# STATUTES OF CALIFORNIA

AND DIGESTS OF MEASURES

**2002**

Constitution of 1879 as Amended

Measures Submitted to Vote of Electors,  
Primary Election, March 5, 2002  
and General Election, November 5, 2002

General Laws, Amendments to the Codes, Resolutions,  
and Constitutional Amendments passed by the  
California Legislature

**2001-02 Regular Session**  
**2001-02 Second Extraordinary Session**  
**2001-02 Third Extraordinary Session**

*Compiled by*  
DIANE F. BOYER-VINE  
*Legislative Counsel*

RESOLUTION CHAPTER 79

Senate Concurrent Resolution No. 87—Relative to the selection of the Legislative Counsel of California.

[Filed with Secretary of State June 7, 2002.]

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That, pursuant to Section 10201 of the Government Code, Diane F. Boyer-Vine is selected as the Legislative Counsel of California.

---

RESOLUTION CHAPTER 80

Senate Joint Resolution No. 29—Relative to the taxation of film and television productions.

[Filed with Secretary of State June 12, 2002.]

WHEREAS, In 2001, the film production industry directly generated 283,000 jobs in California, and is projected to have a \$34.9 billion impact on California's economy; and

WHEREAS, Much of California's recovery during the recession in the early 1990s was attributable to the entertainment production industry due to the fact that during the period from 1992 through 1996, employment in the entertainment production industry rose by 38 percent and generated an additional 62,000 jobs—almost seven times as much growth as in California's economy as a whole; and

WHEREAS, California accounts for 70 percent of the total revenues generated from the motion picture industry and Californians account for 60 percent of the industry's total employment; and

WHEREAS, In 1996, 81 percent of all United States motion picture feature films and 80 percent of all television programs were shot in California; and

WHEREAS, Many of the highest money-grossing productions of all time, including motion pictures such as E.T., Terminator 2, Indiana Jones and the Temple of Doom, Mrs. Doubtfire, and Gone with the Wind were filmed in California, and television programs such as Ally McBeal, The Practice, The West Wing, and The X-Files are filmed in California; and

WHEREAS, "Economic runaway productions" are film or television productions that are developed for initial exhibition or broadcast in the United States, but that are actually filmed in another country to achieve lower production costs; and

WHEREAS, The number of economic runaway film and television productions is persistently growing, as evinced by a 1999 study of theatrical films, films for television, television miniseries, and 30- and 60-minute television series; and

WHEREAS, This study indicated that out of 1,075 films developed in the United States in 1998, 285 (27 percent) were economic runaway productions—a 185-percent increase from the 100 economic runaway productions made in 1990; and

WHEREAS, This study also indicated that out of 308 films for television developed in the United States in 1998, 139 (45 percent) were economic runaway productions—a 363-percent increase from the 30 economic runaway productions made in 1990; and

WHEREAS, In 1998, economic runaway productions caused economic losses in the United States that are estimated at \$10.3 billion, up from \$2 billion in 1990, and caused a loss of the equivalent of 22,500 full-time jobs; and

WHEREAS, Economic runaway productions may have led to the loss of at least the equivalent of 36,000 full-time jobs in 2001; and

WHEREAS, In 1999, 90 percent of economic runaway productions went to Canada where the government offers federal and provincial tax credits of 22 percent to 46 percent of labor expenses, that result in a reduction in production costs of approximately 10 percent; and

WHEREAS, Two pending federal bills, S. 1278 (Lincoln-D (AR)) and H.R. 3131 (Drier-R (CA)), would enact the Independent Film and Television Production Incentive Act of 2001, to provide a federal income tax credit that equals 25 percent of certain wages paid in the production of films and television programs in the United States, and 35 percent of those wages that are so paid in low income areas ; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature respectfully requests the President and Congress of the United States to enact the Independent Film and Television Production Incentive Act of 2001; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, the Chairperson of the House Committee on Ways and Means, the Chairperson of the Senate Committee on Finance, and each Senator and Representative from California in the Congress of the United States.

---

RESOLUTION CHAPTER 81

Assembly Concurrent Resolution No. 146—Relative to California Police and Fire Games.

[Filed with Secretary of State June 13, 2002.]

WHEREAS, The California Police and Fire Games (hereafter, the Games) rank as one of the largest multisport athletic competitions in the world; and

WHEREAS, The 2002 Games will be hosted by the City of Santa Ana and the Santa Ana Police Department during the week of June 16 through June 22, 2002; and

WHEREAS, This year is the 36th anniversary of the Games and the third year that firefighters and police officers will compete together; and

WHEREAS, The purpose of the Games is to generate awareness and funding for important local charities, promote physical fitness through athletic competition, and develop a partnership between businesses, the community, firefighters, and law enforcement; and

WHEREAS, In 2002, it is anticipated that 9,000 to 10,000 athletes will compete in over 60 different sporting events; and

WHEREAS, In 2002, the Games are expected to bring in \$7 to \$9 million into the local economy through hotel accommodations, meals, recreation, and local shopping at malls and retail centers. This will help stimulate employment and generate tax revenues for the local economy; and

WHEREAS, In addition to benefiting businesses and organizations, the Games offer individuals an opportunity to participate in the improvement of their community through financial contributions, in-kind donations, and volunteerism; and

WHEREAS, All net proceeds from the Games will benefit local charity organizations: Santa Ana Police Officers Association; Widows and Orphans Fund; Boy's and Girl's Club of Santa Ana; the Orangewood Children's Home; D.A.R.E. Youth Programs; and the United Cerebral Palsy Foundation of Orange County; and

WHEREAS, Santa Ana Fire Chief Mark Martin, Santa Ana Police Chief Paul Walters, Santa Ana Police Captain Bruce Carlson, Santa Ana Police Lieutenant Dave Petko, Santa Ana Police Sergeant Paul Gonsalves, Santa Ana Police Corporal Brad Hadley, Santa Ana Police Officer Bob Reed, Santa Ana Police Investigator Tom Serafin, Santa Ana Police Officer Chuck Saale, Santa Ana Police Communications Supervisor Tina Horner, and Santa Ana Police Investigator Eric Demopoulos deserve recognition for their efforts in making sure that the 2002 Games benefit the community and its organizations; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature of the State of California thanks all the police and fire departments in the State for their continued dedication and commitment to the citizens of California; and be it further

*Resolved,* That the Legislature especially thanks the City of Santa Ana and the Santa Ana Police Department for their efforts in ensuring the success of the 2002 California Police and Fire Games; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to the author for distribution.

---

## RESOLUTION CHAPTER 82

Senate Concurrent Resolution No. 83—Relative to Reflex Sympathetic Dystrophy (RSD) Syndrome Awareness Month.

[Filed with Secretary of State June 17, 2002.]

WHEREAS, Reflex Sympathetic Dystrophy (RSD) Syndrome, a progressive multisymptom, multisystem, neuromuscular, and neurovascular disorder, is a debilitating chronic pain disease simultaneously involving nerves, muscles, blood vessels, skin, bones, and tissue; and

WHEREAS, It can develop after an injury, minor or major, and generally occurs in a limb; and

WHEREAS, RSD attacks the sympathetic nervous system, causing it to become confused, leading to a variety of symptoms that result in devastating consequences; and

WHEREAS, If misdiagnosed or left untreated, RSD begins to damage the surrounding tissues, and can spread to virtually all areas of the body and ultimately lead to total disability; and

WHEREAS, Early diagnosis is crucial; there is a short window of time during which RSD can possibly be mitigated, usually within the first three to six months after onset; and

WHEREAS, Proper aggressive treatment by qualified pain management professionals can lead to relief of pain and associated symptoms; and

WHEREAS, As RSD progresses, treatment becomes increasingly difficult; and

WHEREAS, Although millions in the United States are affected with RSD, exceeding the combined totals of those with HIV/AIDS, breast cancer, and multiple sclerosis, it is not well known by the public or some medical professionals, and this lack of knowledge causes many patients to suffer needlessly for many years; and

WHEREAS, RSD knows no age, gender, race, or nationality barrier and can strike anyone at anytime; and

WHEREAS, Other events that can cause RSD include infections, cuts, pricks of fingers or toes, soft tissue injuries, crush injuries, injury to any area rich in nerve endings, fractures, sprains, dislocations, broken bones, multiple trauma to a particular body part, surgical procedures, invasive procedures, and repetitive motion disorders, such as that which causes carpal tunnel syndrome; and

WHEREAS, Some signs and symptoms of RSD include severe burning pain in a localized area that is out of proportion to the severity of the injury, localized edema or swelling that may not always be apparent in the later stages, hyperesthesia, which is oversensitivity to touch and light pressure, vasospasm, which affects color and temperature of skin, muscle atrophy, constant burning pain, decreased range of motion, muscle spasms, stiffness, restricted mobility, and rapid hair and nail growth; and

WHEREAS, Although RSD sufferers may experience some or all of the signs and symptoms, the one common element is constant burning pain, the intensity of which can often fluctuate due to use of the affected area, mental distress, environmental temperature, visual and auditory stimuli, or for no apparent reason; and

WHEREAS, Secondary to the physical suffering, those with progressive RSD may suffer from great emotional and social harm including depression, anxiety, isolation, career loss, financial ruin, abandonment by family and friends, life-long disability, and suicide; and

WHEREAS, Although RSD dates back to the Civil War, there is no known cure; and

WHEREAS, Medical professionals must find the cause before they can find the cure; and

WHEREAS, Because RSD is not a well known disease it does not receive adequate funding for needed medical research; and

WHEREAS, Greater awareness of RSD in the medical community and general public will lead to earlier intervention and increased funding resulting in much improved, long-term quality of life; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the California Legislature proclaims May 2002 as Reflex Sympathetic Dystrophy (RSD) Syndrome Awareness Month; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 83

Assembly Concurrent Resolution No. 119—Relative to the Aerospace Highway.

[Filed with Secretary of State June 20, 2002.]

WHEREAS, The aerospace industry is a major economic and social force in America, employing approximately 900,000 people; and

WHEREAS, California has been a leader in the aerospace industry; and

WHEREAS, Edwards Air Force Base, the home of the Air Force Flight Test Center (AFFTC), has served the aerospace world for more than 50 years, from America's first jet airplane to the landings of the space shuttle; and

WHEREAS, Numerous milestones in flight have taken place at the AFFTC in its 50-year history, including the following: Air Force Captain Charles E. "Chuck" Yeager piloting the rocket-powered Bell X-1 became the first man to penetrate the so-called "sound barrier" in 1947, and in 1949, he completed the first, and to this day, only ground takeoff of an experimental rocket plane in the Bell X-1; and

WHEREAS, More than 150 confirmed "first flights" have taken off, from Edwards Air Force Base, and this list represents a conservative compilation of confirmed first flights of new experimental and prototype air vehicles; and

WHEREAS, The XB-70, conceived in the 1950s as a high-altitude bomber that could fly three times the speed of sound (Mach 3) and considered one of the world's most exotic airplanes, was used as a research aircraft for the advanced study of aerodynamics, propulsion, and other subjects related to large supersonic aircraft; and

WHEREAS, In 1953, Jacqueline Cochran, flying a Canadian-built (Canadair) F-86 Sabre, became the first woman to exceed the speed of sound and established a new women's absolute speed record of 652.337 mph over a low-level course at Edwards Air Force Base; and

WHEREAS, In 1953, the prototype North American YF-100A Super Sabre became the first aircraft in history to fly supersonic in level flight on its maiden flight from Edwards Air Force Base; and

WHEREAS, In 1954, test pilot Major Arthur "Kit" Murray piloted the Bell X-1A to a new altitude record of 90,440 feet and became the first man to actually see the curvature of the earth; and

WHEREAS, In 1958, test pilot Captain Walter Irwin set a new official world absolute speed record when he piloted a Lockheed F-104A Starfighter to an average speed of 1,404.09 mph; and

WHEREAS, In 1959, with test pilot Major Joe Jordan at the controls, a Lockheed F-104C became the first jet-powered (air-breathing) aircraft to climb above 100,000 feet; and

WHEREAS, In 1962, Major Bob White became the first man to fly an airplane above 300,000 feet, to 314,750 feet, and the first to fly an airplane in near space (above 50 miles) and was the first of eight X-15 test pilots at Edwards Air Force Base to earn their astronaut's wings by flying an airplane above 50 miles; and

WHEREAS, In 1967, Air Force test pilot Major William J. "Pete" Knight piloted the modified X-15A-2 to a speed of Mach 6.7 (4,520 mph) and thereby recorded the fastest speed anyone has ever flown in an airplane; and

WHEREAS, In 1976, Air Force Captain Eldon Joersz set a new official world absolute speed record when he piloted a Lockheed SR-71A to an average speed of 2,193.64 mph at Edwards Air Force Base; and

WHEREAS, In 1977, the nonorbiting Space Shuttle Enterprise demonstrated the soundness of the shuttle design and confirmed the approach and landing techniques after being launched from a 747 and landing on Rogers Dry Lake 5 minutes and 21 seconds later; and

WHEREAS, In 1979, at a remote location, test pilot Lieutenant Colonel N.K. "Ken" Dyson completed the final flight of Lockheed's classified Have Blue low-observables concept demonstrator flight test program, and convincingly demonstrated low observability against a wide array of the most sophisticated air- and ground-based air defense systems, and the successful conduct of these tests led to the development of the F-117A Nighthawk in the early 1980s and the stealth revolution began in earnest; and

WHEREAS, In 1981, the Space Shuttle Columbia landed safely on Rogers Dry Lake following its first orbital mission, and marked the first time in history an orbital vehicle had left earth under rocket power and returned on the wings of an aircraft; and

WHEREAS, In 1986, Dick Rutan and Jeanna Yeager piloted the experimental Voyager, and nine days, three minutes and 44 seconds after taking off from Edwards Air Force Base, the aircraft touched down on Rogers Dry Lake after completing the first-ever nonstop, unrefueled flight around the world; and

WHEREAS, Given the importance of the aerospace industry to our nation and the significant contribution of the AFFTC at Edwards Air Force Base to the Department of Defense and the State of California, it would be a fitting tribute to name a portion of State Highway 14 near Edwards Air Force Base as the Aerospace Highway; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate concurring,* That the Legislature hereby dedicates the portion of State Highway 14, from the Pearblossom Highway to State Highway 395, as the Aerospace Highway; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the Department of Transportation and to the author for appropriate distribution.

---

#### RESOLUTION CHAPTER 84

Assembly Concurrent Resolution No. 120—Relative to the Aerospace Industry Monument.

[Filed with Secretary of State June 20, 2002.]

WHEREAS, The aerospace industry is a major economic and social force in America, employing approximately 900,000 people; and

WHEREAS, California has been a leader in the aerospace industry; and

WHEREAS, Edwards Air Force Base, the home of the Air Force Flight Test Center (AFFTC), has served the aerospace world for more than 50 years, from America's first jet airplane to the landings of the space shuttle; and

WHEREAS, Numerous milestones in flight have taken place at the AFFTC in its 50-year history, including the following: Air Force Captain Charles E. "Chuck" Yeager piloting the rocket-powered Bell X-1 became the first man to penetrate the so-called "sound barrier" in 1947, and in 1949, he completed the first, and to this day, only ground takeoff of an experimental rocket plane in the Bell X-1; and

WHEREAS, More than 150 confirmed "first flights" have taken off from Edwards Air Force Base, and this list represents a conservative compilation of confirmed first flights of new experimental and prototype air vehicles; and

WHEREAS, In 1953, Jacqueline Cochran, flying a Canadian-built (Canadair) F-86 Sabre, became the first woman to exceed the speed of sound and established a new women's absolute speed record of 652.337 mph over a low-level course at Edwards Air Force Base; and

WHEREAS, In 1953, the prototype North American YF-100A Super Sabre became the first aircraft in history to fly supersonic in level flight on its maiden flight from Edwards Air Force Base; and

WHEREAS, In 1954, test pilot Major Arthur “Kit” Murray piloted the Bell X-1A to a new altitude record of 90,440 feet and became the first man to actually see the curvature of the earth; and

WHEREAS, In 1958, test pilot Captain Walter Irwin set a new official world absolute speed record when he piloted a Lockheed F-104A Starfighter to an average speed of 1,404.09 mph; and

WHEREAS, In 1959, with test pilot Major Joe Jordan at the controls, a Lockheed F-104C became the first jet-powered (air-breathing) aircraft to climb above 100,000 feet; and

WHEREAS, In 1962, Major Bob White became the first man to fly an airplane above 300,000 feet to 314,750 feet and the first to fly an airplane in near space (above 50 miles), and was the first of eight X-15 test pilots at Edwards Air Force Base to earn their astronaut’s wings by flying an airplane above 50 miles; and

WHEREAS, In 1967, Air Force test pilot Major William J. “Pete” Knight piloted the modified X-15A-2 to a speed of Mach 6.7 (4,520 mph) and thereby recorded the fastest speed anyone has ever flown in an airplane; and

WHEREAS, In 1976, Air Force Captain Eldon Joersz set a new official world absolute speed record when he piloted a Lockheed SR-71A to an average speed of 2,193.64 mph at Edwards Air Force Base; and

WHEREAS, In 1977, the nonorbiting Space Shuttle Enterprise demonstrated the soundness of the shuttle design and confirmed the approach and landing techniques after being launched from a 747 and landing on Rogers Dry Lake 5 minutes and 21 seconds later; and

WHEREAS, In 1979, at a remote location, test pilot Lieutenant Colonel N.K. “Ken” Dyson completed the final flight of Lockheed’s classified Have Blue low-observables concept demonstrator flight test program, and convincingly demonstrated low observability against a wide array of the most sophisticated air- and ground-based air defense systems, and the successful conduct of these tests led to the development of the F-117A Nighthawk in the early 1980s and the stealth revolution began in earnest; and

WHEREAS, In 1981, the Space Shuttle Columbia landed safely on Rogers Dry Lake following its first orbital mission, and marked the first time in history an orbital vehicle had left earth under rocket power and returned on the wings of an aircraft; and

WHEREAS, In 1986, Dick Rutan and Jeanna Yeager piloted the experimental Voyager, and nine days, three minutes and 44 seconds after taking off from Edwards Air Force Base, the aircraft touched down on

Rogers Dry Lake after completing the first-ever nonstop, unrefueled flight around the world; and

WHEREAS, NASA Dryden Air Force Rocket Propulsion Laboratory (AFRPL) at Edwards Air Force Base has contributed to the defense of our country since 1954 through the development of virtually all the nation's rocket propulsion technology; and

WHEREAS, Since its inception, the AFRPL initiated the development and testing of several rocket engines at the Edwards Rocket Site, including the first ATLAS Intercontinental Ballistic Missile (ICBM) in 1956; the first full-scale Minuteman solid propellant ICBM in 1959; the Pratt & Whitney XLR-129 Rocket Engine, which served as the precursor to the Rocketdyne "Space Shuttle Main Engine" in 1964; and the Titan 34 Solid Rocket Booster from the nozzle down to return Titan 34 to the nation's launch service after the Challenger tragedy; and

WHEREAS, The Edwards Rocket Site played a role in President John F. Kennedy's "Race to the Moon" when in 1961 Rocketdyne performed the first test firing of the 1,500,000 pound thrust F-1 Engine for the Manned Lunar Launch Program, and was subsequently used as the location for over 7,000 development and acceptance test firings of the F-1 Engine, that included every engine used to launch men to the moon; and

WHEREAS, AFRPL at the Edwards Rocket Site has continued to play a role in developing space technology since man first walked on the moon, helping to develop the nation's largest hydrogen rocket engine for the Boeing Evolved Expendable Launch Vehicle and "Attitude Control Thrusters Systems" for satellite and space maneuvering applications; and

WHEREAS, In 1953 the former Palmdale Airport was officially converted into Air Force Plant 42, and since then, under the direction of the United States government, has supported facilities for the production, engineering, final assembly, and flight testing of many notable high-performance aircraft from Boeing, Lockheed-Martin, and Northrop Grumman, including the F-100 Super Sabre, F-104 Starfighter, SR-71 Blackbird, B-1 Lancer, Space Shuttle, F-117 Nighthawk, B-2 Spirit, and U-2S reconnaissance plane; and

WHEREAS, Air Force Plant 42 has consistently made great contributions to aeronautics and astronautics in America, winning nine prestigious Collier Trophies in recognition for improving the performance, efficiency, and safety of air and space vehicles; and

WHEREAS, Air Force Plant 42 is a major part of the economic vitality of the Antelope Valley, employing approximately 8,500 workers in and around the airfield complex, and bringing a half billion dollars in wages to the local community and millions more in local contracts; and

WHEREAS, Several of the world's leading aerospace and defense firms as well as local subcontractors and suppliers have recognized the importance of aerospace in the region, and have joined together to form a cooperative organization called the Antelope Valley Aerospace Alliance, which is dedicated to the economic survival and improvement of the aerospace economy located in the vicinity of Edwards Air Force Base and United States Air Force Plant 42; and

WHEREAS, The Antelope Valley Aerospace Alliance is a unique-in-the-nation organization that has grown to represent over 20,000 military and civilian members involved with the design, development, production, flight test, and support of advanced military and civilian air and spacecraft; and

WHEREAS, It would be a fitting tribute to erect a monument and plaque to commemorate the major milestones within the aerospace industry that have taken place in the Antelope Valley; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate concurring,* That the Department of Transportation is requested to grant, without charge, the necessary encroachment permit authorizing a historical monument and plaque dedicated to commemorate the major milestones within the aerospace industry that have taken place in the Antelope Valley, to be placed within the right-of-way of the vista point overlooking Palmdale Lake on State Highway Route 14, which plaque will read substantially as follows:

Within the Antelope Valley, significant aerospace accomplishments have occurred throughout the century. This monument is dedicated to all the craftsmen, engineers, technicians, and pilots who have made these strides in aerospace possible, including:

Air Force Captain Charles E. "Chuck" Yeager's breaking of the "sound barrier" in the rocket-powered Bell X-1 in 1947.

Air Force test pilot Major William J. "Pete" Knight's record as the "Fastest Man Alive" flying at a speed of Mach 6.7 (4,520 mph) in the modified X-15A-2 in 1967.

The historic landing of the Space Shuttle Columbia in 1981, which landed safely on Rogers Dry Lake following its first orbital mission.

More than 150 "first flights," which greatly expanded the possibilities of flights on earth and in space.

Aircraft manufacturing milestones include:

- (a) The B-2 and B-1B bombers.
- (b) The F-117 Stealth Fighter.
- (c) The SR-71 "Blackbird" spy plane.

(d) The Space Shuttle orbiters.

The work of the men and women who contributed to these accomplishments cannot be overstated. Their contributions have made the Antelope Valley a leading aerospace force not only in California, but also in the United States; and be it further

*Resolved*, That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers or to permit an appropriate private source to erect a monument; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the Department of Transportation and to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 85

Assembly Concurrent Resolution No. 214—Relative to National Flag Day.

[Filed with Secretary of State June 20, 2002.]

WHEREAS, By Act of Congress of the United States dated June 14, 1777, the first official Flag of the United States was adopted; and

WHEREAS, By Act of Congress dated August 3, 1949, June 14 of each year was designated “National Flag Day”; and

WHEREAS, Congress has requested the President to issue annually a proclamation designating the week in which June 14 occurs as “National Flag Week”; and

WHEREAS, On December 8, 1982, the National Flag Day Foundation was chartered to conduct educational programs and to encourage all Americans to “Pause for the Pledge of Allegiance” as part of the celebration of National Flag Day throughout the nation; and

WHEREAS, By Act of Congress, dated June 20, 1985, Public Law 99-54 was passed to have the “Pause for the Pledge of Allegiance” as part of the celebration of National Flag Day throughout the nation; and

WHEREAS, Flag Day celebrates our nation’s symbol of unity, a democracy in a republic, and stands for our country’s devotion to freedom, to the rule of law, and to equal rights; and

WHEREAS, Since the founding of our nation, the flag has held a unique place in the hearts of those brave men and women who have served in our nation’s armed forces, whereby in each of our nation’s wars examples may be found of soldiers offering their lives not only in

defense of our nation, but also in honor of our flag and the principles it embodies; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That June 14, 2002, is hereby designated as Flag Day of the State of California; and be it further

*Resolved,* That the Legislature of the State of California urges all citizens of the State of California to pause at 7 p.m. EDT on June 14, 2002, for the 23rd annual national “Pause for the Pledge of Allegiance,” and join all Americans in reciting the Pledge of Allegiance to the Flag of the United States of America; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 86

Senate Concurrent Resolution No. 74—Relative to food and agriculture.

[Filed with Secretary of State June 24, 2002.]

WHEREAS, California’s agricultural industry contributes 27 billion dollars to California’s economy each year and provides 10 percent of the entire workforce in California; and

WHEREAS, According to the California Department of Food and Agriculture, California is the largest agricultural state in the United States, producing over 350 commodities; and

WHEREAS, California is the top United States producer of many fruits and vegetables, such as almonds, artichokes, dates, figs, raisins, kiwifruit, olives, clingstone peaches, pistachios, dried plums, and walnuts; and

WHEREAS, For over 50 consecutive years, California has been the number one agricultural state in the nation, and the producer of about half of the nation’s fruits, nuts, and vegetables; and

WHEREAS, This state produces the majority of grapes grown in the nation, and some of the best wine in the world; and

WHEREAS, California produces almost one out of every five glasses of milk in the nation; and

WHEREAS, The California Department of Food and Agriculture (CDFA) oversees the safety of milk and milk products and ensures that inspections not covered by the United States Department of Agriculture are completed; and

WHEREAS, Meat and poultry products standards ensure that these products are wholesome and not adulterated; and

WHEREAS, More than 20 percent of all California's agricultural production is shipped to foreign markets; and

WHEREAS, California's agricultural expertise and knowledge not only keep the world's population fed, but also keep the environment greener and the food supply safer; and

WHEREAS, Through donations, efforts are regularly made to reduce international starvation in needy countries; and

WHEREAS, Many other states and countries lack the comprehensive food safety standards that establishes California produce as the standard bearer; and

WHEREAS, Since September 11, 2001, California has increased, reassessed, and strengthened emergency response plans regarding food related terrorism; and

WHEREAS, Despite California's current fiscal situation, the California Department of Food and Agriculture plans to continue its efforts to keep the state's food supply safe; and

WHEREAS, The Golden State is, by far, the number one exporter of produce in the United States and, in addition, despite recent events, remains the largest and safest food and agricultural producer in the nation; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature of the State of California respectfully recognize and honor the men and women of California who have contributed to the excellence of the agricultural industry, and recognize that many steps are taken and millions of people are involved in the delivery of safe food and other agricultural products to consumers everyday; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the Governor.

---

## RESOLUTION CHAPTER 87

Senate Concurrent Resolution No. 77—Relative to Juneteenth, Emancipation Day.

[Filed with Secretary of State June 24, 2002.]

WHEREAS, June 19, 2002, marks the 137th anniversary of Juneteenth, Emancipation Day; and

WHEREAS, Juneteenth, or June 19, 1865, is considered the date when the last slaves in America were freed when General Gordon Granger rode into Galveston, Texas, and issued General Order No. 3, almost 2<sup>1</sup>/<sub>2</sub> years

after President Abraham Lincoln signed the Emancipation Proclamation; and

WHEREAS, President Lincoln issued the Emancipation Proclamation on September 22, 1862, notifying the states in rebellion against the Union that if they did not return to the Union by January 1, 1863, he would declare their slaves forever free, a proclamation that was ignored by those states that seceded from the Union and that did not apply to those slave-holding states that did not rebel against the Union, resulting in about 8,000,000 slaves unaffected by the proclamation; and

WHEREAS, Juneteenth is observed as a legal holiday in Texas and Oklahoma and is celebrated annually in more than 200 cities in the United States, with some cities sponsoring weeklong celebrations culminating on June 19 and others holding shorter celebrations; and

WHEREAS, Juneteenth symbolizes for many African-Americans what the Fourth of July symbolizes for all Americans — freedom, serves as a historical milestone reminding Americans of the triumph of the human spirit over the cruelty of slavery, honors those African-American ancestors who survived the inhumane institution of bondage, and demonstrates pride in the marvelous legacy of resistance and perseverance those ancestors left behind; and

WHEREAS, Freedom meant more than the right to travel freely; it meant the right to name one's self, to legalize marriages, to seek an education, to assemble and openly worship, and, for the first time, to have the laws of the United States protect the rights of Blacks; and

WHEREAS, Although the promise of emancipation gave freed men optimism for the future, few realized that slavery's bitter legacy was just beginning to unfold and that equality was to remain an elusive dream; and

WHEREAS, Ex-slaves, who entered freedom under the worst possible conditions, most penniless and homeless with only the clothes on their backs, were, as Frederick Douglas said, "free, without roofs to cover them, or bread to eat, or land to cultivate, and as a consequence died in such numbers as to awaken the hope of their enemies that they would soon disappear"; and

WHEREAS, By 1877, the end of Reconstruction, the North had abandoned Black Americans to the will of southern Whites, who, through violence, racial discrimination, and Jim Crow laws, succeeded in disenfranchising them, resulting in more than 100 years of oppression, while Blacks turned to the only institution that gave them hope, the church; and

WHEREAS, The fact that it took the Civil War to enforce the Emancipation Proclamation and the 13th Amendment to the United States Constitution, and to forcibly end slavery, left a bitter legacy that continues to divide American society and still haunts our country; and

WHEREAS, African-Americans celebrate the Fourth of July in honor of American Independence Day, but history reminds us that Blacks were still enslaved when the United States obtained its independence; and

WHEREAS, According to historian John Hope Franklin, “the Founding Fathers (by allowing slavery) set the stage for every succeeding generation of Americans to apologize, compromise and temporize on those principles of liberty that were supposed to be the very foundation of our system of government and way of life ... that is why this nation tolerated and, indeed, nurtured the cultivation of racism that has been as insidious as it has been pervasive”; and

WHEREAS, The legacy of racism has grown into perhaps the greatest internal threat that this country faces because, as John Hope Franklin aptly put it, “slavery weakened America’s moral authority”; and

WHEREAS, Despite living under the most inhumane conditions known to humankind, Blacks contributed everything from agricultural inventions, to medical breakthroughs and to music; crafted incredible sculptures, designed beautiful buildings, and helped build a nation; and preserved a culture and succeeded in passing down a legacy of music, language, food, religion, and a lesson in survival; and

WHEREAS, Slavery taught America a lesson of cooperation demonstrated by the fact that Blacks and Whites together created an antislavery movement that ultimately succeeded, fought and died together to force an end to slavery, and have worked throughout the nation’s history for social justice; and

WHEREAS, While the painful memory of slavery makes it difficult to celebrate Juneteenth, it is the positive legacy of perseverance and cooperation that makes it impossible to ignore; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature of the State of California hereby declares that each June 19 shall be known as Juneteenth, Emancipation Day, throughout the State of California, that all Californians celebrate freedom from the vestiges of racial discrimination and the abolition of all badges and incidents of slavery; and be it further

*Resolved,* That the Legislature urges all Californians to take this opportunity to reflect on the significant role that African-Americans have played in the history of the United States, and California in particular, and on the positive impact that African-Americans continue to make on society; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the State Library, the State Archives, the State Department of Education, and the author for appropriate distribution.

---

## RESOLUTION CHAPTER 88

Assembly Constitutional Amendment No. 15—A resolution to propose to the people of the State of California an amendment to the Constitution of the State, by amending Sections 1, 6, 8, 10, 15, and 16 of, amending and repealing Section 23 of, and repealing Section 5 of, Article VI thereof, relating to court consolidation.

[Filed with Secretary of State June 27, 2002.]

*Resolved by the Assembly, the Senate concurring,* That the Legislature of the State of California at its 2001–02 Regular Session commencing on the fourth day of December 2000, two-thirds of the membership of each house concurring, hereby proposes to the people of the State of California that the Constitution of the State be amended as follows:

First—That Section 1 of Article VI is amended to read:

SEC. 1. The judicial power of this State is vested in the Supreme Court, courts of appeal, and superior courts, all of which are courts of record.

Second—That Section 5 of Article VI is repealed.

Third—That Section 6 of Article VI is amended to read:

SEC. 6. (a) The Judicial Council consists of the Chief Justice and one other judge of the Supreme Court, three judges of courts of appeal, 10 judges of superior courts, two nonvoting court administrators, and any other nonvoting members as determined by the voting membership of the council, each appointed by the Chief Justice for a three-year term pursuant to procedures established by the council; four members of the State Bar appointed by its governing body for three-year terms; and one member of each house of the Legislature appointed as provided by the house.

(b) Council membership terminates if a member ceases to hold the position that qualified the member for appointment. A vacancy shall be filled by the appointing power for the remainder of the term.

(c) The council may appoint an Administrative Director of the Courts, who serves at its pleasure and performs functions delegated by the council or the Chief Justice, other than adopting rules of court administration, practice and procedure.

(d) To improve the administration of justice the council shall survey judicial business and make recommendations to the courts, make recommendations annually to the Governor and Legislature, adopt rules for court administration, practice and procedure, and perform other functions prescribed by statute. The rules adopted shall not be inconsistent with statute.

(e) The Chief Justice shall seek to expedite judicial business and to equalize the work of judges. The Chief Justice may provide for the

assignment of any judge to another court but only with the judge's consent if the court is of lower jurisdiction. A retired judge who consents may be assigned to any court.

(f) Judges shall report to the council as the Chief Justice directs concerning the condition of judicial business in their courts. They shall cooperate with the council and hold court as assigned.

Fourth—That Section 8 of Article VI is amended to read:

SEC. 8. (a) The Commission on Judicial Performance consists of one judge of a court of appeal and two judges of superior courts, each appointed by the Supreme Court; two members of the State Bar of California who have practiced law in this State for 10 years, each appointed by the Governor; and six citizens who are not judges, retired judges, or members of the State Bar of California, two of whom shall be appointed by the Governor, two by the Senate Committee on Rules, and two by the Speaker of the Assembly. Except as provided in subdivisions (b) and (c), all terms are for four years. No member shall serve more than two four-year terms, or for more than a total of 10 years if appointed to fill a vacancy.

(b) Commission membership terminates if a member ceases to hold the position that qualified the member for appointment. A vacancy shall be filled by the appointing power for the remainder of the term. A member whose term has expired may continue to serve until the vacancy has been filled by the appointing power. Appointing powers may appoint members who are already serving on the commission prior to March 1, 1995, to a single two-year term, but may not appoint them to an additional term thereafter.

(c) To create staggered terms among the members of the Commission on Judicial Performance, the following members shall be appointed, as follows:

(1) Two members appointed by the Supreme Court to a term commencing March 1, 1995, shall each serve a term of two years and may be reappointed to one full term.

(2) One attorney appointed by the Governor to a term commencing March 1, 1995, shall serve a term of two years and may be reappointed to one full term.

(3) One citizen member appointed by the Governor to a term commencing March 1, 1995, shall serve a term of two years and may be reappointed to one full term.

(4) One member appointed by the Senate Committee on Rules to a term commencing March 1, 1995, shall serve a term of two years and may be reappointed to one full term.

(5) One member appointed by the Speaker of the Assembly to a term commencing March 1, 1995, shall serve a term of two years and may be reappointed to one full term.

(6) All other members shall be appointed to full four-year terms commencing March 1, 1995.

Fifth—That Section 10 of Article VI is amended to read:

SEC. 10. The Supreme Court, courts of appeal, superior courts, and their judges have original jurisdiction in habeas corpus proceedings. Those courts also have original jurisdiction in proceedings for extraordinary relief in the nature of mandamus, certiorari, and prohibition. The appellate division of the superior court has original jurisdiction in proceedings for extraordinary relief in the nature of mandamus, certiorari, and prohibition directed to the superior court in causes subject to its appellate jurisdiction.

Superior courts have original jurisdiction in all other causes.

The court may make any comment on the evidence and the testimony and credibility of any witness as in its opinion is necessary for the proper determination of the cause.

Sixth—That Section 15 of Article VI is amended to read:

SEC. 15. A person is ineligible to be a judge of a court of record unless for 10 years immediately preceding selection, the person has been a member of the State Bar or served as a judge of a court of record in this State.

Seventh—That Section 16 of Article VI is amended to read:

SEC. 16. (a) Judges of the Supreme Court shall be elected at large and judges of courts of appeal shall be elected in their districts at general elections at the same time and places as the Governor. Their terms are 12 years beginning the Monday after January 1 following their election, except that a judge elected to an unexpired term serves the remainder of the term. In creating a new court of appeal district or division the Legislature shall provide that the first elective terms are 4, 8, and 12 years.

(b) Judges of superior courts shall be elected in their counties at general elections except as otherwise necessary to meet the requirements of federal law. In the latter case the Legislature, by two-thirds vote of the membership of each house thereof, with the advice of judges within the affected court, may provide for their election by the system prescribed in subdivision (d), or by any other arrangement. The Legislature may provide that an unopposed incumbent's name not appear on the ballot.

(c) Terms of judges of superior courts are six years beginning the Monday after January 1 following their election. A vacancy shall be filled by election to a full term at the next general election after the second January 1 following the vacancy, but the Governor shall appoint a person to fill the vacancy temporarily until the elected judge's term begins.

(d) (1) Within 30 days before August 16 preceding the expiration of the judge's term, a judge of the Supreme Court or a court of appeal may

file a declaration of candidacy to succeed to the office presently held by the judge. If the declaration is not filed, the Governor before September 16 shall nominate a candidate. At the next general election, only the candidate so declared or nominated may appear on the ballot, which shall present the question whether the candidate shall be elected. The candidate shall be elected upon receiving a majority of the votes on the question. A candidate not elected may not be appointed to that court but later may be nominated and elected.

(2) The Governor shall fill vacancies in those courts by appointment. An appointee holds office until the Monday after January 1 following the first general election at which the appointee had the right to become a candidate or until an elected judge qualifies. A nomination or appointment by the Governor is effective when confirmed by the Commission on Judicial Appointments.

(3) Electors of a county, by majority of those voting and in a manner the Legislature shall provide, may make this system of selection applicable to judges of superior courts.

Eighth—That Section 23 of Article VI is amended to read:

SEC. 23. (a) The purpose of the amendments to Sections 1, 4, 5, 6, 8, 10, 11, and 16, of this article, and the amendments to Section 16 of Article I, approved at the June 2, 1998, primary election is to permit the Legislature to provide for the abolition of the municipal courts and unify their operations within the superior courts. Notwithstanding Section 8 of Article IV, the implementation of, and orderly transition under, the provisions of the measure adding this section may include urgency statutes that create or abolish offices or change the salaries, terms, or duties of offices, or grant franchises or special privileges, or create vested rights or interests, where otherwise permitted under this Constitution.

(b) When the superior and municipal courts within a county are unified, the judgeships in each municipal court in that county are abolished and the previously selected municipal court judges shall become judges of the superior court in that county. The term of office of a previously selected municipal court judge is not affected by taking office as a judge of the superior court. The 10-year membership or service requirement of Section 15 does not apply to a previously selected municipal court judge. Pursuant to Section 6, the Judicial Council may prescribe appropriate education and training for judges with regard to trial court unification.

(c) Except as provided by statute to the contrary, in any county in which the superior and municipal courts become unified, the following shall occur automatically in each preexisting superior and municipal court:

(1) Previously selected officers, employees, and other personnel who serve the court become the officers and employees of the superior court.

(2) Preexisting court locations are retained as superior court locations.

(3) Preexisting court records become records of the superior court.

(4) Pending actions, trials, proceedings, and other business of the court become pending in the superior court under the procedures previously applicable to the matters in the court in which the matters were pending.

(5) Matters of a type previously within the appellate jurisdiction of the superior court remain within the jurisdiction of the appellate division of the superior court.

(6) Matters of a type previously subject to rehearing by a superior court judge remain subject to rehearing by a superior court judge, other than the judge who originally heard the matter.

(7) Penal Code procedures that necessitate superior court review of, or action based on, a ruling or order by a municipal court judge shall be performed by a superior court judge other than the judge who originally made the ruling or order.

(d) This section shall remain in effect only until January 1, 2007, and as of that date is repealed.

---

## RESOLUTION CHAPTER 89

Assembly Concurrent Resolution No. 135—Relative to highways.

[Filed with Secretary of State June 27, 2002.]

WHEREAS, State Highway Route 1 is a north-south highway, spanning most of California, from the City of San Juan Capistrano to Mendocino County; and

WHEREAS, A portion of State Highway Route 1 passes through Ventura County; and

WHEREAS, State Highway Route 1 has a strong historical significance for the military personnel of the Vietnam War era as it passes beside the United States Naval Weapons Station at Seal Beach, the United States Coast Guard Headquarters at Long Beach, Vandenberg Air Force Base, Point Mugu Naval Weapons Station, the United States Coast Guard Station at Oxnard, the Ventura County Naval Base, Camp San Luis Obispo Military Reserve, the Ventura County California Air National Guard Base, the United States Naval Reservation at Monterey, and Fort Hunter Liggett, from which military personnel were trained and dispatched to Vietnam; and

WHEREAS, The State of California has the largest United States veteran population in the nation, comprised of some 3.3 million armed services veterans and representing 12.3 percent of the nationwide veteran population of nearly 27 million; and

WHEREAS, More than 350,000 California veterans served in the Vietnam War, which resulted in 40,000 of them being wounded and 5,822 killed or missing in action, representing more than 10 percent of the nation's total casualties; and

WHEREAS, More California residents died in the Vietnam War than residents of any other state, and more Californians received the Medal of Honor, the Bronze Star, and the Purple Heart than veterans of any other state; and

WHEREAS, The residents of Ventura County wish to express their gratitude and appreciation for the sacrifices these Vietnam veterans have made for their country; and

WHEREAS, It is fitting and proper that State Highway Route 1 in Ventura County be designated as the Ventura County Vietnam Veterans Memorial Highway and that the portion of State Highway Route 126 between the City of Santa Paula and State Highway Route 101 be designated as the Korean War Veterans' Memorial Highway ; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature hereby designates that portion of State Highway Route 1 located in Ventura County as the Ventura County Vietnam Veterans Memorial Highway and that portion of State Highway Route 126 between the City of Santa Paula and State Highway Route 101 as the Korean War Veterans' Memorial Highway ; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing these special designations, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the Department of Transportation and to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 90

Assembly Concurrent Resolution No. 156—Relative to the Kumeyaay Highway.

[Filed with Secretary of State June 27, 2002.]

WHEREAS, The people of the Kumeyaay Indian Nation, once referred to as Diegueño by the Spanish, are the original native inhabitants of San Diego County and have lived in that region for more than 10,000 years; and

WHEREAS, Historically, the Kumeyaay greeted the Spanish when they first sailed into San Diego harbor with the Juan Rodriguez Cabrillo expedition of 1542; and

WHEREAS, The boundaries of the Kumeyaay lands changed with the arrival of the Europeans, but once extended from the Pacific Ocean, south to Ensenada in Baja Norte, Mexico, east to the sand dunes of the Colorado River in Imperial Valley and north to Warner Springs Valley; and

WHEREAS, The Kumeyaay had a sophisticated social, political, and religious structure and were wise stewards of the land and natural resources; and

WHEREAS, The original trails through the mountains and connecting desert and the coast and inlands were cleared and used by the Kumeyaay, some of which evolved into current freeways in San Diego and Imperial Counties; and

WHEREAS, Today Kumeyaay tribal governments have jurisdiction over approximately 70,000 acres of federal trust land concentrated in reservations in East County from El Cajon, Lakeside, Poway, and Ramona to the desert; and

WHEREAS, Today the Kumeyaay nation is represented by 13 separate bands, those being the Barona, Campo, Cuyapaipe, Inaja-Cosmit, Jamul, LaPosta, Los Coyotes, Manzanita, Mesa Grande, San Pasqual, Santa Ysabel, Sycuan, and Viejas Bands; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That Interstate Highway Route 8 from Greenfield Drive on the eastern city boundary of El Cajon to Nimitz Boulevard in Mission Bay in San Diego County, be officially named the Kumeyaay Highway; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the Department of Transportation and to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 91

Assembly Concurrent Resolution No. 172—Relative to Postpartum Mood and Anxiety Disorder Awareness Month.

[Filed with Secretary of State June 27, 2002.]

WHEREAS, Maternal health and, more specifically, the mental health of women before, during, and after childbirth is an issue of great concern to women and their families and is, therefore, of interest to the California Legislature; and

WHEREAS, Postpartum depression or other postpartum disorders are serious and debilitating disorders that affect childbearing women and their families; and

WHEREAS, Postpartum disorders can take many forms, including depression, anxiety, panic disorder, obsessive-compulsive disorder, and psychosis, and, therefore, it is appropriate to use the broader, more accurate term of “postpartum mood and anxiety disorders” to describe the many levels and degrees of severity of these afflictions, which can have potentially serious repercussions upon the psychological, social, and physical health of mothers, children, and families; and

WHEREAS, It is critical that all Californians become aware of how common postpartum mood and anxiety disorders are; that they affect all categories of women regardless of their age, race, or income level; that they can have a profound impact on the family; and that they are eminently treatable with medication, therapy, or both medication and therapy; and

WHEREAS, Studies show that up to 80 percent of postpartum women around the world experience the “baby blues,” which is expressed as frequent and prolonged crying, anxiety, irritability, poor sleep, quick mood changes, and a sense of vulnerability. The onset of the “baby blues” usually occurs within three days of birth, may continue for a few weeks, and does not normally require treatment, but is instead alleviated by emotional support and practical assistance with the baby; and

WHEREAS, Between 10 and 20 percent of new mothers are affected by postpartum depression and may experience symptoms of depressed mood, inability to find pleasure in usually engaging activities, sleep disturbances, diminished concentration, appetite and weight loss, anxiety and panic attacks, feelings of guilt and worthlessness, suicidal thoughts, and fears about hurting the baby; and

WHEREAS, One to two out of every 1,000 new mothers can experience postpartum psychosis, which may begin with manic states, hyperactivity, an inability to sleep, and avoidance of the baby, and may lead to delusions, hallucinations, incoherence and thoughts of harming the child or themselves; and

WHEREAS, The medical community does not fully understand or recognize all factors contributing to postpartum mood and anxiety disorders, but it is believed that these disorders are caused by physiological factors, such as hormone levels, and can be exacerbated by such external risk factors as marital problems, sleep deprivation, and preexisting mental illnesses; and

WHEREAS, Mental illness related to childbearing is often overlooked and is heavily stigmatized because new mothers are expected to be happy and mothers suffering from a form of these disorders feel confused, ashamed, and isolated; and

WHEREAS, According to Postpartum Support International (PSI), a strong social support network, including hotlines, Web sites, respite care, knowledgeable clergy, and resource and referral lists, can greatly reduce the intensity and duration of symptoms of postpartum depression and can promote healing and recovery. Social support includes empathy, information, and practical help that leads women and their families to obtain effective treatment and creates an environment in which women learn that they are not alone, they are not to blame, and they will get better; and

WHEREAS, The federal Melanie Stokes Postpartum Depression Research and Care Act directs the United States Secretary of Health and Human Services, the National Institutes of Health, including the National Institute of Mental Health to expand and intensify research and related activities with respect to postpartum depression and postpartum psychosis and directs the Secretary of Health and Human Services to make grants to provide for projects for the establishment, operation, and coordination of effective and cost-efficient systems for the delivery of essential services to individuals with postpartum depression or postpartum psychosis and their families; and

WHEREAS, The recent, highly publicized tragic deaths of children at the hands of their mothers who suffered from postpartum psychosis have emphasized the need for more awareness of the illness; improved referral processes; improved access to therapy, medication, and other services; more research into postpartum mood and anxiety disorders and postpartum psychosis; and a greater understanding of how the justice system interacts with mothers who suffer from postpartum psychosis and are accused of a crime; and

WHEREAS, Many women are not adequately informed about, screened for, and treated for postpartum mood and anxiety disorders because they are uninsured or underinsured and lack access to comprehensive health care and also face cultural and linguistic barriers; and

WHEREAS, Many at-risk women may not get help because they are not informed about postpartum mood and anxiety disorders as part of

their health care, because there is a lack of knowledge and nonuse of screening and assessment tools, and because they are unaware of services and treatment for postpartum mood disorder, such as medication, professional therapy and counseling, support groups, or crisis hotlines; and

WHEREAS, Increased education and awareness, improved access to health care, proper use of prenatal screening tools, and the discussion by health care providers of postpartum mood and anxiety disorders with patients are all critical factors in identifying mothers-to-be who are at risk, and prompt diagnosis, treatment, and proper social support can effectively work together to facilitate a mother's recovery; and

WHEREAS, There is ample opportunity for the diverse health care community, including therapists, counselors, psychologists, psychiatrists, nurses, childbirth educators, nurse midwives, nurse practitioners, doulas, social workers, health educators, breastfeeding instructors, and pediatricians, to make women aware of postpartum mood and anxiety disorders and identify at-risk women during prenatal visits, prepared childbirth classes, labor and delivery, breastfeeding classes, postpartum well-baby checkups, and parenting classes and it behooves hospitals, health plans, and insurance companies to establish and encourage these policies of diagnosis and identification; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the California Legislature hereby proclaims the month of May 2002 as "Postpartum Mood and Anxiety Disorder Awareness Month" in California; and be it further

*Resolved,* That the State Department of Health Services and the State Department of Mental Health are requested to work together to explore ways to improve women's access to mental health care at the state and local levels, to facilitate increased awareness and education about postpartum mood and anxiety disorders, to explore and encourage the use of prenatal screening tools, and to improve the availability of effective treatment and support services; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 92

Assembly Concurrent Resolution No. 175—Relative to the Day of the Horse.

WHEREAS, The horse is a living link to the heritage and history of the State of California and the United States of America; and

WHEREAS, Without horses, the economy, history, and character of the State of California and the United States of America would be profoundly different; and

WHEREAS, The presence of the horse continues to permeate our society from movie screens to open land to our own backyards; and

WHEREAS, Horses are a vital part of our collective experience and, as such, deserve our protection and compassion; and

WHEREAS, With increasing pressure from modern society, all horses, wild and domestic, rely on humans for adequate food, water, and shelter; and

WHEREAS, Today, horses play a vital role in the economy of the State of California and the United States of America; and

WHEREAS, The Congressional Horse Caucus estimates the horse industry contributes well over \$100 billion to the American economy annually; and

WHEREAS, The University of California, Davis, reports that California equine activities support between 300,000 and 1 million horses; and

WHEREAS, The second Saturday in December should be specially set aside as the Day of the Horse to encourage all citizens to be mindful of the welfare of the horse and its contribution to our economy, heritage, and history; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature of the State of California hereby proclaims December 14, 2002, to be the Day of the Horse in the State of California, and calls upon all citizens to be mindful of the welfare of the horse and to recognize and appreciate the role of the horse in our history, heritage, and economy.

---

### RESOLUTION CHAPTER 93

Assembly Concurrent Resolution No. 194—Relative to physical education.

[Filed with Secretary of State June 27, 2002.]

WHEREAS, Physical education is essential to the development of growing children; and

WHEREAS, Physical education helps improve the overall health of children by improving their cardiovascular endurance, muscular strength and power, and flexibility, and by enhancing weight regulation,

bone development, posture, skillful moving, active lifestyle habits, and constructive use of leisure time; and

WHEREAS, Physical education increases a child's mental alertness, academic performance, readiness to learn, and enthusiasm for learning; and

WHEREAS, Physical education helps improve self-esteem and interpersonal relationships, and fosters responsible behavior and the independence of children; and

WHEREAS, Children who participate in high quality physical education programs tend to be more healthy and physically fit; and

WHEREAS, Physically fit adults have significantly reduced risk factors for heart attacks and strokes; and

WHEREAS, The Surgeon General, in "Objectives for the Nation," recommends increasing the number of mandated physical education programs that focus on health-related physical fitness; and

WHEREAS, Physical education programs and curricula should provide for the special needs of pupils with low fitness, physical disabilities, or learning disabilities; and

WHEREAS, A high quality physical education program for all children in kindergarten through grade 12 is an essential part of a comprehensive education; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature hereby proclaims May 1, 2002, to May 7, 2002, inclusive, as Physical Education and Sports Week and the month of May as Physical Fitness and Sports Month, and urges residents statewide to learn more about the relationship between physical and mental health and to take appropriate steps to incorporate quality physical activities into their lives and those of their children; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 94

Assembly Concurrent Resolution No. 212—Relative to Groundwater Awareness Month.

[Filed with Secretary of State June 27, 2002.]

WHEREAS, Groundwater is one of California's most precious natural resources, representing 40 percent or more of California's water supply in dry years; and

WHEREAS, California withdraws an average of 13 billion gallons of groundwater each day for rural, municipal, industrial, agricultural, and environmental uses; and

WHEREAS, Groundwater is a renewable resource that to some extent, is replenished naturally, but which also requires active management to maximize available supplies; and

WHEREAS, Groundwater is currently being depleted by an average of 425 billion gallons per year in California, causing declining groundwater levels and degrading groundwater quality; and

WHEREAS, California's increasing population will continue to place new demands on our groundwater resources, through groundwater quality impacts, extraction, transfer, consumption, recharge interception, and supply diversions; and

WHEREAS, Many Californians are not aware that groundwater is an important source of water supply for the state; and

WHEREAS, The voters have recently approved two bond measures with substantial funding for groundwater protection and storage, and the Legislature has implemented several programs to encourage and assist local agencies in managing and protecting groundwater resources; and

WHEREAS, Substantial challenges lie ahead in order to sustain, protect, and manage California's groundwater resources; and

WHEREAS, California must act through water conservation, public education, water reuse, artificial recharge, conjunctive management, improved source water protection, and other means, to address the increasing demands on our groundwater resources; and

WHEREAS, The Assembly has formed a Select Committee on Underground Water Quality to study California's groundwater successes and challenges, and to evaluate opportunities for assisting local agencies in protecting and improving the management of this precious and limited resource, while preserving existing water rights; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate concurring,* That the Legislature proclaims the month of June 2002, as Groundwater Awareness Month in California.

---

## RESOLUTION CHAPTER 95

Assembly Concurrent Resolution No. 218—Relative to Harmful, Nonnative Weeds Awareness Week.

[Filed with Secretary of State June 27, 2002.]

WHEREAS, The spread of certain harmful, nonnative species of plants are causing enormous damage to the environment and economy of California and the world; and

WHEREAS, These harmful, nonnative weeds are being spread more rapidly with increasing global travel and commerce, at great cost to human and animal health, and economic security; and

WHEREAS, The destructive impact of harmful, nonnative and often poisonous weeds is profound, affecting California's cropland, rangeland, forests, parks, and wildlands, through decreased land productivity, degradation of wildlife habitat, and outright destruction of crops, livestock, wetlands, waterways, watersheds, and recreational areas; and

WHEREAS, The lost crop productivity caused by these weeds alone has been estimated at \$7.4 billion nationwide, a large proportion of which is attributable to California. Nationally, the direct and indirect costs of controlling these weeds may be as high as \$5.4 billion annually; and

WHEREAS, One of these weeds, called the yellow star thistle, has become the most common invasive plant in California, and is responsible for ruining pasture land, choking out native plants, killing horses who eat its poisonous early-season growth, and stabbing people and animals with its large, sharp thorns; and

WHEREAS, Pathways for the spread of harmful, nonnative weeds are many and varied, involving both accidental and intentional introductions, and could be reduced by increased awareness of the dangers posed even by seemingly innocuous plants when transplanted to a different ecosystem; and

WHEREAS, The federal government has recently adopted programs to prevent, control, and manage harmful, nonnative weeds, and California has a noxious weed management program for the purpose of managing and eradicating noxious weeds through specified local weed management areas, and these programs have emphasized information sharing, education, and public awareness as crucial to the success of any prevention, control, or eradication effort; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the second week of July be designated and recognized as Harmful Nonnative Weeds Awareness Week in California; and be it further

*Resolved,* That on the occasion of Harmful Nonnative Weeds Awareness Week, the Legislature encourages all Californians to participate in activities to raise awareness of the scourge of these weeds, and of methods to prevent their pernicious spread; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the author of this resolution for distribution.

---

RESOLUTION CHAPTER 96

Assembly Joint Resolution No. 26—Relative to military reserve personnel.

[Filed with Secretary of State June 27, 2002.]

WHEREAS, The military reserve forces of the United States provide a valuable service to the citizens of the United States; and

WHEREAS, Military reserve personnel make up 60 percent of the total armed forces of the United States; and

WHEREAS, The reserve forces of the United States military provide for the continuing freedom and pursuit of democracy throughout the world; and

WHEREAS, The military reserve upholds our values and beliefs in times of peace as well as war; and

WHEREAS, Evidence suggests that members of the military reserve may be discriminated against due to their reserve status when applying for financing; and

WHEREAS, This discrimination results in members of the military reserve being charged higher interest rates for loans due to their reserve status; and

WHEREAS, This discrimination is an attempt to circumvent the Soldiers and Sailors Relief Act of 1940; and

WHEREAS, The Soldiers and Sailors Relief Act of 1940 specifies that should a member of the military reserve be called to active duty, that person's outstanding loans shall be capped at a 6 percent interest rate should the soldier prove that his or her active duty status would put him or her in financial hardship; and

WHEREAS, The practice of subprime lending based on reserve status is not prohibited by federal law; and

WHEREAS, California has taken the lead in protecting the military reserve and the National Guard in California through Assembly Bill 120 of the 2001–02 Regular Session; and

WHEREAS, We must protect the interest of our military reserve personnel in order to preserve military readiness and morale; and

WHEREAS, The federal government must stand firm in upholding the rights and duties of the military reserve and continue to demonstrate leadership in the implementation of a strong military force; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California memorializes the President and Congress of the United States to do all of the following:

(a) Stand firm in protecting the financial interest of military reserve personnel.

(b) Enact new legislation that strengthens the provisions of the Soldiers and Sailors Relief Act of 1940.

(c) Look into the practice of predatory lending against military reservists based on their reserve status.

(d) Enact legislation that makes it a crime to discriminate against military reserve personnel based on reserve status when applying for financing; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States and to all members of Congress of the United States.

---

#### RESOLUTION CHAPTER 97

Assembly Joint Resolution No. 34—Relative to disabled military retirees.

[Filed with Secretary of State June 27, 2002.]

WHEREAS, A penalty is imposed against disabled military retirees for concurrent receipt of retirement and disability compensation; and

WHEREAS, If a member of the armed forces retires with 20 or more years of service to this country, earning retirement compensation, and this same retiree has a major disability resulting from wounds or service connected activities, \$1 from his or her retirement check is deducted for each dollar of disability payment received; and

WHEREAS, This law requires retired military personnel to do something no one else in America is obligated to do—pay for their own disability; and

WHEREAS, For many years, veterans' organizations and disabled veterans battled to change this law; and

WHEREAS, Last year, Congress recognized that disabled military retirees had a legitimate complaint and introduced legislation that was designed to correct this policy; and

WHEREAS, Included within the National Defense Authorization Act For Fiscal Year of 2002 is legislation that will end this discriminatory practice of deducting disability compensation from retirement pay. However, the legislation will be effective only if the President requests money to cover its costs in his next budget; and

WHEREAS, These disabled military retirees fought in World War II, Korea, Vietnam, the Persian Gulf, and a dozen brush fire wars in unremembered countries, risking everything for our country. They gave of their youth and health, only to be retired with a disability that they are forced to pay for out of their own pockets; and

WHEREAS, The discrimination our country has displayed for its disabled military retirees should not be passed on to those young people who are now fighting our War Against Terrorism; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes the Congress and the President of the United States to urge the Congress of the United States to fund the National Defense Authorization Act For Fiscal Year of 2002, to eliminate the penalty imposed against disabled military retirees for concurrent receipt of retirement and disability compensation; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, and to the Speaker of the House of Representatives, the President of the Senate, and each Member in the Congress of the United States.

---

#### RESOLUTION CHAPTER 98

Senate Joint Resolution No. 25—Relative to oxygenate requirements in gasoline.

[Filed with Secretary of State June 27, 2002.]

WHEREAS, In June 2001, the federal Environmental Protection Agency rejected a request from Governor Davis to exempt California from the cleaner-burning gasoline requirements of the Clean Air Act; and

WHEREAS, The State of California will continue to work to meet the requirements of the Clean Air Act; and

WHEREAS, A waiver from that requirement would allow the state to transition methyl tertiary-butyl ether (MTBE) out of gasoline more quickly and cost-effectively, with the assurance from the oil industry that it can produce cleaner-burning gasoline without oxygenates; and

WHEREAS, Ethanol was originally used as a gasoline extender and an octane enhancer; and

WHEREAS, The National Research Council reported on May 11, 1999, that oxygen additives used in reformulated gasoline does reduce carbon monoxide emissions, but has little to do with a decrease in the emission of ozone, which contributes to smog and greenhouse gases; and

WHEREAS, The price of gasoline would increase substantially in California if the oil industry had to convert their oxygenates from MTBE to ethanol and would in turn place an undue economic burden on the consumers of California; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Congress of the United States review California's request to be exempted from the gasoline oxygenate additive requirements imposed by the Clean Air Act, and take immediate action to relieve the consumers of California from the prospect of even higher gasoline prices; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Congress of the United States.

---

#### RESOLUTION CHAPTER 99

Assembly Concurrent Resolution No. 126—Relative to protection of California agriculture from invasive species.

[Filed with Secretary of State June 28, 2002.]

WHEREAS, California's agriculture, natural resources, and wildlife are constantly under attack from new plant and animal-destroying insects, diseases, and micro-organisms; and

WHEREAS, There is a lack of protection provided due in part to an inadequate number of inspectors; and

WHEREAS, Increased coordination between the California Department of Food and Agriculture and postal and package delivery services will aid in the inspection process of suspect items; and

WHEREAS, Invasive species-harmful nonnative plants, animals, and microorganisms are found throughout California and the United States causing billions of dollars annually in damage to crop, range lands, and waterways; and

WHEREAS, In California three entities are responsible for the protection of California agriculture: The United States Department of Agriculture, the California Department of Food and Agriculture, and county agricultural Commissioners; and

WHEREAS, Approximately \$20,000,000 is spent each year to protect the State of California, yet a new invasive species is found in California every 60 days; and

WHEREAS, Invasive species must be eradicated at a cost of millions of dollars; now, therefore be it

*Resolved by the Assembly of the State of California, the Senate concurring,* That funding is requested from the United States Congress

and the United States Department of Agriculture for the following purposes:

(a) To provide full funding for the California High Risk Pest Exclusion Program.

(b) To fund the 24-hour-per-day operation of California's agricultural inspection stations, with the exception of those stations that must close during winter months due to highway closures.

(c) To fund and fill all vacant positions at ports of entry.

(d) To encourage the United States Department of Agriculture to disallow the import of fruits and vegetables into the United States without proper review of relevant scientific research.

(e) For research and development of plans to prevent, detect, and eradicate invasive species; and be it further

*Resolved*, That the Chief Clerk of the Assembly prepare and transmit a copy of this resolution to each Senator and Representative from California in the Congress of the United States.

---

#### RESOLUTION CHAPTER 100

Assembly Joint Resolution No. 43—Relative to federal Medicaid Assistance Percentages.

[Filed with Secretary of State June 28, 2002.]

WHEREAS, Federal Medicaid Assistance Percentages (FMAP) are recalculated annually to determine the federal share of Medicaid costs allocated to each state; and

WHEREAS, The United States Department of Health and Human Services calculates FMAP based on the United States Department of Commerce statistics of the average per capita income in each state and the nation as a whole; and

WHEREAS, The recalculation of FMAP for 2003 will reduce California's share of federal Medicaid funds by \$397 million, which will be the highest loss in the nation; and

WHEREAS, California's per capita income grew by 8.1 percent from 1999 to 2000, the second fastest rate in the nation; and

WHEREAS, As Californians' incomes rise, the state rate for Medicaid matching funds from the federal government declines; and

WHEREAS, Despite the growth in per capita income in California, lower income Californians often failed to experience the relative wage growth of higher income Californians; and

WHEREAS, Despite per capita income levels above the national average, California has both high levels of income and poverty; and

WHEREAS, With 4.4 million people under the federal poverty thresholds, California leads the nation in residents living in poverty, and has 1.4 million more impoverished residents than Texas and 2 million more impoverished residents than New York; and

WHEREAS, FMAP calculations grew out of the Kerr-Mills Social Security Act of 1960, and predate the official definition of the poverty thresholds adopted in the late 1960s; and

WHEREAS, The authors of the Kerr-Mills Social Security Act incorrectly presumed that states with high per capita incomes would have low poverty, and vice versa; and

WHEREAS, California is already facing daunting budget cuts due to the state's deficit, making it even more difficult for the state to absorb and offset these federal reductions; and

WHEREAS, The Medi-Cal program faces severe underfunding due to these factors not being taken into account; and

WHEREAS, There is a critical need to protect the health of millions of low-income families and individuals that depend on health programs like Medicaid and the State Children's Health Insurance Program; now, therefore, be it

*Resolved, by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California memorializes the President and Congress of the United States to consider the 4.4 million Californians who are living below poverty thresholds by taking into account the total number of persons living in poverty rather than the per capita income when establishing the formula that will be used in the calculation of the FMAP; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Secretary of the United States Department of Health and Human Services.

---

## RESOLUTION CHAPTER 101

Assembly Concurrent Resolution No. 81—Relative to transportation.

[Filed with Secretary of State July 8, 2002.]

WHEREAS, Only one major transportation corridor currently links Riverside County with Orange County, despite the fact that over the past decade Riverside County has been the fastest growing county in the

state, and its population is expected to double to 3 million citizens in the next 15 years; and

WHEREAS, The existing transportation corridor is critical for the flow of people, goods, and services between Riverside County and Orange County and within the region as a whole; and

WHEREAS, Many of the residents of Riverside County commute to Orange County, therefore adding to this corridor's congestion; and

WHEREAS, A plan to bring one million tons of air cargo to the March Air Reserve Base is currently being drafted, the implementation of the plan will require a reliable transportation system to transport goods and services to distribution centers and metropolitan areas in southern California; and

WHEREAS, Extreme traffic congestion currently plagues the existing transportation corridor, which is ranked at the highest level of congestion according to the Department of Transportation, with expected demand to increase by 40 percent in the next 20 years; and

WHEREAS, The existing transportation corridor between Riverside County and Orange County includes one of the most congested highway facilities in southern California, carrying over 16,500 vehicles per peak hour, while only designed to carry 14,400 vehicles per peak hour, significantly exceeding its capacity; and

WHEREAS, The affected freeway currently experiences over 66,000 vehicle hours of delay per day, significantly increasing the amount of oxides of nitrogen (NOx) pollutants and hydrocarbons that are introduced into our air, as well as costing the regional economy up to \$7 million per day in lost opportunity; and

WHEREAS, This freeway congestion and its resulting spillover effect on local streets impede commercial development by causing concern over both the flow of goods and services to, and from, the various establishments and access to a dependable and punctual workforce; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature urges the Department of Transportation and the regional transportation planning agencies to expeditiously consider both alternative transportation corridors between Riverside County and Orange County and taking action to utilize all other modes of transportation, and to follow the current process for adopting transportation funding priorities through the State Transportation Improvement Program; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to the Department of Transportation.

---

## RESOLUTION CHAPTER 102

Assembly Concurrent Resolution No. 209—Relative to Affordable Housing Week.

[Filed with Secretary of State July 8, 2002.]

WHEREAS, Decent, safe, and affordable housing is one of the basic necessities of life; and

WHEREAS, Affordable housing is of vital importance to the health and well-being of Californians; and

WHEREAS, Hundreds of thousands of Californians live in overcrowded, substandard, and otherwise inadequate housing; and

WHEREAS, There is an extreme shortage of rental housing in California, particularly for lower income renters. One-half of all low-income renters, and three-fourths of all very low income renters spend more than 50 percent of their income for housing; and

WHEREAS, Over 360,000 Californians are homeless, according to the Department of Housing and Community Development. The most rapidly increasing segments of the homeless population are seniors and families with children; and

WHEREAS, The California Department of Housing and Community Development and the Association of Bay Area Governments have determined that almost 10,000 new units of affordable housing are needed over the next five years in order to meet the needs of Alameda County's very low income population; and

WHEREAS, The Alameda County Board of Supervisors has declared a housing state of emergency in Alameda County; and

WHEREAS, California has lost more than 20,000 affordable housing units over the past five years, with almost 50 percent of the loss coming from the Counties of Los Angeles, Ventura, Orange, San Bernardino, Riverside, and Imperial; and

WHEREAS, In Los Angeles County, an extremely low-income household, earning 30 percent of the Area Median Income of \$56,100, can afford monthly rent of no more than \$421, while the Fair Market Rent (FMR) for a two-bedroom unit is \$823; and

WHEREAS, A worker earning minimum wage must work 101 hours per week in order to afford a two-bedroom unit at FMR; and

WHEREAS, In Sacramento County, 190,000 households are at or below 80 percent of the Area Median Income and must compete for only 30,600 affordable housing and 7,800 Section 8 housing slots; and

WHEREAS, Nearly 500,000 households in California languish on Section 8 waiting lists. Most wait more than three years for their names to come up; and

WHEREAS, California is second to last in the nation in home ownership rates; and

WHEREAS, Thousands of units of affordable housing have been built by nonprofit developers in the State of California; and

WHEREAS, These affordable housing units are well managed, well maintained, and are contributing to the communities in which they are located; and

WHEREAS, East Bay Housing Organizations and similar organizations around the state will be acknowledging the need for increasing the supply of decent affordable housing and celebrating the contributions of affordable housing during Affordable Housing Week; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature proclaim the week of June 1, 2002, to June 9, 2002, inclusive, as Affordable Housing Week in California; and be it further

*Resolved,* That the Legislature calls upon all Californians to learn about and honor the contributions of affordable housing by participating in activities held throughout the week to commemorate this observance; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for distribution.

---

## RESOLUTION CHAPTER 103

Assembly Concurrent Resolution No. 210—Relative to Resurrection Blvd.

[Filed with Secretary of State July 8, 2002.]

WHEREAS, The importance of racial diversity in television received national attention throughout the 1999–2000 television season, in which major network executives promised more progressive hiring practices both on and off the screen; and

WHEREAS, Latino actors display an admirable and honorable history in American television and in the motion picture industry, positively contributing to the diversity of the Californian as well as American landscape; and

WHEREAS, While Latinos constitute approximately 12.5 percent of the United States population, they continue to be the most underrepresented ethnic group on prime time television and in films; and

WHEREAS, While Latinos have received 4.9 percent of the roles cast for Screen Actors Guild contracts, the highest percentage since the guild

began tracking this statistic in 1992, the appearance of Latinos in television and films approximate less than one-third of their actual proportion of the United States population; and

WHEREAS, Latinos rarely occupy more than 2 percent of the available jobs in the television and film industry in general, further attesting to the consensus about minority underrepresentation since the media reform efforts of the late 1960s and 1970s; and

WHEREAS, The number of Latino characters in prime time television have dropped from 3 percent to 2 percent, from the 1999–2000 television season to the 2000–01 season; and

WHEREAS, Showtime Networks, Inc., demonstrates real commitment and interest in improving diversity in the American television industry, as well as in developing substantive Latino programming; and

WHEREAS, The Showtime-sponsored show Resurrection Blvd. is the first dramatic series on American television to prominently feature Latinos both in front of and behind the camera, including actors, directors, writers, and producers; and

WHEREAS, Resurrection Blvd. highlights multicultural diversity within the television industry by featuring more than 400 Latino actors during the past two television seasons; and

WHEREAS, Resurrection Blvd. is entering its third season in June 2002, marking the first and longest-running Latino-supported dramatic series on television; and

WHEREAS, This groundbreaking show exemplifies sincere efforts towards portraying a truly diverse American scene in the television industry, providing critical exposure for the Latino as well as other minority populations; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature hereby commends Resurrection Blvd. for its creative vision in depicting minority populations in a positive light, encouraging future endeavors in the diversification of the American entertainment industry; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

#### RESOLUTION CHAPTER 104

Senate Concurrent Resolution No. 50—Relative to the Mark Denis Melbourne Memorial Interchange.

WHEREAS, Mark Denis Melbourne was a fixture on southern California radio giving traffic reports for four decades and for five years was the unidentified voice on the monorail that ferries visitors around Disneyland; and

WHEREAS, He was regarded as one of the most respected broadcasters in southern California and was used as the “image voice” for KFI 640 AM radio station; and

WHEREAS, He was also a part-time communications instructor at the University of Southern California and is regarded as having loved to share his knowledge of broadcasting with others and advocated reporting traffic without panic and with caring and willingness to help frustrated drivers avoid bottlenecks; and

WHEREAS, He worked hard to help southern California drivers get to work safely and on time and was universally one of the most well-liked radio people in southern California; and

WHEREAS, He died of a fatal illness in the year 2000 in his home in Anaheim Hills at the early age of 59 and it is appropriate to recognize his contributions to Californians and travelers in the State of California through a designation of a memorial interchange near his home in Anaheim Hills; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature hereby designates the interchange of State Highway Routes 55 and 91 in the City of Anaheim in the County of Orange as the Mark Denis Melbourne Memorial Interchange; and be it further

*Resolved,* That the Department of Transportation is hereby requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation and, upon receiving donations from nonstate sources covering this cost, to erect those plaques and markers; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the Director of Transportation and to the author of this resolution for distribution.

---

## RESOLUTION CHAPTER 105

Senate Concurrent Resolution No. 64—Relative to the Police Officer Louie Pompei Memorial Interchange.

[Filed with Secretary of State August 8, 2002.]

WHEREAS, Louis A. Pompei, or “Louie” as friends knew him, was born on August 4, 1964, in Shenandoah, Pennsylvania, and was raised

in the Mahanoy area of Pennsylvania where he graduated from high school in 1982; and

WHEREAS, Officer Pompei graduated from Mansfield University, Pennsylvania, in 1986 with a bachelor of arts degree in Criminal Justice Administration; and

WHEREAS, Officer Pompei was hired as a Police Officer trainee by the Glendora Police Department on October 12, 1987, graduated from the Los Angeles County Sheriff's Academy on March 4, 1988, and worked in the Patrol Division of the Glendora Police Department from 1988 to 1992 where he developed an enthusiasm for working narcotics cases; and

WHEREAS, Officer Pompei worked as a narcotics investigator in the Detective Division of the Glendora Police Department from 1992 to 1995; and

WHEREAS, Officer Pompei was assigned to a position with L.A. IMPACT, a major crimes multijurisdictional task force, composed of officers from agencies throughout the county, primarily dedicated to investigating major drug suppliers through southern California; and

WHEREAS, Officer Pompei was a physical fitness buff, and body builder, who earned a silver medal in the bodybuilding competition of the 1994 California Police Olympics, and who was a runner on the Glendora-Monrovia-Arcadia Police relay team, which annually competes in the Baker to Vegas 120-mile Challenge Cup relay race; and

WHEREAS, People who knew him remember Officer Pompei for his love of life, contagious enthusiasm, positive and outgoing attitude, and generous, helpful, and dependable personality; and

WHEREAS, Officer Pompei made the ultimate sacrifice while protecting and serving the people of California on Friday, June 9, 1995; and

WHEREAS, On that date, while off duty in a Vons Market in Via Verde, Officer Pompei attempted to stop an armed robbery takeover in which a box boy was being pistol whipped; and

WHEREAS, While trying to stop the armed robbery, Officer Pompei died in a fire fight, loyal to the Law Enforcement Code of Ethics which states in pertinent part, "As a law enforcement officer, my fundamental duty is to serve mankind; safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation and the peaceful against violence or disorder"; and

WHEREAS, Officer Pompei died as he had lived, as a hero upholding the ideal of protecting those who could not protect themselves; and

WHEREAS, Officer Pompei's coworkers, friends, and family deeply feel his loss and will never forget his love of life and his enthusiasm for his profession; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the interchange where State Highway Route 30 connects with Interstate Highway Route 210 be officially named the Police Officer Louie Pompei Memorial Interchange; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the Director of Transportation and to the author for appropriate distribution.

---

#### RESOLUTION CHAPTER 106

Senate Concurrent Resolution No. 45—Relative to the William H. “Harry” Armstrong Interchange.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, William H. “Harry” Armstrong has been a Council Member of the City of Clovis since 1970 serving as Mayor during 1982–84, 1990–92, 1994–97, and 1999–01; and

WHEREAS, William H. “Harry” Armstrong was born in Merced, California, and has lived in Clovis since 1962; and

WHEREAS, William H. “Harry” Armstrong is a Korean War Veteran, Member of American Legion Post 147, and Life Member of VFW Post 3223; and

WHEREAS, William H. “Harry” Armstrong is retired as Transportation Manager from Foster Farms Dairy and a union member since 1954; and

WHEREAS, William H. “Harry” Armstrong has served the League of California Cities as President, First Vice President, Second Vice President, Board Member, Executive Committee, Transportation, Communication, and Public Works Policy Committee; and

WHEREAS, William H. “Harry” Armstrong has served the South San Joaquin Division of the League of California Cities as President, Environmental Quality Committee, Human Resources Development Committee, Chairman of the Legislative Committee, First Vice President, Labor Relations Committee, and Revenue and Taxation Committee; and

WHEREAS, William H. "Harry" Armstrong is the Chairman of the Association of Metropolitan Water Agencies; and

WHEREAS, William H. "Harry" Armstrong has served as Chairman of the Fresno County Democratic Central Committee since 1997; and

WHEREAS, William H. "Harry" Armstrong, as Chairman of the Fresno County Transportation Authority, has worked diligently to bring the State Highway Route 168 project to fruition; and

WHEREAS, It would be a fitting tribute to William H. "Harry" Armstrong to name the Herndon Avenue Interchange on State Highway Route 168 in the City of Clovis as the William H. "Harry" Armstrong Interchange in honor and recognition of William H. "Harry" Armstrong; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly concurring,* That on or after the date on which William H. "Harry" Armstrong ceases his service on the Clovis City Council, the Herndon Avenue Interchange on State Highway Route 168 in the City of Clovis be officially named the William H. "Harry" Armstrong Interchange; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation and, upon receiving donations from nonstate sources covering the cost, to erect those plaques and markers; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the Director of Transportation and to the author of this resolution for distribution.

---

## RESOLUTION CHAPTER 107

Senate Concurrent Resolution No. 52—Relative to the James Dean Memorial Junction.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, James Byron Dean, one of the most admired movie stars of all time and an icon of American culture, was born on February 8, 1931, in Marion, Indiana; and

WHEREAS, He later moved to California and attended Santa Monica City College and the University of California at Los Angeles; and

WHEREAS, He is best known for his roles in "East of Eden," "Rebel Without a Cause," and "Giant," and he also appeared on television shows and in a Broadway play; and

WHEREAS, As a successful actor, he attained cult status in little more than a year's time, personifying the restless American youth of the mid-1950s; and

WHEREAS, He was tragically killed on September 30, 1955, in an automobile crash on State Highway Route 46 in San Luis Obispo County while traveling in his automobile on the way to a racing event; and

WHEREAS, Many decades after his death, James Dean remains widely admired as an accomplished actor, and it is appropriate to recognize his contributions through a designation of a memorial junction near the site of his untimely death; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature hereby designates the junction of State Highway Routes 41 and 46 near Cholame in the County of San Luis Obispo as the James Dean Memorial Junction; and be it further

*Resolved,* That the Department of Transportation is hereby requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation and, upon receiving donations from nonstate sources covering this cost, to erect those plaques and markers; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the Director of Transportation and to the author of this resolution for distribution.

---

## RESOLUTION CHAPTER 108

Senate Concurrent Resolution No. 82—Relative to Korean-Americans.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, Missionaries from the United States played a central role in nurturing the political and religious evolution of modern Korea, and directly influenced the early Korean immigration to the United States; and

WHEREAS, In December 1902, 56 men, 21 women, and 25 children left Korea and traveled across the Pacific Ocean on the S.S. Gaelic and landed in Honolulu, Hawaii, on January 13, 1903; and

WHEREAS, The early Korean-American community was united around the common goal of attaining freedom and independence for their colonized mother country; and

WHEREAS, Members of the early Korean-American community served with distinction in the Armed Forces of the United States during World War I, World War II, and the Korean conflict; and

WHEREAS, On June 25, 1950, Communist North Korea invaded South Korea with approximately 135,000 troops, thereby initiating the involvement of approximately 5,720,000 personnel of the United States Armed Forces who served during the Korean conflict to defeat the spread of communism in Korea and throughout the world; and

WHEREAS, Casualties in the United States Armed Forces during the Korean conflict included 54,260 dead (of whom 33,665 were battle deaths), 92,134 wounded, and 8,176 listed as missing in action or prisoners of war; and

WHEREAS, In the early 1950s, thousands of Koreans, fleeing from war, poverty, and desolation, came to the United States seeking opportunities; and

WHEREAS, Korean-Americans, like waves of immigrants to the United States before them, have taken root and thrived in the United States through strong family ties, robust community support, and countless hours of hard work; and

WHEREAS, Korean immigration to the United States has invigorated business, church, and academic communities in the United States; and

WHEREAS, According to the 2000 United States Census, Korean-Americans own and operate 135,571 businesses across the United States that have gross sales and receipts of \$16,000,000,000 and employ 333,649 individuals with an annual payroll of \$5,800,000,000; and

WHEREAS, The contributions of Korean-Americans to the United States include the invention of the first beating heart operation for coronary artery heart disease, the development of the nectarine, a four-time Olympic gold medalist, and achievements in engineering, architecture, medicine, acting, singing, sculpture, and writing; and

WHEREAS, Korean-Americans play a crucial role in maintaining the strength and vitality of the United States-Korean partnership; and

WHEREAS, The United States-Korean partnership helps undergird peace and stability in the Asia-Pacific region and provides economic benefits to the people of the United States and Korea and to the rest of the world; and

WHEREAS, Beginning in 2003, more than 100 communities throughout the United States will celebrate the 100th anniversary of Korean immigration to the United States; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature of the State of California (1) recognizes the achievements and contributions of Korean-Americans to the United States over the past 100 years, and (2) requests that the people of

California and interested organizations observe the 100th anniversary of Korean immigration to the United States with appropriate programs, ceremonies, and activities; and be it further

*Resolved*, That the Secretary of the Senate transmit a copy of this resolution to the author for appropriate distribution.

---

RESOLUTION CHAPTER 109

Senate Joint Resolution No. 42—Relative to the Child Care and Development Block Grant.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, The United States Congress enacted the Child Care and Development Block Grant Act of 1990, now known as the Child Care and Development Block Grant (CCDBG), pursuant to the Omnibus Budget Reconciliation Act of 1990 (P.L. 101-508), to provide federal funding for child care subsidies for low-income families and for initiatives to improve the quality of child care; and

WHEREAS, Congress set up the block grant in its current form in 1996 when it passed the Personal Responsibility and Work Opportunity Reconciliation Act (P.L. 104-193), often referred to as “welfare reform,” and authorized federal funding for the CCDBG only through fiscal year 2002; and

WHEREAS, Congress will be considering this year a reauthorization of funding for the CCDBG; and

WHEREAS, Making more quality child care available will help support a vibrant economy, allow families to find and keep jobs, and prepare the workforce of the future; and

WHEREAS, Studies repeatedly have shown that good quality child care, which provides a loving, safe, and stable environment, helps children enter school ready to succeed, improve their skills, and stay safe while their parents work; and

WHEREAS, The positive impact of good quality child care is even greater for low-income children, yet in many communities, families cannot find adequate and affordable care; and

WHEREAS, Child care is unaffordable for many families, and many low-income parents who are unable to obtain help paying for child care are forced to make impossible choices, including whether to pay rent, food or child care or whether to choose less expensive, but potentially detrimental, care for their children, and, for some parents, having no choice but to return to welfare; and

WHEREAS, The CCDBG is the primary source of support for families who cannot afford the quality child care that is critical to their ability to find and keep a job and to prepare their children to succeed in school; and

WHEREAS, Through the CCDBG, each state, including California, receives both “mandatory” funds, which are automatically available each year although states must contribute a match to receive these funds, and “discretionary” funds, which are available without a match but must be appropriated by Congress each year; and

WHEREAS, The reauthorization of the CCDBG offers an opportunity to continue state child care assistance efforts and to increase both mandatory funding for the next five years and discretionary funding for fiscal year 2003; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature of the State of California memorializes the United States Congress to approve legislation that increases and reauthorizes funding for the Child Care and Development Block Grant; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, the Majority Leader of the Senate, and each Senator and Representative from California in the Congress of the United States.

---

## RESOLUTION CHAPTER 110

Assembly Concurrent Resolution No. 136—Relative to the Rosa Parks Highway.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, Rosa Parks was born on February 4, 1913, in Tuskegee, Alabama, the first child of James and Leona (Edwards) McCauley; and

WHEREAS, Rosa Louise McCauley married Raymond Parks on December 18, 1932; and

WHEREAS, Rosa Parks was arrested on December 1, 1955, in Montgomery, Alabama, for refusing to give up her seat on a bus to a white man, and her stand for equal rights became legendary; and

WHEREAS, Rosa Parks’ arrest for refusing to comply with Montgomery’s segregation law was the impetus for a boycott of Montgomery buses, led by Dr. Martin Luther King, Jr., by approximately 42,000 African-Americans for 381 days; and

WHEREAS, On November 13, 1956, the United States Supreme Court ruled that Montgomery's segregation law was unconstitutional, and on December 20, 1956, Montgomery officials were ordered to desegregate buses; and

WHEREAS, Rosa Parks is honored as the "Mother of the Modern Day Civil Rights Movement," because her refusal to surrender her seat in compliance with Montgomery's segregation law inspired the civil rights movement, which has resulted in the breakdown of numerous legal barriers and the lessening of profound discrimination against African-Americans in this country; and

WHEREAS, The courage and conviction of Rosa Parks laid the foundation for equal rights for all Americans and for the Civil Rights Act of 1964; and

WHEREAS, Rosa Parks was the first woman to join the Montgomery chapter of the NAACP, and was an active volunteer for the Montgomery Voters League; and

WHEREAS, Rosa Parks cofounded the Rosa and Raymond Parks Institute for Self Development in 1987 with Elaine Easton Steele to motivate and direct youth to achieve their highest potential through the "Pathways to Freedom" program; and

WHEREAS, Rosa Parks is the recipient of many awards including the Presidential Medal of Freedom, the nation's highest civilian honor, the Congressional Gold Medal of Honor, the highest honor Congress can bestow upon a civilian, and the first International Freedom Conductor Award from the National Underground Railroad Freedom Center, among many other awards and honors; and

WHEREAS, Rosa Parks has dedicated her life to the cause of human rights and truly embodies the love of humanity and freedom; and

WHEREAS, Rosa Parks' life embodies the spirit of not only the African-American experience, but the American civil rights movement; and

WHEREAS, This year marks the occasion of Rosa Parks' 89th birthday; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature hereby designates State Highway Route 58 between State Highway Route 99 and State Highway Route 184 as the Rosa Parks Highway, in tribute of Ms. Rosa Parks, who helped ignite the civil rights movement; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the Department of Transportation and the author for appropriate distribution.

---

RESOLUTION CHAPTER 111

Assembly Concurrent Resolution No. 169—Relative to California youth.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, In California, persons who are under 18 years of age represent 27.3 percent of the state's population, according to the 2000 United States Census; and

WHEREAS, State and local entities provide important services to young people in California; and

WHEREAS, Young people in California have demonstrated their ability to propose workable solutions to community problems, such as redistricting, violence, transportation, and student assessment, among others; and

WHEREAS, On January 26, 2002, young people from the Counties of Alameda and Contra Costa presented state legislators and county and local public officials with solutions to continuing problems that affect all youth; and

WHEREAS, By failing to include California's young people in decisionmaking processes, public officials ensure that youth-sponsored solutions to problems facing young people in California will be overlooked or ignored; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring*, That state agencies and the Legislature include young people in the decisionmaking process in matters that affect California's young people; and be it further

*Resolved*, That copies of this resolution be transmitted to state, county, and city boards, committees and commissions and to committees of the California Legislature.

---

RESOLUTION CHAPTER 112

Assembly Concurrent Resolution No. 179—Relative to the Highway 50 Association Wagon Train.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, The Highway 50 Association is a nonprofit organization that has sponsored an annual wagon train event for the past 53 years in order to commemorate an important part of California and western history; and

WHEREAS, The event consists of the operation of a wagon train from Dayton, Nevada to the site of gold discovery in California in Coloma, El Dorado County, using portions of Highway 50 and other highways and traveling over two mountain passes; and

WHEREAS, This commemoration helps preserve the rich pioneering heritage of early California settlers, and hosts school groups wishing to have a firsthand learning experience; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Highway 50 Association annual wagon train event is hereby designated as a state historic event; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to the Secretary of the Business, Transportation and Housing Agency, the California Highway Patrol, and the Department of Transportation.

---

#### RESOLUTION CHAPTER 113

Assembly Concurrent Resolution No. 220—Relative to the How to Live in America Program.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, The How to Live in America Program, created by Community Communications, Inc., is an innovative program designed to teach non-English-speaking persons who have committed traffic and other minor offenses about the United States legal system; and

WHEREAS, The goals of the program are to generate a change of behavior among immigrants through increased awareness of general United States customs and laws, as well as specific legal issues such as bail bonds, warrants, and plea bargains; and

WHEREAS, The program assists immigrants in becoming productive members of society, and benefits the judicial process, by reducing repeat offenses; and

WHEREAS, The program creates awareness among immigrants of the serious consequences of breaking the law and how it can affect their lives in the United States; and

WHEREAS, The program presents information in a step-by-step format, with each aspect of the program presented in simple language so that it is easy for immigrants to understand; and

WHEREAS, In Eagle County, Colorado, where the program first began, recidivism rates among Latinos have dropped significantly for drunk driving, domestic violence, and for repeat occurrences of any type of violation; and

WHEREAS, The program has been implemented in Santa Clara, Contra Costa, and San Mateo Counties, and is successfully educating and guiding Latino and other non-English-speaking defendants through the judicial system, and providing basic information on United States laws, possible penalties, and consequences for breaking the law, as well as an important orientation to living in the United States; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature of the State of California commends the Counties of Santa Clara, Contra Costa, and San Mateo on their successful implementation of the How to Live in America Program, recognizing the program for providing productive learning environments for immigrants and preventing repeat offenses; and be it further

*Resolved,* That other counties be urged to implement the How to Live in America Program for their own immigrant populations; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

#### RESOLUTION CHAPTER 114

Assembly Concurrent Resolution No. 228—Relative to Sheriff Larry D. Smith.

[Filed with Secretary of State August 15, 2002.]

*WHEREAS,* Sheriff Larry D. Smith is the elected Sheriff, Coroner, Public Administrator and Marshal of Riverside County, and also serves by contract as the Chief of Police for 12 municipal law enforcement agencies in Riverside County, and is the county's first elected Sheriff-Coroner; and

*WHEREAS,* As commander of one of the largest and most progressive law enforcement agencies in the nation, Sheriff Smith oversees 2,940 men and women serving Riverside County; and

WHEREAS, Sheriff Smith has served the Riverside County Sheriff's Department in an exemplary fashion for over 36 years, beginning his remarkable career with the department on August 1, 1966, as a deputy sheriff in the Blythe jail and patrol station, and holding since then each successive rank in assignments across the county; and

WHEREAS, Over his career, Sheriff Smith's command assignments for the Riverside County Sheriff's Department included Narcotics, Information Services, Jail Commander, and Patrol Station Commander, and serving as the department Search and Rescue Coordinator and Emergency Services Team Commander; and

WHEREAS, Sheriff Smith was promoted to Chief Deputy Sheriff in 1987, and under his leadership as Chief of the Corrections Division, two modern jails were financed and built in Riverside County; and

WHEREAS, Sheriff Smith guided the division through its largest growth in the history of the department, the Riverside corrections system being among the 15 largest in the United States; and

WHEREAS, As Chief of the Special Operations Division, Sheriff Smith oversaw countywide narcotics enforcement, automation, and public safety communications, and was also instrumental in the creation of helicopter support in the aviation bureau; and

WHEREAS, Sheriff Smith was elected as Riverside County's 11th Sheriff, winning election in June 1994 and assuming office on December 14, 1994, and was overwhelmingly reelected to his second term in June 1998; and

WHEREAS, Under Sheriff Smith's leadership, crime has decreased by over 57 percent in Riverside County, with much of this decrease attributable to his insistence on increasing patrol positions from 661 in 1991 to 1,058 in 2002; and

WHEREAS, Sheriff Smith has received countless commendations and awards from law enforcement and numerous other associations, including the California Peace Officer's Association, the California State Sheriff's Association, the Executive Office of the President of the United States, the California State Senate and State Assembly, and the Riverside County Board of Supervisors; and

WHEREAS, Sheriff Smith is an active member of the Riverside County community, where he serves as a board member of numerous charitable organizations, including the American Heart Association and the United Way of the Inland Valleys, and presently serves on the advisory committee of the Debbie Chisholm Memorial Foundation, a charitable group dedicated to granting the wishes of terminally ill children; and

WHEREAS, In recognition of Sheriff Smith's extensive contributions to Riverside County, it is appropriate to name an existing or planned

county building in Riverside County after Sheriff Smith; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature requests the Riverside County Board of Supervisors to name an existing or planned county building in Riverside County after Sheriff Larry D. Smith; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to the Riverside County Board of Supervisors.

---

## RESOLUTION CHAPTER 115

Assembly Concurrent Resolution No. 230—Relative to Valley Fever Awareness Month.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, Valley fever (coccidioidomycosis), a progressive, multisymptom, respiratory disorder, is a debilitating disease; and

WHEREAS, It is caused by the inhalation of tiny airborne fungi that live in soil, but are released into the air by soil disturbance or wind; and

WHEREAS, Valley fever attacks the respiratory system causing infection that can lead to symptoms that resemble a cold, influenza, or pneumonia-like symptoms; and

WHEREAS, Left untreated or mistreated, infection can spread from the lungs into the bloodstream causing inflammation to the skin, permanent damage to lung and bone tissue, and swelling of the membrane surrounding the brain leading to meningitis, which can be devastating and even fatal; and

WHEREAS, Once serious symptoms of valley fever appear, including pneumonia and labored breathing, treatment must be prompt with antifungal drugs that are disagreeable and often toxic, especially for patients who have it injected beneath the base of their skull for meningitis, causing side effects such as nausea, fever, and kidney damage; and

WHEREAS, Within California alone, valley fever is found in portions of the Sacramento Valley, all of the San Joaquin Valley, desert regions, and portions of southern California; and

WHEREAS, Valley fever affects the young, the elderly, and those with lowered immune systems, which number in the tens of thousands; and

WHEREAS, Valley fever has been a disease studied for the past 100 years, but still remains impossible to control and difficult to treat; and

WHEREAS, There is no known cure to date for valley fever; however, researchers are closer than they ever have been in finding a much needed vaccine to this devastating disease; and

WHEREAS, The research effort to find a vaccine and the funding partnership, including funding from the State of California, was approved by the Legislature and signed by Governor Wilson in 1997; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature does hereby proclaim August 2002 as Valley Fever Awareness Month.

---

### RESOLUTION CHAPTER 116

Assembly Concurrent Resolution No. 233—Relative to Medal of Honor recipients of California.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, Our nation's highest award for bravery is the Congressional Medal of Honor. This medal is bestowed only for the most extraordinary acts of heroism or self-sacrifice above and beyond the call of duty, and it is the most distinguished decoration for military valor any individual can receive; and

WHEREAS, The Medal of Honor is generally presented to its recipient by the President of the United States of America in the name of Congress, and it is commonly referred to as the Congressional Medal of Honor; and

WHEREAS, Since the Medal of Honor was established in 1861, there have been 3,428 total Medals of Honor awarded, with almost one-half of them awarded posthumously. The first Medal of Honor was awarded in the Civil War, and the last conflict in which it was awarded was Somalia. Of the 3,410 recipients, 18 have received the Medal of Honor twice. To date 2,468 medals have been awarded to individuals serving in the Army, 649 to individuals serving in the Navy, 294 to individuals serving in the Marines, 16 to individuals serving in the Air Force, and one to an individual serving in the Coast Guard; and

WHEREAS, Recipients of the Medal of Honor include individuals of every rank, from private to general, and represent ethnic, geographical, economic, social, and religious diversity; and

WHEREAS, General George Patton, referring to the Medal of Honor, once remarked "I'd give my immortal soul for that decoration," and President Harry S. Truman once remarked to a Medal of Honor recipient, "I'd rather have that medal than be President of the United States"; and

WHEREAS, Medal of Honor recipients of California have fought so unselfishly to secure our freedom, we owe these decorated heroes a debt of gratitude; and

WHEREAS, The names of all recipients of the Medal of Honor are etched on the granite walls of the Medal of Honor Memorial located at Riverside, in the great State of California; and

WHEREAS, It is important to recognize the significant duties, responsibilities, and sacrifices of the 16 living Medal of Honor recipients of California: John Baca, Robert Bush, Jon Cavaiani, Walt Ehlers, John Finn, Delbert Jennings, John McGinty, Lew Millett, Robert Modrzejewski, Mitch Paige, Richard Pittman, Alejandro Ruiz, James Stockdale, James Swett, James Taylor, and Jay Vargas; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature of the State of California does hereby recognize and commend the bravery and selflessness of the Medal of Honor recipients of California, and expresses its appreciation for their service and dedication to the citizens of California and the United States; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 117

Assembly Joint Resolution No. 47—Relative to commending Title IX of the Education Amendments of 1972.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, June 23, 2002, marks the celebration of the 30th anniversary of Title IX of the Education Amendments enacted by the United States Congress and signed into law in 1972, and upon this occasion, it is deserving of special public commendations; and

WHEREAS, Title IX of the Education Amendments of 1972, which is one of the most significant pieces of federal legislation passed in the 20th century, prohibits discrimination on the basis of sex in education programs and activities at education institutions that receive federal funds, and it is an omnibus education law affecting all curricular and extracurricular offerings, from medicine, law, and science to drama, dance, and athletics; and

WHEREAS, Girls and women throughout the ages have participated in a variety of sports and physical activities in school, community, and club programs; and

WHEREAS, Prior to the passage of Title IX, there were few opportunities for girls and women to participate in high school or college athletics; and

WHEREAS, Participation in sports is acknowledged as a positive force in developing and promoting physical, mental, moral, social, and emotional well-being, and it is well-established that participation in athletics builds self-esteem, communication skills, discipline, and perseverance, all qualities that make a positive and significant difference in the quality of life and in the level of accomplishment; and

WHEREAS, Participation in girls youth and high school sports leagues has risen to a record level, and participation by female collegiate athletes now represents 41 percent of all varsity athletes; and

WHEREAS, Girls who participate in sports have the opportunity to develop strong interpersonal relationships while learning teamwork, goal-setting, and other achievement-oriented behaviors; and

WHEREAS, Participation in athletics strengthens family bonds between young women and their parents who may have participated in athletics themselves, and engaging in physical activities and sporting events as a family unit further enhances family bonds; and

WHEREAS, Teenage female athletes are less likely to use marijuana, cocaine, or other illicit drugs, less likely to be suicidal, less likely to smoke, and more likely to have positive body images than female nonathletes, and women student athletes graduate at a significantly higher rate than women students in general; and

WHEREAS, Teenage female athletes are 50 percent less likely to become pregnant as female nonathletes, less likely to have sex as teenagers than female nonathletes, and more likely to postpone their first sexual experience than female nonathletes; and

WHEREAS, Many female athletes have distinguished themselves as representatives of California and the nation in international competition and the Olympic Games, and during the 2000 Summer Olympics, women competed for the first time in the same number of team sports as men; and

WHEREAS, Professional female athletes now compete in leagues such as the Women's United Soccer Association, the Women's National Basketball Association, the Women's Tennis Association, the Ladies Professional Golf Association, Women's Professional Softball League, and the Women's Professional Football League, and the United States Professional Volleyball League will launch in 2002; and

WHEREAS, The increased visibility of female athletes provide people, young and old, female and male, with positive role models, and many women agree that seeing successful female athletes make them feel great pride as women; and

WHEREAS, Title IX continues to break down the gender barriers in educational institutions, giving women the opportunity to strive and achieve for excellence and realize the best within themselves; and

WHEREAS, Women of all ages should be encouraged to compete and contribute to sports at all levels of competition and to ensure opportunity for the next generation of female athletes and sports leaders as we enter the new millennium; now therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California memorializes the President and Congress of the United States to do all of the following:

(1) Stand firm in their resolve to uphold the intent and substance of the current provision of Title IX of the Education Amendments of 1972.

(2) Pursue a strong enforcement policy for Title IX of the Education Amendments of 1972 and strengthen the compliance and enforcement policies of the U.S. Department of Education's Office for Civil Rights (OCR).

(3) Support the continuation of the strong compliance standards that are currently in place for Title IX of the Education Amendments of 1972.

(4) Encourage all Americans to participate in the national celebration, "Celebrating 30 Years of Title IX"; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President of the United States and to all Members of Congress of the United States.

---

## RESOLUTION CHAPTER 118

Assembly Joint Resolution No. 48—Relative to the reunification of Cyprus and its accession to the European Union.

[Filed with Secretary of State August 15, 2002.]

WHEREAS, For 27 years Turkey has illegally occupied 37 percent of the territory of the Republic of Cyprus and during that time has continually violated the will of the international community, including the United States and the United Nations, that Turkey cease its illegal occupation of Cyprus; and

WHEREAS, It is the position of the United States government that a political settlement to the Cyprus problem should be based on United Nations Security Council Resolutions; and

WHEREAS, These resolutions provide that a Cyprus settlement must be based on a State of Cyprus with a single sovereignty and international personality and a single citizenship, with its independence and territorial integrity safeguarded, and comprising two politically equal

communities as described in the relevant Security Council resolutions, in a bicommunal and bizonal federation; and

WHEREAS, The resumption of direct talks in January 2002, in the context of the Good Offices of the Secretary General, to find a just and viable solution to the Cyprus problem is an encouraging development that should be sustained and intensified in order to arrive, by the target date of June 2002, to an agreement; and

WHEREAS, The members of the Security Council, reiterated, on April 4, 2002, their full support for the negotiating process and for the Secretary General's mission entrusted to him by the Security Council in Security Council Resolution 1250, which was adopted on June 29, 1999, and urged the leaders to work for reaching a comprehensive settlement that takes full consideration of the relevant United Nations Resolutions and Treaties; and

WHEREAS, A peaceful, just, and lasting solution to the Cyprus problem would greatly benefit the security and the political, economic, and social well-being of all Cypriots, as well as contribute to improved relations between Greece and Turkey, and will serve the interests of the United States in the region; and

WHEREAS, Security, reconciliation, and prosperity for all Cypriots can be best achieved within the context of membership in the European Union which will provide significant rights and obligations for all Cypriots; and

WHEREAS, The prospect of Cyprus' accession to the European Union has acted as a catalyst for the resumption of the talks aimed at reaching a solution of the Cyprus problem; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature calls upon the President of the United States to increase the administration's efforts to encourage initiatives that will help promote and achieve reunification, reconciliation, stability, and prosperity in Cyprus within the context of the ongoing efforts under the United Nations Secretary General's auspices and on the basis of the relevant United Nations Security Council Resolutions; and be it further

*Resolved,* That the Assembly and Senate of the State of California, jointly, request the United States government to continue to strongly support the accession of Cyprus to the European Union, without a settlement of the Cyprus problem being a precondition for accession; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the United States House of Representatives, and to each Senator and Representative in the Congress of the United States.

---

## RESOLUTION CHAPTER 119

Assembly Concurrent Resolution No. 202—Relative to seniors.

[Filed with Secretary of State August 20, 2002.]

WHEREAS, The right to a healthy life is one of the most basic of all rights; and

WHEREAS, Three million six hundred thousand Californians are over the age of 65 years. Medicare alone is unable to support the health care needs of such a large population. Many seniors have fixed incomes and cannot afford rising health care costs, including the costs of prescription medications and other treatments that are not covered by Medicare; and

WHEREAS, Five million eight hundred thousand people in the United States are in long-term care. Long-term care costs approximately \$50,000 per year per patient, and thus seniors in long-term care are often forced to impoverish themselves, losing not only their assets, but also lifetimes of memories. In addition, many seniors are forced to leave their homes prematurely and enter long-term care facilities because they are denied home health care services; and

WHEREAS, Seniors with diminished mental and physical capacities are targets for financial, physical, and emotional elder abuse that negatively affects their health; and

WHEREAS, Seniors are often treated by different doctors who do not know the medical histories of their patients, thus further reducing the continuity and resulting quality of care for seniors; and

WHEREAS, Seniors are presented with a confusing maze of health care laws and regulations, both federal and state, thus making it difficult for them to have access to accurate information relating to their coverage and rights; and

WHEREAS, Many seniors are, therefore, currently not receiving the quality of health care that they deserve as a basic right; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That it is the goal of the Legislature that every senior in California receive the best possible health care and that, in order to achieve this goal, the Legislature finds and declares that seniors ought to have all of the following rights with regard to health care:

(1) Every senior should be entitled to access affordable, high-quality, and expedient health care, including prescription medication, hospitalization, mental health care, orthotics, dental care, vision care, gender-specific medical care, and long-term care.

(2) Every senior should be entitled to continuity with respect to his or her health care.

(3) Every senior should be entitled to safe and clean environments in assisted living and long-term health care facilities.

(4) Every senior should be entitled to access to home health care.

(5) Every senior should be entitled to accessible and legible information about health care and accompanying rights.

(6) Every senior should be entitled to information and easy access to a knowledgeable advocate who is capable of assisting seniors who are disabled by illness.

(7) Every senior should be entitled to protection from financial, emotional, and physical elder abuse; and be it further

*Resolved*, That the Chief Clerk of the Assembly distribute copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 120

Assembly Concurrent Resolution No. 211—Relative to integrating walking and biking into transportation infrastructure.

[Filed with Secretary of State August 20, 2002.]

WHEREAS, Bicycling and walking contribute to cleaner air; and

WHEREAS, Bicycling and walking provide affordable and healthy transportation options for many of the 10 million Californians who do not possess a driver's license; and

WHEREAS, The State Department of Health Services has declared that more than 40,000 Californians annually die from causes related to physical inactivity; and

WHEREAS, The United States Centers for Disease Control has determined that changes in the community environment to promote physical activity may offer the most practical approach to prevent obesity or reduce its comorbidities. Automobile trips that can be safely replaced by walking or bicycling offer the first target for increased physical activity in communities; and

WHEREAS, Bicycling and walking contribute to safeguarding our coast from offshore oil drilling and enhance California's energy independence and national security by reducing our reliance upon imported oil; and

WHEREAS, Designing roads for safe and efficient travel by bicyclists and pedestrians saves lives; and

WHEREAS, Bicyclists and pedestrians pay sales taxes which provide for the majority of local transportation spending; and

WHEREAS, Local demand for funding from the Bicycle Transportation Account, the Safe Routes to School, and the

Transportation Enhancement Activity Programs far exceeds available moneys; and

WHEREAS, The best use of limited financial resources is to include bicycle and pedestrian elements into roadway projects where feasible; and

WHEREAS, Bicycling and walking reduce traffic congestion in California; and

WHEREAS, In February 2000, the United States Department of Transportation issued a design guidance statement titled, "Accommodating Bicycle and Pedestrian Travel: A Recommended Approach-A United States Department of Transportation Policy Statement on Integrating Bicycling and Walking into Transportation Infrastructure;" and

WHEREAS, In March 2001, the California Department of Transportation issued Deputy Directive 64 titled "Accommodating Non-Motorized Travel" which states that "The Department fully considers the needs of non-motorized travelers (including pedestrians, bicyclists and persons with disabilities) in all programming, planning maintenance, construction, operations, and project development activities and products. This includes incorporation of the best available standards in all of the Department's practices. The Department adopts the best practices concepts in the US DOT Policy Statement on Integrating Bicycling and Walking into Transportation Infrastructure;" now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That in order to improve the ability of all Californians who choose to walk or bicycle to do so safely and efficiently, the Legislature of the State of California hereby encourages all cities and counties to implement the policies of the California Department of Transportation Deputy Directive 64 and the United States Department of Transportation's design guidance document on integrating bicycling and walking when building their transportation infrastructure.

---

## RESOLUTION CHAPTER 121

Assembly Joint Resolution No. 6—Relative to retirement security and savings.

[Filed with Secretary of State August 20, 2002.]

