Existing law also provides that the consent may not be revoked after a waiver of the right to revoke consent has been signed or after the 90-day period, as specified.

This bill would revise the above provisions by instead providing that the birth parent or parents have a 30-day period in which to sign and deliver to the department or delegated county adoption agency a written notarized statement revoking the consent and requesting the child to be returned to the birth parent or parents or to sign the waiver of the right to revoke consent on a form prescribed by the department in the presence of a representative of the department or delegated county adoption agency. The bill would provide that, after revoking consent, the birth parent or parents may reinstate the original consent by signing and delivering a written notarized statement to that effect to the department or delegated county adoption agency, in which case the revocation of consent would be void and a new 30-day period would commence. The bill would also make conforming changes.

Ch. 689 (SB 370) Ortiz. Seniors: Wellness and injury prevention programs.

Existing law requires the California Department of Aging, among other things, to administer the Mello-Granlund Older Californians Act that establishes various programs that serve older individuals, including aging informational and educational programs.

This bill would establish within the department the StayWell Program, for the provision of educational information to seniors, families, caregivers, and other entities on a healthy lifestyle and the resources and services available for seniors, and to promote education and training for professionals and caregivers who work directly with seniors in order to maximize wellness.

This bill would establish the Program for Injury Prevention in the Home Environment, under which the department, through the Senior Housing and Information Support Center in the department, would be required to award grants to eligible local level entities for injury prevention information and educational programs and services.

Ch. 690 (SB 511) Alpert. Children with disabilities.

Existing law requires the Superintendent of Public Instruction, in connection with diagnostic centers established for the purpose of the diagnosis of disabled children to provide counseling services for parents, guardians, and families of disabled children.

This bill would require the State Department of Education to award grants for the establishment of Family Empowerment Centers on Disability in each of the 32 regions in the state established under the Early Start Family Resource Centers that are operated by the State Department of Developmental Services for the purpose of extending services to communities not receiving services, as specified. The bill would require the department to issue requests for proposals, select grantees, and award grants, as specified. The bill would require the centers to be staffed primarily by parents and guardians of children and young people with disabilities, as specified. The bill would require centers receiving funding and

servicing the parents and guardians of children and young adults from age 3 years to age 18 years and those young adults from age 19 years to age 22 years who had an individualized education plan prior to their 18th birthday to provide specified services to parents and guardians of children and young adults with disabilities. The bill would require that funding for centers be allocated based upon a specified formula. The bill would require the establishment of a statewide Family Empowerment and Disability Council to provide assistance to Family Empowerment Centers on Disability, as specified.

The bill would appropriate \$2,372,000 to the State Department of Education, as specified, from federal funds received by the state from the federal Department of Education for special education capacity building, for purposes of Family Empowerment Centers on Disability.

Ch. 691 (SB 587) Soto. Health facilities: critically or terminally ill patients: transfers.

Existing law provides for the licensure and regulation of health facilities by the State Department of Health Services. A violation of these provisions is subject to criminal sanction.

This bill would require each hospital to have in effect a discharge planning policy that requires appropriate arrangements for posthospital care and a process that requires that each patient shall be informed of his or her continuing health care requirements, and would specify the implementation of certain patient discharge procedures, including a requirement that a transfer summary be provided when a patient is being transferred to a long-term health care facility.

The bill would require a hospital to advise a patient of certain rights prior to discharging the patient.

The bill would require hospitals to establish and implement a written policy to ensure that each patient receives information regarding each medication given at the time of his or her discharge.

Under existing law, one of the types of long-term health care facilities is a skilled nursing facility.

This bill would require that a skilled nursing facility shall admit a patient only upon a physician's order and only if the facility is able to provide necessary care for the patient. It would also impose other preadmission requirements upon skilled nursing facilities.

The Knox-Keene Health Care Service Plan Act of 1975 provides for the regulation and licensing of health care service plans by the Department of Managed Health Care and makes the willful violation of any of its provisions a crime. Existing law also provides for the regulation of policies of disability insurance and long-term care policies and certificates by the Insurance Commissioner.

This bill would prohibit any health care service plan contract, certain disability insurer contracts, and any long-term care policies or certificates that are issued, amended, renewed, or delivered on and after January 1, 2002, from containing a provision that prohibits or restricts any health facilities' compliance with the requirements of the bill.

Because the bill would impose additional requirements on health care service plans and health facilities, violations of which constitute a criminal offense, it would expand the scope of an existing crime, thereby creating a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 692 (SB 639) Ortiz. Alzheimer's disease and related disorders: demonstration projects.¹²

Existing law establishes a number of mental health programs administered by various state or local entities.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill, until January 1, 2003, would require the California Health and Human Services Agency to develop a strategic plan for improving access to mental health services for people with Alzheimer's disease or related dementia and to complete the plan and submit a report to the Governor and the Legislature no later than January 1, 2003.

This bill would also appropriate, without regard to fiscal years, \$85,000 from the General Fund to the agency for the purpose of implementing the bill.

Ch. 693 (SB 696) Speier. Pharmacies: prescription benefits: Medicare beneficiaries.

Existing law requires the State Department of Health Services to conduct a study of the adequacy of Medi-Cal pharmacy reimbursement rates.

This bill would require the department to report the results of the study to the Legislature by July 1, 2002.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services, including prescription benefits. Under existing law, the department pays participating pharmacists a discounted price for drugs on a Medi-Cal list of contract drugs, and obtains best price rebates from drug manufacturers.

Existing law, operative until January 1, 2003, requires Medicare beneficiaries, upon showing their Medicare card and prescription, be charged a price not to exceed the Medi-Cal reimbursement rate for prescription medicines, and an amount to cover electronic transmission charges, as a condition of a pharmacy's participation in the Medi-Cal program.

This bill would enact the Golden Bear State Pharmacy Assistance Program, participation in which would be voluntary for Medicare beneficiaries, pharmacies, and drug manufacturers.

The bill would require participating pharmacies to charge prices based on specified components, including rebates to be negotiated with drug manufacturers, and would require the department to pay pharmacies an amount based on these rebates. It would further require rebate amounts paid by the department with respect to a manufacturer's drug to also be paid by the manufacturer to the department.

The bill would require moneys received from drug manufacturers pursuant to the bill to be deposited into the Golden Bear State Pharmacy Assistance Program Rebate Fund, which would be created by the bill. The fund would be continuously appropriated to the department without regard to fiscal years for implementation of the bill.

This bill would only be implemented upon the receipt of all necessary federal approvals and if the department is able to negotiate a sufficient number of rebate agreements.

The bill would appropriate \$1,000,000 from the General Fund to the department, in the form of a loan, for startup costs for implementation of the bill.

Ch. 694 (SB 841) Alpert. Foster care: Early Start to Emancipation programs.

Existing law makes provision for the placement of certain children in foster care, and provides for child welfare services, which are public social services directed toward, among other purposes, protecting and promoting the welfare of all children, including those in foster care placement.

This bill would require the State Department of Social Services to provide technical assistance and training to help counties that elect to establish Early Start to Emancipation programs similar to a program established in the County of Los Angeles that provides services to foster youth as they transition from middle school to high school.

This bill would appropriate to the department the sum of \$125,000 for the purposes of the bill, to be allocated as prescribed.

Ch. 695 (SB 771) Figueroa. Unsolicited and unwanted telephone solicitations.

Existing law prohibits certain unfair business practices, including certain advertising practices.

This bill would require the Attorney General, not later than January 1, 2003, to maintain a "do not call" list, containing the telephone numbers and ZIP Codes of residential or wireless telephone subscribers who do not wish to receive unsolicited and unwanted telephone calls from telephone solicitors. It would prohibit, subject to certain exceptions, a telephone solicitor from calling any telephone number, beginning on or after the 31st day after the then current "do not call" list becomes available, to, among other things, seek to offer a prize, to rent, sell, exchange, promote, gift, or lease any goods or services, to offer or solicit credit, to seek certain marketing information, or to seek to sell or promote any investment, insurance, or financial services. It would also prohibit persons who sell, lease, exchange, or rent telephone solicitation lists, except for directory assistance and telephone directories sold by telephone companies, from including in their lists telephone numbers that appear on the then current "do not call" list. Fees paid in connection with the "do not call list" by subscribers and solicitors would be deposited in the Special Telephone Solicitors Fund created by the bill.

Existing law makes it a crime to violate any of the provisions governing advertising. By adding these new prohibitions to those provisions, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 696 (AB 870) Wesson. Public utilities: automatic calling equipment.

(1) Existing law authorizes the Public Utilities Commission to control and regulate the use of automatic dialing-announcing devices and specifies the hours during which the devices may not be operated.

This bill would prohibit, on and after July 1, 2002, any person operating specified automatic calling equipment from making a telephone connection for which no person, acting as an agent or telemarketer, is available for the person called, as prescribed. The bill would require the commission to establish, before July 1, 2002, an acceptable error rate for telephone connections made in violation of that prohibition. Because a violation of a requirement of the commission is a crime, this bill, by requiring the commission to establish the error rate, would change the definition of a crime, thereby imposing a state-mandated local program. The bill would authorize the commission to require any person operating that specified equipment to maintain prescribed records for submission to the commission.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 697 (AB 75) Steinberg. Principal Training Program.

Existing law prohibits a person from being employed as principal of a school of 6 or more certificated employees unless he or she holds a valid school administration credential and a teaching credential or a services credential with a specialization in pupil personnel, health, clinical or rehabilitative, or librarian services. Existing law includes among the minimum requirements for a preliminary services credential with specialization in administrative services completion of an entry level program of specialized and professional preparation in administrative services and current employment in an administrative position after completion of the professional preparation. Existing law includes among the minimum requirements for a professional services credential with specialization in administrative services a minimum of 2 years of successful experience in a full-time administrative position

in a public school or private school of equivalent status while holding a preliminary administrative services credential and completion of a program of advanced preparation.

This bill would establish, until July 1, 2006, the Principal Training Program to provide incentive funding to provide schoolsite administrators with instruction and training. The bill would require the State Board of Education, in consultation with the Commission on Teacher Credentialing or any other entity with specified expertise, to develop criteria for the approval of state-qualified training providers. The bill would require the State Department of Education to develop, and the State Board of Education to review and approve, interim and final reports containing prescribed information on the status of the program.

Ch. 698 (AB 160) Bates. Domestic violence: protective orders.

Existing law provides that if a defendant is charged with a domestic violence crime, the court with jurisdiction over that matter may, upon a good cause belief that harm, intimidation, or dissuasion of a victim or witness has occurred or is reasonably likely to occur, issue specified orders, including restraining or protective orders against the defendant. Existing law further provides that a restraining or protective order issued in a domestic violence criminal case has precedence over any other court order against the defendant.

This bill would state the Legislature's findings and declarations with respect to the relationship between civil and criminal restraining or protective orders. This bill would specify that the criminal restraining order or protective order has precedence in enforcement over any civil court order that pertains to the same persons. The bill would direct the Judicial Council of California to promulgate a protocol, for adoption by local courts, to provide for coordination of all orders regarding the same persons. This bill would require that the protocol include mechanisms for communication and information sharing, as specified, and permit family or juvenile court orders to coexist with criminal court orders as long as the orders protect the safety of the parties, as specified.

Existing law requires the Department of Justice to maintain a Domestic Violence Restraining Order System containing information regarding various protective and restraining orders and injunctions, including orders to protect victims of violent crime from specified types of contact with the defendant. Under existing law, when a court issues an order to protect a victim of violent crime from contact with the defendant, the court or its designee must transmit that order to law enforcement personnel within one business day. Existing law further provides that specified information regarding the order must be transmitted to the Department of Justice for inclusion in the Domestic Violence Restraining Order System.

This bill would require a court that modifies, extends, or terminates an order protecting a victim of violent crime from contact with the defendant to transmit that modification, extension, or termination to the law enforcement agency that entered the protective order into the Domestic Violence Restraining Order System. This bill would also require modifications, extensions, and terminations of orders protecting victims of violent crime from contact with the defendant to be issued on forms adopted by the Judicial Council of California and approved by the Department of Justice.

This bill would provide that its provisions shall be implemented on January 1, 2003.

This bill would incorporate additional amendments to Section 6380 of the Family Code contingent upon the prior enactment of AB 731.

By imposing new reporting duties on local law enforcement agencies, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 699 (AB 232) John Campbell. Administration of estates and trusts.

Existing law provides that the grant or refusal to grant certain orders regarding a decedent's estate is appealable, including orders adjudicating the merits of a claim regarding the transfer or conveyance of real property of a decedent.

This bill would make that provision applicable to any final order relating to the proration of estate taxes or generation-skipping transfer taxes, as specified. The bill would also revise that provision to make it inapplicable to the orders described above.

Existing law authorizes a personal representative of an estate, and the attorney for the personal representative of the estate, to be compensated for ordinary services based on the value of the estate accounted for by the personal representative at a rate of 4% on the first \$15,000, 3% on the next \$85,000, and 2% on the next \$900,000, and as further specified.

This bill would change those specific rates to 4% on the first \$100,000, 3% on the next \$100,000, and 2% on the next \$800,000.

Existing law also specifies that regardless of the provisions in a decedent's will, a personal representative who is an attorney may receive the personal representative's compensation but cannot receive compensation for services as the attorney for the personal representative unless the court approves the right to compensation.

This bill would instead provide that a personal representative who is an attorney shall be entitled to receive the personal representative's compensation, as specified.

Ch. 700 (AB 358) Kelley. Water quality: Cathedral City.

The Porter-Cologne Water Quality Control Act authorizes a California regional water quality control board, in a water quality control plan, to specify certain areas where the discharge of waste, or certain types of waste, will not be permitted. The act authorizes a regional board, under certain circumstances, to make a determination that the discharge of waste from existing or new individual disposal systems that utilize subsurface disposal should not be permitted.

This bill would require the appropriate regional board, on and after January 1, 2012, to prohibit the discharge of wastewater into the ground through the use of individual subsurface disposal systems in the Cove area of Cathedral City in Riverside County for the purposes of protecting the health and safety of the residents consuming the groundwater of the Upper Coachella Valley Groundwater Basin. The bill would authorize the appropriate regional board, prior to January 1, 2012, to implement this prohibition. The bill would require the regional board to revise its water quality control plan to reflect this prohibition. The bill would make related findings and declarations.

Ch. 701 (AB 436) Chan. Resources and environmental protection: California Environmental Quality Act: focused environmental impact reports.

(1) The existing California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect. The act authorizes the utilization of a focused environmental impact report on any subsequent project identified in a master environmental impact report, if the lead agency finds that the analysis in the master environmental impact report of cumulative impacts, growth inducing impacts, and irreversible significant effects on the environment is adequate for the subsequent project. The act also requires the lead agency to prepare a focused environmental impact report notwithstanding that the project was not mentioned in a master environmental impact report, where a project consists of not

more than 100 units or a residential and commercial or retail mixed-use development of not more than 100,000 square feet, if the project meets specified requirements.

This bill would, until January 1, 2005, authorize a focused environmental impact report to be prepared for a project in the City of Oakland that consists of multiple-family residential development, or a residential and commercial or retail mixed-use development with not more than 25% of the total floor area of the project utilized as retail space, if certain conditions are met, including a condition that the Oakland City Council vote to authorize the implementation of the bill by voting to approve the practice of preparing focused environmental impact reports in specified central business target housing areas. The bill would also exclude that vote and a related determination by the council from the definition of "project" for the purposes of CEQA. By imposing a duty on the City of Oakland to make additional determinations, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that, due to unique circumstances relating to the City of Oakland, a general statute cannot be made applicable.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 702 (AB 539) Maddox. Marital: liability: spousal debts.

Existing law provides that a married person is personally liable for debts incurred by the person's spouse for necessities of life, as specified, and provides that the married person's separate property may be applied to the satisfaction of these debts.

Existing law sets forth various statutes of limitations for the commencement of civil actions.

This bill would specify that an action based upon the marital liability of a deceased spouse must be commenced within a one-year period, except as specified.

Ch. 703 (AB 583) Jackson. Dissolution of marriage: community property.

Existing law requires a full and accurate disclosure of all assets and liabilities in which one or both parties have or may have an interest to be made in a proceeding for dissolution of marriage or legal separation of the parties, regardless of the characterization as community or separate, together with a disclosure of all income and expenses of the parties. Existing law provides that each party has a continuing duty to update and augment that disclosure to the extent there have been any material changes, as specified.

This bill would modify the provision regarding each party's continuing duty to update and augment his or her disclosure by providing that each party shall do so immediately, fully, and accurately upon material change. The bill would also make related, conforming changes.

Existing law requires each party, from the date of separation to the date of the distribution of the community property, to provide the other party with an accurate and complete written disclosure of any investment opportunity that presents itself after the date of separation, but that results from any investment of either spouse from the date of marriage to the date of separation, inclusive. Existing law requires that written disclosure be made in sufficient time for the other spouse to make an informed decision as to whether he or she desires to participate in the investment opportunity.

This bill would additionally require the disclosure to contain any investment opportunity, business opportunity, or income-producing opportunity that presents itself after the date of separation, but that results from any investment, business activity, or other income-producing opportunity of either spouse from the date of marriage to the date of separation, inclusive. The bill would require that the written disclosure be made in time for the other spouse to make an informed decision as to whether he or she desires to participate in the business or other potential income-producing opportunity, and for the court to resolve

any dispute regarding the right of the other spouse to participate in the opportunity. The bill would also provide that specified standards apply to all activities that affect the assets or liabilities of the other spouse, and the income or expenses of the party.

Existing law requires each party to a proceeding for dissolution or nullity of marriage or legal separation of the parties to serve on the other party, under specified circumstances, a final declaration of disclosure to be executed under penalty of perjury on a form prescribed by the Judicial Council.

This bill would revise provisions authorizing a stipulation of a mutual waiver of the requirement governing a final declaration of disclosure. The bill would require a court to set aside a judgment upon failure to comply with all disclosure requirements, and would revise the sanctions for violation of the requirements governing a preliminary or final declaration of disclosure. The bill would also make related, conforming changes. By revising the elements of perjury, this bill would alter the definition of a crime and thus impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 704 (AB 585) Nation. Public accountants.

(1) Existing law provides for the licensing and regulation of the practice of accountancy by the State Board of Accountancy in the Department of Consumer Affairs. Pursuant to existing law, the board may adopt rules and regulations to carry out and facilitate its duties. Existing law requires that an applicant for the certified public accountants' examination meet specified educational requirements and that an applicant for licensure as a certified public accountant meet certain educational and experience requirements.

This bill would revise these provisions relating to educational and experience requirements.

(2) Under existing law, a certified public accountant license candidate is required to pass a written examination. Existing law provides that a candidate who passes 2 or more subjects but fails the examination has the right to be reexamined in only the remaining subjects.

This bill would repeal this requirement on January 1, 2006, when new examination requirements, as specified, would apply.

(3) Existing law requires that an applicant for a certified public accountant license be over 18 years of age, and prohibits the board from giving a license to an applicant with a certified public accountant license from another state who is not over 18 years of age.

This bill would delete this age requirement.

(4) Existing law requires an applicant for licensure as a certified public accountant to demonstrate experience in the attest function.

This bill would require a firm to meet specified peer review requirements in order to provide attest services and would require an individual applicant to meet specified criteria to sign reports on attest engagements. The bill would require the board to adopt regulations implementing and interpreting new application, examination, education, and licensure process requirements.

(5) Existing law provides that a person holding a valid and unrevoked license from any state may practice public accountancy after submitting an application for licensure and showing proof of qualifying continuing education.

This bill would also authorize a qualified applicant to perform attest services.

This bill would make other related changes.

(6) The bill would provide that it would become operative only if SB 133 is enacted and becomes effective on or before January 1, 2002.

Ch. 705 (AB 620) Wayne. Education: high-tech high schools.

Existing law establishes various programs for enhancement of technology skills of pupils, including, but not limited to, the California Summer Science and Technology Academy, the Education Technology Grant Program Act of 1996, the Archie-Hudson and Cunneen School Technology Revenue Bond Act, the Education Technology Staff Development Program, the California Technology Assistance Project, and the Digital High School Education Technology Grant Act of 1997.

This bill would, until January 1, 2003, establish the High-Tech Schools Grant Program to provide grants to eligible school districts or charter schools for the purpose of establishing new high-tech high schools. The grant program would be administered by the Superintendent of Public Instruction, with the approval of the State Board of Education and with the assistance of an advisory board, who would be required to award grants under the program on a competitive basis. The amount of a grant under the program would be \$2,000,000 and would require a local match that is at least equal to the amount of the grant. The bill would require that all funds awarded under the program be used to establish high-tech high schools, as defined. The bill would state that funding for the purposes of the grant program would be contingent on an appropriation made in the annual Budget Act, other legislation, or both.

Ch. 706 (AB 646) Horton. Sales and use taxes: exemptions: medical supplies purchased by surgical clinics.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax, including an exemption for specified medical supplies purchased through a doctor's prescription, or furnished by a doctor, dentist, or podiatrist in the treatment of a patient, or furnished by a health facility for treatment prescribed by a doctor, dentist or podiatrist.

This bill would include specified clinics in the definition of a health facility described in this exemption.

This bill would incorporate changes made by AB 249 that would become operative if both bills are enacted and this bill is enacted after AB 249.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 707 (AB 664) Dutra. Domestic violence programs.

Existing law provides that the Office of Criminal Justice Planning may expend funds for local domestic violence programs, subject to the availability of funds therefor.

This bill would appropriate \$2,000,000 to the Office of Criminal Justice Planning to fund programs that have previously received funds, but were not selected for funding in 2001. The bill would set forth findings.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 708 (AB 677) Steinberg. Persons with disabilities.

(1) Existing law provides that no person in the state shall be unlawfully denied the benefits of, or unlawfully subjected to discrimination under, any program or activity that is funded

directly by the state or receives any financial assistance from the state, on the basis of ethnic group identification, religion, age, sex, color, or disability, and defines the term “disability” for these purposes.

This bill instead would provide that no person in the state shall, on any of those bases, be unlawfully denied full and equal access to the benefits of, or unlawfully subjected to discrimination under, any program or activity that is conducted, operated, or administered by the state or by any state agency, is funded directly by the state, or receives any financial assistance from the state. It would also revise the definition of “disability” for these purposes.

Existing law also specifies a hearing procedure for determining violations of the above provisions, requires curtailing state funding for any contractor, grantee, or local agency found to be in violation, and makes these provisions and regulations adopted thereunder enforceable by a civil action for equitable relief.

This bill would provide that any civil action for equitable relief shall be independent of any other rights and remedies.

(2) Existing law authorizes a disabled person, any temporarily disabled person, and any disabled veteran, including those temporarily traveling in the state, to apply to the Department of Motor Vehicles for the issuance of a distinguishing placard for specified parking purposes. The placard is required to be the size and color determined by the department and to have a fixed expiration date of June 30 every 2 years. The fee for an original application, a renewal application, or the issuance of a new or substitute placard is fixed at \$6.

This bill would provide that the placard shall also be in the shape determined by the department, and would require that a portion of the placard be printed in a contrasting color that shall be changed every 2 years. It would also repeal the fees, except for a temporary placard for a person who is temporarily disabled.

Ch. 709 (AB 717) Wiggins. Information Technology Career Academy Grant Initiative.

Existing law, the Digital High School Education Technology Grant Act of 1997, establishes a program to provide high school pupils with basic computer skills including, but not limited to, Internet search and retrieval tools, so as to, among other things, improve pupil achievement in all academic subjects.

This bill would, until January 1, 2003, establish the California Information Technology Career Academy Grant Initiative to establish a partnership between the state and the National Academy Foundation and would provide grants to create up to 100 information technology career academies in public high schools.

Ch. 710 (AB 770) Nakano. Cellular telephones: vehicles: study.

(1) Existing law requires the Department of the California Highway Patrol to prepare and, on request, supply to police departments, coroners, sheriffs, and other suitable agencies or individuals, forms for accident reports required under the Vehicle Code that call for sufficiently detailed information to disclose with reference to a traffic accident the cause, conditions then existing, and the persons and vehicles involved.

This bill would require any traffic collision report prepared by a member of the Department of the California Highway Patrol or any other peace officer, to include information as to whether a cellular telephone or other driver distraction or inattention, as defined, is a known or suspected associated factor to the cause of the collision.

The bill would require this information to be collected and transmitted to the department by July 1, 2002.

The bill would require the department to study and make recommendations concerning the issue of driver distractions and inattention as they relate to associated factors to the cause of traffic collisions. The bill would require the department to develop recommendations for legislative or regulatory action to address these issues, to review and analyze a sample of

existing studies and statistics relating to the issue of driver distractions and inattention as associated factors to the cause of traffic collisions, and to report to the Legislature and Governor by December 31, 2002.

Because the bill would increase the level of services imposed on local law enforcement agencies, the bill would create a state-mandated local program.

(2) The bill would remain in effect only until January 1, 2003, and as of that date, would be repealed unless a later enacted statute deletes or extends that date.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 711 (AB 865) Hertzberg. Credit cards.

Existing law regulates credit card issuers, as specified.

This bill, operative July 1, 2002, except as otherwise specified, and applicable as specified, would require a credit card issuer to provide to the cardholder in each billing statement various statements regarding the length of time it will take, at various payment rates, to pay off the balance due on an open-end credit card account, as well as related information, and a certain table to be developed by the Department of Financial Institutions, as specified.

Ch. 712 (AB 1017) Jackson. Victims of crime.

(1) Existing law provides for the indemnification of victims and derivative victims of specified types of crimes, for certain expenses for which the victim or derivative victim has not been and will not be reimbursed from any other source. A "derivative victim" is defined for these purposes as a resident of the state who meets additional criteria, and may include parent, sibling, spouse, or child of the victim. Indemnification is made under these provisions from the Restitution Fund, which is continuously appropriated to the California Victim Compensation and Government Claims Board for these purposes.

This bill would include the grandparent or grandchild of the victim within the definition of "derivative victim" for these purposes, and would authorize, until January 1, 2007, reimbursement for outpatient mental health services to a nonresident of the United States who otherwise meets the criteria for reimbursement, as a derivative victim under these provisions. The bill would provide for the reimbursement of specified individuals for expenses incurred in an amount not to exceed \$1,000 for cleaning the scene of a crime in a residence when the victim has died as a result of the crime.

(2) Existing law authorizes the prescribed period for filing an application for crime victim assistance with the board to be extended for a period not to exceed 3 years after the date of the crime or 3 years after the victim attains 18 years of age, whichever is later, except that the board may grant an additional extension under certain circumstances, some of which apply only until January 1, 2003.

This bill would provide that the period of time prescribed for filing by or on behalf of a derivative victim shall be tolled when the board accepts the application filed by a victim of the same qualifying crime. It would extend the application of certain circumstances for extension of the filing period to January 1, 2004.

(3) Existing law provides that no reimbursement shall be made for any expense that is submitted more than 3 years after it is incurred by a victim or derivative victim.

This bill would provide that reimbursement may be made for an expense submitted more than 3 years after the date it is incurred if the victim or derivative victim has affirmed the debt

and is liable for the debt at the time the expense is submitted for reimbursement, or has paid the expense as a direct result of a crime for which a timely application has been submitted.

(4) Existing law, until January 1, 2003, includes the primary caretaker of a minor victim who was not the primary caretaker at the time of the crime within the definition of "derivative victim" for purposes of indemnification, defines "injury" to include emotional injury when sustained as a result of a crime committed in violation of specified provisions of law under certain circumstances, defines "crime" to include injury or death caused by a person in violation of specified provisions of law, and authorizes reimbursement for services provided by a person who qualifies as a psychology intern according to specified criteria. Among the criteria is a requirement that the intern is under the supervision of a licensed mental health professional, described as a psychiatrist, psychologist, or social worker.

This bill would extend the operation of these provisions until January 1, 2004, except that it would extend indefinitely the provisions authorizing reimbursement for services provided by a person who qualifies as a psychology intern. The bill would expand the description of a licensed mental health professional for purposes of intern supervision to include a marriage and family therapist. It would additionally provide for reimbursement for services provided by a person licensed as a registered nurse according to specified criteria.

(5) Existing law, until January 1, 2003, requires the board to consider certain factors with respect to a victim's age, physical condition, and psychological state, as well as any compelling health and safety concerns, in determining eligibility for indemnification as a victim of crime, and provides certain exceptions for prohibitions on indemnification.

This bill would extend the operation of these provisions until January 1, 2004.

(6) Existing law, until January 1, 2003, provides for specified conditions on the reimbursement for mental health counseling for certain derivative victims of crime.

This bill would extend the operation of these provisions to January 1, 2004.

(7) Existing law allows certain victims to apply for reimbursement for, among other things, up to \$2,000 for specified relocation expenses, including first and last month's rent, in the case of an adult victim of domestic violence, and \$5,000 or more when justified, to make a residence accessible or vehicle operational in the case of a victim disabled as a result of the crime.

This bill would provide that the victim need not be an adult to qualify for those relocation expenses, and would include a security deposit within the reimbursable expenses. The bill would delete any limit on reimbursement to make a residence or vehicle accessible or a vehicle operational for a disabled victim.

(8) This bill would make other technical, nonsubstantive changes.

(9) By providing for an expanded pool of recipients of, an extended period of time for expending, and a new use for, moneys from a continuously appropriated fund, this bill would make an appropriation.

(10) This bill would incorporate additional changes in Section 13961.01 of the Government Code proposed by AB 409, to be operative if this bill and AB 409 are both enacted and become effective on or before January 1, 2002, and this bill is enacted last. It would also incorporate additional changes in Section 13965 of the Government Code proposed by AB 1019, to be operative if this bill and AB 1019 are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 713 (AB 1129) Liu. Juvenile court proceedings.

Existing law authorizes the juvenile court to issue ex parte orders enjoining a parent, guardian, or current or former member of a dependent child's household from striking, assaulting, battering, or engaging in other specified violent behavior against the child or excluding that person from the dwelling of the person who has care, custody, and control of the child. A willful and knowing violation of an order issued pursuant to this provision is a misdemeanor.

This bill would expand that provision to enjoin any person from engaging in that behavior or exclude any person from the household. The bill would also revise that provision to authorize a juvenile court to simultaneously issue an ex parte order enjoining any person from engaging in similar behavior against the parent, guardian, or current caretaker of a dependent child regardless of whether the child resides with that parent. Because a willful and knowing violation of the order would be a misdemeanor, the bill would create a new crime, thereby imposing a state-mandated local program.

This bill would incorporate additional changes in Section 213.5 of the Welfare and Institutions Code proposed by SB 66 that would become operative only if SB 66 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 714 (AB 1241) Robert Pacheco. Community colleges: teacher preparation programs.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state.

This bill would require the Chancellor of the California Community Colleges, in consultation with the Chancellor of the California State University, the President of the University of California, the Association of Independent California Colleges and Universities, and with representatives of accredited colleges and universities in other states, to submit, on or before January 1, 2003, a written report to the Legislature on the feasibility of the development of a model teacher preparation curriculum that would be available to qualified students in each community college district, the establishment of financial incentives for community college students who wish to become teachers, the offering of community college teacher preparation courses that would provide academic credits that are fully transferable to the California State University, and the guaranteeing of the transfer of students who successfully complete the community college teacher preparation curriculum to appropriate status in teacher preparation programs of the California State University. The bill would require the Chancellor of the California Community Colleges to report on the fiscal implication of implementing any or all of the recommendations of the feasibility study, as prescribed.

Ch. 715 (AB 1277) Cardenas. Funeral directors.

Existing law, the Funeral Directors and Embalmers Law, provides for regulation of funeral directors and other licensees by the Cemetery and Funeral Bureau of the Department of Consumer Affairs. Existing law requires specified information to be included in a funeral establishment's price list, requires a consumer guide to be provided in certain situations, and prescribes penalties for violations of these and various other provisions.

This bill would require that a statement be included on a funeral establishment's price list providing that the survivor of the deceased or the responsible party is entitled to receive a copy of any preneed funeral arrangement contract paid for by or on behalf of the deceased. The bill would require the Cemetery and Funeral Bureau to develop a form containing certain information that would be required to be provided to consumers by a funeral establishment prior to the drafting of a contract for funeral services. The bill would require this form to be signed and dated by the consumer and a representative of the funeral establishment. The bill would also require a funeral establishment to provide the consumer

with a consumer guide for funeral and cemetery purchases prior to the drafting of a contract for funeral services. Because the bill would add additional requirements concerning preneed funeral arrangement contracts, the violation of which is a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 716 (AB 1609) Calderon. High school exit examination.

Existing law requires that the Superintendent of Public Instruction, with the approval of the State Board of Education, to develop a high school exit examination in language arts and mathematics in accordance with the statewide academically rigorous content standards.

Existing law requires, commencing with the 2003–04 school year, each pupil completing grade 12 to successfully pass the high school exit examination as a condition of receiving a diploma of graduation or a condition of graduation from high school. Under existing law, a pupil may take the high school exit examination in grade 9 beginning in the 2000–01 school year.

This bill would, instead, limit pupils in grade 9 to taking the high school exit examination in the 2000–01 school year. The bill would require the State Department of Education to contract for an independent study regarding the requirement of passing the high school exit examination as a condition of receiving a diploma of graduation and a condition of graduation from high school, subject to approval by the State Board of Education regarding the scope of work and the final contract for the independent study. The bill would require that a final report based on the study be delivered to the Governor, Legislature, State Board of Education, and Superintendent of Public Instruction on or before May 1, 2003.

The bill would authorize the State Board of Education to delay, on or before August 1, 2003, the date upon which each pupil completing grade 12 is required to successfully pass the high school exit examination as a condition of receiving a diploma of graduation or a condition of graduation from high school.

Ch. 717 (AB 1718) Committee on Higher Education. Public postsecondary education: California State University: Governor's Teacher Scholars Program.

(1) Existing law establishes the California State University under the administration of the Trustees of the California State University. Existing law, to be repealed as of January 1, 2002, sets forth a procedure for the adoption of regulations by the trustees, and requires the trustees to follow that procedure rather than the procedure set forth in the Administrative Procedure Act.

This bill would delay the repeal of this provision until January 1, 2003.

(2) Existing provisions of the California Constitution establish the University of California as a public trust under the administration of the Regents of the University of California.

Existing law requests the Regents of the University of California to develop a teacher preparation program, known as the Governor's Teacher Scholars Program, that will include a rigorous teacher preparation program that prepares teachers to work in schools with high percentages of low-income or English language learners. Existing law requires, among other things, that a participant in this program make a commitment to teach for at least 4 years in a California public elementary or secondary school that is eligible to be designated, under a prescribed statute relating to the Assumption Program of Loans for Education, as a school that serves a large population of students from low-income families.

Existing law establishes an Assumption Program of Loans for Education, under which an applicant enrolled in a participating institution of postsecondary education, or an applicant who agrees to participate in a teacher trainee or teacher internship program, and who further

agrees to obtain a teaching credential in a subject area that is designated as a current or projected shortage area or to provide classroom instruction in a school that serves a large population of pupils from low-income families, has a high percentage of teachers holding emergency permits, or is a low-performing school, is eligible to enter into an agreement for loan assumption, to be redeemed upon becoming employed as a teacher.

This bill would require a participant in the Governor's Teacher Scholars Program to comply with the teaching requirements for participants in the Assumption Program of Loans for Education set forth in a prescribed statute.

Ch. 718 (SB 133) Figueroa. Accountants.

(1) Existing law provides for the licensing and regulation of accountants by the State Board of Accountancy in the Department of Consumer Affairs. The provisions creating the board and authorizing the board to appoint an executive officer will become inoperative on July 1, 2002, and will be repealed on January 1, 2003.

This bill would extend these dates, making the provisions inoperative on July 1, 2006, and repealing them on January 1, 2007. The bill would increase the total membership of the board and would also alter the composition of the board.

(2) Existing law authorizes the board to conduct investigations or hearings relating to any matter involving the conduct of licensees. Existing law authorizes the board to appoint an administrative committee for the purpose of obtaining technical expertise.

This bill would provide that the executive officer would determine when to engage in these activities. The bill would also revise the required composition of the administrative committee.

(3) Existing law requires that an applicant for the certified public accountants' examination meet specified educational requirements and that an applicant for licensure as a certified public accountant meet certain educational and experience requirements.

This bill would revise these provisions relating to educational and experience requirements.

(4) Under existing law, a certified public accountant license candidate is required to pass a written examination. Existing law provides that a candidate who passes 2 or more subjects but fails the examination has the right to be reexamined in only the remaining subjects.

This bill would revise the provisions relating to the examination process and examination requirements.

(5) Existing law requires that an applicant for a certified public accountant license be over 18 years of age, and prohibits the board from giving a license to an applicant with a certified public accountant license from another state who is not over 18 years of age.

This bill would delete this age requirement.

(6) Existing law requires an applicant for licensure as a certified public accountant to demonstrate experience in the attest function.

This bill would require a firm, other than a sole proprietor or a small firm, to meet specified peer review requirements in order to provide attest services and would require an individual applicant to meet specified criteria to sign reports on attest engagements. The bill would require the board to adopt regulations implementing, interpreting, and making specific these new application, examination, education, and licensure requirements.

(7) Existing law provides that a person holding a valid and unrevoked license from any state may practice public accountancy after submitting an application for licensure and showing proof of qualifying continuing education.

This bill would authorize a qualified applicant to also perform attest services.

(8) Existing law sets specified fees to be charged by the board and requires that the board maintain a reserve balance in its contingent fund equal to approximately 3 months of annual authorized expenditures.

This bill would revise the fees to be charged by the board and would require that the board maintain a reserve balance equal to approximately 6 months of annual authorized expenditures.

This bill would make other related changes.

(9) Because this bill would increase fees deposited in the Accounting Fund, a continuously appropriated fund, it would make an appropriation.

(10) The bill shall only become operative if AB 585 is enacted and becomes effective on or before January 1, 2002.

Ch. 719 (SB 158) Haynes. Attorney's fees: Riverside County.

Under law effective until January 1, 2001, in the Counties of Riverside and San Bernardino, a party to a civil action that made a settlement offer was entitled to an award of attorney's fees at the court's discretion, for services rendered after the offer was made, if the offer was rejected and the party to whom it was made failed to obtain a more favorable judgment.

This bill would reenact those provisions as to Riverside County only, to remain in effect until January 1, 2005. The bill would also require the Judicial Council and the Superior Court of Riverside County, jointly, to make specified findings of fact to assess whether the act increases the early settlement of cases, as specified, and to report their findings to the Legislature by March 1, 2004, as specified.

The bill would also declare the intent of the Legislature in this regard.

Ch. 720 (SB 168) Bowen. Personal information: confidentiality: identity theft.

(1) The Consumer Credit Reporting Agencies Act and the federal Fair Credit Reporting Act provide for the regulation of consumer credit reporting agencies, commonly known as credit bureaus, which collect credit-related information on consumers and report this information to subscribers. The Consumer Credit Reporting Agencies Act requires certain notices and disclosures to be provided to consumers with a mailing address in California, including a requirement for providing a copy of a consumer's credit file to the consumer for a reasonable fee not exceeding \$8, and a requirement to provide a toll-free telephone number for certain purposes, including the opportunity for a consumer to elect to have his or her name removed from lists supplied to creditors that are used to make firm offers of credit, as defined, that were not initiated by the consumer.

This bill would require, beginning July 1, 2002, consumer credit reporting agencies to also accept security alerts, as defined, by written request or via a toll-free telephone number, from consumers, and would allow a consumer to request a consumer credit reporting agency to impose a security freeze on release of any information from his or her file. The bill would require a consumer credit reporting agency to place a security alert in a consumer credit report within 5 business days of receiving a request to do so and to notify persons using consumer credit reports of the existence of a security alert. The bill would require that the security alert remain in effect for at least 90 days and would allow a consumer to renew it.

The bill would also require, beginning January 1, 2003, a consumer credit reporting agency to place a security freeze, as defined, on a consumer credit report within 5 business days of receiving a request to do so in writing by certified mail, and would prohibit the release of information from a consumer credit report while the freeze is in place, except as provided. Among other things, the bill would also require a consumer credit reporting agency to provide a consumer an identification number to be used for temporarily lifting a freeze upon a consumer credit report or authorizing the subsequent release of information from a consumer credit report that is subject to a security freeze. The bill would also provide that a security freeze shall remain in place until either the consumer requests to have the security freeze removed, or upon discovery by the consumer credit reporting agency that the consumer's credit report was frozen due to a material misrepresentation by the consumer. The bill would provide that it does not prevent a consumer credit reporting agency from charging

a reasonable fee to freeze, remove a freeze, or temporarily lift a freeze regarding access to a consumer credit report.

The bill would further require, beginning January 1, 2003, that, if a security freeze is in place, a consumer credit reporting agency must provide a consumer with written confirmation within 30 days after making specified changes to information in a consumer's credit report.

This bill would also exempt specified information services companies from the requirements of placing a security alert or a security freeze. The bill would additionally exempt from its requirements certain consumer credit reporting agencies that act only as resellers of consumer credit information and that do not maintain permanent consumer credit data bases from which new credit reports are produced, but would require these consumer credit reporting agencies to honor any security freeze placed on a credit report by any other consumer credit reporting agency.

The bill would also revise the written summary of rights that a consumer credit reporting agency is required to provide to a consumer to include information about security alerts and security freezes and their consequences.

(2) Existing law provides for the use of social security numbers as a means of identification in numerous applications.

This bill would prohibit any person or entity, not including a state or local agency, as of July 1, 2002, from using an individual's social security number in certain ways, including posting it publicly or requiring it for access to products or services. This bill would provide an exception to the above-described provisions for a person or entity that meets specified conditions, but would provide that an individual may prohibit the use of his or her social security number in these circumstances by making a written request and that there may be no charge for implementing this request. This bill would also provide that its provisions do not prevent the collection, use, or retention of social security numbers as required by state or federal law, or the use of social security numbers for internal verification or administrative purposes. The bill would exempt from its requirements certain records required to be open to the public pursuant to specified state laws. The bill would also provide that the prohibition on the use of social security numbers shall apply to providers of health care, health care service plans, licensed health care professionals, contractors, as defined, pursuant to delayed operative provisions.

(3) This bill would enact other related provisions.

Ch. 721 (SB 223) Burton. Drug testing.¹³

Existing law added by initiative statute provides that effective July 1, 2001, except as specified, a person convicted of a nonviolent drug possession offense shall receive probation with completion of a drug treatment program as a condition of probation. That initiative statute also provides that effective July 1, 2001, except as specified, a person's parole may not be suspended or revoked for commission of a nonviolent drug possession offense or for violating a drug-related condition of parole, but that an additional condition of parole for those offenses or violations shall be completion of a drug treatment program. Existing law creates a state fund to award counties money to implement the drug treatment requirements of the initiative statute, but prohibits money in that fund from being used to pay for the cost of drug testing.

Existing law provides that if a person who is placed on probation for a nonviolent drug possession offense or who is on parole violates a drug-related condition of probation or parole, then, for the first drug-related violation, the person's probation or parole may be revoked if the state proves that the person is a danger to the safety of others. Existing law further provides that for the 2nd drug-related violation of probation, the person's probation may be revoked if the state proves either that the person poses a danger to the safety of others or is unamenable to drug treatment. Existing law also allows for revocation of a person's probation or parole if the probation department or parole authority moves for revocation on

NOTE: Superior numbers appear as a separate section at the end of the digests.

the ground that the person is unamenable to all forms of drug treatment, and the person fails to prove that there is a drug treatment program to which he or she is amenable.

This bill would appropriate \$9,600,000 from the General Fund to be used by the State Department of Drug and Alcohol Programs to award counties grants to pay for drug testing if the counties have on file with the department an approved plan for implementing the above-mentioned initiative statute that includes a description of the process to be used for substance abuse treatment and testing consistent with specified sections of existing law. This bill would also appropriate \$8,400,000 from the Federal Substance Abuse Prevention and Treatment Block Grant to be used by the State Department of Drug and Alcohol Programs for drug testing and other purposes. This bill further states that where drug treatment is a condition of a person's probation or parole, drug testing shall be used as a drug treatment tool, and the results of any drug testing shall not be given greater weight than other aspects of the person's treatment program. This bill would also specify that for the purposes of the initiative, drug treatment must be provided by a program that is licensed or certified by the state, or by a drug treatment program operated under the direction of the Veterans Health Administration of the Department of Veterans Affairs or a program provided in a specified provision of law.

This bill would specify that the term "drug-related condition" of probation or parole include the drug treatment regimen, employment, vocational training, educational programs, and counseling. This bill would also expand the types of activities that constitute drug-related probation and parole violations in connection with revocation of probation and parole. In addition, this bill would require proof that a person is unamenable to all forms of drug treatment, and would eliminate the requirement that the person prove there is a drug treatment program to which he or she is amenable, before probation or parole can be revoked on the ground that the person is unamenable to all forms of drug treatment.

Since this bill would add provisions that supplement provisions of the above-mentioned initiative, it would amend that initiative statute and, in accordance with the requirements of that initiative statute, would require a $\frac{2}{3}$ vote for enactment by the Legislature.

This bill would provide that if it becomes effective before July 1, 2001, it will become operative on July 1, 2001.

This bill would declare that it is to take effect immediately as an urgency statute, and would authorize the Director of Alcohol and Drug Programs to (1) implement specified provisions by means of a letter to county lead agencies; and (2) adopt emergency regulations to implement those provisions, as specified.

Ch. 722 (SB 233) Alpert. Pupil testing.

(1) Existing law repeals the provisions of the Leroy Greene California Assessment of Academic Achievement Act which consists in part of the Standardized Testing and Reporting (STAR) Program on January 1, 2002.

This bill would extend the repeal date to January 1, 2005. The bill would delete obsolete provisions regarding the assessment of applied academic skills that is no longer a part of the Leroy Greene California Assessment of Academic Achievement Act.

(2) Existing law, the Standardized Testing and Reporting Program, requires each school district, charter school, and county office of education to administer to each of its pupils in grades 2 to 11, inclusive, a designated achievement test and a standards-based achievement test. Existing law requires the State Board of Education to ensure that the achievement test for grades 9 to 11, inclusive, contain core curriculum areas consisting of reading, writing, mathematics, history/social science, and science.

This bill would instead require the achievement test to contain English and language arts, mathematics, and science and would also make other conforming changes. The bill would require the board to minimize the amount of testing time for content areas for which there already exists a standards-based examination, as specified.

(3) Existing law requires the Superintendent of Public Instruction, with approval of the State Board of Education, to provide for the development of an assessment instrument that measures the degree to which pupils are achieving the academically rigorous content standards and performance standards, to the extent standards have been adopted by the State Board of Education. Existing law requires the standards-based achievement test to include, at a minimum, a direct writing assessment once in elementary school and once in middle or junior high school and other items of applied academic skills if deemed valid and reliable.

This bill would name the standards-based achievement test the California Standards Tests and would require them to also include an assessment in history/social science in at least one elementary or middle school grade level selected by the State Board of Education and in science in at least one elementary or middle school grade level selected by the State Board of Education.

(4) Existing law requires the Superintendent of Public Instruction to prepare and submit to the Legislature, the State Board of Education, and each school district in the state an annual report containing an analysis, on a school-by-school basis, of the results and test scores of the assessment of applied academic skills and the achievement test.

This bill would delete the requirements that the report be submitted to each school district in the state and that the analysis be prepared on a school-by-school basis.

(5) Existing law established the Golden State Examination Program to administer the Golden State Examination to measure pupil achievement under statewide standards of competency in academic subjects.

This bill would instead require the examination to measure advanced pupil achievement on the academically rigorous content standards adopted by the State Board of Education and would require the examination to be administered in augmentation of standards-based achievement tests, as specified. The bill would require the State Department of Education, with approval of the State Board of Education, to contract for a study of the Golden State Examination to be completed by December 15, 2003, as specified. The bill would require a Golden State Examination to consist of some portion of the California Standards Test and additional Golden State Examination items in order to reduce testing time and in subjects for which a California Standards Test and a Golden State Examination exist.

(6) Existing law authorizes a school district to receive reimbursement for the costs of the STAR Program tests, as specified, for the 1997–98 fiscal year.

This bill would repeal this provision.

(7) This bill would, subject to the availability of funds in the annual Budget Act for this purpose, require the Superintendent of Public Instruction, upon approval of the State Board of Education, to contract for the development and distribution of a workbook to be distributed to all pupils in the 10th grade that would contain information on the proficiency levels that must be demonstrated by pupils on the high school exit examination, and separate workbooks for each of grades 2 to 11, inclusive, for each pupil in grades 2 to 11, inclusive, who is required to take the STAR Program achievement tests.

(8) Existing law requires test publishers to agree to meet certain requirements in order to be eligible for consideration to contract with the state with regard to the statewide achievement test and the standards-based achievement test. Existing law requires the costs associated with test item development to be provided as a separate amount in the written contract between test publishers and the State Department of Education and prohibits the amortization of those costs across the number of tests to be administered.

This bill would delete the provisions regarding the costs of test item development. The bill would authorize the State Department of Education, with the approval of the State Board of Education, to enter into a separate contract for the administration of any test that is part of the Leroy Greene California Assessment of Academic Achievement Act, including coordination of tests, assemblage of tests or test items, scoring, or reporting.

Ch. 723 (SB 348) Kuehl. Claims against the state: appropriation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Existing statute establishes procedures for making that reimbursement and authorizes the Legislature to suspend a mandated program by not funding it in the annual Budget Act for any fiscal year.

Existing law also requires the Controller, in the event that there are insufficient revenues to fund all of the state-mandated claims approved by the Controller, to report immediately this deficiency to the Legislature for additional appropriation, and requires that any additional appropriation include an amount necessary to reimburse any interest due to eligible claimants.

This bill would appropriate \$89,042,000 from the General Fund and the State Transportation Fund, as specified, to the Controller for the payment of claims from school districts and local agencies for reimbursement for specified state-mandated local costs.

This bill would require the Controller to allocate funds provided pursuant to a specified item of the Budget Act of 2001 according to a specified schedule.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 724 (SB 374) O'Connell. Education: categorical programs: consolidated applications.

Under existing law, school districts that participate in certain school improvement programs are required to develop and annually update a district master plan and submit that plan to the governing board of a school district for approval, in accordance with prescribed procedures. Existing law prohibits any school from participation in school-based coordinated categorical programs unless a school plan has been approved for the school. Under existing law, school districts that participate in those programs are required to ensure that for each school in a district operating categorical programs subject to those provisions, school plans and onsite program reviews are conducted at least once every 3 years, commencing in the 1984–85 school year, by independent persons not employed by the school district. Existing law requires the Superintendent of Public Instruction to adopt regulations establishing criteria for these reviews and to develop a process for State Department of Education training and validation concerning those reviews.

This bill would delete those provisions that require school districts to ensure that for each school in a district operating categorical programs, school plans and onsite program reviews are conducted at least once every 3 years by persons not employed by the school district. The bill would also delete obsolete provisions from those provisions. The bill would require the Superintendent of Public Instruction to establish the content, process, and frequency for conducting reviews of district achievement related to categorical programs. The bill would instead require that, notwithstanding any other provision of law, as a condition of receiving funding for specified categorical programs, school districts ensure that each school in a district operating those categorical programs consolidates any plans that are required by those programs into a single plan, to be known as the Single Plan for Pupil Achievement. The bill would revise and expand the list of school-based categorical programs covered by those provisions. The bill would also require that this plan be aligned with school goals for improving pupil achievement, and would prescribe related matters. The bill would require the plan to be annually reviewed and updated, as specified, by the schoolsite council, or, if the school does not have such a council, by schoolwide advisory groups that meet certain requirements. The bill would require the governing board of a participating school district to review and approve the school plan and subsequent revisions.

Ch. 725 (SB 575) O'Connell. School facilities: automatic fire detection alarm and sprinklers.

Existing law, the Leroy F. Greene School Facilities Act of 1998 (the Greene Act of 1998), requires the State Allocation Board to administer the allocation of school facilities funds for public education.

Existing law, relating to the construction of school buildings, requires the Department of General Services to pass upon and approve or reject all plans for the construction of, or if the estimated cost exceeds \$25,000, the alteration of, any school building.

This bill would, with certain exceptions relating to portable buildings, require new construction projects under the Greene Act of 1998, which require approval of the Department of General Services, to comply with prescribed automatic fire detection, alarm, and sprinkler system requirements, would require modernization projects having an estimated total cost in excess of \$200,000 to comply with the automatic fire detection and alarm system requirements, and would require inclusion of amounts necessary to cover the costs of the system. The bill would require the State Allocation Board to review the adequacy of the per pupil eligibility amounts for new construction grants and modernization funding and make any adjustments determined to be necessary by July 1, 2003.

Existing law requires every public, private, or parochial school building to be provided with a dependable and operative fire warning system and requires every person and public officer managing, controlling, or in charge of the school to sound the fire alarm signal upon the discovery of fire.

This bill would exempt these persons from this requirement if the public, private, or parochial school building is equipped with an automatic fire detection and alarm system, which for this purpose may or may not include a sprinkler system, and would repeal related provisions regarding the California uniform fire code signal.

Existing law requires the alarm to be sounded at least once every calendar month at the elementary and intermediate levels and at least twice a year at the secondary level. Existing law requires fire drills to be held at the secondary level at least twice every school year.

This bill would, instead, require that the alarm be sounded at least once every month, and would require that fire drills be conducted at the elementary level at least once every calendar month and at the intermediate and secondary level at least twice every school year.

Ch. 726 (SB 593) Alarcon. California State University: real property exchange.

Existing law establishes the California State University and provides for its administration by the Trustees of the California State University. Existing law designates 25 institutions of higher education as components of the California State University, and authorizes these institutions to provide various academic programs.

This bill would authorize the trustees to exchange a parcel of land of approximately 5 acres, known as Zelzah Court, which is part of the California State University, Northridge property, for the approximately 8.5-acre Prairie Street schoolsite, which is owned by the Los Angeles Unified School District for land, or for a combination of land and money, in accordance with prescribed criteria. The bill would provide that any funds received from the transaction authorized by the bill would be appropriated to the trustees for expenditure, without regard to fiscal year, for construction and capital development of projects that are eligible for state support, following review and approval by the Department of Finance. The bill would require that the expenditure of funds received under the bill be consistent with the master plan of the campus for which the project is proposed. The bill would also require that any funds received under the bill that are not encumbered prior to January 1, 2007, revert to the General Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 727 (SB 708) Speier. Insurance.

(1) Existing law provides for regulation of the business of insurance by the Insurance Commissioner.

Existing law requires the Department of Insurance to establish a program for the mediation of disputes between insureds and insurers arising out of the 1994 Northridge earthquake. This program is authorized to continue through January 1, 2005.

This bill would extend the operation of the program until January 1, 2006, and would expand it to include disputes arising out of an event for any insured peril that involves lines of insurance for residential and automobile coverage and any other insured loss the commissioner determines would be best served by the mediation process. The bill would make other changes to the mediation program.

(2) Existing law requires the commissioner to receive, investigate, and respond to complaints and inquiries relative to the handling of insurance claims by insurers.

This bill would provide that the commissioner may not decline to investigate complaints on various grounds, including that the insured is represented by an attorney or is involved in a civil action against an insurer, or that the complaint is from an attorney.

(3) Existing law sets forth various other duties and responsibilities of the commissioner and the department.

This bill would require the department to make public a letter or legal opinion signed by the commissioner or the department's chief counsel that was prepared in response to an inquiry from an insured or other person or entity and that discusses the application of the Insurance Code or regulations promulgated by the commissioner. The bill would define the term "extraordinary circumstances" for the purpose of the department determining noncompliance with the insurance laws and regulations and determining appropriate penalties. The bill would impose limitations on the authority of the department to enter into settlement agreements referencing the existence of extraordinary circumstances for a period of more than 6 months. The bill would also require the department to adopt regulations relative to the training and accreditation of insurance adjusters in the evaluation of earthquake damage.

Ch. 728 (SB 724) Committee on Business and Professions. Businesses.

(1) Existing law requires that specified information relating to claims against a physician and surgeon for acts of professional negligence or for the unauthorized rendering of professional services be reported to the Medical Board of California.

This bill would require these reports to include the name and license number of the physician and surgeon against whom the claim was made.

(2) Existing law, the Dental Practice Act, establishes an examining committee within the Dental Board of California and makes it responsible, among other matters, for assisting the board in the examination of applicants for licensure by the board.

This bill would delete these provisions and would require the board to use persons who are licensed under the act and who meet other specified criteria in the administration of its licensure examination.

(3) Existing law provides, generally, for the licensure of chiropractors and other health care practitioners.

This bill would extend to chiropractors provisions applicable to other health care practitioners authorizing a regulatory board to request an administrative law judge who finds a licentiate found to have violated the licensing act to pay a sum not to exceed the costs of investigation and enforcement of the case and would extend to chiropractors provisions making it a misdemeanor to offer or accept a rebate, commission, discount, or other consideration for the referral of patients, thereby imposing a state-mandated local program by expanding the definition of a crime. The bill would also extend to chiropractors and certain other health care practitioners provisions authorizing the establishment, by regulation, of a system for the issuance of citations to licentiates containing an order of abatement or payment of an administrative fine.

(4) The Dental Practice Act and the Medical Practice Act include certain provisions operative until January 1, 2002, relating to the administration of general anesthesia by a physician and surgeon to patients in the office of a dentist licensed by the board.

This bill would extend the inoperative date with respect to these provisions to January 1, 2007.

(5) The Medical Practice Act prohibits a physician and surgeon from practicing without a certificate issued by the Medical Board of California and establishes criteria for the issuance of this certificate, including evidence of the completion of specified preprofessional education courses. The act exempts, under specified conditions, a graduate of an approved medical school and a graduate of a foreign medical school from this certificate requirement while participating in postgraduate training.

This bill would delete the postsecondary education criteria as a requirement for issuance of a certificate and would terminate the exemption afforded a graduate during postgraduate training if his or her application for a certificate is denied by the board's Division of Licensing.

(6) Existing law, which provides for biennial renewal fees for certificates to practice podiatric medicine, expires January 1, 2002.

This bill would extend that expiration date to January 1, 2004.

(7) Existing law, the Occupational Therapy Practice Act, sets forth the requirements for licensure as an occupational therapist and for certification by the Hand Therapy Certification Commission of a therapist providing hand therapy services.

This bill would delay until January 1, 2003, the ability of an occupational therapist to satisfy the experience requirement for this certification by performing hand therapy services under the supervision of an occupational or physical therapist who is certified by the commission.

(8) Existing law specifies the course requirements for continuing education of speech-language pathologists and audiologists.

This bill would revise those course requirements.

(9) Existing law, the Speech-Language Pathologists and Audiologists Licensure Act, creates, until July 1, 2002, the Speech-Language Pathology and Audiology Board.

This bill would extend this board to July 1, 2004.

(10) Existing law provides for the licensure of vocational nurses and psychiatric technicians by the Board of Vocational Nursing and Psychiatric Technicians of the State of California and authorizes the board to reinstate, under specified conditions, a license that it has suspended or revoked.

This bill would specify the time when a petition for reinstatement is required to be filed and would provide certain processes for the conduct of these proceedings.

(11) The Pharmacy Law provides for the regulation and licensing of pharmacists and various other persons and entities by the California State Board of Pharmacy and makes it a misdemeanor for a wholesaler or any other person to permit the dispensing of prescriptions except by a pharmacist or exemptee.

This bill would authorize a pharmacy to repackage, at the patient's request, a drug that was previously dispensed to the patient and would revise, for purposes of the Pharmacy Law, the definition of "manufacturer;" and the board's authority to issue a temporary permit to conduct a pharmacy. This bill would also provide that it is a misdemeanor for a wholesaler or any other person to permit the furnishing of dangerous drugs or dangerous devices except by a pharmacist or exemptee. In that regard, the bill would change the definition of a crime, thereby imposing a state-mandated local program. The bill would also make other clarifying changes.

(12) Existing law makes it a misdemeanor for any person other than a pharmacist to compound or dispense any dangerous drug or device, or to compound or dispense a prescription, with certain exceptions.

This bill would revise the latter exemption with respect to veterinary food-animal drugs, would limit the insurance or renewal of licenses for veterinary food-animal drug retailers and wholesalers of dangerous drugs or devices, would revise provisions for the issuance of a retired license to a pharmacist, and would expand the investigative authority of the California State Board of Pharmacy regarding unprofessional conduct. The bill would impose a state-mandated local program by expanding the definition of a crime. The bill would also

incorporate changes to Section 4115 of the Business and Professions Code proposed by AB 536 contingent upon its prior enactment.

(13) Existing law requires persons engaged in the practice of marriage, family, and child counseling to be licensed by the Board of Behavioral Sciences. Under existing law, an applicant for this licensure is required to achieve a passing score on an examination and to possess a doctoral or master's degree in one of several designated subjects, including social work. Existing law requires an intern, defined as a person who has earned a master's or doctoral degree but is not yet licensed, to register with the board and renew this registration annually. Under existing law, the board is authorized to assess various fees in connection with its licensure activities that are deposited into the Behavioral Sciences Fund, which is continuously appropriated.

This bill would delete social work from the type of degrees that satisfy this particular educational requirement for licensure and would limit eligibility for oral examination. The bill would also require an intern to pay a fee of \$75 upon his or her registration renewal. Because the bill would increase the amount of revenue paid into a continuously appropriated fund, it would make an appropriation.

(14) Existing law provides for the renewal of registration as an unlicensed marriage, family, and child counselor.

This bill would revise the requirements for renewal of registration, including the payment of a renewal fee; and would prohibit renewal or reinstatement after 6 years from initial issuance.

(15) Existing law precludes licensure as a licensed educational psychologist for persons convicted or registered for specified sex crimes.

This bill would revise that limitation, and further limit eligibility for licensure based upon oral examination.

(16) Existing law provides for the licensure and registration by the Board of Behavioral Sciences of persons engaged in the practice of clinical social work. Under existing law, an applicant for this license is required to meet specified professional experience and educational requirements and to achieve a passing score on a professional licensure examination. Existing law also authorizes the board to take disciplinary action against a licensee for unprofessional conduct and makes the violation of any provision regulating the licensure or practice of a clinical social worker a crime.

This bill would limit eligibility for oral examination and would require an applicant for licensure to furnish evidence that he or she has completed training or coursework in the subjects of human sexuality and child abuse assessment and reporting. The bill would also specify the professional experience requirements for licensure with respect to persons registered with the board on and after January 1, 2002. The bill would additionally make sexual relations between the licensee and a former client, unprofessional conduct, subject to disciplinary action by the board and would prohibit the board from issuing a license to an applicant subject to criminal registration laws. Because the bill would specify additional acts as unprofessional conduct, the commission of which would be a criminal offense, it would expand the scope of an existing crime, thereby imposing a state-mandated local program.

(17) Existing law, the Architects Practice Act, provides that architects may plan the sites and designs of buildings and structures, and that professional services include the compliance with applicable codes and regulations, the governmental review process and contract administration.

This bill would provide that the use of the words "certify" or "certification" by a licensed architect would constitute a professional opinion regarding the facts that are the subject of the certification and would not be considered a warranty or guarantee.

(18) Existing law, the Contractors' State License Law, authorizes the Contractors' State License Board to conduct all functions and duties relating to the licensing, regulation, and discipline of licensees and makes certain acts a crime, including using an incorrect contractor's license number with the intent to defraud. The registrar is the executive officer

who carries out the board's administrative duties and tasks delegated by the board and is authorized to issue a citation for a violation of specified provisions that may result in the assessment of a civil penalty. Existing law specifies when the board will conduct its meetings, what activities contractors may perform, and the criminal penalties that exist if a licensed or unlicensed person intentionally uses a contractor's license number that does not belong to him or her. Existing law provides how much time the registrar has to collect civil penalties from nonlicensee citations, provides licensing requirements for fictitious name usage, provides timeframes for filing claims against a licensee's cash deposit, sets requirements regarding the licensing examination process, and addresses misrepresentation and fraud concerning license application and renewal. Existing law requires that these civil penalties and other fees that are collected be deposited in the Contractors' License Fund which is continuously appropriated for purposes of the Contractors' State License Law.

This bill would authorize the board to meet once each quarter, allow contractors to deal with underground storage tanks, allow the registrar to issue citations to unlicensed individuals and unregistered salespersons the registrar believes violated the Contractors' State License Law and to persons who use an incorrect contractor's license number to defraud others, and would also authorize the registrar to use collection agencies to collect civil penalties. The civil penalties assessed and collected pursuant to this bill would be deposited in the Contractor's License Fund which is continuously appropriated. Therefore, the bill would make an appropriation.

This bill would also provide that a licensee could only conduct business under one name per license, extend the time in which a claim could be made against a licensee's cash deposit to 3 years after the expiration of the license, revise the licensing examination procedures, and expand the grounds for disciplinary action during the license application and renewal process concerning misrepresentations or omissions made on the application or renewal form.

(19) Existing law does not allow the use of a fictitious business name that includes the words or abbreviations "Company," "Limited," "Co.," or "Ltd." if a business is not a limited liability company.

This bill would allow the use of a fictitious business name that includes the words or abbreviations "Company," "Limited," "Co.," or "Ltd." if that use does not imply that the business is a limited liability company.

Existing law requires that a fictitious business name statement contain the name or names of the person or persons doing business, the name of the business, and when the business began operating under the fictitious name. The form must be signed by the applicant or applicants and filed with the county clerk where the business is located.

This bill would require the applicant or applicants to declare that the information in the fictitious business name statement is true and correct. Since the filing of a false statement would constitute a crime, the bill would impose a state-mandated local program.

Existing law requires the publication of a refiled fictitious business name statement when the prior statement has expired unless there are no changes in the information in the statement.

This bill would provide that the exception from republication of a fictitious business name statement applies only if the statement is refiled within 40 days of the expiration date of the previous statement. The bill would also eliminate an exception from publication of a statement of withdrawal from a partnership operating under a fictitious business name.

(20) Existing law requires that county clerks issue permanent identification cards with a photograph to each process server and register professional photocopyers.

This bill would require each county clerk to issue temporary identification cards, valid for 120 days, to applicants while waiting for background checks from the Federal Bureau of Investigation and the Department of Justice. By requiring county clerks to issue temporary identification cards, the bill would impose a state-mandated local program. The bill would correct an erroneous section reference in a provision regulating the fee payable in connection

with the filing of an application with a county clerk for registration as a professional photocopier.

(21) Existing law requires that a provider of tax preparer education meet standards and procedures approved by the California Tax Education Council or the Bureau for Private Postsecondary and Vocational Education.

This bill would delete the bureau from these provisions and would require the council to include 2 tax preparers in its membership.

(22) Existing law regulates the retail sale of home medical devices.

This bill would revise the definition of home medical devices, the retail sale of which requires licensure by the State Department of Health Services, would revise the application of licensure for warehouses owned by retail facilities, would expand the list of home medical devices that may be sold by pharmacies and pharmacists, and would revise the requirements applicable to the storage of home medical devices by retail facilities.

(23) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 729 (SB 985) Kuehl. Real property.

(1) Existing law provides for the renewal and termination of a hiring of real property for an unspecified term.

This bill would set forth separate provisions governing the renewal and termination of a hiring of residential real property in the Cities of Los Angeles, Santa Monica, and West Hollywood, effective until January 1, 2005, as specified.

(2) Existing law sets forth the Costa-Hawkins Rental Housing Act, as specified, authorizing owners of residential real property to establish the initial and all subsequent rental rates for certain dwellings or units.

This bill would exempt specified condominium units from these provisions.

(3) Existing law requires any owner of a dwelling structure containing one or more units offered to the public for rent or residential lease to disclose the name and street address at which personal service may be effected of each manager and each owner of the premises.

This bill would additionally require the disclosure of the telephone number of those persons, the name, telephone number, and address of the person or entity to whom rent payments shall be made, and the form or forms in which rent payments are to be made. The bill would require the owner to provide a copy of the rental agreement or lease to the tenant within 15 days of its execution by the tenant and, once each calendar year thereafter, within 15 days of a request by the tenant.

The bill would also provide that if the address provided by the owner does not allow for personal delivery, then it shall be conclusively presumed that upon the mailing of any rent or notice to the owner by the tenant to the name and address provided, the notice or rent is deemed received by the owner on the date posted, if the tenant can show proof of mailing to the name and address provided by the owner.

(4) Existing law defines unlawful detainer to include circumstances in which a tenant continues in possession of the property without permission of the landlord after default in the payment of rent and 3 days' written notice requiring payment or possession of the property has been served on the tenant. The notice must state the amount that is due.

This bill would also require that notice to include the name, telephone number, and address of the person to whom the rent shall be made, or other specified information; and would also provide that if the address provided by the owner does not allow for personal delivery, then it shall be conclusively presumed that upon the mailing of any rent or notice to the owner by the tenant to the name and address provided, the notice or rent is deemed received by the owner on the date posted, if the tenant can show proof of mailing to the name and address provided by the owner.

The bill would also specifically refer to the payment of rent by an electronic funds transfer procedure.

Ch. 730 (SB 1080) Bowen. Medical care providers: gynecological cancers.

Existing law requires medical care providers, as defined, to give to each patient during an annual gynecological examination a standardized written summary describing symptoms and appropriate methods of diagnoses of gynecological cancers.

This bill would require that the standardized summary be in layperson's language, explaining the symptoms and appropriate methods of diagnoses for gynecological cancers in a language understood by the patient. The bill would make a physician and surgeon subject to citation and an administrative fine upon the 2nd and subsequent complaints of his or her failure to provide the patient with this summary. The bill would require that these fines be credited to the Contingent Fund of the Medical Board of California to be used to provide information to women about gynecological cancers, but would specify that the expenditure of these funds is contingent upon an appropriation by the Legislature.

Ch. 731 (SB 1090) Bowen. Privacy: video providers.

Existing law prohibits, with prescribed exceptions, a person who owns, controls, operates, or manages a cable television corporation or leases channels on a cable system from using electronic devices to observe, listen to, record, or monitor events or conversations inside a subscriber's residence, workplace, or place of business without the subscriber's written consent. Existing law also prohibits that person from providing any other person with individually identifiable information, as specified, regarding any subscriber.

This bill would make the above provisions applicable to a person who owns, controls, operates, or manages a satellite television corporation or leases channels on a satellite system. The bill would also provide exceptions to the meaning of the term "individually identifiable information." Since a violation of these provisions is, among other things, a crime, the bill would impose a state-mandated local program by expanding the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 732 (AB 489) Migden. Loans secured by real property.

Existing law provides for regulation of banks and savings associations by the Department of Financial Institutions. Existing law provides for regulation of real estate brokers by the Department of Real Estate. Existing law provides for regulation of finance lenders and residential mortgage lenders by the Department of Corporations. Existing law provides that willful violations of provisions governing savings associations, real estate brokers, and residential mortgage lenders are crimes.

This bill would impose various requirements on consumer loans secured by specified real property, defined as "covered loans." The bill would prohibit various acts in making covered loans, including the following: failing to consider the financial ability of a borrower to repay the loan, financing specified types of credit insurance into a consumer loan transaction, recommending or encouraging a consumer to default on an existing consumer loan in order to solicit or make a covered loan that refinances the consumer loan, and making a covered

loan without providing the consumer a specified disclosure. The bill would provide that a violation of its provisions would be subject to a civil penalty.

Ch. 733 (AB 344) Migden. Loans secured by real property.

Existing law provides for regulation of banks and savings associations by the Department of Financial Institutions. Existing law provides for regulation of real estate brokers by the Department of Real Estate. Existing law provides for regulation of finance lenders and residential mortgage lenders by the Department of Corporations. Existing law provides that willful violations of provisions governing savings associations, real estate brokers, and residential mortgage lenders are crimes.

AB 489 of the 2001–02 Regular Session would impose various requirements on consumer loans secured by specified real property, defined as “covered loans.” This bill would make various changes to the provisions of AB 489 that apply to a covered loan for which an application is made on or after July 1, 2002.

Ch. 734 (AB 804) Committee on Education. Education.

(1) Existing law establishes the Child Care Facilities Revolving Fund in the State Treasury to provide funding for the renovation, repair, or improvement of an existing building to make the building suitable for licensure for child care and development services and for the purchase of new relocatable child care facilities for lease to school districts and contracting agencies who provide child care and development services. Existing law requires the Superintendent of Public Instruction to submit a plan to the Office of the Secretary for Education, the Department of Finance, and the Legislative Analyst specifying the application procedures to request funding, allowable uses of the funds, and the form of agreement to be used.

This bill would recast provisions authorizing use of this funding for renovation, repair, or improvement of an existing building, and would specify that school districts and county offices of education that operate a California School Age Families Education Program are eligible to apply for and receive funding from the fund. The bill would delete the requirement that the Superintendent of Public Instruction submit a plan.

(2) Under existing law, the Child Care and Employment Act establishes a child care fund in each local service delivery area to provide child care services for the children of parents in the service delivery area’s job training and placement programs.

This bill would repeal the act.

(3) Existing law establishes a 3-year pilot project on infant home care for the purposes of developing and evaluating a model program for the recruitment, training, and monitoring of a network of infant care providers.

This bill would repeal the pilot project.

(4) Existing law authorizes local educational agencies to submit proposals to the Superintendent of Public Instruction to fund activities that will increase the percentage of pupils at qualifying high schools that meet the requirements for admission to the California State University or the University of California. Existing law requires the Superintendent of Public Instruction to recommend, and the State Board of Education to approve, a plan for the comprehensive evaluation of programs authorized pursuant to the grant program. Existing law requires the superintendent to complete the evaluation and submit it to the board by July 1, 2003, and the board to submit the final evaluation and report to the Legislature by December 31, 2003. Existing law requires the act to become inoperative on July 1, 2004, and repealed as of January 1, 2005.

This bill would extend the dates of submission for those reports for one year and extend the inoperative and repeal dates of the act for one year.

(5) Existing law requires a school district applying for funding under the Leroy F. Greene School Facilities Act of 1998 to establish a restricted account within the school district’s general fund for the exclusive purpose of providing funds for ongoing and major

maintenance of school buildings and requires that a school district deposit into the account in each fiscal year for 20 years after receiving funds under the act, a minimum amount equal to 3% of the district's general fund budget for that fiscal year.

This bill would require the minimum amount to be equal to 3% of the applicant of the district's total general fund expenditures, including other financing uses, for the fiscal year and would allow a school district that serves as the administrative unit for a special education local plan area exclude from its total general fund expenditures, for purposes of calculating the minimum amount to deposit in the restricted account, the distribution of revenues that are passed through to participating members of the special education local plan area.

(6) Existing law requires the State Allocation Board to apportion funds from the State School Deferred Maintenance Fund to school districts based on local one-to-one match up to a maximum amount based in part on the district's total expenditures and certain ending fund balances, excluding amounts expended for capital outlay or debt service.

This bill would allow a school district that serves as the administrative unit for a special education local plan area to also exclude revenues that are passed through to participating members of the special education local plan area from its total expenditures for purposes of calculating the maximum amount of funds that may be apportioned to it from the State School Deferred Maintenance Fund.

(7) Existing law requires the State Teachers Retirement Board to offer a midcareer retirement information program for the benefit of all members.

This bill would require the board to provide active and retired members with notice pertaining to time constraints and requirements for passing the state basic skills proficiency tests if an individual wants to return to the classroom after 39 months.

(8) Under existing law, the Carl Washington School Safety and Violence Prevention Act states the intent of the Legislature that public schools serving pupils in kindergarten or any of grades 1 to 12, inclusive, have access to supplemental resources to establish programs and strategies that promote school safety and emphasize violence prevention among children and youth in the public schools. Existing law requires the Superintendent of Public Instruction to provide funds to school districts serving the specified pupils.

This bill would make the act applicable to public schools and school districts serving pupils in any of grades 8 to 12, inclusive.

(9) Existing law creates the Cesar Chavez Day of Service and Learning program and authorizes the California Commission on Improving Life Through Service to make grants to local and state operated Americorps or Conservation Corps programs that submit proposals to engage pupils through their schools and school districts in community service that qualifies as instructional time on Cesar Chavez Day and that honors the life and work of Cesar Chavez.

This bill would authorize the grants to be made based on proposals selected through a competitive process and would include National Senior Service Corps and Learn and Serve with the Americorps and Conservation Corps as programs that may submit proposals for grants.

(10) Existing law requires the Superintendent of Public Instruction to determine the statewide average percentage of school district expenditures that are allocated to the salaries of administrative personnel, teachers, and district superintendents and to submit a copy of this information annually to the Legislature, the Governor, the Department of Finance, and the office of the Legislative Analyst.

This bill would delete the requirement regarding submission of the information to the Legislature, the Governor, the Department of Finance, and the office of the Legislative Analyst.

(11) Existing law establishes a program to award grants to school districts and teachers as incentives for teachers who are assigned to teach to attain certification from the National Board for Professional Teaching Standards.

This bill would define "assigned to teach" for this purpose.

(12) Existing law sets forth a method for calculating the average daily attendance of school districts that sponsor charter schools to take into account the attendance of charter school pupils.

This bill would allow for an increase in a school district's average daily attendance when a school within the district becomes a charter school for one year and then returns to being a noncharter school the following year.

(13) Existing law requires the State Department of Education to develop an evaluation design for the high-risk youth education and public safety program that will assess the effectiveness of program implementation and operation and to report to the Legislature by March 1, 2002.

This bill would require an interim report by March 1, 2002, and a final report by May 1, 2004.

(14) Existing law subjects a minor who is a truant to certain sanctions including being classified as a habitual truant upon the minor's 4th truancy within the same school year.

This bill would also authorize a minor who is a truant to be required to attend make up classes conducted on one day of a weekend and would classify the minor as a habitual truant upon his or her 3rd, rather than 4th, truancy within the same school year.

(15) Existing law requires the adopted course of study for grades 7 to 12, inclusive, to include algebra as part of the mathematics area of study. Existing law requires, commencing with the 2003–04 school year, the mathematics requirement for graduation to be met by a course or courses that meet or exceed the State Board of Education adopted content standards for Algebra I. Existing law deems the mathematics requirement for graduation to be satisfied if at any time in any of grades 7 to 12, inclusive, a pupil completes coursework that meets or exceeds adopted content standards for Algebra I in less than 2 courses. Existing law states the intent of the Legislature that any modification of coursework required by these provisions be incorporated into the other coursework that the governing board of a school district may by rule specify as required for high school graduation.

This bill would apply towards satisfaction of the mathematics requirement for graduation coursework a pupil completes at any time in any of grades 7 to 12, inclusive, that meets or exceeds adopted content standards for Algebra I. The bill would state the intent of the Legislature that any modification of coursework required by these provisions be incorporated instead into the 2 courses of mathematics required for graduation.

(16) Existing law requires the State Department of Education to establish the California Technology Assistance Project to administer a regionalized network of technical assistance to schools and school districts on the implementation of education technology. Existing law repeals this and related provisions on January 1, 2004.

This bill would extend the repeal date to January 1, 2005.

(17) Existing law establishes the American Indian Early Childhood Education Program and requires the State Department of Education to prepare a request for proposal to contract for an independent evaluation for the program to be performed on or before December 31, 2000, and repeal these provisions on December 31, 2001.

This bill would instead require the evaluation to be performed on or before December 31, 2001, and would extend the repeal date to January 1, 2004.

(18) Existing law establishes the California School Age Families Education program (Cal-SAFE) to provide state funding and assistance to school districts or county superintendents of schools for the purpose of establishing comprehensive, continuous, community linked, school-based programs that focus on youth development, and dropout prevention for pregnant and parenting pupils and child care and development services for their children, if prescribed conditions are met.

This bill would permit applicant agencies that are not in full compliance to submit a timeline and corrective action and be granted, on a case-by-case basis, for an extension until no later than June 30, 2002, of waivers from implementation of prescribed requirements.

(19) Existing law defines “referral for assessment” for the purposes of special education and related services to be a request for assessment made by a parent, teacher, or other service provider.

This bill would include within that definition a request by a foster parent, and would set forth the rights of a foster parent in that regard.

(20) Existing law establishes the Intensive Algebra Instruction Academies Program.

This bill would renumber the provisions governing that program.

(21) Existing law provides for the development of a master contract with alternative nonpublic, nonsectarian schools or agencies that provide alternative special education services to districts, special education local plan areas, county offices, and parents. Existing law requires the nonpublic, nonsectarian schools or agencies to file an application for certification with the Superintendent of Public Instruction between January 1 and June 30.

This bill would allow applications to be filed all year.

(22) Existing law requires the governing board of a school district maintaining one or more high schools to adopt textbooks for use in the high schools and authorizes only textbooks of publishers who comply with certain requirements to be adopted.

This bill would require the adoption of instructional materials, defined to include textbooks and other materials that are designed for use by pupils and their teachers as a learning resource, and would authorize only the instructional materials of publishers who comply with certain requirements to be adopted.

(23) Existing law authorizes the governing board of any school district to establish a retiree benefit fund for specified purposes.

This bill would instead authorize the board to establish a pension plan and other employee benefits fund for those same purposes.

(24) Existing law requires a publisher or manufacturer of instructional materials to comply with specified requirements for materials offered for adoption or sale in the state, including the right of the state to transcribe, reproduce, and distribute the material for deaf pupils and pupils with visual disabilities.

This bill would also require a publisher or manufacturer to provide the state with the right to modify the materials for pupils with other disabilities that prevent the use of standard instructional materials. The bill would also require a publisher or manufacturer to provide computer files or other electronic versions of the materials to the state within 30 days of adoption and require the state to request those materials as needed for specified purposes.

(25) Existing law establishes the State Instructional Materials Fund in the State Treasury as a means of annually funding the acquisition of instructional materials. Existing law requires the State Board of Education to encumber part of the fund to pay for accessible instructional materials to accommodate pupils with visual disabilities.

This bill would instead require the state board to encumber the fund to pay for those materials to accommodate pupils who are visually impaired or who have disabilities and are unable to access the general curriculum.

(26) Existing law requires the Superintendent of Public Instruction to maintain a central clearinghouse-depository and duplication center for accessible versions of instructional materials and assistive devices and materials for visually impaired pupils.

This bill would also require that the depository and duplication center maintain accessible versions of instructional materials for pupils with other disabilities. The bill would also require that assistive devices in the depository to consist of items designed for use by pupils with visual impairments.

(27) Existing law establishes the Governor’s Scholars Program under which a pupil may receive a scholarship for attaining a score on the reading and mathematics portions of the nationally normed statewide achievement test that places the pupil in the top 5% of test takers in his or her grade level statewide or in the top 10% of test takers in his or her grade level in the comprehensive public high school attended by the pupil. In order for a pupil to be eligible for a scholarship under the Governor’s Scholars Program, the pupil is required, among other

things, to attend a California public school for at least one continuous year prior to the administration of the statewide achievement test upon which the award is based.

This bill would instead require the pupil to have been enrolled at a California public school for at least 12 consecutive months immediately preceding the administration of that test, would provide that a pupil attending any California public school is eligible for the 5% award, would include the California Schools for the Deaf and the California School for the Blind as “comprehensive high schools,” and would require that pupils attending these state schools who met the criteria for an award for tests taken in 2000 be given an award.

(28) Existing law establishes the Governor’s Distinguished Mathematics and Science Scholars Program, under which a pupil may receive a scholarship for demonstrating specified high academic achievement in mathematics and the sciences, and requires that a pupil, among other things, earn an award under the Governor’s Scholars Program to be eligible.

This bill would provide that test scores that are required to be attained for the award of a scholarship under the Governor’s Distinguished Mathematics and Science Program, but that are attained before the award of a scholarship under the Governor’s Scholars Program, may be used to satisfy the requirements of the Governor’s Distinguished Mathematics and Science Program even if the scores were earned before January 1, 2000, but would prohibit a pupil from claiming an award under the Governor’s Distinguished Mathematics and Science Program until the pupil has earned an award under the Governor’s Scholars Program.

(29) Existing law requires a school district that has a qualified or negative certification regarding its ability to meet its financial obligations to allow the county office of education at least 6 working days to review and comment on any proposed agreement made between the exclusive representative of the employees of the school district and the public school employer.

This bill would impose a similar requirement on a county office of education that has a qualified or negative certification except that the Superintendent of Public Instruction would review and comment on the proposed agreement.

(30) Existing law prohibits a state or local government agency, in connection with competitive bidding for a public building or construction contract, from requiring a bidder to obtain a surety bond or insurance in connection with the project from a particular surety or insurance company, agent, or broker, and authorizes use of owner-controlled or wrap-up insurance on a construction or renovation program for which the total cost exceeds \$50,000,000 if the agency meets certain conditions and certifies that it has made certain determinations. Existing law exempts a construction or renovation project undertaken by a school district from these provisions.

This bill would also exempt a community college district.

(31) Existing law authorizes a joint powers authority to issue bonds in order to purchase or acquire, by sale, assignment, pledge, or other transfer, any or all right, title, and interest of any local agency in and to the enforcement and collection of delinquent and uncollected property taxes, assessments, and other receivables that have been levied by or on behalf of the local agency and placed for collection on the secured, unsecured, or supplemental property tax rolls. Existing law authorizes school districts, among others, to sell, assign, pledge, or otherwise transfer to a joint powers authority their right, title, and interest in and to the enforcement and collection of delinquent and uncollected property taxes, assessments, and other receivables that have been levied by or on behalf of the local agency for collection on the secured, unsecured, or supplemental property tax rolls.

Under existing law, a school district that participates in a joint powers authority using this financing mechanism is required to report an amount equal to 100% of the school district’s allocable share of the taxes levied for the fiscal year on its behalf and requires 100% of the school district’s allocable share of the delinquent taxes levied for the fiscal year, whether or not the delinquent taxes are ever collected, to be paid by the joint powers authority to the

county auditor and distributed to the school district by the county auditor in the same time and manner otherwise specified for the distribution of tax revenues generally to school districts pursuant to current law.

This bill would adjust the amounts to be reported by school districts participating in a joint powers authority and the amounts to be paid by the joint powers authority to the county auditor for distribution to school districts.

(32) Existing law authorizes the California Debt Limitation Allocation Committee to establish the Extra Credit Teacher Home Purchase Program to provide federal mortgage credit certificates and reduced interest rate loans to eligible teachers, principals, vice principals, and assistant principals who agree to teach or provide administration in a low-performing school and defines a low-performing school.

This bill would revise the definition of low-performing schools.

(33) Existing law requires that certain funds appropriated in the Budget Act of 2001 be used solely for the purposes of activities associated with ensuring that the High School Exit Examination and standards-based achievement test are aligned to the state-adopted academic standards.

This bill would allow those funds to also be used for the purpose of additional psychometric and contracting support for those tests thereby making an appropriation.

(34) Existing law makes available certain funds for the purpose of matching Workforce Investment Act funds and requires the Superintendent of Public Instruction to allocate those funds according to specified priorities.

This bill would instead make those funds available for allocation to support CalWORKs participants who are eligible for youth services in the federal Workforce Investment Act thereby making an appropriation.

(35) Existing law appropriates certain funds for allocation to school districts, county offices of education, and charter schools on the basis of average daily attendance and average daily enrollment in preschool and child care programs operated on schoolsites and requires the average daily enrollment of children served in preschool and child care development programs to be determined by dividing an agency's total number of child days of enrollment in these programs by 180 days.

This bill would instead require an agency's total number of child days of enrollment to be divided by 175 for a preschool program, 246 days for a general or migrant child care program, or 160 days for a schoolage community child care program. The bill would also define schoolsite for these purposes.

(36) Existing law appropriates the sum of \$15,761,000 from the General Fund to the Superintendent of Public Instruction in accordance with a specified schedule, including \$62,000 to the Hilmar Unified School District for street access at Hilmar High School.

The bill would reappropriate the funds for the purposes of street access at Hilmar Middle School to the extent that funding remains available.

(37) Existing law established the Class Size Reduction Program and provides for state apportionments to implement a class size reduction program for kindergarten and grades 1 to 3, inclusive.

This bill would, notwithstanding other provisions of law, set the total apportionment for class size reduction for the Compton Unified School District at \$9,695,028 for the 1999–2000 fiscal year.

(38) Existing law appropriated \$350,000,000 for allocation on a one-time basis to school districts, county offices of education, and charter schools for the Academic Performance Index Schoolsite Employees Performance Bonus with 50% of the funds to be used to provide one-time bonuses, to employees and the other 50% to be used at the discretion of the schoolsite for any one-time purpose.

This bill would require that school agency administrative costs and salary-driven benefit costs to be paid from funds appropriated for the schoolsite portion of the funds.

(39) Existing law defines the arts, for purposes of the Summer School for the Arts, as including drama and includes drama as an instructional related activity in the California State University system. Existing law includes references in various provisions to music, drama, art, and the fine arts.

This bill would refer to theatre instead of drama and to the visual and performing arts and would include dance, music, theatre, and visual arts in the visual and performing arts.

(40) This bill would make technical and clarifying changes and update cross-references in other provisions of the Education Code.

(41) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 735 (AB 819) Jackson. School safety.

Existing law establishes the School Safety and Violence Prevention Act (Act), a statewide program administered by the Superintendent of Public Instruction, pursuant to which funds are allocated to school districts for purposes that include, but are not limited to, providing conflict resolution personnel, providing on-campus communication devices, establishing staff training programs, and establishing cooperative arrangements with law enforcement agencies.

This bill would state the intent of the Legislature that schoolsites receiving funds pursuant to the Act provide age-appropriate instruction in domestic violence prevention, dating violence prevention, and interpersonal violence prevention.

This bill would incorporate additional changes in Section 32228 of the Education Code, proposed by AB 804, to be operative only if AB 804 and this bill are both chaptered and become effective on or before January 1, 2001, and this bill is chaptered last.

Ch. 736 (AB 306) Frommer. Special education.¹⁴

(1) Existing law requires braille instruction to be provided by a teacher credentialed to teach pupils who are functionally blind. Existing related regulations authorize holders of certain credentials to teach children with disabilities in a special day class in which the primary disability is visual impairment including blindness.

This bill would authorize a school district, special education local plan area, or county office of education to reinforce braille instruction using a braille instructional aide who meets certain criteria and is under the supervision of a teacher who holds an appropriate credential, as determined by the Commission on Teacher Credentialing, to teach pupils who are functionally blind or visually impaired.

(2) Existing law provides for the adoption and selection of quality instructional materials for use in elementary and secondary schools, and imposes requirements upon publishers and manufacturers, including, but not limited to, the requirement that they provide to the state, at no cost, the right to transcribe, reproduce, and distribute the material in braille, large print, recordings, or other accessible media for use by pupils with visual disabilities, including computer diskette versions of print materials if made available to any other state, and those corrections and revisions as may be necessary.

This bill would delete the provision that requires a publisher or manufacturer to provide computer diskette versions of print material if made available to any other state, and instead, would require computer files or electronic versions of each state-adopted literary title to be provided within 30 days of request by the state, and computer files or other electronic versions of nonliterary titles, including science and math, to be provided when technology is available to convert those materials.

This bill would appropriate \$227,000 for allocation to at least 15 community college districts throughout the state to enable each district to offer at least one additional course to train individuals in braille instruction. The funds appropriated by this bill would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 737 (AB 466) Strom-Martin. Mathematics and Reading Professional Development Program. ¹⁵

Existing law requests the Regents of the University of California to jointly develop with the Trustees of the California State University and the independent colleges and universities, the California Professional Development Institutes that provide training to teachers in various subject matters taught in the elementary and secondary schools.

This bill would require the instruction provided through the professional development institutes to acquaint teachers with the value in the diagnostic nature of standardized tests. The bill would require that priority for the selection of teachers to participate in the professional development institutes be accorded first to teachers who have not participated in a professional development institute in reading or mathematics; second priority would be accorded to teachers who have participated in a professional development institute in reading or mathematics but who have not yet received supplemental training in the specified areas; and third priority would be accorded to teachers who have participated in a professional development institute in reading or mathematics and have received supplemental training in the specified areas.

This bill would establish, until July 1, 2005, the Mathematics and Reading Professional Development Program, to be administered by the Superintendent of Public Instruction with the approval of the State Board of Education under which a local education agency, as defined, would receive incentive funding to provide training in mathematics and reading to teachers and also to provide training to instructional aides and paraprofessionals, as defined, who directly assist with classroom instruction in mathematics and reading, through professional development programs conducted by institutions of higher education or an approved provider of training. The bill would authorize a school or county office of education that participates in the program to claim staff development funding, as prescribed. The bill would authorize, subject to the concurrence of the State Board of Education, the University of California to serve teachers in prekindergarten through grade 12 in participating school districts with programs in reading or mathematics, as specified. This bill would appropriate \$1,200,000 from the General Fund to the State Department of Education for purposes of the Mathematics and Reading Professional Development Program with half the funds available for expenditure in each of the 2001–02 and 2002–03 fiscal years.

Ch. 738 (AB 637) Lowenthal. Redevelopment.

(1) The existing Community Redevelopment Law requires redevelopment agencies to use not less than 20% of taxes allocated to the agency for low- and moderate-income housing, as specified. That law prescribes how these funds may be used. New or substantially rehabilitated housing units developed or otherwise assisted with moneys from the existing Low and Moderate Income Housing Fund are required to remain available for prescribed periods of time.

This bill would require this housing to be occupied by persons and families of very low, low, or moderate income. The bill would also extend the time periods for the housing units to be available to and occupied by persons and families of low or moderate income and very low income households. The bill would prohibit funds from the Low and Moderate Income Housing Fund from being used to the extent that other reasonable means of private or commercial financing the new or substantially rehabilitated units at the same level of affordability and quantity are reasonably available to the agency or to the owner of the units.