WHEREAS, It has become increasingly apparent that many working individuals face challenges that make it difficult for them to maximize their retirement savings and plan adequately for their retirement; and

WHEREAS, Current law could be amended to encourage and facilitate increased retirement savings and retirement planning; and

WHEREAS, The 106th Congress considered H.R. 1102, the Retirement Security and Savings Act of 2000, which subsequently failed passage; and

WHEREAS, The Retirement Security and Savings Act of 2000 would have increased the amount of deductible contributions workers could make each year to an Individual Retirement Account, commonly known as an IRA, with special accelerations allowed for individuals 50 years of age and older; and

WHEREAS, The Retirement Security and Savings Act of 2000 would have increased the dollar limit on deductions for participation in tax-deferred retirement plans, tax-sheltered annuities, and deferred compensation plans under Sections 401(k), 403(b), and 457 of Title 26 of the United States Code; and

WHEREAS, The Retirement Security and Savings Act of 2000 would have repealed the laws that require the coordination of contributions to a plan under Section 457 of Title 26 of the United States Code with contributions to other such plans; and

WHEREAS, The Retirement Security and Savings Act of 2000 would have revised and clarified existing law to enhance pension fairness for women; and

WHEREAS, The Retirement Security and Savings Act of 2000 would have increased pension portability by allowing distributions from IRAs, tax-deferred retirement plans, tax-sheltered annuities, and deferred compensation plans under Sections 401(k), 403(b), and 457 of Title 26 of the United States Code to be rolled over to other plans or arrangements, including a surviving spouse's plans or arrangements; and

WHEREAS, The Retirement Security and Savings Act of 2000 would have allowed a participant in a state or local government plan to exclude from gross income certain direct transfers of funds if they were used to purchase permissive service credits under the plan or to repay certain contributions; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California respectfully requests that the President of the United States and the Congress of the United States enact legislation containing provisions similar to the Retirement Security and Savings Act of 2000; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, the Majority Leader of the

Senate, and each Senator and Representative from California in the Congress of the United States.

---

RESOLUTION CHAPTER 122

Assembly Joint Resolution No. 25—Relative to forest resources.

[Filed with Secretary of State August 20, 2002.]

WHEREAS, California is blessed with 40 million acres of forests that provide economic, consumer, environmental, and aesthetic benefits indispensable to our quality of life; and

WHEREAS, Preservation of those forestlands for fish and wildlife habitat, recreation, water quality, and open-space uses is a priority for all Californians and depends upon good forest management practices to ensure sustainable forests; and

WHEREAS, Good forest management integrates the nurturing, sustainable harvesting, and replanting of forests and conservation of soil, air, water, wildlife, fish habitat, and aesthetics; and

WHEREAS, Approximately 85 percent of California's water originates in forested watersheds; and

WHEREAS, Good forest management requires cooperation among landowners, forest products enterprises, scientists, government, forest residents and visitors, and consumers of wood products; and

WHEREAS, 16 million acres of California forests contain productive forestlands available to provide a sustainable supply of building materials, paper, furniture, medicines, and other important products; and

WHEREAS, Forest-based enterprises have been an important component of California's economy for more than 150 years, supporting jobs, families, businesses, and entire rural communities throughout the state while providing significant tax revenues to government; and

WHEREAS, California was the first state to establish a multiagency, discretionary environmental review and approval process for timber harvesting on private lands in the United States; and

WHEREAS, Wood, a readily available and commonly used building product that is renewable, recyclable, reusable, and biodegradable, is critical to society's ability to meet the public's demand for housing; and

WHEREAS, Forest-based enterprises and professionals agree that they have a responsibility to be good stewards of the environment and are committed to continuing to improve upon modern, scientifically sound approaches that ensure maximum conservation and renewal of our forests; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California recognizes the important role that sustainably managed forests and products from those forests will continue to play in meeting the needs of the citizens of California; and be it further

*Resolved,* That the Legislature encourages good forest practices to ensure the conservation, maintenance, and enhancement of a productive and stable forest environment that protects water quality, wildlife resources, and rural communities; and be it further

*Resolved,* That the Legislature confirms its support for economically and environmentally sound management practices that ensure the sustainability of our forests as well as future supplies of essential products from our forests; and be it further

*Resolved,* That the Legislature memorializes the Congress to similarly declare its encouragement of public and private investment in economically and environmentally sound management practices that ensure sustainable forests for the benefit of present and future generations; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

---

## RESOLUTION CHAPTER 123

Assembly Joint Resolution No. 42—Relative to federal proposal to devolve the administration of the unemployment insurance system.

[Filed with Secretary of State August 20, 2002.]

WHEREAS, Unemployment insurance has been the bedrock of the social safety net for workers who have been laid off and are seeking jobs and is the first line of defense during economic downturns; and

WHEREAS, Unemployment insurance not only provides vital income support to laid off workers, but also stabilizes the local, state, and national economies because the benefits workers receive are invested back into the community; and

WHEREAS, President Bush's proposal would destroy the federal-state partnership on which the unemployment insurance system is founded and would eliminate the historic role of the federal government in both ensuring that administrative financing keeps pace with ever-changing workload needs and assuring that the program is implemented consistently across the country; and

WHEREAS, Although the administration proposes to provide much-needed additional “Reed Act” funding for state unemployment programs, under the proposal states would receive no federal aid to fund the administrative costs of the unemployment insurance system after 2006; and

WHEREAS, President Bush’s proposal would reduce federal administrative payments that will result from the reduction in the Federal Unemployment Tax Act (FUTA) flat tax from \$56 per worker per year to \$14 per year; and

WHEREAS, This proposal would force California to raise taxes or find other state general funds to administer the unemployment insurance program; and

WHEREAS, President Bush’s proposal would jeopardize the federal government’s ability to help our state respond to economic downturns by drastically reducing the funding now dedicated to the federal unemployment trust funds; and

WHEREAS, The federal proposal would do nothing to help states cope with the challenges of expanding and modernizing their unemployment insurance systems, including ensuring that more low-wage workers are covered when they become unemployed; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California urges the President and Congress of the United States to abandon the federal proposal to devolve the administration of the unemployment insurance system. The Legislature also urges the President and Congress of the United States to instead work with the state to ensure that the state receives a greater level of workload-based federal appropriations for administrative financing, and to provide new dedicated federal funding to help the state cover the workers who are now having the most difficulty collecting unemployment benefits; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to the President of the United States and to each Senator and Representative from California in the Congress of the United States.

---

## RESOLUTION CHAPTER 124

Senate Concurrent Resolution No. 84—Relative to a sister state relationship with the Azores.

[Filed with Secretary of State August 21, 2002.]

WHEREAS, The Azores is a group of nine islands strategically located in the Atlantic Ocean 800 miles west of Portugal, a two-hour flight from the capital city of Lisbon; although the Azores continue to be part of Portugal, they have been administrated autonomously since 1980; and

WHEREAS, The first Azorean settlers in California can be traced back to the early 19th century, when they engaged in whaling and gold mining; a large wave of Azorean immigrants moved into California at the end of the 19th century and industriously set up considerable agricultural operations, especially dairying and intensive vegetable and fruit farming; and

WHEREAS, Historically, California has been a popular destination for migrants from the Azores, creating strong cultural ties between the two regions; currently there are roughly 500,000 Portuguese people living in California, approximately 90 percent of whom have either come directly from the Azores or have Azorean parentage; and

WHEREAS, People continue to migrate to California from the Azores, creating a large concentration of Azoreans in California, especially around the East Bay and the Central Valley, and many maintain strong ties to their ancestral homeland; and

WHEREAS, The Azores have many characteristics in common with California, including enjoying similarly mild climates and having similar prominent economic activities, such as agriculture, tourism, wine growing, and fishing. Agriculture is an important industry for the people of the Azores, where approximately 28.7 percent of the population is engaged in that activity; and

WHEREAS, The Azores are a destination for mainland Portuguese as well as international tourists who come to enjoy the natural beauty as well as sites of historical significance. Like California, the Azores have the combination of mountains, ocean, and open land. Diving, fishing, hiking, golf, tennis, and relaxing on the beach are just a few of the activities tourists enjoy; and

WHEREAS, California and the Azores could benefit greatly from increased cooperation as some similar challenges are faced in both regions. Because of the volcanic nature of the islands, they are subject to severe earthquakes in much the same way that California is. Soil erosion, air pollution, and droughts have also been common problems; and

WHEREAS, A sister state relationship would promote mutual trade and commerce and increase the potential for educational, environmental, and cultural relations between the Azores and California; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature of the State of California, on behalf of

the people of California, extends to the people of the Azores an invitation to join with California in a sister state relationship in order to encourage and facilitate mutually beneficial economic, educational, environmental, and cultural exchanges and to lead to a more indelible and lasting relationship between California and the citizens of the Azores; and be it further

*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the author for appropriate distribution.

---

#### RESOLUTION CHAPTER 125

Senate Concurrent Resolution No. 85—Relative to the California Highway Patrol Officer Arthur E. Dunn Memorial.

[Filed with Secretary of State August 21, 2002.]

WHEREAS, Twenty-five years ago, California Highway Patrol Officer Arthur E. Dunn, a dedicated officer, died in the line of duty on July 9, 1977, when he was shot by a prisoner he was transporting to jail while traveling on State Route 89 in Shasta County; and

WHEREAS, Officer Dunn joined the Department of the California Highway Patrol in March 1963, graduated from the patrol academy and was assigned to the West Los Angeles area on July 5, 1963, transferred to the Sacramento area on December 3, 1965, the Redding area on October 11, 1967, and was assigned to the Burney Resident Post in July 1968; and

WHEREAS, Officer Arthur E. Dunn, as a result of his steadfast dedication to the citizens of the State of California, and his commitment and contributions to the safety of the motoring public represented the Department of the California Highway Patrol in an outstanding manner; and

WHEREAS, In recognition of his ultimate sacrifice for the citizens of the state, it is befitting that, on the northbound and southbound portions of State Route 89, in the vicinity of mile post markers 89SHA36.00 and 89SHA41.00, in the unincorporated area of Shasta County, appropriate memorials be placed to honor the memory of this selfless officer; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring*, That the Department of Transportation is requested to grant, without charge, the necessary encroachment permits authorizing appropriate memorials, funded by nonstate sources, to be placed within the right-of-way of northbound and southbound State Route 89 in the

vicinity of milepost markers 89SHA36.00 and 89SHA41.00; and be it further

*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the Department of Transportation and the author for appropriate distribution.

---

RESOLUTION CHAPTER 126

Senate Concurrent Resolution No. 86—Relative to California Highway Patrol Officer George W. Redding Memorial.

[Filed with Secretary of State August 21, 2002.]

WHEREAS, Twenty-five years ago, California Highway Patrol Officer George W. Redding, a dedicated officer, died in the line of duty on August 17, 1977, as a result of injuries sustained when struck by a utility pole guy wire while investigating a traffic collision on State Highway Route 273 in Shasta County; and

WHEREAS, Officer Redding joined the Department of the California Highway Patrol in January 1966, graduated from the patrol academy and was assigned to the San Leandro area on May 25, 1966, and transferred to the Redding area on September 15, 1969; and

WHEREAS, Officer Redding, as a result of his steadfast and selfless dedication to the citizens of the State of California, and his commitment and contributions to the safety of the motoring public, represented the Department of the California Highway Patrol in an outstanding manner; and

WHEREAS, In recognition of his ultimate sacrifice for the citizens of the state, it is befitting that on the northbound and southbound portions of State Highway Route 273 in the vicinity of mile-post markers 273SHA6.50 and 273SHA10.50 in the unincorporated area of Shasta County appropriate memorials be placed to honor his memory; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring*, That the Department of Transportation is requested to grant, without charge, the necessary encroachment permits authorizing appropriate memorials, funded by nonstate sources, to be placed within the right-of-way of northbound and southbound State Highway Route 273 in the vicinity of milepost markers 273SHA6.50 and 273SHA10.50; and be it further

*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the Department of Transportation and the author for appropriate distribution.

---

RESOLUTION CHAPTER 127

Senate Concurrent Resolution No. 100—Relative to Family History Month.

[Filed with Secretary of State August 21, 2002.]

WHEREAS, The family has been the vehicle of survival and stability in every culture; and

WHEREAS, The family is fundamental to our nation's future because it is the context in which almost all early learning and acculturation takes place; and

WHEREAS, The family, striving for a future of opportunity and hope, reflects our nation's belief in community, stability, and love, and remains an institution of promise, reliance, and encouragement; and

WHEREAS, The family is looked to as an unwavering symbol of constancy that will help discover a future of prosperity, promise, and potential; and

WHEREAS, Within our nation's libraries and archives lie the treasured records that detail the history of our nation, states, communities, and citizens, and individuals from across the nation and across the world have embarked on a genealogical journey to discover who their ancestors were and how various forces shaped their past; and

WHEREAS, An ever-growing number in our nation and in other nations are collecting, preserving, and sharing genealogies, personal documents, and memorabilia that detail the life and times of families around the world; and

WHEREAS, The California State Genealogical Alliance (CSGA) Officers conducted a query of those genealogical societies with 1,000 or more members, societies with over 500 members, and the number of smaller CSGA member societies with 30 to 100 members, and from this query, CSGA estimated that 75,000 California residents are members of a California genealogical society; and

WHEREAS, In addition to the 75,000 Californians who are members of a California genealogical society there are thousands more who belong to national societies in other states; and

WHEREAS, Genealogical research is rapidly expanding as computer software and online databases simplify research; and

WHEREAS, The study of family history gives individuals a sense of their heritage and a sense of responsibility in carrying out a legacy that their ancestors began, and as individuals learn about their ancestors who worked so hard and sacrificed so much, their commitment to honor their ancestors' memory by doing good has increased; and

WHEREAS, Interest in one's personal family history transcends all cultural and religious affiliations; and

WHEREAS, To encourage family history research, education, and knowledge sharing, national, state, and local officials have actively promoted genealogy and facilitated access to family history records in archives and libraries, which has become important factors in the successful perception of nationwide camaraderie, support, and participation; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the month of October 2002 shall be recognized as Family History Month, and the people of the state are encouraged to take an interest in tracing their family's history and to observe the month with appropriate ceremonies and activities.

---

#### RESOLUTION CHAPTER 128

Senate Concurrent Resolution No. 101—Relative to Parent-Teacher Association Membership Month.

[Filed with Secretary of State August 21, 2002.]

WHEREAS, The California State Parent Teacher Association (PTA) has demonstrated more than 100 years of dedication in promoting parent and public involvement in schools and communities; and

WHEREAS, Since its founding in 1897, the purpose of the PTA has been to promote the welfare of children and youth in homes, schools, communities, and places of worship, to raise the standards of home life, and to encourage a closer relationship between the home and the school so that parents and teachers may cooperate more intelligently in the education of children and youth; and

WHEREAS, The California State PTA also promotes united efforts by educators and the general public that will secure for all children and youth the highest advantages in physical, mental, social, and spiritual education; and

WHEREAS, Research provides substantial evidence that children whose families provide a caring and supportive environment and are actively involved in their schools have a higher probability of personal and academic success; and

WHEREAS, Statistics also show that the most highly successful schools are those with the most active parent and community involvement; and

WHEREAS, Parent and teacher cooperation in public schools will contribute significantly to the opportunities for all of our children to be successful in school, and will better prepare California's pupils for the job market of the 21st century; and

WHEREAS, More than one million parents, grandparents, educators, and other community members have enlisted as active members of the California State PTA in 3,900 local associations throughout California; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature of the State of California hereby commends parents, grandparents, and other citizens who have been involved in their schools and communities; and be it further

*Resolved,* That the Legislature encourages the participation of parents and community volunteers in every school and community across the state to provide children and youth with a healthy and productive learning environment; and be it further

*Resolved,* That the Legislature hereby proclaims September 2002 as Parent-Teacher Association Membership Month in California.

---

## RESOLUTION CHAPTER 129

Senate Joint Resolution No. 40—Relative to international investment agreements.

[Filed with Secretary of State August 21, 2002.]

WHEREAS, The United States government, through the United States Trade Representative, is negotiating to create or interpret investment agreements under the proposed Free Trade Area of the Americas (FTAA), bilateral agreements such as the United States-Chile agreement, the investment chapter of the North American Free Trade Agreement (NAFTA), and potentially under the World Trade Organization (WTO); and

WHEREAS, Investment agreements affect state and local powers, including, but not limited to, zoning, protection of groundwater and other natural resources, corporate ownership of land and casinos, law enforcement by courts, public services, and sovereign immunity; and

WHEREAS, Investment rules under these agreements deviate from United States legal precedents on takings law and deference to legislative determinations on protecting the public interest; and

WHEREAS, Investment rules do not safeguard any category of law from investor complaints, including, but not limited to, laws passed in the interest of protecting human or animal health, environmental resources, human rights, and labor rights; and

WHEREAS, Foreign investors have used the provisions of NAFTA's investment chapter to challenge core powers of state and local government, including, but not limited to, regulatory power to protect groundwater in California; the power of civil juries to use punitive damages to deter corporate fraud in Mississippi; the ability of states to invoke sovereign immunity in Massachusetts; and a decision by local government to deny a zoning permit for construction of a hazardous waste dump in Guadalcazar, Mexico; and

WHEREAS, Serious concerns about international investment agreements have been expressed by national government associations, including the National Conference of State Legislatures, which urged federal trade negotiators not to commit the United States to further investor-to-state dispute provisions such as those pending under NAFTA; the National League of Cities, which has expressed concern that expansion of investment rules could undermine the successful effort by state and local governments to defeat legislation to expand compensation for takings in the 104th Congress; and the National Association of Attorneys General, which has encouraged Congress to ensure that foreign investors receive no greater rights to financial compensation than those afforded our citizens in any new international trade agreements; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes the President and Congress of the United States that the Congress and the United States Trade Representative should preserve the traditional powers of state and local governments by requiring that negotiators of international investment agreements do all of the following:

(a) Either carve out state and local governments from the scope of future investment agreements or exclude investor-to-state disputes from investment agreements.

(b) Ensure that international investment rules do not give greater rights to foreign investors than United States investors enjoy under the United States Constitution.

(c) Ensure that international investment rules do not undermine traditional police powers of state and local governments to protect public health, conserve environmental resources, and regulate fair competition.

(d) Ensure that all proceedings are open to the public and that all submissions, findings, and decisions are promptly made public,

consistent with the need to protect classified information, and that amicus briefs will be accepted and considered by investment tribunals.

(e) Provide that an investors' home government must consent to the investor's claim against its host government, if investor-to-state disputes are retained; and be it further

*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the United States Trade Representative, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

---

### RESOLUTION CHAPTER 130

Assembly Concurrent Resolution No. 102—Relative to the Senator Jim Costa Highway.

[Filed with Secretary of State August 23, 2002.]

WHEREAS, The Honorable Jim Costa, California State Senator, is departing the California State Legislature after 24 years of dedicated public elected service, having represented the 16th State Senate District since 1994 and, prior to that tenure, represented the 30th Assembly District from 1978 to 1994, and upon this occasion, he is deserving of the special honors and highest commendations of the people of the State of California; and

WHEREAS, Jim Costa was elected to the California State Assembly in 1978 at the age of 25, and his reason for wanting to be elected to office was to help people, make a difference in determining public policy, and deal with issues that affect people's daily lives; and

WHEREAS, His background in farming was an asset as a Legislator, and the issues on which he focused most intently were water, agriculture, transportation, housing, and problems of the San Joaquin Valley; and he also devoted a great deal of time and energy to the National Conference of State Legislatures, of which he served as president in the years 2000 and 2001; and

WHEREAS, During his tenure in the Assembly, he served as Chair of the Assembly Water, Parks, and Wildlife Committee and the Subcommittee for the Assembly Ways and Means Committee; and

WHEREAS, Since his election to represent the 16th Senatorial District in 1994, Senator Jim Costa has served the Senate admirably as Chairman of the Agriculture and Water Resources Committee, the Banking, Commerce and International Trade Committee, the Housing

and Community Development Committee, and the Transportation Committee; and

WHEREAS, Senator Costa's major legislative accomplishments include spearheading the effort that obtained \$26 million for a UCSF-Fresno Medical Education and Research Center to help train new doctors and ease the San Joaquin Valley's shortage of physicians; forging historic agreements that became Proposition 204, the Safe, Clean, Reliable Water Supply Act of 1996 and Proposition 13, the Safe Drinking Water, Clean Water, Watershed Protection, and Flood Protection Bond Act in 2000; moving California's primary election to the first Tuesday in March of even-numbered years; writing the law to help child protective services and improve response to abuse complaints; writing the 1998 and 1999 agricultural land conservation laws; helping enact tax cuts, welfare reform, and class size reduction; authoring "Three Strikes, You're Out," America's toughest standard against violent crime; authoring major reform of the Endangered Species Act to encourage retention of wildlife habitat; coauthoring legislation that equalized special education funding and support for county offices of education; authoring landmark legislation which requires local agencies to give greater consideration to the availability of water when considering major new development; advocating for reduction of Bay Area smog blowing into the San Joaquin Valley and working to switch San Joaquin Valley truck fleets to cleaner fuels by gaining approval of a first-of-its-kind program to create LNG terminals; creating the San Joaquin River Conservancy to establish a parkway along the San Joaquin River; authoring legislation which encourages investment in construction of affordable housing for low and moderate income families; leading the effort to save and improve Amtrak passenger rail service in California and to create the California High Speed Rail Authority; and bringing to fruition the construction of eight prisons built in local communities which requested them, providing over 10,000 permanent jobs; and

WHEREAS, Jim Costa, a third-generation American, grew up in a farming family of Portuguese descent and was raised on his family's farm in western Fresno County, and he and his family have farmed in the San Joaquin Valley since the early 1900s in Tulare, Kings, and Fresno Counties; and

WHEREAS, Through his public service activities Senator Jim Costa has made a significant impact on the people of the 16th Senate District and throughout the state; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Honorable Jim Costa be commended on his illustrious record of dedicated and highly effective public elected service, applauded on the leadership he has provided during his tenure

in the State Legislature, and extended best wishes for every continued success in his future pursuits; and be it further

*Resolved*, That the portion of State Highway Route 180 between State Highway Route 99 and Chestnut Avenue, and any future freeway extension between Chestnut Avenue and Clovis Avenue, in the County of Fresno, be officially dedicated as the “Senator Jim Costa Highway”; and be it further

*Resolved*, That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the Department of Transportation and to the author for appropriate distribution.

---

#### RESOLUTION CHAPTER 131

Senate Concurrent Resolution No. 95—Relative to sister state status.

[Filed with Secretary of State August 26, 2002.]

WHEREAS, The people of California and the State of Baja California Sur share a mutual history, ancestry, culture, art, and architecture of Spanish and Native American civilizations; and

WHEREAS, The States of California and Baja California Sur share many geographical, agricultural, and economic similarities, including beautiful coastlines on the Pacific Rim, significant agricultural areas, and a strong level of tourism; and

WHEREAS, The State of California and the Mexican State of Baja California Sur share a mutually beneficial economic relationship that includes trade, investments, and commerce in the areas of fishing, agriculture, mining, manufacturing, ecotourism, and other important industries; and

WHEREAS, The North American Free Trade Agreement (NAFTA) has expanded trade between the State of California and the State of Baja California Sur, providing additional impetus and reason for cooperation; and

WHEREAS, The State of Baja California Sur has an annual gross state product of more than 23 billion pesos per year, a 10-year growth rate of more than 400 percent, and per capita incomes that rank it number eight among the United States of Mexico; and

WHEREAS, The State of California and the State of Baja California Sur have supported cooperative research by universities in California and Baja California Sur to promote bilateral economic development, thereby providing mutual benefit to the people of the State of California and the State of Baja California Sur; and

WHEREAS, The number and diversity of university campuses in Baja California Sur provide ample and untapped opportunities for cooperative research and for student and faculty exchanges with California colleges and universities; and

WHEREAS, The States of California and Baja California Sur, in affirmation of the common goal of strengthened cultural ties among the Californias, as agreed to and ratified by the Commission of the Californias and the California Arts Council, duly signed the Memorandum of Understanding, which seeks to establish a joint cultural program to promote the exchange of arts and culture; and

WHEREAS, Gaspar de Portola, former Governor of the territory of Baja California and Baja California Sur, made significant contributions in the exploration of California and the establishment of the state's first presidio in 1769; and

WHEREAS, Generations of people from the State of Baja California Sur reside in the State of California, and a growing number of Californians reside in the State of Baja California Sur, particularly after retirement; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature of the State of California, on behalf of the people of the State of California, extends to the people of the State of Baja California Sur in Mexico an invitation to join with the State of California in a sister state relationship (relación de hermandad con el Estado de Baja California Sur, México) in order to encourage and facilitate mutually beneficial educational, economic, and cultural exchanges; and be it further

*Resolved,* That it is the intent of the Legislature through a sister state relationship with the State of Baja California Sur to do the following:

(1) Promote the economic growth and well-being of small, medium, and large companies in both California and Baja California Sur by increasing their potential for trade and investment.

(2) Provide a forum for sustained goodwill and cooperation between the elected leaders of the State of California and the State of Baja California Sur.

(3) Promote bilateral ties that lead to a more indelible and lasting relationship between the citizens of California and the citizens of Baja California Sur; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the Governor of California, to the Governor of Baja

California Sur, to the State Congress of Baja California Sur, and to each Senator and Representative from California in the Congress of the United States.

---

RESOLUTION CHAPTER 132

Senate Joint Resolution No. 48—Relative to California fire service terrorism preparedness.

[Filed with Secretary of State August 26, 2002.]

WHEREAS, California has experienced numerous large-scale disasters including fires, earthquakes, floods, and landslides, to which the California Fire Service has responded and mitigated further destruction in their mission as first responders; and

WHEREAS, Following the events of September 11, 2001, the threat of terrorism adds critical new dimensions to the preparedness for first responders responsible for the rescue and safety of California citizens; and

WHEREAS, The California Metropolitan Fire Chiefs have compiled a comprehensive inventory, totaling \$200,000,000, in training and equipment needs necessary to elevate the capabilities of the state's Fire Service to an appropriate level in order to meet current requirements for readiness, including the bolstering of fire department resources and training throughout the state; and

WHEREAS, It is imperative that all Statewide Fire Service first responders have available to them personal protection equipment in the event their duties require exposure to incidents involving nuclear, biological, or chemical devices designed as tools of terrorism or weapons of mass destruction; and

WHEREAS, It is crucial that all Statewide Fire Service first responders receive training that is specially designed to adequately prepare them for weapons of mass destruction events; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature of the State of California requests the President and Congress of the United States to make sufficient funds available to California to support the state's Fire Service first responder preparedness needs ; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to Senate Majority Leader Tom Daschle, to Senate Minority Leader Trent Lott, to House Speaker J. Dennis Hastert, to House Minority Leader

Richard Gephardt, and to each Senator and Representative from California in the Congress of the United States.

---

RESOLUTION CHAPTER 133

Senate Concurrent Resolution No. 91—Relative to “Partnerships for Preparedness” symposiums.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, Military facilities tend to be physically, socially, and politically isolated from surrounding communities, and have no established link to state or local levels of strategic planning at the executive, operational, or tactical levels; and

WHEREAS, Crisis tends to dictate decisions among military facilities and surrounding communities, creating competition with little positive benefit; and

WHEREAS, Effective strategic coordination does not exist between localities, interest groups, the State of California, and the United States Department of Defense; and

WHEREAS, The establishment of coordination between localities, interest groups, the State of California, and the United States Department of Defense is a top priority; and

WHEREAS, The Office of Military Base Retention and Reuse (OMBRR) within the California Technology, Trade, and Commerce Agency, seeks to foster a network of influence among military facilities, surrounding communities, and state and federal government agencies, and to develop resources to facilitate positive and collaborative action on specific defense related topics of interest statewide; and

WHEREAS, The OMBRR is working with the Office of Economic Adjustment within the United States Department of Defense to obtain a grant for the purpose of developing a model to enhance the long-term relationships between military facilities and the communities that surround these facilities; and

WHEREAS, The OMBRR will also sponsor several two-day “Partnerships for Preparedness” symposiums around the state that are designed to facilitate dialogue between military facilities, surrounding communities, and state and federal government agencies that best utilize the political process and cooperation at the local level; and

WHEREAS, These “Partnerships for Preparedness” symposiums will be the first of their kind in the nation and encourage participants to work towards obtainable resolutions to complex issues arising between military bases and surrounding communities; and

WHEREAS, These “Partnerships for Preparedness” symposiums will provide an opportunity for communities to shape their future in a wide range of areas, through continuous discussion and implementation of specific action plans developed at a local level rather than from a state or federal mandate; and

WHEREAS, These “Partnerships for Preparedness” symposiums will build lasting relationships between California’s military bases, a myriad of private and public organizations, the United States Department of Defense, and the defense industry; and

WHEREAS, These symposiums will facilitate grass roots momentum for collaborative action, with state and federal support, for creating coalitions from their participants that can respond to future community challenges; and

WHEREAS, Through these events, military bases and their surrounding communities will be able to identify a common vision, provide a forum for dialogue, and facilitate agreement on actions to ensure our national security and enhance the quality of life in our local communities; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature commends the efforts of the Office of Military Base Retention and Reuse, including its sponsorship of “Partnerships for Preparedness” symposiums, and encourages California cities, counties, and military bases to participate in these symposiums; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the author for appropriate distribution.

---

#### RESOLUTION CHAPTER 134

Senate Concurrent Resolution No. 99—Relative to the California Task Force on Youth and Workplace Wellness.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, Senate Concurrent Resolution No. 40, enacted in 2001 as Resolution Chapter 111, established the California Task Force on Youth and Workplace Wellness (“task force”); and

WHEREAS, The task force is charged with performing various duties to promote fitness and health in schools and workplaces; and

WHEREAS, The task force consists of 12 voting members, two of which are Members of the Assembly appointed by the Speaker of the Assembly, two of which are Members of the Senate appointed by the Senate Committee on Rules, four of which are experts appointed by the

Speaker of the Assembly, and four of which are experts appointed by the Senate Committee on Rules; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the California Task Force on Youth and Workplace Wellness is hereby expanded to include four additional voting members, for a total of 16 members; and be it further

*Resolved,* That two of the additional members shall be appointed by the Speaker of the Assembly, and shall include one person from the field of health and one member from the field of education; and be it further

*Resolved,* That the other two additional members shall be appointed by the Senate Committee on Rules, and shall include one person from the field of health and one member from the field of education.

---

### RESOLUTION CHAPTER 135

Senate Concurrent Resolution No. 103—Relative to Declaring Our Principles of Inclusion for California.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, California, as the rest of the United States and the rest of the entire world, has been experiencing the most remarkable rapid radical change in history, a period in which the only constant is change and the greatest inconstant is the ever-increasing rate of change; and

WHEREAS, The resulting breakdown of old forms, the disintegration of community and the disaffection of our people with government and its institutions has left many, if not most, of us disoriented, floundering, and desperately in need of discovering a way to regain our bearings and to re-envision and create new forms to enable us to come back together in community; and

WHEREAS, It is therefore appropriate for the Legislature to provide leadership in bringing all Californians together to recognize the profound changes and challenges that face us, and to take a long-term big-picture look at how we can cope with these changes and challenges and discern the most promising strategies for dealing with them constructively and collaboratively; and

WHEREAS, The Legislature can lead the people of California in a public dialogue regarding the most profound cross-cutting changes and challenges, facing us as we move into the 21st Century, including, but not limited to, race, diversity, technology, learning, families, health, communities, violence, aging, and environmental sustainability; and

WHEREAS, Our Joint Committee on Preparing California for the 21st Century was created in 2000 to assist the Legislature in this charge; and

WHEREAS, Our Joint Committee on Preparing California for the 21st Century chose as our first task an examination of California's most profound issue: race, diversity, and inclusion; and

WHEREAS, Our Joint Committee on Preparing California for the 21st Century convened an Advisory Team comprising Californians from across the state to assist us in drafting a set of "Principles of Inclusion," which were created to help frame public dialogue on the meaning and implications of our changing demographics and to promote an inclusive state; and

WHEREAS, Our Advisory Team provided, and our Joint Committee on Preparing California for the 21st Century adopted, its "Principles of Inclusion;" now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature declares, as our common aspiration for all Californians—regardless of gender, race, or national origin—and as its guiding principles, the following "Principles of Inclusion:"

1. We Californians affirm in thought and action that we human beings have the potential to become life affirming, constructive, responsible, and trustworthy.

2. We Californians respect, trust, and honor ourselves and each other, both as unique individuals and as bearers of diverse, rich, community-based traditions.

3. We Californians are prepared for employment and entrepreneurialism on a lifelong basis in our 21st Century information-based global economy.

4. We Californians fully and freely participate in political, economic, and social institutions, to achieve leadership positions, and to promote the expansion of democratic processes and decision-making.

5. We Californians fairly share, without barriers, in the fruits and burdens of all our economic, social, religious, and political institutions, programs, and processes.

6. We Californians regularly work, live, and socialize with people from other ethnic groups or races.

7. We Californians recognize and appreciate the awful damage caused by discrimination, and seek to prevent that conduct and to reduce that harm.

8. We Californians have access to high-quality education throughout our lifetimes, to enable us to become lifelong learners.

9. We Californians are not excluded from housing options.

10. We Californians live in neighborhoods that are free from crime and environmental hazards, and that meet basic health, housing, telecommunications, transportation, and other needs.

11. We Californians are treated fairly and equally by our law enforcement and judicial systems, including our criminal justice system.

12. We Californians have the opportunity to age in dignity.

13. We Californians practice the peaceful resolution of interpersonal and inter-group conflict.

14. We Californians enjoy the benefits of racial inclusion described in these Principles throughout the urban, suburban and rural regions of our State; and be it further

*Resolved*, That the Legislature of the State of California strongly encourages all citizens and communities in California—both public and private—to consider these “Principles of Inclusion” for themselves, and to adopt these, or their own separate “Principles of Inclusion;” and be it further

*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the author for appropriate distribution.

## RESOLUTION CHAPTER 136

Senate Joint Resolution No. 39—Relative to trade with Cuba.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, The relationship between the United States and Cuba has long been marked by tension and confrontation; and

WHEREAS, Further heightening this hostility is the 40-year-old United States trade embargo against the island nation, which remains the longest-standing embargo in modern history; and

WHEREAS, Cuba imports nearly a billion dollars' worth of food every year, including approximately 1,100,000 tons of wheat, 420,000 tons of rice, 37,000 tons of poultry, and 60,000 tons of dairy products; and

WHEREAS, These amounts are expected to grow significantly in coming years as Cuba slowly recovers from the severe economic recession it has endured following the withdrawal of subsidies from the former Soviet Union in the last decade; and

WHEREAS, California is the top agricultural producer and exporter in the nation, a position it has held for 50 years, with an enormous variety of crops and great growing conditions; and

WHEREAS, California's production values are more than \$26 billion annually; and

WHEREAS, California is, therefore, ideally positioned to benefit from the market opportunities that free trade with Cuba would provide; and

WHEREAS, Rather than depriving Cuba of agricultural products, the United States embargo succeeds only in driving sales to competitors in other countries that have no such restrictions; and

WHEREAS, In recent years, Cuba has developed important pharmaceutical products, namely, a new meningitis-B vaccine that has virtually eliminated the disease in Cuba; and

WHEREAS, These products have the potential to protect Americans against diseases that continue to threaten large populations around the world; and

WHEREAS, Cuba's potential oil reserves have attracted the interest of numerous other countries that have been helping Cuba develop its existing wells and search for new reserves, and Cuba's oil output has increased more than 400 percent over the last decade; and

WHEREAS, The United States' trade, financial, and travel restrictions against Cuba hinder California's exports of agricultural and food products and our ability to import critical energy products, the treatment of illnesses experienced by Californians, and the right of Californians to travel freely; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature of the State of California hereby respectfully urges the President and Congress of the United States to consider the removal of trade, financial, and travel restrictions relating to Cuba; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

---

## RESOLUTION CHAPTER 137

Senate Joint Resolution No. 49—Relative to human exposure to environmental chemicals.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, In 1999, the federal Centers for Disease Control and Prevention (CDC) issued its first National Report on Human Exposure to Environmental Chemicals, a new publication that provides an ongoing assessment of the United States population's exposure to environmental chemicals using biomonitoring; and

WHEREAS, “Environmental chemical” means a chemical compound or chemical element present in air, water, soil, dust, food, or other environmental media, and “biomonitoring” is the assessment of human exposure to chemicals by measuring the chemicals or their metabolites in human specimens, such as blood or urine collected in the representative survey known as the National Health and Nutrition Examination Survey (NHANES); and

WHEREAS, It is important to know which chemicals are stored in the body because they act as a “reservoir” for continued exposure, with potentially serious health consequences, since a chemical that accumulates in the body over time can increase the potential for disease to occur; and

WHEREAS, The first edition of the National Report on Human Exposure to Environmental Chemicals presents levels of 27 environmental chemicals measured in the United States population, including metals such as lead, mercury, uranium, cotinine, a marker of tobacco smoke exposure, and organophosphate pesticide metabolites, as well as phthalates; and

WHEREAS, The National Report on Human Exposure to Environmental Chemicals determines the toxic substances to which Americans are exposed, as well as populations at risk, volumes of toxic substances used, and exposure trends; and

WHEREAS, The National Report on Human Exposure to Environmental Chemicals determines whether interventions to reduce exposure have been effective; and

WHEREAS, In collaboration with other federal agencies, the National Report on Human Exposure to Environmental Chemicals provides additional information on interpreting lab measurements, including potential sources of exposure and human toxicity; and

WHEREAS, The next National Report on Human Exposure to Environmental Chemicals is due to be issued by December 2002 and will analyze 75 chemicals; and

WHEREAS, The National Report on Human Exposure to Environmental Chemicals’ findings, organized by state and demographics, were to be made available in January of 2002; and

WHEREAS, California is a world leader in clean air and water standards, often improving upon federal standards; and

WHEREAS, The California survey within the National Report on Human Exposure to Environmental Chemicals constitutes a valid sample in its own right; and

WHEREAS, The National Report on Human Exposure to Environmental Chemicals’ specific findings for the State of California will help the State Department of Health Services, the Legislature, and

the Governor's office to address California's environmental health needs; and

WHEREAS, The State Department of Health Services is responsible for developing a plan to establish an environmental health tracking system by 2003, a project that requires collation of all available data sets; and

WHEREAS, The National Report on Human Exposure to Environmental Chemicals will inform the planning process as California builds capacity at state biomonitoring facilities; and

WHEREAS, The State Department of Health Services needs to make a budgetary commitment to additional biomonitoring to augment CDC findings; and

WHEREAS, The California public has the right to information regarding regional exposures to particular chemicals; and

WHEREAS, California findings on particular chemicals will serve as an information base for populations concerned about decreasing chemical risks in their communities; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes the President of the United States, the United States Secretary of Health and Human Services, the Director of the Centers for Disease Control and Prevention, and the California Congressional delegation to seek the immediate release to the State Department of Health Services, and thereby to the California public, of the California-specific findings from the 1999 CDC National Report on Human Exposure to Environmental Chemicals; and be it further

*Resolved,* That the Legislature of the State of California respectfully memorializes the Director of the Centers for Disease Control and Prevention to release to the State Department of Health Services all California-specific findings from the National Report on Human Exposure to Environmental Chemicals that is due to be issued by December 2002, at the time that report is issued; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, the United States Secretary of Health and Human Services, the Director of the Centers for Disease Control and Prevention, and to each Senator and Representative from California in the Congress of the United States.

---

## RESOLUTION CHAPTER 138

Senate Joint Resolution No. 50—Relative to the bicentennial anniversary of the United States Military Academy at West Point.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, This year the United States Military Academy at West Point celebrates 200 years of providing leaders of character for our Army and a lifetime of selfless service to the nation; and

WHEREAS, On March 16, 1802, President Thomas Jefferson signed into law a bill of the United States Congress authorizing the establishment of “a military academy to be located at West Point in the State of New York”; and

WHEREAS, West Point was originally created as an academic institution devoted to the arts and sciences of warfare, and later emphasizing engineering to serve the needs of the nation and to eliminate the country’s reliance on foreign engineers and artilleryists; and

WHEREAS, West Point graduates were responsible for the construction of many of the nation’s initial railway lines, bridges, harbors, and roads that were the vital infrastructure of our great nation; and

WHEREAS, The list of graduates representing the Long Gray Line is distinguished and includes two American Presidents, Ulysses S. Grant and Dwight D. Eisenhower; and

WHEREAS, West Point graduates have led or nation’s Armed Forces from the birth of our nation to the present, many of them giving their lives as the ultimate sacrifice to preserve our freedom; and

WHEREAS, In addition to Ulysses S. Grant, who led the Union Army in the Civil War, General Robert E. Lee, leader of Confederate troops, graduated from the United States Military Academy; and

WHEREAS, Other graduates with notable military careers include Generals Philip Sheridan, William T. Sherman, George S. Patton, Douglas MacArthur, and H. Norman Schwarzkopf; and

WHEREAS, West Point graduates have distinguished themselves in countless ways, from Olympic glory to receiving the Heisman Trophy, from receiving scores of Rhodes Scholarships to serving as some of the nation’s pioneering astronauts; and

WHEREAS, The academy is preparing for its third century of service to our nation, a future in which fighting and winning our nation’s wars remains the Army’s primary focus; and

WHEREAS, The academy must also prepare officers for peacekeeping duties as part of an ever complex world; and

WHEREAS, The academy remains today an energetic, vibrant institution that attracts some of the nation’s best and brightest young men and women who, in the next 200 years of service to this nation, will face challenges different from those that have gone before them to make up the storied Long Gray Line; and

WHEREAS, The academy continues its lasting commitment to its motto of duty, honor, and country; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature of the State of California recognizes that the United States Military Academy at West Point is a living testament to the accomplishments of the United States throughout its history; and be it further

*Resolved,* That the Legislature of the State of California honors the United States Military Academy at West Point and its graduates as they move forward into the academy's third century of service to the nation; and be it further

*Resolved,* That the Legislature of the State of California respectfully requests the United States Congress to recognize the 200th anniversary of the United States Military Academy; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

---

#### RESOLUTION CHAPTER 139

Senate Joint Resolution No. 51—Relative to the United Nations Population Fund.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, The Bush Administration has determined that the \$34 million appropriated by Congress shall not be provided at this time to the United Nations Population Fund (UNFPA) due to the Kemp-Kasten Amendment, which provides that none of the funds made available under the Foreign Assistance and Related Programs Appropriations Act of 1985 “may be made available to any organization or program which, as determined by the President of the United States, supports or participates in the management of a program of coercive abortion or involuntary sterilization”; and

WHEREAS, The UNFPA strives to establish universal access to reproductive health, promote awareness of population and human development issues, and support population and human development; and

WHEREAS, The UNFPA provides 142 countries with health services during pregnancy and birth, voluntary family planning, teen-pregnancy prevention, and services to protect women and families from HIV/AIDS and other sexually transmitted infections; and

WHEREAS, The UNFPA addresses the issues of population, family planning, women's empowerment, and HIV intervention; and

WHEREAS, These issues are paramount to the United Nations' goals of reducing poverty, increasing global stability and prosperity, and creating a sustainable population; and

WHEREAS, The UNFPA programs not only provide benefits to women, but also their families, their communities, and their nations; and

WHEREAS, The UNFPA is committed to a voluntary, human rights-based approach to reproductive health and family planning stipulated by the 1994 Cairo International Conference on Population and Development; and

WHEREAS, A fact-finding mission to China conducted by the United States found no evidence that the UNFPA had supported or participated in programs involving coercive abortion or involuntary sterilization in China; and

WHEREAS, Past funds to the UNFPA from the United States were restricted so that they did not fund programs in China; and

WHEREAS, Congress had already approved sending \$34 million to the UNFPA in 2002; and

WHEREAS, The United States funding, estimated by the UNFPA, would be enough to prevent 2 million unwanted pregnancies, nearly 800,000 induced abortions, 4,700 maternal deaths, nearly 60,000 cases of serious maternal illness, and over 77,000 infant and child deaths; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature of the State of California memorializes the President and Congress of the United States to reinstate the \$34 million in funding for the United Nations Population Fund; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

---

## RESOLUTION CHAPTER 140

Assembly Concurrent Resolution No. 168—Relative to the Jerry Medina Memorial Freeway.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, On March 29, 2001, a beloved son, brother, friend, classmate, and neighbor, lost his life in a most tragic accident; and

WHEREAS, Jerry Medina was driving home after a day at Modesto High School when the accident occurred; and

WHEREAS, A truck crossed the highway median and landed on Jerry's car near Maze Boulevard, leaving him dead at 18 years of age; and

WHEREAS, Five other people were injured as a result of this accident; and

WHEREAS, This tragic incident continues to live in the memory of his family, friends, classmates, neighbors, and the community; and

WHEREAS, It is appropriate that the loss of this fine young man be remembered on the highway where he died; and

WHEREAS, It is also fitting that the section of highway designated in his memory consist of the section of State Highway Route 99 between Standiford Avenue/Beckwith Road, and Tuolumne Boulevard in Modesto, the path Jerry traveled daily to school; and

WHEREAS, The promise and joy for life that Jerry displayed might serve as a reminder for our youth to develop their own potential to the fullest; and

WHEREAS, This memorial section of State Highway Route 99 will continue to remind all of us of the need to keep safety a priority and a reminder to cherish every day and enjoy it to the fullest; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature hereby dedicates the section of State Highway Route 99 between Standiford Avenue/Beckwith Road, and Tuolumne Boulevard in Modesto to the memory of Jerry Medina; and be it further

*Resolved,* That this portion of State Highway Route 99 be officially designated the Jerry Medina Memorial Freeway; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate signs and markers, consistent with the signing requirements for the state highway system, showing the special designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs and markers; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the Department of Transportation and to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 141

Assembly Concurrent Resolution No. 177—Relative to foreign teacher recruitment and support.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, Pupil success depends on having a fully qualified and fully credentialed teacher in every classroom; and

WHEREAS, There are over 42,000 individuals in California's schools who do not hold a credential or other certificate issued by the Commission on Teacher Credentialing, up from 37,000 in 1997, and these noncertificated teachers are primarily concentrated in schools of greatest need; and

WHEREAS, A shortage of qualified teachers undermines California's ongoing efforts to fully achieve educational excellence; and

WHEREAS, California issues over 300 credentials annually to individuals trained to teach outside the United States to fill vacant teaching positions; and

WHEREAS, Individuals recruited to teach from other countries would benefit from full school district support, including orientation to state teaching standards and access to quality professional development; and

WHEREAS, Current law prescribes qualifications for foreign national teachers and, under the implementation of Chapter 548 of the Statutes of 1998, as early as 2003, new teachers, including teachers from other states and countries who are issued preliminary credentials will be required to complete induction programs for beginning teacher support for up to two years in order to receive a professional clear credential; and

WHEREAS, Existing law establishes professional development programs for teachers, including the Beginning Teacher Support and Assessment System, the Education Technology Staff Development Program, and the Professional Development Institutes to improve teachers' performance in the classroom; and

WHEREAS, Recent reforms have occurred in the federal Elementary and Secondary Education Act, and specifically, the No Child Left Behind Act of 2001 urges states to put highly qualified teachers in every public school classroom by 2005 and provides specific funds to states and local schools for improving teacher quality, teacher recruitment, teacher salaries, and teacher training and development, and for promoting English proficiency; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature hereby urges school districts, schools, and school administrators to review and renew their systematic and sustained efforts to fully support the teachers holding a valid HB-1, J, or similar visa, that they recruit from other countries to fill teacher shortages; and be it further

*Resolved,* That the Legislature urges school districts, schools, and school administrators to provide credentialed teachers who received

training in countries other than the United States, to the extent that it is anticipated that those teachers will become permanent employees of the school district, with improved access to high quality professional development, orientation programs, teacher induction and mentoring programs, and other local activities targeted to easing their transition into, and retention in, California classrooms to ensure effective teaching experiences for improved student outcomes; and be it further

*Resolved*, That school districts, schools, and school administrators should provide support for these teachers within existing resources without prejudice to other noninternational teachers; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit a copy of this resolution to the California Teachers Association and to the California Teachers Association Language Acquisition Committee.

---

#### RESOLUTION CHAPTER 142

Assembly Concurrent Resolution No. 178—Relative to the University of California.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, The University of California is committed to enrolling a student body reflective of the diversity of the State of California; and

WHEREAS, According to the results of the 2000 census of the United States, people of color comprise the majority of the general population of the State of California, making it the most racially and ethnically diverse state in the country; and

WHEREAS, Over the last seven years, there has been a dramatic decrease in the number of underrepresented people of color, which include African-American, Latino, and American Indian students, applying, admitted, and enrolling in the graduate programs and professional schools of the University of California; and

WHEREAS, From fall 1994 to fall 2001, inclusive, the number of African-Americans admitted to law schools at UC Berkeley, UC Davis, and UCLA declined 55 percent, from a total of 239 to 107, and their enrollment rate over the same period declined 68 percent, from a total of 87 to only 28; and

WHEREAS, From fall 1994 to fall 2001, inclusive, the number of Latinos admitted to law schools at UC Berkeley, UC Davis, and UCLA declined 33 percent, from a total of 273 to 184, and their enrollment rate over the same period declined 48 percent, from a total of 110 to only 57; and

WHEREAS, From fall 1994 to fall 2001, inclusive, the number of American Indians admitted to law schools at UC Berkeley, UC Davis, and UCLA declined 65 percent, from a total of 34 to 12, and their enrollment rate over the same period declined 58 percent, from a total of 12 to only 5; and

WHEREAS, From fall 1994 to fall 2001, inclusive, the number of underrepresented people of color admitted to UC medical schools declined 36 percent, from a total of 261 to 166, and their enrollment rate over the same period declined 54 percent, from a total of 107 to only 49; and

WHEREAS, From fall 1995 to fall 1999, inclusive, the number of underrepresented people of color admitted to UC business schools declined 34 percent, from a total of 149 to 99, and their enrollment rate over the same period declined 35 percent, from a total of 68 to only 44; and

WHEREAS, From fall 1995 to fall 1999, inclusive, the number of underrepresented people of color admitted to all of the UC graduate programs declined 7 percent, from a total of 1,385 to 1,291, and their acceptance rate over the same period declined 5 percent, from a total of 751 to only 714; and

WHEREAS, Over the last seven years, there has also been a significant decrease in the number of Asians/Asian Americans and Filipino Americans admitted and enrolled at certain graduate programs and professional schools of the University of California; and

WHEREAS, From fall 1995 to the fall 2000, the number of Filipino Americans admitted to law schools at UC Berkeley, UC Davis, and UCLA declined 21 percent, from a total of 33 to 26, and their enrollment rate over the same period declined 35 percent, from a total of 17 to only 11; and

WHEREAS, From fall 1995 to the fall 1999, the number of Asians/Asian Americans admitted to UC graduate programs declined 10 percent, from a total of 2,333 to 2,111, and their acceptance rate over the same period declined 13 percent, from a total of 1,097 to only 950; and

WHEREAS, These dramatic declines in the numbers of underrepresented people of color admitted to, and enrolling in, University of California graduate programs and professional schools has discouraged underrepresented people of color from applying to graduate programs and professional schools they perceive as hostile and unwelcoming; and

WHEREAS, Limiting educational opportunities in higher education at the graduate and professional school level perpetuates inequity among Californians; and

WHEREAS, The dramatic decline in the numbers of underrepresented people of color admitted to, and enrolling in, University of California

graduate programs and professional schools harms all students because their education is without the benefit of the perspectives those now-absent students once brought to classroom discussions; and

WHEREAS, The dramatic decline in the number of underrepresented people of color enrolling in University of California graduate programs and professional schools contributes to a declining number of underrepresented people of color entering into professions, such as law, business, education, and medicine; and

WHEREAS, The UC Medical Student Diversity Task Force reported in their 2000 "Special Report on Medical Student Diversity" that research focusing on access to health services has repeatedly shown that physicians from groups traditionally underrepresented in medicine are more likely to serve those from minority and economically disadvantaged backgrounds, to practice in physician shortage areas, and to serve patients with chronic illnesses and multiple diagnosis; and

WHEREAS, The American Bar Association's Commission on Racial and Ethnic Diversity in the Profession reported that representation by people of color in the legal profession is significantly lower than in most other professions, that entry into the profession by people of color has slowed considerably since 1995, and that enrollment by people of color has dropped significantly at top public law schools in California; and

WHEREAS, The current admissions policies of the University of California's graduate programs and professional schools are too narrow, and do not allow for a large number of qualified students of color to be admitted and enrolled; and

WHEREAS, The University of California has already approved a proposal to utilize a "comprehensive review" for its freshman admissions process to consider a broad variety of academic and personal qualifications; and

WHEREAS, The Senate Select Committee on College and University Admissions and Outreach held five hearings during the 2001 legislative session on diversity in higher education, and its concluding report, "Increasing Access and Promoting Excellence: Diversity in California Public Higher Education," urges the University of California to explore the possibility of adopting a comprehensive application-selection process to guide individual departments in choosing their graduate students; and

WHEREAS, The Legislature of the State of Texas approved legislation (HB 1641) in the 2001 legislative session to broaden its admissions criteria to include additional important factors, and to prevent standardized test scores from being used as the sole criterion for consideration of the applicant, or as the primary criterion to end consideration of the applicant, for its graduate programs and professional schools; and

WHEREAS, Standardized test scores, as the sole criterion or as the primary criterion to end consideration of an applicant, could well constitute a major obstacle to the admission of underrepresented people of color to the University of California's graduate and professional schools, and the overreliance on standardized test scores, to the exclusion of other valuable admissions information, exacerbates the problem of low admission and enrollment rates of people of color; and

WHEREAS, Industry standards and guidelines militate against using standardized test scores as the sole criterion for making important decisions that impact people's lives, and support the use of multiple measures to make high-stakes decisions, when these measures are available and will add to the validity of the decision; and

WHEREAS, The Law School Admissions Council (LSAC), the organization that administers the Law School Admissions Test (LSAT), launched a five-year effort in January 2001 to urge law schools to deemphasize numbers-based admissions policies and to broaden their admissions criteria; and

WHEREAS, By broadening the admissions criteria of the graduate programs and professional schools, and by prohibiting standardized test scores from being used as the sole criterion for consideration or as the primary criterion to end consideration of the applicant, the Regents of the University of California would assert that the University of California is committed to admitting and enrolling all students, and would assure underrepresented people of color that they are welcome and wanted; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature of the State of California officially requests the Regents of the University of California to implement a comprehensive approach in the admissions processes to include a broad variety of academic and personal qualifications for their respective graduate programs and professional schools by the end of the 2002–03 academic year; and be it further

*Resolved,* That the Legislature requests that the comprehensive approach also include reviewing and revising the admissions policies of graduate programs and professional schools, which claim to include some additional qualifications, to include an even broader variety of important qualifications, as is already done for the freshman admissions process of the University of California; and be it further

*Resolved,* That the Legislature requests that the comprehensive approach include reviewing and revising the weight or value placed on each of the important factors so that the standardized test scores are not the overriding criterion used to determine admissions; and be it further

*Resolved,* That the Legislature officially requests the regents to prohibit, before the end of the 2002–03 academic year, standardized test

scores from being used as the sole criterion for consideration of the applicant for, or as the primary criterion to end consideration of the applicant for, admission to the university's various graduate programs and professional schools; and be it further

*Resolved*, The Legislature requests that the regents describe those factors that are considered by each graduate program or professional school in making admissions decisions, and make those descriptions reasonably available to any interested person, by publishing the description of the factors in each graduate program and professional schools' catalogue, and making the information available on their respective Internet Web sites; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit a copy of this resolution to each member of the Regents of the University of California.

---

#### RESOLUTION CHAPTER 143

Assembly Concurrent Resolution No. 193—Relative to career technical education.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, State law requires public high schools to offer career technical education designed and conducted for the purpose of preparing youth for gainful employment that serves the personnel needs of the state and the individual desires and needs of the pupils; and

WHEREAS, California's career technical education system is considered an integral and valuable part of secondary and postsecondary education in California as evidenced by the fact that more than 1.2 million pupils in California public high schools participate in career technical education; and

WHEREAS, About 10 percent of the pupils who begin the 9th grade will have earned a bachelor's degree 10 years later; and

WHEREAS, Limiting vocational opportunities for the other 90 percent of pupils who may not obtain a bachelor's degree within 10 years of the 9th grade, may be detrimental to the education and economy of California; and

WHEREAS, Tuition, books, costs of living, and other expenses incurred while attending college are often prohibitive to economically disadvantaged students who desire to obtain an education; and

WHEREAS, Career technical education teaches pupils real life skills and provides opportunity in diverse areas such as agriculture, home economics, metalwork, woodwork, business, auto mechanics, health,

and other important trade areas that are important to the well-being and economic vitality of the people of California; and

WHEREAS, Many productive and positive vocational and technical education contributions have come from organizations as diverse as Future Farmers of America, Future Business Leaders of America, Distributive Education Clubs of America, Future Homemakers of America—Home Economics Related Occupations, Health Occupation Students of America, and Vocational Industrial Clubs of America, all of which make a positive difference in the lives of pupils by developing their potential for premier leadership, personal growth, and career success; and

WHEREAS, An important part of the work of the state is to strengthen the relationship between a strong education system and California's economic future, a future that depends on the state's ability to develop a competent, competitive workforce for the knowledge-based, global economy of the 21st century; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That protecting and encouraging career technical education in the secondary public schools will help to ensure that providing economic and educational opportunities for every public high school pupil in California remains a priority for the Legislature; and be it further

*Resolved,* That it is the purpose and intent of the Legislature to promote career technical education in California's public high schools for the 1.2 million pupils who benefit from participating in those programs; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to the State Department of Education, the Superintendent of Public Instruction, and the Governor.

---

#### RESOLUTION CHAPTER 144

Assembly Concurrent Resolution No. 223—Relative to the Alice Livingston Memorial Overcrossing.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, Alice Livingston was born Elisa Espinosa, the third of eight children, on August 4, 1936, in Norwalk, California; and

WHEREAS, She was raised on local farms in Orange County where she later graduated from Huntington Beach Union High School; and

WHEREAS, She graduated from Orange County Coast Community College in the year 1956 while working for her high school; and

WHEREAS, In the year 1958, she moved to Spain, working four years for the United States government as a civil service employee, and later marrying an airman in the United States Air Force and giving birth to her first daughter Terrie; and

WHEREAS, In the year 1962, Alice Livingston returned to the United States, settling with her husband and daughter in El Cajon, California, where she gave birth to her second daughter Susan, devoted her time to raising her children, and later worked for a local manufacturing company; and

WHEREAS, In December of 1979, Alice Livingston moved with her younger daughter to Sacramento, California, and began more than 20 years of service with the California State Assembly as a member of the Assembly stenography pool; and

WHEREAS, In January of 1980, Alice Livingston joined the staff of the Assembly Committee on Revenue and Taxation, chaired by then Assembly Member Wadie Deddeh; and

WHEREAS, In 1983, Alice Livingston began working for then Speaker pro Tempore Frank Vicencia; and

WHEREAS, In March of 1987, Alice Livingston began working for the Assembly Transportation Committee, where she provided exemplary service as committee secretary under several chairs over the course of 15 years; including former Assembly Members Richard Katz (1987–95), Antonio Villaraigosa (1995–96), and Larry Bowler (1996–97), then Assembly Members and current Senators Kevin Murray (1997–99) and Tom Torlakson (1999–2001), and the current Chair Assembly Member John Dutra; and

WHEREAS, Alice Livingston grew to serve as a mentor to others in the position of committee secretary, and was ultimately designated to help train staff for the position; and

WHEREAS, In May of 2002, Alice Livingston fell ill and was later diagnosed with lung cancer, ultimately succumbing to the condition at the age of 65 on the morning of Thursday, June 6, 2002; and

WHEREAS, In the midst of her illness, Alice Livingston continued to inquire about her colleagues in the Legislature and the daily business of the Assembly Transportation Committee, requesting copies of the Senate and Assembly Daily Files and offering several times to “come in and help out at work”; and

WHEREAS, Alice Livingston was a longtime resident in the community of Rancho Cordova at the time of her passing; and

WHEREAS, During her years of service to the Legislature, and most notably her tenure as a committee secretary, Alice Livingston served with great distinction and ceaseless dedication, observing the highest standards of conduct and ethics as a professional Legislative staff member; and

WHEREAS, In light of her many years of service as committee secretary to the Assembly Transportation Committee, it is fitting to name an overcrossing on State Highway 50 after Alice Livingston; and

WHEREAS, Alice Livingston was an inspiration to all who knew her as a generous, selfless, hard-working, intelligent, and modest person; and

WHEREAS, Alice Livingston's coworkers, friends, and family deeply feel her absence and will forever remember her dignity, warmth, kindness, love of life, and enthusiasm for her profession; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Mather Field Road overcrossing on State Highway Route 50 in Rancho Cordova be officially named the Alice Livingston Memorial Overcrossing; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the Director of Transportation and to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 145

Assembly Concurrent Resolution No. 225—Relative to Off-Highway Motor Vehicle Recreation Program.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, In 1971, the California Legislature acknowledged the tremendous growth in the number of off-highway motor vehicles being used for recreation in California and recognized that legislation was urgently needed to satisfy the demand for adequate recreation facilities for off-highway vehicles and to provide the restraints necessary to ensure recreational compatibility on public lands between various user groups; and

WHEREAS, Twenty-one separate items of legislation were introduced in 1971 to address the need to properly manage off-highway vehicles, including Assembly Bill 2342 which was authored by Assembly Members Eugene 'Gino' Chappie and Ed Z'berg and signed by the Governor on December 22, 1971, as Chapter 1816 of the Statutes

of 1971, and the majority of Assembly Bill 2342 consisting of the Chappie-Z'berg Off-Highway Motor Vehicle Law of 1971 (Section 38000 of the Vehicle Code and following) became operative 30 years ago, on July 1, 1972; and

WHEREAS, The California Off-Highway Motor Vehicle (OHV) Recreation Program has been in existence for 30 years and has grown to encompass over 100,000 miles of roads and trails statewide; and

WHEREAS, The Legislature established a self-funding mechanism whereby off-highway vehicle recreationists would have appropriate areas designated and maintained for their use in a manner consistent with good environmental practices; thus, no money comes from the General Fund to support the California OHV Recreation Program, and the off-highway vehicle recreationists have directly contributed over \$500 million to the Off-Highway Vehicle Trust Fund over the last 30 years and the OHV Recreation Program has awarded over \$200 million in grants to local and federal agencies to date; and

WHEREAS, There have been dramatic increases in Green Sticker and street-licensed four-wheel drive registration, and there are currently 506,585 street-licensed four-wheel drives registered and 489,380 Green Sticker registrations, and despite the 108 percent increase in Green Sticker registrations and the 74 percent increase in street-licensed four-wheel drive registrations, the amount of available acres of land for off-highway motor vehicles use has been steadily decreasing; and

WHEREAS, The Off-Highway Motor Vehicle Recreation Program has partnered with the California Police Activities League to teach over 2,000 at-risk youth how to operate and enjoy off-highway motorcycles and all-terrain vehicles under the Off-Road PALS program, and the Off-Road PALS program focuses on off-highway motor vehicle safety education while motivating at-risk youth to improve behavior, encourage responsibility, and learn skills that will be carried through life; and

WHEREAS, Off-highway motor vehicles enable the disabled and the elderly to access remote forests and desert areas; and

WHEREAS, The Off-Highway Motor Vehicle Recreation Division is developing a contract for a certified State Training Organization to implement the All-Terrain Vehicle Program for the state; and

WHEREAS, OHV clubs donate many hours of labor each year to clean wilderness areas and assist in revegetation programs; and

WHEREAS, There are six existing snow vehicle recreation areas (SVRAs) in California, visited by 1,993,494 people in 1999–2000, and SVRAs and SNO-Parks provide areas for both motorized and nonmotorized recreation and offer affordable recreation to young families with tight budgets (at the Oceano Dunes SVRA 70 percent of

the 1.1 million visitors are families, and families account for half of the visitors to the Ocotillo Wells SVRA); and

WHEREAS, The research, monitoring, and protection of the Western Snowy Plover and the Least Tern at the Oceano Dunes SVRA exceeds that which is found at all but a few California beaches, and the Hollister Hills SVRA contains a nature preserve; and

WHEREAS, The attendance at SNO-Parks has dramatically increased to 415,000 annual visitors, 42 percent of those visitors being ethnic minorities, largely Hispanic, and 67 percent of SNO-Park visitors coming to play in the snow; and

WHEREAS, The number of snowmobile registrations has increased by 180 percent, but Oregon which has 2,000 fewer registered snowmobiles than California has 4,000 more miles of trails; and

WHEREAS, California's OHV Recreation Program is the largest of its kind with the strictest environmental standards in the country; and

WHEREAS, New regulations have been created and adopted to bring the grant program into compliance with the off-highway motor vehicle laws passed in 1992, and multidisciplinary teams have been created to review grants in order to increase grant accountability, and the grant funds for Off-Highway Motor Vehicles Law Enforcement have been substantially increased, and conservation activities are taking a much higher priority in OHV grant allocations than in years past; and

WHEREAS, The Off-Highway Motor Vehicle Recreation Division is committed to maintaining a proactive resource management program; and

WHEREAS, Over 3.5 million California residents and 14.2 percent of all California households participate in off-highway recreation activities annually; and

WHEREAS, Off-Highway motor vehicle recreation affects 43,000 jobs, and the economic impact of off-highway vehicle recreation has grown to more than an estimated \$9 billion annually to the California economy; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the California Legislature acknowledges the significant contributions the Off-Highway Motor Vehicle Recreation Program has made to the quality of life in California; and, be it further

*Resolved* That the California Legislature commends the Off-Highway Motor Vehicle Recreation Program and the off-highway recreationists community on 30 years of a successful program.

---

## RESOLUTION CHAPTER 146

Assembly Concurrent Resolution No. 237—Relative to Childhood Cancer Month.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, Cancer is by far the leading cause of death by disease among children in this country; and

WHEREAS, Many children of California are afflicted with cancer, experiencing enormous pain and suffering, and they and their families require extraordinary levels of information and support in their struggles against this disease; and

WHEREAS, Successful prevention and treatment of many types of childhood cancer have not yet been achieved; and

WHEREAS, The conquest of cancer, a complex and intractable foe, requires a high level of commitment in order to provide the necessary resources and research; and

WHEREAS, California has many of the world's finest medical, academic, and commercial institutions, and must continue as a leader in the fight against this terrible disease; and

WHEREAS, Increased public awareness of this major public health problem is a crucial step toward finding solutions; and

WHEREAS, Childhood Cancer Month is an important nationwide tool for raising awareness among governmental officials and the public about the nature and scope of this problem; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature of the State of California hereby recognizes and declares September as Childhood Cancer Month; and be it further

*Resolved,* That the Legislature of the State of California is committed to supporting efforts to find cures for, and achieve prevention of, childhood cancer; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

## RESOLUTION CHAPTER 147

Assembly Joint Resolution No. 30—Relative to firefighters.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, The threat of wildfires to lives, homes, and natural resources in the State of California has been increasing significantly each year as the population of the state grows; and

WHEREAS, Fighting wildland fires from the air is critical to the safety of our citizens and communities and the protection of our natural resources; and

WHEREAS, Flying retardant bombers on wildfires in gusty winds over smoke-filled rugged terrain is extremely dangerous; and

WHEREAS, Pilots and crews of retardant bombers repeatedly risk their lives each fire season in order to ensure the safety and protection of all California citizens, homes, communities, and natural resources; and

WHEREAS, All too frequently, pilots and crews of retardant bombers are killed in the line of duty while fighting wildfires; and

WHEREAS, Families of pilots and crews fighting wildfires, who work on a contract basis, who are killed in the line of duty currently do not have the same opportunity for death benefits as the families of firefighters, police officers, and others recognized as “public safety officers” by the United States Department of Justice; and

WHEREAS, It is the intent of the State of California to encourage the recruitment and retention of skilled and experienced pilots and crews to fight wildfires from the air; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California memorializes the United States Congress and the United States Department of Justice to include the families of wildland firefighting pilots and their crews, past and present, who have worked or who now work on a contract basis as eligible for death benefits on the same basis as public safety officers; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, the President pro Tempore of the Senate of the United States, the Bureau of Justice Assistance of the United States Department of Justice, each Senator and Representative from California in the Congress of the United States, the Governor, and the Secretary of the Resources Agency.

---

## RESOLUTION CHAPTER 148

Assembly Joint Resolution No. 39—Relative to airport security workers.

WHEREAS, The Aviation and Transportation Security Act (Public Law 107-71) established the Transportation Security Administration within the Department of Transportation, to be administered by the Under Secretary of Transportation for Security; and

WHEREAS, Under the act, the Under Secretary is responsible for day-to-day security screening operations for passenger air transportation, including the screening of passenger baggage; and

WHEREAS, Under the act, the Under Secretary is responsible for developing standards for the hiring, training, testing, and retention of security screening personnel; and

WHEREAS, Under the act, the qualification standards require that security screeners be citizens of the United States; and

WHEREAS, The Under Secretary assumed responsibility for airport security on February 19, 2002, and all security screening personnel that are not United States citizens will be terminated by November 19, 2002; and

WHEREAS, A large percentage of security screening personnel at several airports in California are not United States citizens; and

WHEREAS, In the bay area alone, approximately 1,200 security screeners, most of whom are of Filipino descent, will lose their jobs as a result of the requirement that security screeners must be United States citizens, with no demonstrable showing that this will improve safety or security; and

WHEREAS, The vast majority of security screeners that are not citizens of the United States are legal immigrants from nations that have long been friends or allies of the United States and their countries having fought alongside our soldiers during wartime; and

WHEREAS, The vast majority of security screeners that are not citizens of the United States have either applied for citizenship or are prevented from applying for citizenship as a result of punitive immigration policies; and

WHEREAS, Immigrant security screeners are not to blame for the September 11, 2001, disaster, and punitive action against those immigrants who are not a security risk creates and inflames ill feelings for this country abroad; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California memorializes the President and the Congress of the United States to suspend or eliminate the requirement that security screeners be citizens of the United States, and instead provide that those individuals must meet the same immigration requirements as persons who serve in the National Guard; and be it further

*Resolved,* That the President and the Congress should act to ensure that any legal immigrant that has applied for citizenship should be

allowed to keep his or her security screening job, absent evidence showing that they are a security or criminal risk; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

---

## RESOLUTION CHAPTER 149

Assembly Joint Resolution No. 49—Relative to home health care.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, California's home health care industry has suffered a loss of over one-third of licensed home health agencies since 1998; and

WHEREAS, The Medicare home health care benefit started in 1966 and has provided Medicare home health care insurance coverage to hundreds of thousands of homebound Medicare beneficiaries who need care on a part-time or intermittent basis; and

WHEREAS, Medicare home health care users are older, sicker, poorer, and more disabled than the Medicare population generally, with 26 percent over 85 years of age; and

WHEREAS, In 1980, Congress changed the home health care benefit by expanding access to care for beneficiaries without a prior hospitalization and by eliminating visit limits; and

WHEREAS, In 1981 restrictive administrative interpretations of part-time or intermittent care limited spending by denying access to this medically fragile population. As a result of the restrictions, a class action lawsuit was filed that resulted in a 1988 ruling that overturned the restrictions, *Duggan v. Bowen* (D.C. 1988) 691 F.Supp. 1487. As a result, utilization of home health services grew; and

WHEREAS, The growth continued until Congress passed the 1997 Balanced Budget Act to restrict spending; and

WHEREAS, An interim payment system (IPS) was implemented in fiscal years 1998–2000 to immediately control spending; and

WHEREAS, The IPS system dramatically reduced reimbursement rates, which fell below 1993 payment limits and resulted in 284 closures of California home health care agencies during 1998–99; and

WHEREAS, A new system, the prospective payment system (PPS), was implemented to cease the IPS unprecedented reductions in payments; and

WHEREAS, PPS could not correct the 49 percent cut in home health care outlays with further declines expected through 2002; and

WHEREAS, During IPS implementation and before PPS, a new national standard patient assessment system, the Outcomes and Assessment Information Set (OASIS), was required for all Medicare providers in 1999 and provided burdensome reporting requirements; and

WHEREAS, The implementation of IPS, PPS, and OASIS collection has resulted in a 36-percent reduction in the number of participating home health care providers, closure of over 340 licensed home health agencies, and reduced access to care for medically fragile Californians; and

WHEREAS, The 1997 Balanced Budget Act has already reduced utilization and home health care spending significantly below the intended savings that were anticipated due to that act; and

WHEREAS, The Congressional Budget Office projected home health expenditure reductions of \$16.2 billion over five years (fiscal year 1998 to fiscal year 2002), actual reductions from fiscal year 1998 to fiscal year 2000 were \$35.8 billion, and current projected reductions for fiscal years 2001 and 2002 are an additional \$35.3 billion resulting in \$71.1 billion; and

WHEREAS, California is undergoing an anticipated \$20 billion budget deficit, which could result in Medi-Cal reducing current reimbursement rates to 2000 levels, resulting in a double rate reduction guaranteed to devastate the 629 Medicare certified home health care agencies operating in California; and

WHEREAS, The proposed 15 percent cut in home health care reimbursement rates will negatively affect access to care, and leave thousands without a home health care agency that can service their medical needs; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California hereby respectfully memorializes the President and the Congress of the United States to enact legislation that contains steps to ensure that Medicare home health care recipients are guaranteed the best care, and that home health providers, who have undergone multiple regulation and administrative changes at the hands of the federal government since the 1997 Balanced Budget Act, are not further harmed; and be it further

*Resolved,* That the Legislature opposes the 15 percent cut in home health payments scheduled for October 1, 2002; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, the Minority Leader of the House of Representatives, the Majority Leader of the Senate, the Minority Leader of the Senate, to each Senator and Representative from California in the Congress of the United States, and to the President's

commission to eliminate the pending additional 15 percent cut in home health payments scheduled for October 1, 2002.

---

RESOLUTION CHAPTER 150

Assembly Joint Resolution No. 50—Relative to veterans.

[Filed with Secretary of State September 3, 2002.]

WHEREAS, The United States presently has a population of over 25 million veterans from its previous wars. The majority of that veteran population is from World War II and the Korean War; and

WHEREAS, The World War II and Korean War veteran population is presently over 70 years of age, and that group is passing away at the rate of 1,000 veterans per day; and

WHEREAS, The United States government has acknowledged its responsibility to provide medical care or compensation for medical problems, as well as other benefits, to those veterans who served their country in time of war; and

WHEREAS, The United States Department of Veterans Affairs is charged with administering the federal benefits program for veterans; and

WHEREAS, When a veteran passes away with a claim pending against the Department of Veterans Affairs, the claim essentially ends with the veteran's passing regardless of how long the claim had been pending; and

WHEREAS, Dying while waiting is unacceptable for American veterans; and

WHEREAS, There presently exists a backlog of over 601,000 claims submitted by veterans. This backlog has persisted for several years, with some claims outstanding for one year or more; and

WHEREAS, A significant portion of these claims involve World War II and Korean War veterans, and despite determined efforts by the United States Department of Veterans Affairs to eliminate this backlog, the backlog continues; and

WHEREAS, There exists a trained group of individuals known as county veterans service officers located in 37 of the 50 states, representing 700 counties and a workforce of over 2,400 full-time local government employees; and

WHEREAS, These county veterans service officers were established in 1945 after World War II for the purpose of helping returning veterans reenter civilian life, and have continued to do so for all veterans of all wars since then; and

WHEREAS, These county veterans service officers are highly trained individuals who have continued to provide assistance to all veterans for over 50 years and are already familiar with the United States Department of Veterans Affairs claims policies and procedures; and

WHEREAS, For example, in California, county veterans service officers annually assist California's veterans obtain monetary benefits in excess of \$150 million by assisting these veterans in filing over 50,000 claims annually with the United States Department of Veterans Affairs; and

WHEREAS, This claims processing backlog needs to be urgently reduced while our World War II and Korean War veterans are still with us; and

WHEREAS, The United States Department of Veterans Affairs could enter into a partnership with state and local governments to utilize these highly trained county veterans service officers to eliminate the present claims processing backlog, by expanding the county veterans service officers' role; and

WHEREAS, This would be a cost-effective way of reducing the claims processing backlog by eliminating the need for a substantial increase in federal employees; and

WHEREAS, These county veterans service officers, as represented by the California Association of County Veterans Service Officers and the National Association of County Veterans Service Officers, have offered to assist the United States Department of Veterans Affairs in exchange for block grants to the various states based upon each state's veteran population to compensate county veterans service officers for their expanded role; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California urges the Congress of the United States and the President to support and enact legislation that would establish a federal/state partnership to use the knowledge and skills of the local county veterans service officers to assist the United States Department of Veterans Affairs in eliminating the veterans claims processing backlog in order that America's veterans can take advantage of the benefits that the United States has authorized for them for their faithful and loyal service to a grateful nation; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, the Majority Leader of the Senate, and to each Senator and Representative from California in the Congress of the United States.

---

## RESOLUTION CHAPTER 151

Assembly Concurrent Resolution No. 188—Relative to water as a vital resource.

[Filed with Secretary of State September 5, 2002.]

WHEREAS, Water was the catalyst that allowed California, a semiarid state, to grow and prosper; and

WHEREAS, California's prosperity has been built on a solid foundation of public and private investment in developing its water supply; and

WHEREAS, An adequate and reliable supply of high quality water is vital to California's economy, environment, and way of life; and

WHEREAS, Water is very affordable relative to the cost of other real and perceived necessities of life, with an average urban family in southern California living in a single-family home paying about \$30 per month for water, while paying \$60 to \$90 for electricity; and

WHEREAS, Tap water costs less than  $\frac{7}{100}$ ths of a cent per liter, versus store-bought water that costs 50 cents to \$1 per liter, or 700 percent to 1,400 percent more; and

WHEREAS, Census officials estimate that, by 2020, California's current population of 32 million will reach 49 million, and as the state grows, so will the demand for water; and

WHEREAS, The demand for water is growing, and the California Water Plan is forecasting that, by 2020, there will be shortfalls of 2.5 million acre-feet in a normal rainfall year and even greater shortages in drought years; and

WHEREAS, In the future, great uncertainty hovers over the state's water supply as a result of climate change, the reallocation of water supplies from urban and agricultural uses to environmental uses, population growth, and the lack of a clear federal and state commitment to water infrastructure investment, and California must take decisive action now to avoid repeating the mistakes of the energy crisis; and

WHEREAS, This year's rain and snowfall levels are expected to be below normal and, if we have another dry year, there will be severe water shortages in many parts of the state; and

WHEREAS, California is overdrafting its groundwater supplies by an annual average of approximately 1.3 million acre-feet; and

WHEREAS, California's farms use less water now than they did 30 years ago, while total production of crops is up by 67 percent; and

WHEREAS, Under the 1992 Central Valley Project Improvement Act (Public Law 102-575), 800,000 acre-feet of Central Valley Project water were dedicated for fishery restoration, and 340,000 acre-feet were dedicated for in-stream use in the Trinity River; and

WHEREAS, Approximately 90 percent of the Central Valley Project's water is used to irrigate more than 3 million acres of farmland and to provide water to about 2 million customers; and

WHEREAS, California's State Water Project delivers more than 2 million acre-feet annually, and serves farmers in the San Joaquin Valley and urban users in southern California and the bay area; and

WHEREAS, A primary feature of California's State Water Project is the 444-mile-long California Aqueduct that transports water from the Sacramento-San Joaquin Delta south to the Los Angeles area; and

WHEREAS, Approximately 30 percent of California State Water Project water is used by agriculture, and approximately 20 million Californians get part of their water from the project; and

WHEREAS, If California is not careful about where and when water supplies are taken from our lakes, rivers, and streams, there will be serious consequences for the environment; and

WHEREAS, Since water quality standards for both people and wildlife are important, the Legislature must find alternatives that produce cost-efficient methods for protecting both the water supply and the environment; and

WHEREAS, There is a need to continue the orderly development of California's water resources in order to meet the growing needs for water in the future, as our population grows and our economy continues to expand; and

WHEREAS, Expanded conservation, recycling, surface water storage, groundwater storage, ocean desalination, watershed protection, and clean-up of contaminated groundwater basins will ensure that we will have enough water in the future; and

WHEREAS, If California fails to plan sound solutions to address water issues, California will fall victim to a crisis; and

WHEREAS, Strong leadership from federal, state, and local leaders will be needed if California is to avoid water shortages and the threat of droughts in the future; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That state leaders should continue to examine water issues in order to resolutely and deliberately address these important issues; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the Governor of California, to each member of Congress from California, and to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 152

Assembly Concurrent Resolution No. 190—Relative to civic participation in elections.

[Filed with Secretary of State September 5, 2002.]

WHEREAS, Young people of this country care deeply about the future; and

WHEREAS, Surveys show that young people are more involved in efforts to help improve local communities through community service and charity work; and

WHEREAS, Youth participation in the political process, however, is the lowest among any age group; and

WHEREAS, Our elected officials and our democratic form of government require the support of the public to maintain their vitality and legitimacy; and

WHEREAS, Various steps need to be taken in order to arrest the decline in voter participation and in order that current and future generations of California voters will remain engaged in the grand experiment of democracy; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring*, That the Legislature expresses its support for all of the following:

(1) Aggressive and creative implementation of the Federal Higher Education Act provisions which require publicly funded colleges and universities to make a good faith effort to supply incoming students with voter registration forms.

(2) A televised, youth-oriented debate during the gubernatorial election of 2002 in which young people may write and ask the candidates their questions.

(3) Greater inclusion of hands-on civic participation opportunities in the curriculum of high schools and colleges of California; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the gubernatorial nominees, qualified political parties, state colleges and universities, public schools, and the office of the Secretary of State.

---

RESOLUTION CHAPTER 153

Senate Concurrent Resolution No. 55—Relative to stem cell research.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, An estimated 128 million Americans suffer the crippling economic and psychological burden of chronic, degenerative, and acute diseases, including diabetes, Parkinson's disease, cancer, and Alzheimer's disease; and

WHEREAS, The costs for treatment and lost productivity of chronic, degenerative, and acute diseases in the United States constitutes hundreds of billions of dollars every year; and

WHEREAS, Stem cell research offers immense promise for developing new medical therapies for these debilitating diseases, a critical means to explore fundamental questions of biology, and could lead to unprecedented treatments and even cures for diabetes, Alzheimer's disease, cancer, and other diseases ; and

WHEREAS, California is a state in which scientific achievement and biotechnical capabilities outstrip the rest of the country; and

WHEREAS, Stem cell research, including the use of embryonic stem cells for medical research, has profound medical, social, legal, and ethical implications; and

WHEREAS, There is a need for evaluation of those implications and a review of public policy related to stem cell research; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That there is hereby established a panel to advise the Legislature on stem cell research; and be it further

*Resolved,* That the panel shall be comprised of at least 14 members; that seven members shall be appointed by the Senate Committee on Rules and that seven members shall be appointed by the Speaker of the Assembly; and be it further

*Resolved,* That the members of the panel serve without compensation, and that there be a representative from each of the following fields: medicine, human biology, cellular microbiology, biotechnology, law, bioethics, and religion; and be it further

*Resolved,* That the Chair of the Senate Committee on Health and Human Services and the Chair of the Assembly Committee on Health shall jointly chair the advisory panel; and be it further

*Resolved,* That the advisory panel shall meet at least once each quarter for a period of one year, and shall evaluate the medical, social, legal, and ethical implications of stem cell research, the appropriate policy for the State of California, and ways in which the state can support existing efforts to fulfill the promise of stem cell research; and shall also make recommendations on how California may responsibly pursue stem cell research; and be it further

*Resolved*, That upon completing the evaluation, but not later than July 1, 2004, the advisory panel make recommendations to the Legislature with respect to the policy issues concerning stem cell research; and be it further

*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the Senate Committee on Rules, the Speaker of the Assembly, the Chair of the Senate Committee on Health and Human Services, and Chair of the Assembly Committee on Health.

---

### RESOLUTION CHAPTER 154

Senate Concurrent Resolution No. 88—Relative to John William Coltrane.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, John William Coltrane was born on September 23, 1926, in Hamlet, North Carolina; and

WHEREAS, His mother sang and played piano and his father, a tailor by trade, played clarinet and violin; and

WHEREAS, He spent his adolescence in High Point, North Carolina, before moving to Philadelphia, Pennsylvania, in 1943; and

WHEREAS, He attended Ornstein School of Music in Philadelphia, where he studied saxophone and supported himself by working in a sugar refinery; and

WHEREAS, In 1945, he was inducted into the United States Navy and stationed in Hawaii, where he played clarinet in the United States Navy marching band; and

WHEREAS, Upon returning to civilian life in 1946, he continued his musical studies and began playing saxophone professionally in a variety of jazz bands; and

WHEREAS, In 1948 he joined legendary trumpet player Dizzy Gillespie's band, and throughout the 1950s played with jazz luminaries such as Earl Bostic, Johnny Hodges, Miles Davis, and Thelonious Monk; and

WHEREAS, By 1960 he had formed his own band and had developed his own style on the saxophone known as "sheets of sound," which "broke the fine line of delineation between noise and music, shouting at the complacency and mediocrity around him"; and

WHEREAS, He not only used traditional elements of jazz music, but also explored musical ideas from other cultures, including those of India, Africa, and Latin America; and

WHEREAS, From 1960 until his death from cancer on July 17, 1967, he made some of the greatest and most famous jazz recordings of all time; and

WHEREAS, He once said the following regarding his music: “I want to be a force for real good. In other words, I know that there are bad forces, forces that bring suffering to others and misery to the world, but I want to be the opposite force. I want to be the force which is truly for good”; and

WHEREAS, He is considered one of the most influential artists, musical or otherwise, of the 20th century; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature recognizes the 75th anniversary of the birth of John William Coltrane.

---

#### RESOLUTION CHAPTER 155

Senate Concurrent Resolution No. 89—Relative to the CHP Officer Dale E. Newby Memorial Highway.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, State Traffic Officer Dale E. Newby, of the California Highway Patrol, was killed while in the line of duty on July 17, 1982, during a traffic stop at State Highway Route 5 and Eight Mile Road; and

WHEREAS, Officer Newby was performing his duties as a dedicated officer by stopping a motorist for speeding and erratic driving; and

WHEREAS, Officer Newby, after scuffling with the motorist, an ex-mental patient, was shot and killed; and

WHEREAS, The tragedy was compounded when the gunman fled the area and took a hostage, who was subsequently shot and killed by the perpetrator prior to taking his own life; and

WHEREAS, An estimated 850 people, including law enforcement personnel from Massachusetts, Oklahoma, Ohio, New Jersey, Florida, Louisiana, and Michigan, attended his funeral, in addition to then Governor Edmund G. Brown, Jr. and then Lieutenant Governor Mike Curb; and

WHEREAS, Officer Newby was a committed officer, having graduated from the California Highway Patrol Academy and appointed a peace officer of the great State of California on April 24, 1967; and

WHEREAS, Officer Newby was only 36 years of age at the time of his death and was survived by his wife, Beverly, and their three sons, Sean, Jeffrey, and Dale, Jr.; and

WHEREAS, It is appropriate that State Highway Route 5 from Eight Mile Road to French Camp Road in Stockton, be designated as the CHP Officer Dale E. Newby Memorial Highway as a dedication to the memory of this officer who gave his life, the ultimate sacrifice, in service to the citizens of that area; and

WHEREAS, This memorial highway will continue to remind us of the sacrifices that the California Highway Patrol and other peace officers make on a daily basis; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation, and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect those plaques and markers within the right-of-way of northbound and southbound of State Highway Route 5 from Eight Mile Road to French Camp Road in Stockton and be designated as the CHP Officer Dale E. Newby Memorial Highway; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the Department of Transportation and to the author for appropriate distribution.

---

#### RESOLUTION CHAPTER 156

Senate Concurrent Resolution No. 92—Relative to the Joint Committee to Develop a Master Plan for Education.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, Education is the most important function of the State of California and is essential to the cultural, political, and economic health of the state and the nation; and

WHEREAS, California's population is rich in ethnic and cultural diversity, which is a resource that should continually be developed to ensure the ongoing success of the state and its residents; and

WHEREAS, Over the past 25 years, California has developed an extraordinary educational system, from preschool to the postgraduate level, with an unprecedented investment of public and private moneys and the energy and commitment of countless individuals; and

WHEREAS, In 1960, California established a master plan for the development, expansion, and integration of the facilities, curriculum, and standards of postsecondary education in junior colleges, the California State University system, the University of California system,

and other institutions of higher education in the state to meet the needs of the state during the 10 years following the master plan's establishment; and

WHEREAS, Since the adoption of the Master Plan for Higher Education in California, the master plan has been reviewed periodically by the Commission for the Review of the Master Plan for Higher Education, the Coordinating Council for Higher Education, the Joint Committee for Review of the Master Plan in Higher Education, and the California Postsecondary Education Commission; and

WHEREAS, Many members of the education community believe a master plan for kindergarten and grades 1 to 12, inclusive, is necessary due to the major policy initiatives enacted in recent years, and that coordination, guidance, and policy direction toward a framework for understanding the roles of the state and school districts in governing and financing the education system are critical; and

WHEREAS, Many members of the education and child care communities believe that a master plan for education must incorporate early childhood development and education opportunities to ensure that California's children have the opportunities to support their becoming productive lifelong learners; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Joint Committee to Develop a Master Plan for Education—Kindergarten through University established pursuant to Resolution Chapter 43 of the Statutes of 1999, and extended by Resolution Chapter 132 of the Statutes of 2000, continues in existence until November 30, 2004; and be it further

*Resolved,* That all provisions of Resolution Chapter 43 of the Statutes of 1999, relating to the Joint Committee to Develop a Master Plan for Education—Kindergarten through University, which are applicable to the ongoing operation of the joint committee, also continue in effect until November 30, 2004; and be it further

*Resolved,* That the joint committee shall submit a report on its activities to the Legislature at the end of the 2001–02 Regular Session; and be it further

*Resolved,* That the joint committee is renamed the “Joint Committee to Develop a Master Plan for Education.”

---

## RESOLUTION CHAPTER 157

Senate Concurrent Resolution No. 93—Relative to joint doctoral programs.

WHEREAS, California has historically made a commitment to providing access to high-quality public educational programs for all students, ranging from elementary to doctoral level instruction; and

WHEREAS, The state's policy and educational leaders remain committed to ensuring that professionals serving in our public schools and community colleges are fully prepared to meet the challenges in today's classrooms; and

WHEREAS, The Governor and the Legislature have made improving California's educational system a top priority; and

WHEREAS, It is recognized that well-qualified education leaders are a key to successfully implementing improvements in California education; and

WHEREAS, Public school and community college educators seek greater access to affordable advanced educational programs that will help them improve their leadership skills to better serve their students; and

WHEREAS, The California State University (CSU) and the University of California (UC) recognize that regional access to education doctoral (Ed.D.) programs in public higher education is necessary but currently inadequate to meet California's growing need for skilled educational leaders; and

WHEREAS, CSU and UC, working together, can create rigorous, high-quality Ed.D. programs for working professionals that build on the complementary strengths of both systems; and

WHEREAS, With the support of the Legislature, as well as the education community, statewide organizations, and business and community leaders, the CSU and UC have agreed to develop a joint Ed.D. initiative as equal partners that will greatly expand the access to these public programs for a large number of California's education leaders; and

WHEREAS, Beginning in 2002, CSU and UC have each committed \$1,000,000 per year from their existing resources for this purpose for the first two years, for a total of \$4,000,000; and

WHEREAS, The CSU and UC have agreed to form a Joint Ed.D. Board that will solicit, review, fund, and expedite programs that build on the mutual strengths of the CSU and UC campuses, and that would be cochaired by the chief academic officers of the two systems and include faculty from CSU and UC; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature supports the Joint Education Doctorate Initiative of the CSU and UC, and intends that gaps in California's needs for education doctorates (Ed.D.s) be identified and addressed through doctoral programs offered jointly and on a coequal basis by the CSU and UC; and be it further

*Resolved*, That the CSU and UC, through a collaborative regional assessment process, will evaluate the educational leadership needs of public schools, community colleges, and other aspects of higher education to ensure that those needs are understood and properly matched with the strengths of the CSU and UC. These assessments will be conducted under the auspices of the Joint Ed.D. Board, and will include ongoing consultation with K-12, community college, and California independent college and university leaders; and be it further

*Resolved*, That the Joint Ed.D. Board shall develop a strategy for consultation with K-12 and community college representatives to provide input with regard to the development and expansion of new joint Ed.D. programs; and be it further

*Resolved*, That, beginning in fall 2003, joint CSU/UC Ed.D. programs will be established, and will enroll students to address identified unmet statewide and regional educational leadership needs; and be it further

*Resolved*, That it is the intent of the Legislature that both of the following shall occur:

(a) That joint Ed.D. programs will be governed and offered by the CSU and UC on a coequal basis, in which participation and decisionmaking in all aspects of the program design, governance, and delivery occur equitably.

(b) That the Joint Ed.D. Board and the CSU and UC faculty will consider the characteristics and requirements inherent in the highest quality programs that are applicable to today's research and educational needs as they develop, implement, and subsequently evaluate joint Ed.D. programs; and be it further

*Resolved*, That the joint Ed.D. programs be designed so that working professionals can complete these programs in a reasonable timeframe using techniques, such as alternative scheduling, including part-time enrollment and delivery, that would utilize evening, weekend, or summer instruction; and be it further

*Resolved*, That CSU and UC will jointly report to the Legislature every two years, beginning in June 2004, on all of the following:

(a) The implementation of the joint Ed.D. programs, including information identifying the number of new programs, enrollments, and degree recipients.

(b) The extent to which these programs are fulfilling identified state needs for training in educational leadership.

(c) Feedback from program participants about the programs and steps the universities are taking to make improvement; and be it further

*Resolved*, That the Legislature encourages this collaboration between CSU and UC as a sound and fiscally responsible policy direction to address the state priority of meeting the leadership needs of public school and community college educators, and as the fulfillment of one

of the original tenets of the Master Plan for Higher Education, to which the Legislature remains fully committed; and be it further

*Resolved*, That the Secretary of the Senate transmit copies of this resolution to each member of the Trustees of the California State University and the Regents of the University of California.

---

RESOLUTION CHAPTER 158

Senate Concurrent Resolution No. 94—Relative to the Deran Koligian Memorial Highway.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, Deran Koligian was elected to the Fresno County Board of Supervisors in 1982, where he served with distinction until the date of his passing on December 11, 2001; and

WHEREAS, Deran Koligian, the son of Armenian immigrants, was born in Fresno County and raised on his family farm in the Kearney Park community; and

WHEREAS, Deran Koligian was a World War II veteran with service in the South Pacific and, after the war, returned home to attend Fresno State College and to manage his family's farm; and

WHEREAS, Deran Koligian began his public service in 1957, spending 24 years on school boards in western Fresno County, including the Madison Elementary School Board and the Central High School Board; and

WHEREAS, Deran Koligian was an active member of St. Paul's Armenian Church and was the first Armenian-American to be elected to office in Fresno County; and

WHEREAS, Deran Koligian was a strong supporter of agriculture and a protector of agricultural lands from urban encroachment; and

WHEREAS, Deran Koligian was a vocal supporter of Measure C, which provided local augmentation for the construction and maintenance of state highways and local roads, and, as a member of the Fresno Transportation Authority, was instrumental in securing funds for numerous road and highway transportation projects, including the extension and widening of State Highway Route 180 in western Fresno County; and

WHEREAS, It would be a fitting tribute to the memory of Fresno County Supervisor Deran Koligian for a portion of State Highway Route 180 to be named the Deran Koligian Memorial Highway; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature hereby officially designates the portion of State Highway Route 180 from State Highway Route 99 to State Highway Route 33, and upon completion, from State Highway Route 33 to Interstate Highway 5, the Deran Koligian Memorial Highway; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the Department of Transportation and to the author of this resolution for distribution.

---

#### RESOLUTION CHAPTER 159

Senate Concurrent Resolution No. 102—Relative to Binational Health Week.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, According to the 2000 United States Census, California is home to more than 8.45 million people of Mexican origin, 3.7 million of whom were born in Mexico; and

WHEREAS, The Secretariat of Health and the Secretariat of Foreign Relations of the United Mexican States, the State Department of Health Services, and the University of California, for the California-Mexico Health Initiative (CMHI), have recognized the necessity of improving access to health services to migrant workers and their families in the State of California; and

WHEREAS, Mexican origin immigrants have limited access to health care; and

WHEREAS, Seventy-seven percent of Latinos in California are of Mexican origin; and

WHEREAS, Forty-four percent of the Mexican immigrants in the United States are in California; and

WHEREAS, Ninety-one percent of California's hired agricultural workers were born in Mexico; and

WHEREAS, Improving the health of mobile populations requires multiple approaches in service design, delivery, funding priorities, and, more fundamentally, requires strong binational commitment; and

WHEREAS, In October 2001, the CMHI, the California Policy Research Center, the University of California Office of the President, and the State Office of Binational Border Health convened the first Binational Health Week, an unprecedented effort overseen by multiagency task forces, which conducted health promotion activities involving 115 community-based organizations from seven counties at 98 sites; and

WHEREAS, More than 950 people participated in planning and implementing activities, and over 18,720 people received direct health care services during the week; and

WHEREAS, Binational Health Week reflects coordinated efforts between California and Mexico to improve the quality of life of immigrant families by expanding their access to health care, increasing their health insurance coverage, and reducing their unmet health needs; and

WHEREAS, The CMHI operates in California, and in seven Mexican states that are home to many California immigrants; and

WHEREAS, This Binational Health Week is a bilateral collaborative effort with the active participation of the Mexican Ministry of Health and Foreign Affairs, and state and local organizations. In California, the State Department of Health Services, the Office of Binational Border Health, the Mexican Consulate, the Latino Legislative Caucus, community clinics, and community-based organizations have endorsed the effort; and

WHEREAS, The objective of Binational Health Week is to generate a dynamic dialogue between California and Mexico representatives, and the CMHI vision is that “[h]ealth is a universal human right that should be respected both in one’s place of origin and where one works”; and

WHEREAS, California and Mexico share a population, and they need to share common strategies to address this population’s health needs; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Legislature of the State of California hereby calls on all the people of California to join the people of Mexico and all Californians of Mexican origin in observing and participating in Binational Health Week, to take place the week of October 12 to 19, 2002; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 160

Senate Concurrent Resolution No. 104—Relative to Dosan Ahn Chang Ho Memorial Interchange.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, Dosan Ahn Chang Ho was born in a small village in Korea in 1878; and

WHEREAS, The life of Dosan Ahn Chang Ho has had an enormously beneficial impact and significance on the history of modern Korea and Korean Americans; and

WHEREAS, Ahn Chang Ho arrived in America in 1902 with his newlywed wife, Lee Hae Ryon (Helen Ahn); and

WHEREAS, As the steamship approached Hawaii, Ahn Chang Ho resolved to stand tall above the sea of turmoil existing at that time in Korea, and resolved to call himself “Dosan,” which means Island Mountain; and

WHEREAS, While living in San Francisco, Dosan organized the San Francisco Social Meeting on September 23, 1903, and initiated a social reform movement that was in desperate need in the Korean American society; and

WHEREAS, As an accomplished orator and leader at the age of 24, Dosan guided his countrymen to form a respectable community for Koreans in the United States; and

WHEREAS, Dosan Ahn Chang Ho and his family settled in Riverside, California, in March 1904 and worked tirelessly to unite Korean Americans and to revive the patriotic spirit of the Korean people; and

WHEREAS, Dosan moved his family to Los Angeles in 1913, where the Dorothy Chandler Pavilion now stands, and played a significant role in the growth of the Korean American community in the City of Los Angeles; and

WHEREAS, Dosan and his friends decided to form the Gonglip-Hyuphoe, or Cooperative Association, which would become the basis for the Korean National Association, which Dosan later led as president; and

WHEREAS, The Korean National Association maintained structure within the Korean American community, both to build character of individuals and to enhance the image of Koreans within the mainstream community; and

WHEREAS, Dosan established one of the first English schools for Koreans so that his fellow Korean Americans could learn English and the Bible; and

WHEREAS, As a community organizer, Dosan helped to relieve blighted living conditions for his fellow Korean Americans in the Greater Los Angeles area; and

WHEREAS, Dosan's Korean improvement work helped shape his future as the spiritual leader of the Korean Independence Movement; and

WHEREAS, Following Japan's annexation of Korea in 1910, Dosan formulated the basis for the Provisional Government of Korea, and conceived Hung Sa Dahn (Young Korean Academy), an organization to develop leaders for the independence movement, in 1913; and

WHEREAS, The Korean National Association was recognized by the United States State Department and the California State Government as a self-governing society, and, as a result, the Korean American community became a better place to live for many people; and

WHEREAS, In 1915, Dosan promoted the development of the Korean language program for second generation Korean Americans as an opportunity to pass on Korean traditions, values, and identity to younger generations; and

WHEREAS, Dosan's philosophy and teachings serve as a model for Korean American youths; and

WHEREAS, Dosan was one of the first Korean American pioneers, establishing the path for the two million Korean Americans living in the United States today; and

WHEREAS, The year 2003 marks the 100th Year Centennial Immigration for Korean Americans to the United States; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the interchange where Interstate Highway Route 10 connects with Interstate Highway Route 110, in Los Angeles, be named the Dosan Ahn Chang Ho Memorial Interchange in honor of Dosan Ahn Chang Ho; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system, showing this special designation, and upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers; and be it further

*Resolved,* That the Secretary of Senate transmit copies of this resolution to the Department of Transportation and to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 161

Senate Concurrent Resolution No. 105—Relative to Caltrans Maintenance Worker Memorial Bridge.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, Public employees at every level of California government faithfully serve their fellow Californians; and

WHEREAS, The state values a professional civil service whose highest principle is duty to the public, whose foremost commitment is to excellence, and whose experience and expertise are a resource to be used and respected for the benefit of all Californians; and

WHEREAS, The thousands of men and women who serve at all levels in the Division of Maintenance of the Department of Transportation are persons of knowledge, ability, and integrity who deserve to be recognized for their dedicated service; and

WHEREAS, Employees of the Department of Transportation are among those who must regularly work within the public right-of-way and in close proximity to traffic while performing their responsibilities, including the maintenance of streets, the maintenance and repair of water and sewer lines, the maintenance and replacement of traffic signs and signals, the application of pavement markings, and the maintenance and landscaping of street medians; and

WHEREAS, The men and women in the Division of Maintenance have paid a particularly harsh price for their dedicated service while working in conditions that have resulted in the highest death and accident rates in state service, with numerous deaths and injuries in the past 10 years; and

WHEREAS, Accidents in highway work zones resulted in 1,093 deaths nationwide in 2000; and

WHEREAS, Workers in work zones and motorists traveling through work zones suffer injury and death as a result of accidents in work zones; and

WHEREAS, The state desires to promote the safety of its employees and to encourage motorists traveling in and through the state to exercise caution and care when encountering a work zone; and

WHEREAS, The dedication of a bridge on the state highway system can serve as a symbolic link between the sacrifice of the past that has helped to create the present concern about highway safety and current efforts to make safety a priority in the future; and

WHEREAS, This dedication will continue to remind everyone of the need to keep safety as a priority and to cherish and enjoy every day; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Sacramento River Bridge and Overhead on Interstate Route 80 commonly known as the Bryte Bend Bridge in Sacramento and Yolo Counties is hereby dedicated in honor of the deceased and injured workers of the Division of Maintenance of the Department of Transportation, and is to be known as the Caltrans Maintenance Worker Memorial Bridge; and be it further

*Resolved,* That the Department of Transportation is hereby requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highways system, showing this special designation and, upon receiving donations from nonstate sources covering the cost, to erect those plaques and markers; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the Director of Transportation and to the author of this resolution for distribution.

---

#### RESOLUTION CHAPTER 162

Senate Concurrent Resolution No. 106—Relative to the September 11, 2001, memorial.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, The catastrophic events of September 11, 2001, left our great nation in a state of unimaginable grief and changed our world forever; and

WHEREAS, All four hijacked planes were bound for California and carried more than 100 brave Californians who paid the ultimate price for our freedom; and

WHEREAS, These horrendous crimes have inflicted great pain and suffering that will last for generations by claiming the lives of innocent men, women, and children; and

WHEREAS, The families of these Californians will never be able to feel the touch of a spouse or a partner lost, know the dreams of a child lost, or benefit from the wisdom of a parent or grandparent lost; and

WHEREAS, There are an estimated 175 California families who will never recover from the loss of their loved ones but will look for constant reminders of their life together; and

WHEREAS, September 11, 2002, will mark the passage of one year since this tragic event; now, therefore, be it

*Resolved by the Senate of the State of California, the Assembly thereof concurring,* That the Department of General Services is hereby requested to plant commemorative rose bushes near the east steps of the

State Capitol along with the placement of a very small plaque memorializing those Californians who lost their lives on September 11, 2001; and be it further

*Resolved*, That the Secretary of the Senate transmit a copy of this resolution to the Director of General Services.

---

RESOLUTION CHAPTER 163

Senate Joint Resolution No. 38—Relative to stem cell research.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, The United States is a world leader in the discovery and invention of technology that improves the health and quality of lives of individuals; and

WHEREAS, California is a state whose scientific achievements and research regarding recombinant DNA outstrip the rest of the country; and

WHEREAS, California's success with respect to biotechnology is largely attributable to the freedom of researchers to perform pioneering work at the frontiers of scientific discovery; and

WHEREAS, The biotechnology industry contributes to the growth of the state and national economy, and produces a significant amount of jobs and revenue; and

WHEREAS, Therapeutic cloning promises to be the next field of rapid progress in the realm of biotechnology; and

WHEREAS, Scientists confirm that embryonic stem cells hold far more potential than adult stem cells as to the development of treatments and cures for disease; and

WHEREAS, A prohibition on stem cell research would stifle scientific innovation, diminish the ability of biomedical companies to maintain the nation's role as the reigning world leader in biotechnology and biomedicine, drive talented scientists outside the country, and set the United States decades behind other nations in the development of medical therapies; and

WHEREAS, An estimated 128 million Americans suffer the debilitating physiological, economic, and emotional burdens of chronic and degenerative diseases, including diabetes, heart disease, Parkinson's disease, spinal cord injury, cancer, and Alzheimer's disease; and

WHEREAS, The cost of treatment for these diseases and of lost productivity totals hundreds of billions of dollars every year; and

WHEREAS, Stem cell research provides a critical means to unlock fundamental questions of cellular biology that are key to curing cancer; and

WHEREAS, Stem cell research has immense potential to provide medical therapies to cure and treat many other debilitating diseases; and

WHEREAS, A prohibition on stem cell research and therapeutic cloning will deny over one-third of Americans their foremost opportunity for a cure or effective treatment for disease, by denying scientists the chance to develop efficient medications and therapies; and

WHEREAS, The United States has historically been a haven for scientific inquiry and technological innovation, and this environment of scientific openness, coupled with a commitment of public and private resources, has made this country the reigning leader in the fields of biomedicine and biotechnology; and

WHEREAS, California's biomedical industry constitutes a significant portion of the state's economy, employing over 225,000 Californians in over 2,500 companies, investing more than \$2.1 billion in research, and creating \$12.8 billion in wages and salaries worldwide as well as revenues of nearly \$7.8 billion; and

WHEREAS, The biomedical industry would be considerably harmed by a prohibition of stem cell research and therapeutic cloning; and

WHEREAS, Proposed federal legislation that imposes barriers to this research prioritizes the religious values of a national minority ahead of the public health interests of Californians and all Americans, criminalizes the legitimate pursuit of effective medical therapy, and prevents physicians from fulfilling their moral and professional obligation to offer patients the best treatment available; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature of the State of California memorializes the President and Congress of the United States to reject legislation that inappropriately impedes the progress of medical science by impeding stem cell and therapeutic cloning research, and denies Americans legal access to effective medical therapies; and be it further

*Resolved,* That the Legislature memorializes the President and Congress of the United States to enact legislation that would do all of the following:

- (1) Impose a ban on reproductive cloning.
- (2) Permit research involving therapeutic cloning, including the derivation of or use of stem cells from any source.
- (3) Establish a process to facilitate the donation of material containing stem cells to researchers and ensure this material is donated by informed participants who provide written consent.

(4) Establish guidelines to oversee stem cell research conducted in the United States to ensure that this research is safe and is conducted within appropriate medical, ethical, and moral parameters; and be it further

*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the Senate Committee on Rules, the Speaker of the Assembly, the Chair of the Senate Committee on Health and Human Services, and the Chair of the Assembly Committee on Health, and to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

---

#### RESOLUTION CHAPTER 164

Senate Joint Resolution No. 41—Relative to permanent resident alien airport security screeners.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, On November 19, 2002, all airport security screeners become federal employees and must become United States citizens or lose their jobs; and

WHEREAS, Almost 80 percent of the current security screeners at the San Francisco International Airport are noncitizens; and

WHEREAS, Many of these employees are well trained and have years of experience as airport security screeners; and

WHEREAS, San Mateo and San Francisco Counties are already reeling from the economic recession and termination of qualified airport security screeners would cause further disruption to the local economy; and

WHEREAS, On December 14, 2001, and December 17, 2001, respectively, S. 1829 and H.R. 3505, two identical measures both titled the Airport Security Personnel Protection Act, were introduced in the United States Senate and the United States House of Representatives; and

WHEREAS, These measures provide for transitional employment for qualified lawful permanent resident alien airport security screeners until their naturalization processes are completed on an expedited basis as required by the measures; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly*, That the Legislature of the State of California hereby urges the Congress of the United States to enact either S. 1829 or H.R. 3505, or both, without the provisions that provide for an expedited naturalization

process, as the Airport Security Personnel Protection Act; and be it further

*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the Speaker of the House of Representatives, and to each Senator and Representative from California in the United States Congress.

---

## RESOLUTION CHAPTER 165

Senate Joint Resolution No. 52—Relative to the California Wild Heritage Act of 2002.

[Filed with Secretary of State September 11, 2002.]

WHEREAS, California's public lands contain an invaluable and irreplaceable diversity of ecosystems; and

WHEREAS, Increasing population growth and expansion of urban and suburban developments threaten the integrity of many of these ecosystems; and

WHEREAS, These ecosystems provide critical habitat to native flora and fauna, 293 of which are listed as rare, threatened, or endangered; and

WHEREAS, Protection and maintenance of these wildlands preserves the health of watersheds essential to safe and good quality water for agricultural uses and human consumption; and

WHEREAS, Many of California's wild lands include sites, including flora and fauna sacred and spiritually valuable to Native American tribes; and

WHEREAS, The deserts, coasts, riparian areas, mountains, valleys, and chaparral of California have shaped the history and the cultural heritage of California; and

WHEREAS, Protection and maintenance of California's wild and scenic rivers is an essential component of the survival and recovery of threatened salmon and other fish species; and

WHEREAS, Conservation and restoration of California's natural resources also benefits our recreation and tourism industries; and

WHEREAS, Senator Barbara Boxer has authored the California Wild Heritage Act of 2002 to protect 81 areas, totaling 2.5 million publicly held acres of the state scattered throughout 36 counties; and

WHEREAS, The California Wild Heritage Act of 2002 designates 22 wild and scenic rivers totaling 440 miles of riparian systems; and

WHEREAS, The California Wild Heritage Act of 2002 protects the Ancient Bristlecone Pine Forest where the oldest living trees have

flourished in the harsh environment of the White-Inyo Mountain range for over 4,000 years; and

WHEREAS, The California Wild Heritage Act of 2002 provides enhanced protections critical for the continued conservation of unique and fragile areas of coastal, chaparral, pinon-juniper, mountain, forest and desert habitat currently classified as National Forest, National Park, or Bureau of Land Management Lands; and

WHEREAS, The California Wild Heritage Act of 2002 designates Cache Creek and the East Fork of the Carson River as “Wild and Scenic Rivers Study Areas”; and

WHEREAS, The California Wild Heritage Act of 2002 establishes the “Sacramento River National Conservation Area”; and

WHEREAS, The California Wild Heritage Act of 2002 balances the needs of the military, agricultural, law enforcement, firefighting, and recreational use communities with the intrinsic environmental value of the wilderness areas; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature respectfully memorializes the President and the United States Congress to enact S. 2535, the California Wild Heritage Act of 2002, as introduced by Senator Barbara Boxer, and to be introduced by Representatives Hilda Solis and Mike Thompson; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the Speaker of the House of Representatives, the Chairpersons of the House and Senate Taxation Committees, and to each Senator and Representative from California in the Congress of the United States.

---

## RESOLUTION CHAPTER 166

Assembly Concurrent Resolution No. 123—Relative to the California Law Revision Commission.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, The California Law Revision Commission is authorized to study topics set forth in the calendar contained in its report to the Governor and the Legislature that are thereafter approved for study by concurrent resolution of the Legislature, and topics that have been referred to the commission for study by concurrent resolution of the Legislature; and

WHEREAS, The commission, in its annual report covering its activities for 2001 and 2002, recommends continued study or

modification of 20 topics, all of which the Legislature has previously authorized or directed the commission to study; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature approves for continued study by the California Law Revision Commission the topics listed below, all of which the Legislature has previously authorized or directed the commission to study, as modified:

(1) Whether the law should be revised that relates to creditors' remedies, including, but not limited to, attachment, garnishment, execution, repossession of property (including the claim and delivery statute, self-help repossession of property, and the Commercial Code provisions on repossession of property), confession of judgment procedures, default judgment procedures, enforcement of judgments, the right of redemption, procedures under private power of sale in a trust deed or mortgage, possessory and nonpossessory liens, insolvency, and related matters.

(2) Whether the California Probate Code should be revised, including, but not limited to, the issue of whether California should adopt, in whole or in part, the Uniform Probate Code, and related matters.

(3) Whether the law should be revised that relates to real and personal property including, but not limited to, a marketable title act, covenants, servitudes, conditions, and restriction on land use or relating to land, powers of termination, escheat of property and the disposition of unclaimed or abandoned property, eminent domain, quiet title actions, abandonment or vacation of public streets and highways, partition, rights and duties attendant upon assignment, subletting, termination, or abandonment of a lease, and related matters.

(4) Whether the law should be revised that relates to family law, including, but not limited to, community property, the adjudication of child and family civil proceedings, child custody, adoption, guardianship, freedom from parental custody and control, and related matters, including other subjects covered by the Family Code.

(5) Whether the law relating to offers of compromise should be revised.

(6) Whether the law relating to discovery in civil cases should be revised.

(7) Whether the acts governing special assessments for public improvement should be simplified and unified.

(8) Whether the law relating to the rights and disabilities of minors and incompetent persons should be revised.

(9) Whether the Evidence Code should be revised.

(10) Whether the law relating to arbitration, mediation, and other alternative dispute resolution techniques should be revised.

(11) Whether there should be changes to administrative law.

(12) Whether the law relating to the payment and the shifting of attorney's fees between litigant should be revised.

(13) Whether the Uniform Incorporated Nonprofit Association Act, or parts of that uniform act, and related provisions should be adopted in California.

(14) Recommendations to be reported pertaining to statutory changes that may be necessitated by court unification.

(15) Whether the law of contracts should be revised, including the law relating to the effect of electronic communications on the law governing contract formation, the statute of frauds, the parol evidence rule, and related matters.

(16) Whether the law governing common interest housing development should be revised to clarify the law, eliminate unnecessary or obsolete provisions, consolidate existing statutes in one place in the codes, establish a clear, consistent, and unified policy with regard to formation and management of these developments and transaction of real property interests located within them, and to determine to what extent they should be subject to regulation.

(17) Whether the statutes of limitation for legal malpractice actions should be revised to recognize equitable tolling or other adjustment for the circumstances of simultaneous litigation, and related matters.

(18) Whether the law governing disclosure of public records and the law governing protection of privacy in public records should be revised to better coordinate them, including consolidation and clarification of the scope of required disclosure and creation of a single set of disclosure procedures, to provide appropriate enforcement mechanisms, and to ensure that the law governing disclosure of public records adequately treats electronic information, and related matters.

(19) Whether the law governing criminal sentences for enhancements relating to weapons or injuries should be revised to simplify and clarify the law and eliminate unnecessary or obsolete provisions.

(20) Whether the Subdivision Map Act (Division 2 (commencing with Section 66410) of Title 7 of the Government Code), and the Mitigation Fee Act (Chapter 5 (commencing with Section 66000), Chapter 6 (commencing with Section 66010), Chapter 7 (commencing with Section 66012), Chapter 8 (commencing with Section 66016), and Chapter 9 (commencing with Section 66020) of Division 1 of Title 7 of the Government Code) should be revised to improve their organization, resolve inconsistencies, clarify and rationalize provisions, and related matters; and be it further

*Resolved*, That the Secretary of the Senate transmit a copy of this resolution to the California Law Revision Commission.

---

RESOLUTION CHAPTER 167

Assembly Concurrent Resolution No. 125—Relative to the protection of personal information.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, The Financial Services Modernization Act, commonly known as the Gramm-Leach-Bliley Act, became law in 1999, and reformed the laws that define and regulate the structure of the financial services industry; and

WHEREAS, The Gramm-Leach-Bliley Act greatly liberalized the ways that financial institutions were permitted to share nonpublic personal information, and has, in turn, highlighted the extent to which various entities buy, sell, and use nonpublic personal information; and

WHEREAS, The Gramm-Leach-Bliley Act does not provide a comprehensive framework by which citizens may control access to their nonpublic personal information, but instead explicitly permits the states to enact laws that provide for greater protection of the privacy of nonpublic personal information; and

WHEREAS, The citizens of California have indicated their great concern with this issue, and have made clear their overwhelming desire to have control over the disclosure of their nonpublic personal information; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring*, That the Legislature authorizes and requests that the California Law Revision Commission study, report on, and prepare recommended legislation by January 1, 2005, if funding is provided in the 2002–03 Budget Act specifically for this purpose, concerning the protection of personal information relating to, or arising out of, financial transactions, and that this legislation shall accomplish the following objectives:

(a) Provide consumers with notice and the opportunity to protect and control the dissemination of their personal information by, and between, companies and their affiliates and non-affiliated third parties;

(b) Authorize and direct affected regulators to prepare regulations that will recognize the inviolability and confidentiality of a consumer's personal information and the legitimate needs of entities that lawfully use the information to engage in commerce at the behest of consumers or for their benefit;

(c) Assure that regulated entities will be treated in a manner so that, regardless of size, an individual business, holding company, or affiliate will not enjoy any greater advantage or suffer any burden that is greater than any other regulated entity;

(d) Be compatible with, and withstand any preemption by, the Gramm-Leach-Bliley Act or the federal Fair Credit Reporting Act;

(e) Provide for civil remedies and administrative and civil penalties for a violation of the recommended legislation, including, but not limited to, attorney's fees, costs, actual and compensatory damages, and exemplary damages, including, but not limited to, relief as provided pursuant to Article 3 (commencing with Section 3294) of Chapter 1 of Title 2 of Part 1 of Division 4 of the Civil Code, and as provided in unfair business practices actions brought under Article 1 (commencing with Section 17000) of Chapter 4 of Part 2 of Division 7 of the Business and Professions Code; and be it further

*Resolved*, That it is not the intent of the Legislature that enactment of this measure restrict the introduction, passage, or operation of legislation relating to the financial service industry or related privacy issues; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the California Law Revision Commission and to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 168

Assembly Concurrent Resolution No. 154—Relative to the 48th Anniversary of *Brown v. Board of Education*.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, On May 17, 1954, the United States Supreme Court issued its decision in *Brown v. Board of Education of Topeka* (1954) 347 U.S. 483, overturning the "separate but equal" doctrine in American law; and

WHEREAS, This landmark decision paved the way for equality in education and nearly every other aspect of American life; and

WHEREAS, May 17, 2002, will be the 48th anniversary of the historic *Brown v. Board of Education* decision; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring*, That the Legislature hereby designates May 17 as California's official day to commemorate the historic *Brown v. Board of Education* decision; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

RESOLUTION CHAPTER 169

Assembly Concurrent Resolution No. 158—Relative to career and technical education.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, Improvement in the overall quality of California's workforce is one of the most vital components of economic development and is directly related to the future success of the state's economy; and

WHEREAS, The rapid growth of California's population and labor force will require special efforts and investments to attract, support, and retain businesses that pay high wages to highly skilled workers; and

WHEREAS, Despite previous strong economic times, California has experienced, and continues to experience, a growing inequality in income distribution illustrating that economic growth alone cannot be relied upon to alleviate this income gap; and

WHEREAS, In providing testimony to legislative committees, business and industry groups, including, but not limited to, the State Building and Construction Trades Council, the California Chamber of Commerce, the California Manufacturers and Technology Association, and the California Restaurant Association, repeatedly have alluded to the problem that California is not adequately training and preparing our future homegrown workforce to meet the needs of California's infrastructure and service demands; and

WHEREAS, For California to address existing workforce gaps, the state must do a better job of preparing pupils for an economy that demands workers with strong academic and career knowledge and skills, who are adaptable to change, and are prepared for lifelong learning; and

WHEREAS, For California to better prepare the future workforce, the Legislature must provide the direction and resources to sustain successful educational programs that can provide pupils valuable academic and technical knowledge and skills, career guidance, organizational help in developing careers, and networks of support that will serve as the foundation for lifelong learning; and

WHEREAS, Over the next 10 years, California will provide significant investments to improve and expand existing career and technical education programs and practices, including, but not limited to, vocational educational programs, regional occupational centers and programs, career academies and pathways, career experience and

guidance, and a network of school, community, and business partnerships; and

WHEREAS, California's K–12 education system is the lifeline of the state's economy, and investments in the education system is one of the most essential components to ensuring the state's competitive edge in an increasingly global economy; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature is committed to improving career and technical education programs and practices and ensuring that these programs are a major component in the efforts to improve California's K–12 education system; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

#### RESOLUTION CHAPTER 170

Assembly Concurrent Resolution No. 189—Relative to the California State University.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, California State University, San Bernardino, is situated in the largest county in California, and serves as the most prominent institution of higher learning in San Bernardino County; and

WHEREAS, The 2000 Census reported a dramatic change in the demographics of San Bernardino and Riverside Counties, with large increases of persons of Mexican, Latino, or Hispanic descent; and

WHEREAS, With these demographic changes come economic, educational, social, political, and cultural challenges and opportunities, and it is imperative that California State University, San Bernardino, institute a curriculum recognizing and meeting the needs of the changing communities for which it is the leading institution of higher education; and

WHEREAS, The National Alliance for Human Rights has called for the establishment of a Chicano/Latino Studies Department at the California State University; and

WHEREAS, A Chicano/Latino Studies Department could offer an interdisciplinary curriculum of academic study that would critically examine the historical and contemporary experiences of people of Mexican, Latino, or Hispanic descent within the context of United States society, institutions, and cultures; and

WHEREAS, A Chicano/Latino Studies Department could emphasize the development of a broad knowledge of the Chicano/Latino

experience, stressing the analysis of the interrelationships in the historical background, cultural patterns, and artistic expression of the Chicano/Latino community in order to acquire a well-rounded, in-depth, understanding of the contemporary interface between Chicanos/Latinos and the whole of United States society; and

WHEREAS, A Chicano/Latino Studies Department could incorporate various disciplines in its approach, including political science, sociology, anthropology, history, literary study, and art; and

WHEREAS, A Chicano/Latino Studies Department could focus on the political, economic, social, historical, and cultural experiences of persons of Mexican, Latino, or Hispanic descent; and

WHEREAS, A Chicano/Latino Studies Department would have, as a fundamental objective, the combining of academic rigor with community participation; and

WHEREAS, A Chicano/Latino Studies Department would offer an important setting for scholarly research regarding social issues, politics, labor relations and economics, health issues, criminology issues, housing issues, education and language issues, immigration policy, and issues that transcend national borders; and

WHEREAS, A Chicano/Latino Studies Department would provide students with the opportunity to earn a bachelor's degree or master's degree in Chicano/Latino Studies; and

WHEREAS, A Chicano/Latino Studies Department would prepare K-16 teachers to provide culturally competent instruction to students, potentially impacting the high school and postsecondary education dropout rate among students of Mexican, Hispanic, or Latino descent; and

WHEREAS, Representatives of California State University, San Bernardino, including the President of the University, have participated in ongoing discussions with students, faculty, and local community groups in order to explore the creation of a Chicano/Latino Studies Department, and the University should be encouraged to continue these efforts; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature of the State of California urges the Trustees of the California State University to consider establishing a Chicano/Latino Studies Department at the California State University, San Bernardino; and be it further

*Resolved,* That the Legislature requests the Trustees of the California State University to make a determination whether to establish a Chicano/Latino Studies Department at the California State University, San Bernardino, and to report to the Senate Committee on Education and to the Assembly Committee on Higher Education by December 31, 2004, with their decision and the progress made in creating the

department, and, if the trustees do not decide to create a Chicano/Latino Studies Department, to report the reasons for this decision; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the Trustees of the California State University and to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 171

Assembly Concurrent Resolution No. 204—Relative to Little Italy in the City of San Diego.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, San Diego's Middletown district was a historic settling area for Italian American immigrants, in which they created a unique extra-national community in the early 1900s; and

WHEREAS, In 1906, the San Francisco earthquake and an influx of Italian immigrants from San Pedro, where fishermen that hailed from Naples and Ischia had settled, caused San Diego's Italian population to swell; and

WHEREAS, These immigrants joined with local populations of Mexican, Japanese, and Portuguese in small fishing enterprises, where they became vital to the establishment and growth of the tuna fishing industry; and

WHEREAS, The fishing industry helped establish other businesses in the community of Little Italy; and

WHEREAS, The fishing fleet became a source of wealth for the City of San Diego; and

WHEREAS, In 1945, the fishermen's committee organized to ensure the success of the Our Lady of the Rosary Catholic Church, the currently active community church, with members signing an agreement promising to donate 25 cents for every ton of fish that the boats sold; and

WHEREAS, As Italians grew in the social and economic ranks of the city, many moved away from Little Italy; and

WHEREAS, The completion of Interstate 5 in 1962 disrupted the neighborhood, causing residents to relocate, and the community lost its identity as a place where Italians lived; and

WHEREAS, In the mid-1990s, the San Diego Centre City Development Corporation initiated the process of the reconstruction and reconditioning of Little Italy; and

WHEREAS, Little Italy is today a thriving neighborhood that has become an example for other redevelopment projects in San Diego County; and

WHEREAS, The local business community has established the Little Italy Association, a recognized business improvement district that works in concert with the City of San Diego to ensure the success of the neighborhood and to emphasize and support its commercial success; and

WHEREAS, The recognition of Little Italy as a destination through the placement of freeway markers and plaques will encourage the continued growth and redevelopment of this important component of the history of San Diego; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature hereby designates the Hawthorne Street exit on Interstate 5 north and the Front Street exit on Interstate 5 south near downtown San Diego, as the defined routes for the destination of Little Italy; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements of the state highway system, showing this designation, and upon receiving donations from nonstate sources, to erect these plaques and markers, provided that the City Council of the City of San Diego has first approved a resolution designating the area referenced in this resolution as the Little Italy district ; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the Department of Transportation and to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 172

Assembly Concurrent Resolution No. 205—Relative to Myositis Awareness Day.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, Myositis is a chronic, auto-immune disease that triggers the inflammation and degeneration of skeletal muscle tissues, in which inflammatory cells surround, invade, and destroy normal muscle fibers as though they were defective or foreign to the body; and

WHEREAS, Myositis can be a debilitating and sometimes fatal disease; and

WHEREAS, Currently 30,000 cases of myositis are estimated to exist in the United States; and

WHEREAS, There are various forms of myositis that currently have different effects on the body, including inflammatory myositis and polymyositis, which destroys normal muscle fibers; dermatomyositis, which is a rash and results in weakness of the trunk muscles; and inclusion body myositis, which includes gradual muscle weakness and affects both proximal and distal muscles; and

WHEREAS, Limited public recognition of myositis has resulted in inadequately funded research; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature hereby designates September 21, 2002, as Myositis Awareness Day in California; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

### RESOLUTION CHAPTER 173

Assembly Concurrent Resolution No. 213—Relative to Clean Air Vehicles.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, The State of California has a goal of achieving and maintaining healthful air quality for its residents; and

WHEREAS, Air pollution is one of the main triggers that can exacerbate symptoms of asthma, which is the country's most common chronic childhood disease; and

WHEREAS, Pollution reduction measures are needed to improve the air quality in California and decrease the occurrence of respiratory ailments in children and adults; and

WHEREAS, The State Air Resources Board conducts a Clean Air Vehicle program that specifies which vehicles powered by electricity or alternative fuels meet state and federal standards for tailpipe and evaporative emissions; and

WHEREAS, Electric vehicles produce no tailpipe or evaporative emissions and qualify as Zero Emission Vehicles (ZEV) under the board's Clean Air Vehicle program; and

WHEREAS, Certain Super Ultra Low Emission Vehicles (SULEV) and Ultra Low Emission Vehicles (ULEV) that meet the requirements of the federal Inherently Low Emission Vehicle (ILEV) standards, such as vehicles powered by alternative fuels such as compressed natural gas or liquid propane, have extremely low tailpipe emissions, meet requirements that offer significant lifetime emission reductions, and are eligible for the board's Clean Air Vehicle program; and

WHEREAS, The Department of Motor Vehicle's Clean Air Vehicle Decal program, established by the Legislature in 1999, provides owners of vehicles that meet these federal and state vehicle emission standards with driver's side, passenger side, and rear bumper stickers that grant those vehicles access to High Occupancy Vehicle (HOV) lanes and toll-free passage during commute hours on the seven state-owned toll bridges; and

WHEREAS, 2002 marks the first year that a major automobile manufacturer has made a large number of electric vehicles available for public purchase in California; and

WHEREAS, The "Golden Gate Bridge, Highway and Transportation District Act" was enacted by the Legislature on May 25, 1923, to allow the City and County of San Francisco, the Counties of Marin, Sonoma, and Del Norte, and parts of the Counties of Mendocino and Napa to organize as a bridge district in order to borrow money, issue bonds, construct a bridge, and collect tolls on the bridge; and

WHEREAS, On December 4, 1928, the Golden Gate Bridge, Highway and Transportation District was formed as the entity to design, construct, and finance the Golden Gate Bridge under the act; and

WHEREAS, The district currently grants toll-free passage during commute hours to motorcycles and carpools of three or more persons; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature of the State of California urges the Golden Gate Bridge, Highway and Transportation District to provide toll-free passage on the Golden Gate Bridge during commute hours to vehicles bearing a distinctive Clean Air Vehicle decal issued by the Department of Motor Vehicles; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to each member of the board of directors of the Golden Gate Bridge, Highway and Transportation District.

---

#### RESOLUTION CHAPTER 174

Assembly Concurrent Resolution No. 215—Relative to public postsecondary education.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, Social workers provide invaluable services to adults, children, and families, helping them address critical issues such as child abuse, poverty, drug dependency, and mental illness; and

WHEREAS, Social workers are the state's largest and often, the only provider of services to the mentally ill, developmentally disabled, seniors, children, and families facing intense socioeconomic pressures; and

WHEREAS, The need for qualified and culturally diverse social workers in California has significantly increased with the state's growing population, yet the number of graduates from schools of social work has remained constant over the past decade; and

WHEREAS, The total number of students graduating from social work programs, estimated at 1,500 per year, is inadequate to meet the numbers of human service staff currently needed in California public social service agencies; and

WHEREAS, The social worker shortage has become alarmingly high due to barriers associated with recruitment, retention, and most importantly, an inadequate number of available spaces for social work students in social work education programs; now, therefor, be it

*Resolved by the Assembly of the State of California, the Senate concurring,* That the Legislature urges the California Community Colleges, the California State University, and the University of California to expand their enrollment in social work preparation programs, in order to meet the growing social service demands of the people of California; and be it further

*Resolved,* That the Legislature requests the California Association of Deans and Directors of Schools of Social Work and the California Social Work Education Center to collaborate with the California Community Colleges, the University of California, the California State University, the Association of Independent California Colleges and Universities, and other interested stakeholders, including employers and representatives of populations served by social workers, to develop a master plan, to be submitted to the Legislature by January 1, 2004, for social work education in the State of California, that reflects the state's diverse population and is designed to address the state's shortage of social workers; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to the Board of Governors of the California Community Colleges, to the Trustees of the California State University, to the Regents of the University of California, to the California Association of Deans and Directors of Schools of Social Work, to the Association of Independent California Colleges and Universities, and to the California Social Work Education Center.

---

## RESOLUTION CHAPTER 175

Assembly Concurrent Resolution No. 221—Relative to Japanese-American World War II veterans of California.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, The Japanese-American veterans, including the 100th Infantry Battalion, 442nd Regimental Combat Team, Military Intelligence Service, and other men and women who faithfully and resolutely served America during World War II, have traveled from all regions of California to take part in a special dedication in their honor at the State Capitol on June 24, 2002; and

WHEREAS, That fateful day, December 7, 1941, forever changed the lives of these Americans of Japanese ancestry, relocating many from their homes in California to internment camps as a result of the Presidential Executive Order 9066; and

WHEREAS, Despite their living in horrendous conditions behind barbed wire and being classified 4C “enemy alien,” these brave young Nisei answered the call and volunteered to defend their country, the United States of America; and

WHEREAS, The United States Army allowed them to serve in segregated military units, including the 100th Infantry Battalion, 442nd Regimental Combat Team, and Military Intelligence Service, that afforded them the opportunity to prove their loyalty and citizenship through military service; and

WHEREAS, The 100th Infantry Battalion, comprised of mainly Nisei from Hawaii, was later attached to the 442nd Regimental Combat Team as its 1st Battalion, and valiantly fought in six major campaigns in the European Theater, including Monte Cassino, Anzio, Po Valley, the Liberation of Bruyeres, and the Rescue of the Lost Battalion, and is recognized as the “Purple Heart Battalion”; and

WHEREAS, The 442nd Regimental Combat Team composed of volunteers and draftees from Hawaii and the mainland internment camps joined the 100th Battalion in the European Theater in 1944, participating in major battles at Belvedere, Hill 140, Bruyeres, Biffontaine, Po Valley-Gothic Line, and the invasion of southern France; and

WHEREAS, One of the most poignant episodes of World War II occurred on October 30 1944, in France, as the 100/442 was called up to rescue the decimated Texans of the 36th Division who were surrounded by the enemy; fearlessly answering the order the 100/442 saved 211 lives, while taking more that 800 casualties; and

WHEREAS, The 522nd Field Artillery Battalion, who was originally attached to the 442nd and later assigned to the 62nd Infantry Division, marched through Germany and in one of the most ironic twists of World

War II, liberated the Dachau concentration camp, while their families were undeservedly residing behind barbed wire internment camps; and

WHEREAS, America's secret weapon in the Pacific Theater, the Nisei soldiers of the Military Intelligence Service, were dispatched to every major battle and campaign in the Pacific as linguists who interpreted enemy documents and radio transmissions as well as prepared propaganda, interrogated prisoners of war and assisted with the surrender and United States occupation after the war's end, and whose contributions saved millions of American lives and shortened the war in the Pacific by two years; and

WHEREAS, These valiant efforts have been recognized by the U.S. government with numerous military awards, including 18,143 individual decorations that include 21 Medals of Honor, 52 Distinguished Service Crosses, 559 Silver Stars, with 28 Oak Leaf Clusters in lieu of second Silver Stars awards, 8 Presidential Unit Citations, 4,000 Bronze Stars, with 1,200 Oak Leaf Clusters representing second Bronze Stars, and 9,486 casualties receiving Purple Hearts, the State of California has never formally honored the more than 30,000 Japanese-American men and women who served in the United States Army during World War II; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature recognizes the Nisei World War II veterans for their extraordinary and heroic service to America during World War II and declare that their sacrifice and valor should forever be a reminder of the true spirit of democracy in America; and be it further

*Resolved,* That the Legislature thanks the 100th/442, who are the most highly decorated military unit in the history of the United States, and who are truly our American heroes, for their sacrifice, courage, and service to our great nation; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 176

Assembly Concurrent Resolution No. 234—Relative to the Louis J. Papan Highway.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, Louis J. Papan was elected to the California State Assembly in November 1972, and was reelected seven times, serving in the California State Assembly until 1986; and

WHEREAS, Assembly Member Papan was again elected to the Assembly in 1996, and was reelected twice, serving as the Dean of the Assembly until 2002; and

WHEREAS, Assembly Member Papan was first elected to the Daly City City Council in November 1970; and

WHEREAS, Assembly Member Papan was critical in securing funding for the purchase of Linda Mar Beach and the Pacifica Pier in the City of Pacifica; and

WHEREAS, Assembly Member Papan authored legislation necessary to create CalTrain to serve commuters in San Mateo County; and

WHEREAS, Assembly Member Papan and his wife Irene founded John's Closet, a nonprofit organization that to date has helped provide new clothes for over 7,000 low-income children in San Mateo County; and

WHEREAS, Assembly Member Papan has worked as a tireless and successful advocate for the development and improvement of all modes of transportation in California; and

WHEREAS, Assembly Member Papan has tirelessly fought for the needs of disabled children, and successfully enhanced funding for special education, child abuse programs, and has worked to improve the general well-being of handicapped children; and

WHEREAS, As Chair of the Assembly Committee on Rules, Assembly Member Papan oversaw the restoration of the Historic Capitol Building, preserving a piece of history for all Californians; and

WHEREAS, As Chair of the Assembly Committee on Rules and the Assembly Committee on Banking and Finance, Assembly Member Papan has shown unparalleled leadership, vision, and commitment in advancing the professionalism of the Assembly and fostering an environment of open exchange of ideas; and

WHEREAS, It is fitting to acknowledge and memorialize public accomplishments and achievements of Assembly Member Papan; now, therefore, be it

*Resolved, by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature hereby designates the portion of State Highway Route 1 in San Mateo County from the interchange at Skyline Boulevard to the southern city limits of the City of Pacifica as the Louis J. Papan Highway; and be it further

*Resolved,* That the Department of Transportation is requested to determine the cost of appropriate plaques and markers, consistent with the signing requirements for the state highway system showing the special designation, and upon receiving donations from nonstate sources covering the cost, to erect those plaques and markers; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the Department of Transportation and to the author for appropriate distribution.

---

RESOLUTION CHAPTER 177

Assembly Concurrent Resolution No. 235—Relative to public pension funds.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, The University of California is an independent academic institution with a strong reputation for academic freedom, free speech, and intellectual honesty; and

WHEREAS, The University of California has collected and invested more than \$50 billion of pension funds on behalf of its employees; and

WHEREAS, Historically, political groups have tried to use the financial power of public pension funds to advance their political goals; and

WHEREAS, Divestiture by public pension funds has added strong messages of reproach when other means of political influence have failed to bring about social justice and political freedom; and

WHEREAS, Divestiture efforts were part of the political campaign to end apartheid in South Africa; and

WHEREAS, Pro-Palestinian groups are now urging the University of California to divest itself of \$7 billion in stock from many of our nation's most prestigious and profitable companies because they have ties to Israel; and

WHEREAS, Israel is the United States' strongest ally in the Middle East and has worked with the international community to defend itself against the violence and bloodshed that Palestinian terrorists have inflicted on its citizens; and

WHEREAS, Israel is a stalwart democracy in the region, with a vigorous, well-defined election process that produces accountable leaders dedicated to protecting its citizens and territory; and

WHEREAS, Israel has shown great restraint by heeding requests from the United States to preserve Yasser Arafat as leader of the Palestinian Authority as a means to pursue a peaceful resolution of issues when strong evidence indicates the Palestinian Authority is complicit in terrorist acts; and

WHEREAS, Successful divestiture efforts would send a signal, undercutting efforts to peacefully resolve the Israeli and Palestinian

conflict, and would equate Israel with the racist South African apartheid regime; and

WHEREAS, The University of California should use its strong academic reputation and resources to develop an understanding of the issues found in the Middle East and advance the cause of peace and human rights in the region; and

WHEREAS, The University of California should take no steps that provide support or validation for those who engage in terrorist acts or provide any comfort for those who justify terrorist acts as legitimate means of political expression; and

WHEREAS, In 1992, the Legislature passed and Governor Wilson signed Assembly Bill 2251 by then Assembly Member Margolin that prohibits the investment of California public trust funds in companies or institutions that participate in the Arab League's boycott of Israel; and

WHEREAS, Any divestiture of University of California pension funds from companies doing business in Israel would be contrary to the intent of that well-considered law and would make the university a participant in the prohibited Arab League boycott; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the University of California should reject calls to divest its pension funds that are invested in companies with ties to Israel; and be it further

*Resolved,* That the California Legislature condemns terrorism as a means to achieve political ends and urges the leaders of the Palestinian Authority to clearly renounce terrorism as a form of political expression and embrace peaceful negotiations as the best route to enduring peace; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to the President of University of California, the Regents of the University of California, and to the author for appropriate distribution throughout the community.

---

## RESOLUTION CHAPTER 178

Assembly Concurrent Resolution No. 236—Relative to Agricultural Worker Health and Housing Commission.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, The health of all Californians depends on the ability of the agricultural industry and farmworkers to produce healthy food at an affordable price; and

WHEREAS, Preserving California agriculture's ability to produce healthy food at an affordable price is a critical strategy for preserving California's agricultural lands; and

WHEREAS, The ability of California agriculture to compete in the global marketplace depends on maintaining a well-housed, healthy, and productive workforce; and

WHEREAS, The health and productivity of California's farmworkers depends on their access to affordable housing and health care; and

WHEREAS, It is in the interest of all Californians that the agricultural industry and the farmworker community work together to improve housing and health conditions in rural California; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That an Agricultural Worker Health and Housing Commission be established. The commission shall be composed of equal numbers of members representing growers and agricultural workers. The commission shall consist of 10 members, with three each appointed by the Speaker of the Assembly and President pro Tempore of the Senate, and two each appointed by the Assembly Minority Leader and the Senate Minority Leader. The commission shall be funded solely through private sources ; and be it further

*Resolved,* That the commission shall report to the Legislature with recommendations on the ways in which the housing and health conditions of agricultural workers can be improved, with emphasis on efforts and policies that involve analysis of the entire food system, from raw inputs to the ultimate consumer. The commission shall also report to the Legislature on the ability of the agricultural industry to compete in the global marketplace and shall make recommendations regarding changes to existing law, such as the provision of the manufacturer's investment credit, which would help the agricultural industry remain competitive. It is the intent of the Legislature that policies can be developed that provide reasonable conditions of life to agricultural workers while maintaining a healthy and economically viable agricultural system; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 179

Assembly Concurrent Resolution No. 238—Relative to California Economic Literacy Week.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, Young people should understand our economic system to perform effectively as workers, consumers, savers, and citizens; and

WHEREAS, In turn, this state's economy depends on economically informed and educated citizens to maintain its competitive edge; and

WHEREAS, Unfortunately, adults and high school pupils do not have a grasp of rudimentary economic concepts, according to a recent Louis Harris poll surveying 1,000 adults and 1,000 high school pupils nationwide; and

WHEREAS, While those polled were nearly unanimous in their belief that basic economics should be taught in high school, both pupils and adults lack a fundamental understanding of scarcity, money, and inflation, with less than half of the participants demonstrating knowledge of these concepts; and

WHEREAS, Legislation in the 1984–85 Regular Session established a one-semester course in economics as a requirement for graduation from high school; and

WHEREAS, New standards, adopted by the State Board of Education in November 1988, include an economics strand integrated into the social science curriculum, kindergarten through grade 11, inclusive; and

WHEREAS, The California Council on Economic Education works with the California State University system, other colleges and universities and Centers for Economic Education to help teachers implement new standards; and

WHEREAS, With the leadership of the California Council on Economic Education, the State Board of Education adopted new history social science standards that promote economic reasoning and an understanding of the United States economy in a global setting; and

WHEREAS, An understanding of economics helps pupils view history not as a series of random events, but as the result of decisions made by individuals; and

WHEREAS, These concepts help pupils evaluate major decisions that will affect them for the rest of their lives, including decisions relating to marriage, pregnancy, schooling, and careers; and

WHEREAS, California has made great progress in economic education and is one of only 13 states that include an economics course in the high school graduation requirements; and

WHEREAS, The adoption of the 1998 history social science standards has resulted in economics playing a greater role in classrooms from kindergarten to grade 12, inclusive, since the economics strand runs through the entire curriculum; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the week of October 7, 2002, through October 11, 2002, be recognized as Economic Literacy Week in this state, and urges

Californians to observe these days by working for a better understanding of our economic system; and be it further

*Resolved*, That the Chief Clerk of the Assembly prepare and transmit copies of this resolutions to the author for appropriate distribution.

---

RESOLUTION CHAPTER 180

Assembly Concurrent Resolution No. 240—Relative to adoption.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, Each year in California there are more than 545,000 reports of child abuse and neglect, more than 38,000 court filings alleging child abuse or neglect, and more than 132,000 children and families with active child welfare cases; and

WHEREAS, More than 100,000 children in California are living apart from their families in out-of-home care; and

WHEREAS, The Judicial Council has made the improvement of the administration of justice in court proceedings involving children and families a high priority; and

WHEREAS, The Judicial Council is committed to working with the Governor, the Legislature, and local courts and communities to achieve greater permanence for children in the abuse and neglect system; and

WHEREAS, Through collaborative efforts, the number of children waiting to be adopted has been reduced and great strides have been made toward ensuring that all of California's children live in safe and permanent homes; and

WHEREAS, Twenty-four percent of the children who enter foster care in California and are placed with nonrelatives do not leave the foster care system within three years; and

WHEREAS, There are still approximately 8,900 children freed for adoption each year and only 5,900 children adopted annually; and

WHEREAS, Raising public awareness of the need for permanent homes for children and highlighting innovative approaches by public and private agencies will help expedite the adoption and permanency process; and

WHEREAS, The Assembly and Senate are committed to working together to improve outcomes for children in the abuse and neglect system; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring*, That November 2002, is hereby proclaimed to be "Court Adoption and Permanency Month," in which the courts and their local

communities are encouraged to join together in activities to expedite the adoption and permanency process.

---

RESOLUTION CHAPTER 181

Assembly Concurrent Resolution No. 241—Relative to Macedonia.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, Philip of Macedonia, his son, Alexander the Great, and his tutor, the philosopher Aristotle, were born and raised in the northern province of Greece, Macedonia; and

WHEREAS, The language and culture of the ancient Macedonians, the ancestors of the inhabitants of northern Greece today, were Hellenic; and

WHEREAS, The Macedonians, like the rest of the Hellenes in antiquity, believed in the 12 gods of Olympus and participated with their fellow Hellenes in the Olympic Games; and

WHEREAS, Pella, the palace where Alexander the Great was born, and Vergina, the burial site of the Macedonian kings, are all located in northern Greece; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature recognizes that the ancient Macedonians were Hellenes, and that the inhabitants of Macedonia today are their Hellenic descendants and part of the northern province of Greece, Macedonia; and be it further

*Resolved,* That the history of ancient Macedonia has been Hellenic for 3,000 years and continues to be so today; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

RESOLUTION CHAPTER 182

Assembly Joint Resolution No. 52—Relative to a national memorial.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, On September 11, 2001, United Airlines Flight 93 while en route to San Francisco with 40 passengers and crew aboard was hijacked by terrorists; and

WHEREAS, The passengers and crew on the flight, understanding that the intention of the hijackers was to fly the plane into a target in the

nation's Capitol, consulted with each other and their families about what action to take; and

WHEREAS, The passengers moved to stop this heinous act of terrorism, even at the cost of their lives, in an act of extraordinary bravery and self-sacrifice that resulted in the fatal crash of Flight 93 in Somerset County, Pennsylvania; and

WHEREAS, The passengers and crew, some of whom were California residents, will forever be remembered and are memorialized in this resolution. The crew included: Jason Dahl, Leroy Homer, Jr., Lorraine G. Bay, Sandra W. Bradshaw, Wanda A. Green, Ceecee Lyles, and Deborah Ann Jacobs Welsh. The passengers included: Christian Adams, Todd Beamer, Alan Beaven, Mark Bingham, Deora Bodley, Marion Britton, Thomas E. Burnett, Jr., William Cashman, Georgine Rose Corrigan, Patricia Cushing, Joseph Deluca, Patrick "Joe" Driscoll, Edward Porter Felt, Jane C. Folger, Colleen L. Fraser, Andrew Garcia, Jeremy Glick, Lauren Grandcolas, Donald F. Greene, Linda Gronlund, Richard Guadagno, Toshiya Kuge, Hilda Marcin, Waleska Martinez, Nicole Miller, Louis J. Nacke II, Donald A. Peterson, Jean Hoadley Peterson, Mark "Mickey" Rothenberg, Christine Snyder, John Talignani, Honor Elizabeth Wainio and Kristin Gould White; and

WHEREAS, Legislation (H.R. 3917) has been introduced to designate the crash site as a National Memorial that will honor the final resting place of the people of Flight 93 who were courageous and heroic in giving their lives to bring down the airplane. The legislation reads, in part, "the crash site is a profound symbol of American patriotism and spontaneous leadership of citizen-heroes"; and

WHEREAS, The designated National Memorial will honor the heroism of the Californians who were among the passengers and crew, demonstrating our commitment to the families, friends, neighbors, and colleagues of the victims that the legacy of their loved ones will endure for generations; and

WHEREAS, The National Memorial will remind future generations of the unmatched courage of those aboard Flight 93 and inspire the nation to work for a world at peace and free of terrorism; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California requests the Congress and President of the United States to enact H.R. 3917 to designate a National Memorial at the crash site of Flight 93 in Somerset County, Pennsylvania to pay tribute to and honor the true heroes of this nation; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, the Majority Leader of the

Senate, and to each Senator and Representative from California in the Congress of the United States.

---

RESOLUTION CHAPTER 183

Assembly Joint Resolution No. 57—Relative to immigration enforcement.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, The United States Department of Justice is considering the use of deputized state and local law enforcement officers to enforce United States immigration laws, including those relating solely to civil deportability; and

WHEREAS, The United States Department of Justice officials have recently asserted their belief that states have inherent authority to enforce civil immigration laws, thereby retreating from longstanding precedent indicating that civil immigration laws are the purview of federal immigration officers; and

WHEREAS, Local law enforcement authorities already provide appropriate cooperation and assistance to federal authorities on immigration matters in the context of persons in custody for violations of state and local laws; and

WHEREAS, The plan under federal consideration would go further, authorizing local and state agents to arrest and detain persons without any cause to believe those persons have committed any crime other than violating immigration status requirements; and

WHEREAS, Local and state law enforcement agencies in California already respond to a great many calls for service unrelated to immigration, and the additional obligations of enforcing immigration law would strain law enforcement resources; and

WHEREAS, Local law enforcement officers, while talented and committed to proper enforcement of the laws, are not trained in immigration matters; and

WHEREAS, Immigration enforcement has traditionally been a federal responsibility; and

WHEREAS, Immigrant communities in the United States fear that the provision of immigration authority to state and local law enforcement agents could lead to broader racial profiling; and

WHEREAS, Law enforcement agencies in California have worked hard to gain the trust of immigrant communities, with improved public safety as a consequence; and

WHEREAS, Local law enforcement agencies throughout California have opposed the Justice Department's proposed plan to have them enforce immigration laws because it will adversely affect their ability to properly enforce state and local laws in the diverse communities they serve; and

WHEREAS, The California Police Chiefs Association in an April 10, 2002, letter to the United States Department of Justice stated, "It is the strong opinion of the California Police Chiefs Association leadership that in order for local and state law enforcement organizations to continue to be effective partners with their communities, it is imperative that they not be placed in the role of detaining and arresting individuals based solely on a change in their immigration status;" and

WHEREAS, Hard working but improperly documented immigrants, who are already criminally victimized at greater rates due to their fear of reporting their concerns to law enforcement, would be further discouraged from providing important information to authorities; and

WHEREAS, In the wake of September 11, discouraging members of immigrant communities from reporting crimes and assisting in the investigation of crimes, which would adversely impact efforts to protect our communities from the dangers of terrorism and violent crime, would be an especially costly error; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That under existing California law, state and local law enforcement agencies lack the legal authority to stop, arrest, or detain persons based upon suspected or alleged violations of the civil provisions of the federal immigration laws, except when detention is mandated pursuant to a detainer issued by the Immigration and Naturalization Service and only for the period of time authorized by the detainer; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to United States Attorney General, John Ashcroft, at the United States Department of Justice.

---

## RESOLUTION CHAPTER 184

Assembly Joint Resolution No. 60—Relative to the Kumeyaay Nation.

[Filed with Secretary of State September 16, 2002.]

WHEREAS, The Kumeyaay Nation has occupied and traversed the southern California and Baja California region from the Pacific Ocean to the desert approximately 75 miles north and 75 miles south of the

international border separating the United States and Mexico for thousands of years; and

WHEREAS, Today, the Kumeyaay Nation continues to survive as a recognized sovereign nation within the United States and the State of California; and

WHEREAS, Of the 18 federally recognized bands in San Diego County, 12 are Kumeyaay/Diegueno (Barona Band, Campo, Ewiiapaayp, Jamul, La Posta, Manzanita, Mesa Grande, San Pasqual, Santa Ysable, Sycuan, and Viejas); and

WHEREAS, The Kumeyaay people located in Baja California maintain their villages and govern their community affairs; and

WHEREAS, The Kumeyaay people's lifestyle requires free movement within their aboriginal boundaries, and that includes crossing the international border; and

WHEREAS, When laws were passed by Congress directed at slowing the legal and illegal crossing of the international border by foreign nationals trying to enter the United States, Congress overlooked the impact upon the Kumeyaay Nation lifestyle and culture on both sides of the international border; and

WHEREAS, Kumeyaay within Baja California, Mexico desire to pass and repass for cultural and social purposes with Kumeyaay in the United States in order to preserve Kumeyaay culture and heritage; and

WHEREAS, Recently (1998–2001), the United States Immigration and Naturalization Service consulted with the Kumeyaay Nation to learn of the negative impacts recent laws have imposed upon the Kumeyaay Nation lifestyle and, through this consultation process, established a vehicle to allow for the pass and repass of the Kumeyaay people; and

WHEREAS, The Kumeyaay Nation is a federally recognized tribal government within the United States; and

WHEREAS, The California State Assembly recognizes the Kumeyaay Nation and the aboriginal territory occupied by Kumeyaay people for thousands of years that includes areas on both sides of the international border separating the United States and Mexico (Baja California); now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature supports the efforts of the Kumeyaay Nation to remedy the pass and repass of Baja Kumeyaay and memorializes the United States Immigration and Naturalization Service to continue to work with the Kumeyaay Nation to allow for the pass and repass of Baja Kumeyaay; and be it further

*Resolved,* That the Chief Clerk of the Assembly transit copies of this resolution to the Director of the United States Immigration and Naturalization Service and each Senator and Representative from

California in the Congress of the United States, and to the author for appropriate distribution.

---

RESOLUTION CHAPTER 185

Assembly Constitutional Amendment No. 11—A resolution to propose to the people of the State of California an amendment to the Constitution of the State, by adding Article XVI A thereto, relating to infrastructure finance.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, An investment in California's infrastructure is an investment in California's future because the quality of life in California depends on the quality of our children's education and on the condition of the state's transportation network, water system, parks, natural resources, and other infrastructure; and

WHEREAS, California's infrastructure is critically under-funded; and

WHEREAS, California has often used bonds to pay for infrastructure investments, but bonds alone cannot address the magnitude of California's infrastructure investment deficit; and

WHEREAS, According to the Legislative Analyst's 1998 report, Overhauling the State's Infrastructure Planning and Financing Process, the state needs to take two main steps to provide a more stable funding source for our infrastructure needs: dedicate a given level of General Fund resources for infrastructure, and reserve a proportion of the General Fund for current year capital outlay; and

WHEREAS, In the 1960s, when California created the nation's finest education and transportation systems, the state routinely committed 7 to 10 times more of the General Fund to capital outlay than today; and

WHEREAS, Establishing a California Twenty-First Century Infrastructure Investment Fund and slowly increasing the amount of the General Fund committed to capital outlay is an appropriate method of assuring continual capital outlay to address infrastructure needs; and

WHEREAS, By limiting the annual growth of the infrastructure fund to a small percentage of annual General Fund growth, Article XVI A will protect education, child care, and other necessary services during periods of economic recession; and

WHEREAS, The purpose of subdivision (b) of Section 2 of Article XVI A is to ensure that funding for infrastructure projects is not at the expense of funding of other vital programs and to protect existing vital programs in the event of an economic recession; now, therefore, be it

*Resolved by the Assembly, the Senate concurring,* That the Legislature of the State of California at its 2001–02 Regular Session commencing on the fourth day of December 2000, two-thirds of the membership of each house concurring, hereby proposes to the people of the State of California that the Constitution of the State be amended by adding Article XVI A thereto, to read:

## ARTICLE XVI A

### INFRASTRUCTURE INVESTMENT FUND

SECTION 1. The California Twenty-First Century Infrastructure Investment Fund is hereby established in the State Treasury for the purpose of funding capital outlay expenses. The Department of Finance shall prepare an annual plan to expend these funds, unless the Governor directs another state agency to prepare the plan.

SEC. 2. As used in this article:

(a) “Department of Finance” means the Department of Finance or a successor agency.

(b) “General Fund revenues” excludes transfers from other funds into the General Fund and transfers from the General Fund into other funds.

(c) “Infrastructure fund” means the California Twenty-First Century Infrastructure Investment Fund.

(d) “Made for purposes of the current fiscal year Budget Act as determined by the Department of Finance” means General Fund revenues contained in the Final Budget Summary published by the Department of Finance for the current fiscal year.

SEC. 3. (a) Commencing in the 2006–07 fiscal year, and in every fiscal year thereafter, the Controller shall make the following transfers from the General Fund to the infrastructure fund:

(1) During the 2006–07 fiscal year, a sum equal to 1 percent of the total amount of General Fund revenues as estimated by the Department of Finance for purposes of the Budget Act for that fiscal year.

(2) During the 2007–08 fiscal year, a sum equal to 1.3 percent of the total amount of General Fund revenues as estimated by the Department of Finance for purposes of the Budget Act for that fiscal year.

(3) During the 2008–09 fiscal year, a sum equal to 1.6 percent of the total amount of General Fund revenues as estimated by the Department of Finance for purposes of the Budget Act for that fiscal year.

(4) During the 2009–10 fiscal year, a sum equal to 1.9 percent of the total amount of General Fund revenues as estimated by the Department of Finance for purposes of the Budget Act for that fiscal year.

(5) During the 2010–11 fiscal year, a sum equal to 2.2 percent of the total amount of General Fund revenues as estimated by the Department of Finance for purposes of the Budget Act for that fiscal year.

(6) During the 2011–12 fiscal year, a sum equal to 2.5 percent of the total amount of General Fund revenues as estimated by the Department of Finance for purposes of the Budget Act for that fiscal year.

(7) During the 2012–13 fiscal year, a sum equal to 2.8 percent of the total amount of General Fund revenues as estimated by the Department of Finance for purposes of the Budget Act for that fiscal year.

(8) During the 2013–14 fiscal year, and every fiscal year thereafter, a sum equal to 3 percent of the total amount of General Fund revenues as estimated by the Department of Finance for purposes of the Budget Act for the applicable fiscal year.

(b) Notwithstanding subdivision (a), if the total General Fund revenues for a fiscal year are estimated by the Department of Finance to not increase by at least 4 percent, after adjusting for inflation, compared to the revenues for the prior fiscal year, the increase in the percentage amount to be transferred in the budget year, as otherwise specified in paragraphs (2) to (8), inclusive, of subdivision (a) shall be delayed by one fiscal year.

(c) Notwithstanding subdivision (a), if the total General Fund revenues for a fiscal year are estimated by the Department of Finance to increase by at least 8 percent, after adjusting for inflation, compared to the revenues for the prior fiscal year, the increase in the percentage amount to be transferred in the budget year, as otherwise specified in paragraphs (2) to (8), inclusive, of subdivision (a) shall be accelerated by one fiscal year from the schedule in subdivision (a).

(d) Notwithstanding paragraph (1) of subdivision (a), the initial annual transfer to the infrastructure fund shall not occur until General Fund revenues for a fiscal year are estimated by the Department of Finance to increase by at least 4 percent, after adjusting for inflation, compared to the revenues for the prior fiscal year.

(e) Notwithstanding subdivision (a), in a fiscal year in which both of the conditions specified in subparagraphs (A) and (B) of paragraph (1) apply, the transfer pursuant to this section shall be reduced by an amount determined pursuant to paragraph (2):

(1) (A) The percentage growth in the amount required to be applied for the support of school districts and community college districts pursuant to Section 8 of Article XVI is greater than the percentage growth in General Fund revenues.

(B) The transfer specified pursuant to this section is not otherwise reduced pursuant to subdivision (b) or (f) or pursuant to subdivision (b) or (c) of Section 4.

(2) (A) Determine the amount required to be applied for the support of school districts and community college districts pursuant to Section 8 of Article XVI for the current fiscal year based on the estimate contained in the Governor's May Revision proposal for that fiscal year.

(B) Determine an amount equal to the amount required to be applied for the support of school districts and community college districts pursuant to Section 8 of Article XVI for the prior fiscal year multiplied by the percentage growth in General Fund revenues from the prior to the current fiscal year based on the estimate contained in the Governor's May Revision proposal for the current fiscal year.

(C) Subtract the amount determined pursuant to subparagraph (B) from the amount determined pursuant to subparagraph (A) and multiply that difference by 0.5.

(f) Notwithstanding subdivision (a), the percentage of General Fund revenues transferred to the infrastructure fund in any fiscal year may not exceed the difference between 7.5 percent of estimated General Fund revenues for that fiscal year less the percentage of General Fund revenues for the prior fiscal year that were used to make debt payments in the prior fiscal year on general obligation bonds of the State and lease-revenue bonds issued by the State Public Works Board.

(g) The annual amount transferred to the infrastructure fund, as required pursuant to subdivision (a), shall be reduced by an amount equal to the sales tax revenue in each fiscal year that is redirected to the Traffic Congestion Relief and Safe School Bus Trust Fund pursuant to Proposition 51 if that measure was approved by the voters in November 2002.

SEC. 4. (a) The annual transfer from the General Fund to the infrastructure fund, as provided for by this article, shall be made over four time periods in the fiscal year as follows:

(1) The first transfer shall be made on August 1, or 30 days after enactment of the budget, whichever is later, and shall be in the amount of 25 percent of the total transfer for the fiscal year based on revenue assumptions made for purposes of the Budget Act, as determined by the Department of Finance.

(2) The second transfer shall be made on November 1, and shall be in the same amount as the first transfer.

(3) The third transfer shall be made on February 1, and the amount shall be the difference between 75 percent of the total required transfer for the current fiscal year, based on the adjusted revenue estimate for the current fiscal year according to the Governor's Budget proposal for the following fiscal year, and the total amount of the first and second transfers.

(4) The fourth transfer shall be made on May 31, and the amount shall be based on the difference between the total required transfer for the

current fiscal year based on the adjusted revenue estimate for the current fiscal year according to the Governor's May Revision proposal for the following fiscal year and the total amount previously transferred.

(b) (1) If the updated revenue estimate for the current fiscal year, as contained in the Governor's Budget proposal for the next fiscal year, is more than 5 percent below the revenue assumptions made for purposes of the current fiscal year Budget Act as determined by the Department of Finance, the February 1 transfer shall be suspended until no sooner than May 31.

(2) If the updated revenue estimate for the current fiscal year, as contained in the Governor's May Revision proposal for the next fiscal year, is more than 5 percent below the revenue assumptions made for purposes of the current fiscal year Budget Act as determined by the Department of Finance, the February 1 transfer and the May 31 transfer shall be suspended for that fiscal year. If the February 1 transfer had already been made because revenue estimates at that time did not show a 5 percent or greater decline, that amount shall be credited toward the transfer for the next fiscal year.

(3) If the revenue estimate for the current fiscal year, as contained in the Governor's May Revision proposal for the next fiscal year, is between 2 percent and 5 percent below the revenue assumptions made for purposes of the current fiscal year Budget Act, as determined by the Department of Finance, the total transfer for that fiscal year shall be only 75 percent of what it would otherwise be if revenues had not declined from the original estimate.

(4) If the revenue estimate for the current fiscal year, as contained in the Governor's May Revision proposal for the next fiscal year, is between zero and 2 percent below the revenue assumptions made for purposes of the current fiscal year Budget Act as determined by the Department of Finance, the total transfer amount for that fiscal year shall be 100 percent of that required under Section 3, and the fourth transfer on May 31 shall include the balance needed to fulfill the transfer requirement.

(c) If there is a year-to-year revenue decline on the basis that revenues in a fiscal year, as estimated either for purposes of the Budget Act at the beginning of the fiscal year, the following January in the Governor's Budget, or the following May in the Governor's May Revision, are estimated to be either less than the actual revenues in the prior fiscal year or more than 4 percent below actual revenues in the prior fiscal year after adjusting for inflation, both of the following shall occur:

(1) The transfer shall be suspended for that year. If the year-to-year decline in revenues is based on January or May revenue estimates, any transfers already made in August, November, and February of that fiscal year shall be credited toward transfer requirements for the following

fiscal year. However, if the transfer is suspended in any fiscal year, the transfer in the following fiscal year shall be only one-half of the amount otherwise required based on the percentages specified in Section 3. That transfer requirement shall include amounts credited from transfers made in the prior fiscal year pursuant to this paragraph prior to any suspension occurring.

(2) Any unencumbered funds in the infrastructure fund that are allocated only to the State, and are subject to appropriation, may be loaned interest-free to the General Fund, either in the fiscal year that the transfer is suspended or in the following fiscal year, provided that these loans do not result in the delay of any previously funded projects.

SEC. 5. The funds transferred to the infrastructure fund in each fiscal year shall be allocated by the Legislature in the following fiscal year for capital outlay purposes, as follows:

(a) Fifty percent for acquisition, construction, rehabilitation, modernization, or renovation of infrastructure that is owned, or is to be acquired by, the State.

(b) Fifty percent for acquisition, construction, rehabilitation, modernization, or renovation of infrastructure, including, but not limited to, streets, roads, highways, transportation, water, parks, and open space, that is owned, or is to be acquired by, local governments, including cities, counties, a city and county, and special districts, but not school districts or community college districts. The Legislature shall provide by law a method for the annual allocation of these funds to local governments for their use on projects that meet the requirements of this section.

SEC. 6. Neither transfers to, nor allocations from, the infrastructure fund shall in any manner affect the calculations otherwise made pursuant to Section 8 or Section 8.5 of Article XVI.

SEC. 7. For purposes of this article, appropriations from the infrastructure fund pursuant to this article constitute appropriations for qualified capital outlay projects for purposes of Section 9 of Article XIII B.

---

## RESOLUTION CHAPTER 186

Assembly Concurrent Resolution No. 79—Relative to entertainment park signs.

[Filed with Secretary of State September 18, 2002.]

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That a county with a population of not more than 900,000

persons that contains an entertainment park that is visited by 120,000 patrons or more per year should be authorized to apply to the Department of Transportation to have an exit sign placed on the nearest major highway access point to the park if the park is located not more than two miles from the highway and the street on which the park is located has the same name as the park; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit a copy of this resolution to the Director of Transportation.

---

### RESOLUTION CHAPTER 187

Assembly Concurrent Resolution No. 229—Relative to Mexican Consular identification cards.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, There are many Mexican nationals residing in California who do not possess a form of identification issued by a United States federal or state agency; and

WHEREAS, Many immigrants are fearful of reporting crimes to the police because they do not possess proper identification; and

WHEREAS, Cities and counties in California waste hundreds of thousands of dollars annually on police processing time for immigrants who do not possess proper identification; and

WHEREAS, Many immigrants lack access to certain public services because they do not possess proper identification; and

WHEREAS, In 47 cities across the nation, including 10 in California, the Mexican Consulate or El Consulado General de Mexico, issues identification cards to Mexican nationals who have a birth certificate, a proper form of Mexican identification, and who have been residing in the United States for at least six months; and

WHEREAS, The Mexican Consular identification cards, or *Matricula Consular*, are state-of-the-art and contain various security safeguards designed to prevent falsification; and

WHEREAS, If Mexican citizens possess a *Matricula Consular*, they are able to establish their identities to local peace officers and acceptance of that identification would facilitate their interactions with law enforcement agencies and reduce the time needed to process undocumented immigrants, saving time and lowering costs; and

WHEREAS, If a Mexican citizen possesses a *Matricula Consular*, he or she will be more likely to report crimes and cooperate with law enforcement officers if it is an accepted form of identification; and

WHEREAS, If a Mexican citizen who possesses a Matricula Consular is able to establish his or her identity to other city and county personnel, he or she will have better access to public services; and

WHEREAS, Acceptance of the Mexican Consular identification cards will enable many of California's residents to participate in services such as signing on for power and water service, obtaining senior citizen discount rates for public transportation, obtaining library cards, reporting domestic violence, participating in other city and county programs and services, and having access to local and state government buildings to meet with elected officials and attend local government meetings; and

WHEREAS, Certain cities and counties, including the City and County of Los Angeles, City and County of San Francisco, City of Oakland, City of Watsonville, County of Santa Clara, and the County of Santa Cruz, now accept the Matricula Consular as official identification cards; and

WHEREAS, Numerous police and sheriffs departments across California, including those of the City of San Jose, Orange County, Sacramento County, San Diego County, and Santa Cruz County, also accept the Matricula Consular as official identification cards pursuant to their own departmental policy; and

WHEREAS, Various United States banks accept this form of identification, including Wells Fargo, Bank of America, California Credit Union, U.S. Bank, and the California Union Bank, and since November 2001, Mexican immigrants have opened new bank accounts and deposited over \$50 million in banks throughout California using the Matricula Consular; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature of the State of California urges cities and counties throughout California, including their respective agencies, and state agencies to accept the Mexican Consular identification cards, known as the "Matricula Consular," as an official form of identification; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 188

Assembly Concurrent Resolution No. 242—Relative to Jury Rights Day.

WHEREAS, The year 2002 marks the 211th anniversary of the Bill of Rights; and

WHEREAS, September 5, 2002, marks the 332nd anniversary of the day when jurors in the William Penn trial refused to convict Penn for preaching Quakerism, then considered an illegal religion, to a congregation gathered on a London street after being locked out of their meeting house, then considered an unlawful assembly; and

WHEREAS, The Penn jury, in refusing to convict, provided a basis for the United States Constitution's First Amendment rights of freedom of speech, religion, and peaceable assembly; and

WHEREAS, September 5, also commemorates the day when four of the Penn jurors began nine weeks of incarceration for finding Penn innocent, after which their release and exoneration forever established as English and American legal doctrine that it is the right and responsibility of the trial jury to apply the law and decide on matters of fact in the case before it; and

WHEREAS, The Sixth and Seventh Amendments are included in the Bill of Rights to preserve the right of trial by jury, which in turn conveys upon the jury the responsibility to defend all other individual rights enumerated in and implied by the United States Constitution and its amendments, along with all the rights which attend that responsibility; and

WHEREAS, The State of California recognizes these rights as true and unalienable; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That September 5, 2002, be hereby proclaimed Jury Rights Day.

---

## RESOLUTION CHAPTER 189

Assembly Concurrent Resolution No. 243—Relative to Constitution Week and Constitution Day.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, The delegates to the 1787 Constitutional Convention in Philadelphia, Pennsylvania, crafted the Constitution to be a unique experiment in self-government, which recognized the dangers of concentrating too much power in one person, branch, or institution of government; and

WHEREAS, It is appropriate and fitting that Californians commemorate the historical contributions that the United States Constitution has made to citizens and its significance in preserving the

individual freedoms, liberties, and common welfare of the people who live in the United States; and

WHEREAS, Since the cowardly terrorist attacks against the World Trade Center and the Pentagon on September 11, 2001, the people of California and the United States have witnessed the strength that the Constitution has provided to our republic, as shown not only by how judiciously our armed forces responded, but also in our continued commitment to ensuring that the freedoms and values embodied by our Constitution continue to endure and not fall victim to terrorism themselves; and

WHEREAS, Especially in light of the September 11 tragedy, it is appropriate and fitting that Californians commemorate the historical contributions that the United States Constitution has made to their lives, and its continued significance in preserving the individual freedoms, liberties, and common welfare embodied therein; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature of the State of California hereby declares the week of September 15-21, 2002, as Constitution Week and September 17 as Constitution Day; and be it further

*Resolved,* That the Governor is hereby requested to proclaim Constitution Week and Constitution Day and that the proclamation shall do all of the following:

(1) Call upon those in positions of authority or influence to bring to the attention of California's citizens the importance of the United States Constitution in shaping and articulating the basic values that underlie the unique character of American civilization and culture, based on the belief that all power emanates from the people and that governmental authority is based upon the consent of the governed.

(2) Encourage elected and appointed officers and employees at all levels of government and in all public and educational institutions to develop new programs and new ideas by which the citizens of this state and nation can better understand and improve the effectiveness of all branches of government established within the American constitutional system.

(3) Remind all citizens of California that the preservation of our Constitution, as well as our freedom and liberty, is the responsibility of every Californian; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to the Governor of the State of California.

---

## RESOLUTION CHAPTER 190

Assembly Concurrent Resolution No. 249—Relative to the 30th Anniversary of the Federal Water Pollution Control Act Amendments of 1972.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, Clean water is an essential natural resource of critical importance to all Californians; and

WHEREAS, Californians strongly support protecting the quality of the state's watersheds, wetlands, streams, rivers, lakes, groundwater, beaches, and coastal waters; and

WHEREAS, Maintaining and improving water quality is essential to protect public health and to provide a habitat for fish and wildlife; and

WHEREAS, Maintaining and improving water quality is necessary to our economic development and well-being, to promote tourism and its beneficial effects for our economy, to provide recreational activities, to protect fisheries, and to benefit agriculture; and

WHEREAS, Water pollution problems persist and California faces significant challenges to protect the quality of its water resources and watersheds from point and nonpoint sources of pollution; and

WHEREAS, Further development, innovation, and investment in water pollution management practices, water infrastructure, research and technological development, and education programs are necessary and desirable to facilitate water quality protection; and

WHEREAS, October 2002 marks the 30th anniversary of the enactment of the Federal Water Pollution Control Act Amendments of 1972 (P.L. 92-500), which extensively amended, reorganized, and expanded the Federal Water Pollution Control Act, to its modern form; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring*, That the Legislature, in recognition of the 30th anniversary of the enactment of The Federal Water Pollution Control Act Amendments of 1972, declares the year 2002 the "Year of Clean Water" and declares October 2002 as "Clean Water Month"; and be it further

*Resolved*, That the Legislature encourages all Californians to recognize the importance of making a personal commitment to do their part to protect water quality and to recommit to achieving the goals of the Federal Water Pollution Control Act; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 191

Assembly Concurrent Resolution No. 250—Relative to hepatitis C.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, Hepatitis C virus infection is the most common chronic blood borne viral infection in the United States; and

WHEREAS, Nearly two in every 100 Americans are infected; and

WHEREAS, The Centers for Disease Control estimates the hepatitis C virus to have infected 500,000 Californians, more than any other state in the union; and

WHEREAS, The hepatitis C rate among veterans is roughly four times the rate of the general population; and

WHEREAS, Forty percent of inmates in California prisons are infected with hepatitis C, which presents a dangerous situation for prisoners, corrections staff, and the public as these infected inmates are released to the street on parole; and

WHEREAS, Hepatitis C can live largely undetected in the body for 20 to 30 years; and

WHEREAS, Infected individuals, who are unaware they are infected, can unknowingly transmit the virus to others for decades, while their own livers are slowly deteriorating; and

WHEREAS, No vaccine is available for hepatitis C; and

WHEREAS, Hepatitis C causes up to one-half of all the liver cancer cases in the United States; and

WHEREAS, Twenty percent of all patients with chronic hepatitis C will develop cirrhosis, which is when healthy liver cells are replaced by scar tissue that can prevent the liver from functioning properly; and

WHEREAS, Nearly 50 percent of all liver transplants in the United States are performed for end-stage hepatitis C, however reinfection of the transplanted liver by the virus usually occurs and the patient may require a second transplant; and

WHEREAS, The demand for liver transplants is expected to jump by 500 percent by 2008; and

WHEREAS, Ten thousand Americans a year are dying from hepatitis C; and

WHEREAS, By the end of the decade, the annual death toll could easily reach 30,000, which is twice the toll that AIDS takes in America each year; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature is concerned about the health crisis associated with hepatitis C and hereby recommends:

(1) Implementation of prevention and educational activities to counsel, screen, and treat persons at risk for hepatitis C virus infection.

- (2) Monitoring and evaluation of the infection rate of hepatitis C.
- (3) Implementation of outreach and community-based programs to educate health care professionals concerning diagnosis, medical management, and prevention.

---

RESOLUTION CHAPTER 192

Assembly Concurrent Resolution No. 251—Relative to the Colorado River.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, Colorado River water is vital to the economy, environment, and people of California; and

WHEREAS, Colorado River water is the key source of drinking water for over 17,000,000 people in urban southern California and the primary water supply for agriculture in southern California; and

WHEREAS, In 1964, in the case of *Arizona v. California*, the United States Supreme Court fixed California's basic annual apportionment of mainstream Colorado River water at 4.4 million acre-feet; and

WHEREAS, Colorado River water apportionments were based on more liberal hydrological assumptions and, as a result, the Colorado River is oversubscribed; and

WHEREAS, For many years, California has been using up to 5.2 million acre-feet more than its annual apportionment of 4.4 million acre-feet. From 600,000 to 700,000 acre-feet of water above California's apportionment has been used each year for the Colorado River Aqueduct, which carries approximately 1.25 million acre-feet of water annually to southern California. California has been able to use more than its apportioned share because Nevada and Arizona had not been using their full apportioned shares, and surplus Colorado River water has been available. However, Nevada and Arizona are now using their full apportionments; and

WHEREAS, The other Colorado River Basin states and the Secretary of the Interior have expressed concern over California's continued reliance upon surplus Colorado River water. They have stated that California must reduce its use of Colorado River water to its basic annual apportionment of 4.4 million acre-feet so that other states are not subjected to risks of shortage; and

WHEREAS, In response to the concerns of the Secretary of the Interior and the other Colorado River Basin states, the Colorado River Board of California and its represented agencies, including the Imperial Irrigation District (IID), the Coachella Valley Water District (CVWD),

the Metropolitan Water District of Southern California (MWD), the San Diego County Water Authority (SDCWA), and others, agreed upon a plan (referred to as California's Colorado River Water Use Plan) to reduce California's use of Colorado River water to 4.4 million acre-feet per year. The framework components of the plan are wide in scope, and provide various potential options to reduce use, including conservation and water transfers; and

WHEREAS, In January 2001, the Secretary of the Interior implemented the Colorado River Interim Surplus Guidelines, which will allow California to continue to use more than 4.4 million acre-feet until 2016. The Surplus Guidelines are contingent upon the water agencies executing the Quantification Settlement Agreement (QSA) on or before December 31, 2002, at the latest. The QSA is an integral component of the plan, and is an agreement between IID, CVWD, MWD, and SDCWA that, if executed, will settle long-standing disputes among Colorado River water users in California regarding the apportionment and priorities of Colorado River water for use in California. The QSA also will quantify water use, and will help ensure reasonable and beneficial use of Colorado River water among all California entities currently using and relying on the basic apportionment of 4.4 million acre-feet; and

WHEREAS, The QSA facilitates agricultural to municipal and industrial transfers of Colorado River water in order to ensure a full Colorado River Aqueduct; and

WHEREAS, An integral part of California's plan to meet its goal of using no more than 4.4 million acre-feet of Colorado River water is the transfer of up to 200,000 acre-feet of efficiency-based conserved water from IID to SDCWA; and

WHEREAS, There are complicated state and federal issues surrounding the water transfer, including the potential for the transfer to accelerate the salinization of the Salton Sea; and

WHEREAS, The Salton Sea is a resource of state and national importance due to the large numbers and variety of migratory birds and other species that are found there, and the Salton Sea fishery is very productive, supporting both recreation and wildlife use. Some species are very dependent on the Salton Sea for major periods of their lives. Increased salinization will further stress federal and state threatened or endangered species; and

WHEREAS, Congress recognized that preservation of the Salton Sea is in the national interest in the Salton Sea Reclamation Act of 1998 (Public Law 105-372). The report of alternative options for restoration of the Salton Sea has not been submitted to Congress as called for in Public Law 105-372; and

WHEREAS, If the QSA is not executed on or before December 31, 2002, the Secretary of the Interior has stated that the Interim Surplus Guidelines will be suspended and that California will immediately lose up to 800,000 acre-feet per year of Colorado River water (a supply equivalent to that used by about 5,000,000 people in a year); and

WHEREAS, The loss of that water, which currently serves over one-half of the state's residents, would have a significant impact on California's economy, environment, and quality of life, and could force a greater reliance on water from the fragile ecosystem of the California Bay-Delta to make up the lost water; and

WHEREAS, Loss of Colorado River water as a result of suspension of the Interim Surplus Guidelines is likely to create a water supply shortage for urban southern California, and eventually could threaten the health, safety, and economic well-being of the state's residents and industries; and

WHEREAS, In addition to the possible suspension of the Interim Surplus Guidelines, the Colorado River Basin is experiencing a severe multiyear drought, and Colorado River reservoir storage has declined by 15.6 million acre-feet since December 1999, while Lake Mead is at its lowest level in 30 years; and

WHEREAS, The Colorado River Basin water supply is projected for water year 2002 to be from 15 to 24 percent of normal, further jeopardizing California's Colorado River water supply; now, therefore, be it

*Resolved by the Assembly of the State of California, the Senate thereof concurring,* That the Legislature finds and declares that it is of the utmost importance to the people of California that IID, MWD, CVWD, and SDCWA reach agreement and execute the Quantification Settlement Agreement (QSA) on or before December 31, 2002, to move forward with the Colorado River Water Use Plan and maintain the Interim Surplus Guidelines; and be it further

*Resolved,* That, if the QSA is not executed on or before December 31, 2002, and southern California's water supplies are cut, the Legislature will consider appropriate legislative actions to ensure the successful implementation of the QSA and to further ensure that the suspension of the Interim Surplus Guidelines will be lifted; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 193

Assembly Joint Resolution No. 37—Relative to labor negotiations by California waterfront workers.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, California ports are a crucial part of the global and local economies, and the labor negotiations that concern their operations are closely watched by businesses and governments; and

WHEREAS, The jobs in California ports are of high quality, due to agreements that have been negotiated over the last fifty years by the Pacific Maritime Association (PMA) and organized labor; and

WHEREAS, The legal, established collective bargaining process, including the right to strike, is a right of the waterfront union members under the National Labor Relations Act of 1935; and

WHEREAS, The Bush administration has announced, through Department of Labor officials, that it may invoke a national economic emergency in order to forestall a strike under the Taft-Hartley Act, or may use the National Guard to prevent such a strike; and

WHEREAS, The use of this power, or even the announcement of the intentions to use it, will and has upset what has been, up until now, a level playing field between management and labor; now therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California opposes any action by the President and the administration that would impose a Taft-Hartley injunction against waterfront unions, would remove union workers from coverage by the National Labor Relations Act, or would send military personnel to the West Coast docks to assist in a lockout of waterfront union workers; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

## RESOLUTION CHAPTER 194

Assembly Joint Resolution No. 45—Relative to the Independent System Operator.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, California has a long established policy of supporting customer generation resources; and

WHEREAS, Customer generation includes all manner of customer self-reliance, such as cogeneration, distributed generation, and self-generation; and

WHEREAS, Both the California legislative and executive branches of government have consistently supported the development of customer generation; and

WHEREAS, Customer generation promotes energy self-sufficiency through private capital investment; and

WHEREAS, These resources assist in relieving transmission congestion and enhancing the reliability of the electric system by local deployment of generating resources; and

WHEREAS, The Independent System Operator (ISO) is currently pursuing unnecessary and burdensome changes to the metering, scheduling, and operational requirements of customer generation and cogeneration resources in tariff proposals before the Federal Energy Regulatory Commission (FERC); and

WHEREAS, The ISO's proposed gross metering policy, that would attribute a disproportionate share of ISO costs to electricity load served by customer generation over private transmission or distribution facilities, would result in substantially higher ISO fees for electricity load served by customer generation without any additional benefit for customers or for grid reliability; and

WHEREAS, The ISO's proposed policy is a major disincentive to the successful development of customer generation in California; now, therefore, be it

*Resolved by the Assembly and the Senate of the State of California, jointly* That the Legislature of the State of California urges FERC to do all of the following:

(1) Maintain long-standing federal policies to promote development of customer generation resources.

(2) Ensure the California electricity load served by customer generation not incur costs for any transmission related service in excess of the transmission costs included in standby service rates developed using ratemaking principles that existed prior to the establishment of the ISO; and be it further

*Resolved*, That the Legislature urges FERC to reject the cost allocation provisions of the ISO's proposed gross metering policy, provided that the reliability standards, established by an official determination of the Western Electricity Coordinating Council, do not require the ISO to procure ancillary services according to the gross load of customer generators; and be it further

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

RESOLUTION CHAPTER 195

Assembly Joint Resolution No. 53—Relative to the Temporary Assistance for Needy Families (TANF) program.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, The United States Congress must reauthorize the Temporary Assistance for Needy Families (TANF) program by October 1, 2002; and

WHEREAS, States are achieving success under TANF because states have the flexibility to design appropriate, effective programs that move people into work and support vulnerable children. Under TANF, California has decreased families' dependence on welfare, increased work rates and wages, and improved the well-being of children; and

WHEREAS, Welfare reauthorization should help states like California build on their unprecedented success at moving people off welfare; and

WHEREAS, Devolution was a core principle in welfare reform. The TANF block grant allows each state to design the most effective and appropriate programs for moving families from welfare to work. Under TANF, California's welfare recipients are working more hours than ever before and California has nearly tripled the number of welfare recipients who are working; and

WHEREAS, The flexibility offered in current federal law has permitted California to make the well-being of children its highest priority. Under current federal law, California ensures that poor children have a basic level of subsistence, regardless of their parents' immigration status or ability to meet participation requirements; and

WHEREAS, Current federal law supports the fact that different strategies are needed for families facing different barriers to work. Today, California's counties develop welfare-to-work plans, work programs, and participation requirements that are tailored to each family's unique circumstances. Current federal law permits California's counties to develop programs that are sensitive to state and county labor markets and employment rates; and

WHEREAS, Since 1997, when the TANF program was created, the value of the TANF block grant has significantly diminished due to inflation. If TANF funding continues at current levels, the

inflation-adjusted value of the block grant in 2007 would be approximately 22 percent less than its original value in 1997; and

WHEREAS, California is using all of its TANF block grant, yet faces a projected shortfall in its TANF program. At the same time, California faces a budget deficit of \$24 billion, increasing the importance of adequate federal funding; and

WHEREAS, Child care is central to states' efforts to move families into work. Under TANF, states have helped many parents find and keep jobs, secure child care, and overcome personal barriers to work. As work participation requirements rise, so must state resources to meet families' corresponding child care needs; and

WHEREAS, Despite states' success in moving many families off welfare, many families still on aid have numerous and complex barriers to joining the workforce. States want to move these families into work as quickly as possible, but recognize that families with difficulties, such as domestic violence, learning disabilities, and mental illness, must receive supportive services to address these barriers to work; and

WHEREAS, California is currently being penalized by the federal government for failure to implement a statewide automated child support system due to system failure on the part of the project's original vendor. California has paid nearly \$300 million in penalties from the state's General Fund and, upon completion of the statewide automation system, will pay total penalties of approximately \$1.3 billion. California has entered into a corrective action plan with the United States Department of Health and Human Services and is in full compliance with the plan; and

WHEREAS, Federal child support automation penalties have served the important purpose of capturing the attention of California and have resulted in significant restructuring to establish a reliable approach to securing a statewide automated child support system; and

WHEREAS, Governor Davis and the California Legislature have made a strong commitment to improving the state's child support program that has resulted in historically high levels of child support collections; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly,* That to build on the success of welfare reform, in reauthorization of the TANF program, the California Legislature urges federal policymakers to maintain state flexibility to spend TANF funds. Given states' demonstrated success using this flexibility, this central premise of welfare reform should not be compromised in welfare reauthorization; and be it further

*Resolved,* In TANF reauthorization, the California Legislature urges federal policymakers to maintain state flexibility to provide a safety net to vulnerable children; and be it further

*Resolved*, In TANF reauthorization, the California Legislature urges federal policymakers to maintain state flexibility to design the most effective ways to move people into work. State flexibility in designing work programs should not be compromised in welfare reauthorization; and be it further

*Resolved*, In TANF reauthorization, the California Legislature urges federal policymakers to adjust the TANF block grant for inflation. Freezing the TANF block grant at current levels is not adequate to maintain even current program levels because inflation has eroded the value of the block grants. Welfare reauthorization is an opportunity for the federal government to address this funding inadequacy; and be it further

*Resolved*, In TANF reauthorization, the California Legislature urges federal policymakers to recognize states' needs to provide ongoing supportive services. Welfare reauthorization should help states provide child care and supportive services, as they are substantial defenses in permanently keeping families off welfare; and be it further

*Resolved*, In TANF reauthorization, the California Legislature urges federal policymakers to base the year on which the federal child support automation penalties are assessed to the 1997–98 fiscal year, the year prior to penalties first being imposed. This will ensure that states do not incur additional penalties because of increased investments in the administration of their child support programs; and be it further

*Resolved*, In TANF reauthorization, the California Legislature urges federal policymakers to give states the option to reinvest federal child support automation penalties back into their child support programs and automation efforts. This will ensure that states continue to concentrate on the deficiencies that contribute to automation implementation delays and subsequent penalties; and be it further

*Resolved*, In TANF reauthorization, the California Legislature urges federal policymakers to simplify the child support distribution rules to allow more money to reach families while also reducing California's system procurement costs and assisting in an earlier completion of the statewide automated system.

*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to the Majority Leader of the Senate, and to each Senator and Representative from California in the Congress of the United States.

---

## RESOLUTION CHAPTER 196

Assembly Joint Resolution No. 61—Relative to Holocaust insurance claims.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, Sixty years have passed since the horrific events of the Holocaust, during which the Nazis murdered six million Jews and five million other people; and

WHEREAS, During the Second World War, many Jewish families in Europe purchased life insurance policies as financial protection for loved ones who would survive the war; and

WHEREAS, After the Nazis came to power, they systematically confiscated the assets and insurance policy documents of Jews and other victims, and did not issue death certificates for the countless Jews and untold others murdered in concentration camps; and

WHEREAS, After the war, many insurers refused to pay on valid policies because survivors did not have adequate documentation; thus the victims of the Holocaust and their heirs have been unable to collect the proceeds from life insurance policies, which they are rightfully owed; and

WHEREAS, Insurance company records may be the only proof of insurance held by Holocaust survivors or their heirs, and in some instances, recollections of the very existence of insurance policies may have perished along with Holocaust victims; and

WHEREAS, In 1998, the International Commission on Holocaust Era Insurance Claims (ICHEIC) was created to facilitate the expeditious processing of unpaid insurance policies issued to Holocaust victims; and

WHEREAS, ICHEIC launched its claims process in February 2000; and

WHEREAS, As of May 31, 2002, ICHEIC has received over 85,000 claims from all over the world, of which more than 2,357 were from California; and

WHEREAS, Only 1,370 claimants worldwide have received offers from ICHEIC insurers, and most of the 85,000 victims are still waiting; and

WHEREAS, California enacted the Holocaust Victims Insurance Relief Act in 1999, requiring insurers to provide data to the Department of Insurance by April 10, 2000, regarding all policies they or an affiliated company wrote in Europe between 1920 and 1945; and

WHEREAS, Approximately five California insurers have provided documents in full compliance with the statute and approximately 100 have refused to comply; and

WHEREAS, As of March 2000, four separate lawsuits have been filed by California insurers in an attempt to block the implementation of the 1999 Holocaust Victims Insurance Relief Act, alleging that the statute is unconstitutional; and

WHEREAS, In February 2001, the Federal Court of Appeals denied some of the insurers' constitutional challenges, but allowed an injunction to stand which enjoined the requirement that California insurers submit information about policies sold in Europe between 1920 and 1945; and

WHEREAS, On July 15, 2002, the Ninth United States Circuit Court of Appeals ruled that the 1999 Holocaust Victims Insurance Relief Act is constitutional, and while subsequent appeals by insurers have resulted in the injunction remaining in place, once the injunction is lifted, the state will be able to require insurers to release detailed information about policies they sold in Europe between 1920 and 1945; and

WHEREAS, The deliberate delay on the part of these insurers may result in a generation of Holocaust victims dying before their claims are rightfully paid; and

WHEREAS, It would be an unconscionable act of inhumanity to allow survivors of the Holocaust to be victimized once again by allowing these insurance claims to go unpaid; and

WHEREAS, We can no longer idly stand by while justice is being denied for these vulnerable elderly victims; now, therefore, be it

*Resolved by the Assembly and the Senate of the State of California, jointly,* That the Legislature of the State of California hereby urges the International Commission on Holocaust Era Insurance Claims, the National Association of Insurance Commissioners, and the Department of Insurance to take immediate action to encourage insurers to fully comply with the ICHEIC claims process for Holocaust era insurance claims; and be it further

*Resolved,* That the Legislature of the State of California urges the ICHEIC insurers to continue to fund the ongoing ICHEIC operation for an adequate time period; and be it further

*Resolved,* That the Legislature of the State of California urges the ICHEIC to advocate more forcefully for claimants; and be it further

*Resolved,* That the Legislature of the State of California urges the ICHEIC to do everything it can to require the ICHEIC insurers, the German Insurance Association, and the German Foundation to comply with the ICHEIC claims process; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the author for appropriate distribution.

---

## RESOLUTION CHAPTER 197

Assembly Joint Resolution No. 63—Relative to the extradition of criminals.

[Filed with Secretary of State September 18, 2002.]

WHEREAS, The Mexican Supreme Court ruled in October 2001 that Mexico will not extradite criminals who face life sentences in the United States; and

WHEREAS, The United States Constitution prohibits states from entering into treaties with foreign governments to protect their citizens and arrange extradition for criminals; and

WHEREAS, The person or persons responsible for the April 29, 2002, murder of Los Angeles County Sheriff Deputy David March is believed to have fled to Mexico to avoid prosecution; and

WHEREAS, California and other states must rely upon the federal government to resolve this issue of national importance; and

WHEREAS, The Attorney General from each of the 50 states has asked United States Attorney General John Ashcroft and United States Secretary of State Colin Powell to address this extradition issue with their counterparts in Mexico; now, therefore, be it

*Resolved, by the Assembly and Senate of the State of California, jointly,* That the extradition from Mexico of all criminals who face life sentences is a matter of urgent and enduring importance to the State of California; and be it further

*Resolved,* That California's Senators and Members of the House of Representatives should take all prudent and necessary steps to ensure that this matter is addressed at the highest levels of our federal government; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President of the United States, the United States Attorney General, the United States Secretary of State, and to each member of the Congress of the United States.

---

---

---

**2001 – 02**

**SECOND EXTRAORDINARY SESSION**

---

---

## **EXTRAORDINARY SESSION SPECIAL RULES OF EFFECTIVENESS**

Except for a statute calling an election, a statute providing for a tax levy or an appropriation calling for the usual current expenses of the state, and an urgency statute, all of which take effect immediately following enactment, a statute adopted during an extraordinary session takes effect on the 91st day following the adjournment of the special session (see subdivision (c) of Section 8 of Article IV of the California Constitution). The effective date of a joint resolution is the date it is filed with the Secretary of State.

The 2001–02 Second Extraordinary Session reconvened on January 7, 2002, and adjourned *sine die* on May 9, 2002. The 91st day after adjournment is August 8, 2002. Please refer to the preceding year's Statutes and Amendments to the Codes for statutes enacted prior to the reconvening date.

EXECUTIVE DEPARTMENT  
STATE OF CALIFORNIA

PROCLAMATION  
by the  
Governor of the State of California

**WHEREAS**, an extraordinary occasion has arisen and now exists requiring that the Legislature of the State of California be convened in extraordinary session; and

**WHEREAS**, on January 3, 2001, I convened the 2001-02 First Extraordinary Session of the Legislature to deal with a broad range of energy issues, including the availability and supply of electrical power and natural gas; and

**WHEREAS**, it is necessary for the Legislature to adjourn the First Extraordinary Session; and

**WHEREAS**, it is necessary to reconvene the Legislature in extraordinary session to continue deliberations on critical energy issues;

**NOW, THEREFORE, I, GRAY DAVIS**, Governor of the State of California, by virtue of the power and authority vested in me by Article IV, Section 3(b) of the Constitution of the State of California, do hereby convene the Legislature of the State of California to meet in extraordinary session at Sacramento, California, on the 14<sup>th</sup> day of May, 2001, at a time appointed by each house of the Legislature of said day for the following purpose and to legislate upon the following subjects:

1. To consider and act upon legislation affecting the availability, supply, consumption, and use of energy in California.
2. To consider and act upon legislation (a) affecting the operation, maintenance, and finances of facilities owned or controlled directly or indirectly by persons, corporations or public entities that provide electricity and natural gas to California residents and businesses, and (b) relating to the assets, liabilities, and financial viability of investor-owned utilities.
3. To consider and act upon legislation affecting the interaction between wholesale and retail markets for energy supply, capacity and reliability.
4. To consider and act upon legislation relating to the roles, functions, and duties of state energy agencies.
5. To consider and act upon legislation protecting the health and safety of California residents with respect to facilities that generate and deliver energy service in California.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Great Seal of the State of California to be affixed this 14<sup>th</sup> day of May 2001.

CHAPTER 19

An act to amend Section 362 of, to add Section 761.3 to, and to repeal Section 342, as added by Chapter 16 of the Statutes of 2001, Second Extraordinary Session, of, the Public Utilities Code, relating to public utilities.

[Approved by Governor April 25, 2002. Filed with  
Secretary of State April 26, 2002.]

*The people of the State of California do enact as follows:*

SECTION 1. The Legislature finds and declares all of the following:

(a) Electric generating facilities and powerplants in California are essential facilities for maintaining and protecting the public health and safety of California residents and businesses.

(b) It is in the public interest to ensure that electric generating facilities and powerplants located in California are effectively and appropriately maintained and efficiently operated.

(c) Owners and operators of electric generating facilities and powerplants provide a critical and essential good to California residents. It is in the public interest that the Public Utilities Commission seek enforcement capability from the Federal Energy Regulatory Commission regarding the private generator agreement to provide for broader state control of operational activities of generation facilities in the state.

(d) To protect the public health and safety and to ensure electrical service reliability and adequacy, the Public Utilities Commission and the Independent System Operator shall work collaboratively to develop clearly articulated, uniform operating practices and procedures. The commission shall enforce compliance with those practices and procedures.

SEC. 2. Section 342 of the Public Utilities Code, as added by Section 3 of Chapter 16 of the Statutes of 2001, Second Extraordinary Session, is repealed.

SEC. 3. Section 362 of the Public Utilities Code is amended to read:

362. (a) In proceedings pursuant to Section 455.5, 851, or 854, the commission shall ensure that facilities needed to maintain the reliability of the electric supply remain available and operational, consistent with maintaining open competition and avoiding an overconcentration of market power. In order to determine whether the facility needs to remain available and operational, the commission shall utilize standards that are no less stringent than the Western Systems Coordinating Council and North American Electric Reliability Council standards for planning reserve criteria.

(b) The commission shall require that generation facilities located in the state that have been disposed of in proceedings pursuant to Section 851, are operated by the persons or corporations who own or control them in a manner that ensures their availability to maintain the reliability of the electric supply system.

SEC. 4. Section 761.3 is added to the Public Utilities Code, to read:

761.3. (a) Notwithstanding subdivision (g) of Section 216 and subdivisions (c) and (d) of Section 228.5, the commission shall implement and enforce standards adopted pursuant to subdivision (b) for the maintenance and operation of facilities for the generation of electric energy owned by an electrical corporation or located in the state to ensure their reliable operation. The commission shall enforce the protocols for the scheduling of powerplant outages of the Independent System Operator.

(b) (1) The commission and the Independent System Operator shall jointly establish the California Electricity Generation Facilities Standards Committee. The committee shall consist of three members, one a member of the commission appointed by the commission, one a member of the Independent System Operator board appointed by that board, and one individual with expertise regarding electric generation facilities and jointly appointed by the commission and the Independent System Operator board. The committee, within 90 days of the effective date of this section and after providing notice and opportunity for public comment, shall adopt, and may thereafter revise, standards for the maintenance and operation of facilities for the generation of electric energy located in the state. The standards shall be consistent with subdivision (d) of this section.

(2) The committee shall be supported by a reasonable amount of staff time, which shall be provided proportionally by the agencies represented on the committee.

(3) This subdivision shall be operative only until January 1, 2005.

(c) Nothing in this section authorizes the commission to establish rates for wholesale sales in interstate commerce from those facilities, or to approve the sale or transfer of control of facilities that have been certified as exempt wholesale generators by the Federal Energy Regulatory Commission pursuant to Section 79z-5a(1) of Title 15 of the United States Code.

(d) (1) (A) Except as otherwise provided in this subdivision, this section shall not apply to nuclear powered generating facilities that are federally regulated and subject to standards developed by the Nuclear Regulatory Commission, and that participate as members of the Institute of Nuclear Power Operations.

(B) The owner or operator of a nuclear powered generating facility shall file with the Oversight Board and the commission an annual

schedule of maintenance, including repairs and upgrades, updated quarterly, for each generating facility. The owner or operator of a nuclear powered generating facility shall make good faith efforts to conduct its maintenance in compliance with its filed plan and shall report to the Oversight Board and the Independent System Operator any significant variations from its filed plan.

(C) The owner or operator of a nuclear powered generating facility shall report on a monthly basis to the Oversight Board and the commission all actual planned and unplanned outages of each facility during the preceding month. The owner or operator of a nuclear powered generating facility shall report on a daily basis to the Oversight Board and the Independent System Operator the daily operational status and availability of each facility.

(2) (A) Except as otherwise provided in this subdivision, this section shall not apply to a qualifying small power production facility or a qualifying cogeneration facility within the meaning of Sections 201 and 210 of Title 11 of the federal Public Utility Regulatory Policies Act of 1978 (16 U.S.C. Secs. 796(17), 796(18), and 824a-3), and the regulations adopted pursuant to those sections by the Federal Energy Regulatory Commission (18 C.F.R. Secs. 292.101 to 292.602, inclusive), nor shall this section apply to other generation units installed, operated, and maintained at a customer site, exclusively to serve that customer's load.

(B) An electrical corporation that has a contract with a qualifying small power production facility, or a qualifying cogeneration facility, with a name plate rating of 10 megawatts or greater, shall report to the Oversight Board and the commission maintenance schedules for each facility, including all actual planned and unplanned outages of the facility and the daily operational status and availability of the facility. Each facility with a name plate rating of ten megawatts or greater shall be responsible for directly reporting to the Oversight Board and the Independent System Operator maintenance schedules for each facility, including all actual planned and unplanned outages of the facility and the daily operational status and availability of the facility, if that information is not provided to the electrical corporation pursuant to a contract.

(e) In developing the standards pursuant to subdivision (b), the committee shall take into consideration generation facilities scheduled for retirement, valid warranties on generation facilities, and the operational authority of the Independent System Operator as prescribed in the standard Participating Generator Agreement and applicable sections of the Federal Energy Regulatory Commission's approved Independent System Operator tariff.

(f) Nothing in this section shall result in the modification, delay, or abrogation of any deadline, standard, rule, or regulation adopted by a

federal, state, or local agency for the purposes of protecting public health or the environment, including, but not limited to, any requirements imposed by the State Air Resources Board or by an air pollution control district or an air quality management district pursuant to Division 26 (commencing with Section 39000) of the Health and Safety Code. The Independent System Operator shall consult with the State Air Resources Board and the appropriate local air pollution control districts and air quality management districts to coordinate scheduled outages to provide for compliance with those retrofits.

(g) The Independent System Operator shall maintain records of generation facility outages and shall provide those records to the Oversight Board and the commission on a daily basis. Each entity that owns or operates an electric generating unit in California with a rated maximum capacity of 10 megawatts or greater, shall provide a monthly report to the Independent System Operator that identifies any periods during the preceding month when the unit was unavailable to produce electricity or was available only at reduced capacity. The report shall identify the reasons for any such unscheduled unavailability or reduced capacity. The Independent System Operator shall immediately transmit the information to the Oversight Board and the commission.

(h) This section does not apply to any of the following:

(1) Facilities owned by a local publicly owned electric utility as defined in subdivision (d) of Section 9604.

(2) Any public agency that may generate electricity incidental to the provision of water or wastewater treatment.

(3) Facilities owned by a city and county operating as a public utility, furnishing electric service as provided in Section 10001.

SEC. 5. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the only costs that may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, eliminates a crime or infraction, or changes the penalty for a crime or infraction, within the meaning of Section 17556 of the Government Code, or changes the definition of a crime within the meaning of Section 6 of Article XIII B of the California Constitution.

SEC. 6. This act shall become operative only if Assembly Bill 28 of the 2001–02 Second Extraordinary Session is enacted and becomes effective.

RESOLUTION CHAPTER 2

Senate Concurrent Resolution No. 3—Relative to final adjournment of the 2001-02 Second Extraordinary Session of the Legislature.

[Filed with Secretary of State May 10, 2002.]

*Resolved by the Senate of the State of California, the Assembly thereof concurring, That the 2001-02 Second Extraordinary Session of the Legislature shall adjourn sine die at midnight on May 9, 2002.*

---

## **EXTRAORDINARY SESSION SPECIAL RULES OF EFFECTIVENESS**

Except for a statute calling an election, a statute providing for a tax levy or an appropriation calling for the usual current expenses of the state, and an urgency statute, all of which take effect immediately following enactment, a statute adopted during an extraordinary session takes effect on the 91st day following the adjournment of the special session (see subdivision (c) of Section 8 of Article IV of the California Constitution). The effective date of a joint resolution is the date it is filed with the Secretary of State.

The 2001–02 Third Extraordinary Session convened on January 10, 2002, and adjourned *sine die* on May 2, 2002. The 91st day after adjournment is August 1, 2002.

EXECUTIVE DEPARTMENT  
STATE OF CALIFORNIA

**A PROCLAMATION**  
**By the**  
**Governor of the State of California**

**WHEREAS**, an extraordinary occasion has arisen and now exists requiring that the Legislature of the State of California be convened in extraordinary session; and

**WHEREAS**, the California economy, already slowing prior to the terrorist attacks of September 11<sup>th</sup>, is in a recession along with the rest of the nation that will continue through at least the first half of 2002; and,

**WHEREAS**, California has suffered significant job losses totaling 64,300, or 11.2 percent of national job losses, since September 11<sup>th</sup> due to continued weakening of the economy and the effects of the terrorist attacks on the air transportation, lodging, and restaurant industries; and

**WHEREAS**, as a result, California is facing the steepest revenue decline in more than half a century, which necessitates prompt action to reduce current-year General Fund spending in addition to the hiring freeze and operating expense and equipment expenditure reductions already ordered pursuant to Governor's Executive Orders D-48-01 and D-49-01; and,

**WHEREAS**, the Legislative Analyst's Office and the Department of Finance are projecting a budget shortfall exceeding \$12 billion over the 2001-02 and 2002-03 fiscal years; and,

**WHEREAS**, it is necessary to convene the Legislature in extraordinary session to deliberate on critical budget issues;

**NOW, THEREFORE, I GRAY DAVIS**, Governor of the State of California, by virtue of the power and authority vested in me by Article IV, Section 3(b) of the Constitution of the State of California, do hereby convene the Legislature of the State of California to meet in extraordinary session at Sacramento, California, on the 10<sup>th</sup> day of January, 2002, at a time appointed by each house of the Legislature of said day to consider and act upon legislation to do the following:

1. Enact current-year General Fund spending reductions as specified in the November 2001 "Proposed Reduction in 2001-02 Spending".
2. Enact further General Fund spending reductions identified for 2001-02.
3. Make recently enacted unemployment benefit increases retroactive to September 11, 2001, accelerate the delivery of certain capital outlay projects to stimulate the creation of jobs by shifting the financing for these projects to lease revenue bonds, and authorize general obligation bonds for critically needed infrastructure.

**IN WITNESS WHEREOF**, I have hereunto set my hand and caused the Great Seal of the State of California to be affixed this eighth day of January 2002.

CHAPTER 1

An act to amend Items 0540-101-0001, 1111-011-0582, 2240-115-3006, 3900-001-001, 3960-011-1003, 5180-153-0001, 6110-102-0001, 6110-123-0001, 6110-184-0001, 6110-191-0001, 6110-193-0001, 6110-195-0001, 6110-196-0001, 6110-200-0001, 6110-232-0001, 6110-485, 6110-495, 6870-485, and 9670-015-0942 of Section 2.00 of, to add Items 0505-495, 0552-495, 0690-495, 0971-495, 2240-115-0929, 2240-495, 2660-302-0042, 2660-497, 2920-495, 2920-011-8100, 3125-495, 3340-495, 3360-496, 3480-495, 3600-495, 3790-495, 3860-011-0942, 3860-495, 3900-496, 4120-495, 4170-495, 4200-495, 4260-495, 4280-495, 4440-495, 4700-495, 5175-495, 5180-495, 5240-496, 5460-497, 6110-496, 6440-496, 6610-496, 8100-495, 8260-495, 8350-495, 8660-116-0470, 8660-495, 8940-495, 9908-495, 9909-495, 9911-495, and 9914-495 to, and to repeal Items 6110-133-0001, 6110-134-001, and 6110-210-0001 of, Section 2.00 of the Budget Act of 2001 (Chapter 106 of the Statutes of 2001), and to add Sections 3.20, 3.30, 3.40, and 3.70 to the Budget Act of 2001, relating to the support of state government, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor February 2, 2002. Filed with  
Secretary of State February 4, 2002.]

*The people of the State of California do enact as follows:*

SECTION 1. The reversions and transfers added by this act are in addition to the appropriations made in Section 2.00 of the Budget Act of 2001 (Ch. 106, Stats. 2001) and are subject to the provisions of that act, as appropriate, including, as applicable, the provisions of that act that apply to the items of appropriation that are amended by this act. Unless otherwise specified, the references in this act to item numbers refer to items of appropriation in Section 2.00 of the Budget Act of 2001 (Ch. 106, Stats. 2001).

SEC. 2. Item 0505-495 is added to Section 2.00 of the Budget Act of 2001, to read:

0505-495—Reversion, Department of Information Technology. Notwithstanding any other provision of law, the sum of \$684,000 from the appropriation provided in Schedule (1) of Item 0505–001–0001, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 3. Item 0540-101-0001 of Section 2.00 of the Budget Act of 2001 is amended to read:

0540-101-0001—For local assistance, Secretary for

Resources . . . . .	7,147,000
Schedule:	
(1) Grants . . . . .	3,147,000
(2) Los Angeles River . . . . .	1,000,000
(4) San Joaquin River Parkway . . . . .	3,000,000

Provisions:

1. The amount appropriated in Schedule 1 of this item \$3,147,000 shall be for the Coastal County and City Offshore Energy Assistance Program as required by Chapter 977 of the Statutes of 1996.
2. The funds received by other state agencies from Schedule (2) and (4) of this item are exempt from the reporting requirements of Section 28.50 of the Budget Act.
3. The funds appropriated in Schedule (2) and (4) of this item are available for encumbrance for state operations, capital outlay or local assistance through fiscal year 2002–03.
4. The funds appropriated in Schedule (2) and (4) of this item shall be expended as follows: Los Angeles River: \$1 million for either the acquisition of Wrigley Heights in the City of Long Beach or for the Cornfields property at Chinatown in the City of Los Angeles; San Joaquin River Parkway: \$3 million for the Spano Ranch acquisition in the Counties of Fresno and Madera.

SEC. 4. Item 0552-495 is added to Section 2.00 of the Budget Act of 2001, to read:

0552-495—Reversion, Office of the Inspector General. Notwithstanding any other provision of law, the sum of \$55,000 from the appropriation provided in Item 0552–001–0001, Budget Act of 2001 (Ch. 106, Stats. 2001) shall revert to the General Fund.

SEC. 5. Item 0690-495 is added to Section 2.00 of the Budget Act of 2001, to read:

0690-495—Reversion, Office of Emergency Services. Notwithstanding any other provision of law, the sum of \$1,000,000 from the appropriation provided in Schedule (2) of Item 0690-001-0001, Budget Act of 2001 (Ch. 106, Stats. 2001) shall revert to the General Fund.

SEC. 6. Item 0971-495 is added to Section 2.00 of the Budget Act of 2001, to read:

0971-495—Reversion, California Alternative Energy and Advanced Transportation Financing Authority. Up to \$24,900,000 of the unencumbered balance from the \$25,000,000 appropriation provided by Section 14 of Chapter 8 of the Statutes of 2001, First Extraordinary Session shall revert to the General Fund upon order of the Director of Finance.

SEC. 7. Item 1111-011-0582 of Section 2.00 of the Budget Act of 2001 is amended to read:

1111-011-0582—For transfer by the Controller from the High Polluter Repair or Removal Account to the General Fund . . . . . (94,000,000)

Provisions:

- 1. The funds transferred in this item represent funds that remained in the High Polluter Repair or Removal Account (HPRRA) because the Smog Impact Fee Refunds were paid by the General Fund, rather than the HPRRA.

SEC. 8. Item 2240-115-0929 is added to Section 2.00 of the Budget Act of 2001, to read:

2240-115-0929—For transfer, upon order of the Director of Finance, from the Housing Rehabilitation Loan Fund to the General Fund . . . . . (49,200,000)

SEC. 9. Item 2240-115-3006 of Section 2.00 of the Budget Act of 2001 is amended to read:

2240-115-3006—For transfer, upon order of the Director of Finance, from the Jobs-Housing Balance Improvement Account to the General Fund . . . . . (99,682,000)

SEC. 10. Item 2240-495 is added to Section 2.00 of the Budget Act of 2001, to read:

2240-495—Reversion, Department of Housing and Community Development. Notwithstanding any other provision of law, a total of \$59,682,000 from the appropriations provided in the following citations shall revert to the balance in the fund from which the appropriation was made.

3006—Jobs—Housing Balance Improvement Account

- (1) \$106,000 from Item 2240-001-3006, Budget Act of 2001 (Ch. 106, Stats. 2001)
- (2) \$59,576,000 from Item 2240-114-3006, Budget Act of 2001 (Ch. 106, Stats. 2001)

SEC. 11. Item 2660-302-0042 is added to Section 2.00 of the Budget Act of 2001, to read:

2660-302-0042 —For capital outlay, Department of Transportation, payable from funds deposited in the State Highway Account, State Transportation Fund that are not subject to Article XIX of the California Constitution

	20,000,000
Schedule:	
(1) 30—Mass Transportation . . . . .	20,000,000
(a) San Joaquin Corridor:	
Signals and Double Track . . . . .	(20,000,000)

SEC. 12. Item 2660-497 is added to Section 2.00 of the Budget Act of 2001, to read:

2660-497—Reversion, Department of Transportation. Notwithstanding any other provision of law, \$20,000,000 from the appropriation provided in Schedule (a) (2) San Joaquin Corridor: Signals and Double Track in Item 2660-301-0001, Budget Act of 2000 (Ch. 52, Stats. 2000), shall revert to the General Fund.

SEC. 13. Item 2920-495 is added to Section 2.00 of the Budget Act of 2001, to read:

2920-495—Reversion, Technology, Trade, and Commerce Agency. Notwithstanding any other provision of law, a total of \$457,000 from the appropriations provided in the following citations shall revert to the General Fund:  
0001—General Fund

- (1) \$457,000 from Item 2920-012-0001, Budget Act of 2001 (Ch. 106, Stats. 2001), as follows:
  - (a) \$297,000 from Schedule (2)(e) 20.60.005 India
  - (b) \$160,000 from Schedule (2)(c) 20.60.003 Philippines

SEC. 14. Item 2920-011-8100 is added to Section 2.00 of the Budget Act of 2001, to read:

2920-011-8100—For transfer by the Controller, upon order of the Director of Finance, from the Renewable Energy Loan Loss Reserve Fund to the General Fund . . . . . (\$29,938,000)

SEC. 15. Item 3125-495 is added to Section 2.00 of the Budget Act of 2001, to read:

3125-495—Reversion, California Tahoe Conservancy. Notwithstanding any other provision of law, a total of \$4,800,000 from the appropriations provided in the following citations shall revert to the General Fund:  
0001—General Fund

- (1) \$3,087,000 from Schedule (1) 50.30.002—Land acquisition and site improvements—Public access and recreation pursuant to Title 7.42 (commencing with Section 66905) of the Government Code appropriated in Item 3125-301-0001, Budget Act of 2001 (Ch. 106, Stats. 2001).

- (2) \$858,000 from Schedule (3) 50.30.004—Land acquisition and site improvements—Stream environment zones and watershed restorations pursuant to Title 7.42 (commencing with Section 66905) of the Government Code appropriated in Item 3125–301–0001, Budget Act of 2001 (Ch. 106, Stats. 2001).
- (3) \$855,000 from Schedule (4) 50.30.005—Land acquisition pursuant to Section 66907 of the Government Code appropriated in Item 3125–301–0001, Budget Act of 2001 (Ch. 106, Stats. 2001).