(2) Existing law contains findings and declarations that it is the policy of each redevelopment agency to expend over the duration of the redevelopment plan, the moneys in the Low and Moderate Income Housing Fund to assist housing for persons of low and very low income.

This bill would require these moneys to be expended over the duration of the redevelopment implementation plan, as prescribed. The bill would also require, whenever all or a portion of a redevelopment project is developed with very low, low-, or

moderate-income housing units developed with agency assistance or pursuant to the requirements described in (3) below, that the redevelopment agency require that this housing be made available for rent or purchase by low- or moderate-income persons or families displaced by the housing project. The bill would require the implementation plan to contain additional information, as prescribed, relating to the expenditure of Low and Moderate Income Housing Fund.

(3) The Community Redevelopment Law, until January 1, 2002, requires that when dwelling units housing persons and families of low or moderate income are destroyed or removed from the housing market as part of a redevelopment project, an equal number of replacement units shall be rehabilitated, developed, or constructed, as specified. That law sets forth numerous duties of the redevelopment agency with respect to these replacement units, including the responsibilities of the agency regarding long-term affordability standards, and contains alternate provisions, to become effective on January 1, 2002, relating to low- and moderate-income replacement units that do not expressly provide for certain options available under the provisions in effect until January 1, 2002, including acquiring housing outside the project area under certain conditions, aggregating new or substantially rehabilitated dwelling units in one or more project areas, acquiring certain long-term affordability covenants, and permitting certain sales of owner-occupied low- and moderate-income units.

This bill would, among other things, incorporate within those provisions that are to become operative on January 1, 2002, the provisions that are to be repealed on January 1, 2002. It would also revise the definition of substantially rehabilitated dwelling units and the provisions relating to affordability covenants for purposes of these provisions, effective January 1, 2002, and would further revise those provisions on January 1, 2006, as specified.

(4) This bill would incorporate additional changes in Section 33334.2 of the Health and Safety Code proposed by AB 637, AB 661, and SB 459, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 2002, and this bill is enacted last.

This bill also would incorporate additional changes in Section 33413 of the Health and Safety Code proposed by SB 211, to be operative if SB 211 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 739 (AB 1707) Committee on Transportation. Transportation.

(1) Existing law provides that state highway routes embracing portions of certain designated state highway routes are known and designated as "El Camino Real."

This bill would revise the designated portions of state highway routes included in the description of "El Camino Real."

(2) Existing law requires a course provider of a mature driver improvement course to report certain information concerning course participants to the Department of Motor Vehicles.

This bill would delete that requirement and make other related changes.

(3) Existing law requires every owner of a traffic violator school to keep a record at the school's primary business location showing certain information, including the name and address of each person given instruction.

This bill would require the record of the address of each person given instruction to only be used by the school for administrative purposes and would make a technical change in this provision and in a related provision. Because a violation of the Vehicle Code is a crime under existing law, the bill would create a state-mandated local program by creating a new crime.

(4) Existing law authorizes a manufacturer, remanufacturer, distributor, or dealer owning or lawfully possessing any vehicle of a type otherwise required to be registered to operate or move the vehicle on the highways without registering the vehicle on the condition that the vehicle displays one of certain specialized license plates.

This bill would also authorize operation or movement of the vehicle under similar circumstances for a period not to exceed 7 days by a person test-driving the vehicle in conjunction with a sale or lease from a dealer.

(5) Existing law requires a person involved in a motor vehicle accident to report the accident to the Department of Motor Vehicles within 10 days of the accident. The department is required to suspend the driver's license of a person who does not report an accident as required.

This bill would provide that the department is not required to file an accident report if none of the parties involved in an accident has reported the accident within one year of its occurrence. The bill would also provide that the license suspension provisions do not apply under these circumstances.

(6) Existing law provides that a towed vehicle may be equipped with an exterior mounted pilot lamp meeting certain requirements.

This bill would instead refer to an exterior mounted indicator lamp and would revise the applicable requirements.

(7) Existing law prohibits a vehicle from being equipped with any lamp or illuminating device that is not required or permitted by the provisions of existing law that pertain to lighting equipment on vehicles.

This bill would authorize a motor vehicle to be equipped with one or 2 rear-facing auxiliary lamps, subject to specified mounting and operation requirements.

(8) Existing law declares the Legislature's intent, commencing July 1, 1991, to allocate \$10,000,000 annually for 10 years to the Environmental Enhancement and Mitigation Demonstration Program Fund to be used for making grants to local, state, and federal agencies and nonprofit entities that undertake projects to mitigate transportation facilities. Existing law requires the Department of Transportation to extend the completion date to June 30, 2002, for specified Environmental Enhancement and Mitigation (EEM) projects.

This bill would require the department to extend the completion date to June 30, 2004, for a specified EEM project for the Tahoe City Public Utility District.

(9) This bill would make other clarifying changes and correct obsolete cross-references.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(11) This bill provides that any section of any act enacted by the Legislature during the 2001 calendar year that takes effect on or before January 1, 2002, and that amends, amends and renumbers, adds, repeals and adds, or repeals a section that is amended, added, or repealed by this bill, shall prevail over this bill, whether that act is enacted prior to, or subsequent to, the enactment of this bill.

Ch. 740 (SB 108) Speier. Organ and tissue donor registry.

Existing law contains provisions known as the Uniform Anatomical Gift Act and related provisions that require the Department of Motor Vehicles to provide forms and other information relating to the act.

This bill would enact the Organ and Tissue Donor Registry Act of 2001, which would establish under the Uniform Anatomical Gift Act an Organ and Tissue Donor Registry in the California Health and Human Services Agency, and would instead require the Department of Motor Vehicles to provide information and a standardized form containing specified information, to be completed by driver's license and identification card applicants who desire to be organ donors.

This bill would also authorize the department to receive voluntary contributions to be deposited in the Organ and Tissue Donor Registry Fund created by the bill. This bill would make the fund subject to appropriation by the Legislature.

Implementation of certain provisions of this bill are contingent on the Director of Finance determining that sufficient moneys are available for that implementation.

Ch. 741 (SB 211) Torlakson. Redevelopment: indebtedness.

The existing Community Redevelopment Law authorizes the legislative body of a community to adopt an ordinance declaring that there is no further need for a redevelopment agency under prescribed conditions. It also prohibits a redevelopment agency from acting pursuant to a redevelopment plan after a specified time limit on the effectiveness of the plan, except to pay previously incurred indebtedness.

This bill would prohibit the adoption of an ordinance declaring that there is no further need for an agency if the agency has excess surplus funds or has not completed specified obligations. It would authorize a redevelopment agency that adopted a redevelopment plan on or before December 31, 1993, to amend that plan in accordance with specified procedures to extend its effectiveness to pay indebtedness and receive tax increment revenues with respect to the plan for not more than 10 years if specified requirements are met, including the issuance of a letter by the Department of Housing and Community Development confirming that the agency has not accumulated an excess surplus in its Low and Moderate Income Housing Fund. The bill would authorize an affected taxing entity, the Department of Finance, or the Department of Housing and Community Development to request the Attorney General to participate in the amendment process. It also would authorize the Attorney General to bring a civil action to determine the validity of an adopted amendment.

This bill would, on or after January 1, 2002, allow those redevelopment plans to be amended by adoption of an ordinance to eliminate the time limit on the establishment of loans, advances, and indebtedness required prior to January 1, 2002, without being required to comply with any other provision of law relating to the amendment of redevelopment plans.

This bill, among other things, would prescribe additional requirements that a redevelopment agency would have to meet prior to the time limit on the effectiveness of a redevelopment plan, including requiring a percentage of new and substantially rehabilitated dwelling units to be available at affordable housing cost to persons and families of low or moderate income prior to the time limit on the effectiveness of the plan, as specified.

The bill would prohibit the Redevelopment Agency of the City of Oakland from receiving specified property tax revenue upon the extension of a specified plan amendment.

The bill would incorporate additional changes in Section 33413 of the Health and Safety Code proposed by AB 637, to be operative if AB 637 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 742 (SB 613) Alarcon. Medi-Cal: notifications to managed care plans.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

This bill would require the department to notify a Medi-Cal managed care plan of the date of the annual redetermination of a Medi-Cal beneficiary, who is in a disabled aid category and whose redetermination is the responsibility of the department.

Ch. 743 (SB 891) Escutia. New Economics for Women.¹⁶

Existing law establishes the Multifamily Housing Program, administered by the Department of Housing and Community Development, to provide assistance in the form of deferred payment loans for, among other things, the costs of developing dwelling units, transitional housing, and child care, and after school care and social service facilities integrally linked to assisted dwelling units that are affordable to lower income households.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would appropriate \$250,000 from the General Fund to the Department of Parks and Recreation for allocation as a grant to the governing board of New Economics for Women to provide for the capital outlay needs of the La Posada Housing Project.

Ch. 744 (SB 1182) Committee on Revenue and Taxation. Property taxation.

Existing property tax law provides for supplemental and escape assessments to be made on property outside the regular assessment period, provides for certain notices of those assessments to be given to assesses, and specifies that applications for reduction of those assessments are required to be filed within certain time periods.

This bill would, among other things, specifically apply to the County of Los Angeles notice requirements regarding supplemental and escape assessments that currently apply to counties that have opted to require the filing of an application for reduction in an assessment, made outside the normal assessment period, within 60 days of the date of the relevant tax bill. This bill would also revise and recast provisions specifying the time periods for the filing of an application for reduction in an assessment, to specify separate requirements for (1) the County of Los Angeles and opting counties, and (2) other counties in the state. By imposing new notice duties upon local officials in the County of Los Angeles, this bill would impose a state-mandated local program.

This bill would also make clarifying, or technical, nonsubstantive changes to other provisions of property tax law.

Existing law provides that the annual vehicle license fee is 2% of the market value. Existing law also provides for a substitute methodology for computing the annual vehicle license fee that would only become operative if either of 2 specified contingencies occurred. Neither of these 2 contingencies occurred.

This bill would repeal these inoperative provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 745 (SB 1191) Speier. State and local reporting requirements.

Existing law requires or requests various state and local agencies to prepare and submit reports to the Governor, the Legislature, or other state entities.

This bill would revise or delete certain reporting requirements for state and local agencies, and delete obsolete references.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 746 (AB 31) Reyes. Central Valley Infrastructure Grant Program.¹⁷

Existing law sets forth the duties of the Department of Housing and Community Development with respect to various community development programs in the state.

This bill would establish until January 1, 2007, the Central Valley Infrastructure Grant Program in the Department of Housing and Community Development for the purpose of providing grants, beginning September 1, 2001, for qualifying projects to rural small cities in the Counties of Fresno, Kings, Kern, Tulare, Madera, Merced, Stanislaus, and San Joaquin.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 747 (AB 705) Steinberg. Dependent children: siblings.

(1) Existing law authorizes a social worker to take a minor into custody in various specified situations, including where there is reasonable cause for believing that the minor is a person who may come within the jurisdiction of the juvenile court on the basis of abuse or neglect. A child who is within the jurisdiction of the juvenile court may be adjudged a dependent child of the court.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under certain conditions, a dependent child of the court may be placed for adoption. If a dependent child of the court is ordered placed for adoption, the court may include in the final adoption order provisions for the adoptive parent or parents to facilitate postadoptive sibling contact.

This bill would require a social worker who takes a minor into custody, to the extent that it is practical and appropriate, to place the minor together with any siblings or half-siblings who are also detained, or include in a specified report prepared for the initial petition hearing a statement of the social worker's continuing efforts to place the siblings together or why those efforts are not appropriate. By placing additional duties on local employees, the bill would impose a state-mandated local program.

(2) Existing law provides for status review hearings for minors who have been adjudged dependent children of the juvenile court. At least 10 days prior to the hearing, the social worker is required to file a supplemental report and his or her recommendation regarding disposition and to provide the parent or legal guardian with a copy of the report, including the recommendation. If the child is removed from the physical custody of his or her parent or legal guardian, the social worker is required to provide a summary of his or her recommendations for disposition to the counsel for the child.

This bill would revise those provisions to require the social worker to provide the child's counsel with a copy of the report, including the recommendations at least 10 days prior to the hearing.

By imposing additional duties on local employees, the bill would impose a state-mandated local program.

(3) Existing law authorizes a court to terminate parental rights under certain conditions unless the court finds a compelling reason for determining that termination would be detrimental to the child due to one of certain, enumerated circumstances.

This bill would revise the list of circumstances to include substantial interference with a sibling relationship.

(4) Existing law authorizes a court, in the adoption proceedings of a dependent child, to include provisions for postadoptive sibling contact in the final adoption order. Under existing law, if a juvenile court orders a permanent plan of adoption, the court retains jurisdiction over the child until the child is adopted.

This bill would provide that upon granting the adoption petition and issuing the adoption order, the court's jurisdiction over the child with respect to dependency proceedings would terminate, however the court would maintain jurisdiction over the child for purposes of enforcing the postadoption contact agreement.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 748 (AB 715) Wayne. Oil spill prevention and response: ballast water.

(1) The existing Lempert-Keene-Seastrand Oil Spill Prevention and Response Act generally requires the administrator for oil spill response, acting at the direction of the Governor, to implement activities relating to oil spill response, including emergency drills and preparedness, and oil spill containment and cleanup, and to represent the state in any coordinated response efforts with the federal government. Existing law sets forth the duties of the administrator, including the implementation of periodic announced and unannounced drills to test response and cleanup operations, equipment, contingency plans, and procedures. Existing law requires state and local entities, operators of marine facilities, and

the operators of all vessels located in marine waters to cooperate with the administrator in carrying out these drills.

Existing law requires the administrator to adopt and implement regulations and guidelines governing the adequacy of oil spill contingency plans, and requires each operator of a vessel or a marine facility to prepare and implement an oil spill contingency plan applicable to the vessel or marine facility.

Existing law provides for interim marine facility and vessel oil spill contingency plans, which are required to be prepared on or before July 31, 1991.

The act also prohibits the operation of a nontank vessel, as defined, of 300 gross registered tons or greater in the marine waters of the state unless the owner or operator prepares and submits an oil spill contingency plan to the administrator for oil spill response.

This bill would generally revise and recast those provisions and would define the terms "environmentally sensitive area," "nontank vessel," "oil spill response organization" (OSRO), "dedicated response resources," "reasonable worst case spill," "tank barge," and "tank ship." The bill would also revise other definitions for purposes of the act. The bill would require the administrator to establish performance standards, by June 30, 2002, that each operator and rated OSRO are required to meet during unannounced drills carried out by the administrator and would require the operator to be responsible for the costs that it incurs while carrying out those drills.

The bill would repeal the provisions requiring interim contingency plans and would revise the requirements for preparing and implementing oil spill contingency plans, including requiring the plan to identify at least one OSRO rated by the administrator to implement the plan.

The bill would specify procedures and requirements for the rating of an OSRO by the administrator, including requirements for specified equipment and unannounced drills to test the resources and response of the OSRO. The bill would also require the administrator to adopt regulations to implement the OSRO rating provisions and would require the administrator to review each rating every 3 years, as specified. The bill would authorize the administrator to charge a fee to process an OSRO rating application or renewal. The bill would require an owner or operator to comply with the applicable oil spill contingency plan approved by the administrator if there is an oil spill.

(2) Existing law requires the administrator to establish harbor safety committees for specified harbors.

The bill would authorize a harbor safety committee to petition the administrator for the appointment of additional members.

(3) Existing law specifies certain ballast water management practices and imposes administrative civil penalties upon persons who violate those requirements. The administrator is authorized to impose administrative civil penalties for such a violation.

The bill would authorize the administrator, after the time for review of a violation of the oil spill prevention and response act or the provisions regulating ballast water control has expired, to apply to the clerk of the appropriate court for a judgment to collect the administrative civil liability pursuant to a specified procedure.

(4) Existing law imposes specified criminal fines and penalties, including imprisonment in the county jail for not more than one year, upon any person convicted of continuing operations for which a contingency plan is required or knowingly failing to follow the material provisions of the applicable contingency plan.

Because a violation of the contingency plan requirements is a crime under existing law, the bill would impose a state-mandated local program.

(5) Existing law establishes the State Interagency Oil Spill Committee and specifies its membership. Existing law also provides for a review subcommittee in that committee.

The bill would include the Chairperson of the San Francisco Bay Conservation and Development Commission as a member of the committee, with specified limited voting and decisionmaking authority, and would include the executive director of that commission as

a member of the review subcommittee, with specified limited voting and decisionmaking authority.

(6) The bill would also make conforming changes and delete obsolete provisions.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 749 (AB 961) Steinberg. Low-performing schools. ¹⁸

(1) Existing law requires the governing board of a school district to develop jointly with parents and guardians, and to adopt, a policy that outlines how parents or guardians of pupils, school staff, and pupils may share the responsibility for continuing the intellectual, physical, emotional, and social development and well-being of pupils at each schoolsite.

This bill would, consistent with federal law, require a school that participates in the High Priority Schools Grant Program for Low Performing Schools established by this bill and that maintains kindergarten or any of grades 1 to 5, inclusive, to jointly develop with parents or guardians for all children enrolled at that schoolsite a school-parent compact.

(2) Existing law establishes various programs designed to improve the academic achievement of pupils, including, among others, the Public Schools Accountability Act of 1999 which contains the Immediate Intervention/Underperforming Schools Program (IIUSP) and requires the Superintendent of Public Instruction to develop an Academic Performance Index (API) to measure the performance of schools. Existing law requires a school district that participates in the IIUSP to contract with an external evaluator to assist the school in the development of its school action plan.

This bill would add to the duties of the external evaluator the provision of technical assistance to the participating school and would, as an alternative to contracting with the external evaluator, allow a school district to contract with entities with proven expertise specific to the challenges inherent in low-performing schools. The bill would authorize a school selected on or after September 2001 to participate in the IIUSP to use an existing plan instead of the required action plan, as specified.

The bill would provide an alternative to the existing sanctions to which a school is subject if it does not meet its API growth target and fails to show significant growth.

This bill would establish the High Priority Schools Grant Program for Low Performing Schools within the Public Schools Accountability Act of 1999. The bill would require the Superintendent of Public Instruction to invite schools ranked in the 5 lowest deciles of the API to participate in the IIUSP and the High Priority Schools Grant Program for Low Performing Schools. Priority for participation would be given to schools ranked in the lowest deciles, as specified. Participation in the IIUSP would be required in order to receive funding under the program established by the bill. The bill would require a school to develop and submit an action plan containing specified components. The bill would require a school district to report certain information annually to the Superintendent of Public Instruction regarding a participating school's progress toward achieving specified goals.

The bill would, 24 months after receipt of funding, subject a participating school that has not met its growth targets each year to review by the State Board of Education. After a specified number of months of plan implementation, schools that do not meet their API growth targets and that fail to show significant growth would be subject to the sanctions existing under the IIUSP and the alternative sanctions established by this bill. A school participating in the High Priority Schools Grant Program for Low Performing Schools that meets or exceeds its API growth target would continue to receive funding under this program for a 4th year, as specified.

This bill would appropriate \$3,000,000 from the General Fund to the State Department of Education to provide training, as specified, and for costs associated with the administration and oversight of the High Priority Schools Grant Program for Low

NOTE: Superior numbers appear as a separate section at the end of the digests.

Performing Schools and would authorize those funds to be expended to fund up to 18 positions in the department. The bill would reduce by \$3,000,000 the appropriation made in the Budget Act of 2001 for purposes of low-performing schools.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 750 (AB 1107) Leach. State Department of Education: reports.

(1) Existing law requires a school district to submit, on or before June 1, 1998, a written report to the Legislature or the State Board of Education on the amount of state funds that the school district has expended or diverted, as of January 1, 1996, from bilingual education programs for the purpose of recognition of, or instruction in, any dialect, idiom, or language derived from English and requires a school district to restore those funds to its bilingual program before January 1, 1999.

This bill would delete these requirements.

(2) Existing law requires the State Department of Education and the Board of Governors of the California Community Colleges to submit to the Legislature an annual descriptive report containing information on career technical education and technical training programs, including regional occupational centers and programs, an annual individual program evaluation derived from a representative sample of participating districts and schools containing information on program effectiveness, and a copy of the annual state plan for career technical education.

This bill would make specified changes to the information required to be included in the report and program evaluation.

(3) Existing law requires that each state preschool program contracting agency report annually to the Superintendent of Public Instruction the numbers of 3- and 4-year old children enrolled in its state preschool programs and requires the superintendent to annually transmit this information to the Legislature and the Governor.

This bill would delete these requirements.

(4) Existing law requires the Superintendent of Public Instruction, on or before November 30, 2000, to submit a plan to the Office of the Secretary for Education, the Department of Finance, and the Legislative Analyst's Office specifying the application procedures to request funding from the Child Care Facilities Revolving Fund for the renovation, repair, or improvement of an existing building, as specified.

This bill would delete this provision.

(5) Existing law requires the Superintendent of Public Instruction, on December 15, 1980, and every 3rd year thereafter, to submit to the Joint Legislative Budget Committee a report documenting the performance of child care and development programs and containing prescribed information.

This bill would delete this provision.

(6) Existing law requires county welfare departments and alternative payment programs to provide to the State Department of Education or the State Department of Social Services, whichever is appropriate, and the local child care planning council, on a monthly basis, data about child care usage and demand in each of the 3 stages of child care provided under the CalWORKs program.

This bill would additionally require each county welfare department to provide to the State Department of Social Services, on a monthly basis, data regarding child care usage and demand in stage 1 of child care services under the CalWORKs program.

(7) Existing law requires the State Department of Education to collect data from participants in the Local Arts Education Partnership Program and to submit a written report on the program's progress to the Joint Committee on the Arts no later than December 31, 1996.

This bill would delete these requirements.

(8) Existing law requires the State Department of Education to monitor the performance of the Department of Toxic Substances Control in meeting specified timeframes relating to

the environmental assessment of proposed schoolsites and to report its findings to the Department of General Services and the Department of Finance on a quarterly basis. Existing law requires the State Department of Education also to report, to the Department of General Services and the Department of Finance every 6 months for a period of 2 years, the amount of fees or other charges of any state agency review paid by school districts pursuant to provisions governing the acquisition and disposal of schoolsites and any concerns about those fees or charges.

This bill would delete these requirements.

(9) Existing law requires the Superintendent of Public Instruction to contract for an ongoing independent evaluation of the effectiveness of school violence reduction programs funded by grants pursuant to the Carl Washington School Safety and Violence Prevention Act and to submit on or before June 1, 1998, to the Legislature an interim progress report and on or before October 1, 1999, a final evaluation report.

This bill would delete these requirements.

(10) Existing law requires the State Department of Education to report, on June 30, 1979, and each year thereafter, to the Joint Legislative Audit Committee on the actions taken by the department to eliminate audit exceptions and comply with management improvement recommendations.

This bill would make that annual report due on October 1.

(11) Existing law requires the Superintendent of Public Instruction to prepare an annual report on ratios of administrative school district employees to other school district employees and to transmit a copy of this report to the Legislature and to any agency or individual who requests it.

This bill would delete these requirements.

(12) Existing law authorizes a school district or school, individually or jointly with another school district or school, to provide a comprehensive program in first aid or cardiopulmonary resuscitation (CPR) training, or both, to pupils and employees and requires each school district or school that develops a program to report to the Assembly Education Committee on or before January 1, 1997, as to the success of the program and any concerns raised in the program and containing information regarding how many school staff and pupils have participated in this training as well as the ratio of cardiopulmonary resuscitation or first aid trained staff to the total pupil enrollment on a per school basis.

This bill would delete the reporting requirement.

(13) Existing law requires the State Department of Education to prepare and distribute to school districts and county offices of education guidelines for incorporating in-service training in gang violence and drug and alcohol abuse prevention for teachers, counselors, athletic directors, school board members, and other educational personnel into the staff development plans of all school districts and county offices of education. Existing law requires the department to report annually to the Legislative Analyst and the fiscal, education, and appropriate select committees of each house of the Legislature, on the status of gang violence and drug and alcohol abuse prevention in-service training programs provided by school districts and county offices of education.

This bill would delete the reporting requirement.

(14) Existing law requires the Superintendent of Public Instruction to monitor the implementation of impacted language programs and to submit an annual report to the Legislature on the number of pupils served by each impacted language group and grade level.

This bill would delete those provisions.

(15) Existing law requires the Superintendent of Public Instruction to develop for submission to the Legislature and the Governor an annual evaluation of bilingual needs and programs within the state.

This bill would delete this requirement.

(16) Existing law requires the Superintendent of Public Instruction to report to the Governor and the respective fiscal policy committees of the Assembly and the Senate on the implementation of the immigrant workforce preparation program.

This bill would delete this requirement.

(17) Existing law requires the Superintendent of Public Instruction to contract for a 4-year independent review of the effectiveness of the newly funded California Partnership Academies and requires preliminary results to be reported after the 1994–95 fiscal year and a final evaluation to be performed after the 1996–97 fiscal year. Existing law requires these reports to be made to the Legislature by January 1 following their completion.

This bill would delete those requirements.

(18) Existing law requires the governing board of a school district receiving a grant pursuant to the single gender academies pilot program to provide a detailed report of the relative success of the single gender academy to the Superintendent of Public Instruction, Department of Finance, office of the Legislative Analyst, Joint Legislative Budget Committee, Senate Committee on Education, and to the Assembly Committee on Education on or before January 1, 2000.

This bill would delete the reporting requirement.

(19) Existing law requires the State Department of Education to create an evaluation design for the Student Academic Partnership Program and requires school districts that receive grants under that program to use this evaluation design to assess the effectiveness of their programs. Existing law requires these school districts to transmit their assessments to the department and requires the department to develop a report to be submitted to the Legislature on or before March 1, 1999.

This bill would delete these requirements.

(20) Existing law requires certain persons convicted of offenses relating to controlled substances to pay a drug program fee that is deposited into the drug program fund maintained by the county treasurer. Existing law requires that a minimum of 33% of the moneys in the fund be allocated to primary prevention programs in the schools and community and requires that county superintendents of schools use 5% of those funds to conduct an annual evaluation that is submitted to the State Department of Education which in turn writes and submits a report to the Legislature and the Governor.

This bill would delete the evaluation requirement.

(21) Existing law requires the State Department of Education to award and administer grants for projects directed at the prevention of tobacco use among schoolage children and to report to the Legislature on local school district expenditures and services statewide.

This bill would delete the reporting requirement.

(22) Existing law, the Budget Acts of 1991 and 1992, require the State Department of Education to pay a minimum of \$500,000 to contract for a longitudinal evaluation to assess the effectiveness of local drug and alcohol abuse education prevention programs, state the intent of the Legislature that the evaluation be conducted for a minimum of 3 years, and require the department to annually submit findings of the evaluation to the Legislature.

This bill would delete the requirement that the department use those funds to contract for the evaluation, the statement of legislative intent, and the requirement regarding annual submission of the findings of the evaluation.

(23) Existing law requires the State Department of Education to review the adult education program commencing in 2002 and every 5 years thereafter and to submit a report of its findings to the chairs of the appropriate policy and fiscal committees of the Legislature, the Director of Finance, and the Legislative Analyst.

This bill would delete these requirements.

Ch. 751 (AB 1205) Ashburn. Valley fever.

Existing law establishes the Valley Fever Vaccine Project, administered by the State Department of Health Services, and provides for state support and funding of efforts by the project to conduct valley fever vaccine research.

This bill would appropriate \$500,000 from the General Fund to the department for the 2001–02 fiscal year, for purposes of extending the project.

Existing law authorizes the department to contract on a sole source basis with a nonprofit organization that has provided funding for vaccine research on valley fever and requires the organization to distribute research grants to support research efforts that are likely to advance the effort to develop a vaccine.

This bill would exempt these contracts from review by the Department of General Services.

This bill would incorporate additional changes in Section 120480 of the Health and Safety Code proposed by SB 1191, that would become operative only if SB 1191 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 752 (AB 1382) Liu. Space industry development.

Existing law provides for the California Space and Technology Alliance and the California Space Flight Competitive Grant Program administered by the alliance, and the Highway to Space Competitive Grant Program administered by the Western Commercial Space Center under the Highway to Space Program. Applications for grants under these programs are evaluated according to specified criteria by an impartial review panel established by the respective entity, and grants are awarded based on these evaluations by the Secretary of Technology, Trade, and Commerce. Both the alliance and the center may establish an advisory committee to provide input and recommendations on the respective programs and other space-flight related issues.

This bill would delete these provisions and instead, subject to the availability of funds appropriated for that purpose, require the Technology, Trade, and Commerce Agency to implement a space industry development program. The agency would be required to contract with a nonprofit corporation to assist in its administration of these activities, according to specified criteria. The corporation would be required to issue solicitations for the California Space Industry Competitive Grant Program established by the bill, and evaluate grant proposals with the assistance of an impartial review panel to be established by the corporation, according to specified criteria. The Secretary of the Technology, Trade, and Commerce Agency would be required to award grants based upon these criteria.

This bill would establish the California Space Industry Advisory Committee within the agency, to be composed of a specified membership, to provide input and recommendations on the competitive grant program established by the bill, and to provide recommendations on space industry issues.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 753 (AB 1673) Committee on Water, Parks and Wildlife. Fish: wildlife: marine life master plan: abalone: triploid grass carp: striped bass: salmon: landing fees: sea cucumbers: sablefish: permits.

(1) Existing law requires the Department of Fish and Game to prepare and submit periodic reports to the Governor and the Legislature on the status of selected freshwater fisheries and the status of selected ocean fisheries.

This bill would repeal that requirement.

(1.5) Existing law authorizes the department to exchange or release to any appropriate federal, state, or local agency or agencies in other states, for purposes of law enforcement, any information collected or maintained by the department under specified law.

This bill, with specified exceptions, would designate as confidential and not public records, the names and addresses contained in records submitted and retained by the department for the purpose of obtaining recreational fishing and hunting licenses.

(2) Existing law prohibits any person from obtaining more than one fishing license, permit, reservation, or entitlement of the same class, except under specified conditions.

This bill would additionally exempt certain licenses issued through the Automated License Data System.

(3) Existing law requires the department to submit to the Fish and Game Commission a draft of a master plan under the Marine Life Protection Act on or before January 1, 2002, a proposed final master plan on or before April 1, 2002, and a final master plan on or before July 1, 2002.

This bill would require the department to submit to the commission a draft of a master plan under the Marine Life Protection Act on or before January 1, 2003, a proposed final master plan on or before April 1, 2003, and a final master plan with regulations on or before December 1, 2003.

(4) Existing law requires the commission, annually, until the master plan is adopted, and thereafter at least every 3 years, to receive, consider, and promptly act upon petitions from the department or any other interested party, to add, delete, or modify marine protected areas.

This bill would delete the requirement that the commission promptly act upon a petition from the department.

(5) Existing law prohibits any person from taking abalone for commercial purposes in specified districts. Existing law establishes a rebuttable presumption, affecting the burden of producing evidence, that a person who is required to obtain a license to take a fish, reptile, or amphibia, and who takes or possesses more than 12 individual abalone possess the abalone for commercial purposes.

This bill would additionally establish that rebuttable presumption if a person who is required to obtain a license takes abalone in excess of the annual bag limit.

(6) Existing law, until January 1, 2002, provides for the issuance of a sport fishing license, to a resident or nonresident, over the age of 16 years, for 2 consecutive designated days, upon the payment of a base fee. On and after January 1, 2002, existing law authorizes a license for one designated day.

This bill would extend the operative date of the current law authorizing a license for 2 consecutive days and repeal the section that would become operative on January 1, 2002, authorizing a license for one designated day.

(7) Existing law authorizes the department to adopt regulations that provide for the control of aquatic plant pests using artificially introduced triploid grass carp under a permit issued by the department and requires the department to impose conditions in the permit, including issuing a permit only for the Counties of Imperial, Riverside, and San Bernardino.

This bill would delete the limitation authorizing the department to issue those permits for the use of triploid grass carp for aquatic plant pest control only for those 3 counties.

(8) Existing law requires the department to report to the Legislature annually a summary of the use of triploid grass carp use for aquatic plant pest control compiled from information submitted to the department from permittees.

This bill would delete that provision.

(8.5) Existing law establishes a procedure for a person holding a valid sport fishing license to obtain a second-rod sport fishing stamp from the department.

This bill would authorize any person who has a valid second-rod sport fishing license stamp attached to a valid sport fishing license to fish with 2 rods in the Colorado River district in any sport fishery in which the regulations of the commission provide for the taking of fish by angling.

(9) Existing law requires fees received by the department for a striped bass stamp to be deposited in a separate account in the Fish and Game Preservation Fund, to be used solely to produce striped bass, increase the number of striped bass, and to help restore aquatic

habitat for striped bass, and to fund any other recommendation made by the Striped Bass Stamp Fund Advisory Committee, except that 15% of the funds are required to be used for projects that benefit salmon.

This bill would require the department to spend the funds in that account solely to increase the abundance of striped bass, consistent with state and federal Endangered Species Act requirements, and consistent with the striped bass policy goals established by the commission, and to fund any other recommendations made by the advisory committee. The bill would delete the requirement that 15% of the funds be used for projects that benefit salmon.

(10) Existing law requires the Director of Fish and Game to appoint the advisory committee. Existing law requires the advisory committee to annually recommend to the department projects and budgets for the expenditure of revenue.

This bill would require the department to notify the committee prior to placing funding provisions in the budget.

(11) Existing law, until January 1, 2002, requires a person taking striped bass to have a striped bass stamp affixed to his or her sport fishing license. Under existing law, the stamp is issued by the department for a fee of \$3.50. The revenue from the fees is required to be used for specified purposes relating to striped bass, as recommended by the advisory committee appointed by the director. Existing law requires that the revenues from the stamp fees be deposited in the Fish and Game Preservation Fund, a continuously appropriated fund used to carry out the Fish and Game Code.

This bill would extend those provisions until January 1, 2004. Since a violation of these provisions would be a misdemeanor under existing law, the bill would impose a state-mandated local program by extending a crime that otherwise would be repealed.

(12) Existing law requires the department to issue a commercial fishing salmon stamp to a person who is 16 years of age or more but less than 18 years of age for $\frac{1}{2}$ of a specified fee.

This bill would delete that provision.

(13) Existing law generally prohibits anyone who is between 16 and 70 years of age from taking salmon for commercial purposes or being on board a vessel on which salmon are taken for commercial purposes while salmon are being taken or transported unless that person has a commercial fishing stamp affixed to his or her commercial fishing license. Existing law also prohibits the operator of a vessel on which salmon are taken for commercial purposes from permitting those persons on board while salmon are being taken or transported.

This bill would apply those prohibitions, instead, to persons between 18 and 70 years of age.

(14) Under existing law, no person may take, possess aboard a boat, or land sea cucumbers for commercial purposes except under a sea cucumber permit. That existing law provides for the department to issue and renew sea cucumber permits for specified fees. This existing law will become inoperative on April 1, 2002, and will be repealed on January 1, 2003.

This bill would continue the operation of that law until April 1, 2005, and would repeal it on January 1, 2006.

Other provisions of existing law make a violation of the laws relating to taking, possessing, and landing sea cucumbers for commercial purposes a crime.

This bill would impose a state-mandated local program by extending the period for the operation of that law.

(15) Existing law requires every person who owns or operates a vessel in public waters in connection with fishing operations for profit in this state, or who brings fish into this state, or who, for profit, permits persons to fish therefrom, to submit an application for commercial boat registration and to be issued a registration number upon payment of specified fees.

This bill would specify that the above provisions do not apply to any person required to be licensed as a guide.

(16) Existing law requires landing taxes to be paid monthly to the department within 60 days after the close of each month.

This bill would require landing taxes to be paid quarterly to the department within 30 days of the close of each quarter.

(17) Existing law prohibits finfish, other than hagfish, from being taken with traps for commercial purposes in ocean waters between Port Arguello and the United States-Mexico international boundary, except under a valid finfish trap permit issued to that person that has not been suspended or revoked.

This bill would exempt sablefish from that prohibition. The bill would impose conditions on general traps used to take sablefish for commercial purposes in that area. Since a violation of these conditions would be a misdemeanor under existing law, the bill would impose a state-mandated local program by extending a crime that otherwise would be repealed.

(18) Under existing law, finfish trap permits are issued to persons who meet certain requirements, including the requirement that the person landed at least 50 pounds of finfish, other than hagfish, taken in finfish traps as reported on one or more fish landing receipts during the immediately preceding permit year.

This bill would additionally exclude sablefish from qualifying for that 50-pound requirement.

(19) Existing law, until April 1, 2002, authorizes finfish to be taken with finfish traps subject to prescribed conditions.

This bill would make that provision inoperative on April 1, 2005, and would repeal it on January 1, 2006. Since a violation of this provision would be a misdemeanor under existing law, the bill would impose a state-mandated local program by extending a crime that otherwise would be repealed.

(20) This bill would make various technical, nonsubstantive changes. The bill would designate the department offices in Belmont and Los Alamitos, among others, instead of Menlo Park and Long Beach, among others, as the contact office for when a person is unable to recover a set net.

(21) Existing law requires a court to order the department to permanently revoke and the department to permanently revoke the commercial fishing license and any commercial fishing permits of any person convicted of either removing abalone from the shell or possessing abalone illegally removed from the shell or taking or possessing abalone that are less than the minimum size if the person possessed more than 24 abalone at the time of the offense.

This bill would change the above requirement to 12 abalone at the time of the offense. Since a violation of this provision would be a misdemeanor under existing law, the bill would impose a state-mandated local program by creating a new crime.

(22) Existing law imposes specified punishment if a person is convicted of a violation of specified law in an area closed to the taking of abalone for commercial purposes, and the person takes or possesses more than 12 abalone at one time or more than 100 abalone during a calendar year.

This bill would impose the punishment for a violation of specified law in an area closed to the taking of abalone for commercial purposes if the person takes or possesses more than 12 abalone at one time or takes abalone in excess of the annual bag limit.

(23) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the department and the Fish and Game Commission to carry out the Fish and Game Code. Because this bill would extend existing duties imposed on the department and would extend the period of time in which fees would be deposited into the Fish and Game Preservation Fund, the bill would make an appropriation.

(24) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 754 (AB 1697) Committee on Judiciary. Judicial proceedings: juveniles: manner of holding property.

Existing law requires each social study or evaluation made by a social worker or child advocate appointed by the court, required to be received in evidence, as specified, to include a factual discussion of specified factors including, but not limited to, whether the county welfare department has considered child protective services, and what plan, if any, exists for the return of the child to his or her parents, among others.

This bill would additionally require the social worker or child advocate to consider whether the child has any siblings under the court's jurisdiction and information related thereto, as specified.

Existing law provides that the juvenile case file of a minor may only be inspected by certain persons, as specified.

This bill would authorize a commissioner or other hearing officer assigned to a family law case with issues concerning custody or visitation to inspect the case file, and, if actively participating in such a family law case, would authorize counsel appointed for the minor in the family law case to inspect the case file. It also would limit the authority given under existing law for inspection by family court mediators and child custody evaluators to those such persons who are actively participating in such a family law case.

Because this bill would increase the duties of local officials, it would create a state-mandated local program.

Existing law provides for the manner of holding property by husband and wife.

This bill would specify that husband and wife may hold property as community property with a right of survivorship.

Existing law authorizes an appellate court to appoint counsel for an indigent appellant upon appeal from a judgment freeing a child who is a dependent child of the juvenile court from parental custody and control. Existing law provides that those costs are a charge against the state.

This bill would instead provide that those costs are a charge against the court.

Existing law, the Child Abuse and Neglect Reporting Act, provides for the protection of children suspected to be subject to child abuse or neglect. Existing law further requires specified "mandated reporters" to report suspected child abuse or neglect to police departments, sheriff's departments, county probation departments, or county welfare departments.

This bill would additionally classify employees or volunteers of a Court Appointed Special Advocate program as "mandated reporters."

Since a failure to make a required report is a misdemeanor, the bill would impose a state-mandated local program by expanding the scope of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 755 (SB 943) Committee on Judiciary. Child support.

Existing law requires, in a case where a parent is enrolled in health insurance coverage but fails to apply to obtain coverage of a child as required by a court or administrative order, that the employer or insurer enroll the child under the health coverage upon presentation of the court order or request by the district attorney, the other parent or person having custody of

the child, or the Medi-Cal program. Existing law also requires, in any case in which health insurance is provided to a child pursuant to a court order or administrative order, for the insurer to provide certain information, as specified, to the district attorney. In addition, an employer or other person providing health insurance must provide evidence of coverage and any information necessary for a child to obtain benefits through the coverage to the district attorney when requested by the district attorney. Existing law also requires specified child support obligations to be paid either to child support obligees or the district attorney.

This bill would change all references from the district attorney to the local child support agency and make other technical and related administrative changes.

Existing law requires each local child support agency to maintain a complaint resolution process and to provide a written resolution of a complaint within 30 days of receiving the complaint.

This bill would authorize the director of a local child support agency to extend that period for resolution of a complaint an additional 30 days.

Existing law requires a local child support agency, in a dispute regarding the amount to be withheld for arrearages pursuant to a withholding order for support of a child, to provide an administrative review within 15 days after receipt of a request from a support obligor. In addition, existing law allows an obligor in receipt of a statement of support arrears to have this determination reviewed by administrative procedures.

Existing law also requires a local child support agency to maintain a list of persons who are not in compliance with support orders or judgments and to inform an applicant that has challenged the inclusion of his or her name on this list within 75 days of receipt of a written request. In addition, existing law establishes procedures by which a person claiming that child support enforcement actions have erroneously been taken against him or her, may file a claim of mistaken identity with the child support agency.

This bill would require that administrative reviews by the local child support agency in these situations occur within 30 days of receipt of the request, and be conducted in the same manner as provided for resolution of a child support complaint. The bill would also make related, administrative changes.

Existing law requires county child support agencies participating in state child support incentive programs to provide certain data regarding the number of child support cases to the Department of Child Support Services. Under existing law, this information must be provided on a quarterly basis, no later than 30 days after the end of each quarter.

This bill would instead require that this data be provided no later than 15 days after the end of each quarter.

Existing law provides that a county board of supervisors may designate a county financial evaluation officer to make financial evaluations of parental liability for certain reimbursable costs, including, among other things, the costs for keeping a minor in custody in a law enforcement facility or institution.

This bill would also allow a county financial officer to make a financial evaluation of parental liability for voluntarily placing a minor in 24-hour out-of-home care.

Existing law requires a local child support agency to enter into an annual automation cooperation agreement (AACA) with the state department designated as responsible for operating the child support enforcement program, for the purpose of allowing the department to pass through automation funding to that county. Existing law requires this agreement to be entered into by December 1, as specified.

This bill would require the AACA to be incorporated into a specified cooperative agreement between the department and the county, and would delete the above date requirement. The bill would also require the department to establish an appeals process for counties that have had state or federal funds withheld pursuant to these provisions.

By increasing the administrative obligations placed on local child support agencies, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 756 (AB 92) Chavez. Liability: flood control and water conservation facilities.

Existing law provides that, until January 1, 2002, neither a public agency that operates flood control and water conservation facilities nor its employees shall be liable for injuries caused by the condition or use of unlined flood control channels or adjacent groundwater recharge spreading grounds under prescribed conditions.

This bill would extend the operative date of the above provision to January 1, 2007.

Existing law requires, until January 1, 2002, that the County of Los Angeles Department of Public Works maintain a record of injuries, and the results of any civil actions ensuing therefrom, that are incurred by the public in the unlined flood control channels or adjacent groundwater recharge spreading grounds during groundwater recharge activities, and annually file a copy of that record with the Judicial Council. Existing law requires the Judicial Council to submit a report on these matters to the Legislature on or before January 31, 2001.

This bill would extend that annual county reporting requirement until January 1, 2007, and would require the Judicial Council to submit another report on these matters to the Legislature by January 31, 2006. By extending the duties of local officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 757 (AB 635) Bates. Highways: relinquishment: State Highway Routes 1 and 126.

Existing law requires the California Transportation Commission to relinquish to any city or county any portion of any state highway within the city or county that has been deleted from the state highway system by legislative enactment. These relinquishments become effective upon the first day of the next calendar or fiscal year, whichever first occurs after the effective date of the legislative enactment.

This bill would authorize the commission to relinquish to the City of Dana Point a specified portion of State Highway Route 1 that is located within the city limits of that city upon terms and conditions the commission finds to be in the best interests of the state, if the commission and the city enter into an agreement providing for that relinquishment.

The bill would authorize the commission to relinquish to the City of Santa Clarita the portion of State Highway Route 126 that is between State Highway Route 5 and State Highway Route 14, pursuant to the terms of a cooperative agreement between the City of Santa Clarita and the Department of Transportation.

Ch. 758 (AB 1070) Pavley. County scenic highway.

Existing law authorizes the Department of Transportation when the department, with the advice of the Departmental Transportation Advisory Committee, determines that a county highway meets the minimum standards prescribed by the department for official scenic

highways, including certain standards described in statute, to authorize the county in which the highway is located to designate the highway as an official county scenic highway.

This bill would require the department to designate a portion of the Malibu Canyon-Las Virgenes Highway a county scenic highway, upon the County of Los Angeles applying, as specified, for the designation and the department determining that the County of Los Angeles is in compliance with the statutory standards.

Ch. 759 (AB 1220) Pavley. Park and ride facilities.

Existing law authorizes the Department of Transportation to establish ridesharing programs in metropolitan areas for private and public employees with funds made available for that purpose from any source, and provides that ridesharing programs may be established and maintained entirely by the department or in cooperation with public or private parties pursuant to contract. Existing law provides that the Department of Transportation may construct and maintain fringe and transportation corridor parking facilities along the state highway system.

This bill would require the Director of Transportation, without supplanting any other program or redirecting funds allocated to other programs, to restart program efforts in District 7 of the department to develop and implement additional shared use agreements for public use of private parking lots as park and ride facilities to complement and facilitate ridership on existing and planned transit routes.

Ch. 760 (AB 1324) Negrete McLeod. California Conservation Corps.

Existing law establishes the California Conservation Corps in the Resources Agency as a service organization providing employment and training for young men and women.

Existing law provides that fire prevention, fire suppression, and disaster relief are to be a major emphasis of the corps.

This bill would specify that disaster relief includes, but is not limited to, flood, earthquake, pest infestation assistance measures, and search and rescue efforts.

Existing law requires state agencies to use the corps' services to the maximum extent feasible to carry out projects that promote the corps' mission.

This bill would require state agencies considering the use of contracted labor, to give priority to the corps, subject to the availability of assistance from the corps, when the mission of the corps and the nature of the state agency's project are substantially consistent, and to notify the corps of any potential contracts for services that would fit within the parameters of the legislative intent set forth in a specified statute. This bill would further provide that the use of corps members shall be given strong consideration over the use of other contracted labor.

Ch. 761 (SB 124) Johnson. Department of Transportation: property transfer: Department of Parks and Recreation: City of Newport Beach.

(1) The California Constitution authorizes the Legislature, by statute, with respect to state surplus property located in the coastal zone and acquired by the expenditure of certain tax revenues, to transfer the property, for a consideration at least equal to the acquisition cost paid by the state to acquire the property, to the Department of Parks and Recreation for state park purposes.

This bill would require the Department of Transportation to transfer a certain parcel of land in the City of Newport Beach to the Department of Parks and Recreation, for use as a park upon payment of consideration of \$1,356,485 by the City of Newport Beach. The bill would require the funds to be deposited in the State Highway Account. The bill would make the transfer of the property contingent on the execution of an agreement between the Department of Parks and Recreation and the City of Newport Beach that requires the city to perform all of the responsibilities related to, and to assume the liability for, the construction, operation, and maintenance of the park and its improvements.

(2) The bill would declare that, due to the special circumstances concerning the Department of Transportation property in the City of Newport Beach, a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution, and the enactment of a special statute is therefore necessary.

(3) To the extent that the bill would impose new duties on the City of Newport Beach, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 762 (AB 1553) Keeley. Environmental justice: guidelines.

Existing law defines the term "environmental justice," provides that the Office of Planning and Research shall be the coordinating agency in state government for environmental justice programs, and requires that the Director of Planning and Research take actions with respect to the implementation, coordination, and review of environmental justice programs in the state. Existing law requires the office to adopt guidelines for the preparation and content of the mandatory elements required in city and county general plans.

This bill would require the office, when it adopts the next general plan guidelines, but in no case later than July 1, 2003, to adopt guidelines, as specified, for addressing environmental justice matters in city and county general plans, and to hold at least one public hearing prior to the release of any draft guidelines, and at least one public hearing after the release of the draft guidelines. The bill would authorize the hearings to be held at the regular meetings of the Planning Advisory and Assistance Council.

Ch. 763 (AB 1390) Firebaugh. Air pollution.

(1) Existing law grants primary authority for the control of air pollution from vehicular sources to the State Air Resources Board. Existing law also authorizes the state board to adopt and implement motor vehicle emission standards and motor vehicle specifications. Existing law also provides for the existence of various clean air programs, including the Carl Moyer Air Quality Standards Attainment Program.

This bill, notwithstanding a specified provision of the Budget Act of 2001, would require any air quality management district or air pollution control district with a population of one million residents or greater, in consultation with the state board, to expend not less than 50% of the moneys appropriated until January 1, 2007, for the Carl Moyer program, programs to fund the purchase of reduced emission schoolbuses, and diesel mitigation programs, in a manner that directly reduces air contaminants or the public health risks associated with air contaminants, in communities with the most significant exposure to air contaminants or localized air contaminants, or both, including communities of minority populations or low-income populations, or both. The bill would make those provisions inapplicable to those districts with fewer than one million residents, but would, notwithstanding a specified provision in the Budget Act of 2001, encourage those districts to apply similar funding approaches to the extent each district determines feasible. By imposing additional duties on districts, this bill would impose a state-mandated local program.

(2) Existing law requires the state board, in conjunction with the State Energy Resources Conservation and Development Commission, to develop and administer a program to provide grants to individuals, local governments, state agencies, nonprofit organizations, and private businesses, to encourage the purchase or lease of a new zero-emission vehicle.

This bill would expand those potential grant recipients to include public agencies, and would permit the state board to reserve, allocate, and reallocate funds to any of those grant recipients. The bill would require the state board to periodically review grant applications and the award of grants to ensure utilization of grant funds, and would authorize the state

board to reduce or eliminate grants if that recipient received a grant for the purchase or lease of a zero-emission vehicle in the Budget Act of 2001.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 764 (SB 32) Escutia. Contaminated property: restoration.

Existing law generally authorizes the Department of Toxic Substances Control and California regional water quality control boards to regulate corrective actions to releases of hazardous materials.

The existing Polanco Redevelopment Act authorizes a redevelopment agency, until January 1, 2004, to take any action that the redevelopment agency determines is necessary, consistent with other state and federal laws, to remedy or remove a release of hazardous substances on, under, or from a project area. Existing law immunizes a redevelopment agency that remedies or removes a hazardous substance release, pursuant to that act, from liability under specified state laws, and additionally immunizes a redevelopment agency that causes another person to undertake and complete that action.

This bill would enact the California Land Environmental Restoration and Reuse Act and would require the legislative body of a city or county that elects to implement the act to adopt an ordinance to implement the act, including designating a local agency to administer the act.

This bill would require the California Environmental Protection Agency to establish guidelines, by April 1, 2002, regarding the selection of an oversight agency and would specify a procedure for the selection of an oversight agency for a property subject to a phase I environmental assessment by representatives of the department and the State Water Resources Control Board.

The bill would authorize a local agency to issue a notice to the owner or operator of a property requiring the owner or operator to provide the local agency with specified information regarding whether a hazardous materials release may be present on the property. If the local agency determines, based on that information, that the property may be affected by a hazardous materials release or the threat of a release, the local agency would be authorized to make a finding that the property is, or may be, affected by the release or the threat of a release. A local agency would be authorized to issue a notice requiring the owner or operator to conduct a phase I environmental assessment of the property, in response to the release or the threat of a release and to protect human health and the environment, as specified.

The bill would require a local agency to enter into an agreement with the oversight agency prior to, or concurrent with, the oversight agency's review of the phase I environmental assessment which would provide for, among other things, cost reimbursement. The bill would continuously appropriate the funds received by the oversight agency for expenditure for the purposes specified in the agreement, thereby making an appropriation.

If the phase I environmental assessment recommends that a preliminary endangerment assessment be prepared, or if the oversight agency makes a specified finding, the bill would authorize the local agency to require the owner or operator to prepare a preliminary endangerment assessment.

The bill would authorize a local agency or oversight agency to issue a notice to the owner or operator requiring a site investigation and remedial action, if the preliminary endangerment assessment contains a specified finding. The bill would prescribe procedures for the conduct of a site investigation and remedial action by the owner or operator pursuant

to a remediation plan approved by the oversight agency. The bill would authorize a local agency to initiate a remedial action, pursuant to an approved remediation plan, if the governing body of the local agency, by resolution, makes one of specified findings, and to initiate a site investigation, under specified conditions.

The bill would require a local agency proposing to carry out a remedial action to provide information to the public and to take specified actions to enable community participation. The bill would make the owner or operator of the property that is the subject of a site investigation or remedial action under the act liable for the costs incurred by the local agency pursuant to the act. The bill would immunize a local agency that undertakes and completes a property investigation and remedial action pursuant to the act and receives a written determination of completion issued by the oversight agency from liability under specified state and local laws with regard to the release identified and addressed in accordance with the approved remediation plan. The bill would require the Director of the Department of Toxic Substances Control or the executive director of the regional water quality control board, as appropriate, to acknowledge in writing the applicability of this immunity and issue that determination.

The bill would require the California Environmental Protection Agency to initiate a scientific peer review of specified screening levels and to complete the process by December 31, 2004. The agency would be required to publish, by March 1, 2004, a list of screening numbers determined for specified contaminants, and to conduct public workshops in establishing and revising those levels.

The bill would require the agency to publish a guidance document that explains how these screening numbers may be used with regard to remediating contaminated properties, facilitating the restoration and revitalization of contaminated property, and making specified decisions.

The bill would require the agency to conduct a study to evaluate the usefulness of pilot screening numbers, as defined, in encouraging the remediation of contaminated property in the study areas of the Los Angeles, Santa Ana, and San Diego regions of the California regional water quality control boards, as specified, and would require the agency to carry out the study from March 1, 2002, until March 1, 2004. The bill would require the agency to evaluate the information developed by the study in establishing and reviewing pilot screening numbers.

The bill would also require the agency, by January 1, 2003, to publish an informational document to assist citizen groups, community-based organizations, interested laypersons, property owners, local government officials, developers, environmental organizations, and environmental consultants to understand the factors that are taken into account, and the procedures that are followed, in making site investigation and remediation decisions under the Carpenter-Presley-Tanner Hazardous Substances Account Act ("State Superfund") and the Porter-Cologne Water Quality Control Act.

The bill would make a statement of legislative intent regarding the funding to be provided the agency to determine and publish screening numbers and conduct the pilot screening number study, and would require the agency to expend existing funds, appropriated for those purposes, for the scientific peer review of the screening numbers and for publishing the informational document.

Ch. 765 (SB 828) Alarcon. Environmental justice.

Existing law requires the Secretary for Environmental Protection, on or before January 15, 2002, to convene a Working Group on Environmental Justice, composed of various representatives, as specified, to assist the California Environmental Protection Agency (Cal-EPA) in developing an interagency environmental justice strategy. Existing law defines "environmental justice" to mean the fair treatment of people of all races, cultures, and incomes with respect to the development, adoption, implementation, and enforcement of environmental laws and policies. Existing law requires the working group to examine

existing data and studies on environmental justice, make recommendations to various entities and hold public meetings, among other things.

This bill would require the secretary to convene the working group on or before January 1, 2002. The bill would require the working group to assist Cal-EPA in developing that agencywide strategy by July 1, 2002, and to examine data, make recommendations, and hold public meetings, among other things, on or before April 1, 2002. The bill would require each board, department, and office within Cal-EPA to review its programs and identify gaps that may impede achievement of environmental justice by December 31, 2003. The bill would renumber various provisions of the Public Resources Code.

Ch. 766 (SB 47) Bowen. Electrical restructuring: Oversight Board: Independent System Operator.

The existing restructuring of the electrical services industry provides for the authorization of direct transactions between electricity suppliers and end use customers and for the establishment of an Independent System Operator and a Power Exchange. An Electricity Oversight Board is also established to oversee the Independent System Operator and the Power Exchange. Under existing law, the Oversight Board has the exclusive right to decline to confirm the appointments of members of the governing board of the Independent System Operator. Under existing law, the existing Independent System Operator governing board is required to be replaced, within a specified period of time, by a 5-member independent governing board of directors appointed by the Governor for one-year terms. Existing law requires that a member of the independent governing board of the Independent System Operator not be affiliated with any actual or potential market participant administered by the Independent System Operator.

This bill would authorize the Electricity Oversight Board to investigate any matter related to the wholesale market for electricity. This bill would delete the Electricity Oversight Board's exclusive right to decline to confirm the appointments of members of the governing board of the Independent System Operator. This bill would require the Independent System Operator governing board appointed by the Governor to be confirmed by the Senate. The bill would require these appointments to be for 3-year terms, with initial appointments of one member for a one-year term, 2 members for a 2-year term, and 2 members for a 3-year term.

The bill would make a conforming change in existing law.

Ch. 767 (SB 195) Chesbro. Counties and districts.

(1) Existing law authorizes a county pursuant to a resolution adopted by its board of supervisors to lend any of its available funds to designated types of special districts located wholly within the county or partly within the county, subject to certain conditions.

This bill would add resort improvement districts to those districts eligible for these loans from a county.

(2) Under existing law, in counties that have a county counsel, the county counsel is required to discharge specified duties statutorily vested in the district attorney, including defending and prosecuting all civil actions and defending actions brought against county officers, employees, or servants.

This bill would expressly authorize the County Counsel of Solano County to bring a civil action when the county has a cause of action to abate a public nuisance, and would require the county counsel to do so when directed by the county board of supervisors. The bill would provide that the County Counsel and the District Attorney of Solano County have the concurrent right to bring this action.

(3) Under existing law, the duties pertaining to elections are performed by the county elections official. However, in specified counties, the board of supervisors is authorized to appoint a registrar of voters to discharge all duties vested by law in the county clerk that relate to, and are part of, the election procedure.

This bill would extend this appointment authority to Lake County. It also would make other technical, nonsubstantive changes in these provisions.

(4) Existing law establishes procedures for the destruction of records in the files of special districts.

This bill would make the San Joaquin Valley Air Pollution Control District subject to these procedures.

(5) Existing law specifies that deposits to the Merced County Courthouse Construction Fund shall continue through and include the 25th year after the initial year in which the surcharge is collected or the 25th year after any borrowings are made for any construction.

This bill would extend the required deposits period from 25 years to 30 years and would make the provision applicable to deposits made to the Criminal Justice Facilities Construction Fund in Merced County.

Ch. 768 (SB 480) Johannessen. California Military Museum. ¹⁹

Existing law provides for the establishment of the California Military Museum, located in the Old Sacramento State Historic Park.

This bill would appropriate the sum of \$100,000 from the General Fund to the Department of Parks and Recreation for a local assistance grant to the California Military Museum.

This bill would state the intent of the Legislature in enacting these provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 769 (SB 527) Sher. Air pollution.

(1) Existing law prescribes various civil penalties that may be imposed by the State Air Resources Board for a violation of specified state board regulations relating to vehicular and nonvehicular air pollution control. Existing law also authorizes any city attorney, with the consent of the district attorney, upon the complaint of the state board, to bring an action for unfair trade practices.

This bill would authorize the state board to impose administrative penalties as an alternative to seeking civil penalties for certain violations. The bill would authorize the state board to impose an administrative penalty up to the maximum amount the state board is authorized to impose as a civil penalty for that violation. The bill would also limit the state board's authority to impose an administrative penalty to a maximum of \$10,000 per day in which there is a violation not to exceed \$100,000 per penalty assessment proceeding for any violation arising from the same conduct. The bill would also provide for administrative review under existing state board administrative hearing procedure regulations, except that this bill would require that the hearings be conducted by an administrative law judge appointed by the Office of Administrative Hearings. The bill would also provide for judicial review of an administrative hearing in conformance with existing law. The bill would also prohibit the state board from causing an action to be brought by any city attorney against any person upon whom the state board has imposed an administrative penalty.

(2) Existing law requires the Secretary of the Resources Agency to establish the California Climate Action Registry as a public benefit nonprofit corporation, governed by a prescribed board of directors, that is required to record and register voluntary greenhouse gas emission reductions made by California entities after 1990.

This bill would define the terms, "annual emissions results," "baseline," "certification," "de minimis emissions," "emissions," "emissions inventory," and "material" for purposes of those provisions governing the registry.

Existing law also requires the registry to perform various functions, including, among other things, adopting standards for verifying emissions reductions, adopting a list of approved auditors that would verify emissions reductions, establishing emissions reductions goals, designing and implementing efficiency improvement plans, maintaining a record of all emissions baselines and reductions, and recognizing, publicizing, and promoting entities that participate in the registry.

This bill would revise the functions and duties of the registry, as prescribed, and would require the registry, in coordination with the State Energy Resources Conservation and Development Commission, to adopt industry-specific reporting metrics at one or more public meetings.

Existing law requires participants in the registry to report emissions baselines and annual emissions results expressed by a fraction in terms of emissions efficiency rates, as prescribed, and to adopt guidelines encouraging participants to report emissions in relation to the annual average business as usual rate of improvement in the energy efficiency of the state economy, as determined by the commission.

This bill would delete those requirements, and would require participants to report direct or indirect emissions separately, and would authorize the registry, on or after January 1, 2004, in coordination with the commission, to revise the scope of indirect emission source types that participants may be required to report, after a public workshop and review process, if the commission approves that revision at a public hearing, and makes specified determinations. The bill would specify that participants shall not be required to report emissions of any greenhouse gas that is de minimis, as defined, in quantity, when summed across all applicable sources of the participating entity.

The bill would prescribe certain requirements for the registration and certification of a participant in the registry.

Existing law requires the registry, not later than July 1, 2003, and periodically thereafter, to report to the Governor and the Legislature on the number of organizations participating in the registry, the percentage of the state's emissions represented by the participants in the registry, and the reductions in greenhouse gas emissions achieved by those participants.

This bill would additionally require the registry to report to the Governor and the Legislature on ways to make the registry more workable for participants that are consistent with the goals and intent of the registry. The bill would make various other changes with respect to the functions and obligations of the registry, as prescribed.

(3) Existing law also prescribes criminal penalties for a violation of a federally enforceable operating permit issued pursuant to specified provisions of the federal Clean Air Act or for a violation of specified laws under that act relating to stationary sources. Under existing law, the recovery of civil penalties for a violation of specified state laws relating to nonvehicular emission limitations precludes criminal prosecution for the violations under the act. Other existing law, as of January 1, 2003, makes a person who transports, or who provides a vehicle to transport, motor vehicle fuel for a motor vehicle fuel distributor who is not in compliance with specified laws, liable for a civil penalty.

This bill would correct erroneous cross-references and delete an obsolete cross-reference in those provisions.

Ch. 770 (AB 1) Aanestad. Electrical restructuring: energy efficiency programs.

Under the Public Utilities Act, the Public Utilities Commission, until January 1, 2012, requires electrical corporations to identify a separate rate component to collect a system benefits charge to fund energy efficiency, renewable energy, and research, development, and demonstration programs.

This bill would establish a dispute resolution process for the Large Nonresidential Standard Performance Contract Program funded under these provisions.

A violation of the act is a crime. Because a violation of the provisions of this bill would be a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 771 (AB 1233) Pescetti. Public utilities: transportation charges.

(1) Existing law authorizes the Public Utilities Commission to establish rates for public utilities, including gas corporations. Under existing law, the commission requires every gas corporation to revise its transportation tariffs and conditions of service to eliminate all components that assess shippers of gas produced in the state for the costs of interstate transmission of gas produced outside the state. Existing law requires the Public Utilities Commission to allow a gas corporation to fully recover all reasonable and prudent costs associated with ownership and operation of the gas plant used for transportation.

This bill would require the commission to investigate, as part of the rate proceeding for any gas corporation, impediments to the in-state production and storage of natural gas. The bill would authorize the commission to adopt a tariff that encourages in-state production or storage of natural gas, including reducing local transmission rates applicable to in-state gas blends, unless the commission finds that adopting the tariff will likely result in consequences adverse to the interests of gas customers. The bill would state related legislative findings and declarations. Since a violation of an order by the commission is a crime under existing provisions of law, the bill would create a state-mandated local program by expanding the definition of a crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 772 (AB 1457) Keeley. Property taxation: mobilehomes.

Existing property tax law requires the reassessment at fair market value of real property upon a change in ownership, and specifies those transfers of real property that constitute a change in ownership. Existing law excludes from classification as a change in ownership, subject to certain conditions, any transfer made, on or after January 1, 1985, of a mobilehome park to a nonprofit corporation, stock cooperative corporation, limited equity stock cooperative, or other entity formed by the tenants of the park for the purpose of purchasing the park. Existing law classifies as a change in ownership any subsequent transfer of any portion of that same mobilehome park, on and after January 1, 1989, that is not for the purpose of converting ownership of the park in a specified manner.

This bill would prohibit any escape or supplemental assessment from being levied, and would cancel any outstanding taxes that were levied between January 1, 2000, and January 1, 2002, for a pro rata change in ownership in a mobilehome park occurring between January 1, 1989, and January 1, 2002, if the assessor failed to timely discover a subsequent pro rata change in ownership after the initial exclusion, but would, commencing with the January 1, 2002, lien date, require the assessor to correct the base year value of the subject portion of the park to properly reflect the changes in ownership. The bill would also require certain mobilehome park owners to report to the county assessor each year certain information regarding ownership interests in that park. By requiring local tax officials to perform additional duties with respect to these reports, this bill would impose a state-mandated local program.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 773 (AB 1574) Lowenthal. Energy conservation: building standards: inspections.

(1) Existing law defines terms related to paid home inspections, establishes a standard of care for home inspectors, and prohibits certain inspections in which the inspector or the inspector's employer, as specified, has a financial interest.

This bill would include within the definition of home inspection for those purposes an inspection of energy efficiency. The bill would specify energy efficiency items to be inspected.

(2) Existing law requires the State Energy Resources Conservation and Development Commission to adopt regulations concerning energy conservation standards for lighting, insulation, climate control systems, and other building design and construction standards for new residential and new nonresidential buildings.

This bill would authorize the commission to develop and disseminate measures that would enhance energy efficiency in single-family residential dwellings that were built prior to the development of the current energy efficiency standards.

The bill would require a home inspector, as defined, to provide specified energy efficiency information if, at the time a single-family residential dwelling is sold, a buyer or seller requests the information.

Ch. 774 (AB 1724) Pavley. Public utilities: Reliable Electric Service Investments Act.

Under the Reliable Electric Service Investments Act, the State Energy Resources Conservation and Development Commission (Energy Commission) is required to create an investment plan, in accordance with specified objectives, to govern the allocation of funds in order to ensure a fully competitive and self-sustaining California renewable energy supply. Existing law requires the Energy Commission, in preparing these investment plans, to recommend specified allocations, including customer credits for renewable energy not under contract with a utility. Existing law specifies that commencing on January 1, 2002, public entities are not eligible to receive customer credits for renewables.

This bill would delete the provision that prohibits, commencing January 1, 2002, public entities from receiving customer credits for renewables and, instead, would require the Energy Commission to establish a cap on the aggregate amount that may be awarded to public entities under the program, to assure adequate funding of credits for residential and small commercial customers.

Ch. 775 (AB 215) Cohn. Health care benefits: survivors of firefighters and peace officers.

Under the Public Employees' Medical and Hospital Care Act specified employees and annuitants and their eligible family members, as defined, may enroll in an approved health benefits plan and continue that enrollment after retirement or after the death of the employee, as specified. Under that act, an appropriation is made monthly from the General Fund to pay the state's share, as specified, of the cost of that enrollment for specified employees and all annuitants.

This bill would provide that, upon the death of specified firefighters and peace officers from injury or disease relating to their official duties, their uninsured surviving spouses, as defined, and uninsured family members shall be entitled to enroll in those health benefits plans, as specified, and a portion, as established annually according to a specified formula, of the cost of that enrollment shall be paid by the state from the General Fund, thus making an appropriation. The bill would require the Worker's Compensation Appeals Board to

resolve any disputes regarding whether the cause of the firefighter's or peace officer's death was related to his or her official duties, as specified. The bill would require the employer of a deceased firefighter or peace officer, as described above, whose spouse or family member may be eligible for health benefits under its provisions, to notify the Board of Administration of the Public Employees' Retirement System, which would then be required to promptly determine eligibility and forward specified materials to the eligible spouse or family member.

Ch. 776 (AB 286) Cedillo. Athletic events: boxers' pensions.

Existing law, the Boxing Act, provides for the regulation by the State Athletic Commission of specified contests, matches, and exhibitions and authorizes the commission to assess and collect various fees in connection with this responsibility, which are deposited into the General Fund. The act also requires the commission to establish a pension plan for professional boxers in this state that is funded by contributions from promoters, managers, and boxers and by certain of the fees collected by the commission, and for this purpose creates the Boxers' Pension Account, specifying that the moneys within this account are deposited into the General Fund and continuously appropriated for purposes of the pension plan.

This bill would change the name of the Boxers' Pension Account to the Boxers' Pension Fund and would establish that fund in the State Treasury. The bill would prohibit the deposit or transfer of any money within this fund to the General Fund and would specify that the commission has exclusive control over the moneys in the fund which are continuously appropriated for the purposes and administration of the pension plan.

Ch. 777 (AB 351) La Suer. Local recreational areas: personnel: prior criminal convictions.

(1) Existing law prohibits a county or city or city and county or special district, in connection with the operation of a park, playground, recreational center, or beach used for recreational purposes, from hiring for employment or as a volunteer any person in a position having supervisory or disciplinary authority over any minor, if the person has been convicted of specified crimes, and authorizes a county, city, city and county, or special district to screen, in accordance with specified law, any such prospective employee or volunteer for their criminal background.

This bill would require a county or city or city and county or special district to require that each such prospective employee or volunteer complete an application that inquires as to whether or not that individual has been convicted of any of those specified crimes, and would require, instead of authorize, each of those entities to screen any such prospective employee or volunteer, having supervisory or disciplinary authority over any minor, for that person's criminal background. The bill would also make a technical, correcting change. By imposing a new duty on local agencies implementing its provisions, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 778 (AB 399) Havice. County employees' retirement: Los Angeles County.

The County Employees Retirement Law of 1937 defines "final compensation" for purposes of calculating benefits under that law.

This bill would provide a new definition of “final compensation” that would be applicable to certain employees who retire on or after July 1, 2001, under specified retirement plans sponsored by the retirement system in Los Angeles County.

The County Employees Retirement Law of 1937 defines “compensation earnable” for purposes of calculating benefits under that law.

This bill would provide a new definition of “compensation earnable” for purposes of calculating retirement benefits in Los Angeles County, to become operative upon the adoption of a specified resolution by the board of supervisors.

Existing Law establishes a retirement plan, known as Retirement Plan E, that is applicable in the retirement system in Los Angeles County and prescribes procedures for members of other plans within the county system to transfer to that plan. Under that plan, the county board of retirement is authorized to adjust specified factors for calculating early retirement benefits. Also under that plan, specified reductions and adjustments are made to a member’s pension amount based upon the member’s primary insurance amount under specified provisions of the federal Social Security Act.

This bill would, upon adoption of the bill’s provisions by the county board of supervisors, (1) modify the procedures for members to transfer to Retirement Plan E and establish procedures for members in Retirement Plan E to transfer to another plan within the system, (2) modify the early retirement factors and eliminate the county board of retirement’s authority to adjust those factors, (3) provide that the pension adjustment provisions relating to member’s primary insurance amount shall be applicable when the member retires after attaining the age of 62 years, as specified, and (4) prescribe automatic and elective cost-of-living adjustments applicable to retirement or death allowances payable under Retirement Plan E.

The County Employees Retirement Law of 1937 provides for various survivors’ allowances that are equal to 50% or 60% of the deceased member’s retirement allowance, as specified.

This bill would authorize Los Angeles County, by a resolution adopted by a majority vote of the county board of supervisors, to increase each of those allowances to an amount equal to 55% or 65% of the deceased member’s retirement allowance, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 779 (AB 464) Frommer. State Board of Fire Services.

Existing law creates in the office of the State Fire Marshal, a State Board of Fire Services which consists of 18 members who are specified representatives of government and private industry. A quorum of the board consists of not less than 10 members.

This bill would reduce the voting membership of the board to 17 members and a quorum to 9 members, and revise the selection process for the volunteer firefighter, the fire chiefs, and the fire service labor representatives on the board.

Ch. 780 (AB 492) Oropeza. State employees: precinct board members.

Existing law permits a voter, including a public employee, to take no more than 2 hours off from work for voting, without loss of pay, if a voter does not have sufficient time outside of working hours to vote at a statewide election. Existing law does not permit a state employee to take time off from work, without loss of pay, to serve as a member of a precinct board.

This bill would provide that pursuant to regulations adopted by the Department of Personnel Administration, and subject to the collective bargaining agreement between the state and the employee’s exclusive representative, a state employee, as defined, who has been appointed as a member of a precinct board and takes time off from state employment to serve as a member of that precinct board on election day shall receive payment of his or her regular wages or salary for that election day, without forfeiting any compensation received for his or her service as a precinct board member. The eligibility of a state employee to receive time

off for these purposes would be subject to the approval of the employee's manager or supervisor and pursuant to the terms of the collective bargaining agreement. The bill would require the department to adopt regulations to implement these provisions.

Ch. 781 (AB 510) Matthews. Public employees' retirement: retiree health accounts.

Existing law, the Public Employees' Retirement Law, provides that contracting agencies that have excess assets, as determined by the chief actuary, may request that the Board of Administration of the Public Employees' Retirement System transfer employer assets to member-accumulated contribution accounts to satisfy all member contributions, as specified.

This bill would authorize a contracting agency to request that the board transfer excess assets from the contracting agency's employer account to a retiree health account established by the board, in its discretion, in the contracting agency's employer account, if the transfer qualifies under federal Internal Revenue Code provisions. The bill would authorize the board, in its discretion, to transfer those excess assets to be used solely for the payment of current retiree health liabilities, subject to certain conditions.

Ch. 782 (AB 616) Calderon. Local government employees' retirement: benefits.

Under existing law, contracting agencies of the Public Employees' Retirement System may elect to provide service retirement benefits for local miscellaneous members, as defined, based on either a 2% at age 60 formula or a 2% at age 55 formula, as specified. Under existing law, the contribution rate for those members is 7% of compensation. Member contributions are deposited in the Public Employees' Retirement Fund, a continuously appropriated special fund.

This bill would authorize contracting agencies to provide service retirement benefits to local miscellaneous members based on a 3% at age 60 formula, a 2.5% at age 55 formula, or a 2.7% at age 55 formula, as specified, and to increase member contributions under those benefit formulae to 8% of compensation, thereby making an appropriation.

Existing law, the County Employees Retirement Law of 1937, authorizes adoption of various formulae for calculation of service retirement allowances and adoption of various corresponding contribution rates or a single rate of contributions, as specified.

This bill would authorize counties or districts, subject to approval by the county board of supervisors, to provide service retirement allowances for general members based on a 3% at age 60 formula, a 2.5% at age 55 formula, or a 2.7% at age 55 formula, as specified, and to adopt corresponding contribution rates or to apply the single rate of contributions, as specified. The bill also would make a related technical change.

The bill would incorporate additional changes to Section 20677 of the Government Code proposed by AB 118, to take effect if this bill and that bill are enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 783 (AB 856) Wesson. Horse racing.

Provisions adopted in the 2001 portion of the 2001–02 Regular Session, which becomes effective January 1, 2002, direct the California Horse Racing Board to oversee the conduct of a union and multiemployer collective bargaining agent recognition procedure for backstretch employees. They also provide that within 120 days of the effective date of those sections the board shall also adopt emergency regulations to establish standards governing the employee housing provided to backstretch personnel at licensed racetracks. No license shall be issued to a racing association to conduct a horse race meeting unless the board has inspected the housing conditions that exist on the racetrack's backstretch and determined the living conditions to be in compliance with the standards established by the board.

This bill would amend these provisions by deleting a provision that authorizes the board to contract with the Agricultural Labor Relations Board and by adding specifics concerning

the authority of arbitrators used to resolve disputes between parties to the collective bargaining agreements created under these provisions. This bill would also amend provisions relating to inspection of the living conditions of backstretch workers by providing that the board may be assisted by a local building department or other local entity designated by the jurisdiction in which the racetrack is located in conducting these annual inspections to ensure compliance with the standards it has established.

Ch. 784 (AB 867) Cardoza. County employees: law enforcement: retirement.

(1) Existing law annually appropriates \$18,500,000 from the General Fund to the Controller to allocate \$500,000 each to specified county sheriffs' departments to enhance law enforcement efforts.

This bill would require those funds, until July 1, 2002, to be used to supplement rather than supplant existing law enforcement resources.

(2) The County Employees Retirement Law of 1937 contains various alternative benefits provisions that may be selected by counties.

This bill would authorize Stanislaus County to elect retirement benefits provisions, as specified.

(3) Existing law provides that, for counties adopting a specified county employee retirement plan, the rate of contribution to the plan will be, as specified.

This bill would allow Stanislaus County to contribute twice the amount specified.

(4) Existing law provides that the legislative body of a local agency may establish a pension trust for the benefit of its officers and employees.

This bill would allow a county that has created a pension trust for its officers and employees to contract with the courts or other local agencies within the county to participate in any plan under the county's pension trust. This bill would also provide that the contracting court or local agency located within the county has the authority to make participation in the plan optional or compulsory for its officers and employees.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 785 (AB 895) Wiggins. Public Employees' Retirement System: state peace officer/firefighter members.

The Public Employees' Retirement Law prescribes various retirement formulas based on a member's position and years of service, including a 2% at age 50 retirement formula for certain state and local safety members and a 3% at age 50 retirement formula for state peace officer/firefighter members and specified local members, subject to maximum limits based on the specified percentages of final compensation and other limitations.

This bill would prescribe a 3% at age 50 retirement formula for specified members of the California State University police department, and would modify the maximum pension limitations for those members to 90% of final compensation, if authorized by and in accordance with a memorandum of understanding between the Trustees of the California State University and the recognized employee organization or if authorized by the approval by the trustees of an application by members in management positions, subject to specified conditions and limitations.

Under the Public Employees' Retirement Law, the normal contribution rate for state peace officer/firefighter members is 8% of the member's compensation in excess of \$238 per month, as specified.

The bill would provide that the normal rate of contribution for specified members of the California State University police department is also 8% of compensation, subject to specified limitations.

Ch. 786 (AB 1038) Hertzberg. Vehicles: Department of the California Highway Patrol: Department of Personnel Administration.

Under existing law, the Department of Personnel Administration administers and enforces laws pertaining to the state's personnel system.

This bill would authorize the Department of Personnel Administration, when determining compensation for communications operators in the Department of the California Highway Patrol, to consider the total compensation for communications operators in comparable positions in the police departments of the Cities of Los Angeles, Oakland, San Diego, and San Jose, and the City and County of San Francisco.

Ch. 787 (AB 1082) Nation. Public employees' retirement: local safety members.

Under the Public Employees' Retirement Law, employees of contracting agencies classified as local safety members are entitled to generally higher benefits, and subject to higher contribution rates, than those employees classified as local miscellaneous members. County peace officers, as defined, are included within the local safety member classification. Existing law authorizes Monterey and Santa Clara Counties to designate specified park rangers as county peace officers for these purposes. Member contributions are deposited in the Public Employees' Retirement Fund, a continuously appropriated fund.

This bill would authorize contracting agencies to include specified park rangers within the local safety member classification and would expand to all county contracting agencies the authorization to designate specified employees in the Park Ranger class series as county peace officers for these purposes. The bill would make an appropriation by increasing the amount of employee contributions to the Public Employees' Retirement Fund.

Ch. 788 (AB 1184) Oropeza. Local public employees.

The existing Meyers-Millias-Brown Act, which governs local public employer-employee relations, establishes the right of local public employees to form, join, and participate in the activities of employee organizations of their own choosing for the purpose of representation on all matters of employer-employee relations.

This bill would expressly prohibit punitive action, denial of promotion, and threats of this treatment against a local public employee for the exercise of any lawful action as an elected, appointed, or recognized representative of any employee bargaining unit.

Ch. 789 (AB 1262) Migden. Motor carriers: drivers.

Existing law requires the Department of the California Highway Patrol to regulate the safe operation of, among others, motor carriers in accordance with statutes and regulations.

This bill would require every motor carrier regularly employing, as defined, more than 20 full-time, as defined, drivers to report to the department whenever it replaces more than half of its drivers, except as specified, within a 30-day period. The bill would require the department, within 21 days of receiving the report, to inspect the motor carrier to ensure that the motor carrier is complying with all safety of operations requirements.

Because, under existing law, a violation of the safety statutes and regulations is a crime, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 790 (AB 1281) Cedillo. Public employees: representation.

Under the Meyers-Millias-Brown Act governing local public agency employment relations, bargaining unit determinations and representation elections are determined and processed in accordance with rules adopted by the public agency in accordance with the act.

This bill would require the public agency to grant exclusive or majority recognition to an employee organization after a review and verification by a neutral 3rd party agreed to by the employee organization and the public agency of a signed petition, authorization cards, or

union membership cards showing that a majority of the employees in an appropriate bargaining unit desire the representation, unless another labor organization has previously been lawfully recognized as exclusive or majority representative of all or part of the same unit. The bill would require the Division of Conciliation of the Department of Industrial Relations to be the neutral 3rd party and to verify the exclusive or majority status of the employee organization in the event the public agency and the employee organization cannot agree on a neutral 3rd party. The bill would establish criteria pursuant to which an election to establish majority status would be ordered.

Ch. 791 (AB 1374) Wiggins. Public employee benefits: workers' compensation: leave of absence for disability.

Existing law provides that certain peace officers, firefighters, and other specified state and local public employees are entitled to a leave of absence without loss of salary while disabled by injury or illness arising out of and in the course of employment. The leave of absence is in lieu of temporary disability payments or maintenance allowance payments otherwise payable under the workers' compensation system. Existing law, in the case of certain peace officers, provides that the leave of absence shall not be deemed to constitute family care and medical leave or to reduce the time authorized for family care and medical leave.

This bill would provide that the provisions relative to family care and medical leave also apply to city, county, and district firefighters.

Ch. 792 (AB 1681) Canciamilla. Workers' compensation: individually identifiable information.

Existing law provides that a person or public or private entity who is not a party to a claim for workers' compensation benefits may not obtain individually identifiable information, as defined, that is obtained or maintained by the Division of Workers' Compensation of the Department of Industrial Relations on that claim, except that, among other things, individually identifiable information may be used by the Division of Workers' Compensation, the Division of Occupational Safety and Health, and the Division of Labor Statistics and Research, as necessary to carry out their duties.

This bill would add the Commission on Health and Safety and Workers' Compensation to the list of entities that may use the individually identifiable information as necessary to carry out the commission's research. The bill would require the administrative director of the Division of Workers' Compensation to adopt regulations, as specified, regarding the uses and disclosure of this information.

Ch. 793 (AB 1683) Committee on Public Employees, Retirement and Social Security. Public employee benefits.

(1) The Public Employees' Retirement Law provides that certain benefits provisions shall be applicable to contracting agencies only if the agency's contract with the system, as originally executed or as amended, makes the provision applicable.

This bill would provide that some of those provisions shall be applicable to a contracting agency only if its contract so provided on or before December 31, 2001.

(2) Under existing law, when a local agency contracts with the Public Employees' Retirement System, members of the local agency's retirement system included in the contract become members of the Public Employees' Retirement System and payments being made to retirees, survivors, and beneficiaries of the local system on the effective date of the contract are continued and paid by the Public Employees' Retirement System at the existing rates, unless the contract or a subsequent amendment thereto otherwise provides, as specified.

This bill would revise that provision to provide that payments being made to retirees, survivors, and beneficiaries of the local system on the effective date of the contract be continued and paid, as specified, unless the contract or a subsequent amendment thereto otherwise provides as to persons retired under the local system, as specified.

(3) Existing law authorizes members of the Public Employees' Retirement System employed by a contracting agency to withdraw their contributions to the system upon the termination of the agency's contract with the system.

This bill would make that authorization applicable to those members only if they are not employed in a position subject to coverage by the system at the time of the election to withdraw.

(4) Existing law establishes the local sheriff and the local firefighter membership classifications within the Public Employees' Retirement System. Members subject to the local sheriff classification were formerly classified as county peace officers.

This bill would specify conditions for the conversion of county peace officer service to local sheriff service and would make technical changes with respect to the local firefighter classification.

(5) Under the Public Employees' Retirement Law, contracting agencies may authorize their members to elect to receive service credit for time during which the member served in the military, provided, among other things, that service was continuous, and time during which the member was on war relocation leave.

This bill would eliminate the requirement that the military service be continuous and would repeal the provision relating to war relocation leave.

(6) The Public Employees' Retirement Law provides that the monthly allowance paid to, among others, a local member who retired prior to January 1, 2000, may be increased, at the election of the contracting agency, according to a specified schedule.

This bill would provide that those increases shall be made notwithstanding the purchase power protection increase that is also provided under existing law for those retirees.

(7) Existing law authorizes a member of the Public Employees' Retirement System to elect, upon service retirement, to have the actuarial equivalent of his or her unmodified service retirement allowance paid as a temporary annuity and life income, as specified.

This bill would establish an alternative temporary annuity election that would be available to persons who first became members of the system on or after January 1, 2002.

(8) Existing law establishes a replacement benefits program for members of the Public Employees' Retirement System.

This bill would designate that program as a benefits replacement plan and would clarify that the plan is applicable to school employers and members of the system.

(9) The Public Employees' Retirement Law and Public Employees' Medical and Hospital Care Act prescribe retirement, death, and health benefits for specified public employees and their survivors.

This bill would make technical and clarifying changes to provisions of that law and act.

(10) Existing law prescribes procedures to transfer membership from the Public Employees' Retirement System to a county retirement system subject to the County Retirement Law of 1937 for certain public safety members who were employed by a contracting agency and who are subsequently employed by a county, fire authority, or district within any of 2 or 3 specified counties as a result of the transfer of firefighting or law enforcement functions, as specified.

This bill would clarify that those procedures are also applicable to those public safety members who were employed by the state and who are subsequently employed by a county, fire authority, or district within all 3 counties as a result of such a transfer. The bill would also make related technical changes.

(11) Under existing law, the Board of Administration of the Public Employee's Retirement System administers an agreement with the federal Department of Health and Human Services for the social security coverage of employees of the state and various public agencies that contract for coverage. The existing law excludes from that coverage agreement policemen and firemen, as defined.

This bill would expand the definition of “fireman” for those purposes to include certain employees of the City of Long Beach who perform life saving and peace keeping duties, as specified.

(12) Existing law, the Public Employees’ Medical and Hospital Care Act, provides that an annuitant, as defined, who meets specified criteria and who was enrolled in a specified health benefits plan at the time of becoming an annuitant may continue his or her enrollment, as specified. The act also authorizes contracting agencies to allow eligible family members of a deceased employee of the contracting agency to enroll in a specified health benefits plan following the employee’s death, as specified.

This bill would specify that this authorization is applicable to eligible family members who are not enrolled on the employee’s date of death.

Ch. 794 (SB 6) O’Connell. School finance.

Existing law requires the county superintendent of schools to adjust the total revenue limit for each school district in the jurisdiction of the county superintendent of schools by the amount of increased or decreased employer contributions to the Public Employees’ Retirement System (PERS), and sets forth a method for calculating that amount for the 1995–96 fiscal year and each fiscal year thereafter. Existing law, the Budget Act of 2001, appropriated \$35,000,000 for the purpose of limiting the PERS offset to K-12 revenue limit apportionments.

This bill would provide that the amount appropriated in the Budget Act of 2001 is for the purpose of limiting reductions to revenue limits, as described. The bill would also set forth parameters for apportionment reductions in the 2002–03 fiscal year.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 795 (SB 20) Alarcon. Displaced janitors.

Existing law provides for a system of labor standards enforcement administered by the Labor Commissioner.

This bill would enact the Displaced Janitor Opportunity Act, which would require contractors and subcontractors, as defined, that are awarded contracts or subcontracts to provide janitorial or building maintenance services at a particular job site or sites, to retain, for a period of 60 days, certain employees who were employed at that site by the previous contractor or subcontractor. This bill would require that employees retained under the bill’s provisions for that 60-day period be offered continued employment if their performance during that 60-day period is satisfactory. This bill would only apply to contracts entered into on or after January 1, 2002.

This bill would authorize an employee who was not retained in accordance with the bill’s provisions, or his or her agent, to bring an enforcement action in a court of competent jurisdiction, as specified.

This bill would authorize local government agencies to enact ordinances imposing stricter standards or additional enforcement provisions.

Ch. 796 (SB 90) Dunn. Public employees’ retirement: local safety member benefits.

Under the Public Employees’ Retirement Law, service retirement benefits for local safety members shall not exceed 75% or, in some cases, 85% of final compensation.

This bill would increase this benefit to 90% of final compensation for local safety members who retire on or after January 1, 2002.

Ch. 797 (SB 181) Dunn. State employees: state peace officers and firefighters.

Existing law makes legislative findings and declarations that a minimum supervisory compensation differential is necessary to compensate state peace officer/firefighter members who are supervisors within the departments and boards of the Youth and Adult Correctional Agency.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would revise these legislative findings and declarations to include state peace officer/firefighter members who are correctional supervisors within the State Department of Mental Health.

Existing law, the Public Employees' Retirement System, specifies that the rate of contribution for state peace officer/firefighter members is generally 8% of the compensation in excess of \$238 per month paid to those members. However, the rate of contribution for those members who are supervisors within the boards and departments of the Youth and Adult Correctional Agency is 8% of compensation in excess of \$863 per month paid to those members.

This bill would make the latter provision applicable to state peace officer/firefighter members who are correctional supervisors within the State Department of Mental Health.

Ch. 798 (SB 202) Soto. Public employee postretirement health benefits: employer contributions.

The Public Employees' Medical and Hospital Care Act requires contracting agencies, as defined, to pay employer contributions for postretirement health benefits for employees who retire for service and who are first employed after the date of the contract amendment or January 1, 1999, subject to specified conditions. In those circumstances, for employees with 20 or more years of credited service, the contracting agency is required to pay 100% of the required health premium.

This bill would recast those provisions and, upon approval by the governing body of a contracting agency, would authorize the contracting agency to give employees hired prior to the contract amendment the right to elect to be subject to those provisions, and would require the contracting agency also to pay 100% of the required health premium for annuitants who retired for disability and annuitants who retired with 20 or more years of service credit with the contracting agency and who meet specified criteria.

Ch. 799 (SB 235) Vasconcellos. Community colleges: classified staff representatives.

(1) Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state. Existing law also establishes a procedure for the selection of an exclusive representative of employees of a community college district to meet and negotiate with an employer on matters within the scope of representation.

This bill would require that, notwithstanding any other provision of law, when a classified staff representative is to serve on a college or district task force, committee, or other governance group, the exclusive representative of the classified employees of that college or district appoint the representative for the respective bargaining unit members. The bill would authorize a local governing board to consult with other organizations of classified employees on shared governance issues, as specified. The bill would require the governing board of the community college district to determine a process for the selection of a classified staff representative in a situation where no exclusive representative exists. The imposition of this requirement on the governing boards of community college districts would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 800 (SB 334) Ortiz. Teachers' retirement benefits: retirement following reinstatement.

Existing law prescribes service retirement benefits for members of the Defined Benefit Program of the State Teachers' Retirement Plan who retire for service following reinstatement from a prior retirement.

This bill would prescribe different service retirement benefits for those members who retire for service with at least 2 years of creditable service, as specified, following reinstatement from a prior retirement.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 801 (SB 379) Alarcon. Public safety officers: civilian employees.

(1) Existing law establishes the Public Safety Officers Procedural Bill of Rights, which permits public safety officers to engage in political activity, as specified, and which provides specified procedures and conditions for the investigation and interrogation of a public safety officer that could lead to punitive action.

This bill would extend similar rights to civilian employees of the police department of any city. By extending these rights to a new group of local public employees, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 802 (SB 499) Soto. State Teachers' Retirement System.

The Teachers' Retirement Law provides that, prior to January 1, 2002, dependent, unmarried children of members of the Defined Benefit Program of the State Teachers' Retirement Plan are eligible for disability and family benefits if they are under 22 years of age on the date of the member's disability or death; however, on and after January 1, 2002, dependent, unmarried children of those members are eligible for those benefits only if they are under 18 years of age or under 22 years of age and full-time students, as defined, on the date of the member's disability or death.

This bill would instead provide that, on and after January 1, 2002, dependent, unmarried children of those members shall continue to be eligible for disability and family benefits if they are under 22 years of age on the date of the member's disability or death. The bill would also make technical changes to that provision.

Existing law, known as the Dave Elder State Teachers' Retirement System Home Loan Program Act, establishes a member home loan financing program and specifies that the maximum amount of any loan under that program shall not exceed \$350,000.