SEC. 16. Item 3340-495 is added to Section 2.00 of the Budget Act of 2001, to read:

3340-495—Reversion, California Conservation Corps. Notwithstanding any other provision of law, a total of \$3,200,000 from the appropriation provided in Chapter 8 of the Statutes of 2001, First Extraordinary Session, for the PowerWalk project shall revert to the General Fund.

SEC. 17. Item 3360-496 is added to Section 2.00 of the Budget Act of 2001, to read:

3360-496—Reversion, Energy Resources Conservation and Development Commission. Notwithstanding any other provision of law, a total of \$48,700,000 from the appropriations in the following citations shall revert to the General Fund.

0001—General Fund

- (1) \$2,200,000 from Item 3360–001–0001, Budget Act of 2001 (Ch. 106, Stats. 2001)
- (2) \$43,500,000 from Section 5 of Chapter 7 of the Statutes of 2001, First Extraordinary Session, as amended by Section 57 of Chapter 111 of the Statutes of 2001, consisting unencumbered funds and unliquidated encumbered balances that have not been committed to specific projects.
- (3) \$3,000,000 from Section 13 of Chapter 12 of the Statutes of 2001, First Extraordinary Session

SEC. 18. Item 3480-495 is added to Section 2.00 of the Budget Act of 2001, to read:

3480-495—Reversion, Department of Conservation. Notwithstanding any other provision of law, a total of \$4,488,000 from the appropriations provided in the following citations shall revert to the General Fund:

0001—General Fund

- (1) \$1,496,000 from Item 3480-101-0001, Budget Act of 2001 (Ch. 106, Stats. 2001).
- (2) \$1,496,000 from Item 3480-101-0001, Budget Act of 2000 (Ch. 52, Stats. 2000).
- (3) \$1,496,000 from Item 3480-101-0001, Budget Act of 1999 (Ch. 50, Stats. 1999).

SEC. 19. Item 3600-495 is added to Section 2.00 of the Budget Act of 2001, to read:

3600-495—Reversion, Department of Fish and Game. Notwithstanding any other provision of law, a sum of \$320,000 from the appropriation provided Schedule (1) 20-Biodiversity Conservation Program in Item 3600-001-0001, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 20. Item 3790-495 is added to Section 2.00 of the Budget Act of 2001, to read:

3790-495—Reversion, Department of Parks and Recreation. Notwithstanding any other provision of law, a total of \$38,598,045 from the appropriations provided in the following citations shall revert to the General Fund:

0001—General Fund

- (1) \$580,000 from the amount transferred to State Operations from the appropriation in Item 3790-101-0001, Budget Act of 2000, pursuant to Provision 1 of Item 3790-001-0392, Budget Act of 2000 (Ch. 52, Stats. 2000).

- (2) \$31,221,545 from Schedule (a) 80.25 Recreational Grants appropriated in Item 3790-101-0001, Budget Act of 2000 (Ch. 52, Stats. 2000).
- (3) \$6,796,500 from Schedule (a) 80.25 Recreational Grants appropriated in Item 3790-101-0001, Budget Act of 1999 (Ch. 50, Stats. 1999).

SEC. 21. Item 3860-011-0942 is added to Section 2.00 of the Budget Act of 2001, to read:

3860-011-0942—For transfer by the Controller from the Trust Account for Energy Performance Awards in the Special Deposit Fund to the General Fund . . . . . (17,716,000)

SEC. 22. Item 3860-495 is added to Section 2.00 of the Budget Act of 2001, to read:

3860-495—Reversion, Department of Water Resources. Notwithstanding any other provision of law, a total of \$19,680,000 from the appropriations provided in the following citations shall revert to the General Fund:  
0001—General Fund

- (1) A total of \$11,544,000 from Item 3860-001-0001, Budget Act of 2001 (Ch. 106, Stats. 2001) as follows:
  - (a) \$2,200,000 from Schedule (1) 10-Continuing Formulation of the California Water Plan
  - (b) \$9,344,000 from Schedule (2) 15-CalFed Bay Delta Program
- (2) \$8,136,000 from Schedule (2) 30.20.020-Delta Levee Subventions appropriated in Item 3860-101-0001, Budget Act of 2001 (Ch. 106, Stats. 2001).

SEC. 22.3. Item 3900-001-0001 of Section 2.00 of the Budget Act of 2001 is amended to read:

3900-001-0001—For support of State Air Resources Board, for payment to Item 3900-001-0044 . . . . . \$66,087,000  
Provisions:

1. It is the intent of the Legislature that the State Air Resources Board consider the eligibility of manufacturers and consumers of low-speed vehicles or Neighborhood Electric Vehicles, or both, in the administration of any grant programs, loan programs, or rebate programs, as an incentive to manufacturers or consumers, or both, of zero emission vehicles, in recognition of those vehicles' contribution to achieving compliance with the zero emission vehicle mandate.
2. It is the intent of the Legislature that \$37.1 million from this item be allocated pursuant to Item 3900-001-0044, Provision 3.

SEC. 22.5. Item 3900-496 is added to Section 2.00 of the Budget Act of 2001, to read:

3900-496—Reversion, Air Resources Board. Notwithstanding any other provision of law, a total of \$23,000,000 provided in Item 3900-001-0383, Budget Act of 2001 (Ch. 106, Stats. 2001) shall revert to the Natural Resources Infrastructure Fund.

3960-011-1003—For transfer by the Controller from the Cleanup Loans and Environmental Assistance to Neighborhoods Account to the General Fund . . . . . (77,000,000)  
Provisions:

1. Of the funds transferred to the Cleanup Loans and Environmental Assistance to Neighborhoods Account pursuant to Item 3960-011-0001 of the Budget Act of 2000, \$77,000,000 shall be transferred to the General Fund.

SEC. 24. Item 4120-495 is added to Section 2.00 of the Budget Act of 2001, to read:

4120-495—Reversion, Emergency Medical Services Authority. Notwithstanding any other provision of law, the sum of \$2,500,000 from the appropriation provided in Item 4120-101-0001, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 25. Item 4170-495 is added to Section 2.00 of the Budget Act of 2001, to read:

4170-495—Reversion, Department of Aging. Notwithstanding any other provision of law, the sum of \$100,000 from the appropriation provided in Section 3 of Chapter 682 of the Statutes of 2001, shall revert to the General Fund.

SEC. 26. Item 4200-495 is added to Section 2.00 of the Budget Act of 2001, to read:

4200-495—Reversion, Department of Alcohol and Drug Programs. Notwithstanding any other provision of law, the sum of \$10,467,000 from the appropriation provided in Item 4200-103-0001, Budget Act of 2000 (Ch. 52, Stats. 2000), as reappropriated by Item 4200-490, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 27. Item 4260-495 is added to Section 2.00 of the Budget Act of 2001, to read:

4260-495—Reversion, Department of Health Services. Notwithstanding any other provision of law, the sum of \$2,530,000 of the appropriations provided in the following citations shall revert to the General Fund.

0001—General Fund

(1) \$530,000 from Schedule (1) 10—Public and Environmental Health appropriated in Item 4260-001-0001, Budget Act of 2001 (Ch. 106, Stats. of 2001).

(2) \$2,000,000 from Schedule (2)—Health Care Services appropriated in Item 4260-001-0001, Budget Act of 2001 (Ch. 106, Stats. 2001).

SEC. 28. Item 4280-495 is added to Section 2.00 of the Budget Act of 2001, to read:

4280-495—Reversion, Managed Risk Medical Insurance Board. Notwithstanding any other provision of law, the sum of \$54,300,000 from the appropriation provided in Schedule (1) 40—Healthy Families Program, in Item 4280-101-3020, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the Tobacco Settlement Fund.

SEC. 29. Item 4440-495 is added to Section 2.00 of the Budget Act of 2001, to read:

4440–495—Reversion, Department of Mental Health. Notwithstanding any other provision of law, the sum of \$400,000 from the appropriation provided in Item 4440–101–0001, Budget Act of 2001 (Ch. 106, Stats. 2001), and the sum of \$2,889,000 from the deficiency authority provided in Item 4440–011–0001, shall revert to the General Fund.

SEC. 30. Item 4700-495 is added to Section 2.00 of the Budget Act of 2001, to read:

4700–495—Reversion, Department of Community Services and Development. Notwithstanding any other provision of law, the sum of \$25,357,743 from the appropriations provided in the following citations shall revert to the General Fund:

0001—General Fund

- (1) \$1,611,000 from Schedule (2) 47–Naturalization Services appropriated in Item 4700–101–0001, Budget Act of 2001 (Ch. 106, Stats. 2001).
- (2) \$23,746,743 from Section 5 of Chapter 7 of the Statutes of 2001, First Extraordinary Session, as amended by Section 57 of Chapter 111, Statutes of 2001. The balance of unencumbered funds available in this measure, \$30,000,000, shall be used for cash or crisis payments to households.

SEC. 31. Item 5175-495 is added to Section 2.00 of the Budget Act of 2001, to read:

5175-495—Reversion, Department of Child Support Services. Notwithstanding any other provision of law, the sum of \$40,500,000 from the appropriations provided in the following citations shall revert to the General Fund:  
0001—General Fund

- (1) \$30,500,000 from Schedule (a)(2) 10.02—Child Support Incentives appropriated in Item 5175-101-0001, Budget Act of 2000 (Ch. 52, Stats. 2000).
- (2) \$10,000,000 from Schedule (1)(b) 10.02—Child Support Incentives appropriated in Item 5175-101-0001, Budget Act of 2001 (Ch. 106, Stats. 2001).

SEC. 32. Item 5180-153-0001 of Section 2.00 of the Budget Act of 2001 is amended to read:

5180-153-0001—For transfer by the State Controller, upon notification by the Department of Social Services, to the Transitional Housing for Foster Youth Fund . . . . . 5,200,000

SEC. 33. Item 5180-495 is added to Section 2.00 of the Budget Act of 2001, to read:

5180-495—Reversion, Department of Social Services. Notwithstanding any other provision of law, the sum of \$42,782,000 from the appropriations provided in the following citations shall revert to the General Fund:  
0001—General Fund

- (1) \$7,444,000 from Schedule (b)(2) 25.15.020— Administration in Item 5180-111-0001, Budget Act of 2000 (Ch. 52, Stats. 2000).
- (2) \$20,175,000 from Schedule (a)(1) 25.25.010— Child Welfare Services in Item 5180-151-0001, Budget Act of 2000 (Ch. 52, Stats. 2000).
- (3) \$3,830,000 from Schedule (a)(2) 25.25.020— Adoptions in Item 5180-151-0001, Budget Act of 2000 (Ch. 52, Stats. 2000).
- (4) \$5,000,000 from Schedule (2) 16.40—Foster Care in Item 5180-101-0001, Budget Act of 2001 (Ch. 106, Stats. 2001).

- (5) \$964,000 from Schedule (1) (a) 25.25.010—Child Welfare Services in Item 5180-151-0001, Budget Act of 2001 (Ch. 106, Stats. 2001). The State Department of Social Services shall address training needs that arise during the remainder of the 2001-02 fiscal year with state funds that maximize the receipt of federal matching funds.
- (6) \$369,000 from Schedule (2) (b) 25.15.020 in Item 5180-111-0001, Budget Act of 2001 (Ch. 106, Stats. 2001).
- (7) \$5,000,000 from Schedule (2) (a) 25.15.010 in Item 5180-111-0001, Budget Act of 2001 (Ch. 106, Stats. 2001).

SEC. 34. Item 5240-496 is added to Section 2.00 of the Budget Act of 2001, to read:

5240-496—Reversion, Department of Corrections. Notwithstanding any other provision of law, \$1,600,000 of the appropriation provided in Schedule (1) 21-Institution Program in Item 5240-001-0001, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 35. Item 5460-497 is added to Section 2.00 of the Budget Act of 2001, to read:

5460-497—Reversion, Department of the Youth Authority. Notwithstanding any other provision of law, the sum of \$4,547,000 from the appropriation provided in Item 5460-001-0001, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 36. Item 6110-102-0001 of Section 2.00 of the Budget Act of 2001 is amended to read:

6110-102-0001—For local assistance, Department of Education (Proposition 98), for transfer to Section A of the State School Fund . . . . . 5,000,000

Provisions:

- 1. The funds appropriated in this item shall be used to provide grants to charter schools that are located in low-income areas for the purposes of leasing

facilities, contingent upon legislation to be enacted prior to January 1, 2002. The funds appropriated are intended to be offset by reductions to charter school funding as specified in the legislation, including, but not limited to, provisions pursuant to Article 2 (commencing with Section 47633) of Chapter 6 of Part 26.8 of Division 4 of Title 2 of the Education Code or Section 47613.1 of the Education Code.

SEC. 37. Item 6110-123-0001 of Section 2.00 of the Budget Act of 2001, as amended by Chapter 749 of the Statutes of 2001, is amended to read:

6110-123-0001—For local assistance, Department of Education (Proposition 98), for implementation of the Public Schools Accountability Act, pursuant to Chapter 6.1 (commencing with Section 52050) of Part 28 of the Education Code . . . . .	343,270,000
Schedule:	
(1) 20.60.030.031—Immediate Intervention/Underperforming Schools Program . . . . .	160,970,000
(2) 20.60.030.032—High Achieving/Improving Schools Program . . . . .	144,300,000
(3) 20.60.030.034—Low Performing Schools . . . . .	38,000,000

Provisions:

1. Funds appropriated in Schedule (1) are provided solely for the purpose of implementing the Immediate Intervention/Underperforming Schools Program, pursuant to Article 3 of Chapter 6.1 (commencing with Section 52053) of Part 28 of the Education Code. Of this amount, \$21,500,000 is for the purpose of providing planning grants of \$50,000 each to a third cohort of new schools, and the remainder is provided to fully fund implementation grants for the first and second cohorts of schools that received planning grants under the program during the 1999-00 and 2000-01 fiscal years.
2. Funds appropriated in Schedule (2) are provided solely for the purpose of implementing the Governor’s High Achieving/Improving Schools Program, pursuant to Article 4 of Chapter 6.1 (commencing with Section 52056) of Part 28 of the Education Code.

- 3. Of the funds appropriated in Schedule (3) of this item, \$18,000,000 shall be used to provide planning grants to schools in the first decile of the Academic Performance Index established pursuant to Section 52052 of the Education Code. First priority for funding shall be given to schools that have applied for participation in the High Priority Schools Grant Program for Low Performing Schools, established by Section 52055.600 of the Education Code, and commit to apply by May 15, 2002, for participation in the federal Comprehensive School Reform Demonstration Program (P.L. 105–78). The amount of funding to be allocated for planning grants for each schoolsite shall not exceed \$50,000.
- 4. Of the funds appropriated in Schedule (3) of this item, \$20,000,000 shall be used to provide planning grants to schools in the second decile of the Academic Performance Index established pursuant to Section 52052 of the Education Code. First priority for funding shall be given to schools that apply for participation in the High Priority Schools Grant Program for Low Performing Schools established by Section 52055.600 of the Education Code, and commit to apply for participation in the federal Comprehensive School Reform Demonstration Program (P.L. 105–78). Notwithstanding Section 2.00 of the Budget Act of 2001, these funds shall be available through June 30, 2003.

SEC. 38. Item 6110-133-0001 of Section 2.00 of the Budget Act of 2001 is repealed.

SEC. 39. Item 6110-134-0001 of Section 2.00 of the Budget Act of 2001 is repealed.

SEC. 40. Item 6110-184-0001 of Section 2.00 of the Budget Act of 2001 is amended to read:

6110–184–0001—For local assistance, Department of Education (Proposition 98), Program 20.10.025—Educational Technology Digital High School Program established pursuant to Article 4 (commencing with Section 52250) of Chapter 8.5 of Part 28 of the Education Code ..... 61,000,000

Provisions:

- 1. Notwithstanding the provisions of subdivision (e) of Section 52254 of the Education Code, funds may be allocated to a county office or offices to provide

statewide support and assistance as required by statute, upon approval of the Department of Finance.

SEC. 41. Item 6110-191-0001 of Section 2.00 of the Budget Act of 2001 is amended to read:

6110-191-0001—For local assistance, Department of Education (Proposition 98), for transfer to Section A of the State School Fund, Program 20.60.050.002—Beginning Teacher Support and Assessment System . . . . . Provisions:	84,640,000
--	------------

1. The funds appropriated in this item are for direct disbursement by the State Department of Education for the Beginning Teacher Support and Assessment System, as set forth in Article 4.5 (commencing with Section 44279.1) of Chapter 2 of Part 25 of the Education Code. These funds shall be expended only after development of a program and expenditure plan by the State Department of Education, and approval of the plan by the Department of Finance.
2. Funds appropriated in this item are for the purpose of providing grants to support 24,274 teachers through local Beginning Teacher Support and Assessment System Programs.
3. Of the funds appropriated in this item, \$2,997,500 is provided for cost-of-living adjustments (COLAs) at a rate of 3.87 percent, for a total per participant grant level of \$3,375.
4. It is the intent of the Legislature that first-year holders of preliminary teaching credentials, as defined in subdivision (b) of Section 44259 of the Education Code, be afforded first priority for funding appropriated in this item. To the extent that any funds appropriated in this item remain after all first-year holders of preliminary teaching credentials have been served, those funds may be used to serve second-year holders of preliminary teaching credentials. If there are insufficient funds to serve all second-year holders of preliminary teaching credentials, the rate for second-year holders of preliminary teaching credentials shall be prorated.

SEC. 42. Item 6110-193-0001 of Section 2.00 of the Budget Act of 2001 is amended to read:

6110–193–0001—For local assistance, State Department of Education (Proposition 98), for transfer to Section A of the State School Fund Program 20.60–Staff Development . . . . . 129,464,000

Schedule:

- (1) 20.60.010.001–Administrator Training and Evaluation Program . . . . . 5,109,000
- (2) 20.60.050.004–School Development Plans and Resource Consortia . . . . . 21,622,000
- (3) 20.60.070–Bilingual Teacher Training Program . . . . . 1,740,000
- (5) 20.60.060–Instructional Support: Teacher Peer Review . . . . . 84,168,000
- (6) 20.60.110–Instructional Support: Improving School Effectiveness Reader Services for Blind Teachers . . . . . 325,000
- (7) 20.60.112–Instructional Support: Advanced Placement Teacher Training . . . . . 16,500,000

Provisions:

1. The funds appropriated in this item are for transfer by the Controller to Section A of the State School Fund, for allocation by the Superintendent of Public Instruction to school districts, county offices of education, and other educational agencies for purposes of the Proposition 98 programs funded in this item, in lieu of the amounts otherwise provided for those programs by statute.
2. Notwithstanding any other provision of law, the amount appropriated in Schedule (1) shall be the maximum amount of Proposition 98 funds allocated for the purposes of the administrator training and evaluation program established pursuant to Article 3 (commencing with Section 44681) of Chapter 3.1 of Part 25 of the Education Code. Funds appropriated in Schedule (1) include \$68,000 for the purpose of making adjustments for increases in average daily attendance at a rate of 1.40 percent. If growth funds are insufficient, the State Department of Education may adjust the per-pupil growth rates

- to conform to available funds. Additionally, \$191,000 is for the purpose of providing a cost-of-living adjustment (COLA) at a rate of 3.87 percent.
3. Notwithstanding any other provision of law, the amount appropriated in Schedule (2) shall be the maximum amount allocated for the purposes of the school development plans authorized pursuant to Article 1 (commencing with Section 44670.1) of Chapter 3.1 of Part 25 of the Education Code and the resource agencies or consortiums designated pursuant to Article 2 (commencing with Section 44680) of Chapter 3.1 of Part 25 of the Education Code. Funds appropriated in Schedule (b) include \$287,000 for the purposes of making adjustments for increases in average daily attendance at a rate of 1.40 percent. If growth funds are insufficient, the State Department of Education may adjust the per-pupil growth rates to conform to available funds. Additionally, \$805,000 is for the purpose of providing a cost-of-living adjustment (COLA) at a rate of 3.87 percent.
  4. Notwithstanding any other provision of law, the amount appropriated in Schedule (3) shall be the maximum amount allocated for the purposes of the Bilingual Teacher Training Assistance Program established by Article 4 (commencing with Section 52180) of Chapter 7 of Part 28 of the Education Code. Funds appropriated in Schedule (c) include \$24,000 for the purpose of making adjustments for increases in average daily attendance at a rate of 1.40 percent. If growth funds are insufficient, the State Department of Education may adjust the per-pupil growth rates to conform to available funds. Additionally, \$65,000 is for the purpose of providing a cost-of-living adjustment (COLA) at a rate of 3.87 percent.
  5. Notwithstanding Sections 44505 and 44506 of the Education Code, the Superintendent of Public Instruction shall reduce the rate of apportionment provided to school districts for the Peer Assistance and Review Program proportional to the amount of funding provided under Schedule (5).
  6. The funds appropriated in Schedule (5) shall be allocated in accordance with Article 4.5 (commencing with Section 44500) of Part 25 of the Education Code. Funds appropriated in Schedule (5) include \$1,917,000 for the purpose of making

adjustments for increases in average daily attendance at a rate of 1.40 percent. If growth funds are insufficient, the State Department of Education may adjust the per-pupil growth rates to conform to available funds. Additionally, \$5,371,000 is for the purpose of providing a cost-of-living adjustment (COLA) at a rate of 3.87 percent.

- 7. Notwithstanding any other provision of law, the amount appropriated in Schedule (6) shall be the maximum amount allocated for the purposes of the Reader Service for Blind Teachers, for transfer to the Reader Employment Fund established by Section 45371 for the purposes of Section 44925 of the Education Code. Funds appropriated in Schedule (6) include \$4,000 for the purposes of making adjustments in average daily attendance at a rate of 1.40 percent. If growth funds are insufficient, the State Department of Education may adjust the per-pupil growth rates to conform to available funds. Additionally, \$12,000 is for the purpose of providing a cost-of-living adjustment (COLA) at a rate of 3.87 percent.
- 8. Notwithstanding any other provision of law, the amount appropriated in Schedule (7) shall be the maximum amount allocated for the purposes of providing Advanced Placement teacher training pursuant to Section 52247 of Chapter 8.3 of Part 28 of the Education Code.

SEC. 43. Item 6110-195-0001 of Section 2.00 of the Budget Act of 2001, is amended to read:

6110–195–0001—For local assistance, Department of Education (Proposition 98), Program 20.60.140—Staff Development: Teacher Improvement, Teacher Incentives National Board Certification . . . . . 10,000,000  
 Provisions:

- 1. Of the funds appropriated in this item, \$5,000,000 is for the purpose of providing incentive grants of \$10,000 to teachers for achieving certification from the National Board for Professional Teaching Standards pursuant to Chapter 2, Article 13 (commencing with Education Code Section 44395).
- 2. Of the funds appropriated in this item, \$5,000,000 is for the purpose of providing incentive grants of \$20,000 to teachers that have achieved certification from the National Board for Professional Teaching

Standards and agree to teach in a low performing school pursuant to Chapter 2, Article 13 (commencing with Education Code Section 44395).

SEC. 44. Item 6110-196-0001 of Section 2.00 of the Budget Act of 2001, is amended to read:

6110-196-0001—For local assistance, Department of Education (Proposition 98), for transfer by the Controller to Section A of the State School Fund, for allocation by the Superintendent of Public Instruction to school districts, county offices of education, and other agencies for the purposes of Proposition 98 educational programs funded in this item, in lieu of the amount that otherwise would be appropriated pursuant to statute . . . . . 1,286,968,000  
Schedule:

(1) 30.10.010—Special Program, Child Development, Preschool Education . . . . . 294,920,000

Provisions:

1. (a) \$3,750,000 of the amount in Schedule (3) of this item is for expansion of the After School and Safe Neighborhoods Partnerships Program. Notwithstanding any other provision of law, the State Department of Education shall prioritize expansion funding allocations as follows:
  - (1) New middle schools where at least 50 percent of students are eligible for free or reduced-cost meals through the school lunch program of the United States Department of Agriculture.
  - (2) Increase grant caps for participating middle schools that have students on waiting lists to participate. Grant caps may be increased by the lesser of either 25 percent of the current grant cap or the proportion of children unserved by the program as measured by documented waiting lists as of January 1, 2001, compared to actual after school enrollment on that same date.
  - (3) New elementary schools where at least 50 percent of students are eligible for free or reduced-cost meals through the school lunch program of the United States Department of Agriculture.
  - (4) Increase grant caps for participating elementary schools that have students on waiting lists to participate under the same

limitations as paragraph (2) of this subdivision. Further, in order to support student academic achievement, funds allocated to middle schools for expansion of the After School Learning and Safe Neighborhoods Partnerships Program shall only be available for programs meeting high academic quality standards. Criteria for judging the strength of academic quality for middle school applications shall be based on the following priority order: (1) programs offering tutoring and homework assistance in language arts and mathematics, coordinated with the school's academic program to assist student readiness in meeting the high school exit exam; (2) history and social science, or science. All academic components shall include supervision by staff meeting qualifications no less than that of an instructional aide and a staff-to-student ratio no greater than 20 students per staff.

- (aa) Of the amount appropriated in Schedule (3) of this item, \$3,750,000 is for expansion of a Before School component of the After School Learning and Safe Neighborhoods Partnerships Program. Expenditure of this money is contingent upon legislation to establish this new component.
- (aaa) In the event the State Department of Education anticipates that it will be unable to encumber all of the funds for expansion pursuant to subdivisions (a) and (aa) of this provision, \$2,000,000 of the anticipated savings shall be available for three-year grants on a one-time basis for after school regional centers established pursuant to Chapter 318 of the Statutes of 1998 for the purpose of serving as a centralized resource for technical assistance and training on best practices for either or both, (1) the Before School component and (2) middle schools in areas such as program content and local financing, including establishment of long-term partnership funds, staffing, and managing programs for accountability.

- (b) Of the amount appropriated in Schedule (1) of this item, \$23,799,000 is for the purpose of providing full-year funding for expansion of the half-day preschool program with priority given to funding allocations to underserved areas initiated with a \$23,799,000 augmentation in the Budget Act of 2000, as specified in Provision 1(aa) of Item 6110–196–0001 of Section 2.00 of Chapter 52, Statutes of 2000.
  - (c) Of the amount appropriated in Schedule (2)(a) of this item, \$40,000,000 is for the purpose of providing full-year funding for expansion of full-day, general child care for children ages 0–5 years old initiated with a \$40,000,000 augmentation in the Budget Act of 2000, as specified in Provision 1(b) of Item 6110–196–0001 of Section 2.00 of Chapter 52, Statutes of 2000.
  - (d) Of the amount appropriated in Schedule (2)(c) of this item, \$3,000,000 is for the purpose of providing full-year funding for expansion of migrant day care services initiated with a \$3,000,000 augmentation in the Budget Act of 2000, as specified in Provision 15 of Item 6110–196–0001 of Section 2.00 of Chapter 52, Statutes of 2000.
2. Notwithstanding Section 8278 of the Education Code, funds available for expenditure pursuant to Section 8278 of the Education Code shall be expended in the 2001–02 fiscal year pursuant to the following schedule:
- (a) The amount necessary for accounts payable pursuant to paragraph (1) of subdivision (b) of Section 8278 of the Education Code.
  - (b) \$5,000,000 in augmentation of Schedule (2) (I), Quality Improvement, for projects to improve the quality and availability of child care as specified in Provisions 7(d) and 7(e) of this item.
  - (c) Of the remaining funds available after meeting the requirements in (a) and (b) of this provision, \$1,732,000 shall be allocated for instructional materials and equipment for center-based programs and to improve resource lending libraries in resource and referral programs, \$5,000,000 shall be allocated for facilities

renovation and repair contracts necessary to meet health and safety standards and to comply with the federal Americans with Disabilities Act of 1990, and, up to \$32,508,000 shall be available for Stage 3 child care in accordance with Provision 9(b) of this item. Should additional amounts become available pursuant to Section 8278 beyond those specified herein, it is the intent of the Legislature that up to \$15,000,000 may be transferred to the Child Care Facilities Revolving Fund, of which \$5,000,000 may be used for the CalWORKs Center-Based Pilot. Additional amounts in excess of \$15,000,000 shall not be expended prior to approval of a plan by the Department of Finance pursuant to the notification requirements of Section 28.00 of this act.

- (d) The Controller shall establish an account entitled Section 8278 Expenditures in 1999 in 6110-196-0001, Program 30.10.060. Any unexpended General Fund balances as of June 30, 2001, or subsequent abatements, from those amounts listed in Schedules (1), (2)(a), (2)(b), (2)(c), (2)(d), (2)(g), (2)(h), (2)(i), (2)(j), (2)(k), (2)(l) and (2)(m) of this item, that are available pursuant to Section 8278 of the Education Code, shall be transferred to the account for the purpose of making expenditures pursuant to that section.
3. The State Department of Education shall report to the Joint Legislative Budget Committee and the Department of Finance, by March 31, 2002, the amount of child development funds, by program, that have been determined after audit to be unearned. The report shall include the settlement of claims payable by program from unearned contract fund balances. This provision includes both Federal Fund and General Fund contracts.
4. (a) Notwithstanding any other provision of law, alternative payment child care systems shall be subject to the rates established in the Regional Market Rate Survey of California child care and development providers for provider payments. The State Department of Education shall utilize a federal fund contract with the State Child Care Resource and Referral Network (Network) to conduct a market rate survey. It is the intent of the Legislature that the contract between the

State Department of Education and the Network require that the summary report and analyses of changes in mean and ceiling rates, adjustment factors, and regional rates be forwarded to the Department of Finance along with the mean and ceiling rates. The contract shall also provide resources sufficient for the Network to respond to requests for related information by the Department of Finance. Any changes to the market rate limits, adjustment factors or regions are subject to the approval process for child care contract funding terms and conditions as specified in Section 8447 of the Education Code. When approved, those changes shall be utilized by the State Department of Education and the State Department of Social Services in various programs under the jurisdiction of both departments to determine limits of reimbursement to providers.

- (b) Notwithstanding any other provision of law, annual revisions to the family copayment schedule for child care and development programs are also subject to the approval process pursuant to Section 8447 of the Education Code and, when approved, shall be utilized by both the State Department of Education and Department of Social Services where applicable.
5. The funds appropriated in this item for campus child care tax bailout shall be allocated by the State Department of Education based on a schedule provided by the Chancellor of the California Community Colleges. The chancellor shall schedule the allocation of these funds to community college districts that levied child care permissive override taxes in the 1977–78 fiscal year pursuant to Sections 8329 and 8330 of the Education Code in an amount equal to the property tax revenues, tax relief subventions, and state aid required to be made available by the district to its child care and development program for the 1979–80 fiscal year pursuant to Section 30 of Chapter 1035 of the Statutes of 1979, increased by any cost-of-living increases granted in subsequent fiscal years. These funds shall be used only for the purpose of community college child care and development programs.

6. Notwithstanding any provision of law to the contrary, higher educational institutions may establish and maintain child development programs on or near their respective campuses with priority for services given to children of students of that campus. Those higher educational institutions under contract with the State Department of Education for child care and development services shall be subject to the rules and regulations adopted by the Superintendent of Public Instruction except where those rules and regulations differ with respect to the conditions specified for the community colleges in Provision 11 of Item 6870-101-0001.
7. Funds in Schedule (2)(l), along with funds allocated pursuant to Provision 2(b) of this item, shall be reserved for activities to improve the quality and availability of child care, pursuant to the following:
  - (a) \$2,230,000 is for the schoolage care and resource and referral earmark.
  - (b) \$16,411,000 is for the infant and toddler earmark and shall be used for increasing the supply of quality child care for infants and toddlers. Of this amount, \$4,413,000 is available on a one-time basis. Of the remaining funds, up to \$8,998,000 is available for expenditure immediately and \$3,000,000 shall only be available after the Department of Education reports to the Department of Finance the 2002 federal fiscal year earmark requirement. It is intended that the earmark be funded at the minimum amount required under federal law with any discretionary funding remaining used to offset budget year expenditures in CalWORKs Stage 2 through budget revision approved by the Department of Finance. Notwithstanding any other provision of law, expenditure plans and contract provisions for awarding these funds shall give high, but not exclusive, priority to the development of new family day care home providers, especially those who offer care during nontraditional hours such as weekends, evenings, and nights and who offer care for special needs children.
  - (c) \$1,500,000 is for the five-year regional resource centers program initiated in the Budget Act of 1999 (Ch. 50, Stats. 1999) to develop capacity in underserved areas.

- (d) From the remaining funds including funds available pursuant to Provision 2(b) of this item, the following amounts shall be allocated for the following purposes: \$4,000,000 to train former CalWORKs recipients as child care teachers, \$2,000,000 in one-time funding to continue training and to develop, produce, and disseminate classroom curriculum linked to the prekindergarten learning and development guidelines developed pursuant to Section 8203.3 of the Education Code for child care centers; \$3,000,000 in one-time funding available through 2003–04 to adapt, produce and disseminate prekindergarten learning and development guidelines and related curriculum for all exempt and licensed family child care home providers; \$2,700,000 for contracting with the Department of Social Services for increased inspections of child care facilities, \$1,000,000 to continue the Family Child Care At Its Best training project, which, through an interagency agreement with the University of California at Davis Extension Program, provides child development training to licensed family child care home providers to enhance the quality and safety of licensed family child care homes, \$1,000,000 for Trustline registration workload (Ch. 3.35 (commencing with Sec. 1596.60), Div. 2, H.& S.C.); \$500,000 for health and safety training for licensed and exempt child care providers; \$320,000 for the Child Development Training Consortium, \$300,000 for the Health Hotline, \$300,000 to implement a technical assistance program to child care providers in accessing financing for renovation, expansion, and/or construction of child care facilities; and \$1,000,000 for the Home Instruction Program for Preschool Youngsters (HIPPY) for the districts in the amounts specified herein, contingent upon a written agreement with the California HIPPY State Office by October 1, 2001, to provide evaluation, training, and technical assistance to local districts implementing HIPPY programs according to the HIPPY statewide capacity building design. The agreement shall specify implementation goals including starting date and participation levels as agreed to by both

parties. In the event that a school district or county office of education does not substantially meet the implementation requirements specified in the written agreement by February 1, 2002, its share may be redistributed as determined by the Superintendent of Public Instruction and the California HIPPIY State Office with the approval of the Department of Finance through notification of the Legislature through the Section 28.00 notification process. Funds shall be allocated under this provision, as follows: (1) Los Angeles Unified School District (\$100,000), (2) Los Angeles County Office of Education (\$100,000), (3) Santee School District (\$115,000), (4) San Diego Unified School District (\$340,000), (5) Contra Costa County Office of Education (\$75,000), (6) San Francisco Unified School District (\$100,000), (7) Santa Barbara Unified School District (\$85,000), and (8) Stanislaus County Office of Education (\$85,000).

- (e) The State Department of Education shall allocate \$425,000 to preschool education projects including, but not limited to, those operated by the public television stations in Redding, San Francisco, San Jose, Los Angeles, Fresno, and San Diego. Of this amount, the department shall allocate up to \$320,000 to public television stations in Redding, San Francisco, San Jose, and Los Angeles, based upon the satisfaction by the projects operated by the public television stations in each of those cities of all of the following criteria: (1) the 30-percent minimum match; (2) a plan that identifies the providers to be trained; (3) number of trainers to be trained; (4) the quality of the training offered; (5) linkages to the child care community; and (6) cost-effectiveness. The balance of the \$425,000 identified in this subdivision shall be made available to support projects in Fresno and San Diego, based upon the determination by the State Department of Education of the satisfaction by the projects operated by the public television station in each of those cities of the criteria set forth in (1) to (6), inclusive, of this subdivision. As a condition of receiving funds as described in this subdivision in the

2001-02 fiscal year, each grantee that received funds in the 2000-01 fiscal year shall complete and submit to the State Department of Education, no later than March 1, 2002, an evaluation of the effectiveness of the project operated by the grantee in improving the quality of child care provided in the affected community.

- (f) \$30,000 shall be made available for a preschool public television project in Eureka.
  - (g) As required by federal law, the State Department of Education shall develop an expenditure plan that sets forth the final priorities and the reasons therefore if the final priorities are different from those approved in response to the reporting requirement contained in Provision 7(h) of Item 6110-196-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000). This plan shall be submitted to the Department of Finance by September 1, 2001, and funds shall not be encumbered prior to approval of the plan by the Department of Finance. The State Department of Education shall coordinate with the Department of Social Services, the California Children and Families State Commission, and other applicable entities to identify annual statewide expenditures for quality enhancements which qualify for meeting federal requirements, and shall reference these expenditures in its biennial federal quality plans or any subsequent amendments.
  - (h) \$15,000,000 from the General Fund shall be for child care worker recruitment and retention programs as specified by Chapter 547, Statutes of 2000.
8. (a) If the federal funds available pursuant to Provision 10 of Item 6110-196-0001 of Section 2.00 of the Budget Act of 1997 (Ch. 282, Stats. 1997) have not been transferred to Item 6110-001-0001 of Section 2.00 of this act by June 30, 2001, those funds shall be available in the 2001-02 fiscal year for (a) interim data reporting as approved by the Department of Finance, and, (b) for the same purposes and subject to the same conditions, including FSR development, and reporting requirements otherwise applicable to Item 6110-196-0001

and Item 6110–001–0890 of Section 2.00 of the Budget Act of 1997 (Ch. 282, Stats. 1997).

- (b) No later than August 31, 2001, the State Department of Education (SDE) shall convene a data collection task force composed of representatives of the SDE, the Legislative Analyst, the chairs and vice chairs of the appropriate fiscal and policy committees of the Legislature, the Department of Social Services, the Senate Office of Research, the Joint Legislative Audit Committee, the Department of Finance, child care providers, and other stakeholders as defined by the task force. The task force shall advise the SDE on the implementation of the interim data collection system and development and implementation of the long-term data collection system. The task force members shall provide advice concerning any associated feasibility study reports and requests for proposals, assist the SDE in designing systems that generate policy-relevant information, establish timelines for project completion, and monitor progress toward project completion. Any company or individual who participates in the task force or in an advisory capacity to the task force shall not be eligible to bid for the development of the system. In the development of this system, the SDE shall contract for a risk assessment of the project. The SDE shall provide copies of any status reports it is required to send to the United States Department of Health and Human Services, as well as any feasibility study reports and requests for proposals, to each of the task force participants. If the interim system and long-term system are not fully discussed in those reports, the SDE shall provide supplementary reports to the members of the task force on October 1, 2001, and March 1, 2002, regarding progress toward completion of the projects. It is the intent of the Legislature that the SDE take all necessary steps to comply with federal reporting requirements in a timely fashion.
- (c) The State Department of Education shall ensure that any long-term data collection system adopted by the department is able to collect the

data specified by Provision 8(c)(6) of Item 6110–196–0001 of the Budget Act of 2000 (Ch. 52, Stats. 2000).

- (d) For purposes of ensuring adequate data for policy consideration, management of the current year budget, and development of the child care budget for the 2002–03 fiscal year, with special emphasis on CalWORKs caseload driven programs, it is the intent of the Legislature that the SDE utilize funds made available pursuant to subdivision (a) above for interim data collection to finance any surveys or sampling activities needed to augment state staff capabilities in meeting requirements specified herein and as clarified or amended by the Department of Finance. It is legislative intent that the SDE expedite any contracting necessary to fulfill the data requirements of this subdivision. It is recognized that the CalWORKs child care programs present unique challenges requiring the cooperation of the two implementing state agencies with the Department of Finance to annually determine a budgetary plan and to determine any midyear adjustments which may be advisable. Therefore, the following requirements shall apply:

1. The State Department of Education shall maintain an improved allocation, contracting, and reimbursement system for CalWORKs Stage 2 and Stage 3 funding to ensure funds are distributed in proportion to statewide needs. These needs shall recognize attrition experience and family fees collected at the local level which shall be counted toward the funding available to meet those needs. The department shall conduct monthly analyses of caseloads and expenditures and adjust agency contract maximum reimbursement amounts and allocations as necessary to ensure funds are distributed proportional to need. The department shall share monthly caseload analyses with the Department of Social Services.
2. The department shall provide quarterly reports on the sufficiency of funding for Stage 2 and Stage 3 to the Department of

- Finance and the Department of Social Services (DSS) and to the Legislative Analyst's office. The department shall provide caseloads, expenditures, allocations, unit costs, family fees, and other key variables and assumptions used in determining the sufficiency of state allocations. Detailed backup by month and on a county-by-county basis shall be provided to the DSS at least on a quarterly basis for comparisons with Stage 1 trends.
3. Any request from the child care reserve shall be based on the information and analyses pursuant to the preceding paragraphs and shall be made jointly and coordinated with the DSS to eliminate duplication. In order to facilitate coordination, detailed backup by month and on a county-by-county basis, if different from quarterly data provided pursuant to the previous paragraph, shall be provided to the DSS to facilitate its analyses and comparison of overall CalWORKs caseloads and related child care needs.
  4. By September 15, 2001, and March 15, 2002, the department shall ensure that detailed caseload and expenditure data, through the most recent period for Stage 2 and Stage 3 along with all relevant assumptions, is provided to DSS to facilitate budget development and the May Revision, respectively. The detailed data provided shall include actual and projected monthly caseload from Stage 2 scheduled to time off of their transitional child care benefit from the last actual month reported by agencies through the 2003-04 fiscal year as well as local attrition experience. DSS shall utilize data provided by the State Department of Education, including key variables from the prior fiscal year and the first two months of the 2001-02 fiscal year, to provide coordinated estimates in November 2001 for each of the three stages of care for preparation of the 2002-03 Governor's Budget, and shall utilize data from the first two quarters of the 2001-02

fiscal year for preparation of the 2002 May Revision. DSS shall share its assumptions and methodology with SDE in the preparation of the 2002–03 Governor’s Budget.

5. As deemed necessary by the department for counties where there is more than one Alternative Payment Program participating in Stage 2 and Stage 3, county welfare departments shall participate jointly with the Alternative Payment Programs, as applicable, to jointly determine the amount of funds initially distributed to each Alternative Payment Program. However, the State Department of Education may adjust these allocations at any time for providers deemed by the State Department of Education to be on conditional status and shall adjust the allocations as necessary to ensure a distribution of funding proportional to each alternative payment provider’s documented need pursuant to the analysis specified in this provision.
6. Upon request by the Department of Finance, the State Department of Education shall determine, through survey or mandatory reporting, and through use of consultant services as necessary, requested information (such as selected updates of data collected pursuant to Provision 8(c)(6) of the Budget Act of 2000 (Ch. 52, Stats. 2000)) which shall be provided to the Department of Finance for use in 2002–03 budget development.
9. (a) The Department of Finance is authorized to augment the appropriation in this item for CalWORKs Stage 3 funding upon demonstration by the State Department of Education that additional funding is necessary to serve the caseload specified in Provision 9(b). The Department of Finance shall provide written notification to the chairperson of the fiscal committees of each house of the Legislature and the Chairperson of the Joint Legislative Budget Committee at the time the augmentation is approved.

- (b) Notwithstanding any other provision of law, the funds in Schedule (2)(f) for Stage 3 are reserved exclusively for continuing child care to: (1) former CalWORKs families who are working, have left cash aid and have exhausted their two-year eligibility for transitional services in either Stage 1 or 2 pursuant to subdivision (c) of Section 8351 or Section 8353 of the Education Code, respectively, but still meet eligibility requirements for receipt of subsidized child care services; and (2) families who received lump-sum diversion payments or diversion services under Section 11266.5 of the Welfare and Institutions Code and have spent two years in Stage 2 off of cash aid, but still meet eligibility requirements for receipt of subsidized child care services. The funds made available for CalWORKs Stage 3 child care pursuant to this item, Item 6110-485, and pursuant to Provision 2(c) of this item are on a one-time basis. The State Department of Education shall advise all Alternative Payment Providers to notify the Stage 3 caseload that subsidies are only extended through the 2001-02 fiscal year under current eligibility, subsidy, and family fee conditions.
- (c) Any families who have been continuously enrolled in Stage 3 slots funded through the original increment of \$60,000,000 initially funded in the Budget Act of 1997 (Ch. 282, Stats. 1997) from the Child Care and Development Block Grant are exempted from these restrictions, provided they continue to meet eligibility criteria for receipt of subsidized child care. However, Alternative Payment Providers shall continue to replace exempted families with those meeting the eligibility requirements specified herein.
10. Nonfederal funds appropriated by this item which have been budgeted to meet the state's Temporary Assistance for Needy Families maintenance of effort requirement established pursuant to the federal Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (P.L. 104-193) may not be expended in any way that would cause their disqualification as a federally allowable maintenance of effort expenditure.

11. In recognition of the extensive services currently provided to CalWORKs recipients, the increased level of services provided to these populations by resource and referral agencies as provided for in this item, and the economies of scale that occur as contract amounts have been multiplied since 1996–97, it is the intent of the Legislature that administrative and support services allowances for alternative payment contractors serving these populations be limited to no more than 25 percent of the direct cost of care payments to child care providers. Therefore, notwithstanding any other provision of law or regulation, the State Department of Education shall ensure that contract provisions conform to this intent for Stages 2 and 3 child care contracts funded through Schedules (2)(e) and (2)(f) of this item.
12. Notwithstanding Section 26.00 of this act, the funds appropriated in Schedule (5) of this item, for child development cost-of-living adjustments, is for transfer to Schedules (1), (2)(a), (2)(b), (2)(c), (2)(d), (2)(g), (2)(h), (2)(i), (2)(j), and (2)(m) within this item. Upon application of the 2001–02 COLA, the maximum standard reimbursement rate shall not exceed \$27.44 per hour for General Child Care programs and \$17.51 per hour for State Preschool. Furthermore, the Community College Match, the Migrant Child Care, and the CalSAFE Child Care programs shall adhere to the maximum standard reimbursement rates as prescribed for the General Child Care programs. All other rates and adjustment factors shall be revised to conform. All contract maximum amounts shall be revised so that erosion of service capacity from the 2000–01 rates are restored.
13. The funds appropriated in Schedule (4) of this item for child care and development services minimum wage impact are to be transferred as general cost-of-living adjustments, notwithstanding Provision 12, to other schedules in this item as determined by the Department of Education through a Budget Revision as approved by the Department of Finance.
14. Of the funds in Schedule (2)(c) of this item, up to \$5,000,000 may be used to establish or continue a pilot Migrant Alternative Payment Network Program for central valley counties. This program shall comply with the requirements approved

pursuant to Provision 18 of Item 6110-196-0001 of Section 2.00 of the Budget Act of 1998 (Ch. 324, Stats. 1998).

- 15. Notwithstanding any other provision of law, it is the intent of the Legislature that unearned contract amounts from General Funds or Federal Funds appropriated for CalWORKs Stages 2 and 3 in any prior year be used to offset direct service costs in CalWORKs Stage 2 child care in the 2000-01 fiscal year and each year thereafter. Therefore, in order to account for these funds in determining the budget, the Department of Education shall disencumber any amounts in excess of a three-percent reserve of the original contract amount for each unaudited contract and shall provide a report by September 1, 2001, and April 1, 2002, of the available balances to the Department of Finance. The Department of Education shall ensure child care audits are closed out in a timely fashion to ensure savings are available in the fiscal year budget following initial appropriation.

SEC. 45. Item 6110-200-0001 of Section 2.00 of the Budget Act of 2001 is amended to read:

6110-200-0001—For local assistance, Department of Education (Proposition 98), Program 20.60.037 Healthy Start Support Services for Children Act . . . . .	1,000,000
---	-----------

SEC. 46. Item 6110-210-0001 of Section 2.00 of the Budget Act of 2001 is repealed.

SEC. 46.3. Item 6110-223-0001 is added to Section 2.00 of the Budget Act of 2001, to read:

6110-223-0001—For local assistance, State Department of Education (Proposition 98) for transfer to Section A of the State School Fund, for the purpose of limiting the PERS offset to K-12 revenue limit apportionments on a one-time basis . . . . .	\$35,000,000
---	--------------

- 1. The amount provided shall be capped at \$35,000,000 and shall be allocated pursuant to subdivision (b) of Section 42238.12 of the Education Code.

SEC. 46.5. Item 6110-231-0001 is added to Section 2.00 of the Budget Act of 2001, to read:

6110-231-0001—For local assistance, State Department of Education (Proposition 98) for transfer to Section A of the State School Fund . . . . . \$67,831,000

Provisions:

- 1. The funds in this item shall be allocated to all school districts and county offices of education on the basis of an equal amount per unit of average daily attendance for the purpose of the Proposition 98 educational programs specified in subdivision (b) of Section 12.40 of this act.

SEC. 47. Item 6110-232-0001 of Section 2.00 of the Budget Act of 2001 is amended to read:

6110-232-0001—For local assistance, Department of Education (Proposition 98) for transfer to Section A of the State School Fund, Program 10.26, Program to Reduce Class Size in Two Courses in Grade 9 pursuant to Chapter 6.8 (commencing with Section 52080) of Part 28 of the Education Code . . . . . 135,185,000

Provisions:

- 1. Of the funds appropriated in this item, \$4,165,000 is provided for cost-of-living adjustments (COLAs) at a rate of 3.87 percent.

SEC. 48. Item 6110-485 of Section 2.00 of the Budget Act of 2001 is amended to read:

6110-485—Reappropriation (Proposition 98) Department of Education. The sum of \$319,271,000 is reappropriated from the Proposition 98 Reversion Account, for the following purposes:

0001—General Fund

- (1) \$4,166,000 to the State Department of Education for the purpose of funding prior year Annual Parent Notification-Staff Development mandate claims pursuant to Chapter 929, Statutes of 1997.
- (3) \$12,005,000 for transfer by the Controller to Section A of the State School Fund, for allocation by the Superintendent of Public Instruction to SELPAs to fully fund the 2000-01 special education average daily attendance increase.

- (5) \$846,000 to the State Department of Education, for transfer to Section A of the State School Fund, to fully fund the 1999–00 deficit in the child nutrition program.
- (6) \$1,281,000 to the State Department of Education, for transfer to Section A of the State School Fund to fully fund the 2000–01 deficit in the child nutrition program.
- (8) \$10,000,000 on a one–time basis to the State Department of Education for Regional Occupational Centers and Programs for equipment.
- (9) \$1,000,000 to the State Department of Education for allocation to FCMAT to provide professional management assistance to the Emery Unified School District.
- (10) \$200,000 to the State Department of Education for allocation to FCMAT to provide professional management assistance to school districts in west Contra Costa County.
- (11) \$500,000 to the State Department of Education for allocation to FCMAT for the purposes of implementing the Student Friendly Services through Technology project.
- (12) \$100,000 to the State Department of Education for the purpose of reimbursing districts for the cost of substitute educators pursuant to Section 44987.3 of the Education Code.
- (13) \$15,000,000 to the State Department of Education for allocation to schools pursuant to Article 2 (commencing with Section 51120) of Chapter 1.5 of Part 28 of the Education Code (Nell Soto Parent/Teacher Involvement Program).

- (15) \$62,505,000 as a contingency expenditure, to be authorized by the Department of Finance for transfer to the Controller as necessary for the reimbursement of state–mandated cost claims and interest submitted by school districts and county offices of education. These funds would be applied toward the minimum funding requirement for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution for the 2000–01 fiscal year.
- (16) \$23,939,000 to the State Department of Education for the purpose of funding prior year school crimes reporting mandate claims pursuant to Chapter 759 of the Statutes of 1992 and Chapter 410 of the Statutes of 1995.
- (17) \$8,590,000 to the State Department of Education for the purpose of funding ongoing mandates claims, excluding the School Bus Safety II mandate, pursuant to the enactment of mandates claims legislation during the 2001–02 Regular Session.
- (18) \$4,500,000 for allocation to FCMAT for ongoing fiscal oversight of school districts pursuant to Provision 4.
- (19) \$4,500,000 to the State Department of Education for allocation to the Fiscal Crisis and Management Assistance Team for costs associated with administration of the California School Information Services Project.
- (20) \$1,000,000 for allocation to the Fiscal Crisis and Management Assistance Team for the purpose of reviewing school district hiring practices, pursuant to Section 42127.85 of the Education Code.
- (21) \$15,000,000 to the State Department of Education for the Principal Training Program pursuant to legislation enacted during the 2001–02 Regular Session related to providing professional development training to administrators.

- (22) \$1,600,000 in one-time funding to the State Department of Education for the School Violence Reimbursement Project in the Grossmont Union High School District.
- (23) \$3,500,000 in one-time funding to the State Department of Education for the purpose of supporting sustainability and evaluation activities by existing Teenage Pregnancy Prevention Grant Program grantees that received funding in 2001-02 pursuant to Section 8922 of the Education Code. Funding shall be distributed proportionate to the funding received in 2000-01.
- (24) \$11,566,000 to the State Department of Education for the purpose of funding FCMAT's implementation of the local California School Information Services Project.
- (25) \$635,000 to the State Department of Education for the Beginning Teacher Salary Program.
- (27) \$5,500,000 to be set aside on a one-time basis pursuant to legislation enacted during the 2001-02 Regular Session for career/technical education services.
- (32) \$110,000 on a one-time basis to the State Department of Education for grants to school districts and county offices of education pursuant to the gender equity train-the-trainer grant programs established pursuant to Section 224.5 of the Education Code.
- (33) \$6,000,000 to the State Department of Education for the allocation on a one-time basis to implement the High Tech High School Program pending enactment of legislation during the 2001-02 Regular Session.
- (36) \$500,000 to the State Department of Education to allocate to school districts for one-time costs associated with the English Language Development Test.
- (37) \$31,728,000 to the State Department of Education for the Mathematics and Reading Professional Development Program, pursuant to legislation enacted in the 2001-02 Regular Session.

- (39) \$5,000,000 to be set aside on a one–time basis for the purpose of funding legislation related to establishing the California Information Technology Career Academy Grant Initiative.
- (40) \$10,000,000 on a one–time basis to the State Department of Education to augment the School Safety Block Grant Program.
- (41) \$3,000,000 to the State Department of Education to contract for the development of the High School Exit Exam Workbooks.
- (42) \$75,000,000 to the State Department of Education to be allocated on a one–time basis for the purposes specified in Provision 8 of this item.

Provisions:

- 1. The funds reappropriated in subdivision (24) of this item shall be transferred to FCMAT only if education telecommunications funds do not materialize.
- 3. The funds reappropriated in subdivision (12) of this item shall only be used to reimburse districts which request reimbursement pursuant to Section 44987.3 of the Education Code.
- 4. Of the funds reappropriated in subdivision (18) of this item, \$4,500,000 shall be allocated to FCMAT for purposes as follows:
  - (a) \$3,500,000 for the purposes of fully funding county office of education (COE) oversight activities pursuant to Chapter 1213 of the Statutes of 1991 and subsequent laws. These activities include, but are not limited to, conducting reviews, examinations, and audits of districts and providing written notifications of the results at least annually by county offices of education on the fiscal solvency of the districts with disapproved budgets, qualified or negative certifications, or, pursuant to Section 42127.6 of the Education Code, districts facing fiscal uncertainty. Written notifications of the results of these reviews, audits, and examinations shall be provided at least annually to the district governing board, the Superintendent of Public Instruction, the Director of Finance, and the Office of Secretary for Education.
  - (b) \$1,000,000 to fund reimbursement of COE activities pursuant to Provision 4 of Item

6110-107-0001 or for extraordinary costs of audits, examinations, or reviews of district budgets in cases where the COE has reason to believe fraud, misappropriation of funds, or other illegal fiscal practices require COE review. If the legislation is adopted in the 2001-02 legislative session regarding COE fiscal oversight activities, the funds in this provision may also be used for those purposes. Any unexpended funds provided under this paragraph may be allocated for the development and implementation of training in accordance with paragraph (2) of subdivision (d) of Section 42127.8 of the Education Code.

- (c) The amounts in subdivision (a) of this provision shall be distributed by a formula to be adopted by FCMAT in consultation with the California County Superintendent Educational Services Association and approved by the Department of Finance and the Superintendent of Public Instruction. The amounts in subdivision (b) of this provision shall be distributed by FCMAT on an as-needed basis subject to approval by the Department of Finance and the Superintendent of Public Instruction.
7. The funds reappropriated in subdivision (22) of this item shall be allocated by the State Department of Education to the Grossmont Union High School District in San Diego County for the School Violence Reimbursement Project. The Grossmont Union High School District shall expend these funds to increase the ratio of adults to students on campus, including, but not limited to, school staff and faculty, community partners, school security personnel, school resource officers, and volunteers, and to fund a pilot program for a school violence prevention hotline to reduce the risks of acts of violence against students and staff. These funds may also be used to reimburse the Grossmont Union High School District for nonbudgeted expenses incurred during the separate school campus shootings within the district in 2001.
8. (a) Of the funds reappropriated in subdivision (42) of this item up to \$8,000,000 shall be set aside to provide a third year of Immediate Intervention/Underperforming Schools program implementation grant funding for schools that received their first year of IIUSP

implementation funding in 2000–01, if they meet the following conditions (1) have met their Academic Performance Index growth targets, pursuant to Section 52052 of the Education Code, for two consecutive years and (2) are not receiving funding through the Comprehensive School Reform Demonstration program and (3) they were in the first decile of the Academic Performance Index (API) in the 2000–01 fiscal year. The amount of funding provided to these schools for a third year of implementation shall be the amount specified in Section 52054.5 of the Education Code, less the amount received pursuant to Section 52057 of the Education Code. Notwithstanding Section 2.00 of the Budget Act of 2001 (Ch. 106, Stats. 2001), these funds shall be available through June 30, 2003.

The balance of these funds shall be allocated to all school districts, county offices of education, and charter schools in the state on the basis of an equal amount per unit of average daily attendance, including average daily attendance attributable to regional occupational centers and programs and adult education programs, as reported on the second principal apportionment for the 2000–01 fiscal year, and average daily enrollment in preschool and child care programs operated on schoolsites. For the purpose of determining the average daily enrollment of children served by local education agencies in preschool and childcare development programs operated on schoolsites, the Superintendent of Public Instruction shall divide a local education agency's total number of child days of enrollment in these programs in the 2000–01 school year by 180 days to determine an average daily enrollment for the programs and allocate funds according to this average daily enrollment. Of the funds distributed for the purposes of this provision, each school district, county office of education, and charter school shall receive not less than \$3,750 for each schoolsite within its jurisdiction. Each school district, county office of education, and charter school has discretion to allocate these funds

within its jurisdiction, as each deems appropriate.

- (b) As a condition of receipt of funds provided in this item, school districts, county offices of education, and charter schools shall, in a local governing board resolution adopted in a regularly scheduled public meeting, identify energy conservation measures that result in a decrease in the amount of energy used by schools within the local education agency. The local governing board resolution shall also include a list of specific actions that will be carried out to achieve the reduction in energy use. Funds appropriated under this item may be used for energy conservation measures, increased energy costs, career/technical education one-time purposes, or any other one-time educational purpose.

SEC. 49. Item 6110-495 of Section 2.00 of the Budget Act of 2001 is amended to read:

6110-495—Reversion, Department of Education, Proposition 98. The following amounts shall revert to the Proposition 98 Reversion Account:

1. \$56,030,000 from Chapter 2 of the 1999 First Extraordinary Session.
2. \$73,970,000 from Item 6110-104-0001 of Section 2.00 of the Budget Act of 1999 (Ch. 50, Stats. 1999).
3. \$67,500,000, or whatever lesser or greater amount reflects the remaining unencumbered balance after the reappropriation specified in Provision 5 of Item 6110-494, of the General Funds appropriated in Item 6110-196-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000) with the exception of Schedules (b)(5.1) and (b)(5.2) for CalWORKs child care programs.
4. \$16,800,000 from Item 6110-125-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).
5. \$16,000,000 from Item 6110-184-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).
6. \$98,871,000 from Item 6110-104-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).

7. \$15,261,000 or whatever greater or lesser amount reflects the unencumbered balance from Item 6110-204-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).
8. \$53,868,000 or whatever greater or lesser amount reflects the unencumbered balance from Item 6110-205-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).
9. \$50,000,000 from Item 6110-133-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).
10. \$20,000,000, or whatever lesser or greater amount reflects the unencumbered balance of the appropriation specified in Item 6110-198-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).
11. \$45,000,000 or whatever greater or lesser amount reflects the unencumbered balance of the appropriation specified in Item 6110-232-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).
12. \$2,500,000 or whatever greater or lesser amount reflects the unencumbered balance of the appropriation specified in Item 6110-158-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).
13. \$17,700,000 or whatever greater or lesser amount reflects the unencumbered balance of the appropriation specified in Item 6110-156-0001 of Section 2.00 of the Budget Act of 1999 (Ch. 50, Stats. 1999).
14. \$35,000,000 from Item 6110-112-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).
15. \$10,000,000 from Schedule (e) 20.60.060—Instructional Support: Teacher Peer Review of Item 6110-193-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).
17. \$7,000,000 or whatever greater or lesser amount reflects the unencumbered balance of the appropriation specified in Item 6110-212-0001 of Section 2.00 of the Budget Act of 2000 (Ch. 52, Stats. 2000).

SEC. 50. Item 6110-496 is added to Section 2.00 of the Budget Act of 2001, to read:

6110-496—Reversion, Department of Education. Notwithstanding any other provision of law, the sum of \$6,000,000 from Program 20 in Item 6110-136-0001, Budget Act of 2001 (Ch. 106, Stats. 2001), for stipends for teacher attendees of University of California Professional Teacher Development Program, shall revert to the General Fund.

SEC. 52. Item 6440-496 is added to Section 2.00 of the Budget Act of 2001, to read:

6440-496—Reversion, University of California. Notwithstanding any other provision of law, the sum of \$31,000,000 from the funds appropriated in Schedule (1) Support, in Item 6440-001-0001, Budget Act of 2001 (Ch. 106, Stats. 2001), as amended by Chapter 564 of the Statutes of 2001, shall revert to the General Fund.

SEC. 53. Item 6610-496 is added to Section 2.00 of the Budget Act of 2001, to read:

6610-496—Reversion, California State University. Notwithstanding any other provision of law, the sum of \$20,000,000 from the funds appropriated in Schedule (1) Support in Item 6610-001-0001, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 54. Item 6870-485 of Section 2.00 of the Budget Act of 2001 is amended to read:

6870-485—Reappropriation (Proposition 98) California Community Colleges. The sum of \$121,325,000 is reappropriated from the Proposition 98 Reversion Account for the following purposes.  
0001—General Fund

- (1) \$3,153,000 to the California Community Colleges for the purpose of funding 2000–01 costs for the Part–Time Faculty Office Hours Program. Notwithstanding Section 87885 of the Education Code, or any other provision of law, these funds shall provide up to 50 percent of the total costs (including state and local matching funds) of the compensation paid for office hours of part–time faculty. Furthermore, the use of these funds is contingent on the enactment of legislation to reinstate a 1:1 state–to–local matching ratio.
- (2) \$23,000,000 to the California Community Colleges for assisting colleges in covering a portion of their natural gas and electricity costs incurred during the 2000–01 fiscal year, or enhancing efficiency efforts. Funds shall be allocated to the chancellor’s office for distribution to districts in direct proportion to colleges’ actual energy expenditures in the 2000–01 fiscal year.
- (3) \$26,000,000 to the California Community Colleges to assist colleges in covering a portion of their increased natural gas and electricity costs incurred during the 2001–02 fiscal year or for enhancing conservation efforts. Funds shall be allocated to the chancellor’s office for distribution to individual colleges on a square–foot basis of owned or long–term leased space.
- (4) \$7,172,000 to the California Community Colleges for the purpose of funding 2001–02 costs for the Part–Time Faculty Office Hours Program. Of the funds provided, the use of \$4,672,000 is contingent upon the enactment of legislation to reinstate a 1:1 state–to–local matching ratio.

- (5) \$57,000,000 to the California Community Colleges solely to increase compensation for part-time faculty from the amounts previously authorized. Funds shall be distributed to districts based on the total actual full-time equivalent students served in the previous fiscal year and include a small district factor as determined by the chancellor. These funds are to be used to assist districts in making part-time faculty salaries more comparable to full-time salaries for similar work, as determined by each district's local collective bargaining unit. These funds shall not supplant the amount of resources each district used to compensate part-time faculty or be used to exceed parity of each part-time faculty employed by each district with regular full-time faculty at the same district, as certified by the chancellor. If a district achieves parity, its allocation may be used for any other educational purpose.
- (6) \$5,000,000 to the California Community Colleges for the purpose of funding 2001-02 costs for the Community College Teacher and Reading Development Partnerships. Grants are designed to both encourage promising students to pursue a career in teaching through development of an articulated internship program with school districts and California State University institutions and to assist elementary school pupils to develop improved reading skills. Acceptance of grants shall constitute concurrence by the district to collect and provide all information specified by the chancellor. The board of governors shall implement the program in accordance with the plan approved by the Office of the Secretary for Education.

SEC. 55. Item 8100-495 is added to Section 2.00 of the Budget Act of 2001, to read:

8100-495—Reversion, Office of Criminal Justice Planning. Notwithstanding any other provision of law, the sum of \$82,000,000 of the appropriation provided in Schedule (22.1) 50.30.700—Special Projects—Public Safety in Item 8100–101–0001, Budget Act of 2000 (Ch. 52, Stats. 2000), shall revert to the General Fund.

SEC. 56. Item 8260-495 is added to Section 2.00 of the Budget Act of 2001, to read:

8260–495—Reversion, California Arts Council. Notwithstanding any other provision of law, the sum of \$5,100,000 from the appropriations provided in the following citations shall revert to the General Fund.

0001—General Fund

(1) \$4,341,000 from Item 8260–101–0001, Budget Act of 2001 (Ch. 106, Stats. 2001) as follows:

(a) Schedule (1) 05—Arts in Education (\$3,244,000)

(b) Schedule (3) 20—Organizational Support Grants (\$647,000)

(c) Schedule (5) 30—Special Initiatives Program (\$450,000)

(2) \$759,000 from Item 8260–111–0001, Budget Act of 2001 (Ch. 106, Stats. 2001), for the California Challenge Program.

SEC. 57. Item 8350-495 is added to Section 2.00 of the Budget Act of 2001, to read:

8350-495—Reversion, Department of Industrial Relations. Notwithstanding any other provision of law, the sum of \$1,000,000 from the appropriation provided in Schedule (6) 40—Prevention of Industrial Injuries and Deaths of California Workers in Item 8350–001–0001, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 58. Item 8660-495 is added to Section 2.00 of the Budget Act of 2001, to read:

8660–495—Reversion—Public Utilities Commission. Notwithstanding any other provision of law, the sum of \$93,398,000 from the appropriations provided in the following citations shall revert to the General Fund:

0001—General Fund

(1) \$93,398,000 from Section 5 of Chapter 7 of the Statutes of 2001, First Extraordinary Session.

SEC. 58.5. Item 8660-116-0470 is added to Section 2.00 of the Budget Act of 2001, to read:

8660-116-0470—For transfer by the Controller from the California High-Cost Fund–B to the General Fund . . . . . (35,500,000)  
Provisions:

1. The Legislature deems \$35,500,000 in the California High-Cost Fund–B to be in excess of the cost of the telephone program for which fees were levied.
2. In no case may a fee increase be imposed as a result of redirecting the fees in this item.
3. Any excess from the transfer authorized in this item shall be returned to the California High-Cost Fund–B by the Controller on July 1, 2002. For purposes of this provision, excess is defined as the amount which is greater than the sum of the amounts expended in 2001–02 for (1) the program specified in Section 5 of Chapter 7 of the Statutes of 2001, First Extraordinary Session, as amended by Section 57 of Chapter 111, Statutes of 2001, (2) the program specified in Chapter 7 of the Statutes of 2001, First Extraordinary Session, as amended by Chapter 4 of the Statutes of 2001, Second Extraordinary Session, and (3) \$2,000,000 from Schedule (1) 07–Science Technology and Innovation in Item 2920–101–0001, Budget Act of 2001 (Ch. 106, Stats. 2001).

SEC. 59. Item 8940-495 is added to Section 2.00 of the Budget Act of 2001, to read:

8940–495—Reversion, Military Department. Notwithstanding any other provision of law, the sum of \$2,100,000 from the appropriation provided in Schedule (9) 65–California National Guard youth programs in Item 8940–001–0001, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 60. Item 9670-015-0942 of Section 2.00 of the Budget Act of 2001 is amended to read:

9670–015–0942—For transfer from the Smog Impact Fee Refund Account to the General Fund upon order of the Director of Finance . . . . . (214,132,000)

SEC. 61. Item 9908-495 is added to Section 2.00 of the Budget Act of 2001, to read:

9908-495—Reversion, Janitorial/Contract Services. Notwithstanding any other provision of law, the sum of \$2,000,000 from Item 9908-001-0001, Budget Act of 2000 (Ch. 52, Stats. 2000) as reappropriated by Item 9908-490, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 62. Item 9909-495 is added to Section 2.00 of the Budget Act of 2001, to read:

9909-495—Reversion, Health Insurance Portability and Accountability Act. Notwithstanding any other provision of law, the sum of \$19,039,000 of the appropriation provided in Item 9909-001-0001, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 63. Item 9911-495 is added to Section 2.00 of the Budget Act of 2001, to read:

9911-495—Reversion, Utilities Costs. Notwithstanding any other provision of law, the sum of \$64,195,000 of the appropriation provided in Item 9911-001-0001, Budget Act of 2001 (Ch. 106, Stats. 2001), shall revert to the General Fund.

SEC. 64. Item 9914-495 is added to Section 2.00 of the Budget Act of 2001, to read:

9914-495—Reversion, Postage Rate increases. Notwithstanding any other provision of law, the sum of \$3,000,000 from the balance of the appropriations provided in the following citations shall revert to the General Fund:

0001—General Fund

- (1) \$1,000,000 from the appropriation in Item 9914-001-0001, Budget Act of 2000 (Ch. 52, Stats. 2000)
- (2) \$2,000,000 from the appropriation in Item 9914-001-0001, Budget Act of 2001, (Ch. 106, Stats. 2001)

SEC. 65. Section 3.20 is added to the Budget Act of 2001, to read:

SEC. 3.20. Notwithstanding any other provision of law, the Director of Finance is authorized to revert to the General Fund all or a portion of the balance of appropriations as identified pursuant to Executive Order D-49-01. These reversions will effect a minimum \$150 million statewide reduction in operating expenses and equipment costs. The Director of Finance will provide to the Chairperson of the Joint Legislative Budget Committee, and the chairperson of the committee in each house that considers appropriations, a summary listing by department of the amounts reverted.

SEC. 66. Section 3.30 is added to the Budget Act of 2001, to read:

SEC. 3.30. Notwithstanding any other provision of law, the Director of Finance is authorized to revert all or a portion of the unliquidated encumbered balance of 2000-01 and prior fiscal years' General Fund support appropriations for which goods and services have not been received as identified pursuant to Executive Order D-49-01. These reversions will effect a minimum \$25 million statewide reduction in past years' expenditures. The Director of Finance will provide to the Chairperson of the Joint Legislative Budget Committee, and the chairperson of the committee in each house that considers appropriations, a report listing the savings generated by each department.

SEC. 67. Section 3.40 is added to the Budget Act of 2001, to read:

SEC. 3.40. Notwithstanding any other provision of law, the Director of Finance is authorized to revert all or a portion of the balance of certain 2001-02, General Fund, local district project appropriations. These reversions will effect approximately a \$30 million statewide reduction in local district project expenditures. The Director of Finance will provide to the Chairperson of the Joint Legislative Budget Committee, and the chairperson of the committee in each house that considers appropriations, a report detailing the specific projects affected by these reversions.

SEC. 68. Section 3.70 is added to the Budget Act of 2001, to read:

SEC. 3.70. Hiring Freeze Reversion—Notwithstanding any other provision of law, the Director of Finance is authorized to revert all or a portion of the unencumbered balance of appropriations made by this act that reflect savings resulting from the Hiring Freeze pursuant to

Executive Order D-48-01. The Controller shall transfer any amounts identified by the Director of Finance for this purpose to the fund from which the appropriation was made. The Director of Finance will provide to the Chairperson of the Joint Legislative Budget Committee, and the chairperson of the committee in each house that considers appropriations, a summary of the amounts reverted.

SEC. 69. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

In order that necessary reversions, transfers, and adjustments by this act to the appropriations in the Budget Act of 2001 for support of state government for the 2001–02 fiscal year be made as soon as possible, it is necessary that this act take effect immediately.

---

## CHAPTER 2

An act to amend Sections 33050, 42238, 42238.12, 42238.44, 51725, 51727, and 51729 of, and to add Sections 42238.45 and 52055.660 to, the Education Code, to amend Section 1 of Chapter 723 of the Statutes of 2001, and to amend Section 33 of Chapter 891 of the Statutes of 2001, relating to education, making an appropriation therefore, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor February 2, 2002. Filed with  
Secretary of State February 4, 2002.]

*The people of the State of California do enact as follows:*

SECTION 1. Section 33050 of the Education Code is amended to read:

33050. (a) The governing board of a school district or a county board of education, on a districtwide or countywide basis or on behalf of one or more of its schools or programs, after a public hearing on the matter, may request the State Board of Education to waive all or part of any section of this code or any regulation adopted by the State Board of Education that implements a provision of this code that may be waived, except:

- (1) Article 1 (commencing with Section 15700) and Article 2 (commencing with Section 15780) of Chapter 4 of Part 10.
- (2) Chapter 6 (commencing with Section 16000) of Part 10.

(3) Chapter 12 (commencing with Section 17000), Chapter 12.5 (commencing with Section 17070.10), and Chapter 14 (commencing with Section 17085) of Part 10.

(4) Part 13 (commencing with Section 22000).

(5) Section 35735.1.

(6) Paragraph (8) of subdivision (a) of Section 37220.

(7) The following provisions of Part 10.5 (commencing with Section 17211):

(A) Chapter 1 (commencing with Section 17211).

(B) Article 1 (commencing with Section 17251) to Article 6 (commencing with Section 17365), inclusive, of Chapter 3.

(C) Sections 17416 to 17429, inclusive; Sections 17459 and 17462 and subdivision (a) of Section 17464; and Sections 17582 to 17592, inclusive.

(8) The following provisions of Part 24 (commencing with Section 41000):

(A) Sections 41000 to 41360, inclusive.

(B) Sections 41420 to 41423, inclusive.

(C) Sections 41600 to 41866, inclusive.

(D) Sections 41920 to 42911, inclusive.

(9) Sections 44504 and 44505.

(10) Article 3 (commencing with Section 44930) of Chapter 4 of Part 25 and regulations in Title 5 of the California Code of Regulations adopted pursuant to Article 3 (commencing with Section 44930) of Chapter 4 of Part 25.

(11) Part 26 (commencing with Section 46000).

(12) Chapter 6 (commencing with Section 48900) and Chapter 6.5 (commencing with Section 49060) of Part 27.

(13) Section 51513.

(14) Chapter 6.10 (commencing with Section 52120) of Part 28, relating to class size reduction.

(15) Section 52163.

(16) The identification and assessment criteria relating to any categorical aid program, including Sections 52164.1 and 52164.6.

(17) Sections 52165, 52166, and 52178.

(18) Article 3 (commencing with Section 52850) of Chapter 12 of Part 28.

(19) Section 56364.1, except that this restriction shall not prohibit the State Board of Education from approving any waiver of Section 56364 or Section 56364.2, as applicable, relating to full inclusion.

(20) Article 4 (commencing with Section 60640) of Chapter 5 of Part 33, relating to the STAR Program, and any other provisions of Chapter 5 (commencing with Section 60600) of Part 33 that establish requirements for the STAR Program.

(b) Any waiver of provisions related to the programs identified in Section 52851 shall be granted only pursuant to Article 3 (commencing with Section 52850) of Chapter 12 of Part 28.

(c) The waiver of an advisory committee required by law shall be granted only pursuant to Article 4 (commencing with Section 52870) of Chapter 12 of Part 28.

(d) Any request for a waiver submitted by the governing board of a school district or a county board of education pursuant to subdivision (a) shall include a written statement as to both of the following:

(1) Whether the exclusive representative of employees, if any, as provided in Chapter 10.7 (commencing with Section 3540) of Division 4 of Title 1 of the Government Code, participated in the development of the waiver.

(2) The exclusive representative's position regarding the waiver.

(e) Any request for a waiver submitted pursuant to subdivision (a) relating to a regional occupational center or program established pursuant to Article 1 (commencing with Section 52300) of Chapter 9 of Part 28, that is operated by a joint powers entity established pursuant to Chapter 5 (commencing with Section 6500) of Division 7 of Title 1 of the Government Code, shall be submitted as a joint waiver request for each participating school district and shall meet both of the following conditions:

(1) Each joint waiver request shall comply with all of the requirements of this article.

(2) The submission of a joint waiver request shall be approved by a unanimous vote of the governing board of the joint powers agency.

(f) The governing board of any school district requesting a waiver under this section of any provision of Article 5 (commencing with Section 39390) of Chapter 3 of Part 23 shall provide written notice of any public hearing it conducted pursuant to subdivision (a), at least 30 days prior to the hearing, to each public agency identified under Section 39394.

SEC. 2. Section 42238 of the Education Code is amended to read:

42238. (a) For the 1984–85 fiscal year and each fiscal year thereafter, the county superintendent of schools shall determine a revenue limit for each school district in the county pursuant to this section.

(b) The base revenue limit for the current fiscal year shall be determined by adding to the base revenue limit for the prior fiscal year the following amounts:

(1) The inflation adjustment specified in Section 42238.1.

(2) For the 1995–96 fiscal year, the equalization adjustment specified in Section 42238.4.

(3) For the 1996–97 fiscal year, the equalization adjustments specified in Sections 42238.41, 42238.42, and 42238.43.

(4) For the 1985–86 fiscal year, the amount received per unit of average daily attendance in the 1984–85 fiscal year pursuant to Section 42238.7.

(5) For the 1985–86, 1986–87, and 1987–88 fiscal years, the amount per unit of average daily attendance received in the prior fiscal year pursuant to Section 42238.8.

(6) For the 2003–04 fiscal year, the equalization adjustment specified in Section 42238.44.

(c) Except for districts subject to subdivision (d), the base revenue limit computed pursuant to subdivision (b) shall be multiplied by the district average daily attendance computed pursuant to Section 42238.5.

(d) (1) For districts for which the number of units of average daily attendance determined pursuant to Section 42238.5 is greater for the current fiscal year than for the 1982–83 fiscal year, compute the following amount, in lieu of the amount computed pursuant to subdivision (c):

(A) Multiply the base revenue limit computed pursuant to subdivision (c) by the average daily attendance computed pursuant to Section 42238.5 for the 1982–83 fiscal year.

(B) Multiply the lesser of the amount in subdivision (c) or 1.05 times the statewide average base revenue limit per unit of average daily attendance for districts of similar type for the current fiscal year by the difference between the average daily attendance computed pursuant to Section 42238.5 for the current and 1982–83 fiscal years.

(C) Add the amounts in subparagraphs (A) and (B).

(2) This subdivision shall become inoperative on July 1, 1998.

(e) For districts electing to compute units of average daily attendance pursuant to paragraph (3) of subdivision (a) of Section 42238.5, the amount computed pursuant to Article 4 (commencing with Section 42280) shall be added to the amount computed in subdivision (c) or (d), as appropriate.

(f) For the 1984–85 fiscal year only, the county superintendent shall reduce the total revenue limit computed in this section by the amount of the decreased employer contributions to the Public Employees' Retirement System resulting from enactment of Chapter 330 of the Statutes of 1982, offset by any increase in those contributions, as of the 1983–84 fiscal year, resulting from subsequent changes in employer contribution rates.

(g) The reduction required by subdivision (f) shall be calculated as follows:

(1) Determine the amount of employer contributions that would have been made in the 1983–84 fiscal year if the applicable Public

Employees' Retirement System employer contribution rate in effect immediately prior to the enactment of Chapter 330 of the Statutes of 1982 were in effect during the 1983–84 fiscal year.

(2) Subtract from the amount determined in paragraph (1) the greater of subparagraph (A) or (B):

(A) The amount of employer contributions that would have been made in the 1983–84 fiscal year if the applicable Public Employees' Retirement System employer contribution rate in effect immediately after the enactment of Chapter 330 of the Statutes of 1982 were in effect during the 1983–84 fiscal year.

(B) The actual amount of employer contributions made to the Public Employees' Retirement System in the 1983–84 fiscal year.

(3) For purposes of this subdivision, employer contributions to the Public Employees' Retirement System for any of the following shall be excluded from the calculation specified above:

(A) Positions supported totally by federal funds that were subject to supplanting restrictions.

(B) Positions supported by funds received pursuant to Section 42243.6.

(C) Positions supported, to the extent of employer contributions not exceeding twenty-five thousand dollars (\$25,000) by any single educational agency, from a revenue source determined on the basis of equity to be properly excludable from the provisions of this subdivision by the Superintendent of Public Instruction with the approval of the Director of Finance.

(4) For accounting purposes, the reduction made by this subdivision may be reflected as an expenditure from appropriate sources of revenue as directed by the Superintendent of Public Instruction.

(h) The Superintendent of Public Instruction shall apportion to each school district the amount determined in this section less the sum of:

(1) The district's property tax revenue received pursuant to Chapter 3 (commencing with Section 75) and Chapter 6 (commencing with Section 95) of Part 0.5 of the Revenue and Taxation Code.

(2) The amount, if any, received pursuant to Part 18.5 (commencing with Section 38101) of the Revenue and Taxation Code.

(3) The amount, if any, received pursuant to Chapter 3 (commencing with Section 16140) of the Government Code.

(4) Prior years' taxes and taxes on the unsecured roll.

(5) Fifty percent of the amount received pursuant to Section 41603.

(6) The amount of motor vehicle license fees distributed pursuant to Section 11003.4 of the Revenue and Taxation Code.

(7) The amount, if any, received pursuant to any provision of the Community Redevelopment Law (Part 1 (commencing with Section 33000) of Division 24 of the Health and Safety Code), except for any

amount received pursuant to Section 33401 or 33676 of the Health and Safety Code that is used for land acquisition, facility construction, reconstruction, or remodeling, or deferred maintenance, except for any amount received pursuant to Section 33492.15, paragraph (4) of subdivision (a) of Section 33607.5, or Section 33607.7 of the Health and Safety Code that is allocated exclusively for educational facilities.

(8) For a unified school district, other than a unified school district that has converted all of its schools to charter status pursuant to Section 47606, the amount of statewide average general-purpose funding per unit of average daily attendance received by school districts for each of four grade level ranges, as computed by the State Department of Education pursuant to Section 47633, multiplied by the average daily attendance, in corresponding grade level ranges, of any pupils who attend charter schools funded pursuant to Chapter 6 (commencing with Section 47630) of Part 26.8 for which the district is the sponsoring local educational agency, as defined in Section 47632, and who reside in and would otherwise have been eligible to attend a noncharter school of the district.

(i) No transfer of seventh and eighth grade pupils between an elementary school district and a high school district shall result in the receiving district receiving a revenue limit apportionment for those pupils that exceeds 105 percent of the statewide average revenue limit for the type and size of the receiving school district.

SEC. 3. Section 42238.12 of the Education Code is amended to read:

42238.12. (a) For the 1995–96 fiscal year and each fiscal year thereafter, the county superintendent of schools shall adjust the total revenue limit for each school district in the jurisdiction of the county superintendent of schools by the amount of increased or decreased employer contributions to the Public Employees' Retirement System resulting from the enactment of Chapter 330 of the Statutes of 1982, adjusted for any changes in those contributions resulting from subsequent changes in employer contribution rates, excluding rate changes due to the direct transfer of the state-mandated portion of the employer contributions to the Public Employees' Retirement System, through the current fiscal year. The adjustment shall be calculated for each school district, as follows:

(1) (A) Determine the amount of employer contributions that would have been made in the current fiscal year if the applicable Public Employees' Retirement System employer contribution rate in effect immediately prior to the enactment of Chapter 330 of the Statutes of 1982 were in effect during the current fiscal year.

(B) For the purposes of this calculation, no school district shall have a contribution rate higher than 13.020 percent.

(2) Determine the actual amount of employer contributions made to the Public Employees' Retirement System in the current fiscal year.

(3) If the amount determined in paragraph (1) for a school district is greater than the amount determined in paragraph (2), the total revenue limit computed for that school district shall be decreased by the amount of the difference between those paragraphs; or, if the amount determined in paragraph (1) for a school district is less than the amount determined in paragraph (2), the total revenue limit for that school district shall be increased by the amount of the difference between those paragraphs.

(4) For the purpose of this section, employer contributions to the Public Employees' Retirement System for any of the following positions shall be excluded from the calculation specified above:

(A) Positions or portions of positions supported by federal funds that are subject to supplanting restrictions.

(B) Positions supported by funds received pursuant to Section 42243.6.

(C) Positions supported, to the extent of employers contributions not exceeding twenty-five thousand dollars (\$25,000) by any single educational agency, from a non-General Fund revenue source determined to be properly excludable from this section by the Superintendent of Public Instruction with the approval of the Director of Finance.

(5) For accounting purposes, any reduction to district revenue limits made by this provision may be reflected as an expenditure from appropriate sources of revenue as directed by the Superintendent of Public Instruction.

(6) The amount of the increase or decrease to the revenue limits of school districts computed pursuant to paragraph (3) for the 1995–96 fiscal year or any fiscal year thereafter shall not be adjusted by the deficit factor applied to the revenue limit of each school district pursuant to Section 42238.145.

(b) Funding appropriated through the Budget Act of 2001 or legislation amending the Budget Act of 2001 for the purpose of limiting the reductions to revenue limits calculated pursuant to this section and to Section 2558 for the 2001–02 fiscal year shall be allocated on a one-time basis in the following manner:

(1) Each school district and county office of education subject to a reduced apportionment pursuant to this section or to Section 2558 shall receive a share of the amount described in paragraph (3) that is proportionate to the reduction in their apportionment pursuant to this section or to Section 2558 for the 2001–02 fiscal year as compared to the statewide total reduction that would occur absent this paragraph.

(2) For the 2001–02 fiscal year, in lieu of the alternative calculation authorized by paragraph (1), San Francisco Unified School District shall

receive an amount equal to five dollars and 57 cents (\$5.57) multiplied by its second principal apportionment average daily attendance for the 2001–02 fiscal year.

(3) Notwithstanding any other provision of law, total allocations pursuant to this subdivision shall not exceed thirty-five million dollars (\$35,000,000).

(c) Thirty-five million dollars (\$35,000,000) is hereby appropriated from the General Fund for transfer to Section A of the State School Fund for local assistance for the purpose of limiting the reductions to revenue limits calculated pursuant to this section and to Section 2558 for the 2003–04 fiscal year. Funding from this appropriation shall be allocated in the following manner:

(1) Each school district and county office of education subject to a reduced apportionment pursuant to this section or to Section 2558 shall receive a share of the amount appropriated in this subdivision that is proportionate to the reduction in their apportionment pursuant to this section or to Section 2558 for the 2003–04 fiscal year as compared to the statewide total reduction that would occur absent this paragraph.

(2) For the 2003–04 fiscal year, in lieu of the alternative calculation authorized by paragraph (1), the San Francisco Unified School District shall receive an amount equal to five dollars and 57 cents (\$5.57) multiplied by its second principal apportionment average daily attendance for the 2003–04 fiscal year.

(3) Notwithstanding any other provision of law, total allocations pursuant to this subdivision shall not exceed thirty-five million dollars (\$35,000,000) for the 2003–04 fiscal year.

(4) For the purposes of making the computations required by Sections 8 of Article XVI of the California Constitution, the appropriation made by this section shall be deemed to be “General Fund revenues appropriated for school districts,” as defined in subdivision (c) of Section 41202 of the Education Code, for the 2003–04 fiscal year and included within the “total allocations to school districts and community college districts from General Fund proceeds of taxes appropriated pursuant to Article XIII B,” as defined in subdivision (e) of Section 41202 of the Education Code, for the 2003–04 fiscal year.

(d) For the 2004–05 fiscal year, and each fiscal year thereafter, apportionment reductions pursuant to this section and to Section 2558 shall be limited as follows:

(1) Each school district and county office of education subject to a reduced apportionment pursuant to this section or to Section 2558 shall receive a share of the amount described in paragraph (3) that is proportionate to the reduction in their apportionment pursuant to this section or to Section 2558 for the 2004–05 fiscal year as compared to the statewide total reduction as would occur absent this paragraph.

(2) In lieu of the alternative calculation authorized by paragraph (1), the San Francisco Unified School District shall receive funding equal to the amount of funding per unit of average daily attendance specified in paragraph (2) of subdivision (c) as increased annually by cost-of-living adjustments specified in Section 42238.1, multiplied by its second principal apportionment average daily attendance for that fiscal year.

(3) Notwithstanding any other provision of law, total limitations pursuant to this subdivision shall not annually exceed the amount described in paragraph (3) of subdivision (c) as annually increased by the cost-of-living adjustments specified in Section 42238.1, multiplied by the annual statewide percentage growth in total average daily attendance, measured at the second principal apportionment.

SEC. 4. Section 42238.44 of the Education Code is amended to read:

42238.44. (a) This section shall be known and may be cited as, the Fairness in Education Funding Act.

(b) (1) For the 2003–04 fiscal year, the Superintendent of Public Instruction shall compute an equalization adjustment for each school district, so that no district’s 2002–03 base revenue limit per unit of average daily attendance is less than the 2002–03 base revenue limit per unit of average daily attendance above which fall not more than 10 percent of the total statewide units of average daily attendance for each category of school district set forth in subdivision (c).

(2) For purposes of this section, the district base revenue limit and the statewide average base revenue limit shall not include any amounts attributable to Section 45023.4, 46200, or 46201.

(c) Subdivision (b) shall apply to the following school districts, which shall be grouped according to size and type as follows:

District	ADA
Elementary . . . . .	less than 101
Elementary . . . . .	more than 100
High School . . . . .	less than 301
High School . . . . .	more than 300
Unified . . . . .	less than 1,501
Unified . . . . .	more than 1,500

(d) The Superintendent of Public Instruction shall compute a revenue limit equalization adjustment for each school district’s base revenue limit per unit of average daily attendance as follows:

(1) Multiply the amount computed for each school district pursuant to subdivision (b) by the average daily attendance used to calculate the district’s revenue limit for the 2003–04 fiscal year.

(2) Divide forty million dollars (\$40,000,000) for the 2003–04 fiscal year by the statewide sum of the amount computed pursuant to paragraph (1).

(3) Multiply the amount computed for the school district pursuant to paragraph (1) of subdivision (b) by the amount computed pursuant to paragraph (2).

(e) (1) For the purposes of this section, the 2002–03 statewide 90th percentile base revenue limit determined pursuant to paragraph (1) of subdivision (b), and the fraction computed pursuant to paragraph (2) of subdivision (d) for the 2002–03 second principal apportionment, shall be final, and shall not be recalculated at subsequent apportionments. The fraction computed pursuant to paragraph (2) of subdivision (d) shall not, under any circumstances, exceed 1.00. For purposes of determining the size of a school district pursuant to subdivision (c), county superintendents of schools, in conjunction with the Superintendent of Public Instruction, shall use school district revenue limit average daily attendance for the 2002–03 fiscal year as determined pursuant to Section 42238.5 and Article 4 (commencing with Section 42280).

(2) For the purposes of calculating the size of a school district pursuant to subdivision (c), the Superintendent of Public Instruction shall include units of average daily attendance of any charter school for which the school district is the chartering agency.

(3) For the purposes of computing the target amounts pursuant to subdivision (b), the Superintendent of Public Instruction shall count all charter school average daily attendance toward the average daily attendance of the school district that is the chartering agency.

SEC. 5. Section 42238.45 is added to the Education Code, to read:

42238.45. (a) (1) For the 2001–02 fiscal year, the Superintendent of Public Instruction shall compute an adjustment for each school district, so that no district’s 2000–01 base revenue limit per unit of average daily attendance is less than the 2000–01 base revenue limit per unit of average daily attendance above which fall not more than 10 percent of the total statewide units of average daily attendance for each category of school district set forth in subdivision (b).

(2) For purposes of this section, the district base revenue limit and the statewide average base revenue limit shall not include any amounts attributable to Section 45023.4, 46200, or 46201.

(b) Subdivision (a) shall apply to the following school districts, which shall be grouped according to size and type as follows:

District	ADA
Elementary . . . . .	less than 101
Elementary . . . . .	more than 100
High School . . . . .	less than 301

High School . . . . .	more than 300
Unified . . . . .	less than 1,501
Unified . . . . .	more than 1,500

(c) For the 2001–02 fiscal year, the Superintendent of Public Instruction shall determine and allocate on a one-time basis for each school district amounts as follows:

(1) Multiply the amount computed for each school district pursuant to subdivision (a) by the average daily attendance used to calculate the district’s revenue limit for the 2001–02 fiscal year.

(2) Divide forty million dollars (\$40,000,000) appropriated for purposes of this section for the 2001–02 fiscal year by the statewide sum of the amount computed pursuant to paragraph (1).

(3) Multiply the amount computed for the school district pursuant to paragraph (1) of subdivision (a) by the amount computed pursuant to paragraph (2).

(d) (1) For the purposes of calculating the size of a school district pursuant to subdivision (b), the Superintendent of Public Instruction shall include units of average daily attendance of any charter school for which the school district is the chartering agency.

(2) For the purposes of computing the target amounts pursuant to subdivision (a), the Superintendent of Public Instruction shall count all charter school average daily attendance toward the average daily attendance of the school district that is the chartering agency.

(e) Allocations for purposes of this section do not represent adjustments to school district base revenue limits.

SEC. 6. Section 51725 of the Education Code is amended to read:

51725. (a) The High-Tech High School Grant Program is hereby established to provide five one-time grants to eligible school districts or charter schools for purposes of establishing new high-tech high schools.

(b) As used in this article, “high-tech high school” means a public comprehensive high school maintained by a school district or charter school that offers a very rigorous college preparation curriculum with an emphasis in science, mathematics, and engineering, and also may include digital arts and media. Technology shall be integrated throughout the curriculum and shall be a fundamental tool for both teaching and learning. Instruction at a high-tech high school shall be consistent with the academic content standards adopted by the State Board of Education and the applicable curriculum framework content standards adopted by the State Board of Education. A high-tech high school may not include a school maintained by the California Youth Authority, or operated by a regional occupational center or program, continuation high school, community day school, a State Special School, distance learning school, or independent study school. An adult

education program may not be offered at a high-tech high school. Nothing in this section prohibits a comprehensive high school that operates a high-tech high school from having an affiliation with a regional occupational center or program, but the regional occupational center or program shall not be eligible for funding under this article and may not establish a high-tech high school under this article.

(c) The Superintendent of Public Instruction shall administer the application process for the award of grants. The Superintendent of Public Instruction, with the approval of the State Board of Education shall award grants on a competitive basis. The total amount of each grant is two million dollars (\$2,000,000), which shall be awarded over two years. The award of a grant requires a local match that is at least equal to the amount of the grant. All funds awarded pursuant to this section shall be used solely for the establishment of high-tech high schools. Notwithstanding any other provision of law, the Superintendent of Public Instruction shall not be required to adopt regulations in order to administer the High-Tech High School Grant Program and allocate program funds.

(d) Funding for the purposes of this article is contingent on an appropriation made in the annual Budget Act or other legislation. Funding in each year shall be equally divided among schools awarded grants, with no recipient receiving more than two million dollars (\$2,000,000) in total over the two years.

SEC. 7. Section 51727 of the Education Code is amended to read:

51727. (a) The Superintendent of Public Instruction shall accept applications and may not award more than five grants. Applications shall be due February 1, 2002. The Superintendent of Instruction shall complete the review of applications pursuant to subdivision (c) of Section 51726 and make awards pursuant to subdivision (d) of Section 51726 no later than March 31, 2002. The proposed high-tech high school for which a school district or charter school receives funding shall be operational by September 30, 2002. If the Superintendent of Public Instruction does not receive five applications that merit funding pursuant to subdivision (c) of Section 51726, some or all grants may be delayed until receiving the approval of the State Board of Education.

(b) The Superintendent of Public Instruction, with the approval of the State Board of Education, may, upon a showing of good cause and if necessary, extend any of the following dates:

- (1) The deadline for application submission.
- (2) The date the grant award is to be made.
- (3) The date by which a high-tech high school is to be operational.

(c) If a grant recipient fails to make the high-tech high school operational by the specified date, the Superintendent of Public Instruction, with the approval of the State Board of Education may

rescind the grant award and award the grant funds to another eligible grant recipient as determined by the Superintendent of Public Instruction, with the approval of the State Board of Education.

(d) If the grant funds awarded pursuant to this article are not used towards the establishment and implementation of a new high-tech high school, the Superintendent of Public Instruction shall withhold an amount equal to the funds the school district or charter school received pursuant to this article from the next monthly principal apportionment payment. The Superintendent of Public Instruction shall conduct compliance visits as required to ensure that the funds are used appropriately.

SEC. 8. Section 51729 of the Education Code is amended to read: 51729. This article shall remain in effect only until January 1, 2004, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2004, deletes or extends that date.

SEC. 9. Section 52055.660 is added to the Education Code to read: 52055.660. Notwithstanding any provision of this article, for the 2001-02 fiscal year, the Superintendent of Public Instruction shall allocate funds for the program established by this article as specified in the Budget Act of 2001, as amended by legislation enacted during the 2001-02 Third Extraordinary Session.

SEC. 10. Section 1 of Chapter 723 of the Statutes of 2001 is amended to read:

Section 1. Of the funds provided pursuant to Schedules (1), (16), and (17) of Item 6110-485 of Section 2 of the Budget Act of 2001, the Controller shall allocate the amounts as follows:

(a) Five million four hundred fifty-six thousand dollars (\$5,456,000) for the payment of claims from school districts, except for community colleges, pursuant to subdivisions (c) and (h) of Section 48980 of the Education Code (Annual Parent Notification-Staff Development, CSM 97-TC-24), for costs incurred from July 1, 1997, to June 30, 2002, inclusive.

(b) (1) The payment of claims from school districts, except for community college districts, pursuant to former Section 38048 of, and Sections 39831.3 and 39831.5 of, the Education Code and Section 22112 of the Vehicle Code (School Bus Safety Act II, CSM 97-TC-22), for costs incurred from July 1, 1996, to June 30, 2002, inclusive, shall only be made if funds for this purpose are provided in the Budget Act of 2001, as amended by legislation enacted during the 2001-02 Third Extraordinary Session, or any future Budget Acts.

(2) On or before March 18, 2002, the State Auditor shall conduct an audit of the School Bus Safety Act II (CSM-97-TC-22) mandate to provide independently developed and verified information related to the cost of claims associated with the mandate. The State Auditor shall

report the results of the audit and recommendations to the appropriate budget subcommittees of each house, the Legislative Analyst, and the Department of Finance on or before March 30, 2002. In conducting the audit, the State Auditor shall do all of the following:

(A) Review and evaluate the laws, rules, and regulations applicable to the issues.

(B) Review the Commission on State Mandates parameters and guidelines to determine if they adequately define the mandate's reimbursable activities and provide sufficient guidance for claiming reimbursable costs.

(C) Examine any prior reviews of the cost of claims.

(D) Examine a sample of the cost of claims to determine if the expenditures and activities that are claimed are consistent with the parameters and guidelines for reimbursement that have been adopted by the Commission on State Mandates.

(E) Evaluate the commission's methodology for estimating the future costs of this mandate.

(3) Payment of claims pursuant to this subdivision shall not be made by the Controller until the time the State Auditor has completed the audit required by paragraph (2) to determine whether the parameters and guidelines related to the act are consistent with the original intent of the Legislature and the Department of Finance has approved the release of these funds.

(4) The Department of Finance shall not approve the release of these funds sooner than 30 days after notification in writing of the necessity therefor to the chairperson of the budget subcommittee of each house that considers education budgets. The notification shall include a statement from the Controller specifying the extent to which the proposed release of funds is consistent with, or departs from, the findings of the State Auditor.

(c) Thirty-one million two hundred thirty-nine thousand dollars (\$31,239,000) for the payment of claims from school districts, except for community college districts, pursuant to Sections 628.2 and 628.6 of the Penal Code and Sections 700 to 704, inclusive, of Title 5 of the California Code of Regulations, and the Department of Education Guidelines for School Crimes Reporting (School Crimes Reporting II, CSM 97-TC-03), for costs incurred from July 1, 1996, to June 30, 2002, inclusive.

SEC. 11. Section 33 of Chapter 891 of the Statutes of 2001 is amended to read:

Sec. 33. The amount of forty million dollars (\$40,000,000) is hereby appropriated from the Proposition 98 Reversion Account to the Superintendent of Public Instruction for transfer to Section A of the State

School Fund for the purposes of Section 42238.45 of the Education Code.

SEC. 12. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

In order to ensure continued funding and operation of the primary and secondary public schools in this state, it is necessary that this act take effect immediately.

---

### CHAPTER 3

An act making an appropriation to amend and supplement the Budget Act of 2001 for the support of the government of the State of California and for several public purposes in accordance with the provisions of Section 12 of Article IV of the Constitution of the State of California and declaring the urgency thereof, to take effect immediately.

[Approved by Governor April 25, 2002. Filed with  
Secretary of State April 26, 2002.]

*The people of the State of California do enact as follows:*

SECTION 1. The Legislature hereby finds and declares all of the following:

(a) The California economy is suffering the effects of the tragic events of September 11, 2001.

(b) Providing economic stimulus and employment opportunities to the citizens of California will help prevent further erosion of the economy.

(c) Construction of public works projects provides numerous jobs and the need for related goods and services.

(d) State government can help provide economic stimulus and employment opportunities by ensuring that construction projects are continued.

(e) Given the General Fund revenue shortfalls, it is necessary to utilize lease revenue bond financing in order to continue construction projects that were previously funded from the General Fund.

(f) It is necessary to provide funding for projects that have either exceeded or are anticipated to exceed previously authorized appropriations due to contractor bids that exceeded authorized levels or design estimates.

SEC. 2. (a) The State Public Works Board shall, on or before June 30, 2002, disencumber and revert any funds from General Fund appropriations for the projects listed in subdivision (b).

(b) There is hereby appropriated the sum of three hundred seventy million nine hundred thirty-six thousand dollars (\$370,936,000) from the Public Buildings Construction Fund, in accordance with the following schedule:

(1) Thirteen million seven hundred fifty-five thousand dollars (\$13,755,000) to the California Conservation Corporation for project 20.10.150-Delta Service Center Site Selection and Acquisition—Acquisition.

(2) Twenty-six million seven hundred thirty-nine thousand dollars (\$26,739,000) to the University of California for project 99.11.030-Merced Campus Classroom and Office Building-Preliminary plans, working drawings, construction, and equipment.

(3) Three hundred eight million five hundred thousand dollars (\$308,500,000) to the University of California for project 99.00.055-Institutes for Science and Innovation-Preliminary plans, working drawings, construction, and equipment.

(4) Five million four hundred seventy thousand dollars (\$5,470,000) to the Department of Justice for project 85.60.020-Santa Rosa Replacement Laboratory-Construction.

(5) Two million seven hundred eight thousand dollars (\$2,708,000) to the Department of the Youth Authority for project 60.54.110-Fred C. Nelles Youth Correctional Facility: Replace Taft Adjustment Center-Construction.

(6) Six million two hundred forty thousand dollars (\$6,240,000) to the Department of Justice for project 85.60.060-Redding Replacement Laboratory-Construction.

(7) One million seven hundred seventy-one thousand dollars (\$1,771,000) to the Department of Forestry and Fire Protection for project 30.10.125-Mendocino Ranger Unit Headquarters: Replace Automotive Shop-Construction.

(8) One million three hundred ninety thousand dollars (\$1,390,000) to the Department of Forestry and Fire Protection for project 30.40.090-Antelope Forest Fire Station: Replace Barracks/Mess Hall-Working drawings and construction.

(9) One million five hundred ten thousand dollars (\$1,510,000) to the Department of Forestry and Fire Protection for project 30.40.105-Vallecito Conservation Camp: Replace Utilities/Construct Apparatus Buildings-Working drawings and construction.

(10) Two million nine hundred thirteen thousand dollars (\$2,913,000) to the California Department of Corrections for project

61.34.426-Ironwood State Prison, Blythe: Correctional Treatment Center, Phase II-Construction.

SEC. 3. The State Public Works Board may issue lease-revenue bonds, notes, or bond anticipation notes pursuant to Chapter 5 (commencing with Section 15830) of Part 10b of Division 3 of Title 2 of the Government Code to finance the design or construction, or both, of the projects authorized by subdivision (b) of Section 2.

SEC. 4. The State Public Works Board and the appropriate agency or department may obtain interim financing for the project costs authorized in subdivision (b) of Section 2 from any appropriate source, including, but not limited to, the Pooled Money Investment Account pursuant to Sections 16312 and 16313 of the Government Code.

SEC. 5. Each participating agency or department that has a project scheduled in subdivision (b) of Section 2 is authorized and directed to execute and deliver all leases, contracts, agreements, or other documents necessary or advisable to consummate the sale of bonds or otherwise effectuate the financing of these scheduled projects.

SEC. 6. The State Public Works Board may authorize the augmentation of the cost of construction of the projects scheduled in subdivision (b) of Section 2 pursuant to the board's authority under Section 13332.11 of the Government Code. In addition, the board may authorize any additional amount necessary to establish a reasonable construction reserve and to pay the cost of financing including the payment of interest during the design and construction of the projects, the costs of financing a debt service fund, and the cost of issuance of permanent financing for the projects. This additional amount may include interest payable on any interim financing obtained.

SEC. 7. Notwithstanding any other provision of law, approvals by the State Public Works Board for the project identified under paragraph (3) of subdivision (b) of Section 2 shall apply only to the allocation of state capital outlay funds appropriated by the Legislature, including land acquisition and equipment funds.

SEC. 8. In the event that the bonds authorized for projects in subdivision (b) of Section 2 are not sold, the agency or department that has initiated loans shall commit a sufficient portion of its current support appropriation, as determined by the Department of Finance, to repay any interim financing. It is the intent of the Legislature that this commitment be made until all interim financing is repaid either through the proceeds from the sale of bonds or from an appropriation.

SEC. 9. Notwithstanding any other provision of law, the funds appropriated in subdivision (b) of Section 2 shall be available for encumbrance until June 30, 2007.

SEC. 10. It is the intent of the Legislature that the appropriations in subdivision (b) of Section 2 shall replace amounts from prior Budget Act

appropriations that will be reverted through the State Public Works Board process. Any expenses previously incurred from these funds shall be recorded as a cost to the Public Buildings Construction Fund rather than the General Fund.

SEC. 11. The State Public Works Board is not deemed a lead or responsible agency for purposes of the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code for any activities under the State Building Construction Act of 1955 (Part 10b (commencing with Section 15800) of the Government Code. This section does not exempt any participating agency or department from the requirements of the California Environmental Quality Act. This section is intended to be declarative of existing law.

SEC. 12. Notwithstanding any other provision of law, the Department of Finance may transfer, on or before June 30, 2002, any unallocated or unencumbered funds, or both, previously transferred from the General Fund to the Inmate Construction Revolving Account back to the General Fund.

SEC. 13. Notwithstanding any other provision of law, the Department of Finance may transfer, on or before June 30, 2002, any unallocated or unencumbered funds, or both, previously transferred from the General Fund to the Architectural Revolving Fund back to the General Fund.

SEC. 14. The projects identified in paragraph (2) of subdivision (b) of Section 2-University of California Merced Campus Classroom and Office Building and paragraph (3) of subdivision (b) of Section 2-University of California Institutes for Science and Innovation, may utilize design-build construction consistent with the University of California's practices, policies, and procedures.

SEC. 15. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

To supplement the amount appropriated in the Budget Act of 2001 in order to provide for the health and safety of the citizens of California, it is necessary that this act take effect immediately.

---

#### CHAPTER 4

An act to amend Section 1280 of the Unemployment Insurance Code, relating to unemployment insurance, and making an appropriation therefor.

[Approved by Governor May 6, 2002. Filed with Secretary of State May 6, 2002.]

*The people of the State of California do enact as follows:*

SECTION 1. Section 1280 of the Unemployment Insurance Code is amended to read:

1280. (a) For any new claims filed with an effective date on or after January 1, 1992, and prior to September 11, 2001, an individual’s weekly benefit amount is the amount appearing in column B in the following table opposite that wage bracket in column A that contains the amount of wages paid to the individual for employment by employers during the quarter of his or her base period in which his or her wages were the highest.