This bill would provide, instead, that the maximum amount of any loan under the program may not exceed 200% of the conforming loan limit set by either the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation, as specified.

Under the existing Teachers' Retirement Law, members of the Defined Benefit Program of the State Teachers' Retirement Plan may elect to receive service credit for time spent in certain types of service or activities that would not otherwise be creditable.

This bill would authorize those members to elect to receive service credit for time spent in a position subject to coverage by the Cash Balance Benefit Program of the State Teachers' Retirement Plan, subject to specified conditions.

The bill would appropriate \$1,000,000 from the Teachers' Retirement Fund to the Teachers' Retirement Board for the administrative costs of implementing benefit changes, as specified.

Ch. 803 (SB 501) Committee on Public Employment and Retirement. State teachers' retirement.

(1) The Teachers' Retirement Law defines "creditable compensation," "full-time equivalent," and "overtime" for purposes of calculating benefits under that law.

This bill would make technical changes to those definitions.

(2) The Teachers' Retirement Law provides an optional, alternative method for calculating the final compensation, for purposes of benefits under that law, applicable to a member whose salary was reduced due to a reduction in school funds.

This bill would repeal that provision.

(3) Existing law requires the Teachers' Retirement Board to provide a specified annual report to, among others, the Joint Public Pension Fund Investments Committee.

This bill would delete the reference to that committee.

(4) Existing law prescribes service and disability benefits for members of the Defined Benefit Program of the State Teachers' Retirement Plan, which benefits are calculated, in part, based upon the member's credited service; however, with respect to certain benefit calculations, specified types of credited service, such as credit for unused sick leave, are excluded.

This bill would additionally exclude from those benefit calculations service credited for an unused leave of absence for education, as specified.

(5) The Teachers' Retirement Law prescribes contribution rates, service and disability retirement benefits, survivor benefits, and benefits for former spouses of members, and establishes a replacement benefits program for members of the Defined Benefit Program and the Cash Balance Benefit Program of the State Teachers' Retirement Plan.

This bill would make technical and clarifying changes to those provisions.

(6) Existing law authorizes members of the Defined Benefit Program of the State Teachers' Retirement Plan to elect to receive service credit for various types of nonqualified service, subject to the payment of certain contributions, or to elect to redeposit previously refunded contributions, as specified.

This bill would authorize the member to pay or redeposit those contributions by transferring funds from eligible retirement plans, subject to applicable federal and state laws.

(7) The Teachers' Retirement Law prescribes specified benefit increases applicable to retirement, disability, and other allowances, and to annuities payable under the Defined Benefit Supplement Program.

This bill would make those increases inapplicable to those annuities.

(8) Existing law authorizes members and participants of the Defined Benefit Supplement Program and the Cash Balance Benefit Program of the State Teachers' Retirement Plan to elect from among several forms of annuity payments. Existing law provides that, upon election of an annuity under the Cash Balance Benefit Program, the credits in the participant's employee and employer accounts are transferred to the Annuitant Reserve.

This bill would authorize members of the Defined Benefit Supplement Program to receive a lump-sum payment instead of annuity payments in specified circumstances. The bill would provide, with respect to certain annuity payment options under of the Cash Balance Benefit Program, an increased payment if the participant's designated beneficiary predeceases the member and provide that upon reemployment of a participant receiving a disability annuity, his or her employee and employer's accounts shall be credited, and the Annuitant Reserve

reduced, by the actuarial equivalent of the participant's annuity. The bill would also make technical and clarifying changes to those provisions.

(9) Existing law requires the State Teachers' Retirement System to pay the premiums associated with Medicare Part A for members of the Defined Benefit Program who retired prior to January 1, 2001, and meet specified criteria. Existing law also authorizes the Teachers' Retirement Board to pay those premiums for certain members who retire on or after January 1, 2001, subject to certain findings by the board.

This bill would make technical and clarifying changes to those provisions.

(10) Existing law provides that certain permanent or regular employees of a school or agency shall be subject to the Public Employees' Retirement System, provided they are not members of the State Teachers' Retirement System.

This bill would clarify that those employees shall be subject to the Public Employees' Retirement System if they are neither members nor participants of the State Teachers' Retirement Plan.

(11) This bill would declare that if any other bill affects any code section contained in this bill, the provisions of that other bill shall prevail as to that code section, regardless of the date of enactment.

Ch. 804 (SB 588) Burton. Prevailing wages: payroll records.

Existing law generally requires contractors engaged in public works to pay employees the prevailing wage, as determined by the Director of Industrial Relations, and to comply with requirements relating to recordkeeping and employee work schedules.

This bill would authorize a joint labor-management committee established pursuant to a specified provision of federal law to bring an action against any employer who fails to pay prevailing wages as required by state law.

Existing law requires each contractor and subcontractor on a public works project to keep accurate payroll records containing information about employees, including name, address, social security number, and work history. Existing law requires, if these records are provided to the public or any public agency, that the names, addresses, and social security numbers of the employees be obliterated.

This bill would prohibit the obliteration of any information on employee payroll records except the employee's name and social security number, for any records supplied to a joint labor-management committee established pursuant to federal law.

Ch. 805 (SB 614) Burton. School employees: labor relations.

Existing law provides that public school employees who are in a unit for which an exclusive representative has been selected, are required, as a condition of continued employment, either to join the recognized employee organization or to pay the organization a fair share service fee. Existing law further provides that upon notification to the employer by the exclusive representative, the amount of the fee is required to be deducted by the employer from the wages or salary of the employee and paid to the employee organization, and prescribes related matters.

This bill would instead require that, notwithstanding any other provision of law, upon receiving notice from the exclusive representative of a public school employee who is in a unit for which an exclusive representative has been selected, the employer would be required to deduct the amount of a fair share service fee from the wages and salary of the employee and pay that amount to the employee organization. The bill would also provide that the employee would, thereafter, be required, as a condition of employment, either to join the recognized employee organization or pay that fair share service fee, would prescribe related matters, and would make conforming changes in related provisions.

The bill would require the employer of a public school employee to provide the exclusive representative of a public employee with the home address of each member of a bargaining unit, regardless of when that employee commences employment, in order to satisfy specified

notification requirements. By imposing new duties on school districts, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 806 (SB 730) O'Connell. Workers' compensation: death benefits.

Existing law provides for the payment of a state scholarship to dependents of specified peace officers, correctional officers or employees, and firefighters if the peace officer, correctional officer or employee, or firefighter is killed in the performance of his or her duty or if death or permanent disability is suffered by the peace officer, correctional officer or employee, or firefighter as a result of specified accidents or injuries incurred in the performance of his or her duty. Eligibility for the state scholarship is limited to dependents who demonstrate financial need to the Student Aid Commission.

This bill would prohibit proceeds of death benefits received by a dependent from being included when determining financial need for eligibility for the scholarship.

Ch. 807 (SB 1207) Romero. Occupational safety and health: volunteer firefighters.

Existing provisions of the California Occupational Safety and Health Act of 1973 define the terms "employee" and "employment." The definition of "employment" in existing law limits "employment" to work for hire.

This bill would impose a state-mandated local program by including within these definitions, and thereby making the act applicable to, volunteer firefighters when covered by workers' compensation pursuant to provisions applicable to volunteer firefighters of specified volunteer fire departments that are wholly or partially supported by a county, city, or public district.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 808 (SB 1212) Romero. Higher education labor relations: memorandum of understanding.

(1) Existing law establishes the California State University under the administration of the Trustees of the California State University. An existing provision relating to the university requires the trustees to establish grievance and disciplinary action procedures for all academic employees, as prescribed.

This bill would provide that this provision does not apply to a grievance relating to merit pay if a memorandum of understanding is agreed to and it provides for merit pay for academic employees of the university.

(2) Existing law relating to higher education labor relations provides that, in the case where various specified statutes conflict with a memorandum of understanding, the memorandum of understanding shall be controlling.

This bill would, instead, provide that, with respect to a memorandum of understanding entered into on or after January 1, 2002, the provision described in (1) above, with the exception of a specified portion of that provision, provides a minimum level of benefits or rights and shall be superseded by a memorandum of understanding only if the relevant terms of the memorandum of understanding provide more than the minimum level of benefits or rights provided by that statute.

Ch. 809 (AB 84) Hertzberg. Department of Motor Vehicles: records: confidentiality: psychiatric social workers and trial court employees.

(1) Existing law prohibits the disclosure of the home addresses of certain public employees and officials that appear in any records of the Department of Motor Vehicles, except to a court, a law enforcement agency, and certain other official entities.

Existing law makes a violation of the prohibition specified above a crime if the disclosure is of the home address of the public officials and employees, or the spouses or children of these officials or employees.

This bill, in addition, would require the home addresses of employees of a trial court, psychiatric social workers employed by counties, and the spouses and children of these employees and workers to be withheld from public inspection. The bill would also authorize the disclosure of the home addresses of certain public employees and officials to an attorney in a civil or criminal action who demonstrates to a court the need for the information, if the disclosure is made pursuant to a subpoena.

By expanding the scope of an existing crime, the bill would impose a state-mandated local program.

(2) This bill would incorporate additional changes in Section 1804.4 of the Vehicle Code, proposed by AB 1029, to be operative only if AB 1029 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 810 (AB 152) Calderon. San Gabriel Water Quality Authority: board members.

(1) The San Gabriel Water Quality Authority Act requires the board of the San Gabriel Water Quality Authority to be composed of 7 members, 3 of whom are water district members, 2 of whom are city members, and 2 of whom are producer members. The act requires city members and their alternates to be elected and to be city council members. The act requires water district members and their alternates to be appointed and to be members of the board of a water district. The act defines a producer member to mean a member who, pursuant to a specified court judgment, is a designee of a producer other than a water district or a city that is a holder of at least 5% of the prescriptive pumping rights in the Main San Gabriel Basin.

The act generally requires all actions of the board to be approved by an affirmative vote of a majority of all of the board members and, in addition, for certain actions, including the adoption of the authority's budget, requires that that vote include at least one city member, one producer member, and one water district member.

Existing law prohibits the board members of a district, as defined, from being financially interested in any contract made by them in their official capacity, or by any body or board of which they are members.

This bill would authorize the authority to contract with any producer, defined to include a producer under the specified court judgment and a business entity that is a majority owner or corporate affiliate of that producer if no producer member, or his or her alternate, votes on the contract.

The bill would provide that the financial interest of any producer member in a contract between a producer and the authority, or the fact that a producer member may have an ownership interest in, or hold the position of, a shareholder, director, officer, agent, or employee of that producer, does not constitute a violation of the above-described conflict-of-interest provision, if specified requirements are met.

The bill would require a contract with a producer, or a successor in interest to a producer, to be approved by the affirmative vote of a majority of all of the board members, other than producer members. The bill would delete the requirement that the adoption of the authority's budget be approved by at least one city member, one producer member, and one water district member.

The bill would provide that if a city member or alternate city member ceases to be a city council member, the office occupied by that member on the board of the authority shall be deemed vacant. The bill would provide that if a water district member or alternate water district member ceases to be a member of a water district, the office occupied by that member on the board of the authority shall be deemed vacant.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 811 (AB 173) Chavez. Solid waste: fees.

The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. The act requires each operator of a disposal facility in the state to pay a quarterly fee to the State Board of Equalization, as specified, for all waste disposed of at each disposal site. The fees are deposited in the Integrated Waste Management Account, which may be expended by the board, upon appropriation by the Legislature, for specified purposes regarding the regulation of solid waste. Existing law requires that recycled materials and inert waste removed from the waste stream, and not disposed of in a solid waste landfill, not be included, for the purpose of assessing specified fees. Existing law defines the term "inert waste" for the purposes of this provision, until January 1, 2002, as including the use, disposal, or placement of solely inert waste on property where surface mining operations are being conducted, or have been conducted previously, if the use, disposal, or placement is for purposes of reclamation. Existing law also defines the term "inert waste," until January 1, 2002, as including only rock, concrete, brick, sand, soil, and cured asphalt.

This bill would delete the repeal of that definition of inert waste, thereby continuing the operation of the provisions pertaining to that definition until the board adopts the regulations specified below.

The bill would require the board, by January 1, 2004, to adopt and file with the Secretary of State, regulations that establish an appropriate level of oversight of the management of construction and demolition waste, and the management of inert waste at mine reclamation sites. The bill would make the fee exemption for recycled materials and inert materials that defines the term "inert waste" inoperative on the operative date of those regulations, and would repeal the fee exemption that contains those definitions on January 1 following the operative date of those regulations.

This bill would reenact the exemption for recycled materials and inert waste that does not include those definitions of "inert waste" on the operative date of those regulations.

Ch. 812 (AB 223) Frommer. Evidence: depositions: forms: discovery.

Existing law sets forth the required contents of a civil complaint or cross-complaint, the right of a defendant to request a statement of the nature and amount of damages sought, and the required amount of an undertaking to obtain a release of an attachment or a protective order, or to protect the rights of a 3rd-party creditor, with regard to a writ of execution on a debtor's property.

This bill would make technical changes in these provisions and increase the required amount of those undertakings, as specified.

Existing law authorizes the clerk of a court to enter in the Register of Actions a writ of execution on a money judgment as wholly satisfied when no more than \$10 interest deficit exists in a limited civil case, as specified.

This bill would extend that authorization to all civil cases involving money judgments.

Existing law provides that a party may obtain discovery by taking an oral deposition in another state of the United States, or in a territory or an insular possession subject to its jurisdiction. The deposition must be conducted under the supervision of a person authorized to administer oaths by the laws of the United States or before a person appointed by the court.

This bill would authorize the clerk of the court to issue a commission authorizing the deposition in another state or place. The commission would be issued to any party in any action pending in its venue without a noticed motion or court order. The commission would contain such terms as are required by the foreign jurisdiction to initiate the process. If a court order is required by the foreign jurisdiction, an order for a commission would be authorized to be obtained by an ex parte application. The bill would also permit a person to take, or attend, a deposition by telephone or other electronic means, would permit a nonparty deponent to appear at his or her deposition by telephone, as specified, and would authorize the use of electronic technology in conducting discovery, as specified.

Existing law provides that certified shorthand reporters have the power to administer oaths or affirmations to those being deposed.

This bill would make that power applicable when the deposition is taken by telephone or other remote electronic means, as specified.

Existing law requires the Judicial Council to develop and approve official form interrogatories and requests for admission of the genuineness of any relevant documents or of the truth of any relevant matters of fact in any civil action in a state court based on personal injury, property damage, wrongful death, unlawful detainer, breach of contract, family law, or fraud.

This bill would further require the Judicial Council to develop and approve official form interrogatories and requests for admission for use in any other civil action in a state court as the Judicial Council deems appropriate.

Existing law generally provides that attorney work product is not discoverable unless the court determines the denial of discovery will unfairly prejudice the party seeking discovery, as specified. However, existing law also provides that any writing reflecting an attorney's impressions, conclusions, opinions, or legal research or theories is not discoverable under any circumstances. Existing law relating to the assertion of privilege provides that the presiding officer may not require disclosure of information claimed to be privileged in order to rule on the claim. However, if a court is unable to rule on the validity of the assertion of certain specified privileges without requiring disclosure, the court may require the disclosure of the information in chambers out of the presence and hearing of all persons except the person authorized to claim the protection and such other persons as the person authorized to claim the protection is willing to have present.

This bill would specify that a presiding officer may not require disclosure of attorney work product coming within the absolute prohibition in order to rule on a claim of privilege and would provide that other attorney work product may be disclosed pursuant to the above procedure in order to rule on such a claim.

Existing law requires each trial court to report to the Judicial Council on progress towards achieving specified cost reduction goals.

This bill would repeal that requirement.

Existing law specifies the total fee for filing a first paper in a limited civil case. Existing law authorizes the board of supervisors of each county to exclude a specified portion of the total fee relating to dispute resolution.

This bill would revise the total fee for filing a first paper in a limited civil case, as specified. The bill would delete the authority of a board of supervisors to exclude a portion of the total

fee and instead permit the Judicial Council to authorize any trial court to exclude that portion of the fee.

Existing law provides that the Judicial Council shall establish by rule the Trial Court Budget Commission and may delegate certain budgetary activities and recommending authority to the Trial Court Budget Commission. Existing law also provides specific standards for the allocation of moneys to individual courts proposed by the commission for approval by the Judicial Council. Existing law requires that each trial court send a copy of its budget request to the board of supervisors, and provides that the board of supervisors may comment on the budget to the Trial Court Budget Commission.

This bill would remove the statutory authorization for the Trial Court Budget Commission, make corresponding changes, and delete the provision requiring the sending of a copy of a trial court budget request to the board of supervisors. This bill would also provide that the Judicial Council may seek input regarding budgetary activities as it deems appropriate, and expressly permit the consideration of other issues when making allocation determinations. This bill would repeal the statute requiring that each trial court send a copy of its budget request to the board of supervisors, and authorizing the board of supervisors to comment on the budget to the Trial Court Budget Commission.

Existing law provides generally for the state funding of trial courts. These provisions require the establishment of a decentralized system of trial court management, define court operations for funding purposes, require the board of supervisors in each county to establish a Trial Court Operations Fund in the county treasury, provide for an annual appropriation to the Judicial Council for general operations of trial courts, require the Judicial Council to adopt appropriate rules for budget submission and management and the reporting of revenues and expenditures by each trial court, and require the continuation by counties of certain services to the courts.

This bill would revise the requirements for decentralized trial court management systems, revise the procedures for the audit and review of a Trial Court Operations Fund, revise the budget request procedures for the annual appropriation for trial court funding, and make corresponding changes in the definition of trial court operations.

Existing law provides that, with the prior approval of the county auditor, a municipal court may deposit into a bank account moneys that are deposited with the court as bail.

This bill would extend this provision to all trial courts, require prior approval of the administrative director of the courts rather than the county auditor, and provide for regulation of these accounts by the Judicial Council, as specified.

This bill would authorize the Judicial Council to restrict or prohibit a trial court from transferring money from one program to another, to audit the trial courts, to establish and control separate funds, and to regulate, control, and manage all moneys collected by the trial courts.

Existing law governs trial court employee benefits.

This bill would provide that, if a county administers benefits to trial court employees, the employee is eligible for benefits as regulations specify and the employee has the right to receive, and is similarly subject to the modifications of, the same level of benefits as county employees in similar classifications.

Existing law requires the Judicial Council to prepare a form, containing specific required information disclosures, by which litigants to an action may claim financial hardship and be excused from paying certain fees.

This bill would remove from the form the disclosure of the litigant's date of birth.

This bill would also require that any specified costs, charged to the courts by the counties, be expressly stated and contain only items of court operations.

This bill would require courts and counties to establish procedures to share budgetary information, as specified.

This bill would also require the Judicial Council to provide to the Legislature, on December 1, 2001, and yearly thereafter, court budget expenditure data, as specified.

Existing law provides for a confession of judgment without an action, upon the payment of a specified fee and the filing of specified documents, that becomes the judgment roll.

This bill would increase the filing fee for a confession of judgment in limited civil cases, and revise the list of required documents that become the judgment roll.

Existing law provides that a settling party in certain actions may give notice of settlement to all parties and the court and that, within 25 days of the mailing of that notice, a nonsettling party may file a notice of motion to contest the good faith of the settlement.

This bill would shorten the time limitation for the nonsettling party to file a motion contesting the good faith of the settlement to 20 days, if the original notice of settlement was personally served.

Existing law provides that service by mail is completed at the time of deposit and that the period of notice and any required response to the service, or any right or duty based thereon, is extended 5 days if mailed to a destination within California, 10 days if the destination is within the United States but outside California, and 20 days if the destination is outside the United States.

This bill would specify that the applicable days for this period of notice are calendar days, and that these time extensions shall be determined based upon either the destination or the place of mailing, or both, as specified.

This bill would incorporate additional changes in Section 2025 of the Code of Civil Procedure, proposed by SB 805, to be operative only if SB 805 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

This bill would incorporate additional changes in Section 77003 of the Government Code, proposed by AB 1700, to be operative only if AB 1700 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

This bill would incorporate additional changes in Section 77009 of the Government Code, proposed by SB 1191, to be operative only if SB 1191 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 813 (AB 276) Migden. Discrimination: remedies.

Existing law specifies that all persons have the right to be free of violence or intimidation by threat of violence against their persons or property because of their race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, disability, or position in a labor dispute or because another person perceives them to have one or more of these characteristics. Under existing law, these provisions do not apply to statements concerning positions in a labor dispute that are made during lawful labor picketing.

Existing law makes violation of these provisions subject to an award of damages up to \$150,000 in an administrative proceeding brought under the Fair Employment and Housing Act. Existing law specifies that the director of the Department of Fair Employment and Housing must issue an accusation in those administrative proceedings within one year after the complaint is filed with the department, except for complaints treated by the director as group or class complaints, with respect to which the accusation must be issued within two years of the filing of the complaint.

This bill would extend to 2 years the period within which an accusation may be issued by the director upon a complaint alleging a violation of the above-described right to be free of violence or intimidation or threats of violence.

Ch. 814 (AB 540) Firebaugh. Public postsecondary education: exemption from nonresident tuition.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college

campuses throughout the state. Existing law authorizes community college districts to admit, and charge a tuition fee for, nonresident students in accordance with specified criteria.

Existing law establishes the California State University, and authorizes the operation of its various campuses under the administration of the Trustees of the California State University. Existing law authorizes the trustees, on the basis of demonstrated financial need and scholastic achievement, to waive entirely, or reduce below the minimum rate, the tuition fee of a nonresident student, as defined.

Existing law prescribes residency requirements for students at public institutions of postsecondary education, including, among others, the campuses of the California Community Colleges and the California State University. With respect to alien students, existing law specifies that an alien, including an unmarried minor alien, may establish his or her residence unless precluded by the federal Immigration and Nationality Act from establishing domicile in the United States. These provisions are applicable to the University of California only if the Regents of the University of California act to make them applicable.

This bill would require that a person, other than a nonimmigrant alien as defined, who has attended high school in California for 3 or more years, who has graduated from a California high school or attained the equivalent thereof, who has registered at or attends an accredited institution of higher education in California not earlier than the fall semester or quarter of the 2001-02 academic year, and who, if he or she is an alien without lawful immigration status, has filed an affidavit as specified, be exempted from paying nonresident tuition at the California Community Colleges and the California State University.

The bill would authorize a student exempt from nonresident tuition under the bill to be reported by a community college district as a full-time student for apportionment purposes. The bill would require student information obtained in the implementation of the bill to be confidential.

Ch. 815 (AB 608) Dickerson. Transportation funding.

(1) Under existing law, each regional transportation planning agency and each county transportation commission, after consulting with the Department of Transportation, is required to adopt and submit to the California Transportation Commission and the Department of Transportation, not later than December 15, 2001, and December 15 of each odd-numbered year thereafter, a 5-year regional transportation improvement program in conformance with the state transportation improvement program. Those local transportation entities may request and receive an amount not to exceed $\frac{1}{2}$ of one percent of their regional improvement fund expenditures for the purposes of project planning, programming, and monitoring, except that those local transportation entities that are not receiving federal metropolitan planning funds may request and receive an amount not to exceed 2% of their regional improvement fund expenditures for those purposes.

This bill would increase the maximum amount that may be requested and received by those entities for the above described purposes to 1% and 5%, respectively.

(2) Existing law requires state transportation funds available for regional improvement projects to be programmed by the California Transportation Commission in the 5-year state transportation improvement program (STIP) in accordance with certain formulas, including the north-south split and county minimums. Existing law requires the programmed project amount in the STIP to be adjusted in certain cases.

This bill would also authorize the adjustment by the commission of a programmed project amount in the STIP if the construction contract award amount for a project is less than 80% of the engineer's final estimate, excluding construction engineering.

Ch. 816 (AB 731) Wayne. Domestic violence.

Existing law provides for the issuance and enforcement of protective orders in cases involving domestic violence. Existing law provides that a protective or restraining order related to domestic or family violence and issued by a court of another state, a tribe, or a

military tribunal shall be deemed valid if the issuing court had jurisdiction over the parties and the matter.

This bill would delete the latter provision and would enact the Uniform Interstate Enforcement of Domestic Violence Protection Orders Act, which would authorize the enforcement of a valid foreign protection order in a tribunal of this state under certain conditions. It would prescribe the criteria for a determination of validity and would specify that registration or filing of an order in this state is not required for the enforcement of a valid order. It also would require a law enforcement officer of this state to enforce a foreign protection order upon determining that there is probable cause to believe that a valid foreign protection order exists and has been violated. The bill would also recast the provisions of existing law that authorize any individual to register a foreign protection order and that require a court in this state to register the order and would make related technical changes.

This bill would incorporate additional amendments to Section 6380 of the Family Code made by AB 160 to take effect if both bills are enacted and this bill is enacted last.

By imposing new duties on local law enforcement officers, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 817 (AB 938) Cohn. Health care service plans: contracting providers: lists.

Under existing law, the Knox-Keene Health Care Service Plan Act of 1975, health care service plans are regulated by the Director of the Department of Managed Health Care. Existing law requires each plan to utilize disclosure forms or materials containing information regarding the benefits, services, and terms of the plan contract, and requires the disclosure form to include, among other things, a description of any limitations on the patient's choice of a primary care or specialty care physician, and to include general authorization requirements for referral by a primary care physician to a specialty care physician.

This bill would require the disclosure form to include any limitations on the patient's choice of a nonphysician health care practitioner, and to include any general authorization requirements for referral by a primary care physician to a nonphysician health care practitioner.

This bill would require a health care service plan to provide to enrollees, upon request, a list of contracting providers, updated on a quarterly basis, and information concerning their medical education, board certification, and subspecialty training. The bill would require that the list indicate that it is subject to change without notice and that it provide enrollees with a telephone number whereby the enrollee can determine if the provider is accepting new patients. The bill would provide that a complete republication of a plan's provider directory is not required. The bill would require a health care service plan to permit enrollees to request this information through the plan's toll-free telephone number. The bill also would require a health care service plan to provide enrollees, upon request, information on plan providers.

A willful violation of the act is a crime. Therefore, the bill's imposition of additional or revised requirements on health care service plans would impose a state-mandated local program by creating new crimes or changing the definition of existing crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason. This bill would become operative on July 1, 2002.

Ch. 818 (AB 978) Steinberg. Native American graves protection and repatriation.

Existing law contains provisions regarding the regulation of human remains disposal and burials.

This bill, the California Native American Graves Protection and Repatriation Act of 2001, would require all state agencies and museums that receive state funding and that have possession or control over collections of human remains or cultural items, as defined, to complete an inventory and summary of these remains and items on or before January 1, 2003, with certain exceptions, would provide a process for the identification and repatriation of these items to the appropriate tribes, and would authorize the imposition of civil penalties for failure to comply with the requirements of this bill. The bill would also establish the Repatriation Oversight Commission, composed of 10 members, with specified duties relating to the repatriation process.

Ch. 819 (AB 1011) Pavley. County records.

(1) Existing law prescribes the various duties of the county assessor and the county recorder with respect to the filing and maintenance of public documents and prescribes fees that may be charged by the county recorder for recording and indexing documents.

This bill would require the county recorder in each county to develop and maintain, within the existing indexing system, a comprehensive index of conservation easements on land in that county. The bill would also require the county recorder, with respect to conservation easements affecting property within the county, recorded on or after January 1, 2002, to include the conservation easement in the index, if the document is properly labeled, or if a Notice of Conservation Easement, as set forth in the bill, is also recorded. The bill would authorize specified parties to conservation easements to fill out and record a Notice of Conservation Easement for conservation easements recorded prior to January 1, 2002. The bill would specify that, with respect to recording a conservation easement document, the fee for recording and indexing documents shall include funds to cover the costs associated with indexing the document. The bill would state the intent of the Legislature that the conservation easement index be established by using existing resources. By imposing these duties on county officers, this bill would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 820 (AB 1015) Wright. Employment: retaliation.

Existing law prohibits an employer from discriminating against any employee because the employee has filed a claim with or instituted a proceeding before the Labor Commissioner relating to the employee's rights, because the employee testifies or will testify in such a proceeding, or because the employee exercised, on behalf of himself, herself, or others, rights afforded employees by the Labor Code. Existing law provides for reinstatement of and the payment of lost wages and work benefits to any employee who is subjected to adverse employment action because the employee filed a bona fide complaint with the Division of Industrial Relations. Existing law makes it a misdemeanor for an employer to take adverse employment action against employees who file bona fide complaints.

This bill would extend those provisions to apply to applicants for employment who are refused employment, not selected for a training program leading to employment, or discriminated against in any other manner. The bill would also expand existing prohibitions to include protection for employees and applicants who engage in conduct delineated in Chapter 4 of Division 1 and Chapter 5 of Part 3 of Division 2 of the Labor Code. The bill

would provide that its provisions relating to Chapter 4 of Division 1 and Chapter 5 of Part 3 of Division 2 do not apply to state and local law enforcement agencies, certain religious organizations or corporations, or certain members of the press.

The bill would also provide that its provisions shall not be construed to invalidate certain collective bargaining agreements and employment contracts that protect an employer against conduct that is in direct conflict with the employer's essential enterprise-related interests where breach of the agreement would materially and substantially interfere with the employer's operations or collective bargaining agreements protecting a firefighter against diseases presumed to arise as a result of his or her employment by limiting the firefighter's consumption of tobacco products. The bill would provide that its provisions do not affect existing law regarding employment discrimination related to the consumption of tobacco products.

The bill would provide that its provisions are severable and would also make technical, nonsubstantive changes to existing law.

Ch. 821 (AB 1025) Frommer. Lactation accommodation.

Existing law imposes various requirements upon employers concerning safety, working conditions, and other matters regarding the workplace, but no requirement upon private employers to accommodate employees desiring to express breast milk.

This bill would require employers to provide a reasonable amount of break time to employees desiring to express milk. The break time would be required to run concurrently, if possible, with any break time already provided. The bill would provide further that in the event it is not possible for the break time for expressing milk to run concurrently with the break time that is already provided to the employee, the break time for expressing milk shall be unpaid. Employers would also be required to provide the use of a room, or other location, other than a toilet stall, in close proximity to the employees' work area. The bill would permit the room or other location provided by employers to employees for the purpose of expressing milk to include the place where the employee normally works as long as that location meets the bill's other requirements.

This bill would exempt an employer from its requirements if the employer's operations would be seriously disrupted by providing break time to employees desiring to express milk. The bill would subject employers who violate these provisions to specified civil penalties and would authorize the Labor Commissioner to issue citations for such violations. The bill further provides procedures for issuing, contesting, and enforcing judgments for citations or civil penalties issued by the Labor Commissioner for violations of the bill's provisions and would impose a state-mandated local program by requiring, through incorporation of an existing provision, clerks of superior courts to issue judgments upon receipt of a prescribed filing by the Labor Commissioner.

Existing law provides that certain violations of the Labor Code are misdemeanors.

This bill would provide that, notwithstanding any provision of the Labor Code, violation of the bill's provisions shall not be a misdemeanor.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 822 (AB 1432) Corbett. Office of Emergency Services.

(1) The Natural Disaster Assistance Act authorizes the Director of Emergency Services to allocate funds appropriated for the purposes of the act for various local agency and state costs. Among the costs that may be provided for are local agency personnel costs eligible for funding or reimbursement under specified provisions of federal law, excluding normal hourly wage costs of regularly assigned emergency services and public safety personnel; costs to repair, restore, reconstruct, or replace facilities belonging to local agencies damaged as a result of natural disasters; and indirect costs as defined by a specified federal publication.

This bill would delete the reference to federal eligibility for personnel costs and instead provide that local agency personnel costs may be funded, excluding normal hourly wage costs of employees engaged in emergency work activities. The bill would also provide that specified mitigation costs may be funded and delete the reference to a specified federal publication and instead provide that indirect administrative costs may be funded.

(2) Existing law establishes the Disaster Response-Emergency Operations Account within the Special Fund for Economic Uncertainties, and continuously appropriates the moneys in the account, subject to specified limitations, for allocation by the Director of Finance to state agencies for disaster response operation costs incurred by state agencies as a result of a state of emergency proclamation by the Governor. These provisions become inoperative on July 1, 2002, and are repealed as of January 1, 2003.

This bill would extend the operation of these provisions to July 1, 2003, and would extend the date of their repeal to January 1, 2004. By extending the existence of a continuously appropriated fund, this bill would make an appropriation.

(3) Existing law requires an electrical corporation or local publicly owned electric utility to notify immediately the Commissioner of the California Highway Patrol and the sheriff and any affected chief of police of the specific area that will sustain a planned loss of power as soon as the planned loss becomes known as to when and where that power loss will occur.

This bill would require the Office of Emergency Services also to be notified.

(4) This bill would additionally make various technical corrections and delete obsolete references.

Ch. 823 (AB 1534) Longville. Contractors: works of improvement.

Existing statutory law generally governs payment provisions contained in contracts for works of improvement.

This bill would require an owner of property who contracts for a work of improvement, for construction, alteration, addition to, or repair of the property, where the value of the contract is either (1) more than \$5,000,000 where the owner's interest is a fee simple absolute interest in the property, or (2) more than \$1,000,000 where the owner's interest is less than a fee simple absolute interest in the property, to provide to the original contractor, if a lending institution is providing a construction loan, a copy of the recorded construction mortgage or deed of trust that shall disclose the amount of the construction loan. The bill would also require an owner who is not the majority owner of the original contractor to provide security for that project by a payment bond, irrevocable letter of credit, or a construction security escrow account, as specified. The bill's requirements would not apply to the construction of single-family residences, as defined, and specified associated fixed works, public works projects, or housing developments eligible for a density bonus, as specified. The bill would also exempt certain qualified publicly traded companies and qualified private companies, as defined, from the above requirements.

Ch. 824 (AB 1700) Steinberg. Courts: civil actions.

(1) Existing law provides for portable assistive listening systems for the courts; procedures for the reclassification of cases; the disposition of various fees remaining unused with the courts; the role of the county board of supervisors in setting court fees; the payment of court fees, fines, or bail by credit card; the filing by court officers and others of a sworn inventory oath; the setting of court fees; payroll dates for judicial personnel; court personnel

costs; the cost of court seals; the disposition of court fees; courthouse construction; registers of actions; court management review; court district consolidation; the naming of court districts; the selection of court officials; inspection of commitment facilities; court operations; trial court funding; court pilot projects; court-appointed special advocate grants; juvenile court infraction adjudication; liability for costs of sealing juvenile records; and parental responsibility for services for wards of the juvenile court.

This bill would revise, recast, or repeal these various provisions. The bill would impose a state-mandated local program by transferring various duties from the counties to the courts.

This bill would also incorporate additional changes in Section 77003 of the Government Code, proposed by AB 223, to be operative only if AB 223 and this bill are both chaptered and become effective January 1, 2002, and this bill is chaptered last.

(2) Existing law requires the governing association of a common interest development and the builder of the development to comply with specified conditions before the association commences an action for damages against the builder based upon a claim for defects in the design or construction of the development. Among other things, the association's notice to the builder commences a period not to exceed 90 days, unless the association and builder agree to a longer period, during which the association and builder shall either attempt to settle the dispute or attempt to agree to submit the dispute to alternative dispute resolution. That notice also tolls all statutory and contractual limitations on actions against all parties who may be responsible for the defects claimed. However, the builder may give written notice to cancel the tolling of the statute of limitations, as specified. The builder may request, within 25 days of the date the association delivers the notice, to meet and confer with the board of directors of the association and to inspect the project and conduct testing. Existing law provides that the meeting is for the purpose of discussing specified issues.

This bill would revise and recast those provisions. The bill would instead require that, before an association files a complaint for damages against a respondent, as defined, based upon a claim for defects in design, or construction, the association must serve upon the respondent, a "Notice of Commencement of Legal Proceeding," that the respondent take specified action within 60 days of receipt of that notice, and that the parties meet and confer in an effort to select a dispute resolution facilitator prior to the commencement of an action for damages. The bill would require dispute resolution, as specified. Service of the notice would commence a period not to exceed 180 days, except as specified, during which the association and respondent must attempt to resolve the dispute. The bill would also specify procedures for the filing of a complaint and the amendment of claims in regard to this litigation.

The provisions would become operative on July 1, 2002.

The bill would also provide these provisions, including the existing law, would become inoperative on July 1, 2010.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 825 (SB 290) Committee on Transportation. Transportation.

(1) The Outdoor Advertising Act regulates the placement of advertising displays adjacent to and within specified distances of highways that are part of the national system of interstate and defense highways and federal aid highways. The act, except as specified, prohibits any advertising display from being placed or maintained on property adjacent to a section of a

freeway that has been landscaped if the advertising display is designed to be viewed primarily by persons traveling on the main-traveled way of the landscaped freeway.

This bill would additionally exempt from that prohibition, and would subject an advertising display to special removal and relocation provisions, not more than 4 nonconforming advertising displays located in the Mid-City Recovery Redevelopment Project Area within the City of Los Angeles, if the displays meet prescribed conditions.

The bill would set forth facts and declare that the provisions specified above constitute necessary special legislation.

(2) Existing law requires the Department of Transportation to furnish to the Department of General Services a record of each parcel of real property, where available, or identified transportation project, which it possesses, except certain existing properties or projects. Existing law further requires certain other descriptions to be provided.

This bill would recast these provisions to instead require the department to furnish the above record of each parcel, containing revised information to the Department of General Services by July 1, 2002, and each July 1 thereafter, with respect to lands, buildings, office buildings, maintenance stations, equipment yards, and parking facilities. The bill would exclude from the report existing highways, airspace, excess lands, and property acquired for highway projects.

(3) Existing law requires the Department of Transportation to encourage research and development of technological innovation in all modes of transportation in cooperation with public agencies and the private sector.

This bill would require the State Energy Resources Conservation and Development Commission, in consultation with the department, to study the potential cost-effectiveness and energy efficiency of utilizing retroreflective sheeting materials on highway signs. The bill would require the commission, in completing the study, to review any existing studies to the extent feasible and report its finding to the Legislature on or before May 1, 2002.

(4) Existing law requires funds received by the Department of Transportation as reimbursement for any work performed by the department under contract or other agreement for any local agency or entity or for any other state agency or state entity be deposited in the Transportation Reimbursable Work Account which is a continuously appropriated account in the State Transportation Fund.

This bill would repeal those provisions.

(5) Under existing law, contracts for construction in excess of \$10,000 and contracts for the purchase of supplies, equipment, and materials in excess of \$20,000 are required to be awarded by the North San Diego County Transit Development Board to the lowest responsible bidder after competitive bidding, except in an emergency.

This bill would increase these thresholds from \$10,000 to \$50,000 and from \$20,000 to \$50,000, respectively.

(6) Under existing law, when an expected purchase contract involving the San Diego Metropolitan Transit Development Board exceeds \$1,000 and does not exceed \$50,000, that board is required to seek a minimum of 3 quotations which permit prices and other terms to be compared.

This bill would increase the above-described threshold from \$1,000 to \$2,500.

(7) Existing law requires the California Transportation Commission to relinquish to any city or county any portion of any state highway within the city or county that has been deleted from the state highway system by legislative enactment. These relinquishments become effective upon the first day of the next calendar or fiscal year, whichever first occurs after the effective date of the legislative enactment.

This bill would authorize the commission to relinquish to the City of Newport Beach a specified portion of State Highway Route 1, upon terms and conditions the commission finds to be in the best interests of the state. The relinquishment would become effective immediately following the county recorder's recordation of the relinquishment resolution containing the commission's approval of the terms and conditions of the relinquishment. The

portion of State Highway Route 1 relinquished as specified would cease to be a state highway on the effective date of the relinquishment. The bill would impose a state-mandated local program by requiring the City of Newport Beach to perform specified functions.

(8) Existing law authorizes the California Transportation Commission, upon a determination by the commission that it is in the best interests of the state to do so, to relinquish, upon terms and conditions approved by it, that portion or portions of State Highway Route 2 located within the City of West Hollywood or the City of Santa Monica, or both, to that city or cities, upon agreement by the city or cities to accept the relinquishment or relinquishments. A relinquishment under this authority is effective on the date specified in the commission's approved terms and conditions with the respective city, and, thereafter, State Highway Route 2 may not include the portion or portions so relinquished, nor may the portion or portions be considered for future adoption by the state.

This bill would authorize the commission to relinquish to the City of Los Angeles a specified portion of State Highway Route 2, upon terms and conditions the commission finds to be in the best interests of the state, and would require the City of Los Angeles to maintain within its jurisdiction certain directional signs, thereby imposing a state-mandated local program. The relinquishment would become effective immediately following the county recorder's recordation of the relinquishment resolution containing the commission's approval of the terms and conditions of the relinquishment. The portion of State Highway Route 2 relinquished as specified would cease to be a state highway on the effective date of the relinquishment.

(9) Existing law lists and describes the highway routes in the state highway system, including State Highway Route 25.

This bill would amend the description of State Highway Route 25.

(10) Existing law provides, among other things, that, upon the implementation of the permanent trailer identification plate program, all trailers shall receive an identification certificate upon conversion to the permanent trailer identification program.

This bill would exempt from this requirement cases where the registrant has elected to apply for trailer identification plates or the trailer is exempt from registration.

(11) Existing law imposes gross vehicle weight fees, in accordance with a schedule, upon the registration of commercial motor vehicles operated either singly or in combination with a declared gross vehicle weight of 10,001 pounds or more. Under existing law, pickup truck weight fees are not calculated under that schedule.

This bill would additionally not calculate electric vehicle weight fees under that schedule.

The bill would preclude the weight of any vehicle issued an identification plate pursuant to a specified provision or the weight of an implement of husbandry, as defined, from being considered when calculating the declared gross vehicle weight of a towing commercial motor vehicle that is owned and operated exclusively by a farmer or an employee of a farmer in the conduct of agricultural operations.

The bill would require tow trucks that are utilized to render assistance to the motoring public or to tow or carry impounded vehicles to pay the above described weight fees in accordance with the existing schedule, except that the fee calculation shall be based only on the gross vehicle weight rating of the towing or carrying vehicle. The bill would require, upon each initial or transfer application for registration, the registered owner or lessee or that lessee's or owner's designee, to certify to the Department of Motor Vehicles the gross vehicle weight rating of the tow truck. Because under existing law, a failure to comply with the Vehicle Code is a crime, this bill would impose a state-mandated local program, by expanding the scope of that crime.

(12) Under existing law, the driver of any vehicle involved in an accident resulting only in damage to any property, including vehicles, is allowed to move the vehicle, if possible, off the main lanes of the highway to a safe location within the immediate vicinity of the accident unless that action would create a traffic hazard or cause an injury to any person. Existing law requires that driver to undertake certain notification actions.

This bill would recast this provision to require the driver involved in the described accident to, instead, immediately stop the vehicle at the nearest location that will not impede traffic or otherwise jeopardize the safety of other motorists. The bill would also require the driver to immediately undertake the notification requirements.

Because these changes would have the effect of expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(13) Existing law exempts from vehicle weight fees one commercial vehicle weighing less than 6,001 pounds unladen which, among other things, is used primarily for the transportation of a disabled person.

This bill would increase the weight of the commercial vehicle entitled to the exemption to those weighing less than 8,001 pounds unladen, rather than less than 6,001 pounds unladen. The bill would make a correspondingly related change in a provision governing nonresident daily commuters.

(14) Under existing law, in computing any penalty relating to the registration and transfer of vessels, a fraction of a dollar is disregarded unless it exceeds 50¢.

This bill would apply the above if the fraction of a dollar equals or exceeds 50¢.

(15) Existing law provides for the issuance of an instruction permit by the Department of Motor Vehicles subject to certain requirements which permit entitles the applicant to operate a vehicle for a period not exceeding 12 months.

This bill would additionally require an applicant to qualify for and be issued an instruction permit within 12 months from the date of the application and would entitle an instruction permitholder to operate a vehicle for 24 months, rather than 12 months, from the date of the application.

(16) Existing law requires every driver and every owner of a motor vehicle to be able to establish financial responsibility, and, at all times, carry in the vehicle evidence of a form of financial responsibility, which may be obtained by a law enforcement officer from the electronic reporting system established by the Department of Motor Vehicles. Existing law provides that evidence of financial responsibility may include the number of an insurance policy. Existing law requires, upon the demand of a peace officer, that evidence of financial responsibility be provided by a person driving a motor vehicle.

This bill would provide that the electronic reporting system alternative applies when that system becomes available for use by law enforcement officers.

The bill would also provide that the name of the insurance company is required to be included, as well as the number of the insurance policy, as evidence of financial responsibility. The bill would also provide that evidence of financial responsibility be provided to a traffic collision investigator upon the demand of that investigation.

(17) Existing law sets forth in the Vehicle Code lighting and reflector requirements for vehicles operating upon the highways.

This bill would require all trailers and semitrailers having an overall width of 80 inches or more and a gross vehicle weight rating of more than 10,000 pounds, and manufactured on or after December 1, 1993, except as specified, and all truck tractors manufactured on or after July 1, 1997, to be equipped with the conspicuity system specified in a federal Motor Vehicle Safety Standard.

The bill would allow any trailer, semitrailer, or motor truck having an overall width of 80 inches or more and manufactured prior to December 1, 1993, and any truck tractor manufactured prior to July 1, 1997, to be equipped with the conspicuity system.

Because a violation of Vehicle Code equipment requirements is, under existing law, a crime, this bill would impose a state-mandated local program by creating a new crime.

(18) Existing law requires a motor carrier permit to be canceled and a \$20 fee to be assessed to the motor carrier permit applicant if the permit is paid by check and the check is dishonored by the bank.

This bill would delete the required \$20 fee assessment for dishonored checks.

(19) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(20) This bill would incorporate additional changes in Section 4000.6 of the Vehicle Code proposed by AB 1472, to be operative only if AB 1472 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

The bill would incorporate additional changes in Section 5014.1 of the Vehicle Code proposed by AB 1472, to be operative only if AB 1472 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

The bill would incorporate additional changes in Section 5017 of the Vehicle Code proposed by AB 1472, to be operative only if AB 1472 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

The bill would incorporate additional changes in Section 9400.1 of the Vehicle Code proposed by AB 1472, to be operative only if AB 1472 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 826 (AB 1472) Longville. Vehicles: commercial vehicle registration.

(1) Under existing law a trailer or semitrailer that has a valid identification plate issued by the Department of Motor Vehicles is exempt from personal property taxation under the Revenue and Taxation Code.

This bill would include logging dollies, pole or pipe dollies, and trailer buses that have been issued valid identification plates and any auxiliary dolly or tow dolly within those listed vehicles that are exempt from personal property taxation.

This bill would specify that the exemption does not apply to a logging dolly that is used exclusively off-highway.

The bill would make cross-reference changes in related provisions.

(2) Existing law exempts from the Sales and Use Tax Law, new or remanufactured trailers or semitrailers with an unladen weight of 6,000 pounds or more and, among other things, is purchased for use without this state, if the purchaser furnishes certain documents to the manufacturer, remanufacturer, or dealer, including a written evidence of an out-of-state license and registration for that vehicle.

This bill would, for purposes of the above exemption, allow the purchaser's agent to furnish the necessary documents, and allow for the purchaser's or lessee's United States Department of Transportation number or Single State Registration System filing as a substitute to the above described written evidence if the vehicle is licensed under the permanent trailer identification plate program, and is used exclusively in interstate or foreign commerce, or both.

(3) Existing law requires any commercial motor vehicle, singly or in combination, that operates with a declared gross vehicle weight that exceeds 10,000 pounds to be registered, as specified.

This bill would clarify that the declared gross vehicle weight threshold includes declared combined gross vehicle weight.

(4) Existing law provides that a temporary registration or trip permit issued to a commercial motor vehicle shall include the diesel fuel permit number issued by the State Board of Equalization.

This bill would delete that requirement.

(5) Under existing law, an application for the original registration of a commercial motor vehicle is required to include a declaration, made by the owner to the Department of Motor Vehicles upon the appropriate form furnished by the department, that the owner is aware of the applicable motor carrier safety regulations adopted by the Department of the California Highway Patrol.

This bill would delete that requirement.

(6) Existing law requires that every piece of special construction equipment, special mobile equipment, cemetery equipment, every tow dolly, trailer, semitrailer, and every logging vehicle display an identification plate, as specified.

This bill would delete an obsolete date in those provisions.

(7) Existing law provides, upon the implementation of the permanent trailer identification plate program, that specified provisions apply, including that specified trailers be assigned a permanent identification plate and be assessed a service fee in an amount sufficient to pay at least the actual costs to the Department of Motor Vehicles, but not to exceed \$20.

This bill would allow a permanent trailer identification sticker to be affixed in lieu of an identification plate, and would make conforming changes.

(8) Under existing law, an application for a transfer of registration of a commercial motor vehicle is required to include a declaration, that the owner is aware of the applicable motor carrier safety regulations adopted by the Department of the California Highway Patrol.

This bill would delete this requirement.

(9) Under the permanent trailer identification plate program, in addition to any other registration fee, scheduled fees are required to be paid to the Department of Motor Vehicles for the registration of commercial motor vehicles. Existing law requires the department to file monthly with the Controller a report of money received by the department covering all fees received by the department. The Treasurer, in turn, under existing law, is required to deposit all moneys so reported and remitted in the Motor Vehicle Account in the State Transportation Fund, into which is merged the Motor Vehicle Account in the Transportation Tax Fund.

This bill would require, of the moneys collected by the department for the registration of commercial motor vehicles, \$82 for each initial, original, and renewal registration, to be reported monthly to the Controller, and at the same time, deposited in the State Treasury to the credit of the Motor Vehicle Account in the State Transportation Fund, and the other moneys collected by the department for the registration of commercial motor vehicles to be deposited to the credit of the State Highway Account in the State Transportation Fund.

The bill would prohibit the department from assessing a Cargo Theft Interdiction Program fee upon any commercial motor vehicle that has a declared gross vehicle weight of less than 10,001 pounds.

The bill would require the department to issue refunds of, or credits for, any Cargo Theft Interdiction Program fee that is assessed upon a vehicle that does not meet specified minimum weights or is a pickup truck or an electric vehicle.

(10) Under existing law, on or before January 1, 2003, and annually thereafter, the Department of Motor Vehicles, in consultation with the Department of the California Highway Patrol, the Department of Transportation, the Board of Equalization, and the commercial vehicle industry, is required to review and report to the Legislature and make recommendations regarding the fee schedule for commercial motor vehicles.

This bill would require the above to occur on or before July 1, 2003.

(11) The bill would also make various technical, conforming, and clarifying changes to the permanent trailer identification plate program and related statutes.

(12) This bill would incorporate additional changes in Section 5014.1 of the Vehicle Code proposed by SB 290, to be operative only if SB 290 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(13) This bill would incorporate additional changes in Section 9250.7 of the Vehicle Code proposed by SB 106, to be operative only if SB 106 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(14) This bill would incorporate additional changes in Section 9400.1 of the Vehicle Code proposed by SB 290, to be operative only if SB 290 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(15) This bill would make related changes, contingent on the enactment of SB 290.

Ch. 827 (SB 293) Torlakson. Pharmacies: injectable sterile drug products.²⁰

Existing law, the Pharmacy Law, provides for the licensing and regulation of pharmacists and pharmacy corporations in this state by the California State Board of Pharmacy. Existing law regulates controlled substances, dangerous drugs, and dangerous devices.

This bill would authorize the California State Board of Pharmacy, based on reasonable belief obtained during an investigation or pharmacy inspection, to issue a cease and desist order to a pharmacy requiring the pharmacy to refrain from compounding injectable sterile drug products if that activity poses an immediate threat to the public health or safety. The bill would implement quality assurance methods regarding the compounding of injectable sterile drug products. The bill would require the board to adopt necessary regulations regarding injectable sterile drug products. The bill would require specified pharmacies to obtain a license from the board in order to prepare injectable sterile drug products. The bill would provide that the reconstitution of a sterile powder would not require a license if specified conditions are met. By charging a fee for these licenses which would be deposited into the continuously appropriated Pharmacy Board Contingent Fund, the bill would make an appropriation.

This bill would provide that a violation of the bill or regulations adopted pursuant to it would be subject to a fine of up to \$2,500. These fines would be deposited into the continuously appropriated Pharmacy Board Contingent Fund and would thereby make an appropriation. This bill would appropriate \$580,000 from the Pharmacy Board Contingent Fund for purposes of the bill.

A violation of the Pharmacy Law is a crime. By adding additional requirements to the Pharmacy Law concerning injectable sterile drug products, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 828 (SB 870) Costa. Dairies: dairy marketing study.

Existing law relating to milk pricing and pooling provides that all milk produced in the state shall be pooled and that minimum prices that handlers must pay individual producers for the share of the raw milk that they have supplied shall be set. Existing law provides that the Secretary of Agriculture, in establishing minimum prices to be paid by handlers to producers for market milk in any market area, may establish, as the applicable minimum prices, those prices applicable within the marketing area of ultimate usage of the market milk, those prices applicable within the marketing area where the plant of first receipt of the market milk is located, those prices applicable in the marketing area where the producers place of production is located, or any of the above or any combination of the above. A violation of any of the provisions relating to the stabilization and marketing of market milk is a misdemeanor.

This bill would require the Department of Food and Agriculture to complete by April 15, 2002, a study of various programs affecting the regulated milk pricing and pooling programs and to submit it to the respective chairpersons of the Senate Committee on Agriculture and Water Resources and the Assembly Committee on Agriculture.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 829 (SB 883) Escutia. Water replenishment districts.

(1) The Water Replenishment District Act requires a water replenishment district to advertise for bids before making any contract totaling \$25,000 or more within any 12-month period, but provides that in the case of an emergency, a district may enter into a contract without advertising for bids in accordance with specified provisions of law.

This bill, if a proposed expenditure described in the annual district budget for any item of supplies or services equals or exceeds \$25,000, would require that district to advertise for bids before making any contract for that item during the year to which that budget applies. The bill would authorize a district to enter into a contract without advertising for bids in the case of an emergency if the emergency relates to the repair or replacement of district facilities. The bill would exempt certain contracts from that advertising requirement. The bill would authorize the district to adopt other procurement, advertising, and bidding rules that are more restrictive than those contained in the Public Contract Code and would require those more restrictive rules to govern the procurement, advertising, and bidding practices of the district.

The bill would prohibit a board member of a water replenishment district from making, or in any way attempting to use his or her official position to influence, a decision in which the board member knows or has reason to know that any of the relatives, as defined, or cohabitants, as defined, of the board member, whose financial interests are not otherwise regulated by the Political Reform Act of 1974, has a financial interest.

By imposing requirements on a water replenishment district, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 830 (SB 940) Committee on Judiciary. Disclosure of information regarding juveniles.

(1) Existing law provides for the protection and safety of minors under the jurisdiction of the juvenile court. Existing law further requires juvenile courts and other public agencies responsible for administering the juvenile court law to consider the protection of the public, the importance of providing redress for victims, and the best interests of minors subject to these provisions.

This bill would require juvenile court judges to act in accordance with a specified standard of judicial administration recommended by the Judicial Council that encourages juvenile court judges, among other things, to play a role in the leadership of a community in developing resources for prevention, intervention, and treatment services for at-risk children and families.

(2) Existing law provides that a minor may come within the jurisdiction of the juvenile court on the ground that the minor (a) has been or will be neglected or abused, or (b) has violated a law, an ordinance, or a curfew, or is habitually disobedient or truant. Whenever a minor appears to come within the jurisdiction of the juvenile court on the ground that both (a) and (b) are applicable, the county probation department and the county welfare department are required, pursuant to a jointly developed written protocol, to initially determine which status will serve the best interests of the child and the protection of society. These recommendations are required to be presented to the juvenile court. The court is then required to determine which status is appropriate for the minor.

This bill would establish a similar procedure whenever a minor who is under the jurisdiction of the juvenile court in one county is alleged to come within the jurisdiction of the juvenile court in another county. The bill would also require that any other juvenile court having jurisdiction over the minor shall receive a specified notice from the court in which the petition is filed within 5 calendar days of the presentation of the recommendations of the departments pursuant to these provisions. By imposing additional duties on county probation and child protective services departments and local court employees, the bill would impose a state-mandated local program.

The bill would also provide that child protective services departments, rather than county welfare departments, shall carry out the duties described above.

(3) Existing law generally provides that the status of every child who has been declared a ward of the juvenile court and placed in foster care shall be reviewed at least every 6 months. These provisions also provide that there shall be a permanency planning hearing within 12 months of the date the child first entered foster care and no less often than every 12 months during the period of placement. Under certain conditions, the court may order a hearing to terminate parental rights.

This bill would require the probation department, in any case where a child has been declared a ward of the juvenile court and has been in foster care for 15 of the most recent 22 months, to follow existing procedures to terminate parental rights, unless the probation department has documented a compelling interest for determining that termination of parental rights is not in the child's best interests or that reasonable reunification efforts have not been provided, as specified. In addition, the bill would require the probation department to make efforts to identify a family for adoption at the time it sets a hearing for termination of parental rights. By imposing additional duties on local probation department employees, the bill would impose a state-mandated local program.

(4) Existing law generally restricts the disclosure of information regarding juvenile offenders. However, information contained in a case file may be inspected by a person designated by court order of a judge of the juvenile court upon filing a petition.

Existing law authorizes a law enforcement agency to disclose information regarding the taking of a minor into custody to another law enforcement agency or to any person or agency which has a legitimate need for the information, as specified. Existing law requires a law enforcement agency to disclose information regarding a minor who has escaped from a secure detention facility, as specified, to a person who has specifically requested this information.

This bill would establish additional disclosure requirements for Los Angeles County. The bill would require a law enforcement agency to release, upon request, a complete copy of a juvenile police record, as defined, and would expand the category of persons to whom a law enforcement agency is required to release this information, without notice or consent of the person who is the subject of that record.

These disclosure provisions for Los Angeles County would also require the release, upon request, of a redacted copy of the record to specified persons or entities. If that person or entity seeks a complete copy of the record, that person or entity must submit a request using a specified form to the appropriate law enforcement agency. The bill would require the law enforcement agency to take specified actions in response to that request. Among other actions, the law enforcement agency may be required to send a notice of the request to specified persons, to make reasonable efforts to obtain the address of those persons, and, under certain circumstances, to submit the request, any objections to the request, and a copy of the requested record to the juvenile court in order to obtain authorization to release the records. The bill would set forth procedures for obtaining the release of those records. The bill would require out-of-state entities to file a petition to obtain that information. The bill would also require the Judicial Council to develop forms to implement these provisions. The bill would require the juvenile court and law enforcement in Los Angeles County to conduct an evaluation of the procedures for the release of police records containing information about

minors and to report the results of that evaluation to the Legislature on or before December 31, 2006.

The bill would provide that information received pursuant to these provisions is confidential. An intentional violation of these confidentiality provisions would be a misdemeanor punishable by a fine not to exceed \$500.

By imposing additional duties on law enforcement agencies and by creating new crimes, the bill would impose a state-mandated local program.

(5) Existing law provides that a hearing may be conducted with the consent of the minor, where a minor is charged with a traffic or nontraffic offense.

This bill would exclude infraction violations from that provision and would provide that consent of the minor is not required prior to conducting a hearing upon written notice to appear in the case of an infraction violation. The bill would also authorize a minor to enter a plea at the arraignment upon a written notice to appear in the case of an infraction violation.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 831 (AB 1696) Committee on Human Services. Minors.

(1) Existing law requires a probation officer, upon delivery of a minor who has been taken into temporary custody, to immediately investigate the circumstances of the minor and the facts surrounding the minor being taken into custody and to immediately release the minor to the custody of his or her parent, legal guardian, or responsible relative unless evidence before the court demonstrates that continuance in the home is contrary to the minor's welfare, as specified.

This bill would require the probation officer, if he or she has reason to believe that the minor is at risk of entering foster care placement, to make reasonable efforts, as defined, to prevent or eliminate the need for removing the minor from the minor's home. Because this bill would impose additional duties on county probation officers, it would create a state-mandated local program.

(2) Where it appears that a minor has violated an order of the juvenile court, or escaped from a commitment of the juvenile court, or where it is a matter of immediate or urgent necessity to protect the minor or reasonably necessary to protect the person or property of another, existing law authorizes the court to order that the minor be detained in the juvenile hall or other suitable place for up to 15 days. If the first contact with the family has occurred in an emergency situation in which the family could not exercise effective care and control over the minor, even if reasonable services were provided, the court must make a finding that the lack of preplacement preventive efforts was reasonable.

This bill would revise the latter provision. The bill would require the probation officer to submit specified documentation to the court regarding whether reasonable efforts were made to prevent or eliminate the need to remove the minor from the home and whether continuance in the home is contrary to the minor's welfare. The bill would also require the court to make the determination whether continuance in the home is contrary to the minor's welfare and whether there are available services that would prevent the need for further detention of the minor. The bill would also make other changes. By imposing additional duties on probation officers, the bill would impose a state-mandated local program.

(3) Existing law requires the probation officer to prepare a specified case plan regarding a minor who has been removed from the home of his or her parent or legal guardian following a finding by the court that continuance in the home is contrary to the minor's welfare within a specified time period.

This bill would revise the contents of the case plan, as specified. The bill would revise the provisions governing the preparation and submission of the social study or case plan. By imposing additional duties on probation officers, the bill would create a state-mandated local program.

(4) Existing law provides for the filing of a petition to declare a minor a ward of the juvenile court and, under certain circumstances, for the removal of the minor from his or her home. Existing law authorizes the juvenile court to make any and all reasonable orders for the care, custody, conduct, maintenance, and support of minors who have been adjudged wards of the court. Existing law generally requires that reunification services be provided to a minor and his or her family when the minor is removed from the minor's home. Existing law also provides for periodic status review hearings and permanency planning hearings for wards of the court. Under certain conditions, parental rights may be terminated.

This bill would revise the circumstances under which reunification services need not be provided to a parent or legal guardian to specifically include circumstances where the court finds by clear and convincing evidence that the parent has been convicted of certain criminal acts, including the murder or voluntary manslaughter of another child of the parent. The bill would revise procedures for the conduct of status review hearings and permanency planning hearings for wards of the court. The bill would also require the clerk of the court to provide a copy of a specified notice to foster parents, legal guardians, or relatives providing care to the minor where the care, custody, and control of the minor is under the supervision of the probation officer for foster care placement.

The bill would require the probation department to follow procedures for the termination of parental rights where a minor has been declared a ward of the juvenile court and has been in foster care for 15 of the most recent 22 months, unless the probation department has documented in the file a compelling reason for determining that termination of parental rights would not be in the minor's best interest. The bill would also provide that when the court orders the care, custody, and control of a minor to be under the supervision of the probation officer for foster care, the decision regarding choice of placement shall be based upon selection of a safe setting that meets other specified criteria. The bill would revise and recast other, related provisions and make technical changes.

By imposing additional duties on probation officers, the bill would create a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 832 (SB 974) Torlakson. Public contracts: cities.

The Public Contract Code contains various definitions of a "public entity," all of which include a city as a public entity. Under the California Constitution, a city may, as an alternative to being entirely subject to the general law of the state, elect to operate pursuant to a charter that authorizes the enactment of ordinances and regulations superseding the general law of the state with respect to municipal affairs.

This bill would state that the Public Contract Code is the basis of contracts between most public entities and their contractors and subcontractors. This bill would further state, with

regard to charter cities, that this code applies in the absence of an express exemption or a city charter provision or ordinance that conflicts with that code.

The bill would state that these provisions are declaratory of existing law.

Ch. 833 (AB 196) Correa. Public employees: medical conditions.

The County Employees Retirement Law of 1937 provides that, for purposes of qualification for disability retirement benefits, the development of a blood-borne infectious disease by specified safety members, firefighters, and members in active law enforcement, as defined, shall be presumed to arise out of and in the course of employment if the member demonstrates that he or she was exposed to blood or blood products as a result of performance of job duties.

This bill would eliminate the requirement that the member demonstrate that exposure for purposes of that presumption.

Under existing law, a person injured in the course of employment is generally entitled to receive workers' compensation on account of that injury. Existing law provides that, in the case of certain state and local firefighting and law enforcement personnel, the term "injury" includes hernia, tuberculosis, and meningitis that develops or manifests itself during a period while the member is in the service of the governmental entity, and establishes a disputable presumption in this regard.

This bill would extend these provisions to members of the California Highway Patrol.

Existing law also defines "injury" in the case of specified state and local firefighting and law enforcement personnel and patrol members, to include hepatitis that develops or manifests itself during the period while the member is in the service of the governmental entity.

This bill would expand the scope of this provision to include any blood-borne infectious disease.

Ch. 834 (SB 424) Burton. Workers' compensation.

Under existing law, a person injured in the course of employment is generally entitled to receive workers' compensation on account of that injury. Existing law provides that, in the case of certain law enforcement personnel, the term "injury" includes various medical conditions that are developed or manifested during a period while the person is in that service, and establishes a disputable presumption in this regard.

This bill would provide that in the case of certain law enforcement personnel, the term "injury" also includes a lower back impairment that develops or manifests itself during a period while the person is in that service.

Ch. 835 (SB 1222) Romero. Workers' compensation.

Under existing law, a person injured in the course of employment is generally entitled to receive workers' compensation on account of that injury. Existing law provides that, in the case of certain law enforcement personnel, the term "injury" includes various medical conditions that are developed or manifested during a period while the person is in that service, and establishes a disputable presumption in this regard.

This bill would provide that in the case of certain peace officers of the Department of Corrections, the Department of the Youth Authority, and local agencies, the term "injury" includes heart trouble, pneumonia, tuberculosis, and meningitis that develops or manifests itself during a period while the person is in that service.

Ch. 836 (AB 43) Wesson. Public employment.

Existing law established a state civil service system and provides for a Commission on the Status of Women to enable women to make the maximum contribution to society.

This bill would require the commission to evaluate the compensation and classification plans for state civil service and related employees and the employees of the University of California, Hastings College of the Law, and the California State University and to determine

where compensation and classification inequities exist, based on comparability of the value of work. It would require the commission to report to the Legislature and the parties meeting and conferring under the Ralph C. Dills Act and the Higher Education Employer-Employee Relations Act, and would require the commission to hire staff or contract for services as required, pursuant to specified procedures.

This bill would specify that the commission would be an advisory commission only and that there would be no right or obligation to implement the findings of the commission without further legislation that specifically authorizes that the evaluations, determinations, and findings of the commission be implemented.

This bill would provide that specific provisions of the bill shall not be implemented unless or until funds are appropriated by the Legislature in the annual Budget Act or another statute.

Ch. 837 (AB 70) Wright. Firefighting equipment. ²¹

Existing law authorizes the Office of Emergency Services to acquire new or used firefighting apparatus and equipment for resale to local agencies and to provide other assistance to agencies for the acquisition of firefighting apparatus and equipment.

This bill would establish in the office the thermal imaging equipment purchasing program and require the office to acquire firefighting thermal imaging equipment on behalf of local and state agencies that provide fire suppression services and are interested in obtaining this equipment. The bill would authorize the director of the office to, among other things, purchase thermal imaging equipment at the lowest possible price from a reliable vendor that meets specified requirements. The bill would require any participating local agency to pay $\frac{1}{2}$ of the price of equipment purchased on its behalf by the state.

This bill would appropriate \$50,000 from the General Fund to the office for the thermal imaging equipment purchasing program. It would require the director to seek funding from the private sector, grant programs, and other appropriate sources.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 838 (AB 98) Zettel. Controlled substances.

(1) Existing law makes it a crime to possess for sale or to sell materials, compounds, mixtures, or preparations containing certain controlled substances, as specified, punishable by imprisonment in a county jail for a period of not more than one year or in the state prison.

This bill would, in addition, make it an infraction or a misdemeanor to possess the substances specified in that provision, except upon the prescription of a physician, a dentist, or others. The bill would make a conforming change to a related provision. By creating new crimes, this bill would impose a state-mandated local program upon local governments.

(2) This bill would incorporate additional changes in Section 11377 of the Health and Safety Code proposed by AB 258, that would become operative only if AB 258 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 839 (AB 128) Goldberg. Education: public school employees.

Under existing law, the governing board of a school district and the governing board of a community college district are required to prescribe written rules and regulations governing the personnel management of the classified service. Existing law requires that any employee designated as a permanent employee be subject to disciplinary action only for cause as prescribed by rule or regulation of the governing board, but the governing board's determination of the sufficiency of the cause for disciplinary action is required to be conclusive.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that nothing in those provisions shall be construed to prohibit the governing board, pursuant to the terms of an agreement with an employee organization, under specified provisions, from delegating its authority to determine whether sufficient cause exists for disciplinary action against classified employees, excluding peace officers, as defined, to an impartial 3rd-party hearing officer, and would provide that the governing board retains authority to review the determination under the standards set forth in specified provisions.

This bill would incorporate additional changes in Sections 45113 and 88013 of the Education Code proposed by AB 365, that would become operative only if AB 365 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 840 (AB 135) Havice. State teachers' retirement: purchase power protection.

Under the Teachers' Retirement Law, quarterly supplemental payments are made to retired members, disabled members, and beneficiaries from specified accounts to restore up to 75% of the purchasing power of the initial monthly allowances provided under the Defined Benefit Program, as specified.

This bill would provide that those supplemental payments shall be made to restore up to 80% of the purchasing power of those allowances.

Ch. 841 (AB 258) La Suer. Controlled substances.

(1) Existing law categorizes controlled substances into 5 schedules and places the greatest restrictions and penalties on those contained in Schedule I including prohibiting the prescribing of any Schedule I controlled substance. Existing law places the controlled substance gamma-hydroxybutyrate or gamma-hydroxybutyric acid (GHB) into Schedule II.

Existing law also makes it a misdemeanor for any manufacturer, wholesaler, retailer, or other person in this state who sells, transfers, or otherwise furnishes any one of specified substances to any person or business entity to fail to submit specified reports to the Department of Justice regarding all those transactions or to sell or furnish those substances to a minor.

This bill would delete GHB from Schedule II, and instead, classify GHB as a Schedule I controlled substance, unless the GHB is contained in a drug product approved pursuant to federal law, as specified, in which case the substance would be classified as a Schedule III controlled substance. The bill would make conforming changes to related provisions. The bill would revise the provision described above requiring a manufacturer, wholesaler, retailer, or other person to make a report to the Department of Justice to include additional specified substances. By expanding the scope of substances to which existing crimes apply, this bill would create new crimes and impose a state-mandated local program.

(2) This bill would incorporate additional changes in Section 11377 of the Health and Safety Code proposed by AB 98, that would become operative only if AB 98 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 842 (AB 313) Goldberg. Women, infants, and children's nutrition.

Existing law, the California Special Supplemental Food Program for Women, Infants, and Children, under the administration of the State Department of Health Services, provides for the issuance of nutrition coupons, as defined, to certain recipients with nutritional need, as determined by a physician or health professional.

This bill would, commencing July 1, 2002, provide, until January 1, 2005, that the nutrition coupons issued under the program shall be redeemable by recipients at any authorized retail food vendor, and would require the department to submit a report to the appropriate committees of the Legislature regarding the implementation of the above provisions.

Under existing law, the department is required to include specified information on the nutrition coupons. The bill would require, to the extent feasible, that the specified information provided by the department on the nutrition coupons shall be provided in a form that may be read by optical scanning technology readily available to vendors. This bill would also require the department to report to the Legislature, no later than March 15, 2002, on the feasibility and costs of providing the information in this form. The bill would further require that the specified information shall be provided only to the extent that funds for that purpose are appropriated in the annual Budget Act or another statute.

Existing law authorizes the department to design, implement, and fund an electronic benefits transfer (EBT) system for the California Special Supplemental Food Program for Women, Infants, and Children.

This bill would require the department to develop a plan to determine the feasibility of implementing the EBT system by January 1, 2003, and to report its findings to the Legislature by July 1, 2003.

Ch. 843 (AB 349) La Suer. Sex offenders: registration update.

Existing law requires certain persons, including any person convicted of any specified sexual offense, for the rest of his or her life while residing or located within California, to register with specified law enforcement officials within 5 working days of coming into, or changing his or her residence or location within, any city, county, or city and county, or campus, and annually thereafter within 5 working days of his or her birthday.

Existing law additionally requires the person, at the time of the subsequent annual registration, to update his or her registration with those entities, including verifying his or her name and address and place of employment on a form as may be required by the Department of Justice.

This bill would revise this registration update provision to require the person to provide current information as required on the Department of Justice annual update form including information to parallel the requirement already established for preregistration that additionally includes the fingerprints and a current photograph of the person and the license plate of any vehicle owned by, regularly driven by, or registered in the name of, the person. The bill would make related changes.

The bill would incorporate additional changes to Section 290 of the Penal Code made by AB 4 and AB 1004 to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 844 (AB 365) Nation. School employees: classified service.

Existing law, which is applicable to school districts and community college districts that have not adopted the merit system, requires the governing board of each school district and community college district to prescribe written rules governing the personnel management of the classified service, whereby those employees are designated as permanent employees of the district after serving a prescribed probationary period not to exceed one year.

This bill would require a permanent employee who accepts a promotion and fails to complete the probationary period for the promotional position, to be employed in the classification from which he or she was promoted.

This bill would incorporate additional changes in Sections 45113 and 88013 of the Education Code proposed by AB 128, that would become operative only if AB 128 and this bill are both chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 845 (AB 530) Reyes. Crime prevention.

Existing law authorizes specified counties to develop Rural Crime Prevention Programs to address the problems of agricultural and rural crime. Under existing law, this authorization will expire on January 1, 2002.

This bill would provide that authorization for the Rural Crime Prevention Programs shall not expire until July 1, 2002.

Existing law requires the Department of Justice to secure any criminal record to determine whether the person has been convicted or incarcerated within the last 10 years for a sex offense against a minor or for a violation of other specified crimes, including any felony, if an employer of the person requests the determination and submits fingerprints of the person to the department and the person is unlicensed and provides nonmedical domestic or personal care to an aged or disabled adult in the adult's own home.

This bill would also require the department to provide a subsequent arrest notification, as specified.

Ch. 846 (AB 663) Vargas. Workers' compensation: lifeguards.

Existing law provides that an injury of an employee arising out of and in the course of employment is generally compensable through the workers' compensation system. Existing law provides that, in the case of certain law enforcement officers and firefighters, the term "injury" includes heart trouble, hernia, pneumonia, and other injuries and diseases.

This bill would provide, with respect to active lifeguards employed, for more than 3 consecutive months in a calendar year, by certain local agencies and the Department of Parks and Recreation, that the term "injury" includes skin cancer that develops or manifests itself during the period of the lifeguard's employment.

This bill would further create a rebuttable presumption that the above injury arises out of and in the course of the lifeguard's employment if it develops or manifests during the period of the employment.

Ch. 847 (AB 674) Dutra. Contracts.

Existing law, the Contractors' State License Law, prohibits a licensed contractor from inserting a provision in a contract that shields the contractor from liability when that provision has been determined to be void or unenforceable.

This bill would provide that a temporary employment agency, employment referral service, labor contractor, or other similar entity supplying an employee to a licensed contractor would not be required to secure the payment of compensation for any employee for whom the contractor is required to secure the payment of compensation. The bill would provide that this provision would be operative only if AB 1679 is enacted.

Existing law prescribes bidding procedures for any improvement or unit of work not performed by the personnel of the Santa Clara Valley Water District if the district estimates the work to cost over \$25,000.

This bill would authorize the district, upon approval of the board of directors, to use prescribed bidding procedures for building construction contracts.

Ch. 848 (AB 762) Papan. Horse racing.

Existing law provides that if a track specified in a license becomes unsuitable for racing, the board may specify another track in the same area for the conduct of the licensee's horse racing meeting.

This bill would permit the California Horse Racing Board to issue a license to the San Mateo County Fair allowing it to conduct its horse racing meetings at another location, either within or outside the county, when its present site, Bay Meadows, closes. This bill would also provide that the provisions presently applicable to the San Mateo County Fair's conduct of live horse racing meetings shall apply to its conduct of races at any other location, within or outside of San Mateo County.

Ch. 849 (AB 1078) Jackson. Driving under the influence.

(1) Existing law makes it a public offense, punishable as either a misdemeanor or felony, if a person is convicted of specified driving under the influence offenses (DUI) that occur within 10 years of, among other offenses, gross vehicular manslaughter while intoxicated or felony vehicular manslaughter.

This bill would recast this provision as to the specific prior offenses described above to delete the 10-year restriction. Because this would expand the scope of an existing crime, this bill would impose a state-mandated local program.

The bill would make conforming, technical changes in existing law.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 850 (AB 1245) Alquist. Community colleges: temporary and part-time faculty.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges, and authorizes the provision of instruction by community college districts throughout the state. Existing law requires that a person employed to teach adult or community college classes for not more than 60% of the hours per week of a full-time employee having comparable duties, excluding substitute service, be classified as a temporary employee and not become a contract employee.

This bill would require the issue of earning and retaining annual reappointment rights by any person employed as temporary or part-time faculty to be a mandatory subject of negotiation with respect to the collective bargaining process relating to any new or successor contract between community college districts and temporary or part-time faculty occurring on or after January 1, 2002.

Ch. 851 (AB 1337) Cohn. Health benefits trusts: recovery of medical costs.

Existing law establishes lien rights and procedures for the recovery by health care service plans and disability insurers of medical costs paid on behalf of an enrollee or insured for injuries caused by a 3rd party when the enrollee or insured obtains a settlement, award, or judgment against the 3rd party.

This bill would establish lien rights and procedures for the recovery by specified health benefits trusts of medical costs paid on behalf of participants, as defined, for injuries caused by a 3rd party when the participant obtains a settlement, award, or judgment against the 3rd party, as specified.

Ch. 852 (AB 1549) Wiggins. Court facilities.

Existing law requires the board of supervisors of each county, during the period from July 1, 1997, to June 30, 2001, to be responsible for providing suitable and necessary facilities for judicial officers and court support staff for judicial positions created prior to July 1, 1996.

This bill would revise this requirement by extending that period of responsibility for providing suitable and necessary facilities to December 31, 2002.

Existing law requires the state, unless a court and a county otherwise mutually agree, to assume responsibility for suitable and necessary facilities for judicial officers and support staff for any judgeships authorized during the period from January 1, 1998, to June 30, 2001.

This bill would require the state, unless a court and a county otherwise mutually agree, to assume responsibility for suitable and necessary facilities for judicial officers and support staff for any judgeships authorized during the period from January 1, 1998, to December 31, 2002.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 853 (AB 1614) Washington. Crime prevention: drug endangered children.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law establishes in the Office of Criminal Justice Planning (OCJP) a program of financial and technical assistance for district attorneys' offices, designated the California Major Narcotic Vendors Prosecution Law. Existing provisions of that law make various legislative findings and statements of legislative intent regarding the need to support efforts to prosecute drug producers and sellers through proven organizational and operational techniques.

This bill would establish until July 1, 2006, in OCJP, a program of financial and technical assistance for counties to provide district attorneys or county sheriffs with funds to coordinate multiagency drug endangered child response teams in cooperation with local, state, and federal law enforcement agencies, and county departments of health and children services, for the purpose of responding promptly to cases involving drug endangered children. The Executive Director of OCJP would be required to make an annual report to the Legislature on the fiscal and operational status of the program, with evaluations of specified criteria. The bill would provide that available funds may be used to support Drug Endangered Children Programs, on a competitive grant basis, considering specified factors, in 7 specified counties and, if there are remaining funds, in up to an additional 5 counties for the purpose of implementing this bill. The bill would provide that one representative of each local agency involved in implementing a county's Drug Endangered Children Program shall form an executive committee, the function of which is to distribute the grant funds awarded the county under the bill in a fair and equitable manner and for the purposes of implementing the bill.

Ch. 854 (SB 205) McPherson. Crime.

Existing law contains numerous provisions pertaining to crime and the implementation of the criminal laws of this state.

This bill would make numerous, nonsubstantive changes to clarify and update these provisions.

The bill would also make various technical revisions.

This bill would amend an initiative statute that provides its provisions may be amended by the Legislature by a $2/3$ vote of the membership of each house, and therefore requires a $2/3$ vote.

This bill would incorporate additional changes to Section 3000 of the Penal Code proposed by AB 1004, contingent upon the prior enactment of that bill.

This bill would incorporate additional changes in Section 19705 of the Revenue and Taxation Code, proposed by SB 1185, to be operative only if SB 1185 and this bill are both chaptered and become effective January 1, 2002.

Ch. 855 (SB 255) Speier. Crimes: unattended children in vehicles.

(1) Existing law makes it a crime for any person, under circumstances or conditions likely to produce great bodily harm or death, to willfully cause or permit any child to suffer, or inflict thereon unjustifiable physical pain or mental suffering, or having the care or custody of any child, willfully cause or permit the person or health of that child to be injured, or willfully cause or permit that child to be placed in a situation where his or her person or health is endangered. This crime is required to be punished by imprisonment in a county jail not exceeding one year, or in the state prison for 2, 4, or 6 years.

This bill would additionally make it an infraction, punishable by a fine of \$100, for the parent, legal guardian, or other person responsible for a child who is 6 years of age or younger to leave that child inside a motor vehicle, without being subject to the supervision of a person who is 12 years of age or older, and where there are conditions that present a significant risk to the child's health or safety, or when the vehicle's engine is running or the vehicle's keys are in the ignition, or both. This bill would authorize the court to reduce or waive the fine if the defendant is economically disadvantaged and attends a community education program.

This bill would provide that the infraction provision and a related infraction provision do not apply if an unattended child is injured or medical services are rendered.

The bill thereby would impose a state-mandated local program by creating a new crime.

The bill would require that 70% of the revenue collected from fines imposed under these provisions be allocated by the county treasurer to the county or city health department where the violation occurred, to be used for the development and implementation of community education programs on the dangers of leaving young children unattended in motor vehicles; 15% be allocated to the county or city for the administration of the program from which will be paid the cost of the county to account for and disburse fine revenues ; and 15% be allocated to the city, to be deposited in its general fund except that, if the violation occurred in an unincorporated area, this amount would be deposited in the county's general fund. The bill would authorize county and city health departments to develop and implement the community education program or to contract for the development and implementation of that program. The bill would require each county and city health department to prepare and annually update a listing of community education programs that provide information on the dangers of leaving young children unattended in motor vehicles and ways to avoid this danger and would provide for the forwarding, availability, and distribution of the listing. Because the requirements described in this paragraph would increase the level of services required by county treasurers and city and county health departments, the bill would thereby impose a state-mandated local program.

The bill would require the department to include information concerning the dangers of leaving children unattended in motor vehicles, including the effect of solar heat on the temperature of vehicle interiors and the penalties for noncompliance with the provisions specified above, in specified materials distributed by the department.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 856 (SB 486) Speier. Public safety: working warehouses.

Existing law prescribes safety standards for various industries.

This bill would require an owner, manager, or operator of a working warehouse, as defined, to secure merchandise stored on shelves higher than 12 feet above the sales floor, as defined, by installing safety devices such as rails, fencing, netting, security doors, gates, cables, or binding materials. The bill would require that a safety zone that blocks customers from entering areas where merchandise could fall be temporarily established when heavy machinery is used to remove items from a shelf. The bill would require all working warehouses to comply with these provisions by no later than July 1, 2002.

Under the bill, an owner, manager, or operator of a working warehouse who employs more than 50 employees would be required, within 30 days of December 31, 2002, and within 30 days of December 31, 2003, to submit to the Division of Occupational Safety and Health a report of all known injuries requiring hospitalization, including emergency room medical treatment, or deaths occurring to customers as a result of falling merchandise. The bill would permit a corporation owning, managing, or operating more than one working warehouse to submit a single report on behalf of all of the corporation's working warehouses each year, provided that the location of the warehouse where each reportable incident occurred is included in the report.

Ch. 857 (SB 776) Torlakson. DUI offenses: fines.

Under existing law, a person who is convicted of a driving while under the influence offense is required to be punished by terms of imprisonment, fines, and other sanctions, including required attendance in a licensed driving-under-the-influence program. Existing law requires the Department of Motor Vehicles to undertake various functions with regard to administering driver's licenses, including certain functions concerning the imposition of sanctions involving driving-under-the-influence offenders.

This bill would require the department to review the effectiveness of programs, procedures, sanctions, fines, and fees provided for in current law relating to the offense of driving under the influence of alcohol or drugs and to report those findings to the Legislature on or before July 1, 2002.

Ch. 858 (SB 799) Karnette. Battered women's syndrome: writ of habeas corpus.

Existing law specifies circumstances under which a writ of habeas corpus may be prosecuted to inquire into the cause of a person's imprisonment.

This bill would include within those circumstances the fact that evidence relating to battered women's syndrome, based on abuse committed on the perpetrator of a homicide by the victim of the homicide, was not introduced at trial, and, had it been introduced, there is a reasonable probability that the result of the proceedings would have been different. The bill would specify that provisions authorizing a court to take certain actions, including ordering a new trial or reversing a conviction, would apply to these provisions. This bill would also provide that it is grounds for denial of a petition if a petitioner filed a petition prior to the effective date of these provisions and a court determined on the merits that the omission of evidence relating to battered woman's syndrome at trial was not prejudicial and did not entitle the petitioner to habeas relief. The bill would also specify that its provisions are limited to murder convictions resulting from pleas entered, or trials commenced, before January 1, 1992, and would be repealed as of January 1, 2005.

Ch. 859 (SB 826) Margett. Peace officers: Dental Board of California.

(1) Existing law, the Dental Practice Act, provides for, among other matters, the regulation of dentists and of dental auxiliaries by the Dental Board of California within the Department of Consumer Affairs, and authorizes the director of that department, for a period extending to July 1, 2002, to designate as peace officers an additional 7 persons who shall at the time of their designation, be assigned to the investigations unit of the board. All fines, penalties, and forfeitures collected pursuant to the enforcement of the Dental Practice Act are deposited into the State Dentistry Fund.

This bill would extend to January 1, 2004, the director's authority to designate these additional peace officers for assignment to the board, and would require the board to contract with an entity to perform a followup study of an initial study it made, examining the board's needs for sworn peace officers in its investigations unit. The bill would require that the contract provide the entity at least 3 months to conduct the followup study, and that the study be completed and submitted to the Legislature by August 1, 2002. The bill would appropriate the sum of \$75,000 from the State Dentistry Fund to the board for the followup study.

(2) Existing law pertaining to the state civil service system provides for the appointment of an employee on a limited term basis and generally limits the term of this appointment to a period of one year.

This bill would extend the limited term appointment of limited term peace officers at the Dental Board of California to January 1, 2004. The bill would provide that its provisions remain in effect only until January 1, 2004, and as of that date are repealed unless a later enacted statute enacted before January 1, 2004, deletes or extends that date.

Ch. 860 (SB 1059) Perata. Mentally ill offenders: Council on Mentally Ill Offenders.²²

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law establishes a program of mentally ill offender crime reduction grants provided to counties to expand or establish a plan to reduce crime and criminal justice costs related to mentally ill offenders, administered and evaluated by the Board of Corrections in consultation with the State Department of Mental Health and the State Department of Alcohol and Drug Programs.

This bill would establish the Council on Mentally Ill Offenders, as specified, to investigate and promote cost-effective approaches to meeting the long-term needs of adults and juveniles with mental disorders who are likely to become offenders or have a history of offending. This bill would also provide that its provisions would be repealed as of January 1, 2007. The council would be required to report annually to the Governor and Legislature regarding its activities during the preceding year.

The bill would appropriate \$100,000 from the General Fund to the Youth and Adult Correctional Agency for purposes of this act, as specified.

Ch. 861 (AB 414) Dutra. Hazardous waste disposal: lead: nickel: copper.

(1) Existing law prohibits, until July 1, 2003, any person from disposing of waste that contains specified concentrations of lead, copper, or nickel to land, except as specified, until the appropriate California regional water quality control board amends the solid waste facility's waste discharge requirements and the appropriate local enforcement agency revises the solid waste facility's permit.

Existing law also prohibits, until July 1, 2003, any person from disposing hazardous waste to land in any facility that is not a class I hazardous waste disposal facility, until the Department of Toxic Substances Control issues a variance, the appropriate California regional water quality control board amends the solid waste facility's waste discharge requirements, and the appropriate local enforcement agency revises the solid waste facility's permit. Existing law excludes, from that land disposal prohibition, wastes disposed pursuant to a variance issued before August 21, 1998, or pursuant to a variance for the disposal of special waste. A violation of the hazardous waste control laws is a crime.

This bill would extend the date of the repeal of these prohibitions until July 1, 2006, thereby imposing a state-mandated local program by extending the operation of a crime.

The bill would additionally exempt the wastes that are excluded under existing law from the hazardous waste land disposal prohibition, from the prohibition on the disposal of wastes containing specified concentrations of lead, copper, or nickel. The bill would also exempt, from both of these prohibitions, wastes disposed of pursuant to a variance issued by the department to a state or local agency for the disposal of lead-contaminated soils, if the disposal is only within the operating right-of-way of an existing highway. The bill would specify that this exemption applies to lead-contaminated soil that is moved from one project to another, only if the lead-contaminated soil is managed, as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 862 (AB 621) Corbett. Public utilities: electricity: interruptible service contracts.

(1) Existing law requires the creation and operation of an Independent System Operator to ensure efficient use and reliable operation of the state's electricity transmission grid consistent with achievement of specified planning and operating reserve criteria.

This bill would require the Independent System Operator to notify each local air pollution control district and air quality management district of the name and address of each entity within the district's boundaries within the Independent System Operator's control area with whom it enters into an interruptible service contract or similar arrangement, as defined.

Because a violation of this requirement would be a crime under other provisions of existing law, the bill would impose a state-mandated local program by creating new crimes.

The bill would require the local air pollution control district or air quality management district to maintain in a confidential manner the information received by the Independent System Operator pursuant to these provisions.

(2) Existing law authorizes the Public Utilities Commission to approve contracts between an electrical corporation and its heavy industrial customers as determined by the electrical corporation, of not more than 10 years' duration, in which the electrical corporation buys from the heavy industrial customer the right to interrupt the customer's service on short notice, as determined by the commission.

This bill would require an electrical corporation to notify each local air pollution control district and air quality management district of the name and address of each entity within the district's boundaries within the electrical corporation's control or service area with whom it enters into an interruptible service contract or similar arrangement, as defined.

Because a violation of this requirement would be a crime under other provisions of existing law, the bill would impose a state-mandated local program by creating new crimes.

The bill would require the local air pollution control district or air quality management district to maintain in a confidential manner the information received by an electrical corporation pursuant to these provisions.

(3) Existing law provides for formation of local publicly owned electric utilities.

This bill would require a local publicly owned electric utility to notify each local air pollution control district and air quality management district of the name and address of each entity within the district's boundaries within the local publicly owned electric utility's control or service area with whom it enters into an interruptible service contract or similar arrangement, as defined.

The bill would require the local air pollution control district or air quality management district to maintain in a confidential manner the information received by a local publicly owned electric utility pursuant to these provisions.

Because the bill would require local publicly owned electric utilities to undertake certain activities in this regard the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 863 (AB 910) Wayne. Wildlife conservation easements.

Existing law establishes the Wildlife and Natural Areas Conservation Act to provide the financial means to correct wildlife habitat deficiencies through a program of acquisition, enhancement, restoration, and protection of areas that are most in need of proper conservation.

This bill would prohibit a governmental entity from condemning any wildlife conservation easement acquired by a state agency unless it complies with specified condemnation procedures.

Ch. 864 (AB 965) Mountjoy. Highways: victim signs.

Existing law restricts the placement and maintenance of signs along the highways.

This bill would require, until January 1, 2007, that the Department of Transportation design, place, and maintain, or cause to be designed, constructed, placed, and maintained, along state highways, signs that read as follows: "Please Don't Drink and Drive" followed by: "In Memory of (victim's name)." These signs would be required to be placed, subject to placement guidelines of the department, upon the state highways in close proximity to the location where a vehicular accident occurred if a party to that accident was convicted of operating a vehicle in violation of certain provisions prohibiting the driving of a motor

vehicle while under the influence of alcohol or drugs, at the time of the accident, or if the party was driving in violation of those provisions, but was not prosecuted for specified reasons.

The bill would provide that, upon the request of an immediate family member, as defined, of the deceased victim of an accident occurring on and after January 1, 1991, and described above, or upon the request of a party who has obtained the written consent of an immediate family member, the department shall place the sign and charge the requesting party a fee to cover the department's costs in designing, constructing, placing, and maintaining that sign and the department's administrative costs in implementing these provisions. The bill would prohibit the department from placing a sign if a member of the immediate family objects.

The bill would require the department to evaluate the program and report its findings and recommendations to the Legislature by January 1, 2006.

Ch. 865 (AB 972) Calderon. School facilities: preliminary endangerment assessment: Phase I environmental assessment.

(1) Existing law requires a school district, in implementing provisions of law concerning the selection of schoolsites, to provide a notice to residents in the immediate area, approved in form by the Department of Toxic Substances Control, prior to the commencement of work on a preliminary endangerment assessment.

This bill would instead require a school district to provide this notice utilizing a format developed by the Department of Toxic Substances Control.

(2) Existing law requires the governing board of a school district, as a condition of receiving state funding under the Leroy F. Greene School Facilities Act (Greene Act) of 1998, to conduct a Phase I environmental assessment of a proposed schoolsite before acquiring the site. A school district is required to submit a Phase I environmental assessment to the State Department of Education, if that assessment concludes that further investigation of the site is not required.