A	B
Amount of wages in highest quarter	Weekly benefit amount
\$900.00– 948.99 .....	40
949.00– 974.99 .....	41
975.00–1,000.99 .....	42
1,001.00–1,026.99 .....	43
1,027.00–1,052.99 .....	44
1,053.00–1,078.99 .....	45
1,079.00–1,117.99 .....	46
1,118.00–1,143.99 .....	47
1,144.00–1,169.99 .....	48
1,170.00–1,195.99 .....	49
1,196.00–1,221.99 .....	50
1,222.00–1,247.99 .....	51
1,248.00–1,286.99 .....	52
1,287.00–1,312.99 .....	53
1,313.00–1,338.99 .....	54
1,339.00–1,364.99 .....	55
1,365.00–1,403.99 .....	56
1,404.00–1,429.99 .....	57
1,430.00–1,455.99 .....	58
1,456.00–1,494.99 .....	59
1,495.00–1,520.99 .....	60
1,521.00–1,546.99 .....	61
1,547.00–1,585.99 .....	62
1,586.00–1,611.99 .....	63

1,612.00–1,637.99 .....	64
1,638.00–1,676.99 .....	65
1,677.00–1,702.99 .....	66
1,703.00–1,741.99 .....	67
1,742.00–1,767.99 .....	68
1,768.00–1,806.99 .....	69
1,807.00–1,832.99 .....	70
1,833.00–1,871.99 .....	71
1,872.00–1,897.99 .....	72
1,898.00–1,936.99 .....	73
1,937.00–1,975.99 .....	74
1,976.00–2,001.99 .....	75
2,002.00–2,040.99 .....	76
2,041.00–2,066.99 .....	77
2,067.00–2,105.99 .....	78
2,106.00–2,144.99 .....	79
2,145.00–2,170.99 .....	80
2,171.00–2,209.99 .....	81
2,210.00–2,248.99 .....	82
2,249.00–2,287.99 .....	83
2,288.00–2,326.99 .....	84
2,327.00–2,352.99 .....	85
2,353.00–2,391.99 .....	86
2,392.00–2,430.99 .....	87
2,431.00–2,469.99 .....	88
2,470.00–2,508.99 .....	89
2,509.00–2,547.99 .....	90
2,548.00–2,586.99 .....	91

4,228.00-4,264.99 .....	130
4,265.00-4,301.99 .....	131
4,302.00-4,338.99 .....	132
4,339.00-4,375.99 .....	133
4,376.00-4,412.99 .....	134
4,413.00-4,449.99 .....	135
4,450.00-4,486.99 .....	136
4,487.00-4,523.99 .....	137
4,524.00-4,560.99 .....	138
4,561.00-4,597.99 .....	139
4,598.00-4,634.99 .....	140
4,635.00-4,671.99 .....	141
4,672.00-4,708.99 .....	142
4,709.00-4,745.99 .....	143

4,746.00–4,782.99 .....	144
4,783.00–4,819.99 .....	145
4,820.00–4,856.99 .....	146
4,857.00–4,893.99 .....	147
4,894.00–4,930.99 .....	148
4,931.00–4,966.99 .....	149

If the amount of wages paid an individual for employment by employers exceeds four thousand nine hundred sixty-six dollars and ninety-nine cents (\$4,966.99) in the quarter of his or her base period in which these wages were highest, the individual's weekly benefit amount shall be 39 percent of these wages divided by 13, but in no case shall this amount exceed two hundred thirty dollars (\$230). If the benefit payable under this subdivision is not a multiple of one dollar (\$1), it shall be computed to the next higher multiple of one dollar (\$1).

(b) Notwithstanding subdivision (a), for existing claims on or after September 11, 2001, provided that the unemployment benefits have not been exhausted as of September 11, 2001, and for all new claims filed with an effective date beginning on or after September 11, 2001, and prior to January 1, 2003, an individual's weekly benefit amount is the amount for weeks of unemployment beginning on or after September 11, 2001, appearing in column B in the following table opposite that wage bracket in column A that contains the amount of wages paid to the individual for employment by employers during the quarter of his or her base period in which his or her wages were the highest.

A	B
Amount of wages in highest quarter	Weekly benefit amount

2,704.00–2,742.99 .....	95
2,743.00–2,781.99 .....	96

If the amount of wages paid an individual for employment by employers exceeds two thousand seven hundred eighty-one dollars and ninety-nine cents (\$2,781.99) in the quarter of his or her base period in which these wages were highest, the individual's weekly benefit amount shall be 45 percent of these wages divided by 13, but in no case may this amount exceed three hundred thirty dollars (\$330).

(c) For new claims filed with an effective date beginning on or after January 1, 2003, an individual's weekly benefit amount is the amount appearing in column B in the following table opposite the wage bracket in column A that contains the wages paid to the individual for employment by employers during the quarter of his or her base period in which his or her wages were the highest.

1,742.00–1,767.99 .....	68
1,768.00–1,806.99 .....	69
1,807.00–1,832.99 .....	70

If the amount of wages paid an individual for employment by employers exceeds one thousand eight hundred thirty-two dollars and ninety-nine cents (\$1,832.99) in the quarter of his or her base period in which these wages were highest, the individual’s weekly benefit amount shall be 50 percent of these wages divided by 13, but in no case shall this amount exceed the applicable of the following:

(1) For new claims filed with an effective date beginning on or after January 1, 2003, and before January 1, 2004, three hundred seventy dollars (\$370).

(2) For new claims filed with an effective date beginning on or after January 1, 2004, and before January 1, 2005, four hundred ten dollars (\$410).

(3) For new claims filed with an effective date beginning on or after January 1, 2005, four hundred fifty dollars (\$450).

If the benefit payable under this subdivision is not a multiple of one dollar (\$1), it shall be computed to the next higher multiple of one dollar (\$1).

SEC. 2. (a) It is the intent of the Legislature in enacting the amendments to Section 1280 of the Unemployment Insurance Code that those amendments be construed to allow a qualified unemployed person’s benefit year to begin on the date that the qualified unemployed person became unemployed.

(b) For purposes of subdivision (a), “qualified unemployed person” means a person who meets all of the following conditions:

(1) The person became unemployed on or after September 11, 2001, and before January 1, 2002.

(2) The person did not file a claim for unemployment compensation benefits on or before January 1, 2002, because that individual sought the additional benefits that would have been paid on or after January 1, 2002.

(3) The person filed a new claim for unemployment compensation benefits with an effective date beginning on January 6, 2002, or January 13, 2002.

(c) It is the further intent of the Legislature to make the payment of unemployment insurance benefit increases effective in the most expeditious manner.

SEC. 3. From the moneys transferred to the state's Unemployment Trust Fund pursuant to subsection (d) of Section 1103 of Title 42 of the United States Code, six hundred million dollars (\$600,000,000) shall be utilized for the payment of unemployment compensation and for ensuring the solvency of the state's Unemployment Trust Fund.

## PREFACE

### **Digests**

The Summary Digest consists of a short summary of each law enacted, and of each constitutional amendment, concurrent or joint resolution adopted by the Legislature in 2002.

The text of the Summary Digest is arranged numerically by chapter number.

Superior numbers following the title refer to a Governor's Message affecting that law. These are printed after the digests in the "Digest Chapters Superior Numbers" section.

### **Cross Reference Tables**

Cross reference tables are arranged numerically by bill or resolution number and indicate the chapter number of each.

### **New General Laws**

Lists new general laws passed in the years 1999–2002 which do not specifically amend, add to, or repeal any existing code or general law.

### **Index**

A subject matter index to all measures, including constitutional amendments and resolutions, is included.

### **Statutory Record**

This edition of the Summary Digest includes a statutory record for 1999–2002. Superior numbers following the *Effect* refer to a special condition affecting that section.

Cumulative statutory records for 10-year periods, 1989–1998, 1979–1988, 1969–1978, 1959–1968 and 1949–1958, and for the 16-year period, 1933–1948, are published in separate volumes, which supplement the original statutory record, 1850–1932, published in 1933.

## EFFECTIVE DATES

### Regular Session

The 2001–02 Regular Session reconvened on January 7, 2002, and adjourned *sine die* on November 30, 2002. Statutes enacted in 2002, other than those taking immediate effect, will become effective January 1, 2003. In absence of other considerations, the provisions of a statute become operative on the date it takes effect. Digests indicate statutes taking immediate effect.

An urgency statute, and a statute calling an election, providing for a tax levy, or making an appropriation for the usual current expenses of the state may take effect immediately. Such a statute becomes *effective* on the date it is filed with the Secretary of State.

However, any statute may, by its own terms, delay the *operation* of its provisions until the happening of some contingency, until a specified time, or until a vote of the electors at a statewide election. Also, a later statute or a general provision in a particular code may delay the operation of a statute to a time after its effective date.

The effective date of a joint or concurrent resolution is the date it is filed with the Secretary of State.

A constitutional amendment proposed by the Legislature and adopted by the people takes effect the day after the election unless the measure provides otherwise.

### Extraordinary Sessions

An urgency statute enacted at a special session of the Legislature takes effect immediately, as outlined above, and the same rules apply with respect to a delayed *operative date*. A nonurgency statute takes effect on the 91st day after adjournment of the special session at which the bill was passed. The effective date of a concurrent resolution is the date it is filed with the Secretary of State.

The 2001–02 Second Extraordinary Session reconvened on January 7, 2002, and adjourned *sine die* on May 9, 2002. Statutes enacted at an extraordinary session, other than those taking immediate effect, will become effective on the 91st day after adjournment. The 91st day after adjournment is August 8, 2002. Please refer to the preceding year’s Statutes and Amendments to the Codes for statutes enacted prior to the reconvening date.

The 2001–02 Third Extraordinary Session convened on January 10, 2002, and adjourned *sine die* on May 2, 2002. Statutes enacted at an extraordinary session, other than those taking immediate effect, will become effective on the 91st day after adjournment. The 91st day after adjournment is August 1, 2002.

**DIGESTS OF STATUTES  
ENACTED IN 2002**

2001–02 REGULAR SESSION

---

---

**BILL CHAPTERS**

Ch. 1 (SB 65) Burton. State employees: State Bargaining Unit 6.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of a memorandum of understanding entered into between the state employer and State Bargaining Unit 6 (California Correctional Peace Officers Association), and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would also provide that provisions of the memorandum of understanding approved by this bill that require the expenditure of funds on or after July 1, 2001, may not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer and the affected employee organization shall meet and confer to renegotiate the affected provisions.

(2) Existing law contains various provisions relating to civil service and employer-employee relations between the state and its employees and contains comparable provisions, that apply to state employees in State Bargaining Unit 6, with respect to general reemployment lists; reinstatements; probationary periods; rejection of probationers; relocation; transfers; use of broadband classifications; personnel classification plans; demonstration projects on classifications, compensation, and related projects; salary ranges; layoffs; demotions; seniority; and demotions in lieu of layoffs. Existing law also establishes procedures for the adoption of regulations by the Department of Personnel Administration and contains comparable provisions that apply only to state employees in State Bargaining Unit 6.

This bill would delete those comparable provisions and would instead make the general provisions applicable to state employees in State Bargaining Unit 6.

(3) Existing law provides that in any case where specified provisions of the State Civil Service Act and related statutory provisions are in conflict with the provisions of a memorandum of understanding reached between the state employer and a recognized employee organization, the memorandum of understanding shall be controlling without further legislative action.

This bill would additionally make that provision applicable to specified provisions of the State Civil Service Act relating to military leaves of absence and layoffs.

(4) Existing law declares that it is the policy of the state to pay state traffic officers compensation that is comparable to that paid to officers employed by the police departments of Los Angeles, San Diego, Oakland, and San Francisco.

This bill would require the state to compensate sworn members of the California Highway Patrol who are rank-and-file members of State Bargaining Unit 5 to be paid the estimated average total compensation, as defined, for each corresponding rank for those police departments, unless otherwise agreed by the state and the exclusive representative in the collective bargaining process. The bill would require the state and the exclusive representative to jointly survey annually and calculate the estimated average total compensation, as specified.

(5) The Public Employees' Retirement Law defines "final compensation" for purposes of calculating retirement benefits.

This bill would provide that, for patrol members in State Bargaining Unit 5 and specified excluded patrol members, who retire or die between July 1, 2001, and June 30, 2004, or

between July 1, 2004, and June 30, 2006, the member's final compensation shall be increased by a specified percentage based on the member's contribution rate.

(6) Existing law provides that the contribution rates for state miscellaneous, state industrial, and state safety members of the Public Employees' Retirement System in State Bargaining Units 7, 8, 10, 12, 13, 16, 18, and 19 shall be reduced by 2<sup>1</sup>/<sub>2</sub>% during the period from August 31, 2001, to June 30, 2002, and by an additional 2<sup>1</sup>/<sub>2</sub>% during the period from July 1, 2002, to June 30, 2003, inclusive.

This bill would make those contribution rate reductions inapplicable to state miscellaneous and state industrial members in State Bargaining Unit 13 and would make other technical and clarifying changes.

(7) Existing law provides that contribution rates for specified state peace officer/firefighter members of the Public Employees' Retirement System shall be reduced by 2<sup>1</sup>/<sub>2</sub>% during the period from August 31, 2001, to June 30, 2002, and by an additional 2<sup>1</sup>/<sub>2</sub>% during the period from July 1, 2002, to June 30, 2003, inclusive.

This bill would make those contribution rate reductions also applicable to state peace officer/firefighter members of the system employed by the legislative branch of state government who are not members of civil service and to state peace officer/firefighter members who are supervisors within the boards and departments of the Youth and Adult Correctional Agency or correctional supervisors within the State Department of Mental Health and would make other technical and clarifying changes to those provisions. The bill would also authorize the Department of Personnel Administration to set different employee contribution rates for other specified peace officer/firefighter members excluded from collective bargaining.

(8) Existing law prescribes a 2<sup>1</sup>/<sub>2</sub>% at age 55 or a 3% at age 55 retirement formula for state peace officer/firefighter members.

This bill would prescribe a 3% at age 50 retirement formula for state peace officer/firefighter members who are members of State Bargaining Unit 6 and who retire or die on or after January 1, 2006.

(9) Existing law, the Public Employees' Medical and Hospital Care Act, authorizes the Board of Administration of the Public Employees' Retirement System to, among other things, approve health benefit plans offered by employee organizations, subject to specified conditions.

This bill would authorize the employee organization for State Bargaining Unit 6 to offer different medical plan designs with varying rates in different areas of the state.

(10) Existing law makes confidential the home address of any of a list of state officers and employees that appears in the Department of Motor Vehicles records, if the officer or employee requests it be kept confidential, with certain exemptions for information available to specified governmental agencies. Violation of the confidentiality requirement is a felony.

This bill would add to that list state employees employed as Museum Security Officers and state employees in specified job classifications within the Department of Motor Vehicles and the California Highway Patrol. This bill, by adding persons to be covered by those confidentiality requirements, would expand the scope of a crime, thereby imposing a state-mandated local program.

(11) Existing provisions of the Budget Act of 2001 appropriate specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for the augmentation of state employee compensation.

This bill would appropriate an additional \$15,421,000, as scheduled, from those funds, in augmentation of specified items of the Budget Act of 2001 for state employee compensation.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(13) This bill also would declare that it is to take effect immediately as an urgency statute.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Ch. 2 (AB 217) Pavley. Batterer's treatment programs.

Existing law prescribes terms of probation, including successful completion of a batterer's treatment program for a person convicted of a crime in which the victim is, among other persons, a spouse or former spouse, a cohabitant or former cohabitant, a person with whom the defendant is having or has had a dating or engagement relationship, or a person with whom the defendant has had a child. If a batterer's treatment program, as specified, is unavailable, the court may direct the defendant to participate in another appropriate counseling program.

This bill would require the defendant to attend consecutive weekly sessions, unless granted an excused absence for good cause by the program for no more than 3 individual sessions during the entire program, and to complete the program within a period of 18 months unless, after a hearing, the court finds good cause to modify these requirements. By increasing probation supervision duties, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 3 (SB 259) Murray. Baldwin Hills Conservancy.

Existing law establishes the Baldwin Hills Conservancy and prescribes the functions and duties of the conservancy. Existing law prescribes the territory under the jurisdiction of the conservancy, and defines the "Baldwin Hills area" as the land area currently within the Kenneth Hahn State Recreation Area, the Baldwin Hills community, the surrounding property bordered on the south by Slauson Avenue, and on the east by La Brea Avenue, and including a spur of land extending from Stocker Street to an area between La Brea Avenue and Crenshaw Boulevard, and including Ballona Creek and adjacent property within  $\frac{1}{4}$  mile of Ballona Creek on either side, from the Santa Monica Freeway (Interstate 10) to the Marina Freeway (Interstate 90).

This bill would revise that definition of the "Baldwin Hills area" to include areas designated on a specified map detailing the boundaries of the Baldwin Hills area, and property adjacent to Ballona Creek within 50 yards of Ballona Creek on either side from the Santa Monica Freeway (Interstate 10) to the Marina Freeway (Interstate 90).

Existing law requires that the governing board of the conservancy consist of 9 voting members, including, among other members, 3 members of the public appointed by the Governor who are residents of Los Angeles County selected from a list of prominent members of the community who shall represent the diversity of the surrounding community.

This bill would increase to 13 the number of voting members of the board, and would require that 6 members of the public who are residents of Los Angeles County and represent the diversity of the surrounding community be appointed by the Governor. The bill would require that of those 6 members, one member shall represent Culver City, and 3 members shall be residents of specified communities and members of homeowner groups within those communities. The bill would also include, among the voting members of the board, the Members of the Los Angeles County Board of Supervisors within whose district the majority of the Baldwin Hills area is located. The bill would also require the board to perform a study of the potential environmental and recreational uses of Ballona Creek and the adjacent property, as specified, develop a proposed map for that area, and provide a report to the Legislature on those activities by January 1, 2003.

Existing law requires the conservancy to review and approve any operating agreement or amendments to an existing operating agreement between the Department of Parks and Recreation and any local operating agency, including the County of Los Angeles, for the Kenneth Hahn State Recreation Area, and specifies that any proposed operating agreement or an amendment to an agreement shall not be effective unless the conservancy provides written approval of the proposed agreement.

This bill would delete those provisions pertaining to operating agreements or amendments to operating agreements and would require that any proposed operating agreement, or amendment to an agreement, for the Kenneth Hahn State Recreation Area to be submitted to the conservancy at least 90 days prior to the proposed effective date of the agreement to enable the conservancy to provide input, as appropriate.

Existing law requires the conservancy to approve changes to the current agreement for the operation of the Kenneth Hahn State Recreation Area that may be proposed for adoption by the Department of Parks and Recreation.

This bill would eliminate that requirement.

This bill would prohibit the conservancy from extending, under any circumstances, the road designated as "Stocker Street" to Overland Avenue or to any street within the boundaries of Culver City without the prior written approval of the City Council of Culver City.

#### Ch. 4 (SB 107) Sher. Natural community conservation planning.

(1) The existing Natural Community Conservation Planning Act authorizes the Department of Fish and Game to enter into an agreement with any person for the purpose of preparing and implementing a natural community conservation plan to provide comprehensive management and conservation of multiple wildlife species.

This bill would repeal that act and would enact a new Natural Community Conservation Planning Act. The bill would authorize the department to enter into agreements, which would be required to meet specified conditions, with any person or public entity for the purpose of preparing a natural community conservation plan to provide comprehensive management and conservation of multiple wildlife species.

The bill would require the department to establish a process for public participation throughout plan development and review to ensure that interested persons have an adequate opportunity to provide input in the process.

The bill would require each natural community conservation plan to include an implementation agreement governing specified matters.

The bill would authorize the department to be compensated for the actual costs incurred in participating in the preparation and implementation of natural community conservation plans.

(2) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the department and the Fish and Game Commission to carry out the Fish and Game Code.

Because this bill would impose duties on the department, the bill would make an appropriation.

#### Ch. 5 (SB 711) Dunn. State employees on active duty: benefits.

Existing law provides that a state employee who, as a member of the California National Guard or a United States military reserve organization, is ordered to active duty by Presidential determination that it is necessary to augment the active forces for any operational mission, or when in time of national emergency declared by the President or otherwise authorized by law, shall receive for the duration of the event for a period not to exceed 180 days as part of his or her compensation the difference between the amount of his or her military pay and the amount the person would have received as a state employee, and all benefits he or she would have received had he or she not served on active duty, as specified.

This bill would provide that a state employee who is a member of the California National Guard or a United States Military Reserve organization shall receive these benefits for a period not to exceed 365 days if he or she is ordered to serve on active duty on and after September 11, 2001, as a result of the War on Terrorism.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 6 (AB 749) Calderon. Workers' compensation: administration and benefits.

(1) Existing law provides for an annual assessment of employers by the Department of Industrial Relations for the purpose of funding increased investigation and prosecution of workers' compensation fraud by the Bureau of Fraudulent Claims of the Department of Insurance and by district attorneys. Existing law provides for the assessment of civil penalties for acts constituting workers' compensation fraud.

This bill would also authorize use of these funds for investigation and prosecution of an employer's willful failure to secure payment of workers' compensation. This bill would require the Bureau of State Audits to evaluate the effectiveness of the efforts of the Fraud Assessment Commission, the Bureau of Fraudulent Claims, the Department of Industrial Relations, and local law enforcement agencies in identifying, investigating, and prosecuting workers' compensation fraud and the willful failure to secure payment of workers' compensation. It would expand the membership of the Fraud Assessment Commission from 5 to 7 members by adding 2 representatives of organized labor. The bill would increase the civil penalty amounts that could be imposed for workers' compensation fraud. These funds would be deposited in the Workers' Compensation Fraud Account in the Insurance Fund.

(2) Existing law requires workers' compensation insurers to maintain or provide occupational safety and health loss control consultation services certified by the Director of Industrial Relations.

This bill would eliminate the requirement that these services be certified by the director, would eliminate fees imposed on insurers for that certification, would accordingly eliminate the Loss Control Certification Fund in which these fees are deposited, would require an expansion of the scope of these services, and would make legislative findings in this regard. The bill would eliminate the requirement that each insurer submit an annual health and safety loss control plan to the director for identifying employers with the greatest workers' compensation losses and the most significant and preventable health and safety hazards.

The bill would require the Department of Industrial Relations to establish an insurance loss control services coordinator position to provide information to employers about the availability of these loss control consultation services, to be funded from the Workers' Occupational Safety and Health Education Fund that would be created by the bill. The bill would require the Commission on Health and Safety and Workers' Compensation to establish and maintain a worker occupational safety and health training and education program. The bill would require the director to levy and collect fees from workers' compensation insurers for purposes of the program, with the fees to be deposited in the Workers' Occupational Safety and Health Education Fund. Moneys in the fund could be expended for the above purposes upon appropriation by the Legislature.

(3) Existing law requires the Insurance Commissioner to designate a rating organization to assist him or her in developing, among other things, a classification system.

This bill would require the designated rating organization to develop and file with the Insurance Commissioner a weekly premium per employee for each classification used or proposed by the designated rating organization for use in determining the premium for an uninsured employer.

(4) Existing law provides for the Insurance Commissioner to approve rates for workers' compensation insurance.

This bill, notwithstanding any other provision of law, would authorize an insurer to increase rates on policies with inception dates prior to January 1, 2003, to reflect the changes in benefit levels enacted by this bill. It would also provide that the Insurance Commissioner

would not have the authority to disapprove a rate, discount, or credit established by an insurer for any policy issued to an employer for coverage of employees participating in a specified program established under a collective bargaining agreement.

(5) Existing law provides for a 6-member board of directors to administer the State Compensation Insurance Fund, with the Director of Industrial Relations serving as a nonvoting, ex officio member.

This bill would add the Speaker of the Assembly and the President pro Tempore of the Senate, or their designees, to the board as ex officio members.

(6) Existing law specifies the authority of the State Compensation Insurance Fund.

This bill would commission an independent study, with the assistance of an investment banking firm, to determine the feasibility of the State Compensation Insurance Fund issuing bonds or securities. The bill would require advertising of the fund to include a specified disclaimer.

(7) Existing law provides for a manager of the State Compensation Insurance Fund.

This bill would change the title of this officer to president.

(8) Existing law requires the rates of the State Compensation Insurance Fund to be fixed at a percentage of the payroll of any employer which, in the long run and on average, will produce a sufficient sum, when invested at 3½% interest, to meet specified goals.

This bill would replace the 3½% interest standard with a standard that the investment be made in a way so as to realize the maximum return consistent with safe and prudent management practices.

(9) Existing law makes certain conclusive presumptions regarding a child's or spouse's dependency on a deceased employee for support as it pertains to workers' compensation benefits.

This bill would make similar presumptions with respect to a deceased employee who has no person who qualifies as dependent on the support of the deceased employee.

(10) Existing law generally provides for settlement and commutation of workers' compensation benefits, but does not allow settlement or commutation of prospective vocational rehabilitation services except upon a specified finding by a workers' compensation judge.

This bill would additionally authorize an employee and a represented employee to settle the employee's right to prospective vocational rehabilitation services with a one-time payment under certain conditions.

(11) Existing law provides for the Department of Industrial Relations to be divided into at least 6 divisions, including the Division of Workers' Compensation, which is under the direction of an administrative director. Existing law provides that the administrative director has various powers and duties with respect to the Workers' Compensation Appeals Board and workers' compensation administrative law judges who hear appeals of workers' compensation claims.

This bill would create the position of court administrator with respect to the workers' compensation adjudicatory process at the trial level, who would be appointed by the Governor with the advice and consent of the Senate. This bill would specify the court administrator's powers and duties. The bill would add various other provisions, including certain qualifications and ethics requirements for workers' compensation administrative law judges and other provisions relating to the operation of the workers' compensation courts.

(12) Existing law requires the administrative director to conduct audits of insurers, self-insured employers, and 3rd-party administrators to ensure that injured workers are promptly and accurately receiving the full measure of compensation they are entitled to receive.

This bill would require the administrative director to conduct a profile audit review of each audit subject at least once every 5 years and to conduct a full compliance audit on each audit subject that fails to meet or exceed the profile audit review performance standard established by the director. The bill would provide for the assessment of penalties on audit subjects that

fail to meet established audit standards, and based on the results of these audits, the administrative director would be required to publish and make available on request a list ranking all insurers, self-insured employers, and 3rd-party administrators audited.

(13) Existing law requires that specified notices be provided to injured employees.

This bill would specify the contents of various notices that are required to be posted, given to, or mailed to an employee. The bill would provide for specified procedures to be used in notifying employees regarding benefits and required actions in pursuing a workers' compensation claim.

(14) Existing law provides that the Commission on Health and Safety and Workers' Compensation in the Department of Industrial Relations is to be funded by appropriations from the Workplace Health and Safety Revolving Fund, into which certain civil and administrative penalties are deposited.

This bill would instead provide for the deposit of these penalties in the Workers' Compensation Administration Revolving Fund, and would provide funding for the commission from this fund, upon appropriation by the Legislature.

(15) Existing law requires the Industrial Medical Council to, among other things, counsel and assist the administrative director and suggest standards for improving care furnished to injured employees.

This bill would require the administrative director, in consultation with the council and other specified entities, on or before July 1, 2003, to begin to conduct a study of medical treatment provided to workers who have sustained industrial injuries and illnesses. It would require the administrative director, on or before July 1, 2004, to make recommendations based on the study to the Legislature.

This bill, commencing July 1, 2004, until January 1, 2009, would require the administrative director to establish the Return-to-Work Program in order to promote the early and sustained return to work of the employee following a work-related injury or illness. The bill would create the Workers' Compensation Return-to-Work Fund, subject to appropriation by the Legislature, from which reimbursement would be made to employers meeting specified criteria relating to program participation. It would also require the administrative director to contract with an independent research organization to conduct a study and issue a report on the program, and to make this report available to the public and the Legislature on or before January 1, 2008.

(15.5) Existing law makes it a crime for any person to make false or fraudulent statements, or take certain other actions, with respect to any claim under the workers' compensation system.

This bill would also make it a crime to make or cause to be made any knowingly false or fraudulent material statement or representation in connection with claims and reimbursements under the Return-to-Work Program. The creation of these new crimes would impose a state-mandated local program.

(16) Existing law provides for the Director of Industrial Relations to issue and serve on any employer that has failed to secure the payment of workers' compensation a stop order prohibiting the use of employee labor, and to also issue and serve on the employer a penalty assessment order in the amount of \$1,000 per employee employed, as specified.

This bill would authorize the director to assess a higher amount upon a determination that an employer has been uninsured for a period in excess of one week during the calendar year preceding the determination. The bill would enact other related changes with respect to these provisions. It would require the director to establish and maintain a program to encourage, facilitate, and educate employers to provide early and sustained return to work after occupational injury or illness.

This bill would also authorize the appeals board to provide for a summary hearing on the issue of compensability if a claim is settled by the director by means of a compromise and release or stipulations with request for award.

(17) Existing law specifies the medical information about an injured employee that an insurer or a claim administrator may disclose to an employer, including the diagnosis of the injury if that diagnosis would affect the employer's premium.

This bill would permit disclosure to an employer of the mental or physical condition for which workers' compensation is claimed and the treatment provided for this condition.

(18) Existing law generally provides that the report of the qualified medical evaluator and the report of the treating physician with respect to a workers' compensation injury shall be the only admissible reports relative to making a determination with regard to an employer's workers' compensation liability. Existing law provides that once a worker has received a comprehensive medical-legal evaluation, the worker is not entitled to another evaluation if he or she later becomes represented by an attorney.

This bill would delete the limitation on obtaining another evaluation and would make various other changes to these and other related provisions.

(19) Existing law generally provides that the findings of the treating physician are presumed to be correct, unless rebutted, in cases where an additional comprehensive medical evaluation is obtained.

This bill would limit the operation of this presumption to situations involving the treatment of a worker by his or her personal physician or personal chiropractor, who was predesignated prior to the date of injury.

(20) Existing law requires injured employees to be provided with medical services, including prescription drugs.

This bill would require the use of generic drugs and would require the Administrative Director of the Division of Workers' Compensation to adopt by July 1, 2003, and revise no less frequently than biennially, an official pharmaceutical fee schedule. The bill would additionally require that the injured employee have access to a pharmacy within a reasonable distance from his or her residence. It would also provide that the administrative director has the sole authority to develop an outpatient surgery facility fee schedule for services not performed under contract.

(21) Existing law provides certain methods for determining workers' compensation benefits payable to a worker or his or her dependents for purposes of temporary disability, permanent total disability, permanent partial disability, and in case of death.

This bill would provide for increased temporary disability and permanent partial disability and death benefits for injuries or deaths occurring on or after January 1, 2003, with additional increases in benefits phased in over several years. The bill would also revise the computation of the permanent disability benefit by increasing the number of weeks, as specified, for injuries occurring on or after January 1, 2004.

(22) Existing law requires that a disability indemnity payment made by any written instrument be immediately negotiable and payable in cash on demand.

This bill would provide that it is not a violation of this provision if a delay in the negotiation of a written instrument is caused solely by the application of state or federal banking laws or regulations.

(23) Existing law provides for the payment of workers' compensation death benefits to wholly dependent children, as defined, of a deceased employee-parent until the youngest child attains 18 years of age.

This bill would also provide these benefits to children who are physically or mentally incapacitated from earning until the death of these children.

(23.5) Existing law authorizes collective bargaining agreements between a private employer or groups of employers engaged in construction, construction maintenance, and related activities and a recognized or certified exclusive bargaining representative that establishes a dispute resolution process for workers' compensation instead of the hearing before the Workers' Compensation Appeals Board and its workers' compensation administrative law judges, or that provides for specified other alternative workers' compensation programs.

This bill would enact similar provisions with respect to employers in the aerospace and timber industries. By requiring certain information in connection with these provisions to be submitted by an employer under penalty of perjury, this bill would expand the definition of the crime of perjury, thereby imposing a state-mandated local program.

(24) Existing law requires certain disputes relating to workers' compensation to be submitted to arbitration, including certain disputes relating to permanent disability rating and vocational rehabilitation.

This bill would delete the requirement for the arbitration of these disputes.

(25) Existing law provides that medical and disability benefits may be claimed for up to one year from specific triggering events.

This bill would additionally establish timeframes whereby lien claimants must file liens against compensation.

(26) This bill would also require the Director of Industrial Relations to establish 8 additional workers' compensation administrative law judge positions and the same number of other associated positions.

(27) This bill would exempt a claim or right under workers' compensation from provisions relating to secured transactions.

(28) This bill would declare the intent of the Legislature relative to various matters.

(29) This bill would make various technical, nonsubstantive changes and other related changes.

(30) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 7 (AB 1327) Leslie. Water rights: Truckee River.

(1) Existing law provides that an appropriation of water in this state from a stream flowing into this state for beneficial use in another state may be made only when, under the laws of the other state, water may be diverted in that state for beneficial use in this state.

Existing law provides that, with regard to a stream flowing across the state boundary, a right of appropriation having the point of diversion and place of use in another state and recognized by the laws of that state has the same force and effect as if the point of diversion and place of use were in this state, except as otherwise specified.

(2) Existing law provides that these provisions do not apply to interstate lakes or streams flowing in or out of those lakes.

This bill would provide that the provisions described in (1) above apply to any appropriation or change in point of diversion, place of use, or purpose of use under a right to the use of waters from the Truckee River if the appropriation or change is made pursuant to a specified operating agreement entered into by the United States, the State of Nevada, and this state.

#### Ch. 8 (AB 1414) Dickerson. Public lands.

(1) Existing law establishes the Department of Fish and Game in the Resources Agency.

This bill would require the department, upon appropriation of funds by the Legislature for that purpose, to prepare draft management plans for parcels wholly within its jurisdiction acquired on or after January 1, 2002, for public review within 18 months of the recordation date. The bill would require the department to report, on or before February 1 of each year, to the appropriate legislative fiscal subcommittees regarding the plans.

(2) Existing law continuously appropriates money in the Fish and Game Preservation Fund to the department to carry out the Fish and Game Code. Because this bill would impose duties on the department, the bill would make an appropriation.

(3) Existing law establishes the Resources Agency in state government, under the supervision of the Secretary of the Resources Agency.

This bill would also, upon appropriation of funds by the Legislature for that purpose, require the Resources Agency, in conjunction with each department, board, conservancy, and commission within that agency, to develop and maintain a database of lands and easements that have been acquired by the departments and boards within the agency. The bill would require the Resources Agency to provide a report to the Governor and the Legislature on or before December 31, 2003, and each year thereafter.

The bill would also require the Resources Agency, until January 1, 2010, to prepare an annual report summarizing expenditures on the California Clean Water, Safe Neighborhood Parks, and Coastal Protection Bond Act of 2002, if that act is enacted by the Legislature during the 2001–02 Regular Session of the Legislature.

#### Ch. 9 (AB 1531) Kehoe. Consumer credit.

Existing law requires a consumer credit reporting agency, upon consumer request, to allow consumer inspection of its files regarding that consumer.

Existing law requires those files to include the telephone numbers of a source of information included in the report, of a recipient of a consumer credit report of the consumer, and of others making certain inquiries of the credit report of the consumer, if provided.

This bill instead would suspend those requirements regarding the disclosure of those telephone numbers until January 1, 2003.

The will would make other conforming changes.

The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 10 (SB 585) Perata. Elections: ballots.

Existing law provides that at partisan primary elections, each voter not registered as intending to affiliate with any one of the political parties participating in the election shall be furnished only a nonpartisan ballot, unless he or she requests a ballot of a political party and that political party, by party rule duly noticed to the Secretary of State, authorizes a person who has declined to state a party affiliation to vote the ballot of that political party.

This bill would impose a state-mandated local program by requiring the county elections official to maintain a record of which political party's ballot was requested, or whether a nonpartisan ballot was requested, by each person who declined to state a party affiliation. It would require that the record be made available to any person or committee who is authorized to receive copies of the printed indexes of registration for primary and general elections pursuant to a specified provision of law.

This bill would become operative on March 6, 2002.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would provide that it shall take effect immediately as an urgency statute.

#### Ch. 11 (AB 1131) Frommer. Apprenticeship programs.

Existing law provides that reimbursement rate for apprenticeship education shall be established in the annual Budget Act. Existing law applies the reimbursement rate to isolated apprentices and defines isolated apprentices as apprentices registered with the Division of Apprenticeship Standards in the Department of Industrial Relations.

This bill would limit reimbursement under the existing provision for related and supplemental instruction provided to indentured apprentices to reimbursement for instruction provided by a program approved by the Division of Apprenticeship Standards.

Ch. 12 (SB 369) Dunn. Multifamily rental and affordable housing: financing.

Prior law, which was repealed on January 1, 2002, authorized any city or county to issue revenue bonds for the purpose of providing financing for multifamily rental housing, and capital improvements related to that housing.

This bill would reenact these provisions, as modified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 13 (AB 154) La Suer. Controlled substances: permits to conduct business.

(1) Existing law provides that any manufacturer, wholesaler, retailer, or any other person or business entity in this state who sells, transfers, or otherwise furnishes any substance contained on a list of specified substances to a person or business entity in this state or any other state or who obtains from a source outside of the state any specified substance shall submit an application to, and obtain a permit for the conduct of that business from, the Department of Justice. Selling, transferring, or otherwise furnishing any specified substance without a permit is a misdemeanor or a felony.

This bill would provide that for any substance added to the list on or after January 1, 2002, the Department of Justice may postpone the effective date of the requirement for a permit for a period not to exceed six months from the listing date of the substance.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 14 (SB 728) Machado. State employees: memoranda of understanding.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of memoranda of understanding entered into between the state employer and State Bargaining Units 1, 3, 4, 11, 15, and 21, the California State Employees Association, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that provisions of the memoranda of understanding approved by this bill that require the expenditure of funds shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer, and the affected employee organization shall meet and confer to renegotiate the affected provisions.

(2) Existing provisions of the Teachers' Retirement Law, operative until July 1, 2003, establish the normal rate of contribution for members of the Defined Benefit Program in State Bargaining Units 10, 12, 16, 18, and 19, and other specified members, and require these members to contribute to the retirement fund 5<sup>1</sup>/<sub>2</sub>% of creditable compensation from August 31, 2001, to June 30, 2002, and 3% of the creditable compensation from July 1, 2002, to June 30, 2003.

This bill would approve provisions that require 25% of the amount contributed by a member to the retirement fund, as specified above, to be credited to the member's Defined Benefit Supplement account. The bill would also make conforming changes.

(3) Existing law, the Teachers' Retirement Law, establishes the normal rate of contribution to the retirement fund for specified members based on bargaining unit.

This bill, operative until July 1, 2003, would establish the contribution rate for members of the Defined Benefit Program in State Bargaining Unit 3 or 21, and would require these members, from January 1, 2002, to June 30, 2002, to contribute to the retirement fund an amount equal to 5<sup>1</sup>/<sub>2</sub>% of the member's creditable compensation, and to contribute 3% of

creditable compensation to the retirement fund from July 1, 2002, to June 30, 2003. In addition, 25% of the amount contributed would be credited to the member's Defined Benefit Supplement account.

(4) The Public Employees' Retirement Law provides that the contribution rate for a state miscellaneous member whose service is not included in the federal system is 6% of the compensation in excess of \$317 per month for service rendered on or after July 1, 1976. Existing law also provides that the contribution rate for a state miscellaneous member whose service has been included in the federal system is 5% of compensation in excess of \$513 per month for service rendered on or after July 1, 1976.

This bill would amend the above provisions to instead refer to a state miscellaneous member employed by the California State University, the University of California, the legislative branch, or the judicial branch. The bill would also make corresponding changes.

(5) Existing law, the Public Employees' Retirement Law, also provides the normal rate of contribution for a state miscellaneous or industrial member, subject to certain criteria.

This bill would revise and recast the above provisions to provide that those procedures would be subject to modification pursuant to the terms of a memorandum of understanding between the state employer and those bargaining units. The bill would also permit the Department of Personnel Administration to set a different contribution rate for members who are not defined as state employees, and for officers or employees of the executive branch who are not members of the civil service.

(6) The Public Employees' Retirement Law provides that for specified state members the normal rate of contribution is 6% of compensation in excess of \$317 per month for a member whose service is not included in the federal system, or in excess of \$513 for one whose service is included in the federal system.

This bill would permit the Director of the Department of Personnel Administration to establish the normal rate of contribution for members who do not fall within the definition of "state employee," as specified, and for officers or employees of the executive branch of state government who are not members of the civil service.

(7) Existing law establishes the normal rate of contribution to the Public Employees Retirement System for specified state safety members.

This bill would provide that the normal rate of contribution for specified state safety members in State Bargaining Units 1, 3, 4, 11, or 15 from January 1, 2002, to June 30, 2002, and 1% of compensation from July 1, 2002, to June 30, 2003, as specified.

(8) Existing law also establishes the contribution rate for specified state peace officer/firefighter members and sets this figure at 8% of compensation in excess of \$238 per month.

This bill would permit the Director of the Department of Personnel Administration to establish the normal rate of contribution for members who do not fall within the definition of "state employee" and officers or employees of the executive branch of the state government who are not members of the civil service.

(9) Existing provisions of the Budget Act of 2001 appropriate specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for the augmentation of state employee compensation.

This bill would appropriate an additional \$35,486,000, as scheduled, from those funds in augmentation of specified items of the Budget Act of 2001 for state employee compensation.

(10) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 15 (SB 801) Speier. Health: health facilities and clinics: women, infants, and children's nutrition.

Existing law regulates the licensure of health facilities and clinics, as defined, and prescribes the duties of the State Department of Health Services in this regard. Under existing law, any person who violates provisions regulating health facilities or who willfully or repeatedly violates any rule or regulation adopted thereunder is guilty of a misdemeanor.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law makes it a condition of licensure that these facilities, with certain exceptions, implement a formal plan, on or before January 1, 2005, to eliminate or substantially reduce medication-related errors in the facility.

This bill would impose several requirements on the formal plan, including a requirement that the plan evaluate, assess, and include a method to address specified procedures and systems relating to medication-related errors. The bill would require the department to monitor the implementation of each of the facility's plans upon licensure visits beginning January 1, 2005.

Because a violation of the provisions applicable to health facilities is a crime, the bill would impose a state-mandated local program.

Existing law, the California Special Supplemental Food Program for Women, Infants, and Children, under the administration of the State Department of Health Services, provides for the issuance of nutrition coupons, as defined, to certain recipients with nutritional need, as determined by a physician or health professional.

Existing law, commencing July 1, 2002, provides, until January 1, 2005, that the nutrition coupons issued under the program shall be redeemable by recipients at any authorized retail food vendor, and requires the department, by July 1, 2004, to submit a report to the appropriate committees of the Legislature regarding the implementation of this provision.

This bill would instead provide that the provisions described above concerning retail food vendors shall be operative January 1, 2004, and shall remain in effect until July 1, 2006. This bill would require the department to submit the report described above to the Legislature on or before January 1, 2006. This bill would make related changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 16 (SB 1987) Burton. Public contracts: 2012 Olympic Games.

Existing law provides specified requirements in awarding certain public contracts.

This bill would authorize the Governor to sign agreements required by the United States Olympic Committee as part of the bid process for San Francisco to become the United States Candidate City for the 2012 Olympic Games.

This bill would make legislative findings and declarations that, among other things, the Bay Area Sports Organizing Committee has developed a self-sufficient bid for a privately financed 2012 Olympic Games. This bill would authorize the Governor to enter into an agreement for the state to be jointly liable, not to exceed a specified amount, with the local organizing committee, as specified, for obligations of the local organizing committee, and for any financial deficit relating to the Olympic Games, through the creation of the Olympic Games Trust Fund, as provided.

This bill would declare that it would take effect immediately as an urgency statute.

#### Ch. 17 (SB 836) Scott. Sex offenders.

Existing law requires certain persons convicted of any specified sexual offenses to register with local law enforcement officials, as specified. Existing law also requires that if the person who is registering has no residence address, he or she shall update his or her registration no less than once every 60 days in addition to other registration requirements, as specified. In regard to those persons without a residence address who are subject to registration, existing law declares that it is the intent of the Legislature that efforts be made with respect to those persons who are on probation or parole to engage them in treatment.

This bill would make a conforming change with respect to legislative intent expressed in other existing law and delete the statement of intent by the Legislature.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 18 (AB 1242) Wiggins. Pest control: Glassy-winged Sharpshooter.

Existing law generally creates programs in the Department of Food and Agriculture for eradication of Pierce's disease and its vector, the Glassy-winged Sharpshooter.

This bill would state various findings and declarations relating to the Glassy-winged Sharpshooter and Pierce's disease and their effect on the wine and grape industry.

This bill would appropriate \$7,140,000 in federal funds made available to the department to the Department of Food and Agriculture Fund, to be distributed via grants, as specified, and to cover administrative expenses directly related to the program, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 19 (AB 1543) Firebaugh. Public postsecondary education: exemption from nonresident tuition.

Existing law requires that a person, other than a nonimmigrant alien as defined, who has attended high school in California for 3 or more years, who has graduated from a California high school or attained the equivalent thereof, who has registered at or attends an accredited institution of higher education in California not earlier than the fall semester or quarter of the 2001-02 academic year, and who, if he or she is an alien without lawful immigration status, has filed an affidavit with respect to legalizing his or her immigration status, be exempted from paying nonresident tuition at the California Community Colleges and the California State University.

This bill would authorize a state court, if it finds that the above provision, or any similar provision adopted by the Regents of the University of California, is unlawful, to order that the administering entity that is the subject of the lawsuit terminate any waiver awarded under that statute or action, as equitable relief, and would prohibit the award of money damages, tuition refund or waiver, or other retroactive relief. The bill would provide that the California Community Colleges, the California State University, and the University of California are immune from the imposition of any award of money damages, tuition refund or waiver, or other retroactive relief in a lawsuit.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 20 (SB 469) Alpert. Water quality: total maximum daily loads.

(1) Existing law requires the State Water Resources Control Board to formulate and adopt state policy for water quality control in accordance with specified objectives. Existing law requires each California regional water quality control board to establish water quality objectives in water quality control plans in accordance with specified objectives, for submission to the state board.

This bill would require the state board to prepare, on or before July 1, 2003, guidelines to be used by the state board and the regional boards for the purpose of listing and delisting waters and developing and implementing the total maximum daily load (TMDL) program and total maximum daily loads pursuant to the federal Clean Water Act. The bill would require the guidelines to be finalized not later than January 1, 2004.

(2) Existing law requires the state board to act on the regional board's water quality control plans within 60 days of submission or 90 days of resubmission.

This bill would require the state board to comply with the 60 day time deadline when taking action on a regional board's water quality control plan that is being amended solely for an action related to the regional board's TMDL submittal, and that the 60 day time deadline is not extended by time spent sending the submittal back to the regional board, unless the proposed amendment is for an exceedingly complex TMDL, which shall be provided in writing by the state board, or the submission by the regional board is clearly incomplete.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 21 (SB 823) Poochigian. Local law enforcement funding.

Existing law establishes in each county treasury a Supplemental Law Enforcement Services Fund that receives from the Controller an annual allocation of state funds. Moneys from this fund are required to be allocated by the county auditor to the county, each city located within that county, and designated districts providing law enforcement services, in accordance with specified requirements. The moneys are allocated for, among other things, frontline law enforcement services and the implementation of a comprehensive multiagency juvenile justice plan. Existing law requires each county or city and county to report annually on those programs to the county board of supervisors and the Board of Corrections beginning August 15, 2001. Existing law requires the Board of Corrections to compile the local reports and make a report to the Governor and Legislature by January 15, 2003, and annually thereafter, as provided. Existing law also requires a county, city, or city and county Supplemental Law Enforcement Oversight Committee to submit data detailing and summarizing allocations to the Controller and provides that the county, city, or city and county shall forfeit its allocation if that data is not provided.

This bill would require the annual report on those programs to be made beginning October 15, 2002, and would prohibit the expenditure of allocated funds and interest thereon if that report and the data detailing and summarizing allocations are not submitted. This bill would require the Board of Corrections to compile the local reports and make a report to the Governor and Legislature by March 15, 2003, and annually thereafter.

The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 22 (AB 227) Dutra. Unclaimed property: escheat.

Under existing law, property that is held by a business that is unclaimed for more than specified periods escheats to the state. Existing law requires persons holding unclaimed property to report and deliver it to the Controller within a prescribed time period, and imposes interest payments at the rate of 12% per annum and penalties for a failure to do so. Existing law also provides that any person who paid or delivered to the Controller on or before December 31, 2001, in accordance with specified requirements, is not subject to statutory interest payments for failure to pay or deliver unclaimed property. Existing law requires the Controller to submit a report to the Legislature on the amnesty program, to be published no later than December 31, 2002.

This bill would extend the above deadline for paying or delivering unclaimed property to the Controller to December 31, 2002, subject to specified conditions. The bill would also extend the time for the Controller to submit a report to the Legislature to no later than July 31, 2003, and would make other technical, nonsubstantive changes.

The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 23 (AB 953) Simitian. Park and open-space districts.

(1) Existing law permits a park or open-space district to, by unanimous vote of the members of its board, exchange real property that is dedicated for park or open-space purposes for land that is of equal or greater value and is needed for park or open-space purposes, with certain restrictions.

This bill would permit a district to exchange interests in real property in addition to real property for the same purpose and with the same restrictions.

Existing law permits a park or open-space district to convey to any public agency real property that is dedicated and used for park or open-space purposes as long as the public agency agrees in writing to continue to use the land for park or open-space purposes and not to convey the property without the consent of the majority of the voters in the district pursuant to an election.

This bill would permit a district to convey interests in real property under the same conditions.

Existing law permits the general manager of the East Bay Regional Park District, upon approval of the district's board, to bind the district without advertising and without written

contract for the payment of supplies, materials, labor or other consideration for any purpose, in amounts not exceeding \$25,000. The expenditures must be reported at the board's next regular meeting.

This bill would also permit the general manager of the Midpeninsula Regional Open Space District and the general manager of the Sonoma County Agricultural Preservation and Open Space District to do the same.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 24 (AB 1145) Jackson. Regional open-space district: County of Ventura.

Existing law permits proceedings for the formation of a regional park and open-space district in specified counties of the state to be initiated by resolution of the county board of supervisors adopted after a noticed hearing, and specifies the contents of the resolution.

This bill, in addition, would permit the formation of a regional open-space district in Ventura County to be initiated by resolution of the county board of supervisors after a noticed hearing. The bill would specify the contents of the resolution, including a requirement to call an election, as prescribed. The bill would specify that, with respect to a district formed pursuant to those provisions, where the board of directors of the district is appointed by the board of supervisors of the county in which the district is located, the terms of office of each member of the board of directors is 4 years commencing at noon on the first Monday in January, except as provided.

Ch. 25 (SB 33) Soto. School-parent compacts: Nell Soto Parent/Teacher Involvement Program.

Existing law establishes the Nell Soto Parent/Teacher Involvement Program, pursuant to which the Superintendent of Public Instruction allocates one-time grants to schools in accordance with prescribed criteria, for the purpose of strengthening communication between schools and parents. Existing law requires a teacher to be compensated for his or her participation.

The bill would delete the limitation that the grants be one-time grants and would authorize the California School for the Blind and the California School for the Deaf to participate in the program. The bill would provide for the allocation of funding pursuant to the Nell Soto Parent/Teacher Involvement Program to the California School for the Deaf, the California School for the Blind, and schools ranked in the bottom 5 deciles on the Academic Performance Index, with priority given to the California School for the Deaf, the California School for the Blind, and schools in the bottom 2 deciles. The bill would require that teaching paraprofessionals also be compensated for their participation.

The bill would require the Superintendent of Public Instruction to evaluate the Nell Soto Parent/Teacher Involvement Program and would authorize the superintendent to use up to \$75,000 from funds appropriated for the program for administration of the program.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 26 (SB 1227) Burton. Housing and Emergency Shelter Trust Fund Act of 2002.

Under existing law, there are programs providing assistance for, among other things, multifamily housing, emergency housing, farmworker housing, home ownership for low- and very low income households, and downpayment assistance for first-time homebuyers. Existing law also establishes specified code enforcement programs.

This bill would enact the Housing and Emergency Shelter Trust Fund Act of 2002, which, if adopted, would authorize, for purposes of financing various existing housing and code enforcement programs, and additional specified programs subject to the enactment of enabling legislation, the issuance of bonds in the amount of \$2,100,000,000 pursuant to the State General Obligation Bond Law.

This bill would provide for submission of the bond act to the voters at the November 5, 2002, statewide general election in accordance with specified law.

The bill would enact additional provisions for the distribution of designated portions of the proceeds of the bond act and the administration of the programs pursuant to which those funds would be distributed. Those provisions would become operative only if the bond act is adopted by the voters.

This bill would also delete obsolete provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 27 (AB 887) Daucher. Highways: Route 90: relinquishment.

Existing law requires the California Transportation Commission to relinquish to any city or county any portion of any state highway within the city or county that has been deleted from the state highway system by legislative enactment.

This bill would authorize the commission to relinquish to the City of Yorba Linda a specified portion of State Highway Route 90, upon terms and conditions the commission finds to be in the best interests of the state. The relinquishment would become effective immediately following the recordation by the county recorder of the relinquishment resolution containing the commission's approval. The portion of State Highway Route 90 relinquished would cease to be a state highway on the effective date of the relinquishment.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 28 (AB 1448) Maddox. Prevailing wage laws: violations.

Existing law governing the obligations of contractors and subcontractors involved in public works projects requires that employees be paid the prevailing wage, as determined by the Director of Industrial Relations, and requires that contractors and subcontractors keep accurate payroll records, which may be made available for public inspection, as provided. These provisions contain certain requirements that, under existing law, will be repealed on January 1, 2003. The provisions to be repealed include (1) a requirement that contractors and subcontractors verify under penalty of perjury the accuracy of their payroll records and their compliance with certain provisions; (2) a requirement that a subcontractor file certified copies of payroll records as requested by specified entities; and (3) an exemption for contractors from penalties for a subcontractor's failure to provide requested payroll records that instead makes the subcontractor subject to the penalty.

Existing law provides that a contractor or subcontractor who employs a worker in violation of limits on hours that may be worked in a day or week is liable for a specified penalty. Under existing law, this provision will be repealed on January 1, 2003, and replaced by a provision under which a contractor is subject to a penalty for his or her own violations of the limits on employee hours, as well as being subject to a penalty for any violations by his or her subcontractors.

This bill would delete the January 1, 2003, repeal of these wage and hour provisions, thus keeping these provisions in effect indefinitely. By extending the term of the provision requiring verification of payroll records under penalty of perjury, the bill would preserve the existence of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 29 (AB 1729) Committee on Insurance. Unemployment insurance.

(1) Existing law designates the Director of Employment Development as the chairperson of a strike force on the underground economy. The strike force is required to make annual reports to the Governor and the Legislature.

This bill would require the annual reports to be made by June 30 of each year.

(2) Existing law requires that the director provide certain information to school employers by October 15 of each year.

This bill would change the reporting date to March 31.

(3) Under existing law relating to employer withholding of taxes from employee wages, a banking day is defined as any day other than a weekend day or a banking holiday recognized by the Federal Reserve System.

This bill would revise the definition of a banking day to exclude weekend days and banking holidays recognized by the Internal Revenue Service.

(4) The bill would also correct erroneous cross-references, update references to federal law, and repeal outdated provisions or provisions with outdated cross-references.

Ch. 30 (AB 131) Corbett. Personal income and bank and corporation tax laws: federal conformity.

Existing state income and corporation tax laws, in modified conformity with federal income tax laws, provide for tax benefits and other specified treatment in connection with retirement plans.

This bill would provide additional state income and corporation tax law conformity with federal income tax laws with respect to rollovers allowed among various types of plans, and purchase of service credit in government defined benefit plans.

This bill would take effect immediately as a tax levy.

Ch. 31 (SB 332) Sher. Building standards: straw-bale structures.

(1) Existing law, known as the State Building Standards Law, creates the California Building Standards Commission and authorizes it to review proposed building standards, adopt or reject these proposed standards, and codify and publish the adopted standards in the California Building Standards Code. Local agencies have the responsibility for the enforcement of numerous provisions of the California Building Standards Code.

The existing law declares the intent of the Legislature to adopt safety guidelines for the construction of structures, including single-family dwellings, that use baled rice straw, as defined, as a loadbearing or nonloadbearing material. The guidelines do not become operative within any city or county unless and until a specified finding is made and the finding is filed with the Department of Housing and Community Development.

This bill would revise the guidelines and would require them to apply to the construction of all structures that use baled straw as a loadbearing or nonloadbearing material within a city or county that has adopted the guidelines in existing law prior to January 1, 2002. It would provide that the guidelines proposed by this bill would not become operative in any other city or county, unless and until the legislative body of a city or county makes an express finding that the guidelines apply within the city or county because of local conditions and the city or county files a copy of the finding with the department. It would also provide that the guidelines would become inoperative when building standards that permit the construction of these structures become effective after approval by the commission. Because the bill would impose new duties on local enforcement agencies, the bill would constitute a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 32 (SB 550) Costa. Endangered species.

Under existing law, until December 31, 2002, the accidental take of candidate, threatened, or endangered species resulting from inadvertent or ordinary negligent acts on a farm or ranch in the course of otherwise lawful routine and ongoing agricultural activities is not prohibited by the California Endangered Species Act.

This bill would delete the requirement that the acts be inadvertent or ordinary negligent acts in order for the exception to apply.

This bill would provide that its provisions would remain in effect only until January 1, 2009, and as of that date would be repealed, unless a later enacted statute that is enacted before January 1, 2009, deletes or extends that date.

Ch. 33 (AB 16) Hertzberg. Education facilities: Kindergarten-University Public Education Facilities Bond Acts of 2002 and 2004.

(1) Existing law, the Class Size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998, provides for the issuance, pursuant to the State General Obligation Bond Law, of state general obligation bonds in an amount not to exceed \$9,200,000,000, exclusive of refunding bonds, to provide aid to school districts, county superintendents of schools, and county boards of education in accordance with prescribed provisions, including, but not limited to, the Leroy F. Greene State School Facilities Act of 1998.

This bill would make certain adjustments in the facilities funding mechanism, including, but not limited to, provisions relating to multitrack year-round schools, supplemental apportionments for small schools, costs adjustments for projects in densely populated urban areas, the priority ranking mechanism, the state to local cost share for modernization, Field Act compliance for leased or purchased buildings, energy efficiency grant adjustments, older building modernization costs, hardship eligibility, and critically overcrowded schools, making some of these changes operative only for projects funded pursuant to the proceeds of state bonds approved by the voters after January 1, 2002. The bill would also establish the 2002 and 2004 state school facilities funds, for receipt of the proceeds of bonds approved by the voters for these purposes.

(2) This bill would enact the Kindergarten-University Public Education Facilities Bond Act of 2002, to become operative only if approved by the voters at the November 5, 2002, statewide general election, and would provide for its submission to the voters at that election.

The bill would also enact the Kindergarten-University Public Education Facilities Bond Act of 2004, to become operative only if approved by the voters at the 2004 direct primary election, and would provide for its submission to the voters at that election. The bill would further enact a second Kindergarten-University Public Education Facilities Bond Act of 2004, to be submitted to the voters at the November 2, 2004, statewide general election only if the first 2004 bond act is not approved by the voters.

The bond acts, if approved by the voters, would provide for the issuance of state general obligation bonds in an amount not to exceed a combined total of \$25,350,000,000, exclusive of refunding bonds, consisting of a total of \$13,050,000,000, exclusive of refunding bonds, for the 2002 bond act and a total of \$12,300,000,000, exclusive of refunding bonds, for either of the 2004 bond acts. The bill would provide that, of this amount, for each bond act, a prescribed amount would be deposited in the 2002 State School Facilities Fund and the 2004 State School Facilities Fund, as appropriate, to provide aid to school districts, county superintendents of schools, and county boards of education, and a prescribed amount would be deposited in the 2002 Higher Education Capital Outlay Bond Fund and the 2004 Higher Education Capital Outlay Bond Fund, as appropriate, which would be established by this bill, to provide aid for California public higher education facilities.

(3) Under existing law, the State Allocation Board consists of the Director of Finance, the Director of General Services, and the Superintendent of Public Instruction. The board also includes 2 Members of the Senate, appointed by the Senate Committee on Rules, and 2 Members of the Assembly, appointed by the Speaker of the Assembly.

This bill would add to the board a person appointed by the Governor and an additional Member of the Senate and an additional Member of the Assembly, appointed as specified. The bill would specify that 2 of the Senators would belong to the majority party and one of the Senators would belong to the minority party, and that 2 of the Members of the Assembly would belong to the majority party and one of the Members of the Assembly would belong to the minority party.

(4) Existing law authorizes a school district to levy a fee, charge, dedication, or other requirement against any construction within the boundaries of the school district for the purpose of funding the construction or reconstruction of school facilities. The law authorizes a school district to increase the levy, as prescribed, if state funds for new school facility construction are not available, as defined.

This bill would suspend the operation of the provision authorizing the increased levy until the 2002 statewide general election, or if bonds are approved at the 2002 statewide general election, until the 2004 direct primary election. This bill would exclude the availability of certain funds for the purpose of making the determination as to whether state school facility funds are available. The bill would also establish the Homebuyer Down Payment Assistance Program to provide assistance in payment of the school facilities fee on affordable housing development.

(5) This bill would appropriate the sum of \$651,289,000, from the Public Buildings Construction Fund to the California State Library, the University of California, the California State University and the California Community Colleges for construction of education facilities, including, but not limited to, library facilities, pursuant to a prescribed schedule, and would authorize the State Public Works Board to issue related lease-revenues bonds.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 34 (SB 657) Scott. Income and bank and corporation taxes: federal conformity.

Under the Personal Income Tax Law and the Bank and Corporation Tax Law, various provisions of the federal Internal Revenue Code, as enacted as of a specified date, are referenced in various sections of the Revenue and Taxation Code. Those laws provide that for taxable years beginning on or after January 1, 1998, the specified date of those referenced Internal Revenue Code sections is January 1, 1998, unless otherwise specifically provided.

Existing law requires, for any introduced bill that proposes changes in any of those dates, that the Franchise Tax Board prepare a complete analysis of the bill that describes all changes to state law that will automatically occur by reference to federal law as of the changed date. It further requires the Franchise Tax Board to immediately update and supplement that analysis upon any amendment to the bill, and requires that analysis to be made available to the public and to be submitted to the Legislature for publication in the daily journal of each house of the Legislature.

This bill would change the specified date of those referenced Internal Revenue Code sections to January 1, 2001, for taxable years beginning on or after January 1, 2002, and thereby would make numerous substantive changes to both the Personal Income Tax Law and the Bank and Corporation Tax Law with respect to those areas of preexisting conformity that are subject to changes under federal laws enacted after January 1, 1998, and that have not been, or are not being, excepted or modified.

This bill would make certain other changes in federal income tax laws applicable, with specified exceptions and modifications, and make specified supplemental, technical, or clarifying changes, for purposes of the Personal Income Tax Law or the Bank and Corporation Tax Law, or both, with respect to, among other things, credits that may reduce certain taxes below the tentative minimum tax, the credit for research and development expenses, adjustments in computing alternative minimum taxable income, the exclusion of extraterritorial income, annuities and certain proceeds of life insurance contracts, the Ricky

Ray Hemophilia Relief Fund Act of 1998, the denial of deduction for club dues, the mark to market accounting method, the inapplicability of excise tax on premiums paid, certain amounts paid in connection with insurance contracts, specified federal acts, the installment method of accounting, qualified state tuition programs, the Federal Agriculture Improvement and Reform Act of 1996, determinations relating to deferred compensation, taxation of estates and trusts, small business stock, failure by an individual to pay estimated income tax, underpayment of estimated tax, underpayments of installments, elimination of interest on overlapping periods of tax overpayments and underpayments, mining exploration and development costs, tax-exempt interest, "S corporations," certain publicly traded partnerships treated as corporations, the deduction for a qualified computer contribution, secured indebtedness, tax on passive investment income, securities futures contracts, and the sale or exchange of livestock. This bill would specify various dates on which specified provisions apply, make findings and declarations that certain provisions are declaratory of existing law, and specify the intent and operation in the application of provisions conforming to various federal acts.

This bill would provide that it would only become operative if this bill and AB 1122 are both chaptered.

This bill would take effect immediately as a tax levy.

#### Ch. 35 (AB 1122) Corbett. Taxation: federal conformity.

Under the Personal Income Tax Law and the Bank and Corporation Tax Law, various provisions of the federal Internal Revenue Code, as enacted as of a specified date, are referenced in various sections of the Revenue and Taxation Code. Those laws provide that for taxable years beginning on or after January 1, 1998, the specified date of those referenced Internal Revenue Code sections is January 1, 1998, unless otherwise specifically provided.

Existing law requires, for any introduced bill that proposes changes in any of those dates, that the Franchise Tax Board prepare a complete analysis of the bill that describes all changes to state law that will automatically occur by reference to federal law as of the changed date. It further requires the Franchise Tax Board to immediately update and supplement that analysis upon any amendment to the bill, and requires that analysis to be made available to the public and to be submitted to the Legislature for publication in the daily journal of each house of the Legislature.

This bill would change the specified date of those referenced Internal Revenue Code sections to January 1, 2001, for taxable years beginning on or after January 1, 2002, and thereby would make numerous substantive changes to both the Personal Income Tax Law and the Bank and Corporation Tax Law with respect to those areas of preexisting conformity that are subject to changes under federal laws enacted after January 1, 1998, and that have not been, or are not being, excepted or modified.

This bill would make certain other changes in federal income tax laws applicable, with specified exceptions and modifications, and make specified supplemental, technical, or clarifying changes, for purposes of the Personal Income Tax Law or the Bank and Corporation Tax Law, or both, with respect to, among other things, credits that may reduce certain taxes below the tentative minimum tax, the credit for research and development expenses, adjustments in computing alternative minimum taxable income, the exclusion of extraterritorial income, annuities and certain proceeds of life insurance contracts, the Ricky Ray Hemophilia Relief Fund Act of 1998, the denial of deduction for club dues, the mark to market accounting method, the inapplicability of excise tax on premiums paid, certain amounts paid in connection with insurance contracts, specified federal acts, the installment method of accounting, qualified state tuition programs, the Federal Agriculture Improvement and Reform Act of 1996, determinations relating to deferred compensation, taxation of estates and trusts, small business stock, failure by an individual to pay estimated income tax, underpayment of estimated tax, underpayments of installments, elimination of interest on overlapping periods of tax overpayments and underpayments, mining

exploration and development costs, tax-exempt interest, “S corporations,” certain publicly traded partnerships treated as corporations, the deduction for a qualified computer contribution, secured indebtedness, tax on passive investment income, securities futures contracts, and the sale or exchange of livestock. This bill would specify various dates on which specified provisions apply, make findings and declarations that certain provisions are declaratory of existing law, and specify the intent and operation in the application of provisions conforming to various federal acts.

This bill would provide that it would only become operative if this bill and SB 657 are both chaptered.

This bill would take effect immediately as a tax levy.

Ch. 36 (AB 168) Nation. Charter schools: funding.

Existing law requires the Controller, commencing with the 1999–2000 fiscal year, to transfer from the General Fund to Section A of the State School Fund, a continuously appropriated fund, amounts necessary to meet computed apportionments of general-purpose funding for charter schools, as specified. These provisions become inoperative on July 1, 2002, and are repealed on January 1, 2003.

This bill would, until July 1, 2004, specify that a charter school shall be treated as a school district for purposes of the State School Fund.

By extending appropriations through the 2003–04 fiscal year, the bill would thereby make an appropriation.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 37 (SB 526) Sher. Underground storage tanks: discharges: closure: data storage: brownfield sites insurance.

(1) Under the existing Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, owners and operators of petroleum underground storage tanks are required to establish and maintain evidence of financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage arising from operating an underground storage tank.

The act provides for the issuance of a specified closure letter relative to the completion of an investigation and corrective action for an underground storage tank. The act, prohibits the issuance of such a closure letter unless the soil or groundwater, or both, where applicable, have been tested for MTBE, as specified.

This bill would additionally prohibit the issuance of such a closure letter unless the board, a California regional water quality control board, or the local agency finds that the tank is in compliance with specified corrective action requirements.

(2) Under the act, the State Water Resources Control Board is required to develop and implement a data base system for storing and retrieving data from cases involving discharges of petroleum from underground storage tanks, including specified information on sites where discharges have occurred.

The act requires that a site included in the system be designated as having no residual contamination if, at the time the site is closed, the board determines that no residual contamination remains on the site.

This bill would instead require that a site be designated in the data system as having no residual contamination if, at the time a closure letter is issued for the site, the board makes that determination.

(3) The act requires the board to adopt regulations to implement the act and the board is authorized to adopt emergency regulations to implement requirements for demonstrating financial responsibility and establishing corrective action requirements.

This bill would delete the department’s specific authority to adopt emergency regulations to implement those provisions.

(4) The existing Financial Assurance and Insurance for Redevelopment Program (FAIR), requires the Secretary for Environmental Protection to solicit proposals for a package of environmental insurance products from insurance companies through a competitive bidding process. The insurance company selected by the secretary is required to offer a prenegotiated package of environmental insurance products to any interested recipient of a loan under the Cleanup Loans and Environmental Assistance to Neighborhoods (CLEAN) Program, which provides loans to finance the performance of actions necessary to respond to the release or threatened release of hazardous material on an eligible property, and to any other person who conducts a response action in the state. Existing law provides that the selected insurance company or companies are the exclusive state-designated provider of environmental insurance under the FAIR Program for a period of 3 years and requires the request for proposal to specify whether the secretary intends to select only one insurance company or more than one insurance company.

This bill would delete the requirement that the request for proposal specify whether the secretary intends to select only one insurance company or more than one insurance company.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 38 (AB 1759) Wesson. California Memorial Scholarship Program: California memorial license plates.

(1) Existing law establishes the Golden State Scholarshare Trust and Governor's Scholarship Programs, under the administration of the Scholarshare Investment Board, to provide financial aid for postsecondary education costs of participating students.

This bill would establish the California Memorial Scholarship Program under the administration of the board to provide scholarships for surviving dependents, as defined, of California residents, as defined, killed as a result of injuries sustained during the terrorist attacks of September 11, 2001. The bill would establish the California Memorial Scholarship Fund, out of which moneys would be provided to fund the scholarships. The bill would prescribe the responsibilities of the Treasurer and the board in administering the scholarship program.

(2) Existing law requires the Department of Motor Vehicles to issue specific special interest license plates in accordance with a specified procedure.

This bill would provide for the issuance of California memorial license plates. The bill would provide that additional revenue derived from the issuance, renewal, transfer, and substitution of California memorial license plates would be deposited, as specified, in the Antiterrorism Fund and the California Memorial Scholarship Fund.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 39 (AB 1350) Canciamilla. Gas corporations: condemnation.

(1) Existing law prohibits a public utility that offers competitive services, other than a railroad corporation, a refined petroleum product common carrier pipeline corporation, or a water corporation, or an electrical company or gas corporation that needs to meet its commission-ordered obligation to serve, from condemning any property for the purpose of competing with another entity in the offering of those competitive services, unless the Public Utilities Commission finds that the condemnation would serve the public interest.

This bill would authorize, notwithstanding the above prohibition, a gas corporation to exercise the power of eminent domain to condemn any property for the purpose of competing with another entity in the offering of natural gas and services related to natural gas, but only as to property for which the gas corporation has filed a complaint in eminent domain in superior court on or before October 31, 2002. The bill would also provide that it shall become inoperative on October 31, 2002, and, as of April 1, 2003, is repealed.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 40 (AB 1684) Committee on Public Employees, Retirement and Social Security. State employees: memorandum of understanding.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of a memorandum of understanding entered into between the state employer and State Bargaining Unit 2, the Association of California State Attorneys and Administrative Law Judges, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that provisions of the memorandum of understanding approved by this bill that require the expenditure of funds shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer, and the affected employee organization shall meet and confer to renegotiate the affected provisions.

(2) Existing law prescribes contribution rates for state employees who are state miscellaneous, state industrial, or state safety members of the Public Employees' Retirement System.

This bill would reduce the contribution rates by 2<sup>1</sup>/<sub>2</sub>% during the period from January 1, 2002, to June 30, 2002, inclusive, and by an additional 2<sup>1</sup>/<sub>2</sub>% during the period from July 1, 2002, to June 30, 2003, inclusive, for state miscellaneous and state industrial members of the Public Employees' Retirement System in State Bargaining Unit 2.

(3) Existing law provides generally that wages earned and unpaid at the time an employee is discharged or an employee without a written contract quits are due and payable not later than 72 hours thereafter.

This bill would expressly permit a state employer to contribute unpaid vacation and other leave on a pretax basis, to the discharged or quitting employee's state-sponsored supplemental retirement account if the employee has submitted a written election authorizing the contribution, as specified.

(4) Existing law prohibits the contravention or setting aside by a private agreement of certain laws prescribing the frequency of wage payments.

This bill would provide that a state employer does not violate that prohibition by authorizing employees who quit or are discharged to take payment for unused or accumulated vacation or other leave.

(5) The annual Budget Act appropriates specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds, for state employee compensation.

This bill would appropriate \$875,000 from those funds for state employee compensation, in augmentation of the Budget Act of 2001.

(6) The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 41 (AB 1760) John Campbell. Orange County Water District.

The Orange County Water District Act provides for basin equity assessments and production requirements and limitations on persons and operators within the district and requires each person or operator not excluded, to file a basin equity assessment report on or before the 30th day of September of each year, setting forth the total amounts of water produced from groundwater within the district and from supplemental sources during the

preceding water year. If the person or operator fails to file a basin equity assessment report on or before that date the district must assess a penalty charge against that person or operator.

This bill would, instead, mandate the assessment of the penalty if the person or operator fails to file a basin equity assessment report on or before the 30th day of November of each year.

#### Ch. 42 (SB 508) Vasconcellos. Education: pupils.

Existing law establishes the Public Schools Accountability Act of 1999, which contains the Immediate Intervention/Underperforming Schools Program (IIUSP) and requires a school district that participates in the IIUSP to contract with an external evaluator to assist the school in the development of its school action plan.

This bill would authorize a school participating in the IIUSP to alternatively contract with an entity that has proven, successful expertise specific to the challenges inherent in low-performing schools instead of contracting with an external evaluator.

Existing law establishes the High Priority Schools Grant Program for Low Performing Schools (High Priority Program) within the Public Schools Accountability Act of 1999. Existing law requires a school that applies to participate in the federal Comprehensive School Reform Demonstration Program but does not participate because there are insufficient funds to allow the school to participate to be automatically approved for participation in the High Priority Program. Under existing law the Superintendent of Public Instruction is required to allocate \$200 per pupil to eligible schools for implementation of a school action plan under the program.

This bill would condition the automatic approval for participation in the High Priority Program on the school's completion of an action plan for participation in the federal program that meets certain requirements that a plan is required to meet for purposes of the IIUSP. The bill would also modify the deadlines for submission and approval of a school action plan during the 2001–02 fiscal year.

The bill would increase to \$400, including funds received under the federal Comprehensive School Reform Demonstration Program and other specified provisions, the amount of per pupil funding provided under the program.

Existing law requires a school action plan developed for purposes of the High Priority Program to include a pupil literacy and achievement component that contains a strategy to achieve certain goals, among which is that each English learner will demonstrate increased performance on the English language development test and the statewide achievement tests.

This bill would change that goal so that English learners rather than each English learner will demonstrate that increased performance.

Existing law encourages a school participating in the High Priority Program to assess the academic progress of pupils on an annual basis and authorizes the use of any curriculum-based achievement test for that purpose.

This bill would condition this use of a curriculum-based achievement test to those that are proven to be valid and reliable.

Existing law requires the State Department of Education to conduct a study on the issue of sustainability of funding for low-performing schools and requires the study to include an analysis of the ability of a school to sustain growth in academic achievement, particularly when the pupil population that continuously attends the school manifests issues of poverty and low socioeconomic status, and other characteristics that are generally out of the direct control of the school.

The bill would, instead, require the study to include, among other things, (1) a description of the ongoing needs of low-performing schools and the sources of funding schools have used to meet these needs, (2) an analysis of the use and effectiveness of funds provided pursuant to the High Priority Program, and (3) an assessment of whether local, state, and federal resources are likely to be sufficient to sustain all or some of the academic

improvements initiated in low-performing schools after funding made available pursuant to the High Priority Program expires.

The bill would require each school district with schools participating in the High Priority Schools Grant Program for Low Performing Schools to submit to the Superintendent of Public Instruction an evaluation of the impact, costs, and benefits of the program as it relates to the school district and the schools under its jurisdiction that are participating in the program, as prescribed. The bill would require the Superintendent of Public Instruction to develop and the State Board of Education to approve, the guidelines for a request for proposal for an independent evaluator to prepare a multiyear comprehensive evaluation of the implementation, impact, costs, and benefits of the program, and to disseminate the results of that report to the Legislature, the Governor, and interested parties, as prescribed.

Existing law requires that certain funds be allocated to school districts, county offices of education, and charter schools on the basis of an equal amount per unit of average daily attendance, including average daily enrollment in preschool and child care programs operated on schoolsites. Existing law sets forth the method for determining the average daily enrollment of children served in preschool and child care development programs.

This bill would specify that these funds are to be allocated to local education agencies and that the preschool and child care programs whose average daily enrollment is used to determine the amount to be allocated are required to be operated by local education agencies under contract with the Child Development Division of the State Department of Education. The bill would revise the method for determining the average daily enrollment of children served in preschool and child care development programs. The bill would define "schoolsites" for purposes of this provision.

The bill would make technical and conforming changes.

The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 43 (SB 1231) Committee on Local Government. Validations.

This bill would enact the First Validating Act of 2002, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 44 (SB 1338) Peace. Budget Act of 2001: contingencies or emergencies.

The Budget Act of 2001 appropriated \$5,000,000 from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies or emergencies upon written authorization from the Director of Finance. The Budget Act of 2001 also appropriated \$2,500,000 for loans to state agencies for contingencies or emergencies.

This bill would appropriate \$327,227,000 as scheduled, in augmentation of these Budget Act appropriations. This bill would authorize the Director of Finance to withhold authorization for the expenditure of funds appropriated in the bill until preliminary estimates of potential deficiencies are verified.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

#### Ch. 45 (AB 1559) Diaz. State data centers.

(1) Existing law establishes the Hawkins Data Center within the Department of Justice, the Stephen P. Teale Data Center, which is funded by the continuously appropriated Stephen P. Teale Data Center Revolving Fund, within the Business, Transportation and Housing Agency, and the California Health and Human Services Agency Data Center, which is funded from the continuously appropriated California Health and Human Services Data Center Revolving Fund, within the California Health and Human Services Agency. The data centers are under the supervision of data center directors appointed by the respective

appointing authority in consultation with the Director of Information Technology, and are subject to consolidation with other information technology centers if the Director of Information Technology deems it in the best interest of the state.

These provisions become inoperative on July 1, 2002, and are repealed as of January 1, 2003.

This bill would revise and recast these provisions by, among other things, deleting the provisions requiring consultation with the Director of Information Technology in the appointment of the data centers' directors, and the provisions specifying that the data centers are subject to consolidation with other information technology centers. It would also indefinitely extend the duration of these provisions. By making the existence of continuously appropriated funds permanent, this bill would make an appropriation.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 46 (AB 1354) Rod Pacheco. Emergency housing.

Under existing law, the Department of Housing and Community Development is required to adopt regulations for the administration of the Emergency Housing and Assistance Program. Existing law further provides that, notwithstanding a specified provision of law relating to discrimination, nothing in these provisions shall be construed to preclude a provider of emergency shelter or transitional housing from restricting occupancy on the basis of sex.

This bill would additionally provide that the provisions described above shall not be construed to preclude a provider of emergency shelter or transitional housing from restricting occupancy on the basis of age.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 47 (SB 1189) Costa. Alcoholic beverages: licensees: advertising restrictions.

Existing law generally prohibits a manufacturer of alcoholic beverages and a winegrower from paying, crediting, or compensating a retailer for advertising or pay or giving anything of value for the privilege of placing a sign or advertisement with a retail licensee. It authorizes, as an exception, the holder of a beer manufacturer's or winegrower's license, or a distilled spirits manufacturer or a distilled spirits manufacturer's agent, to purchase advertising space and time from, or on behalf of, an on-sale retail licensee, under certain conditions, if the on-sale retail licensee is the owner, manager, agent, assignee, or major tenant of a specified facility.

This bill would extend that exception to an on-sale licensee who is the owner, manager, agent of the owner, assignee of the owner's advertising rights, or the major tenant of the owner of an outdoor stadium with a fixed seating capacity in excess of 1,500 seats located in Tulare County or a motorsports entertainment complex, as described, in San Bernardino County.

This bill would make findings regarding the need for special legislation.

Existing law makes it a misdemeanor for a licensee, subject to the provisions of the bill, to violate existing provisions relating to the purchase of that advertising space or time.

This bill would impose a state-mandated local program by expanding the licensees subject to these criminal provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 48 (AB 1087) Calderon. Apprenticeships: electricians.

Existing law requires the Division of Apprenticeship Standards by July 1, 2001, to establish minimum training, competency, and certification standards for electricians, as

defined, and to establish and adopt regulations and fees to implement those standards. Existing law requires the division to establish advisory committees as needed to establish electricians' standards by March 1, 2000, and to include electrical contractors on the committees.

This bill would require the division to issue certification cards to electricians who become certified pursuant to the standards set by the division. The bill would continuously appropriate fees collected by the division pursuant to existing law for expenditure in an amount sufficient to pay the cost of supplying the certification cards. The bill would exempt from these provisions work performed in connection with temporary or portable electrical devices in specified industries.

The bill would also require electricians who perform work as electricians for contractors with specified types of licenses to obtain certification by January 1, 2005. The bill would prohibit electricians working for those certain contractors from performing electrical work, unless they are certified. The bill would exempt apprentice electricians from certification, but would permit apprentices who are within one year of completing their apprenticeships to take the certification examination and, upon passing the examination, become certified immediately upon completing the term of their apprenticeship. The bill would require the division to establish a specified committee to establish written educational curriculum standards for enrollees in an electrician training program.

The bill would require the division to make electrician certification information available in non-English languages, provide non-English certification tests, ensure that certain apprenticeship programs provide for reasonable alternative means of satisfying minimum federal education standards, and provide a specified report to the Legislature no later than January 1, 2004.

The bill would also make technical, nonsubstantive changes.

The bill would authorize, after January 1, 2005, uncertified persons who have registered with the division and have completed or are enrolled in a training program to perform electrical work under supervision, as specified. The bill would authorize the division to charge an initial registration fee for this purpose, not to exceed \$25, and would continuously appropriate these fees for the division's administrative costs with regard to the training program.

#### Ch. 49 (AB 1848) Diaz. School desegregation: Targeted Instructional Improvement Grants.

Existing law combines the funding for court-ordered desegregation programs and for voluntary integration programs to form the Targeted Instructional Improvement Grant Program and requires a school district receiving these funds to expend them to fund the costs of any court-ordered desegregation program if the order exists and is still in force or to provide instructional improvement for the lowest achieving pupils in the district.

This bill would, notwithstanding this provision, authorize a school district or multidistrict consortium or collaborative to expend the funds to continue operating a voluntary or court-ordered desegregation program that was established before the enactment of the Targeted Instructional Improvement Grant Program, including a court-ordered program that the district continues operating after the court order establishing the program is dissolved.

#### Ch. 50 (AB 1864) Salinas. Pajaro Valley Water Management Agency.

Existing law, the Pajaro Valley Water Management Agency Act, grants to the Pajaro Valley Water Management Agency various powers for the purposes of water management within its boundaries, including the power to regulate groundwater replenishment programs and recapture supplemental groundwater made available by these programs. The act declares that the purpose of the agency is to manage existing and supplemental water supplies to ensure sufficient water supplies for present and anticipated needs. The act defines "supplemental

water” to mean water imported from outside the watershed of the groundwater basin and certain conserved flood waters.

This bill would modify the definition of supplemental water to include recycled water.

Ch. 51 (AB 2657) Bogh. Instruction: grade point average.

Existing law prohibits a school district, when calculating a pupil’s grade point average, from assigning extra grade weighting to a course that covers a subject required for admission to the University of California or the California State University unless the University of California approves the course for extra grade weighting.

This bill would establish a 4 year implementation schedule for those provisions by commencing application to pupils in grade 9 in the 2005–06 school year.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 52 (SB 467) Scott. Disability insurance.

Existing Law provides unemployment compensation benefits for qualified unemployed individuals. In determining the disability base period for persons whose unemployment benefits for the benefit year have expired, the disability period is calculated with reference to specified 3-month periods in which the disability benefits begin.

This bill would change the specified 3-month periods to include those 3 months included in the respective quarters of a calendar year.

Existing law provides that a specified percentage of the wages of all California employees are to be deposited in the Disability Fund for purposes of funding unemployment compensation disability benefits. Existing law also authorizes an employer, or a majority of employees employed in this state by the same employer, subject to approval by the Director of Employment Development and conditioned upon specified requirements, to elect to be covered under a voluntary plan for the payment of disability insurance.

This bill would make technical amendments to a number of the provisions governing voluntary plans for the payment of disability insurance deductions.

Ch. 53 (AB 2597) Committee on Elections, Reapportionment and Constitutional Amendments. Municipal elections.

Existing law requires that specified charter proposals be submitted to the voters, including charter proposals to amend or repeal a city charter proposed by a petition signed by 15% of the registered voters of the city, and charter proposals to amend or repeal of a city and county charter proposed by a petition signed by 10% of the registered voters of the city and county. Existing law requires that the number of registered voters be determined according to the county elections official’s last official report of registration to the Secretary of State.

This bill would require that the report of registration used for this determination be the report effective at the time that the proponents of a measure proposing to amend a charter give notice of their intent to circulate the petition.

Existing law requires that a petition to amend a municipal charter be filed with the elections official not later than 200 days after the date on which the notice of intent to circulate the petition was published or posed, or both.

This bill would require that the petition be filed within 180 days from the date of receipt of the title and summary, or after termination of an action for a writ of mandate requiring that the ballot title or summary be amended and, if applicable, receipt of an amended title or summary, or both, whichever comes later.

Ch. 54 (AB 255) Zettel. Elder abuse.

(1) Existing law, the Elder Abuse and Dependent Adult Civil Protection Act, establishes various procedures for the reporting, investigation, and prosecution of elder and dependent adult abuse. These procedures require certain persons, called mandated reporters, to report known or suspected instances of elder or dependent adult abuse. Under existing law, care custodians of elder or dependent adults and local law enforcement agencies are mandated

reporters. A violation of the reporting requirements by a mandated reporter, as defined, is a misdemeanor.

This bill would revise the provisions setting forth the purposes of the act, would revise the definition of mandated reporter by including a “clergy member,” as defined, and would redefine “care custodian” to include certain employees of humane societies, animal control agencies, fire departments, and offices of environmental health and code enforcement. The bill would also add abduction to the conduct that is required to be reported under the act, would redefine “multidisciplinary personnel team,” and “neglect,” and would define “imminent danger.” It would also exclude from the definition of “health practitioner” religious practitioners who diagnose, examine, or treat elders or dependent adults.

(2) Existing law authorizes various entities to receive information relevant to an incident of elder or dependent adult abuse and applies confidentiality requirements and liability limitations to those entities.

This bill would extend to any district attorney’s office the authority to receive this information and apply the related confidentiality and liability provisions to the office.

Because the bill would expand the definition of a crime, it would impose a state-mandated local program.

(3) Existing law specifies procedures under which a law enforcement officer or other designated persons, may take an endangered adult, as defined, into temporary emergency protective custody or, whether or not medical treatment is required, any physician treating the endangered adult may request that the law enforcement agency take that endangered adult into temporary emergency protective custody, under specified circumstances. Existing law defines various terms for purposes of these provisions.

This bill would revise the definition of the terms to conform to the definitions used for purposes of the act.

(4) Existing law requires every county welfare department to establish and maintain within the county welfare department a specialized entity responsible for the operation of an adult protective services program. Existing law defines various terms for purposes of these provisions.

This bill would revise these definitions of the terms to conform to the definitions used for purposes of the act.

(5) Existing law provides for enhanced adult protective services provisions, to the extent funds are provided in the annual Budget Act, that require that adult protective services include certain activities and require each county to establish an emergency response adult protective services program containing specified requirements.

This bill would combine these provisions with those described in (4) above and make other changes to conform these provisions to the act. The bill would revise the program requirements related to providing immediate intake or intervention in response to reports and the requirements of an immediate response concerning certain reports involving elder or dependent adults residing in other than long-term care or residential facilities. It would also require a county adult protective service agency to provide certain organizations with specified instructional materials regarding elder and dependent adult abuse and neglect and their obligations under the act. The imposition of this new requirement on counties would create a state-mandated local program.

(6) Existing law requires that certain investigations of allegations of elder and dependent adult abuse, and the case management of elder and dependent adult abuse cases, be performed by county merit system or civil service employees. Under existing law, a county adult protective service agency may utilize a contracted private or nonprofit telephone answering service after normal working hours and on weekends and holidays. These provisions are implemented only to the extent that funding is provided in the Budget Act.

This bill would eliminate that restriction on the application of those provisions.

This bill would also make technical revisions.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 55 (AB 1785) Reyes. Health: local agency joint powers agreements.

Existing law requires counties to provide or secure certain public health care services, and authorizes the formation of local health care districts and the establishment of municipal hospitals for the purpose of providing needed public health care services.

Existing law, the Joint Exercise of Powers Act, permits 2 or more public agencies to enter into an agreement to jointly exercise any power common to the contracting parties.

Existing law, notwithstanding this provision, authorizes a private, nonprofit hospital in the Counties of Contra Costa, Kings, San Diego, Tuolumne, and Tulare to enter into joint powers agreements with a public agency.

This bill would also authorize Selma Community Hospital, a private, nonprofit hospital in the County of Fresno, to enter into a joint powers agreement with specified public agencies.

The bill would state the finding and declaration of the Legislature that a special law is necessary and that a general law cannot be made applicable.

Ch. 56 (SB 183) Burton. State employees: retirement benefits.

(1) Existing law authorizes members of the Public Employees' Retirement System to receive service credit for various types of service that are not otherwise eligible for service credit upon payment of specified additional contributions, which contributions are deposited in the Public Employees' Retirement Fund, a continuously appropriated special fund.

This bill would authorize state and school members of the system and, if adopted by their contracting agencies, local members of the system to receive service credit for service performed with specified legislative, executive, and judicial fellowship programs, upon payment of specified additional contributions and subject to certain limitations. By increasing member contributions to the Public Employees' Retirement Fund, the bill would make an appropriation.

(2) Under the Public Employees' Retirement Law, state employees classified as state safety members are entitled to generally higher benefits, and subject to higher contribution rates, than those employees classified as state miscellaneous members. Member contributions are deposited in the Public Employees' Retirement Fund, a continuously appropriated fund.

Under this bill, a state employee who is (1) a member of State Bargaining Unit 7, (2) in a related managerial, supervisory, or confidential position, or (3) an officer or employee of the executive branch in a related position, subject to specified conditions, and who is classified as a state miscellaneous member would, as of July 1, 2004, become a state safety member, unless he or she elects to remain a miscellaneous member, as specified in existing law. By increasing member contributions to the Public Employees' Retirement Fund, the bill would make an appropriation.

(3) The Public Employees' Retirement Law prescribes a 3% at age 50 retirement formula for state peace officer/firefighter members who are members of State Bargaining Unit 6 and who retire or die on or after January 1, 2006.

This bill would additionally make the 3% at age 50 retirement formula applicable to state peace officer/firefighter members who are members of State Bargaining Unit 7 and who retire or die on or after July 1, 2004, and would make a related, technical change.

(4) Under existing law, specified employees of the Department of Justice, among others, are defined as “peace officers” and, as such, may exercise certain powers, including the power of search, seizure, and arrest, and are state peace officer/firefighter members of the Public Employees’ Retirement System.

This bill would include the Attorney General in the definition of a “peace officer.”

Ch. 57 (AB 81) Migden. Property taxation: state-assessed property.

The California Constitution requires the State Board of Equalization to assess the property, other than franchises, of companies transmitting or selling gas or electricity. Existing regulations require the board to assess an electric generation facility, for purposes of this constitutional provision, only if (1) the facility was constructed pursuant to a certificate of public convenience and necessity issued by the California Public Utilities Commission to the company that presently owns the facility or (2) the company owning the facility is a state assessee for reasons other than its ownership of the generation facility or its ownership of pipelines, flumes, canals, ditches, or aqueducts lying within 2 or more counties.

Existing property tax law provides for the valuation, as a unit, of properties of a state assessee that are operated as a unit as a primary function of that assessee, and for the allocation of the assessed value of the unit among various counties in which the state-assessee’s unitary property is located. Existing law also provides, pursuant to specified formulas, for the application in each county of specified tax rates to unitary assessed value, and for the allocation among jurisdictions in that county of the resulting revenues.

This bill would, commencing with the January 1, 2003, property tax lien date, require the board to annually assess electric generation facilities, with specified exceptions, with a generating capacity of 50 megawatts or more that is owned by an electrical corporation, as defined.

This bill also would require that the assessed value of electric generation facilities required to be assessed by the board be allocated exclusively to the county in which the facility is located, and that the revenues derived from the assessment of this property be allocated in the same percentage shares as revenues derived from locally assessed property among the jurisdictions in which the property is located. By establishing new duties with respect to the annual allocation of property tax revenues derived from state-assessed property, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 58 (AB 352) Runner. Undetectable knives.

Existing law provides that any person who commercially manufactures or causes to be commercially manufactured, knowingly imports into the state for commercial sale, keeps for commercial sale, or offers or exposes for commercial sale, any undetectable knife is guilty of a misdemeanor. Existing law also defines an “undetectable knife” to mean any knife or other instrument that, among other criteria, is not detectable by a metal detector set at standard calibration.

This bill would revise the definition of “undetectable knife” to include any knife or other instrument that, among other criteria, is not detectable by a metal detector or magnetometer, as specified.

Ch. 59 (AB 1285) Reyes. Supplemental Instruction: Fresno Unified School District.

Existing law requires the governing board of each district maintaining any or all of grades 7 to 12, inclusive, to offer supplemental instructional programs for pupils enrolled in grades 7 to 12, inclusive, who do not demonstrate sufficient progress toward passing the exit examination required for high school graduation. Existing law authorizes these supplemental instructional programs to be offered during the summer, before school, after school, on Saturday, or during intersession, or in any combination of summer, before school, after school, Saturday, or intersession instruction, but requires that they be in addition to the regular schoolday. Existing law prohibits the waiver of these provisions.

This bill would, notwithstanding existing law, authorize the State Board of Education to grant a waiver request from the Fresno Unified School District to allow that school district to use supplemental instructional program funds to offer to pupils enrolled at the Cooper Middle School an instructional day that is 60 minutes longer than at other middle schools in the district in order to provide more instruction in language arts and mathematics. The bill would require the Superintendent of Public Instruction to conduct an evaluation of this alternative use of supplemental instruction funds and submit an evaluative report to the Legislature by December 31, 2004. These provisions would become inoperative on July 1, 2004, and would be repealed as of January 1, 2005.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 60 (AB 1433) Horton. Military service: benefits.

Existing law authorizes extensions of time for certain credit contracts of, and stays of administrative and judicial proceedings of, enlisted members of the National Guard ordered into active state service by the Governor for specified emergency purposes.

Existing law prohibits eviction or distress, except upon leave of court, with respect to premises, rented at or below a certain monthly rate, that were occupied by the spouse, children, or other dependents of reservists called into active duty as a result of the Iraq-Kuwait crisis. Existing law also requires the court to issue a stay for a specified period or make other prescribed orders, unless the court found that the ability to pay the rent was not materially affected by that military service. Existing law makes knowing eviction or distress a misdemeanor.

This bill would revise and recast those provisions to provide similar protections for members of the National Guard ordered into active state service by the Governor or active federal service by the President of the United States for emergency purposes, and for reservists called to active duty, as specified. This bill would provide protections for these persons during their period of military service with respect to, among other things, court proceedings, contract obligations, rental agreements, taxes or assessments, and health or medical insurance.

This bill would also make other, related changes.

By making violations of certain provisions misdemeanors, this bill would impose a state-mandated local program.

This bill would state the intention of the Legislature in enacting these provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 61 (AB 1734) Committee on Utilities and Commerce. Telecommunications services.

(1) Existing law establishes the California High-Cost Fund-B Trust and the Deaf Equipment Acquisition Fund (DEAF Trust). Existing law authorizes the trustee of the California High-Cost Fund-B Trust to transfer money, on or before September 30, 2001, to the DEAF Trust to cover the costs of programs to provide specified telecommunications services and equipment to deaf or disabled persons in this state. Existing law requires the commission to reimburse the California High-Cost Fund-B Trust for any transfer of money to the DEAF Trust. Existing law requires that reimbursement during specified dates to the California High-Cost Fund-B Trust be deposited in a separate memorandum account within the DEAF Trust. Existing law requires that on July 1, 2002, any funds remaining in the DEAF Trust, including amounts deposited in the memorandum account for purposes of reimbursing the California High-Cost Fund-B Trust, revert to the General Fund in the State Treasury, with all amounts in the memorandum account reverting for the purpose of funding the California High-Cost Fund-B Trust account in the State Treasury.

This bill would instead require that on July 1, 2002, any funds in the DEAF Trust that were deposited in the memorandum account for purposes of reimbursing the California High-Cost Fund-B Trust revert to the Controller for deposit in the California High-Cost Fund-B Trust Committee Fund in the State Treasury. The bill would also require that on July 1, 2003, any funds remaining in the DEAF Trust, exclusive of those funds in the memorandum account, revert to the Deaf and Disabled Telecommunications Program Administrative Committee Fund in the State Treasury.

(2) Existing law establishes the Deaf and Disabled Telecommunications Program Administrative Committee (committee) to advise the Public Utilities Commission regarding the implementation, development, and administration of programs to provide specified telecommunications services and equipment to persons who are deaf or disabled, and to carry out the programs pursuant to the commission's direction, control, and approval. Existing law establishes the Deaf and Disabled Telecommunications Program Administrative Committee Fund in the State Treasury to carry out the programs pursuant to the commission's direction, control, and approval, and requires the commission to report to the Governor and the Legislature regarding a transition plan for programs associated with the fund.

This bill would, commencing July 1, 2003, rename the committee the Telecommunications Access for Deaf and Disabled Administrative Committee, and delete the authority of the committee to carry out programs pursuant to the commission's direction, control, and approval. The bill would require the committee to advise the commission on certain contracts and agreements related to deaf and disabled telecommunications programs and to submit recommendations to the commission for the administration and governance of certain deaf and disabled telecommunications programs. The bill would require the commission to establish qualifications for persons to serve as members of the committee so that consumers of telecommunications services for the deaf and disabled represent not less than  $\frac{2}{3}$  of the membership of the committee and, to the extent feasible, that one of those members have experience in the administration of similar deaf and disabled telecommunications programs. The bill would require, commencing July 1, 2003, that any staffing costs incurred by the commission for the oversight and administration of the deaf and disabled telecommunications programs be funded by moneys appropriated from the Deaf and Disabled Telecommunications Program Administrative Committee Fund.

(3) Existing law requires that all revenues collected by telephone corporations in rates to fund the deaf and disabled telecommunications programs be submitted to the commission. Existing law requires that commencing July 1, 2002, the commission transfer the moneys received, and all unexpended revenue collected prior to July 1, 2002, to the Controller for deposit in the Deaf and Disabled Telecommunications Program Administrative Committee Fund.

This bill would instead require the commission to transfer the moneys received, including unexpended revenue collected prior to July 1, 2003, commencing July 1, 2003.

(4) Existing law requires the commission to design and implement various programs to provide telecommunications services to deaf, disabled, and hearing-impaired individuals.

This bill would authorize the commission to contract with entities, including nonprofit entities, or persons with necessary expert knowledge, ability, and experience to provide, manage, or operate specified telecommunications services and equipment for the deaf and disabled telecommunications programs. The bill would require any contractor the commission selects to deliver these services to consult with the Telecommunications Access for Deaf and Disabled Administrative Committee regarding the specialized needs of individuals using the deaf and disabled telecommunications services and equipment.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 62 (AB 1819) Robert Pacheco. Delinquent fines: collection.

Existing law authorizes any county or court to implement a comprehensive program to identify and collect delinquent fines and forfeitures, with or without a warrant having been issued against the alleged violator, if the base fine, excluding state and county penalties, is at least \$100. Existing law authorizes the county or court to deduct and deposit in the county treasury the cost of operating that program, excluding capital expenditures, from any revenues collected prior to making any distribution of revenues to other governmental entities required by any other provision of law.

This bill instead would authorize any county or court that implements a comprehensive program to identify and collect delinquent fines and forfeitures, with or without a warrant having been issued against the alleged violator, if the base fines and forfeitures are delinquent. The bill would allow the cost of operating the program, excluding capital expenditures, to be deposited in the county treasury or the trial court operations fund prior to disbursement pursuant to existing law. The bill would expressly provide that any county or court may establish a minimum base fine or forfeiture amount for inclusion in the program.

#### Ch. 63 (AB 1873) Koretz. Peace officers: confidential records.

Under existing law, peace officer personnel records and other specified records, or information from those records, are confidential and may not be disclosed by the department or agency that employs the peace officer in any civil or criminal proceeding except by discovery pursuant to specified provisions of law.

This bill would recast these provisions and provide that these records may not be disclosed in any civil or criminal proceeding except by discovery pursuant to specified provisions of law.

#### Ch. 64 (AB 2106) Bogh. Jurisdiction.

Generally, jurisdiction over an offense is in the jurisdictional territory where it occurs. Existing law provides that the jurisdiction for an offense committed in part in 2 different jurisdictional territories is in any competent court of either jurisdictional territory. For certain specified theft-related crimes involving property moved among jurisdictional territories, jurisdiction lies in any of those territories. For crimes of domestic and sexual abuse, where the defendant and victim are the same and the offenses occur in several jurisdictional territories, jurisdiction lies in each of those territories. Existing law provides for other special jurisdictional determinations involving treason, incest, bigamy, and other offenses without clear territorial connection, or with connections to multiple territories.

This bill would provide for territorial jurisdiction over charged violations of specified provisions relating to weapons of mass destruction in the courts of any of the territories in which any one of the offenses occurred, if the offenses are part of a single scheme or terrorist attack.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 65 (AB 2336) Negrete McLeod. Prisoners: hearing notice.

Under existing law, in specified actions or proceedings in which a prisoner's parental or marital rights are subject to adjudication, an order for the prisoner's temporary removal from the institution and for the prisoner's production before the court may be made by the superior court of the county in which the action or proceeding is pending, or by a judge thereof. Existing law requires that a copy of the order be transmitted to the warden, superintendent, or other person in charge of the institution not less than 48 hours before the order is to be executed.

This bill would require that instead a copy of the order be transmitted not less than 15 days before the order is to be executed.

Ch. 66 (AB 2563) Vargas. Domestic violence.

Existing law gives the court authority, as specified, to revoke or terminate probation, or to modify conditions of probation. Under existing law, a court cannot modify, revoke, or change court orders of probation without written notice to the proper probation officer, and cannot modify a probation order without providing a 2-day written notice to the prosecutor, and an opportunity to be heard on the matter.

This bill would provide that a protective order that is a term or condition of probation in a domestic violence case may not be modified without a 5-day written notice being provided to the prosecuting attorney. This bill would require a court limiting or terminating a protective order as a condition of probation in a domestic violence case to consider if there has been any material change in circumstances since the crime for which the order was issued, and to consider any issue that relates to whether good cause exists for the change, including specified considerations.

Ch. 67 (SB 1271) Ackerman. Nonprobate transfers: Uniform TOD Security Registration Act.

Existing law, the Uniform TOD Security Registration Act, provides for the transfer of the ownership or proceeds of a security, as defined, upon the death of the owner, without probate or estate administration, and defines a security account for these purposes.

This bill would add the term cash equivalents, as defined, and an investment management or custody account with a trust company or a trust department of a bank with trust powers, as specified, to the definition of security account for purposes described above.

Ch. 68 (SB 1322) Ackerman. Debtor and creditor relations.

(1) Existing law permits a plaintiff to apply for a writ of possession, which must show, among other things, the basis of the plaintiff's claim and that the plaintiff is entitled to the property claimed. Existing law requires a hearing on a noticed motion before the writ of possession may be issued, except as specified, and prohibits a court from issuing a writ until the plaintiff posts an undertaking in a value of at least twice the defendant's interest. Existing law permits a defendant to post an undertaking to prevent the seizure of the property or reclaim it.

This bill would provide an alternative procedure for writs of possession if a court finds that a defendant has no interest in the property. The bill would require, under these circumstances, that a court waive the requirement of the plaintiff's undertaking and that the court determine the amount of the defendant's undertaking, as specified. The bill would also require a levying officer to deliver to the person in possession of the property a copy of the court order for issuance of the writ of possession.

(2) Under the existing Enforcement of Judgments Law, a judgment creditor may levy upon the property of a judgment debtor to satisfy the judgment, and the judgment debtor may claim that certain property is exempt from the levy by following a specified procedure. Under that existing law, a levying officer holds the property until the final determination of the exemption.

This bill would require that if an exemption of property, as described above, is not determined within a specified time, the property claimed to be exempt shall be released, unless otherwise ordered by the court. The bill would further permit a levying officer to release the property described above after an appeal is waived or the time for filing an appeal has expired.

Ch. 69 (SB 1325) Kuehl. Personal jurisdiction: general appearance.

Under existing law, a defendant, on or before the last day of his or her time to plead or within any further time that the court may for good cause allow, may serve and file a notice of motion for certain purposes, including to quash service of summons on the ground of lack of jurisdiction of the court over him or her.

The bill would permit a defendant or cross-defendant to move to quash service of summons, move to stay or dismiss the action on the grounds of inconvenient forum, or move to dismiss for delay in prosecution, and simultaneously answer, demur, or move to strike the complaint or cross-complaint. The bill would specify certain circumstances under which a party is not deemed to have made a general appearance for purposes of a court exercising its jurisdiction.

The bill would declare the intent of the Legislature in enacting its provisions to conform California practice with respect to challenging personal jurisdiction to the practice under Rule 12(b) of the Federal Rules of Civil Procedure.

Ch. 70 (SB 1370) Bowen. Servicing of indebtedness: transfer.

Existing law requires any person transferring the servicing of indebtedness to a different servicing agent to provide written notice to the borrower or subsequent obligor, as specified.

This bill additionally would require any person transferring the servicing of indebtedness to a different servicing agent to provide to the new servicing agent all existing insurance policy information that the person is responsible for maintaining.

Ch. 71 (SB 1371) Morrow. Court reporting.

Existing law requires an official court reporter to provide a transcript in plain and legible longhand to the court or either party of the transcript of a judicial proceeding originally taken in shorthand.

This bill also would require that transcript to be provided in longhand to a nonparty if he or she is entitled to receive the transcript whether or not the nonparty was entitled to attend the proceeding.

The bill would make other technical nonsubstantive changes to the state statutes which govern the production of transcripts by court reporters, including reorganizing and consolidating various code sections which make reference to the obsolete municipal courts.

Ch. 72 (SB 2061) Morrow. Evidentiary privileges.

Existing law specifies that the right of a person to claim an evidentiary privilege is waived if the holder of the privilege discloses a significant part of the privileged communication or has consented to that disclosure, as specified.

This bill would add the domestic violence victim-counselor privilege to the list of evidentiary privileges to which this provision applies. The bill would also add a communication made in the course of a sexual assault victim-counselor or domestic violence victim-counselor relationship to the list of communications presumed to have been made in confidence and therefore privileged.

Existing law provides that a communication between a client and his or her lawyer is not deemed lacking in confidentiality solely because the communication is transmitted by facsimile, cellular telephone, or other electronic means between the client and his or her lawyer.

This bill would delete that provision and add a provision specifying that a communication between persons in a privileged relationship does not lose its privileged character for the sole

reason that it is communicated by electronic means or because persons involved in the delivery, facilitation, or storage of electronic communication may have access to the content of the communication.

Ch. 73 (SB 1359) Haynes. Display of the American flag.

Existing law prohibits any person, private entity, or governmental agency from adopting a measure that prevents any person or private entity from exercising his or her legal right to display a Flag of the United States on private property, unless it is used as, or in conjunction with, an advertising display. Existing law prohibits these provisions from being construed to prevent a city, county, or city and county from imposing reasonable restrictions as to the time, place, and manner of placement or display of a Flag of the United States when necessary for the preservation of the public's health, safety, or order, and prohibits any restrictions from being imposed solely to promote aesthetic considerations.

This bill would additionally prohibit any local government agency, as defined, from adopting any policy or regulation that prohibits or restricts an employee of that agency from displaying a Flag of the United States, or a pin of that flag, on his or her person, in his or her workplace, or on a local government agency vehicle, except as specified.

Ch. 74 (AB 1992) Correa. County employees' retirement: board of retirement: Orange County.

(1) Existing law authorizes boards of retirement of retirement systems subject to the County Employees Retirement Law of 1937 to appoint an administrator who shall not be subject to county civil service, who shall be a county employee, and who may be dismissed at will by the board, as specified.