This bill would require the school district to additionally submit proof of the environmental assessor's qualifications to the state department, thereby imposing a state-mandated local program by imposing new duties upon school districts with regard to the submission of a Phase I environmental assessment.

The bill would exempt a schoolsite acquisition project or a school construction program from the changes made by this bill if the final preliminary endangerment assessment for the schoolsite acquisition or construction project is approved by the Department of Toxic Substances Control, or a public hearing for the project is completed, pursuant to the law in effect on that date of the approval or hearing, and if the hearing or approval took place on or before the effective date of the bill.

(3) Existing law requires the Department of Toxic Substances Control to complete its review within 60 calendar days of receipt of a preliminary endangerment assessment from a school district and to return the preliminary draft to the school district with comments and request modifications, request further assessment, or approve the preliminary endangerment assessment as a final draft preliminary endangerment assessment. Existing law specifies procedures for the public review and approval of the final draft preliminary endangerment assessment and requires the school district to reconsider the adequacy of its approved environmental impact report or negative declaration in light of the approved final draft of the preliminary endangerment assessment, if the district has complied with the California Environmental Quality Act prior to initiating the preliminary endangerment assessment.

This bill would repeal those provisions regarding the review of the final draft preliminary endangerment assessment by the department and the reconsideration of the adequacy of the environmental impact report or negative declaration. The bill would instead require a school district, at the same time the school district submits a preliminary endangerment assessment to the Department of Toxic Substances Control, to publish a notice of submission in a local newspaper of general circulation, to post the notice at the proposed schoolsite, and to choose one of 2 specified procedures for making the preliminary endangerment assessment

available to the Department of Toxic Substances Control and the public for review and comment.

The bill would impose a state-mandated local program by imposing new duties upon school districts with regard to the review of a preliminary endangerment assessment.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 866 (AB 1329) Lowenthal. Hazardous waste testing laboratories: recyclable materials.

(1) Under existing law, the analysis of any material required by the hazardous waste control laws is to be performed by a laboratory certified by the State Department of Health Services pursuant to the provisions regulating environmental laboratories. Until January 1, 2001, analyses performed by a laboratory pursuant to the facility's waste analysis plan that were prepared in accordance with specified regulations were exempt from those requirements, if the laboratory met specified conditions.

This bill would reenact that exemption for those analyses performed by a laboratory pursuant to the facility's waste analysis plan.

(2) Under existing law, recyclable materials are subject to the requirements of the hazardous waste control laws, but specified recyclable materials are excluded from classification as a waste if they meet certain requirements, including if the recyclable material is used or reused as an ingredient in an industrial product or as a safe and effective substitute for a commercial product and is subject to specified treatment procedures.

Existing law provides that certain units, including associated piping, that are part of a system used for the recovery of oil from oil-bearing materials, and the associated storage of oil-bearing materials and the recovered oil, are exempt from the hazardous waste control laws if specified conditions are met, notwithstanding certain requirements concerning recyclable materials. A violation of any requirement of the hazardous waste control law is a crime.

This bill would additionally require that a recyclable material that is used or reused as an ingredient to make a product or a substitute for a commercial product not be a wastewater containing more than 75 parts per million of total petroleum hydrocarbons that is transported offsite to a specified facility. Because a violation of this requirement would be a crime, the bill would impose a state-mandated local program.

The bill would make conforming changes to the provisions exempting systems for recovering oil for oil-bearing materials.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 867 (AB 1532) Pavley. Environmental quality.

(1) The existing California Environmental Quality Act (CEQA) requires that transportation information resulting from the reporting or monitoring program required to be adopted by a public agency pursuant to a specified provision of CEQA be submitted to the transportation planning agency in the region where the project is located and to the Department of Transportation when the project has impacts that are of statewide, regional, or areawide significance according to specified criteria.

This bill would require that the transportation information be submitted to the transportation planning agency in the region where the project is located and to the Department of Transportation for a project of statewide, regional, or areawide significance according to specified criteria.

(2) CEQA further requires that a lead agency call at least one scoping meeting for a proposed project that may affect highways or other facilities under the jurisdiction of the Department of Transportation if the meeting is requested by the department. CEQA authorizes a lead agency to charge and collect a reasonable fee from any person proposing a project to recover the estimated costs incurred by the lead agency in preparing a negative declaration or environmental impact report and for procedures necessary to comply with CEQA for the project. Existing law requires specified notices to be mailed to any person who has filed a written request for notices with either the clerk of the governing body or, if there is no governing body, the director of the agency.

This bill would additionally require a lead agency to call at least one scoping meeting for a project of statewide, regional, or areawide significance and would require the lead agency to provide notice of the scoping meeting to specified entities, thereby imposing a state-mandated local program.

The bill would require a lead agency to mail the notice of the scoping meeting to a person who has filed a written request for notices with specified entities.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 868 (AB 1621) Cardenas. Vehicles: registration.

Under existing law and except as otherwise provided in the Vehicle Code, every vehicle registration and registration card expires at midnight on the expiration date designated by the Director of Motor Vehicles and is required to be renewed prior to the expiration of the registration year.

This bill would provide that vehicles registered pursuant to the International Registration Plan and vehicles registered under the Partial Year Registration Program expires at midnight of December 31 of the registration year. The bill would provide that for the purposes of applying any future reductions or increases in the vehicle license fee, the vehicle registrations subject to these provisions are deemed to have a final expiration date in the succeeding calendar year.

Ch. 869 (AB 1664) Pavley. Water quality.

(1) The Porter-Cologne Water Quality Control Act (Water Quality Act) requires each person for whom waste discharge requirements have been prescribed by a California regional water quality control board, to submit a report and an annual fee, according to a fee schedule established by the State Water Resources Control Board, as specified. The act provides that any person who fails to furnish the report or pay the fee is guilty of a misdemeanor and the regional boards may administratively impose civil liability.

This bill would give the state board the same authority to impose administrative civil liability as the regional boards, as prescribed.

(2) The Water Quality Act requires the Attorney General, at the request of a regional board, to petition the superior court for the issuance of a temporary restraining order, temporary injunction, or permanent injunction, or combination thereof, as may be appropriate, in order to require any person to furnish the report or pay the annual fee in compliance with the above provisions.

This bill would give the state board the same authority to request the Attorney General to petition the superior court for the issuance of a temporary restraining order, temporary

injunction, or permanent injunction, to require any person to furnish the report or pay the annual fee in compliance with the above provisions.

(3) The Water Quality Act authorizes the regional boards, in establishing or reviewing any water quality control plan or waste discharge requirement, to investigate the quality of any waters of the state within its region, as prescribed. In conducting the investigation, the regional boards may require any person who has discharged, discharges, or is suspected of discharging, or who proposes to discharge waste within its region, or any citizen or domiciliary, or political agency or entity of this state who has discharged, discharges, or is suspected of discharging, or who proposes to discharge, waste outside of its region that could affect the quality of waters within its region, to furnish technical or monitoring program reports. The burden, including costs, of these reports must bear a reasonable relationship to the need for the report and the benefits to be obtained from the reports.

This bill would expand the authority of the regional boards to authorize those boards to require any person who is suspected of having discharged waste within its region, or any citizen or domiciliary, or political agency or entity of this state who is suspected of having discharged waste outside of its region that could affect the quality of waters within its region, to furnish technical or monitoring program reports. The bill would require the regional board to provide the person with a written explanation on the need for the reports and the identification of the evidence that supports requiring the person to provide the reports.

(4) The Water Quality Act requires the state board, in determining the amount of civil liability to be imposed upon a violator of the above provisions, to take into consideration specified factors, including the economic savings to the violator.

This bill would require the state board to take into consideration the economic benefit or savings, if any, realized as a result of the violation.

(5) Pursuant to the Water Quality Act, a person who intentionally or negligently violates any cease and desist order or cleanup and abatement order issued pursuant to the above provisions, or intentionally or negligently discharges waste, or causes or permits waste to be deposited in violation of any waste discharge requirement issued pursuant to the above provisions, or causes or permits any oil or any residuary product of petroleum to be deposited in or on any waters of the state, except in accordance with waste discharge requirements, may be held civilly liable by a regional board and a superior court. When there is a discharge, and a cleanup and abatement order is issued, the act authorizes the regional board to impose liability in an amount not to exceed \$5,000, but not less than \$500, for each day the discharge occurs and for each day the cleanup and abatement order is violated. The act authorizes the superior court to impose liability in an amount not to exceed \$15,000 for each day the discharge occurs and for each day the cleanup and abatement order is violated. When there is a discharge, and a cleanup and abatement order is not issued, the act authorizes the regional board to impose liability in an amount not to exceed \$10 for each gallon of waste discharged. The act authorizes the superior court to impose liability in an amount not to exceed \$20 for each gallon of waste discharge. When there is no discharge, but an order issued by the regional board is violated, the regional board may impose liability in an amount not to exceed \$1,000, but not less than \$100, for each day the violation occurs. The act authorizes the superior court to impose liability in an amount not to exceed \$10,000 for each day the violation occurs.

This bill would delete those provisions regarding the amount of liability that may be imposed by the regional boards or the superior court. The bill would authorize the regional boards, the state board, and the court to impose civil liability on a daily basis or on a per gallon basis, as specified.

(6) The Water Quality Act requires a superior court, in determining the amount of civil liability to be imposed upon a violator of the above provisions, to take into consideration specified factors.

This bill would require the superior court to also take into consideration the degree of toxicity of the discharge and the economic benefit or savings, if any, realized as a result of

the violation. By imposing new duties upon the superior court, this bill would impose a state-mandated local program.

(7) The Water Quality Act prescribes certain civil penalties for violations of specified waste discharge requirements set forth in that act or the federal Clean Water Act. In determining the amount of liability to be imposed for violations of those acts, the regional boards, the state board, and the superior court, are required to take into consideration specified factors.

This bill would require the regional boards, the state board, and the superior court to also take into consideration whether the discharge is susceptible of cleanup or abatement, the degree of toxicity of the discharge, the effect on the violator's ability to continue its business, and any voluntary cleanup efforts undertaken by the violator. By imposing new duties on the superior court, this bill would impose a state-mandated local program.

(8) The Water Quality Act prescribes certain criminal penalties for knowing or negligent violations of specified waste discharge requirements set forth in that act or the federal Clean Water Act, including imprisonment.

This bill would specify that the authorized imprisonment be in the state prison.

(9) The Water Quality Act authorizes the state board to order moneys to be paid to a regional board, upon application, to assist the regional board in responding to a significant unforeseen water pollution problem, posing an actual or potential public health threat, for which the regional board does not have adequate resources budgeted.

This bill would also authorize the state board to order moneys paid to the regional board, upon application, for costs relating to the oversight and tracking of the implementation of the supplemental environmental project required as a condition of an order imposing administrative civil liability.

(10) The Water Quality Act requires any supervisor and operator of a wastewater treatment plant to possess a certificate of appropriate grade in accordance with regulations adopted by the state board. The act imposes certain criminal penalties on any person who operates a wastewater treatment plant who does not hold a valid, unexpired certificate of the appropriate grade. The act requires any person or entity that contracts with the owner of a wastewater treatment plant to operate that plant to register with the state board. The act imposes certain criminal penalties on any person or entity that owns or operates a wastewater treatment plant that employs any person to operate the plant who does not hold a valid, unexpired certificate of the appropriate grade.

This bill would subject a person who commits certain acts in connection with the operation or management of a wastewater treatment plant, or with regard to a related registration or certification, to civil liability in an amount not to exceed \$5,000 for each violation. The bill would subject any person who submits to the state board false or misleading information on an application for a certificate or registration to civil liability in an amount not to exceed \$5,000 for each violation.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 870 (SB 41) Alpert. California Native Americans: instructional and reference resources.²³

(1) Existing law sets forth the required, authorized, and prohibited course of study for pupils in school districts maintaining grades 1 to 12, inclusive. Existing law provides for the

NOTE: Superior numbers appear as a separate section at the end of the digests.

development of California Indian education centers for the purposes of improving the academic achievement of American Indian pupils.

This bill would require the State Librarian to allocate grants to develop California Native American instructional resources for public schools, would require that the instructional resources be submitted to the Curriculum Development and Supplemental Materials Commission and to the State Board of Education for public hearings and approvals, as prescribed. The bill would appropriate \$425,000 from the General Fund and allocate \$250,000 of these moneys to the State Librarian for these purposes.

This appropriation would be General Fund revenues appropriated to school districts for the purposes of Section 8 of Article XVI of the California Constitution.

(2) This bill would require the State Librarian to develop the California's American Indian Nations Information Project, and would allocate \$75,000 of the appropriation in (1) above to the State Librarian for this purpose. The bill would require the cooperation of the University of California, if consented to by the Regents of the University of California.

(3) This bill would allocate \$100,000 of the appropriation in (1) above to the State Department of Education for supporting the commission and the board in review of the standards-based instructional resources pursuant to this bill.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 871 (SB 100) Johannessen. Emission control: specially constructed vehicles.

Existing law defines a specially constructed vehicle as a vehicle that is built for private use, not for resale, and is not constructed by a licensed manufacturer or remanufacturer, and requires all specially constructed vehicles to be subject to the emission control system testing and certification requirements established by the Department of Consumer Affairs.

This bill would require a passenger vehicle or pickup truck that is a specially constructed vehicle to be inspected by stations authorized to perform referee functions, as prescribed, and would require the Department of Motor Vehicles to provide an initial registration to no more than the first 500 vehicles that meet the specified criteria and are presented to the department each year for registration. Upon completion of the inspection, the referee would be required to affix a tamper-resistant label to the vehicle and to issue a certificate that establishes the engine model-year and emission control system application.

Ch. 872 (SB 431) Monteith. School finance: utility costs.

Existing law requires the State Board of Education to adopt standards and criteria including, but not limited to, comparisons and reviews of, among other things, reserves and fund balance, and requires school districts to use the standards and criteria in developing their budgets and managing their expenditures. Under existing related regulations, available reserves may not be less than certain percentages as applied to total expenditures, transfers out, and uses, with certain exceptions. For a school district with fewer than 1,001 to 30,000 units of average daily attendance, available reserves may not be less than 3%.

This bill would provide, notwithstanding any other provision of law, that a county unified school district with fewer than 3,000 units of average daily attendance may use up to 30% of its budget reserve to pay for utility costs, including propane, fuel, and electricity costs, in each of the 2000–01 and 2001–02 fiscal years.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 873 (SB 497) Sher. Land use: energy conservation.

(1) Existing law prohibits the legislative body of any city or county from enacting an ordinance that prohibits or unreasonably restricts the use of solar energy systems other than for the preservation or protection of the public health and safety.

This bill would make technical, nonsubstantive changes to this provision.

(2) Existing law makes the Subdivision Map Act inapplicable to a lot line adjustment between 2 or more existing adjacent parcels, where the land taken from one parcel is added

to an adjacent parcel, and where a greater number of parcels than originally existed is not thereby created, if the lot line adjustment is approved by the local agency or advisory agency. The act requires a local agency or advisory agency to limit its review and approval to a determination of whether or not the parcels resulting from the lot line adjustment will conform to local zoning and building ordinances.

This bill would make the act inapplicable to a lot line adjustment between 4 or fewer existing adjoining parcels, where the land taken from one parcel is added to an adjoining parcel, and where a greater number of parcels than originally existed is not thereby created, if the lot line adjustment is approved by the local agency or advisory agency. The bill would require a local agency or advisory agency to limit its review and approval to a determination of whether or not the parcels resulting from the lot line adjustment will conform to the local general plan, any applicable coastal plan, and zoning and building ordinances, as specified.

(3) The Subdivision Map Act requires the design of a subdivision for which a tentative map is required to provide, to the extent feasible, for future passive natural heating or cooling opportunities in the subdivision.

This bill would make technical changes to this provision.

(4) The Subdivision Map Act also requires the subdivider of a subdivision that, as shown on the final map thereof, contains 200 or more parcels, to dedicate additional land as may be necessary and feasible to provide bicycle paths for the use and safety of the residents. A local ordinance may require land within a subdivision, except a subdivision that consists of the subdivision of airspace, to be dedicated or irrevocably offered for dedication for local transit facilities that directly benefit the subdivision residents if the subdivision has the potential for 200 or more dwelling units and the local governing body finds that transit services are or will be made available to the subdivision within a reasonable time.

This bill would require all subdividers to dedicate additional land as may be necessary and feasible to provide bicycle paths for the residents. It would also authorize a local ordinance to require land within any subdivision to be dedicated or irrevocably offered for dedication for local transit facilities, except as specified.

(5) The Subdivision Map Act requires a local agency to issue a certificate of compliance or a conditional certificate of compliance if it determines that real property does not comply with the act or local ordinances enacted pursuant to the act.

This bill would eliminate the provision for issuance of a certificate of compliance and would require the issuance of a conditional certificate of compliance in those instances.

Ch. 874 (SB 528) Sher. Department of Conservation: beverage containers: fees: enforcement.

(1) The existing California Beverage Container Recycling and Litter Reduction Act requires the Department of Conservation to undergo a selective audit of entities making payments to, or receiving payments from, the department to determine whether redemption payments and applicable processing fees are being paid to the department on all beverage containers sold in California, and that refund values and processing payments are being paid out properly by the department. Existing law requires the selective audit to be made a part of an annual report, copies of which are required to be submitted to the Governor and the Legislature.

This bill would delete the requirement that the selective audit is made part of an annual report, with copies submitted to the Governor and the Legislature.

(2) The existing act requires the department to certify recycling centers and processors and imposes specified requirements as a condition of certification. The act authorizes the department to issue a certificate as a probationary certificate that is limited to a specified period and allow a probationary certificate holder to request a hearing subsequent to the revocation of such a certificate.

This bill would additionally require, as a condition of certification, that if one or more certified entities have operated at the same location within the past 5 years, the operations at

the location of the recycling center or processor, as applicable, exhibit, to the satisfaction of the department, a pattern of operation in compliance with the requirements of the act. The bill would authorize the department to recovery, from a party requesting a hearing on a revoked probationary certificate, any costs incurred by the department associated with preparing for, or conducting the hearing, if the party requesting the hearing does not appear on the date scheduled and does not notify the department, as specified.

(3) The existing act requires a distributor of specified beverage containers to pay a redemption payment to the department, for each beverage container, as defined, sold or transferred, for deposit in the California Beverage Container Recycling Fund. The money in the fund is continuously appropriated to the department to pay, among other things, glass incentive payments to operators of curbside recycling programs, in an amount of up to \$300,000,000 annually. Existing law repeals that authority to make these payments on January 1, 2003.

This bill would authorize the department to make those payments to an operator of a curbside recycling program or any other entity that is certified under the act, if the operator or entity color sorts glass beverage containers. The bill would delete the repeal of the payment authority, thereby authorizing the department to make those payments indefinitely, and making an appropriation.

(4) The existing act requires the department to pay a total of \$15,000,000 per fiscal year to operators of curbside programs and neighborhood dropoff programs and requires the amount of the payment to be calculated based upon the volume of beverage containers collected during the fiscal year by curbside and neighborhood dropoff programs and reported to the department by processors during the reporting period of October 1 to December 31, inclusive. A violation of the act is a crime.

This bill would require these payments to be made only if the curbside or neighborhood dropoff program accepts all types of empty beverage containers for recycling and would change the reporting period to the fiscal year for which those payments are made.

The bill would require the operator of a curbside program or neighborhood dropoff program to make specified records available for inspection and review by the department, thereby imposing a state-mandated local program by creating new crimes.

(5) The act provides that the money in the fund is continuously appropriated to the department to pay, among other things, handling fees to supermarket sites. Existing provisions of the act specify the method for determining whether certain payments made by a supermarket site that receives handling fees constitute “unfair and predatory pricing” under the act. Other provisions of the act establish procedures for the consideration of complaints alleging unfair and predatory pricing.

This bill would amend the definition of “unfair and predatory pricing” for the purposes of the act by adjusting the methods through which the department is required to obtain pricing data and to make calculations based on that data. The bill would revise the procedures required for the consideration of complaints alleging unfair and predatory pricing, including specifying which certified recyclers may bring a complaint against a supermarket site, deleting the requirement that the respondent have the burden of proof in demonstrating that it has not engaged in unfair and predatory pricing, and requiring that the respondent to a complaint be given an opportunity, as prescribed, to rebut a presumption that unfair and predatory pricing has taken place. The bill would specify a method for determining the amount of time a supermarket site that has been determined to have engaged in unfair and predatory pricing is ineligible to receive handling fees. The bill would provide for the retroactive application of these changes, under specified circumstances.

Because this bill would revise the methods for expending funds from the continuously appropriated California Beverage Container Recycling Fund, it would constitute an appropriation.

(6) Existing law requires the Director of Conservation to adopt regulations to implement specified provisions of the act, and authorizes the director to adopt these regulations as

emergency regulations, which are filed with, but not repealed by, the Office of Administrative Law and which remain in effect until revised by the director.

This bill would additionally include the adoption of regulations to implement the unfair and predatory pricing procedures within this provision.

(7) Existing law imposes criminal and civil penalties for specified violations of the act, including submission of false or fraudulent claims for payment. Existing law authorizes the department to take specified disciplinary actions, including ordering the immediate suspension of a certificate holder if there is, among other things, a pattern of deceit, fraud, or intentional misconduct in carrying out the duties and responsibilities of a certificate holder during the 6-month period immediately preceding the order of suspension.

Existing law also authorizes the department to issue a cease and desist order when a person is engaged in recycling activity that violates the act and prescribes procedures for requesting a hearing regarding an order.

This bill would specify, for purposes of this immediate suspension, that a pattern of deceit, fraud or intentional misconduct in carrying out the duties of a certificate holder includes, but is not limited to, the destruction or concealment of any records six months immediately preceding the order of suspension.

The bill would revise the procedures for requesting a hearing regarding the issuance of a cease and desist order. The bill would also correct erroneous references and make conforming changes.

(8) The existing Fiberglass Recycled Content Act of 1991 requires the department to include in its annual report to the Legislature a discussion of the progress toward achieving maximum use of cullet in the manufacture of fiberglass sold in the state, as specified.

This bill would delete that requirement.

(9) Existing law, requires the department to contract with the University of California for the preparation and submittal to the department, by January 1, 2002, of a specified recycling study.

This bill would extend the date for the submittal of the report to January 1, 2003.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(11) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 875 (AB 1602) Keeley. California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Act of 2002.

Under existing law, programs have been established pursuant to bond acts for, among other things, the development and enhancement of state and local parks and recreational facilities.

This bill would enact the California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Act of 2002, which, if adopted, would authorize, for the purpose of financing a program for the acquisition, development, restoration, protection, rehabilitation, stabilization, reconstruction, preservation, and interpretation of park, coastal, agricultural land, air, and historical resources, as specified, the issuance, pursuant to the State General Obligation Bond Law, of bonds in the amount of \$2,600,000,000.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 876 (AB 1481) Frommer. Urban Park Act of 2001.

The existing Roberti-Z' Berg-Harris Urban Open-Space and Recreation Program Act provides for annual grants to cities, counties, and districts, as defined, for recreational and open-space purposes and for block grants for the rehabilitation of historic structures within a park or recreational area.

This bill would enact the Urban Park Act of 2001, which would require the Department of Parks and Recreation to establish a local assistance program under which the department would offer grants, on a competitive basis, to various local entities and nonprofit organizations, as defined, for the acquisition or development, or both, of urban parks and recreational areas and facilities.

The bill would require the department, in evaluating applications for grants, to assign priority to applications for projects that meet specified criteria. The bill would authorize the department to adopt guidelines to amplify or clarify the criteria, and to propose additional criteria to provide guidance in selecting projects in areas that have the greatest deficiencies in parks and recreation facilities.

The bill would allow a grant recipient to use grant funds to pay for any portion of the cost of cleaning up, removing, or remediating any toxic materials or hazardous substances, if the amount used for cleanup, removal, or remediation does not exceed a specified amount. The bill would require the department, by April 30, 2003, and on or before April 30 annually thereafter, to submit a report to the Legislature on the status of each grant made pursuant to the act. The bill would provide that provisions of the act shall only be implemented during those fiscal years for which funding is appropriated for that purpose in the annual Budget Act.

Ch. 877 (SB 359) Murray. Parks and recreation: urban parks and healthy communities.

Existing law authorizes the Department of Parks and Recreation to award grants to local governments and certain other entities for the acquisition of parklands and the development and maintenance of parks in the state.

This bill would establish the California Youth Soccer and Recreation Development Program, and would require the department to administer the program, which is intended to provide assistance and grants to local agencies and community-based organizations, as defined, with regard to funding and fostering the development of new youth soccer, baseball, and basketball recreation opportunities in the state. The bill would require the department to report to specified legislative budget committees regarding the need for specified recreational facilities in the state, and capital improvements of these facilities, to be used for the program.

The bill would create the California Youth Soccer and Recreation Development Fund in the State Treasury, which would be used for the deposit of funds derived from federal, state, and private sources to be used for the program. The bill would require the department to award grants, on a competitive basis, subject to an appropriation by the Legislature therefor, to local agencies and community-based organizations for the purposes of the program, and to develop eligibility guidelines for awarding grants that give preference to certain heavily populated, urban, low-income communities, as provided.

This bill would enact the State Urban Parks and Healthy Communities Act and would create the State Urban Parks and Healthy Communities Fund in the State Treasury. The bill would authorize the department to expend moneys in the fund, upon appropriation by the Legislature, to provide grants to state agencies, local governments, and community organizations to provide environmental education and park opportunities for schoolage children. The bill would require the department to give specified priority to the issuance of these grants and would require the amount of the grants to be not less than \$20,000 or more than \$200,000. The bill would specify the purposes for which these grants may be expended.

The bill would also require the department to provide grants to local agencies and community organizations to facilitate the use of outdoor recreation or provide needed after school programs.

The bill would require the department to adopt guidelines to implement the bill by June 1, 2002.

The bill would provide that any funding for the bill would be contingent upon a future appropriation in the annual Budget Act.

Ch. 878 (SB 766) Burton. Parks and recreation.

Existing law contains various provisions related to parks and recreation.

This bill would allocate \$190,000,000 of the funds appropriated by the proposed California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Act of 2002, for urban park and recreation purposes, if Senate Bill 359 and Assembly Bill 1481 of the 2001–02 Regular Session are enacted.

Ch. 879 (SB 307) Vasconcellos. Historical resources: California Japantown Preservation Pilot Project.²⁴

(1) Existing law vests with the Department of Parks and Recreation control of the state park system, and requires the department to administer various programs relating to state historical resources. Existing law also requires local legislative bodies, or the local planning agency if directed by the local legislative body, to prepare specific plans for the systematic implementation of the jurisdiction's general plan.

This bill would create, until July 1, 2004, the California Japantown Preservation Pilot Project, which would require the State Librarian to provide a one-time grant to the City of Los Angeles, the City of San Jose, and the City and County of San Francisco, for the purposes of aiding in the preparation, adoption, or implementation of specific plans that promote the preservation of existing Japantown neighborhoods in those jurisdictions. The bill would require any city or city and county that receives a grant under the program to consult with a community organization, as defined, in preparing the specific plan, as defined. By imposing additional duties on specified local governments, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) The bill would appropriate \$450,000 from the General Fund to the California Research Bureau of the California State Library for the implementation of the pilot program.

Ch. 880 (AB 913) Steinberg. Attorneys: pro bono services.

Existing law provides for a program regulated by the State Bar that provides civil legal services to indigent persons.

This bill would require a contract with the state for legal services that exceeds \$50,000 to certify that the contracting law firm agrees to make a good faith effort to provide a specified minimum number of hours of pro bono legal services, as defined, during each year of the contract. Pursuant to the bill, failure to make a good faith effort, as determined by considering specified factors, could constitute cause for nonrenewal of a contract and be taken into account in the awarding of future contracts. The bill would provide that these requirements do not apply to specified contracts. These provisions would become operative on January 1, 2003.

Ch. 881 (AB 935) Hertzberg. Public Interest Attorney Loan Repayment Program.

Existing law establishes the Student Aid Commission as the primary state agency for the administration of state-authorized student financial aid programs available to students attending all segments of postsecondary education.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would establish the Public Interest Attorney Loan Repayment Program for licensed attorneys who practice or agree to practice in public interest areas of the law, as defined, and who meet other designated criteria. The program would be administered by the Student Aid Commission, which would be authorized to make 3,000 awards of loan assumption annually, as prescribed.

The bill would create the Public Interest Attorney Loan Repayment Endowment Account in the State Treasury, which would consist of funds appropriated by the Legislature for the program and private contributions to the program.

Ch. 882 (AB 1084) Wesson. Public contracts.

(1) Existing law requires state agencies to give small businesses a 5% preference in contracts for construction, the procurement of goods, or the delivery of services.

This bill would include microbusinesses under those provisions, and revise annual goals for the program. The bill would also add related definitions and make related changes.

This bill would also authorize a local agency to provide for a small business preference in construction, the procurement of goods, or the delivery of services, and to establish a subcontracting participation goal for small businesses on contracts with a preference for those bidders who meet the goal.

This bill would require an awarding department to report to the Governor and the Legislature on the level of participation by business enterprises, by race, ethnicity, and gender of owner, in specified contracts.

(2) The bill would state legislative intent to enact legislation participation of small businesses in public contracting. The bill would also state the intent of the Legislature to act in conformity with certain public contracting recommendations.

Ch. 883 (SB 413) Speier. State Auditor: whistleblowing.

(1) Under the California Whistleblower Protection Act, the State Auditor is authorized to conduct an investigative audit upon receiving confirmation that an employee or state agency has engaged in an improper governmental activity. The act prohibits disclosure of the identity of the person who provided the information that initiated the investigative audit except as specified. The act further provides, among other things, that a person who intentionally engages in acts of reprisal, retaliation, threats, coercion, or similar acts against a state employee or applicant for state employment for having made a protected disclosure, as defined, is subject to civil liability and criminal penalties. However, the act provides that any action for civil damages is only available to an injured party who has first filed a complaint with the State Personnel Board and the board has failed to reach a decision pursuant to specified procedures.

This bill would require the State Auditor to prepare a written explanation of the act, with specified information, no later than April 1, 2002, prepare for distribution to each state agency the explanation in electronic format, and post it on the Web site of the Bureau of State Audits. The bill would require every state agency to print and post the notice at state offices no later than July 1, 2002, and send it by electronic mail to state employees of the agency annually, and would provide instead that civil damages are available to an injured party only if the State Personnel Board has issued, or failed to issue, findings pursuant to the specified procedures.

The bill would specify that its provisions shall apply to the California State University and the University of California.

The bill would require that if the State Auditor, after investigating, finds that a state employee may have engaged or participated in improper governmental activities, the State Auditor shall send a copy of the investigative report to the employee's appointing power. The bill would require the appointing power to either serve a notice of adverse action upon the employee who is the subject of the investigative report or set forth in writing its reasons for not taking adverse action. The appointing power would be required to provide a copy of the

notice of adverse action or written reasons why it chose not to take adverse action to the State Personnel Board and the State Auditor. The bill would require a similar procedure by the State Personnel Board whenever the board determines that a manager, supervisor, or employee, who is not named a party to the retaliation complaint, may have engaged or participated in improper governmental activities.

(2) Existing law requires any state officer or employee filing a complaint of reprisal or retaliation to have also previously filed a complaint of improper governmental activity with the State Auditor, or with the Inspector General, as specified.

This bill would repeal this requirement. The bill would also authorize the State Personnel Board, if the board determines after a hearing, or if no hearing is requested and the executive officer based on his or her findings concludes, that improper governmental activity has occurred, to order compensatory damages, in addition to the remedies specified in existing law. The bill would apply the procedures relative to complaints of reprisal or retaliation to violations by employees, in addition to managers and supervisors.

(3) Existing law provides that a person shall not be retaliated against under the State Civil Service Act because he or she has opposed any practice made an unlawful employment practice, or made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under the act.

The bill would establish that the burden of proof is on the supervisor, manager, employee, or appointing power to demonstrate by clear and convincing evidence that an alleged adverse employment action would have occurred for legitimate, independent reasons, if a person demonstrates by a preponderance of evidence that opposing any practice made an unlawful employment practice under the act, or making a charge, testifying, assisting, or participating in any manner in an investigation, proceeding, or hearing under the act, was a contributing factor in any adverse employment action taken against him or her.

Ch. 884 (AB 341) Strom-Martin. Teachers: professional development.

Existing law establishes various programs of professional development for teachers, including among others the Beginner Teacher Support and Assessment System, a grant program for in-service training of teachers of mathematics who teach pupils enrolled in grades 4 to 12, inclusive, the Education Technology Staff Development program, the Teacher Reading Instruction Development programs, and the California Professional Development Institutes.

This bill would require the State Department of Education to issue a request for proposals to contract for the development of standards for professional development for educators and instructional leaders. The standards would serve as guidelines for providers of professional development activities and could be used to facilitate the coordination among existing professional development programs. The bill would require the entity with which the department contracts to submit the standards to the Superintendent of Public Instruction for approval after which the superintendent would be required to submit the standards to the State Board of Education for approval.

The bill would appropriate \$140,000 from the General Fund to the Superintendent of Public Instruction for purposes of implementing these provisions.

Ch. 885 (AB 343) Bates. State coastal conservancy: education programs: grants.²⁵

(1) Existing law requires the State Coastal Conservancy to implement various coastal protection programs and projects, and, for purposes of those provisions, defines a “nonprofit organization” as “any private, nonprofit organization, existing under the provisions of Section 501(c)(3) of the United States Internal Revenue Code, which has among its principal charitable purposes the preservation of land for scientific, historic, educational, recreational, agricultural, scenic, or open-space opportunities.”

This bill would revise that definition of a “nonprofit organization” to mean any private, nonprofit organization, that qualifies under Section 501(c)(3) of the United States Internal Revenue Code, whose purposes are consistent with specified provisions governing the conservancy.

The bill would authorize the conservancy to undertake projects to provide educational programs for children and adults relating to the preservation, protection, enhancement, and maintenance of coastal resources, and to award grants to nonprofit organizations, educational institutions, and public agencies for this purpose, but would provide that the conservancy is not required to take any action pursuant to those provisions, unless and until any funds are made available by the Legislature specifically for this purpose. The bill would prohibit the conservancy from using more than 10% of the funds provided for the program for administrative costs.

(2) Existing law authorizes the conservancy to award grants to any public agency or nonprofit organization that is a public land trust having a specified agreement with the conservancy, having authority to acquire, develop, and operate public coastal accessways for purposes of the acquisition of interests in, and for initial development of, lands that are suitable for and which will be used for public accessways to and along the coast.

The bill would, instead, authorize the conservancy to award grants to any public agency or nonprofit organization to acquire land, or any interest therein, or to develop, operate, or manage lands for public access purposes to and along the coast.

(3) The Budget Act of 2000 appropriated \$13,480,000 to the State Coastal Conservancy for capital outlay for the Hamilton Airfield Wetlands Restoration project.

Existing law prohibits any funds appropriated for capital outlay to be expended by a state agency until the Department of Finance and the State Public Works Board have approved preliminary plans for the project, among other things.

This bill would declare that the expenditure of funds appropriated for the Hamilton Airfield Wetlands Restoration project is not subject to the above provision.

(4) The Budget Act of 2000 appropriated \$32,000,000 for wetlands restoration and acquisition.

This bill would authorize an amount of the funds appropriated for wetlands restoration and acquisition, not to exceed \$3,750,000, to be used by the State Coastal Conservancy for the purchase of other Marin County baylands and related uplands, thereby making an appropriation. The bill would authorize up to \$250,000 of that appropriation to be used for the purposes of educational programs relating to coastal resources, thereby making an appropriation.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 886 (AB 1018) Liu. Career education.²⁶

Existing law provides for the establishment of career technical schools and training programs.

This bill would establish, subject to funding provided by an appropriation in the annual Budget Act or other measure for these purposes, the Industry-Based Certification Incentive Grant Program for the purpose of awarding grants to selected school districts, county offices of education, and regional occupational centers and programs to establish industry-based certification programs within their career technical programs. The State Department of Education, in consultation with the Secretary for Education, would administer the program and develop criteria and a process to select grant recipients. The bill would give first priority for the award of grants to programs that will operate in high schools that scored in the bottom two deciles on the Academic Performance Index. The bill would require the State Department of Education to evaluate the effectiveness of each industry-based certification program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law, the Budget Act of 2001, reappropriates \$8,000,000 from the Proposition 98 reversion account to be set aside on a one-time basis for career/technical education services, as described.

This bill would allocate \$4,450,000 of that amount to the State Department of Education for specified career technical education purposes.

Ch. 887 (AB 1295) Thomson. School performance: Academic Performance Index.

Existing law requires the Superintendent of Public Instruction (SPI) to develop an Academic Performance Index (API) to measure the performance of schools. The superintendent is required to develop growth targets for all schools and statewide API performance targets, based on the API. Existing law provides that, when the API is fully developed, schools may either meet the state target or meet their growth target to be eligible for the Governor's Performance Award Program, a program of monetary and nonmonetary awards to schools.

This bill would delete the provision by which schools that meet the state target are eligible for the Governor's Performance Award Program and would require a school, including a school participating in the Immediate Intervention/Underperforming Schools Program, to meet, at a minimum, its annual API growth target to be eligible for that program. The bill would authorize the State Board of Education to establish additional criteria that schools must meet to be eligible for the program.

Existing law defines "numerically significant subgroup," for purposes of measuring academic performance on the API.

This bill would authorize the SPI to define "numerically significant subgroup" for schools whose API score is based on test scores of no fewer than 11 and no more than 99 pupils.

Existing law provides that only comprehensive high schools, middle schools, and elementary schools with 100 or more pupils may be included in the API ranking.

This bill would provide that only schools with 100 or more test scores contributing to the API may be included in the API ranking and would provide for API scores for specified types and sizes of schools, as described.

Existing law establishes the Immediate Intervention/Underperforming Schools Program (II/USP), to which underperforming schools may apply for participation. Existing law requires schools participating in the II/USP to develop action plans to improve the academic performance of pupils enrolled in the school, and, among other things, requires the action plan to examine and consider disaggregated data providing information regarding the achievement of all pupils by race, ethnicity, and gender.

This bill would instead require the action plan to examine and consider disaggregated data providing information regarding the achievement of pupils in numerically significant subgroups.

Existing law provides that, 24 months after receipt of funding under the II/USP, a school that has met or exceeded its growth target each year is required to receive an award under the Governor's Performance Award Program.

This bill would delete this provision. The bill would also require the Superintendent of Public Instruction to continue to monitor a school that has not met its growth targets within 36 months of receiving funding under the II/USP until the school meets its annual growth target or the statewide performance target. If, in any year between the third year of implementation funding under the II/USP and the first year the school meets its growth target and a school fails to make significant progress, as determined by the State Board of Education, the bill would require that school to be deemed a low-performing school. The bill would also provide that monetary awards would only be awarded to schools that meet or exceed API performance or growth targets or increase by 5 points, whichever is greater.

Ch. 888 (SB 354) Escutia. Education: interscholastic athletics.

Existing law requires the State Department of Education to exercise its general supervision over the course of physical education in elementary and secondary schools of the state, as specified. Existing law, until January 1, 2002, describes the California Interscholastic Federation (CIF) as a voluntary organization consisting of school and school-related personnel with the responsibility for administering interscholastic athletic activities in secondary schools and sets forth legislative intent that the CIF, in consultation with the department, implement certain policies. Existing law required the CIF to report to the Legislature on its evaluation and accountability activities undertaken pursuant to those provisions on or before January 1, 2002.

This bill would extend those provisions pertaining to the department and the CIF to January 1, 2007, and would instead require that report by the CIF to be submitted to the Governor and the Legislature on or before January 1, 2005.

Ch. 889 (SB 225) Kuehl. Education: interscholastic athletics: discrimination.

(1) Existing law, until January 1, 2002, describes the California Interscholastic Federation (CIF) as a voluntary organization consisting of school and school-related personnel with the responsibility for administering interscholastic athletic activities in secondary schools and sets forth legislative intent that the CIF, in consultation with the State Department of Education, implement certain policies. Existing law prohibits a voluntary interscholastic athletic association, of which any public school is a member, from discriminating against, or denying the benefits of any program to, any person on the basis of race, sex, or ethnic origin. Existing law requires the CIF to report to the Legislature on its evaluation and accountability activities undertaken pursuant to those activities on or before January 1, 2002.

This bill would broaden that prohibition against discrimination to include, among others, discrimination on the basis of religion, mental or physical disability, and any basis contained in the prohibition of hate crimes and would prescribe related matters. The bill would also require the CIF to provide information to parents and pupils regarding the state and federal complaint procedures for discrimination complaints in interscholastic athletics.

(2) Under existing law, the State Department of Education has certain authority over interscholastic activities including that if the department states that a school district, an association, or consortium of school districts, or the California Interscholastic Federation is not in compliance with state or federal law, the department may require the school district, association, or consortium, or the federation to adjust its policy so that it is in compliance. Under existing law, the department is prohibited from determining the specific policy that a school district, association, or consortium, or the federation must adopt in order to comply with state and federal laws.

This bill would, notwithstanding any other provision of law, allow a complainant from a public school who wishes to file a discrimination complaint based on interscholastic activities conducted by an association, by a consortium of school districts, or by the California Interscholastic Federation to file that discrimination complaint directly with the department without having to first file a discrimination complaint with a school district, and would authorize the department, if it states that an association, a consortium of school districts, or the California Interscholastic Federation is not in compliance with state or federal law, to prescribe the administrative remedies that such an association, consortium of school districts, or the California Interscholastic Federation must provide in order to comply with state or federal law.

The bill would extend those provisions pertaining to the CIF until January 1, 2007, and would instead require that report to be made to the Governor and the Legislature on or before January 1, 2005.

Ch. 890 (SB 257) Kuehl. Schools: hate crimes.

(1) Existing law requires the School/Law Enforcement Partnership to establish interagency safe school programs to address the problems of school safety, truancy,

excessive absenteeism, and school crime including vandalism, drug and alcohol abuse, gang membership, and gang violence.

This bill would require that for partnership purposes, school crime includes hate crimes.

(2) Existing law makes each school district and county office of education responsible for the overall development of comprehensive school safety plans that include, among other things, a sexual harassment policy.

This bill would require the comprehensive school safety plan to include development of a discrimination and harassment policy, as specified, and development of hate crime reporting procedures, thereby imposing a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 891 (SB 735) Committee on Budget and Fiscal Review. Education. ²⁷

(1) Existing law, until January 1, 2002, establishes the Educational Telecommunication Fund in order for the governing board of the County Office Fiscal Crisis and Management Assistance Team to carry out its responsibilities regarding the establishment of telecommunications standards to support the efficient sharing of school business and administrative information and requires that the amount of any offset made to the principal apportionments of school districts because the apportionments were not in accordance with law be deposited in the fund for a maximum deposit of \$10,000,000.

This bill would change the date upon which the Educational Telecommunication Fund becomes inoperative to January 1, 2003. The bill would also increase the maximum amount that may be annually deposited in the fund to \$15,000,000.

(2) Existing law requires, for the 1990–91 fiscal year and each fiscal year thereafter, that moneys to be applied by the state for the support of school districts and community college districts be distributed in accordance with certain calculations. This provision does not apply to the fiscal years between the 1992–93 fiscal year and the 2000–01 fiscal year, inclusive.

This bill would, instead, make this provision inapplicable to the fiscal years between the 1992–93 fiscal year and the 2001–02 fiscal year, inclusive.

(3) Existing law requires the Controller during each fiscal year to transfer from the General Fund to Section A of the State School Fund certain sums, as certified by the Superintendent of Public Instruction, for apportionment during the fiscal year.

This bill would require the Superintendent of Public Instruction to certify to the Controller amounts that do not exceed amounts needed to fund the revenue limits of school districts and county superintendents of schools and the revenue limit portion of charter school operational funding, as those amounts are determined by specified statutes.

(4) Existing law requires, and provides a mechanism for, reimbursement of certain school district costs associated with compliance with desegregation plans.

This bill would repeal provisions governing funding of court-ordered and voluntary desegregation plans. The bill would combine funding for those programs and establish the Targeted Instructional Improvement Grant to fund the costs of any court-ordered desegregation program, if the order exists and is still in force, and to provide instructional improvement for the lowest achieving pupils in a district.

(5) Existing law authorizes the governing board of a school district, the county superintendent of schools, or the county boards of education, commencing with the 2000–01 fiscal year, to increase the lowest salary on the salary schedule for a certificated employee that meets certain requirements by designating as the lowest salary on the salary schedule an

amount that is at least \$34,000 in the 2000–01 fiscal year. Existing law sets forth procedures for reimbursement for the cost of the increase and requires claims forms to be filed with the Superintendent of Public Instruction by March 1, 2001.

This bill would allow claims forms to be filed until September 30, 2001.

(6) Existing law requires the State Board of Education to establish a Governor's Performance Award Program to provide monetary and nonmonetary awards to schools that meet or exceed Academic Performance Index performance growth targets and demonstrate comparable improvement in academic achievement by all numerically significant ethnic and socioeconomically disadvantaged subgroups within schools. Existing law requires the monetary awards to be made available on either a per pupil or per school basis, not to exceed \$150 per pupil enrolled.

This bill would provide that monetary awards be awarded only to schools whose Academic Performance Index scores meet or exceed their growth targets or increase by 5 points, whichever is greater, and in which all numerically significant subgroups' scores meet or exceed 80% of the school's growth target or increase by 4 points, whichever is greater. The bill would limit the amount of the monetary award to \$150 per pupil who received a score on the annual achievement test and standards based achievement test that are part of the Standardized Testing and Reporting program.

(7) Existing law requires that certain computations be made to determine the amount of funding for each special education local plan area for the fiscal year in which the computation is made.

This bill would require the Superintendent of Public Instruction to permanently increase the amount per unit of average daily attendance of each special education local plan area, would provide an equalization adjustment, and would set forth a formula for determining the amount of the increase and adjustment.

(8) Existing law requires the Superintendent of Public Instruction to develop or acquire a test that assesses the English language development of pupils whose primary language is a language other than English and requires the test to be used to identify pupils who are limited English proficient, to determine the level of English language proficiency of pupils who are limited English proficient, and to assess the progress of limited-English-proficient pupils in acquiring the skills of listening, reading, speaking, and writing in English.

This bill would require the Superintendent of Public Instruction to apportion funds appropriated for this purpose to enable school districts to use the tests for the purposes listed above and would require the State Board of Education to establish the amount of funding to be apportioned per test administered, based on a review of the cost per test. The bill would provide that the amount of funding to be apportioned per test is not valid without the approval of the Director of Finance.

(9) Under existing law, the governing board of a community college district may provide compensation for office hours to part-time faculty. As part of that program, existing law requires the Chancellor of the California Community Colleges to apportion to each district that establishes a program funding in an amount equal to \$2 for every \$1 paid for office hours of part-time faculty, as defined, by a district. Existing law provides that the allocation to any district in a fiscal year may not exceed $\frac{2}{3}$ of the total costs of compensation paid for office hours of part-time faculty.

This bill would instead require the chancellor to apportion to each district up to 50% of the total costs of the compensation paid for office hours of part-time faculty. The bill would provide that the allocation to any district in a fiscal year may not exceed 50% of the total costs of compensation paid for those office hours.

(10) Existing law authorizes the Regents of the University of California to establish 3 California Institutes for Science and Innovation for the purpose of combining technological and scientific research and training and educating future scientists and technological leaders.

This bill would authorize the regents to establish a 4th institute for science and innovation. The bill would express legislative intent to appropriate a total of \$100,000,000 during the 2001–02, 2002–03, and 2003–04, and 2004–05 fiscal years for this purpose.

(11) Existing law, which ceased to be operative on June 30, 1987, provided a method of impact aid allocation that allowed efforts initiated under educationally disadvantaged youth programs and bilingual education programs to continue and expand so long as the need exists. Under existing law, funding for this program may continue beyond June 30, 1987, for the general purposes of the program.

This bill would appropriate \$465,623,000 from the General Fund to the State Department of Education for transfer to Section A of the State School Fund for purposes of the Economic Impact Aid Program, and would make a related change.

(12) This bill would set the cost-of-living adjustment for certain items contained in the Budget Act of 2001 at 3.87%.

(13) Existing law requires the Superintendent of Public Instruction to compute, for the 2001–02 fiscal year, an equalization adjustment for each school district so that no district's prior year base revenue limit per unit of average daily attendance is less than the prior year base revenue limit per unit of average daily attendance above which fall not more than 10% of the total statewide units of average daily attendance for the appropriate size and type of district.

This bill would appropriate \$40,000,000 from the Proposition 98 Reversion Account to the Superintendent of Public Instruction for the purpose of implementing the equalization adjustment.

(14) The Budget Bill for the 2001–02 fiscal year, as passed by the Legislature, appropriated funds for support of the California Community Colleges. When the Governor approved this bill, which became the Budget Act of 2001, he reduced these funds, among others.

This bill would appropriate \$112,859,000 to the Chancellor and Board of Governors of the California Community Colleges in augmentation of specified items of the Budget Act of 2001, as scheduled.

(15) Certain funds appropriated from the General Fund by this bill would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(16) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 892 (SB 740) O'Connell. Charter schools.

(1) Under the Charter Schools Act, a charter school that provides independent study is required to comply with the provisions of law that are otherwise applicable to the governing board of a school district or a county office of education that offers independent study.

This bill would authorize a charter school that has an approved charter to receive funding for nonclassroom-based instruction, as defined for that purpose, only if a determination for funding is made by the State Board of Education. The bill would require the State Board of Education to adopt regulations, on or before February 1, 2002, that define and establish general rules governing nonclassroom-based instruction that apply to all charter schools and to the process for determining funding of nonclassroom-based instruction offered by charter schools. The bill would make the determination for funding subject to any conditions or limitations that the state board may prescribe. The bill would authorize the State Board of Education to adopt those regulations as emergency regulations.

(2) The act states the intent of the people that public school facilities should be shared fairly among all public school pupils, including those in charter schools. The act requires each school district to make available to each charter school operating in a school district, facilities sufficient for the charter school to accommodate all of the charter school's in-district students in conditions reasonably equivalent to those in which the pupils would be

accommodated if they were attending other public schools of the district and authorizes the school district to charge the charter school a specified amount for the use of the facility.

This bill would establish the Charter School Facility Grant Program, administered by the State Department of Education, for the purpose of providing assistance with facilities rent and lease costs for pupils in charter schools. The bill would establish pupil enrollment priority provisions and would require that eligible schools receive an amount up to but no more than \$750 per unit of average daily attendance, as certified at the second principal apportionment, to reimburse an amount up to but not more than 75% of the annual facilities rent and lease costs, as prescribed. The bill would establish criteria for eligibility for funding under the program and would impose limitations on the use of funds received under the program. The bill would state the intent of the Legislature that \$10,000,000 be appropriated for the Charter School Facility Grant Program for the 2001–02, 2002–03, and 2003–04 fiscal years.

(3) The act requires in specified years, the Superintendent of Public Instructions, to make certain apportionments on behalf of charter schools including an amount for each unit of regular average daily attendance in the charter school that is equal to the current fiscal year base revenue limit for the school district to which the charter petition was submitted. The act also requires the Superintendent of Public Instruction to annually compute a general-purpose entitlement, funded from a combination of state and local funds, for each charter school, as specified.

This bill would, notwithstanding any other provision of law, authorize the State Board of Education to adjust the amount of funding allocated on the basis of average daily attendance generated through charter school nonclassroom-based instruction, as defined for this purpose, as specified.

(4) The act requires that the Legislative Analyst conduct, or contract for, an evaluation of the effectiveness of the act to report to the Governor and the Legislature by July 1, 2003.

This bill would require the evaluation to include an analysis of the funding system for charter schools that offer nonclassroom-based instruction.

(5) This bill would incorporate additional changes in Section 47605 of the Education Code proposed by SB 675, to be operative only if SB 675 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

(6) This bill would incorporate additional changes in Section 47612.5 of the Education Code proposed by SB 955, to be operative only if SB 955 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 893 (AB 25) Migden. Domestic partnerships.

(1) Existing law establishes a cause of action for negligence, including the negligent infliction of emotional distress and a cause of action for wrongful death.

This bill would make these provisions applicable to a domestic partner as well as a surviving spouse.

(2) Existing law provides for the registration of domestic partnerships, as defined, and limits the legal effect of the registration of the domestic partnership to specified provisions of law. Existing law provides that persons of opposite sexes may not establish a domestic partnership unless they are both over the age of 62 and both persons meet specified eligibility criteria under the Social Security Act.

This bill would expand the legal effect of the registration of a domestic partnership to any provision of law specifically referring to domestic partners. This bill would also expand the class of persons who may establish and register a domestic partnership by providing that persons of opposite sexes may establish a domestic partnership if one or both of them are over the age of 62 and one or both of them meet the specified eligibility criteria under the Social Security Act.

(3) Existing law provides that a stepparent desiring to adopt a child of the stepparent's spouse may for that purpose file a petition in the county in which the petitioner resides and prescribes the procedure for such an adoption.

This bill would authorize the employment of the procedures applicable to stepparent adoption to the adoption by a domestic partner, as defined, of the child of his or her domestic partner.

(4) Under the Public Employees' Medical and Hospital Care Act, state and local employers may elect to offer health care coverage and other benefits to domestic partners of employees and annuitants, as defined; however, a domestic partner is not eligible for continued health coverage upon the death of the employee or annuitant.

This bill would provide that a domestic partner, and a child of a domestic partner, shall be eligible for continued health coverage upon the death of the employee or annuitant if the domestic partner is receiving a beneficiary allowance, as specified. The bill would also prohibit a surviving domestic partner from enrolling additional family members in a health benefits plan.

(5) Under the existing County Employees Retirement Law of 1937, death benefits and survivor's allowances are payable to the surviving spouse or children of a deceased member, as specified.

This bill would provide that in San Mateo County, subject to the approval of the board of supervisors, death benefits and survivor's allowances may be payable to a member's surviving domestic partner, as specified.

(6) Existing law, the Uniform Health Care Decisions Act, allows an individual to give instructions about personal health care decisions or authorize someone else to act as a surrogate to make these decisions.

This bill would authorize a domestic partner to make health care decisions on behalf of a patient in certain circumstances.

(7) Existing law provides for the licensure and regulation of health care service plans administered by the Department of Managed Care. Under existing law, a willful violation of any of these provisions is punishable as either a felony or a misdemeanor. Existing law also provides for the regulation of policies of disability insurance administered by the Insurance Commissioner.

Existing law requires that health care service plans and disability insurers provide coverage for certain benefits and services.

This bill would require a group health care service plan and a policy of disability insurance that provides hospital, medical, or surgical expense benefits to offer coverage to employers and guaranteed associations for a domestic partner of an employee, subscriber, insured, or policyholder to the same extent, and subject to the same terms and conditions, as provided to a dependent of an employee, subscriber, insured, or policyholder. The bill would also require that if an employer or guaranteed association has purchased coverage for domestic partners, a health care service plan or a policy of group disability insurance that provides hospital, medical, or surgical expense benefits for employees, subscribers, insureds, or policyholders and their dependents shall enroll as a dependent, upon application by the employer or group administrator, a domestic partner of the employee, subscriber, insured, or policyholder when that employee, subscriber, insured, or policyholder in accordance with the terms and conditions of the group contract, as specified. The bill would also provide that a health care service plan or policy of group disability insurance may require a copy of a valid Declaration of Domestic Partnership and notification of termination of the domestic partnership.

Since a willful violation of the provisions applicable to health care service plans is a crime, this bill would impose a state-mandated local program.

(8) Existing law requires any employer who provides sick leave to employees, as specified, to allow the employees to use the sick leave to attend to the illness of a sick child, parent, or spouse.

This bill would require the employer described above to allow the employee to use sick leave to attend to an ill domestic partner or child of a domestic partner, and would make other conforming changes.

(9) Existing law provides for the creation of conservatorships and trusts, and for the management of the estates of decedents.

This bill would define domestic partner and surviving domestic partner for the purposes of the Probate Code. The bill would revise the provisions regarding conservatorships to provide for the participation of a domestic partner of the conservatee or proposed conservatee in these proceedings. The bill would require preference for selection of a conservator be given to the domestic partner and a person nominated by the domestic partner. The bill would require that a petition for conservatorship set forth the names and addresses of the domestic partner of the proposed conservatee or the names and addresses of any children of a predeceased domestic partner. The bill would require notice of a conservatorship hearing to be sent to the domestic partner of the proposed conservatee and would authorize the domestic partner to appear at the hearing in support or opposition to the petition. The bill would prohibit a domestic partner from petitioning for the appointment of a conservatorship of his or her domestic partner under specified conditions. This bill would also include a domestic partner within the definition of a family member for the purposes of requiring a domestic partner, when acting as a conservator or a guardian, to reveal his or her relationship to a ward or conservatee when petitioning a court for approval of certain property transactions. This bill also would make conforming changes.

(10) Existing law prohibits a court official, employee, or a person related by blood or marriage, as defined, who is involved in the appointment of a conservator or guardian, or the processing of any document relating to a conservator or guardian, from purchasing, leasing, or renting the personal or real property from the estate of a conservatee or a ward whom the conservator or guardian represents.

This bill would include a domestic partner within the definition of a person related by blood or marriage for the purposes of the provisions described above.

(11) Existing law provides for the transfer of the property of a deceased person by will, and prescribes a statutory will form. Existing law provides that dissolution of a marriage revokes a bequest of property made in a will to a former spouse, among other things.

This bill would provide that termination of a domestic partnership revokes a bequest of property made in a will to a former domestic partner, among other things. The bill would also revise the statutory will form to, among other things, provide for the inclusion of a domestic partner among the beneficiaries to whom the testator may indicate a desire to leave his or her principal residence, automobiles, household, and personal effects, or residuary estate.

(12) Existing law provides that the surviving spouse is entitled to be appointed administrator of the decedent's estate and shall be given priority over other persons in relation to the decedent.

This bill would expand the right to be appointed as administrator of a decedent's estate to children of a domestic partner and to the parents of a predeceased domestic partner and their issue.

(13) The Personal Income Tax Law provides, in specified conformity to federal law, an exclusion from gross income for certain amounts expended for medical care and for certain employer-provided coverage under an accident or health plan. That law also allows a deduction for certain health insurance costs of self-employed individuals and with respect to certain group health plans.

This bill would make those tax benefits available to domestic partners.

(14) Existing law provides that an individual who leaves his or her work voluntarily or without good cause is disqualified from receiving unemployment benefits. Existing law further defines good cause for these purposes, and establishes procedures and presumptions for the administration of benefits.

This bill would include in the definition of good cause the act of accompanying one's domestic partner to a place from which it is impractical to commute and to which a transfer by the employer is not available. This bill would also make related changes.

(15) Existing law provides that if a person is eligible to receive disability benefits, but is mentally unable to make a claim, the claim may be made by the spouse of the individual, and the payment shall be executed upon the affidavit of the spouse, or other qualified person, as specified.

This bill would allow a domestic partner to make the claim and execute the affidavit in the capacity described above.

(16) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 894 (AB 59) Cedillo. Health programs: eligibility.

Existing law provides for the federal medicaid program, administered by each state, California's version of which is the Medi-Cal program. The Medi-Cal program, which is administered by the State Department of Health Services, provides qualified low-income persons with health care services.

Existing law requires each school district and county superintendent of schools maintaining kindergarten or any of grades 1 to 12, inclusive, to provide for each needy pupil one nutritionally adequate, free or reduced-price meal during each schoolday, and requires applications for participation in that free or reduced-price meal program to be made available to pupils at all times during each regular schoolday. The National School Lunch Program provides to eligible students lunches reimbursable pursuant to the National School Lunch Act.

To the extent permitted by federal law, this bill would make certain persons who are eligible for free school lunches under the federal program also eligible for the Medi-Cal program.

Existing law requires school districts and county superintendents of schools to provide various notifications to parents and guardians.

This bill would authorize school districts and county superintendents of schools to provide specified information regarding the Medi-Cal program to applicants for the National School Lunch Program or with the notification regarding eligibility for the National School Lunch Program. This bill would provide for the sharing of information from applications for the National School Lunch Program with specified local health agencies and would make provision for the confidentiality of that shared information.

This bill would require each county to participate in a pilot program to determine eligibility of certain children for, and enroll them in, the Medi-Cal program.

Because each county is responsible for Medi-Cal eligibility determinations, and because this bill would expand Medi-Cal eligibility, the bill would impose a state-mandated local program.

This bill would also require the department, in consultation with various agencies and representatives to develop policies and procedures to implement the provisions of this bill.

This bill would also prescribe various reporting requirements and provisions for expediting application processes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 895 (AB 1118) Corbett. Seismic safety: insurance: tax credits: retrofitting.

Existing law requires the Department of Insurance to establish a program for residential grants and loans to help pay for the retrofitting of high-risk residential dwellings owned or occupied by low- and moderate-income households, in order to minimize the risk of earthquake damage to those dwellings and thereby reduce the costs of residential earthquake insurance. Existing law appropriates a specified amount from the California Residential Earthquake Recovery Fund to the Department of Insurance for the purposes of the program. The funds are available until July 1, 2003.

This bill would make the funds in the California Residential Earthquake Recovery Fund available for expenditure until December 1, 2004, and would also appropriate the entire amount of funds not previously appropriated from that fund, not to exceed \$1,500,000, to the Department of Insurance for purposes of the program.

Ch. 896 (SB 388) Alpert. School districts: sale or lease of surplus property.

Under existing law, the governing board of any school district is authorized to sell for cash any personal property belonging to the school district if, among other things, the property is not required for school purposes, and certain requirements are satisfied regarding that sale, including providing notice of the sale, calling for bids, and selling the property to the highest responsible bidder. These requirements are applicable to a school district leasing land, buildings, or equipment that is no longer needed.

This bill would authorize a school district, notwithstanding any other provision of law, to sell or lease Internet appliances, as defined, or personal computers to parents of pupils within the school district, for the purpose of providing access to the school district's educational computer network, at a standard price not to exceed the cost incurred by the school district in purchasing the Internet appliance or computer, and would not require a sale or lease pursuant to those provisions to be subject to a requirement to call for bids or to sell or lease those Internet appliances or computers to the highest bidder.

The bill would also require a school district that elects to sell or lease Internet appliances or computers, as authorized by the bill, to provide access to the school district's educational network for those families that cannot afford that access.

Ch. 897 (SB 493) Sher. Health programs.

Existing law establishes the Healthy Families Program to arrange for the provision of health, dental, and vision services to eligible children pursuant to a federal program, entitled the State Children's Health Insurance Program. Under existing law, the program is administered by the Managed Risk Medical Insurance Board.

Existing law provides for the federal medicaid program, administered by each state, California's version of which is the Medi-Cal program. The Medi-Cal program, which is administered by the State Department of Health Services, provides qualified low-income persons with health care services.

Existing federal law provides for the Food Stamp Program, under which food stamps are distributed to eligible households. Under existing state law, the State Department of Social Services administers the Food Stamp Program under which the food stamps allocated to California are distributed by each county.

This bill would require the State Department of Health Services, in conjunction with the State Department of Social Services, to implement a simplified eligibility process as part of the Food Stamp Program to expedite Medi-Cal program and Healthy Families Program enrollment for food stamp recipients who are not enrolled in those programs. The bill would require each county health department to develop a data list of family members residing in

eligible food stamp households who are not enrolled in the Medi-Cal program or the Healthy Families Program. The bill would also require the county welfare department to develop a notice to inform individuals identified on the data list that they may be entitled to receive benefits under the Medi-Cal program or the Healthy Families Program, and would specify the further duties of the county in this regard. The bill would specify that counties shall include the cost of implementing the above data list and notice provisions in their annual administrative budget requests to the State Department of Health Services.

Because the bill imposes certain requirements on each county, the bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 898 (SB 680) Figueroa. Health facility data.

Existing law, the Health Data and Advisory Council Consolidation Act, operative until June 30, 2004, requires every organization that operates, conducts, or maintains a health facility to make and file with the Office of Statewide Health Planning and Development, specified reports containing various financial and patient data.

This bill would additionally impose the above requirements on every organization that owns a health facility.

This bill would revise the type of data required to be filed with the office.

Existing law also requires that the office publish certain patient outcome reports for specified periods.

This bill would revise the data that the office shall publish and would revise the periods to which the reports shall apply.

Existing law requires the office to maintain a file of all reports filed under the Health Data and Advisory Council Consolidation Act.

This bill would require the office also to post all reports on its Web site, and would specify that the reports include a discussion of findings, conclusions, and trends concerning the overall quality of medical outcomes for procedures and conditions studied by the reports.

The bill would delete the provision limiting the duration of the operation of the Health Data and Advisory Council Consolidation Act.

Ch. 899 (SB 780) Ortiz. Protection of the exercise of constitutional rights.

Existing provisions of federal law make it a crime and provide a civil remedy for the commission of certain activities that interfere with a person's access to reproductive health services facilities or with a person's participation in religious services or that damage or destroy property of a reproductive health facility or place of worship.

Existing provisions of state law authorize a civil action for damages resulting from the commission of specified activities that interfere with a person's access to a health facility or with the facility's functioning, and a court in which a proceeding for this relief is filed, is required to take all reasonable action to protect, as specified, the parties and witnesses in the matter.

Under other existing provisions of state law, it is a crime to make a threat, as specified, causing a person to refrain from engaging in a religious service or to commit an act of terrorism, as specified, at a place of religious worship or at a location where abortion counseling services, education, or other specified activities are conducted. Existing law also

makes it a crime to damage or destroy the real or personal property of a place of worship or to interfere with the exercise of a person's religious beliefs because of his or her religion.

Under existing law, the Attorney General is required to collect from local law enforcement agencies information relating to crimes motivated by, among other personal characteristics, a person's religion, which the Department of Justice analyzes and submits in an annual report to the Legislature.

This bill would add similar provisions in state law to make it a crime and would provide a civil remedy for the commission of the acts prohibited under federal law, as described above. The bill would require a court in proceedings regarding the prohibited acts to take all actions reasonably required to protect the safety and privacy of the parties, witnesses, and persons who are victims, or at risk of becoming victims, of the prohibited activities. This bill would allow specified persons to use pseudonyms in civil actions related to prohibited acts. The bill would authorize as remedies in the civil action injunctive relief, compensatory and punitive damages, attorney's fees, costs of the suit, and statutory damages. This bill would also authorize the Attorney General, a district attorney, or a city attorney to file an action to enjoin prohibited acts, for compensatory damages to persons aggrieved by prohibited acts, and for civil penalties, as specified.

The bill would also require the Attorney General to assume specified duties related to planning, information gathering, and analysis with respect to anti-reproductive-rights crimes, as defined. The bill would also require the Attorney General to submit various reports on this issue to the Legislature. The bill would require the Commission on Peace Officer Standards and Training to develop a training course on anti-reproductive-rights crimes. This bill would provide that the requirements for information gathering, reporting, planning, and course development related to anti-reproductive-rights crimes would be repealed on January 1, 2007.

Because this bill would create a new crime and would impose a reporting requirement on local law enforcement agencies, it would impose a state-mandated program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 900 (SB 1169) Alpert. Pharmacy.

Under existing law, a pharmacist may not, in general, furnish a dangerous drug except upon the prescription of a physician, dentist, podiatrist, optometrist, or veterinarian. However, existing law provides for certain exemptions.

This bill would authorize a pharmacist to initiate emergency contraception drug therapy in accordance with standardized protocols developed by the pharmacist and an authorized prescriber acting within his or her scope of practice. The bill would require a pharmacist who initiates emergency contraception drug therapy pursuant to these provisions to provide the recipient with a standardized fact sheet developed by the California State Board of Pharmacy, in consultation with the State Department of Health Services, the American College of Obstetricians and Gynecologists, the California Pharmacists Association, and other health care organizations. The bill would also require that prior to performing this procedure a pharmacist complete a specified training program.

This bill would incorporate additional changes in Section 4052 of the Business and Professions Code proposed by AB 826, to be operative only if AB 826 and this bill are both enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Because a violation of the Pharmacy Law is a misdemeanor, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 901 (AB 2) Alquist. Independent expenditure committees.

Under existing law, the Political Reform Act of 1974, a committee that receives contributions totaling \$1,000 or more in a calendar year, known as a recipient committee, is required to file a statement of organization within 10 days after qualification as a recipient committee, as specified. Existing law further requires a committee that qualifies as a recipient committee during the period ending 17 days before an election to file the information required by the statement of organization by telegram or personal delivery within 24 hours of qualifying as a recipient committee.

This bill would require an independent expenditure committee that qualifies as a recipient committee within a period specified by statute preceding an election for which it has made independent expenditures of \$1,000 or more, as specified, to file the information required to be reported in the statement of organization within 24 hours of qualifying as a recipient committee.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties upon persons who violate the provisions of the bill.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the Political Reform Act of 1974, would therefore require a $\frac{2}{3}$ vote.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 902 (AB 56) Shelley. Voting Modernization Bond Act of 2002.

This bill would enact the Voting Modernization Bond Act of 2002 (Shelley-Hertzberg Act), which, if approved, would authorize, for purposes of assisting counties in the purchase of updated voting systems, the issuance, pursuant to the State General Obligation Bond Law, of bonds in the amount of \$200,000,000.

The bill would provide for submission of the act to the voters at the March 5, 2002, statewide election.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 903 (AB 140) Strom-Martin. Rural telecommunications infrastructure: grants.

(1) Existing law creates the High-Cost Fund-A Administrative Committee and the High-Cost Fund-B Administrative Committee to advise the Public Utilities Commission regarding programs to provide for transfer payments to telephone corporations providing services in high cost areas and to carry out the programs under the commission's authority. Existing law creates the California High-Cost Fund-A Administrative Committee Fund and

the High-Cost Fund-B Administrative Committee Fund. Moneys in the funds may be expended, as specified, upon appropriation in the annual Budget Act.

This bill would, under the Public Utilities Act, until January 1, 2006, also establish a grant program for the construction of telecommunications infrastructure, as prescribed.

The bill would provide that the corporations receiving transfer payments shall continue to be fully reimbursed for the costs they are entitled to recover.

Under the bill, the funding for the grant program would be from the existing California High-Cost Fund-A Administrative Committee Fund or the High-Cost Fund-B Administrative Committee Fund, or both, up to a specified annual limit, as determined by the commission. The bill would require the commission to award grants, as specified. The bill would require the commission to establish a working group to develop technical criteria for evaluating the grants. Because, under the act, a violation of these provisions would be a crime, this bill would impose a state-mandated local program by creating new crimes.

The bill would prohibit any appropriation from the California High-Cost Administrative Committee Fund-B for the purposes of the grant program until the United States Supreme Court decides a specified case regarding high-cost funding, the commission recalculates the statewide average cost to serve a residential line stated in a specified decision of the commission, as it determines to be appropriate, and the commission is current on all claims made by carriers for service provided in high-cost areas, except as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 904 (AB 280) Robert Pacheco. Precinct formation: voters.

Existing law prescribes the duties of county elections officials in connection with the formation of election precincts or the change of precinct boundaries, among other things, and provides that the number of voters may not exceed 1,000 in any new or changed voting precinct. Existing law also requires the precinct boundaries for a general election to be the same as the precinct boundaries for a primary election, except as specified.

This bill would increase to 1,250 in counties with a population of 1,000,000 or more, the maximum number of voters allowable in a voting precinct. The bill would require an elections official to provide to the Secretary of State and to the public written information that addresses specified factors before establishing a precinct in which the number of voters exceeds 1,000. It would require a county that increases an election precinct to more than 1,000 voters to report that action to the Secretary of State and would require the Secretary of State to report to the Legislature by January 1, 2004, as specified.

Existing law permits the consolidation of election precincts for a local, special, or consolidated election, and certain statewide elections, so that not more than 6 existing precincts may be consolidated into one election precinct, with the polling place located within the boundaries of the consolidated precinct.

This bill would delete the authorization to consolidate precincts for a special election.

Existing law requires that the precinct board consist of a minimum of one inspector and 2 clerks.

This bill would require that the precinct board consist of a minimum of one inspector and 3 clerks if the elections official opts to increase precinct size pursuant to a specified provision of this bill.

The provisions of this bill would remain in effect only until January 1, 2005.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new program or

higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

Ch. 905 (AB 549) Longville. California Energy Commission: building standards.

Existing law requires the State Energy Resources Conservation and Development Commission to prescribe, by regulation, various energy efficiency design standards for residential and nonresidential buildings.

This bill would require the commission to investigate options and develop a plan to decrease wasteful peakload energy consumption in existing residential and nonresidential buildings. The bill would require the commission to use existing funds to investigate those options and develop a plan and to report its findings, on or before January 1, 2004, to the Legislature.

This bill would require electric and gas utilities to provide support for building standards in consultation with the commission, to the extent that funds are made available to the utilities for that purpose.

Ch. 906 (AB 673) Migden. Forensic identification.

(1) Existing law requires various criminal offenders, persons found guilty by reason of insanity, and registered sex offenders to provide DNA samples to the Department of Justice for inclusion in the DNA and Forensic Identification Data Base.

This bill would require people who have been convicted of or who have pled guilty or no contest to burglary, robbery, arson, or carjacking, or an attempt to commit these offenses, to provide DNA samples to the Department of Justice for inclusion in the data base. By increasing the duties of local officials, this bill would impose a state-mandated local program.

The bill furthermore would add probation officers, prosecuting city attorneys' offices, courts, and administrative tribunals to the list of agencies and officers to which DNA and other forensic identification information shall be released, as specified; impose specified criminal and civil penalties if a person uses an offender sample or DNA profile for other than criminal identification or exclusion purposes, or the knowing disclosure of DNA or other forensic identification information, developed pursuant to these provisions, to an unauthorized individual or agency, or for other than identification purposes; subject the Department of Justice, but not its employees, to liability for an unauthorized disclosure under the provisions; would provide, among a number of exemptions, that the public disclosure by a law enforcement agency of the fact of a DNA profile match would not be a violation of the provisions; make clarifying changes to related provisions; and provide that this bill shall only become operative if both this bill and SB 83 are enacted and become effective. By creating new crimes and increasing the penalties on existing crimes, this bill would impose a state-mandated local program on local government.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 907 (AB 1171) Dutra. Highways: toll bridges: funding.

(1) Existing law imposes a seismic retrofit surcharge equal to \$1 per vehicle for passage on the state-owned toll bridges in the region within the area of the jurisdiction of the

Metropolitan Transportation Commission, except for vehicles that are authorized toll-free passage on those bridges. Revenue generated from the surcharge is required to be deposited in the Toll Bridge Seismic Retrofit Account in the State Transportation Fund, which is continuously appropriated without regard to fiscal years to the Department of Transportation for the purpose of funding seismic retrofit of currently listed bridges. The department is required to determine the date when (a) sufficient funds have been generated for the completion of seismic retrofit and the replacement of the San Francisco-Oakland Bay Bridge, as specified, and (b) sufficient funds have been generated to pay for any costs added under a specified provision relating to the San Francisco-Oakland Bay Bridge. The department is required to notify the Secretary of State of that date, immediately upon making that determination. These provisions are repealed on January 1, 2008, or on the date the Secretary of State receives the specified notice, whichever occurs first.

This bill would delete the repeal date described above and would instead provide a repeal date occurring when the California Transportation Commission notifies the Secretary of State that sufficient funds have been generated to meet certain obligations, as defined, and thereby would make an appropriation by extending the time during which the money in the account would be continuously appropriated. The bill would require the money in the account that is in excess of those funds needed to meet the toll commitment and other elements requiring to meet the obligations of the department's financial plan to be available to the Bay Area Toll Authority for funding certain purposes and projects that are consistent with existing law requirements.

The bill would require the department to transfer the funds annually to the authority upon receiving notification from the authority's governing board.

The bill would prohibit the increase in tolls beyond the level needed to complete the seismic retrofit and replacement of bay area bridges, as described above, unless the California Infrastructure and Economic Development Bank makes certain described findings and the Department of Finance confirms those findings.

(2) Existing law sets forth the cost estimates at \$2,620,000,000 to retrofit the state-owned toll bridges and to replace the east span of the San Francisco-Oakland Bay Bridge in accordance with a schedule.

This bill would revise that cost estimate to \$4,637,000,000 and would correspondingly revise the schedule.

(3) Existing law provides that the estimated cost of replacing the east span of the San Francisco-Oakland Bay Bridge is based on certain assumptions.

The bill would instead provide that this estimated cost is based on specific conditions, rather than assumptions.

(4) Existing law provides that it is the intent of the Legislature that specific amounts from various funds be allocated through the 2004–05 fiscal year, for the seismic retrofit or replacement of the identified state-owned toll bridges.

This bill would require the continued allocation of the funds until expended, rather than through the 2004–05 fiscal year, and would revise the amount available from the seismic retrofit surcharge, subject to certain limitations, and would include the funds necessary to meet principal obligations, as defined, of not less than \$642,000,000 from the state's share of the federal Highway Bridge Replacement and Rehabilitation Program.

The bill would revise the proportional reduction of funding formula provided under existing law, if the cost of retrofitting or replacement, or both, is less than the statutory cost estimate set forth above.

The bill would require the department, upon substantial completion of the retrofit work of the state-owned toll bridges, to submit a final report prepared by an independent accounting firm identifying the sources and use of the funds. The bill would require the report to serve as the basis for any proportional reduction in funding as described above.

The bill would provide that if the department issues federal highway grant anticipation notes to fund the retrofitting of state owned toll bridges and the replacement of the east span

of the San Francisco-Oakland Bay Bridge, certain adjustments in the state transportation improvement program county share shall not apply.

The bill would authorize the department to enter into certain financial arrangements to finance or refinance the seismic retrofit project costs which would include the issuance of revenue bonds.

The bill would provide that nothing in the bill shall be construed to negatively impact any project that is programmed prior to January 1, 2002, in the state transportation improvement program.

Ch. 908 (AB 1335) Cohn. Transportation: regional and local project funds: letter of no prejudice.

Existing law authorizes a regional or local entity to expend its own funds for any component of a transportation project within its jurisdiction that is included in the current fiscal year's state transportation improvement program and for which the commission has not made an allocation. The amount expended is authorized to be reimbursed by the state, subject to annual appropriation by the Legislature, if (1) the California Transportation Commission makes an allocation for, and the Department of Transportation executes a fund transfer agreement for, the project during the same fiscal year as when the regional or local expenditure was made, (2) expenditures made by the regional or local entity are eligible for reimbursement in accordance with state and federal laws and procedures, and (3) the regional or local entity complies with all legal requirements for the project, as specified.

This bill would authorize a regional or local entity that is a lead applicant for an eligible project included in an adopted regional transportation plan to apply to the commission for a letter of no prejudice for the project in order to expend its own funds for any component of the transportation project, subject to the approval of the commission. The bill would authorize the commission, in consultation with regional and local entities, and the department, to develop guidelines to implement these provisions.

Ch. 909 (AB 1475) Liu. Employment harassment: religious exemption.

Existing provisions of the California Fair Employment and Housing Act generally exempt nonprofit religious corporations and associations from the act's provisions providing remedies for specified unlawful employment practices, including discrimination and harassment. However, the provisions of the act making discrimination on various bases an unlawful employment practice are made applicable, with certain exceptions, to persons employed by a religious corporation or association to perform other than religious duties, as specified, at a health care facility operated by the religious corporation or association for the provision of health care that is not restricted to adherents of the religion.

Existing provisions of the act make it an unlawful employment practice for an employer to harass an employee, an applicant, or a person providing services pursuant to a contract. This existing law does not apply to employers that are nonprofit religious corporations or associations.

This bill would make the provisions of the act prohibiting harassment applicable, with certain exceptions, to persons employed by a religious corporation or association to perform other than religious duties, as specified, at a health care facility operated by the religious corporation or association for the provision of health care that is not restricted to adherents of the religion.

Ch. 910 (SB 504) Scott. Employment discrimination: nonprofit educational institutions.

Under existing law, nonprofit public benefit corporations are subject to the antidiscrimination provisions of the California Fair Employment and Housing Act pertaining to employers, except that nonprofit public benefit corporations incorporated to provide health care on behalf of a religious organization are excluded from the provisions

of the act pertaining to employers with respect to employment, including promotion, of an individual of a particular religion in an executive or pastoral-care position connected with the provision of health care.

This bill, notwithstanding any other provisions of law, would permit nonprofit public benefit corporations formed by or affiliated with a particular religion, that operate an educational institution as the sole or primary activity, to restrict employment, including promotion, in any or all employment categories to individuals of the particular religion. The bill would specify that nonprofit public benefit corporations remain subject to certain existing prohibitions against discrimination in employment. The bill would also make technical, nonsubstantive changes.

Ch. 911 (SB 759) Murray. Transportation: traffic congestion relief.

Existing law provides for the establishment and annual update of a 5-year plan for funding infrastructure.

This bill, on and after the date that Assembly Constitutional Amendment No. 4 (Res. Ch. 87, Stats. 2001) is approved by the voters, would require the Department of Finance to prepare an annual audit report examining any expenditures made pursuant to the allocations authorized under proposed Article XIX B of the California Constitution. The bill would require the report to be made available to the public and to be submitted to both houses of the Legislature.

The bill would require the funds allocated under certain provisions of proposed Article XIX B of the California Constitution, when appropriated, to be apportioned in accordance with, and subject to, certain apportionment formulas and other requirements set forth in specified provisions of existing law relating to allocations from the Transportation Investment Fund.

The bill would require all ballots for the election during which ACA 4 is submitted to the voters for approval to contain certain ballot statements and labels containing certain information relating to that measure.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 912 (SB 1170) Sher. State vehicle fleet.

The Warren-Alquist State Energy Resources Conservation and Development Act specifies the policies of the state regarding energy resources and requires the State Energy Resources Conservation and Development Commission to acquire and analyze information to ascertain future energy problems and uncertainties, including impacts of petroleum price increases and projected conservation measures on the demand for energy.

This bill would make it the policy of the state to minimize the economic and environmental costs due to the use of petroleum-based fuels and other transportation fuels by state agencies. The bill would require the commission, the Department of General Services, and the State Air Resources Board to develop and adopt fuel-efficiency specifications governing the purchase by the state of motor vehicles and replacement tires. The bill would require the commission and the department, in developing the specifications, to jointly conduct a study to examine state vehicle purchasing patterns and to analyze the costs and benefits of reducing the energy consumption of the state fleet by no less than 10% on or before January 1, 2005. The bill would also require the commission, the department, and the state board, on or before January 31, 2003, and annually thereafter, to develop and adopt air pollution emission specifications governing the purchase by the state of passenger cars and light-duty trucks that meet or exceed the state's Ultra-Low Emission Vehicle (ULEV) standards for exhaust emissions. The bill also would require the commission, on or before January 31, 2003, to develop and adopt recommendations for consideration by the Governor and Legislature for a California State Fuel-Efficient Tire Program.

Ch. 913 (SB 19) Escutia. Pupil health.²⁸

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Existing law requires the governing board of a school district to give diligent care to the health and physical development of pupils.

This bill would authorize every public school to post a summary of nutrition and physical activity laws and regulations, and the school district policies and would require the State Department of Education to develop the summary of the laws and regulations.

(2) Existing law requires that 50% of the items, other than foods reimbursed under federal law, offered for sale each schoolday at any schoolsite by any entity or organization during regular school hours be selected from a prescribed list of foods.

The bill would, commencing January 1, 2004, require the sale of all foods on school grounds at elementary and middle schools, as defined, and at middle and high schools participating in a pilot program established by the bill, to be approved by the person or persons designated for this purpose by the school district, subject to funding being appropriated in the Budget Act of 2003.

The bill would, subject to funding being appropriated in the Budget Act of 2003, commencing January 1, 2004, with certain exceptions, permit the sale of foods at elementary schools only as full meals during breakfast and lunch periods and would require items that are sold during specified breaks to meet certain standards. The bill would restrict the sale of specified beverages at elementary and middle schools. The bill would require certain foods sold to pupils at specified times to meet specified requirements.

(3) Existing law requires the Superintendent of Public Instruction to reimburse school districts for certain costs associated with free and reduced price meals.

This bill would, commencing January 1, 2004, require that reimbursement to be increased to 23¢ per meal sold or served to pupils at elementary or middle schools.

(4) Existing law provides for various advisory committees to be formed at the school district level.

This bill would authorize a school district maintaining at least one middle school to convene a Child Nutrition and Physical Activity Advisory Committee that would develop and recommend to the governing board of the school for its adoption a school district policy on nutrition and physical activity. The committee would include school district governing board members, school administrators, food service directors, food service staff, parents, pupils, physical and health education teachers, dietitians, doctors, nurses, and interested community members. In developing the policy, the committee would be required to hold at least one public hearing. The bill would require the State Department of Education to provide a grant to a school district that develops and adopts a policy by January 1, 2003. The bill would appropriate \$5,500,000 to the Superintendent of Public Instruction for grants and technical support to school districts, and for program evaluation, as prescribed.

The funds appropriated by this bill for grants to school districts would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(5) By imposing new requirements on school districts, the bill would impose state-mandated local programs.

(6) This bill would require the Superintendent of Public Instruction to supervise the implementation of certain provisions enacted by the bill, as prescribed, for noncompliance. If the Superintendent of Public Instruction finds that a school district or county superintendent of schools fails to comply with those provisions, the superintendent would be required to provide the school district with a noncompliance notification and the school district would be required to adopt a corrective plan.

(7) The bill would require the Department of Education to establish a pilot program in which high schools voluntarily adopt food sale requirements.

(8) This bill would require the State Department of Education, with advice from the Child Nutrition Advisory Council, to design and implement a financial incentive grant program to help and encourage schools to implement their policies and meet specified goals.

(9) This bill would require the State Department of Education to monitor implementation of the program and to report to the Legislature annually and on June 1, 2004, as prescribed.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 914 (SB 786) Scott. Purchase of instructional materials.

(1) Under existing law, the Leroy Greene California Assessment of Academic Achievement Act, the State Board of Education is required to adopt statewide academically rigorous content standards in the core curriculum areas of reading, writing, mathematics, history/social science, and science. Existing law, the Schiff-Bustamante Standards-Based Instructional Materials Program, requires the State Department of Education to apportion funds appropriated for the purchase of instructional materials that are aligned to those language arts, mathematics, history/social science, or science content standards in a specified amount.

This bill would require that each school district that receives resources under that program or any other resources for that purpose purchase instructional materials for pupils in kindergarten and grades 1 to 12, inclusive, that are aligned with state content standards in language arts, mathematics, history/social science, or science, as adopted by the State Board of Education, within 2 years of the date the materials have been adopted by the State Board of Education, and would prescribe related matters. The bill would also authorize the State Board of Education to grant extensions for the purchase of those instructional materials or textbooks beyond the 2-year period if certain requirements are met. The bill would require a school district to report to the Superintendent of Public Instruction any resources received under the Schiff-Bustamante Standards-Based Instructional Materials Program that have not been used within 2 years of their receipt by the school district and would authorize the Superintendent of Public Instruction to offset future apportionments of instructional materials funding in order to recover the unspent funds. By imposing new requirements on school districts regarding the purchase of instructional materials, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 915 (AB 63) Cedillo. Taxation: disclosure.

Existing law prohibits the disclosure of any information concerning any taxpayer by the State Board of Equalization, the Franchise Tax Board, and the Director of Employment Development to any person, except as specifically authorized by statute. It permits the disclosure of certain information by the Franchise Tax Board to the Commissioner of Internal Revenue of the United States, other California tax officials, the Multistate Tax Commission, the tax officers of another state, and the tax officials of Mexico, under specified conditions.

This bill would, until December 31, 2008, additionally permit, under specified conditions, the disclosure of tax information to tax officials of any city. The bill would require that the

Franchise Tax Board be reimbursed its cost of providing this information to a city, as specified.

This bill would require the California Research Bureau to make a report to the Legislature, by December 31, 2005, regarding the impact and effect of the bill.

This bill would also provide that it will become operative only if this bill and AB 205 are both enacted and become effective on or before January 1, 2002.

Ch. 916 (AB 302) Migden. Election ballots and voter pamphlets.

Existing law requires an absent voter, after marking the absentee ballot, to return the ballot either by mail or in person to the official from whom it came or in person to any member of a precinct board at any polling place within the jurisdiction, except that an absent voter who, because of illness or other physical disability, is unable to return the ballot, may designate a family member, as specified, to return the absentee ballot.

This bill would authorize the absent and disabled voter to designate any person residing in the voter's household to return the ballot. The bill would provide that, notwithstanding this provision, no absent voter's ballot shall be returned by a paid or volunteer worker of a campaign or controlled committee, except as specified. The bill would require the absentee ballot identification envelope to include the name of the person authorized to return it.

Ch. 917 (AB 696) Longville. Online campaign disclosure.

Under existing law, the Secretary of State, in consultation with the Fair Political Practices Commission, is required to develop online and electronic filing processes for use by persons and specified entities required to file statements and reports with the Secretary of State's office, and to make 2 reports to the Legislature.

This bill would require those processes to enable a user to comply with all of the disclosure requirements of the Political Reform Act of 1974, including a means or method whereby filers subject to online and electronic filing disclosure requirements may submit required filings free of charge, and that does not provide any additional or enhanced functions or services that exceed the minimum requirements necessary to fulfill the disclosure provisions of the act. It would require at least one means or method to be made available no later than December 31, 2002.

This bill would also change the date by which one of the above-described reports is due, and require a 3rd report to the Legislature, due no later than January 31, 2003. The bill would declare that these changes are declaratory of existing law.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

This bill would appropriate \$600,000 from the General Fund to the Secretary of State to defray the costs of developing software as required by this act.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 918 (AB 719) Wiggins. Absentee voters.

Existing law authorizes a voter who has specified physical impairments or conditions to apply for permanent absent voter status.

This bill would additionally authorize a voter who is employed in a position that requires the voter to work shifts of 24 consecutive hours or more to apply for permanent absent voter status.

Ch. 919 (AB 733) Longville. Elections: extension of deadlines.

The Elections Code prescribes various deadlines for tabulating and reporting the vote in elections.

This bill would authorize a county elections official, where a postelection deadline would prevent the proper tabulation or recounting of ballots, to petition the superior court to extend any postelection deadline for the counting of votes or reporting of vote totals so that all votes are counted pursuant to Section 2.5 of Article II of the California Constitution. The bill would also define “vote” for purposes of those constitutional provisions.

The bill would not become operative unless a specified constitutional amendment adding those constitutional provisions is adopted by the voters.

Ch. 920 (AB 1115) Committee on Revenue and Taxation. Taxation: residency requirements; part-year resident: AMT.

The Franchise Tax Board collects and administers the income taxes of California residents. Existing law provides formulas for determining the income tax owed by individuals that are part-year or non-California residents. Existing law is silent on the tax treatment of loss carryovers, deferred deductions, and deferred income that vested prior to the time individuals became part-year or non-California residents.

This bill would revise and recast the computation of personal income tax with respect to part-year or non-California residence, and would, for that purpose specify the manner in which loss carryovers, deferred deductions, and deferred income are to be calculated in computing a part-year or non-California resident’s California income tax liability.

The Personal Income Tax Law and the Bank and Corporation Tax Law impose an alternative minimum tax that may be reduced by specified credits.

This bill would make technical and clarifying changes with respect to the ordering and allowance of those credits, as provided.

Existing law with respect to the administration of income and corporate taxes requires taxes to be paid, and claims for refunds to be made, prior to maintaining an action for illegally collected taxes.

This bill would provide that an otherwise valid claim for a refund shall be a claim only for purposes of tolling the statute of limitations under specified conditions, if the tax has not been paid in full.

Existing law authorizes the Franchise Tax Board to disclose tax returns and return information under specified conditions.

This bill would additionally authorize that disclosure to designated persons for use in actions or proceedings affecting the personnel rights of employees or former employees, as specified. An unauthorized disclosure by a person of the information received under this authority would subject that person to criminal penalties. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 921 (AB 1325) Negrete McLeod. Political Reform Act of 1974: lobbyists: Public Utilities Commission: payments to influence legislative or administrative action.

Existing provisions of the Political Reform Act of 1974 generally define “administrative action,” to mean, among other things, the proposal, enactment, or defeat of a state agency regulation in any ratemaking proceeding or any quasi-legislative proceeding.

This bill would define “ratemaking” and “quasi-legislative proceeding,” as specified, for purposes of proceedings before the Public Utilities Commission (PUC).

Existing provisions of the act generally define a “lobbyist” as an individual who receives \$2,000 or more in a calendar month or whose principal duties are to communicate directly or through agents with an elective state official, agency official, or legislative official for the purpose of influencing legislative or administrative action.

This bill would provide that a proceeding before the PUC constitutes “administrative action” for purposes of this provision if the proceeding is a “ratemaking proceeding” or a “quasi-legislative proceeding” as defined by this bill, except as specified.

Existing provisions of the act define a “payment to influence legislative or administrative action” as including specified types of payment.

Existing law requires a lobbyist employer and any person who makes payments to influence legislative or administrative action of \$5,000 or more in a calendar quarter to file periodic lobbying reports disclosing specified items of information, including overhead expenses and payments to employees who spend 10% or more of their compensated time in lobbying activities in any one month.

This bill would provide that, in lieu of reporting those payments, a filer that makes payments to influence a ratemaking or quasi-legislative proceeding before the PUC may report only the portion of payments that are made to or for time spent by the filer’s attorneys or witnesses in appearing, testifying, or preparing to appear or testify in that type of proceeding before the commission, except as specified.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of this bill.