This bill would authorize the board of retirement of the Orange County Employees Retirement System to appoint an administrator, assistant and subordinate administrators, legal counsel, an investment officer, and specified senior management employees. Those appointees would be employees of the retirement system, subject to terms of employment determined by the board of retirement.

(2) Under existing law, counties and districts, as defined, may provide retirement benefits to their employees pursuant to the County Employees Retirement Law of 1937.

This bill would include the Orange County Employees Retirement System within the definition of a "district" for purposes of providing retirement benefits to the system's employees. The bill would provide that when the system becomes a district, the employees of that district who had previously been in county service shall continue to be members of the system, without interruption in service or loss of credit, and all necessary appropriations and transfers of funds shall be charges against the funds of that district.

(3) The County Employees Retirement Law of 1937 authorizes a board of supervisors or governing body of a district, by resolution, to make any formula for calculation of benefits applicable to service credit earned prior to the date of the resolution and to require, subject to certain conditions, the affected members to pay some or all of the contributions that would have been paid if the formula had been in effect during that designated period prior to the date of the resolution.

This bill would additionally authorize the board of supervisors or the governing body of a district in Orange County, by resolution adopted by majority vote and made pursuant to a memorandum of understanding, as specified, to make certain formulas for the calculation of benefits for general or safety members applicable to the employees of a bargaining unit comprised of general members, safety members, or employees of the Probation Services Unit and Probation Supervisory Management Unit, as specified. The bill would also require the affected members, subject to certain conditions, to pay some or all of those additional contributions, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 75 (SB 1268) Battin. Lake Cuyamaca Recreation and Park District.

(1) Existing law establishes the Lake Cuyamaca Recreation and Park District, and prescribes the functions and duties of the district. Existing law authorizes the district to acquire all necessary and proper lands and facilities by borrowing funds or purchasing on contract. Existing law prohibits the amount of indebtedness incurred from exceeding an amount equal to the anticipated tax income for a 2-year period, and requires that all indebtedness be repaid in approximately equal annual installments during a period not to exceed 5 years from the date on which the indebtedness is incurred, at a rate not to exceed 6% per annum. Existing law requires that a tax be levied and collected sufficient to pay the interest and principal on the indebtedness.

This bill would specify that the amount of indebtedness shall not exceed an amount equal to the anticipated revenue for a 2-year period, and would require that all indebtedness be repaid in annual installments during a period not to exceed 10 years from the date on which the indebtedness is incurred, at a rate that is less than or equal to the rate permitted under certain provisions of existing law. The bill would delete those provisions requiring that a tax be levied to repay the principal and interest on the indebtedness.

(2) Existing law authorizes the district board to call an election for the issuance of bonds to pay for the acquisition of a structure or improvement of real property if the acquisition or improvement reasonably requires an expenditure of funds in excess of available funds of the district derived from ordinary taxation. Existing law prescribes procedures for, and imposes conditions upon, the issuance of bonds by the district.

This bill would require the district to proceed under certain provisions of existing law relating to issuance of bonds by recreation and park districts, if the district elects to incur general obligation bonded indebtedness for the acquisition or improvement of real property or for the funding or refunding of any outstanding indebtedness.

Ch. 76 (SB 1579) Brulte. Public resources: recreation and park districts.

The existing Recreation and Park District Law specifies procedures for park district formation, procedures for the selection of the district board of directors and officers, the powers and duties of the board, and financial provisions. Existing law authorizes the board of directors of a district to form zones within a district to provide different services, to provide different levels of service, or to raise additional revenues within specific areas of the district. Existing law requires the board of directors of a district to terminate the proceedings if the board determines, among other things, that property owners who own more than 50% of the assessed value of all taxable property in the district have filed written objections to the formation.

This bill would require the board to terminate the proceedings if the board determines that property owners who own more than 50% of the assessed value of all taxable property in the proposed zone, instead of the district, have filed written objections to the formation of the zone.

Ch. 77 (SB 1833) Peace. Budget Act of 2001: public social services.

The Budget Act of 2001 appropriated \$726,494,000 from the General Fund to the State Department of Social Services for expenditure for local assistance, including children's services, special programs, and community care licensing.

This bill would increase this appropriation to \$753,619,000, as scheduled, and make related changes.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 78 (AB 1765) Bogh. Vehicle length limitation.

Under existing law, with specified exceptions, a 40-foot limitation is imposed on the length of vehicles that may be operated on the highways.

This bill would additionally exempt schoolbuses fitted with a crossing control arm from that limitation when the excess length is caused by the projection of the device, as specified.

Ch. 79 (AB 1892) Harman. Orange County Sanitation District.

The County Sanitation District Act authorizes a sanitation district to acquire, construct, and complete certain works, property, or structures necessary or convenient for sewage collection, treatment, and disposal.

This bill would authorize the Orange County Sanitation District to acquire, construct, operate, maintain, and furnish facilities for the diversion of urban runoff from drainage courses within the district, the treatment of the urban runoff, the return of the water to the drainage courses, or the beneficial use of the water.

This bill would declare that it constitutes necessary special legislation.

This bill would declare that it shall take effect immediately as an urgency statute.

Ch. 80 (AB 1915) Lowenthal. Vehicles: license plates.

Existing law provides for the assignment of a specific license number to a motor vehicle, which may be changed only upon application to the Department of Motor Vehicles (DMV), and under certain circumstances. Existing law provides for controls on the replacement of lost, stolen, or mutilated license plates when the applicant provides an address different from that in DMV records.

This bill would require the DMV to provide a new set of license plates to a registered owner of a vehicle who appears in person and submits a completed application and also presents to the DMV the previously issued plates, proof of identity and vehicle ownership, and either evidence of victimization by a domestic abuser or evidence of efforts to get assistance in regard to the domestic abuse, as specified. This bill would exempt special interest license plates from this requirement.

Ch. 81 (AB 2034) Horton. Community colleges: Reporting by Community College Employees of Improper Governmental Activities Act.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state.

Existing law, known as the California Whistleblower Protection Act, sets forth the circumstances and procedures under which a state employee may report improper governmental activities or make a protected disclosure to the State Auditor, and prohibits retaliation or reprisal against a state employee for these acts. Existing law, known as the Reporting by Community College Employees of Improper Governmental Activities Act, enacts provisions, applicable to community college campuses, that are similar to the California Whistleblower Protection Act, including procedures for the investigation and determination of complaints by the State Personnel Board.

This bill would require the hearings to be conducted in accordance with the statutes governing community colleges and the rules of practice and procedure of the State Personnel Board. The bill would also require that no costs associated with hearings of the State Personnel Board conducted pursuant to a cited provision of the Reporting by Community College Employees of Improper Governmental Activities Act shall be charged to the board of governors. The bill would instead require that all of the costs associated with those hearings shall be charged directly to the community college district that employs the complaining employee, or with whom the complaining applicant for employment has filed his or her employment application.

Ch. 82 (AB 2038) Ashburn. County service areas.

Existing law permits the board of supervisors by a  $\frac{4}{5}$  vote to appropriate up to \$1,000,000 of its available moneys to a revolving fund for specified uses relating to county service areas under prescribed conditions, including a requirement that the revolving fund be reimbursed. Existing law also authorizes the Board of Supervisors of Santa Barbara County to disburse money from the revolving fund to county service areas without the requirement of reimbursement.

This bill would grant the same authority to the Board of Supervisors of Tulare County.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 83 (AB 2122) Washington. Local agency investments.

Existing law authorizes the legislative body of a local agency having money in a sinking fund of, or surplus money in, its treasury not required for the immediate needs of the local agency to invest any portion of the money that it deems wise or expedient in specified securities and financial instruments. One of the types of eligible securities is commercial paper of prime quality, as described. Existing law limits counties and cities and counties to investing no more than 40% of their money in eligible commercial paper and limits other local agencies, such as cities, to investing no more than 25% of their money in eligible commercial paper.

This bill would make the City of Los Angeles subject to the same concentration limits for investment in eligible commercial paper as counties and cities and counties.

Ch. 84 (AB 2142) Chavez. Financial guaranty insurance.

Existing law regulates insurers transacting financial guaranty insurance. Existing law requires at least 95% of a financial guaranty insurance corporation's outstanding total net liability on specified obligations, including corporate obligations, partnership obligations, and asset-backed securities, to be investment grade.

This bill would exempt corporate obligations, partnership obligations, and asset-backed securities from that investment requirement governing financial guaranty insurance corporations.

Ch. 85 (AB 2146) Chu. Community colleges: intersession terms.

(1) Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state.

Existing law provides that nothing in the Education Code is to be construed as permitting a community college faculty member to acquire regular classification with respect to employment in a summer school maintained by a community college district. Existing law also excludes service in connection with this employment from the computation of the service required as a prerequisite to attainment of, or eligibility for, classification as a regular employee of the district.

This bill would also exclude intersession terms from this computation if this exclusion is in accordance with an applicable collective bargaining agreement.

(2) Existing law relating to the employment of faculty by a community college district defines an "academic year" as that period between the 1st day of a fall semester or quarter and the last day of the following spring semester or quarter.

This bill would further require that an "academic year" exclude any intersession term that has been excluded pursuant to an applicable collective bargaining agreement. The bill would also make various technical and conforming revisions.

Ch. 86 (AB 2167) Koretz. Real estate licenses.

The Real Estate Law requires the licensure of a person by the Real Estate Commissioner to engage in the business of, act in the capacity of, or advertise or assume to act as, a real estate

broker or a real estate salesperson within this state. Existing law requires an applicant for an original real estate salesperson license to successfully complete 2 courses from a list of designated courses. Existing law also requires an applicant for renewal of a real estate license to successfully complete 45 hours of educational courses including 4 designated courses.

This bill would require, on and after July 1, 2003, an applicant for an original real estate salesperson license to successfully complete a course in real estate practices and one course from the list of designated courses. The bill would also provide, on and after July 1, 2003, that successful completion of the 4 designated courses for renewal of a real estate license requires an applicant to demonstrate that he or she has passed a final examination.

Ch. 87 (AB 2196) Lowenthal. Podiatrists.

Existing law, the Medical Practice Act, makes it a misdemeanor for a person who is not licensed as a physician and surgeon to use certain words, letters, and phrases or any other terms that imply that he or she is authorized to practice medicine as a physician and surgeon. Existing law makes it a misdemeanor for a person who is not licensed to practice podiatric medicine to use certain words, letters, and phrases or any other terms that imply that he or she is a podiatrist.

This bill would specify that a person who is licensed to practice podiatric medicine may use the phrases "doctor of podiatric medicine," "doctor of podiatry," and "podiatric doctor" or the initials "D.P.M.," and the person would not be in violation of the act.

Ch. 88 (AB 2398) Robert Pacheco. Community colleges: surplus personal property.

(1) Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state. Existing law contains provisions generally governing the acquisition and disposition of personal property by community college governing boards, including provisions authorizing the sale of surplus personal property under prescribed conditions. Existing law also allows these districts to exchange for value, sell for cash, or donate any personal property belonging to the district if the property is determined to be surplus, the property is exchanged with, or sold or donated to, school districts or other community college districts and the receipt of the property would not be inconsistent with technology plans of the recipient district.

This bill would allow the surplus property to also be exchanged with, or sold or donated to, other public entities. The bill would also make conforming changes.

(2) Existing law allows the governing board of a community college district to empower, by a unanimous vote of its members, a district employee to sell at a private sale property that does not exceed \$2,500 in value.

This bill would substitute the \$2,500 maximum valuation of the property with a \$5,000 maximum value.

Ch. 89 (AB 2435) Jackson. Victims of crime: services.

Existing law provides for various services to be provided to victims of crime in the state.

This bill would require the Secretary of the State and Consumer Services Agency to submit a report to the Legislature no later than January 1, 2004, on crime victim services in the state.

Ch. 90 (AB 2502) Wyland. Horse racing.

Under existing law, the organization representing the horsemen at a horse racing event receives distributions of funds for purses to be paid to or for the benefit of the horsemen at the racing meeting. Of the portion of the takeout to be paid as purses, the horsemen's organization representing the horsemen receives a percentage for administrative expenses and services rendered to the horsemen. Under existing law which is scheduled to be repealed by its own terms on January 1, 2004, any association, including a fair, that conducts thoroughbred racing must pay to the owners' organization contracting with the association

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

an additional percentage for a national marketing program, as specified, to promote thoroughbred racing unless the owners' organization chooses not to contribute to the program. This same law requires the owners' association annually to file a report with the board and the Legislature, as specified, accounting for the receipt and expenditures of these funds.

This bill would delay the repeal of these requirements until January 1, 2008.

Ch. 91 (AB 2708) Mountjoy. School safety plan.

Existing law requires each school to adopt a comprehensive school safety plan by March 1, 2000, and to review and update its plan by March 1, every year thereafter.

This bill would specify that a new school campus that begins offering classes to pupils after March 1, 2001, must comply with these requirements.

Ch. 92 (AB 2723) Washington. Evidence: admissibility.

Existing law provides for the inadmissibility of certain evidence as a matter of public policy, including portions of statements, writings, or benevolent gestures expressing sympathy or a general sense of benevolence relating to the pain, suffering, or death of a person involved in an accident and made to that person or to the family of that person, which are inadmissible as evidence of an admission of liability in a civil action. However, a statement of fault, which is part of, or in addition to, any of the above is not inadmissible.

This bill would extend this rule of evidence to the admissibility of evidence of an admission of liability in administrative adjudication proceedings pursuant to the Administrative Procedure Act.

Ch. 93 (AB 2917) Chan. California Health Facility Construction Loan Insurance Law.

Existing law, the California Health Facility Construction Loan Insurance Law, provides an insurance program administered by the Office of Statewide Health Planning and Development for health facility construction, improvement, and expansion loans made to a political subdivision or nonprofit corporation, as defined. In order for a loan to be eligible for insurance under this law, it is required to be secured by a first mortgage, first deed of trust, or other first priority lien on a fee interest of the borrower.

This bill would expand the security for these loan purposes to include a leasehold interest of a specified duration.

Ch. 94 (SB 1323) Ackerman. Municipal bankruptcy.

Under existing law, any taxing agency or instrumentality of the state may file a petition and prosecute to completion bankruptcy proceedings permitted under the laws of the United States.

This bill would, instead, authorize, except as provided by statute, a local public entity, as defined, in this state to file a petition and exercise powers pursuant to the applicable federal bankruptcy law. The bill would make other conforming changes and would make technical changes to correct obsolete references.

Ch. 95 (SB 1336) Alpert. Claims against the state: appropriation.

Existing law requires the California Victim Compensation and Government Claims Board to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate \$1,457,756.09 from various specified funds to the Executive Officer of the California Victim Compensation and Government Claims Board to pay claims accepted by the board in accordance with a schedule that identifies the funds and accounts from which the payments are to be made.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 96 (SB 1559) Figueroa. Child witness: closed circuit television.

Existing law authorizes a minor under the age of 13 years, to give testimony by way of a closed-circuit television under specified circumstances and procedures if the minor's testimony will involve a recitation of the facts under either of 2 circumstances: (1) an alleged sexual offense committed on or with that minor; or (2) the minor is a victim of a violent felony as defined. The currently operative version of the statute is operative until January 1, 2003, and on that date is repealed. Effective January 1, 2003, the version of the statute to become operative would only apply under the first circumstance.

This bill would extend indefinitely the operation of the currently operative version of the statute, thereby authorizing a minor to give testimony under either of the 2 circumstances described above. The bill would also repeal the version of the statute to become operative January 1, 2003.

Ch. 97 (SB 1815) Chesbro. County surplus property.

Existing law authorizes the board of supervisors of a county to donate or lease any real or personal property that the board declares to be surplus to a school or community college district, a county children and families commission, or a nonprofit corporation organized for the care, teaching, or training of children, developmentally disabled children, or Native Americans.

This bill would delete the references to "nonprofit corporation" and instead substitute an organization exempt from taxation pursuant to specified provisions of federal law and would add such an organization, organized for the provision of health and human services, to those entities to which a county board of supervisors may donate or leave this property.

Ch. 98 (SB 1935) Costa. Commercial coaches: commercial modulars.

The Mobilehomes-Manufactured Housing Act of 1980, authorizes the Department of Housing and Community Development to adopt regulations for the construction of commercial coaches and special purpose commercial coaches. A knowing violation of the act or regulations issued pursuant to it is punishable as a misdemeanor. The act defines a special purpose commercial coach as a vehicle with or without motive power, designed for human occupancy, for industrial, professional, or commercial purposes, that is not required to be moved under a permit.

This bill would provide that the definition of a commercial coach and special purpose commercial coach means the same as commercial modular and special purpose commercial modular, respectively, and applies to all statutory references of these terms.

Ch. 99 (AB 3008) Committee on Budget. Budget implementation: education finance.

The Budget Act of 2001 makes appropriations, including appropriations in regard to the state's funding obligations for school districts and community college districts, for support of state government for the 2001-02 fiscal year.

This bill, in augmentation of the Budget Act of 2001, would reappropriate designated appropriations made in that act, relating to various educational programs in the total amount of \$1,796,591,000, to the Trustees of the California State University for the support of the California State University for the 2001-02 fiscal year.

This bill would appropriate \$503,433,000 from the Proposition 98 Reversion Account for transfer to Section A of the State School Fund, for allocation by the Superintendent of Public Instruction to school districts, county offices of education, and other agencies for the purposes of adult education, as specified, for costs incurred in the 2001-02 fiscal year.

This bill would declare that it makes appropriations for the usual and current expenses of the state, thereby taking effect immediately.

Ch. 100 (AB 516) Cedillo. Redevelopment: Byzantine-Latino Quarter.

(1) Existing law requires the Department of Transportation to keep and repair all objects or markers adjacent to a state highway that have been erected to mark registered historical places.

This bill would require the Department of Transportation, through the erection of highway signs and appropriate markers to provide recognition of the historical importance of the Byzantine-Latino Quarter within the City of Los Angeles.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 101 (AB 3011) Committee on Budget. Education.

(1) The bill would appropriate \$1,046,893,000 for expenditure in the 2002–03 fiscal year from the General Fund, with \$931,303,000 appropriated to the Superintendent of Public Instruction and \$115,590,000 appropriated to the Board of Governors of the California Community Colleges for allocation on a one-time basis to community college districts. Of the amount appropriated to the Superintendent of Public Instruction, \$76,000,000 would be for allocation on a one-time basis for the Instructional Time and Staff Development Reform Program, \$60,643,000 would be for allocation on a one-time basis for the STAR program, \$67,300,000 would be for allocation on a one-time basis for the Governor's High Achieving/Improving Schools Program, \$713,360,000 would be for allocation on a one-time basis for the Targeted Instructional Improvement Grant program, and \$14,000,000 would be for allocation on a one-time basis for the Beginning Teacher Support and Assessment System. This appropriation would be applied toward the 2002–03 fiscal year minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(2) The bill would require the Superintendent of Public Instruction and the Board of Governors of the California Community Colleges to allocate the funds appropriated in the bill by August 1, 2002.

(3) The bill would not become operative unless AB 3008 of the 2001–02 Regular Session is enacted.

(4) The bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

#### Ch. 102 (AB 1828) Bill Campbell. Halal food.

Existing law provides that every person who, with intent to defraud, sells any meat or meat preparations falsely representing them to be kosher or prepared in compliance with Hebrew orthodox religious requirements, or who fails to indicate that both kosher and nonkosher meat is for sale in the same place of business, as specified, is punishable by a fine of not less than \$100 nor more than \$600, or imprisonment in a county jail for not less than 30 days nor more than 90 days, or by both that fine and imprisonment.

This bill would provide that a person who, with intent to defraud, sells any meat or meat preparations falsely representing them to be halal or prepared in compliance with Islamic religious requirements, or who fails to indicate that both halal and nonhalal meat is for sale in the same place of business, as specified, is punishable by the same imprisonment and fine. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 103 (AB 2112) Cogdill. Vehicles: hazardous materials.

Under existing law, it is a crime to operate a motor vehicle without a driver's license unless an exemption is applicable. Existing law provides that a nonresident over the age of 18 years having in his or her immediate possession a valid driver's license issued by a foreign

jurisdiction of which he or she is a resident, may operate a motor vehicle in this state without a driver's license with specified exceptions.

This bill would further require such a nonresident, 21 years of age or older, if transporting hazardous materials, as defined, in a commercial vehicle, to have a valid license with the appropriate endorsement issued by another state or other jurisdiction that is recognized by the department, or to have in his or her immediate possession a Canadian driver's license and a copy of his or her current training certificate to transport hazardous material that complies with all federal laws and regulations with respect to hazardous materials. Because this bill would expand the application of a crime, it would impose a state-mandated local program.

This bill would also specify that a nonresident who is entitled to an exemption while operating a commercial vehicle and who is required to have a current medical certificate in his or her possession, as specified, shall comply with any restriction on that certificate.

This bill would state the intent of the Legislature that this act not be construed to abrogate any provision of law that would otherwise require an individual to obtain a California driver's license. This bill would declare that it is to take effect immediately as an urgency statute.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 104 (AB 2687) Maldonado. Transportation of hazardous materials: drinking water reservoirs.

Existing law authorizes the Department of the California Highway Patrol, after consultation with the Department of Transportation or the city or county agency with traffic control jurisdiction over a highway, to close a highway to vehicles transporting hazardous materials or hazardous waste, if, among other things, the highway is located within a watershed of a drinking water reservoir that is owned and operated by a municipal water district, and meets other specified criteria. Driving, or directing or permitting an authorized agent to drive, a vehicle in violation of these provisions is a misdemeanor.

This bill would provide that these provisions apply to public water systems, as defined, in addition to municipal water districts, and would make technical changes to the criteria relating to drinking water reservoirs for these purposes.

By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 105 (SB 2069) Burton. Citations: quotas.

Existing law prohibits a state or local agency from establishing any policy requiring peace officers to meet a quota for arrests made or citations issued. Existing law also prohibits a state or local agency from using the number of arrests made or citations issued as the sole criterion for specified personnel matters relating to peace officers.

This bill would, in addition, prohibit a state or local agency from establishing any policy requiring parking enforcement employees to meet a quota for arrests made or citations issued, and would prohibit a state or local agency from using the number of arrests made or citations issued as the sole criterion for specified personnel matters relating to parking enforcement employees. This bill would also include the Regents of the University of California within the definition of an "agency" to which these prohibitions are applicable.

Ch. 106 (AB 2508) Dickerson. Remembrance Memorial for California Korean War Veterans at Santa Nella.

Existing law provides for the construction and maintenance of veterans' buildings and memorials in the state.

This bill would recognize the existing Korean War memorial built in 1998 in the San Joaquin Valley National Cemetery near Santa Nella as the official state memorial for veterans of the Korean War, to be known as the Remembrance Memorial for California Korean War Veterans at Santa Nella.

Ch. 107 (AB 269) Correa. Professional and vocational licensing boards, commissions, and bureaus.

Existing law provides for the establishment of professional and vocational licensing boards, commissions, and bureaus that are overseen by the Department of Consumer Affairs. These boards, commissions, and bureaus license, regulate, and discipline persons practicing or engaging in professions and vocations regulated by them.

This bill would state that the highest priority for licensing boards, commissions, and bureaus, in performing their licensing, regulatory, and disciplinary functions, is the protection of the public.

Ch. 108 (AB 1874) Horton. Insurance: license renewal.

Existing law provides for the licensure, including the renewal of licenses, and regulation of rental car agents and credit insurance agents by the Insurance Commissioner.

This bill would authorize the commissioner to mail a renewal application to these licensees to the latest address the commissioner has for the licensees not less than 60 days before the license is set to expire. The bill would authorize the renewal application for an expired license to be filed up to one year after the expiration date of the license. The bill would require, in addition to the renewal fee, a penalty of 50% of the renewal fee to be charged a licensee who files the renewal application after the expiration of the license.

Ch. 109 (AB 1961) Canciamilla. Residential care facilities for the elderly: terminally ill persons.

Existing law provides for the licensure and regulation of residential care facilities for the elderly by the State Department of Social Services.

Existing law prohibits any person who requires 24-hour skilled nursing or intermediate care, or who is bedridden, other than for a temporary illness or for recovery from surgery, from being a resident at a residential care facility for the elderly.

Existing law authorizes the waiver of this prohibition to allow a resident who has been diagnosed as terminally ill to remain in the facility when certain requirements are met.

This bill would permit a residential care facility for the elderly to obtain a waiver from the department, when certain requirements are met, for the purpose of allowing a person who has been diagnosed by his or her physician and surgeon as being terminally ill to become a resident of the facility if that person is already receiving hospice services and would continue to receive those services without disruption.

Ch. 110 (AB 2154) Robert Pacheco. Expedited Youth Accountability Program.

Existing law establishes, until 2003, the Expedited Youth Accountability Program, operative in Los Angeles County, and in other counties upon approval of the board of supervisors, as specified. The program provides for the issuance of citations requiring the appearance of minors not detained for any felony or misdemeanor offense, and not cited to the Informal Juvenile and Traffic Court, before the juvenile court. The program requires participating counties to establish deadlines that ensure that a case brought pursuant to these provisions will be heard within 60 calendar days after the minor is cited. The citation includes a detailed description of the person and a written promise by that person to appear or a notice

to appear, as specified. It also requires the issuance of that citation to the parent or guardian of a minor. Failure to appear is a misdemeanor.

This bill would delete the 2003 termination date, thereby making those provisions operative indefinitely. By making these provisions operative indefinitely, the bill would expand the definition of a crime by requiring specified statements to be made under penalty of perjury and would impose new duties on local juvenile justice systems, thereby establishing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 111 (AB 2404) Reyes. Mobile health care units.

Existing law establishes the Mobile Health Care Services Act that regulates the licensure to operate a mobile unit, as defined, as an adjunct to a licensed parent health facility or clinic, an independent-freestanding clinic, or another type of approved mobile unit. These provisions are administered by the State Department of Health Services. Existing law requires an applicant to submit an application that states, among other things, the proposed area or areas where the mobile unit will be providing services.

This bill would prohibit the department from requiring, after the initial licensure, or the initial approval of the addition to existing licensure of a parent facility, to operate a mobile service unit, that each site where the mobile unit operates be licensed or approved by the department unless the mobile unit will be operating outside of the proposed area or areas specified in the application as required under the above provisions.

Existing law requires that proposed modifications to previously approved mobile unit services, procedures, and sites be reviewed and approved by the department. Existing law requires that site changes also be reported by the licensee to local authorities, as appropriate, and requires that the licensed parent facility or clinic be responsible for obtaining approvals for the site of the mobile unit from local planning, zoning, and fire authorities, as required.

This bill would provide instead, with regard to mobile unit sites, that a mobile unit shall not operate at any site, unless the site has been reported by the licensee to the department at least 15 days before the mobile unit's first visit to the site. The bill would provide that prior to the operation of a mobile unit at any site for the first time, the licensee shall report the site to local authorities for purposes of obtaining approvals as provided under the above provisions.

#### Ch. 112 (AB 2519) Keeley. Nonprofit corporations: dissolution.

Existing law, the Nonprofit Corporation Law, sets forth procedures for the voluntary dissolution of a nonprofit public benefit corporation. Under existing law, the directors of that corporation are required to file with the Secretary of State a certificate of dissolution stating, among other matters, that the corporation's assets have been distributed or that none were acquired by the corporation.

This bill would delete this statement from the required information on a certificate of dissolution and would require that a document issued by the Attorney General either waiving objections to the distribution of the corporation's assets or confirming that the corporation has no assets be attached to the certificate of dissolution before being filed with the Secretary of State.

#### Ch. 113 (AB 2773) Salinas. Prisons.

Existing law provides that the Director of Corrections, in the capacity of chairman of the Prison Industry Board, may order any authorized public works project involving construction, renovation, or repair of prison facilities to be performed by inmate labor when the total expenditure does not exceed \$200,000. Existing law provides that under specified

conditions, state agencies are authorized to carry out projects if the estimated cost does not exceed \$400,000.

This bill would provide that the director, in the capacity of chairman of the Prison Industry Board, would be authorized to order the public works projects as described that do not exceed the \$400,000 cost limit authorized by other existing law.

Ch. 114 (SB 1317) Johannessen. Public employees' retirement: local sheriffs.

The Public Employees' Retirement Law defines "local sheriff" for purposes of prescribing benefits and contribution rates, to include any officer or employee of a sheriff's office of a contracting agency, except specified persons whose functions do not fall within the scope of active law enforcement service.

This bill would expand the definition of "local sheriff" to include marshals or deputy marshals of Shasta County and district attorney investigators of the Counties of Shasta and Butte, subject to specified conditions. The bill would also make conforming and technical changes.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 115 (SB 1318) Karnette. State teachers' retirement: member contributions.

Existing law requires members of the Defined Benefit Program of the State Teachers' Retirement Plan to contribute to the retirement fund 8% of the member's creditable compensation, with those contributions being credited to the individual account of the member, as specified.

This bill would authorize the member's employer to pay all or a portion of those contributions for the member, subject to specified conditions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 116 (SB 1752) Soto. County employees' retirement boards.

The County Employees Retirement Law of 1937 authorizes the boards of retirement and investment in Kern County, Orange County, San Joaquin County, and Santa Barbara County to contract with the county counsel or with attorneys in private practice, or employ staff attorneys, for legal services.

This bill would authorize the boards of retirement and investment in San Bernardino County to also contract for these legal services, as specified.

This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 117 (SB 1708) Poochigian. Charter schools: special education funding.

Existing federal law, the Individuals with Disabilities in Education Act (IDEA), requires school districts, county offices of education, and special education local plan areas to comply with state laws that conform to the federal Individuals with Disabilities Education Act, in order that the state may qualify for federal funds available for the education of individuals with exceptional needs. The IDEA requires that the local educational agency service children with disabilities who attend charter schools in the same manner as it serves children with disabilities in other schools.

This bill would clarify that a charter school is allowed to report average daily attendance to accommodate eligible pupils who require extended year services as part of an individualized education plan under the IDEA.

Ch. 118 (SB 1965) Alpert. Sex offender registration.

Existing law requires the Department of Justice to continually compile specified information categorized by community of residence and ZIP Code regarding any person required to register as a sex offender for a conviction for the commission or attempted commission of any specified sex offense. Existing law requires the Department of Justice to provide a CD-ROM or other electronic medium containing the compiled sex offender information to certain law enforcement agencies. These law enforcement agencies are

required to make the CD-ROM or other electronic medium available for public viewing, as specified. Existing law requires any applicant for viewing, among other things, to provide identification in the form of a California driver's license or California identification card, showing the applicant to be at least 18 years of age.

This bill would require an applicant for viewing the compiled sex offender information to provide the above described identification or a military identification card and orders with proof of permanent assignment or attachment to a military command or vessel in California, showing that he or she is at least 18 years of age.

Ch. 119 (SB 1889) Johannessen. Transactions and use tax: Redding.

Existing law authorizes various local governmental entities, in accordance with certain limitations and approval requirements, to levy transactions and use taxes in accordance with the procedures and requirements set forth in the Transactions and Use Tax Law.

This bill would additionally authorize the City of Redding, subject to the approval of a majority of the voters voting on the issue at an election, to levy a transactions and use tax pursuant to the Transactions and Use Tax Law at a rate of 0.25% for general governmental purposes.

This bill would make legislative findings and declarations as to the necessity of a special statute.

Ch. 120 (AB 355) Havice. School community policing.

Existing law establishes the School Community Policing Partnership Act under which grants are awarded on a competitive basis to county offices of education, school districts and consortia of school districts and county offices of education that develop and implement plans that demonstrate a collaborative and integrated approach for implementing a system of providing safe and secure environments through community policing. Existing law prohibits the use of grant funds to fund school resource officers.

This bill would prohibit use of grant funds to fund school resource officer positions created on or before January 1, 2003.

Ch. 121 (AB 610) Kelley. Nonprofit charitable temporary food facilities.

Existing law, the California Uniform Retail Food Facilities Law, defines a nonprofit charitable temporary food facility as a temporary food facility that is conducted and operated by a specified type of corporation, that is exempt from taxation pursuant to specified provisions of law. Under existing law, a nonprofit charitable temporary food facility may operate once annually for a period of time not to exceed 72 hours. Under existing law, any person who violates any provision of the California Uniform Retail Food Facilities Law, or any related regulation, is guilty of a misdemeanor.

This bill would expand the definition of a nonprofit charitable temporary food facility to include an established club or organization of students. The bill would additionally authorize a nonprofit charitable temporary food facility to operate up to 4 times annually, for up to 72 hours for each of the 4 time periods.

The bill would provide that the provisions relating to nonprofit charitable temporary food facilities shall not prevent a local enforcement agency from performing inspections of, or requiring permits for, any nonprofit charitable temporary food facility to ensure compliance with existing food safety provisions.

Because the violation of provisions applicable to retail food facilities is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 122 (AB 1358) Pescetti. Childcare facilities: inspections.

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law provides that any person may request an inspection of any child daycare facility after notifying the State Department of Social Services of an alleged violation of applicable requirements. Existing law requires the department to inspect a child daycare facility on receipt of such a complaint, except as provided. Existing law authorizes the department to conduct announced and unannounced site visits.

This bill would require the department to conduct any authorized inspection, announced site visit, or unannounced site visit of any child daycare facility only during the period beginning one hour before and ending one hour after the facility's normal business hours, or at any time childcare services are being provided, with specified exception. This bill would also require the department to develop regulations establishing a procedure for the department to inactivate a license, in its discretion and upon the licensee's request, and would provide for inspections during the period of inactive status, as prescribed.

This bill would become operative July 1, 2003.

#### Ch. 123 (AB 1958) Bates. Coroner's reports.

Existing law, which is repealed by its own terms on January 2, 2003, requires a provider of health care, a health service plan, or a health contractor to disclose medical information if the disclosure is required by a coroner in the course of an investigation by the coroner's office for the purpose of identifying the decedent or locating next of kin, or when investigating deaths that may involve public health concerns, organ or tissue donation, child abuse, elder abuse, suicides, poisonings, accidents, sudden infant death, suspicious deaths, unknown deaths, or criminal deaths, or when otherwise authorized by the decedent's representative. Medical information requested by the coroner under this provision must be limited to information regarding the patient who is the decedent and who is the subject of the investigation and must be disclosed to the coroner without delay upon request.

This bill would extend this provision indefinitely.

#### Ch. 124 (AB 2033) Robert Pacheco. Admissibility of evidence.

Existing law sets forth the rules governing the proof of the content of a writing in a civil or criminal action or proceeding. Under existing law, if made in the regular course of business, as specified, a nonerasable optical image reproduction of a writing may be introduced in court as proof of a writing, provided that additions, deletions, or changes to the original document are not permitted by that technology.

This bill would expand that category of evidence to include any other reproduction of a public record by a trusted system, as specified. The bill would also make technical, nonsubstantive changes to that provision. The bill would become operative on the date the Secretary of State adopts specified standards regarding the storage of documents in electronic media.

#### Ch. 125 (AB 2114) La Suer. Department of Justice: evidence.

Under existing law, state and local agencies contract with various laboratories to assist in the apprehension or prosecution of criminals.

This bill would require the Department of Justice to adopt standards and guidelines regarding the handling of potential evidence arising out of the testing of substances that are suspected to be related to activities of terrorists, to be used by laboratories operated by or contracting with the Department of Justice, any state agency, or any local agency, and by any other laboratory in the state the department determines may test any material that may become evidence in a criminal prosecution for any crime committed in the commission of terrorist activities. This bill would declare that its provisions shall be accomplished to the extent that funds are available.

The bill would declare that it shall take effect immediately as an urgency statute.

#### Ch. 126 (AB 2173) Wayne. Sentencing: enhancements.

Existing law provides procedures for imposing consecutive sentences under specified circumstances, and for various sentence enhancements involving firearms.

This bill would recast those provisions.

The bill would set forth a general requirement that enhancements be in addition and consecutive to the offense, and that, where applicable, the middle term be imposed unless there are aggravating or mitigating circumstances. It would specifically make these general provisions applicable to indeterminate, as well as to determinate, sentences. It would eliminate various duplicative provisions.

The bill would eliminate certain enhancements where other provisions of law provide for duplicate or more severe enhancements.

The bill would make various clarifying changes and would make additional technical changes.

**Ch. 127 (AB 2303) Runner. Vehicle registration: smog certificate validity.**

(1) Existing law generally governs the registration of motor vehicles, and provides that, among other requirements, that except as otherwise provided, the Department of Motor Vehicles shall require upon initial registration, and upon transfer of ownership and registration, of any motor vehicle, as specified, and upon registration of a motor vehicle previously registered outside this state which is subject to those provisions, a valid certificate of compliance or a certificate of noncompliance, as appropriate, in regard to smog certification.

(2) Existing law also provides exceptions to these provisions, including when a valid certificate was issued in connection with the most recent renewal of registration of the vehicle, and the transfer occurred not more than 60 days following the date by which that renewal of registration was required.

This bill would delete the exception described in paragraph (2) above, and instead, would provide an exception where the initial application for transfer is submitted within the 90-day validity period of a smog certificate, as specified. The bill would make related changes.

**Ch. 128 (AB 2831) Simitian. Health records: delivery of laboratory test results by Internet posting.**

Existing law provides that a health care professional who orders a laboratory test shall provide a patient, upon request, those test results in plain language and in oral or written form.

Existing law permits test results to be delivered in electronic form if requested by the patient and if deemed appropriate by the health care professional who requested the test, subject to specified requirements regarding, among other things, consent of the patient. Under existing law, certain clinical laboratory test results are prohibited from being conveyed to a patient by Internet posting or other electronic means, including test results related to routinely processed tissues.

This bill would instead provide that clinical laboratory test results related to routinely processed tissues may not be conveyed to the patient by Internet posting or other electronic means if they reveal a malignancy. This bill would also provide that the requirements described above do not prohibit direct communication by Internet posting or other electronic means to convey clinical laboratory test results by a treating health care professional, as specified.

**Ch. 129 (SB 976) Polanco. Elections: rights of voters.**

Existing law provides for political subdivisions that encompass areas of representation within the state. With respect to these areas, public officials are generally elected by all of the voters of the political subdivision (at-large) or from districts formed within the political subdivision (district-based).

Existing law generally allows the voters of the entire political subdivision to determine whether the elected public officials are elected by divisions or by the entire political subdivision.

This bill would provide that an at-large method of election, as defined, may not be imposed or applied in a manner that results in the dilution or abridgment of the right of registered voters who are members of a protected class, as defined, by impairing their ability to elect candidates of their choice or to influence the outcome of an election.

This bill would provide that a violation of its provisions shall be established if it is shown that racially polarized voting, as defined, occurs in elections for governing board members of a political subdivision, among other things. It would provide that an intent to discriminate against a protected class, as defined, is not required to establish a violation of this bill.

This bill would authorize a court to impose appropriate remedies, including district-based elections, and to award a prevailing nonstate or nonlocal government plaintiff party reasonable attorney's fees and expenses consistent with specified case law as part of the costs.

This bill would permit a member of a protected class to file an action pursuant to this bill under specified circumstances.

#### Ch. 130 (SB 1048) Speier. Parking authorities.

The Parking Law of 1949 provides for, in every city or city and county, a parking authority that functions only after the adoption of a resolution of need by its legislative body. Existing law authorizes the mayor to appoint the members of the parking authority and permits the mayor of a charter city or city and county having a parking and traffic commission created by its charter, with the approval of the legislative body, to require the members of the commission to serve ex officio as members of the parking authority.

This bill would, in a charter city or city and county having a board of directors of a public transportation agency created by its charter, authorize 5 or more members of the board to serve ex officio as members of the parking authority.

The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 131 (SB 1263) Soto. Veterinary medicine.

Existing law, the Veterinary Medicine Practice Act, provides for the licensing and regulation of the practice of veterinary medicine. A violation of the act is a crime.

The act provides that the laws regulating the practice of veterinary medicine do not apply to individuals practicing veterinary medicine who meet certain requirements, including (1) veterinarians employed by the University of California while engaged in the performance of duties in connection with the College of Agriculture, the Agriculture Experiment Station, the School of Veterinary Medicine, or the agricultural extension work of the university, and (2) students in the School of Veterinary Medicine of the University of California who participate in diagnosis and treatment as part of their educational experience, including those in off-campus educational programs under the direct supervision of a licensed veterinarian appointed by the university.

This bill would require, for purposes of the exception applicable to a student in an off-campus educational program, that the veterinarian who supervises the student be in good standing.

This bill would also exempt from the laws regulating the practice of veterinary medicine veterinarians employed by the Western University of Health Sciences while engaged in the performance of duties in connection with the College of Veterinary Medicine and students in the College of Veterinary Medicine of the Western University of Health Sciences who participate in diagnosis and treatment as part of their education experience, including those in off-campus educational programs under the direct supervision of a licensed veterinarian in good standing appointed by the university.

This bill would require an off-campus educational site to display in a conspicuous place a consumer notification specifying that the veterinary facilities are also being used for

diagnosis and treatment of animals by graduate students in a veterinary medical program. The bill would provide that a violation of this requirement is not a crime.

The Veterinary Medicine Practice Act requires the Veterinary Medical Board in the Department of Consumer Affairs to determine qualifications to practice veterinary medicine by means of an examination, including an examination concerning statutes and regulations of the act. Existing law exempts from this provision University of California veterinary medical students who have successfully completed a course on veterinary law and ethics meeting certain requirements.

This bill would require that the course completed by the student be board approved in order for the student to qualify for the exemption. The bill would also exempt from the examination requirement Western University of Health Sciences veterinary medical students meeting the course requirement.

Ch. 132 (SB 1920) Knight. Air resources: air pollution control districts and air quality management districts: budget adoption.

Existing law provides for the establishment of air pollution control districts and air quality management districts. Each district is required to adopt its annual budget in accordance with certain requirements, including that the district provide notice of and hold a public hearing for the exclusive purpose of reviewing its budget and of providing the public with the opportunity to comment upon the proposed district budget. Existing law requires the public hearing for reviewing and commenting on the budget to be separate from the hearing at which the district adopts its budget.

This bill would require the public hearing for reviewing and commenting to be separated, by a period of not less than two weeks, from the hearing at which the budget is adopted, and would exclude districts with a population of 1,000,000 persons or less from the requirement that the public hearing for reviewing and commenting on the budget be held exclusively for those purposes.

Ch. 133 (SB 2052) Sher. Natural community conservation plans: endangered species.

Existing law establishes the Natural Community Conservation Planning Act. Under this act, the Fish and Game Commission, upon recommendation from the Department of Fish and Game, may authorize the taking of any candidate species whose conservation, protection, restoration, and enhancement is provided for in a department approved natural community conservation plan.

Under the existing California Endangered Species Act, the commission is required to establish a list of candidate species along with a list of endangered species and a list of threatened species. The act defines candidate species, for purposes of the act, to mean a native species or subspecies of a bird, mammal, fish, amphibian, reptile, or plant that the commission has formally noticed as being under review by the department for addition to either the list of endangered species or the list of threatened species, or a species for which the commission has published a notice of proposed regulation to add the species to either list.

This bill would provide that, for purposes of the Natural Community Conservation Planning Act, the phrase "candidate species" has the same meaning as defined under the California Endangered Species Act, and would make technical changes in existing law.

Ch. 134 (AB 670) Strom-Martin. Animal cruelty, abuse, and neglect.

Existing law provides that it is unlawful to maliciously and intentionally maim, mutilate, torture, wound, deprive of necessary sustenance, drink or shelter, subject to needless suffering, or kill an animal.

This bill would permit employees of county child and adult protective services agencies to receive instruction from those agencies on identifying and reporting animal cruelty, abuse, and neglect. This bill would provide that they may report known or suspected animal cruelty,

abuse, or neglect to the entity or entities that investigate reports of animal cruelty, abuse, and neglect in that county.

Ch. 135 (AB 957) Papan. Taxpayer contributions: Lupus Foundation of America, California Chapters Fund.

Provisions relating to the administration of personal income taxes allow individual taxpayers to contribute amounts in excess of their tax liability for the support of specified funds, including the Lupus Foundation of America, California Chapters Fund, for purposes of education and awareness, and to provide research grants to develop and advance the understanding, causes, techniques, and modalities effective in the prevention, care, treatment, and cure of lupus.

This bill would clarify that the funds are required to be used by the California based operating chapters of the Lupus Foundation of America for lupus education and awareness, and for research grants for those purposes as specified in current law.

Ch. 136 (AB 1317) Liu. Pupils: expulsion.

Under existing law, a pupil may be expelled from school for specified reasons. Existing law entitles a pupil under consideration of expulsion to a hearing to determine whether the pupil should be expelled.

This bill would, in addition to any other immunity that may exist, expressly deem any testimony provided by a pupil witness in an expulsion hearing conducted pursuant to those provisions to be a privileged publication or broadcast for purpose of those provisions of law relating to libel and slander.

Ch. 137 (AB 1703) Steinberg. Attorneys: pro bono services.

Commencing January 1, 2003, existing law requires the contracting law firm of a contract with the state for legal services exceeding \$50,000 to certify that it agrees to make a good faith effort to provide a minimum number of hours of pro bono legal services during each year of the contract. Existing law provides that the minimum number of hours of pro bono legal services may be either (1) 30 times the number of attorneys in the law firm with the hours prorated on an actual day basis for any contract period of less than a full year or (2) 10% of the contract.

This bill would define "10% of the contract" to mean the number of hours equal to 10% of the contract amount divided by the average billing rate of the firm.

Ch. 138 (AB 1784) Harman. Construction of instruments.

Existing law provides rules for the interpretation of wills, trusts, deeds, and other instruments, which are to be used as interpretive aids where the intention of the transferor is not indicated by the instrument.

This bill would revise the above-described rules for interpretation by, among other things, clarifying the appropriate use of extrinsic evidence to determine the intention of the transferor; making changes in terminology; limiting the application of certain rules to specified transfers; conforming certain rules with the Uniform Probate Code; adding new provisions regarding securities; repealing certain rules; eliminating redundant provisions; and making technical and conforming revisions.

Ch. 139 (AB 1967) Zettel. Sexually violent predators: notification: change in status.

Existing law provides for the civil commitment of an inmate determined to be a defined sexually violent predator. Existing law defines a "sexually violent predator" as a person who has been convicted of a sexually violent offense against 2 or more victims, and who has a diagnosed mental disorder that makes the person a danger to the health and safety of others in that it is likely that he or she will engage in sexually violent criminal behavior if discharged.

Existing law permits a person committed as a sexually violent predator to petition the court for conditional release from commitment to receive supervision and treatment in the community pursuant to a conditional release program for one year, or to petition the court for subsequent unconditional discharge.

Existing law requires that the State Department of Mental Health notify certain law enforcement entities when the department makes a recommendation to the court for community outpatient treatment for any person committed as a sexually violent predator.

This bill would also require the department to notify these law enforcement entities when a person committed as a sexually violent predator has petitioned a court for outpatient care in a conditional release program or has petitioned a court for subsequent unconditional discharge, if the department has been notified or is aware of the filing of the petition.

Ch. 140 (AB 2144) Committee on Insurance. Insurance.

The California Life and Health Insurance Guarantee Association Act provides that with respect to covered policies the California Life and Health Insurance Guarantee Association becomes obligated after an entry of an order of liquidation or rehabilitation, the association may elect to succeed to the rights of the insolvent insurer after the date of the order of liquidation or rehabilitation. The act also requires the association to pay premiums for coverage relating to periods after the date of the order of liquidation or rehabilitation if the association elects to succeed to the rights of the insolvent insurer.

This bill would instead require the association to pay all unpaid premiums due for coverage relating to periods before and after the date of the order of liquidation or rehabilitation if the association elects to succeed to the rights of the insolvent insurer.

Ch. 141 (AB 2382) Corbett. Mobilehome parks.

(1) The Mobilehome Residency Law deems the substantial failure of the management of a mobilehome park to provide and maintain physical improvements in the common facilities in good working order and condition or the substantial violation of a mobilehome park rule, or both, to be a public nuisance that may be remedied only by a civil action or abatement. The law authorizes a civil action to be brought by, among others, the district attorney or city attorney of the jurisdiction in which the park is located.

This bill would, instead, permit a nuisance action to be brought by the district attorney or county counsel of the jurisdiction in which the park, or the greater portion of the park, is located, the city attorney or city prosecutor, if the park is located within the jurisdiction of the city, and the Attorney General.

(2) Existing law, known as the Mobilehome Parks Act, requires the owner or operator of a mobilehome park to abate any nuisance in the park within a prescribed period after written notice to remove the nuisance, and requires the district attorney of the county in which the park, or the greater portion of the park, is located to bring a civil action to abate the nuisance.

This bill would permit the county counsel of the county in which the park, or the greater portion of the park, is located and the city attorney or city prosecutor, if the park is located within the jurisdiction of the city, to bring a civil action to abate the nuisance. It would also authorize the Attorney General to bring a civil action to abate the nuisance.

Ch. 142 (AB 2555) Leach. Child care and development services: local contracts.

Existing law authorizes the Superintendent of Public Instruction to enter into and execute local contractual agreements with any public or private entity or agency for the delivery of child care and development services or the furnishing of property, facilities, personnel, supplies, equipment, and administrative services related to the delivery of child care development services.

This bill would provide that if an agency places a person who has been convicted of specified theft-related crimes in a position of fiscal responsibility or control, as defined, the agency may have its contract suspended or terminated immediately, upon review and

recommendation of the general counsel of the State Department of Education. The bill would require the agency to receive 90 days prior notice of the termination and would allow the agency to appeal the termination action. The bill would require the department to withdraw the termination action if the agency provides evidence that the convicted person has been removed from the position and provides assurance that the person will not be returned to a position of financial responsibility or control.

Ch. 143 (AB 2784) Chavez. Telephone corporations: disabled telecommunications program.

Existing law requires the Public Utilities Commission to design and implement a program whereby each telephone corporation provides specialized or supplemental telephone communications equipment to subscribers who are certified to be disabled. Existing law further provides that the certification include a statement of medical need for specialized telephone communications equipment, provided by a licensed physician or by a qualified state or federal agency as determined by the commission.

This bill would revise the later provision to additionally authorize a licensed optometrist to provide a statement of visual need.

Ch. 144 (AB 2925) Migden. Jury duty.

Existing law establishes a system of state funding for trial courts. Existing law establishes the Trial Court Trust Fund for the purpose of funding trial court operations. For purposes of those provisions, court operations are defined to include, among other things, juror expenses of per diem fees and mileage. Existing law also specifies the fees and travel reimbursement to be paid to jurors in civil and criminal cases. Existing law reimburses a juror 15¢ per mile for each mile traveled in attending court per day.

This bill would provide for travel reimbursement to jurors only after the first day of attendance as a juror and would increase this amount to 34¢ per mile for each mile traveled per day, in going only.

Ch. 145 (SB 1465) Costa. Horse racing.

Existing law generally requires every licensee conducting a horse racing meeting to provide for the running of at least one race each racing day limited to California-bred horses, to be known as the "California-bred race." Existing law requires for thoroughbred and quarter horse racing that the total amount distributed to horsemen and horsewomen for California-bred stakes races from the purse account to be not less than 10% of the total amount distributed for all stakes races from the purse account at that racing meeting.

This bill would permit some of that 10% from the purse account at a race meeting to be distributed to horsemen and horsewomen for races featuring California-breds, upon approval of the official registering agency.

Existing law requires any association conducting a race meeting that includes thoroughbred racing to deposit certain sums with the official registering agency for thoroughbred horses, and requires that official registering agency to distribute a portion of those sums annually to the California-bred race fund for the promotion of California-bred races and for purses for California Cup Day and other California-bred races. Under existing law, any of that portion of the funds not used for those purposes is redistributed to augment the breeder and stallion funds, as specified.

This bill would permit some of those funds apportioned for California-bred purposes to be used as purses for races featuring California-bred horses, upon the approval of the official registering agency. This bill would also provide that, out of those funds that remain in the California-bred fund at the end of a year, an amount up to 1% of the total breeder, stallion, and owner award receipts shall remain in the fund for allocation under these provisions the following year, and only the balance above that amount, if any, is to be distributed to the breeder and stallion funds, as specified.

Ch. 146 (SB 1481) Polanco. Inmate welfare fund.

Existing law provides that the sheriff of each county may maintain an inmate welfare fund to be kept in the treasury of the county into which profit from a store operated in connection with the county jail, 10% of all gross sales of inmate hobbycraft, and any rebates or commissions received from a telephone company, as specified, is required to be deposited. Existing law provides that the money and property deposited in the inmate welfare fund shall be expended by the sheriff primarily for the benefit, education, and welfare of the inmates confined within the jail; any funds that are not needed for the welfare of the inmates may be expended for the maintenance of county jail facilities.

This bill would clarify that the inmate welfare fund is not to be used to pay required county expenses of confining inmates in a local detention system, such as meals, clothing, housing, or medical services or expenses, except that it may be used to augment those expenses as determined by the sheriff to be in the best interests of inmates.

Ch. 147 (SB 1721) Soto. Land use: farmworker housing.

Existing law requires local agencies to make specified findings before disapproving or conditionally approving housing development projects for very low, low- or moderate-income households and subjects local agencies to court action if the required specified findings are not made, or the local agency's decision is inconsistent with those findings and the findings are not supported by substantial evidence.

This bill would apply these provisions to a local agency using design review standards to disapprove or render infeasible a housing development project, including farmworker housing.

Ch. 148 (SB 1754) McPherson. Bench warrants: assessments.

Existing law allows a county, by resolution of the board of supervisors, to require the courts of that county to impose an assessment of \$7 upon every person who fails to appear in court when required to do so, or who fails to comply with any valid court order.

Existing law requires the money collected under this system to be used for the development of an automated county warrant system.

This bill would raise to \$15 the amount that a county may require the courts of that county to assess upon every person who fails to appear in court or fails to comply with a valid court order.

This bill would authorize a county to use any money remaining after developing and maintaining the automated warrant system to fund a warrant service task force for the purpose of serving all bench warrants issued within the county.

Ch. 149 (SB 1779) Burton. Damages: childhood sexual abuse: statute of limitations.

Existing law requires that an action for recovery of damages suffered as a result of childhood sexual abuse, as defined, be commenced within 8 years of the date the plaintiff attains the age of majority or within 3 years of the date the plaintiff discovers or reasonably should have discovered that the psychological injury or illness occurring after the age of majority was caused by sexual abuse, whichever occurs later, and provides that certain of those actions may not be commenced on or after the plaintiff's 26th birthday.

This bill would provide that those actions may be commenced on or after the plaintiff's 26th birthday if the person or entity against whom the action is commenced knew, had reason to know, or was otherwise on notice, of any unlawful sexual conduct by an employee, volunteer, representative, or agent, and failed to take reasonable steps, and implement reasonable safeguards, to avoid future acts of unlawful sexual conduct. The bill would revive a cause of action solely for those claims for a period of one year, except as specified.

Ch. 150 (SB 1878) Poochigian. Will contests.

(1) Existing law provides that a no contest clause in an instrument is not enforceable against specified types of actions unless expressly identified in the no contest clause as a violation of the clause. Existing law includes a petition for settlement or for compromise affecting the terms of the instrument among those types of actions.

This bill would delete the above action from those provisions.

(2) Existing law also specifies the types of proceedings that do not, as a matter of public policy, violate a no contest clause.

This bill would revise and recast those provisions, and would also expand that list to include proceedings regarding the interpretation of an instrument containing a no contest clause, the approval of a settlement or compromise, the reformation of an instrument, and the accounting or report of a fiduciary, as specified. The bill would also define "direct contest" and "indirect contest" for purposes of those provisions, and would revise the definition of "contest," as specified. The bill would also make related, conforming changes.

Ch. 151 (AB 662) Vargas. Pupil suspension and expulsion.

Existing law prohibits a pupil from being suspended from school or recommended for expulsion unless the superintendent or the principal of the school in which the pupil is enrolled determines that the pupil has committed specified acts.

This bill would additionally authorize a superintendent or the principal of the school in which a pupil is enrolled to suspend or recommend for expulsion a pupil who unlawfully offers, arranges to sell, negotiates to sell, or sells the prescription drug Soma.

Ch. 152 (AB 1458) Kelley. State Board of Equalization: business and special taxes.

Existing law provides for the administration of various taxes by the State Board of Equalization.

This bill would authorize the board to accept offers in compromise on a final tax liability, as defined, under the Sales and Use Tax Law and the Use Fuel Tax Law, and on a final fee liability, as defined, under the Underground Storage Tank Maintenance Fee Law, as applicable.

The Fee Collection Procedures Law provides for the administration of various fee programs by the board.

This bill would authorize the board to allow for the relief of interest for failure to make a timely return or payment due to a disaster, as provided.

By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 153 (AB 1509) Runner. Legislative Counsel: holidays.

Existing law establishes the holidays to which state employees in the executive branch of government, including the Legislative Counsel and the employees of the Legislative Counsel Bureau, are entitled.

This bill would require that the Legislative Counsel and the employees of the Legislative Counsel Bureau observe any holiday to which the Legislative Counsel and the employees of the Legislative Counsel Bureau are entitled and that is also observed by the Legislature on the same day that the holiday is observed by the Legislature.

Ch. 154 (AB 1714) Canciamilla. Public resources: prohibited uses.

Existing law makes it unlawful for any elected state officer, appointee, employee, or consultant to use or permit others to use state resources for a campaign activity, or personal or other purposes that are not authorized by law. Existing law also provides that the incidental and minimal use of state resources is not unlawful.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill instead would prohibit the use of public resources for the activities specified above and would also apply this prohibition to any elected local officer and any local appointee, employee, or consultant.

The bill would also provide that the incidental and minimal use of public resources is not subject to criminal prosecution.

Ch. 155 (AB 1749) Longville. Juneteenth National Freedom Day.

Existing law requires the Governor to proclaim various days as holidays and days of remembrance.

This bill would require the Governor to proclaim the 3rd Saturday in June each year as “Juneteenth National Freedom Day: A day of observance,” and would urge the people of California to join in celebrating this day to honor and reflect on the significant role that African-Americans have played in the history of the United States and how they have enriched society through their steadfast commitment to promoting brotherhood and equality.

Ch. 156 (AB 1752) Migden. Public records.

The Bagley-Keene Open Meeting Act generally requires that meetings of state bodies, as defined, be conducted openly. That act generally requires that public writings, pertaining to a matter subject to discussion or consideration at a public meeting, that are distributed to a majority of the members of the state body shall be made available for public inspection. The act requires that, in the case of the Franchise Tax Board, prior to that state body taking final action on any item, writings pertaining to that item that are public records that are distributed to members of the state body by board staff or individual members prior to or during a meeting shall be made available for public inspection at that meeting, distributed to all persons who request notice in writing, and made available on the Internet.

This bill would make these requirements imposed on the Franchise Tax Board also applicable to the State Board of Equalization with respect to writings pertaining to any item that does not involve a named tax or fee payer. The bill would require the State Board of Equalization to distribute the writings, as specified, to all persons who request or have requested copies of these writings.

Ch. 157 (AB 1854) Ashburn. Milk marketing orders.

Existing law provides that the Secretary of the Department of Food and Agriculture may issue marketing orders which contain provisions for the establishment of plans for advertising any commodity grown in the state. Existing law also provides that the advertising and sales promotion plans for fluid milk may contain provisions to allocate funds for promotion of cheese and butter products. Existing law also requires the Department of Food and Agriculture to report to the Governor and the Legislature regarding the effectiveness of the fluid milk promotion plans.

This bill would provide that funds may be allocated for the promotion of ice cream products. This bill would also remove provisions requiring the department to report the effectiveness of the promotion plans to the Governor and Legislature.

Existing law provides that the provisions relating specifically to milk products would remain in effect until January 1, 2003.

This bill would remove the repeal date of these provisions.

Ch. 158 (AB 1893) Papan. Commercial banks.

Existing law imposes limitations on the amount of money that a person, partnership, or association may owe a commercial bank. Existing law authorizes exceptions to these limitations if a loan is, among other things, secured by obligations of the United States or is covered by a guarantee or commitment by any Federal Reserve Bank, any department or bureau of the United States, or any specified small business development corporation.

This bill would add another exception for obligations secured by a segregated deposit account in a lending bank provided the security interest in the deposit has been perfected and meets specified conditions.

Ch. 159 (AB 1964) Diaz. City ordinances: notice.

(1) Existing law requires the city clerk, within 15 days after the passage of an ordinance by the city council, to cause the ordinance to be published or posted according to specified procedures.

This bill would permit any member of the public to file with the city clerk a request for notice of specific proposed ordinances or proposed amendments to ordinances. The bill would authorize the city to charge a fee reasonably related to the costs of providing the service. The bill would permit the city to provide notice by a general mailing list instead. By requiring the city clerk to mail or otherwise transmit notice of proposed ordinances, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 160 (AB 2105) La Suer. DNA collection.

Under existing law, specified felony offenders and registrable sex offenders are required to provide blood and saliva samples along with their prints for a state DNA database. The materials are collected by detention facilities or designated state, local, or private agencies, and forwarded to the Department of Justice. Existing law makes it unlawful to possess, use, or threaten to use weapons of mass destruction or restricted biological substances, as specified.

This bill would add persons convicted of terrorist activity in violation of specified weapons of mass destruction provisions to those offenders who are required to provide DNA samples for inclusion in the state database.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 161 (AB 2181) Dutra. Metropolitan Transportation Commission.

Existing law creates the Metropolitan Transportation Commission with transportation planning and programming responsibilities in the 9-county San Francisco Bay Area region. Existing law authorizes the commission to impose a regional gasoline tax not to exceed 10¢ per gallon subject to approval of voters in the region. Existing law requires the commission to adopt a regional transportation expenditure plan for the revenues derived from the tax. In order for a transportation project to be included in the expenditure plan, the project is required to meet one of several specified regional transportation needs.

This bill would revise the description of 2 of the specified regional transportation needs that a project is required to meet.

Ch. 162 (AB 2182) John Campbell. Local agency investments.

Existing law prescribes the types of investments in which a local agency generally may invest its funds for deposit, including United States Treasury notes, bonds, bills, or

certificates of indebtedness, or those for which the faith and credit of the United States are pledged for the payment of principal and interest.

This bill would provide, until January 1, 2007, that, notwithstanding the above-described provisions, a county or city and county may invest any portion of the funds that it deems wise or expedient using prescribed criteria that authorize investments in various securities, obligations, and other financial instruments, including direct obligations of the United States Treasury or any other obligation guaranteed as to principal and interest by the United States government, bonds, notes, debentures, or other obligations of, or securities issued by, any federal government agency, instrumentality, or government-sponsored enterprise, and state treasury notes, bonds, or registered state warrants.

Ch. 163 (AB 2310) Chu. High school equivalency certificates.

Existing law requires the Superintendent of Public Instruction to issue a California high school equivalency certificate and an official score report, or an official score report only, to any person who has not completed high school and who meets certain specified requirements. Existing law requires that applications for a California high school equivalency certificate and official score report be submitted by each test center following each examinee's completion of all or a portion of the five tests comprising the general educational development test battery.

This bill would delete the requirement that applications for a California high school equivalency certificate and official score report be submitted by each test center following each examinee's completion of all or a portion of the five tests comprising the general educational development test. The bill would instead require that fee to be submitted when registering for the test. The bill would require each scoring contractor to provide the superintendent with a set of results for each examinee who has taken that test, and would make other, conforming changes in related provisions.

Ch. 164 (AB 2387) Bates. State Coastal Conservancy: education programs: grants.

Existing law authorizes the State Coastal Conservancy to undertake projects to provide educational programs for children and adults relating to the preservation, protection, enhancement, and maintenance of coastal resources, and to award grants to nonprofit organizations, educational institutions, and public agencies for this purpose.

Existing law provides that the conservancy is not required to take any action pursuant to those provisions, unless and until funds are made available by the Legislature specifically for the purpose described above. Existing law prohibits the conservancy from using more than 10% of the funds provided for the program for administrative costs.

This bill would prohibit the conservancy from awarding a grant to a local public educational agency or community college, if the source of the grant is the General Fund.

Ch. 165 (AB 2484) Jackson. School violence prevention.

Existing law establishes the Carl Washington School Safety and Violence Prevention Act, which requires the Superintendent of Public Instruction to provide funds to school districts serving pupils in any of grades 8 to 12, inclusive, for the purpose of promoting school safety and reducing schoolsite violence. Existing law requires the funds allocated pursuant to this act to be expended by the school districts for any one or more of specified purposes.

This bill would add as another eligible purpose, providing and implementing instructional curricula and materials on the prevention of school violence and school terrorism through recognition and reporting.

Ch. 166 (AB 2541) Negrete McLeod. School-to-career initiatives.

Existing law establishes the Interagency Partnership for School-to-Career Programs as a formal collaboration between the Secretary for Education, the State Department of Education, the Chancellor's Office of the California Community Colleges, and the Health

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

and Human Services Agency, for the purpose of administering a grant program to local entities who meet various requirements.

This bill would, in addition to other requirements, require a grant applicant to demonstrate its ability to offer instruction on the topic of employees' and employers' rights and obligations in the workplace.

Ch. 167 (AB 2548) Nation. Real estate.

The Real Estate Law provides for the licensing and regulation of real estate brokers and salespersons by the Department of Real Estate with respect to certain activities. Existing law provides that certain persons are exempt from regulation under these provisions, including any person authorized in writing by a savings institution to act as an agent of that institution if authorized under state law or comparable authority of the Federal Home Loan Bank Board.

This bill would delete an obsolete reference to the Federal Home Loan Bank Board and would instead refer to the Office of Thrift Supervision of the United States Department of the Treasury.

Ch. 168 (AB 2647) Liu. Transportation.

(1) Existing law requires transportation planning agencies and certain other agencies, on a regular basis, to report to the Director of Transportation relative to social services transportation services and related matters, and to prepare an inventory of services and an action plan for service consolidation. Existing law requires the director to submit a summary of these reports to the Legislature on a biennial basis.

This bill would repeal the provisions requiring the agencies to report to the director and prepare an inventory of services and the provisions requiring the director to submit a summary of the reports to the Legislature.

(2) Existing law governing public contracts requires the Department of Transportation to establish and administer a computerized databank containing a list of certified minority, women, and disadvantaged business enterprises, and also containing a list of disabled veteran business enterprises certified by the Department of General Services.

This bill would delete the requirement with respect to the list of disabled veteran business enterprises.

(3) Existing law requires the Department of Transportation to submit a report every 3 years to the Secretary of the Business, Transportation and Housing Agency relative to transportation corridors.

This bill would repeal these provisions.

Ch. 169 (AB 2791) Migden. Income taxes: limited liability companies: limited liability partnerships.

The Personal Income Tax Law requires every limited liability company, limited liability partnership, foreign limited partnership, foreign limited liability partnership, or foreign limited liability company doing business in this state to pay annually a tax for the privilege of doing business in this state.

This bill would, if a limited liability company or limited liability partnership files a return that is designated as its final return, require the Franchise Tax Board to notify the taxpayer that the annual tax continues to be due annually until a certificate of cancellation is filed with the Secretary of State.

Existing law requires the filing of certificates of limited partnership, foreign limited partnership, foreign limited liability partnership, or foreign limited liability company in the office of the Secretary of State in order to form a limited partnership, foreign limited partnership, foreign limited liability partnership, or foreign limited liability company.

This bill would require the Secretary of State to provide notice that the filing of the certificate will obligate the limited partnership, foreign limited partnership, foreign limited

liability partnership, or foreign limited liability company to pay an annual tax, for the taxable year, as specified.

Ch. 170 (AB 2846) Frommer. Public safety officers: American flag.

The Public Safety Officers Procedural Bill of Rights Act provides that no punitive action, nor denial of promotion on grounds other than merit, shall be undertaken by a public agency without providing the public safety officer with an opportunity for an administrative appeal. The act specifies, among other matters, procedures that are required in connection with an interrogation and investigation of a public safety officer.

This bill would provide that, notwithstanding any other provision of law, the employer of a public safety officer may not take any punitive action against an officer for wearing a pin or displaying any other item containing the American flag, unless the employer gives the officer written notice stating that the pin or other item violates an existing rule, regulation, policy, or local agency agreement or contract identifying that rule, regulation, policy, or local agency agreement or contract, and stating that the officer may file an appeal against the employer challenging the alleged violation.

Ch. 171 (AB 2885) Strom-Martin. Forest practices: timber operator license.

The existing Z'berg-Nejedly Forest Practice Act of 1973 generally prohibits any person from conducting timber operations unless a timber harvesting plan prepared by a registered professional forester has been submitted for the operations to the Department of Forestry and Fire Protection. Existing law prohibits the real person in interest, as defined, from having any interest in or responsibility for the conduct of the timber operations of any person licensed during the period for which a timber operator license has been either suspended or revoked.

This bill would additionally prohibit the real person in interest from having any interest in or responsibility for the conduct of the timber operations of any person licensed during the period for which a timber operator license has been denied.

Ch. 172 (SB 584) Perata. Political Reform Act of 1974: definitions.

(1) Under the Political Reform Act of 1974, as amended by the Legislature, the definition of "income" specifically excludes any loan or loans from a commercial lending institution that are made in the lender's regular course of business on terms available to members of the public without regard to official status, if either the loan is secured by the principal residence of filer, or the balance owed does not exceed \$10,000.

This bill would delete the requirement that, in order for the loan to be excluded from the definition of income, the loan must be either secured by the principal residence of filer, or the balance owed must not exceed \$10,000.

(2) Under the Political Reform Act of 1974, as amended by the Legislature, the definition of "income" specifically excludes any indebtedness created as part of a retail installment or credit card transaction if made in the lender's regular course of business on terms available to members of the public without regard to official status, so long as the balance owed to the creditor does not exceed \$10,000.

This bill would delete the requirement that, in order for the indebtedness to be excluded from the definition of income, the balance owed to the creditor not exceed \$10,000.

Ch. 173 (SB 1472) Romero. Corporations.

Existing law sets forth various requirements applicable to a corporation with outstanding shares of record held by 100 or more persons relative to a supermajority vote requirement for an amendment of the articles of incorporation or a certificate of determination. A corporation is exempt from these requirements if it meets 4 conditions.

This bill would delete one of these conditions and make other related changes.

Ch. 174 (SB 1515) Machado. Community facilities districts: exclusions.

Existing law, the Mello-Roos Community Facilities Act of 1982, provides a method for local agencies to finance certain public capital facilities and services by the establishment of a community facilities district and the imposition of special taxes. Existing laws grant landowners who voluntarily agree not to develop their property various benefits under open-space easements, Williamson Act contracts, farmland security zone contracts, conservation easements, and agricultural conservation easements.

This bill would provide that territory that is subject to any of those easements or contracts may not be included within or annexed to a community facilities district that provides or would provide facilities or services related to sewers, nonagricultural water, or streets and roads unless the landowner consents. With respect to territory included in a community facilities district by landowner consent as required by the bill, the bill would prohibit termination of an easement or cancellation of a contract prior to the release of the land from specified liens.

Ch. 175 (SB 1643) Johnson. Public agency emergencies.

(1) The Ralph M. Brown Act generally requires, with specified exceptions for authorized closed sessions, that meetings of a legislative body of a local agency be conducted openly and that the body provide notice, as specified, prior to its meetings. The act authorizes a legislative body to hold an emergency meeting in an emergency situation, as defined, without complying with specified 24-hour notice and posting requirements, if prompt action is necessary due to the disruption or threatened disruption of public facilities and if the presiding officer of the body, or a designee thereof, notifies local media, as specified, one hour prior to the emergency meeting.

This bill would authorize an emergency meeting under these provisions in the event of a dire emergency, as defined, and provide that, in this situation, notice shall be given at or near the time that the presiding officer notifies the members of the legislative body of the emergency meeting.

(2) The act provides that the legislative body may not meet in closed session during an emergency meeting. The act also provides that the general requirement that meetings be open shall not be construed to prevent the legislative body of a local agency from holding closed sessions with the Attorney General, district attorney, sheriff, or chief of police, or their respective deputies, on matters posing a threat to the security of public buildings or a threat to the public's right of access to public services or public facilities.

This bill would provide that a legislative body holding an authorized emergency meeting may meet in closed session pursuant to provisions allowing a closed session with law enforcement on specified security matters if agreed to by  $\frac{2}{3}$  vote of the members present at the emergency meeting, or, if less than  $\frac{2}{3}$  of the members are present, by unanimous vote.

(3) The California Public Records Act requires state and local agencies to make public records available upon receipt of a request that reasonably describes an identifiable record not otherwise exempt from disclosure by express provisions of law, and upon payment of fees to cover costs.

This bill would include as exempt from disclosure under these provisions a document prepared by a local agency that assesses its vulnerability to terrorist attack or other criminal acts intended to disrupt the public agency's operations and that is for distribution or consideration in a closed session.

Ch. 176 (SB 1707) Committee on Judiciary. Arbitration: standards of ethics.

Existing law, beginning July 1, 2002, requires a person serving as a neutral arbitrator pursuant to an arbitration agreement to comply with the ethics standards for arbitrators adopted by the Judicial Council. Existing law also requires these standards to be consistent with the standards established for arbitrators in the judicial arbitration program, and authorizes these standards to expand the general disclosure and disqualification requirements imposed by law for contract arbitration. Existing law further requires these

standards to address the disclosure of interests, relationships, or affiliations that may constitute conflicts of interest, including prior service as an arbitrator or other dispute resolution neutral entity, disqualifications, acceptance of gifts, and establishment of future professional relationships.

This bill would specify that these provisions do not apply to an arbitration conducted pursuant to the terms of a public or private sector collective bargaining agreement.

Ch. 177 (SB 1729) McPherson. Vehicles: violations.

Existing law provides that a local authority may adopt rules and regulations by ordinance or resolution prohibiting the use of a particular highway under its jurisdiction by certain vehicles, as specified.

This bill would provide that an ordinance or resolution enacted by a local authority prohibiting the use of a particular highway by certain vehicles may impose a fine or a penalty of up to \$100 for a violation.

Ch. 178 (SB 2032) Monteith. Display of the United States flag: common interest developments.

The Davis-Stirling Common Interest Development Act sets forth certain requirements for declarations and governing documents of common interest developments. Existing law requires that an association manage a common interest development, and requires the association to fulfill certain procedures in order to impose disciplinary action upon a member for a violation of the governing documents or rules of the association.

This bill would prohibit any declaration or other governing document of a common interest development from limiting or prohibiting, or being construed to limit or prohibit, the display of the flag of the United States, as defined, except as required for the protection of the public health or safety, in or on an owner's separate interest or within a portion of the common area used exclusively by the owner, as specified. It would also provide that, in any action brought to enforce these provisions, the prevailing party shall be awarded reasonable attorneys' fees and costs.

Ch. 179 (AB 601) Leach. Business contracts.

Existing law authorizes a person who sells the goodwill of a business and a shareholder disposing of all of his or her shares in the corporation or its subsidiary or disposing of all or substantially all of the assets of the corporation or those of a division or subsidiary together with the goodwill of the corporation or its division or subsidiary, to contract with the buyer to refrain from competing with the business so sold, under certain conditions. Existing law additionally authorizes a member of a limited liability company and a partner of a partnership to agree to refrain from competing with a business upon the dissolution of the company or partnership, upon the sale of the member's or partner's interest in the entity, or upon the disassociation of the partner from the partnership.

This bill would extend this authorization to any owner's sale or other disposition of the ownership interest or assets, together with the goodwill, of a business entity or a division or subsidiary thereof. The bill would define "business entity," "owner," and "ownership interest" for purposes of these provisions. The bill would include a partnership and a limited liability company within the definition of a business entity and would make related changes with respect to partnerships and limited liability companies.

Ch. 180 (AB 886) Simitian. Parental authority: educational decisions.

Existing law authorizes a court to limit the control exercised over a minor by a parent or guardian in all cases in which the minor is adjudged a ward or dependent child of the court. Existing law also provides that a guardian or conservator has charge of the education of the ward or conservatee.

This bill would provide that whenever the court specifically limits the right of the parent or guardian to make educational decisions for a child, the court shall appoint a responsible

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

adult to make educational decisions for the child. The bill would provide that whenever the court grants a petition removing the guardian or conservator of a minor or tendering the resignation of the guardian or conservator of a minor, if the court does not immediately appoint a successor guardian or conservator, the court shall appoint a responsible adult to make educational decisions for the minor until a successor guardian or conservator is appointed. The bill would also provide that whenever the court suspends or limits the powers of the guardian or conservator to make educational decisions for the minor, the court shall appoint a responsible adult to make educational decisions for the minor until the guardian or conservator is again authorized to make educational decisions for the child, as specified. The bill would further provide that an individual who would have a conflict in representing the child, as specified, may not be appointed to make educational decisions.

Ch. 181 (AB 1336) Koretz. Pet dealers.

Existing law regulates the retail sale of dogs and cats by a pet dealer, as defined. Existing law in this regard includes a requirement that the dealer provide written information to purchasers relating to various subjects, such as breeder information, illnesses, and immunization records.

This bill would require every pet dealer to deliver to the purchaser of each dog or cat written material containing information on the benefits of spaying and neutering, and other specified subjects.

This bill would provide that a pet dealer may satisfy his or her obligation by delivering model materials developed by the Pet Industry Joint Advisory Council and other specified entities.

Ch. 182 (AB 1863) Committee on Higher Education. California State University: regulations.

Existing law establishes the California State University under the administration of the Trustees of the California State University. Existing law, to be repealed as of January 1, 2003, sets forth a procedure for the adoption of regulations by the trustees, and requires the trustees to follow that procedure rather than the procedure set forth in the Administrative Procedure Act.

This bill would extend the repeal of this provision from January 1, 2003, to January 1, 2008.

The bill would require the trustees each year to report to the Governor, the Senate Education Committee, and the Assembly Higher Education Committee on all regulatory actions taken by the trustees during the previous calendar year and related matters.

Ch. 183 (AB 1934) Corbett. Telephone corporations: background security checks.

Existing law permits telephone corporations to construct, own, control, operate and manage telephone lines and to provide telephone service for compensation in the state, subject to regulation by the Public Utilities Commission.

This bill would require telephone corporations to perform an investigation into the background of certain applicants for employment. The bill would also require that a background check be performed on certain persons hired by a telephone corporation under a personal services contract, as independent contractors and as vendors, and would require independent contractors and vendors to certify that they have obtained the background checks, and to make those checks available to the telephone corporation upon request. The bill would provide that the telephone corporation is not responsible for administering or paying for the background checks of persons hired under a personal services contract, independent contractors, and vendors.

Ch. 184 (AB 2299) Bates. Tolls: evasion.

Existing law makes the evasion of tolls on toll facilities subject to civil penalties governed by a specified procedure which includes an administrative investigation and review procedure and an administrative and judicial appeal process. If a vehicle is found to have evaded tolls, the agency responsible for enforcement must forward a specified notice of violation to the registered owner of the vehicle within 21 days of the violation.

This bill would provide that, if accurate information concerning the identity and address of the registered owner is not available to the processing agency within 21 days of the violation, the processing agency shall have an additional 45 calendar days to obtain such information and forward the notice of toll evasion violation. Where the registered owner is a repeat violator, as specified, this bill would require the processing agency to forward the notice of toll evasion violation within 90 calendar days of the violation. This bill would also require the processing agency to use its best efforts to obtain accurate information concerning the registered owner for these purposes.

Ch. 185 (AB 2346) Dickerson. Peace officers: deputy sheriffs.

Existing law defines specified powers, rights, duties, and training requirements for peace officers, and provides that any deputy sheriff, employed in that capacity by a county, is a peace officer whose authority extends to any place in the state with regard to offenses committed within his or her home jurisdiction, and any offense committed in his or her presence where there is immediate danger to person or property or the escape of the perpetrator, or where there is probable cause to believe these situations exist. Existing law also provides that a deputy sheriff of a county of the first class and any deputy sheriff of the County of Riverside or San Diego, who is assigned to perform duties relating to specified custodial assignments is a peace officer whose authority extends to any place in the state only while engaged in the performance of the duties of his or her employment and for the purpose of carrying out the primary function of employment relating to his or her custodial assignments, or when directed to perform other law enforcement duties during a local state of emergency.

This bill would provide that this latter provision is also applicable to deputy sheriffs employed by the Counties of Kern, Humboldt, Imperial, Mendocino, Plumas, Santa Barbara, Siskiyou, Sonoma, Sutter, and Tehama. The bill would make other technical changes.

This bill would incorporate additional changes in Section 830.1 of the Penal Code, proposed by SB 183, to be operative only if SB 183 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

Ch. 186 (AB 2402) Rod Pacheco. Speed limits: City of Norco: pedestrian and equestrian trails.

Existing law prohibits any person from driving a vehicle at a speed greater than the speed limit. Existing law generally sets forth prima facie speed limits unless changed or otherwise authorized by law. Existing law permits local authorities to set prima facie speed limits higher or lower than the established prima facie speed limits on the basis of an engineering and traffic survey, as defined, if the different speed limit is necessary to facilitate the orderly movement of traffic and is reasonable and safe.

This bill would authorize the City of Norco, when conducting an engineering and traffic survey, to consider equestrian safety in addition to the specified factors set forth.

The bill would make legislative findings and declarations as to the necessity of a special statute.

Ch. 187 (SB 1745) Polanco. Domestic violence reporting.

Existing law provides that mandated written and telephoned reports of known or suspected child abuse by health practitioners and other specified professionals shall be confidential, and that violations of this confidentiality shall be punishable as misdemeanors,

as specified. Existing law also provides, however, that authorized persons within county health departments shall be permitted to receive copies of reports made by specified health practitioners pursuant to provisions of law requiring reports of maternal substance abuse and copies of needs assessments prepared by health practitioners related to pregnant and postpartum substance abusing women.

This bill would make a nonsubstantive, technical correction to existing law authorizing persons within county health departments to receive copies of the aforementioned reports and assessments made by specified health professionals regarding maternal substance abuse.

Existing law requires law enforcement agencies to prepare reports regarding calls for assistance that are related to domestic violence.

This bill would state the Legislature's findings and declarations with respect to the relationship between domestic violence and the abuse and neglect of children. This bill would require child protective services, law enforcement agencies, and others to develop protocols in collaboration with one another, as specified, as to how law enforcement and child welfare agencies will cooperate in their response to a domestic violence related incident in a home in which a child resides.

This bill would declare that it is the intent of the Legislature that this bill would reduce duplication, overlap, and local costs.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new program or higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

#### Ch. 188 (AB 137) Reyes. Agricultural preserves: annexations.

Under the Williamson Act, upon the annexation by a city of any land subject to a contract with a county that enforceably restricts the land to agricultural use within an agricultural preserve, the city succeeds to all rights, duties, and powers of the county under the contract unless the land being annexed was within one mile of the city boundary when the contract was executed, the contract was executed prior to January 1, 1991, and the city filed a protest of record that identifies the affected contract and the subject parcel. The act authorizes a local agency formation commission to request, and requires the Department of Conservation to provide, advice and assistance regarding the commission's obligation to determine whether an annexing city may exercise its option not to succeed to the rights, duties, and powers of the county under the contract.

This bill would require the Department of Conservation to advise the local agency formation commission of its concerns, whether or not it has been requested to do so, and would require the commission to address those concerns. The bill would require the commission to base its determination on substantial evidence in the record. The bill would prescribe criteria for the exercise by the city of its option not to succeed to a contract.

#### Ch. 189 (AB 1982) Bogh. Workers' compensation: advanced disability pension benefits.

Existing workers' compensation law permits a city, county, special district, or harbor district that is a member of the Public Employees' Retirement System, is subject to the County Employees Retirement Law of 1937, or is subject to the Los Angeles City Employees' Retirement Systems, to make advanced disability pension payments to any local safety officer who meets certain criteria and is approved for a disability allowance.

This bill would require these entities to make these advanced disability pension payments commencing no later than 30 days from the date of issuance of the employee's last regular payment for wages or salary, payment for specified benefits, or payment for sick leave, unless

certain conditions exist. It would impose the above requirement only if an employee meets specified conditions.

This bill would require these advanced disability pension payments to continue until the claimant is approved or disapproved for a disability allowance pursuant to final adjudication as provided by law.

Ch. 190 (AB 1330) Steinberg. State employees.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding may not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of memoranda of understanding entered into between the state employer and State Bargaining Units 14, 17, and 20, the California State Employees Association, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that provisions of the memoranda of understanding approved by this bill that require the expenditure of funds shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer and the affected employee organization shall meet and confer to renegotiate the affected provisions.

(2) The Public Employees' Retirement Law provides for the normal rate of contribution to the retirement fund for a state miscellaneous or industrial member, subject to certain criteria.

This bill, operative until July 1, 2003, would establish various normal rates of contribution for state miscellaneous or industrial members in State Bargaining Units 14, 17, and 20, as specified, who are and are not included in the federal system, and to be effective as of a date to be determined by the Director of the Department of Personnel Administration, but no later than May 1, 2002, to June 30, 2002, inclusive, and effective from July 1, 2002, to June 30, 2003, inclusive.

(3) Existing law establishes the normal rate of contribution to the Public Employees' Retirement System for specified state safety members.

This bill would provide that the normal rate of contribution for specified state safety members in State Bargaining Unit 20 from a date to be determined by the Director of the Department of Personnel Administration, but no earlier than May 1, 2002, to June 30, 2003, is 1% of compensation in excess of \$317 per month paid to that member for service rendered.

(4) Existing provisions of the Budget Act of 2001 appropriate specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for the augmentation of state employee compensation.

This bill would appropriate an additional \$4,837,000, as scheduled, from those funds in augmentation of specified items of the Budget Act of 2001 for state employee compensation.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 191 (AB 1753) Migden. Magazine distributors.

Existing law provides for the regulation of various businesses and professions by the Department of Consumer Affairs.

This bill would require a magazine distributor to place clearly and conspicuously the magazine subscription expiration date on renewal notices mailed to its subscribers or to direct subscribers to refer to the magazine's mailing label for the subscription expiration date. The

bill would require the subscription expiration date to be disclosed on a magazine's mailing label.

Ch. 192 (AB 1909) Cohn. Domestic violence: demonstration project.

Under existing law, any person who perpetrates domestic violence, as defined, is subject to both criminal penalties and civil remedies, as specified.

This bill would, subject to adequate, discretionary funding from a city or county, authorize the superior courts in San Diego County and in Santa Clara County, and in any other county able and willing to participate, to develop a demonstration project to identify the best practices in civil, juvenile, and criminal court cases involving domestic violence. The bill would require superior courts participating in this demonstration project to report their findings and recommendations to the Judicial Council and the Legislature by May 1, 2004. The bill would permit the Judicial Council to make those recommendations available to any court or county.

Ch. 193 (AB 1933) Reyes. Domestic violence.

Existing law requires every person to abstain from injuring the person or property of another or from infringing upon the rights of another. Existing law also provides that a person who commits a sexual battery, as specified, is liable for damages, including, but not limited to general, special, and punitive damages.

This bill would also provide that a person who commits the tort of domestic violence, as specified, is liable for damages, including, but not limited to, general, special, and punitive damages. The bill would also set forth findings and declarations regarding its purposes.

Ch. 194 (AB 2252) Cohn. Sex crimes: evidence.

Existing law provides that, except as specified, evidence of a person's character is inadmissible when offered to prove his or her conduct on a specified occasion. Existing law creates exceptions to that rule, including that in a criminal action in which the defendant is accused of a sexual offense, evidence of the defendant's commission of another sexual offense or offenses is not inadmissible under that rule, except as specified. Existing law defines the term "sexual offense" as conduct proscribed by various sections of the Penal Code as well as other types of conduct.

This bill would expand the definition of "sexual offense" for the purposes of the aforementioned exception to the rule against the admission of character evidence to include those violations of the law proscribing assault with the intent to commit a specified felony that require sexual intent.

Existing law vests territorial jurisdiction for specified sexual, domestic, and stalking offenses that involve the same defendant and victim but occur in more than one territorial jurisdiction, in any jurisdiction where at least one of the offenses occurred.

This bill would add the charges of assault with intent to commit specified sex crimes and aggravated sexual assault of a child to those offenses for which territorial jurisdiction over multiple violations lies in any jurisdiction where one of those offenses happened, subject to a specified hearing in which the prosecution is required to present evidence that all district attorneys in counties with jurisdiction of the offenses agree to the venue. It would also eliminate, as to the sexual offenses, the requirement that these offenses involve a single victim for territorial jurisdiction to lie in any jurisdiction where one of these offenses happened. This bill would also permit, as to all of the specified sexual, domestic, and stalking offenses, similar jurisdictional rules to apply to any charge which could properly be joined to one of those offenses.

Ch. 195 (AB 2417) La Suer. Common interest developments: meetings.

Existing law, the Davis-Stirling Common Interest Development Act, defines and regulates common interest developments and provides that any member of the association may attend meetings of the board of directors of the association, except when the board adjourns to

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

executive session to consider specified matters. Existing law requires matters discussed in executive session to be generally noted in the minutes of the board of directors.

This bill would require that matters discussed in executive session be noted in the minutes of the immediately following meeting open to the entire membership.

Ch. 196 (AB 2456) Jackson. Employment of offenders.

Under existing law, prison inmates and persons confined in a county jail, industrial farm, road camp, or city jail, who have been convicted of specified offenses, may not be employed so that they have access to personal information of private individuals, as specified. Under existing law, wards of the juvenile court or the Department of the Youth Authority, who have been adjudicated as having committed any of these same specified offenses, are not permitted to perform any function that provides them access to personal information of private individuals, as specified. Under existing law, the personal information to which each of these inmates and wards is denied access is specified to include, but not be limited to, social security numbers, addresses, driver's license numbers, credit card numbers, and telephone numbers.

This bill would expand the list of specifically included types of personal information to which these parties are denied access by adding an array of identification and identity-related materials. It would also expand the prohibition on employment that permits access to this personal information to cover any person convicted of one of the specified offenses while that person is performing community service in lieu of a fine or custody.

Ch. 197 (AB 2493) Robert Pacheco. Service of process.

Existing law provides for the registration by the county clerk of legal document assistants, unlawful detainer assistants, and process servers, as specified.

This bill would make technical, nonsubstantive changes to those provisions.

Existing law provides the methods by which a summons is served, as specified. Existing law provides alternative service by publication if the party cannot with reasonable diligence be served in another manner.

This bill would prohibit a court, in making a determination that a party cannot be served in another manner, from conducting a search of public databases that restrict access to residential addresses, including, but not limited to, the Department of Motor Vehicles' records.

Existing law proscribes the manner in which a registered process server is to levy a writ of execution on specified types of property.

This bill would permit a registered process server to levy more than once under a valid writ of execution.

Upon a judgment creditor's delivery of an application for issuance of an earnings withholding order, existing law authorizes a registered process server to issue an earnings withholding order to the county where the judgment debtor's employer is served a writ of execution. Existing law provides that the fee for these services be allowed as a recoverable cost, as specified, but not to exceed \$1.50.

This bill would delete the monetary limitation and provide that the fee for these services be allowed as a recoverable cost, under specified provisions.

Ch. 198 (AB 2526) Dickerson. Crimes.

Under existing law, if a defendant is convicted of an offense, the defendant may be required to pay all or a portion of the costs for any legal assistance that was provided by the court, for probation or probation investigation, for incarceration in a local detention facility, or for the provision of parole supervision. Existing law requires an ability to pay determination hearing before these costs may be assessed to the defendant and, if practicable, requires the court to consolidate these hearings. Existing law authorizes the determination of the ability to pay

made at the consolidated hearing to be used for all purposes related to these specified provisions.

This bill would require the court to consolidate all ability to pay determination hearings into one proceeding and would authorize the court to use this determination of ability to pay made at the consolidated hearing for all purposes.

Ch. 199 (AB 693) Longville. School facilities improvement districts: elections.

Existing law authorizes the governing board of a school facilities improvement district to provide for and call a special bond election within the district to submit to the voters a proposition on whether to incur debt and issue bonds. Existing law permits the election to be called for any date, with specified exceptions, including elections held on, or the day before or after, a state holiday, and elections for school bonds pursuant to specified provisions of law.

This bill would prohibit an election within a 45-day period before or after a statewide election, unless called for the same date as the statewide election or an established election date.

Ch. 200 (AB 1493) Pavley. Vehicular emissions: greenhouse gases.

(1) Existing law establishes the California Climate Action Registry, and requires the registry to perform various functions relating to the provision of technical assistance for emissions reductions, including maintaining a record of certified greenhouse gas emission baselines and emission results. Existing law requires these records to be available to the public, except for any portion deemed confidential by a participant in the registry. Existing law, the California Public Records Act, provides that all public records, as defined, are open to inspection at all times during the office hours of a state or local agency and any person has a right to inspect any public record, except as specifically provided in the act.

This bill would revise the exception applicable to records maintained by the registry to make those records available to the public, except that portion of the data or information exempt from disclosure pursuant to the act. The bill would require the registry, in consultation with the State Air Resources Board, to adopt procedures and protocols for the reporting and certification of reductions in greenhouse gas emissions from mobile sources for use by the state board in granting the emission reduction credits.

(2) Existing law requires the state board to endeavor to achieve the maximum degree of emission reductions possible from vehicular and other mobile sources in order to accomplish the attainment of the state standards at the earliest practicable date.

This bill would require the state board to develop and adopt, by January 1, 2005, regulations that achieve the maximum feasible reduction of greenhouse gases emitted by passenger vehicles and light-duty trucks and any other vehicles determined by the state board to be vehicles whose primary use is noncommercial personal transportation in the state. The bill would prohibit those regulations from taking effect prior to January 1, 2006, in order to give the Legislature time to review the regulations and determine whether further legislation should be enacted prior to the effective date of the regulations. Under the bill, the regulations would apply only to a motor vehicle manufactured in the 2009 model year, or any model year thereafter.

The bill would require the regulations to provide flexibility, to the maximum extent feasible, in the means by which a person may comply with those regulations, including, but not limited to, authorization for a person to use alternative methods of compliance with the regulations. The bill would prohibit the state board from imposing a mandatory trip reduction measure or land use restriction in providing that compliance flexibility. The bill would prohibit the state board, in adopting the regulations, from requiring the imposition of additional fees and taxes on any motor vehicle, fuel, or vehicle miles traveled; a ban on the sale of any vehicle category, a reduction in vehicle weight; a limitation on, or reduction of, the speed limit on any street or highway in the state; or a limitation on, or reduction of, vehicle

miles traveled. The bill would declare that the provisions of the bill prohibiting the state board from imposing additional fees or taxes on any motor vehicle, fuel, or vehicle miles traveled, or to limit or reduce the speed limit on any street or highway in the state to be declaratory of existing law. The bill would require the state board to ensure that any alternative methods of compliance achieve equivalent or greater reductions in emissions of greenhouse gases as the regulations. The bill would also require the state board to conduct public workshops regarding the regulations in specified communities with the most significant exposure to air contaminants. The bill would also require the state board to grant emission reduction credits for reductions of greenhouse gas emissions achieved prior to the operative date of the regulations, utilizing the 2000 model year as the baseline for calculating those reductions. The bill would require the state board to include an exemption in those regulations for vehicles subject to specified exhaust emission standards. The bill would authorize the state board to elect not to adopt a standard for a greenhouse gas, if the state board determines that the federal government has adopted a standard regulating that greenhouse gas, and the state board makes specified findings related to the similarity of the federal standard. The bill would also require the state board, by January 1, 2005, to provide a report to the Legislature on the contents of those regulations.

Ch. 201 (AB 1912) Kehoe. Transportation: transit operations: funding.

Existing law requires that a specified portion of the funds in the Public Transportation Account in the State Transportation Fund be appropriated to the Controller for allocation to transportation planning agencies and county transportation commissions, as specified, for allocation to the transit operators in the area of the agency's or commission's jurisdiction. Existing law allows the allocation of funds to an operator for its operating costs, only if the operator is not precluded by contract from employing part-time drivers or contracting with common carriers of persons operating under a franchise or license and the operator is in compliance with prescribed ratios of fare revenues to operating costs.

This bill would delete these existing conditions on the allocation of funds to an operator for operating costs. The bill would provide that specified provisions do not prohibit or limit a public transit operator from employing part-time drivers or contracting with common carriers or persons operating under a franchise or license.

Ch. 202 (AB 1965) Bogh. Public postsecondary education: Medal of Honor recipients.

Existing law prohibits any state-owned college, university, community college, or other school from charging any tuition or fees to certain dependents or survivors of veterans, including any child of any veteran of the United States military who has a service-connected disability, has been killed in service, or has died of service-connected disability, where the annual income of the child, including the value of any support received from a parent, does not exceed the national poverty level.

This bill would further provide that an undergraduate student who is a recipient of a Medal of Honor, commonly known as a Congressional Medal of Honor, or any undergraduate students who are children of a recipient of the Medal of Honor and who are no more than 27 years old, would not be subject to tuition or fees at any campus of the University of California, the California State University, or the California Community Colleges if they meet the income requirements set forth in existing law, and are California residents, as defined. These provisions would only apply to the University of California to the extent the regents make them applicable by resolution.

Ch. 203 (AB 2984) Committee on Insurance. Insurance: depository institutions: production agencies: surplus line brokers: reinsurance intermediaries.

(1) Existing law provides for the licensure and regulation of insurers by the Insurance Commissioner and the Department of Insurance.

This bill would establish provisions regulating retail sales practices, solicitations, advertising, and offers of any insurance product or annuity to a consumer by a depository institution, or any person engaged in those activities at the office of a depository institution or on behalf of a depository institution.

(2) Existing law contains provisions governing the licensing and practice of production agencies, surplus line brokers, and reinsurance intermediaries. A violation of certain provisions regulating the duties of surplus line brokers is a crime.

This bill would revise licensing provisions with regard to production agencies, surplus line brokers, and reinsurance intermediaries, and would also revise requirements for certain licensees within those categories. Because this bill would expand the duties of a surplus line broker and thereby expand the definitions of crimes associated with a violation of these duties, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 204 (SB 937) Margett. Public contracts: bids and disputes.

The Subletting and Subcontracting Fair Practices Act requires a public entity taking bids for construction of a public work or improvement to establish a date for submission of bids by prime contractors. Existing law applicable to local agencies requires that any bids that are submitted after the bid submittal deadline must be returned unopened to the bidder.

This bill would recast the provisions governing notice of bid submittal deadlines, and would also apply to state agencies the requirement that postdeadline bids be returned unopened.

#### Ch. 205 (SB 1302) Costa. All-terrain vehicles.

Under existing law, the definition of an all-terrain vehicle includes among its requirements that the vehicle be 600 pounds or less in unladen weight.

This bill would expand the definition of all-terrain vehicles to include those motor vehicles up to 900 pounds in unladen weight. All-terrain vehicles are subject to certain regulatory requirements, and to the extent this bill would increase the scope of an existing crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 206 (SB 1494) Ackerman. Property tax: liens.

Under existing law, every tax on real property is a lien against the property assessed.

This bill would, in addition, provide that any penalties or interest on real property is a lien on the property.

#### Ch. 207 (SB 1513) Karnette. Public resources: oil spill contingency planning: financial responsibility.

Existing law establishes in state government the office of administrator for oil spill response and requires the administrator to adopt and implement regulations and guidelines governing the adequacy of oil spill contingency plans.

Under existing law, a nontank vessel, as defined, that is required to have a contingency plan may not enter marine waters of the state unless the nontank vessel owner or operator has provided to the administrator evidence of financial responsibility that demonstrates, to the administrator's satisfaction, the ability to pay at least \$300,000,000 to cover damages caused by a spill, and the owner or operator of the nontank vessel has obtained a certificate of financial responsibility from the administrator for the nontank vessel. However, until

January 1, 2003, the administrator is authorized to establish a lower standard of financial responsibility for a nontank vessel that has a carrying capacity of 6,500 barrels of oil or less, or, if the nontank vessel is owned and operated by California or a federal agency, a carrying capacity of 7,500 barrels of oil or less.

This bill would extend, until January 1, 2006, the expiration date of the authority of the administrator to establish a lower standard of financial responsibility for the specified nontank vessels.

Ch. 208 (SB 1689) Margett. Criminal law: prohibited weapons.

Existing law prohibits the manufacture, importation, sale, giving, lending, and possession of specified weapons and related items, including metal knuckles. Violation of these provisions is a crime.

This bill would prohibit the commercial manufacture, knowing importation for commercial sale, and keeping, offering, or exposing for commercial sale of hard plastic knuckles. Violation of this provision would be a misdemeanor.

By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 209 (SB 1709) Poochigian. Charter schools: audits.

Existing law requires a charter school to transmit a copy of its annual, independent, financial audit report for the preceding fiscal year to its chartering entity and the State Department of Education by December 15 of each year.

This bill would, in addition, require a charter school to transmit a copy of its annual, independent, financial audit report for the preceding fiscal year to the Controller and the county superintendent of schools of the county in which the charter school is sited.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 210 (SB 1739) Morrow. Witnesses: protection.

Existing law establishes a Witness Protection Program administered by the Attorney General to provide for the relocation or other protection of a witness in a criminal proceeding where there is credible evidence, as defined, of substantial danger that the witness may suffer intimidation or retaliatory violence. Existing law authorizes the Attorney General to enter into an agreement with a witness under specified terms, and provides that a witness selected by the Attorney General may receive services under the program from "victim of crime" funds. Existing law provides for the Attorney General to determine whether family, friends, or associates of the witness are endangered, and therefore are also subject to protection under these provisions. Existing law provides that the Attorney General may reimburse state and local agencies for the costs of providing witness protection services when an action is brought by local prosecutors. Existing law provides immunity to the Attorney General for any condition in the witness protection agreement that cannot reasonably be met due to a witness committing a crime while in the program.

This bill would allow local and state prosecutors, rather than just the Attorney General, to select witnesses for inclusion in the program; to enter into witness protection contracts to provide protection on specified terms; and to determine the eligibility of family, friends, or associates of a witness for protection. This bill would permit the Attorney General to reimburse state and local agencies for the costs of protection services when an action is brought by state prosecutors, as well as when an action is brought by local prosecutors. This bill would also provide immunity to state and local prosecutors, rather than just the Attorney General, for any condition in the witness protection agreement that cannot reasonably be met due to a witness committing a crime during participation in the program.

Existing law prohibits a person from accepting or receiving, directly or indirectly, any payment or benefit in consideration for providing information obtained as a result of witnessing an event or occurrence that he or she knows, or reasonably should know, is a crime, or if he or she has personal knowledge of facts that he or she knows, or reasonably should know, may require that person to be called as a witness in a criminal prosecution. Certain rewards and categories of compensation are exempted from these prohibitions, including lawful compensation provided by law enforcement or prosecutors to informants.

This bill would exempt from these criminal prohibitions lawful compensation provided to a witness participating in the Witness Protection Program.

Ch. 211 (SB 1741) Johnson. Political Reform Act of 1974: campaign statements.

Under the existing Political Reform Act of 1974, a “late contribution” means any contribution, including a loan, that totals \$1,000 or more that is made to or received by a candidate, a controlled committee, or a primarily formed committee, before the date of the election at which the candidate or measure is to be voted on, but after the closing date of the last campaign statements required to be filed before the election. Existing law requires that each candidate or committee that makes or receives a late contribution report the late contribution, as specified, within 24 hours of the time the late contribution is made or received.

This bill would require the recipient of a late contribution to report whether the contribution was made in the form of a loan.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act’s purposes with a  $\frac{2}{3}$  vote of each house and compliance with specified procedural requirements. This bill, which would declare that it furthers the purposes of the act, would therefore require a  $\frac{2}{3}$  vote.

Ch. 212 (SB 1742) Johnson. Political Reform Act of 1974: limitations of contributions.

Under the existing Political Reform Act of 1974, a candidate for elective state office is authorized to return all or part of any contribution to the donor at any time.

This bill would prohibit a candidate for elective state office from returning, to himself or herself, contributions that were made by the candidate to the candidate’s controlled committee.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act’s purposes with a  $\frac{2}{3}$  vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a  $2/3$  vote.

Ch. 213 (SB 1859) Costa. Elections: ballot pamphlets.

Existing law requires the ballot pamphlet for an election at which state bond measures will be submitted to the voters to include a discussion of the state's current bonded indebtedness situation. Existing law requires that the discussion include specified information.

This bill would additionally require, in cases where a bond measure allocates funds for programs, the discussion to include the proportionate share of funds for each major program funded by the measure.

Ch. 214 (SB 2086) Committee on Revenue and Taxation. Property taxation: administration.

Existing property tax law provides for a state grant program for the funding of local administration of the property tax.

This bill would make technical changes to these provisions to correct certain cross-references.

Pursuant to authorization by the California Constitution, existing property tax law establishes a welfare exemption under which property is exempt from taxation if, among other things, that property is used exclusively for religious, hospital, scientific, or charitable purposes and is owned and operated by an entity, as provided, that is itself organized and operated for those purposes. Existing law requires those who qualify for these exemptions to notify a county assessor, on or before March 15, or in the case of the religious exemption, June 30, if the taxpayer no longer qualifies for the exemption.

This bill would change these notification dates to February 15.

Existing property tax law allows taxes, penalties, and interest imposed for delinquent filings of property tax exemption applications to be reduced in the case of an exemption application of a college, cemetery, church, religion, exhibition, veterans' organization, free public library, free museum, public school, community college, state college, state university, or a person or entity claiming the welfare exemption.

This bill would specify that those taxpayers applying for an exemption for aircraft of historical significance may also have penalties reduced pursuant to these provisions.

Existing property tax law allows taxes, penalties, and interest imposed for delinquent filings of property tax exemption applications to be reduced in the case of an exemption of a college, cemetery, church, religion, exhibition, or veterans' organization that acquires new property or is organized after the lien date, if an application for exemption is filed on or before the lien date in the calendar year next succeeding the calendar year in which the property was acquired.

This bill would allow these taxes, penalties, and interest to be reduced pursuant to these provisions only if the entity files an exemption application within 90 days from the first day of the next month following the date on which the property was acquired.

The California Constitution provides that, unless otherwise provided in the constitution or by federal law, all property in the state is taxable and is assessed at its fair market value. Existing law requires a taxpayer to furnish to assessors various types of information about the taxpayer's property.

This bill would authorize the board of supervisors of a county to enact an ordinance that requires any party that records a digital subdivision map with the county recorder to also file a duplicate digital copy of that map with the county assessor.

Existing property tax law allows county assessors to destroy documents containing information obtained from taxpayers 6 years after the lien date for the taxes for which the information was obtained, or 3 years after the lien date if the documents have been microfiched, microfilmed, imaged, or otherwise preserved.

This bill would allow, in the same manner, county assessors to destroy affidavits for certain property tax exemptions.

Ch. 215 (SB 2096) Committee on Environmental Quality. Laboratory services.

Existing law requires a laboratory that performs analyses for specified substances, including pesticide residues in food, to either obtain certification by the State Department of Health Services or, in the alternative, to obtain accreditation under the National Environmental Laboratory Accreditation Program (NELAP) if it chooses to meet standards adopted by the National Environmental Laboratory Accreditation Conference (NELAC) and become eligible for recognition by other states and agencies that require or accept NELAP accreditation.

Existing law provides that the period of accreditation for NELAP accredited laboratories shall be 12 months.

This bill would require that an application for renewal be filed with the department prior to the expiration date of the accreditation, and failure to do so would result in expiration of the accreditation.

Existing law requires the department to deny or revoke a certificate if it finds that certain conditions exist.

This bill would revise these conditions. The bill would, among other things, include among these conditions failure by the laboratory to analyze proficiency testing samples, and submission by the laboratory, as its own, of proficiency testing sample results generated by another laboratory.

This bill would make related and conforming changes.

Ch. 216 (AB 2559) Wesson. Veterans' Home of California.

The Veterans' Homes Bond Act of 2000 requires the proceeds from the sale of the bonds issued under that act to be deposited in a newly established Veterans' Home Fund. That act provides that upon appropriation by the Legislature, the moneys in that fund are to be allocated first to meet state funding requirements for the renovation or construction of those veterans' homes identified by a specified statute, and then to fund any additional homes established pursuant to the bond act.

This bill would continuously appropriate the moneys in the Veterans' Home Fund, without regard to fiscal years and in an amount not to exceed \$31,000,000, to meet state funding requirements for the construction of veterans' homes, located in the City of Lancaster and in the community of Saticoy, that are identified by the same specified statute, and a veterans' home located in West Los Angeles, that is an additional home established pursuant to the bond act.

This bill would make various findings and declarations regarding these provisions. The bill would also state the intent of the Legislature in enacting these provisions.

This bill would provide that it would become operative only if AB 2953, SB 1234, and SB 1773 are enacted and become effective on or before January 1, 2003.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 217 (SB 1234) Johannessen. Veterans' homes.