This bill would also make technical, nonsubstantive changes.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act’s purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements. Proposition 208, an initiative measure approved by the voters at the November 5, 1996, statewide general election, makes the amendment provisions of the Political Reform Act applicable to the amendment of that initiative measure. Proposition 208, however, has been generally superseded by Proposition 34, approved by the voters at the November 7, 2000, statewide general election, with the exception of certain provisions, one of which is amended by this bill.

This bill, which would declare that it furthers the purposes of the Political Reform Act of 1974 and Proposition 208, would therefore require a $\frac{2}{3}$ vote.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 922 (AB 1520) Shelley. Elections.

Existing provisions of the Elections Code permit the use of a mark in lieu of a signature in certain instances. Existing general provisions of law permit the use of a mark in lieu of a signature on a sworn statement only if witnessed by 2 other persons.

This bill would permit the use of a mark when witnessed by one person and would permit the use of a person’s mark where a signature is otherwise required by the Elections Code if the person is unable to provide a signature and the mark is attested by a witness.

Existing law authorizes voters who have specified impairments or conditions to apply for permanent absent voter status.

This bill would impose a state-mandated local program by authorizing any voter to apply for permanent absent voter status. This bill would require the Secretary of State to report annually regarding the impact, if any, that permitting all voters to apply for permanent absent voter status has on increasing voter participation.

Existing law makes it a misdemeanor for a person having charge of a completed absent voter ballot to willfully interfere or cause interference with its return to the local elections official.

This bill would specify that this offense is punishable by imprisonment in the county jail for up to 6 months, by a fine of up to \$10,000, or by both.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 923 (AB 1711) Committee on Elections, Reapportionment and Constitutional Amendments. Voter registration index.

Existing law requires county elections officials to provide up to 2 copies of the printed indexes of voter registration for the primary and general elections, or for any special election at which a partisan office is being filled, to a requesting state or county party central committee.

This bill would permit county elections officials to furnish one copy of the indexes in electronic form, in lieu of furnishing 2 copies in print.

Ch. 924 (AB 1712) Committee on Elections, Reapportionment and Constitutional Amendments. Special election: local initiative measure.

Existing law requires that an election for a county, municipal, or district initiative measure that qualifies for the local ballot pursuant to specified procedures be held not less than 88 nor more than 103 days after the date of the order of election. Existing law provides, when it is legally possible to hold a special election on any of those measures within 180 days prior to a regular or special election held within the same territory, that the election on the initiative measure may be held on the same date as, and consolidated with, that regular or special election.

This bill would provide that when it is legally possible to hold a special election for a county, municipal, or district initiative measure that qualifies for the local ballot pursuant to specified procedures between a regularly scheduled statewide direct primary election and a regularly scheduled statewide general election in the same year, the special election may be held on the same date as, and consolidated with, the statewide general election.

Ch. 925 (SB 7) Peace. Voting.

Existing law requires that a printed absent voter application form inform the voter, among other things, that if the voter is unaffiliated with a political party, the voter may request an absentee ballot for a particular political party if that party has adopted a party rule, duly noted to the Secretary of State, authorizing that vote. It requires the application to contain a telephone number that the voter may call to inquire which political parties have adopted such a rule.

This bill would require that the telephone number be a toll-free telephone number established by the Secretary of State that the voter may call to access information regarding which parties have adopted the voting rule in question.

Existing law allows voters meeting certain conditions to be given permanent absent voter status. Absentee ballots from permanent absent voters are subject to the same deadlines and are processed and counted the same as all other absent voter ballots.

This bill would require county elections officials, before primary elections, to mail to each voter on the permanent absent voter list who is unaffiliated with a political party a notice and application regarding voting in the primary elections. The bill would require the notice to advise the voter that he or she may request an absentee ballot for a political party, if the particular political party adopted a party rule as specified authorizing voters to vote in their primary election.

This bill would also require that the notice contain a toll-free telephone number established by the Secretary of State as to which political parties have adopted rules permitting absentee votes and a preprinted statement for the voter to check indicating that the voter is unaffiliated with any party but, for that primary election only, requests an absentee ballot for a specified party.

Existing law requires the chairman of a political party to provide written notice of the adoption of a rule as described above to the Secretary of State not later than the 60th day prior to the partisan primary election at which the vote is authorized.

This bill would require that the written notice of the adoption of the rule be provided to the Secretary of State not later than the 135th day prior to the partisan primary election at which the vote is authorized.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 926 (SB 373) Torlakson. Environmental education: waste: recycling.

(1) Existing law requires the State Board of Education to include in the science framework appropriate language addressing the issue of integrated waste management in the ecology and environmental studies areas.

Existing law requires the Curriculum Development and Supplemental Materials Commission to study problems of courses of study in the schools of the state and, upon the request of the State Board of Education, make recommendations for the adoption of minimum standards for courses of study in preschool, kindergarten, elementary, and secondary school.

This bill would require the State Board of Education and the State Department of Education to revise, as necessary, the framework in science to include specified concepts regarding environmental education. The bill would require the Office of Integrated Environmental Education of the California Integrated Waste Management Board, which would be established by this bill, to provide the commission with information and materials to aid the commission in implementing this requirement. The bill would provide for the delayed implementation of these revisions until the appropriate curriculum framework adoption cycle commences.

(2) Existing law requires the governing board of every school district to prescribe and enforce the course of study for kindergarten and specified elementary grades.

This bill would require the Office of Integrated Environmental Education to create the Environmental Ambassador Pilot Program, commencing July 1, 2002.

The bill would require the office to use the findings and results of the pilot program to develop and refine the unified education strategy that the office would be required to adopt and would require the office to submit a report to the Governor and the Legislature by June 30, 2005, on the results of the pilot program. The bill would repeal the program on January 1, 2007.

This bill would require the Office of Integrated Environmental Education, in cooperation with the State Department of Education, the State Board of Education, and the Secretary for Education, to develop and implement a unified education strategy on the environment for elementary and secondary schools in the state. The bill would require the office to submit a report to the Legislature and the Governor by June 30, 2005, on the implementation of the unified education strategy. The bill would also make conforming changes.

(3) Existing law requires the California Integrated Waste Management Board to develop and implement a source reduction and recycling program for school districts that includes, among other things, the development of a model waste reduction and recycling program for school districts and schools.

The California Integrated Waste Management Act of 1989 requires each city, county, city and county, and regional agency, if any, to develop a source reduction and recycling element of an integrated waste management plan containing specified components. The first and each subsequent revision of the element is required to divert 50% of the solid waste subject to the element, on and after January 1, 2000, except as specified. Existing law requires a city, county, or regional agency to submit an annual report to the board summarizing its progress in diverting solid waste from disposal.

This bill would authorize a school district and county office of education to coordinate with the local agency, as defined, in diverting solid waste from landfill disposal or transformation facilities.

The bill would require the board to develop models and school waste reduction tools that may be used by schools, school districts, county offices, and local agencies to implement waste reduction programs. The bill would require the board to provide training and ongoing technical and information assistance to local agencies, schools, county offices, and school districts on implementing waste reduction programs.

The bill would require the Division of the State Architect, in consultation with the board, to develop and maintain on its Web site a list of recycled materials and a list of environmentally preferable products that may be used in the construction and modernization of public school facilities.

The bill would require the board, in consultation with the State Department of Education, the State Board of Education, and the Secretary for Education, to establish a program to provide grants to schools and school districts to assist in the development and implementation of educational programs to teach source reduction, recycling, and composting and would require the State Department of Education, the State Board of Education, and the Secretary for Education, to adopt criteria for awarding these grants. The bill would exempt the adoption of the criteria from the procedures for the adoption of regulations.

The bill would require the board by January 1, 2004, to evaluate the implementation of school waste reduction plans in the state's schools, and if the board determines that less than 75% of schools have implemented a waste reduction and recycling program, the board would be required to recommend to the Legislature those statutory changes needed to require schools to implement such a program.

(4) The bill would appropriate \$1,500,000 from the fees imposed upon operators of solid waste disposal facilities and deposited in the Integrated Waste Management Fund, for expenditure by the board, to provide grants to county offices of education, school districts, and schools for the grant program established by the bill. The bill would authorize the board to expend not more than 5 percent of this amount for administrative costs. The bill would make a legislative declaration that the funds appropriated by the bill are not the proceeds of taxes within the meaning of Article XIII A of the California Constitution, but are the proceeds of fees for specified reasons.

Ch. 927 (SB 412) Vasconcellos. Campaign practices: political cyberfraud.

Existing law makes it unlawful for a person, with bad faith intent, to register, traffic in, or use an Internet domain name, as defined, that is identical or confusingly similar to the personal name of another living person or deceased personality, without regard to any goods or services offered.

This bill would make it unlawful for a person, with intent to mislead, deceive, or defraud, to commit an act of political cyberfraud.

This bill would define “political cyberfraud” as an act concerning a political Web site, as defined, that is committed with intent to deny a person access to a political Web site, deny a person the opportunity to register a domain name for a political Web site, or cause a person reasonably to believe that a political Web site has been posted by a person other than the person who posted the Web site. It would provide that political cyberfraud includes, but is not limited to, specified acts.

This bill would not apply to a domain name registrar, registry, or registration authority. It would make a violation of its provisions punishable by a fine not to exceed \$1,000 for each day the violation occurs and would authorize a court to order the transfer of a domain name as part of the relief awarded.

This bill would remain in effect only until January 1, 2003.

Existing law (Ch. 975, Stats. 2000) creates the Bipartisan California Commission on Internet Political Practices to study the issues presented by political activity on the Internet, and to report thereon to the Legislature by December 1, 2001.

This bill would extend the deadline for submittal of the report to September 30, 2002, would extend the existence of the commission accordingly, and would require the commission to include in its study the issue of political cyberfraud.

Ch. 928 (SB 919) Polanco. Outdoor advertising displays: Metropolitan Transportation Authority of Los Angeles County.

Existing law, the Outdoor Advertising Act, generally regulates the use of outdoor advertising displays. Existing law provides for the creation of the Los Angeles Metropolitan Transportation Authority with specified transportation planning and operating responsibilities.

This bill, notwithstanding any other provision of law, would prohibit any outdoor advertising display that exceeds 10 feet in either length or width, being built upon land or rights-of-way owned by the Los Angeles Metropolitan Transportation Authority unless the display complies with the Outdoor Advertising Act, the federal Highway Beautification Act, and certain local provisions. This bill would also prohibit the authority from disregarding or preempting any law, ordinance, or regulation of any city, county, or other local agency involving any outdoor advertising display.

Because a violation of the act is a crime, this bill would create a state-mandated local program by expanding the scope of that crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 929 (AB 134) Kelley. Water resources.

(1) The California Water Resources Development Bond Act authorizes the Department of Water Resources to enter into contracts for the sale, delivery, or use of water or power, or for other services and facilities, made available by the State Water Resources Development System (State Water Project) with public or private corporations, entities, or individuals, as prescribed. Existing law authorizes any public agency that has executed a contract with the state for a water supply to sell any water available to that agency directly to any ultimate water consumer within the agency, subject to certain limitations.

The Castaic Lake Water Agency Law authorizes the Castaic Lake Water Agency to acquire water and water rights, including water from the State Water Project. The agency law authorizes the agency to provide, sell, and deliver water at wholesale for municipal, industrial, domestic, and other purposes.

This bill would authorize the agency to exercise retail water authority within a specified area, in accordance with the County Water District Law and as otherwise specified. The bill, with a certain exception, would prohibit the agency from exporting groundwater produced

within that specified area. The bill would require the agency, during any rolling average 5-year period, to use imported water for not less than 50% of the water supply demand within that specified area, thereby imposing a state-mandated local program. The bill would require the agency to prepare a groundwater management plan, thereby imposing a state-mandated local program. The bill would require the agency, prior to formulating or adopting the plan, to form a representative advisory council, comprised as specified, and to consult with the council regarding all aspects of any proposed groundwater management plan.

(2) The County Water District Law prohibits the Coachella Valley Water District from imposing a replenishment assessment within an area of benefit that exceeds the sum of prescribed costs.

This bill would include within those prescribed costs the cost of recharging the groundwater basin with imported water from the State Water Project.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 930 (AB 153) Nakano. Board of Corrections.

Under existing law, the Board of Corrections is composed of 13 members, 3 of whom are ex officio members and 10 of whom are appointed by the Governor. Existing law requires that the 10 appointed members include persons from specified backgrounds, including one member who is a rank and file representative of a local corrections facility at the level of the first line supervisor or below with a minimum of 5 years of experience.

This bill would expand the board to 15 members by adding to the appointed members a 2nd rank and file representative of a local corrections facility. One of these 2 representatives would be required to be a juvenile probation officer and one would be required to be a deputy sheriff, as specified. A representative of a community-based youth service organization would also be added.

Ch. 931 (AB 624) Oropeza. Alcoholic beverages: licenses.

(1) The Alcoholic Beverage Control Act authorizes the Department of Alcoholic Beverage Control to impose reasonable conditions on the exercise of retail privileges under the act. The department may impose conditions on certain license transfers at the request of a local governing body in whose jurisdiction the license is located.

This bill would require the local governing body to make the request for imposition of conditions within 40 days after the department mails notice of the transfer request, if the license to be transferred is located in an area of undue concentration, as defined.

(2) The act prohibits the application for, and issuance of, an original retail off-sale beer and wine license for any premises if the applicant premises are located in a city, county, or city and county where the number of retail off-sale beer and wine licenses, or total number of retail off-sale beer and wine licenses and off-sale general licenses, exceeds one license for a certain number of inhabitants. Existing law also provides that, notwithstanding that prohibition, the department may approve an application for a retail off-sale beer and wine license in those areas if the applicant shows that public convenience or necessity would be served by the issuance, and certain other conditions are met. Existing law further provides that one condition for the issuance of the license is that the applicant premises are located in a crime reporting district that is below a certain specified threshold.

This bill would allow the department, in considering the application, to take into account adjacent crime reporting districts if the applicant premises are located within 100 feet of the boundaries of any adjacent district.

(3) Under existing law, an applicant for a retail license to sell alcoholic beverages, at a premises that is not currently licensed or for a different retail license, is required to mail a

notification of the application to every resident of real property within a 500-foot radius of the premises for which the license is to be issued.

This bill would require that notification to also be mailed to every owner of real property in that area, if the local jurisdiction in which the license is to be issued provides the applicant, free of charge, with the names and addresses of the owners of the real property. Additionally, the bill would require the notification to be written in English and Spanish, and would require the notice to include information on how to obtain the notice in other languages.

(4) This bill would state the intent of the Legislature in enacting these provisions.

Ch. 932 (AB 936) Vargas. Local public services. ²⁹

(1) Existing law establishes the Emergency Housing and Assistance Program within the Department of Housing and Community Development.

This bill would appropriate \$1,750,000 from the General Fund to the Department of Housing and Community Development to provide a grant to the City of San Diego to purchase 2 25-bed facilities for homeless persons who are diagnosed with severe mental illness.

(2) The existing Budget Act of 2001 appropriates \$20,000 to the Department of Parks and Recreation for allocation to the City of San Diego for the Stein Education Center.

This bill would require this amount to be allocated directly to the Stein Education Center.

(3) Existing law requires the Department of Forestry and Fire Protection to implement and administer various forest resource management programs.

The bill would reappropriate certain funds originally appropriated by the Budget Act of 1999, and reappropriated by Chapter 672 of the Statutes of 2000, for the establishment and development of the Guadalupe Trail in the City of San Jose, and areas surrounding the city.

(4) The existing Budget Act of 2001 appropriates \$59,329,000 to the Department of Boating and Waterways for local assistance in connection with local waterways.

This bill would require the department to recalculate the amount owed on a loan made by the department in connection with improvements to a specified marina at Lake Oroville.

Ch. 933 (AB 1093) Briggs. Horse racing: equine medication.

(1) Existing law authorizes the California Horse Racing Board to suspend or revoke a horse racing license and provides that the action of the board in suspending or revoking a license issued is final, except that the decision is subject to review by any court of competent jurisdiction, as specified. Under existing law, every steward or racing official who is not required to be licensed under specified provisions relating to track operators is required to be licensed by the board. Existing law authorizes the board to remove any racing official or employee in any case where it has reason to believe that the official or employee has been guilty of any dishonest practice in connection with horse racing, has failed to comply with any condition of the licensee's license, or has violated any law or any rule or regulation of the board.

This bill would generally require that enforcement proceedings that allege the use of a prohibited substance, as defined under class I, class II, or class III of the board's schedule of prohibited substances, be referred directly to the Office of Administrative Hearings for administrative adjudication and preparation of a proposed decision for action by the board. The bill would provide specified procedures for the hearing, including, among other things, that the licensee post a bond with the paymaster of purses, as specified. The bill would provide that the board may only modify or amend an administrative law judge's decision so as to decrease, mitigate, or suspend a sanction or penalty.

(2) Existing law, the Horse Racing Law, provides for the operation of horse racing in this state, and associated wagering, subject to regulation and oversight by the California Horse Racing Board as specified. The administration of any substance of any kind to a horse entered in a race is prohibited, unless the board has specifically authorized the use of the substance, and the quantity and composition. Existing law requires the board to classify violations of

NOTE: Superior numbers appear as a separate section at the end of the digests.

this provision based upon specified criteria. In addition to any other penalties that may be imposed, a violation of this provision is punishable by, among other things, the imposition of a monetary penalty of not more than \$10,000.

This bill would instead authorize the board to classify violations of this provision based on the specified criteria and would increase the monetary penalty for a violation involving a prohibited drug substance to not more than \$50,000, the actual amount to be determined, as specified. The bill would provide that the board may impose a monetary penalty of not more than \$100,000 for any other violation of the Horse Racing Law.

(3) Existing law allows racing associations, fairs, and the organization responsible for contracting with racing associations to form a private, statewide marketing association to market and promote thoroughbred and fair horse racing. The organization is required to annually submit a statewide marketing and promotion plan to the California Horse Racing Board, as specified. Existing law provides that these provisions shall become inoperative on July 1, 2002.

This bill would provide that these provisions shall become inoperative on July 1, 2004.

Ch. 934 (AB 1460) Nation. Capital punishment.

Existing law requires that a male person upon whom the sentence of death has been imposed be delivered to the warden of the prison where the execution is to occur and kept there until the judgment is carried out.

This bill would permit an inmate upon whom the sentence of death has been imposed and who commits certain offenses or whose medical or mental health needs are so critical as to endanger the inmate or others to be housed in either secure condemned housing or an institution appropriate for medical or mental health treatment, as specified. This bill would provide that attorney-client access procedures shall be afforded to inmates housed in secure condemned housing or an institution for medical or mental health treatment, as specified. This bill would also require an inmate placed in these alternative housing situations to be returned to San Quentin State Prison at least 60 days before his scheduled date of execution.

The bill would further provide that the condemned housing program at California State Prison, Sacramento, shall be fully operational prior to the transfer of any condemned inmate; those local procedures relating to specified privileges and classification procedures provided to Grade B condemned inmates at San Quentin State Prison shall be similarly instituted at California State Prison, Sacramento, for specified condemned inmates; no more than 15 condemned inmates may be rehoused; and prior to any relocation of condemned row from San Quentin State Prison, all maximum security Level IV, 180-degree housing unit facilities with an electrified perimeter shall be evaluated by the Department of Corrections for suitability for the secure housing and execution of condemned inmates.

Ch. 935 (SB 95) Vincent. Horse racing: interstate licensing compact.

Existing law provides that the California Horse Racing Board is responsible for the licensing of each racing association and all persons, other than the public at large, who participate in a horse race meeting with parimutuel wagering. Existing law imposes various requirements on licensees as specified, and generally requires that all licenses granted under the Horse Racing Law be in writing, and are subject to all rules, regulations, and conditions prescribed by the board. Existing law provides that all licenses granted under the Horse Racing Board are subject to suspension or revocation by the board pursuant to specified procedures and standards.

This bill would state findings and declarations of the Legislature with respect to an interstate compact proposed by the Association of Racing Commissioners International concerning the delegation of California's licensing authority with respect to specified persons and occupations in the horse racing industry to a specified interstate committee, and would authorize the California Horse Racing Board to enter into that interstate compact for the purposes set forth in those findings, provided that California's participation in this

compact does not result in the diminution of applicable existing standards established for licensure in California with regard to an applicant's criminal history and does not prevent the enforcement of any state law or regulation affecting any licensee. This bill would provide that California's entry into the compact will not relieve any individual or entity of its duty to obtain licenses or pay fees as required by state law. This bill would also authorize the board to designate an individual to represent California in conjunction with the administration of the compact.

Ch. 936 (SB 590) Perata. Horse racing.

(1) Existing law provides that a thoroughbred racing association or fair may distribute the audiovisual signal and accept wagers on the results of out-of-state and out-of-country thoroughbred races during the calendar period the association or fair is conducting a race meeting, provided that the total number of thoroughbred races on which wagers are accepted statewide in any given year does not exceed the total number of thoroughbred races on which wagers were accepted in 1998.

This bill would provide that, notwithstanding the above provision, and subject to specified conditions, if the total number of thoroughbred and fair racing days allocated by the board in the northern zone in any calendar year commencing with the calendar year 2001 is less than the total number of thoroughbred and fair racing days allocated by the board in calendar year 2000, a thoroughbred racing association or fair in the northern zone may distribute the audiovisual signal and accept wagers on the results of out-of-state and out-of-country thoroughbred races during the calendar period the association or fair is licensed to conduct a live race meeting, excluding Saturdays and Sundays. The bill would provide that the total number of out-of-state and out-of-country thoroughbred races upon which wagers may be accepted pursuant to this provision shall be sufficient to the extent reasonably possible to prevent any loss of revenue to the General Fund and the California racing participants, as determined by the executive director of the board and subject to specified limitations.

(2) Existing law provides for the operation of live horse racing by associations and fairs, and for wagering thereon, and for the operation of satellite wagering facilities, subject to regulation and oversight by the California Horse Racing Board, as specified. Existing law permits the chairperson of the board to temporarily authorize the conduct of satellite wagering from any zone in the state or from any location outside this state if the live racing or audiovisual signals are disrupted or interrupted so as to cause the cessation of the live racing or audiovisual signals as long as the cause is a natural disaster outside the control of the association or fair conducting the racing or satellite wagering.

This bill would permit the executive director of the board, rather than the chairperson, to authorize this wagering under these circumstances.

(3) Under existing law, all revenues distributed to the state as license fees from horse racing are required to be deposited in the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes.

This bill would authorize additional wagering, and would increase the amount of continuously appropriated license fees, thereby making an appropriation.

Ch. 937 (SB 626) Perata. Weapons.

Existing law, except as provided, generally prohibits the manufacturing, causing to be manufactured, importation into the state, keeping, offering or exposing for sale, giving, or lending of various weapons, including any large-capacity magazine. Existing law also defines "large-capacity magazine" and specifies certain magazines that are not included within the definition.

This bill would exempt the manufacture of a large-capacity magazine for certain law enforcement agents, peace officers, government agencies, the military, or for export. The bill would also exempt certain purchases and loans of large-capacity magazines, as specified.

This bill would, in addition, specify additional magazines that are not included within the definition of “large-capacity magazine.”

Existing law makes it an offense, with specified exceptions, to possess an assault weapon, as defined.

This bill would provide additional exceptions to the offense of possessing an assault weapon, regarding the loan at a target range of an assault weapon by a retired peace officer, as specified, and receipt and possession of an assault weapon by certain peace officers, if those officers register the assault weapon, as specified.

By imposing additional duties on local law enforcement agencies, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 938 (SB 975) Alarcon. California Infrastructure and Economic Development Bank.

Existing law, the Bergeson-Peace Infrastructure and Economic Development Bank Act, establishes the California Infrastructure and Economic Development Bank in the Trade and Commerce Agency. The act requires public works financed by the bank to comply with certain laws applicable to payment of prevailing wages on public works.

This bill would require any of those public works financed through the use of industrial development bonds under the California Industrial Development Financing Act to comply with those laws relating to payment of prevailing wages.

Existing law generally defines “public works” to include construction, alteration, demolition, or repair work done under contract and paid for in whole or in part out of public funds.

This bill would redefine “public works” to include installation and provide that “paid for in whole or in part with public funds” means certain payments, transfers, credits, reductions, waivers, and performances of work, but does not include the construction or rehabilitation of affordable housing units for low- or moderate-income persons, as specified.

This bill would provide that certain private residential housing projects and development projects built on private property are not subject to the prevailing wage, hour, and discrimination laws that govern employment on public works projects.

This bill would also make technical, nonsubstantive changes.

Ch. 939 (SB 1098) Alarcon. Planning and zoning: housing.

Existing law places prescribed limits on the adoption of an interim zoning ordinance by a local legislative body.

This bill would prohibit the extension of an interim ordinance denying needed approvals for projects with a significant component of multifamily housing unless the legislative body identifies the adverse impact of continued approval of the development and makes other specified findings. It would provide that these provisions apply to a county, city, including a charter city, and city and county.

The bill also would make clarifying changes relating to the provision of affordable housing in requirements relating to zoning sufficient vacant land for low-cost residential use.

Ch. 940 (AB 35) Shelley. Firearms: handgun safety certificate.

Existing law generally regulates the transfer of firearms.

This bill would provide that, subject to various exceptions, no person may purchase, transfer, or receive a handgun, as defined, without a handgun safety certificate, as specified. This bill would provide that no handgun safety certificate may be issued to any person under 18 years of age. This bill would establish an application procedure for obtaining a handgun safety certificate, including the applicant's successful completion of a written test. The bill would require the successful completion of a safe handling demonstration before a dealer would deliver a handgun, as specified. The bill would provide that the provisions described in this paragraph would become operative on January 1, 2003.

Existing law, except as provided, requires purchasers and transferees of handguns, as specified, to obtain a "basic firearms safety certificate."

This bill would make these provisions inoperative on January 1, 2003, and would instead, provide for a course and test in connection with obtaining a handgun safety certificate.

This bill would make other conforming changes, including changes that affect requirements relating to the transfer or loan of firearms by firearms dealers and others, the violation of which is an offense. By changing these requirements, this bill would change the definition of existing crimes, and thereby impose a state-mandated local program.

This bill would provide that, except as specified, anyone who purchases or receives a handgun without a handgun safety certificate, or sells, delivers, loans, or transfers a handgun to a person who does not have a handgun safety certificate is guilty of a misdemeanor.

By creating a new crime, this bill would impose a state-mandated local program.

This bill would provide that any person who alters, counterfeits, or falsifies a handgun safety certificate, or attempts to purchase a handgun with one of those certificates is guilty of a misdemeanor.

By creating new crimes, this bill would impose a state-mandated local program.

This bill would establish the Firearms Safety and Enforcement Special Fund to be funded by firearms transaction fees imposed on firearms dealers and fees imposed on certified instructors for the issuance of handgun safety certificates. The moneys in the fund would be continuously appropriated, and be available for expenditure for specified administrative and enforcement activities of the Department of Justice.

This bill would state the intent of the Legislature.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would become operative only if SB 52 is also enacted.

This bill would incorporate additional changes to Section 12071 of the Penal Code proposed by AB 22 and SB 950, or both, to become effective only if AB 22 or SB 950, or both, and this bill are chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 941 (AB 54) Wesson. Gaming clubs.

Existing law provides that every person who deals, plays, carries on, opens, or conducts, or who plays or bets at or against any banking game is guilty of a misdemeanor. A "banking game" or a "banked game" is one in which the bank is involved in play and serves as the ultimate source and repository of funds, dwarfing that of all other participants in the game.

This bill would change the definition of "banking game" or "banked game" by no longer requiring that the bank serve as the ultimate source and repository of funds or dwarf all other participants. By changing the definition of a crime, this bill would impose a state-mandated local program.

With respect to the collection of player fees in gambling establishments, existing law provides that no fee may be calculated as a portion of wagers made or from winnings earned. Existing law provides that fees charged for all wagers be determined and collected prior to the start of play of any hand or round. Violation of these provisions is punishable by

imprisonment in a county jail for not more than one year, or by a fine of not more than \$5,000, or by both that imprisonment and fine. Existing law also provides that its provisions codify the holding in *Sullivan v. Fox* (1987) 189 Cal.App.3d 673, as to the collection of player fees.

This bill would provide that no fee may be calculated as a fraction or percentage of wagers or winnings earned. This bill would provide that fees must be determined before the start of play, but may be collected before or after the start of play. This bill also would remove provisions concerning codification of court decisions. This bill would further revise statements of intent.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 942 (SB 52) Scott. Firearms: handgun safety certificate.

Existing law generally regulates the transfer of firearms.

This bill would provide that, subject to various exceptions, no person may purchase, transfer, or receive a handgun, as defined, without a handgun safety certificate, as specified. This bill would provide that no handgun safety certificate may be issued to any person under 18 years of age. This bill would establish an application procedure for obtaining a handgun safety certificate, including the applicant's successful completion of a written test. The bill would require the successful completion of a safe handling demonstration before a dealer would deliver a handgun, as specified. The bill would provide that the provisions described in this paragraph would become operative on January 1, 2003.

Existing law, except as provided, requires purchasers and transferees of handguns, as specified, to obtain a "basic firearms safety certificate."

This bill would make these provisions inoperative on January 1, 2003, and would instead, provide for a course and test in connection with obtaining a handgun safety certificate.

This bill would make other conforming changes, including changes that affect requirements relating to the transfer or loan of firearms by firearms dealers and others, the violation of which is an offense. By changing these requirements, this bill would change the definition of existing crimes, and thereby impose a state-mandated local program.

This bill would provide that, except as specified, anyone who purchases or receives a handgun without a handgun safety certificate, or sells, delivers, loans, or transfers a handgun to a person who does not have a handgun safety certificate is guilty of a misdemeanor.

By creating a new crime, this bill would impose a state-mandated local program.

This bill would provide that any person who alters, counterfeits, or falsifies a handgun safety certificate, or attempts to purchase a handgun with one of those certificates is guilty of a misdemeanor.

By creating new crimes, this bill would impose a state-mandated local program.

This bill would establish the Firearms Safety and Enforcement Special Fund to be funded by firearms transaction fees imposed on firearms dealers and fees imposed on certified instructors for the issuance of handgun safety certificates. The moneys in the fund would be continuously appropriated, and be available for expenditure for specified administrative and enforcement activities of the Department of Justice.

This bill would state the intent of the Legislature.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would become operative only if AB 35 is also enacted.

This bill would incorporate additional changes to Section 12071 of the Penal Code proposed by AB 22 and SB 950, or both, to become effective only if AB 22 or SB 950, or

both, and this bill are chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 943 (SB 83) Burton. Forensic testing: post conviction.

Existing law grants a person who was convicted of a felony and is currently serving a term of imprisonment the right to make a written motion under specified conditions for the performance of forensic DNA testing. Under existing law, if a hearing is held on the motion, the judge who presided over the person's trial generally hears the motion. Existing law provides that if an indigent person files a motion for DNA testing, the court shall appoint counsel to represent the person.

This bill would provide that an indigent person may request appointment of counsel to file a motion for the performance of DNA testing by sending a written request to the court, as specified. This bill would also specify that if a hearing is held on a motion for DNA testing and the person was convicted by entry of a plea of guilty or nolo contendere, then the judge who accepted the plea will generally decide the motion. This bill would also require the court to appoint counsel to investigate and, if appropriate, file the person's motion for DNA testing and to represent the person solely for the purpose of obtaining DNA testing if the person is indigent and has not previously been appointed counsel. The court may, in its discretion, appoint counsel to an indigent person who has previously been appointed counsel. By requiring that counsel be appointed to perform additional duties, this bill would impose a state-mandated local program.

This bill would also provide that the right to file a motion for postconviction DNA testing cannot be waived.

Existing law requires that DNA evidence secured in connection with a criminal case be retained by an appropriate governmental entity, as specified. That entity may dispose of the evidence if certain criteria are met, including notification of certain persons of the intent to dispose of the biological material.

This bill would specify that all DNA evidence be retained so long as any person remains incarcerated in connection with the case. This bill would also provide that the right to receive notice that a governmental entity intends to dispose of biological material cannot be waived.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 944 (SB 950) Brulte. Firearms: prohibited possession: data base.

Existing law prohibits persons convicted of certain offenses from owning, possessing, or exerting custody or control over a firearm, as specified. Violation of these provisions is a felony.

This bill would require the court, at the time the judgment is imposed, to provide to the defendant, on a form supplied by the Department of Justice, a notice regarding that firearm prohibition. This bill would also require firearms dealers to provide the notice under specified circumstances.

Existing law provides for seizure and return of firearms in specified circumstances.

This bill would, in addition, provide a procedure for the return of seized firearms where existing procedures are not applicable.

Existing law establishes various automated information systems in regard to the transfer and possession of firearms, and persons who are prohibited from owning or possessing firearms.

This bill would, contingent upon an appropriation in the 2002–03 Budget Act to the Department of Justice for this purpose, establish, on and after July 1, 2002, the Prohibited Armed Persons File, a data base that would cross-reference information for persons relative to the purchase and possession of firearms on or after January 1, 1991, and information indicating those persons who have subsequently been prohibited from owning or possessing firearms, as specified.

This bill would declare findings by the Legislature relative to a procedure for disposal of firearms by persons who have become ineligible to possess firearms. This bill would also direct the Attorney General to report to the Legislature no later than June 1, 2002, recommendations for that procedure.

This bill would also make a technical change correcting a cross-reference.

This bill would incorporate changes to Section 12071 of the Penal Code that are contained in SB 9, Chapter 126 of the Statutes of 2001, and SB 294, Chapter 138 of the Statutes of 2001.

This bill would incorporate additional changes to Section 12071 of the Penal Code, proposed by AB 22, or AB 35 and SB 52, or AB 22, AB 35 and SB 52, to be operative only if the AB 22, or AB 35 and SB 52, or AB 22, AB 35 and SB 52, and this bill are chaptered and become effective on or before January 1, 2002, and this bill is chaptered last.

Ch. 945 (SB 952) Committee on Governmental Organization. Gambling.

(1) Existing law establishes the California Gambling Control Commission and grants it specified powers.

This bill would expand the commission's authority to include the authority to issue subpoenas to compel attendance of witnesses and production of documents at commission meetings.

(2) Existing law defines a "work permit" for the purposes of the Gambling Control Act as a specified type of permit issued by the Division of Gambling Control or by a city, county, or city and county. Existing law defines a "banking game" or "banked game" as one in which the house takes on all comers, pays all winners, and collects from all losers. Existing law also lists types of games that are not banked or banking games.

This bill would change the act's definition of "work permit" to a specified type of permit issued by the commission or by a city, county, or city and county. This bill would also remove provisions defining a "banking game" or "banked game."

(3) Under existing law, in order to be employed by a gambling enterprise or to serve as an independent agent of a gambling enterprise, a person must apply for a work permit with the division and must have his or her application granted by the commission. Under existing law, an application for a work permit for use in a jurisdiction where a locally issued work permit is not required is made to the division.

This bill would allow the commission to issue temporary work permits. In addition, this bill would provide that an application for a work permit for use in a jurisdiction where a locally issued work permit is not required shall be made to the commission.

(4) Existing law authorizes the division to recommend to the commission denial of an application for a license, permit, or finding of suitability. Under existing law, the commission must consider certain recommendations for denials of licenses at commission meetings at which specified procedural rules are observed.

This bill would allow the commission to refer cases involving recommendations for the denial of a license, permit, or finding of suitability to an administrative law judge for proceedings conducted pursuant to the Administrative Procedure Act.

(5) Existing law states the Legislature's finding that the division should investigate gambling enterprise employees and, if appropriate, approve those persons for employment in a gambling enterprise.

This bill would state the Legislature's finding that the division should investigate gambling enterprise employees and, if appropriate, recommend their approval as gambling enterprise employees to the commission.

(6) Existing law provides that communications or documents relating to an applicant, licensee, or registrant under the Gambling Control Act are privileged if agents and employees of the division or the California Gambling Control Board reveal those communications or documents in the course of discharging their duties, complying with laws, regulations, and subpoenas, and assisting in investigations. Under existing law, if a document or publication relating to an applicant, licensee, or registrant is revealed by an agent or employee for the purpose of assisting in an investigation, no statement or publication of a document shall impose liability for defamation or constitute a ground for recovery in a civil action. Existing law also prohibits the division and the board, and their employees and agents, from revealing information, documents, or communications provided by an applicant or licensee that are privileged under the Evidence Code without the prior written consent of the applicant or licensee or pursuant to a lawful court order after notice of the proceedings has been given to the applicant or licensee. Existing law allows the board to appoint counsel for the board or request representation by the Attorney General.

This bill would extend the above provisions to the commission and its agents and employees and would delete references to the board. This bill would eliminate the board's authority to appoint counsel or request representation by the Attorney General. This bill would allow the commission to appoint 8 attorneys. This bill would also provide that when employees or agents of the division or commission reveal communications or publications in any form in the course of discharging their duties, complying with laws, regulations, and subpoenas, and, in good faith, providing assistance in investigations, those communications and publications are privileged and shall not form a basis for imposing liability for defamation or constitute a ground for recovery in any civil action. In addition, this bill would prohibit the division and the commission, and their employees and agents, from revealing information, documents, or communications provided by any person that are privileged under any provision of law without the prior written consent of the holder of the privilege or pursuant to a lawful court order after notice of the proceedings has been given to the holder of the privilege.

(7) Under existing law, the act establishes a 2-phased framework for the state regulation of gambling in California. Existing law provides that during the first phase, the division has the authority to issue regulations for the purpose of carrying out the act. Existing law provides that during the 2nd phase, the commission has the authority to issue regulations for the purposes of carrying out the act. Existing law provides that the 2nd phase commenced on January 1, 1999, although under existing law, the division retains its phase-one powers until the Governor signs an Executive order declaring that the commission is prepared to assume its duties and responsibilities, as required by the act.

This bill would repeal provisions of existing law giving the division the authority to issue regulations for the administration and enforcement of the act.

(8) Existing law provides that if the owner of a gambling enterprise is not a person, the owner is not eligible for a gambling license unless specified persons involved in the enterprise obtain a gambling license. Existing law exempts from the group of persons who must obtain a gambling license under this provision landlords, even if those landlords receive a percentage share of the revenue earned by the owner from gambling activities.

This bill would remove the exemption for landlords who receive a percentage share of the revenue earned by the owner from gambling activities from the aforementioned provision.

(9) Existing law provides that a license shall not be denied to a gambling establishment solely because it is not open to the public provided that certain conditions are met.

This bill would delete references to the Division of Gambling Control with respect to issuance and denial of a license.

(10) Existing law requires persons applying for gambling licenses to submit fingerprints to the division on forms provided by the division.

This bill would allow applicants to submit fingerprints to the division using “live scan” or other prevailing, accepted technology.

(11) Existing law gives the commission the authority to issue work permits to employees and independent agents of gambling enterprises.

This bill would specify that work permits issued by the commission shall be valid for 2 years and that the commission will issue regulations regarding the issuance and renewal of work permits.

(12) Existing law provides that neither the division nor the commission shall issue a license to certain gambling clubs, as specified.

This bill would change these provisions to refer only to the commission.

Ch. 946 (AB 93) Wayne. Airports: San Diego County Regional Airport Authority.

(1) Existing law establishes the San Diego Regional Government Efficiency Commission and requires the commission to submit to the Legislature a plan and draft legislation for the consolidation of regional agencies within the San Diego region.

This bill would establish the San Diego County Regional Airport Authority as a local entity of regional government with jurisdiction throughout the County of San Diego, and would require the authority to adopt the comprehensive airport land use plan for that county and coordinate the airport planning of public agencies. The bill would establish the governing body and structure of the authority, require the San Diego Unified Port District to transfer the San Diego International Airport to the authority, and assign various powers and duties to the authority regarding the establishment and operation of airports within the county.

To the extent that these provisions would impose additional duties upon the port district and other entities of local government, the bill would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 947 (AB 1301) Goldberg. School facilities: site contamination: Belmont Learning Complex.

(1) Existing law prohibits the governing board of a school district from approving a project involving the acquisition of a schoolsite or the construction of a school by the school district unless specified actions are taken with regard to potential contamination of the site, including a determination by the lead agency, as defined, that the property purchased or to be built upon is not the site of a current or former hazardous waste disposal site or solid waste disposal site, or a hazardous substance release site.

This bill would require the Los Angeles Unified School District, by January 1, 2003, to prepare a remedial investigation and feasibility study for the Belmont Learning Complex site and to submit the study to the Department of Toxic Substances Control for review. The bill would require the district to obtain a determination that the study is complete and meets the requirements of the Carpenter-Presley-Tanner Hazardous Substances Account Act before the district opens the Belmont Learning Complex as a school or takes any action to use the site for any nonschool purpose. The bill would require the district to reimburse the department for oversight costs incurred by the department and to post the study on its Internet Web site. The bill would impose a state-mandated local program by imposing new duties on a school district.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for

making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 948 (AB 1675) Koretz. Shepherders.

Existing law regulates various aspects of workplace and employee safety and health.

This bill would regulate the industry of shepherding by providing specific requirements that employers of shepherders must implement with regard to shepherder wages, hours, breaks, housing, tools, and working conditions. The bill would establish specified penalties for employers who fail to comply with these provisions.

**DIGESTS OF STATUTES
ENACTED IN 2001**

2001–02 FIRST EXTRAORDINARY SESSION

BILL CHAPTERS

Ch. 1 (AB 5) Keeley. Electrical restructuring: Oversight Board: Independent System Operator.

(1) The existing restructuring of the electrical services industry within the Public Utilities Act provides for the authorization of direct transactions between electricity suppliers and end use customers and for the establishment of an Independent System Operator and a Power Exchange as separately incorporated public benefit, nonprofit corporations. An Electricity Oversight Board is also established to oversee the Independent System Operator and the Power Exchange. The Oversight Board has the exclusive right to approve procedures for the election, submission for confirmation, and qualification for Independent System Operator and Power Exchange governing board members, all of whom are required to be electricity consumers in the area served by the Independent System Operator and the Power Exchange. The governing boards are required to include representatives of investor-owned utility transmission owners, publicly owned utility transmission owners, nonutility electricity sellers, public buyers and sellers, private buyers and sellers, industrial end users, commercial end users, residential end users, agricultural end users, public interest groups, and nonmarket participant representatives. A simple majority of each board is required to consist of persons who are themselves unaffiliated with electric generation, transmission, or distribution corporations. The structural composition of the governing boards existing on July 1, 1999, is required to remain in effect until an agreement with a participating state is legally in effect. However, prior to that agreement, the state retains the right to change each governing board into a nonstakeholder board. If that legislative change occurs, revised bylaws are required to be filed with the Federal Energy Regulatory Commission under a specified provision of federal law.

This bill, instead, would require that, within 90 days of the effective date of the bill, the existing Independent System Operator governing board be replaced by a 5-member independent governing board of directors appointed by the Governor.

The bill would prohibit a member of the independent governing board appointed by the Governor from being affiliated with any actual or potential participant in any market administered by the Independent System Operator.

The bill would prohibit the Independent System Operator from entering into a multistate entity or a regional organization unless that entry is approved by the board. Since a violation of the act is a crime, this bill would impose a state-mandated local program by establishing a new crime.

The bill would require the board to require the articles of incorporation and bylaws of the Independent System Operator to be revised, and to make filings with the Federal Energy Regulatory Commission as the board determines to be necessary.

The bill would require the Independent System Operator to make publicly available a list of all power plants located in the state that are not operational due to a planned or unplanned outage, make the list available over the Internet, and update the list daily.

The bill would make other, conforming changes in existing law.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 2 (AB 6) Dutra. Electrical restructuring.

(1) Existing law requires generation assets owned by any public utility prior to June 1, 1997, and subject to rate regulation by the Public Utilities Commission, to continue to be subject to regulation by the commission until those assets have undergone market valuation, as specified.

This bill would delete those provisions.

(2) Existing law requires the commission to continue to regulate the nonnuclear generation assets owned by any public utility prior to January 1, 1997, that are subject to regulation by the commission until those assets have been subject to market valuation, as prescribed.

This bill would include nuclear facilities for the generation of electricity within those provisions.

The bill would require those facilities to continue to be subject to that regulation until the commission has authorized the disposition of those facilities pursuant to prescribed provisions of law. The bill would prohibit a facility for the generation of electricity owned by a public utility from being disposed of prior to January 1, 2006. The bill would require the commission to ensure that public utility assets remain dedicated to service for the benefit of the public.

Because, under existing law, a violation of the above provisions with regard to regulation by the commission would be a crime, this bill would impose a state-mandated local program by changing the definition of a crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 3 (SB 7) Burton. Public utilities.

Existing law imposes various duties and responsibilities on the Department of Water Resources with respect to the purchase of water and electricity.

This bill would authorize, for a period not to exceed 12 days from the effective date of the act, the Department of Water Resources to purchase electric power from any party and make that electric power available at the cost of its purchase, plus any specified administrative costs, transmission and scheduling costs, and other related costs, incurred by the department, to the Independent System Operator, public utility electrical corporations, or retail end-use customers.

The bill would require that the obligations incurred and funding of the contract and arrangements for the purchase of electric power are to be maintained by the Department of Water Resources, separate and distinct from the funds, moneys and obligations of the State Water Resources Development System. The bill would prohibit the full faith and credit and the taxing power of the state to be pledged for payment of these obligations.

The bill would establish in the State Treasury the Department of Water Resources Electric Power Fund as a continuously appropriated fund and would require all revenues payable to the department under the act to be deposited in the fund. The bill would require payments from the fund to be made only for specified purposes and would require all authorized contracts to be payable solely from the fund.

The bill would require the Public Utilities Commission to adopt and implement emergency regulations to provide for delivery and payment mechanisms relating to the sale of electric power purchased by the Department of Water Resources for sale directly or indirectly to the Independent System Operator, public utilities, or retail end-use customers.

This bill would make these provisions inoperative on February 2, 2001, and would repeal them as of January 1, 2002.

The bill would transfer \$400,000,000 from the General Fund to the Department of Water Resources to purchase electric power, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 4 (AB 1) Keeley. Power exchanges: Department of Water Resources: electric power.

(1) The Public Utilities Act establishes the Power Exchange to provide an efficient competitive auction, open on a nondiscriminatory basis to all electric power suppliers, that meets the loads of all exchange customers at efficient prices. Existing law authorizes the Public Utilities Commission to investigate issues associated with multiple qualified exchanges, and requires the commission, if it determines that allowing electrical corporations to purchase from multiple qualified exchanges is in the public interest, to prepare and submit findings and recommendations to the Legislature on or before June 1, 2001. Existing law prohibits the implementation by the commission of certain commission decisions regarding other exchanges, as specified.

This bill would repeal those provisions, regarding multiple qualified exchanges.

(2) Existing law prohibits any change in the aggregator or supplier of electric power for certain customers from being made until the change has been verified.

This bill would provide that electric power sold to customers pursuant to the bill is not subject to those provisions.

(3) Under existing law relating to the Central Valley Project, the Department of Water Resources has the authority to fix and establish the prices, rates, and charges at which the resources and facilities made available by the project are sold and disposed of, and to enter into contracts and agreements and do any and all things that the department determines to be necessary, convenient, or expedient for the accomplishment of the purposes and objectives of that existing law.

This bill would authorize the department to enter into contracts for the purchase of electric power. The bill would authorize the department to sell power to retail end use customers and, with specified exceptions, to local publicly owned electric utilities at not more than the department's acquisition costs, as specified. The bill would prohibit the department from contracting for the purchase of electric power on and after January 2, 2003. The bill would provide, with specified exceptions, that nothing in the bill authorizes the department to take ownership of transmission, generation, or distribution assets, as specified. The bill would also authorize the department to hire and appoint additional employees and contract for the services of public and private entities.

The bill would authorize the department to issue revenue bonds not to exceed a certain amount, containing specified terms and conditions, upon authorization by written determination of the department and with the approval of the Director of Finance and the Treasurer, as specified.

The bill would establish in the State Treasury the Department of Water Resources Electric Power Fund, to be continuously appropriated to the department, and available for the purposes described above. The bill would require all revenues payable to the department under the bill to be deposited in the fund. The bill would require that payments from the fund be made only for certain purposes. The bill would transfer \$495,755,000 from the General Fund to the fund for the purposes described above and require repayment to the General Fund at the earliest possible time. The bill would appropriate \$4,245,000 to the department for the 2000–01 fiscal year for administrative cost incurred by the department for purposes of the bill. The bill would permit the Department of Finance to authorize the creation of deficiencies for this appropriation.

This bill would require the Public Utilities Commission to calculate the California Procurement Adjustment and would further require the commission to determine the amount of the adjustment payable to the department for deposit into the fund.

The bill would require the Bureau of State Audits to conduct a financial and performance audit of the department's implementation of the bill.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 5 (SB 43) Alpert. Electric power.

(1) The Public Utilities Act requires the Public Utilities Commission to establish a ceiling of \$.065 per kilowatthour on the energy component of electric bills for residential, small

commercial, and lighting customers of the San Diego Gas and Electric Company, through December 31, 2002, retroactive to June 1, 2000, as prescribed. The commission may extend the ceiling through December 2003, as specified. Existing law requires the commission to determine that portion of each existing electrical corporation's retail rate effective on January 5, 2001, that is equal to the difference between the generation related component of the retail rate and the sum of the costs of the utility's own generation, qualifying facility contracts, existing bilateral contracts, and ancillary services, to be known as the California Procurement Adjustment. Existing law requires the commission to further determine the amount of the California Procurement Adjustment that is allocable to the power sold by the Department of Water Resources, which is payable by each electrical corporation to the department for deposit in the Department of Water Resources Electric Power Fund, and known as the Fixed Department of Water Resources Set-Aside.

This bill would, instead, require the commission to also establish a ceiling of \$0.065 per kilowatthour on the energy component of electric bills for electricity supplied to residential, small commercial, and street lighting customers by the San Diego Gas and Electric Company, through December 31, 2002, retroactive to June 1, 2000. The bill would require the commission to also establish a frozen rate of \$0.065 per kilowatthour on the energy component of electric bills for electricity supplied to all customers by the San Diego Gas and Electric Company not subject to the ceiling imposed by existing law, through December 31, 2002, retroactive to February 7, 2001. The bill would provide that a frozen rate established shall not result in any retroactive recovery of undercollections by the San Diego Gas and Electric Company. The bill would require that any undercollection resulting from rate reductions retroactive to February 7, 2001, not result in a revenue undercollection to San Diego Gas and Electric Company. The bill would require the commission to adjust the California Procurement Adjustment and the Fixed Department of Water Resources Set-Aside for those customers, as prescribed. The bill would make related statements about the construction of the bill. Since a violation of a rule or order of the commission is a crime, this bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 6 (AB 43) Correa. Electric power.

(1) The Public Utilities Act requires the Public Utilities Commission to establish a ceiling of \$.065 per kilowatthour on the energy component of electric bills for residential, small commercial, and street lighting customers of the San Diego Gas and Electric Company, through December 31, 2002, retroactive to June 1, 2000, as prescribed. The commission may extend the ceiling through December 2003, as specified. Existing law requires the commission to determine that portion of each existing electrical corporation's retail rate effective on January 5, 2001, that is equal to the difference between the generation related component of the retail rate and the sum of the costs of the utility's own generation, qualifying facility contracts, existing bilateral contracts, and ancillary services, to be known as the California Procurement Adjustment. Existing law requires the commission to further determine the amount of the California Procurement Adjustment that is allocable to the power sold by the Department of Water Resources, which is payable by each electrical corporation to the department for deposit in the Department of Water Resources Electric Power Fund, and known as the Fixed Department of Water Resources Set-Aside.

This bill would require the commission to also establish a frozen rate of \$0.065 per kilowatthour on the energy component of electric bills for electricity supplied to all customers by the San Diego Gas and Electric Company not subject to the ceiling imposed by existing law, through December 31, 2002, retroactive to February 7, 2001. The bill would

provide that a frozen rate established shall not result in any retroactive recovery of undercollections by the San Diego Gas and Electric Company. The bill would require that any undercollection resulting from rate reductions retroactive to February 7, 2001, not result in a revenue undercollection to the San Diego Gas and Electric Company. The bill would require the commission to determine the Fixed Department of Water Resources Set-Aside for those customers, as prescribed. The bill would make related statements about the construction of the bill. Because a violation of a rule or order of the commission is a crime, this bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 7 (SB 5) Sher. State energy projects.

(1) Existing law authorizes state and local agencies to develop energy conservation, cogeneration, and alternate energy supply sources at the facilities of public agencies through contracts and leases in accordance with specified criteria.

This bill, until January 1, 2003, would authorize state agencies to implement energy related projects, subject to certain criteria, and to enter into contracts for these purposes subject to certain criteria. The bill would authorize the Director of General Services to exempt state energy projects from the advertising and competitive bidding requirements set forth in state law, if the director deems it necessary to implement these provisions. The bill would exempt state energy projects from a specified capital outlay process at the discretion of the Department of Finance.

(2) Existing law prohibits the State Public Works Board from entering into leases and energy service contracts sooner than 45 days after notification to the Joint Legislative Budget Committee. Existing law authorizes the joint committee to hold a hearing within 45 days of receipt of the notification.

This bill would prohibit the board from entering into a lease and energy services contract sooner than 15 days after notification and would authorize the joint committee to hold a hearing within 15 days of receipt of the notification.

(3) Existing law requires the State Energy Resources Conservation and Development Commission to adopt interior and exterior lighting energy conservation standards, as specified.

This bill would require the commission to adopt lighting standards for outdoor lighting, as defined, that is not subject to the above standards.

(4) Existing law provides for the establishment and implementation of various energy efficiency programs administered by the State Energy Resources Conservation and Development Commission and the Public Utilities Commission.

This bill would appropriate \$708,900,000 from the General Fund to implement energy efficiency programs and supplement existing energy efficiency programs. Of that amount, from the General Fund, \$246,300,000 would be allocated to the Public Utilities Commission, \$282,600,000 would be allocated to the State Energy Resources Conservation and Development Commission, \$10,000,000 would be allocated to the Department of Consumer Affairs, \$50,000,000 would be allocated to the Department of General Services, \$120,000,000 would be allocated to the Department of Community Services and Development, as scheduled, and subject to reallocation and conditions. Under the bill, any funds that are unencumbered by March 31, 2002, would revert to the General Fund on that date, except as otherwise provided.

(5) Under existing law, the Public Utilities Commission requires every electrical and gas corporation to file a schedule of rates and charges providing baseline rates. In establishing these rates, existing law requires the commission to avoid excessive rate increases for

residential customers, and to establish a gradual differential between the rates for respective blocks of usage.

This bill would require that the commission assure that a specified condition is met with respect to any interruptible service or curtailment program it adopts. The bill would require that an optional binding mandatory curtailment program adopted by the commission that exempts customers from Stage III rotating outages, in exchange for partial load curtailments during every rotating outage period, include specified provisions for agricultural and water supplier customers, as defined. The bill would require each public utility electrical corporation to develop and offer its customers, on or before May 30, 2001, the opportunity to participate, in addition to other programs developed by the commission, in a demand reduction program, as specified.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 8 (AB 29) Kehoe. Energy.

(1) Existing law establishes the State Energy Resources Conservation and Development Commission in the Resources Agency, and grants it authority with respect to various energy efficiency measures and programs. Existing law generally permits public agencies to develop energy conservation, cogeneration, and alternative energy supply sources at their facilities in order to promote all feasible means of energy and water conservation. Existing law also generally requires public agencies to meet specified requirements regarding service, consulting, architectural, and engineering contracts, and requires those contracts to be approved by the Department of General Services.

This bill would enact, until January 1, 2002, the Summer 2001 Energy Efficiency Projects by Community College Districts program, which would fund the implementation of energy conservation, efficiency, cogeneration, and alternate energy supply sources by community college districts on public property. The bill would require a community college district to request proposals prior to awarding or entering into a contract, agreement, or lease, and would require the district to award each contract based on the consideration of specified qualifications. The bill would exempt energy projects from specified requirements imposed on contracts entered into by public agencies. The bill would authorize the exemption of any energy project proposed by a community college district from existing advertising and competitive bidding requirements if the director deems the exemption necessary, as specified.

The bill would require each community college district that receives funds from the program to provide a report to the Chancellor of the California Community Colleges, on or before January 1, 2002, and would require the chancellor to report that information to the Chairperson of the Joint Legislative Budget Committee, the chairpersons of the appropriate policy and fiscal committees of each house of the Legislature, and the Governor by March 1, 2002.

By imposing additional duties on community college districts, this bill would impose a state-mandated local program.

This bill would establish the Statewide Energy Management Program to assist community college districts to achieve energy independence through the development of energy management plans, the construction of sustainable green buildings, the use of renewable or other distributed energy systems, and the expansion of statewide energy education programs and services, as prescribed. The bill would require the Board of Governors of the California Community Colleges, in consultation with the commission, to develop guidelines for this program.

The bill would require the chancellor to establish an advisory committee to provide recommendations regarding overall program development, resource development and deployment, and strategies for implementation and coordination of the program.

(2) Existing law establishes the Technology, Trade and Commerce Agency with specified powers and duties relating to economic development and science and technology. Existing

law requires the energy commission to establish a small business energy assistance low-interest revolving loan program to fund the purchase of equipment for alternative technology energy projects for California's small businesses.

This bill would require the agency to administer the California Renewable Energy Loan Guarantee Program to guarantee loans made by financial institutions to eligible businesses for the permitting, manufacturing, acquisition, construction, or installation of renewable energy systems that are intended to decrease demand on the electricity grid.

(3) Existing law establishes the California Conservation Corps to conserve and develop natural resources, and enhance and maintain environmentally important lands and waters through the use of California's young women and men and to assist these youths in becoming productive adults. Existing law establishes the Department of Community Services and Development to provide a range of services and activities having a measurable and potentially major impact on causes of poverty, and to assist low-income individuals and families, migrants, and the elderly poor to obtain employment, education, income, housing, food, and emergency services.

This bill would create the Mobile Energy Efficiency Brigade, to be implemented by the corps and the department, to expand current weatherization, energy-efficiency, and rehabilitation programs in accordance with prescribed objectives. These provisions would remain in effect until January 1, 2003.

(4) Existing law requires the energy commission to administer a program of grants and loans with respect to energy efficiency measures and programs.

This bill would require the energy commission to administer a grant and loan program for eligible construction or retrofit projects, as defined, and the Small Business Energy Efficient Refrigeration Loan Program established by the bill.

(5) The existing Energy Conservation Assistance Act of 1979, until January 1, 2011, permits a school, hospital, public care institution, or unit of local government to submit an application to the energy commission for a loan of funds for the purpose of financing all or a portion of the costs incurred in implementing a project, as defined, including an energy conservation project.

This bill would establish the Energy Conservation Act of 2001 to establish energy efficiency incentives in the form of grants and loans to low-income residents, small businesses, and residential property owners.

(6) Existing law establishes the California Alternative Energy and Advanced Transportation Financing Authority and prescribes the duties of the authority with respect to, among other things, promoting prompt and efficient development of energy sources that are renewable or that more efficiently utilize and conserve scarce energy resources.

This bill would require the authority to establish a renewable energy program to provide financial assistance to public power entities, independent generators, utilities, or businesses manufacturing renewable energy generation components or systems, or both, to generate new and renewable energy sources, as defined, develop clean and efficient distributed generation, and demonstrate the economic feasibility of new technologies. The bill would require the authority to ensure that any financed project offer its power within California on a long-term contract basis.

(7) Under existing law, the Public Utilities Commission requires every electrical and gas corporation to file a schedule of rates and charges providing baseline rates. In establishing these rates, existing law requires the commission to avoid excessive rate increases for residential customers, and to establish an appropriate gradual differential between the rates for the respective blocks of usage. Additionally, in establishing residential electric and gas rates, including baseline rates, existing law requires the commission to assure that the rates are sufficient to enable the electrical corporation or gas corporation to recover a just and reasonable amount of revenue from residential customers as a class, while observing the principle that electricity and gas services are necessities, for which a low affordable rate is desirable.

This bill would require the commission, at least until December 31, 2003, to require that all charges for residential electric customers are volumetric, and to prohibit any electrical corporation from imposing any charges on residential consumption that are independent of consumption unless the charges are in place prior to the effective date of the bill.

The bill would also require the commission, until December 31, 2002, to ensure that errors in estimates of demand elasticity of sales do not result in material over or undercollections of the electrical corporations.

Because existing law makes any public utility that violates specified provisions regulating public utilities guilty of a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

(8) Existing law exempts an electrical corporation that provides distribution service for direct transactions from the obligation to provide net energy metering to a customer, if the customer participates in direct transactions with an electric supplier that does not offer net energy metering, and authorizes an electrical corporation that provides distribution service for direct transactions to recover from the electric service provider of a customer that participates in direct transactions the incremental costs of metering and billing service related to net energy metering, in an amount set by the Public Utilities Commission. Existing law also establishes formulas for the calculation of net monthly consumption for eligible customer-generators taking service employing baseline, over baseline, and time use of rates. Existing law, for purposes of those provisions, defines the term "electric service provider" to include specified entities and defines "eligible customer-generator," to mean a residential customer, or a small commercial customer of an electric service provider.

This bill would revise the definition of an electric service provider, until January 1, 2003, to also include any other entity that provides electrical service. The bill would revise the definition of an eligible customer-generator, until January 1, 2003, to also include commercial, industrial, or agricultural customers of an electric service provider. The bill would eliminate, until January 1, 2003, certain requirements with respect to the information electric service providers are required to provide to the ratemaking authority relating to total rated generating capacity used by eligible customer-generators.

(9) Existing law requires every electric service provider, upon request, to make available to eligible customer-generators contracts for net energy metering subject to specified limitations on the number of contracts.

This bill would eliminate the specified limitations on the number of contracts.

(10) Existing law specifies that if a customer participates in direct transactions with an electric supplier that does not offer net energy metering, the electrical corporation that provides distribution service for the direct transactions is not obligated to provide net energy metering to the customer.

This bill would, instead, specify that if a customer participates in direct transactions with an electric supplier that does not provide distribution service for the direct transactions, the electrical corporation that provides distribution service for an eligible customer-generator is not obligated to provide net energy metering to the customer.

(11) Under existing law, the Emerging Renewable Resources Account is created in the Renewable Resource Trust Fund and specified portions of revenues collected by electrical corporations for the benefit of in-state operation and development of existing and new and emerging renewable resource technologies are required to be transmitted to the energy commission for deposit in the Renewable Resource Trust Fund. The money in the fund and the account is continuously appropriated to the energy commission for specified purposes, including a multiyear, consumer-based program to foster the development of emerging renewable technologies in distributed generation applications. Existing law requires this program to provide monetary rebates, buydowns, or equivalent incentives to purchasers, lessees, lessors, or sellers of eligible electricity generating systems and limits the incentives to a maximum percentage of the system price, as defined by the energy commission.

This bill would require the commission to expand existing programs to promote clean distribution generation technologies.

The bill would authorize the commission to increase the maximum rebate levels for certain distributed emerging technologies that have a peak capacity greater than 10 kilowatts, if the commission makes a specified determination.

(12) Existing law authorizes the State Public Works Board to develop energy and water conservation and cogeneration and alternative energy and water supply sources at state facilities. Existing law requires the buildings acquired or constructed by the board to be operated and maintained by the board until they are placed under the jurisdiction of the Department of General Services or another state agency.

This bill would require the department to identify, from the department's state property inventory, all buildings where it is feasible to reduce energy consumption and achieve energy efficiencies, as well as to produce onsite electrical generation or reduce the level of peak-period electrical consumption for that building using alternative energy equipment thermal energy storage or cogeneration equipment.

This bill would authorize the Director of General Services to enter into 3rd party agreements to implement energy efficiencies and feasible onsite electrical generation. The bill would authorize the director to enter into negotiated agreements to accomplish specified objectives relating to energy.

This bill would require the department to retrofit specified public buildings where feasible, provided that work on public buildings of the California State University is performed at the request or with the consent of the university.

This bill would require the department to prepare and submit to the Legislature and the Governor, a report of the energy savings, if any, in terms of megawatts per year, for each public building retrofitted on or before 2 years after the effective date of this bill, and every 2 years thereafter.

(13) This bill would limit administrative costs under the bill for participating agencies to 2¹/₂%, and would require prescribed reports to be filed with the Legislature and the Governor.

(14) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(15) The bill would appropriate or reappropriate \$408,650,000 from specified funds to the Controller to be allocated in accordance with a specified schedule to accomplish the purposes of this bill.

(16) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 9 (SB 31) Burton. Electric power.

(1) Under existing law, after any order or decision has been made by the Public Utilities Commission, any party to the action or proceeding, or any stockholder or bondholder or other party pecuniarily interested in the public utility affected, may apply for a rehearing in respect to any matters determined in the action or proceeding and specified in the application for rehearing.

This bill would prohibit a cause of action arising out of any order or decision of the commission construing, applying, or implementing the provisions of Chapter 4 of the Statutes of 2001–02 First Extraordinary Session (AB 1) from accruing in any court to any

corporation or person unless the corporation or person has filed an application to the commission for a rehearing within 10 days after the date of issuance, and the commission would be required to issue its decision and order on rehearing within 20 days after the filing of that application.

This bill would also set forth a specific procedure with regard to judicial review of an order or decision of the commission interpreting, implementing, or applying the provisions of the above referenced Chapter 4.

(2) Existing law authorizes the Department of Water Resources to contract with an electrical corporation to transmit or provide for the transmission of, and distribute the power and provide billing, collection, and other related services, as the agent of the department, on terms and conditions that reasonably compensate the electrical corporation for its services, and requires the commission, at the request of the department, to order such actions. Under existing law, upon the delivery of power to them, the retail end-use customers are deemed to have purchased that power from the department.

This bill would modify the existing transmission, distribution, and related service provisions to authorize the department to contract with an electrical corporation to transmit or provide for the transmission of, and distribute all power made available by the department, and provide, as the agent of the department, billing, collection, and other related services on terms and conditions that reasonably compensate the electrical corporation for its services and adequately secure payment to the department, and would make corresponding changes to the commission's requirement to order that service at the request of the department.

(3) Existing law authorizes the department to enter into contracts for the purchase of electric power and to sell power to retail end-use customers and to local publicly owned electric utilities. Existing law requires the commission to take necessary action to ensure that all, or a portion of, the component rates that are available to electrical corporations for the purchase of their net short position of electricity are used to recover the revenue requirements for the purchase and sale functions described in this paragraph.

This bill would repeal that commission requirement.

(4) Existing law authorizes the department to issue revenue bonds for purposes described in (3) not to exceed a certain amount, containing specified terms and conditions, upon authorization by written determination of the department and with the approval of the Director of Finance and the Treasurer.

This bill would, instead, authorize the issuance of the bonds in an aggregate amount up to the greater of \$13,423,000,000 or the amount calculated by multiplying by a factor of 4 the annual revenues generated by the California Procurement Adjustment; provided the aggregate amount shall not exceed \$13,423,000,000. By increasing the amount of proceeds from the issuance of revenue bonds that may be expended from a continuously appropriated fund, the bill would make an appropriation.

(5) This bill would make other related clarifying and technical changes.

Ch. 10 (SB 6) Burton. California Consumer Power and Conservation Financing Authority.

Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations and other specified entities.

The Warren-Alquist State Energy Resources Conservation and Development Act requires the State Energy Resources Conservation and Development Commission (Energy Commission) to certify sufficient sites and related facilities that are required to provide a supply of electric power sufficient to accommodate projected demand for power statewide. The Energy Commission administers existing law with respect to energy conservation.

This bill would create the California Consumer Power and Conservation Financing Authority, with powers and responsibilities as prescribed, including the issuance of revenue bonds, for the purposes of augmenting electric generating facilities and to ensure a sufficient and reliable supply of electricity, financing incentives for investment in cost-effective

energy-efficient appliances and energy demand reduction, achieving a specified energy capacity reserve level, providing financing for the retrofit of inefficient electric powerplants, renewable energy and conservation, and, where appropriate, developing strategies for the authority to facilitate a dependable supply of natural gas at reasonable prices to the public. The bill would create in the State Treasury the California Consumer Power and Conservation Financing Authority Fund, and would continuously appropriate all money in the fund, except as specified, for the support of the authority.

The bill would prohibit the authority from approving any new program, enterprise, or project, on or after January 1, 2007, unless authority to approve such an activity is granted by statute enacted on or before January 1, 2007.

Ch. 11 (AB 3) Wright. California Alternate Rates for Energy or CARE program.

(1) Existing law requires the Public Utilities Commission to establish a program of assistance to low-income electric and gas customers, which is referred to as the California Alternate Rates for Energy or CARE program.

This bill would require CARE program funds to be used to provide any natural gas customer, as specified, who enrolls in the CARE program during a specified period of time, the same one-time bill credit based on the amount of each gas corporation's average CARE customer discount applied during specified months.

This bill would require the commission to adjust CARE program income requirements annually, as specified, to impose certain requirements on electrical and gas corporations to facilitate better penetration rates for the CARE program, and protect low-income and senior households from unwarranted disconnection of necessary electric and gas services, and to conduct targeted outreach about the program. Because a violation of an order of the commission is a crime under existing provisions of law, this bill would create a state-mandated local program by expanding the definition of a crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 12 (SB 28) Sher. Energy siting of power plants: unemployment insurance.

(1) Existing law contains various provisions relative to air pollution control.

This bill would require the State Air Resources Board, on or before July 1, 2002, in consultation with air pollution control districts, air quality management districts and the Independent System Operator, to establish a schedule for the retrofit of certain electrical generation facilities that would require completion of the retrofits by December 31, 2004, except as specified. The bill also would require the state board, on or before July 1, 2001, to implement a program for the banking, trading, and purchasing of emission reduction credits for electrical generating facilities.

The bill would, until January 1, 2004, authorize an applicant for a permit for an electrical generating facility to pay an emissions offset fee to the appropriate air pollution control district or air quality management district for expenditure by the district to purchase offsets for that facility.

(2) Existing law provides for the restructuring of California's electric power industry so that the price for the generation of electricity is determined by a competitive market.

Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission) to certify all sites and related facilities for thermal powerplants in the state, including a new site and related facility or a change or addition to an existing facility. The Energy Commission is required to prepare a final report and written decision after a public hearing on the application for the powerplant.

Existing law requires the Energy Commission to request the appropriate local, regional, state, and federal agencies to make comments and recommendations about the design, operation, and location of facilities.

This bill would require a public agency to use the staff report submitted for a public hearing on an application in the same manner as an environmental impact report or negative declaration for the site or facilities, except as specified.

This bill would require, until January 1, 2004, each local government agency reviewing the application to file a preliminary list of issues regarding the design, operation, location, and financial impact of the facility with the Energy Commission within 45 days of the date the application for certification is deemed filed. The bill would require the local jurisdiction to provide a final list of those issues no later than 100 days after the application for certification is deemed filed. To the extent that the bill would require the local jurisdiction to provide a new program or higher level of service, it would impose a state-mandated local program.

This bill would require the final report prepared by the Energy Commission to additionally include findings and conclusions as to whether increased property taxes due to the construction of the project are sufficient to support needed local improvements and public services required to serve the project.

This bill would require the written decision prepared by the Energy Commission after the public hearing to include a discussion of any public benefits from the project including, but not limited to, economic benefits, environmental benefits, and electricity reliability benefits.

This bill would clarify that decisions of the Energy Commission are subject to judicial review by the Supreme Court of California.

(3) Existing law authorizes the Energy Commission to establish a process for the expedited review of applications to construct and operate powerplants and thermal powerplants and related facilities.

This bill would require the Energy Commission, until January 1, 2004, also to establish a process for the expedited review of a repowering project.

This bill would additionally delete the deadline for completed applications for an expedited decision on simple cycle thermal powerplants.

(4) Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations and other specified entities.

This bill would require the commission to require each electrical corporation under the operational control of the Independent System Operator as of January 1, 2001, to modify tariffs so that all customers that install new distributed energy resources, as defined, in accordance with specified criteria are served under rates, rules, and requirements identical to those of a customer within the same rate schedule that does not use distributed energy resources, and to withdraw any provisions in otherwise applicable tariffs that activate other tariffs, rates, or rules if a customer uses distributed energy resources. The bill would require each electrical corporation, as part of its distribution planning process, to consider nonutility owned distributed energy resources as a possible alternative to investments in its distribution system in order to ensure reliable electric service at the lowest possible cost. The bill would require the commission, in establishing the rates under the provisions of the bill, to create a firewall that segregates distribution cost recovery, as described.

The bill would require a local publicly owned electric utility, as defined, or a local publicly owned utility otherwise providing electrical service, to undertake a review of its rates, tariffs, and rules, as prescribed, and to hold at least one noticed public meeting to solicit public comment on the review and any recommended changes.

The bill would require the commission to require each electrical corporation to establish new tariffs on or before January 1, 2003, for customers using distributed energy resources. The bill would continue to subject certain distributed energy resources, after January 1, 2003, to preexisting tariffs under the bill, until June 1, 2011 or, for specified installations, until June 1, 2006. The bill would require the commission to prepare and submit to the Legislature, on

or before June 1, 2002, a report describing its proposed methodology for determining the new rates and the process by which it will establish those rates.

The bill would require customers that install distributed energy resources to annually report to the commission specific information about the resources. The bill would require the commission, in consultation with air pollution control districts and air quality management districts and the Energy Commission, to evaluate that information, and, within two years of the effective date of the bill, to prepare and submit to the Governor and the Legislature a report recommending any changes to the above provisions that the commission determines to be necessary.

Because a violation of a requirement of the commission is a crime, this bill would impose a state-mandated local program by creating a new crime.

(5) The bill would authorize a gas corporation public utility, until June 1, 2002, to exercise the power of eminent domain for the purpose of competing with another entity in the offering of natural gas and services related to natural gas. The bill would prohibit the Public Utilities Commission from making a finding on a petition filed by a gas corporation for those purposes.

(6) The bill would appropriate not more than \$3,250,000 from the General Fund to the commission for expenditure, until January 1, 2005, in accordance with a prescribed schedule.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(8) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 13 (AB 31) Wright. Energy.

(1) Existing law appropriates funds to the Department of General Services to be expended for state energy projects, as defined, on state buildings or facilities, or buildings or facilities owned or operated by community colleges.

This bill would authorize those funds to also be expended for state energy projects in buildings or facilities owned or operated by any public postsecondary educational institution, thereby making an appropriation.

(2) Existing law authorizes any person to petition the hearing board of an air pollution control district or air quality management district for a variance from the rules, regulations, or orders of the district. Existing law also allows the chair of a district hearing board, or any member designated by the chair, to issue an emergency variance without notice and hearing, for good cause, including for a breakdown condition.

Existing law authorizes every district board to establish a permit system that requires a person to obtain a permit to build, erect, alter, replace, operate, or use any article, machine, equipment, or other contrivance that may cause the issuance of air contaminants, before doing any of these things.

This bill, until January 1, 2003, would provide that a breakdown condition includes the startup or shutdown of a facility enrolled on or before January 1, 2001, in a specified interruptible program contract, that has complied with applicable startup and shutdown procedures, or a failure to operate air emission control equipment, if either condition is caused by a power interruption or curtailment initiated by the Independent System Operator, a public utility electrical corporation, or local publicly owned electric utility, as defined, and

feasible measures that could have been reasonably implemented to minimize emissions during startup and shutdown were implemented. To the extent this requirement would broaden the scope of breakdown conditions, thereby requiring the chair of the district hearing board, or the designee of the chair, to make additional determinations regarding the issuance of emergency variances, this bill would impose a state-mandated local program.

The bill, until January 1, 2003, would require a district, notwithstanding any permit conditions to the contrary, to authorize, subject to specified conditions, a permitted stationary source to operate its emergency electrical power generating equipment during any period of an involuntary power service interruption, as defined, if necessary to prevent damage to its equipment or to complete the process of products that would be irreparably damaged or destroyed as a result of the involuntary electrical power service interruption. The bill would require each district, within 14 days of the effective date of this bill, to create an emergency authorization form for each applicant to certify in writing its agreement to comply with specified provisions. The bill would require each completed emergency authorization form under these provisions to be approved or denied by the district not later than 5 working days from the date of its submittal, to the extent not inconsistent with other state or federal notice requirements. Because a violation of these requirements or standards are crimes, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

**DIGESTS OF STATUTES
ENACTED IN 2001**

2001–02 SECOND EXTRAORDINARY SESSION

BILL CHAPTERS

Ch. 1 (AB 27) Lowenthal. Long Beach tidelands: gas reserves: exploration and development.

(1) Existing law grants to the City of Long Beach certain tidelands and submerged lands in trust under prescribed conditions.

This bill would authorize the State Lands Commission to negotiate and execute, on behalf of the state, a contract or agreement with the City of Long Beach and any contractor operating under an oil operating contract with the City of Long Beach, that will provide a financial incentive for that contractor to explore for, and develop, additional gas reserves in the Long Beach tidelands, but would provide that nothing in the bill or any contract or agreement that may be entered into pursuant to provisions of the bill shall supersede or amend, in any respect, specified contracts and agreements governing the drilling, developing, extracting, processing, taking, or removal of oil, gas, and other hydrocarbons from the Long Beach tidelands, as defined. The bill would require that any contract or agreement so authorized pursuant to those provisions of the bill specify that the contractor and the City of Long Beach, either directly or indirectly, shall bear the costs of the exploration and development of additional gas reserves in the Long Beach tidelands, as specified. The bill would provide that the state would not bear any of the cost associated with the exploration and development of those additional gas reserves, nor would it pay any abandonment costs with respect to those exploration and development activities.

The bill would require all net revenue derived by the City of Long Beach from the disposition of its allocated share of the additional gas reserves that are a product of the exploration and development undertaken pursuant to a contract or agreement to be used by the City of Long Beach for specified purposes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 2 (SB 68) Battin. Electricity: blackouts.

Existing law requires the Public Utilities Commission to establish priorities among the types or categories of customers of every electrical corporation and every gas corporation, and among the uses of electricity or gas by those customers. In establishing those priorities, existing law requires the commission to consider certain factors, as prescribed.

This bill would also require the commission in establishing use priorities to make a determination of the potential effect of extreme temperatures on the health and safety of residential customers. In making this determination, the bill would require the commission to consult with appropriate medical experts and review appropriate literature and research, consider whether providing priority to customers experiencing extreme temperatures would result in increased outage frequency and duration for remaining customers and its effect on their health and safety, and consider whether alternative measures would be appropriate. The bill would authorize the commission, to the extent it determines it is in the public interest, to provide priority to customers experiencing extreme temperatures only when temperatures are extreme.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 3 (AB 4) Cardoza. Electric power.

Existing law provides that in the event that any electrical or gas corporation experiences any shortage of electricity or gas and is unable to obtain electricity or gas from any other source so that it is unable to meet the demand of its customers, the Public Utilities Commission is authorized to order that service be temporarily reduced.

This bill would require an electrical corporation or local publicly owned electric utility, as defined, to immediately notify the Commissioner of the California Highway Patrol and the sheriff and any affected chief of police of the specific area within their respective law enforcement jurisdiction that will sustain a planned loss of power as soon as the planned loss becomes known as to when and where that power loss will occur.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 4 (SB 64) Costa. Energy: qualified agricultural biomass: incentive grants.

(1) Under the existing Agricultural Biomass-to-Energy Incentive Grant Program, an air pollution control district or an air quality management district, may apply to the California Technology, Trade, and Commerce Agency for a grant to provide incentives to facilities that convert qualified agricultural biomass to energy. Existing law defines a facility as any California site that, among other things, as of July 1, 2000, converted, and continues to convert, qualified agricultural biomass, as defined, to energy, and the conversion results in lower oxides of nitrogen (NO_x) emissions than would otherwise be produced if burned in the open field during the ozone season, and, if the site produces electricity for sale to a public utility, the site does not qualify for specified fixed energy prices.

This bill would include within that definition any California site that operated prior to July 1, 2000, converting qualified agricultural biomass to energy, was closed for a period of time but maintained all applicable air quality permits during that closure, and that is ready to reopen on or before June 30, 2001. The bill would provide that if the site produces electricity for sale, it does not qualify for fixed energy prices established prior to June 30, 2000. By requiring air districts to make additional determinations regarding the eligibility of facilities under the program, this bill would impose a state-mandated local program.

(2) Chapter 7 of the 2001–02 First Extraordinary Session appropriates funds to the State Energy Resources Conservation and Development Commission to be expended for certain energy projects, including \$40,000,000 to encourage the purchase of certain high efficiency electrical agricultural equipment, and incentives for overall electricity conservation efforts.

This bill would require the commission to transfer, of that \$40,000,000, \$3,500,000 to the California Technology, Trade, and Commerce Agency pursuant to an interagency agreement within 30 days of the effective date of the bill for the purpose of supplementing the funding and furthering the intent of the Agricultural Biomass-to-Energy Incentive Grant Program, thereby constituting an appropriation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 5 (SB 75) Ortiz. Income taxes: deduction: interest.

The Personal Income Tax Law allows various deductions in computing income that is subject to taxation.

This bill would allow as a deduction the amount of interest paid or incurred by a taxpayer on any loan or other indebtedness incurred in acquiring and installing any energy efficient product or equipment, as defined, installed or applied to a qualified residence located in this state.

This bill would take effect immediately as a tax levy.

Ch. 6 (SB 84) Burton. State Energy Resources Conservation and Development Commission.

(1) Existing law requires the State Energy Resources Conservation and Development Commission to undertake and implement various programs regarding energy.

This bill would require the commission to develop and implement a program to provide battery backup power for those official traffic control signals that the commission, in consultation with cities, counties, or cities and counties, determines to be high priority traffic control signals. The bill would authorize the commission to grant 70% of the funds to a city, county, or city and county for backup battery power for traffic control signals retrofitted with light-emitting diodes. The bill would require the commission to give priority to a city, county, or city and county that did not receive a grant from the state for the installation of light-emitting diode traffic control signals.

The bill would authorize the commission to reimburse a city, county, or city and county that has installed a backup battery system for light emitting diode traffic signals between January 1, 2001, and the effective date of the bill, up to \$1,500,000.

The bill would make an appropriation by reallocating up to \$10,000,000 from specified existing state funds to the commission for the purpose of providing matching grants pursuant to the bill.

The bill would prohibit the commission from expending more than 5% of the amount available for expenditure for administrative costs in carrying out the grant program.

The bill would require the commission, by June 1, 2004, to submit a report to the Governor and the Legislature on the grant program expenditures and program activities.

(2) Existing law requires the driver of any vehicle approaching an intersection that has official traffic control signals that are inoperative to stop at the intersection, and authorizes that driver to proceed with caution when it is safe to do so.

This bill would specify that those provisions shall apply to traffic control signals that become inoperative because of battery failure.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 7 (SB 85) Burton. Electrical restructuring: rates.

Provisions of the Public Utilities Act restructuring the electrical industry establish a process for the recovery by specified electrical corporations of certain uneconomic costs during a transition period that began on January 1, 1998, and ends for an electrical corporation on the earlier of March 31, 2002, or the date that the electrical corporation fully recovers its uneconomic costs. Existing law imposes during the transition period a rate freeze and a 10% rate reduction to remain in effect until March 31, 2002, unless the electrical corporation fully recovers its uneconomic costs at an earlier date. Existing law provides for fixed transition amounts to enable electric utility corporations to recover uneconomic costs associated with electrical deregulation through a nonbypassable charge on classes of customers until December 31, 2001, with specified exceptions.

This bill would prohibit the Public Utilities Commission from raising rates for residential and small commercial customers upon the termination of the 10% rate reduction for residential and small commercial customers, as described above, solely as a result of the termination of the 10% rate reduction. The bill would provide that its provisions do not affect the authority of the commission to raise rates for other reasons. The bill would provide that its provisions do not further extend the authority to impose fixed transition amounts on customers or further authorize or extend rate reduction bonds. The bill would provide that to the extent its provisions conflict with any other provision of the Public Utilities Code, the provisions of this bill shall prevail.

Ch. 8 (AB 86) Florez. Diesel fuel tax.

The Diesel Fuel Tax Law, with respect to diesel fuel, as defined, imposes a tax at specified rates, upon the removal, entry, sale, delivery, and use of each gallon of diesel fuel, as defined.

This bill would, until January 1, 2007, revise the definition of diesel fuel for those purposes to exempt the water portion of a diesel fuel and water emulsion, as specified. The bill would, until January 1, 2007, also revise the definition of diesel fuel to eliminate references to the manner of use of the diesel fuel, and make related revisions to the definition of blended diesel fuel for purposes of the Diesel Fuel Tax Law.

This bill would incorporate additional changes in Section 60022 of the Revenue and Taxation Code proposed by AB 309, to be operative only if AB 309 and this bill are both enacted and become effective, as specified, and this bill is enacted last.

This bill would take effect immediately as a tax levy.

Ch. 9 (AB 61) Kehoe. Energy.

Chapter 8 of the Statutes of the 2001–02 First Extraordinary Session contains erroneous cross-references.

This bill would correct the erroneous cross-references.

Ch. 10 (SB 82) Murray. Solar energy systems.

(1) The California Small Business Financial Development Corporation Law provides for the creation of small business financial development corporations by the Technology, Trade, and Commerce Agency. These corporations are authorized to make loans and loan guarantees to small businesses for various purposes, including loans for energy efficiency improvement. Existing law continuously appropriates the money in the California Small Business Expansion Fund.

This bill would specifically identify solar energy systems as energy efficiency improvements for which these corporations may grant loans. The bill would specify the minimum and maximum amounts for a loan, and would require the Energy Resources Conservation and Development Commission, in cooperation with the California Office of Small Business Development, to establish criteria and procedures applicable to loans for solar energy systems made under these provisions.

(2) Existing law establishes in state government the Department of General Services, which has various responsibilities related to planning, acquisition, construction, and maintenance of state buildings and property. Existing law also establishes in the Resources Agency the State Energy Resources Conservation and Development Commission, which has various responsibilities related to energy conservation.

This bill would require the department, in consultation with the commission, to ensure that solar energy equipment is installed, no later than January 1, 2007, on all state buildings and state parking facilities where feasible, as specified. It also would require solar energy equipment to be installed where feasible as part of the construction of all state buildings and state parking facilities that commences after December 31, 2002.

This bill would authorize the Director of General Services to exempt such a solar energy equipment project from specified advertising and competitive bidding requirements. The bill would declare that solar energy equipment installation on state buildings and state parking facilities is a state energy project within the meaning of specified provisions of the Government Code, and would authorize the department to expend specified funds for these purposes.

Ch. 11 (SB 2) Alarcon. Public utilities.

(1) Existing law requires the Public Utilities Commission to establish a program of assistance to low-income electric and gas customers, which is referred to as the California Alternate Rates for Energy or CARE program.

This bill would establish the Low-Income Oversight Board for the purpose of advising the commission on low-income electric and gas customer issues and serving as a liaison for the commission to low-income ratepayers and representatives. The bill would require, beginning in 2002, the commission, with the assistance of the Low-Income Oversight Board,

to conduct an assessment of the needs of low-income electricity and gas ratepayers. The bill would require the assessment to include an evaluation of the implementation of low-income programs and the effectiveness of weatherization services and energy efficiency measures in low-income households.

The bill would require the commission to ensure that the CARE discount correctly reflects the level of need of customers.

The bill would require the commission to work with public utility electrical and gas corporations to establish penetration goals. The bill would require the commission to authorize recovery of administrative costs associated with the implementation of the CARE program.

The bill would require the commission to examine methods to improve CARE enrollment and participation, including comparing information from CARE and the Universal Lifeline Telephone Service (ULTS) to determine the most effective means of utilizing that information to increase CARE enrollment, automatic enrollment of ULTS customers who are eligible for the CARE program, customer privacy issues, and alternative mechanisms for outreach to potential enrollees. The bill would require the commission to improve the CARE application process using the existing ULTS application process as a model.

The bill would require weatherization programs to use the needs assessment conducted by the Low-Income Oversight Board to maximize efficiency of delivery.

(2) Existing law requires each local publicly owned electric utility that has not implemented programs for low-income electricity customers or completed an assessment of need for those programs on or before December 31, 2000, to perform a needs assessment, as prescribed, and determine the amount of total funds collected to be allocated to low-income programs.

This bill would require a local publicly owned electric utility to consider increasing the level of discounts or raising the eligibility level of existing rate assistance programs to be reflective of customer need, to streamline enrollment for low-income programs, and to establish participation goals for rate assistance programs.

(3) A violation of the Public Utilities Act is a crime. This bill would change the definition of that crime by adding new requirements for electric utilities, thereby imposing a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 12 (SB 17) Brulte. Income and bank and corporation tax credits: solar energy systems.

The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws.

This bill would, under both laws, allow until January 1, 2006, a credit in an amount equal to the lesser of (a) either 15% or 7¹/₂% of the net cost paid or incurred by a taxpayer during the taxable year for the purchase and installation on property in this state of a solar energy system for the production of electricity, or (b) the applicable dollar amount per rated watt of generating capacity of that same system, as provided.

This bill would take effect immediately as a tax levy.

Ch. 13 (AB 69) Bogh. Public health emergency conditions.

Existing law authorizes the Governor to take various actions in accordance with the State Emergency Plan and programs for the mitigation of the effects of an emergency in the state.

Existing law provides for the Office of Statewide Health Planning and Development, which is charged with enforcement of various provisions of law relating to health facilities, including long-term health care facilities.

This bill would authorize the Governor, by executive order, or the Director of the Office of Statewide Health Planning and Development, to suspend the enforcement of laws and regulations related to the construction or renovation of existing long-term health care facilities when an extraordinary situation exists within the state relating to an inadequate supply of energy that has a strong potential for causing harm to residents of long-term health care facilities.

This bill would require the Office of Statewide Health Planning and Development, in consultation with the office of the State Fire Marshal, to establish specific exemptions of laws and regulations that may be included in an executive order issued pursuant to the bill.

These provisions would remain in effect only until January 1, 2003. This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 14 (AB 21) Canciamilla. Public utilities: eminent domain: certificate of public convenience and necessity.

Existing law requires a public utility that offers competitive services and that wants to exercise its power of eminent domain to condemn any property for the purpose of competing with another entity in the offering of those competitive services, to first obtain from the Public Utilities Commission a finding that the action would serve the public interest. Existing law requires the commission, before making that finding, to conduct a hearing in the local jurisdiction that would be affected by the proposed condemnation, and authorizes the commission to make the finding if the commission makes a specified determination.

This bill would require the commission, at the request of a public utility gas corporation, to hold a local hearing as part of the procedure to issue a certificate of public convenience and necessity. The bill would provide to the commission, if the commission holds public hearings during the certification procedure for the purpose of making the determination described above, an additional 45 days beyond the date of any otherwise applicable statutory or regulatory deadline for making a determination.

Ch. 15 (AB 26) Calderon. Electrical energy: State Energy Resources Conservation and Development Commission: energy loans: electrical corporations: tariffs.

(1) The existing State Assistance Fund for Enterprise Act of 1989 establishes the State Assistance Fund for Energy, California Business and Industrial Development Corporation. Under the act, the corporation, until July 1, 2001, is authorized to make energy efficiency improvement loans to small businesses for a fixed rate of interest for a term not exceeding 5 years.

This bill would extend the operative date of the act until July 1, 2011.

(2) Under existing law, a school, hospital, public care institution, or a unit of local government may submit an application to the State Energy Resources Conservation and Development Commission for an allocation for the purposes of financing projects such as energy audits, energy conservation and operating procedures, energy conservation measures, energy conservation projects, and technical assistance programs. Existing law requires each eligible institution to which an allocation has been made to repay the principal amount of the allocation, plus interest, as specified. Under existing law, the commission, except as specified, must periodically set interest rates on the loans based on surveys of existing financial markets and at rates not lower than the Pooled Money Investment Account.

This bill would instead require the interest rates to be not less than 3% per annum.

(3) Existing law requires the commission to provide loans to local jurisdictions for purposes that include purchase, maintenance, and evaluation of both energy efficient equipment for existing and new facilities and small power production systems, and to improve the operating efficiency of existing local transportation systems. Existing law requires the commission, except as specified, to periodically set interest rates on the loans based on surveys of existing financial markets and at rates not lower than the Pooled Money Investment Account.

This bill would instead require the interest rates to be not less than 3% per annum.

(4) Existing law requires the Public Utilities Commission to require each electrical corporation to establish new tariffs on or before January 1, 2003, for customers using distributed energy resources.

This bill would require the commission, in establishing those tariffs, to consider coincident peakload, and the reliability of the onsite generation, as determined by the frequency and duration of outages, so that customers with more reliable onsite generation and those that reduce peak demand pay a lower cost-based rate.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 16 (AB 28) Migden. Electrical restructuring: Oversight Board: Independent Operator.

(1) The existing restructuring of the electrical services industry within the Public Utilities Act provides for the establishment of an Independent System Operator and a Power Exchange as separately incorporated public benefit nonprofit corporations. An Electricity Oversight Board (Oversight Board) is also established to oversee the Independent System Operator and the Power Exchange in order to ensure the success of electric industry restructuring and to ensure a reliable supply of electricity in the transition to a new market structure. The Oversight Board is granted various powers in order to carry out these purposes.

This bill would authorize the Oversight Board to investigate any matter related to the wholesale market for electricity to ensure that the interests of California's citizens and consumers are served, protected, and represented in relation to the availability of electric transmission and generation, and related costs, during periods of peak demand. The bill would delete a provision relating to the authority of the Oversight Board to exercise the exclusive right to decline to confirm the appointments of the governing board of the Independent System Operator.