Existing law, the "State Building Construction Act of 1955," authorizes the State Public Works Board to acquire or construct public buildings and to issue revenue bonds, negotiable notes, and negotiable bond anticipation notes to finance that construction.

This bill would authorize the State Public Works Board to issue lease-revenue bonds, notes, or bond anticipation notes pursuant to the State Building Construction Act of 1955 to finance the acquisition, design, construction, renovation, or expansion of veterans' homes at Yountville, Barstow, Chula Vista, Lancaster, Saticoy, and West Los Angeles, and in Fresno County and Shasta County, as provided. It would continuously appropriate these funds to

the board on behalf of the Department of Veterans' Affairs for this purpose. This bill would specify the amount of authorized capital outlay for the project.

The bill would condition any issuance of bonds or notes for these purposes on a commitment from the federal government to pay for the federal matching share of the cost of the design, construction, renovation, or expansion of these homes.

This bill would make various legislative findings and declarations regarding these provisions.

This bill would provide that it would become operative only if AB 2559, AB 2953, and SB 1773 are enacted and become effective on or before January 1, 2003.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 218 (AB 2953) Wiggins. Veterans' homes: renovation.

The Veterans' Homes Bond Act of 2000 requires the proceeds from the sale of the bonds issued under that act to be deposited in a newly established Veterans' Home Fund. That act provides that upon appropriation by the Legislature, the moneys in that fund are to be allocated to the Department of Veterans Affairs first to meet state funding requirements for the renovation or construction of those veterans' homes identified by a specified statute.

This bill would continuously appropriate, without regard to fiscal years, an amount not to exceed \$15,000,000 from the Veterans' Home Fund to the department for the renovation of the Veterans' Home of California, Yountville.

This bill would provide that it would become operative only if AB 2559, SB 1234, and SB 1773 are enacted and become effective on or before January 1, 2003.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 219 (SB 1773) Chesbro. Veterans' homes: renovation.

The Veterans' Homes Bond Act of 2000 requires the proceeds from the sale of the bonds issued under that act to be deposited in a newly established Veterans' Home Fund. That act provides that upon appropriation by the Legislature, the moneys in that fund are to be allocated to the Department of Veterans Affairs first to meet state funding requirements for the renovation or construction of those veterans' homes identified by a specified statute.

This bill would continuously appropriate, without regard to fiscal years, an amount not to exceed \$15,000,000 from the Veterans' Home Fund to the department for the renovation of the Veterans' Home of California, Yountville.

This bill would continuously appropriate, without regard to fiscal years, certain remaining funds from the Veterans' Home Fund for these renovations, and would also continuously appropriate certain federal matching funds for related purposes.

This bill would provide that it would become operative only if AB 2559, AB 2953, and SB 1234 are enacted and become effective on or before January 1, 2003.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 220 (AB 2315) Chu. Office of State Printing: paid advertisements.

Existing law prohibits the Office of State Printing from doing any printing for the promotion of sales for any industry.

This bill would, until January 1, 2006, authorize the department to accept paid advertisements in materials printed or published by the state, except for paid political advertising. It would require the department to report to the Governor and the Legislature on its implementation of these provisions no later than December 31, 2005.

Ch. 221 (SB 1019) Torlakson. Counties: clerks.

Existing law requires the county clerk to perform specific duties, including, among other things, giving notice of the time and place fixed for hearings, accepting documents and reports for filing, receiving notice of causes of action against the county and petitions, transmitting and receiving resolutions, and preparing and certifying to all proceedings on file

relative to the issuance and sale of bonds. Existing law prescribes the election procedures for various special districts.

This bill would repeal obsolete provisions and revise references to the county clerk and the registrar of voters to, instead, refer to, as appropriate, the clerk of the board of supervisors, the county elections official, the clerk of the legislative body, or the appropriate financial officer or other designated official in a county. This bill would revise certain obsolete provisions relating to special district elections.

Ch. 222 (SB 1232) Committee on Local Government. Validations.

This bill would enact the Second Validating Act of 2002, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 223 (SB 1233) Committee on Local Government. Validations.

This bill would enact the Third Validating Act of 2002, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

Ch. 224 (SB 1313) Margett. Counties and cities: contracts: law enforcement.

Existing law authorizes a county board of supervisors to contract on behalf of the sheriff of that county, and the legislative body of any city to contract on behalf of that city, to provide supplemental law enforcement services to private individuals or entities to preserve the peace at special events or occurrences that happen on an occasional basis.

This bill would extend that authorization with respect to providing supplemental law enforcement services to private nonprofit corporations that are recipients of government low-income housing funds or grants to preserve the peace on an ongoing basis, and to private entities at critical facilities on an ongoing basis, as specified.

Ch. 225 (SB 1655) Scott. Teacher credentialing: administrative services credential.

Existing law sets forth the minimum requirements for both a preliminary and professional services credential with a specialization in administrative services.

This bill would authorize the Commission on Teacher Credentialing to issue those credentials to persons who meet expedited alternative requirements and would set forth those requirements.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 226 (SB 1800) Johannessen. Public Safety Officer Medal of Valor Act.

Existing law authorizes the Governor to make awards each year to employees or groups of employees who distinguish themselves by outstanding service to the state during the preceding year and to present a Medal of Valor to each member of the National Guard, State Military Reserve, and the Naval Militia who, while an officer or enlisted member of these services, distinguishes himself or herself by courageous conduct at the risk of life, above and beyond the call of duty, while in the service of the state or the United States.

This bill would enact the Public Safety Officer Medal of Valor Act and create the Medal of Valor Review Board with a specified membership. The board would serve without compensation or reimbursement for expenses. The bill would authorize the Governor to award a Medal of Valor to one, or more, in extraordinary cases, public safety officer each year cited by the Attorney General, from among candidates recommended by the board, for extraordinary valor above and beyond the call of duty. The bill would authorize the board to conduct meetings, select candidates, hold one annual hearing, take testimony, call witnesses, and secure information directly from state departments and local agencies necessary to carry out its duties.

Ch. 227 (SB 1877) Johnson. Health care.

Existing law authorizes health care service plans and disability insurers administering health benefit plans covering employees of small employers to enter into agreements with qualified associations to assume responsibility for certain administrative functions. Existing law limits the types of services provided by the association and specifies the requirements needed for an association to qualify. Under existing law, these provisions are repealed on January 1, 2003. A violation of the provisions relating to health care service plans is a crime.

This bill would delete the repeal date for these provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 228 (SB 2001) Committee on Elections and Reapportionment. Election procedures.

Existing law prohibits a county elections official from circulating nomination papers, and a circulator from obtaining signatures within 100 feet of any election booth or polling place.

This bill would provide that this prohibition does not prohibit a county elections official or a deputy county elections official from circulating his or her own nomination papers.

Existing law specifies procedures applicable to the preparation, submittal, and printing of rebuttal arguments to a measure appearing on the ballot of a county, district, or school district election.

This bill would repeal those procedures and replace them with a uniform procedure applicable to rebuttal arguments for county, district, and school district ballot measures.

Existing law requires the elections official administering a county, municipal, district, or school district election, not less than 10 calendar days before specified official election materials are submitted for printing, including the official voter's pamphlet, to make a copy of those election materials available for public examination. It permits any voter, during that 10-calendar-day public examination period, to seek a writ of mandate or an injunction, upon specified grounds, requiring the amendment or deletion of any or all of the materials.

This bill would make clarifying changes in those provisions.

This bill would make related technical changes.

Ch. 229 (SB 2072) Karnette. Vehicles: state highways: weight limits.

Existing law limits the gross weight of vehicles and loads permissible on state highways. Until January 1, 2003, existing law allows the Department of Transportation, upon adoption of conforming ordinances by the City of Long Beach and the City of Los Angeles, to issue special permits to the operators of vehicles that exceed these weight limits when the vehicles travel on defined sections of state highways located within those cities. The law sets forth specified criteria for obtaining these special permits.

This bill would extend indefinitely the operation of the provisions that allow the department to issue special permits for vehicles traveling on the defined state highway sections.

Ch. 230 (AB 2873) Frommer. Accounting.

Existing law establishes the California Board of Accountancy, in the Department of Consumer Affairs, for the purpose of licensing and regulating public accountants. In addition to other requirements, a licensee is required to issue a report conforming to professional standards upon completion of a compilation, review, or audit of financial statements.

This bill would require audit documentation, as defined, to contain sufficient documentation to enable a reviewer with relevant knowledge and experience, but having no previous connection with an auditing engagement, to understand the nature, timing, extent, and results of auditing or other procedures performed, evidence obtained, conclusions

reached, and the identity of the persons who performed and reviewed the work. The bill would create a presumption where the requirements are not met, which may be rebutted by a preponderance of the evidence, that the procedures were not applied, tests were not performed, information was not obtained, and relevant conclusions were not reached with regard to the portions of the audit not documented as required.

This bill would require audit documentation to be maintained for the longer of a 7-year period or a period sufficient to satisfy professional standards and comply with applicable laws and regulations. The bill would also require licensees to maintain a written audit documentation retention and destruction policy that sets forth the licensees' practices and procedures.

This bill would authorize the board to adopt certain regulations regarding audit documentation retention, including regulations establishing a different retention period for specific categories of audit documentation where warranted.

Existing law authorizes the board to revoke, suspend, or refuse to renew any permit or certificate, or to censure the holder of that permit or certificate, for unprofessional conduct.

The bill would make a violation of the audit documentation requirements unprofessional conduct subject to disciplinary action by the board.

#### Ch. 231 (AB 270) Correa. Professions: accountancy.

Existing law provides for the licensing and regulation of accountants by the State Board of Accountancy in the Department of Consumer Affairs. The provisions creating the board, specifying the board's composition, and authorizing the board to appoint an executive officer will become inoperative on July 1, 2006, and will be repealed on January 1, 2007.

This bill would change these dates, making the provisions inoperative on July 1, 2005, and repealing them on January 1, 2006. The bill would increase the number of members on the board from 11 to 15 by increasing the number of public members from 5 to 8 and the licensee members from 6 to 7. The bill would revise the qualification requirements for certain members of the board.

Existing law provides that each board or commission in the Department of Consumer Affairs facing a statutory repeal date has the burden of establishing a compelling need for its continuation to the Joint Legislative Sunset Review Committee. Existing law limits this review in the case of the Board of Accountancy.

This bill would expand that review regarding the Board of Accountancy to include consideration of reports and studies specified in the law regulating accountancy.

Existing law authorizes the board to conduct investigations or hearings relating to any matter involving the conduct of licensees. Existing law authorizes the board to appoint an administrative committee for the purpose of obtaining technical expertise. Existing law authorizes the board to vest this committee with the powers of the board for specified purposes.

This bill would delete the authority to vest the powers of the board in this committee.

Existing law authorizes the board, after notice and hearing, to revoke, suspend, or refuse to renew any permit or certificate, as specified, or to censure the holder of that permit or certificate for unprofessional conduct. Under existing law, unprofessional conduct includes a conviction for a crime substantially related to the qualifications, functions, and duties of a certified public accountant or public accountant, and dishonesty, fraud, or gross negligence in certain duties. Existing law requires, with respect to standards of professional conduct, a licensee to report to the board in writing, within 30 days of the time the licensee has knowledge of certain events concerning the licensee, including the conviction of a crime.

This bill would require a licensee to report other specified events concerning the licensee, including certain civil judgments and settlements, and would authorize the board to adopt regulations to further define certain reporting requirements. It would also require courts and specified insurers and surplus brokers to report certain events to the board. This bill would expand the definition of unprofessional conduct to include repeated negligence indicating

a lack of competency and would provide the board with subpoena power and the authority to proceed in an investigation or action in specified circumstances.

Existing law prohibits a person engaged in the practice of public accountancy from performing services for a client for a commission or from receiving a commission from a client when that person also performs specified services for that client.

This bill would include in that prohibition services for a commission for or receiving a commission from, an officer or director of a client or client-sponsored retirement plan.

Existing law provides that unlicensed persons can be minority owners of public accountancy firms, notwithstanding other laws providing for the issuance of permits to practice accountancy only to licensees, if specified requirements are met.

This bill would add the requirement that a licensed firm disclose the actual or potential involvement of nonlicensee owners in services provided.

Existing law requires an applicant for licensure as a certified public accountant to demonstrate experience in the attest function. A firm, other than a sole proprietor or a small firm, is required to meet specified peer review requirements in order to provide attest services and an individual applicant is required to meet specified criteria to sign reports on attest engagements. The board is required to adopt regulations implementing, interpreting, and making specific the peer review requirements.

This bill would require the board to report to the Legislature and the department by September 1, 2003, concerning the peer review program.

This bill would also require the board to report to the Legislature by September 1, 2003, on problems with respect to the policing and disciplining of accountants employed by a large public accounting firm.

Existing law appropriates all moneys in the Accountancy Fund to the board to carry out provisions of the law relating to accountancy.

This bill would make an appropriation because it authorizes the board to expend moneys in the fund for additional purposes.

This bill would incorporate additional changes to Section 5100 of the Business and Professions Code to take effect if this bill and AB 2873 are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

#### Ch. 232 (AB 2970) Wayne. Accounting: audits.

Existing law establishes the California Board of Accountancy, in the Department of Consumer Affairs, for the purpose of licensing and regulating public accountants. In addition to other requirements, a licensee is required to issue a report conforming to professional standards upon completion of a compilation, review, or audit of financial statements.

This bill would prohibit a licensee from accepting employment with a publicly traded corporation or its affiliate within 12 months of the date of issuance of a financial statement where the licensee had a specified level of participation in the audit engagement and the employment would permit the licensee to exercise significant authority over accounting or financial reporting.

#### Ch. 233 (AB 1797) Harman. Conflicts of interest: disqualification.

Existing provisions of the Political Reform Act of 1974 prohibit a public official at any level of state or local government from making, participating in making, or attempting to use his or her official position to influence a governmental decision in which he or she knows or has reason to know that he or she has a financial interest, as defined. Existing law also requires specified elected and appointed officers at the state and local level of government to disclose specified financial interests by filing periodic statements of economic interests.

This bill would require a public official who holds a specified office and who has a financial interest in a decision within the meaning of the Political Reform Act of 1974 to publicly identify the financial interest giving rise to the conflict of interest or potential conflict of interest, recuse himself or herself from discussing and voting on the matter, and

leave the room until after the discussion, vote, and other disposition of the matter is concluded, except as specified.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a  $\frac{2}{3}$  vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the Political Reform Act of 1974, would therefore require a  $\frac{2}{3}$  vote.

#### Ch. 234 (AB 1803) Harman. Horse racing.

The existing Horse Racing Law regulates the various forms of horse racing authorized in this state. Under that existing law, a barrel race is defined as a horse race around a course with 3 barrels placed in a triangular pattern which conforms to the requirements of the Women's Professional Rodeo Association, a show jumping race is defined as a horse race, over obstacles made of artificial or natural material, which is shorter than a steeplechase course, and is run by horses for time with faults converted to time and which conforms to the requirements and rules of the American Horse Shows Association, and a steeplechase race is defined as horse racing over obstacles made of natural or artificial material and includes both hurdle and timber races which conform to rules of the National Steeplechase and Hunt Association.

This bill would make the compliance of these types of races with the requirements of those rules of those associations voluntary.

Existing law establishes the California Horse Racing Board with jurisdiction and supervision over meetings in the state where horse races with wagering on their results are held or conducted. Existing law permits a license to be granted to a horse racing association only for one type of racing, such as thoroughbred or quarter horse racing. Notwithstanding that prohibition, existing law authorizes an association licensed to conduct quarter horse racing, or a fair to conduct races that include paint horses racing with quarter horses or Appaloosa horses in the same race.

This bill would authorize a quarter horse association to write a race for paint horses only to replace an Appaloosa or Arabian race without increasing the average number of races run per race day with the consent of the organization representing the quarter horse men and women.

This bill also would require any quarter horse racing association or fair conducting barrel racing, paint horse racing, show jump racing, or steeplechase racing to pay to the quarter horsemen's organization from the portion deducted for purses, a specified amount for purposes of representing the horsemen and horsewomen conducting these races.

#### Ch. 235 (AB 1913) Lowenthal. Coastal development.

(1) Existing law requires any person wishing to perform or undertake any development in the coastal zone to obtain a coastal development permit from the California Coastal Commission or from a local government.

This bill would authorize the executive director of the commission to cause a notification of intention to record a notice of a violation of the California Coastal Act of 1976 to be mailed if the executive director has determined, based on substantial evidence, that real property has been developed in violation of the act. The bill would require a public hearing to be held at the next regularly scheduled commission meeting if the owner submits a timely objection to the proposed filing of the notice of violation. The bill would require the issuance of a

clearance letter if the commission finds that no violation has occurred. If the commission determines, based on substantial evidence, that a violation has occurred, the bill would require the executive director to record a notice of violation, as specified, in the office of each county recorder where all or part of the property is located, thereby imposing a state-mandated local program.

The bill would require the executive director, within 30 days after the final resolution of a violation that is the subject of a recorded notice of violation, to record a notice of rescission in the office of each county recorder in which the notice of violation was filed, indicating that the notice of violation is no longer valid. The bill would also authorize the commission at any time and for cause, on its own initiative or at the request of the property owner, to cause a notice of rescission to be recorded invalidating the notice of violation.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 236 (AB 1950) Wright. State employment: probation.

Existing law provides that the State Personnel Board shall establish for each class of position in civil service the length of the probationary period. Existing law provides that the probationary period that shall be served by a state employee upon appointment shall be 6 months unless the board establishes a longer period of not more than one year. The board is authorized to provide by rule for increasing the length of an individual probationary period in the case of an employee's absence, as specified.

Existing law also provides that it is the policy of the state that qualified individuals with a disability shall be employed in the state service and that a department, agency, or commission shall make reasonable accommodation to the known physical or mental limitations of an otherwise qualified applicant or employee with a disability, as specified.

This bill would provide that, upon written agreement between an appointing power and an employee who alleges that he or she has a disability, as defined, and subject to approval of the agreement by the State Personnel Board, the employee's probationary period may be extended, for a period not to exceed 6 months, to allow the appointing power to provide a reasonable accommodation to the employee and the employee to demonstrate, before the probationary period ends, the ability to perform satisfactorily the essential functions of the position with reasonable accommodation.

Ch. 237 (AB 2082) Longville. Local government elections.

Existing law provides for the proponent of a county ballot measure or municipal ballot measure to seek a writ of mandate to change a ballot title or summary that is false, misleading, or inconsistent with the statutory standard.

This bill would allow any elector of the county or municipality, respectively, to seek such a writ of mandate.

Ch. 238 (AB 2133) Goldberg. Prisons: inmate visitation.

Existing law includes legislative findings and declarations indicating the importance of visitation to prisoners as an effective correctional technique that reduces recidivism, and provides for specified services for visitors to prisons. Existing law includes regulations governing the policy and practice of the Department of Corrections concerning prison visitation.

This bill would require that any amendments to existing regulations and any future regulations adopted by the Department of Corrections which may impact the visitation of inmates recognize and consider the value of inmate visitation as a means of increasing safety in prisons, maintaining family and community connections, and preparing inmates for successful release and rehabilitation.

Ch. 239 (AB 2148) Chu. State highways: contracts.

(1) Existing law authorizes the Department of Transportation to enter into contracts for the leasing or renting of tools or equipment for state highway purposes.

This bill would authorize the department to enter into major damage mitigation contracts for specific services regarding major damage repairs and operations on state highways.

(2) Existing law provides that certain contracts for the removal of structures and the leasing or renting of equipment for state highway purposes are exempt from the State Contract Act.

This bill would additionally exempt major damage mitigation contracts for the performance of specific services regarding major damage repairs and operations from the State Contract Act.

Ch. 240 (AB 2203) Florez. Penal institutions: confidentiality of personnel information.

Existing law provides for penal institutions and for the personnel employed by those penal institutions.

This bill would require the Director of Corrections to ensure that documents, computers, or computer accessible media containing personal information, as defined, relating to an employee of the Department of Corrections are not removed from any state prison without proper authorization. The bill would prohibit the knowing removal of employee personal information, without proper authorization, and would require notice to be given if removed personal information is lost or stolen, or can no longer be accounted for. The bill would state the intent of the Legislature that these provisions not interfere with various Whistleblower Protection provisions, the authority of the Office of the Inspector General, or the authority of the State Auditor.

Ch. 241 (AB 2276) Dutra. Vehicles: hazardous materials: emergency materials.

Existing California law requires any vehicle transporting hazardous materials to display placards in the manner prescribed by federal regulations applicable to commercial transportation.

This bill would exempt authorized emergency vehicles operated by peace officers from the state placarding requirement in certain circumstances.

The bill would declare that it is to take effect immediately, as an urgency statute.

Ch. 242 (AB 2472) Simitian. Pesticides.

Existing law generally regulates the use of pesticides. Existing law, the Healthy Schools Act of 2000, provides that it is the policy of the state that effective least toxic pest management practices should be the preferred method of managing pests at schoolsites. Existing law requires the Department of Pesticide Regulation to promote and facilitate the voluntary adoption of integrated pest management programs, as defined, for all school districts that choose to do so.

This bill would state various findings and declarations of the Legislature relating to pesticide use in state buildings and lands and would state the intent of the Legislature to enact legislation to protect public and environmental health through the use of Integrated Pest Management techniques. This bill would define Integrated Pest Management and would require, upon receipt of appropriate grant funds, that the Department of General Services implement a demonstration project to study the use of Integrated Pest Management techniques at the State Capitol Park and its associated grounds, as specified. This bill would also require the Department of General Services to present a report to the Legislature on this demonstration project within 6 months of its implementation.

Ch. 243 (AB 2522) Dutra. California Highway Patrol: transportation system.

Existing law creates the Office of Emergency Services within the Governor's office that, among other matters, coordinates the activities of state agencies in responding to an emergency.

This bill would make various findings relating to the effect of the terrorist attacks of September 11, 2001, on the United States. The bill would require the California Highway Patrol, in cooperation with the Office of Emergency Services and other specified federal, state, and local agencies, to perform a risk assessment of the state's transportation system and to submit a confidential report of its findings to the Governor and the Legislature's leadership prior to January 1, 2003.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 244 (AB 2524) Goldberg. Civil rights: appeals.

Existing law sets forth various civil rights and provides a cause of action for a violation of those rights, as specified.

This bill would provide that if a violation of any of these specified civil rights is alleged or the application or construction thereof is in issue in any proceeding in the Supreme Court of California, a state court of appeal, or the appellate division of a superior court, each party shall serve a copy of the party's brief or petition and brief, on the State Solicitor General at the Office of the Attorney General. Under the bill, no brief in these matters may be accepted for filing unless the proof of service shows service on the State Solicitor General. However, any party failing to comply with this requirement must be given a reasonable opportunity to cure the failure before the court imposes any sanction and, in that instance, the court must allow the Attorney General reasonable time to file a brief in the matter.

Ch. 245 (AB 2800) Chan. California Children and Families Commission: duties.

(1) The California Children and Families Act of 1998 requires that the California Children and Families Program, established by the act, be funded by certain surtaxes imposed on the sale and distribution of cigarettes and tobacco products and deposited into the California Children and Families Trust Fund, and that the fund be used for the implementation of comprehensive early childhood development and smoking prevention programs. Existing law establishes a state commission, the California Children and Families Commission, with specified powers and duties, including the authority to enter into any contracts as necessary or appropriate to carry out the provisions and purposes of the act.

This bill would authorize the state commission to expend money allocated to it under the act to ensure that children are ready to enter school. This bill would also authorize the state commission to allocate funds to county commissions established pursuant to the act as necessary or appropriate to carry out the provisions and purposes of the act.

(2) An initiative measure, the act provides that it may be amended only by a vote of  $\frac{2}{3}$  of the membership of both houses of the Legislature and that all amendments to the act shall be to further the act and must be consistent with its purposes.

This bill, in conformance with those requirements, would declare that its provisions further the act and are consistent with its purposes.

Ch. 246 (AB 2801) Chavez. Alcoholic beverages: licenses: distilled spirits.

Existing law authorizes the Department of Alcoholic Beverage Control to issue temporary permits to transferees of licenses to operate premises during the pendency of the transfer process.

Existing law requires that purchases of beer and wine by the holder of a temporary permit be made before or at the time of delivery in currency or by check, but modifies this requirement to specify a certified check for purchases of distilled spirits.

This bill would allow purchases of distilled spirits by the holder of a temporary permit to be made in the same manner as purchases by that permit holder of beer and wine.

Existing law permits the Department of Alcoholic Beverage Control to issue a special on-sale beer and wine license to a nonprofit symphony association meeting specified criteria.

This bill would also permit the issuance of an on-sale distilled spirits license to a symphony association meeting the same criteria.

Ch. 247 (AB 2949) Wayne. Small claims court: jurisdiction.

Existing law sets forth the actions in which a small claims court has jurisdiction.

This bill would provide that an agreement entered into or renewed on or after January 1, 2003, establishing a forum outside of California for an action arising from an offer or provision of goods, services, property, or extensions of credit primarily for personal, family, or household purposes that is otherwise within the jurisdiction of a small claims court of this state is contrary to public policy and is void and unenforceable.

Ch. 248 (SB 246) Brulte. State highways: Route 66 relinquishment.

Existing law requires the California Transportation Commission to relinquish to any city or county any portion of any state highway within the city or county that has been deleted from the state highway system by legislative enactment.

This bill would authorize the commission to relinquish to the City of Rancho Cucamonga a specified portion of State Highway Route 66, upon terms and conditions the commission finds to be in the best interests of the state.

This bill would incorporate additional changes to Section 366 of the Streets and Highways Code made by SB 857 to be operative if this bill and SB 857 are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 249 (SB 580) Figueroa. Crime prevention: reporting crimes.

Existing law requires any health practitioner employed in a health facility or clinic or physician's office who, in his or her professional capacity or within the scope of his or her employment, has knowledge of or observes a patient who he or she knows or reasonably suspects has suffered from any wound or injury inflicted by his or her own act or any wound or physical injury inflicted on the person as the result of assaultive or abusive conduct to report to a law enforcement agency, as specified.

This bill would require that, within one year from its enactment, a standard state form for reporting crimes pursuant to this provision be developed and adopted by the Office of Criminal Justice Planning, as specified. The bill would make a conforming change and would provide for the repeal of provisions governing the adoption of the form on January 1, 2004.

This bill would make a declaration of legislative intent.

The bill would furthermore provide, in order to better protect victims of child physical abuse or neglect and improve the investigation and prosecution of cases of child physical abuse or neglect, that, on or before January 1, 2004, the Office of Criminal Justice Planning, in cooperation with specified agencies, organizations, and other appropriate experts, shall establish medical forensic forms, instructions, and examination protocols for the victims of child physical abuse or neglect, as specified.

Ch. 250 (SB 803) Committee on Elections and Reapportionment. Recall elections: City of South Gate.

Existing law provides the procedure for the recall of local government officers pursuant to a petition that is circulated for signatures and submitted by the proponents of the recall. It requires that when the city or county elections official is the officer sought to be recalled, the elections official's duties in connection with the recall process be performed by some other person designated by the applicable governing board.

This bill would state legislative findings that there exists a need for an experienced, objective, impartial, and professional entity to conduct any recall or special election that is held in the City of South Gate in the County of Los Angeles during calendar years 2002 and

2003, and would state the intent of the Legislature in connection with this bill. It would require any recall or special election held in the City of South Gate during the 2002 and 2003 calendar years to be administered by the Los Angeles County Registrar-Recorder, subject to approval by the Los Angeles County Board of Supervisors.

This bill would require the City of South Gate, consistent with a specified provision of state law, to pay the County of Los Angeles from the city treasury for any expenses authorized and necessarily incurred in conducting any recall or special election held in the City of South Gate pursuant to this bill. It would provide a procedure under which the Controller would reallocate to the county amounts otherwise scheduled for distribution to the city from unrestricted funds or moneys, as specified.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique circumstances pertaining to the City of South Gate that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 251 (SB 857) Soto. State highways: Route 66 relinquishment.

Existing law requires the California Transportation Commission to relinquish to any city or county any portion of any state highway within the city or county that has been deleted from the state highway system by legislative enactment.

This bill would authorize the commission to relinquish to the City of Fontana a specified portion of State Highway Route 66, upon terms and conditions the commission finds to be in the best interests of the state.

This bill would incorporate additional changes to Section 366 of the Streets and Highways Code made by SB 246 to be operative if this bill and SB 246 are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 252 (SB 1214) Romero. California State University: auxiliary organizations.

Existing law establishes the California State University and its various campuses under the administration of the Trustees of the California State University.

Existing law authorizes the California State University to establish auxiliary organizations, which are defined to include, among other entities, any entity in which any official of the California State University participates as a director as part of his or her official position; student body organizations; and any entity operating a commercial service for the benefit of a campus of the California State University on a campus or other property of the California State University. Existing law requires each auxiliary organization, other than a student body organization, to have a board of directors composed, both as to size and categories of membership, in accordance with regulations established by the trustees.

This bill would require that, if in any fiscal year, a majority of the funding of the auxiliary organization is received from student fees collected on a campus or systemwide, at least a majority of the board of directors of that auxiliary shall consist of California State University students with full voting privileges on that board. This provision would only be applicable to effectuate a change in the membership of a board of directors of an auxiliary organization if the trustees determine that there is no legal or contractual barrier to changing the governing structure of that organization.

Ch. 253 (SB 1253) Figueroa. Pupils: signaling devices.

Existing law prohibits a school from permitting the possession or use of any electronic signaling device that operates through the transmission or receipt of radio waves by pupils of the school while the pupils are on campus, attending school-sponsored activities, or while

under the supervision and control of school district employees, without the prior consent of the principal or his or her designee.

This bill would, instead, authorize school district governing boards to regulate the use of electronic signaling devices and would preclude prohibiting a pupil from using an electronic signaling device if it is determined to be essential for the health of the pupil, as prescribed.

Ch. 254 (SB 1254) Alpert. Identity theft.

Existing law provides that every person who willfully obtains personal identifying information about another person, as defined, and uses that information for any unlawful purpose is guilty of a crime punishable by imprisonment in a county jail not to exceed one year, or a fine not to exceed \$1,000, or both, or by imprisonment in the state prison, or a fine not to exceed \$10,000, or both.

This bill would expand the definition of “personal identifying information” to include other identification numbers and other specified information.

By expanding the scope of an existing crime, this bill imposes a state-mandated local program.

This bill would also provide that every person who, with the intent to defraud, acquires, transfers, or retains possession of the personal identifying information, as defined, of another person, is guilty of a crime punishable by imprisonment in the county jail not exceeding a year, a fine not exceeding \$1,000, or by both that imprisonment and fine.

By creating a new crime, this bill would impose a state-mandated local program.

Existing law provides that if a person discovers that an unauthorized person has applied for certain services or opened certain accounts, the person is entitled to receive the identifying information that was used by the unauthorized person to apply for or open the account or service upon presentation of a copy of a police report and identifying information.

This bill would add applications and accounts regarding commercial mobile radio services, as defined, to the applications and accounts covered by these provisions. It would require that a request for identifying information be made in writing when made to a telephone or telegraph corporation, as specified.

The bill would require the person or entity with which the application was filed or the account opened to provide the information and copies of all forms, without charge, within 10 business days.

The bill would also require the person or entity with which the application was filed or the account opened to provide the information and copies to a law enforcement officer specified by the person in whose name the application was filed or the account opened. It would allow the person or entity to require a signed and dated statement, as specified, from the requesting person.

This bill would also make clarifying changes to these provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 255 (SB 1311) Kuehl. Commercial mobile radio service: public safety agencies.

Existing law requires a provider of commercial mobile radio service, as defined, to provide access for end users of that service to the local emergency telephone systems described in the Warren-911-Emergency Assistance Act.

This bill would authorize a provider of commercial mobile radio service to enter into a contract with a public safety agency, as defined, to give the transmissions of public safety agency end users of that service priority over the transmissions of other persons or entities. The bill would require that the contract comply with applicable federal law.

Ch. 256 (SB 1324) Ortiz. Medical evidentiary examinations.

Existing law provides for the establishment of 2 hospital-based training centers to train medical personnel on how to perform medical evidentiary examinations of victims of child abuse and neglect, sexual assault, elder abuse, or domestic violence. Existing law also specifies the characteristics and responsibilities of the centers.

This bill would instead provide for the establishment of one hospital-based training center to train medical personnel, as defined, on how to perform medical evidentiary examinations for victims of child abuse or neglect, sexual assault, domestic violence, elder abuse, and abuse or assault perpetrated against persons with disabilities. The bill would also specify that the training provided by the training center shall be made available to medical personnel, law enforcement, and the courts throughout the state. The bill would make additional changes to the provisions specifying the responsibilities of the center. The bill would further provide that nothing in its provisions shall be construed to change the scope of practice for any health care provider, as defined, in other provisions of law.

Ch. 257 (SB 1436) Oller. Republican county central committees: Sacramento County; Santa Clara County.

(1) Existing law requires that candidates for Republican county central committee appear on the local ballot and specifies the manner of their election. It requires that in a county containing less than 5 Assembly districts, a committee be elected by supervisor districts, in accordance with a specified formula. It further requires that in a county containing more than 4 and less than 20 Assembly districts, a committee be elected from Assembly districts and consist of 6 members from each district.

This bill would impose a state-mandated local program by requiring that, notwithstanding the above, a committee of not less than 31 members be elected in Sacramento County and a committee of not less than 23 members be elected in Santa Clara County. The bill would require members to be elected by supervisor district, and would require that the number to be elected from any supervisor district be determined in accordance with a specified formula.

(2) Existing law requires removal of a Republican county central committee member who misses four regularly called meetings within one 12-month period, except where the absence is caused by illness or temporary absence from the county.

This bill would authorize a committee in its sole discretion and in accordance with its bylaws to remove a member who misses four or more regularly called meetings within one 12-month period, regardless of the reason for the absences.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 258 (SB 1445) Alpert. Income and corporation taxes: settlements.

Existing income and corporation tax laws provide that the executive officer and chief counsel, jointly, of the Franchise Tax Board may approve a settlement of any civil tax matter in a dispute involving a reduction of tax and penalties that does not exceed \$5,000.

This bill would increase that amount each year in accordance with an inflation adjustment formula, provide that a settlement may include certain matters, provide that a settlement does not preclude certain assessments or refunds, and provide that a settlement approved by the board, itself, shall be final and conclusive, as provided.

Ch. 259 (SB 1508) Scott. Santa Monica Mountains Conservancy: ex officio members.

Existing law establishes the Santa Monica Mountains Conservancy and provides that the conservancy is composed of 9 voting members and 2 ex officio nonvoting members.

This bill would increase to 3 the number of ex officio nonvoting members of the conservancy, and would additionally include the Supervisor of the Angeles National Forest among those members.

Ch. 260 (SB 1512) Scott. Parental custody and control.

(1) Existing law requires, in a proceeding to terminate the parental rights of a father in order to place a child for adoption, that notice of the proceeding be given to every person identified as the natural father or a possible natural father, except as specified.

This bill would require that notice to be provided at least 10 days before the time stated in the notice for the appearance.

(2) Existing law provides that an order requiring or dispensing with a father's consent for the adoption of a child may be appealed from in the same manner as an order of the juvenile court declaring a person to be a ward of the juvenile court.

This bill would instead provide that an order requiring or dispensing with a father's consent for the adoption of a child is conclusive and binding upon the father. The bill would also provide that nothing in that provision limits the right to appeal from that order and judgment.

(3) Existing law provides that specified provisions relating to matters to be considered in awarding custody of a child do not apply in a proceeding to declare a minor free from parental custody and control.

This bill would additionally provide that specified provisions governing child custody, support orders, and the prevention of domestic violence shall be stayed pending final determination of proceedings to declare a minor free from parental custody and control.

(4) Existing law authorizes any interested person to file a petition for an order or judgment declaring a child free from the custody and control of either or both parents. Upon the filing of that petition, the clerk of the court is required to immediately notify one of the persons on a list of specified professionals. The person who is notified by the clerk is required to immediately conduct an investigation for the circumstances of the child, as specified. That person is required to submit a written report of the investigation and a recommendation to the court of the proper disposition to be made in the proceeding in the best interest of the child.

This bill would include licensed clinical social workers and licensed marriage and family therapists to the list of specified professionals who may be notified by the clerk and may be required to conduct the investigation and submit a report and recommendation to the court as described above.

(5) Existing law, the Interstate Compact on the Placement of Children, governs the conditions for placing children in facilities located outside this state. Existing law requires the sending agency to retain jurisdiction over the child who is being placed.

This bill would enact a separate provision defining the term "jurisdiction" for purposes of these provisions, as specified.

(6) Existing law governs proceedings for the adoption of an unmarried minor in this state.

This bill would enact provisions governing the jurisdiction of a court of this state in adoption proceedings in cases where another state may have jurisdiction in the matter. These provisions would also apply to interstate adoptions if the prospective adoptive parents reside outside the state and AB 746 of the 2001–02 Regular Session is enacted. The bill would also set forth guidelines for determining venue if a petition for adoption of a minor is filed.

Ch. 261 (SB 1518) Torlakson. Recycled water.

(1) Existing law requires a sanitary district that includes any part of a city, water district, or other local agency that provides water service to any territory in the district to obtain the consent of that city, water district, or other local agency prior to supplying water service to that territory.

This bill would provide that this requirement does not apply to the provision of recycled water by a sanitary district. The bill, except as otherwise provided, would prohibit a sanitary district from supplying water service using recycled water to the territory of any part of a city, water district, or other local public entity providing water service, or from commencing construction of facilities for that service, prior to offering to consult with that entity and providing notification of availability for consultation.

(2) Existing law requires every urban water supplier to prepare and periodically update an urban water management plan for submission to the Department of Water Resources. Existing law requires the supplier to describe in the plan the projected use of recycled water within the supplier's service area at the end of 5, 10, 15, and 20 years.

This bill would require the supplier to include in the plan a description of the actual use of recycled water in comparison to previously projected uses, and a description of the quantity of treated wastewater that meets recycled water standards, is being discharged, and is otherwise available for use in a recycled water project.

Ch. 262 (SB 1529) Johnson. Conflicts of interest: special commissions.

Existing law establishes various programs to provide health care services to persons with limited incomes and meeting various eligibility requirements. These programs include the Healthy Families Program administered by the Managed Risk Medical Insurance Board and the Medi-Cal program administered by the State Department of Health Services.

Existing law authorizes counties, pursuant to ordinance, to establish a special commission in order to meet the problems of the delivery of publicly assisted medical care and to negotiate a contract to provide or arrange for the provision of health care services, as specified.

Existing law contains prohibitions against public officers being financially interested in any contract made by them in their official capacity or by any body or board of which they are members.

Existing law specifies that a member of a commission or advisory committee to the commission established pursuant to the authority described above shall not be deemed to be interested in a contract entered into by the commission if specified conditions apply, one of which conditions is that the contract contain substantially the same terms and conditions as contracts entered into with other individuals or organizations that the member was appointed to represent.

This bill would add an additional condition under which a member of a commission or advisory committee described above shall not be deemed to be interested in a contract entered into by the commission, to provide that if the contract does not contain substantially the same terms and conditions as contracts entered into with other individuals or organizations that the member was appointed to represent, the member shall recuse himself or herself from making, participating in making, or in any way attempting to use his or her official position to influence the making of, a decision on the contract.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 263 (SB 1558) Figueroa. Dangerous drug or dangerous device samples.

Existing law, the Pharmacy Law, prohibits a manufacturer's sales representative from distributing a complimentary dangerous drug or dangerous device sample without the written request of a physician and surgeon or other specified healing arts practitioner. Under existing law, a certified nurse-midwife, a nurse practitioner, or a physician assistant may sign for the delivery or receipt of a sample requested by the supervising physician and surgeon.

This bill would additionally authorize a certified nurse-midwife, a nurse practitioner, and a physician assistant to sign for the request and receipt of complimentary samples that have

been identified in the standardized procedure, protocol, or practice agreement that has been approved by a physician.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 264 (SB 1620) Knight. Conflict of interest.

Existing provisions of the Political Reform Act of 1974 require a member of any of specified state commissions to file, within 30 days of assuming office, a statement disclosing his or her investments, interests in real property held on the date of assuming office, and income received during the 12 months before assuming office. A person who is subject to confirmation by the Commission on Judicial Appointments or the State Senate is required to file that statement within 10 days after appointment or nomination, and thereafter annually, and upon leaving office, as specified.

This bill would additionally require a member of a board or commission of a newly created agency to file statements of economic interests according to these requirements until the agency adopts an approved conflict-of-interest code.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a  $\frac{2}{3}$  vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the Political Reform Act of 1974, would therefore require a  $\frac{2}{3}$  vote.

Ch. 265 (SB 1627) Kuehl. Protective orders.

Existing law requires the clerk of a court to notify the Department of Justice, by electronic transmission, of the service of a protective order immediately upon receipt of proof of service. Existing law requires the Department of Justice to maintain a Domestic Violence Restraining Order System and to make available to court clerks and law enforcement personnel all information regarding the protective and restraining orders and injunctions.

This bill would revise those provisions to require a law enforcement officer who serves a protective order to submit the proof of service directly into the Domestic Violence Restraining Order System within one business day, as specified. If the person who served the protective order is not a law enforcement officer, and the court is unable to submit the proof of service directly into the Domestic Violence Restraining Order System, the bill would further require the court to transmit a copy of the proof of service to a local law enforcement agency within one business day of receipt, as specified. The bill would require the local law enforcement agency to submit the proof of service directly into the Domestic Violence Restraining Order System and would make related changes.

By imposing additional duties on local law enforcement agencies, the bill would create a state-mandated local program.

Existing law requires the Judicial Council to assist local courts charged with issuing protective orders by developing informational packets describing the general procedures for obtaining a domestic violence restraining order.

This bill also would require the Judicial Council to include in those packets information on how to return proofs of service, including mailing addresses and fax numbers.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for

making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 266 (SB 1632) Perata. Pupils: sun protection.

Existing law authorizes any school district to adopt or rescind a reasonable dress code policy, as specified. Existing law requires every schoolsite to allow for outdoor use during the schoolday, articles of sun-protective clothing that pupils would be allowed to wear outdoors, including, but not limited to, hats, and authorizes schoolsites to set a policy related to that clothing.

This bill would, in addition, require every schoolsite to allow pupils to use sunscreen during the schoolday without a physician's note or prescription and authorize schoolsites to set a policy related to the use of sunscreen.

Ch. 267 (SB 1711) Costa. Land use: water and electrical energy facilities.

(1) Existing law prohibits the application of the building ordinances and zoning ordinances of a county or city to the location or construction of specified water and electrical energy facilities.

This bill would make technical changes to these provisions.

(2) Existing law authorizes the governing board of a local agency to render a city or county zoning ordinance inapplicable to a proposed use of property if the local agency at a noticed public hearing determines by resolution that there is no feasible alternative to its proposal, except when the proposed use of the property by the local agency is for facilities not related to storage or transmission of water or electrical energy.

This bill would make technical changes to these provisions.

Ch. 268 (SB 2035) Karnette. Horse racing.

Under existing law, the California Horse Racing Board is authorized to permit a harness or quarter horse association conducting a race meeting to accept wagers on the results of out-of-state, out-of-country, and sometimes other harness or quarter horse races, if specified conditions are met. One of these conditions is that the association imports no more than 6 races on live racing days. Another is that, subject to specified conditions and limitations, if only one breed is being raced on a given live racing day, the live racing association may import additional races that would otherwise be simulcast by the association which is not racing.

This bill would allow an association permitted to import up to 6 races pursuant to the applicable provision above, if it imports fewer than the 6 races authorized for a given night, to later import races equal in number to those foregone, provided that no more than 2 races could be reserved or added on a single night of racing. This bill would provide that the total number of races imported under these provisions by an association in a calendar year may not exceed the total number of imported races authorized by the formulas in existing law.

Ch. 269 (SB 2085) Committee on Revenue and Taxation. Property taxation.

Existing property tax law provides that a delinquent penalty does not attach to taxes as a result of a public agency acquisition, unless the delinquent penalty was on the property at the time of acquisition.

This bill would remove this condition on the attachment of a delinquent penalty.

Existing property tax law generally authorizes a county tax collector to sell tax-defaulted property 5 years or more after that property has become tax defaulted, and also authorizes a public agency, as provided, or a nonprofit organization, making certain written statements regarding the rehabilitation and use of property for low-income persons, to file a written

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

objection to a proposed sale of tax-defaulted property. Existing law imposes various conditions on a nonprofit organization that objects to the sale of the tax-defaulted property, one of which is that the nonprofit organization obtain a certificate of consistency with a consolidated plan approved by the Department of Housing and Community Development.

This bill would remove that condition.

Ch. 270 (AB 1937) Dutra. Transportation.

Existing law authorizes specified transportation entities to enter into agreements for the joint use or joint development of property or rights.

This bill would authorize any transit operator, as defined, to enter into agreements with a public agency, public utility, or person or entity, to be performed within the district or a transportation corridor or land that will be acquired by the transit operator, for the joint use or joint development of property or rights. The bill would provide that its provisions shall not supersede any existing authority of a transit operator for joint development.

Ch. 271 (AB 1979) Steinberg. Independent Living Program.

Existing federal law establishes the Independent Living Program for foster youth to be administered by counties with federal and state funds.

Existing law requires, on or before July 1, 2000, the State Department of Social Services, in consultation with county and state representatives, foster youth, and advocates, to develop statewide guidelines for the implementation of the federal Independent Living Program, and define the outcomes for the program and the characteristics of foster youth enrolled in the program for data collection purposes.

This bill would require the department to develop and adopt emergency regulations, in consultation with specified stakeholders, that counties shall be required to meet when administering the Independent Living Program and that are achievable within existing funding resources.

Ch. 272 (AB 1989) Liu. Care facilities: change in health status: violations: notice.

Existing law provides for the licensure and regulation by the State Department of Health Services of health facilities, including skilled nursing facilities, intermediate care facilities, and congregate living health facilities. Existing law also provides for the licensure and regulation of residential care facilities for the elderly by the State Department of Social Services.

This bill would require a skilled nursing facility, intermediate care facility, congregate living health facility, or residential care facility for the elderly to make reasonable efforts to contact the person named in the resident's admission agreement as the resident's contact person, or the resident's responsible person, within 24 hours after a significant change in the resident's health or mental status.

Ch. 273 (AB 2064) Cedillo. Human immunodeficiency virus tests: counselors: training.

Existing law makes provisions for various programs relating to treatment of persons with the human immunodeficiency virus (HIV) and the acquired immune deficiency syndrome (AIDS).

This bill would require the State Department of Health Services to authorize the establishment of training programs for counselors for publicly funded HIV testing programs, by specified community-based, nonprofit organizations. The bill would require the participating community-based organizations to follow curriculum content and design for these training programs that is approved by the department. This bill would provide that costs associated with training programs administered pursuant to the bill shall be absorbed by participating community-based organizations, and that the bill shall not be construed to require or prohibit the funding of any training program administered pursuant to the bill by

the department, or by any local government currently administering a training program for HIV counselors.

Ch. 274 (AB 2143) Matthews. Health: cancer programs.

Existing law provides for the federal medicaid program, administered by each state, California's version of which is the Medi-Cal program. The Medi-Cal program, which is administered by the State Department of Health Services, provides qualified low-income persons with health care services. Existing law specifies various requirements applicable to fiscal intermediary services utilized by the department to process Medi-Cal claims received from providers and billing agents.

Existing law provides for various cancer screening and detection programs that are administered by the department, including the Breast and Cervical Cancer Treatment Program. In implementing this program, the department is authorized to contract with public and private entities, or utilize existing health care service provider enrollment and payment mechanisms, including the Medi-Cal program's fiscal intermediary. However, existing law requires that the Medi-Cal program's fiscal intermediary only be utilized if services provided under the program are specifically identified and reimbursed in a manner that does not claim federal financial reimbursement.

This bill would grant similar authority to contract to the department in implementing other designated cancer screening and detection programs.

Ch. 275 (AB 2195) Corbett. Workplace protections.

Existing law provides protections to victims of domestic violence and prohibits employers from taking adverse employment action against victims of domestic violence who take time off from work to attend to issues arising as result of the domestic violence, as long as the employee complies with certain conditions. Existing law provides that employers who violate these provisions are guilty of a misdemeanor.

This bill, by extending those provisions to victims of sexual assault, as defined, would impose a state-mandated local program.

This bill would also make technical, nonsubstantive changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 276 (AB 2551) Nation. Health care: mental health.

Existing law provides for regulation of health care service plans by the Department of Managed Health Care. Existing law requires, on or before July 1, 2002, when the enrollee's employer has changed health plans, a health care service plan or a specialized health care service plan that offers professional mental health services to file a written policy with the Department of Managed Health Care describing how the health plan would facilitate continuity of care for new enrollees who have been receiving services for acute, serious, or chronic conditions from a nonparticipating psychiatrist, licensed psychologist, licensed marriage and family therapist, or licensed clinical social worker. Existing law requires that the health plan allow each new enrollee to continue his or her course of treatment with a nonparticipating provider for a reasonable transition period while transferring to another participating provider in order to effectuate a safe transfer. A willful violation of provisions governing health care service plans is a crime.

This bill would provide that for purposes of continuing treatment of the transferring enrollee, the health care service plan may require the nonparticipating mental health provider to enter into a standard mental health provider contract. The bill would make conforming changes.

Existing law provides for the regulation of policies of disability insurance administered by the Insurance Commissioner. Existing law requires, by July 1, 2002, a disability insurer that provides coverage for hospital, medical, and surgical benefits with providers charging alternative rates, and that provides specified mental health services, to file a written policy with the commissioner that describes how the insurer shall facilitate continuity of care for insureds who have been receiving services for acute, serious, or chronic conditions from nonparticipating mental health providers. Existing law provides that a disability insurer is not required to accept a noncontracting service provider onto its network and would not require an insurer to provide services not otherwise covered.

This bill would provide that for purposes of continuing treatment of a transferring enrollee, the disability insurer may require the nonparticipating mental health provider to enter into a standard mental health provider contract. The bill would make conforming changes.

Because a willful violation of the bill's requirements with respect to health care service plans would be a crime, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 277 (AB 2582) Chu. Paratransit vehicles: high-occupancy vehicle lanes.

Existing law authorizes local authorities and the Department of Transportation to establish exclusive and preferential use of highway lanes for high-occupancy vehicles.

This bill would authorize the operation of a paratransit vehicle upon those highway lanes unless specifically prohibited by a traffic control device, as specified.

Ch. 278 (SB 222) Torlakson. State employees.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding may not become effective unless approved by the Legislature in the annual Budget Act. Existing law also provides that if a memorandum of understanding has expired, a new memorandum has not been agreed to, and the parties have not reached an impasse, the expired memorandum of understanding shall continue in effect.

This bill would approve provisions that require the expenditure of funds of specified tentative agreements entered into between the state employer and State Bargaining Unit 9.

(2) Existing law prescribes contribution rates for state employees who are state miscellaneous and state safety members of the Public Employees' Retirement System.

This bill would reduce the contribution rates, as specified, for state miscellaneous and state safety members in State Bargaining Unit 9 until June 30, 2003.

(3) Existing provisions of the Budget Act of 2001 appropriate specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for the augmentation of state employee compensation.

This bill would appropriate an additional \$4,643,000, as scheduled, from those funds in augmentation of specified items of the Budget Act of 2001, for state employee compensation.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 279 (SB 500) Torlakson. Retail merchandise, utilities, and cable television: delivery, service, and repair: times.

(1) Existing law requires a retailer with 25 or more employees selling merchandise to consumers, where that merchandise will be delivered to the consumer at a later date, to specify either at the time of the sale or at a later date prior to the delivery date, a 4-hour period

within which delivery will be made if the consumer's presence is required. Existing law sets forth similar requirements for these retailers, with regard to the service and repair of merchandise. Existing law provides a cause of action in small claims court, for actual damages not to exceed \$500, against a retailer for failure to comply with these requirements, except for delays caused by unforeseen or unavoidable occurrences beyond the control of the retailer, when the retailer made a diligent attempt to notify the consumer of its inability to deliver, service, or repair the merchandise, or when the consumer was not present during the specified time period.

This bill would require retailers and consumers to agree to the 4-hour period within which the delivery, service, or repair will take place. The bill would increase the total amount of damages that a small claims court can award to an amount not to exceed \$600. The bill would prohibit an action when the retailer makes a diligent attempt to notify the consumer of its inability to deliver, service, or repair, either in person or by telephone, but would require that if notification is by telephone, the retailer or its agent leave a telephone number for a return telephone call, to enable the consumer to arrange a new 2-hour period for delivery, service, or repair with the retailer or the retailer's agent.

(2) Existing law requires that utilities and cable television companies inform subscribers of their right to service connection or repair within a 4-hour period, as specified, by offering the 4-hour period when the subscriber calls for service connection or repair, or by notifying their subscribers by mail three times a year of this service. Existing law further requires that when a subscriber contracts with utilities and cable television companies for a service connection or repair at a later date, and the parties agree that the presence of the subscriber is required, the utilities and cable television companies shall specify, prior to the date of service connection or repair, the time the 4-hour period for the service connection or repair begins, if the subscriber so requests. Existing law provides a cause of action in small claims court, for actual damages not to exceed \$500, against a cable television company or utility for failure to comply with these requirements, except for delays caused by unforeseen or unavoidable occurrences beyond the control of the cable television company or utility, when a diligent attempt was made to notify the subscriber of the inability of the cable television company or utility to deliver service connection or repair within the 4-hour period, or when the consumer was not present during the specified time period.

This bill would delete the option of cable television companies and utilities to notify subscribers by mail of their right to service connection or repair service within a 4-hour period. The bill would require cable television companies to agree with subscribers on the time for the commencement of the 4-hour period for the service connection or repair, where the parties have agreed that the presence of the subscriber is required, regardless of whether the subscriber makes a request. The bill would require utilities to agree with subscribers on the time for commencement of the 4-hour period for service connection or repair when the subscriber requests the appointment. The bill would provide that if a service connection by a utility is not commenced within the 4-hour period described above or as otherwise agreed to by the utility and the subscriber, then the utility may be liable, as specified. The bill would prohibit an action when the cable television company or utility makes a diligent attempt to notify the subscriber of its inability to make the service connection or repair within the 4-hour period agreed upon, either in person or by telephone, but would require that if notification is by telephone, the cable television company or utility leave a telephone number for a return telephone call, to enable the subscriber to arrange a new 2-hour period for the service connection or repair with the cable television company or utility. The bill would increase the total amount of damages that a small claims court can award to an amount not to exceed \$600.

Ch. 280 (SB 873) Torlakson. Transportation: San Francisco Bay area.

Existing law establishes the Metropolitan Transportation Commission as the local area transportation planning agency for the region comprised of the City and County of San

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Francisco and the Counties of Alameda, Contra Costa, Marin, Napa, San Mateo, Santa Clara, Solano, and Sonoma.

This bill would set forth the Regional Transit Expansion Program for the San Francisco Bay area as established by the commission.

Ch. 281 (SB 1267) Battin. Terrorist threats.

Existing law provides that it is a crime to maliciously send or place a facsimile bomb, or to make a false report of a bomb. AB 1838 and SB 1287 would make it a crime to send or place a false or facsimile of a weapon of mass destruction with the intent to cause another person to fear for his or her own safety.

This bill would provide that a person receiving a felony conviction for maliciously sending or placing a facsimile bomb, or making a false report of a bomb, or, if AB 1838 or SB 1287 is enacted and becomes effective on or before January 1, 2003, of sending or placing a false or facsimile of a weapon of mass destruction with the intent to cause another person to fear for his or her own safety, under circumstances in which the person knows the underlying report was false, is liable to specified entities for property damage and for the reasonable costs in personnel, equipment, and materials incurred to respond to and clean up after the threat, as provided.

Ch. 282 (SB 1340) Vincent. Horse racing.

Existing law defines "California-bred" horses based on the type of horse and whether the foal was conceived or born in this state.

This bill would provide that a "California-bred paint horse" is a registered paint horse foal conceived in California by a stallion standing in California at the time of conception, or by a registered paint horse stallion.

The Horse Racing Law provides that any association conducting a race meeting that includes quarter horse racing shall deposit specified percentages of the amount handled on that racing for distributions to the breeder fund, owner fund, stallion fund, and the official registering agency for the payment of breeder premiums, owners' awards, and stallion awards, as specified.

This bill would duplicate the deposit and distribution requirements of quarter horse racing awards for paint horse racing.

Existing law provides that any association conducting a fair racing meeting other than a harness meeting or conducting a mixed breed meeting shall deduct an additional 0.34 of 1% of the total amount handled in its daily conventional and exotic parimutuel pools for all races for payment of breeder and stallion awards, to be distributed following the close of the meeting according to specified statutory distribution requirements.

This bill would provide that with respect to paint horse races, the amounts deducted pursuant to these provisions shall be paid as breeder and owners' premiums, and stallion awards, as specified.

Ch. 283 (SB 1352) Chesbro. Napa County Flood Control and Water Conservation District.

(1) The Napa County Flood Control and Water Conservation District Act creates the Napa County Flood Control and Water Conservation District and grants to the district specified powers relating to flood control and water conservation. The act requires the board of the district to consist of 11 directors, of which 5 are members of the Napa County Board of Supervisors, 5 are mayors from certain cities, and one is a member of the Napa City Council, with prescribed voting powers. The act requires the board directors to serve without compensation.

This bill would provide for alternate directors to serve in the absence of a director. By requiring certain members of city councils to serve as alternate directors for the district, the bill would impose a state-mandated local program. The bill would provide that the approval

of an action of the board is determined by reference to the number of votes and not the number of directors voting. The bill would authorize the directors to be reimbursed for actual expenses incurred in the performance of duties undertaken to carry out the act.

(2) The act requires all ordinances and resolutions of the district, except as otherwise required by the act, to be adopted by the board in the same manner as ordinances and resolutions of Napa County. The act requires the budget of the district, except as otherwise provided, to be prepared and approved in the same manner as the county budget. The act requires certain county officers and employees to be ex officio officers and employees of the district. The act authorizes the board to appoint and employ agents, superintendents, engineers, attorneys, and other employees to carry out the act. The act authorizes the board to appoint certain officers, employees, and agents necessary for the governance of the board and provides that officers, agents, and employees so appointed or employed hold their positions at the pleasure of the board.

This bill would require all ordinances and resolutions of the district, except as otherwise required by the act or by resolution of the board, to be adopted by the board in the same manner as the ordinances and resolutions of the county. The bill would require the budget of the district, except as otherwise provided by resolution of the board, to be prepared and approved in the same manner as the county budget, except that at least 14 votes are required to approve or modify the district budget. The bill would include the county administrator or county executive officer and the clerk of the board of supervisors among those persons required to be ex officio officers or employees of the district, thereby imposing a state-mandated local program. The bill would authorize the board to employ property and purchasing agents and other agents and independent contractors determined by the board to be necessary to carry out the act. The bill would authorize the board to grant certain authority to any purchasing agent employed by the district. The bill would authorize the board, in accordance with the bylaws of the board, to appoint officers, employees, and agents determined to be necessary for its governance, and would provide that those persons hold their positions at the pleasure of the board, except when a specific term of office is prescribed in the bylaws of the board.

(3) The act authorizes the board to impose taxes, fees, and assessments for the purposes of carrying out the act. Article XIII A, Article XIII C, and Article XIII D of the California Constitution impose various restrictions of the authority of a special district to impose special taxes, fees, and assessments.

This bill would provide that the authority of the board to impose special taxes, fees, and assessments is subject to those constitutional provisions, as applicable, and would make various other changes with regard to that authority.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 284 (SB 1556) Dunn. Vehicles: ordinances: mobilehome parks.

Existing law applies the provisions of the Vehicle Code to streets and highways that are publicly maintained and open to the use of the public for purposes of vehicular travel, and to privately owned and maintained roads when requested by the owners and when authorized by an ordinance or resolution of a city or county, or city and county.

This bill would allow the provisions of the code to be applied to mobilehome parks and manufactured housing communities when requested by the owners and when authorized by an ordinance or resolution of a city or county, or city and county. It would require that a public hearing be held before enactment of the ordinance or resolution, and that notices of the hearing, as specified, be provided.

The bill would specify that the Department of the California Highway Patrol would not be required to provide patrol or enforce any provision of the code within a mobilehome park or manufactured housing community.

Ch. 285 (SB 1576) Bowen. Landlords: disclosure of demolitions.

Existing law requires that a landlord of a residential dwelling unit who has actual knowledge of a former ordinance location in a neighborhood area to provide written notice of that knowledge to a prospective tenant, prior to the execution of the rental agreement, as specified.

This bill would require the owner of a residential dwelling unit or the owner's agent who applies to any public agency for a permit to demolish that residential dwelling unit to give written notice of that fact to a prospective tenant prior to entering into or initiating a rental agreement, as specified, and to a current tenant prior to applying for the permit. The bill would define "residential dwelling unit" and "public agency" for these purposes. The bill would require the notice to include the earliest possible approximate date the owner expects the demolition to occur and the approximate date the owner will terminate the tenancy. The bill would provide that a court may award a plaintiff a civil penalty not to exceed \$2,500, actual damages, and moving expenses, as specified, if a landlord fails to provide the required notice. The bill would provide that in an action brought pursuant to its provisions, the prevailing party is entitled to reasonable attorney's fees.

Ch. 286 (SB 1903) O'Connell. Commercial mobile radio service providers: subscriber protection.

Existing law requires any person, corporation, or billing agent that charges subscribers for products or services on a telephone bill to, among other things, include in the telephone bill the amount being charged for each product or service, including any taxes or surcharges, and a clear and concise description of the service or product.

This bill would require a provider of commercial mobile radio service, as defined, to provide subscribers by no later than January 1, 2004, with a means by which a subscriber can obtain reasonably current and available information, as determined by the provider, on the subscriber's calling plan or plans and service usage. The bill would require providers to inform subscribers of the availability of this information and how it may be obtained, at the time service is established.

Ch. 287 (SB 433) Machado. Air resources: civil and administrative penalties.

(1) Existing law, as of January 1, 2003, makes a person who transports, or who provides a vehicle to transport, motor vehicle fuel for a motor vehicle fuel distributor who is not in compliance with specified laws, liable for a civil penalty.

This bill would repeal that law.

(2) Existing law, which is to be repealed on January 1, 2003, provides for civil or administrative penalties up to a prescribed maximum, depending on the nature of the violation, for a violation of prescribed statutes or any rule, regulation, permit, variance, or order of the State Air Resources Board pertaining to fuel requirements and standards. The recovery of those penalties precludes criminal prosecution, or the filing of a criminal complaint requires dismissal of any action or administrative proceeding seeking those civil penalties.

This bill would repeal that repeal date, thereby extending the operation of those provisions indefinitely.

Ch. 288 (SB 1561) Soto. San Bernardino County Flood Control District: limited obligation notes.

Existing law authorizes the San Bernardino County Flood Control District to borrow money and incur indebtedness to meet short-term needs of any district zone by action of the county board of supervisors.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the district to issue limited obligation notes after the adoption, by a <sup>4</sup>/<sub>5</sub> vote of all members of the board of the district, of a resolution. The bill would subject the issuance of the notes to certain requirements, including a requirement that the notes may not mature later than 10 years after the date of the issuance of the notes and a requirement that the amount of the notes outstanding at any one time may not exceed the sum of \$12,000,000.

Ch. 289 (SB 1746) Polanco. Public retirement boards: nominees.

Under existing law, the retirement board of a public pension or retirement system has plenary, sole, and exclusive fiduciary responsibility for the assets of the pension or retirement system.

This bill would make a statement of legislative intent regarding the eligibility of individuals to serve as members of those retirement boards.

Ch. 290 (SB 2063) Brulte. California Indian Cultural Center and Museum.

Existing law requires the Department of Parks and Recreation to implement and administer various programs designed to preserve, protect, and promote historical resources in the state.

This bill would establish the California Indian Cultural Center and Museum Task Force within the department for the purpose of assisting the department in developing a California Indian Cultural Center and Museum, and would require the task force to be convened on or before February 1, 2003.

This bill would require the task force to advise and make recommendations to the department regarding development of the cultural center, including its location, design, content, and governance structure. The bill would also require the task force to submit an annual report to the Legislature detailing its activities and progress.

This bill would specify that the task force's responsibilities shall be complete and its duties discharged when the cultural center is completed and the department adopts a governing structure for the completed cultural center, but would authorize the director to terminate the task force prior to that time if the director obtains approval from <sup>2</sup>/<sub>3</sub> of the task force members.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 291 (SB 2088) Committee on Natural Resources and Wildlife. Resource conservation.

(1) The Wildlife, Coastal, and Park Land Conservation Bond Act of 1988 provides funding for the acquisition, development, rehabilitation, protection, or restoration of park, wildlife, coastal, and natural lands in California.

This bill would authorize the City of Goleta to convert to a different use up to 36 acres of the Santa Barbara Shores Park, which was partially acquired with those bond funds, in exchange for specified property, provided the exchange complies with the Public Park Preservation Act, the acquired property is adequately remediated, and the city submits to the Department of Parks and Recreation specified records relating to the acquisition.

(2) Existing law requires the State Lands Commission, by September 1, 2002, in consultation with the State Water Resources Control Board, the Department of Fish and Game, and the United States Coast Guard, to submit to the Legislature, and make available to the public, a report that includes a summary of the information provided in the ballast water discharge report forms submitted to the commission, monitoring and inspection information collected by the commission on ballast water in the state and an analysis of that information, an evaluation of the effectiveness of the measures taken to reduce or eliminate the discharge of nonindigenous species from vessels, and a summary of the research completed during the 2-year period that precedes the release of the report, and ongoing research, on the release of nonindigenous species by vessels in ballast water.

This bill would instead require that report to be submitted to the Legislature on or before January 31, 2003.

(3) Under existing law, the Department of Forestry and Fire Protection provides fire prevention and suppression for timber, brush, grass, or range lands classified as state responsibility areas by the State Board of Forestry and Fire Protection.

Existing law further requires the department to conduct a research study on chaparral dieback on brushlands in southern California, to cooperate with other entities on the chaparral dieback problem, and to submit annual progress reports on the research study to the Joint Committee on Fire, Police, Emergency, and Disaster Services, and a final report to specified legislative committees by June 30, 1994.

This bill would repeal the provisions described in the above paragraph.

(4) Existing law requires the California Coastal Commission and the Los Angeles Regional Water Quality Control Board to jointly establish and participate in the multiagency Los Angeles Basin Contaminated Sediments Task Force. Existing law further requires the commission to develop, on or before January 1, 2003, a long-term management plan for the dredging and disposal of contaminated sediments in the coastal waters adjacent to the County of Los Angeles, as prescribed.

This bill would instead require the commission to develop the long-term management plan on or before January 1, 2005.

Ch. 292 (AB 2094) Aroner. Parks and Recreation: California SNO-PARKS: permits.

Existing law establishes the California SNO-PARK permit program, whereby winter recreationists purchase a windshield sticker issued by the Department of Parks and Recreation that permits them to park in any of the roadside parking areas to be established and plowed for that purpose. Existing law requires the department to print the permits and to supervise the sale of the permits throughout the state. The department is required to either distribute and sell the permits directly or to contract with vendors to sell the permits.

This bill would prescribe the procedural details of permit distribution and vendor reimbursement in situations where the department elects to contract with a vendor to sell the permits.

Ch. 293 (AB 2362) Canciamilla. Vessels: sanitation devices.

Existing law requires every peace officer of the state and of any city, county, or other public agency, all state and local public health officers, and all boating law enforcement officers to enforce certain provisions relating to vessel sanitation and any regulations adopted pursuant to those provisions. Existing law prohibits any person from disconnecting, bypassing, or operating a marine sanitation device so as to discharge sewage into the waters of the state, unless the particular discharge is expressly authorized or permitted pursuant to state or federal law or regulations. A violation of this prohibition is a misdemeanor. State and local peace officers are authorized to enforce state laws relating to marine sanitation devices and to inspect vessels if there is reasonable cause to suspect noncompliance with those laws.

This bill would authorize a state or local peace officer who reasonably suspects that a vessel is discharging sewage in an area where the discharge is prohibited to board the vessel for the purpose of inspecting the marine sanitation device for proper operation and placing dye tablets into the holding tank.

Ch. 294 (AB 1146) Chan. Fair Employment and Housing Act.

Existing provisions of the Fair Employment and Housing Act require that an individual wishing to pursue a civil action file suit within one year of a right-to-sue notice from the Department of Fair Employment and Housing.

This bill, as specified, would toll the limitations period within which the civil action must be filed, in cases where the Department of Fair Employment and Housing has deferred its

investigation of the individual's complaint to the United States Equal Employment Opportunity Commission or where after an investigation by the Department of Fair Employment and Housing, the Equal Employment Opportunity Commission agrees to perform a substantial weight review of the determination of the department or conducts its own investigation.

Ch. 295 (AB 1770) Papan. Eminent domain proceedings.

Existing law provides that in determining the litigation expenses to be awarded to the defendant as costs in an eminent domain proceeding, the court shall consider the amount of an offer made by the plaintiff to acquire the property, as specified.

This bill would also require the court to consider any deposit made by the plaintiff with the State Treasury to cover the probable compensation to be awarded to the defendant.

Existing law provides that in the trial of the issue of compensation in an eminent domain proceeding, a witness may not be impeached by reference to any appraisal report, written statement and summary of an appraisal, or other statements made in connection with a deposit or withdrawal of a deposit of probable compensation, nor may the report or statement and summary be considered an admission of any party.

This bill would instead provide that in the trial of the issue of compensation, an appraisal report, written statement and summary of an appraisal, or other statement made in connection with a deposit or withdrawal of a deposit may not be considered to be an admission of any party. However, the bill would also provide that if the person who prepared the report, statement and summary, or other statement is called at trial to give an opinion as to compensation, the report, statement and summary, or other statement may be used for impeachment of the witness.

Ch. 296 (AB 2008) Correa. Workers' compensation: death benefits.

Existing law provides for the payment of death benefits to the dependents of an injured employee who has died. Existing law provides that in the case of totally dependent children, the death benefits are payable until the youngest child attains the age of 18 years. Existing law also provides for the payment of those death benefits in the case of a totally dependent minor child of a local safety member or a patrol member, as defined, if the member was killed in the line of duty before January 1, 1990, and the child is otherwise entitled to the benefits.

This bill would extend those death benefits to the totally dependent minor child of a specified safety member or a safety member subject to any public retirement system if the member was killed in the line of duty before January 1, 1990, and the child is otherwise entitled to the benefits. The bill would also provide that the payment of death benefits would apply retroactively.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 297 (AB 2158) Lowenthal. Coastal development permits: affordable housing requirements.

The California Coastal Act of 1976 provides for the planning and regulation of development, under a coastal development permit procedure, within the coastal zone, as defined, based on various coastal resources planning and management policies set forth in the act. The act requires any person wishing to perform or undertake any development in the coastal zone to obtain a coastal development permit from the California Coastal Commission or from a local government and requires compliance with various low- and moderate-income housing requirements.

This bill would require the commission to take appropriate steps to ensure that all coastal development permit conditions existing on January 1, 2002, relating to affordable housing are enforced and exist for the term of the permit. The bill would additionally provide that the above provision is not intended to retroactively authorize the release of any housing unit from coastal development permit requirements relating to affordable housing.

Ch. 298 (AB 2509) Goldberg. Labor standards: local jurisdiction.

Existing law provides that provisions of state law regulating wages, hours, and working conditions for employees do not restrict the exercise of local police powers over those matters in a more stringent manner.

This bill would define a local jurisdiction as a city, county, district, or agency, or any subdivision or combination thereof. It would provide that where a local jurisdiction expends funds provided to it by a state agency, as defined, or operates a program or engages in an activity that has received assistance from a state agency and the local jurisdiction has established, under its police powers, its own labor standards, as defined, those standards apply with regard to the expenditure, program, or activity, so long as the local standards do not conflict with and are not preempted by state law.

This bill would prohibit state agencies from requiring that a local jurisdiction refrain from applying its own labor standards in order to receive state funds or assistance.

Ch. 299 (AB 2714) Aanestad. Property taxation: valuation.

Existing law requires that all property that is subject to property taxation be taxed at its full value. Existing law requires the State Board of Equalization to issue to county property tax assessors data that, in the judgment of the board, will promote uniformity in appraisal practices and assessed values throughout the state.

This bill would require county assessors, who depreciate the taxable value of tangible personal property or trade fixtures by the use of percent good factors that include a minimum percent good, to determine the minimum percent good factors in a supportable manner. The bill would also prohibit county assessors who depreciate this property using percent good factors published by the State Board of Equalization that provide separate factors for property that is first acquired new and property that is first acquired used, from averaging the published factors to apply these factors to both classes of new and used property, unless information reported by a taxpayer does not indicate whether the property was first acquired new or used.

Ch. 300 (AB 3035) Committee on Judiciary. Access to government programs.

(1) The Bagley-Keene Open Meeting Act generally requires that all meetings of a state body be open and public. Writings that are public records and are distributed to members of the state body prior to or during a public meeting, pertaining to any item to be considered during the public meeting, are required to be made available for public inspection, and any person may attend any public meeting of a state body. The act also requires that notice of public meetings and those held in closed session of a state body be given to any person who requests that notice in writing and that the agenda for those meetings be made available upon request without delay.

This bill would require that the notices and agendas of these public meetings and closed sessions and the public records distributed at these public meetings and closed sessions be made available in appropriate alternative formats upon request by any person with a disability consistent with the federal Americans with Disabilities Act of 1990. The bill would also require that the notice include information on the availability of disability-related aids or services to enable the person to participate in a public meeting consistent with the federal Americans with Disabilities Act of 1990.

(2) Existing law provides that no person in this state shall, on the basis of ethnic group identification, religion, age, sex, color, or disability, be unlawfully denied full and equal access to the benefits of, or be unlawfully subjected to discrimination under, any program or activity that is conducted, operated, or administered by the state or by any state agency, is funded directly by the state, or receives any financial assistance from the state.

This bill would extend the prohibited basis of discrimination under this provision to include race and national origin.

(3) The Ralph M. Brown Act requires that all meetings of a legislative body of a local agency be open and public. All persons may attend these meetings except as otherwise provided by the act. The act also requires that the agenda be posted and include a general description of items to be discussed in closed session. All the documents constituting the agenda packet of a public meeting, including any other writings distributed to all or a majority of all of the members of a legislative body of a local agency by any person in connection with a matter to be discussed at the public meeting, are required to be made available to any person upon request.

This bill would require that these agendas, agenda packets, and other writings distributed to members of a legislative body be made available in appropriate alternative formats to persons with a disability and that the agendas include information on the availability of disability-related aids or services to enable the person to participate in the public meeting consistent with the federal Americans with Disabilities Act of 1990.

(4) This bill would incorporate changes in Section 11125.1 of the Government Code proposed by AB 1752 that would become operative if both bills are enacted and this bill is enacted last.

#### Ch. 301 (SB 1403) Kuehl. Landlord-tenant.

(1) Existing law provides for the renewal or termination of a hiring of real property for an unspecified term, as specified. Existing law, effective until January 1, 2005, also sets forth a separate provision governing the renewal and termination of a hiring of residential real property in the Cities of Los Angeles, Santa Monica, and West Hollywood.

This bill would modify the above provision to make it applicable on a statewide basis and effective until January 1, 2006, as specified. Among other things, the bill would require an owner of a residential dwelling giving notice to a tenant of his or her intent to terminate the dwelling to give at least 60 days' notice prior to termination or 30 days' notice prior to termination if the tenant has resided in the dwelling for less than one year or if other enumerated circumstances are satisfied.

(2) Existing law requires any city, county, or city and county, including a chartered city, that has a system of rent control that does not include a system of vacancy decontrol, as defined, to permit reasonable expenses, fees, and other costs for professional services incurred in the course of successfully pursuing specified rights, including a fair rate of return, to be included in any calculation of net operating income and operating expenses used to determine a fair return to the owner of the property.

This bill would provide that those provisions be inoperative until the Costa-Hawkins Rental Housing Act is repealed.

(3) Existing law permits a landlord to enter a dwelling unit under specified circumstances. Existing law also requires reasonable notice of an intent to enter, as defined, except in an emergency, when the tenant has abandoned or surrendered the premises, or when impracticable.

This bill would require that a landlord give written notice of an intent to enter and have the notice served on the tenant, as specified, except in an emergency or when the tenant has abandoned or surrendered the premises. The bill would provide that written notice mailed at least 6 days prior to entry is presumed reasonable. The bill would permit a landlord, if entry is for the purpose of exhibition to prospective or actual purchasers, to provide notice orally, as specified, 24 hours prior to entry.

(4) Existing law permits the court to relieve a tenant against the forfeiture of his or her lease and restore the tenant to his or her former estate, upon an application made within 30 days after a forfeiture of a lease is declared by the court.

This bill would permit the court to relieve a tenant against a forfeiture of a lease or rental agreement, as specified, upon its own motion or pursuant with an application made at any time prior to restoration of the premises to the landlord. The bill would permit oral

applications by persons appearing in court without an attorney, if the plaintiff is present and has an opportunity to contest that application or has been given ex parte notice.

(5) Under the Ellis Act, public entities generally are prohibited from adopting any statute, ordinance, or regulation, or taking any administrative action, to compel the owner of residential real property to offer or to continue to offer accommodations in the property for rent or lease. However, existing law authorizes any public entity that has in effect any system of rent control to regulate any accommodations withdrawn from rent or lease and that are again offered for rent or lease for residential purposes within 2 years of the date that the accommodations were withdrawn.

This bill would, instead, require that tenancies commenced either during a 5-year period after the notice of intent to withdraw is filed with the public entity or the 5-year period after the accommodations are withdrawn be offered at the rent in effect at the time the notice of intent to withdraw was filed. The bill would require that accommodations first offered again during a 10-year period after the notice of intent to withdraw is filed with the public entity for the first rerelease and subsequent rereleases during the following 2 years be offered at the rent in effect at the time the notice of intent to withdraw was filed. The bill would provide that those amendments apply to all new tenancies created after December 31, 2002, unless the tenancy was created prior to January 1, 2003, after a lawful withdrawal of the unit, as specified.

#### Ch. 302 (SB 1421) Romero. Crimes.

Under existing law, sexual battery, the touching for sexual purposes of an intimate part of a person against the will of the person touched, or of an intimate part of a person if the person is incapacitated, institutionalized, or in other specified circumstances, is a misdemeanor or felony.

This bill would make touching an intimate part of another person for the purpose of sexual arousal, sexual gratification, or sexual abuse, if the victim is at the time unconscious of the nature of the act because the perpetrator fraudulently represented that the touching served a professional purpose, a sexual battery. The bill would make related changes.

By expanding the scope of a crime, this bill would impose a state-mandated local program.

Under existing law, sexual intercourse, sodomy, oral copulation, and causing penetration of the genital or anal openings, if for sexual purposes on a person unconscious of the nature of the act by a person aware of that unconsciousness, is a felony. Existing law defines “unconscious of the nature of the act” to include, among other things, not aware, knowing, perceiving, or cognizant of the essential characteristics of the act due to the perpetrator’s fraud in fact.

This bill would add to the definition of “unconscious of the nature of the act” for purposes of these crimes a victim who was not aware, knowing, perceiving, or cognizant of the essential characteristics of the act due to the perpetrator’s fraudulent representation that the sexual penetration served a professional purpose when it served no professional purpose.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 303 (SB 1458) Romero. Vehicle dealers: bonds.

(1) Existing law requires an applicant for a vehicle dealer’s license to procure and file with the Department of Motor Vehicles a bond executed by an admitted surety in the amount of \$10,000. An applicant for a remanufacturer’s license is required to file a bond in the amount of \$25,000.

This bill would increase the amount of the dealer’s bond and the remanufacturer’s bond to \$50,000, except the bond amount of a dealer who deals exclusively in motorcycles would remain at \$10,000.

(2) Existing law provides that any person or governmental agency that suffers loss or damage by reason of any fraud by a licensed vehicle dealer shall have a right of action against the dealer and the surety upon the dealer's bond, as specified. Existing law also provides that a financing agency shall not be entitled to protection under the bond for any monetary interest of the financing agency that has loaned money to a vehicle dealer, but shall be entitled to protection under the bond if the financing agency is defrauded by a vehicle dealer as to any conditional sales contract acquired by way of purchase or pledge. Existing law furthermore provides that the claims of nonlicensees for fraud shall be satisfied first and entitled to preference over all other claims for fraud.

This bill would revise these provisions to provide that claims against the surety, upon a dealer's bond, by a financing agency that has loaned money to a licensee or assignee thereof shall be allowed only to the extent that the claims of any other person or entity with respect to the bond shall be satisfied first and entitled to preference over the claims of the financing agency with respect to the bond. However, as to any conditional sales contract acquired by way of purchase or pledge, the bill would specify that a financing agency shall be entitled to protection under the bond with the same preference as any other person.

Ch. 304 (SB 1658) Soto. Support: laches.

Existing law provides that a judgment for child, family, or spousal support is enforceable until paid in full and is exempt from any requirement that judgments be renewed.

This bill would permit, in an action to enforce a judgment for child, family, or spousal support the defendant, to raise, and the court to consider, the defense of laches only with respect to any portion of the judgment owed to the state.

Ch. 305 (SB 1704) Ortiz. Child custody investigations.

Existing law provides that in any contested proceeding involving child custody or visitation rights, if the court has appointed a child custody evaluator and the court determines that there is a serious allegation of child sexual abuse, the court must require an evaluation. In addition, when an allegation of child abuse arises in any other circumstances in a proceeding involving child custody or visitation rights, the court may require an evaluator to conduct an evaluation. Existing law specifies the actions the evaluator must take in conducting an evaluation pursuant to these provisions, including filing a confidential written report containing specified information with the clerk of the court in which the custody hearing will be conducted.

This bill would instead provide that in any contested proceeding involving child custody or visitation rights, if the court has appointed a child custody evaluator, or has referred the case for a full or partial court-connected evaluation, investigation, or assessment, and the court determines there is a serious allegation of child sexual abuse, the court must require an evaluation, investigation, or assessment. The bill would require the court to consider only specified evaluations, investigations, or assessments in determining custody or visitation rights when the court has determined that there is a serious allegation of child sexual abuse, except as specified. The bill would also require that the confidential written report of an evaluator or investigator include information regarding domestic violence or substance abuse in the family, as specified. The bill would also make a conforming change.

The bill would incorporate amendments to Section 827 of the Welfare and Institutions Code proposed by this bill and AB 3028. These amendments would become operative if both bills are enacted and become effective on or before January 1, 2003, each bill amends these provisions, and this bill is enacted after AB 3028.

Ch. 306 (SB 1765) Bowen. Consumers.

The existing Song-Beverly Consumer Warranty Act provides consumer warranty protection to buyers of various products. Existing law requires that every manufacturer,

distributor, or retailer which makes express warranties with respect to consumer goods fully set forth those warranties in simple and readily understood language, as specified.

This bill would provide that if any manufacturer, distributor, or retailer provides a warranty or product registration card or form, or an electronic online warranty or product registration form, to be completed and returned by the buyer, the card or form is required to inform the buyer that the card or form is for product registration and failure to return the card or form does not diminish his or her warranty rights during the warranty period. The bill would provide that the requirements imposed on the distribution of any warranty or product registration card or form, or an electronic online warranty or product registration form, become effective on January 1, 2004.

Ch. 307 (SB 1792) Vasconcellos. California Economic Strategy Panel: appointments.

Existing law requires the Secretary of Technology, Trade, and Commerce to convene the California Economic Strategy Panel, that includes specified appointed members, to provide recommendations regarding an economic development strategic plan. Appointments to the panel are required to expire at the end of the 2-year planning horizon of the economic development strategy panel.

This bill instead would require that, beginning January 1, 2003, appointments to the panel be for 4-year terms as specified, except that certain appointments made by the Governor on January 1, 2003, would be for 2-year terms and upon the expiration of those 2-year terms, the appointments would be for 4-year terms and be made every 4 years thereafter.

Ch. 308 (SB 1863) Bowen. Telecommunications services.

Existing law declares the Legislature's policies for telecommunications in California.

This bill would include, in the Legislature's policies for telecommunications in California, providing educational institutions, health care institutions, community-based organizations, and governmental institutions with access to advanced telecommunications services in recognition of their economic and societal impact. The bill would state the intent of the Legislature that the Public Utilities Commission should provide a nonprofit community technology program, as defined, with discounts comparable to those that are provided to schools and libraries to address inequality of access to advanced telecommunications services.

This bill would incorporate additional changes to Section 709 of the Public Utilities Code made by SB 1563 to be operative if this bill and SB 1563 are enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 309 (SB 1907) Murray. Healing arts: referrals.

Existing law provides that it is a misdemeanor for a healing arts licensee, including physicians and surgeons, psychologists, acupuncturists, optometrists, dentists, podiatrists, and chiropractic practitioners, to refer a person for certain health care services if the licensee has a financial interest, as defined, with the person or entity that receives the referral. Existing law provides specified exemptions from this prohibition.

This bill would exempt from the prohibition a personal services arrangement between a licensee or an immediate family member of a licensee and the recipient of the referral if the arrangement meets specified requirements and is set out in writing, the arrangement specifies all services to be provided by the licensee, the term of the arrangement is for at least one year, and the compensation to be paid over the term of the arrangement is set in advance, does not exceed fair market value, and is not determined in a manner that takes into account the volume or value of any referrals or other business generated between the parties.

Ch. 310 (SB 1936) Burton. Community property.

Existing law provides that a husband or wife is permitted to enter into any real property transaction with the other or any other person, and in transactions between themselves are

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

subject to the general rules governing fiduciary relationships, except as specified, which are the same rights and duties governing nonmarital business partners. Existing law requires that both spouses provide access to books regarding transactions, render upon request information regarding community property, and account to the spouse any benefit or profit from any transaction made by one spouse without the consent of the other regarding community property.

This bill would subject a husband or wife that enters into any real property transaction with the other to those general rules governing fiduciary relationships where the transaction involves the administering of a trust. The bill would also make certain conforming changes that correct erroneous references and a technical, nonsubstantive change. The bill would include a statement of legislative intent regarding the fiduciary relationship between spouses.

#### Ch. 311 (AB 264) Correa. Contractors.

The Contractors State License Law provides for the licensing and regulation of contractors by the Contractors' State License Board, including specialty contractors.

This bill would provide that a trade examination shall not be required for the limited specialty license classification.

Existing law requires the surety of a contractor to notify the Registrar of Contractors of any payment on any claim against the contractor's bond within 30 days of making the payment. Existing law, with specified exceptions, provides that any judgment or admitted claim against, or good faith payment from, a bond shall constitute grounds for disciplinary action against a contractor by the Contractors' State License Board.

This bill would provide that, prior to a settlement of a claim through a good faith payment by the surety, the contractor shall have not less than 15 days to file a written protest instructing the surety not to make the payment based on certain specific grounds. The bill would require the board to investigate the matter for disciplinary violations when a licensee files a written protest and a surety has suffered a loss regarding its good faith payment.

This bill, with respect to payments made by a surety that are reported to the Registrar of Contractors, would provide that the contractor's license shall be suspended by operation of law if proof of payment of the amount owed to the surety has not been made by the contractor within 90 days after the contractor is notified to that effect by the Contractors' State License Board. This bill would also provide that a contractor's license may not be renewed, reissued, or reinstated while any judgment or admitted claim in excess of the amount of the contractor's bond remains unsatisfied or while the surety remains unreimbursed for loss and expense sustained on the bond.

Existing law generally requires an applicant for a contractors' license or a licensee to have on file with the board a Certificate of Workers' Compensation Insurance or a Certification of Self-Insurance. Existing law provides that failure of a licensee to comply with this requirement shall result in the automatic suspension of the license by operation of law, and specifies various procedures in this regard.

This bill would revise and recast these provisions.

#### Ch. 312 (AB 728) Correa. Contractors: arbitration of disputes.

Existing law, the Contractors' State License Law, provides for arbitration of disputes arising out of cases filed with or by the Contractors' State License Board. The registrar is the executive officer who carries out the board's administrative duties and tasks delegated by the board and who is authorized to issue a citation for a violation of specified provisions that may result in the assessment of a civil penalty.

Existing law authorizes the registrar to refer specified complaints where the licensee is in good standing at the time of the referral to arbitration, with the concurrence of both the licensee and the complainant, if there is evidence that the complainant has suffered or is likely to suffer damages greater than \$5,000 and less than \$50,000. The registrar is required to refer these complaints to arbitration where the licensee is in good standing at the time of the referral

if the contract price is equal to or less than \$5,000 or if the demand for damages is equal to or less than \$5,000. Existing law also requires that an accusation or citation against a licensee be filed by the registrar within a specified time period.

This bill would change the amount in dispute requirement for mandatory arbitration to \$7,500 or less. The bill would require that referrals to the arbitration program be subject to the same statute of limitation as accusations or citations by the registrar. The bill would delete the requirement that a licensee be in good standing at the time of a referral in order to qualify for referral to arbitration. The bill would provide that the disassociation of any qualifying partner, responsible managing officer, or responsible managing employee from a license that has been referred to arbitration does not relieve the qualifying partner, responsible managing officer, or responsible managing employee from responsibility for complying with an award rendered as a result of an arbitration referral.

Ch. 313 (AB 1026) Oropeza. Healing arts: dentists.

Existing law provides that it is unlawful for healing arts licensees, as specified, to provide, publish, or advertise false, fraudulent, misleading, or deceptive statements, photographs, or other images, in order to induce the provision of services or the rendering of products relating to a professional practice or business for which he or she is licensed and makes the violation of these provisions punishable as a misdemeanor. Existing law provides that this includes the statement that the licensee is certified by a private or public board or agency or a statement that the licensee only practices in specific fields.

This bill would provide that a licensed dentist shall not advertise as or hold himself or herself out as a specialist or advertise membership in or specialty recognition by an accrediting organization unless the practitioner has completed a specialty education program approved by the American Dental Association and the Commission on Dental Accreditation, or is eligible for examination by, or is a diplomate of a national specialty board recognized by the American Dental Association. The bill would also prohibit a dentist from representing to the public or advertising accreditation either in a specialty area of practice or by a board not meeting the above requirements unless the dentist has attained membership in or been credentialed by an accrediting organization recognized by the board as a bona fide organization for that area of dental practice. The bill would set forth membership or credentialing requirements that an organization must have in order to be recognized as a bona fide organization. The bill would also require a dentist who lacks the above qualifications to state that he or she is a general dentist in any advertisement announcement, or solicitation that announces a practice emphasis.

Because the bill would specify additional provisions regarding the advertising practices of dentists, the violation of which is punishable as a misdemeanor, it would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 314 (AB 1296) Thomson. Transportation: commuter rail: study.

The Clean Air and Transportation Improvement Act of 1990 authorizes the California Transportation Commission to allocate certain bond funds in specified amounts to specified transportation projects, including not more than \$35,000,000 for commuter rail service between the Cities of Auburn and Davis.

This bill would authorize one or more local agencies, as described, to undertake a study or a joint study concerning the feasibility of extending commuter rail or intercity rail service beyond the City of Davis to the City of Dixon.

Ch. 315 (AB 2037) Diaz. Public contracts: claims.

Existing law authorizes a public entity to compromise or otherwise settle any third-party claim relating to a public works contract.

This bill would impose a state-mandated local program by requiring a public entity to include provisions in the contract for timely notification of the contractor of a third-party claim. This bill would also provide that a public entity is entitled to recover reasonable costs incurred by the public entity in providing the notice.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 316 (AB 2449) Correa. Barbering and cosmetology.

Existing law, the Barbering and Cosmetology Act, provides a comprehensive scheme of regulation and licensure for persons practicing barbering, cosmetology, skin care, nail care, or electrolysis.

This bill would require a person licensed under the act to report certain information with respect to his or her practice status to the bureau upon license renewal. The bill would require the bureau to report to the Senate Committee on Business and Professions and the Assembly Committee on Business and Professions within 5 years after the implementation of this bill on the information collected.

Existing law provides that a violation of the act is a misdemeanor unless another penalty is specified.

In enlarging the scope of activities subject to that penalty, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 317 (AB 2606) Harman. Recycled water.

Existing law prohibits any person from constructing, maintaining, or using any waste well that extends into a subterranean water-bearing stratum that is used or intended to be used as a source of water supply for domestic purposes prior to a finding by the State Department of Health Services, after a public hearing, that the proposed recharge by direct injection will not impair the quality of water in the receiving aquifer as a source of domestic water supply.

This bill would require the State Department of Health Services to determine that the proposed recharge by direct injection will not degrade, rather than impair, the quality of water in the receiving aquifer as a source of domestic water supply.

The bill would also require the department, when making the described findings, to consider a certain antidegradation policy adopted by the State Water Resources Control Board and current and potential future public health consequences of the controlled recharge.

#### Ch. 318 (AB 2955) Pescetti. North San Joaquin Water Conservation District: assessments.

(1) Under the Water Conservation District Law of 1931, a district may be organized and established by a county board of supervisors, with specified powers and purposes.

This bill would authorize the North San Joaquin Water Conservation District to impose a specified per-acre assessment, not to exceed \$5 per acre or portion of an acre, on land on which surface water or groundwater is applied, as defined, or delivered, to pay for the expenses relating to the delivery of surface water, for groundwater recharge, and for related expenses of the district. The bill would authorize the board of the district to provide a procedure for the fixing and collection of the assessments by way of the county tax bills,

thereby imposing a state-mandated local program by imposing additional duties on the affected county with regard to the collection of those assessments.

(2) Article XIII C of the California Constitution generally requires a majority vote of the electorate for a local government to impose, extend, or increase any general tax and a  $\frac{2}{3}$  vote of the electorate to impose, extend, or increase any special tax and permits the use of the initiative to affect local taxes, assessments, fees, and charges. Article XIII D of the California Constitution generally requires that assessments, fees, and charges be submitted to property owners for approval or rejection after the provision of written notice and the holding of a public hearing. The Proposition 218 Omnibus Implementation Act prescribes specific procedures and parameters for local jurisdictions in complying with Article XIII C and Article XIII D of the California Constitution.

This bill would require that any assessments be levied consistent with Article XIII C, Article XIII D, and the Proposition 218 Omnibus Implementation Act.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 319 (SB 1240) Figueroa. Advertising.

(1) Existing law makes it unlawful for any person, firm, corporation, or association that is a nongovernmental entity to solicit funds or information by means of a mailing that contains a seal, insignia, trade or brand name, or any other term or symbol that reasonably could be interpreted or construed as implying any state or local government connection, approval, or endorsement, unless the nongovernmental entity has an expressed connection with a state or local entity or unless the solicitation contains a specified disclosure. A violation of these or other related provisions is a misdemeanor.

This bill would extend the application of these provisions to solicitations made by nongovernmental entities by electronic message or over an Internet Web site. Because this bill would revise the definition of a crime, it would thereby impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 320 (SB 1339) Vasconcellos. Postsecondary education: admissions.

Existing law requires the Superintendent of Public Instruction to assist all school districts to ensure that all public high school pupils have access to a core curriculum that meets the admission requirements of the University of California and the California State University.

This bill would additionally require the Superintendent of Public Instruction to advise school districts that maintain high schools about the importance of making readily available to each high school pupil the list of courses offered by the school attended by that pupil that are certified by the University of California as meeting admission requirements.

This bill would also request the University of California to assist each school district that maintains a high school to ensure certain matters regarding admission requirements of the University of California and the California State University are understood, employed, and maintained by the school districts and to ensure that lists of courses currently offered by the high schools and certified by the University of California as meeting admission requirement criteria are made available to each high school pupil and a copy is provided annually to each high school pupil. This provision and other related provisions would, pursuant to existing provisions of law, only be applicable to the University of California if the Regents of the University of California adopt a resolution to make them applicable.

Ch. 321 (SB 1348) Brulte. Water: conservation.

The Urban Water Management Planning Act requires every public and private urban water supplier that directly or indirectly provides water for municipal purposes to more than 3,000 customers, or supplies more than 3,000 acre-feet of water annually, to prepare, adopt, and submit to the Department of Water Resources an urban water management plan. Existing law requires that the plan describe and evaluate sources of water supply, reasonable and practical efficient uses, reclamation, and demand management activities. Demand management activities are water conservation measures, programs, and incentives that prevent the waste of water and promote the reasonable and efficient use and reuse of available water supplies. Existing law requires that the plan be updated at least once every 5 years and requires the department, until January 1, 2006, to take into consideration whether the urban water supplier has submitted an updated plan, in determining eligibility for funds made available pursuant to any program administered by the department.

This bill would require the department to take into consideration whether the urban water supplier is implementing or planning the implementation of water demand management activities in evaluating applications for grants or loans made available from the Water Conservation Account for the purpose of funding urban water conservation projects.

Ch. 322 (SB 1385) Brulte. Parks and recreation: grants: water conservation measures.

Existing law requires the Department of Parks and Recreation to develop, operate, and maintain state parks and recreation areas. Existing law further requires the department to award grants for the acquisition and development of neighborhood, community, and regional parks and recreation lands and facilities in urban and rural areas.

This bill would require the criteria and procedures adopted by the department for evaluating applications for the grants described above, to include recommendations that the grant applicant consider water conservation measures in their proposed project. The bill would require the department to develop those recommendations in consultation with the Department of Water Resources.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 323 (SB 1572) Sher. Proposition 65: enforcement.

The existing Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) prohibits any person, in the course of doing business, from knowingly and intentionally exposing any individual to a chemical known to the state to cause cancer or reproductive toxicity without giving a specified warning, or from discharging or releasing such a chemical into any source of drinking water, except as specified. The act imposes civil penalties upon persons who violate those prohibitions, and provides for the enforcement of those prohibitions by the Attorney General, a district attorney, or specified city attorneys or prosecutors, and by any person in the public interest. The act requires any person bringing an action in the public interest, or any private person filing an action in which a violation of the act is alleged, to notify the Attorney General that such an action has been filed and requires such a person, after the action is either subject to a settlement or a judgment, to submit to the Attorney General a reporting form that includes the results of that settlement or judgment and the final disposition of the case.

This bill would additionally require any private person settling any violation of the act to submit to the Attorney General the reporting form that includes the results of that settlement and the final disposition of the case. The bill would also make technical nonsubstantive changes and correct erroneous references.

The bill, in conformance with the requirements of Proposition 65, would make a legislative finding and declaration that these changes would further the purposes of the act.

Ch. 324 (SB 1599) Poochigian. Water quality: enforcement.

Under existing law, point source discharges of pollutants to surface waters require a waste discharge permit under the national pollutant discharge elimination system (NPDES). Under existing law, the State Water Resources Control Board and the California regional water quality control boards prescribe waste discharge requirements in connection with the discharge of waste that could affect the quality of the waters of the state. A person aggrieved by any action or failure to act by a regional board relative to waste discharge requirements, compliance with the provisions of the Federal Water Pollution Control Act, the Storm Water Enforcement Act of 1998 or the Water Recycling Law, may petition the state board for review. If a petition for review of a regional board action on waste discharge requirements issued for a solid waste landfill includes a request for a stay of the waste discharge requirements, the state board must act on the requested stay within 60 days of accepting the petition. Existing law authorizes the filing of a petition with the superior court to review a decision of the state board, and authorizes the superior court to issue a stay.

This bill would authorize the state board, in ruling on a petition for review of a regional board action on any waste discharge requirements, to grant a stay to be in effect from the effective date of the waste discharge requirements. The bill would authorize the superior court, in granting a stay pursuant to a petition for review of a decision of the state board denying a request for a stay of waste discharge requirements, to make the stay effective as of the effective date of the waste discharge requirements.

#### Ch. 325 (SB 1642) Soto. Nutrition.

Existing law authorizes a registered dietitian and certain other nutritional professionals to provide specified services relating to medical nutrition therapy upon referral by a health care provider. The services include the ordering of laboratory tests related to nutritional therapeutic treatments and the accepting or transmitting of verbal or electronically transmitted orders from a health care provider to implement medical nutrition therapy. Existing law specifies that these services may be offered for individuals or groups of patients in licensed institutional facilities or in private office settings.

This bill would recast these provisions with respect to the ordering of medical laboratory tests and accepting and transmitting orders. The bill would also change the requirements with respect to the ordering of medical laboratory tests in a clinic where a registered nurse is on duty. The bill would also include a person licensed under the Chiropractic Initiative Act in the definition of health care provider for purposes of these provisions.

#### Ch. 326 (SB 1872) Bowen. Vendors: refund and return policies: consumer remedies.

Existing law generally requires a vendor conducting business through the Internet or any other electronic means of communication to, among other things, disclose to a buyer located in this state the vendor's return and refund policy. Certain activities are exempt from these and other related provisions. A violation of these provisions is a crime.

This bill would require a vendor that offers a return and refund policy allowing the return of goods or cancellation of services to process and send to the buyer any refund due within 30 days or to otherwise arrange to credit the buyer's account.

This bill would also extend the application of the vendor return and refund disclosure and refund requirements to certain activities currently exempt from the disclosure requirement.

Because this bill would revise the definition of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 327 (SB 1922) Romero. Hazardous waste transportation: remote sites.

Existing law exempts a person who initially collects certain hazardous waste at a remote site and transports the hazardous waste to a consolidation site from complying with the requirements concerning possession of a manifest and registration as a hazardous waste transporter, if the person complies with specified conditions, including if not more than 275 gallons or 2,500 pounds, whichever is greater, of hazardous waste is transported in any shipment.

This bill would exempt a public utility, local publicly owned utility, or municipal utility that transports a single shipment of up to 5,000 gallons of mineral oil from those manifest and registration requirements, if the oil does not meet a toxicity test under specified regulations.

Ch. 328 (SB 1989) Knight. Small wind energy systems.

(1) Existing law authorizes a local agency to provide by ordinance, until July 1, 2005, for the installation of small wind energy systems, as specified, and to issue a conditional use permit for this purpose, except where otherwise prohibited by law. Existing law also authorizes a local agency to impose conditions on the installation of these systems, and requires a local agency to approve an application for a small wind energy system by right if specified conditions are met.

This bill would require a local agency that receives an application for a small wind energy system on a site within a specified restricted military airspace to forward a copy of the application to the governing authority of that airspace and to consider any written comments received from that governing authority. The bill would create a state-mandated local program by imposing new duties on local agencies.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 329 (SB 2091) Committee on Natural Resources and Wildlife. State parks: concession contract: Crystal Cove Historic District.

Existing law authorizes the Department of Parks and Recreation to enter into a concession contract for the development, operation, and maintenance of the Crystal Cove Historic District as a public use facility for a period of up to 60 years, upon those terms and conditions that the department determines to be in the best interests of the state.

This bill would repeal that provision.

Ch. 330 (AB 7) Thomson. Transactions and use tax: City of Davis.

Existing law authorizes various local governmental entities, subject to certain limitations and approval requirements, to levy transactions and use taxes in accordance with the procedures and requirements set forth in the Transactions and Use Tax Law.

This bill would additionally authorize the City of Davis, subject to the approval of  $\frac{2}{3}$  or a majority of the voters voting on the issue at an election, to levy a tax pursuant to the Transactions and Use Tax Law at a rate of 0.25% or 0.5%.

This bill would make legislative findings and declarations as to the necessity of a special statute.

Ch. 331 (AB 902) Strom-Martin. Transactions and use tax: qualified cities.

Existing law authorizes various local governmental entities, subject to certain limitations and approval requirements, to levy transactions and use taxes in accordance with the procedures and requirements set forth in the Transactions and Use Tax Law.

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would additionally authorize a qualified city, with the approval of  $\frac{2}{3}$  of voters voting on the issue at an election, to levy a transactions and use tax at a rate of 0.25%, or a multiple thereof not to exceed 1%, for the purpose of maintenance, repair, replacement, construction, or reconstruction of the road system in that qualified city.

This bill would make legislative findings and declarations as to the necessity of a special statute.

Ch. 332 (AB 1758) Nakano. Limitation of actions: Holocaust-era artwork.

Existing law authorizes actions for the taking, detaining, or injuring of any good or chattel, or for the specific recovery of personal property to be commenced within 3 years. Existing law authorizes actions for the theft of any article of historical, interpretive, scientific, or artistic significance to be commenced within 3 years of the discovery of the article by various entities, as defined.

This bill would authorize any owner, or heir or beneficiary of the owner, of Holocaust-era artwork, as defined, to bring an action in superior court to recover that artwork from any museum or gallery. This bill would provide that any action brought under these provisions may not be dismissed for failure to comply with the applicable statute of limitation, provided the action is commenced on or before December 31, 2010.

Ch. 333 (AB 1988) Diaz. Emergency Medical Services Authority: task force: emergency and trauma services.

Existing law provides the Emergency Medical Services Authority with administrative authority over the provision of emergency medical services in the state. Under existing law, the authority is required, among other things, to assess emergency medical services needs throughout the state and to provide technical assistance for the purpose of developing emergency medical services systems.

This bill would require the authority to convene a task force of specified members to study the delivery and provision of emergency medical services in California. The bill would require the task force to submit a report to the Legislature providing recommendations for improving the delivery of emergency medical services throughout California within 2 years from the date that funding and positions have been provided for the project. The bill would require these provisions to be implemented only to the extent that the authority obtains private funding needed to support and monitor the work of the task force.

Ch. 334 (AB 2009) Nakano. Swap meets, flea markets, and open-air markets.

Existing law regulates the operation of swap meets, defined to include flea markets, indoor swap meets, and outdoor swap meets or flea markets, where merchandise is offered for sale and exchange. Existing law requires a vendor to report all personal property offered or displayed for sale or exchange at a swap meet on a form approved by the California Department of Justice, unless the personal property is new. Existing law requires the completed report to be submitted to the chief of police or the sheriff depending on the location of the swap meet. Under existing law, a violation of the provisions regulating these events is punishable as a misdemeanor offense.

This bill would instead specify that all merchandise offered for sale or exchange by a vendor at a swap meet, flea market, or open-air market be reported unless the merchandise is new.

Because a violation of the provisions regulating swap meets is punishable as a misdemeanor offense, to the extent the bill would make additional events subject to this sanction, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 335 (AB 2015) Corbett. Crimes: breaking and entering tools.

Existing law makes it a misdemeanor for any person to have upon him or her in his or her possession any specified instrument or tool with the intent to break or enter into any building, railroad car, aircraft or vessel, trailer coach, or vehicle, as defined.

This bill would add to the list of instruments or tools ceramic or porcelain spark plug chips or pieces. The bill would state the Legislature's intent to add only ceramic or porcelain spark plug chips or pieces, not other common objects such as rocks or pieces of metal, to the list of burglary tools. Because this bill would create a new crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 336 (AB 2052) Goldberg. Health care service plans and health insurance: group contract or policy rate changes.

Existing law provides that, with respect to group health care service plans and group health insurance, no change in premium rate or coverage is effective unless the plan or the insurer meets specified notification requirements. A violation of the provisions regulating health care service plans is a crime.

This bill would prohibit, except as specified, a health care service plan or a health insurer from changing its premium rates or applicable copayments or coinsurances or deductibles for group health care service plans or group health insurance after the group contractholder or group policyholder has delivered written acceptance of the contract or policy, after the start of the open enrollment period, or after receipt of the premium payment for the first month of coverage. The bill would provide for exemptions from the prohibition where the change is authorized or required in the group contract or policy, is agreed to under a preliminary agreement, or is mutually agreed to in writing, as specified.

Because a violation of this bill's prohibition against a group health care service plan changing premium rates or applicable copayments or coinsurances or deductibles would be a crime, the bill would impose a state-mandated local program.

This bill would declare the Legislature's intent to protect consumers from being charged a higher rate after enrolling in or renewing a contract with a health care service plan or a health insurer.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 337 (AB 2057) Steinberg. Mental health services.

Existing law, the Bronzan-McCorquodale Act, provides for the allocation of state funds to counties for mental health programs.

Existing law, the Adult and Older Adult Mental Health System of Care Act, requires the State Department of Mental Health to administer a program providing grants to counties to provide a mental health system of care for adults and older adults with severe and persistent mental illness.

Existing law further requires the department, in each year in which additional funding is provided by the State Budget, to establish programs that offer individual counties sufficient funds to comprehensively serve certain severely mentally ill adults, and to evaluate the effectiveness of the strategies in providing assistance to these persons in accordance with specified criteria.

This bill would include certain information relating to persons enrolled in the Medi-Cal program among the criteria used by the department for the above evaluation.

Ch. 338 (AB 2061) Salinas. Transactions and use tax: City of Salinas.

Existing law authorizes various local governmental entities, in accordance with certain limitations and approval requirements, to levy transactions and use taxes in accordance with the procedures and requirements set forth in the Transactions and Use Tax Law.