The bill, until January 1, 2003, or the occurrence of a specified event, whichever is earlier, would authorize the Oversight Board to direct the inspection or reproduction of records of the Independent System Operator or the Power Exchange. The bill would authorize the Oversight Board to direct the Independent System Operator to report to the Oversight Board, as specified. The bill would enact confidentiality requirements and procedures applicable to information provided in this regard. The bill would require the Public Utilities Commission to treat specified information received from the Oversight Board in accordance with a prescribed confidentiality provision, the violation of which provision would make certain commission officers or employees guilty of a misdemeanor. By creating a new crime, the bill would impose a state-mandated local program.

The bill, until January 1, 2003, or the occurrence of a specified event, whichever is earlier, would require that electric generation and transmission facilities be subject to various standards related to their availability. The bill would require the Oversight Board, in consultation with the commission and the Independent System Operator, to prepare and adopt protocols for the scheduling of transmission and generation equipment outages for the purpose of maintenance, repair, or upgrade and to prepare and adopt a schedule of outages in accordance with those protocols. The bill would require the Oversight Board to direct the Independent System Operator to develop and submit to the Oversight Board and the commission proposed generation facility maintenance, operating, and availability standards for generator units with a certain capacity. The bill would authorize the commission to adopt those standards and ensure compliance with those standards. The bill would require entities that own or operate certain electric generating units to provide reports on a monthly basis to the Independent System Operator that identify any periods the units were unavailable to produce electricity or were available at reduced capacity. The bill would require the Independent System Operator to transmit that information to the Oversight Board and the commission.

The bill would also impose certain requirements on electrical corporations having contracts with certain qualifying facilities or cogeneration facilities. The bill would require a report of the operational status and availability of the facility to be provided to the Oversight Board and the commission on a daily basis. The bill would provide for the assessment of penalties by the commission for violations of these provisions. Because a violation of the Public Utilities Act is a crime under existing provisions of law, the bill would create a state-mandated local program by expanding the definition of a crime.

The bill, until January 1, 2003, or the occurrence of a specified event, whichever is earlier, would impose various duties on local publicly owned electric utilities and certain other local public entities relative to maintenance of certain generation and transmission facilities, and reporting of actual planned and nonplanned outages of facilities, thereby imposing a state-mandated local program.

The bill would require the Oversight Board to report to the Legislature in writing on a quarterly basis on its progress in implementing the provisions of this bill.

The bill would provide that its provisions shall become operative only if SB 39 of the Second Extraordinary Session of 2001–02 is enacted and becomes effective.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 17 (AB 48) Wright. Energy conservation.

(1) Existing law requires the State Energy Resources Conservation and Development Commission to prescribe, by regulation, lighting, an insulation climate control system, and other building design and construction standards that increase the efficiency in the use of energy for new residential and new nonresidential buildings and to provide an energy conservation manual that includes a prescriptive method of complying with the standards.

This bill would enact the Solar Training, Education, and Certification Act of 2001. The bill would authorize cities, counties, and cities and counties to implement a program that implements applicable building standards requiring the use of solar water heating or photovoltaic systems in construction projects.

(2) Existing law requires the State Energy Resources and Conservation Commission to develop a grant program to offset a portion of the cost of an eligible solar energy system, as defined. Existing law requires that eligible solar energy systems for electricity generation be listed by a certified testing agency.

This bill would require that, in the absence of certification, major components of eligible solar energy systems for electricity generation comply with specifications adopted by the commission.

(3) Existing law establishes in state government the Employment Development Department, and specifies its powers and duties.

This bill would require the department to administer a solar training program, as specified, and to coordinate with the Division of Apprenticeship Standards and the State Contractors' License Board to ensure that solar energy product and service providers in California possess and maintain the necessary skills, training, and certification.

Ch. 18 (AB 57) Wiggins. Municipal utility districts : public agencies.

(1) Existing law authorizes any public agency together with unincorporated territory, or 2 or more public agencies, with or without unincorporated territory, to organize and incorporate as a municipal utility district by filing a resolution or petition. Existing law requires the board of supervisors to whom the resolution or petition is presented to call an election within the proposed district and to canvass the returns of each public agency and each parcel of unincorporated territory. The board of supervisors is required to order and declare the district created and established of the public agencies and territory in which a majority of those who voted did so in favor of the creation of the district if the total number of voters in the approving public agencies and territory is not less than $\frac{2}{3}$ the number of voters within the district as first proposed, according to the register used at the election.

This bill would recast and reorganize these provisions. The bill would require that the number of registered voters in the approving public agencies and territory be not less than $\frac{2}{3}$ the number of registered voters within the district as proposed to the voters, in order to declare the district created where a majority of those who voted did so in favor of the district. The bill would provide that those public agencies and parcels of unincorporated territory in which a majority of those persons voting did not vote in favor of the creation of the district shall be excluded from the district.

(2) This bill would incorporate changes to Section 11652 of the Public Utilities Code, proposed by SB 23 2X, to be operative, as specified, only if SB 23 2X and this bill are both chaptered and become effective, and this bill is chaptered last.

**DIGESTS OF RESOLUTIONS AND PROPOSED
CONSTITUTIONAL AMENDMENTS
ADOPTED IN 2001**

2001–02 REGULAR SESSION

RESOLUTION CHAPTERS

Res. Ch. 1 (ACR 11) Washington. Dr. Martin Luther King, Jr. Day.

This measure would designate that January 15, 2001, be observed as the official memorial of the late Rev. Dr. Martin Luther King, Jr.'s birth, commemorate Dr. Martin Luther King, Jr. Day, the work of Dr. Martin Luther King, Jr., and the Civil Rights Movement in changing public policy in California and in the United States of America.

Res. Ch. 2 (ACR 13) Washington. Emergency services: State Capitol building tragedy.

This measure would commend officers and employees of specified government agencies and departments for their services in response to the tragedy and fire at the State Capitol on Tuesday, January 16, 2001.

Res. Ch. 3 (ACR 14) Migden. Girls and Women in Sports Day.

This measure would recognize female athletes, coaches, officials, and sports administrators for their important contribution in promoting the value of sports in the achievement of full human potential and would proclaim February 7, 2001, as California Girls and Women in Sports Day.

Res. Ch. 4 (ACR 15) Wright. Black History Month.

This measure would recognize February 2001 as Black History Month, urge all citizens to join in celebrating the accomplishments of African-Americans during Black History Month, and encourage the people of California to recognize the many talents, achievements, and contributions that African-Americans make to their communities.

Res. Ch. 5 (SCR 11) Morrow. Library Lovers Month.

This measure would proclaim the month of February 2001 as Library Lovers Month, and urge all Californians to visit a library and thank a librarian for services provided by libraries and librarians.

Res. Ch. 6 (ACR 17) Nakano. Day of Remembrance.

This measure would declare February 19, 2001, as a Day of Remembrance in order to increase public awareness of the events surrounding the internment of Americans of Japanese ancestry during World War II.

Res. Ch. 7 (SCR 2) Alpert. College Awareness Month.

This measure would proclaim February 2001 to be "College Awareness Month." This measure would urge California residents to encourage elementary and secondary school pupils to succeed in their academic endeavors so they may earn a college education and contribute to the economic, social, and political future of California.

Res. Ch. 8 (SCR 7) Johannessen. POW Recognition Day.

This measure would designate April 9, 2001, as POW Recognition Day in California.

Res. Ch. 9 (ACR 24) Strom-Martin. Read Across America.

This measure would proclaim March 2, 2001, as Read Across California Day, endorse the Read Across America campaign, and would commend the National Education Foundation and the California Teachers Association for their efforts on behalf of the Read Across America campaign.

Res. Ch. 10 (ACR 33) Hertzberg. Japan Peace Treaty Day.

This measure would proclaim September 8, 2001, as Japan Peace Treaty Day and would urge all Californians to observe this day of remembrance for the actions taken in San Francisco on September 8, 1951.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Res. Ch. 11 (ACR 16) Strom-Martin. Spay Day USA 2001.

This measure would declare February 27, 2001, to be Spay Day USA 2001, and would request that Californians observe that day by having their dogs or cats spayed or neutered or by contributing to organizations that provide spay or neuter services.

Res. Ch. 12 (SCR 3) Burton. Friendship state relationship: Punjab State, India.

This measure would, on behalf of the people of California, extend an invitation to the people of Punjab State, India, to join with California in a friendship state relationship in order to encourage and facilitate mutually beneficial social, economic, educational, and cultural exchanges and to lead to a more indelible and lasting relationship between Californians and the people of Punjab State, India.

Res. Ch. 13 (SCR 4) Burton. Sister state relationship: Gujarat State, India.

This measure would, on behalf of the people of California, extend an invitation to the people of Gujarat State, India, to join with California in a sister state relationship in order to encourage and facilitate mutually beneficial social, economic, educational, and cultural exchanges that would lead to an indelible and lasting relationship between the residents of California and Gujarat State, India.

Res. Ch. 14 (SCR 8) Murray. Arts Education Month.

This measure would proclaim March 2001 to be "Arts Education Month."

Res. Ch. 15 (SCR 5) Torlakson. California Fitness Month.

This measure would proclaim the month of April 2001 as California Fitness Month, and would encourage all Californians to enrich their lives through proper diet and exercise.

Res. Ch. 16 (SCR 6) Chesbro. Physical education.

This measure would proclaim May 1 to May 7, 2001, as Physical Education and Sports Week and May as Physical Fitness and Sports Month in this state.

Res. Ch. 17 (SCR 16) Chesbro. California Adult Education Week.

This measure would proclaim the week of March 26, 2001, to April 1, 2001, as California Adult Education Week.

Res. Ch. 18 (SJR 6) Dunn. Multifamily rental housing.

This measure would memorialize the President of the United States and the Congress to review the tax structure within the Internal Revenue Code, including depreciation schedules and passive loss provisions that favored investment in multifamily rental housing, as they existed prior to the Tax Reform Act of 1986, and to enact new tax benefits that complement the federal Low-Income Housing Tax Credit Program and provide additional incentives to invest in multifamily rental housing, so that the significant shortage of affordable multifamily housing both in California and throughout the United States may be addressed through increased investment.

Res. Ch. 19 (SJR 10) Poochigian. Special education: federal funding.

This measure would memorialize the President and Congress of the United States to provide the full federal share of funding for special education programs to the states so that this state and other states will not be required to take funding from other vital state and local programs to fund this underfunded federal mandate.

Res. Ch. 20 (ACR 19) Wayne. Colorectal Cancer Awareness Month.

This measure would designate the month of March 2001 as "Colorectal Cancer Awareness Month" in California.

Res. Ch. 21 (SCR 20) Alpert. State Employee Mentor Awareness and Recruitment Day.

Existing law known as the California Academic Volunteer and Mentor Service Act of 1992 creates the Academic Volunteer and Mentor Service Program, administered by the office of the Governor and local school jurisdictions, in order to provide academic support and guidance to each child who requires it. Existing law also provides for the participation of volunteer mentors within certain substance abuse treatment programs.

This measure would designate April 3, 2001, as State Employee Mentor Awareness and Recruitment Day with the purpose of focusing positive attention on state employee mentors and encouraging others to mentor a young person.

Res. Ch. 22 (ACR 8) Havice. Crime Victims' Rights Week.

This measure would recognize the week of April 23 through 27, 2001, as Crime Victims' Rights Week in California.

Res. Ch. 23 (ACR 34) Corbett. California Earthquake Preparedness Month.

This measure would declare the month of April to be California Earthquake Preparedness Month and urge all Californians and government agencies to engage in education, evaluation of seismic hazards, mitigation, safety activities, and the exchange of information related to earthquake preparedness with other states and nations during that month.

Res. Ch. 24 (ACR 39) Mountjoy. Work Zone Safety Awareness Week.

This measure would proclaim the week of April 9 to April 12, 2001, as Work Zone Safety Awareness Week in California.

Res. Ch. 25 (ACR 31) Strom-Martin. Women's history.

This measure would urge all Californians to celebrate Women's History Month and join in the commemoration of International Women's Day on March 8, 2001. This measure would also urge all California public school districts to add an accurate and inclusive women's history component into approved curriculum and provide the corresponding educational materials for pupils in grades 1 to 12, inclusive. This measure would further urge the State Board of Education to ensure that the state curriculum framework includes accurate and inclusive instruction on the accomplishments and contributions of women throughout history and ensure that state criteria for selecting textbooks include information to guide the selection of textbooks that emphasize the accomplishments and contributions of women throughout history.

Res. Ch. 26 (ACR 40) Leach. Mathematics Education Awareness Month.

This measure would proclaim April as Mathematics Education Awareness Month and would encourage Californians to work together to ensure that the mathematics curricula of local schools are adequately preparing children for the challenges of tomorrow.

Res. Ch. 27 (ACR 12) Cardoza. Child abuse and neglect.

This measure would designate 2001 as the Year of Heightened Concern for Special Children.

Res. Ch. 28 (ACR 41) Strom-Martin. California Earth Day.

This measure would declare April 22, 2001, as "California Earth Day," would reaffirm the Legislature's commitment to the fundamental principles of environmental laws, and would encourage the state's residents to promote the goals of Earth Day 2001.

Res. Ch. 29 (SCR 9) Morrow. Vicente "Vince" Andrade Memorial Bridge.

This measure would designate the Twin Oaks Valley Road Bridge on State Highway Route 78 in the City of San Marcos, San Diego County, as the Vicente "Vince" Andrade Memorial

Bridge in honor and recognition of Vicente “Vince” Andrade. The measure also would request the Department of Transportation to determine the cost for appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect those plaques and markers.

Res. Ch. 30 (SCR 27) Speier. California Nonprofits and Philanthropy Week.

This measure would proclaim April 22–28, 2001 as California Nonprofits and Philanthropy Week in California, to recognize the importance and value of nonprofit and philanthropic organizations.

Res. Ch. 31 (SJR 5) Poochigian. Armenian Genocide: Day of Remembrance.

This measure would designate April 24, 2001, as “California Day of Remembrance for the Armenian Genocide of 1915–1923.” It would memorialize the Congress of the United States to likewise act to commemorate the Armenian Genocide.

Res. Ch. 32 (ACR 7) Havice. California Peace Officers’ Memorial Day.

This measure would honor California peace officers and commemorate Friday, May 4, 2001, as California Peace Officers’ Memorial Day.

Res. Ch. 33 (ACR 9) Havice. Law Enforcement Appreciation Week.

This measure would proclaim May 13 through May 19, 2001, as Law Enforcement Appreciation Week in California and would encourage all Californians to join in this observance to commend our law enforcement officers for their professionalism and commitment to the citizens of California.

Res. Ch. 34 (ACR 36) Cox. Meningococcal disease awareness.

This measure would designate April 2001 as Meningitis Awareness Month.

Res. Ch. 35 (ACR 45) Hertzberg. Community College Month.

This measure would recognize April 2001 as California Community College Month.

Res. Ch. 36 (ACR 57) Koretz. California Holocaust Memorial Week.

This measure would designate the week of April 15 through April 22, 2001, as California Holocaust Memorial Week, and would urge Californians to observe these days of remembrance for the victims of the Holocaust in an appropriate manner.

Res. Ch. 37 (ACR 35) Thomson. Skin cancer and melanoma awareness.

This measure would declare that the month of May shall be recognized as Skin Cancer Awareness Month in California, and would encourage all Californians to make themselves and their families aware of the risk of skin cancer and the preventive measures. The measure would also proclaim May 7, 2001, as Melanoma Awareness Monday in California, to increase public awareness of the importance of routine complete skin examination to detect early melanoma.

Res. Ch. 38 (ACR 52) Correa. California Professional Beauty and Barbering Industry Week.

This measure would declare the week of April 22 to April 28, 2001, as the “California Professional Beauty and Barbering Industry Week.”

Res. Ch. 39 (ACR 60) Daucher. Keep California Beautiful Month.

This measure would designate April 2001 as “Keep California Beautiful Month.”

Res. Ch. 40 (SCR 24) Speier. Organ and Tissue Donor Awareness Week.

This bill would proclaim the week of April 15 to 21, 2001, as Organ and Tissue Donor Awareness Week, and would encourage all Californians to learn the facts about organ and

tissue donation, make a decision about becoming a donor, and discuss their decision with family members.

Res. Ch. 41 (ACR 21) Firebaugh. University of California regents.

This measure would request the Regents of the University of California to repeal SP-1, a policy approved by the regents in 1995, by the end of the 2000–01 academic year.

Res. Ch. 42 (ACR 64) Zettel. Charter schools.

This measure would proclaim April 30 through May 4, 2001, as California Charter Schools Week.

Res. Ch. 43 (ACR 69) Strom-Martin. Day of the Teacher.

This measure would proclaim May 9, 2001, to be Day of the Teacher and would urge Californians to observe that day.

Res. Ch. 44 (SCR 31) Burton. 9-1-1 for Kids Week.

This measure would designate the Week of May 14 through May 18, 2001, as “9-1-1 for Kids Week” in the State of California.

Res. Ch. 45 (ACR 67) Nakano. Small Business Week.

This measure would request the Governor to proclaim the week of May 6, 2001, through May 12, 2001, as California Small Business Week, in conjunction with National Small Business Week.

Res. Ch. 46 (ACR 56) Steinberg. Foster care.

This measure would acknowledge the month of May 2001, as Foster Care Awareness Month and urge all citizens to give recognition and appreciation to foster parents.

Res. Ch. 47 (ACR 27) Dickerson. India earthquake.

This measure would express the sympathy of the Legislature for those who died and those who lost loved ones in the earthquake that hit India on January 26, 2001. It also would express the hope that the world never forgets this tragedy and acknowledge the efforts of the India Earthquake Relief Fund.

Res. Ch. 48 (ACR 51) Negrete McLeod. Parents Anonymous, Inc.

This measure would commend Parents Anonymous, Inc., for its commitment to strengthening families, preventing child abuse, child neglect, and juvenile delinquency for more than 30 years in California and other states.

Res. Ch. 49 (SCR 19) Johannessen. California marine transportation system.

This measure would proclaim the month of May as California Marine Transportation System Month, and would declare the intent of the Legislature to promote the funding and programs necessary to the advancement of the California marine transportation system.

Res. Ch. 50 (ACR 44) Havice. Gold Star Mothers Week.

This measure would designate the last Monday in May, and the week following, as Gold Star Mothers Week in honor of the heroic sacrifices of our fallen men and women and of the sacrifices made by their loving parents.

Res. Ch. 51 (SCR 26) Polanco. Cesar Chavez Day.

This measure would recognize March 31 as the anniversary of the birth of Cesar Chavez and call upon all Californians to participate in appropriate observances to remember Cesar Chavez as a symbol of hope and justice to all citizens.

Res. Ch. 52 (SCR 28) Alarcon. California Museum Month.

This measure would recognize the important role that museums have in the State of California and would proclaim May 2001 as California Museum Month.

Res. Ch. 53 (ACR 26) Dickerson. Mosquito and Vector Control Awareness Week.

This measure would declare May 21 through 28, 2001, Mosquito and Vector Control Awareness Week.

Res. Ch. 54 (ACR 46) Florez. The Kern County Korean War Veterans Memorial Highway.

This measure would designate a specified portion of State Highway Route 99 as the Kern County Korean War Veterans Memorial Highway. The measure would request the Department of Transportation to determine the cost of appropriate plaques designating that portion of State Highway Route 99 and, upon receiving donations from nonstate sources covering that cost, to erect those plaques.

Res. Ch. 55 (ACR 58) Nakano. Asian and Pacific Islander American Heritage Month.

This measure would commend Asian and Pacific Islander Americans for their accomplishments and service to the state, and would recognize May 2001 as Asian and Pacific Islander American Heritage Month.

Res. Ch. 56 (ACR 63) Pavley. State parks.

This measure would declare May 2001 to be State Parks Month.

Res. Ch. 57 (ACR 6) Havice. Sober Graduation Month.

This measure would designate May 31, 2001, to June 30, 2001, inclusive, as Sober Graduation Month and would request Californians to join the Department of the California Highway Patrol in supporting the Sober Graduation Program.

Res. Ch. 58 (ACR 25) Kelley. Sonny Bono Memorial Freeway.

This measure would designate the Coachella Valley portion of Interstate 10 from a point just west of the State Highway 111 cutoff in the Palm Springs area to a point at the bottom of the grade east of the City of Coachella as the Sonny Bono Memorial Freeway in honor and recognition of Sonny Bono. The measure also would request the Department of Transportation to determine the cost for appropriate signs showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 59 (ACR 28) Briggs. The Peter Hillman Memorial Interchange.

This measure would designate the Bullard Avenue Interchange on State Highway Route 168 in the City of Clovis as the Peter Hillman Memorial Interchange in honor and recognition of Deputy United States Marshal Peter Hillman. The measure also would request the Department of Transportation to determine the cost for appropriate signs showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 60 (ACR 47) Florez. George Alan Ingalls Memorial Highway.

This measure would designate a specified portion of State Highway Route 198 in the City of Hanford as the George Alan Ingalls Memorial Highway. The measure would request the Department of Transportation to determine the cost of appropriate plaques and markers so designating that portion of State Highway Route 198 and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 61 (ACR 4) Pescetti. Stanley L. Van Vleck Memorial Highway.

This measure would designate a specified portion of State Highway Route 16 as the Stanley L. Van Vleck Memorial Highway. The measure would request the Department of

Transportation to determine the cost of appropriate plaques and markers so designating that portion of State Highway Route 16 and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 62 (ACR 43) Havice. Merchant Marine Remembrance Week.

This measure would designate June 11 to June 17, 2001, as Merchant Marine Remembrance Week and would encourage all Californians to join in this observance.

Res. Ch. 63 (ACR 70) Zettel. Elder Abuse Prevention Month.

This measure would designate May 2001, as Elder Abuse Prevention Month.

Res. Ch. 64 (ACR 78) Mountjoy. National Flag Day.

This measure would designate June 14, 2001, as Flag Day of the State of California and would urge all citizens of California to pause at 4 p.m. on that day for the 22nd annual national Pause for the Pledge of Allegiance and join all Americans in reciting the Pledge of Allegiance to the Flag of the United States of America.

Res. Ch. 65 (SCR 22) Battin. Child abuse and neglect.

This measure would acknowledge the month of April, 2001, as Child Abuse Prevention Month and encourage members of the public to support child abuse prevention activities in their communities and schools.

Res. Ch. 66 (AJR 3) Leonard. Retirement benefits: teachers.

This measure would request the President and the Congress of the United States to enact legislation to repeal the Government Pension Offset and the Windfall Elimination Provision from the Social Security Act.

Res. Ch. 67 (AJR 5) Strom-Martin. United States Coast Guard.

This measure would urge the President and Congress of the United States to fully fund the Coast Guard's operation readiness and recapitalization requirements.

Res. Ch. 68 (ACR 53) Leach. Public education: business community involvement: school-business partnerships.

This measure would request the business community, administrators, teachers, and instructors of elementary and secondary schools and community colleges to cooperate in the development and expansion of school-business partnerships and would request the State Department of Education to disseminate copies of this measure to various agencies and organizations interested in fostering cooperation between elementary and secondary schools, community colleges, and the business community.

Res. Ch. 69 (ACR 85) Reyes. Bone Marrow Registration and Testing Day.

This measure would designate Saturday June 23, 2001, as Bone Marrow Registration and Testing Day and would urge all Californians to register with the National Bone Marrow Donor Registry Program to increase the number of potential bone marrow matches for persons in need of a bone marrow transplant.

Res. Ch. 70 (ACR 23) Maddox. Vietnam: religious freedom.

This measure would express the support of the Legislature for religious freedom for the people of Vietnam.

Res. Ch. 71 (SCR 25) Soto. Alameda Corridor East Project.

This measure would commend the work of the San Bernardino Associated Governments for facilitating the Alameda Corridor East Project.

Res. Ch. 72 (ACR 22) Frommer. Model Curriculum on Human Rights and Genocide.

This measure would commend the State Board of Education and the State Department of Education for its swift and prompt action in developing and making available for distribution the model curriculum on human rights and genocide. The measure would recommend that the department notify school districts of the availability of the curriculum and convene workshops and training seminars on the curriculum.

Res. Ch. 73 (ACR 68) John Campbell. Cure Children's Cancer Week.

This measure would declare July 9 to July 15, 2001, to be Cure Children's Cancer Week.

Res. Ch. 74 (ACR 71) Aroner. Lake and Reservoir Appreciation Week.

This measure would, annually commencing July 2001, declare the first week of July that includes both a weekend and July 4th as Lake and Reservoir Appreciation Week.

Res. Ch. 75 (ACR 76) Corbett. California Safety Month.

This measure would recognize June 2001 as California Safety Month and would encourage all Californians to practice and promote increased safety while engaging in recreation, work, and other activities in their homes, in the workplace, at school, on streets and highways, and in other public and private places. It would further encourage all public agencies, community organizations, and other groups to distribute educational information, conduct programs, and engage in other appropriate activities to promote safety methods and practices among all Californians.

Res. Ch. 76 (AJR 4) Leslie. Biomass power facilities.

This measure would memorialize the United States Forest Service, the Congress, and the President of the United States to promote a reliable and adequate biomass waste fuel supply. The measure would memorialize the United States Forest Service, Bureau of Land Management, National Park Service, and Environmental Protection Agency to recognize environmental benefits including improved air quality, decreased global-warming gases, and reduced threat of catastrophic forest fires that energy production from biomass waste can provide, and to encourage the continued operation of the existing biomass-to-energy industry by taking the reasonable measures necessary, including tax incentives, to increase the availability and reduce the cost of biomass wastes diverted to powerplants for use as renewable energy or fuels. The measure would also memorialize the United States Forest Service to utilize an appropriate mix of fire suppression activities and forest management methodologies on lands in the Sierra Nevada national forests of California.

Res. Ch. 77 (AJR 16) Robert Pacheco. The Declaration of Independence.

This measure would recognize July 4, 2001, as the 225th anniversary of the Declaration of Independence and the founding of the United States. It would memorialize the peoples and governments of the United States to continue their efforts to realize the fundamental principles pronounced in that document, and the United States to work to further international respect and observance of the inherent rights of individuals throughout the world.

Res. Ch. 78 (SCR 13) Morrow. California Law Revision Commission: studies.

Under existing law, the California Law Revision Commission is required to study, and is limited to studying, those topics approved for its study by concurrent resolution of the Legislature.

This measure would grant approval to the commission to continue its study of designated topics that the Legislature previously authorized or directed the commission to study. The measure would also delete one topic that the Legislature previously approved for study by the commission and would authorize the study of one new topic.

Res. Ch. 79 (SCR 14) Oller. National Purple Heart Trail.

This measure would designate the portions of Interstate Highway Route 5 and Interstate Highway Route 80 within California as California's selections for inclusion in the National Purple Heart Trail.

The bill would request the Department of Transportation to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing the special designation, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers.

Res. Ch. 80 (SCR 18) Chesbro. Earle W. Wrieden Memorial Highway.

This measure would designate the portion of State Highway Route 29 in Lake County that is between the Napa county line and State Highway Route 175 as the Earle W. Wrieden Memorial Highway.

The measure would also request the Department of Transportation to determine the cost of appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 81 (SCR 36) Burton. Stanley Mosk Library and Courts Building.

This measure would rename the State Library and Courts Building as the Stanley Mosk Library and Courts Building.

Res. Ch. 82 (AJR 1) Havice. Americans with Disabilities Act.

This measure would memorialize the President and the Congress to (1) stand firm in their resolve to uphold the current provisions of the Americans with Disabilities Act (ADA), (2) affirm the intent and substance of the ADA by enacting new legislation that would nullify the effect of any court decision that weakens the act, (3) take appropriate measures to encourage both public and private entities to implement the provisions of the ADA, and (4) establish whether the ADA has been applied in the manner in which it was intended, and whether any unintended consequences have resulted.

Res. Ch. 83 (SCR 10) Polanco. Mexican Independence Day: Dies y Seis de Septiembre.

This measure would call on all the people of California to join the people of Mexico and all Californians of Mexican heritage in celebrating Mexican Independence Day on the anniversary of the popular revolt of September 16, 1810, that launched Mexico's war for independence.

Res. Ch. 84 (SCR 17) Costa. Department of Transportation: State Highway Route 99.

This measure would request the Department of Transportation to identify those transportation-related needs on State Highway Route 99 between Bakersfield and Sacramento that would result in traffic congestion relief and the increased transportation of goods. The measure would urge the department to prepare a report to be submitted to the Legislature on its findings.

Res. Ch. 85 (SCR 21) Battin. California Hispanic Heritage Month.

This measure would proclaim September 15 to October 15, 2001, as California Hispanic Heritage Month, and would encourage all Californians to observe this event in communities throughout the state.

Res. Ch. 86 (SJR 1) Murray. Slavery.

This measure would memorialize Congress to enact legislation similar to House Concurrent Resolution 356, which, among other things, would acknowledge the fundamental injustice, cruelty, brutality, and inhumanity of slavery in the United States and

the 13 American colonies, apologize to African-Americans on behalf of the people of the United States for the wrongs committed against their ancestors who suffered as slaves, and urge the establishment of a national museum and memorial regarding slavery as it relates to the history of the United States, and other significant African-American history. The measure would also memorialize Congress to enact legislation similar to House Resolution 40, which would establish the Commission to Study Reparation Proposals for African-Americans.

Res. Ch. 87 (ACA 4) Dutra. Transportation funding: sales and use tax revenues.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law requires revenues derived from those taxes to be deposited in the Retail Sales Tax Fund. Existing law requires the balance of that fund remaining after various specified allocations to be allocated to the General Fund.

This measure would, for the 2003–04 fiscal year and each fiscal year thereafter, require all moneys that are collected during the fiscal year under the Sales and Use Tax Law, with respect to the sale or use of motor vehicle fuel, and that are required to be transferred to the General Fund pursuant to that law, to instead be transferred to the Transportation Investment Fund. This measure would, for the 2003–04 to 2007–08 fiscal years, inclusive, require moneys in that fund to be allocated for transportation purposes as provided in a specified statute. This measure would, for the 2008–09 fiscal year and each fiscal year thereafter, require moneys in the fund to be allocated only for transportation purposes specified by this measure, and would specify the allowable percentage amount to be allocated for each specified transportation purpose.

This measure would allow the Legislature to suspend or modify these requirements under certain circumstances, if the act so providing is approved by $\frac{2}{3}$ of the entire membership of each house of the Legislature.

Res. Ch. 88 (AJR 13) Runner. Autism.

This measure would urge the President and Congress to fully support the Coalition for Autism Research and Education (C.A.R.E.) and the additional federal funding needed for advanced autism research.

Res. Ch. 89 (ACR 10) Havice. Red Ribbon Week.

This measure would proclaim October 22 through October 28, 2001, as Red Ribbon Week, and would encourage all Californians to help build drug-free communities.

Res. Ch. 90 (ACR 86) Nation. National KidsDay.

This measure would designate August 5, 2001, as National KidsDay.

Res. Ch. 91 (ACR 89) Ashburn. Valley Fever Awareness Month.

This measure would proclaim August 2001 as Valley Fever Awareness Month.

Res. Ch. 92 (SCR 12) Chesbro. Dave Ghilarducci and the Police Officer Daniel T. Fraembs Memorial Highways.

This measure would designate that portion of State Highway Route 101 from Bridge No. 4-16 to Bridge No. 4-221 to the memory of Dave Ghilarducci and that portion of State Highway Route 71 in the city limits of the City of Pomona to the memory of Police Officer Daniel T. Fraembs. The measure also would request the Department of Transportation to determine the cost for appropriate signs showing these special designations and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 93 (SJR 2) Polanco. Cesar Chavez: postage stamp.

This measure would respectfully request the United States Postmaster General to issue a postage stamp with the image of Cesar Chavez to recognize his contributions to American life.

Res. Ch. 94 (SJR 4) Soto. Public employees' retirement: Social Security.

This measure would memorialize the President and Congress of the United States to enact legislation to eliminate the government pension offset and the windfall elimination provision of the Social Security Act.

Res. Ch. 95 (SCR 23) Polanco. Year of the Vulnerable Child.

This measure would declare the year 2001 as the Year of the Vulnerable Child.

Res. Ch. 96 (SCR 30) Soto. Reflex Sympathetic Dystrophy (RSD) Syndrome Awareness Month.

This measure would proclaim May 2001 as Reflex Sympathetic Dystrophy (RSD) Syndrome Awareness Month.

Res. Ch. 97 (SJR 12) Polanco. Arctic National Wildlife Refuge.

This measure would memorialize the President of the United States and the United States Congress to take necessary action to protect the Arctic National Wildlife Refuge by prohibiting oil exploration and drilling in any part of that refuge.

Res. Ch. 98 (AJR 9) Runner. Space shuttle.

This measure would memorialize the President, the Congress of the United States, and NASA to ensure that a long-term commitment to keeping the Space Shuttle Modification Program at Plant 42 in Palmdale, California, is maintained, authorize additional space shuttle orbiters in light of the recent cancellation of the X-33 Program by NASA, require that the orbiters be built in California by California workers, and move proactively to land space shuttle orbiters at Plant 42 in Palmdale when those orbiters are due for scheduled refurbishment.

Res. Ch. 99 (ACR 20) Pavley. California Coastal Trail.

This measure would declare that the California Coastal Trail is an official state trail, and would urge the California Coastal Commission and the State Coastal Conservancy to work collaboratively on the completion of the trail.

Res. Ch. 100 (ACR 29) Bates. Orange County Korean War Veterans Memorial Highway.

This measure would designate that portion of State Highway Route 1 that extends from its southern terminus in the City of San Juan Capistrano to its intersection with Golden West Street in the City of Huntington Beach as the Orange County Korean War Veterans Memorial Highway. The measure also would request the Department of Transportation to determine the cost for appropriate signs showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 101 (ACR 59) Aanestad. 14 Mile House Historical Monument.

This measure would request the Department of Transportation to grant, without charge, an encroachment permit authorizing an appropriate historical monument and plaque dedicated to 14 Mile House to be placed within the right-of-way of State Highway Route 32, in Butte County, at a described site.

Res. Ch. 102 (SCR 32) Machado. 32nd Anniversary of the First Moon Landing.

This measure would direct the Legislature to look back and reflect with pride and profound gratitude upon the achievements of our nation's astronauts, engineers, and scientists, designate July 20, 2001, as the 32nd Anniversary of the First Moon Landing, and show

appreciation to those who have committed themselves to promoting space exploration and its benefits.

Res. Ch. 103 (SCR 33) Machado. Neighborhood Watch Month.

This bill would declare August 2001 Neighborhood Watch Month and would commend those California residents who have participated in Neighborhood Watch programs for their distinguished service to their communities by uniting their neighborhoods and law enforcement to keep their neighborhoods safe, and would encourage all Californians to join in this effective means of fighting crime in their neighborhoods.

Res. Ch. 104 (SCR 35) Perata. Children's Health Insurance Month.

This measure would proclaim September 2001 as Children's Health Insurance Month, and would encourage outreach to increase the enrollment of children in the Healthy Families Program and the Medi-Cal program.

Res. Ch. 105 (SJR 11) Machado. Vietnam Veterans Memorial Education Center.

This measure would memorialize the President and the Congress to take appropriate measures to facilitate the design and construction of the Vietnam Veterans Memorial Education Center.

Res. Ch. 106 (SJR 18) Alarcon. Railroad retirement benefits.

This measure would provide that the California Legislature urges the United States Congress to support legislation improving railroad retirement benefits for retirees and their survivors in the 107th Congress.

Res. Ch. 107 (SJR 19) Ackerman. Railroad grade crossings: quiet zones.

This measure would memorialize the Federal Railroad Administration to adopt, as soon as possible, regulations relating to the establishment of quiet zones at railroad grade crossings in accordance with a specified federal law and the Congress to approve legislation that provides funding to the states for the implementation of supplemental safety measures for the purposes of establishing those quiet zones.

Res. Ch. 108 (AJR 12) Firebaugh. Incarceration: undocumented alien felons.

This measure would request the federal government to transfer out of California's prison system and into the federal prison system, all undocumented alien felons currently housed in institutions under the authority of the Department of Corrections.

Res. Ch. 109 (SCR 34) Margett. Muslim holidays.

This measure would call on the people of California to join Californians of Muslim heritage in recognizing the Muslim holidays of Eid-al-Adha and Eid-al-Fiter, and the historically significant day of Israa.

Res. Ch. 110 (SCR 38) Johannessen. Francis B. Mathews Memorial Rest Area.

This measure would designate a specified roadside rest area on State Highway Route 299 in Trinity County, between the communities of Salyer and Hawkins Bar, as the Francis B. Mathews Memorial Rest Area.

This measure also would direct the Department of Transportation to determine the cost of appropriate plaques and markers, consistent with signing requirements for the state highway system, showing that special designation and, upon receiving donations from nonstate sources covering the cost, to erect these plaques and markers.

Res. Ch. 111 (SCR 40) Torlakson. California Task Force on Youth and Workplace Wellness.

This measure would establish the California Task Force on Youth and Workplace Wellness to perform specified duties to promote fitness and health in schools and workplaces. It would

NOTE: Superior numbers appear as a separate section at the end of the digests.

provide that the task force shall consist of Members of the Legislature and experts appointed by the Speaker of the Assembly and the Senate Committee on Rules. It would provide that members of the task force shall conduct task force business on a volunteer basis, would permit the task force to accept private funds and in-kind donations, would require the task force to submit a report on its work to the Legislature on or before June 30, 2004, and provide that the task force shall cease to exist on July 1, 2004, unless a later enacted resolution deletes or extends that date.

Res. Ch. 112 (SJR 3) Karnette. Reproductive rights: Roe v. Wade.

This measure would memorialize the President of the United States and the Congress to take necessary action to preserve the integrity of the United States Supreme Court decision in Roe v. Wade.

Res. Ch. 113 (SJR 8) Speier. Social security.

This measure would request the federal government to implement the principles regarding the social security system espoused by the Older Women's League in making changes to that system and express the opposition of the Legislature to privatizing the social security system.

Res. Ch. 114 (ACA 9) Longville. Right to have vote counted.

The California Constitution requires the Legislature to define residence and provide for registration and free elections.

This measure would specify that a voter who casts a vote in an election shall have that vote counted.

Res. Ch. 115 (AJR 15) Firebaugh. Border crossing deaths.

This measure would urge the President and Congress of the United States and the United States Border Patrol to proceed in a cooperative effort with the Mexican government through the working group on migrations and border safety to achieve a comprehensive examination of border safety and migration issues, an assessment of the impact of United States border initiatives, enhanced investigations and prosecutions of criminal gangs of smugglers, and increasing search and rescue operations along the border.

Res. Ch. 116 (AJR 17) Chavez. Extension of home loan programs.

This measure would respectfully urge the Congress of the United States to amend the Internal Revenue Code to change the definition of "qualified veteran" for purposes of providing financing for home loans to any veteran who meets the requirements as may be imposed by the state law pursuant to which qualified veterans' mortgage bonds are issued.

Res. Ch. 117 (AJR 18) Aroner. Child support automation systems.

This measure would memorialize the Congress of the United States to enact legislation to allow states that have been assessed penalties for failing to implement a child support automation system to reinvest those penalties in child support program improvements and automation system development.

Res. Ch. 118 (AJR 20) La Suer. Filipino veterans of the United States Armed Forces: full benefits.

This measure would memorialize the President and the Congress of the United States during the First Session of the 107th Congress to take action necessary to grant full veterans benefits to Filipino veterans of the United States Armed Forces.

Res. Ch. 119 (AJR 21) Runner. International Literacy Day.

This measure would memorialize the President, Vice President, and the Congress to fully support September 8, 2001, as International Literacy Day.

Res. Ch. 120 (ACR 32) Dutra. Transportation: funding.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This measure would request the California Transportation Commission, working with the Department of Transportation in consultation with regional transportation planning agencies, to prepare and submit to the Legislature, as specified, a study of potential decreases in transportation revenues for transportation planning agencies. The study would identify specified transportation funding elements and suggest legislative and other remedies to address potential funding shortfalls.

Res. Ch. 121 (ACR 73) Strom-Martin. California State University.

This measure would urge the Trustees of the California State University to study its faculty hiring practices over the past decade in order to effectuate improvements in those practices. The measure would also urge the trustees, along with the Academic Senate of the California State University and the California Faculty Association, to jointly develop a plan to raise the percentage of tenured or tenure-track faculty to at least 75%, among other prescribed objectives, and would urge the California State University to provide a report to the Legislature by May 1, 2002.

Res. Ch. 122 (ACR 77) Cohn. Assisted living.

This measure would proclaim the week of September 9 through September 15, 2001, as Assisted Living Week in California and would encourage all citizens to visit friends and loved ones who reside in residential care facilities for elderly and disabled individuals, and also to learn more about assisted living services and how vital these services are to residents.

Res. Ch. 123 (ACR 80) Havice. School crossing guards.

This measure would designate the week of September 3, 2001, as "School Crossing Guards Week."

Res. Ch. 124 (ACR 87) Chavez. Military Families Recognition Week.

This measure would designate the week of November 18 through November 24, 2001, as Military Families Recognition Week.

Res. Ch. 125 (ACR 88) Chavez. Veterans of Foreign Wars Month.

This measure would proclaim the month of October 2001 as Veterans of Foreign Wars Month.

Res. Ch. 126 (ACR 92) Firebaugh. California Arts Council.

This measure would recognize and extend congratulations to the California Arts Council on its 25th anniversary and join in the commemoration of the council's "The Year of the Arts—2001" campaign. This measure also would declare October 10, 2001, as California Arts Day.

Res. Ch. 127 (ACR 93) Zettel. Donna P. Mauzy Memorial Freeway.

This measure would designate the portion of Interstate Highway 8 from State Highway 67 to Greenfield Drive in the City of El Cajon as the Donna P. Mauzy Memorial Freeway. The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect those plaques and markers.

Res. Ch. 128 (ACR 95) Wiggins. Randy Bolt Memorial Highway.

This measure would redesignate a portion of State Route 37 as the Randy Bolt Memorial Highway in honor and recognition of Randy Bolt. The measure also would request the Department of Transportation to determine the cost for appropriate signs showing the special designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 129 (ACR 96) Havice. Joe A. Gonsalves Memorial Interchange.

This measure would dedicate the interchange where State Highway Route 105 meets State Highway Route 605 to the memory of former Assembly Member Joe A. Gonsalves and would specify that this interchange be known as the "Joe A. Gonsalves Memorial Interchange." The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 130 (ACR 97) Mountjoy. Constitution Week and Constitution Day.

This measure would declare the 3rd week in September as Constitution Week and September 17 as Constitution Day and would request the Governor to proclaim Constitution Week and Constitution Day.

Res. Ch. 131 (ACR 99) Thomson. Health Cares About Domestic Violence Day.

This measure would proclaim October 10, 2001, as Health Cares About Domestic Violence Day.

Res. Ch. 132 (ACR 100) Cogdill. Truck Driver Appreciation Week.

This measure would proclaim the week of August 25 through September 1, 2001, as Truck Driver Appreciation Week and would encourage businesses, schools, communities, churches, and other organizations to join in this observance by commending professional truck drivers for the vital role they play in the lives of Americans.

Res. Ch. 133 (ACR 103) Nakano. Prostate cancer.

This measure would declare September 2001 to be Prostate Cancer Awareness Month.

Res. Ch. 134 (ACR 104) Strom-Martin. California Retired Teachers Week.

This measure would declare October 14 to October 20, 2001, as California Retired Teachers Week.

Res. Ch. 135 (ACR 107) Hertzberg. Commemorative state seals.

This measure would authorize the continued existence of the Commemorative Seals Advisory Committee and require it to make recommendations to the Legislature regarding the design, construction, and dedication of 2 commemorative seals, one honoring Native Americans in California and the other honoring California's Spanish and Mexican heritage, for installation on the landing of the upper steps on the west side of the State Capitol on the level below the Great Seal of California. This measure would notify the actions of the committee to date and authorize existing members of the committee to continue serving.

Res. Ch. 136 (ACR 108) Pavley. Veterans Day, 2001.

This measure would designate Sunday, November 11, 2001, as California Veterans Day, 2001.

Res. Ch. 137 (ACR 109) Pavley. Coastal Cleanup Day.

This measure would proclaim September 15, 2001, as the 17th annual Coastal Cleanup Day in California.

Res. Ch. 138 (ACR 110) Wayne. Breast cancer.

This measure would designate the month of October as Breast Cancer Awareness Month and would designate October 19, 2001, as Breast Exam and Mammography Awareness Day.

Res. Ch. 139 (ACR 112) Bogh. Economic Literacy Week.

This measure would recognize the week of October 22 through October 26, 2001, as Economic Literacy Week in this state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Res. Ch. 140 (SCR 15) Soto. Public Employees' Retirement: minimum benefits.

This measure would encourage the establishment of an appropriate system to annually determine a minimum standard of pension adequacy for all retired members of the Public Employees' Retirement System, to identify funding resources for the sole purpose of annually adjusting retired members' pensions to ensure that those pensions are not less than that minimum standard, and to identify extraordinary earnings in excess of any prudent reserves of the Public Employees' Retirement Fund for the purpose of enhancing retired members' pensions.

Res. Ch. 141 (SCR 37) Polanco. Biotechnology.

This measure would request the County of Los Angeles to develop a plan for a biotechnology research park in conjunction with the University of Southern California, other local higher education institutions, and bioscience industries.

Res. Ch. 142 (SCR 39) Soto. Public employees' health benefits: panel study.

This measure would provide for the establishment of a special panel to study the funding of pharmacy benefits, copayments, and other benefit structures of the Public Employees' Medical and Hospital Care Act program. The measure would further require the Chair of the Senate Committee on Public Employment and Retirement to convene this panel no later than September 15, 2001, and would require the panel to make recommendations and submit to certain committees a preliminary report of its conclusions and recommendations by March 1, 2002, and a final report by June 1, 2002.

Res. Ch. 143 (SCR 41) Soto. State employee merit awards.

This measure would request that merit award payments, authorized by the Department of Personnel Administration, be made to specified individuals whose proposals have resulted in annual savings and net revenue gain to the state.

Res. Ch. 144 (SCR 42) Poochigian. 1700th Anniversary of acceptance of Christianity in Armenia.

This measure would acknowledge the significant contribution the Armenian Church has made to the fabric of life of all peoples of California, and would congratulate the Republic of Armenia on the occasion of the 1700th Anniversary of the acceptance of Christianity in Armenia.

Res. Ch. 145 (SCR 44) Costa. Ten Year Anniversary of the California Urban Water Conservation Council.

This measure would congratulate and commend the California Urban Water Conservation Council for its leadership and dedication over the past 10 years to promote and achieve greater efficiency of urban water use.

Res. Ch. 146 (SJR 20) Perata. Global warming.

This measure would memorialize the President of the United States to take proactive steps to curb greenhouse emissions and urge the President to sign the Kyoto Protocol to the United Nations Framework Convention on Climate Change.

Res. Ch. 147 (SJR 21) Polanco. Puerto Rico: political status.

This measure would memorialize the Congress and the President of the United States to enact legislation that would define the political status options available to the United States citizens of Puerto Rico and authorize a plebiscite to provide an opportunity for Puerto Ricans to make an informed decision regarding the island's future political status.

Res. Ch. 148 (SJR 26) Morrow. Terrorist attacks.

This measure would, relative to the terrorist attacks upon citizens of the United States on September 11, 2001, express the sympathy of the people of California to the people of New York, the District of Columbia, and other affected communities; affirm our offer of assistance; express unity behind the leadership of the President; memorialize the Congress to support the President; and memorialize sister states and other jurisdictions to join in support of the victims, their families, the President, and the Congress in moving through the tragedy.

Res. Ch. 149 (ACR 5) Nation. Sudden oak death.

This measure would urge state agencies that are involved with the response to sudden oak death to coordinate with federal agencies to seek funding to address prescribed problems caused by sudden oak death.

Res. Ch. 150 (ACR 98) Runner. 1915 Ridge Route Highway Historical Monument.

This measure would request the Department of Transportation to grant, without charge, an encroachment permit authorizing an appropriate historical monument and plaque to commemorate the 1915 Ridge Route Highway, to be placed within the rights-of-way of State Highway Route 126 and Interstate Highway 5, where those highways converge.

Res. Ch. 151 (ACR 105) Strom-Martin. 90th Anniversary of Women's Suffrage.

This measure would proclaim October 10, 2001, as the 90th Anniversary of Women's Suffrage in California.

Res. Ch. 152 (ACR 113) Bogh. California Department of Forestry and Fire Protection firefighters.

This measure would recognize and commend the bravery and selflessness of the firefighters of the California Department of Forestry and Fire Protection and express appreciation for their continued service and dedication to the citizens of California.

Res. Ch. 153 (ACR 115) John Campbell. Certified Public Accountants Week.

This measure would proclaim November 4 through 10, 2001, as Certified Public Accountants Week in California.

Res. Ch. 154 (ACR 116) Bill Campbell. California Family Month.

This measure would recognize November 2001 as California Family Month.

Res. Ch. 155 (ACR 117) Hertzberg. Tall Ships Challenge 2002.

This measure would commend the American Sail Training Association and congratulate the California host ports in connection with their efforts in the Tall Ships Challenge 2002, and would invite the nations of the world to send their tall ships to participate in the event.

Res. Ch. 156 (ACR 118) Cardoza. Terrorism in New York City and the Pentagon.

This measure would declare that the Legislature joins freedom-loving people around the world in condemning the vicious attack aimed at New York City and the Pentagon, on September 11, 2001, and in observing a time of prayer and remembrance for the victims of this tragedy and for their families.

This measure would resolve that the Legislature stands firm with all Americans to preserve our liberties and our freedom, and wholly supports our national efforts to obtain justice against the cowardly terrorists who destroyed so many innocent lives. It would further resolve that our nation, firm in purpose and direct in its response, will thereby safeguard our national heritage and honor the memory of the Americans who died as a result of this unprecedented act of terror.

Res. Ch. 157 (AJR 29) Florez. Flight training schools.

This measure would memorialize the Congress of the United States to instruct the Federal Aviation Administration to implement security measures including, but not limited to, identification, fingerprinting, and domestic and international background checks for students and trainees at private or government operated flight training schools.

**DIGESTS OF RESOLUTIONS
ADOPTED IN 2001**

2001–02 FIRST EXTRAORDINARY SESSION

RESOLUTION CHAPTERS

Res. Ch. 1 (AJR 1) Cardoza. Natural gas.

This measure would urge the President, the Congress of the United States, and the Federal Energy Regulatory Commission to take certain actions to address the substantial increase in the cost of natural gas resulting from federal deregulation of natural gas.

The measure would also urge the Chairman of the Federal Energy Regulatory Commission to immediately place the issue of cost-based caps of natural gas on the commission agenda and allow it to be voted on, and would urge the President of the United States to meet with a bipartisan coalition of California legislators to discuss the energy crisis facing the western states that threatens the national economy.

Res. Ch. 2 (SCR 3) Burton. Final adjournment: 2001–02 First Extraordinary Session.

This measure would provide that the 2001–02 First Extraordinary Session of the Legislature shall adjourn sine die at midnight on May 14, 2001.

**DIGEST OF RESOLUTION
ADOPTED IN 2001**

2001–02 SECOND EXTRAORDINARY SESSION

RESOLUTION CHAPTER

Res. Ch. 1 (SJR 1) Karnette. Daylight saving time.

This measure would memorialize the Congress to approve legislation that allows a state to uniformly apply daylight saving time year round.

2001 DIGEST CHAPTERS SUPERIOR NUMBERS

1 [Ch. 106] I object to the following appropriations contained in Senate Bill 739.

Item 0160-001-0001—For support of Legislative Counsel Bureau. I revise this item by deleting Provision 1.

I am deleting Provision 1 of this item, which would authorize the continuance of a salary differential approved by the Department of Personnel Administration (DPA) in 1998, in spite of its termination for all other State departments on July 1, 2001. Though I am aware that this language would address a salary compaction problem between supervisory and staff attorney positions at the Legislative Counsel Bureau, it would be inappropriate to authorize the continuation of this program for one department to the exclusion of others. I am directing the DPA to work with the Legislative Counsel Bureau on identifying administrative solutions to this problem.

Item 0250-001-0001—For support of Judiciary. I reduce this item from \$282,689,000 to \$282,394,000 by reducing:

- (2) 20-Courts of Appeal from \$166,633,000 to \$166,588,000, and
- (3) 30-Judicial Council from \$74,126,000 to \$73,876,000.

I am deleting the legislative augmentation of \$45,000 for a half-time Legal Editorial Assistant to post unpublished legal opinions of the Courts of Appeal on the California Courts Website. It is not clear that this is a priority of the Judiciary, and the need for funds to provide this service has not been demonstrated.

I am reducing the funding for administrative support of the Equal Access Fund by \$250,000 to conform to the action taken in Item 0250-101-0001.

Item 0250-101-0001—For local assistance, Judiciary. I reduce this item from \$18,482,000 to \$13,707,000 by reducing:

- (9) 30.90-Equal Access Fund from \$14,250,000 to \$9,500,000, and
- (10.5) 97.20.004-Local Projects from \$75,000 to \$50,000 by reducing the following subschedule:

- (a) County of San Joaquin: Child Advocacy Center and Visitation Center at Mary Graham Children's Shelter from (\$75,000) to (\$50,000).

I am reducing the local assistance funding for the Equal Access Fund by \$4,750,000. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I am open to considering funding for this worthy program in the future when the economy improves.

I am reducing the legislative augmentation to establish a new facility for the Child Advocacy Center and Visitation Center at Mary Graham Children's Shelter by \$25,000. This action is essential due to fiscal constraints and limited resources in the General Fund. However, I am sustaining \$50,000 of this augmentation on a one-time basis.

Item 0450-101-0932—For local assistance, State Trial Court Funding. I reduce this item from \$2,082,060,000 to \$2,081,310,000 by reducing:

- (1) 10-Support for operation of the Trial Courts from \$1,773,533,000 to \$1,772,783,000.

I am deleting the \$750,000 legislative augmentation to establish a truancy court pilot project in Los Angeles County. Actions related to truancy, family issues, and juvenile crime are already within the responsibility of the established family court system. It is not clear that further delineation of areas of responsibility within the courts is necessary, and such delineation could result in inefficiencies and duplication of efforts.

Item 0450-111-0001—For transfer by the Controller to the Trial Court Trust Fund. I reduce this item from \$1,136,151,000 to \$1,135,401,000.

I am deleting the \$750,000 legislative augmentation to establish a truancy court pilot project in Los Angeles County to conform with the action taken in Item 0450-101-0932.

Item 0530-001-0001—For support of Secretary for California Health and Human Services. I reduce this item from \$1,834,000 to \$1,584,000 by reducing:

(1) 10-Secretary for California Health and Human Services Agency from \$2,836,000 to \$2,586,000, and by deleting Provisions 1, 2, 3, 4, 5, 6, and 7.

I am deleting \$154,000 General Fund included in the Budget as an augmentation for operating expenses and equipment, including an augmentation to the Agency's travel budget, and \$96,000 from the base as a matter of consistency because the discretionary budgets for nearly all State departments funded from the General Fund have been reduced similarly. This action is essential due to fiscal constraints and limited resources in the General Fund.

I am deleting Provisions 1 through 7 to conform to actions taken in Item 4170-101-0001.

Item 0540-101-0001—For local assistance, Secretary for Resources. I reduce this item from \$24,147,000 to \$18,147,000 by reducing:

(2) Los Angeles River—North from 4,000,000 to 1,000,000;
 (5) Tuolumne River Parkway from 7,000,000 to 5,000,000; and
 (9) Otay River Parkway from 2,000,000 to 1,000,000;
 and by revising Provision 4.

Due to fiscal constraints and limited resources in the General Fund, it is necessary to reduce the allocations for these projects.

I am revising the following provisional language to conform to this action:

“4. The funds appropriated in Schedule (2) through (5) of this item shall be expended as follows:

Los Angeles River—North: ~~\$4~~ \$1 million for the Cornfields property at Chinatown in the City of Los Angeles. These funds will be supplemented with \$35 million from the Proposition 12 (Parks Bond) to provide for acquisition and preliminary development;

Los Angeles River—South: \$5 million for the acquisition of Wrigley Heights in the City of Long Beach;

San Joaquin River Parkway: \$3 million for the Spano Ranch acquisition in the Counties of Fresno and Madera; *and*

Tuolumne River Parkway: ~~\$7~~ \$5 million for various acquisition and development projects in Stanislaus County.”

Item 0540-101-6015—For local assistance, Secretary for Resources. I reduce this item from \$7,650,000 to \$3,400,000 by deleting:

(2) Los Angeles River—North (850,000);
 (5) Tuolumne River Parkway (850,000);
 (9) Otay River Parkway (850,000);
 (10) Upper Arroyo Seco Parkway (850,000); and
 (11) San Lorenzo River Parkway (850,000).

While these river parkway projects may have merit, I believe that the Resources Agency should review and prioritize all river parkway projects prior to allocating the remaining funds in the River Protection Subaccount.

Item 0550-001-0001—For support of Secretary for Youth and Adult Correctional Agency. I reduce this item from \$1,277,000 to \$1,027,000 by reducing:

(1) 10-Secretary for Youth and Adult Correctional Agency from \$1,535,000 to \$1,285,000, and by deleting Provisions 1 and 2.

I am deleting the \$250,000 legislative augmentation to establish the California Council on Mentally Ill Offenders. The deletion of this new ongoing expenditure is necessary to provide for a prudent General Fund reserve.

I am also deleting Provision 2 to conform to this action.

I am deleting Provision 1, which states legislative intent to fully fund Phase II of an epidemiological investigation of the prevalence and incidence of Hepatitis C in the Department of Corrections and the Department of the Youth Authority. The Budget Act of 2000 included \$2 million for an epidemiological study by the University of California, on the prevalence and incidence of Hepatitis C in these two departments, and this funding is sufficient to complete the study. Therefore, the intent stated in Provision 1, to fully fund this study sometime in the future, is unnecessary.

Item 0555-001-0001—For support of Secretary for Environmental Protection. I reduce this item from \$4,737,000 to \$2,737,000.

In order to correct a technical error in the Budget Bill, I am reducing this item by \$2,000,000. This technical veto will conform with the Legislature's intent, and is consistent with the legislative action taken in Item 0555-001-0044, which reduced funding for Permit Assistance Centers from \$2,439,000 to \$439,000.

As part of this Budget, I am also sustaining the 31.4 positions for the Permit Assistance Centers that were approved by the Legislature without funding. The current energy emergency is an urgent priority, and the Permit Assistance Centers have a crucial role in addressing the environmental permit and approval requirements for new power generation. However, I disagree with the Legislature's action to remove funding for these positions. In order to fund these positions, the Secretary would have to redirect significant resources, negatively affecting the California Environmental Protection Agency's ability to administer existing environmental regulatory functions at a level consistent with existing law. Therefore, I will direct the Secretary to explore all appropriate means of supporting the Permit Assistance Centers on an ongoing basis.

Item 0650-101-0001—For local assistance, Office of Planning and Research. I delete this item.

I am deleting the \$50,000 legislative augmentation for the Hacienda Heights Cityhood Organization to complete an incorporation study. This action is essential due to fiscal constraints and limited resources in the General Fund.

Item 0650-102-0001—For local assistance, Office of Planning and Research. I reduce this item from \$690,000 to \$550,000 and delete Provision (f).

I am deleting the \$140,000 augmentation for the Contra Costa Youth Council. This action is essential due to fiscal constraints and limited resources in the General Fund. The remaining \$550,000 is being sustained on a one-time basis.

I am deleting Provision (f) to conform to this action.

Item 0690-001-0001—For support of Office of Emergency Services. I reduce this item from \$42,077,000 to \$35,977,000 by reducing:

- (1) 15-Mutual Aid Response from \$18,402,000 to \$15,202,000, and
- (2) 35-Plans and Preparedness from \$24,778,000 to \$21,878,000.

I am reducing the augmentation for various emergency operations equipment by \$3,200,000 due to fiscal constraints and the need to build a prudent reserve for economic uncertainties. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. This Budget does retain \$2.5 million for the purchase of emergency-related equipment for use throughout the state through the mutual aid system. I am open to considering funding for these equipment needs when the economy improves.

I am reducing the augmentation for the Tri-Net Seismic Network by \$2,900,000 due to fiscal constraints and the need to build a prudent reserve for economic uncertainties.

Of the \$6.8 million proposed in my Budget, \$3.9 million will be retained to provide \$2.9 million for maintenance and operation of the current Tri-Net system in Southern California, and \$1.0 million to begin to expand the system to other critical locations throughout the state to ensure a more uniform system for earthquake monitoring and related emergency response. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I am open to considering funding for this worthy project in the future when the economy improves.

Item 0690-101-0001—For local assistance, Office of Emergency Services. I reduce this item from \$539,000 to \$225,000 by reducing:

- (a) Local Projects from \$539,000 to \$225,000 by deleting \$180,000 from the following subschedules:
 - (8) City of Garden Grove: Back-up for Emergency Operations Center at City Hall (\$60,000);
 - (9) East County Fire Protection District: East County Fire Rescue Equipment (\$100,000);
 - (10) City of West Covina Fire Department: Fire Department Mass Casualty Trailer (\$20,000);

and by reducing \$134,000 for the following subschedules:

- (2) Altadena Mountain Rescue Team: Altadena Mountain Rescue Team-Mobile Command Post Procurement from (\$14,000) to (\$10,000);
- (3) City of Manteca: Thermal Imaging Devices from (\$60,000) to (\$50,000);
- (4) Malibu Mountain Rescue Team, Inc.: Malibu Mountain Search and Rescue Team from (\$25,000) to (\$10,000);
- (5) Tulare-Kings Chapter of the American Red Cross: Emergency Response Vehicle Procurement from (\$100,000) to (\$50,000); and
- (6) City of Dinuba (Fire Ambulance Services): Regional Multi-Function Training Facility from (\$20,000) to (\$15,000); and
- (7) KRCB TV22-91FM: Small Public Broadcasting Station Digital Conversion from (\$100,000) to (\$50,000)

These actions are essential due to fiscal constraints and limited resources in the General Fund. The augmentations that remain are being sustained on a one-time basis

Item 0820-001-0001—For support of Department of Justice. I reduce this item from \$315,225,000 to \$314,325,000 by reducing:

- (8) 45-Public Rights from \$57,183,000 to \$56,683,000, and by deleting:

- (12.7) 97.20.004-Local Projects (\$400,000).

I am deleting the \$500,000 legislative augmentation to establish the Office of Immigrant Assistance, which would be charged with investigating complaints alleging unfair business practices and discriminatory acts committed against immigrant populations. The Department of Justice has already established this Office within existing resources, and no justification has been provided for additional funding.

I am also deleting the \$400,000 legislative augmentation to implement a toll-free school safety phone line in San Francisco, Los Angeles, and San Diego Counties. This action is essential due to fiscal constraints and limited resources in the General Fund.

I am deleting Provision 5 to conform with this action.

Item 0820-101-0001—For local assistance, Department of Justice. I reduce this item from \$11,844,000 to \$6,764,000 by reducing:

- (1) 25-Executive Programs from \$8,283,000 to \$3,283,000; and by deleting:
 - (2.5) 97.20.004-Local Projects (\$80,000):

- (a) Oxnard Police Department: Oxnard Police Department Photo Imaging System (\$80,000);

and by deleting Provision 3.

I am deleting the \$5,000,000 legislative augmentation for the Youth Leadership Through Crime Prevention Program. The Budget already contains significant funding for similar juvenile crime programs within the Office of Criminal Justice Planning and the Board of Corrections. Accordingly, I am deleting this new ongoing augmentation to build a prudent reserve for economic uncertainties.

I am deleting Provision 3 to conform to this action.

I am also deleting the \$80,000 legislative augmentation which would support a photo imaging system for the Police Department of the City of Oxnard. This action is essential due to fiscal constraints and limited resources in the General Fund.

Item 0840-001-0001—For support of State Controller. I reduce this item from \$68,363,000 to \$67,422,000 by reducing:

- (1) 100000-Personal Services from \$68,547,000 to \$65,432,000, and
- (4) Reimbursements from -\$28,115,000 to -\$25,941,000.

I am reducing the funding provided for Personal Services by \$3,115,000 (\$941,000 General Fund and \$2,174,000 reimbursements) and eliminating 54.6 vacant personnel years. This action is consistent with my efforts to control the growth of State government and maximize the use of existing personnel to meet the service demands of the State. Over the last few years, my Administration has eliminated 6,600 vacant positions statewide, including those in constitutional offices. I am also eliminating 30 vacant positions from the Department of Insurance.

Item 0845-001-0217—For support of Department of Insurance. I reduce this item from \$126,656,000 to \$124,924,000 by reducing:

- (1) 10-Regulation of Insurance Companies and Insurance Producers from \$56,237,000 to \$55,483,000;
- (2) 12-Consumer Protection from \$39,391,000 to \$38,862,000;
- (3) 20-Fraud Control from \$31,738,000 to \$31,289,000;
- (4) 50.01-Administration from \$22,933,000 to \$22,636,000; and
- (5) 50.02-Distributed Administration from -\$22,933,000 to -\$22,636,000.

I am reducing the funding provided for Personal Services by \$1,732,000 and eliminating 30 vacant positions in the department. This action is consistent with my efforts to control the growth of State government and maximize the use of existing personnel to meet the service demands of the State.

Item 0855-001-0367—For support of California Gambling Control Commission. I am revising this item by deleting Provision 1.

I am deleting Provision 1 which would specify that the Gambling Control Commission cannot duplicate the functions of the Division of Gambling Control within the Department of Justice. Based on the duties and responsibilities specified in Chapter 867, Statutes of 1997, the Gambling Control Commission has formalized a Memorandum of Understanding with the Department of Justice to specify the respective functions of the Commission and the Department to avoid duplication. Therefore, this provision is unnecessary.

Item 0890-002-0001—For support of Secretary of State. I delete this item.

This action is necessary due to fiscal constraints and limited resources in the General Fund.

Item 1700-001-0001—For support of Department of Fair Employment and Housing. I reduce this item from \$18,170,000 to \$18,095,000 by reducing:

- (1) 50-Administration of Civil Rights Law from \$22,293,000 to \$22,218,000.

I am reducing this item by \$75,000. Although my January Budget included these funds to provide additional materials regarding the Fair Employment and Housing Act

to housing providers and small businesses employers, I take this action so that vital programs are protected and a prudent reserve for economic uncertainties is maintained.

Item 1760-001-0001—For support of Department of General Services. I reduce this item from \$23,688,000 to \$23,538,000 and delete Provision 2.

I am deleting the \$150,000 legislative augmentation for the preparation of documentation for the State to request an allocation of public safety radio frequencies for state and local agencies. While I understand that receipt of the expanded public safety spectrum is contingent upon the State's application for use, funding is already included in the Budget for engineering and design work on the Public Safety Radio Integrated Systems Management project. Therefore, additional funding is not necessary to ensure the State's ability to receive and retain the new public safety spectrum.

I am deleting Provision 2 to conform to this action.

Item 1760-001-0666—For support of Department of General Services. I revise this item by reducing:

- (1) Program Support from \$651,637,000 to \$651,487,000, and
- (3) Amount payable from the General Fund (Item 1760-001-0001) from -\$23,688,000 to -\$23,538,000.

I am revising this item to conform to the action I have taken in Item 1760-001-0001.

Item 1760-115-0101—For transfer upon order of the Director of Finance, from the School Facilities Fee Assistance Fund to the General Fund. I reduce this item from \$121,000,000 to \$108,000,000.

I am reducing this transfer by \$13,000,000. This reduction will allow the program to continue funding reservations for fee assistance received through December 2001, in accordance with pending legislation to sunset the program. Any unobligated program funds remaining after December 31, 2001, will be returned to the General Fund at that time.

Item 2240-014-0472—For support of Department of Housing and Community Development. I reduce this item from \$653,000 to \$413,000, and delete Provisions 1 and 2.

I am deleting the legislative augmentation of \$240,000 that would provide funding to extend a contract to market the Child Care Facilities Loan program and to award grants for providing technical assistance to potential borrowers. The program has staff and resources for marketing and technical assistance built into its existing support budget. Additionally, the one-time augmentation of \$150,000 for program marketing in 2000-01 raised awareness of the program and should generate sufficient interest in the program to use the remaining \$3.5 million in direct loan funds.

I am deleting Provisions 1 and 2 to conform to this action.

Item 2240-101-0001—For local assistance, Department of Housing and Community Development. I reduce this item from \$22,644,000 to \$22,361,000 by reducing:

- (1.5) 97.20.004-Local Projects from \$1,073,000 to \$790,000 by reducing \$110,000 from the following subschedules:

- (a) County of San Mateo: North San Mateo County Homeless Shelter Improvements from (\$300,000) to (\$200,000); and
- (f) Jovenes, Inc.: Olivares/Pleasant Ave. Transitional Housing and Youth Center from (\$50,000) to (\$40,000);

and by deleting \$173,000 from the following subschedules:

- (g) Single Room Occupancy Housing Corporation: James M. Wood Memorial Community Center (\$150,000); and
- (h) City of Cypress: Installation of disabled access curb ramps (\$23,000).

I am reducing the legislative augmentations for various local projects by \$283,000. This action is essential due to fiscal constraints and limited resources in the General Fund. I am sustaining the remaining augmentations on a one-time basis.

I am also sustaining \$1,000,000 of one-time funding for construction of the People Assisting the Homeless Regional Center in Los Angeles.

Item 2240-104-0001—For transfer, upon order of the Director of Finance, to the Farmworker Housing Grant Fund (0927). I reduce this item from \$18,500,000 to \$13,875,000.

I am reducing this transfer by \$4,625,000. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I take this action as a matter of consistency because the discretionary programs for nearly all State departments funded from the General Fund have been reduced similarly. In addition, part of this reduction reflects the availability of approximately \$3,700,000 in funding from 2000–01 that will allow program expenditures of \$17,575,000 in 2001–02. This leaves the program with significantly higher funding than the Budget Act of 1999, which provided \$3,500,000.

Item 2240-105-0001—For transfer, upon order of the Director of Finance, to the Emergency Housing and Assistance Fund (0985). I reduce this item from \$14,000,000 to \$13,300,000 and delete Provision 2.

I am reducing this transfer by \$700,000. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I take this action as a matter of consistency because the discretionary programs for nearly all State departments funded from the General Fund have been reduced similarly. This leaves the Emergency Housing and Assistance Program with an annual funding level of \$13,300,000, still significantly higher than \$4,000,000 provided in the Budget Act of 1999 for shelter programs.

I am deleting Provision 2 because it conflicts with Item 2240-115-0843, which transfers funds from the California Housing Trust Fund to the General Fund. This provision was inadvertently left in the Budget.

Item 2240-107-0001—For transfer, upon order of the Director of Finance, to the Housing Rehabilitation Loan Fund (0929). I reduce this item from \$35,400,000 to \$26,050,000 and revise Provisions 1 and 2.

I am reducing this transfer by \$9,350,000 and revising Provisions 1 and 2 as follows:

“1. Of the amount transferred by this item ~~\$31,000,000~~ \$23,050,000 shall be utilized for the purposes of the Multifamily Housing Program as set forth in Chapter 6.7 (commencing with Section 50675) of Part 2, Division 31 of the Health and Safety Code.”

“2. Of the amount transferred by this item, ~~\$4,400,000~~ \$3,000,000 shall be utilized for the Downtown Rebound Program established by Section 50898.1 of the Health and Safety Code. Of this amount, ~~\$3,000,000~~ \$2,000,000 shall be available for the purposes of subdivision (a) and ~~\$1,400,000~~ \$1,000,000 shall be available for the purposes of subdivision (b).”

I am reducing funding for the Multifamily Housing Loan Program by \$7,950,000 and the Downtown Rebound Program by \$1,400,000. This action is necessary due to fiscal constraints and limited resources in the General Fund. I take this action as a matter of consistency because the discretionary programs for nearly all State departments funded from the General Fund have been reduced similarly. In addition, part of the reduction to the Multifamily Housing Loan Program reflects the availability of approximately \$68 million in funding provided in 2000–01 that will allow program expenditures of \$91 million in 2001–02.

Item 2400-001-0933—For support of Department of Managed Health Care. I reduce this item from \$30,858,000 to \$30,358,000 by reducing:

- (1) 30-Health Plan Program from \$30,858,000 to \$30,358,000.

I am reducing by \$500,000, the \$1,000,000 legislative augmentation for educating health plan enrollees and providers about the availability of the Independent Medical Review process. The Independent Medical Review process has already been used by many plan enrollees to obtain independent, third party review of disputes about medical care. The Department provides information on how to access the process and arranges for the reviews. In combination with the existing efforts of the department and the \$2,000,000 already in the budget for consumer education, this should be sufficient funding to inform enrollees and providers of the recently created Independent Medical Review process. Health plans are also required to provide the process information and application forms to enrollees denied treatment or services based on medical judgment.

Item 2660-001-0001—For support of Department of Transportation. I delete this item.

I am deleting the \$355,000 legislative augmentation for local projects. This action is essential due to fiscal constraints and limited resources in the General Fund.

Item 2660-001-0042—For support of Department of Transportation. I reduce this item from \$2,020,380,000 to \$2,013,380,000 by reducing:

(7) 20.80-Highway Transportation—Maintenance from \$798,906,000 to \$793,906,000;

(9) 40.00-Transportation Planning from \$117,604,000 to \$115,604,000; and by deleting Provisions 14, 16, 18, 19 and 20.

I am deleting the \$5,000,000 legislative augmentation for State Route 710 maintenance. The Department has indicated that it will review the aesthetics and pavement quality of the highway system and use existing resources to make improvements during 2001–02. The Department plans to review the adequacy of existing aesthetic standards for the system and consider options for changes in both design and maintenance goals.

I am deleting the \$2,000,000 legislative augmentation to provide funding for Chapter 832, Statutes of 2000, which permits regional transportation planning agencies to include, in their 20-year regional transportation plans, alternative planning scenarios that emphasize integration of land use to reduce transportation impact. Since inclusion of alternative scenarios is a discretionary activity and if agencies believe there would be benefits, they should redirect funding for this purpose from other state, federal, and local funds provided for planning. I am also deleting Provision 18 of this item to conform to this action.

I am deleting Provision 14 that requires Caltrans to change the method it uses to report on the work it does to prepare projects for construction. While I agree that the approach proposed in this language would provide useful information, I am concerned that it does not adequately recognize the necessary role of project substitution. A portion of Caltrans' work schedule each year is unavoidably affected by delays beyond the control of the Department or the regional transportation agencies. To ensure a high overall level of project delivery, the regional agencies and Caltrans then substitute projects, an approach which reflects prudent management rather than poor scheduling. While I am open to continuing dialogue on useful measures of project delivery, I believe it is important that the discussion proceed not pursuant to budget bill language but in a broader policy setting. In the interim, I am directing the Department to include a range of project completion information in its future reporting that will present a balanced and complete picture to the Legislature and the public.

I am deleting Provision 16 that requires Caltrans to evaluate options and recommend specific mechanisms to the Legislature for funding capital improvement projects that maintain the California's shortline rail system, as identified in the Global Gateways Program or other goods movement initiatives by January 10, 2002. As previously stated in my signing message of AB 2866, Chapter 127, Statutes of 2000, which contained a similar requirement, I object to using state funds for this purpose. While the efficient movement of goods is important to California's economy, private, for-

profit companies that operate freight railroads are largely capable of funding their own capital and operating needs.

I am sustaining the funding level in this item for design, environmental, construction management, and other project delivery services. Furthermore, I am sustaining Provision 17 that allows unexpended funds appropriated for project preparation and construction management in this item to be used for operating expenses for the purposes of contracting for architectural and engineering services for project delivery. It is my intent that Caltrans use the funding provided for the 315 positions added by the Legislature in whatever manner is necessary to ensure that design services are timely and projects are not delayed.

I am deleting Provision 19 that requires Caltrans to replace all overhead guide signs with signs using specified retroreflective sheeting materials within five years, so as to decrease electricity consumption. Caltrans is currently replacing signs with retroreflectorized signs through its routine maintenance and rehabilitation program. This language would accelerate that program at a significant cost. Energy savings related to this proposal would be minimal compared to the cost of accelerating the replacement program.

I am deleting Provision 20 that requires Caltrans to construct a grade crossing for State Route 1 on the Alameda Corridor as a triple grade crossing. The State's commitment to the Alameda Corridor has been demonstrated with the \$42 million provided from its Interregional Transportation Improvement Program and \$18 million from Proposition 116 funds, which is over 80 percent of the cost of the currently budgeted single grade crossing project. I am directing the Department to work with the interested parties to find a solution to finance and construct the larger and more beneficial grade crossing project.

Budget Bill language supported by the Administration was inadvertently omitted from this item. As a technical correction, I am directing the department to prepare its urban highway congestion monitoring report, distribute the report to the various congestion management agencies statewide, and also make the reports available to any interested parties upon request.

Item 2660-001-0046—For support of Department of Transportation. I revise this item by deleting Provision 3.

I am deleting Provision 3 that states legislative intent to require Caltrans to bid competitively for intercity rail services, as opposed to current law, which is permissive.

The benefits of competitive bidding on intercity rail services are speculative since private rail operators may incur additional costs for the acquisition of equipment and infrastructure necessary to service the various intercity rail routes. The State and Amtrak have been partners in expanding rail service in California, both in building the infrastructure and in marketing rail travel. Amtrak is able to provide one-stop ticketing and connections between its interstate trains and the State's intercity rail service that another vendor may find difficult to duplicate.

While I support competitive bidding, bidding on existing corridors where Amtrak has made significant long-term investments would be difficult for both bidders and the State and may not be cost beneficial. Therefore, I am directing the Department of Transportation to conduct a study to identify the costs and benefits of competitive bidding for the State's intercity rail services.

Item 2660-001-0703—For support of Department of Transportation. I delete this item.

I am deleting the \$250,000 legislative augmentation to complete a study of abandoned rail corridors to evaluate their potential for non-motorized transportation and as links to improve access to public transit. In 1994, Caltrans performed a survey of rail rights-of-way to identify the status of all the rail corridors in the state and evaluate their relative importance and potential for future rail passenger service. I am directing

Caltrans to update and expand the 1994 study using existing resources and to identify abandoned rail corridors that have potential for use by non-motorized transportation and as links to improve access to public transit. Once completed, Caltrans will provide this information to local transportation planning agencies for consideration in local planning efforts.

Item 2660-002-0608—For support of Department of Transportation. I reduce this item from \$72,247,000 to \$65,029,000 and delete Provision 2.

I am deleting the augmentation of \$7,218,000 and Provision 2 to conform to the direction I have provided to Caltrans related to Provision 17 of Item 2660-001-0042.

Item 2660-101-0001—For local assistance, Department of Transportation. I reduce this item from \$2,294,000 to \$1,595,000 by reducing:

(a) Local Projects from \$2,294,000 to \$1,595,000 by reducing \$201,000 for the following subschedules:

- (3) City of Martinez: Burlington Northern/Santa Fe Railroad Trestle from (\$60,000) to (\$40,000);
- (5) City of San Jose: Los Gatos Creek Trail Bicycle and Pedestrian Improvement Project from (\$75,000) to (\$57,000);
- (7) City of Ventura: California Street Storm Drain Upgrade from (\$100,000) to (\$50,000);
- (8) Southern California Regional Rail Authority: Inland Empire Maintenance Facility from (\$100,000) to (\$50,000);
- (10) City of Manteca: Safe Route to School Grant Crom Street Sidewalk Project from (\$100,000) to (\$50,000); and
- (12) County of Los Angeles: Malibu Canyon-Las Virgenes Road Scenic Highway Designation from (\$25,000) to (\$12,000);

and by deleting \$498,000 for the following subschedules:

- (2) City of Westminster: Bolsa Avenue/Little Saigon Project (\$50,000);
- (9) City of Tracy: Replacement of school and pedestrian crossing signs with enhanced visibility signs (\$10,000);
- (14) City of Fullerton: New Central Control System (\$53,000);
- (15) City of Brea: Replace Street Light Poles (\$115,000);
- (16) City of Brea: Carbon Canyon Traffic Analysis (\$50,000);
- (17) City of Brea: Carbon Canyon Specific Plan Update (\$100,000);
- (18) City of Cypress: Rental Deposit Guarantee Program (\$70,000); and
- (19) Castaic Area Town Council: Emergency Bypass Road for Castaic Road (\$50,000).

I am reducing and deleting these legislative augmentations for local projects by \$699,000. These actions are essential due to fiscal constraints and limited resources in the General Fund. The augmentations that I am sustaining are for one-time expenditures.

Item 2660-101-0042—For local assistance, Department of Transportation. I reduce this item from \$356,738,000 to \$339,417,000 by reducing:

(1) 20.30-Highway Transportation-Local Assistance from \$210,592,000 to \$193,871,000,

and

(3) 40-Transportation Planning from \$10,600,000 to \$10,000,000

I am reducing this legislative augmentation for Freeway Service Patrol from \$18,000,000 to \$1,279,000, to expand the Freeway Service Patrol. This level of funding will provide local agencies with the ability to cover unavoidable operating cost increases. The Freeway Service Patrol provides valuable assistance to motorists and helps reduce traffic congestion. While I understand that expanding this program to additional congested areas and to provide better service may have merit, existing statu-

tory formulas preclude the direct allocation of funds based on needs. I am directing the Department of Transportation to work with interested parties on developing a plan for expanded services.

I am deleting the \$600,000 legislative augmentation for the Coronado Tunnel study. The cost of environmental studies related to a local project should be borne by the local agency sponsoring the project or funded from the region's share of the State Transportation Improvement Program.

Item 2660-103-0042—For local assistance, Department of Transportation. I delete this item.

I am deleting the augmentation of \$20,000,000 for initial planning and design costs for the Transbay Terminal Improvement Plan. While I believe there is merit to the project, it should be considered in the context of other regional transportation projects and available funding. It would not be prudent to commit any funds until a viable financing plan is developed for the project in its entirety.

Item 2720-001-0001—For transfer by the Controller, upon order of the Director of Finance, to the Motor Vehicle Account, State Transportation Fund (0044). I delete this item.

I delete the \$29,719,000 transfer, which offsets the cost of protection of the Capitol and constitutional officers to the Motor Vehicle Account. The budget for these services is included in Item 2720-001-0044, for support of the California Highway Patrol from the Motor Vehicle Account, which is not reduced. This action is essential due to fiscal constraints and limited resources in the General Fund. I will reconsider this funding during the development of future budgets.

Item 2720-001-0044—For support of Department of California Highway Patrol. I reduce this item from \$948,101,000 to \$946,351,000 by reducing:

(2) 20-Regulation and Inspection from \$102,863,000 to \$101,113,000, and by deleting Provision 1.

I am deleting the \$1,750,000 legislative augmentation and Provision 1, which funds ten additional officers for the farm labor transportation safety program. The January Budget I proposed includes ten additional officers, doubling the program started a year earlier. I am directing the California Highway Patrol to dedicate five of these additional officers to the Salinas Valley. These officers will begin to address the need for farm labor transportation safety in one of the largest agricultural areas of the State.

Item 2720-002-0001—For support of Department of the California Highway Patrol. I delete this item and Provision 1.

I am deleting the \$10,000 legislative augmentation for the California Highway Patrol Explorer Post. This action is essential due to fiscal constraints and limited resources in the General Fund.

Item 2720-101-0001—For local assistance, Department of the California Highway Patrol. I reduce this item from \$1,000,000 to \$999,000 and revise Provision 1.

"1. Grants shall only be available to local law enforcement agencies that collect all of the following data:

- (a) The number of vehicle drivers stopped for all traffic law enforcement purposes, whether or not a citation or warning was issued.
- (b) The race or ethnicity of the individuals stopped, based on visual observation.
- (c) A tabulation of which of the following basis the stop was made: (1) a violation of the Vehicle Code; (2) a violation of the Penal Code; (3) a violation of a local ordinance; or (4) the appearance of the driver or the appearance of the vehicle matches the description of a crime suspect or of a vehicle involved in the commission of a crime or belonging to a crime suspect.

- (d) Whether a vehicle search was instituted;
- (e) A tabulation indicating if any of the following items were discovered or seized in the course of the search: (1) weapons; (2) controlled substances; (3) cash; (4) vehicles; (5) other property believed to be unlawful or the possession of which is unlawful;
- (f) A tabulation of which of the following resulted from the search or stop: (1) a written citation; (2) a warning; or (3) an arrest. Notwithstanding any other provisions of law, grants may be in the form of advanced payments for the costs of data collection.....3,000,000 ”

I am reducing this item by \$1,000 and deleting language that adds new data elements to be collected when law enforcement officers make traffic stops. I find racial profiling abhorrent, and signed legislation outlawing the practice and requiring all peace officers to submit to additional training in cultural diversity. Given the extraordinary challenges of the work peace officers perform up and down this state, I believe it is more appropriate for local law enforcement agencies to decide if the additional data elements specified in this provision should be collected voluntarily.

Local jurisdictions representing over 60 percent of the State’s population currently are collecting racial profiling data. According to the Commissioner of the California Highway Patrol, the collection of the new data elements that would have been required under this provision and the tabulation and reporting of them to the California Highway Patrol will add significant costs to this program. I am concerned that the added costs are not offset by the modest grants that can be made with the money appropriated in this item. This may lead to less participation by law enforcement agencies in this voluntary program. I am reducing \$1,000 from this item to reflect savings that will be achieved based on vetoing Provision 1 of this item.

I am also revising the language to delete a printing error in the budget bill, which shows an invalid amount associated with this provision.

Item 2720-491—Reappropriation, Department of the California Highway Patrol. I reduce this item by \$1,000 and revise Schedule (1) as follows:

- “(1) Item 2720-101-0001, Budget Act of 2000 (Ch. 52, Stats. 2000). The unencumbered balance is reappropriated to provide local assistance grants to local law enforcement agencies for the cost of collecting racial profiling data and shall be available for expenditure until June 30, 2002. Grants shall only be available to local law enforcement agencies that collect all of the following data: (a) the number of vehicle drivers stopped for all traffic law enforcement purposes, whether or not a citation or warning was issued, (b) the race or ethnicity of the individuals stopped based on visual observation, (c) a tabulation of which of the following basis the stop was made: (1) a violation of the Vehicle Code; (2) a violation of the Penal Code; (3) a violation of a local ordinance; or (4) the appearance of the driver or the appearance of the vehicle matches the description of a crime suspect or of a vehicle involved in the commission of a crime or belonging to a crime suspect; (d) whether a vehicle search was instituted; (e) a tabulation of which the following items were discovered or seized in the course of the search: (1) weapons; (2) controlled substances; (3) cash; (4) vehicles; or (5) other property believed to be unlawful or the possession of which is unlawful; and (f) a tabulation of which of the following resulted from the search or stop: (1) a written citation; (2) a warning; or (3) an arrest. Notwithstanding any other provisions of law, grants may be in the form of advanced payments for the costs of data collection.”

I am reducing \$1,000 from this item and deleting language that adds new data elements to be collected when law enforcement officers make traffic stops. This action conforms with the action I have taken on Item 2720-101-0001.

Item 2740-001-0044—For support of Department of Motor Vehicles, I revise this item by deleting the following schedule:

(7.5) 97.20.001-Unallocated reduction –\$21,000,000,
and by deleting Provision 4.

In order to correct a technical error in the Budget Bill, I am deleting Schedule 7.5 and Provision 4, which relate to a proposal to make a \$21 million unallocated reduction in the Budget of the Department of Motor Vehicles. Such an unallocated reduction was considered by the Legislature and rejected. The total in the item reflects the correct amount. These provisions were inadvertently left in the final version of the Budget Bill. This technical veto will conform the Budget Act to the action taken by the Legislature.

Item 2920-101-0001—For local assistance, Technology, Trade, and Commerce Agency. I reduce this item from \$34,790,000 to \$29,675,000 by reducing:

- (1) 07-Science, Technology and Innovation from \$19,066,000 to \$14,166,000; and
- (5) 97.20.004-Local Projects from \$2,390,000 to \$2,175,000 by reducing the following subschedules:

(a) Canoga Park Improvement Association: Canoga Park Improvement Association/Main Street Canoga Park Community Center Commercial District Improvements from \$150,000 to \$100,000;

(f) East LA Community Corporation: Community Development Incubator from \$140,000 to \$75,000; and

and by deleting the following subschedule:

(e) Redwood Economic Development Inst.: Aleutian Goose Festival and Business Cluster Program (100,000).

I am reducing funding for the Next Generation Internet project by \$3,000,000 and retaining \$2,000,000. Combined with funding available from the Budget Act of 2000, this program will be able to support the two Centers and their grant programs to develop business applications for the new high-speed Internet2 as anticipated in 2001–02. I am also reducing funding for the Manufacturing Technology Program by \$1,900,000.

I am reducing \$215,000 for legislative augmentations for the local projects as indicated above. These actions are necessary due to fiscal constraints and limited resources in the General Fund. I am sustaining one-time funding for the remaining local projects.

Item 2920-102-0001—For local assistance, Klamath River Water Crisis Economic Assistance and Mitigation Program.

I am sustaining the \$8 million legislative augmentation for the Klamath River Water Crisis Economic Assistance and Mitigation Program. This appropriation is being provided to help mitigate the economic distress resulting from the action by the federal Bureau of Reclamation to cease providing water to the Klamath River Valley. Because this problem does not appear to be of a short-term nature, it cannot be addressed well by existing state disaster relief programs. Therefore, expenditure of these funds is contingent on the enactment of subsequent legislation to create an assistance and mitigation program that meets the unique needs of this region.

Item 2920-111-0001—For transfer, upon order of the Director of Finance, from the General Fund to the Film California First Fund (3005). I reduce this item from \$10,000,000 to \$2,000,000.

I am reducing this transfer by \$8,000,000. This reduction reflects the availability of \$8,000,000 in funding from 2000–01 that will allow expenditure of \$10,000,000 in 2001–02 for this program, which provides incentives to use California locations for filming.

Item 3360-101-0001—For local assistance, State Energy Resources Conservation and Development Commission. I delete this item.

I am deleting the legislative augmentation of \$200,000 for the City and County of San Francisco to provide energy efficiency outreach to non-English speaking persons. While I am supportive of outreach efforts to educate non-English speaking persons about the critical need to conserve energy and reduce electricity demand, the State and Consumer Services Agency, the Department of Consumer Affairs, the California Conservation Corps, and the State Energy Resources Conservation and Development Commission are taking measures to inform non-English speaking populations about available energy efficiency and conservation programs. In particular, the Department of Consumer Affairs is running energy efficiency campaigns in paid media forums in five different languages and printing an Energy Assistance Guide and Tips for Energy Emergency in five languages.

I am deleting the legislative augmentations of \$80,000 for a solar panel pilot program for the City of Redondo Beach, \$30,000 to replace red signal lights for the City of Manhattan Beach, and \$300,000 for energy efficiency improvement in the City of Oxnard. This action is essential due to fiscal constraints and limited resources in the General Fund.

Item 3480-001-0001—For support of Department of Conservation. I revise this item by reducing:

- (1) 10-Geologic Hazards and Mineral Resources Conservation from \$25,865,000 to \$25,665,000;

and by deleting:

- (18.5) Amount payable from the Abandoned Mine Reclamation and Minerals Fund (Item 3480-001-3025) (-\$200,000);

and by deleting Provision 2.

I am revising this item to conform to the action I have taken in Item 3480-001-3025.

Item 3480-001-3025—For support of Department of Conservation. I delete this item and Provision 1.

I am deleting this item because the Department of Conservation has not completed its inventory of abandoned mines. Until that inventory is completed and prioritized, it is premature to fund remediation efforts.

Item 3480-011-0035—For transfer by the Controller from the Surface Mining and Reclamation Account to the Abandoned Mine Reclamation and Minerals Fund. I delete this item.

I am deleting the \$200,000 transfer to conform to the action I have taken in Item 3480-001-3025.

Item 3540-001-0001—For support of Department of Forestry and Fire Protection. I reduce this item from \$360,496,000 to \$359,496,000 by reducing:

- (1) 100000-Personal services from \$360,743,000 to \$360,423,000;
- (2) 300000-Operating expenses and equipment from \$220,667,000 to \$219,987,000;

and by deleting Provisions 4.

I am reducing the \$2,700,000 legislative augmentation for Sudden Oak Death (SOD) mitigation to \$1,700,000. This action deletes \$1,000,000 for related fire protection services that have already been funded in this item.

I am deleting Provision 4 because it infringes on the Administration's responsibility to protect forestland by establishing regulations related to timber harvest practices. I am encouraging the Board of Forestry to work with all interested parties to develop permanent regulations promoting responsible timber harvest practices while providing sufficient habitat protection.

Item 3540-101-0001—For local assistance, Department of Forestry and Fire Protection. I reduce this item from \$285,000 to \$120,000 by reducing:

- (1) Local Projects from \$285,000 to \$120,000 by deleting:
 - (c) Placer Land Trust: Auburn Native Oak Protection (\$90,000); and
 - (d) City of Norco: Norco Tree Abatement (\$75,000)

This action is essential due to fiscal constraints and limited resources in the General Fund. Furthermore, the amount being sustained for projects in this item shall be on a one-time basis.

Item 3600-101-0001—For local assistance, Department of Fish and Game. I reduce this item from \$2,200,000 to \$1,800,000 by reducing:

- (2) 97.20.004-Local Projects from \$600,000 to \$200,000 by reducing:
 - (a) Sweetwater Authority: Completion of Reservoir Fishing Facility Improvements from (\$550,000) to (\$200,000);

and by deleting:

- (b) City of Huntington Beach: Shipley Nature Center (\$50,000).

These actions are essential due to fiscal constraints and limited resources in the General Fund. Furthermore, the amount being sustained for these projects shall be approved on a one-time basis.

Item 3600-301-6018—For capital outlay, Department of Fish and Game. I delete this item.

I am deleting the \$7,500,000 legislative augmentation for the Mill Creek Acquisition. While I am supportive of additional funds for acquisitions aimed at protecting wildlife habitat, I note that there is currently \$30 million (\$15 million General Fund and \$15 million Save the Redwoods League) available for this acquisition through the Wildlife Conservation Board's Land Conservation Matching Grants Program. In addition, I am sustaining language in Item 3790-301-0005 directing the Department of Parks and Recreation to allocate \$10,000,000 from the 2000 Bond Habitat Acquisition Program to the Mill Creek Acquisition project.

Item 3640-101-0001—For local assistance, Wildlife Conservation Board. I reduce this item from \$559,000 to \$300,000 by reducing:

- (a) 97.20.004—Local Projects from \$559,000 to \$300,000 by reducing subschedule:
 - (2) Santa Clara County Open Space Authority: Open Space Acquisition Project—Hong Property from (\$100,000) to (\$50,000);

and by deleting subschedules:

- (3) Stanislaus Wildlife Care Center: Expansion (\$109,000); and
- (4) Mountains Recreation and Conservation Authority: Rocky Pointe Arroyo-Simi Wetlands and Nature Preserve (\$100,000).

These actions are essential due to fiscal constraints and limited resources in the General Fund. I am sustaining the legislative augmentation for the Hong Property acquisition on a one-time basis.

Item 3720-001-0001—For support of California Coastal Commission. I reduce this item from \$12,591,000 to \$11,191,000 by reducing:

- (1) 10-Coastal Management Program from \$15,782,000 to \$14,382,000.

I am deleting the \$1,400,000 legislative augmentation for workload related to Local Coastal Program permit applications, appeals, and review. This action is necessary to continue funding for previously approved projects and provide for a prudent reserve for economic uncertainties.

Item 3760-101-0001—For local assistance, State Coastal Conservancy. I reduce this item from \$1,900,000 to \$1,690,000 by reducing:

- (1) 97.20.004—Local Projects from \$1,900,000 to \$1,690,000 by reducing the following subschedules:
 - (c) City of Oakland: Lake Merritt restoration from (\$200,000) to (\$160,000);
 - (d) County of Marin: Bolinas Restoration Project from (\$300,000) to (\$155,000); and
 - (e) City of San Diego: Ocean pier restoration from (\$150,000) to (\$125,000).

This action is essential due to fiscal constraints and limited resources in the General Fund. I am sustaining the legislative augmentations remaining for this projects on a one-time basis.

Item 3780-001-0001—For support of Native American Heritage Commission. I reduce this item from \$528,000 to \$328,000.

I am deleting the \$200,000 legislative augmentation for review of timber harvest plans. This action is necessary to continue funding for previously approved projects and build a prudent reserve for economic uncertainties.

Item 3790-001-0001—For support of Department of Parks and Recreation. I reduce this item from \$130,947,000 to \$129,537,000.

I am reducing this item by \$535,000 for projects at the State Capitol to begin restoration of the historic flag collection, install protective mural cases, and renovate the insectory within Capitol Park. This action is essential due to fiscal constraints and limited resources in the General Fund.

I am sustaining \$100,000 of the \$300,000 originally allocated in this item specifically for preparing a feasibility study on adding the San Joaquin River Parkway to the State Parks System. This action is essential due to fiscal constraints and limited resources in the General Fund.

In order to correct a technical error in the Budget Bill, I am reducing this item by \$675,000. This amendment corresponds to the correct appropriation amount payable from the General Fund as shown in Item 3790-001-0392.

Item 3790-001-0392—For support of Department of Parks and Recreation. I revise this item by reducing:

- (1) For support of the Department of Parks and Recreation from \$272,852,000 to \$272,167,000; and
- (4) Amount payable from the General Fund (Item 3790-001-0001) from -\$130,272,000 to -\$129,587,000.

I am revising this item to conform to the action taken in Item 3790-001-0001.

Item 3790-101-0001—For local assistance, Department of Parks and Recreation. I reduce this item from \$43,326,990 to \$25,060,000 by reducing:

- (a) 80.25-Recreational Grants from \$6,890,000 to \$4,390,000 by deleting:
 - (3) County of Los Angeles: El Pueblo Cultural and Performing Arts Center (\$2,500,000); and
- (b) Local Projects from \$36,436,990 to \$20,670,000 by deleting the following subschedules:
 - (4) Boys and Girls Club of San Bernardino: Expansion Project (\$100,000);
 - (24) City of La Puente: La Puente Community Center (\$99,000);
 - (28) City of Manteca: Tidewater Bikeway (\$125,000);
 - (70) City of Garden Grove: Gum Theater marquee replacement (\$25,000);
 - (90) City of Los Angeles: Ascot Park (\$1,000,000);
 - (138) Tulare County's District Attorney's Office: Tulare County Gang Task Force Operations (\$100,000);
 - (151) City of Visalia: Mobile Recreation Centers (\$100,000);
 - (152) Tulare County: Boys and Girls Club, youth facility (\$100,000);

- (153) City of Oceanside: Martin Luther King, Jr. Skate Park (\$50,000);
- (154) Town of Yucca Valley: Morongo Basin Regional/Multipurpose trails system (\$50,000);
- (155) City of San Jacinto: Estudillo Mansion (\$50,000);
- (156) City of Moreno Valley Department of Parks and Recreation: State Park Bond proposed projects for funding City of Moreno Valley Parks and Recreation Department (\$50,000);
- (165) Tustin Boys and Girls Club: Purchase of fuel powered/solar powered generating system (\$40,000);
- (166) Laguna Beach Boys and Girls Club: Laguna Beach Boys and Girls Club teen facilities expansion (\$60,000);
- (167) City of Folsom: Regional Humbug-Willow Creek Bikeway Gap Closure Project (\$75,000);
- (168) Sunrise Recreation and Park District: Family picnic shelter (\$75,000);
- (169) Orangevale Recreation and Park District: Community solar panels (\$85,000);
- (170) North Highlands Recreation and Park District: McClellan Sports Complex rehabilitation (\$100,000);
- (171) Carmichael Recreation and Park District: Carmichael Park swimming pool renovation (\$75,000);
- (173) City of Fountain Valley: Recreation Facility Expansion Project (\$100,000);
- (174) City of La Palma: El Rancho Verde Open Space Project (\$100,000);
- (175) City of Los Alamitos: USA Olympic Team Facility (\$100,000);
- (176) City of El Cajon: El Cajon High School tennis courts (\$63,000);
- (177) City of El Cajon: Tuttle Parks Sports Field (\$95,000);
- (178) City of La Mesa: Junior Seau Regional Sports Complex Baseball field capability-Phase 3 (\$91,000);
- (179) City of Lemon Grove: Pine replacement at Main Street (\$11,000);
- (180) City of Lemon Grove: Replacement pipe at Ensenada Street (\$8,000);
- (181) City of Lemon Grove: Roosevelt Street (\$8,000);
- (182) City of La Mesa: Junior Seau Regional Sports Complex ball field special features (\$90,990);
- (183) City of El Cajon: Dance studio (\$15,000);
- (184) City of Fontana: Heritage Community Center (\$425,000);
- (185) East Contra Costa County Historical Society: Relocation and Foundation for Eden Plain School Historical Building (\$30,000);
- (187) Tahoe City Public Utilities District: Tahoe City Community Center for Lake Tahoe Information, Culture, and Art (\$100,000);
- (188) Hangtown Gold Bug Park Development Committee: Gold Bug Park Living Museum (\$100,000);
- (189) Los Osos Community Pool Association: Los Osos Community Aquatic Center (\$300,000);
- (190) City of San Maria: Community Youth Center final phase (\$250,000);
- (191) City of Arroyo Grande: Five Cities Community Recreation Center (\$250,000);
- (192) City of Diamond Bar: Summit Ridge Park improvements (\$50,000);
- (193) City of Norco: Ingall's Regional Equestrian Park (\$50,000);
- (194) Riverside Parks and Recreation: Air conditioning for the Cesar Chavez Community Center (\$150,000);
- (196) City of Thousand Oaks: Ventura County Discovery Center (VCDC) (\$100,000);

- (197) City of Los Angeles, Parks and Recreation Department: Recreational facility upgrade (\$132,000);
 - (199) City of Escondido: Escondido Sports Center (\$150,000);
 - (200) City of Encinitas: Parkland and Open Space Acquisition Funding (\$300,000);
 - (201) City of Del Mar: Reconstruction of children's playground area (\$45,000);
 - (202) City of Escondido: Boundless Playground (\$100,000);
 - (203) City of Apple Valley: Apple Valley Town Center Park (\$100,000);
 - (204) County of San Bernardino: Barstow Wading Pool (\$81,000);
 - (205) County of San Bernardino: Spring Valley Lake Baseball Fields (\$60,000);
 - (206) Anza Borrego Foundation: Mason Valley Project (\$200,000);
 - (207) City of Walnut: Suzanne Park Renovation Project (\$50,000);
 - (208) City of La Mirada: Skateboard Park (\$50,000);
 - (209) City of La Puente: Skateboard Park-City of La Puente (\$50,000);
 - (210) City of West Covina: Ridge Rider Equestrian Center (\$50,000);
 - (211) City of Fullerton: Lions Field athletic field lights (\$100,000); and
 - (212) City of Fullerton: Independence Park play structure (\$40,000);
- and reducing the following subschedules:
- (5) Boys and Girls Club of San Pedro: Rancho San Pedro Clubhouse start up capital from (\$288,000) to (\$200,000);
 - (6) Buena Park Boys and Girls Club: Building expansion from (\$395,000) to (\$200,000);
 - (8) City and County of San Francisco: Edgehill Mountain Open Space Park Land acquisition from (\$150,000) to (\$75,000);
 - (9) City of Arcata: Arcata Ballpark improvements from (\$200,000) to (\$150,000);
 - (10) City of Baldwin Park: Baldwin Park Community Center construction of multi-purpose recreational facility from (\$241,000) to (\$200,000);
 - (11) City of Chula Vista: Otay Park, children's playground construction from (\$105,000) to (\$85,000);
 - (12) City of Chula Vista: Nature Interpretive Center from (\$500,000) to (\$150,000)
 - (13) City of Compton: Gonzales Park from (\$390,000) to (\$200,000);
 - (17) City of El Cajon, Department of Parks and Recreation: Montgomery Middle School, sports field lighting from (\$120,000) to (\$90,000);
 - (18) City of El Cajon, Department of Parks and Recreation: Fletcher Hills Recreation Center, pool and locker room improvements from (\$200,000) to (\$150,000);
 - (22) City of La Mesa: Briarcrest Park, capital improvements from (\$200,000) to (\$150,000);
 - (23) City of La Mesa: Junior Seau Regional Sports Complex, capital improvements from (\$200,000) to (\$150,000);
 - (26) City of Lemon Grove, Department of Parks and Recreation: City Center Park, phase II improvements from (\$250,000) to (\$200,000);
 - (27) City of Manhattan Beach: Polliwog Park rehabilitation from (\$200,000) to (\$100,000);
 - (29) City of Montebello: Skateboard Park from (\$246,000) to (\$200,000);
 - (30) City of Ontario: The De Anza Community Center from (\$100,000) to (\$75,000);
 - (31) City of Ontario: Youth Soccer Sports Complex from (\$110,000) to (\$50,000);

- (32) City of Pomona: Westmont Park, Kennedy Skateboard Park, Jaycee Community Park, Ganesha Park Pool, Grove Sports Park from (\$250,000) to (\$80,000);
- (33) City of Rialto: Frisbee Park from (\$75,000) to (\$50,000);
- (34) City of San Bernardino: Skateboard Park from (\$75,000) to (\$25,000);
- (36) City of San Diego: Bay Terraces Community Park, Capital improvement completion from (\$200,000) to (\$150,000);
- (37) City of San Diego: Keiller Park, design and construction of comfort station from (\$200,000) to (\$150,000);
- (38) City of San Diego: Martin Luther King Jr. Community Center, completion of construction from (\$250,000) to (\$150,000);
- (42) City of Whittier: Whittier Greenway Trail from (\$750,000) to (\$450,000);
- (43) City of Willits: Build Youth Center from (\$200,000) to (\$100,000);
- (44) Colour Me Freedom Foundation: Martin Luther King Jr. Museum/Cesar E. Chavez Diversity Center from (\$300,000) to (\$250,000);
- (45) County of Los Angeles: Del Amo Neighborhood Park in Carson from (\$710,000) to (\$350,000);
- (48) County of Santa Barbara: Goleta Youth Baseball Fields Santa Barbara from (\$2,000,000) to (\$500,000);
- (49) County of Santa Clara: Villa Montalvo from (\$300,000) to (\$200,000);
- (51) East County Performing Arts Center: Capital improvements to the center from (\$500,000) to (\$275,000);
- (52) East Los Angeles Community Youth Center: Facility refurbishment from (\$330,000) to (\$225,000);
- (54) McKinleyville Community Services District : McKinleyville Park, ball-park construction from (\$200,000) to (\$125,000);
- (58) National City, Department of Parks and Recreation: Municipal Pool, facility improvements from (\$200,000) to (\$150,000);
- (59) North Highlands Recreation and Park District: Freedom Park Sports Complex, rehabilitation from (\$175,000) to (\$75,000);
- (62) Sacramento Asian Sports Foundation: Community Center from (\$330,000) to (\$100,000);
- (64) Sacramento Valley Open Space Conservancy: Purchase of Fair Oaks Bluffs from (\$300,000) to (\$100,000);
- (67) Trust for Public Lands: Bella Vista Discovery Park Oakland from (\$1,000,000) to (\$650,000);
- (68) City of Orange: Eli Home Expansion from (\$400,000) to (\$150,000);
- (71) City of Concord: Daniel E. Boatwright Sports Complex playground from (\$133,000) to (\$110,000);
- (72) Major League Baseball Urban Youth Foundation: Major League Baseball Academy from (\$2,675,000) to (\$2,000,000);
- (73) Pacoima Community Technology Center from (\$250,000) to (\$75,000);
- (74) County of Merced: South Dos Palos Park irrigation system from (\$333,000) to (\$225,000);
- (75) City of Atwater: Restoration of Bloss Home from (\$275,000) to (\$75,000);
- (76) Heart of Los Angeles Youth: Renovation of Existing Facility from (\$50,000) to (\$40,000);
- (78) East Bay Regional Park District: Roberts Regional Park from (\$50,000) to (\$25,000);
- (79) Bassett Little League: Bassett Little League Park improvements from (\$75,000) to (\$40,000);

- (80) City of La Puente Parks and Recreation: City of La Puente Skate Board Park from (\$150,000) to (\$90,000);
- (84) City of Newark: Newark Skate Park from (\$200,000) to (\$150,000);
- (85) Old Timers Foundation: Capital Improvements for family center in the City of Huntington Park from (\$150,000) to (\$75,000);
- (86) Door of Hope Community Center: Community Skate Park-East Los Angeles from (\$100,000) to (\$75,000);
- (87) City of Shafter: Capital Parks improvement from (\$100,000) to (\$75,000);
- (88) City of Arvin: Arvin Skate Park from (\$140,000) to (\$75,000);
- (89) City of Baldwin Park: Department of Recreation and Community Services-Jones Junior High School multi-purpose sports complex from (\$95,000) to (\$40,000);
- (91) City of Saratoga: Villa Montalvo from (\$200,000) to (\$100,000);
- (92) Children's Discovery Museum of San Jose from (\$250,000) to (\$175,000);
- (97) Boys and Girls Club of Burbank: Boys and Girls Club of Burbank Technology Learning Center from (\$50,000) to (\$40,000);
- (98) Friends of Griffith Park Observatory: Griffith Park Observatory from (\$200,000) to (\$160,000);
- (99) Ad Hoc Committee for Safe Children: Anahauk Youth Soccer Club from (\$75,000) to (\$25,000);
- (100) City of Los Angeles: Phase II: Temple-Beverly Family Park from (\$300,000) to (\$115,000);
- (101) Proyecto Pastoral at Dolores Mission: Proyecto Pastoral at Dolores Mission Expansion from (\$40,000) to (\$30,000);
- (104) City of Bellflower: William Bristol Civic Auditorium from (\$25,000) to (\$15,000);
- (105) City of Hawaiian Gardens: Community Parks Upgrades from (\$25,000) to (\$15,000);
- (110) City of San Diego: Serra Mesa Community Parks from (\$150,000) to (\$140,000);
- (111) City of San Diego: Tierasanta Community Park security lighting from (\$150,000) to (\$100,000);
- (112) City of San Diego: University Tot Lots from (\$175,000) to (\$160,000);
- (113) Mountains Recreation and Conservation Authority: Briar Summit-Laurel Canyon East Core Habitat from (\$88,000) to (\$35,000);
- (114) City of Temple City: Temple City Basketball Court Project from (\$125,000) to (\$100,000);
- (115) South Pasadena: Skate Park from (\$75,000) to (\$50,000);
- (117) Los Angeles Maritime Institute: Completion of Twin Brigantine Project engine rooms from (\$100,000) to (\$60,000);
- (119) City of Stockton: Pixie Woods renovation from (\$200,000) to (\$100,000);
- (120) City of Stockton, Department of Parks and Recreation: Development of Youth Soccer Fields from (\$125,000) to (\$100,000);
- (127) City of Ontario: Construction of the restroom facility at Galvin Park from (\$100,000) to (\$91,000);
- (128) City of Montclair: Skateboard Park from (\$100,000) to (\$80,000);
- (129) City of Hermosa Beach: Renovation of Hermosa Valley Park from (\$90,000) to (\$70,000);
- (130) City of Torrance: North Torrance Community Service Center from (\$100,000) to (\$65,000);
- (132) Boys and Girls Club of Harbor City/Harbor Gateway: Complete facility for Harbor Gateway Boys and Girls Club from (\$100,000) to (\$75,000);

- (133) City of Los Angeles: Vans for afterschool program from (\$50,000) to (\$40,000);
- (134) City of South San Francisco: Construction of the Westborough Learning/Childcare Center from (\$175,000) to (\$150,000);
- (136) Tarzana Community Foundation: Tarzana Community Center from (\$240,000) to (\$100,000);
- (137) Hmong American Community, Inc.: Hmong American Community Center Renovation from (\$90,000) to (\$40,000);
- (139) City of Dinuba (Recreation Services): Minibus/van for Youth Center from (\$35,000) to (\$25,000);
- (141) Southgate Parks and Recreation: Florin Creek Soccer Complex rehabilitation and expansion from (\$75,000) to (\$30,000);
- (143) Vacaville Youth Soccer League: Centennial Park Soccer Complex from (\$300,000) to (\$230,000);
- (144) County of Solano: Relocation of Girl Scouts building from (\$150,000) to (\$100,000);
- (145) St. Vincent de Paul Village: Playground equipment for children's center from (\$150,000) to (\$112,000);
- (146) Willowbrook Boys and Girls Club: Complete construction of the Willowbrook Boys and Girls Club Facility from (\$150,000) to (\$100,000);
- (147) City of San Diego: North Clairemont Recreation Center-picnic shelter from (\$100,000) to (\$75,000);
- (149) City of San Diego: Golden Hill Community Park picnic shelter from (\$70,000) to (\$65,000);
- (161) City of Lake Forest: Community Resource Center from (\$100,000) to (\$50,000);
- (163) City of Lake Forest: Public skate park from (\$50,000) to (\$25,000);
- (186) City of Fontana: Heritage Community Center from (\$500,000) to (\$200,000).

I am reducing this item by \$2,500,000 in recreational grants, which would provide funding to develop a new community events center and rehabilitate the historic Plaza House at El Pueblo de Los Angeles State Park. This action is essential due to fiscal constraints and limited resources in the General Fund.

I am reducing this item by \$15,631,990 in local projects. This action is essential due to fiscal constraints and limited resources in the General Fund. Furthermore, of the amount being sustained for these projects, funding shall be approved on a one-time basis.

I am deleting the \$100,000 local project for (138) Tulare County's District Attorney's Office: Tulare County Gang Task Force Operations. This is a technical veto to correct an error in the Budget Act. This technical veto will conform to the Legislature's intent, and is consistent with legislative action taken in Item 8100-101-0001 (26.5)(af), which makes the correct allocation for this project within the Office of Criminal Justice Planning.

Item 3790-102-0383—For local assistance, Department of Parks and Recreation. I sustain this Item for use on a one-time basis.

Expenditure of this appropriation is dependent upon enactment of separate legislation that will authorize the Director of the Department of Parks and Recreation to establish guidelines for the allocation of these funds.

Item 3790-301-0001—For capital outlay, Department of Parks and Recreation. I reduce this item from \$350,000 to \$245,000 by reducing:

- (1) 97.20.004-Local Projects: Mount Diablo State Park (Morgan Territory) Acquisition from \$300,000 to \$225,000, and

(2) Topanga State Park—Los Liones Trailhead improvements and restroom construction from \$50,000 to \$20,000.

I am reducing these legislative augmentations by \$105,000 due to fiscal constraints and limited resources in the General Fund.

However, I am sustaining the \$50,000 legislative augmentation for the Topanga State Park—Los Liones Trailhead improvements and restroom construction project on a one-time basis.

Item 3790-301-0005—For capital outlay, Department of Parks and Recreation. I revise this item by reducing:

(30.92) 90.KZ.101-Cornfields Project: Acquisition—Acquisition from \$40,000,000 to \$36,000,000; and

(31) Reimbursements from -\$5,041,000 to -\$1,041,000;

and delete Provision 7.

These reductions are in conformance with Items 0540-101-0001, Schedule (2) and 0540-101-6015, Schedule (2), which were reduced due to fiscal constraints and limited resources.

I am deleting Provision 7, which allocates \$6,500,000 of the funds appropriated to the Albion Acquisition. This project has not been reviewed by the Department, with input from the State Parks and Recreation Commission, against other competing priority park system needs.

Item 3790-302-0005—For capital outlay, Parks and Recreation. I reduce this item from \$69,400,000 to \$9,850,000 by reducing:

(7) 90.EC.400-Kenneth Hahn SRA: Baldwin Hills—Acquisition from \$11,000,000 to \$4,000,000;

(13) 90.7T.400-Pigeon Point Light Station SHP: Bolsa Point/Whaler's Cove—Acquisition from \$5,000,000 to \$4,000,000;

(14) 90.72.400-John Marsh Home SHP: Cowell Ranch—Acquisition from \$5,000,000 to \$1,500,000; and

(15) 90.FH.100-Santa Monica SB: 415 PCH Project—EIRs and Planning from \$500,000 to \$350,000

and by deleting \$60,550,000 for the following projects:

(1) 90.EX.400-Malibu Creek SP: Acquisition (700,000);

(2) 90.4E.400-Mendocino Headlands SP: Big River—Acquisition (\$5,000,000);

(3) 90.BR.400-Butano SP: Acquisition (\$3,000,000);

(4) 90.B8.400-Castle Rock SP: Acquisition (\$7,000,000);

(5) 90.CH.400-Point Lobos SR—Acquisition (\$5,000,000);

(6) 90.CO.400-Wilder Ranch SP: Curren Ranch—Acquisition (\$2,200,000);

(8) 90.EF.400-El Capitan SB: El Capitan Ranch—Acquisition (\$6,500,000);

(9) 90.FW.400-Topanga SP: Mulholland Gateway—Acquisition (\$9,000,000);

(10) 90.H6.400-Cuyamaca Rancho SP: Tulloch-Cuyamaca—Acquisition (\$3,000,000);

(11) 90.7P.400-Half Moon Bay SB: Francis Beach—Acquisition (\$1,500,000); and

(12) 90.7Q.400-Montara SB: Rancho Corral—Acquisition (\$5,000,000);

I am reducing these legislative augmentations due fiscal constraints and diminishing resources in the Safe Neighborhood Parks, Clean Water, Clean Air, and Coastal Protection Bond Fund for unspecified state parks projects. The amount I have sustained for the Kenneth Hahn SRA: Baldwin Hills acquisition is intended to secure the acquisition of the Stocker Street Trail. Should this amount be insufficient, I direct the Department of Parks and Recreation to reassess the critical nature of this project and, if appropriate, request additional funds in the 2002 Governor's Budget.

In addition, I direct the Department of Parks and Recreation to allocate \$3,000,000 and \$625,000 from the 2000 Bond Redwood Acquisition Program for the Mendocino

Headlands: Big River acquisition and the Butano SP acquisition, respectively. I further direct the department to seek additional federal funds for the Butano SP acquisition.

I further direct the Department of Parks and Recreation to allocate from the 2000 Bond Habitat Acquisition Program \$3,000,000 for the Castle Rock SP acquisition, \$5,000,000 for the El Capitan SB: El Capitan Ranch acquisition, \$4,000,000 for the Topanga SP: Mulholland Gateway acquisition, \$3,000,000 for the Cuyamaca Rancho SP: Tulloch-Cuyamaca acquisition, \$1,000,000 for the Pigeon Point Light Station SHP: Bolsa Point/Whaler's Cove acquisition, and \$1,500,000 for the John Marsh Home SHP: Cowell Ranch acquisition.

Item 3810-301-0005—For capital outlay, Santa Monica Mountains Conservancy. I reduce this item from \$16,250,000 to \$14,250,000.

I am deleting the \$2 million legislative augmentation for the Oakmont-Verdugo Mountains purchase. The Oakmont-Verdugo Mountains acquisition is one of the projects previously funded through the Resources Agency in 2000–01 from bond funds provided through Proposition 13. The additional \$2 million augmentation is not necessary to complete the acquisition.

Item 3860-001-0001—For support of Department of Water Resources, I reduce this item from \$117,373,000 to \$113,657,000 by reducing:

(4) 30-Public Safety and Prevention of Damage from \$41,976,800 to \$38,260,800, and by deleting Provision 2.

California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. Due to fiscal constraints and limited resources, it is necessary to reduce funding for sediment removal projects for the Tisdale Bypass and the Fremont Weir. However, I am retaining \$599,000 for environmental review and engineering design activities to allow the projects to move forward.

I am deleting Provision 2 to conform to this action.

Item 3860-101-0001—For local assistance, Department of Water Resources, I reduce this item from \$22,586,000 to \$21,991,000 by reducing:

(4) 97.20.004-Local Projects from \$1,550,000 to \$955,000 by reducing subschedules:

(b) State Reclamation Board: Success Reservoir Enlargement Project from (\$550,000) to (\$335,000);

(c) City of Fremont: Dredging Lake Elizabeth from (\$400,000) to (\$120,000); and by deleting subschedule:

(d) Butte County: Rock Creek/Keffer Slough (\$100,000).

I am deleting the \$865,000 legislative augmentation. This action is essential due to fiscal constraints and limited resources in the General Fund. Furthermore, of the amount being sustained for these projects, funding shall be approved on a one-time basis.

Item 3900-101-0001—For local assistance, State Air Resources Board. I reduce this item from \$200,000 to \$75,000 by reducing:

(1) Local projects from \$200,000 to \$75,000 by reducing the following subschedule:

(a) Montebello Unified School District: CNG Buses from (\$150,000) to (\$75,000);

and by deleting the following subschedule:

(b) City of San Clemente: Electric vehicle-San Clemente (\$50,000).

I am deleting the \$125,000 legislative augmentation. This action is essential due to fiscal constraints and limited resources in the General Fund. The \$75,000 in subschedule (a) is being sustained on a one-time basis.

Item 3910-001-0226—For support of California Integrated Waste Management Board. I revise this item.

I am reducing the legislative augmentation of 19.0 positions by 10.0 positions. I am sustaining the remaining 9.0 positions to address the Waste and Used Tire program workload, and sustaining full funding for this program to provide sufficient resources for contractual services.

Item 3910-001-0386—For support of California Integrated Waste Management Board. I reduce this item from \$939,000 to \$439,000.

I am deleting the \$500,000 legislative augmentation for grants to local government to reduce or eliminate trash in the Los Angeles River Watershed. While I am supportive of environmental improvement projects, this project is not of sufficiently high priority to justify funding over other meritorious projects. Proponents of this project have the option to apply for a competitive grant from the Solid Waste Disposal and Codisposal Cleanup Program.

Item 3910-001-0387—For Support of California Integrated Waste Management Board. I revise this item by reducing:

- (1) 11-Waste Reduction and Management from \$77,653,000 to \$77,153,000, and
- (12) Amount payable from Solid Waste Disposal Site Cleanup Trust Fund (Item 3910-001-0386) from -\$939,000 to -\$439,000.

I am revising this item to conform to the action I have taken in Item 3910-001-0386.

Item 3940-001-0001—For support of State Water Resources Control Board. I reduce this item from \$108,796,000 to \$108,659,000 by reducing:

- (1) 10-Water Quality from \$401,839,000 to \$401,702,000.

I am deleting the \$137,000 augmentation for administration of clean beach and research projects. I am reducing this item to conform to the action I have taken in Item 3940-101-0001.

Item 3940-101-0001—For local assistance, State Water Resources Control Board. I reduce this item from \$3,066,000 to \$1,503,000 by reducing:

- (1) 10-Water Quality from \$242,763,000 to \$237,869,000;
- (1.5) 97.20.004-Local Projects from \$203,000 to \$3,000 by deleting the following subschedules:
 - (a) Upper San Gabriel Valley Municipal Water District: Watershed Restoration Program (\$150,000);
 - (c) City of San Juan Capistrano: Water Quality Program (\$50,000);
- (8) Amount payable from the Coastal Nonpoint Source Control Subaccount (Item 3940-101-6022) from -\$65,000,000 to -\$61,469,000;

and by revising Provision 1.

I am deleting \$1,363,000 of the augmentation for clean beach research projects to protect vital existing programs. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. However, in recognition of the critical need to reduce the number of beach closures due to viral and bacterial contamination, I am sustaining \$32,298,000 of the Coastal Nonpoint Source Account funding in Item 3940-101-6022 for various clean beach projects.

I am revising Schedule (8) to conform to the action I have taken in Item 3940-101-6022.

I am also revising Provision 1 to conform to this action.

“1. A total of ~~\$38,000,000~~ (~~\$3,000,000~~ ~~appropriated in this item and~~ \$33,798,000 ~~(\$1,500,000 appropriated in this item and~~ \$32,298,000 appropriated in Item 3940-101-6022) shall be used for clean beach and research projects in accordance with the following schedule:

- (a) County of Los Angeles: Mothers' Beach, Marina Del Rey (2,000,000)
- (b) City of Malibu: Surfrider, Malibu Lagoon (2,000,000)
- (c) City of Calabasas: Malibu Creek (385,000)

- (d) Las Virgenes Municipal Water District: Malibu Creek (742,000)
- (e) City of Long Beach: Los Angeles River (500,000)
- (f) City of Long Beach: Colorado Lagoon (500,000)
- (g) City of Los Angeles: Cabrillo Beach (1,250,000)
- (h) City of Santa Monica: Santa Monica Pier (350,000)
- (i) City of Redondo Beach: Redondo Beach Pier (350,000)
- (j) City of Los Angeles: Temescal Canyon (800,000)
- (k) City of Manhattan Beach: Manhattan Beach (200,000)
- (l) City of Los Angeles: Santa Monica Canyon (1,020,000)
- (m) City of Los Angeles: Imperial Beach (810,000)
- (n) City of Malibu/County of Los Angeles: Surfrider, Malibu Lagoon (794,000)
- (o) City of Avalon: Avalon Beach (500,000)
- (p) County of Ventura: Kiddie and Hobie Beach (1,500,000)
- (q) County of Santa Barbara: Rincon Beach (500,000)
- (r) County of Santa Barbara or City of Santa Barbara or California Department of Parks and Recreation: Arroyo Burro et al. (2,000,000)
- (s) County of Orange: Dana Point Harbor Baby Beaches (750,000)
- (t) City of Laguna Beach and Aliso Water Management District: Aliso Beach (500,000)
- (u) County of Orange or City of Dana Point: Doheny State Beach (750,000)
- (v) County of Orange or City of Newport Beach: Newport Bay (500,000)
- (w) County of Orange: Dana Point-Poche Creek (500,000)
- (x) County of Orange: Huntington State Beach-Santa Ana River (~~2,039,000~~) (1,000,000)
- (y) County of Orange: Huntington Harbor (750,000)
- (z) City of Encinitas: Moonlight Beach (814,000)
- (aa) City of San Diego: Mission Bay (3,000,000)
- (ab) County of San Diego or City of Imperial Beach: Imperial Beach (1,500,000)
- (ac) County of San Diego and City of Coronado: Coronado Beach (1,000,000)
- (ad) County of San Diego or City of San Diego: Ocean Beach (1,500,000)
- (ae) County of San Diego or City of San Diego: Chollas Creek (1,000,000)
- (af) County of Santa Cruz: Seabright Beach (325,000)
- (ag) City of Santa Cruz or County of Santa Cruz: Main and Cowell Beach (150,000)
- (ah) City of Capitola or County of Santa Cruz: Capitola Beach (100,000)
- (ai) City of Santa Cruz or County of Santa Cruz: Main and Seabright Beach (1,000,000)
- (aj) County of Sonoma: Bodega Bay-Campbell Cove (500,000)
- (ak) County of San Mateo: Pillarcitos and Gazos (250,000)
- (al) County of San Mateo: Pacifica State Beach (500,000)
- (am) County of San Luis Obispo or City of Pismo Beach: Pismo State Beach (1,200,000)
- (an) County of Monterey or City of Pacific Grove: Lover's Point (500,000)
- (ao) County of Monterey: Still Water Cove (500,000)
- (ap) Develop rapid indicators (~~2,000,000~~) (1,500,000)
- (aq) Source Identification Methodology (1,000,000) "

This action is essential due to fiscal constraints and limited resources in the General Fund.

The \$3,000 legislative augmentation for the Novato Sanitary District: Novato Heights Sewer Project Revenue Study is being sustained on a one-time basis.

Item 3940-101-6022—For local assistance, State Water Resources Control Board. I reduce this item from \$65,000,000 to \$61,649,000.

I am deleting \$3,531,000 for various clean beach projects that are not of sufficiently high priority to fund at this time. The action taken in this item conforms to the action I have taken in Item 3940-101-0001.

Item 3960-101-0001—For local assistance, Department of Toxic Substances Control. I delete this item.

I am deleting the \$50,000 legislative augmentation for the North Fork Community Development Council for the North Fork Mill Site PCP Contamination Clean-up. This action is essential due to fiscal constraints and limited resources in the General Fund.

Item 4120-101-0001—For local assistance, Emergency Medical Services Authority. I sustain this item.

I am sustaining the \$25,000,000 legislative augmentation for trauma care centers and the \$5,000,000 augmentation for trauma care system planning on a one-time only basis. The Healthy Families and Medi-Cal program and funding expansions continued in this Budget will provide health coverage for approximately 1.1 million formerly uninsured Californians. Funding included in the Budget for those previously uninsured, in addition to the base funding for millions of our residents, should decrease the number of uninsured patients served in trauma centers, and, as a result, reduce the need for State funding in the future.

Item 4130-001-0632—For support of California Health and Human Services Agency Data Center. I reduce this item from \$307,811,000 to \$304,585,000 by reducing:

(2) 30-Systems Management Services from \$165,422,000 to \$162,196,000.

I am reducing this item by \$3,226,000 to conform with actions taken in Item 5180-141-0001.

Item 4140-101-0001—For local assistance, Office of Statewide Health Planning and Development. I revise this item by deleting Provision 2.

I am deleting Provision 2, which would require the Office of Statewide Health Planning and Development to encourage multi-year Rural Health Capital Grants applications. The Office is currently able to award multi-year Rural Health Capital Grants, subject to the appropriation of funds. While a multi-year process may streamline the grant award and payment process, it could result in all funds being committed before new applicants have the opportunity to compete for funding. Additionally, should funding for this program be reduced in the future, out-year commitments may not be able to be met.

Item 4140-111-0236—For local assistance, Office of Statewide Health Planning and Development. I revise this item by deleting Provision 1.

I am deleting Provision 1, which would require the Office of Statewide Health Planning and Development to encourage multi-year Rural Health Services Small Grants applications. The Office is currently able to award multi-year Rural Health Services Small Grants, subject to the appropriation of funds. While a multi-year process may streamline the grant award and payment process, it could result in all funds being committed before new applicants have the opportunity to compete for funding. Additionally, should funding for this program be reduced in the future, out-year commitments may not be able to be met.

Item 4170-001-0001—For support of Department of Aging. I revise this item by deleting Provision 2.

Provision 2 would require that the augmented funds provided for the Multipurpose Senior Services Program (MSSP) be used to increase base funding for current client program slots. The deletion of Provision 2 conforms to the elimination of a \$1.5 million (\$750,000 General Fund) legislative augmentation in the Department of Health Services local assistance budget. The funding for the MSSP local assistance has increased by 55.8 percent under my Administration, including a 17 percent increase provided in this Budget in the Medi-Cal program. I believe that the Budget provides

sufficient funding for the program to cover service costs to the most impaired seniors on a priority basis; therefore, I am deleting the provisional language and the related base funding increase at this time.

Item 4170-101-0001—For local assistance, Department of Aging. I reduce this item from 38,848,000 to \$36,075,000 by reducing:

- (4) 40-Special Projects from \$25,607,000 to \$23,540,000, and
- (4.5) 97.20.004-Local Projects from \$2,551,000 to \$1,845,000 by reducing the following subschedules:
 - (b) Acacia Adult Day Services Garden Grove: Building renovation from (\$170,000) to (\$75,000);
 - (c) City of Chino: Senior citizens' expansion project from (\$75,000) to (\$65,000);
 - (d) City of Culver City: Culver City Senior Center from (\$450,000) to (\$350,000);
 - (e) City of Montclair: Senior Center from (\$90,000) to (\$80,000);
 - (f) City of Rancho Cucamonga: New Senior Center from (\$75,000) to (\$65,000);
 - (g) Filipino-American Senior Opportunities Development Council, Inc.: Provide furniture and equipment for the Northside Community Center from (\$100,000) to (\$75,000);
 - (h) City of Bellflower: Equipment and rehabilitation for Senior Services at Simms Park from (\$25,000) to (\$20,000);
 - (i) George and Marta Brown Foundation: Equipment for the George and Marta Brown Foundation's Brown Center for Innovation-Senior computer lab from (\$43,000) to (\$30,000);
 - (j) City of Rialto, Department of Parks and Recreation: Rialto Senior Center furnishings from (\$100,000) to (\$60,000);
 - (l) City of Chino: Senior Citizens' Center expansion from (\$150,000) to (\$125,000);
 - (m) City of Culver City: Construction of the Culver City Senior Center from (\$800,000) to (\$600,000);
 - (q) Filipino American Association of the USA (FAAUSA): Adult day care center for Filipino World War II veterans from (\$100,000) to (\$25,000);

and by deleting the following subschedules:

- (n) Sierra Foothill Senior Management: Meals on Wheels waiting list elimination (\$38,000);
- (o) Lutheran Social Services of Southern California: Caring Neighbors program (\$30,000);
- (p) Camarillo Health Care District: Elements Affecting Senior Independence program (\$30,000);

and by deleting Provision 6.

I am deleting \$98,000 and reducing \$608,000 from the indicated legislative augmentations for local projects. These reductions are needed due to fiscal constraints and limited resources in the General Fund. The funding for the projects which I am sustaining is being included on a one-time basis.

I am deleting the legislative augmentation of \$600,000 General Fund for the Linkages program, which was intended to provide a per-client rate increase, and reducing the Community-Based Services Programs by an additional \$1,000,000 due to the need to maintain a prudent reserve for economic uncertainties. The Budget retains \$24.9 million for Community-Based Services Programs, which includes \$8.7 million for the Linkages program. Given better economic times during the first two years of my Administration, we were able to provide \$12.4 (\$8.9 million General Fund) to expand services for seniors in 1999–2000 and \$332.4 million (\$187.3 million General Fund)

specifically for community programs for seniors in 2000–01. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I am open to considering funding for these worthy programs in the future when the economy improves.

I am also deleting the legislative augmentation of \$467,000 General Fund for one-time grants for start-up costs at new Adult Day Care (ADC) and Adult Day Support (ADS) centers. Historically, the State has not provided start-up grants for these centers. Due to limited General Fund resources, it is inappropriate for the State to initiate funding for a new program. The Budget includes local assistance funding of \$177.5 million (\$86.3 million General Fund) for Adult Day Health Care and \$4.7 million (\$4.3 million General Fund) for Alzheimer's Day Care Resource Centers, which provide a range of similar health, therapeutic, and social services. In addition, a new federal program, the National Family Caregiver Support Program, will be initiated in 2001–02 to provide a continuum of caregiver support services similar to those offered at ADC and ADS centers.

I am deleting Provision 6 to conform to this action.

Item 4170-102-0001—For local assistance, Department of Aging. I sustain this item.

I am sustaining the \$1,500,000 legislative augmentation for the City of Elk Grove for the Elk Grove Senior Center on a one-time only basis.

Item 4180-401—Commission on Aging. I delete this item.

I delete this item because this language requires the Commission on Aging to report on its financial requirements to operate the Commission, the Area Agencies on Aging Advisory Council of California, and the California Senior Legislature. This activity is more properly conducted as part of the Administration's normal budget development process.

Item 4200-001-0001—For support of Department of Alcohol and Drug Programs. I reduce this item from \$5,267,000 to \$5,091,000 by reducing:

- (1) 15-Alcohol and Other Drug Services Program from \$34,004,000 to \$33,652,000, and
- (4) Reimbursements from –\$4,115,000 to –\$3,939,000.

I am reducing \$352,000 (\$176,000 General Fund and \$176,000 reimbursements) and four new Drug Medi-Cal program auditor positions originally included in my proposed 2001–02 Budget. The May Revision of the Budget proposed the elimination of these positions and associated funding. The Legislature rejected that reduction. The Budget retains ten positions for Drug Medi-Cal audits. In addition, the department can seek assistance by directing suspected fraud to the Department of Health Services, which added 192 positions in 2000–01 for Medi-Cal fraud investigation. This reduction is necessary to provide for a prudent General Fund reserve for economic uncertainties.

Item 4200-001-3019—For support of Department of Alcohol and Drug Programs. I revise this item by deleting Provision 4.

I am deleting Provision 4, which would require the Department of Alcohol and Drug Programs to provide a written summary, by April 2002, of the implementation of the Substance Abuse and Crime Prevention Act of 2000 (Proposition 36). This provision specifies the information to be included in the summary. Because the programs authorized under Proposition 36 commenced July 1, 2001, it is unlikely that sufficient data would be available in time to result in a meaningful report by April 2002. Proposition 36 requires an annual report to be prepared. I am directing the Department to include in its report, to the extent that data are available, the information requested by the Legislature pursuant to this provision. Additionally, I am directing the Department to provide copies of the annual report to the appropriate fiscal committees of the Legislature.

Item 4200-101-0001—For local assistance, Department of Alcohol and Drug Programs. I reduce this item from \$49,240,000 to \$40,380,000:

(1) 15-Alcohol and Other Drug Services programs from \$366,820,000 to \$358,120,000;

(1.5) 97.20.004-Local Projects from \$862,000 to \$702,000; and by revising Provision 4.

I am deleting \$5,700,000 for youth treatment programs. I proposed this reduction as part of the May Revision of the Budget. The Legislature rejected that reduction, restoring the funding. Given the significant commitment of General Fund for Proposition 36, I am reducing this program, consistent with my May Revision. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. The Budget contains over \$635 million in state and federal funds for local drug and alcohol treatment programs, including approximately \$35 million specifically for youth treatment and prevention services.

I am deleting \$3,000,000 from the Drug Court programs. I proposed this reduction as part of the May Revision of the Budget. The Legislature rejected that reduction, restoring the funding. This reduction is necessary due to fiscal constraints and limited resources in the General Fund. The Budget continues \$14.1 million for drug court treatment and \$900,000 for court administrative costs. The Budget also includes \$16 million (\$7.8 million General Fund) in new Drug Medi-Cal funding and \$11.2 million in new local assistance federal block grant funding.

I am revising Provision 4 containing certain legislative augmentations for local projects. This action is necessary due to fiscal constraints and limited resources in the General Fund.

“4. Of the funds appropriated in this item, ~~\$862,000~~ \$702,000 shall be for the following projects:

- (a) Marin Services for Women: Drug and Alcohol Program (250,000)
- (b) Pico Union Westlake Cluster Network: Drug Free Community Program (125,000)
- (c) Montebello East Los Angeles Counseling Center ~~(300,000)~~ (243,000)
- ~~(d) Walden House Incorporated: Walden House Conference Report (100,000)~~
- (e) Wolfe Center: Renovation and Repairs of Wolfe Center ~~(50,000)~~ (47,000)
- (f) King of Kings: Recovery Unit (37,000)”

I am sustaining the remaining augmentations on a one-time basis.

Item 4200-104-0001—For local assistance, Department of Alcohol and Drug Programs. I reduce this item from \$26,957,000 to \$25,957,000 by reducing:

(1) 15-Alcohol and Other Drug Services Program from \$26,957,000 to \$25,957,000.

I am reducing the state-funded perinatal program by \$1,000,000, while maintaining over \$25.9 million in General Fund support for this effort. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I take this action as a matter of consistency because the discretionary programs for nearly all State departments funded from the General Fund have been reduced similarly. I note that another substance abuse perinatal program, the Perinatal Drug Medi-Cal program, is increasing by over \$1.8 million, to a total of \$5.3 million (\$2.6 million General Fund).

Item 4260-001-0001—For support of Department of Health Services. I reduce this item from \$233,690,000 to \$231,260,000 by reducing:

- (1) 10-Public and Environmental Health from \$367,483,000 to \$367,233,000;
- (2) 20-Health Care Services from \$436,573,000 to \$435,573,000;
- (4.6) 97.20.004-Local Projects from \$3,803,000 to \$2,123,000;
- (5) Reimbursements from -\$29,694,500 to -\$29,694,000; and

(41) Amount payable from the Federal Trust Fund (Item 4260-001-0890) from ~~-\$306,470,500 to -\$305,894,000;~~

and by deleting Provision 9 and revising Provision 10.

I am deleting one position added by the Legislature for the Department of Health Services to provide assistance to the County Medical Services Program (CMSP) in negotiating rebate contracts with drug manufacturers. This position would be responsible for negotiating contracts and securing rebates from drug manufacturers on behalf of the CMSP. This legislative increase in state staff conflicts with my continuing effort to control the growth of state government. Given the department's vacancy level, I am instructing that existing resources be redirected to fulfill the Legislature's requirements. However, I am retaining the funding that will allow the CMSP to reimburse the department for these services.

I am deleting the \$500,000 that was included in my proposed Budget for pilot projects to expand community options for long-term care. The Legislature redirected \$100,000 of this proposal to expand the Program of All-Inclusive Care for the Elderly. I am deleting the entire amount as a matter of consistency because the discretionary programs for nearly all State departments funded from the General Fund have been reduced similarly. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. In addition, I am deleting \$500,000 from the Federal Trust Fund, Item 4260-001-0890, to conform to this action.

In order to correct a technical error in Schedule (41) and Schedule (5) Reimbursements of this item, I am reducing Schedule (41) by an additional \$76,500, and Schedule (5) Reimbursements by \$500. This technical veto will conform the Budget Act to the action taken by the Legislature.

I am deleting the \$250,000 legislative augmentation to conduct public health assessments. These capabilities already exist among local public health departments, and the Budget includes \$1 million General Fund for a nonspecific local public health subvention, some of which could be directed to this activity. This reduction is also necessary to establish a prudent General Fund reserve for economic uncertainties. I am also deleting Provision 9 to conform to this action.

I am revising Provision 10 containing certain legislative augmentations for local projects. This action is necessary due to fiscal constraints and limited resources in the General Fund. I am sustaining the remaining augmentations on a one-time basis.

"10. Of the funds appropriated in this item, ~~\$3,803,000~~ \$2,123,000 shall be for the following projects:

- (a) City of Avalon: Genetic Testing in Avalon Bay pursuant to requirements of AB 411 (1997) (150,000)
- (b) City of Santa Rosa: Cloverdale Street Plume Project to Shut Down Contaminated Wells and Construct New Wells ~~(350,000)~~ (150,000)
- (c) Mexican American Alcoholism Program, Inc.: Start up for Community Health Center in South Sacramento ~~(550,000)~~ (150,000)
- (d) Napa Valley Vintners Health Center: Community Health Center Construction ~~(250,000)~~ (200,000)
- (e) San Diego Children's Hospital: Regional Emergency Care Center (1,000,000)
- (f) Westside Women's Health Center (8,000)
- (g) VIDA: Local Health Program ~~(750,000)~~ (100,000)
- (h) City of Long Beach: Multi-Cultural Health Center ~~(45,000)~~ (20,000)
- (i) Santa Barbara Junior League: Clinic on Wheels ~~(200,000)~~ (195,000)
- (j) Horizon Foundation: Public Health Study on Anti-Gay Campaign (100,000)
- (k) Minority AIDS Project in Los Angeles ~~(400,000)~~ (50,000) "

Item 4260-001-0890—For support of Department of Health Services. I reduce this item from \$306,394,500 to \$305,894,000.

I am reducing this item by \$500,500 to conform with actions taken in Item 4260-001-0001, which includes a technical veto to correct an error in the Budget Act.

Item 4260-003-0942—For support of Department of Health Services. I revise this item by deleting Provision 1.

I am deleting Provision 1, which would allow the Department of Health Services to spend up to \$2,000,000 from the Federal Citation Penalties Account for awards to specific nursing facilities. These awards would be passed on to direct caregivers in the form of bonuses. This deletion will permit applicability of Health and Safety Code Section 1417.4, which establishes the Quality Awards Program for nursing homes. This statute allows monetary awards from the General Fund to be used for staff bonuses and monetary awards from the Federal Citation Penalties Account to be used for innovative grants to improve the quality of care and quality of life for residents in skilled nursing facilities. The Budget Bill incorrectly identifies both the General Fund and the Federal Citation Penalties Account as sources for staff bonuses, with no mention of innovative grants to improve the quality of care and quality of life for residents in skilled nursing facilities. The deletion of this provision will leave only Health and Safety Code Section 1417.4 with authority over the Federal Citation Penalties Account, allowing the Department to use funds from this account in the manner intended by statute.

Item 4260-101-0001—For local assistance, Department of Health Services. I reduce this item from \$9,548,027,000 to \$9,546,027,000 by reducing:

(3) 20.10.030-Benefits (Medical Care and Services) from \$22,826,757,000 to \$22,822,757,000; and

(5) Amount payable from the Federal Trust Fund (Item 4260-101-0890) from -\$14,802,896,000 to -\$14,800,896,000;

and by deleting Provisions 12, 13 and 14.

I am deleting the \$250,000 legislative augmentation for the Department of Health Services (DHS) to conduct an oral health needs assessment of children. This is a potentially duplicative effort funded from limited General Fund resources. If the assessment is deemed to be of sufficient priority, private foundation funding should be sought, as was done to conduct the prior study. In addition, I am deleting \$250,000 from the Federal Trust Fund, Item 4260-101-0890, and deleting Provision 12, to conform to this action.

I am deleting Provision 13, which would require DHS to study methods for developing alternative rate-setting methodologies for distinct-part nursing facilities and report to the Legislature by April 1, 2002. By statute, the Department is currently required to submit a report to the Legislature regarding alternative long-term care reimbursement methodology. This report includes distinct-part nursing facilities. Therefore, I am deleting this provision as such a report is already statutorily required.

I am deleting the \$1,000,000 legislative augmentation to increase supplemental outpatient rates paid to small and rural hospitals. Supplemental outpatient rates were recently doubled for these small and rural hospitals in the Budget Act of 2000, from \$4 million to \$8 million (\$4 million General Fund). Additionally, as part of the proposed Orthopaedic Hospital Settlement, Medi-Cal will pay hospitals a lump-sum payment of \$350 million (\$175 million General Fund) in 2001-02, and beginning July 1, 2001, increase hospital outpatient rates by 30 percent as well as provide annual increases of 3.33 percent effective July 1 in each of the three subsequent years. In addition, I am deleting \$1,000,000 from the Federal Trust Fund, Item 4260-101-0890, to conform to this action.

I am deleting the \$750,000 legislative augmentation to conform to the action taken in Item 4170-001-0001 regarding the Multipurpose Senior Services Program in the

Department of Aging. In addition, I am deleting \$750,000 from the Federal Trust Fund, Item 4260-101-0890, to conform to this action.

I am deleting Provision 14 which would require that up to \$5 million General Fund be transferred from other Medi-Cal program areas to Medi-Cal Outreach for Children should \$5 million in Proposition 10 funding be unavailable for this program. This language potentially would create a \$5 million General Fund deficiency in the Medi-Cal program. Absent the Proposition 10 funding and matching federal funding, the outreach budget would increase by approximately \$5.3 million from the 2000–01 level, to \$39.6 million. I am directing DHS to continue to work with the Children and Families Commission to secure Proposition 10 funding for our outreach to children effort. However, if the funding is unavailable, the Department should continue to provide application assistance and related fees, and school-based outreach pursuant to the funding levels in the May Revision of the Governor's Budget and make needed reductions from other areas of the education and outreach budget.

Item 4260-101-0890—For local assistance, Department of Health Services. I reduce this item from \$14,802,896,000 to \$14,800,896,000:

I am reducing this item by \$2,000,000 to conform to the action I have taken in Item 4260-101-001.

Item 4260-111-0001—For local assistance, Department of Health Services. I reduce this item from \$438,606,000 to \$410,862,000 by reducing:

- (4) 10.30.030-Childhood Lead Poisoning Prevention from \$10,500,000 to \$8,500,000;
- (6) 10.30.050-Communicable Disease Control from \$66,604,000 to \$65,704,000;
- (7) 10.30.060-AIDS from \$262,187,000 to \$258,187,000;
- (8) 20.30-County Health Services from \$110,020,100 to \$108,020,100;
- (9) 20.40-Primary Care and Family Health from \$1,526,327,800 to \$1,502,413,800;
- (12) Amount payable from the Childhood Lead Poisoning Prevention Fund (Item 4260-111-0080) from -\$14,000,000 to -\$12,000,000; and
- (20) Amount payable from the Federal Trust Fund (Item 4260-111-0890) from -\$1,029,448,000 to -\$1,026,378,000.

I am reducing this item by \$2,000,000 for the Local Public Health Subvention. I originally proposed this reduction as part of the May Revision of the Budget. The Legislature rejected that proposal. For 2001–02, local realignment health account funds are estimated to be \$1.5 billion, an increase of \$48.7 million. In addition, the Master Tobacco Settlement will provide local governments in California an additional \$475 million. These funds may be used for any public health purpose deemed a local priority.

I am reducing this item by \$5,000,000 for media activities related to teen pregnancy prevention and other family planning programs. The 2001–02 Budget provides \$104.3 million for various family planning programs and activities. Although I am supportive of family planning programs, this action is necessary due to fiscal constraints and limited resources in the General Fund. I take this action as a matter of consistency because the discretionary budgets for nearly all State departments funded from the General Fund have been reduced similarly.

I am deleting the \$6,700,000 legislative augmentation to update the Child Health and Disability Prevention Program (CHDP) Periodicity Schedule to reflect American Academy of Pediatrics standards. The Department of Health Services (DHS) reviews the appropriateness of care provided in CHDP, within programmatic and fiscal constraints. Due to fiscal constraints and limited General Fund resources, I cannot support this augmentation. I am also deleting the \$1,900,000 legislative augmentation from the Federal Trust Fund in Item 4260-111-0890 to conform with this action.

I am deleting the \$2,000,000 legislative augmentation for the Rural Health Services Program that would provide a minimum \$75,000 per-clinic award, the \$2,000,000

legislative augmentation for the Seasonal Agricultural and Migrant Workers Clinic Program, and the \$2,000,000 legislative augmentation for the American Indian Health Program. Given the recent slowing of economic growth, it is not fiscally prudent to expand health care funding for these programs at this time. However, I am retaining the \$10 million augmentation for the Expanded Access to Primary Care (EAPC) Clinic Program. This umbrella program provides funding for and increased access to all clinics that provide primary care. Moreover, local realignment funds are estimated to be \$1.5 billion in 2001–02, an increase of approximately \$45 million. Further, the Master Tobacco Settlement will provide local governments in California an additional \$475 million. These funds may be used for any public health purpose deemed a local priority. Finally, expanded Medi-Cal and Healthy Families programs will provide improved access to care and should mitigate the need for increased clinic funding.

I am deleting the \$500,000 legislative augmentation for the Women, Infants and Children (WIC) Farmer's Market Program. Chapter 294, Statutes of 1997, shifted authority for the program from the California Department of Food and Agriculture to DHS to enable continuation of the service without General Fund expense. Furthermore, nutritional services (including fresh fruits and vegetables, in some instances) are currently available through other federal and State food and nutrition programs whose combined expenditures are approximately \$4 billion annually. This augmentation would represent the first augmentation of General Fund for this purpose, which I cannot support due to limited General Fund resources. I am also deleting the \$1,170,000 legislative augmentation from the Federal Trust Fund in Item 4260-111-0890 to conform with this action.

I am deleting the \$2,000,000 legislative augmentation for the Childhood Lead Poisoning Prevention Program. The program is currently operating with an annual funding imbalance of approximately \$5.3 million. If revenue and expenditure levels remain unchanged, the Special Fund reserve will be depleted during 2002–03. This augmentation would therefore hasten fund exhaustion. I am directing DHS to submit a proposal for the 2002–03 Budget to operate this program within available resources. The Budget currently provides \$8.5 million Childhood Lead Poisoning Prevention Fund to local health departments for lead enforcement and control. I am also deleting the \$2,000,000 legislative augmentation in Item 4260-111-0080 to conform with this action.

I am sustaining the \$500,000 legislative augmentation for the Padres Contra El Cancer Program on a one-time basis. In future years if this is deemed to be a local priority, local realignment funds or the local share of Tobacco Settlement funds may be used for this purpose.

I am reducing this Item by \$4,000,000 for HIV/AIDS Education and Prevention activities. While I recognize the importance of these activities in reducing the spread of the disease; however, California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. The Budget maintains \$61 million General Fund for HIV/AIDS education, prevention, outreach, and direct services. I am sustaining a \$15.3 million legislative augmentation for the AIDS Drug Assistance Program (ADAP) to fund drug price increases and increased caseload in this important program, bringing total funding for the ADAP to \$162.9 million, including \$59.9 million General Fund.

I am reducing this Item by \$400,000 for Tuberculosis Treatment Services. The Budget provides \$7.6 million General Fund for counties to perform non-treatment based tuberculosis control activities, such as outreach, education, investigation, and outbreak control. Moneys can also be made available for these activities from local realignment funds and local Master Tobacco Settlement funds which may be used for

any public health purpose deemed a local priority. This reduction is necessary to build a prudent General Fund reserve for economic uncertainties.

I am reducing this Item by \$500,000 for Pediatric Immunizations. The Budget provides \$16.5 million General Fund for counties to administer and obtain vaccines. Counties can also perform these services pursuant to their statutory indigent care requirements in conjunction with the federal Vaccines For Children Program, which annually makes available millions of federally-funded vaccines for use in California's public health programs. Further, local realignment funds and the Master Tobacco Settlement funds may be used for any public health purpose deemed a local priority. This reduction is necessary to build a prudent General Fund reserve for economic uncertainties.

I am reducing this item by \$2,644,000 for the County Maternal and Child Health Services allocation. The Budget continues to provide \$66.1 million for activities directed to Maternal and Child Health programs. Further, local realignment funds and the Master Tobacco Settlement funds may be used for any public health purpose deemed a local priority. This reduction is necessary to build a prudent General Fund reserve for economic uncertainties. I take this action as a matter of consistency because the discretionary budget for nearly all State departments funded from the General Fund have been reduced similarly.

Item 4260-111-0080—For local assistance, Department of Health Services. I reduce this item from \$14,000,000 to \$12,000,000.

I am reducing this item by \$2,000,000 to conform with the actions taken in Item 4260-111-0001.

Item 4260-111-0890—For local assistance, Department of Health Services. I reduce this item from \$1,029,448,000 to \$1,026,378,000.

I am reducing this item by \$3,070,000 to conform to the actions taken in Item 4260-111-0001.

Item 4260-113-0001—For local assistance, Department of Health Services. I reduce this item from \$23,836,000 to \$23,496,000 by reducing:

- (3) 20.10.030-Benefits (Medical Care and Services) from \$36,470,000 to \$35,490,000, and
- (4) Amount payable from the Federal Trust Fund (Item 4260-113-0890) from -\$72,038,000 to -\$71,398,000

I am deleting the \$340,000 General Fund legislative augmentation for the Department of Health Services to conduct a Rural Health Demonstration Project for special populations. The Budget contains \$9 million for the Managed Risk Medical Insurance Board to conduct Rural Health Demonstration Projects. Due to fiscal constraints and limited General Fund resources, I cannot support an expansion of the Project at this time. I am also deleting \$640,000 from the Federal Trust Fund, Item 4260-113-0890 to conform to this action.

Item 4260-113-0890—For local assistance, Department of Health Services. I reduce this item from \$72,038,000 to \$71,398,000.

I am reducing this item by \$640,000 to conform to the action I have taken in Item 4260-113-0001.

Item 4280-101-0001—For local assistance, Managed Risk Medical Insurance Board. I reduce this item from \$122,536,000 to \$120,536,000 by reducing:

- (2) 40-Healthy Families Program from \$604,140,000 to \$598,240,000;
- (3) Amount payable from the Federal Trust Fund (Item 4280-101-0890) from -\$375,855,000 to -\$371,955,000;

and by deleting Provisions 1 and 3.

I am deleting the legislative augmentation of \$2,000,000 General Fund for the Healthy Families Program (HFP) to implement Rural Health Demonstration Projects.

The HFP already administers Rural Health Demonstration Projects, and the Budget includes \$9 million (\$3 million General Fund) for this purpose. I cannot support this legislative augmentation because of fiscal constraints and limited General Fund resources. In addition, I am deleting \$3,900,000 from the Federal Trust Fund, Item 4280-101-0890 to conform to this action.

I am deleting Provision 1 which would change the Administration's commitment to fully fund the HFP from all enrolled "children" to "families". While the 2001-02 Budget fully funds the proposed HFP parental expansion, this capped program is not intended to be an entitlement. Funding of the provision would involve a significant commitment of state funds at a time when state resources are limited. The Administration's commitment in the HFP is to ensure coverage for all eligible children and expand the program to parents as state and federal resources permit and as allowed by the federal government.

I am sustaining the \$5,000,000 legislative augmentation for the Major Risk Medical Insurance Program (MRMIP). However, I am deleting Provision 3 because it targets the additional resources solely towards enrollment in the program rather than making it available for the MRMIP enrollment and/or other private/public sector market-based efforts to improve access to health insurance for medically uninsurable persons. My Administration will continue to work with the Legislature and the insurance industry to further develop and implement such market-based efforts.

Item 4280-101-0890—For local assistance, Managed Risk Medical Insurance Board. I reduce this item from \$375,855,000 to \$371,955,000.

I am reducing this item by \$3,900,000 to conform to the action I have taken in Item 4280-101-0001.

Item 4300-003-0001—For support of Department of Developmental Services. I revise this item by deleting Provision 9.

I am deleting Provision 9 because this language is contrary to federal and state regulations. This provision would require the Department of Developmental Services to develop, by November 1, 2001, a visual method of readily identifying developmentally disabled individuals placed, pursuant to the California Penal Code, within the secured perimeter at Porterville Developmental Center (Porterville) and to implement the identification method by January 1, 2002.

Although I am vetoing this provision, I am sensitive to the safety and security needs of the local community surrounding Porterville. During my Administration, I have included funding to increase the number of police and security officers ten-fold; construct two 16-foot fences around the area in which the behavioral/forensic consumers reside and observation towers to allow the whole area to be under visual control; construct a Sally Port through which all visitors must be screened; institute electronic locking and alarm systems; and establish a comprehensive set of policies and procedures relating to security and staff training. Implementing a visual identification method, which may include uniforms, would likely result in litigation and/or loss of federal funding. Loss of federal funding for these individuals in Porterville would result in new, multi-million dollar General Fund costs.

Item 4300-101-0001—For local assistance, Department of Developmental Services. I reduce this item from \$1,514,845,000 to \$1,508,194,000 by reducing:

- (2) 10.10.020-Purchase of Services from \$1,660,248,000 to \$1,653,352,000; and
- (6) Reimbursements from -\$512,476,000 to -\$512,231,000.

I am deleting the legislative augmentation of \$2,600,000 (\$2,355,000 General Fund and \$245,000 reimbursements) for rate increases for in-home and out-of-home respite workers and day program (non-mobile consumers) providers. The 2000-01 Budget provided \$42.2 million (\$22.3 million General Fund) for a 10 percent rate increase for salaries and wages and a 5 percent rate increase for associated administrative costs.

California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. Given the previous rate increase and the limited resources in the General Fund, I cannot support further rate increases at this time.

I am sustaining the legislative augmentation of \$750,000 General Fund for the Devereux Facility on a one-time basis.

I am reducing this item by \$2,596,000 for Regional Center clinical staffing ratio increases for evaluation and service coordination in the Early Start Program and workload driven staffing positions for therapy, audiology, and support. The May Revision of the Budget proposed this reduction, which was rejected by the Legislature. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I am open to considering funding for this worthy program in the future when the economy improves.

I am reducing this item by \$1,700,000 for the expansion and implementation of a redesigned special incident reporting system for Regional Center providers. The redesign of the special incident reporting system is important, as it will help to ensure compliance with federal requirements and continued federal funding under the Home and Community-Based Services waiver. However, due to the uncertainty of the economy and General Fund revenues, this reduction is necessary to establish a prudent General Fund reserve. With this reduction, the Budget contains \$7,544,000 (\$5,770,000 General Fund) for the expansion and implementation of a redesigned special incident reporting system. It is my intent to include this funding in the 2002–03 Budget, given the importance of continued federal funding and my commitment to meet federal requirements placed on the Regional Centers.

Item 4300-490—Reappropriation, Department of Developmental Services. I revise this item by revising Schedule (3).

I am modifying Schedule (3) by reducing the amount available for reappropriation to \$500,000 in unexpended funds in Item 4300-101-0001, Budget Act of 2000, for the purchase of services for regional center clients for Self-Determination Pilot Projects. This reduction is necessary due to fiscal constraints and limited resources in the General Fund.

“(3) Item 4300-101-0001 (b) 10.10.020 Budget Act of 2000 (Ch. 52, Statutes of 2000) for Self-Determination Pilot Projects; ~~\$1,618,000~~ \$500,000 shall be reappropriated to Item 4300-101-0001 (1) 10.10.010 and available for expenditure until June 30, 2004.”

Item 4440-011-0001—For support of the State Hospitals, Department of Mental Health. I reduce this item from \$432,953,000 to \$430,309,000 by reducing:

(2) 20.20-Long-Term Care Services-Penal Code and Judicially Committed from \$432,953,000 to \$430,309,000.

I am reducing funding for state hospital security improvements by \$2,644,000, to \$5,000,000 and directing the Department of Mental Health to make its highest priority improvements that ensure staff and patient safety. It is my intent to include funds to complete the security improvements to the state hospitals in 2002–03. Given the fiscal constraints and limited General Fund resources, it is appropriate to prioritize the security projects and to complete these security enhancements over two years.

Item 4440-101-0001—For local assistance, Department of Mental Health. I reduce this item from \$160,421,000 to \$144,004,000 by reducing:

(1) 10.25-Community Services—Other Treatment from \$981,981,000 to \$968,431,000;

(2) 10.40-Community Services—Adult System of Care from \$7,772,000 to \$7,000,000; and

(3) 10.47-Community Services—Children's Mental Health Services from \$41,854,000 to \$39,759,000.

I am deleting the \$350,000 legislative augmentation to fund the California Mental Health Advocacy Commission. This Commission would duplicate much of the work already being accomplished by the statewide Mental Health Planning Council and statewide advocacy groups. Due to fiscal constraints and limited General Fund resources, it is inappropriate to expand State government by establishing another statewide oversight committee.

I am deleting the \$2,000,000 legislative augmentation to fund the Mental Health Respite Care Pilot Program. This augmentation would provide resources for local respite assistance services and could constitute a new state-funded entitlement program. Counties are charged with providing mental health services to residents and have been provided funding for these services through State-Local Realignment. To the extent new categorical programs are established, responsibility for funding these programs shifts to the State. If counties desire to provide respite assistance programs, such programs can be implemented and supported through existing local resources.

I am reducing \$5,000,000 for the Supportive Housing Program. I proposed this reduction as part of the May Revision of the Budget. The Legislature rejected that reduction, restoring the funding. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. This funding was new in 2000-01, and most of the programs are just beginning. Therefore, this reduction is likely to have little impact on established programs or clients. The Budget continues \$20.1 million for supportive housing programs and \$65.6 million for Integrated Services for Homeless Adults.

I am reducing \$2,095,000 for the Children's System of Care. The Budget provides \$443.3 million for mental health treatment to Medi-Cal eligible children and \$13 million for mental health services for children in the Healthy Families Program, and sustains \$39.8 million for the Children's System of Care. I am highly supportive of children's mental health programs. However, California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I take this action as a matter of consistency because the discretionary budgets for nearly all State departments funded from the General Fund have been reduced similarly. I am open to considering funding for this worthy program in the future when the economy improves.

I am reducing \$100,000 for Dual Diagnosis Services for Underserved Populations. I am sustaining the remaining \$1.9 million. I note that this program spent \$1.5 million in 2000-01. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I am open to considering funding for this worthy program in the future when the economy improves.

I am reducing \$100,000 for the Institutions for Mental Disease Transition Pilot Project, which is the Department of Mental Health's portion of the Long-Term Care Pilot Project. This project is a new program for 2001-02 and not all of the \$750,000 provided in the Budget has been spent. In light of fiscal constraints and limited resources in the General Fund, it is appropriate to reduce the funding for this program.

I am deleting \$6,000,000 for Crisis Intervention and Stabilization Assistance. This time-limited program initially funded in 2000-01 has not yet begun, and thus, no ongoing services are affected. In light of fiscal constraints and limited resources in the General Fund, I take this action as a matter of consistency because the discretionary budgets for nearly all State departments funded from the General Fund have been reduced similarly.

I am reducing \$772,000 for the Adult System of Care. This pilot program which provides integrated mental health services to adults is similar to the Integrated Services to Homeless Adults program. I am increasing that program by \$10 million in this Budget. In light of this increase and limited resources in the General Fund, I am taking this action as a matter of consistency as indicated above.

I am sustaining Provisions 4 and 5 on a one-time basis.

Item 4440-101-0890—For local assistance, Department of Mental Health. I revise this item by deleting Provision 4.

I am deleting Provision 4, which would require the Department of Mental Health to use \$200,000 from budgeted local assistance federal funds to develop, by no later than June 30, 2002, a comprehensive statewide plan for the prevention of suicide. The local assistance funding provided in the Budget should be used for treatment services, rather than for administrative studies. Because county mental health is a state-funded, county-administered program, and because service priorities are determined at the local level, such studies should be developed in and by the communities that will operate and benefit from the programs.

Item 4440-103-0001—For local assistance, Department of Mental Health. I reduce this item from \$209,856,000 to \$204,815,000.

I am reducing this item by \$5,041,000 to eliminate the 3 percent discretionary cost-of-living adjustment (COLA) for Mental Health Managed Care originally provided in the 2001–02 Budget. Under Medi-Cal, in 2000–01, psychiatrists received an 18.1 percent rate increase and psychologists received a 30 percent rate increase. These rate increases were also provided for these services under Mental Health Managed Care. In light of fiscal constraints and limited resources in the General Fund, I am eliminating the COLA for 2001–02. Even in the absence of the 3 percent COLA, funding for this program totals \$204.8 million General Fund, an increase of \$19.6 million General Fund in 2001–02.

Item 4440-111-0001—For local assistance, Department of Mental Health. I reduce this item from \$12,247,000 to \$11,747,000.

I am reducing this item by \$500,000 for caregiver resource centers. Another program serving a similar population, the Traumatic Brain Injury (TBI) program, is being increased by \$300,000 in on-going funding and \$1.4 million in one-time funding. Due to fiscal constraints and limited resources in the General Fund, I cannot continue to fund the caregiver resource center program at the prior level and increase funding for the TBI program.

Item 4700-101-0001—For local assistance, Department of Community Services and Development. I reduce this item from \$7,700,000 to \$7,150,000 by reducing:

(2) 47-Naturalization Services from \$6,650,000 to \$6,150,000;

and by deleting:

(3) 97.20.004-Local Projects (\$50,000)

(a) Napa County Coalition for Economic Opportunity for Napa Valley Coalition of Non-Profit Agencies: Model Program for Non-Profit Coalition Training and Purchasing of Services (50,000).

I am reducing funding for the Naturalization Services Program by \$500,000 General Fund. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I take this action as a matter of consistency because the discretionary budgets for many State programs funded from the General Fund have been reduced similarly. The Budget provides \$6.2 million General Fund for the Naturalization Services Program, which I believe is sufficient to continue the provision of services on a priority basis.

I am deleting the legislative augmentation of \$50,000 for the Napa County Coalition for Economic Opportunity for Napa Valley Coalition of Non Profit Agencies. The reduction is necessary due to fiscal constraints and limited resources in the General Fund.

Item 5100-001-0001—For support of Employment Development Department. I reduce this item from \$30,514,000 to \$29,514,000.

I am reducing this item by \$1,000,000 to conform to the action taken in Item 5100-001-0870.

Item 5100-001-0870—For support of Employment Development Department. I revise this item by reducing:

- (1) 10-Employment and Employment Related Services from \$214,339,000 to \$213,339,000,
- (9) Amount Payable from the General Fund (Item 5100-001-0001) from -\$30,514,000 to -\$29,514,000.

I am reducing \$1,000,000 and sustaining \$4,000,000 of the \$5,000,000 for the Faith Based Initiative. The grants associated with this program will provide job services and training to many individuals not traditionally served by the current system of workforce development. However, this reduction is necessary to provide for a prudent reserve for economic uncertainties. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I am open to considering funding for this worthy program in the future when the economy improves.

Item 5100-101-0001—For local assistance, Employment Development Department. I reduce this item from \$950,000 to \$900,000 by reducing:

- (2) 97-20-004-Local Projects from \$700,000 to \$650,000
 - (c) Women Advancing the Valley through Education, Economics and Empowerment (WAVE): Resource Center for WAVE from (\$100,000) to (\$50,000).

I am deleting the \$50,000 legislative augmentation for this local project. This reduction is necessary due to fiscal constraints and limited resources in the General Fund. I am sustaining \$650,000 in this item for local projects on a one-time basis.

I am sustaining the \$250,000 legislative augmentation for the Youthbuild program on a one-time basis. This program provides training and services for economically disadvantaged youth to provide them with the skills necessary to obtain unsubsidized employment, to complete secondary or post-secondary education, to gain entrance to military service, or to obtain qualified apprenticeship.

Item 5160-001-0001—For support of Department of Rehabilitation. I reduce this item from \$47,519,000 to \$47,019,000 by reducing:

- (1) 10-Vocational Rehabilitation Services from \$320,287,000 to \$317,940,000, and
- (8) Amount payable from the Federal Trust Fund (Item 5160-001-0890) from -\$269,770,000 to -\$267,923,000.

I am reducing \$2,347,000 (\$500,000 General Fund and \$1,847,000 Federal Trust Fund) of the \$320.3 million (\$44.9 million General Fund) appropriated for the Vocational Rehabilitation Services program. The Vocational Rehabilitation Services program operates under an Order of Selection based on the availability of funding. Therefore, all of the Most Significantly Disabled clients will continue to be served. The reduction is necessary due to fiscal constraints and limited General Fund resources.

Item 5160-001-0890—For support of Department of Rehabilitation. I reduce this item from \$269,770,000 to \$267,923,000.

I am reducing this item by \$1,847,000 to conform to the action taken in Item 5160-001-0001.

Item 5160-101-0001—For local assistance, Department of Rehabilitation. I reduce this item from \$107,093,000 to \$107,043,000 by reducing:

(3.5) 97.20.004-Local Projects from \$350,000 to \$300,000

(a) Accessible San Diego: Welcome Center for Disabled from (\$100,000) to (\$50,000).

I am reducing the \$50,000 legislative augmentation because this reduction is necessary due to fiscal constraints and limited resources in the General Fund. I am sustaining the remaining augmentations for projects on a one-time basis.

Item 5160-495—Reversion, Department of Rehabilitation. I delete this item.

I am deleting the reversion item added by the Legislature because I continue to support as a high priority, making state services and facilities available to persons with disabilities. This funding was appropriated with two-year availability. The Americans with Disabilities Act Task Force I appointed, in conjunction with the Department of Rehabilitation, has already approved \$11.6 million in projects. The Task Force is moving forward in identifying additional projects. A request for funding proposal has recently been circulated, with a deadline for response of July 23, 2001. It is anticipated that all available funding will be utilized.

Item 5180-001-0001—For support of Department of Social Services. I reduce this item from \$95,932,000 to \$93,932,000 by reducing:

(1) 16-Welfare Programs from \$71,965,500 to \$69,965,500.

I am deleting the \$2,000,000 General Fund legislative augmentation for the Emergency Food Assistance Program for food bank infrastructure improvements. Over the past two years, \$2 million General Fund has been appropriated for food bank infrastructure improvements. The State also has provided and continues to provide funding directly for food assistance for needy families. Federal and State expenditures for food assistance will be \$4 billion (\$152 million General Fund) in 2001–02. This includes expenditures for school meal programs, senior nutrition programs, the Women, Infants, and Children program, the federal Food Stamp program, and the California Food Assistance Program (CFAP). I also support making CFAP a permanent program as part of this Budget.

I am also deleting 2.0 positions approved by the Legislature, in lieu of the proposed contract services, to provide administrative oversight and assistance to the Alameda County Child Welfare Services agency, because of the State's Formal Notice of Noncompliance issued to this county. Contract services are more appropriate because the work is time limited, the project is time sensitive, and filling positions for staff to be onsite in Alameda County may cause delays, which may have a negative impact on the State's ability to perform its responsibilities.

Item 5180-101-0001—For local assistance, Department of Social Services. I reduce this item from \$2,591,540,000 to \$2,590,243,000 by reducing:

(5.5) 97.20.004-Local Projects from \$3,782,000 to \$2,485,000;

and by deleting Provisions 12 and 13 and revising Provisions 14 and 16.

I am deleting Provision 12, which states legislative intent to fully fund CalWORKs Stage One and Stage Two child care services. The Budget fully funds Stage One and Stage Two child care and includes a \$153 million child care reserve to assure that sufficient funds are available if unanticipated needs arise after enactment of the budget.

I am deleting Provision 13, which states legislative intent to fully fund CalWORKs employment services. The Budget funds CalWORKs Employment Services at the current year level and includes a \$30.1 million reserve available for unanticipated needs in any program for which Temporary Assistance for Needy Families Block Grant funds are appropriated, including CalWORKs benefits, employment services, county administration, and child care costs.

I am making a technical veto to correct language in Provision 14 to conform the language to legislative actions that provided a \$6,500,000 General Fund augmentation for the ongoing support of foster children and Independent Living Program services for youth over 18 years. I am also deleting language referencing implementation of an Internet-based application to facilitate foster youth access to personal history record information because the \$1.5 million General Fund augmentation for this purpose was included in Item 5180-151-0001.

“14. Of the funds appropriated in this item, an amount not to exceed ~~\$8,000,000~~ \$6,500,000 shall be available for the ongoing financial support of foster children ; and Independent Living Program services for youth ~~beyond over the age of 18 years ; and implementation of an Internet-based Web application to facilitate foster youth access to their own personal history information upon the enactment of a statute establishing the program during the 2001–2002 Regular Session.~~”

I am revising Provision 16 to delete certain legislative augmentations for local projects. These reductions are necessary due to fiscal constraints and limited resources in the General Fund. I am sustaining \$2,560,000 in this item for local projects on a one-time basis. I revise Provision 16 as follows to conform to these reductions:

- “16. Of the funds appropriated in this item, ~~\$3,782,000~~ \$2,485,000 shall be for the following projects:
- (a) CARECEN: Renovation of New Headquarters (100,000)
 - (b) Catholic Charities of Los Angeles: Guadalupe Center in Canoga Park, Renovation (150,000)
 - (c) Community Development Council of Orange County: New Food Delivery Trucks for Food Bank ~~(68,000)~~ (35,000)
 - (d) County of Sonoma: Valley of the Moon Children’s Home—Construction of New Facility (250,000)
 - (e) County of Sonoma: Valley of the Moon Children’s Home—Construction of New Facility (500,000)
 - (f) Feedback Foundation Anaheim: Capital Goods for Senior Food Bank ~~(100,000)~~ (50,000)
 - (g) Highlands Pre-school and Childcare Center, Infant Toddler Program for Working Poor (50,000)
 - (h) People Assisting the Homeless (PATH) Los Angeles: Program Outreach (75,000)
 - (i) Wellspring Women’s Center: Purchase of New Energy Efficient Heating Unit (25,000)
 - (j) Pomona Valley Center for Community Development: After-School Care Program at the Pomona Valley Center for Community Development ~~(89,000)~~ (50,000)
 - (k) Latin American Civic Association: Headstart ~~(200,000)~~ (50,000)
 - ~~(l) New Economies for Women: Construction of Community Educational Center for the La Posada Housing Project, New Economies for Women (NEW) (250,000)~~
 - (m) City of Milpitas: Expansion of the Milpitas’ “stay and play” Program (75,000)
 - (n) City of Burbank: Childcare Demonstration Project ~~(80,000)~~ (40,000)
 - (o) El Centro del Pueblo: For case management and after school services in conjunction with the family development network collaboration ~~(190,000)~~ (75,000)
 - (p) Mid-Valley YMCA: Mid Valley YMCA Afterschool Childcare program (50,000)

- (q) Women's Shelter of Long Beach: Transitional Shelter for Domestic Violence Victims & Families (~~75,000~~) (60,000)
- (r) Toberman Settlement House: Capitol Development Program (50,000);
- (s) Valley of the Moon: Children's Home (100,000)
- (t) First A.M.E. Church: First A.M.E. Church Welfare-to-Work Program in Los Angeles (~~350,000~~) (225,000)
- (u) Mothers in Action: Mothers in Action Program in Los Angeles (~~250,000~~) (25,000)
- (v) Valley of the Moon: Children's Home (100,000)
- (w) Ward Family Life Programs: Domestic Violence and Health and Well-Being Programs (~~250,000~~) (200,000)
- (x) Al Wooten, Jr. Heritage Center: Domestic Violence and Health and Well-Being Programs (~~100,000~~) (70,000)
- (y) City of Springville: Springville Community Preschool and Childcare playground (25,000)
- (z) City of Oceanside: Middle School After School Programming (50,000)
- (aa) City of Twentynine Palms: Knott's Sky Park pre-School (50,000)
- (ab) Mexican American Opportunities Foundation: Cargo Van; Mexican American Opportunities Foundation (30,000)
- (ac) Clara Mateo Alliance, Inc.: Homeless Women and Children's Day Service Center (~~100,000~~) (80,000) "

Item 5180-141-0001—For local assistance, Department of Social Services. I reduce this item from \$405,197,000 to \$400,997,000 by reducing:

(2) 16.85-Automation Projects from \$254,425,000 to \$248,319,000;

(4) Amount payable from the Federal Trust Fund (Item 5180-141-0890) from $-\$557,599,000$ to $-\$555,693,000$;

and by deleting Provision 10.

I am reducing this item by \$3,226,000 (\$1,700,000 General Fund) to reduce funding for Statewide Automated Welfare System (SAWS) oversight. This action is necessary to protect other vital programs and to provide for a prudent General Fund reserve for economic uncertainties. In addition, each of the SAWS projects includes funding and staff for oversight activities. I am directing the Department of Social Services (DSS) and the Health and Human Services Agency Data Center (HHSDC) to jointly re-evaluate the role of the SAWS Oversight Committee, the HHSDC, the DSS, and the Department of Information Technology in overseeing the SAWS projects, and to phase the SAWS Oversight Committee out to the extent it is duplicative.

I am reducing this item by \$500,000 for Statewide Fingerprint Imaging System implementation activities. This action is necessary to provide for a prudent General Fund reserve for economic uncertainties. I am sustaining \$11.7 million General Fund to complete the implementation of this system and begin ongoing maintenance and operations in 2001-02.

I am reducing this item by \$1,000,000 for Welfare Client Data System implementation activities. This action is necessary to provide for a prudent General Fund reserve for economic uncertainties. I am sustaining \$81.8 million to continue the implementation of this system in 2001-02.

I am reducing this item by \$1,380,000 (\$1,000,000 General Fund) for Consortium IV implementation activities. This action is necessary to provide for a prudent General Fund reserve for economic uncertainties. I am sustaining \$78.6 million to continue the implementation of this system in 2001-02.

I am deleting Provision 10, which requires the DSS to submit a report to the Legislature with options for an automatic transitional food stamp benefit for former CalWORKs recipients for up to three months after the recipient leaves cash assistance. The transitional benefit proposal would expand federal Food Stamp and California

Food Assistance Program eligibility and result in additional General Fund costs for benefit payments and county administration.

Item 5180-141-0890—For local assistance, Department of Social Services. I reduce this item from \$557,599,000 to \$555,693,000.

I am reducing this item by \$1,906,000 to conform to actions taken in Item 5180-141-0001.

Item 5180-151-0001—For local assistance, Department of Social Services. I reduce this item from \$737,672,000 to \$726,494,000 by reducing:

- (1) 25.25-Children's Services from \$1,789,208,000 to \$1,781,613,000;
 - (a) 25.25.010-Child Welfare Services from \$1,674,066,000 to \$1,672,671,000;
 - (b) 25.25.020-Adoptions Program from \$89,159,000 to \$88,959,000;
 - (c) 25.25.030-Child Abuse Prevention from \$25,983,000 to \$19,983,000;
- (2) 25.35-Special Programs from \$126,995,000 to \$122,917,000;
 - (a) 25.35.010-Specialized Services from \$8,944,000 to \$5,644,000;
 - (e) 25.35.050-County Services Block Grant from \$92,304,000 to \$91,526,000;
- (6) Amount payable from the Federal Trust Fund (Item 5180-151-0890) from -\$1,136,637,000 to -\$1,136,142,000;

and by revising Provisions 6 and 10.

I am deleting \$400,000 General Fund and \$495,000 Federal Trust Fund for Child Welfare Services Case Management System staff development in order to maintain a prudent reserve for economic uncertainties. As the Department has the ability to prioritize the efforts of the training program, I am directing it to give primary attention to the most urgently needed training in order to minimize the impact of the reduction.

I am deleting \$500,000 General Fund for the Supportive and Therapeutic Options Program due to fiscal constraints and limited resources in the General Fund. It is my intent that no child be removed from this program and that savings will occur from attrition. Additionally, counties are projected to receive \$1.1 billion in State-Local Realignment funding for community mental health services, which can be used for children receiving Child Welfare Services as well as for children and youth at-risk of placement in exiting foster care.

I am deleting the \$200,000 General Fund legislative augmentation to fund criminal background checks for adoptive applicants at the time of application, rather than reimbursing only those individuals who adopt, upon completion of an adoption. The Budget includes \$872,000 (\$436,000 General Fund) to reimburse adoptive parents for nonrecurring adoption expenses. I cannot support this augmentation due to fiscal constraints and limited resources in the General Fund.

I am deleting \$1,000,000 General Fund for the Child Abuse Prevention, Intervention and Treatment program County Third Party Contracts, and retaining \$13,395,000 General Fund to provide prevention and intervention services for children at risk of abuse or neglect. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I take this action as a matter of consistency because the discretionary programs for nearly all State departments funded from the General Fund have been reduced similarly.

I am deleting \$5,000,000 General Fund retained by the Legislature for the Juvenile Crime Prevention programs. The May Revision proposed the elimination of \$9.7 million General Fund for these programs due to fiscal constraints and limited resources in the General Fund. The Budget includes a separate \$116.3 million General Fund appropriation for comprehensive multi-agency responses to juvenile crime, which is a continuation of a continuum of prevention and rehabilitation services, designed and operated at the local level and administered by the Board of Corrections.

I am reducing funding for the Special Circumstances Program by \$3,300,000 General Fund. I support the services provided by this program; however, expenditures

in this program over the last several years have approximated only 78 percent of the amount available for benefit payments. I am reducing the funding for payments under this program by \$1,300,000. Additionally, changes to this program included in Budget trailer bill language would streamline the administrative determinations process and reduce the program's administrative costs. Consequently, I expect an additional \$2,000,000 General Fund savings related to administration of the program.

I am reducing funding for the County Services Block Grant basic costs by \$778,000 General Fund. The May Revision proposed a reduction of \$11.2 million (\$5.9 million General Fund); however, the Legislature retained \$778,000 General Fund of this amount to cover Non-Medical Out-of-Home Care administrative costs. I believe that the retained funding of \$20.7 million (\$11.3 million General Fund) will be sufficient to cover these costs and meet federal SSI program requirements.

I am revising this item by making a technical veto to correct language in Provision 6, to conform to the legislative actions that provided \$74,300,000 General Fund for the augmentation to Child Welfare Services.

"6. Of the amount appropriated in this item, ~~\$124,874,000~~ *\$123,834,000* shall be provided to counties to fund additional child welfare service activities and shall be allocated based on child welfare services caseload and county unit costs. However no county shall receive less than \$100,000. These funds shall be expressly targeted for emergency response, family reunification, family maintenance and permanent placement services and shall be used to supplement, and shall not be used to supplant, child welfare services funds. A county is not required to provide a match of the funds received pursuant to this provision if the county appropriates the required full match for the county's child welfare services program exclusive of the funds received pursuant to this provision. These funds are available only to counties that have certified that they are fully utilizing the Child Welfare Services/Case Management System (CWS/CMS) or have entered into an agreed upon plan with the State Department of Social Services outlining the steps that will be taken to achieve full utilization. The department shall reallocate any funds that counties choose not to accept under this provision, to other counties based on the allocation formula specified in this provision.

The department, in collaboration with the County Welfare Directors Association and representatives from labor groups representing social workers, shall develop the definition of full utilization of the CWS/CMS, the method for measuring full utilization, the process for the state and counties to work together to move counties toward full utilization, and measurements of progress toward full utilization."

I am revising this item by making a technical veto to correct language in Provision 10, to conform to the language to legislative actions that provided a \$1,500,000 General Fund augmentation for development and implementation of a pilot Internet-based Health and Education Passport in the County of Los Angeles.

"10. Of the funds appropriated in this item, ~~\$2,000,000~~ *\$1,500,000* shall be for the pilot of the Internet based Health and Education Passport in the County of Los Angeles, to collect and maintain health and education records for children in the foster care system, as required by Section 16010 of the Welfare and Institutions Code. Of this amount, the Department of Finance may transfer up to \$500,000 to Item 5180-001-0001 for support of the State Department of Social Services, to provide technical assistance in preparation of the Advance Planning Document, provide Independent Verification and Validation to ensure SACWIS compliance, and to ensure that the project meets federal and state guidelines and privacy requirements."

Item 5180-151-0890—For local assistance, Department of Social Services. I reduce this item from \$1,136,637,000 to \$1,136,142,000.

I am reducing this item by \$495,000 to conform to the actions taken in Item 5180-151-0001.

Item 5240-001-0001—For support of Department of Corrections. I reduce this item from \$4,246,968,000 to \$4,241,601,000 by reducing:

(1) 21-Institution Program from \$3,250,387,000 to \$3,245,770,000;

(3) 31-Community Correctional Program from \$433,438,000 to \$432,688,000; and by deleting Provision 11.

I am deleting the \$750,000 legislative augmentation for a Global Positioning Satellite System pilot project. The benefits of this technology in enhancing public safety have not been sufficiently demonstrated to justify the cost.

I am deleting Provision 11 to conform to this action.

I am deleting the \$617,000 legislative augmentation to increase the uniform allowance for correctional supervisors because this issue would be more appropriately addressed through negotiations with the Department of Personnel Administration.

I am deleting the \$4,000,000 augmentation for operating costs associated with the proposed retrofit of backup electrical generators at Department of Corrections institutions. Since the proposed retrofit will not occur this fiscal year, this augmentation is no longer necessary.

Item 5460-001-0001—For support of Department of the Youth Authority. I reduce this item from \$299,703,000 to \$298,768,000 by reducing:

(1) 20-Institutions and Camps from \$313,750,000 to \$312,815,000.

I am deleting \$935,000 of the augmentation in the January Budget for deferred maintenance projects, leaving \$5,000,000 to address this need. This action is essential due to fiscal constraints and limited resources in the General Fund.

Item 6110-001-0001—For support of Department of Education, I reduce this item from \$51,519,000 to \$50,445,000 by reducing:

(1) 10-Instruction from \$57,754,000 to \$57,355,000;

(2) 20-Instructional Support from \$67,528,000 to \$67,189,000;

(4) 41.00-Executive Management and Special Services from \$8,197,000 to \$8,077,000;

(5) 41.01-State Board of Education from \$2,041,000 to \$1,541,000;

(7.6) 97.20.004.001-Local Projects from \$575,000 to \$560,000; and

(9) Amount Payable from Federal Trust Fund (6110-001-0890) from -\$109,660,000 to -\$109,361,000

I am deleting the legislative augmentation of \$100,000 in Schedule (1) and eliminating one position to support the Apprenticeship program. While I am supportive of the Apprenticeship program, the need for an additional position has not been justified. I would also note that the Budget maintains a \$1,944,000 augmentation for this program.

I am reducing Schedule (2) for the legislative augmentation of \$213,000 and 0.9 personnel years for the Standardized Testing and Reporting and High School Exit Exam Workbook Program. The workload associated with the Workbook Program will be performed mainly by the contractor. Therefore, I cannot support providing additional funding for the Department of Education. I am deleting Provision 26 to conform to this action.

I am reducing Schedule (2) by \$1,000 and eliminating 26.7 vacant personnel years. I share the concern raised by various legislators that several departments have excess and unnecessary position authority in their respective budgets. The elimination of these vacant positions will have no adverse affect on workload or educational services

provided. Lastly, this action is consistent with the overall statewide policy regarding excess vacant positions being implemented in other departments with excessive salary savings.

I am reducing Schedule (2) by \$125,000 and one position for the legislative augmentation to provide technical assistance relative to compliance with the Student Safety and Violence Prevention Act (Chapter 587, Statutes of 1999). This Act strengthened California's nondiscrimination policy by conforming the Education Code to other state constitutional and Penal Code provisions. The department's staffing already includes 15 positions for school safety-related programs, which are available to absorb any workload increase associated with this program. I am deleting Provision 35 to conform to this action.

I am reducing Schedule (4) by \$120,000 and one position to eliminate the legislative augmentation for a development officer to leverage private support for education and to make a \$20,000 technical correction. The Department's staffing should provide adequate resources to respond to inquiries from parties interested in supporting California's educational programs.

I am reducing Schedule (5) by \$500,000 for distributing human rights and genocide model curriculum to all schools in the State. This action is necessary to provide for a prudent General Fund reserve for economic uncertainties. In addition, school districts can already use their general apportionment or other funds to obtain the model curriculum. I am deleting Provision 30 to conform to this action.

I am sustaining the \$60,000 of the \$75,000 proposed in Schedule (7.6), for the legislative augmentation provided to the Department of Education for the Weekend Parental Involvement Pilot Program on a one-time basis.

I am sustaining the \$500,000, in Schedule (7.6), for the legislative augmentation provided to the Department of Education for the Pupil Athletic Access and Safety Program Pilot Project on a one-time basis.

I am reducing Schedules (1) and (9) by \$299,000 to conform to the actions taken in Item 6110-001-0890.

Item 6110-001-0890—For support of Department of Education. I reduce this item from \$109,660,000 to \$109,361,000 and delete Provision 14.

I am deleting the legislative augmentation of \$299,000 and 3 positions in the State Department of Education, intended to assist with the allocation of any specified federal technology funds received. The budget provides an increase of \$850,000 for the California Technology Assistance Project specifically to help school districts take full advantage of available federal funds. If California receives any increased federal funds, I suggest that they be used to supplement any existing available funds for additional technology equipment in schools.

I am deleting Provision 14 to conform to this action.

Item 6110-006-0001—For support of Department of Education (Proposition 98). I reduce this item from \$34,483,000 to \$33,483,000 by reducing:

- (1) 10.60.040-Instruction, State Special Schools from \$39,370,000 to \$38,370,000:
- (b) 10.60.040.002-School for the Deaf, Fremont from \$14,347,000 to \$13,347,000,

and by deleting Provision 3.

I am deleting the \$1,000,000 legislative augmentation provided to the California School for the Deaf in Fremont. I am aware of the staffing issues in the Fremont area associated with comparable pay and cost of living. However, this augmentation is not the appropriate means of addressing the issue of equitable pay for staff at the State Special Schools. I also note that the Department of Personnel Administration is already working to address this issue to provide a long term and more viable solution.

I am deleting Provision 3 to conform to this action.

Item 6110-101-0001—For local assistance, Department of Education (Proposition 98). I reduce this item from \$4,559,000 to \$2,934,000 and revise Provision 1.

I am reducing local projects by \$1,625,000. This action is essential due to fiscal constraints and limited resources in the General Fund. The individual projects remaining in this item are being sustained on a one-time basis.

Additionally, I am reducing the \$1,000,000 augmentation for the National Hispanic University by \$300,000. The remaining \$700,000, in combination with \$250,000 I am sustaining in a separate item, will be used toward the purchase of additional land for this unique university. This university serves the entire state of California in its mission to educate bilingual teachers and to increase the number of math, science and technology degrees granted. I also note that a technical error was made in designating these funds as Proposition 98. I request the Department of Finance to inform the State Controller that the \$700,000 appropriated for this purpose will not be so designated in our official calculation of the guarantee.

“1. The funding in this item shall be allocated for the following local projects:

- (a) San Fernando Middle School: Renovation of the San Fernando Middle School Auditorium (~~500,000~~) (350,000)
- (b) Mount Pleasant School District—National Hispanic University Lease Purchase Agreement (~~1,000,000~~) (700,000)
- (c) Elk Grove Unified School District: Elk Grove Community Pool (50,000)
- (d) Fremont Elementary School, Santa Ana Unified School District: Fremont Elementary School playground equipment (~~58,000~~) (30,000)
- (e) Gilbert Elementary School, Garden Grove Unified School District: Gilbert Elementary School playground equipment (~~110,000~~) (40,000)
- (f) Jackson Elementary School, Santa Ana Unified School District: Jackson Elementary School playground equipment (~~80,000~~) (55,000)
- (g) Lennox School District: Purchase computers (~~125,000~~) (75,000)
- (h) Rancho Cordova Elementary School: Rancho Cordova Elementary School playgrounds (50,000)
- (i) Rancho Cordova High School: Light fixtures (25,000)
- (j) Sunnyvale Elementary School District: Program funds for Project H.E.L.P (100,000)
- (k) Fremont Union High School District: Digital Divide Scholarship Program (~~100,000~~) (75,000)
- (l) East Side Union High School District: Laptops for under-achieving 9th graders (~~50,000~~) (47,000)
- (m) Los Angeles Unified School District: Health clinic at San Fernando High School (~~200,000~~)
- (n) Merced Union High School District, Education Foundation: Construction of Golden Valley Pool (~~250,000~~) (172,000)
- (o) Merced Union High School District: Buhach High School Aquatic Facility (~~250,000~~) (190,000)
- (p) Ceres Unified School District: Ceres High School Performing Arts Center (~~250,000~~) (100,000)
- (q) Alameda Unified School District: Woodstock Child Development Center (~~100,000~~) (65,000)
- (r) East San Gabriel Valley Regional Occupational Program: East San Gabriel Valley Occupational Program and Technical Center (75,000)
- (s) Alhambra Unified School District: Mark Keppel High School HVAC system repair and improvement (250,000)
- (t) Fremont Unified School District: Renovation of the Tak Fudenna Stadium (50,000)

- (u) Glendale Unified School District: Latino Student Initiative Program (~~80,000~~) (40,000)
- (v) Glendale Unified School District: Middle School Technology Lab Program (~~75,000~~) (35,000)
- (w) Verdugo Hills High School: Equipment (~~31,000~~) (20,000)
- (x) Mountain Avenue Elementary School: Computers (~~25,000~~) (15,000)
- (y) Pasadena Unified School District: Greening Project (~~25,000~~) (20,000)
- (z) Long Beach Unified School District, Los Angeles County Office of Education COE (~~\$250,000~~) each to LBUSD and LACOE): Augmentation for specialized secondary schools: California Academy of Math and Science (CAMS) and Los Angeles County High School for the Arts (LACHSA) (~~100,000~~)
- (aa) Long Beach Unified School District: Request for matching funds for district's participation in Malcolm Baldrige National Quality Program (50,000)
- (ab) Sacramento City Unified School District: Didion/Lewis Park Multi-Use Recreational Center (~~175,000~~) (65,000)
- (ac) Sacramento Unified School District: After School Arts and Education Program (Public/Private partnerships for arts education through Sacramento City Unified School District) (~~75,000~~) (40,000)
- (ad) Golden Valley Unified School District: Safe routes for travel to schools (~~100,000~~)
- (ae) Simi Valley Unified School District: Joint-use tennis courts (100,000)
- (af) Lennox Middle School: Lennox Middle School scholarship program (50,000)"

Item 6110-104-0001—For local assistance, Department of Education (Proposition 98). I revise this item by deleting Provision 6.

I am deleting Provision 6 of this item, which would authorize the use of up to \$10 million from any potential savings during 2001–02 to be allocated for supplemental instruction transportation in 2002–03. School districts receive funds for supplemental instruction along with a variety of categorical programs and their general apportionment, all of which can be used to meet the costs of instruction, including transportation. In addition, this provision would result in significant pressure to provide future increases for this purpose without any regard to the availability of resources already provided by the State.

Item 6110-156-0001—For local assistance, Department of Education (Proposition 98). I reduce this item from \$610,706,000 to \$600,706,000 by reducing:

- (1) 10.50.010.001-Adult Education from \$574,705,000 to \$564,705,000, and by deleting Provisions 6 and 7.

I am reducing the \$10,000,000 augmentation for the Adult Education program to better reflect estimated participation. As this program historically has not spent its entire budget allocation, the revised amount will be sufficient to maintain the existing level of service delivery. Even with this reduction, the Adult Education program experienced an increase of 4.7 percent above the current year total.

I am deleting Provisions 6 and 7 that would reallocate unexpended 2000–01 Adult Education funds for program increases. Existing audit findings, related to concurrent enrollment, need to be resolved prior to considering Adult Education funding increases. The Superintendent of Public Instruction currently has the authority to allocate any unused funding to school districts that can demonstrate a need to fund additional students. Finally, I am concerned that this proposal increases the revenue limit without enhancing either accountability or performance.

Item 6110-161-0890—For local assistance, Department of Education. I reduce this item from \$667,190,000 to \$664,818,000 by reducing:

- (4) 10.60.050.021-IDEA, Capacity Building, Special Education from \$43,828,000 to \$41,456,000,

and by deleting Provision 12.

I am deleting the \$2,372,000 legislative augmentation provided to expand the existing Quality Assurance and Focused Monitoring Pilot Program. I share the desire to improve results for all children, especially those with disabilities. However, my Budget already provides \$1,420,000 for local assistance grants in the third year of the Quality Assurance and Focused Monitoring Pilot Program, and it would not be prudent to provide additional funds for this purpose until the tangible results from existing efforts are reviewed and best practices are identified.

I am deleting Provision 12 to conform to this action.

Item 6110-193-0001—For local assistance, State Department of Education (Proposition 98). I reduce this item from \$180,769,000 to \$180,464,000 by deleting:

- (8) 20.60.113-Instructional support: Substitute Teacher Training Program (\$305,000).

I am deleting the \$305,000 legislative augmentation, contained in Schedule 8, for a program to provide professional development training to substitute teachers. I believe it is important to concentrate State resources on serving permanent instructional staff, many of whom have not yet had an opportunity to participate in state-funded professional development efforts. In addition, information regarding the scope and duration of the training that this augmentation would fund is lacking.

Item 6110-196-0001—For local assistance, Department of Education (Proposition 98). I reduce this item from \$1,319,668,000 to \$1,309,168,000 by reducing:

- (1) 30.10.020-Child Care Services from \$1,665,473,000 to \$1,654,973,000;
- (f) 30.10.020.012-Special Program, Child Development, Alternative Payment Program Stage 3 from \$214,326,000 to \$203,826,000.

The Legislature's addition of \$33,500,000 in Subdivision (26) of Item 6110-485, in combination with actions taken to redirect \$32,508,000 of one-time funding earmarked for child care facilities in Provision 2 (c) of this Item constitute a legislative augmentation of over \$66 million for additional child care subsidies for former CalWORKs families who have exhausted eligibility in Stages 1 and 2. Those augmentations were predicated on the May Revision's \$280 million estimate as the amount needed to fully fund all estimated Stage 1 and 2 caseload that would time out off of their two-year transitional subsidized child care benefit through the budget year. However, the Stage 3 estimate has subsequently been revised downward by \$20 million based on 3rd quarter data recently received from the State Department of Education. Based on this revised estimate and consistent with the Administration's interest in reforming the State's child care subsidy system, I am reducing \$10.5 million from this item as a base veto and eliminating the \$33.5 million one-time augmentation included in Subdivision (26) of Item 6110-485 for a total veto of \$44 million. These actions will still leave funding sufficient for all caseload, under current eligibility, co-payment and subsidy policies, that would become eligible for discretionary Stage 3 services prior to February 1, 2002. The Budget still results in an increase of over \$63 million from the prior year for this population for a total of approximately \$236 million. I am, however, setting \$24 million aside in the Proposition 98 Reversion Account for additional services through the remainder of the 2001-02 fiscal year contingent upon enactment of legislation by January 31, 2002, to reform the State's subsidized child care programs in a manner that meets my objectives to use the existing resources allocated for these programs more effectively and to revise inequitable access policies that currently disadvantage low-income populations who have not received public assistance through CalWORKs.

Item 6110-199-0001—For local assistance, Department of Education. I delete this item and Provision 1.

I am deleting the \$700,000 legislative augmentation for child nutrition startup and expansion grants to community-based organizations and local government agencies. This action is necessary to provide for a prudent General Fund reserve for economic uncertainties. The Budget Act continues to provide \$1,000,000 for startup and expansion grants to local educational agencies.

I am deleting Provision 1 to conform to this action.

Item 6110-233-0001—For local assistance, Department of Education. I reduce this item from \$1,175,000 to \$550,000 and revise Provision 1.

I am deleting the \$25,000 legislative augmentation for the Soledad Enrichment Action, Inc.: Charter School Girls Academy (reference Provision 1 (b) in this Item). This action is essential due to fiscal constraints and limited resources in the General Fund.

I am reducing the \$400,000 augmentation for the National Hispanic University by \$150,000. The remaining \$250,000, in combination with \$700,000 I am sustaining in a separate item, will be used toward the purchase of additional land for this unique university. This university serves the entire state of California in its mission to educate bilingual teachers and to increase the number of math, science and technology degrees.

I am deleting the \$50,000 legislative augmentation for Ocean Institute Education (reference Provision 1 (e) in this Item). This action is essential due to fiscal constraints and limited resources in the General Fund. In addition, since the proposed funding amount would be insufficient to fully implement the project, greater future costs or pressures would likely result.

I am reducing the \$500,000 legislative augmentation for Save the Children's "Web of Support" by \$400,000 (reference Provision 1 (g) in this Item). This action is essential due to fiscal constraints and limited resources in the General Fund.

The individual projects remaining in this item are being sustained on a one-time basis.

I am revising Provision 1 to conform to this action:

"1. The funds in this item shall be allocated for the following local projects:

- (a) Building Up Los Angeles: Girls Today Women Tomorrow Mentoring Program (50,000)
- (b) Soledad Enrichment Action, Inc.: Charter School Girls' Academy (25,000)
- (c) The National Hispanic University: Purchase and construction of 11-acre campus for the only National Hispanic University in the Southwest that celebrates 20th anniversary in 2001 (~~400,000~~) (250,000)
- (d) CHIME Institute for Children with Special Needs: Construction of healthy buildings (100,000)
- (e) ~~Ocean Institute: Ocean Institute Education~~ (50,000)
- (f) Communities in Schools: Lockeford Computers (50,000)
- (g) Save the Children: Save the Children's "Web of Support" (~~500,000~~) (100,000)"

Item 6110-485—Reappropriation (Proposition 98) Department of Education. I revise this item from \$566,020,000 to \$466,102,000 as follows:

I am deleting Subdivision (26) for CalWORKs Stage 3 Child Care services.

Consistent with this Administration's interest in reforming the State's child care subsidy system, I am eliminating the \$33.5 million one-time augmentation included in Subdivision (26) of this Item for the purposes explained in my actions on Item 6110-196-0001.

I am reducing Subdivision (27) by \$2,500,000 as follows:

“(27) ~~\$8,000,000~~ \$5,500,000 to be set aside on a one-time basis pursuant to legislation enacted during the 2001–02 Regular Session for career/technical education services.”

The Legislature proposed setting aside \$8,000,000 from the Proposition 98 Reversion Account for career/technical education. I am reducing this amount by \$2,500,000, thereby sustaining \$5,500,000 for this program on a one-time basis. Although I am supportive of career/technical education, this action keeps state spending in line with revenues and provides for a prudent General Fund reserve for economic uncertainties. I am amending Subdivision (27) to conform to this action.

I am reducing Subdivision (36) by \$1,750,000 as follows:

“(36) ~~\$2,250,000~~ \$500,000 to the State Department of Education to allocate to school districts for one-time costs associated with the English Language Development Test.”

I am reducing by \$1,750,000 the \$2,250,000 legislative augmentation for one-time costs associated with the English Language Development exam. I am sustaining \$500,000 to fund district apportionments for an estimated 333,000 English Language Learners expected to enter the California public school system in 2001–02. These students are required to be assessed under State law within 30 days of enrollment. I am supportive of this assessment, which is aimed at measuring English Language Proficiency of English Language Learners, which will assist in the appropriate placement of these students.

I am deleting Subdivisions (28), (29), (34), and (38) as follows:

I am deleting the legislative augmentation of \$26,468,000 in Subdivision (28) in this item to the State Department of Education for the Year Round School Grant Program. These funds were requested to address the impact of unintended consequences to the Year Round School Grant Program resulting from the enactment of Chapter 407, Statutes of 1988 (SB 50, Greene). However, given the State’s fiscal condition, I believe it would be more appropriate to correct the inequities imposed by this program through legislation, thus eliminating cost pressures to the State.

I am deleting the legislative augmentation of \$32,300,000 in Subdivision (29) in this item to the State Department of Education (SDE) for the purpose of funding a current year augmentation for the K–3 Class Size Reduction (CSR) Program. The SDE provided the CSR Program with a cost-of-living adjustment in excess of the rate provided by the Legislature and the Administration in the Budget Act of 1998, resulting in a lack of base funding in 2000–01. Given that the SDE has provided a rate in excess of that provided by the Legislature and the Administration, a more appropriate solution for this issue would be for the SDE to correct the current year per pupil rate, and then recalculate program costs to determine the actual amount required for this program.

I am deleting Subdivision (34) of this item, which would provide a \$400,000 legislative augmentation to funds available for transportation costs associated with supplemental instruction. School districts receive funds for supplemental instruction along with a variety of categorical programs and their general apportionment, all of which can be used to meet the costs of instruction, including transportation. In addition, this provision would result in significant pressure to provide future increases for this purpose without any regard to the availability of resources already provided by the State.

I am deleting Subdivision (38) of this item for the reappropriation of \$3,000,000 that is set aside for a management information system for Regional Occupational Centers and Programs pursuant to the enactment of legislation during the 2001–02 Regular Session. Any funds for this purpose are premature pending the completion of a data management study and approval of a feasibility study report for the Department of

Education. Upon approval, funding for this system should be sought through the annual budget process.

Item 6110-490—Reappropriation, Department of Education. I revise this item by reducing Schedule (1) by \$450,000 and deleting Schedule (2).

I am reducing by \$450,000 the \$950,000 legislative reappropriation for the legal defensibility of the High School Exit Exam in Item 6110-001-0001, Budget Act of 2000. This action is necessary to keep State spending growth in line with revenues and provide for a prudent General Fund reserve for economic uncertainties. The \$500,000 remaining should be sufficient to cover costs during the year, as it is the amount expended during the prior year.

I am deleting the \$250,000 legislative reappropriation for an evaluation of the Public Schools Accountability Act in Item 6110-001-0001, Budget Act of 2000. The Budget will still contain \$500,000 in base funding which I believe to be sufficient to cover the costs associated with this evaluation.

I am revising Schedule (1) as follows and deleting Schedule (2) to conform to these actions:

“(1) ~~\$950,000~~ \$500,000 from Item 6110-001-0001 of the Budget Act of 2000 (Ch. 52, Statutes of 2000). These funds shall be used for the purposes of ensuring the legal defensibility of the High School Exit Examination, including its reliability and validity.”

Item 6110-495—Reversion, Department of Education, Proposition 98. I am revising this item by deleting Schedule 16.

I am deleting Schedule 16 that would revert \$17.5 million from the existing balance of the Child Care Facilities Revolving Fund in order to partially fund an augmentation of CalWORKs Stage 3 child care services on a one-time basis in Item 6110-485. I object to this reversion because it would limit the amount available to maintain adequate facilities for General Child Care and Preschool programs as well as for facilities which may be needed to support the CalWORKs center based pilot program which is designed to provide high quality, Title 5 compliant child care options for CalWORKs families receiving subsidized care. While I am setting aside \$24 million to partially restore the amount I have vetoed from the Proposition 98 Reversion Account in Schedule (26) of Item 6110-485, other actions I have taken on the Budget will leave sufficient resources available in the Proposition 98 Reversion Account to fulfill that commitment without the need for this reversion.

Item 6120-101-0001—For local assistance, California State Library. I reduce this item from \$410,000 to \$352,000 and revise Provision 1.

I am reducing \$58,000 of the \$410,000 legislative augmentation for local library projects due to fiscal constraints and limited resources in the General Fund. Specifically, I am reducing the legislative augmentation for the City of Oakland from \$100,000 to \$60,000, and for the La Canada-Flintridge project from \$75,000 to \$60,000.

I am revising Provision 1 to conform to this action:

“1. The funds appropriated in this item shall be allocated for local projects, *on a one-time basis*, as follows:

- (a) City of Oakland: African-American Museum and Library (~~100,000~~) (77,000)
- (b) City of La Canada-Flintridge-Joint Use Library for the City of La Canada-Flintridge and La Canada Unified School District (~~75,000~~) (40,000)
- (c) Westlake Village Library (10,000)
- (d) Agoura Hills Library (10,000)
- (e) City of Los Angeles: Woodland Hills Library (15,000)

(f) City of San Diego: Logan Heights Library (100,000)

(g) Yuba County Library (100,000)”

Item 6120-221-0001—For local assistance, California State Library. I reduce this item from \$56,870,000 to \$52,970,000.

I am reducing this item by \$3,900,000. This action is essential due to fiscal constraints and limited resources in the General Fund.

Item 6440-001-0001—For support of University of California, I reduce this item from \$3,217,468,000 to \$3,191,176,000 by reducing:

(1) Support from \$3,079,171,000 to \$3,055,161,000;

(2) Charles R. Drew Medical Program from \$10,949,000 to \$8,949,000;

(13) Local Projects from \$600,000 to \$318,000;

and by revising Provisions 10, 16, 21, 23, 24, and 34 and deleting Provisions 27, 28, 29, 31, and 32.

I am sustaining the \$5,000,000 legislative augmentation for clinical teaching support at the university’s medical centers, neuropsychiatric institutes, and dental clinics. However, I am supporting this augmentation on a one-time basis, given fiscal constraints and limited resources in the General Fund.

I am deleting the \$100,000 legislative augmentation to establish the Walter H. Capps Center for the Study of Religion and Public Life at the Santa Barbara campus. This action is necessary to keep State spending growth in line with revenues and provide for a prudent General Fund reserve for economic uncertainties. Furthermore, the University can use other funding sources for the Center if it is a high priority. I am deleting Provision 27 to conform to this action.

I am deleting the \$1,500,000 legislative augmentation to establish the Silicon Valley Center, an off-campus center of the Santa Cruz campus. It would be premature to provide funds for this purpose prior to approval of this off-campus center by the California Postsecondary Education Commission. After the center has been approved, any requests for funds should be submitted through a budget change proposal as part of UC’s annual budget request. I am deleting Provision 28 to conform to this action.

I am deleting the \$2,000,000 legislative augmentation to expand student services. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I take this action to provide for a prudent General Fund reserve for economic uncertainties.

I am deleting the \$1,000,000 legislative augmentation for the UCLA Center for the Study of Latino Health and Culture. This action is necessary to provide for a prudent General Fund reserve for economic uncertainties. I believe the University can use other fund sources for this Center if it is a high priority. I am deleting Provision 31 to conform to this action.

I am deleting the \$2,000,000 legislative augmentation for the Charles R. Drew Medical Program. This action is necessary to keep State spending growth in line with revenues and provide for a prudent General Fund reserve for economic uncertainties. After this action, funding for this program remains at \$8,949,000.

I am reducing the \$600,000 legislative augmentation for various local projects by \$282,000. I am sustaining the remaining \$318,000 on a one-time basis. This action is essential due to fiscal constraints and limited resources in the General Fund. I am revising Provision 34 to conform to this action:

“34. The funds appropriated in Schedule (13) of this Item shall be allocated for the following local projects:

(a) ~~UC: UC Ag Research Center, Monterey (200,000)~~

(b) University of California Los Angeles Advance Policy Institute: Creation of Internet Resource: “Living Independently in LA” (100,000)

- (c) University of California, San Francisco, Center for Lesbian Health Research (100,000)
- (d) University of California: UC Ag Extension in Monterey County (~~200,000~~) (118,000) ”

I am deleting the \$1,500,000 legislative augmentation for graduate and professional school outreach. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. This action is necessary to provide for a prudent General Fund reserve for economic uncertainties. After this action, funding for this program remains at \$3,200,000, in addition to \$2,000,000 in matching university funds. I am deleting Provision 32 to conform to this action.

The following base reductions are essential due to fiscal constraints and limited resources in the General Fund. I take these actions as a matter of consistency because the discretionary budgets for nearly all State departments funded from the General Fund have been reduced similarly:

The \$3,000,000 I proposed to fund Invasive Species Research.

The \$3,000,000 I proposed to increase student services. I am deleting Provision 29 to conform to this action and my previous action to eliminate a \$2 million legislative augmentation for this purpose.

The \$1,100,000 I proposed to expand ASSIST-Articulation System Stimulated Inter-Institutional Student Transfer.

The \$4,000,000 I proposed to continue genetic biomarker research, originally conducted by the March of Dimes. These funds were intended to be one-time in 2000–01, and were erroneously proposed in the 2001–02. I am revising Provision 23 to conform to this action:

“23. Of the amount appropriated in Schedule (1), ~~\$9,000,000~~ \$5,000,000 is to fund the Medical Investigation of Neurodevelopmental Disorders (MIND) Institute, including ~~\$7,500,000~~ \$3,500,000 for research ; of which at least \$4,000,000 is for genetic marker research .”

The \$4,000,000 I proposed on a one-time basis to expand Internet2. After this action, the Budget still contains \$14 million on a one-time basis to continue Internet2 connectivity for UC campuses, and \$8 million in permanent funds, including funds to continue my commitment to provide Internet2 linkages between universities in California and Mexico to enhance collaboration among researchers, teachers, and students. I am revising Provision 24 to conform to this action:

“24. Of the amount appropriated in Schedule (1), \$32,000,000 is for Internet connectivity and network infrastructure to grades K–12 schools and county offices of education, and ~~\$18,000,000~~ \$14,000,000 is available, on a one-time basis, for Internet2 connectivity and infrastructure for UC campuses.”

I am deleting the \$2,000,000 base funding for outreach programs. After this action, the University’s budget still includes \$44,753,000 for these programs. I am requesting that UC allocate this reduction within the various programs outlined in Provision 10, at its discretion, in a manner that would minimize any negative impact on outreach efforts, and to report to the Administration and the Legislature on the allocation of this reduction. I am revising Provision 10 to conform to this action:

“10. Of the amount appropriated in Schedule (1), ~~\$46,753,000~~ \$44,753,000 is provided for new and existing outreach programs that are aimed at improving the chances for pupils from a wide diversity of backgrounds to become eligible for the University of California, as follows:

- (a) The following amounts are for pupil academic development and school partnership programs and shall be matched on a one-to-one basis by the participating schools:

- (1) *Up to* \$17,500,000 is for pupil academic development programs, including MESA, Puente, and the Early Academic Outreach Program, so that these programs may increase the number of pupils who participate in the programs and may offer services such as college admissions test preparation programs, fee waivers for Advance Placement tests, and an increased number of field trips for high school and middle school participants to visit college campuses.
- (2) *Up to* \$10,000,000 is provided for K–12 school partnership programs to systemically reform partner schools in order to achieve long-term improvements in student success.
- (3) *Up to* \$1,000,000 is provided for pupil academic development programs and K–12 partnership programs in the Central Valley.
- (b) *Up to* \$4,500,000 is provided for services to community college students to promote transfer, particularly among community colleges with historically low transfer rates or a large proportion of disadvantaged students.
- (c) *Up to* \$1,000,000 is provided for informational outreach to pupils, families, and K–12 teachers and counselors.
- (d) *Up to* \$1,000,000 is provided for charter schools.
- (e) *Up to* \$3,200,000 is provided for systemwide graduate and professional school outreach, to be matched by \$2,000,000 in university funds.
- (f) *Up to* \$1,500,000 is provided for long-term evaluation of the effectiveness of outreach programs, including college graduation rates for pupils who participated in the K–12 programs, regardless of the college attended.
- (g) *Up to* \$4,553,000 over and above any funds provided under (a)(1) is provided to support MESA programs.
- (h) *Up to* \$2,500,000 is provided for recruitment and admission efforts intended to yield immediate short-term results, including *up to* \$750,000 to support campus efforts to move toward comprehensive assessment of freshmen applications, up to \$1,000,000 for student-initiated outreach activities focused on recruitment and mentorships aimed at high school juniors and seniors, and *up to* \$750,000 for other high-yield recruitment activities such as campus visits, phone banks, mailings, and student prep events. Of the \$750,000 appropriated to support campus efforts to move toward comprehensive assessment of freshmen applications, funding shall be provided to campuses contingent on the elimination of the two-tiered admissions system and the establishment of a unitary admissions review process.”

I am reducing the \$500,000 base funding for the Multi-campus Research Unit for Labor Studies. I am revising Provision 21 to conform to this action:

“21. Of the amount appropriated in Schedule (1), ~~\$6,000,000~~ \$5,500,000 shall be used for UC Berkeley/UCLA to support the Multi-campus Research Unit for Labor Studies.”

I am reducing \$310,000 base funding for substance abuse research. After this action, the budget still includes \$24,000,000 for this purpose. I am revising Provision 16 to conform to this action:

“16. Of the funds appropriated in Schedule (1), ~~\$24,310,000~~ \$24,000,000 is for substance abuse research at the University of California, San Francisco campus in the Neurology Department.”

Item 6610-001-0001—For support of California State University, I reduce this item from \$2,556,068,000 to \$2,535,208,000 by reducing:

- (1) Support from \$3,377,256,000 to \$3,357,006,000;
 - (2.5) 555005-Local Projects from \$910,000 to \$300,000;
- and by revising Provision 17, and deleting Provisions 15 and 16.

I am deleting the \$5,000,000 legislative augmentation for high cost programs. The University's budget includes full funding for enrollment increases at the agreed-upon "marginal cost" amount per full-time equivalent student. The marginal cost formula used to determine additional funding needed for enrollment growth addresses both high cost and low cost programs by providing an "average" marginal cost amount. The University has the discretion to decide how to allocate these funds to each particular program, whether it would be to provide the same amount to each program, or to provide additional funding for high cost programs and a lesser amount for lower cost programs. I am deleting Provision 16 to conform to this action.

I am deleting the \$250,000 legislative augmentation for the CSU Program for Education and Research in Biotechnology. This action is necessary to keep State spending growth in line with revenues and provide for a prudent General Fund reserve for economic uncertainties. I am deleting Provision 15 to conform to this action.

I am reducing the \$910,000 legislative augmentation for various local projects by \$610,000. I am sustaining the remaining \$300,000 on a one-time basis. These actions are essential due to fiscal constraints and limited resources in the General Fund. I am revising Provision 17 to conform to this action:

"17. The funds appropriated in Schedule (2.50) of this item shall be allocated for the following local projects:

- (a) California State University of San Bernardino: Projects to establish the Water Resource Institute (50,000)
- (b) California State University: CSUPERB Biotechnology Center-Pasadena. These funds shall be used for final site assessment and development of the Pasadena Bioscience Innovation and Training Center, and for development of a pilot bioinnovation workforce training program. The California State University will provide an update to the Legislature on the progress of this project during the 2002-03 budget deliberations (~~250,000~~) (200,000)
- (c) ESU: Portuguese Study Center (~~\$260,000~~)
- (d) ESU, Stanislaus: Portuguese Studies (250,000)
- (e) San Francisco State University: Seeing Art at Work: Celebrating a Century of Labor Art in Northern California (100,000)"

The following actions are essential due to fiscal constraints and limited resources in the General Fund. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. I take these actions as a matter of consistency because the discretionary budgets for nearly all State departments funded from the General Fund have been reduced similarly:

The \$2,000,000 reduction in base funding is for Agricultural Research. After this reduction, the budget still includes \$4 million for this purpose.

The \$12,500,000 reduction is for the Teacher Technology Professional Development Program. In the January Budget, I proposed an \$18.5 million augmentation for this program. After this action, the Budget still includes \$12.5 million, a \$6 million increase over 2000-01.

The \$500,000 reduction is for Marine Studies Research. In the January Budget, I proposed a \$1 million augmentation for this program. After this action, the Budget still includes a \$500,000 augmentation for this purpose.

Item 6610-491—Reappropriation, California State University. I delete this item.

I am deleting this reappropriation of \$2,000,000 General Fund from Item 6610-301-0001, Budget Act of 2000, for design and construction of the Center for Animal and Veterinary Science Education, Phase 1A at the California State University, Pomona campus. The campus has not defined the final scope of this project, and I believe this funding, instead, should be used to build a prudent General Fund reserve in light of fiscal constraints.

Item 6870-001-0001—For support of, Board of Governors of the California Community College (Proposition 98). I reduce this item from \$14,129,000 to \$13,379,000 by reducing:

- (1) 10- Apportionments from \$1,412,000 to \$1,326,000;
- (2) 20-Special Services and Operations from \$18,904,000 to \$18,490,000;
- (3) 30.01-Administration from \$5,459,000 to \$5,373,000;
- (4) 30.02-Administration—Distributed from –\$5,459,000 to –\$5,373,000;
- (4.5) 97.20.004-Local Projects from \$750,000 to \$500,000;

and by revising Provision 3 and deleting Provision 2.

I am deleting the \$86,000 augmentation and eliminating one position to support Compliance Review (\$42,000) and Legal Affairs (\$44,000). This action is necessary to keep State spending growth in line with revenues and provide for a prudent General Fund reserve for economic uncertainties.

I am deleting the \$414,000 augmentation to support Enrollment Management (\$109,000), Extended Opportunities Programs and Services (EOPS) and Cooperative Agencies Resources for Education (CARE) (\$80,000), and five-year facilities planning (\$125,000), and to collect baseline data for the Teacher and Reading Development Program (\$100,000). These actions are necessary to provide for a prudent General Fund reserve for economic uncertainties. I am deleting Provision 2 to conform to this action.

I am adjusting Schedules (3) and (4) by –\$86,000, and \$86,000, respectively, to conform with my earlier action to delete augmentations for Legal Affairs and Compliance Review.

I am reducing the \$750,000 legislative augmentation to contract for the operation of Community College Leadership Institute by \$250,000. I am sustaining the remaining funds on a one-time basis. This action is essential due to fiscal constraints and limited resources in the General Fund. I am revising Provision 3 to conform to this action.

“3. Of the funds appropriated in Schedule (4.5) of this item, ~~\$750,000~~ \$500,000 shall be available for the California Community Colleges to contract with an institution of higher education within California to operate a Community College Leadership Institute to coordinate education and training opportunities for community college faculty, classified staff, trustees, and administrators for leadership roles in California Community Colleges.”

Item 6870-101-0001—For local assistance, Board of Governors of the California Community Colleges (Proposition 98). I reduce this item from \$2,733,941,000 to \$2,608,341,000 by reducing:

- (4) 10.10.040-Partnership for Excellence from \$307,600,000 to \$300,000,000;
- (5) 20.10.005-Student Financial Aid Administration from \$18,149,000 to \$7,149,000;
- (6) 20.10.010-Extended Opportunity Programs and Services and Special Services from \$93,439,000 to \$91,439,000;
- (22) 20.30.050-Economic Development from \$50,172,000 to \$45,172,000;
- (23) 20.30.070-Transfer Education and Articulation from \$3,974,000 to \$1,974,000;

and by deleting:

- (24) 20.40.025-Scheduled Maintenance/Special Repairs (\$49,000,000);
- (25) 20.40.035-Instructional Equipment and Library Materials Replacement (\$49,000,000);

and by revising Provisions 1, 6, 9, 10, 23, 24 and 27 and by deleting Provisions 8, 25, and 26.

I am deleting the legislative augmentation of \$7,600,000 to provide the Partnership for Excellence program with a cost-of-living adjustment (COLA). Increased funding for this program should be based solely on the merits of improving student outcomes.

Furthermore, this funding would create a pressure on the State to provide a COLA for other discretionary programs.

I am deleting the legislative augmentation of \$2,000,000 for Extended Opportunity Programs and Services (EOPS) book grants. This augmentation is not necessary as current law allows colleges to use base EOPS funding for books grants if so desired. The budget provides \$79,663,000 for EOPS, which includes an augmentation of \$5,200,000. I am revising Provisions 9 and 10 to conform to this action.

“9. Of the funds appropriated in Schedule (6), ~~\$81,663,000~~ *\$79,663,000* is for Extended Opportunity Programs and Services in accordance with Article 8 (commencing with Section 69640) of Chapter 2 of Part 42 of the Education Code. Of this amount \$6,000,000 represents an augmentation and may only be allocated to serve 10,000 additional students over the number served in the 1999–2000 fiscal year. Funds provided in this item for Extended Opportunity Programs and Services (EOPS) shall be available to students on all campuses within the California Community College system, including those students on new campuses or in new districts. \$11,775,000 is for funding, at all colleges, the Cooperative Agencies Resources for Education (CARE) program in accordance with Article 4 (commencing with Section 79150) of Chapter 9 of Part 48 of the Education Code. The board of governors shall allocate funds on a priority basis and to local programs on the basis of need for student services.”

“10. Of the funds appropriated in Schedule (6), at least ~~\$7,000,000~~ *\$5,000,000* shall only be available to increase the amount of grants to students for purchasing books. In addition, these funds shall not supplant the amount of resources used for book grants by the community colleges in Extended Opportunity Programs and Services.”

I am deleting a \$5,000,000 augmentation to the Economic Development Program to provide additional Industry Driven Regional Collaboratives. These funds, instead, will be used to provide a set-aside of \$4 million for increased nursing enrollments, as well as \$1 million for curriculum development and pilot programs for training licensed nurses in specialty areas, pending enactment of legislation during the 2001–02 Regular Session. I am revising Provision 23 to conform.

“23. Of the funds provided in Schedule (22) of this item for the Economic Development Program:

- (a) No more than \$17,536,000 shall be allocated for grants for regional business resources assistance and innovation Network Centers.
- (b) No less than ~~\$21,387,000~~ *\$16,387,000* shall be allocated for Industry Driven Regional Education and Training Collaboratives. These grants shall be made on a competitive basis and the award amounts shall not be restricted to any predetermined limit, but rather shall be funded on their individual merits. ~~Of this allocation, \$5,000,000 shall only be available for additional regional collaboratives to address information technology, nursing and biotechnology workforce development services. These funds shall not supplant the amount of resources used in the 2000–01 fiscal year for regional collaboratives in the above-mentioned service areas.~~
- (c) No more than \$4,149,000 shall be allocated for statewide network leadership, organizational development, coordination, information and support services, or other program purposes.
- (d) \$5 million shall be available for Job Development Incentive Training programs focused on job creation for public assistance recipients. Any annual savings from this subdivision shall only be available for expenditure for one-time activities listed under subsection (j) of Section 88531 of the Education Code.

- (e) No more than \$2.1 million shall be allocated for Mexican International Trade Centers established pursuant to Section (a) of Ch. 959, Statutes of 1999.
- (f) The following provisions apply to the expenditure of funds within subdivisions (a) and (b) above: Funds allocated for centers and regional collaboratives shall seek to maximize the use of state funds for subdivisions (g) through (j) of Section 88531 of the Education Code. Funds allocated to districts for purposes of subdivisions (g) and (i) of Section 88531 of the Education Code for performance-based training and student internships shall be matched by a minimum of one dollar of private business and industry funding for each one dollar of state funds. Funds allocated for purposes of subdivision (h) of Section 88531 of the Education Code for credit and noncredit instruction may be transferred to Schedules (1) or (3) to facilitate distribution at the chancellor's discretion. Any funds that become available from Network Centers due to savings, discontinuance or reduction of amounts shall first be made available for additional allocations in subdivision (b) above to increase the level of subsidized training otherwise available.
- (g) Funds allocated by the board of governors under this provision shall not be used by community college districts to supplant existing courses or contract education offerings. The chancellor shall ensure that funds are spent only for expanded services and shall implement accountability reporting for districts receiving these funds to ensure that training, credit, and noncredit programs remain relevant to business needs. Programs that do not demonstrate continued relevance and support by business shall not be eligible for continued funding. The board of governors shall consider the level of involvement and financial commitments of business and industry as primary factors in making awards. The chancellor shall incorporate grant requirements into its guidelines for audits of Economic Development grants."

I am deleting the proposed \$11,000,000 for Cal Grant implementation. This action is necessary to keep State spending growth in line with revenues and provide for a prudent General Fund reserve for economic uncertainties. I am deleting Provision 8 to conform to this action.

I am deleting the legislative augmentation of \$2,000,000 for Transfer Grants. I am supportive of increasing transfers, but believe that the \$155 million augmentation I approved last year will greatly assist colleges in improving their transfer rates. I am revising Provisions 6 and 24 to conform.

- "6. Funds provided in Schedule (4) are for the Partnership for Excellence Program established pursuant to Section 84754 of the Education Code. It is the intent of the Legislature that community college districts increase the level of instruction and student services provided to meet the system-wide goal for student transfer. The goal for the California Community Colleges is to increase the number of "transfer ready" students to provide enough applicants to increase by at least 6 percent annually the number of transfer students eligible to enroll at the University of California through the year 2005-06. The goal is also to increase the number of "transfer ready" students to provide enough eligible applicants to increase by at least 5 percent annually the number of transfer students eligible to enroll at the California State University through the year 2005-06.

Colleges accepting Partnership for Excellence funds shall, in connection with their transfer center planning process and annual updates, prepare a set of campus goals for annual change in transfer of eligible students through the

2005–06 academic year; a rationale for selecting those goals; and a plan for achieving those goals. These campus transfer goals, rationale, and plans shall be submitted to the Chancellor's Office of the California Community Colleges, as part of the annual update of the transfer center plan, no later than December 1, 2001. The Chancellor's Office of the California Community Colleges shall compile and submit campus transfer goals for annual change; the rationale for selecting those goals; and plans to achieve those goals to the Governor and the Legislature no later than February 1, 2002.

In administering the provisions of Sections 66734 and 84754 of the Education Code, the chancellor shall review the capacity and readiness of each community college district to meet the needs of students desiring to transfer. From within existing resources, the chancellor shall provide technical assistance to community college districts as necessary to assure that each community college district identifies options to use its local resources most effectively for providing reasonable opportunities to transfer for students served by the district. Technical assistance shall be provided to any college with persistently low numbers or rates of transfer, with the goal that the number of transfers will increase by an average of 10 percent annually, as necessary to overcome these low numbers or rates by the 2004–05 academic year. On or before March 1, 2002, the chancellor shall provide a progress report to the Governor and the Legislature on this review and technical assistance, and, on or before April 15 of each year thereafter, shall report on progress each community college has made in increasing the number of transfers, along with campus expenditures on transfer-related activities, as part of the annual Partnership for Excellence report submitted to the Governor and the Legislature in accordance with paragraph (1) of subdivision (e) of Section 84754 of the Education Code."

- "24. Of the funds appropriated in Schedule (23), \$589,000 is for Project ASSIST, \$835,000 is for the California Articulation Number (CAN) system, \$550,000 is for faculty articulation workshops through fiscal year 2004–05 ; . and \$2,000,000 is to be used for transfer grants designed to improve student success in transferring to the University of California and the California State University at community colleges with historically low rates of transfer to those institutions. The \$2,000,000 for transfer grants shall be administered by the Chancellor of the California Community Colleges and may be used to augment existing transfer centers or to establish transfer academies at community colleges with historically low rates of transfer to the University of California and the California State University."

I am deleting \$98 million for Scheduled Maintenance and the Instructional Equipment and Library Materials Replacement programs. California is heading into a difficult year with its softening economy and substantial revenue decreases. Consequently, the General Fund expenditures in this Budget are down 1.7 percent over the prior year. Historically, the State provides funds for these programs on a one-time basis. I take these actions as a matter of consistency because the Budget includes no discretionary funding for scheduled maintenance and instructional equipment for the California State University and the University of California. While I would like to maintain these funds as a base effort in these areas, this action is essential due to fiscal constraints and limited resources in the General Fund. I am open to considering funding for these worthy programs in the future when the economy improves. I am deleting Provisions 25 and 26 and revising Provisions 1 and 27 to conform to this action.

- "1. The funds appropriated in Schedules (1), (2), (3), (4), (5), (6), (8), (10), (11), (12), (14), (15), (12.5), (19), (22), and (25) are for transfer by the Controller during the 2001–02 fiscal year to Section B of the State School Fund."

“27. Of the funds appropriated in Schedules (24), (25) and (26) of this item, the Chancellor of the California Community Colleges shall have the discretion to transfer funds among these schedules to fund the highest infrastructure priorities of the system. Funds from Schedules (24) and Schedule (26) of this item may be used to fund architectural barrier removal projects that meet the requirements of the federal Americans with Disabilities Act of 1990 and seismic retrofit projects limited to \$400,000. Districts that receive funds for architectural barrier removal projects shall provide a \$1 match for every \$1 provided by the state. The amount \$ in Schedules (24) and Schedule (26) shall be available for expenditure until June 30, 2003.”

Item 6870-102-0001—For local assistance, Board of Governors of the California Community Colleges (Proposition 98). I reduce this item from \$945,000 to \$660,000 and revise Provision 1.

I am reducing the \$945,000 legislative augmentation for local projects by \$285,000. I am sustaining the remaining \$660,000 on a one-time basis. This action is essential due to fiscal constraints and limited resources in the General Fund. I am revising Provision 1 to conform to this action.

“1. The funds in this item shall be allocated for the following local projects:

- (a) City College of San Francisco: Support Funding for Phase 1 of the facility to be jointly used by City College and San Francisco State University for Teacher Preparation, Child Development and early Childhood Education, and Community Health (~~300,000~~) (200,000)
- (b) San Francisco Community College: Mission campus (200,000)
- (c) Santa Ana Community College: Phillips Hall renovation (~~70,000~~) (40,000)
- (d) Compton Community College: Compton Community College Stadium Retrofit (~~150,000~~) (100,000)
- (e) Hartnell Community College: Health Professions Skills Enhancement Program (~~225,000~~) (120,000)”

Item 6870-301-0574—For capital outlay, Board of Governors of the California Community Colleges. I reduce this item from \$155,892,000 to \$141,033,000 by deleting:

Allan Hancock Community College District

Allan Hancock College

(1.5) 40.02.112-Library/Media Tech Center—Preliminary plans (\$317,000);

Butte Community College District

Butte College

(4.1) 40.05.106-Learning Resource Center—Preliminary plans (\$597,000);

Contra Costa Community College District

Diablo Valley College

(18.1) 40.13.220-Life Science Remodel for Laboratories—Preliminary plans (\$162,000);

Los Medanos College

(18.2) 40.13.313-Learning Resource Center—Preliminary plans (\$359,000);

San Ramon Valley Center

(18.3) 40.13.400-Phase 1 Buildings—Preliminary plans (\$723,000);

Foothill-DeAnza Community College District

Foothill College

(19.5) 40.15.206-Center for Innovation and Interactive Learning—Equipment (\$1,656,000);

Glendale Community College District

Glendale College

(20.3) 40.18.122-Allied Health/Aviation Lab—Preliminary plans (\$340,000);

- Grossmont-Cuyamaca Community College District
Cuyamaca College
(20.5) 40.19.116-Science and Technology Mall—Preliminary plans (\$543,000);
Grossmont College
(21.1) 40.19.207-Science Building—Preliminary plans (\$397,000);
Hartnell Community College District
Hartnell College
(21.5) 40.20.101-Library/Learning Resource Center—Preliminary plans
(\$738,000);
Lake Tahoe Community College District
Lake Tahoe Community College
(24.1) 40.23.111-Learning Resource Center—Preliminary plans (\$407,000);
Los Angeles Community College District
Los Angeles Mission College
(28.5) 40.26.408-Child Development Center—Preliminary plans (\$300,000);
Los Angeles Southwest College
(29.1) 40.26.607-Child Development Center—Preliminary plans (\$230,000);
Los Angeles Trade-Tech College
(30.1) 40.26.702-Child Development Center—Preliminary plans (\$215,000);
Los Angeles Valley College
(30.2) 40.26.803-Health Science Building—Preliminary plans (\$661,000);
Los Rios Community College District
American River College
(30.4) 40.27.102-Learning Resource Center Expansion—Preliminary plans
(\$343,000);
North Orange Community College District
Cypress College
(39.5) 40.36.100-Library/Learning Resource Center—Preliminary plans
(\$650,000);
Palo Verde Community College District
Palo Verde College
(41.5) 40.37.102-Technology Building Phase 2—Preliminary plans (\$292,000);
Rancho Santiago Community College District
Santa Ana College
(46.1) 40.41.124-Physical Education Seismic Replacement/Expansion—
Preliminary plans (\$225,000);
Riverside Community College District
Moreno Valley Center
(47.1) 40.44.207-Child Development Center—Preliminary plans (\$67,000);
Norco Valley Center
(47.2) 40.44.307-Child Development Center—Preliminary plans (\$76,000);
San Francisco Community College District
Mission Center
(55.1) 40.48.106-Mission Center Building—Working drawings (\$190,000);
Chinatown Center
(55.2) 40.48.108-Chinatown Campus Building—Preliminary plans (\$1,334,000);
San Luis Obispo County Community College District
Cuesta College
(58.1) 40.51.112-Theater Arts Building—Preliminary plans (\$472,000);
Santa Barbara Community College District
Santa Barbara City College
(63.5) 40.53.120-Gymnasium Remodel—Preliminary plans (\$163,000);

Sequoias Community College District

College of the Sequoias

(66.1) 40.56.112-Science Center—Preliminary plans (\$471,000);

Shasta-Tehama-Trinity Jt. Community College District

Shasta College

(66.5) 40.57.103-Library Addition—Preliminary plans (\$245,000);

Sonoma County Community College District

Santa Rosa Junior College

(67.5) 40.61.402-Learning Resource Center—Preliminary plans (\$1,199,000);

Chabot-Las Positas Community College District

Las Positas College

(67.7) 40.62.215-Physical Education, Gymnasium Phase 1—Preliminary plans (\$461,000);

Southwestern Community College District

Southwestern College

(68.1) 40.63.104-Child Development Center—Preliminary plans (\$227,000);

State Center Community College District

Reedley College

(69.1) 40.64.400-Learning Resource Center Addition—Preliminary plans (\$187,000);

Ventura County Community College District

Moorpark College

(70.1) 40.65.109-Child Development Center—Preliminary plans (\$101,000);

West Hills Community College District

Kings County Center

(73.5) 40.67.204-Phase 2B Classrooms/Laboratories—Preliminary plans (\$298,000);

and

West Valley Mission Community College District

Mission College

(74.1) 40.69.208-Main Building 3rd floor Reconstruction—Preliminary plans (\$213,000).

I am deleting the legislative augmentation of \$14,859,000 for 34 projects at various campuses of the California Community Colleges, because this amount should be held in reserve to address any unanticipated cost increases needed to complete previously approved projects.

Item 7980-001-0001—For support of Student Aid Commission. I reduce this item from \$16,469,000 to \$14,969,000 by reducing:

(1) (15)-Financial Aid Grants Program from \$16,515,000 to \$15,015,000, and by deleting Provision 1.

I am deleting the \$1,500,000 legislative augmentation to provide outreach regarding the Cal Grant program, and to create the College Corps Program. I note that the Student Aid Commission's budget already includes funding for outreach purposes. This action is necessary to maintain State spending growth in line with revenues, and to provide for a prudent reserve for economic uncertainties.

Item 7980-101-0001—For local assistance, Student Aid Commission. I reduce this item from \$619,584,000 to \$618,584,000 by reducing:

(1) 15-Financial Aid Grants Program from \$631,962,000 to \$630,962,000, and by revising Provision 1 by deleting subschedule (i).

I am deleting the \$1,000,000 legislative augmentation to provide funds for organizations to host financial aid workshops and forums for high school students and their parents. This action is necessary to keep State spending growth in line with revenues and provide for a prudent General Fund reserve for economic uncertainties. Never-

theless, I note that the California Student Opportunity and Access Program (Cal-SOAP), administered by the Student Aid Commission, includes over \$8 million to provide informational outreach to K–12 students. I encourage this program to emphasize financial aid outreach to ensure all qualified students apply for and receive a Cal Grant award.

I am revising Provision 1 to conform to this action.

“1. Funds appropriated in Schedule (1) are for the purposes of all of the following:

- (a) Awards in the Cal Grant Program under Chapter 1.7 and Article 3 (commencing with Section 69530) of Chapter 2 of Part 42 of the Education Code.
- (b) Graduate fellowship renewal awards under former Article 9 (commencing with Section 69670) of Chapter 2 of Part 42 of the Education Code.
- (c) Grants under Section 4709 of the Labor Code.
- (d) California Student Opportunity and Access Program contract agreements under Article 4 (commencing with Section 69560) of Chapter 2 of Part 42 of the Education Code.
- (e) The purchase of loan assumptions under Article 5 (commencing with Section 69612) of Chapter 2 of Part 42 of the Education Code. 6,500 warrants shall be issued to California students pursuant to the purchase of loan assumptions.
- (f) Grants under the California State Work-Study Program, Article 18 (commencing with Section 69950) of Chapter 2 of Part 42 of the Education Code.
- (g) The purchase of loan assumptions under Article 5.5 (commencing with Section 69618) of Chapter 2 of Part 42 of the Education Code.
- (h) New and renewal Cal Grant awards in amounts not to exceed award levels comparable to those in effect for the 2000–01 award year except as otherwise provided by law.
- (i) Notwithstanding any other provision of law, of the amount in this schedule, \$1,000,000 shall be used to conduct Cal Grant and financial aid outreach by providing funds for organizations to host financial aid workshops and forums to directly assist high schools and students and their families regarding the completion and submission of the Free Application for Federal Student Aid (FAFSA) form and information about the expanded Cal Grant Program. The workshops and forums shall target those high schools that have an Academic Performance Index (API) that ranks in the lowest two deciles in the state.”

Item 7980-103-0001—For local assistance, California Student Aid Commission.

I am sustaining this item which appropriates funding for the Jackie Robinson Foundation on a one-time basis only.

Item 8100-001-0001—For support of Office of Criminal Justice Planning. I reduce this item from \$4,493,000 to \$4,343,000 to make a technical correction to the Budget Bill.

The program schedules and funding details reflected in this item are correct; however, the total appropriation exceeds the sum of the schedules by \$150,000. Therefore, in order to correct this technical error, I am reducing the item appropriation total by \$150,000, which will conform the Budget Act to the action taken by the Legislature.

Item 8100-101-0001—For local assistance, Office of Criminal Justice Planning. I reduce this item from \$98,341,000 to \$96,935,000 by reducing:

- (26.5) 97.20.004-Local Projects from \$4,593,000 to \$3,187,000 by deleting \$350,000 for the following subschedules:

- (y) OK (Our Kids) Mentoring Program: OK (Our Kids) Mentoring Program Expansion (\$100,000);
- (z) Unity One: Unity 1 Gang Prevention Program in Los Angeles (\$100,000);
- (aa) Banning Police Department: Police Department Expansion (\$50,000);
- (ac) Juvenile Hall Auxiliary of Contra Costa County: Field of Dreams (\$100,000);

and by reducing \$1,056,000 from the following subschedules:

- (c) City of Gardena: Police Detective Vehicles from (\$250,000) to (\$200,000);
- (d) City of San Gabriel: San Gabriel Police Department from (\$200,000) to (\$150,000);
- (f) Orange County District Attorney's Office: High Tech Crime Unit from (\$250,000) to (\$100,000);
- (g) Tariq Kamisa Foundation: Youth Violence Prevention Program from (\$500,000) to (\$200,000);
- (i) County of Alameda Sheriffs Department: MOMS (Maximizing Opportunities for Mothers to Succeed) from (\$800,000) to (\$600,000);
- (j) City of Hayward: Police Facility Addition for Expansion of Youth & Family Services Bureau Counseling Services from (\$350,000) to (\$300,000);
- (k) Orange County District Attorney's Office: Orange County Community Education Services from (\$125,000) to (\$95,000);
- (l) Orange County District Attorney's Office: TracKRS from (\$125,000) to (\$95,000);
- (n) Glendale Police Department: Purchase of one van for the Glendale Police Department Police Activities League Program from (\$40,000) to (\$25,000);
- (s) Hollywood Police Activities League from (\$75,000) to (\$60,000)
- (t) City of Rialto Police Department: Police Activities League from (\$100,000) to (\$60,000);
- (u) Adopt-a-Bike and Computer, Inc.: Computer Repair Program from (\$28,000) to (\$20,000);
- (v) South Coast Ecumenical Council: Long Beach BLAST from (\$25,000) to (\$20,000);
- (w) Long Beach Police Athletic League: Long Beach Police Athletic League Program from (\$50,000) to (\$40,000);
- (ad) Devonshire PALS: Building for PALS Youth Center from (\$100,000) to (\$50,000);
- (ae) City of Pacifica: Completion of the Pacifica Police Station from (\$175,000) to (\$147,000);
- (af) Tulare County District Attorney's Office: Tulare County Gang Task Force Operations from (\$100,000) to (\$75,000).

This action is essential due to fiscal constraints and limited resources in the General Fund. I am sustaining the remaining funding for the projects identified in this schedule on a one-time basis.

I am also deleting Provision 4 of this item, which would specify that the funding appropriated in Schedule 25 is available for competitive grants for the construction and upgrade of local crime laboratories, and would require at least 25 percent to be allocated for projects that are currently in the process of being constructed. This language is unnecessary because I have already directed the Office of Criminal Justice Planning to distribute the grants on a competitive basis. In addition, the requirement that 25 percent of the funds be used for projects that are currently in progress unnecessarily

restricts the allocation process by predefining the method by which a portion of the funds may be used.

Item 8100-101-0597—For local assistance, Office of Criminal Justice Planning. I delete Provision 4.

I am deleting Provision 4, which would require that \$3,300,000 of the funds appropriated in this item be allocated for high technology identity theft pilot projects as specified in SB 222. This provision unnecessarily ties this funding to legislation, which may not be enacted and could limit the ability of the Executive Branch to effectively manage programs.

Item 8100-102-0001—For local assistance, Office of Criminal Justice Planning. I delete this item and Provision 1.

I am deleting this item, which would provide law enforcement assistance grants of \$500,000 each to 36 rural and small counties in California on an ongoing basis. I am vetoing this funding because I intend to sign a budget trailer bill that would provide annual grants of an equal amount to the same rural and small counties identified in this item.

Item 8260-103-0001—For local assistance, California Arts Council. I reduce this item from \$12,631,000 to \$9,132,000 by reducing:

(a) Local Projects from \$12,631,000 to \$9,132,000 by deleting \$1,300,000 for the following subschedules:

- (18) San Diego Maritime Museum: Education Pilot Project (\$125,000);
- (22) Armand Hammer Museum: Renovation of the Armand Hammer Museum located on the UCLA campus (\$750,000);
- (38) Tulare County: History of Transportation wing in the Mooney Grove Museum Complex (\$75,000);
- (39) County of Riverside: Edward Dean Museum and Gardens Education Program (\$50,000);
- (41) Fullerton Railway Plaza Association: Railway Museum, City of Fullerton (\$50,000);
- (44) High Desert Arts Foundation: High Desert Center for the Arts property acquisition (\$75,000);
- (45) Beverly Hospital Foundation (\$100,000);
- (47) Fender Museum of the Arts Foundation: Fender Museum (\$75,000);

and by reducing \$2,199,000 from the following subschedules:

- (2) Armenian Film Foundation: Armenian Film Foundation from (\$190,000) to (\$150,000);
- (3) B Street Theatre, Sacramento: Children's Theater of Sacramento, California from (\$250,000) to (\$200,000);
- (5) Community Redevelopment agency of the City of Los Angeles: NoHo Theater Arts District Marquis Project from (\$100,000) to (\$50,000);
- (7) La Raza Galeria Posada, Sacramento: La Raza Galeria Posada Arts Education Programs from (\$50,000) to (\$30,000);
- (9) San Fernando Valley Chinese Cultural Association, Chinese Heritage Foundation: Chinese Heritage Center from (\$250,000) to (\$50,000);
- (10) City of Los Angeles: Children's Museum from (\$1,000,000) to (\$500,000);
- (12) City of Los Angeles: Children's Museum from (\$1,000,000) to (\$500,000);
- (13) Centro Cultural de Mexico en Orange County: Cultural Arts Center from (\$36,000) to (\$32,000);
- (14) Mexican Cultural Institute: Cultural and educational programs from (\$100,000) to (\$50,000);
- (16) City of Glendale: Glendale Police Department Memorial from (\$25,000) to (\$20,000);

- (17) Santa Barbara Community Youth Performing Arts Center: Santa Barbara Junior High School theater from (\$100,000) to (\$95,000);
- (20) Hollywood Entertainment Museum: Educational Center for Entertainment Arts from (\$250,000) to (\$180,000);
- (21) City of West Hollywood: Russian Cultural Center at Plummer Park from (\$55,000) to (\$30,000);
- (26) City of Chino: Community Theatre expansion from (\$100,000) to (\$55,000);
- (27) Skirball Cultural Center: Skirball Cultural Arts Center from (\$500,000) to (\$400,000);
- (28) Valley Public Television, KVPT Channel 18/65: Purchase Eagles Lodge Building for office and production expansion from (\$15,000) to (\$10,000);
- (31) City of Palo Alto: Children's Theatre sound and light systems from (\$300,000) to (\$175,000);
- (32) B Street Theater: The Children's Theater of California from (\$225,000) to (\$100,000);
- (33) Capital Unity Council from (\$100,000) to (\$50,000);
- (34) Sacramento Theater Company: Kids Write Plays from (\$100,000) to (\$45,000);
- (36) The Natural History Museum of Los Angeles County: Seismic strengthening and historic preservation of the Natural History Museum of Los Angeles County from (\$250,000) to (\$125,000); and
- (37) Miners Cultural Center from (\$100,000) to (\$50,000).

This action is essential due to fiscal constraints and limited resources in the General Fund. The remaining augmentations are being sustained on a one-time basis.

Item 8300-001-0001—For support of Agricultural Labor Relations Board. I reduce this item from \$5,611,000 to \$5,341,000 by reducing:

- (2) 20-General Counsel Administration from \$3,240,000 to \$2,970,000.

I am deleting the \$270,000 legislative augmentation to the Agricultural Labor Relations Board for additional field staff. I believe the augmentation of \$457,000 and three additional staff that I proposed to investigate unfair labor practice cases is sufficient to address workload in this area.

Item 8350-001-0001—For support of Department of Industrial Relations. I reduce this item from \$157,214,000 to \$153,777,000 by reducing:

- (7) 50-Enforcement and Promulgation of Laws Relating to Wages, Hours and Conditions of Employment, and Licensing and Adjudication from \$44,749,000 to \$41,862,000;
- (8) 60-Promotion, Development, and Administration of Apprenticeship and other On-the-Job Training from \$9,102,000 to \$8,552,000;

and by deleting Provision 1.

I am deleting the \$500,000 legislative augmentation for the Department of Industrial Relations to assess the information needs for managing and tracking the Department's workload. There is insufficient information to justify funding at this time. I am also deleting Provision 1, which specifies the purpose of the assessment, to conform to this action.

I am sustaining \$2,000,000 of the \$4,937,000 legislative augmentation to provide increased labor law enforcement efforts, inclusive of industries with high labor enforcement issues, in the Divisions of Labor Standards Enforcement and Apprenticeship Standards. Although I am supportive of efforts to protect the workforce of California, I am reducing this augmentation by \$2,937,000 due to fiscal constraints and limited General Fund resources.

Item 8660-001-0462—For support of Public Utilities Commission. I reduce this item from \$65,629,000 to \$64,116,000 by reducing:

- (1) 10-Regulation of Utilities from \$82,128,000 to \$80,615,000.

I am deleting the legislative augmentation of \$1,513,000 and 9.4 personnel years for the Consumer Affairs Branch to address the consumer complaints backlog. While I am supportive of reducing the backlog, my proposed 2001–02 Budget already included additional resources for this purpose, which the Legislature sustained. Further augmentations to this activity are not warranted until the Commission can demonstrate that the approved resources along with operational efficiencies recommended for implementation by the Commission are insufficient to reduce the backlog.

Item 8700-001-0001—For support of California Victim Compensation and Government Claims Board. I revise this item by reducing:

- (1) 11-Citizens Indemnification from \$53,901,000 to \$50,901,000, and
(10) Amount payable from the Restitution Fund (Item 8700-001-0214) from
–\$42,951,000 to –\$39,951,000.

I am revising this item to conform to the action I have taken in Item 8700-001-0214.

Item 8700-001-0214—For support of California Victim Compensation and Government Claims Board. I reduce this item from \$42,951,000 to \$39,951,000 and delete Provision 3.

I am deleting the \$3,000,000 legislative augmentation to establish three Victim Recovery Resource and Treatment Centers. A similar program is currently being operated by the University of California, San Francisco, and is in the early stages of implementation. While I support programs that provide assistance to victims of crime, it is premature to expand the use of Victim Recovery Centers until an evaluation of the pilot project is completed in 2005.

I am deleting Provision 3 to conform to this action.

Item 8860-025-0001—For support of Department of Finance. I reduce this item from \$3,000,000 to \$2,999,000, and by revising Provision 1.

I am reducing this item by \$1,000 and revising Provision 1.

This language would restrict the State Controller's ability to audit school district attendance, and would conflict with current law by attempting to prohibit recovery of funds not claimed in accordance with law. The language infringes on the separation of powers in that it usurps Executive Branch authority to effectively administer State programs. Further, the language represents a substantive change of law inappropriate for inclusion in the Budget Act.

I am revising Provision 1.

- "1. (a) The funds appropriated in this item shall be used to fund a contract with the Controller's Office to perform audits of school attendance records. The audits shall be limited to data pertaining to the prior three fiscal years.
- (b) Prior to conducting the audit, the Controller shall submit an audit plan to the Joint Legislative Budget Committee. The plan shall comply with American Institute of Certified Public Accountants (AICPA) Generally Accepted Auditing Standards and shall identify (1) the scope and limitations of the attendance audit; (2) the records that shall be retained and supplied by the local agency during the course of the audit; and (3) the state advisories or institutional memoranda describing the obligations of the local agencies subject to the audit.
- (c) It is the intent of the Legislature in providing for these audits that, except as provided in subdivision (d) of this provision, school district attendance audits shall be prospective in application only and shall not be retroactive in the imposition of any apportionment penalty.

- (d) The audits may be used to impose a retroactive apportionment penalty in cases of either (1) an intentional act to defraud the State of California or (2) purposeful falsification of records.”

Item 8955-301-0701—For capital outlay, Department of Veterans Affairs. I delete this item.

I am deleting the \$12,000,000 legislative augmentation for the design and construction of a new veterans' home in Lancaster, California. I have received correspondence from the state commanders of the Veterans of Foreign Wars of the United States, AMVETS, and The American Legion urging me to move forward with building more veterans' homes in southern California with greater attention given to location, services, and resources available to better serve our veterans.

In addition, my Blue Ribbon Task Force on Veterans' Homes has recommended that any future veterans' homes be located in proximity to a United States Department of Veterans Affairs Medical Center and close to available nursing professionals. The Lancaster site does not meet either of these criteria. I look forward to the recommendations of the Governor's Commission on Veterans Homes on the establishment of future veterans' homes.

Item 8960-301-0001—For capital outlay, Veterans' Home of California—Yountville. I reduce this item from \$2,550,000 to \$2,339,000 by deleting:

- (3.5) 80.20.440-Remodel Recreation Center—Preliminary plans and working drawings (\$211,000)

I am deleting the \$211,000 legislative augmentation for this project because it is not a critical fire and life safety issue that requires immediate correction and because of the need to fund higher competing priorities. In addition, the scope of the project has not been defined, and the associated out-year costs have not been evaluated.

Item 8960-490—Reappropriation, Veterans' Home of California—Yountville. I delete this item.

I am deleting the \$1,600,000 reappropriation for support costs associated with the Memorial Chapel project, Item 8960-011-0001, Budget Act of 2000. The Legislature deleted the capital outlay funding for the Memorial Chapel project; therefore, the support costs associated with the project are not needed.

Item 9100-101-0046—For local assistance, Agricultural and Rural Relief Rebates Program, tax relief, sales and use tax rebates for diesel fuel for producing and harvesting agricultural products. I delete this item and Provision 1.

I am deleting the \$8,000,000 legislative augmentation for the Agricultural and Rural Relief Rebates Program. This augmentation would provide sales and use tax rebates for diesel fuel for producing and harvesting agricultural products and transporting these products to the marketplace. Although I am supportive of tax relief for the agricultural industry, providing that relief in the form of rebates is not the most efficient method to deliver tax relief, and would result in unnecessary administrative costs. I intend to sign budget trailer legislation that provides agricultural tax relief in the form of tax exemptions.

Item 9100-102-0001—For local assistance, Agricultural and Rural Relief Rebates Programs, Tax Relief. I delete this item and Provision 1.

I am deleting the \$19,300,000 legislative augmentation for the Agricultural and Rural Relief Rebates Program. This augmentation would provide tax rebates for liquefied petroleum gas for residential and agricultural business use, farm and forestry equipment and machinery, and racehorse breeding stock. Although I am supportive of tax relief for these purposes, providing that relief in the form of rebates is not the most efficient method to deliver tax relief, and would result in unnecessary administrative costs. I intend to sign budget trailer legislation that provides tax relief for these purposes in the form of tax exemptions.

Item 9210-107-0001—For local assistance, Local Government Financing. I reduce this item from \$25,526,000 to \$6,405,000 by reducing:

- (a) Local Projects from \$25,526,000 to \$6,405,000 by deleting \$17,555,000 for the following subschedules:
 - (1) City of Anaheim: Playground Renovation in Anaheim (\$250,000);
 - (2) City of Banning: San Gorgonio Memorial Hospital Foundation (\$800,000);
 - (3) City of Big Bear: Relocate Moonridge Zoo (\$850,000);
 - (4) City of Brea: Retrofit American Legion Building in Brea (\$195,000);
 - (5) City of Citrus Heights: Civic Center Energy Conservation Retrofit Project (\$150,000);
 - (6) City of Colton: Alternative Fuel Park and Ride Project (\$25,000);
 - (9) City of Fontana: City Park (\$709,000);
 - (10) City of Fountain Valley: Mile Square Park, Fountain Valley (\$500,000);
 - (11) City of Fullerton: Playground equipment for Independence Park, Fullerton (\$77,000);
 - (12) City of Fullerton: Replace illuminated street signs, Fullerton (\$148,000);
 - (13) City of Fullerton: Convert Lions Field Lighting, Fullerton (\$200,000);
 - (14) City of Fullerton: Convert Lighting at Leonard Andrews Tennis Court (\$200,000);
 - (15) City of Fullerton: Installation of new traffic control system, Fullerton (\$299,000);
 - (18) City of La Habra: La Bonita Park Improvement, La Habra (\$250,000);
 - (19) City of Laguna Hills: Community Center Paleontological Lobby, Laguna Hills (\$150,000);
 - (21) City of Merced: Merced Grandstands (\$260,000);
 - (22) City of Merced: South Dos Palos Park, Merced (\$333,000);
 - (23) City of Merced: Historic Merced Library (\$1,435,000);
 - (24) City of Morgan Hill: Morgan Hill Wildlife Education Center (\$250,000);
 - (26) City of Orange: Mobile command post (\$150,000);
 - (27) City of Orange: Landfill rehabilitation (\$187,500);
 - (29) City of Redlands: Shoppin' for Seniors (\$300,000);
 - (39) City of Valley Springs: New Hogan Lake Conservatory (\$2,000,500);
 - (40) City of Watsonville: Watsonville Community Center (\$250,000);
 - (41) City of Westminster: Westminster MultiCultural Community Center (\$200,000);
 - (42) County of Los Angeles: Search and rescue services, LA County (\$241,000);
 - (44) County of Orange: Eli Home (\$200,000);
 - (45) County of San Diego: Lakeside Elementary School District, Playground Equipment (\$50,000);
 - (48) Diamond Bar: Summit Ridge Park (\$250,000);
 - (50) LaVerne: LeRoy Haynes Center, LaVerne (\$500,000);
 - (51) Monterey County: Hazardous Material Response Truck (\$35,000);
 - (52) Monterey County: Natavidad Hospital (\$250,000);
 - (53) Oceanside: Mission San Luis Rey, water from Oceanside (\$280,000);
 - (54) Pomona: Corporate Kids CyberKlub, Pomona (\$100,000);
 - (55) Pomona: Bulkhead for Ganesha Park Pool, Pomona (\$110,000);
 - (56) Pomona: Westmont Park, Pomona (\$150,000);
 - (57) Pomona: JFK Park, Pomona (\$210,000);
 - (60) Salinas: Ariel Childrens Theater, Salinas (\$100,000);
 - (61) Salinas: Salinas Municipal Pool Upgrade (\$150,000);

- (62) Salinas: Symphony Center, Salinas (\$185,000);
- (63) Salinas: Senior Center, Greenfield (\$250,000);
- (64) Salinas: Senior Center, Salinas (\$250,000);
- (65) City of San Diego: Water for Industry Program, San Diego (\$400,000);
- (67) San Luis Rey: Seismic stabilization of Mission, San Luis Rey (\$500,000);
- (68) Seal Beach: Concrete Sheetpile Groin Repair Project, Seal Beach (\$300,000);
- (71) Walnut: Suzanne Park, Walnut (\$300,000);
- (72) Walnut: Community Center Facility, Walnut (\$375,000);
- (73) Whittier: Flomar Drive Drainage Project, Whittier (\$460,000);
- (74) City of Exeter: Exeter-A Festival of Arts (\$45,000);
- (75) Tulare County: Boys & Girls Club of Tulare (\$150,000);
- (76) City of Bakersfield: HVAC for the Fox Theater in Bakersfield (\$250,000);
- (77) County of Fresno: Hart Lake water supply pipeline (\$411,000);
- (78) City of Visalia: Visalia PAL purchase of Mobil Recreation Centers (\$125,000);
- (79) County of Kern: Kern County Tot Lot Replacement (\$259,000);
- (80) City of Visalia: Visalia Garden Street Pedestrian Plaza (\$100,000);
- (81) City of Bakersfield: Energy efficient tree planting (\$100,000);
- (82) County of Fresno: Fresno Discovery Museum (\$100,000);
- (91) City of Waterford: Government Center Construction (\$100,000);
- (96) Rancho Cordova Community & Economic Development Corporation: Rancho Cordova Incorporation (\$50,000)
- (97) Castaic Area Town Council: Incorporation Study for the Town of Castaic (\$50,000)

and by reducing \$1,566,000 from the following subschedules:

- (7) City of Colton: Restoration of Carnegie Public Library from (\$125,000) to (\$50,000);
- (8) City of Fontana: Upgrades to the Civic Auditorium from (\$50,000) to (\$25,000);
- (16) City of Hawthorne: Street Upgrade from (\$150,000) to (\$100,000);
- (17) City of Huntington Beach: Olympic Pool-National Aquatic Center from (\$490,000) to (\$300,000);
- (20) City of Manhattan Beach: Manhattan Beach Pier Roundhouse Rehabilitation from (\$200,000) to (\$100,000);
- (25) City of Ontario: Library Expansion Project from (\$50,000) to (\$25,000);
- (30) City of Rialto: Rialto Fire Department, New Ambulance from (\$50,000) to (\$25,000);
- (31) City of Riverside: Riverside National Cemetery from (\$840,000) to (\$400,000);
- (32) City of San Bernardino: Santa Fe Depot Area Plan from (\$100,000) to (\$25,000);
- (33) City of San Diego: Encanto Community Fund, Inc., for Encanto Street Fair from (\$50,000) to (\$20,000);
- (34) City of San Diego: Water for industry program phase II from (\$500,000) to (\$175,000);
- (37) City of Signal Hill: Signal Hill Police Department, Complete Construction of Emergency Operations Center from (\$250,000) to (\$200,000);
- (47) County of San Mateo: Creating a Water Connection at Sawyer Camp from (\$200,000) to (\$100,000);
- (83) County of Contra Costa: Animal Shelter from (\$115,000) to (\$112,000);

- (84) City of Cudahy: Volunteers on Patrol Program from (\$50,000) to (\$35,000);
- (85) City of Downey: Downey Animal Shelter from (\$50,000) to (\$40,000);
- (88) San Joaquin County Sheriff's Department: Equipment from (\$48,000) to (\$45,000); and
- (89) City of Tracy: Tracy Animal Shelter from (\$125,000) to (\$100,000)

This action is essential due to fiscal constraints and limited resources in the General Fund. The augmentations provided in this item are being sustained on a one-time basis.

SEC. 4.60—Building Rental Rate. I revise this Control Section to make a technical correction to the Budget Bill.

This technical veto will make a technical correction to the Budget Bill to conform with the Legislature's intent, and is consistent with the legislative conference action taken in Item 1760-001-0666, which would not require the Department of General Services to establish a separate building rate for the Ronald Reagan Building, recalculate the statewide building rental rate based on the deletion of the costs for the Ronald Reagan Building, and add five cents per square foot per month to initiate the Maintenance and Repairs System (MARS) special repair and recurring maintenance program.

I am revising Control Section 4.60 as follows:

“SEC. 4.60. Notwithstanding any other provision of law, the Department of Finance shall adjust any item of appropriation of this act, as appropriate, to fund the rent for state office buildings as ~~adjusted by the Department of General Services establishment of a separate building rate for the Ronald Reagan Building and the recalculated statewide building rental rate based on the deletion of costs for the Ronald Reagan Building plus five cents per square foot per month to initiate the MARS special repair and recurring maintenance program, as required under Item 1760-001-0666 .~~”

I realize this control section does not require the Department of Finance to notify the Joint Legislative Budget Committee of any adjustments made to Section 2.00 of this Act. However, I am directing the Department of Finance to provide a 30-day notification to the Joint Legislative Budget Committee, as was required by the intended legislative action.

SEC. 7.00—Dymally-Alatorre Bilingual Services Act. I delete this control section.

I am deleting this control section that would appropriate funding to four departments to assist in the provision of bilingual services to the public. The need for funding for these four departments has not been justified. All State departments must comply with the Dymally-Alatorre Act, and most have done so within existing resources. I am directing all State departments to comply with the Act within existing budgeted resources.

With the above deletions, revisions, and reductions, I hereby approve Senate Bill 739.

GRAY DAVIS, Governor

- 2 [Ch. 155] I am signing Assembly Bill No. 441, however, I am vetoing the \$40 million appropriated in the bill as there are sufficient funds remaining in the Proposition 98 Reversion Account to fund this measure. I am setting sufficient funding aside in that account for subsequent legislation to fulfill my commitment for \$40 million of equalization funding.

I also object to the intent statement in the bill to fully meet the funding targets by the 2006–2007 fiscal year. Any consideration for future equalization funding will be contingent on sufficient revenues to meet other, higher priorities. Because I have already approved nearly \$2.3 billion in discretionary funding increases for school districts beyond statutory requirements in the prior two budgets, and because the state

is already in compliance with court requirements for equalized funding, I do not believe that further equalization funding is of a sufficiently high priority to require the level of commitment intended by this statement when there may be more pressing priorities for school reforms that can help ensure increased student achievement.

GRAY DAVIS, Governor

- 3 [Ch. 443] I am signing SB 664, legislation requires the California Postsecondary Education Commission (CPEC) to conduct a review and analysis of admission procedures and attrition rates for two-year associate degree nursing programs.

Nursing programs in the California Community Colleges are currently impacted and the system should take steps to ensure that students admitted into the program are academically prepared. This study should help identify strategies to maximize the number of nursing students that can graduate and help meet California's high demand for nurses. However, due to our rapidly declining economy, I am vetoing the appropriation of \$130,000 and requesting that CPEC conduct the study or contract out within existing resources.

GRAY DAVIS, Governor

- 4 [Ch. 468] I am signing Senate Bill 314, however, I am vetoing Section 4 of the bill which would appropriate \$75,000 from the Controller for disbursement to the Department of Justice in order to implement the provisions of this bill.

I believe that the inclusion of statistical data related to minors who are subject to the jurisdiction of an adult criminal court in the Department of Justice's annual report would be beneficial in order to assess the public safety impact and fiscal consequences of trying minors as adults. However, due to the economic situation facing the State, the Department of Justice should fund the implementation of this bill through the \$350,000 of federal funding that is available from the Office of Criminal Justice Planning and through existing resources of the Department.

GRAY DAVIS, Governor

- 5 [Ch. 523] I am signing Assembly Bill 780. However, due to the rapid decline in our economy and a budget shortfall of \$1.1 billion in the first three months of this fiscal year alone, I have no choice but to oppose additional General Fund spending. As a result, I am deleting the \$7 million General Fund appropriation contained in the bill.

This bill reauthorizes the pesticide mil assessment, which funds approximately 60% of the programmatic activity of the Department of Pesticide Regulation (DPR), at the current rate of 17.5 mils until June 30, 2004. I am signing this bill to maintain the current assessment rate because it does not add an additional financial burden on the regulated industries. Moreover, this action will avoid the potential for the assessment to revert to an unacceptably low level in future years.

However, I am directing the Director of DPR to bring the stakeholders together as specified by this bill to help craft a longer term solution for support of the Department.

I am committed to the continuation of California's nationally renowned pesticide regulatory program and the benefits it provides. Because DPR has sufficient funding for the current fiscal year, I believe that addressing the funding shortfall for the 2002-03 fiscal year during the budget development process would be more appropriate.

GRAY DAVIS, Governor

- 6 [Ch. 558] I am signing Assembly Bill 876 which would appropriate \$100,000 to the State Department of Education to conduct a study of reading programs in schools with grades K–6 where at least 75 percent of the pupils have scored at or above the 80th percentile on the Standardized Testing and Reporting Program (STAR).

Ensuring that students learn to read is one of my primary education priorities. I am signing this measure but eliminating the appropriation. I am asking the Superintendent of Public Instruction to perform this study within existing resources.

Further, the state has provided millions of dollars for the development and adoption of English-Language Arts Academic Content Standards and Reading/Language Arts Frameworks. In addition, it is anticipated that the State Board Education will adopt reading/language arts materials by early 2002, all of which can be used to assist schools in developing successful reading programs.

GRAY DAVIS, Governor

- 7 [Ch. 566] I am signing Assembly Bill 1312, which establishes an Asian Pacific American Anti-Hate Program at the Department of Justice. However, given the rapid decline of our economy and a budget shortfall of \$1.1 billion through the first three months of this fiscal year alone, I am deleting the \$250,000 General Fund appropriation contained in this bill and requesting the DOJ to conduct this important program using existing resources.

GRAY DAVIS, Governor

- 8 [Ch. 576] I am signing Senate Bill 321, which would authorize the Los Angeles Unified School District to develop a 5 year pilot program for training newly hired teachers serving on emergency permits that are assigned to schools that have 20% or more teachers on emergency permits. However, I am deleting Section 3, which appropriates two million (\$2,000,000) from the General Fund.

Supporting the appropriate training of teachers serving on emergency permits is an important step toward improving the instruction for students in hard to staff schools. Unfortunately, given the rapid decline of our economy and a budget shortfall of \$1.1 billion through the first three months of this fiscal year alone, I have no choice but to oppose additional General Fund spending. However, I am directing the Office of the Secretary for Education to identify existing funds that can be used to support this pilot program.

GRAY DAVIS, Governor

- 9 [Ch. 577] I am signing SB 442 which specifies that the strategy for coordinating the housing activities of state and local agencies include housing assistance for various special populations such as the elderly and the disabled communities.

Further, in light of the rapid decline of our economy and a budget shortfall of \$1.1 billion through the first three months of this fiscal year alone, I have no choice but to oppose additional General Fund spending. Therefore, I am deleting Section 4 of the bill that would make a \$150,000 General Fund appropriation to the Director of e-Government. The Director is authorized to do as much as he can within existing resources.

GRAY DAVIS, Governor

10 [Ch. 579] I am signing Senate Bill 502, however, I am vetoing Section 2 of the bill which would appropriate \$100,000 from the General Fund.

This bill would require the Office of Criminal Justice Planning (OCJP) to establish medical forms, instructions, and examination protocol for victims of domestic violence and elder and dependent adult abuse and neglect, using specified guidelines, in cooperation with specified state and local entities.

Given the rapid decline of our economy and a budget shortfall of \$1.1 billion through the first three months of this fiscal year alone, I have no choice but to oppose additional General Fund Spending. Therefore, I am vetoing Section 2 of the bill that would appropriate \$100,000 from the General Fund to the Office of Criminal Justice Planning (OCJP) in order to implement the provisions of this bill.

I am directing the OCJP to implement the provisions of this measure within their existing resources.

GRAY DAVIS, Governor

11 [Ch. 682] I am signing Assembly Bill 830, a bill that will establish a task force to study and recommend innovative measures to improve the delivery of legal services to California's senior citizens.

Many California seniors of low and moderate means are in need of legal advice and assistance to help them navigate through complex issues of daily living. The task force will provide the California Department of Aging and the Legislature with valuable insight and advice regarding uniform standards, accountability in service delivery, and local sources of funding for senior legal services. I support the author's efforts to enhance both the quantity and quality of legal services provided to one of California's most vulnerable populations. I am further directing the California Department of Aging to establish the task force within existing resources.

GRAY DAVIS, Governor

12 [Ch. 692] I am signing Senate Bill 639 which would require the California Health and Human Services Agency to develop a strategic plan for improving access to mental health services for persons with Alzheimer's disease or related dementia.

However, given the rapid decline of our economy and a budget shortfall of \$1.1 billion through the first three months of this fiscal year alone, I have no choice but to oppose additional General Fund spending. I am directing the Health and Human Services Agency to develop the strategic plan within existing resources.

GRAY DAVIS, Governor

13 [Ch. 721] I am signing Senate Bill 223, but I am deleting the \$9.6 million General Fund appropriation for drug testing and thereby reducing the overall appropriation in this bill from \$18 million to \$8.4 million.

This bill would allow drug testing for clients treated under the Substance Abuse and Crime Prevention Act of 2000 (Proposition 36) and would provide \$9.6 million General Fund and \$8.4 million federal Substance Abuse Prevention and Treatment (SAPT) Block Grant funds for that purpose.

I strongly support drug testing as a component of substance abuse treatment and I am retaining the \$8.4 million federal funding in the bill for that purpose. The DADP estimates that the federal SAPT funds are sufficient to meet local needs for drug testing. In addition, given the rapid decline of our economy and a budget shortfall of \$1.1 billion through the first three months of this fiscal year alone, I have no choice but to oppose additional General Fund spending.

I am directing the Department of Alcohol and Drug Programs (DADP) to use \$8.4 million from the federal fiscal year (FFY) 2001 SAPT award for drug testing in 2001–02. Because the need for drug testing will continue, I will include funding from the FFY 2002 award for drug testing in my 2002–03 Budget. Further, I direct the DADP to encourage the counties to make drug testing a priority for use of these federal funds.

GRAY DAVIS, Governor

- 14 [Ch. 736] I am signing Assembly Bill 306 with a deletion. This bill would authorize local education agencies (LEA) to reinforce Braille instruction using a Braille instructional aide; allow Braille instruction for the functionally blind, require LEAs to provide instructional aides with notification of the specified teaching credential programs listed in the bill; appropriate \$227,000 General Fund to the California Community Colleges to offer additional training in Braille and require publishers of instructional materials to provide the state with free electronic versions of each state adopted literary title if the publisher doesn't already offer a large print version or other specialized media version.

I believe this bill will encourage earlier and greater Braille proficiency and lead to greater employment levels for Californians who are blind. However, given the rapid decline of our economy and a budget shortfall of \$1.1 billion through the first three months of this fiscal year alone, I have no choice but to reduce the appropriation in the bill from \$227,000 General Fund to \$100,000 General Fund.

GRAY DAVIS, Governor

- 15 [Ch. 737] I am signing Assembly Bill 466, which establishes the Mathematics and Reading Professional Development Program. The Program will greatly assist efforts to increase academic performance in California schools by enabling 176,000 teachers and 22,000 instructional aides or paraprofessionals to participate in high-quality professional development activities over a four-year period.

However, I am reducing from the bill the \$1.0 million of the \$1.2 million appropriation to the Department of Education for purposes of administering the Mathematics and Reading Professional Development Program. The compelling need for this level of funding is unclear, as the 2001 Budget Act appropriates \$515,000 to the Department of Education for the purpose of Program administration, which is responsible for the most significant workload. I am sustaining \$200 thousand to assist the Superintendent of Public Instruction in allocating the funding for this important program.

Additionally, in subsequent legislation, the provision requiring the State Board of Education to establish an appeal process for audit findings for this program should be removed. This provision conflicts with current law, which established the Education Audits Appeal Panel.

GRAY DAVIS, Governor

- 16 [Ch. 743] I am signing Senate Bill 891, however I am reducing the General Fund appropriation to \$100,000. This bill would have authorized the expenditure of \$250,000 for the New Economics for Women transitional housing project, known as La Posada. This program and those it serves will benefit greatly from the added funds this bill will provide for needed classroom space and a security system.

However, given the rapid decline of our economy and a budget shortfall of \$1.1 billion through the first three months of this fiscal year alone, I have no choice but to fund less than the requested amount.

I would also note that this bill designates the Department of Parks and Recreation as the department that would administer this grant. This is an inappropriate designation. I am requesting cleanup legislation in January that would designate the Department of Housing and Community Development as administrator of this grant to the La Posada project.

GRAY DAVIS, Governor

17 [Ch. 746] I am signing AB 31 with a deletion. This bill would create the Central Valley Infrastructure Grant Program to incentivize infrastructure improvements to eight Central Valley counties. This program was to receive funding from a \$15 million appropriation contained in the 2001 Budget Act.

Given the rapid decline of our economy and a budget shortfall of \$1.1 billion through the first three months of this fiscal year alone, I am directing the Department of Housing and Community Development to use \$12 million for this grant program and to revert \$3 million to the General Fund.

GRAY DAVIS, Governor

18 [Ch. 749] I am signing Assembly Bill 961, however I am reducing the appropriation made in section 8 of this bill by \$2,142,000. This section would appropriate \$3.0 million to the Department of Education for training and administration costs associated with this program. Absent a detailed expenditure plan from the Department of Education justifying this need, I am unable to support an augmentation in excess of that which I believe is necessary to begin implementation of this program.

While I am signing this bill, I am concerned that numerous sections within this bill are unclear and may be interpreted in a way not intended, potentially resulting in significant costs. I am signing this bill with the understanding that the author will introduce urgency legislation to clean up these issues.

GRAY DAVIS, Governor

19 [Ch. 768] I have signed Senate Bill 480 with a deletion. This bill would have appropriated \$100,000 from the General Fund to the Department of Parks and Recreation for a local assistance grant to the California Military Museum.

The Museum currently operates on funds raised by its Foundation, donations, and occasional legislative appropriations. If it does not receive funds this year, it could close its doors. The Museum provides a vital service to the state in honoring the men and women who have served in the military.

Although I have deleted the General Fund appropriation, I am directing the Department of Parks and Recreation to allocate \$100,000 from existing funds to the California Military Museum to ensure their continued operations.

GRAY DAVIS, Governor

20 [Ch. 827] I am signing Senate Bill 293 which would require the Board of Pharmacy (BOP) to adopt regulations establishing standards for compounding injectable sterile drug products in a pharmacy, require some pharmacies that compound these drug products to be specially licensed and provide for inspection and investigations of compounding pharmacies. The bill appropriates \$580,000 from the Pharmacy Contingent Fund for this purpose.

The Board advises that due to the length of time necessary to promulgate regulations, this bill will not be implemented until the next budget year. As a consequence, I am deleting the funds and will review any funding and related positions as part of next year's budget process.

GRAY DAVIS, Governor

21 [Ch. 837] I have signed Assembly Bill 70, which establishes a thermal imaging equipment program within the Office of Emergency Services and creates an advisory committee to develop specifications and information to facilitate the purchase of thermal imaging equipment at competitive rates. However, I am deleting Section 3, which appropriates fifty thousand dollars (\$50,000) from the General Fund.