This bill would additionally authorize the City of Salinas, with the approval of  $\frac{2}{3}$  of the voters voting on the issue at an election, to levy a transactions and use tax at a rate of 0.25% for the purpose of improving specified capital facilities in that city.

This bill would make legislative findings and declarations as to the necessity of a special statute.

Ch. 339 (AB 2193) Maddox. Fire protection: joint powers agencies.

The existing Joint Exercise of Powers Act authorizes 2 or more public agencies, by agreement, to jointly exercise common powers.

This bill would provide that when property tax revenues of Orange County are allocated by that county to an agency formed for the purpose of providing fire protection pursuant to the act, those funds may only be appropriated for expenditure by that agency for fire protection purposes, as defined.

Ch. 340 (AB 2219) Keeley. Retail food establishments.

The existing California Uniform Retail Food Facilities Law regulates sanitary standards in retail food establishments. It is a misdemeanor to violate any provision of, or regulation adopted pursuant to, these provisions.

Existing law requires each food establishment in a building for which construction commenced on or after July 1, 1984, with more than 20,000 square feet of floorspace, to provide at least one separate toilet facility for men and one separate toilet facility for women, in good repair, for patrons, guests, or invitees on property used in connection with, or in, that food establishment.

This bill would require any food establishment with more than 20,000 square feet of floorspace, and any food establishment with less than 20,000 square feet of floorspace that provides space for the consumption of food on the premises, that is in a building constructed on or after January 1, 2004, to provide clean toilet facilities, as specified. The bill would require any food establishment that provides space for the consumption of food on the premises in a building constructed on or before July 1, 1984, to provide clean toilet facilities, as specified, unless the establishment prominently posts a sign stating that toilet facilities are not provided.

This bill would specify that those requirements for restroom facilities that are accessible to patrons, guests, or invitees on the property may be satisfied by permitting access by those persons to the toilet and handwashing facilities that are subject to other requirements.

Because the bill would impose new requirements on food establishments, a violation of which constitutes a crime, the bill would create a new crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 341 (AB 2224) Nation. Sonoma-Marín Area Rail Transit District.

Existing law establishes various local entities to carry out transportation functions within their respective areas of jurisdiction.

This bill would create the Sonoma-Marín Area Rail Transit District within the Counties of Sonoma and Marin. The bill would establish a 12-member board of directors to govern the district. The bill would require the district to work with specified authorities to achieve a safe, efficient, and compatible system of passenger and freight rail service. The bill would

authorize the district to own, operate, manage, and maintain a passenger rail system within the territory of the district. The bill would authorize the district to contract for goods and services, to employ labor, to grant, purchase, lease, condemn for use, or otherwise use real or personal property for transit purposes, to impose voter-approved taxes, to invest revenues, to issue bonds and execute equipment trust certificates, and to create improvement and special benefit districts. The bill would require the Public Employee Relations Board to perform specified duties relating to collective bargaining. The bill would also authorize the district to annex territory and to dissolve. The bill would make related changes.

Ch. 342 (AB 2423) Cardenas. Health: exposure to communicable diseases: first responders.

Existing law provides that the blood or other potentially infectious material of a person receiving health care services that has been the source of a significant exposure to an individual may be tested and the exposed individual may be informed of the HIV status of that patient if certain conditions are met. Existing law provides that if this source patient refuses to consent to an HIV test after a documented effort has been made to obtain consent, then any "available blood or patient sample," as defined, of the source patient may be tested. Existing law prohibits the disclosure of the source patient's identity.

Existing law exempts a health care provider from civil or criminal liability or professional disciplinary action for performing an HIV test on a source patient, or for disclosing the HIV status of the source patient to prescribed persons, if the health care provider believes in good faith that his or her action is consistent with these provisions.

Existing law provides that any health care provider or first responder, or any exposed individual, who willfully performs or permits the performance of an HIV test on a source patient, that results in harm, without adhering to the procedure established by the bill, is guilty of a misdemeanor.

This bill would provide that these provisions apply to a communicable disease.

This bill would change the definition of "available blood or patient sample" for purposes of these and related provisions to refer to blood or other material that was legally obtained from the source patient prior to the release of the patient from the health care facility.

This bill would define "communicable disease" to mean any disease that was transferable through the exposure incident, as determined by the certifying physician.

By expanding the scope of a crime this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 343 (AB 2593) Rod Pacheco. School safety plans.

Existing law provides that if a person who is not a student, officer, or employee of a public school enters a campus or school facility and appears to commit an act likely to interfere with the peaceful conduct of the campus or facility, he or she may be directed to leave by the chief administrative officer or his or her designee. Failure to leave, or reentry within either 7 or 30 days, as specified, is unlawful.

This bill would provide that it is unlawful for a person who is not a student, officer, or employee to return to the campus, after being directed to leave, without following the posted requirements to contact the administrative offices of the campus. This bill would specify that these provisions apply to areas of the campus or facility outside of the common areas where public business is conducted. Because this bill would change the elements of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 344 (AB 2598) Committee on Elections, Reapportionment and Constitutional Amendments. Elections.

Existing law requires the city elections official, in the case of a municipal election to fill offices, to publish a specified notice in a newspaper in the city not later than one week before the election.

This bill would require the notice to be published in a newspaper of general circulation.

Existing law requires that, if held, an election by all-mail ballot to elect the members of the governing board of a special district be held on the first Tuesday following the first Monday in September of each odd-numbered year.

This bill would instead provide that the all-mail ballot election shall be held on the last Tuesday in August of each odd-numbered year.

This bill would make technical, nonsubstantive changes.

Existing law requires the city council of a general law city to meet on the 2nd Tuesday after the election to canvass the returns, declare the election results, pass a resolution stating the results of the election, and install the newly elected officers. Existing law further requires the city council to meet on the Tuesday after the general municipal election and choose one of its number as mayor, and one of its number as mayor pro tempore.

This bill would instead require the city council to meet at the regularly scheduled meeting next following the meeting at which the declaration of the election results was made and choose a mayor and a mayor pro tempore.

Ch. 345 (AB 2655) Matthews. Controlled substances.

Existing law provides for the electronic monitoring of the prescribing and dispensing of Schedule II controlled substances pursuant to the Controlled Substance Utilization Review and Evaluation System (CURES) program, as specified. The program is established contingent upon the availability of adequate funds, and is scheduled to become inoperative on July 1, 2003, and to be repealed on January 1, 2004.

This bill would delete a provision providing for an appropriation from the Pharmacy Board Contingent Fund to the Board of Pharmacy to fund CURES and would instead provide that the program shall be established, contingent upon the availability of adequate funds from the State Dentistry Fund and specified contingent funds of the Medical Board, Pharmacy Board, and Osteopathic Medical Board. This bill would further provide that the program instead shall become inoperative on July 1, 2008, and shall be repealed on January 1, 2009. The bill would also make a technical change.

The bill would provide, in addition, that a licensed health care practitioner or pharmacist may make a written request for, and the Department of Justice may release to that practitioner or pharmacist, the history of controlled substances dispensed to an individual under his or her care based on data contained in CURES, as specified ; in order to prevent the inappropriate, improper, or illegal use of Schedule II controlled substances, the Department of Justice may initiate the referral of the history of controlled substances dispensed to an individual based on data contained in CURES to licensed health care practitioners or pharmacists providing care or services to the individual; and the history of controlled substances dispensed to an individual based on data contained in CURES is medical information subject to the provisions of the Confidentiality of Medical Information Act. The bill would provide that these provisions shall become inoperative on July 1, 2008, and shall be repealed on January 1, 2009.

Ch. 346 (AB 2758) Briggs. Transactions and use taxes: City of Visalia.

Existing law authorizes various local governmental entities, in accordance with certain limitations and approval requirements, to levy transactions and use taxes in accordance with the procedures and requirements set forth in the Transactions and Use Tax Law.

This bill would additionally authorize the City of Visalia, with the approval of  $\frac{2}{3}$  of the voters voting on the issue at an election, to levy a transactions and use tax at a rate 0.25% for the purpose of improving public safety, fire, and law enforcement services in that city.

This bill would make legislative findings and declarations as to the necessity of a special statute.

Ch. 347 (AB 2778) Calderon. Insurance.

(1) Existing law provides for the regulation of insurers by the Insurance Commissioner. Existing law requires licensed life agents and applicants for licensure as a life agent to meet certain education standards unless they are limited by the terms of a written agreement with an insurer to transact only specified life insurance policies or annuities having an initial face value of \$10,000 or less that are designated by the purchaser for the payment of funeral and burial expenses.

This bill would instead require that the face value of those life insurance policies and annuities be \$15,000 or less.

(2) Existing law prohibits the issuance by an insurer of contracts for variable life insurance benefits until a showing has been made to the commissioner indicating that the insurer's condition or method of operation in connection with the contracts is not hazardous to the public or the insurer's policyholders.

This bill would require an insurer to notify the commissioner at any time it implements a material change to mutual funds underlying the variable contract separate account in a policy or contract providing for variable life insurance benefits but would authorize an insurer to make those changes without the commissioner's prior approval or acknowledgment.

Ch. 348 (AB 2923) Pescetti. California Agriculture Day.

Existing law does not designate a particular day as California Agriculture Day.

This bill would designate the first day of spring in each year as California Agriculture Day.

This bill would also encourage a public school, on either the first day of spring or another day determined by the school, to provide education that instructs students on the history and importance of agriculture in California.

Ch. 349 (AB 2934) Wayne. Uniform Family Support Act.

Existing law sets forth the Uniform Family Support Act, as specified.

This bill would revise and recast various provisions of that act including, among others, provisions dealing with personal jurisdiction, simultaneous proceedings, jurisdiction to modify support orders, the computation of support obligations stated in a foreign currency, determination of paternity, determination of a controlling child support order, and an employer's compliance with 2 or more income withholding orders. The bill would transfer specified responsibilities for the enforcement of the act from the Attorney General to the Department of Child Support Enforcement. The bill would become operative upon either of 2 specified events, whichever occurs first, but in no event prior to July 1, 2004.

The bill would impose a state-mandated local program by imposing new duties on the superior court and local support enforcement agencies under an existing program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 350 (AB 3047) Committee on Human Services. Human services.

Existing law requires that any person who desires issuance of a license for a day care center or a special permit for specialized services in a day care center shall submit an application that includes certain information, including evidence that the applicant has posted signs at the point of entry to the facility that includes a statement that children under the age of 4 years or weighing less than 40 pounds must be in an approved child passenger restraint system and that a person may be cited for a violation of the child passenger restraint system provisions and that the person's insurance rates may be adversely affected.

This bill would revise those requirements as to the contents of the posted sign.

Existing law defines "State Department of Health" and "Director of Health" for certain purposes.

This bill would delete these provisions.

Existing law establishes rights of persons committed to a community care facility, as defined.

This bill would make a technical correction to the reference in the definition of a community care facility.

Existing law authorizes the State Department of Social Services to grant state supplemental individual and family grants to meet disaster-related necessary expenses or serious needs of individuals or families adversely affected by any major disaster declared by the President of the United States in those cases where the individuals or families are unable to meet those expenses or needs through assistance under federal emergency provisions.

This bill would remove the requirement that grants may only be made in cases of major disasters and would make technical revisions.

Existing law establishes in the State Treasury, the California Individual and Family Supplemental Grant Fund, and specifies that money in the fund may be used to provide supplemental individual and family grant assistance to pay claims for individuals and families for losses or damages occurring during the incident period of a federal disaster declaration.

This bill would instead specify that the fund shall be used to provide supplemental individual and family grant assistance for unmet needs. This bill would also specify that the grants are for payment of claims for losses or damages occurring during the incident period of a presidential disaster declaration.

#### Ch. 351 (AB 3050) Committee on Health. Health facilities.

(1) Existing law, commencing January 1, 2002, requires each hospital and freestanding ambulatory surgery clinic to file, with the Office of Statewide Health Planning and Development, specified reports containing various patient and health data information.

This bill would extend the operative date of these provisions to January 1, 2004.

(2) Existing law, commencing January 1, 2002, requires freestanding ambulatory surgery clinics to be charged a fee established by the office consistent with specified statutory requirements.

This bill would impose this requirement commencing in calendar year 2004.

(3) The existing California Health Facility Construction Loan Insurance Law provides, without cost to the state, an insurance program for health facility construction, improvement, and expansion loans in order to stimulate the flow of private capital into health facilities construction, improvement, and expansion, and in order to meet the need for new, expanded, and modernized public and nonprofit health facilities. Existing law imposes various functions and duties on the Office of Statewide Health Planning and Development with respect to the administration of this program.

Existing law authorizes the office to take certain steps in the event of a borrower's default.

This bill would also authorize the office to require the lender or borrower's bond trustee to accelerate the borrower's debt and maturity dates of the bonds, if any. It would require the office to pay the lender or borrower's bond trustee the full amount of the remaining principal of the loan and other prescribed amounts.

(4) The bill would eliminate an obsolete provision of law and would also make various technical, nonsubstantive, and conforming changes to all of the above provisions.

Ch. 352 (SB 1404) Chesbro. State hospitals for the mentally disordered: patient funds: self-help groups.

Existing law imposes various functions and duties on the State Department of Mental Health with respect to the administration of state institutions for the mentally disordered. Existing law provides that the institutions over which the department has jurisdiction are Atascadero, Metropolitan, Napa, and Patton State Hospitals.

Existing law authorizes the Director of Mental Health to deposit funds of patients in trust, as specified. Existing law also authorizes the hospital administrator, with the consent of the patient, to deposit the interest or increment on the funds of the patient in the state hospital in a special fund for each state hospital, designated the "Benefit Fund," and requires the hospital administrator to be the trustee of the fund. Existing law authorizes the hospital administrator, with the approval of the Director of Mental Health, to expend moneys in the fund for the education or entertainment of the patients of the institution.

This bill would require that the hospital administrator take into consideration the recommendations of representatives from patient government before expending any moneys in the fund. This bill would also require the Director of Mental Health to provide to the Legislature, no later than August 15 of each year, a summary data sheet containing information on how the benefit fund at each state hospital was expended in the previous fiscal year.

Existing law requires that each patient in a state hospital for the mentally disordered who has resided in the state hospital for a period of at least 30 days be paid a specific amount of aid for his personal and incidental needs.

This bill would require that, in addition, each indigent patient, as defined, be allotted materials and postage, as specified, for letter writing at no cost to the patient, and that the hospital administrator ensure that additional postage and writing materials are available for purchase on hospital grounds.

Existing law requires the department to maintain a statewide mental health prevention program directed toward reducing the need for utilization of the treatment system and the development and strengthening of community support and self-help networks.

This bill would require the department to support the establishment of self-help groups at state hospitals.

Ch. 353 (SB 1499) Johnson. Child care: court records.

Existing law requires that the State Department of Social Services reopen an investigation into a licensed child day care facility when any person provides the department with a certified copy of a court record in which a judicial officer has determined that a child's injury may have been inflicted while in the custody of a day care provider.

Existing law also requires the department to provide a copy of the court record to the child protective services agency in the county in which the incident occurred.

This bill would delete the requirement that the department provide a copy of the court record to the appropriate child protective services agency.

Ch. 354 (SB 1505) Kuehl. Child welfare worker training.

Existing law generally regulates services for the care of children, including vesting the State Department of Social Services with various responsibilities relating to the placement and care of children in the state foster care system. Existing law requires the department to select and award a grant to a private nonprofit or public entity to establish and implement statewide coordinated training programs for county child protective service social workers that address critical issues affecting the well-being of children. Existing law specifies the subjects to be included in that training.

This bill would require the department to include teen dating violence among the subjects covered by the training programs.

Ch. 355 (SB 1650) Alpert. Youth mentoring and development programs.

Existing law provides various services for youth in the state.

This bill would make legislative findings relative to various factors affecting youth in California, and the benefits of mentoring and other positive developmental relationships between youth and adults, to address these concerns. The bill would declare that it is a goal of the Legislature to give every young person in California access to a quality mentoring relationship, and would also declare legislative intent with respect to the conduct of youth mentoring programs in the state.

Ch. 356 (SB 1809) Machado. Clinical laboratories.

Existing law provides for the licensure and regulation of clinical laboratories and various clinical laboratory health care personnel by the State Department of Health Services.

This bill would create a new license category for a medical laboratory technician who would be authorized to perform waived and moderate complexity tests or examinations while working under the supervision of a physician and surgeon or certain other licensed persons, and to report the test results. The bill would require the department to issue a medical laboratory technician license to each person who pays the license fee and meets specified licensure requirements. The bill would also require the department to adopt emergency regulations to implement licensure of medical laboratory technicians as soon as possible, and would authorize the department to establish licensing and renewal fees that do not exceed the costs of the department for the program.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 357 (SB 1880) Machado. Insurance: multiple employer welfare arrangements.

Existing law governing the business of insurance provides for the certification by the Insurance Commissioner of self-funded or partially self-funded multiple employer welfare arrangements if certain requirements are met, including maintaining a specified cash surplus. In general, multiple employer welfare arrangements permit employer members of trade associations to create trust funds for the purpose of offering and providing health care benefits to their employees. Existing law provides for the repeal of these provisions relating to multiple employer welfare arrangements on January 1, 2004.

This bill would delete the January 1, 2004, repeal of the provisions relating to multiple employer welfare arrangements. The bill would increase the amount of the cash surplus employer welfare arrangements are required to maintain in order to be eligible for certification. The bill would require employer welfare arrangements to file annually with the commissioner an actuarial opinion that satisfies certain requirements.

Ch. 358 (SB 1974) Polanco. Insurance policies.

Existing law provides for the regulation of insurers by the Insurance Commissioner. Existing law requires an insurance policy to meet certain requirements, including specifying the parties to an insurance contract and the risks insured against.

This bill would authorize the commissioner to approve insurance policies and associated materials in languages other than English if certain conditions are satisfied.

Ch. 359 (AB 1482) Richman. Regional solid waste agencies.

The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. Under existing law, the act requires each city, county, city and county, and regional agency, if any, to develop a source reduction and recycling element of an integrated waste management plan. Those entities are required to divert, on and after January

1, 2000, 50% of the solid waste from disposal or transformation, through source reduction, recycling, and composting subject to the element, except as specified. Existing law authorizes the board to issue an order of compliance with a schedule for achieving compliance, if the board finds that the city, county, city and county, or regional agency has failed to implement its source reduction and recycling element or its household hazardous waste element. Existing law authorizes the board to impose various administrative penalties for failure to comply with the act.

Existing law authorizes a city or county to form a regional agency with another city or county for the purpose of complying with the integrated waste management program. Existing law allows the agreement that establishes a regional agency to apportion the civil penalties that may be imposed for a failure to submit an adequate plan or to implement the plan element if the total amount of the civil penalties imposed against the regional agency is equivalent to the sum of the penalties that may be imposed against each city or county that is a member of the regional agency.

This bill would authorize the agreement to provide that a city or county is subject to the portion of a penalty imposed on the regional agency that is in proportion to the city's or county's responsibility for the failure to implement a source reduction and recycling element or hazardous waste element. The bill would require the regional agency to provide written notice and the opportunity for a hearing before assessing the city or county a proportion of the penalty. The bill would specify that the bill would not affect the authority of the board to impose a penalty pursuant to other provisions of existing law.

Ch. 360 (AB 2681) Maldonado. School pupil activity buses: passenger restraint systems.

Existing law requires the State Board of Education to adopt regulations to require a passenger in a schoolbus equipped with passenger restraint systems, as specified, to use a passenger restraint system so that the passenger is properly restrained.

This bill would apply these provisions to type 2 school pupil activity buses.

Existing law requires that schoolbuses manufactured on or after January 1, 2002, and purchased or leased for use in California have a "passenger restraint system," as defined, at all designated seating positions, unless specifically prohibited by the National Highway Transportation Safety Administration.

This bill would apply these provisions to type 2 school pupil activity buses manufactured on or after July 1, 2004. Because a violation of this provision would be a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 361 (SB 56) Escutia. Pupil health: nutrition.

Existing law requires the State Department of Education to establish a pilot program in which 10 high schools, middle schools or any combination thereof voluntarily adopt certain food sale requirements. Existing law requires, commencing January 1, 2004, the sale of all foods on school grounds at elementary and middle schools, as defined, and at middle and high schools participating in the pilot program, to be approved by the person or persons designated for this purpose by the school district, subject to funding being appropriated in the Budget Act of 2003. Existing law authorizes a school district maintaining at least one middle school to convene a Child Nutrition and Physical Activity Advisory Committee that would develop and recommend a school district policy on nutrition and physical activity to the governing board of the school district for its adoption.

This bill would require schools that apply and are selected to participate in the pilot program to comply with those food sale requirements, and would make various technical and

clarifying changes in related provisions. The bill would subject operation of the existing law to funding being appropriated on or before January 1, 2004.

Ch. 362 (SB 844) Chesbro. Veterans' Home of California.

The Budget Act of 2000 appropriated specified amounts for capital outlay projects at the Veterans' Home of California, Yountville, including the renovation of and construction at the Lincoln Theater at the home.

This bill would appropriate \$5,790,000 to the Veterans' Home of California, Yountville for renovation and construction projects for the Lincoln Theater at the home.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 363 (SB 1697) O'Connell. Public contracts: purchase of recycled products.

Existing law requires the Legislature to meet certain goals for the procurement or purchase of recycled products, as defined.

This bill would include antifreeze within the definition of "recycled product" for these purposes.

Existing law requires contractors contracting with the Legislature or state agencies to certify in writing, under penalty of perjury, whether the materials, goods, or supplies offered contain the minimum percentage of recycled product required by law.

This bill would make contracts for the provision of antifreeze defined as recycled products subject to this requirement.

By creating a new crime of perjury, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 364 (AB 400) Simitian. Ballot designations.

Existing law allows a candidate for elective office, with the exception of specified judicial offices, to designate, in not more than 3 words, the principal professions, vocations, or occupations of the candidate currently or during the preceding calendar year.

This bill would provide that a candidate's ballot designation as "community volunteer" shall constitute a valid principal vocation or occupation for purposes of existing law, if not otherwise in violation of any of the restrictions set forth in that law, and subject to specified conditions. It would require the Secretary of State to adopt implementing regulations.

Ch. 365 (AB 1757) Leslie. Official state gold rush ghost town: Bodie.

Under existing law, there is no official state ghost town.

This bill would designate Bodie as the official state gold rush ghost town.

Ch. 366 (AB 1900) Nakano. Labor History Week.

Existing law requires all instructional materials adopted by any governing board for use in schools to be, to the satisfaction of the governing board, accurate, objective, current, and suited to the needs and comprehension of pupils at their respective grade levels.

This bill would deem the first week of April to be Labor History Week and would encourage school districts to commemorate that week with appropriate educational exercises that make pupils aware of the role that the labor movement has played in shaping California and the United States.

This bill would state that it is the intent of the Legislature that California labor history be considered in the next cycle in which the history/social science curriculum framework and its accompanying instructional materials are adopted.

Ch. 367 (AB 2022) Longville. Courthouse construction: filing fee surcharges.

Existing law authorizes San Bernardino County to impose a surcharge on certain filing fees, except in limited civil cases, for purposes of funding its Courthouse Construction Fund.

This bill would eliminate the exception applicable to limited civil cases and authorize specific uses of the county's Courthouse Construction Fund. The bill would also make technical, nonsubstantive changes.

Ch. 368 (AB 2118) Dickerson. Cal-OSHA: volunteer firefighters.

Existing law, effective January 1, 2002, provides that the California Occupational Safety and Health Act applies to volunteer firefighters.

This bill would delay the applicability of the act as to volunteer firefighters until January 1, 2004, except as to claims that arose between January 1, 2002, and the effective date of this bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 369 (AB 2140) Simitian. Elder abuse.

Under existing law, any willful and unlawful use of force or violence on the person of another is battery, a misdemeanor punishable by a fine of up to \$2,000, imprisonment in a county jail of up to 6 months, or by both that fine and imprisonment. Under existing law, battery on specified classifications of victims, or under specified circumstances, are subject to specified, increased penalties.

This bill would increase the maximum period of imprisonment in a county jail to one year for a battery committed against the person of an elder or a dependent adult, with knowledge that he or she is an elder or a dependent adult.

Under existing law, a person is guilty of a misdemeanor when, under circumstances or conditions other than those likely to produce great bodily harm or death, he or she willfully causes or permits any elder or a dependent adult, with knowledge that he or she is an elder or a dependent adult, to suffer unjustifiable physical pain or mental suffering. Under existing law, it is also a misdemeanor for a person, having the care or custody of any elder or dependent adult, to willfully cause or permit the person or health of the elder or dependent adult to be injured or to willfully cause or permit the elder or dependent adult to be placed in a situation in which his or her person or health may be endangered. Under existing law, the maximum punishment for either of these offenses is a fine of \$1,000, 6 months in a county jail, or both that fine and imprisonment.

This bill would increase the maximum punishment for a 2nd or subsequent commission of these offenses to a fine not to exceed \$2,000, imprisonment in a county jail not to exceed one year, or both that fine and imprisonment.

By expanding county jail punishment for the above criminal offenses, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 370 (AB 2283) La Suer. Written reports: cost.

(1) Existing law requires that any document or written report prepared for or under the direction of a state or local agency that is prepared in whole or in part under a contract or a subcontract by nonemployees of the agency contain, where the work performed by the nonemployees exceeds \$5,000, the numbers and dollar amounts of all contracts and subcontracts relating to the preparation of the document or written report. Existing law also provides that when multiple documents or written reports are the subject or product of the contract, this disclosure section may also contain a statement that indicates that the total contract amount represents compensation for the multiple documents or written reports.

This bill would require, rather than permit, the disclosure of the total cost for multiple documents or written reports.

(2) Existing law requires various reports to be prepared by state and local agencies.

This bill would also require a state or local agency to consider cost reduction options in preparing any written report.

(3) Existing law authorizes and directs the Department of General Services to study the subject of administrative adjudication and to report its recommendations to the Governor and the Legislature at the commencement of each general session.

This bill would delete the requirement that the department make its report at the commencement of each general session.

Ch. 371 (AB 2368) Robert Pacheco. Conduct of elections.

(1) Existing law authorizes the legislative body of a city to submit to the voters, without a petition, a proposition for the repeal, amendment, or enactment of any ordinance, and authorizes the proposition to be submitted, or a special election to be called, for the purpose of voting on the proposition.

This bill would require the election to be held not less than 88 days after the date of the order of election.

(2) Existing law requires a city elections official to fix and determine a reasonable date prior to an election after which no arguments for or against any city measure may be submitted for printing and distribution to the voters.

This bill would require the city elections official to fix a date 14 days from the calling of the election as a deadline, thereby imposing a state-mandated local program. This bill would make this provision inapplicable to a consolidated municipal election.

(3) Existing law authorizes an act required under the Elections Code to be performed on the next business day with the same effect as if it had been performed on the day appointed, when the last day for the performance of that act is a holiday.

This bill would further authorize a required act to be performed on the next business day with the same effect as if it had been performed on the day appointed, when on the last day the elections official's office is closed pursuant to a resolution or ordinance. This bill would make this provision inapplicable to a consolidated municipal election.

(4) Existing law requires the city governing body to meet on the 2nd Tuesday after the election to canvass the returns, subject to specified procedures, and install the newly elected officers. It permits the governing body, by resolution, to order the elections official to canvass the returns, subject to specified procedures, prior to the 2nd Tuesday after the election.

This bill would revise these procedures by requiring the municipal elections official to conduct the canvass, subject to specified provisions of law, and to certify the results to the governing body. It would revise the timelines for certification of results by the elections official and for the declaration and installation of newly elected officers by the governing body in municipal and consolidated elections. This bill, by adding to the duties of municipal elections officials, would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 372 (AB 2544) Bill Campbell. Contractors: home improvement salespersons.

Existing law, the Contractors' State License Law, authorizes the Contractors' State License Board to conduct all functions and duties relating to the licensing, regulation, and discipline of licensees.

Existing law requires the board to submit a report to the Governor and the Legislature regarding board transactions, including a complete statement of receipts and expenditures during the preceding biennium.

This bill would require the board to post specified information on its Web site each week regarding home improvement salesperson registration applications.

Ch. 373 (AB 2777) Nation. County employees' retirement: death benefits.

Under the County Employees Retirement Law of 1937, any death benefits, optional retirement allowances, or survivor's allowances accorded to a spouse, as specified, may be accorded to a domestic partner in San Mateo County, subject to approval by the county board of supervisors and certain limitations.

This bill would also make these provisions applicable to Los Angeles County, Santa Barbara County, and Marin County, subject to registration with the Secretary of State, and a current Affidavit of Domestic Partnership, if required by the county. The bill would also delete a redundant provision of law.

Ch. 374 (AB 2979) Committee on Revenue and Taxation. Franchise Tax Board: administration of taxes.

The Personal Income Tax Law provides a credit against the taxes imposed by that law to residents for specified taxes paid to another state on income derived from sources within that state.

This bill would provide that income derived from sources within that state shall be determined by applying specified nonresident sourcing rules.

The Personal Income Tax Law generally provides that whenever a joint income tax return is filed by a husband and wife the liability for the tax is joint and several. Existing law allows a court in a proceeding for dissolution of marriage, under specified conditions, to revise the income tax liabilities of the husband and wife. Under existing law, a court may not revise the income tax liabilities of a husband and wife if the gross income reported on the joint return exceeds \$50,000 or if the liability of the relieved spouse exceeds \$2,500.

This bill would preclude a court from revising the joint and several liabilities of a husband and wife if the gross income reported on the joint return exceeds \$150,000, or if the liability of the relieved spouse exceeds \$7,500.

The Gonsalves-Deukmejian-Petris Senior Citizens Property Tax Assistance Law provides for payment of assistance by the Franchise Tax Board to claimants, whether those claimants own or rent their residence, in accordance with schedules that reduce the amount of assistance provided as the amount of a claimant's household income increases along a specified scale of household income amounts.

This bill would also make technical, clarifying corrections to that law.

Existing law provides for the administration of income and bank and corporation tax laws.

This bill would make technical changes to those laws by deleting obsolete language, providing clarification, and correcting erroneous cross-references.

Ch. 375 (AB 2982) Committee on Public Employees, Retirement and Social Security. State teachers' retirement.

(1) Under existing law, "creditable service," for purposes of calculating retirement benefits under the Defined Benefit Program of the State Teachers' Retirement Plan, is defined to include, among other things, performance of certain school activities related to the instructional and guidance program of a school, if those activities are performed within normal work hours, as specified.

This bill would include those activities within the definition of creditable service, irrespective of when the activities are performed.

(2) The Teachers' Retirement Law defines "full time" as the days or hours of creditable service the employer requires to be performed by a specified class of employees in order to earn "earnable compensation," as specified. Existing law further defines "improvement factor" for the purposes of the Defined Benefit Supplement Program to mean an increase of 2% in monthly annuities, to be applied as specified.

This bill would require certain collective bargaining agreements or employment agreements to specify the number of hours of creditable service that equals "full time" and make reference to certain provisions. This bill would delete the definition of improvement factor with regard to the Defined Benefit Supplement Program.

(3) Existing law authorizes substitute teachers and other part-time employees who perform creditable service, as defined, to elect membership in the Defined Benefit Program of the State Teachers' Retirement Plan, which election is irrevocable and remains in effect until the member terminates employment and receives a refund of accumulated contributions.

This bill would provide that the membership election remains in effect only until the member terminates employment.

(4) Under existing law, specified provisions of the Teachers' Retirement Law relating to the Defined Benefit Program apply to a nonmember spouse, as defined, as if he or she were a member of the program.

This bill would additionally make specified provisions of that law relating to the Defined Benefit Supplement Program applicable to a nonmember spouse, as defined. This bill would also clarify that, upon service retirement, a nonmember spouse is entitled to receive a retirement benefit based on the balance of credits in the nonmember spouse's Defined Benefit Supplement account, as specified. The bill would also make explicit the amount and procedure for payment of annuities upon the death of a member, a nonmember spouse, or an annuity beneficiary under the Defined Benefit Supplement Program.

(5) Existing law authorizes school boards to establish regulations to allow an employee to reduce his or her workload to part time and still receive full-time service credit under the Defined Benefit Program of the State Teachers' Retirement Plan if, among other things, the employee has not had a break in service during the 5 years immediately preceding the reduction in workload.

This bill would require that an employee have a minimum of 10 years of credited service, and would provide that, with respect to an employee who reinstates from retirement, his or her period of retirement shall be considered a break in service.

(6) Existing law provides for a disability allowance and disability retirement allowance for specified members of the Defined Benefit Program of the State Teachers' Retirement Plan. Existing law allows the Teachers' Retirement Board to authorize payment of a disability allowance, and permits the member to apply for a disability retirement allowance, if, among other things, the application is made during specified periods. Existing law requires that specified disability allowances and disability retirement allowances be reduced in relation to specified benefits paid by other public systems.

This bill would clarify when application may be made for a disability allowance or a disability retirement allowance and would clarify the circumstances under which these payments may be reduced. The bill would also make technical changes regarding how supplemental earnings of a member retired for disability are calculated. The bill would also require that a member who is receiving a disability allowance or a disability retirement allowance also receive a disability benefit under the Defined Benefit Supplement Program, as specified. The bill would specify the circumstances under which certain forms of payment may be made when the member elects to receive a disability benefit as an annuity. The bill would clarify the calculation of the date upon which a member first became disabled when the member attempts to return to work and has a recurrence of the original disability.

(7) The Teachers' Retirement Law prescribes the requirements a member must satisfy, until January 1, 2003, for a service retirement and provides exemptions from the postretirement earning limitation for a member who is appointed to certain positions.

This bill would extend the operation of these provisions to January 1, 2008.

(8) Existing law requires that an annuity contract and custodial account be offered to specified employees who are members of the Defined Benefit Program of the State Teachers' Retirement Plan. Existing law permits the Teachers' Retirement Board to develop one or more deferred compensation plans, as specified.

This bill would clarify the circumstances under which a 3rd-party administrator may provide investment options and the employees to whom a deferred compensation plan may be offered.

(9) Existing law provides a Medicare Premium Payment Program for specified retired members of the Defined Benefit Program of the State Teachers' Retirement Plan.

This bill would authorize the reduction, as specified, of a member's benefit under the Defined Benefit Program to recover an overpayment under the Medicare Premium Payment Program and would make a technical change.

(10) Existing law prescribes service retirement and disability retirement benefits for members of the Defined Benefit and Defined Benefit Supplement Programs of the State Teachers' Retirement Plan who retire following reinstatement and for members of those programs who were formerly members of the San Francisco local system. Existing law also provides a Cash Balance Benefit Program for certain part-time employees.

This bill would make technical and clarifying changes to those provisions.

(11) Existing law establishes, until January 1, 2011, the Retirement Option Program within the Defined Benefit Program of the State Teachers' Retirement Plan. This program permits a member who retires for service on or after January 1, 2002, and who has reached normal retirement age to elect to receive a lump-sum payment and an actuarially reduced monthly allowance pursuant to its provisions.

This bill would revise and recast these provisions. The bill would prohibit the application of the lump-sum payment for the purpose of redepositing previously refunded retirement contributions, as specified, with a certain exception.

(12) This bill would provide that any other act enacted during the 2002 calendar year that amends, adds, renumbers, or repeals a provision that this bill also amends, adds, renumbers, or repeals shall supersede this bill.

Ch. 376 (AB 3044) Committee on Higher Education. University of California: rules and regulations: misdemeanor.

Existing law establishes the University of California as a public trust administered by the Regents of the University of California. Existing law authorizes the regents to adopt rules and regulations in order to exercise the regents' powers and duties.

This bill would provide that, to the extent the regents adopt or amend rules and regulations pertaining to the governance and maintenance of the buildings and grounds of the University of California, addressing the conduct of persons who are not students, officers, or employees of the University of California when that conduct is a threat to persons or property or constitutes interference with functions or activities of the university, violations of those rules or regulations would be misdemeanors. Because this bill would authorize the creation of new crimes, this bill would impose a state-mandated local program.

The bill would provide that its provisions may not be utilized to impinge upon the lawful exercise of constitutionally protected rights of freedom of speech or assembly, or the constitutionally protected right of personal privacy.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 377 (SB 1265) Alpert. Domestic violence incident report.

Existing law requires state and local law enforcement agencies to provide one copy of all domestic violence incident reports, one copy of all domestic violence incident report face sheets, or both, to a victim of domestic violence, upon request. Existing law requires persons requesting these copies to present state or local law enforcement with identification at the time a request is made.

This bill would also require state and local law enforcement agencies to provide those documents to a representative of the victim, as defined, if the victim is deceased. The bill would require any person requesting those documents to present his or her identification, as specified, and, if that person is a representative of the victim, a certified copy of the death certificate or other satisfactory evidence of the death of the victim. By imposing additional duties on local officials, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 378 (SB 1349) Torlakson. Highways: Safety Enhancement-Double Fine Zones.

(1) Existing law, until January 1, 2004, requires the Department of Transportation, in consultation with the Department of the California Highway Patrol, to develop specified pilot projects to designate and identify certain highway segments as "Safety Enhancement-Double Fine Zones" and impose increased fines for traffic violations occurring within these zones. Under existing law, a segment of State Highway 4 between the intersection with the Cummings Skyway and the intersection with Route 80 is designated for participation in the project.

This bill would delete this particular segment of State Highway 4 from the project and would require the department to develop a pilot project for a designated segment of that same highway between the city limits of Brentwood and the Contra Costa-San Joaquin county line. The bill would also require the department to develop a pilot project for a designated segment of State Highway Route 101.

(2) Existing law also requires the County of Monterey to submit to the Department of Transportation before October 1, 2002, an evaluation of a pilot project that includes a segment of Carmel Valley Road.

This bill would extend the date required for the submission of that evaluation to January 1, 2004.

Ch. 379 (AB 425) Oropeza. 2002–03 Budget Act. <sup>1</sup>

This bill would make appropriations for support of state government for the 2002–03 fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 380 (AB 797) Shelley. Public records: confidentiality.

(1) Existing law establishes a program until January 1, 2005, known as "Address Confidentiality for Victims of Domestic Violence and Stalking" that authorizes specified persons to complete an application containing specified information in person at a community-based victims' assistance program to be approved by the Secretary of State for the purpose of enabling state and local agencies to respond to requests for public records without disclosing a program participant's residence address contained in any public record,

including the program participant's voter registration, and requires the Secretary of State to act as that person's agent for service of process and to designate a substitute mailing address for program participants pursuant to specified procedures that state and local agencies are required to use at the request of a program participant. Under existing law, any person who makes a false statement in an application is guilty of a misdemeanor and any person who is granted confidentiality pursuant to these provisions may file a new affidavit of voter registration or reregistration and be considered an absent voter for subsequent elections until the county elections official is notified otherwise by the Secretary of State or the voter.

This bill would extend the operation of the absent voter provisions and the program described above to January 1, 2008, and would, until that date, create a similar program entitled the "Address Confidentiality for Reproductive Health Care Services Providers, Employees, Volunteers, and Patients" program to protect the confidentiality of home address information of reproductive health care services providers, employees, volunteers, and patients. The Secretary of State would be required to approve an application of a program participant for a substitute address to be designated by the secretary. The secretary would also be required to charge program participants a fee to defray the actual costs of maintaining the program and to reimburse the General Fund, as specified. The bill would establish the Address Confidentiality for Reproductive Health Care Services Fund and would provide that moneys in that fund, upon appropriation by the Legislature, are available for the administration of the program.

By imposing new duties on local public officials and creating new crimes and by extending the operation of an existing crime, this bill would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 381 (AB 1400) Cogdill. Mixed solid waste composting facility.

(1) Existing law, the California Integrated Waste Management Act of 1989, establishes an integrated waste management program administered by the California Integrated Waste Management Board. Under existing law, the act requires each city, county, city and county, and regional agency, if any, to develop a source reduction and recycling element of an integrated waste management plan containing specified components. On and after January 1, 2000, the element is required to divert 50% of the solid waste subject to the element, except as specified, through source reduction, recycling, and composting activities.

This bill would require the County of Mariposa, by July 1, 2003, to submit a report to the board concerning the county's progress in funding, constructing, and operating a mixed solid waste composting facility in cooperation with Yosemite National Park, thereby imposing a state-mandated local program by imposing a new duty upon the county.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would make these provisions inoperative on July 1, 2003, and would repeal them as of January 1, 2004.

Ch. 382 (AB 1860) Migden. Sexual assault victim: pregnancy counseling: emergency contraception.

Existing law sets forth minimum standards for the examination and treatment of victims of sexual assault, including the taking of a baseline gonorrhea culture, a syphilis serology, and specimens for a pregnancy test, if indicated by the history of contact.

This bill would provide, in addition, that where indicated by the history of contact, a female victim of sexual assault shall be provided with the option of postcoital contraception by a physician or other health care provider, and postcoital contraception shall be dispensed by a physician or other health care provider upon the request of the victim.

Ch. 383 (AB 2005) Nakano. Vessels: operation: violations.

(1) Existing law prohibits any person from operating a personal watercraft at any time between the hours from one-half hour after sunset to one-half hour before sunrise, except as specified. A violation of this provision is an infraction.

This bill, instead, would prohibit any person from operating a personal watercraft at any time between the hours from sunset to sunrise. The bill thereby would impose a state-mandated local program by expanding the definition of an existing infraction.

(2) Existing law, with certain exceptions, requires any person on board a personal watercraft or any person being towed behind a vessel on water skis, an aquaplane, or similar device to wear a type I, II, III, or V Coast Guard-approved personal flotation device. A person who violates this requirement is guilty of an infraction.

This bill would exempt from that requirement a person on an underwater maneuvering device, as defined, intended for use by a submerged swimmer.

(3) Existing law requires that a person convicted of violating certain provisions relating to the negligent or reckless operation of a vessel be ordered by the court to complete and pass a boating safety course approved by the Department of Boating and Waterways.

This bill would expand the list of prohibited activities that would require the successful completion of the boating safety course approved by the department.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 384 (AB 2194) Jackson. Obstetrics and gynecology residency requirements.

Existing law, the Therapeutic Abortion Act, authorizes the performance of a therapeutic abortion by a physician and surgeon subject to specified procedures and requirements.

This bill would require all residency programs in obstetrics and gynecology to comply with the program requirements of the Accreditation Council for Graduate Medical Education.

Ch. 385 (SB 1301) Kuehl. Reproductive Privacy Act.

(1) Existing statutory law, the Therapeutic Abortion Act, contains various provisions regarding abortion, including a requirement that an abortion may only be performed by the holder of a physician's and surgeon's certificate, under specified conditions. The act also includes requirements that prior approval be obtained for each abortion by a committee of medical staff, with specified membership, who must determine either that continuation of the pregnancy would impair the physical or mental health of the mother, or that the pregnancy resulted from rape or incest. Existing law defines "mental health" for these purposes.

Certain provisions of the act, including, but not limited to, the above requirements relating to medical committee approval for abortions, and the statutory definition of mental health, have been held unconstitutional by the courts.

This bill would delete the above provisions of the Therapeutic Abortion Act, among others, including the name of the act. The bill would enact the Reproductive Privacy Act,

which would provide that every individual possesses a fundamental right of privacy with respect to reproductive decisions, including (A) the fundamental right to choose or refuse birth control, and (B) the fundamental right to choose to bear a child or obtain an abortion.

This bill would provide that the state shall not deny or interfere with a woman's fundamental right to choose to bear a child or obtain an abortion prior to viability of the fetus, as defined, or when necessary to protect her life or health. The bill would specify the circumstances under which the performance of an abortion is deemed unauthorized.

(2) Under existing law, the procuring or aiding, abetting, attempting, agreeing, or offering to procure an unauthorized abortion constitutes unprofessional conduct of a licensee under the Medical Practice Act, absent compliance with the Therapeutic Abortion Act.

This bill would instead deem it unprofessional conduct to fail to comply with the Reproductive Privacy Act in connection with the above activities.

(3) Under existing law, a person is criminally liable, and subject to possible imprisonment, if he or she performs or assists in performing a surgical abortion if he or she does not have a valid, unrevoked, and unsuspended license to practice as a physician and surgeon, or other certificate that authorizes him or her to perform or assist in performing a surgical abortion.

This bill would instead provide that a person is criminally liable, and subject to possible imprisonment, if he or she performs or assists in performing a surgical abortion if he or she does not have a valid, unrevoked, and unsuspended license to practice as a physician and surgeon, or if he or she assists in performing a surgical abortion without a valid, unrevoked, and unsuspended license or certificate obtained in accordance with some other provision of law that authorizes him or her to perform the functions necessary to assist in performing a surgical abortion. This bill would also create a state-mandated local program by extending criminal liability to a person who performs or assists in performing a nonsurgical abortion without the appropriate licensing or certification.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 386 (SB 2098) Committee on Health and Human Services. Health.

(1) Existing law, the Toxic Mold Protection Act of 2001, imposes various disclosure requirements on landlords, sellers, renters, transferors, and tenants of commercial or industrial real property with respect to the existence of mold conditions. Existing law requires the State Department of Health Services to adopt standards and develop guidelines regarding exposure limits and remediation of toxic mold.

This bill would provide that these disclosure requirements shall not apply until the January 1 or July 1 that occurs at least 6 months after the department adopts the standards and develops the guidelines.

(2) Existing law, the State Department of Health Services Cooperative Agreement Act, provides for the establishment of cooperative agreements between the department and other public and private entities for the purposes of, among other things, simplifying the administration of public health programs by the department. The act requires cooperative agreements to be subject to review and approval by the Department of General Services with certain exceptions. These exceptions include, for allowable cost agreements, changes in line item budgets of up to 10% of the annual total, not to exceed \$50,000, so long as the contract does not increase or decrease.

This bill would increase the amount of changes permissible with respect to these line item budgets to 15% of the annual total, not to exceed \$100,000. It would also require that this maximum amount be assessed annually and automatically adjusted in accordance with cost-of-living indexes.

(3) This bill, in addition, would also make various technical, nonsubstantive changes.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Ch. 387 (AB 1774) Canciamilla. Tide and submerged land: Straits of Carquinez: land restrictions.

Existing law grants to the City of Martinez, and to its successors, all right, title, and interest of the state held by virtue of its sovereignty in and to 3 specified parcels of land situated in the County of Contra Costa, and provides that one of those parcels, identified as Parcel "A", shall be held by the city and its successor in trust for specified uses, in which there is general, statewide interest, and upon express conditions. Those conditions include, among other things, a requirement that Parcel "A" be used only for marina spoils and spoil removal, parking, boat storage, chandlery, recreation, landscaping, and any other use permitted by the Martinez Waterfront Land Use Plan, and expressly prohibits the placement of any building or structure on Parcel "A" that exceeds 20 feet in height.

This bill would eliminate the 20 feet height limit on a building or structure placed on land in Parcel "A".

Ch. 388 (AB 1821) Lowenthal. Civil liability: donated fire protection equipment.

Existing law provides that no food facility that donates any food that is fit for human consumption at the time it was donated to a nonprofit charitable organization or a food bank is liable for any damage or injury resulting from the consumption of the donated food, with certain exceptions.

This bill would provide that, except for damage or injury proximately caused by a grossly negligent act or omission or willful or wanton misconduct of the donor, no public employee or public entity, including, but not limited to, a fire department, a fire protection district, or the Department of Forestry and Fire Protection, that donates fire protection apparatus or equipment to a volunteer fire department, volunteer fire protection district, or volunteer fire company is liable for any damage or injury that results from the use of that apparatus or equipment by the recipient fire department, fire protection district, or fire company.

The bill also would require the donor of the fire protection apparatus or equipment to disclose in writing to the recipient fire department, fire protection district, or fire company any known damage to, or deficiencies in, the apparatus and equipment.

Ch. 389 (AB 1857) Wayne. Administrative procedures.

(1) Existing law provides that the regulations adopted, amended, or repealed by the Fish and Game Commission are not subject to specified time periods prescribed in the Administrative Procedure Act relating to the adoption, amendment, or repeal of regulations.

This bill would further exempt the commission's regulations from the time period for adding specified documents to the rulemaking file after publication of the notice of the proposed regulatory action, where the state agency relies on the document in proposing the action.

(2) Existing law requires that every state agency subject to the act that maintains an Internet Web site or similar forum for the electronic publication or distribution of written material is required to publish on that Web site or other forum specified information regarding a proposed regulation or regulatory repeal or amendment.

This bill would require this information to include the text of a proposed emergency adoption, amendment, or repeal of a regulation and the date it was submitted to the Office of Administrative Law for review and filing with the Office of Administrative Law.

It would also require that a document that is required to be published electronically pursuant to these provisions be posted within a reasonable time after issuance of the document and remain posted for at least 15 days after the rulemaking action is filed with the Secretary of State or notice of a decision not to proceed with the proposed action is published by the agency.

(3) Existing law requires every state agency subject to the act to submit, with the notice of the proposed adoption, amendment, or repeal of a regulation, an initial statement of reasons for proposing the adoption, amendment, or repeal of a regulation. Existing law also

requires that the initial statement of reasons include, among other things, a description of any reasonable alternatives the agency has identified or that have otherwise been identified and brought to the attention of the agency that would lessen any adverse impact on small business.

This bill would also require this statement of reasons to include the state agency's reasons for rejecting those reasonable alternatives.

(4) Existing law requires that the notice of the proposed amendment, adoption, or repeal of a regulation include the name and telephone number of the agency representative and designated backup contact person to whom inquiries concerning the proposed administrative action may be directed, as well as the name and telephone number of an agency person or persons designated to respond to questions on the substance of the proposed adoption, amendment, or repeal of a regulation.

This bill would delete the requirement for inclusion of the name and telephone number of an agency person or persons designated to respond to questions on the substance of the proposed adoption, amendment, or repeal of a regulation, but would, instead, require that if the agency representative receives an inquiry regarding the proposed action that he or she cannot answer, the agency representative shall refer the inquiry to another person in the agency for a prompt response.

(5) The bill would also make various technical or clarifying changes.

Ch. 390 (AB 1875) Nakano. Corporations: articles of dissolution.

The General Corporations Law sets forth procedures for the creation and dissolution of a corporation.

This bill would authorize the filing of articles of dissolution with the Secretary of State relative to the dissolution of a corporation that has not issued shares and would revise certain related provisions.

Ch. 391 (AB 2040) Diaz. Custodial officers: personnel records.

Existing law requires agencies that employ peace officers to establish a procedure for the investigation of complaints by the public against peace officers, provides for confidentiality of peace officer personnel records, as specified, and provides discovery procedures for peace officer personnel records, and other records pertaining to peace officers, as specified.

This bill would authorize agencies and departments employing custodial officers, as defined, to establish a procedure for the investigation of complaints by the public against those custodial officers, consistent with these provisions and for those same purposes. This bill would make conforming changes to those provisions providing discovery proceedings for those personnel records.

Ch. 392 (AB 2535) Diaz. Transportation congestion data.

Existing law grants the Department of Transportation the full possession and control of all state highways and imposes on the department the duty to improve and maintain those highways. Existing law requires the department to provide specified reports to the California Transportation Commission.

This bill would require the department, within existing resources, to collect, analyze, and summarize highway congestion data and make it available to specified agencies.

Ch. 393 (SB 406) Ortiz. Bioterrorism preparedness and other public health threats: federal funding.

Existing law provides for the allocation of state aid to the administrative bodies of qualifying local health departments according to a specified formula. Among other things, the formula provides for a minimum basic allotment to each local health jurisdiction of \$100,000 or \$0.212426630 per capita, whichever is greater, with the balance allotted on a per capita basis. Existing law specifies the purposes for which the allocated funds may be used.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would establish procedures and requirements to govern the allocation to, and expenditure by, local health jurisdictions of federal funding received for the prevention of, and response to, bioterrorist attacks and other public health emergencies. The bill would provide that these procedures apply only when local health jurisdictions are designated by a federal or state agency to manage the funds for public health preparedness and response to bioterrorist attacks and other public health emergencies, pursuant to a specified federally approved plan. The bill would require a local health jurisdiction receiving funds under these provisions to deposit the money in a special Local Public Health Preparedness Trust Fund.

This bill would provide that federal funding received by the State Department of Health Services for bioterrorism preparedness and emergency response is subject to appropriation in the annual Budget Act commencing with the 2003–04 fiscal year.

This bill would appropriate \$50,800,000 from the Federal Trust Fund to the department, half of which would be used for purposes of implementing these provisions and the other half of which would be used for purposes of allocating federal bioterrorism and public health preparedness funds to local health jurisdictions and overseeing that process, implementing state-level provisions of the federally approved collaborative state-local plan, and for hospital bioterrorism preparedness activities.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 394 (SB 1459) Romero. Practice of law.

Existing law provides that a person who practices law or holds himself or herself out as practicing or entitled to practice law is guilty of a misdemeanor if he or she is not an active member of the State Bar.

This bill would exempt from this provision a person who was authorized, pursuant to statute or court rule, to practice law in the state at the time he or she performed the act. The bill would also provide that the misdemeanor is punishable by up to one year in a county jail, or a fine of \$1,000, or both that fine and imprisonment. For a subsequent conviction, the bill would require confinement in a county jail for at least 90 days, except under specified circumstances, and would require that the court state the reasons for any lesser sentencing on the record.

Existing law provides that a person who holds himself or herself out as practicing or entitled to practice law is guilty of a crime punishable by imprisonment in the state prison or county jail if he or she has been (1) involuntarily enrolled as an inactive member of the State Bar, (2) suspended from membership from the State Bar, (3) disbarred, or (4) has resigned from the State Bar with charges pending.

This bill would provide that the penalties also apply if a person meeting that criteria practices or attempts to practice law.

Existing law provides that the willful failure of a member of the State Bar, or one who has resigned or been disbarred, to comply with an order of the Supreme Court, as specified, constitutes a crime punishable by imprisonment in the state prison or county jail.

This bill would make all of the above penalties cumulative to each other and to any other remedies or penalties provided by law.

Because this bill would expand certain crimes to include practicing or attempting to practice law, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 395 (SB 1588) Committee on Local Government. Mosquito abatement: pest abatement: vector control districts.

Existing law contains provisions relating to the establishment of mosquito abatement and vector control districts, including the formation of a district, the selection of a district

governing board, and the powers and duties of the board. Existing law requires the State Department of Health Services to certify government agency employees who handle, apply, or supervise the use of pesticides for public health purposes as vector control technicians and to establish continuing education requirements for those employees.

This bill would repeal these provisions and would enact the Mosquito Abatement and Vector Control District Law which would specify the procedures for district formation, procedures for the selection of the district board of trustees and officers, and the powers and duties of the board. The bill would also make other conforming changes.

The bill would require the State Department of Health Services to charge and collect nonrefundable examination fees for providing examinations to certify government agency employees as vector control technicians.

This bill would incorporate additional changes in Section 53750 of the Government Code proposed by SB 1961, to be operative if SB 1961 and this bill are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 396 (SB 1628) Sher. Resources: litigation.

(1) Existing law requires the Attorney General to represent the California Integrated Waste Management Board and the state in litigation concerning affairs of the board, unless the Attorney General chooses to represent another state agency that is a party to the action. In that case, the legal counsel of the board is required to represent the board.

This bill, instead, would authorize the board to (a) request the Attorney General to represent the board in addition to the other state agency, (b) contract for the services of private counsel, or (c) authorize the legal counsel of the board to represent the board. The bill would authorize the Attorney General to represent both the board and the other state agency upon receiving the written consent of both the board and the other state agency to that representation.

(2) Existing law requires the Attorney General to represent the State Water Resources Control Board and the state in litigation concerning affairs of the board, unless another state agency that is represented by the Attorney General is a party to the action. In that case, the legal counsel of the board is required to represent the board.

This bill, instead, would authorize the board to (a) request the Attorney General to represent the board, a regional water quality control board, or both, in addition to the other state agency, (b) contract for the services of private counsel for those purposes, or (c) authorize the legal counsel of the board to represent the board, or the regional board, or both. The bill would authorize the Attorney General to represent the board, regional board, or both, and the other state agency upon receiving the written consent of both the board and the other state agency to that representation.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 397 (SB 1685) Morrow. Schoolbus: warning light systems.

Existing law provides that a schoolbus driver shall operate an approved flashing amber light warning system, flashing red signal lights, and stop signal arm system, as specified. The schoolbus driver is required to do specified things when a schoolbus is stopped for the purpose of loading or unloading pupils in specified locations; and may not activate the amber light warning system, flashing red signal lights, and stop signal arm system in specified locations. A violation of these provisions is a crime, punishable as specified.

This bill would provide that the schoolbus driver shall deactivate the amber light warning system after reaching a schoolbus stop; would revise the locations and circumstances with respect to which the flashing amber light warning system, flashing red signal lights, and stop signal arm system may or may not be operated; and would make clarifying changes to the provisions. By creating new crimes or changing existing crimes, this bill would impose a state-mandated local program upon local governments.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 398 (SB 1687) Margett. Public contracts: bids: Internet.

Existing California public contract law encourages competition for public contracts and aids public officials in the efficient administration of public contracting. That law also provides for contracting and payment by electronic transmission.

This bill would authorize public entities to adopt methods and procedures to receive bids on public works or other contracts over the Internet, as provided.

Ch. 399 (SB 1875) Karnette. Senior citizens property tax assistance.

Under existing law, qualified persons 62 years of age or older who own or rent their homes may claim state funds to reimburse them for a portion of the property taxes paid on their homes. Existing law specifies requirements for filing a claim for this assistance.

This bill would revise that provision to authorize the Franchise Tax Board to prescribe, by regulation, the information necessary to constitute a valid claim.

Ch. 400 (SB 2036) Morrow. Los Alisos Water District.

(1) Existing law, the California Water District Law, provides for the formation of California water districts and grants to those districts the authority to provide water and sewage services. That district law generally requires the members of the board of a California water district, and the voters of that district, to be landowners. Existing law provides specific exceptions to the district law, including the method of elections for the Los Alisos Water District. That exception, among other things, requires the voters of the Los Alisos Water District and the directors to be residents and registered voters of the district.

This bill would repeal the specific election provisions applicable only to the Los Alisos Water District, thereby, among other things, requiring voters and directors of that district to be landowners, rather than residents, and making that district otherwise subject to the election provision applicable to districts governed by the district law. The bill would create additional duties on local officials regarding the conduct of that district election, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 401 (AB 1590) Simitian. Criminal procedure: search or seizure hearing.

Existing law provides with respect to a preliminary examination in a criminal case that the magistrate shall, upon motion of either party, exclude all potential and actual witnesses who have not been examined.

Existing law also authorizes either party to challenge the exclusion of any person under this provision and requires the magistrate, upon motion of either party, to hold a hearing, on the record, to determine if the person sought to be excluded is, in fact, a person excludable under this provision.

This bill would apply these provisions to a hearing held pursuant to a motion to return property or suppress evidence obtained as the result of a search or seizure. The bill would also make various technical changes.

Ch. 402 (AB 1883) Kelley. Recovery of property.

(1) Existing law, the Collateral Recovery Act, establishes the Bureau of Security and Investigative Services that is under the supervision and control of the Director of the Department of Consumer Affairs. Existing law authorizes the licensure and regulation of persons engaged in the business of repossessing personal property. Existing law provides that a violation of the act, including certain specific provisions, is a crime.

This bill would provide that a person who declares as true any material matter relative to the submission of an application for licensure, a qualification certificate, or application for registration that he or she knows to be false is guilty of a misdemeanor. The bill would require an applicant to sign his or her application for licensure and qualification certificate.

(2) Existing law requires that every office licensed as a repossession agency be under the direction of a qualified certificate holder and requires the certificate holder in charge of the office to spend over 51% of his or her time conducting business at that office during normal business hours.

This bill would instead require that a qualified certificate holder be in charge of only one office location.

(3) Existing law authorizes the director to suspend or revoke a repossession agency license, a qualification certificate, or registration if the director determines that a licensee or others specified, among other things, made any false statement or gave any false information concerning an application for license or a renewal or reinstatement of a license.

This bill would additionally authorize the director to suspend or revoke a repossession agency license, a qualification certificate, or registration if the director determines that a licensee or others specified, gave any false information concerning a qualification certificate or registration. The bill would require the application forms to contain a statement informing the applicant that a false or dishonest answer to a question may be grounds for denial or subsequent suspension or revocation of the license, qualification statement, or registration.

(4) Existing law provides that certain collateral is considered to be repossessed when a repossessor gains entry to the collateral or when the collateral becomes connected to a tow truck.

This bill would provide that a repossession of the collateral also occurs when the collateral becomes connected to the repossessor's tow vehicle, as defined.

Because this bill would place additional requirements on a person licensed under the Collateral Recovery Act, the violation of which is a crime, the bill would impose a state-mandated local program.

Existing law provides that a peace officer or magistrate may cause the removal and seizure of a vehicle, as specified. Existing law provides that a vehicle so seized may be impounded for 30 days. Existing law provides that the vehicle shall be released by the impounding agency to the legal owner or the legal owner's agent if certain conditions are met, including the presentation of certain documents which may be originals, photocopies, facsimiles, or electronic transmissions.

This bill would specify that the impounding agency shall not require that any of these documents be notarized.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 403 (AB 1932) Horton. Unemployment insurance: disability benefit claims.

Existing unemployment insurance law allows the Employment Development Department for good cause to reconsider any determination with respect to a disability benefit claim prior to filing an appeal therefrom.

This bill would also allow the reconsideration within 30 days after an appeal to an administrative law judge is filed.

**Ch. 404 (AB 2344) Correa. Pawnbrokers.**

Existing law regulates the sale and redemption of pledged property by pawnbrokers. Existing law requires a loan to which an original loan debit is applied to be processed as a new loan and deemed a new loan subject to loan origination fees, storage fees, and minimum fees when applicable.

This bill would allow a pledgor to pay all charges and interest due on the original loan in a form acceptable to the pawnbroker. The bill would also subject the new loan to allowable fees rather than minimum fees.

The bill would require that, following a request for redemption of the loan, if the property is stored off the business premises of a pawnbroker, the property be returned the next calendar day when the pawnbroker's store and the off business premise storage facility are open, not to exceed 2 business days. The bill would require a pawnbroker who stores property at a location other than the pawnshop to meet certain customer notification requirements regarding off-premises storage and redemption of property stored off-premises.

**Ch. 405 (AB 2973) Committee on Business and Professions. Regulation of businesses.**

(1) Existing law allows, under specified circumstances, the violation of certain provisions requiring a license or other authorization to engage in a business or profession to be charged as an infraction. Under existing law, these provisions will be repealed on January 1, 2003.

This bill would extend the operation of these provisions to January 1, 2008.

(2) Existing law requires the Director of Consumer Affairs to report to the Governor and Legislature on specified matters and to disseminate certain information to the public.

This bill would recast provisions pertaining to these reporting responsibilities and would delete the director's duty to disseminate particular information to the public.

(3) Existing law requires the Dental Board of California, the Acupuncture Board, the Contractors' State License Board, and the State Board of Guide Dogs to report specified information to the Governor and Legislature. Existing law also requires entities contracting on behalf of the state to report to the Governor and the Legislature certain information concerning the level of participation of minority, women, and disabled veteran business enterprises in those contracts.

This bill would delete these particular reporting requirements.

(4) Existing law provides for the regulation and licensure by the Structural Pest Control Board of persons engaged in the pest control business. Under existing law, a licensee reinspecting items noted in an original inspection report is required to identify the original report by both date and stamp numbers. Existing law also authorizes the board to levy a fine of \$500 for specified violations committed by a licensee, deposited into the Education and Enforcement Account in the Structural Pest Control Education and Enforcement Fund, a continuously appropriated fund.

This bill would increase the amount of this fine to \$1,000 and would delete the requirement of including in the reinspection the stamp numbers of the original report. Because the bill would increase the fine revenue deposited into a continuously appropriated fund, it would make an appropriation.

(5) Existing law, the Electronic and Appliance Repair Dealers Registration Law, provides for the regulation by the Director of Consumer Affairs of persons engaged in the business of repairing, servicing, or maintaining electronic and other types of household appliances and for their registration with the Bureau of Electronic and Appliance Repair, which is within the Department of Consumer Affairs. Under existing law, certain provisions pertaining to the regulation of this business will be repealed on January 1, 2003. The law additionally provides for the regulation by the director and registration with the bureau of service contractors, as defined. Under existing law, a violation of the law's provisions is punishable as a misdemeanor offense, and a violation of specified provisions of the law pertaining to service contractors is additionally subject to the imposition of an administrative fine that, upon

collection, is deposited into the Electronic and Appliance Repair Fund, which is continuously appropriated. Under existing law, the provisions of the law regulating service contractors will be repealed on January 1, 2003.

This bill would extend the operation of these provisions to January 1, 2008. Because the bill would extend the operation of criminal penalty provisions pertaining to service contractors, it would impose a state-mandated local program. Because the bill would also extend, with respect to those persons, the operation of administrative fines which are paid into a continuously appropriated fund, it would also make an appropriation.

(6) Existing law, the Home Furnishing and Thermal Insulation Act, regulates and provides for the licensure of persons engaged in various businesses associated with home furnishings, including sanitizing.

This bill would exempt persons holding specified licenses issued under this law from additional licensure as a sanitizer and would make nonsubstantive changes to various other provisions of this law.

(7) Existing law, the Private Postsecondary and Vocational Education Reform Act of 1989, creates within the Department of Consumer Affairs, the Bureau for Private Postsecondary and Vocational Education, which succeeded to the rights and functions of the former Council for Private Postsecondary and Vocational Education. Under existing law, the Director of Consumer Affairs is vested with the responsibility of administering and enforcing the act and is authorized to assign those duties to a program administrator.

This bill would delete obsolete references to the Council for Private Postsecondary and Vocational Education. The bill would authorize the director to assign his or her duties under the act to a bureau chief.

(8) Existing law requires specified state agencies to adopt regulations regarding their procedures for considering and issuing permits to engage in a particular activity or act and specifies that these regulations be proposed during certain timeframes occurring in 1983 and 1984.

This bill would delete these obsolete timeframe provisions.

(9) Existing law establishes the Motor Vehicle Inspection program, enforced by the Bureau of Automotive Repair in the Department of Consumer Affairs. Under existing law, this program includes the establishment and operation of smog check stations, and the department is required to establish training requirements for smog check technicians. Existing law requires an institution administering these training or retraining courses to issue a certificate that is valid for one year to each person who successfully completes the course.

This bill would extend the term during which the certificate is valid to 2 years.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 406 (AB 3045) Committee on Higher Education. Student financial aid: Golden State Scholarshare Trust: California Memorial Scholarship Program.

(1) Existing law establishes the Golden State Scholarshare Trust Act, pursuant to which, under regulations adopted by the Student Aid Commission, participants invest money in the Golden State Scholarshare Trust for the benefit of a specific beneficiary for the advance savings for the beneficiary's higher education expenses, as defined, at certain postsecondary educational institutions. Existing provisions of the act define "beneficiary," "institution of higher education," and "qualified higher education expenses" for the purposes of the act by conforming these definitions to those included in the federal Internal Revenue Code, as amended by a prescribed federal statute in 1997.

This bill would instead require that these definitions conform to that federal statute, as it is amended from time to time, if, as determined by the Scholarshare Investment Board, the amendment is consistent with the purposes of this act.

(2) An existing provision of the act limits the overall maximum investment level for a designated beneficiary, as defined, to the maximum estimated qualified higher education expenses, as defined, that can be incurred by a beneficiary to obtain a baccalaureate degree at an institution of higher education, as defined, in California for 5 years commencing in the year the majority of beneficiaries of that age are expected to be eligible to enroll in a higher education program for 4 years. An existing provision of the act requires that the maximum investment level be published by the trust as a monetary amount by year group.

This bill would delete this 5-year deadline. The bill would require that the maximum investment level be published by the trust as a monetary amount.

(3) Existing provisions of the act require the payment of a penalty upon the cancellation of a participation agreement.

This bill would delete these requirements.

(4) An existing provision of the act requires the Golden State Scholarshare Trust to report prescribed information, including the amount of any missed contributions that the participant is eligible to make up and the names of the State Senator and Assembly Member who represent the district in which the participant or beneficiary resides, to each participant or beneficiary annually by March 1.

This bill would delete the requirement of the reporting of the amount of any missed contributions that the participant is eligible to make up, and would delete the requirement that the annual report be made by March 1, and, as to the names of the State Senators and Assembly Members, would require only the reporting of an Internet Web site and a toll-free telephone number where these names may be accessed.

(5) Existing law establishes the California Memorial Scholarship Program under the administration of the Scholarshare Investment Board. This program provides scholarships at institutions of higher education, as defined, for surviving dependents, as defined and as identified by the Treasurer, of California residents killed as a result of injuries sustained during the terrorist attacks of September 11, 2001.

This bill would require the California Victim Compensation and Government Claims Board, rather than the Treasurer, to identify the surviving dependents who are eligible for the program. The bill would conform the program's definition of "institution of higher education" to the definition of "eligible educational institution" contained in a specified provision of federal law. The bill would authorize distributions to be made from the program's scholarship fund to eligible surviving dependents on or after July 1, 2005.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 407 (SB 91) Figueroa. Vehicles: dealers: prohibited activities.

(1) Existing law regulates various activities of motor vehicle dealers, and a violation of those provisions is a misdemeanor under other provisions of existing law.

This bill would prohibit any person from aiding or abetting a person in the performance of any act in violation of vehicle dealer, remanufacturer, manufacturer, transporter, distributor, or related branch licensing laws. Because a violation of this prohibition would be a misdemeanor under other provisions of existing law, the bill would impose a state-mandated local program by creating a new crime.

The bill would provide that any person acting as a dealer or a lessor-retailer, who is not duly licensed as a dealer or a lessor-retailer pursuant to law, may not enforce any security interest or bring or maintain any action in law or equity to recover any money or property or obtain other relief from the purchaser or lessee of a vehicle in connection with a transaction in which the person was required to be licensed as a dealer or a lessor-retailer at the time of the transaction.

The bill would provide that remedies and penalties provided in the Vehicle Code for a violation of the vehicle occupational licensing laws are cumulative to the remedies and penalties provided by other laws.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 408 (SB 648) Committee on Environmental Quality. Public contracts: preferences: recycled products.

Existing law requires every procuring agency, as defined, to revise, on or before July 1, 1992, its procedures and specifications for the purchase of lubricating oil and industrial oil to eliminate, from these procedures and specifications, any exclusion of recycled oils and any requirement that oils be manufactured from virgin materials.

This bill would require procuring agencies to continuously review and revise its procedures and specifications for the purchase of lubricating oil and industrial oil to eliminate, from these procedures and specifications, any exclusion of recycled oils and any requirement that oils be manufactured from virgin materials.

Existing law requires, cost and quality being equal, that local and state agencies purchase recycled products instead of nonrecycled products, and also allows local agencies to give preference to suppliers of recycled products.

This bill would make technical and clarifying changes to this requirement.

Existing law requires the Department of General Services to report annually to the Legislature on the amount of recycled products that are utilized by state agencies and state contractors. Existing law requires that this annual report include, among other items, the cost and number of recycled items purchased by various state agencies.

This bill would require the Department of General Services to revise its list of available recycled products as needed and to include the revised list in its annual report.

Ch. 409 (SB 994) Morrow. Liability: public skateboard parks.

Existing law, in effect until January 1, 2003, provides that skateboarding at a public skateboard park that is constructed after January 1, 1998, is a hazardous recreational activity if the person skateboarding is 14 years of age or older, the skateboarding activity is stunt, trick, or luge skateboarding, and the skateboard park is on public property, as specified. That law, also in effect until January 1, 2003, requires local public agencies to maintain a record of all known or reported injuries incurred by skateboarders in a public skateboard park or facility, and other information regarding these incidents, as specified, and requires that copies of those records be filed annually with the Judicial Council which is required to submit a report to the Legislature by March 31, 2000, on these incidents, including claims arising therefrom.

This bill would extend, until January 1, 2008, the operation of these provisions and would require the Judicial Council to submit a report to the Legislature on or before March 31, 2007, on the incidents reported by local agencies. By extending the date for recordkeeping duties on local public agencies, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 410 (SB 1399) Romero. Spousal support.

Existing law provides that in a judgment of dissolution of marriage the court may order a party to pay for the support of the other party an amount, for a period of time, that the court determines is just and reasonable.

This bill would provide that a person who has notice of a temporary or permanent order awarding spousal support who leaves the state with the intent to willfully omit, without lawful excuse, to furnish the spousal support is punishable by imprisonment in a county jail for a period not exceeding one year, a fine not exceeding \$2,000, or by both that imprisonment and fine. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 411 (SB 1489) Perata. Vehicles: speed contests and reckless driving.

Existing law allows a peace officer to arrest and take into custody any person that a peace officer determines was engaged in a motor vehicle speed contest and permits the peace officer to cause the removal and seizure of the motor vehicle used in the contest in accordance with specified statutory procedures. A vehicle impounded under these provisions is required to be impounded for 30 days, with specified exceptions. Existing law permits the release of the motor vehicle prior to the end of the impoundment period in specified circumstances. Existing law makes the registered owner or his or her agent responsible for, among other things, all towing and storage charges related to the impoundment and any authorized administrative charges.

This bill, the U'Kendra K. Johnson Memorial Act, would extend these provisions to those persons engaged in reckless driving on a highway, reckless driving in an offstreet parking facility, or an exhibition of speed on a highway. It would require the impounding agency to release the vehicle to the registered owner prior to the conclusion of the impoundment period if the registered owner was neither the driver nor a passenger in the vehicle at the time of the alleged violation, or was unaware that the vehicle was being used to engage in the prohibited activities. The bill would specify that these changes are effective until January 1, 2007.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 412 (SB 1575) Sher. Wills and trusts: prohibited transferees: exceptions.

Existing law, with specified exceptions, invalidates a donative transfer to the person who drafted the instrument, or to a person who is related by blood or marriage to, is a cohabitant with, or an employee of, the drafter, among others. Existing law excepts from these provisions a transfer where the transferor is related by blood or marriage to, or is a cohabitant with, the transferee or the person who drafted the instrument. Existing law also excepts transfers where the instrument is reviewed by an independent attorney, as specified, and provides a form of certificate for this purpose, and excepts a transfer that is approved by a court, as specified, among others.

This bill would include within the above-described exceptions domestic partners, as specified, and would define cohabitant for these purposes. The bill would require an independent attorney making a review of an instrument to be excepted from the provisions described above to attempt to determine if the intended transfer is the result of fraud, menace, duress, or undue influence, and would revise the certificate the attorney is required to deliver to the transferor, with a copy delivered to the drafter, in order to document his or her review. The bill would delete the exclusion of evidence of certain interested parties, as specified, from a court determination of whether a transfer was a product of fraud, menace, duress, or undue influence. The bill would revise the definition of related by blood or marriage for the purpose of the above-described exceptions. The bill would create new exceptions for any transfer that does not exceed \$3,000, except as specified, and for any transfer made by an

instrument executed by a nonresident of California who was not a resident at the time the instrument was executed, and that was not signed in California.

Ch. 413 (SB 1774) Chesbro. Alcoholic beverages: licenses: separate locations.

Existing law requires separate alcoholic beverage licenses to be issued by the Department of Alcoholic Beverage Control for each of the premises of any business establishment having more than one location, except as otherwise specified.

This bill would permit any manufacturer, importer, or wholesaler to receive, store, and deliver wine as specified in its license, at and from a public warehouse licensed by the department, without holding an additional license at the warehouse. However, an out-of-state business whose alcoholic beverages come to rest, are stored, and shipped from a public warehouse in California would be required by this bill to hold a license at a public warehouse.

Ch. 414 (SB 1831) Peace. Tobacco assets: sales.

(1) Under existing law, states' attorneys general and various tobacco product manufacturers have entered into a Master Settlement Agreement, in settlement of various lawsuits, that provides for the allocation of money to the states and certain territories. The state has entered into a memorandum of understanding providing for the allocation of the state's share of moneys to be received under the Master Settlement Agreement between the state and counties and certain cities in the state.

Existing law sets forth the duties of the Infrastructure and Economic Development Bank and its board of directors generally in performing various financing transactions, including the issuance of bonds or the authorizing of the issuance of bonds by a trust, partnership, limited partnership, association, corporation, nonprofit corporation, or other entity, known as a special purpose trust.

This bill would authorize the bank to sell for, and on behalf of, the state all or any portion of the state's tobacco assets to a special purpose trust, which would be established as a not-for-profit corporation by the bill, except that the sale or sales would be limited to an amount necessary to provide the state with up to \$4.5 billion exclusive of capitalized interest on the bonds and any costs incurred by the bank or the special purpose trust in implementing the bill. "Tobacco assets" would be defined for these purposes as all moneys required to be paid to the state under the Master Settlement Agreement, as further provided in the memorandum of understanding and the California escrow agreement, and all of the state's rights to receive those payments.

This bill would provide that the 5 voting members of the State Public Works Board shall serve ex officio as the directors of the special purpose trust, and would authorize the special purpose trust to issue bonds on the terms it determines. It would also authorize the special purpose trust to enter into agreements with any public or private entity and to pledge the tobacco assets that it purchased as collateral and security for the financing. It would specify that the bonds issued pursuant to these provisions shall not be deemed to constitute a debt of the state or a pledge of the faith or credit of the state.

(2) Existing law establishes the Tobacco Settlement Fund and requires the state's share of moneys received pursuant to the Master Settlement Agreement to be deposited into the fund to be available, upon appropriation by the Legislature, for specified purposes.

This bill would except the sale of tobacco assets as provided for in the bill from these provisions.

Ch. 415 (SB 1897) Kuehl. State Bar of California.

The State Bar Act provides for licensing of attorneys by the State Bar of California, sets forth the disciplinary authority of the Board of Governors of the State Bar, and provides for a State Bar Court to hear and decide disciplinary proceedings. Existing law requires the

Board of Governors to appoint a chief trial counsel who reports to and serves under the direction of the Discipline Committee of the Board of Governors.

This bill would instead refer to the Regulation, Admission, and Discipline Oversight Committee or its successor committee on attorney discipline.

Existing law requires that the president, vice presidents, and treasurer be elected by the board for the ensuing year within the period of 180 days next preceding the annual meeting of the State Bar.

This bill would change the required period to the period of 270 days next preceding the annual meeting.

Existing law requires that an election of the members of the board of governors of the State Bar be by ballot, except where only one member seeks an election to an office, in which event the member is deemed elected. Existing law requires the ballots to be mailed to those entitled to vote within a specified time period and to be returned by mail to the principal office of the State Bar.

This bill would instead require that the ballots be distributed within the specified time period, and that they be returned to a site or sites designated by the State Bar.

Existing law provides that the Conference of Delegates of the State Bar and State Bar sections shall not be funded with mandatory fees and authorizes the State Bar to provide the Conference of Delegates and State Bar sections with administrative and support services, subject to full reimbursement, as specified. Existing law requires the Board of Governors of the State Bar to contract with a nationally recognized independent public accounting firm to conduct an audit of the State Bar's financial statement for each fiscal year. The financial audit is required to examine the receipts and expenditures of the State Bar to ensure that the State Bar has been paid or reimbursed for the full cost of any services provided and that no mandatory dues are being used to fund the activities of the Conference of Delegates or the State Bar sections.

This bill would provide that if a nonprofit successor entity to the Conference of Delegates is incorporated for certain purposes, the State Bar is authorized to collect, in conjunction with the collection of annual membership dues, voluntary fees or donations on behalf of the entity, and to convey previously unexpended voluntary fees or donations to the Conference of Delegates to the successor entity. The bill would require the entity to pay for the cost of collection, and would authorize the entity and the State Bar to contract for other services. The bill would require that, with respect to a successor entity, the State Bar audit include examination of the receipts and expenditures of the State Bar to ensure that the funds collected on behalf of the successor entity are conveyed to that entity, that the State Bar has been paid or reimbursed in full for the cost of any services, and that no mandatory dues are being used to fund the entity.

Existing law gives an unsuccessful applicant for admission to the State Bar of California the right to inspect the applicant's examination documents within 4 months after the results of the examination have been declared.

This bill, until January 1, 2004, would provide that an unsuccessful applicant may inspect within 4 months after the results of the examination have been declared, those examination papers that are in the actual, physical possession of the examining committee.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 416 (SB 1956) Polanco. Dependency proceedings: notice.

Existing law provides for the notification of various parties regarding juvenile court proceedings to determine, review, revise, or terminate the status of a child as a dependent child of the court.

This bill would revise and recast those notice provisions, as specified. By creating new duties for local court officers, probation officers, and social workers under an existing program, the bill would impose a state-mandated local program.

This bill would declare that it is the intent of the Legislature that this bill will reduce local court costs by clarifying and consolidating existing requirements so as to reduce the number of continuances that need to be granted.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new program or higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

Ch. 417 (AB 1850) Nakano. Military service: health care benefits.

Existing law specifies certain pay and allowances for members of the National Guard.

This bill would provide that officers, warrant officers, and enlisted men and women on active duty in the service of the state shall be eligible for health care benefits 30 days after being called to active duty.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 418 (AB 2273) Dutra. Vehicles.

Existing law provides for the issuance of a class C driver's license upon passage of written and road tests. Drivers' licenses held by persons at least 16 years of age, but less than 18 years of age, are distinctive and are issued pursuant to a provisional license program requiring that the individual complete driver education, training, and instruction, restricting his or her driving privilege, and providing for restriction or suspension, as specified.

Existing law provides that prospective employers and employers of certain drivers, as specified, must obtain reports showing the driver's current Department of Motor Vehicles record. Existing law provides for a pull-notice system by which employers are notified of subsequent actions taken against a driver. Under existing law, employment of a driver against whom a disqualifying action has been taken by the Department of Motor Vehicles is a public offense.

Existing law provides that the department may issue instruction permits to certain individuals, as specified, that allow the permitholder to operate a motor vehicle subject to certain restrictions including that he or she be supervised by a California licensed driver who is at least 25 years of age unless the licensed driver is the parent, spouse, or guardian of the permitholder, as specified.

This bill would provide that instruction permitholders, other than those issued a permit in connection with the provisional licensing program for persons under 18 years of age, may be supervised by a California licensed driver who is at least 18 years of age, as specified, and would remove the exception for individuals who are the parent, spouse, or guardian of the permitholder.

This bill would provide that the Department of Motor Vehicles may first issue an instruction permit to operate government owned vehicles while taking driver training instruction administered by the California National Guard, and then a class C license to individuals upon successful completion of examination and driving tests and presentation of an executed enlistment contract with the California National Guard, restricted to operation of United States Army and California National Guard vehicles during the course and scope of employment with the California National Guard. This bill would provide that an applicant who is at least 16 years of age, but less than 18 years of age, would be issued a restricted class C license, however, this bill would provide that the licensee would be subject to certain provisions governing restriction or suspension of the license.

This bill would provide that the status of the license issued pursuant to these provisions shall become part of the pull-notice and report program that provides information to employers of commercial drivers.

The bill would authorize the Department of Motor Vehicles to enter into an interagency agreement with the Military Department for reimbursement for the costs of implementing specified provisions of the bill.

Ch. 419 (AB 2428) Correa. Veterans: benefits.

Existing law defines “veteran” for the purposes of the various programs bestowing benefits upon veterans.

This bill would also include within this definition of veteran any member of the reserves or National Guard who is called to active duty during any period when a presidential executive order specifies that the United States is engaged in homeland defense. The bill would also revise that definition with regard to “active duty” or “active service.”

Existing law relating to veterans benefits generally, including, but not limited to, educational assistance and farm and home purchase, includes within the definition of “veteran” any person who qualifies under federal laws for revenue bond or unrestricted funds, served in the active military, naval, or air service of the United States for a period not to exceed 90 consecutive days, and received an honorable discharge or was released from active duty under honorable conditions.

This bill would include within the definition of “veteran” for these purposes any person who qualifies for funds made available from a qualified mortgage revenue bond issued pursuant to a specified federal law and is, at the time of application for Cal-Vet benefits, a member of the California National Guard or a reserve component of any branch of the United States armed forces who meets specified conditions.

Ch. 420 (AB 1393) Thomson. Water quality.

(1) Under the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board and the California regional water quality control boards are the principal state agencies with regulatory authority over water quality. Existing law prohibits a member of the state board or a regional board from participating in certain board actions in which the board member has a direct personal financial interest, as defined by a provision in the Government Code that has been repealed.

This bill, instead, would prohibit those board members from participating in those specified board actions in which those members have a financial interest within the meaning of the Political Reform Act of 1974.

(2) The act authorizes, or in certain cases requires, a panel of a regional board to conduct proceedings.

This bill would delete those provisions and would authorize a regional board to conduct certain hearings or investigations by means of a panel of 3 or more members of the regional board. The bill would require any final action in the matter to be taken by the regional board and would authorize that board to take additional evidence and to adopt, with or without revision, or reject, the proposed decision of the panel. The bill would authorize the members of a regional board, or their designees, to carry out prehearing conferences for the purposes of addressing matters, including but not limited to, exploration of settlement possibilities, clarification of issues, and objections to evidence. The bill would provide that no party who appears before a panel or at a prehearing conference is precluded from appearing before the regional board at any subsequent hearing relating to the matter.

(3) The act authorizes any executive officer of a regional board to issue a complaint to any person on whom administrative civil liability may be imposed for a violation of a waste discharge requirement. The act authorizes the complaint to be served by personal notice or certified mail and requires that a hearing be conducted before at least a 3 member panel of the regional board not later than 60 days from the date the party is served. The act requires that orders imposing administrative civil liability be served by personal service or registered mail. The act also authorizes the state board to issue administrative civil liability for a violation of a waste discharge requirement.

This bill would instead require that the hearing before the regional board be conducted not later than 90 days from the date the party is served and would delete the requirement that the hearing be conducted before a 3 member panel of the regional board. The bill would instead authorize a complaint and an order to be served by certified mail or in any manner in which a summons may be served. The bill would require, in a proceeding before the state board to impose administrative civil liability for a violation of a waste discharge requirement, that the executive director of the state board issue the complaint and hold a hearing within 90 days of the date the party has been served.

Ch. 421 (AB 1561) Kelley. Energy efficiency standards: clothes washers.

Existing law requires the State Energy Resources Conservation and Development Commission, after one or more public hearings, to prescribe, by regulation, among other things, certain energy efficiency standards, cost effective measures, and consumer education programs, to promote the use of energy efficient appliances whose use, as determined by the commission, requires a significant amount of energy on a statewide basis.

This bill would require the commission, not later than January 1, 2004, to amend existing regulations pertaining to energy efficiency standards for residential clothes washers to require these clothes washers manufactured on or after January 1, 2007 to be at least as efficient as commercial washers. The bill would also require the commission, not later than April 1, 2004, to petition the federal Department of Energy for an exemption from any federal regulations governing energy efficiency standards that are applicable to residential clothes washers, and to report to the Legislature on its progress with respect to the above requirements not later than January 1, 2005.

Ch. 422 (AB 2971) Strom-Martin. Wastewater treatment plants: definition.

(1) Under the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board is required to classify types of wastewater treatment plants, as defined, for purposes of determining the levels of competence necessary to operate the plants. Under that definition, facilities owned by governmental agencies and used in the treatment or reclamation of sewage and industrial waste and certain privately owned facilities performing the same usage purposes and regulated by the Public Utilities Commission are considered wastewater treatment plants.

This bill would revise the definition of wastewater treatment plants for these purposes by including within that definition private and governmental facilities used in the treatment or reclamation of sewage or industrial waste, rather than sewage and industrial waste, and any privately owned facility, without requiring that it is regulated by the Public Utilities Commission, used primarily in the treatment or reclamation of sewage for which the state board or a regional water quality control board has issued waste discharge requirements.

The bill would authorize the state board, subject to renewal and imposed conditions, to exempt for 4 years from the certificate requirements any facility that is classified, by regulation, as a Class 1 plant by the state board and the facility could not, due to operator error, violate water quality objectives.

The bill would authorize the state board to charge a reasonable administrative fee for processing a facility's original or renewal application for exemption.

(2) Existing law requires supervisors and operators of wastewater treatment plants to possess certificates of the appropriate grade.

This bill would, subject to the approval of regulations by the state board, impose this requirement on supervisors and operators of those privately owned facilities that are not regulated by the Public Utilities Commission and are included in the revised definition of "wastewater treatment plants" as provided under (1).

The bill would require operators employed at the private wastewater treatment plants described above to pass any written examination that may be administered by the state board.

(3) Because the failure of a person who operates a wastewater treatment plant to obtain and hold a valid certificate issued by the state board of the appropriate grade is a crime, this bill would impose a state-mandated local program by expanding the scope of that crime.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 423 (SB 812) Sher. Air pollution: California Climate Action Registry.

(1) Existing law requires the Secretary of the Resources Agency to establish the California Climate Action Registry as a nonprofit public benefit corporation, governed by a prescribed board of directors, that is required to record and register voluntary greenhouse gas emissions reductions made by California entities after 1990. Existing law requires the registry to provide referrals to approved providers for advice on designing programs to establish emissions baselines and to monitor and track greenhouse gas emissions, establishing emissions reduction goals, and designing and implementing organization-specific plans that improve energy efficiency or utilize renewable energy, or both, and that are capable of achieving emission reduction targets.

This bill would require the registry to also provide referrals to approved providers for advice on incorporating conservation and best management practices of native forest reservoirs as a mechanism to assist participants in the attainment of emissions reduction goals and the reporting of emissions results.

(2) Existing law requires the registry to perform various functions, including, among other things, adopting standards for verifying emissions reductions, adopting a list of approved auditors that would verify emission reductions, establishing emissions reduction targets, designing and implementing efficiency improvement plans, maintaining a record of all emission baselines and reductions, and recognizing, publicizing, and promoting entities that participate in the registry.

This bill would require the registry to adopt procedures and protocols for the reporting and certification of greenhouse gas emission reductions resulting from a project or an action of a participant. The bill would require the registry, in coordination with the Resources Agency, to adopt procedures and protocols, including specified criteria, for the monitoring, estimating, calculating, reporting, and certifying of carbon stores and carbon dioxide emissions resulting from the conservation and conservation-based management of native forest reservoirs in California in order for registry participants to include the results of those conservation activities as a participant's registered emissions results, or as a part thereof. The bill would additionally require the registry, in consultation with the State Air Resources Board, to adopt procedures and protocols for the reporting and certification of specified reductions in emissions of greenhouse gases.

Ch. 424 (SB 1808) McPherson. State Environmental Goals and Policy Report.

Existing law requires the Governor to prepare and cause to be maintained, regularly reviewed, and revised a comprehensive State Environmental Goals and Policy Report and to transmit the report to the Legislature every 4 years. In the preparation of the report, priority is to be given to the development of statewide land use policy. Existing law also requires the Office of Planning and Research within the office of the Governor to constitute the comprehensive state planning agency and to develop a land use policy for the state.

This bill would require the Office of Planning and Research to report to the Governor and the Legislature annually on or before January 1 regarding the implementation of that report.

Ch. 425 (SB 1822) Sher. Public water systems: public health goals: perchlorate.

(1) Existing law, the Calderon-Sher Safe Drinking Water Act of 1996, requires the State Department of Health Services to submit to the Legislature a Safe Drinking Water Plan for

California once every 5 years, and to take all reasonable measures necessary to reduce the risk to the public health from waterborne illnesses in drinking water caused by cryptosporidium and giardia.

Existing law requires the department to adopt primary drinking water standards for contaminants in drinking water that are to be set at levels as close as possible to the corresponding public health goal. Existing law requires the Office of Environmental Health Hazard Assessment to perform a risk assessment and, based upon that risk assessment, to adopt a public health goal for contaminants in drinking water based exclusively on public health considerations.

This bill would define “public health goal” for these purposes to mean specified public health goals established by the office.

(2) Existing law defines a “public water system” to mean a system that provides water for human consumption through pipes or other constructed conveyances that has 15 or more service connections or regularly serves at least 25 individuals daily at least 60 days of the year, except as specified.

This bill would require the office, on January 1, 2003, to perform a risk assessment and, based upon that risk assessment, to adopt a public health goal based exclusively on public health consideration for perchlorate using specified criteria. It would also require the department, on or before January 1, 2004, to adopt a primary drinking water standard for perchlorate found in public water systems.

Ch. 426 (AB 776) Thomson. Fairfield-Suisun Sewer District.

(1) The Fairfield-Suisun Sewer District Act creates the Fairfield-Suisun Sewer District and grants to the district various powers relating to the treatment and disposal of sewage. The act, with certain exceptions, prohibits the district from contracting for the disposal of any sewage emanating from outside the district.

This bill, subject to certain exceptions provided for under existing law, would prohibit the district from accepting or contracting for the disposal of sewage emanating from outside the district. The bill, in addition, would authorize the district to accept and contract for the disposal of sewage emanating from buildings outside the district that are connected to the district’s sewage treatment system on March 1, 2002. The bill also would authorize the district to contract with Solano County or another public entity for the disposal of sewage emanating from buildings outside the district if the board of the district makes a certain determination.

The bill would, provide that every user that is connected to the district’s sewage treatment system is subject to the district’s ordinances. Because a violation of the district’s wastewater discharge ordinance is a crime, this bill would impose a state-mandated local program to the extent that it expands the scope of an existing crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 427 (AB 890) Cedillo. Health facilities: sale of assets.

Existing law requires any nonprofit corporation that is subject to the Nonprofit Public Benefit Corporation Law and that operates or controls a health facility or operates or controls a health facility that provides similar health care, to provide written notice to, and obtain the written consent of, the Attorney General prior to selling or otherwise disposing of a material amount of its assets to a for-profit corporation or entity or to a mutual benefit corporation or entity.

This bill would instead make these requirements applicable to any nonprofit corporation that operates or controls a health facility or operates or controls a facility that provides similar health care. The bill would also authorize the Attorney General to consider, before

consenting to an agreement to sell or dispose of assets to a for-profit corporation, whether the terms and conditions of the agreement or transaction are fair and reasonable to the nonprofit corporation, and whether the agreement or transaction is at a fair market value, as specified.

Ch. 428 (AB 1425) Thomson. Persons with disabilities: community living support services.

Existing law, the California Community Care Facilities Act, provides for the licensure and regulation of community care and residential facilities by the State Department of Social Services.

Existing law prohibits a community care facility that is unlicensed, is not exempt from licensure, and satisfies any one of several listed conditions from operating in the state. Among the listed conditions is if the facility is providing care or supervision, as defined by the act or rules and regulations adopted pursuant to the act.

This bill would exempt any supportive housing, as described, or independent living arrangement, for individuals with disabilities who are receiving community living support services, as described, from the application of the act. The bill would provide that community living support services do not constitute care or supervision.

This bill would permit counties to contract with agencies or individuals to assist persons with disabilities in securing their own homes, including supportive housing, and to provide persons with disabilities with the supports needed to live in their own homes.

Ch. 429 (AB 1486) Dutra. Mortgage guaranty insurance.

The Mortgage Guaranty Insurance Act provides for the regulation of mortgage guaranty insurance, as defined. Under these provisions, mortgage guaranty insurance may be written only to insure loans secured by first or junior liens on authorized real estate securities in an amount not to exceed 100% of the fair market value of the securities.

This bill would increase the allowable total indebtedness on which this insurance may be written in this circumstance to 103% of the fair market value of the real estate securities.

Ch. 430 (AB 1833) Nakano. Local emergency medical services funds.

Existing law authorizes each county to establish an emergency medical services fund, and provides that the fund shall be utilized to reimburse physicians and surgeons and hospitals for a portion of the cost of services provided to patients who do not make payment for emergency medical services and for other emergency medical services purposes as determined by each county.

This bill would revise procedures for payment of claims against the fund and would require each administering agency of a fund to make all reasonable efforts to notify physicians and surgeons who provide or are likely to provide emergency services in the county as to the availability of the fund and the process by which to submit a claim against the fund.

By requiring counties to notify physicians and surgeons of the availability of the fund, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 431 (AB 2007) Calderon. California Insurance Guarantee Association.

Existing law provides for creation of the California Insurance Guarantee Association in order to provide insolvency insurance for its member insurers. Existing law requires the association to be managed by a board of governors composed of specified members. Existing law requires certain insurers to be members of the association as a condition of doing business. Existing law, in the event an insurer becomes insolvent, provides for the association to collect premium payments from its members in an amount sufficient to pay covered claims of the insolvent insurer and the associated adjustment costs. Existing law provides that the premium charged to any member insurer in that event for any of certain categories shall not be more than 2% of the net direct premium written in the category in this state by that member until September 12, 2002, and after that date establishes the premium limit at 1%.

This bill would revise the membership of the board of governors to include 4 additional members. The bill would revise the provisions establishing the premium charged to member insurers at a limit of 1% after September 12, 2002, and would instead establish the premium limit at 2% per year until December 31, 2007. The bill would establish the premium limit at 1% per year after December 31, 2007.

This bill would make the operation of its provisions contingent upon the enactment of SB 2093.

Ch. 432 (AB 2092) Kelley. State Lands Commission: land exchange agreements: Arizona.

(1) Existing law establishes the State Lands Commission within the Resources Agency, with specified duties governing state-owned lands. Existing law authorizes the commission to exchange lands of equal value with any state agency, political subdivision, person, or the United States when the exchange appears to be in the best interests of California and is to improve navigation, aid in reclamation or flood control protection, or to enhance the configuration of the shoreline.

This bill would authorize the commission to enter into land exchange agreements with Arizona to transfer California's sovereign interest in land located in Arizona and to acquire Arizona's sovereign interest in land located in California. Upon completion of all possible land exchanges, if there is a difference in the total fair market value of the land transferred to Arizona and that acquired by California, this bill would require the difference be paid into or out of the Land Bank Fund. The Land Bank Fund is a continuously appropriated fund. By authorizing moneys in that fund to be expended for a new purpose, this bill would make an appropriation.

(2) The Kapiloff Land Bank Act creates the Land Bank Fund, and continuously appropriates moneys in the fund subject to a statutory trust to the commission, acting as the Land Bank Trustee, to acquire real property or any interest in real property for the purposes of public trust title settlements and for mitigation, as defined. Existing law authorizes a project applicant other than a public agency to deposit mitigation donations to the fund.

This bill would permit a public agency to deposit mitigation donations to the fund. This bill would also make a conforming change to the definition of "title settlements" under the act.

Ch. 433 (AB 2126) Robert Pacheco. Trust companies: investments.

Existing law authorizes a trust company to invest or reinvest in the securities or other interests of any mutual fund for which the trust company or its affiliate is providing services. Existing law requires trust companies that invest or reinvest in those securities or interests to, within 30 days before or after the investment or reinvestment, provide a copy of the prospectus relating to the securities to certain persons unless specifically waived in writing.

This bill would instead require a trust company that invests or reinvests in those securities or interests to provide a copy of the prospectus before the investment or reinvestment or within 30 days after the investment or reinvestment.

Ch. 434 (AB 2155) Committee on Agriculture. Equine drugs.

Existing law prohibits the showing of a horse at a public horse show, competition, or sale if the horse has been administered a prohibited substance. Included in the definition of prohibited substances are nonsteroidal anti-inflammatory drugs. Existing law exempts certain medications from the list of prohibited substances and annually requires the secretary to update the exempt medications list. Existing law exempts the administration of a single nonsteroidal anti-inflammatory substance from the list of prohibited substances, as specified. Existing law excludes these provisions from any individual horse show, competition, or sale that is certified by the Secretary of Food and Agriculture, with the concurrence of the advisory committee, after holding a public hearing, if the secretary determines that specified criteria are satisfied.

This bill would declare that it is the intent of the Legislature to ensure the integrity of public horse shows, horse competitions, and horse sales through the control of performance and disposition enhancing medications while limiting permitted therapeutic usage, as defined, at horse shows and competitions. This bill would remove nonsteroidal anti-inflammatory drugs (NSAIDs) from the list of prohibited substances and, consequently, would also remove the administration of them from the list of exempted medications. The bill would permit the secretary to certify any individual horse show, competition, or sale, with a 30-day written notice of a public hearing to the advisory committee and would include among the criteria that must be satisfied that the drug and medication rules of the sponsoring equine organization or association comply with the above-stated intent of these provisions. This bill would permit the therapeutic administration of NSAIDs, as specified. The bill would establish guidelines for the appropriate therapeutic usage of NSAIDs and would make a violation of those guidelines punishable by, among other things, a civil penalty of not less than \$100 nor more than \$10,000 for each violation. This bill would make other technical changes.

Ch. 435 (AB 2311) Chu. Child care and development services.

(1) Existing law establishes the Child Care and Development Services Act for the purpose of, among other things, providing a comprehensive, coordinated, and cost-effective system of child care and development services for children to age 14 and their parents. Existing law contains, for purposes of the act, definitions of the phrases “children with exceptional needs,” “children with special needs,” and “severely handicapped children.”

This bill would revise those definitions and make conforming changes.

(2) Existing law authorizes center-based programs previously funded under the Alternative Child Care Act and new programs funded under the Child Care and Development Services Act to operate pursuant to the regulations for child day care facilities under the California Community Care Facilities Act. Existing law also exempted those programs from regulations promulgated by the State Department of Education.

This bill would eliminate those provisions.

(3) Under existing law, in order to be eligible for federal and state subsidized child development services, a family is required to meet specified eligibility requirements, which may be satisfied, along with meeting other criteria, if the child is identified as having a medical or psychiatric special need that cannot be met without provision of child day care.

This bill would eliminate that eligibility option.

(4) Existing law requires the Superintendent of Public Instruction, in order to assure geographic equity in the distribution of funds appropriated for child care and development services, to disburse funds for extended day care programs in accordance with specified procedures.

This bill would repeal those provisions.

(5) Existing law requires the county board of supervisors and the county superintendent of schools to select members of the local child care and development planning council to provide a forum for the identification of local priorities for child care and the development

of policies to meet the needs identified within those priorities. Existing law requires a local planning council to conduct an assessment of child care needs in the county no less than once every 5 years, and prescribes factors that the needs assessment shall take into consideration.

This bill would revise the needs assessment factors and would require the department to define and prescribe data elements to be included in the needs assessment. The bill would make other changes to the provisions governing the local planning councils.

Ch. 436 (AB 2313) Chu. Economic development.

(1) Existing law, the Small Business Financial Development Corporation Law, creates the California Small Business Expansion Fund, which is continuously appropriated. Under existing law, this fund may be used to prevent business insolvencies and loss of employment in an area affected by a disaster declared by the President of the United States or the Administrator of the United States Small Business Administration, or a state of emergency declared by the Governor of California. Within the California Small Business Expansion Fund is the Small Business Disaster Recovery Loan Loss Reserve Account that may be used for these same purposes in an area affected by a specified state of emergency that began in the Los Angeles area on April 29, 1992, and related incidents throughout the state that have been declared a disaster by any of these officials.

This bill would expand the circumstances under which funds in this account may be used by deleting its current restrictions and allowing its use in an area affected by a disaster declared by the President of the United States, the Administrator of the United States Small Business Administration, or the United States Secretary of Agriculture or to be in a state of emergency declared by the Governor. The bill would also correspondingly revise the circumstances under which moneys in the fund may be used in response to emergency situations, including those declared a disaster by the United States Secretary of Agriculture. Because the bill would authorize the expenditure of revenue in a continuously appropriated fund for a new purpose, it would thereby make an appropriation.

(2) Existing law, the California Defense Retention and Conversion Act of 1999, requires the Technology, Trade, and Commerce Agency to establish a Defense Retention Grant Program to provide funds to communities with military bases for the development of a strategy to retain these facilities.

This bill would delete provisions declaring the Legislature's intent regarding the amount of starting capital for the grant program and limiting the amount of the grant made by the agency under this program.

Ch. 437 (AB 2856) Chavez. Communications equipment insurance agent license.

Existing law governing insurance provides for the licensure and regulation by the Insurance Commissioner of production agencies, including, among others, insurance agents, life agents, insurance brokers, travel insurance agents, cargo shipper's agents, and variable contract agents. Existing law makes it a crime to act or assume to act in a capacity for which a production agency license is required without having that license.

This bill would provide for the commissioner to issue a communications equipment insurance agent license to a communications equipment vendor, as defined, authorizing the vendor to sell or offer to its customers insurance covering communications equipment. The bill would authorize employees and franchisees of the vendor to be listed as endorsees on the license for the purpose of selling or offering communications equipment insurance under the authority of the agent's license. The bill would impose certain requirements on the licensees and endorsees with respect to training and other related matters. The bill would become operative only upon a determination by the commissioner that the personnel positions needed to carry out its provisions are in existence or have been authorized in the Budget Act of 2002 or a subsequent budget act. The bill would also become operative immediately upon the commissioner receiving a maximum of 50 applications for licensure from communications equipment vendors before April 30, 2003.

By creating a new category of production agency license, the bill would expand the scope of activities for which a license is required. Thus, the bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 438 (AB 3026) Committee on Transportation. Transportation.

(1) Existing law authorizes the Department of Transportation to enter into contracts with the National Railroad Passenger Corporation.

This bill would make nonsubstantive changes to those provisions, deleting references to obsolete federal law.

(2) Existing law continuously appropriates to the Treasurer the amounts identified in the Budget Act as having been deposited in the State Highway Account in the State Transportation Fund from federal transportation funds and pledged by the California Transportation Commission, for the purposes of issuing federal highway grant anticipation notes to fund transportation projects selected by the commission. Projects eligible for this special funding are limited to transportation projects that have been designated for accelerated construction by the commission, including toll bridge seismic retrofit projects, projects approved for funding under the Traffic Congestion Relief Act of 2000, and projects programmed under the current adopted State Transportation Improvement Program (STIP) or the current State Highway Operation and Protection Program.

Existing law requires that all federal and state funds to be allocated by the commission or expended by the Department of Transportation for transportation improvements under the STIP, except as specified, be programmed 40 percent in County Group No. 1, as defined, and 60 percent in County Group No. 2, as defined, and allocated among the counties in each county group in accordance with certain county share formulas.

Existing law requires that all funds allocated to a project under the provisions of existing law described above relating to federal highway grant anticipation notes be counted against the STIP county share for the county in which the project is located.

This bill would instead provide that the projects included in the STIP would be counted against the STIP interregional improvement program share for a project in the interregional improvement program and the county share for the county in which a project is located for a project in a regional improvement program.

(3) Existing law requires a political subdivision to adopt a comprehensive land use plan to provide for the orderly growth of a public airport within its jurisdiction.

This bill would change the term to “airport land use compatibility plan” in those provisions.

(4) Existing law designates certain state highways and segments of those highways as part of the interregional road system.

This bill would include within this designation the segment of Route 246 between Routes 1 and 101. The bill would also make nonsubstantive changes to provisions pertaining to the state highway system.

(5) Under existing law, any peace officer, as defined, may remove a vehicle from the right-of-way of a railroad, street railway, or light rail line located within the territorial limits in which the officer is empowered to act if the vehicle is parked or abandoned upon any track or within 7<sup>1</sup>/<sub>2</sub> feet of the nearest rail.

This bill would also authorize the officer to remove a vehicle that is parked beyond 7<sup>1</sup>/<sub>2</sub> feet of the nearest rail but within the right-of-way of a railroad, street railway, or light rail if signs are posted giving notice that vehicles may be removed.

(6) Existing law describes the parameters of State Highway Route 91 that constitute the Willard Murray Freeway.

This bill would require the Department of Transportation to revise the description of this freeway.

(7) Under existing law, in the absence of an express provision to the contrary, the last enacted statute prevails over a statute enacted earlier during the same year of a session.

This bill would specify that irrespective of the sequence of enactment, the provisions of another statute enacted during the 2002 calendar year that takes effect on or before January 1, 2003, and that affects a provision amended, added, or repealed by this act would prevail over this act.

Ch. 439 (SB 1264) Alpert. Aid for dependent children.

Existing law provides for the California Work Opportunity and Responsibility to Kids (CalWORKs) program, under which each county provides cash assistance and other benefits to qualified low-income families. Each county is required to pay a share of the cost of both aid grant and administrative costs for the CalWORKs program.

Under existing law, certain types of payments received by recipients of aid under the CalWORKs program are prohibited from being treated as income or resources of the family and from being deducted from the amount of aid to which the family would otherwise be entitled.

This bill would add to those payments that may not be treated as income or resources of the family for purposes of determining eligibility under the CalWORKs program, any award or scholarship provided by a public or private entity to, or on behalf of, a dependent child based on the child's academic or extracurricular achievement or participation in a scholastic, educational, or extracurricular competition.

Because each county is required to pay for a share of CalWORKs aid grant costs, the bill would impose a state-mandated local program.

Under existing law, unless otherwise exempt, every individual, as a condition of eligibility for aid under this chapter, is required to participate in welfare-to-work activities as a condition of eligibility for benefits under the CalWORKs program.

This bill would expand the scope of exemptions from the welfare-to-work requirements upon which eligibility for aid under the CalWORKs program is conditioned to include a person who is 16 or 17 years of age who has obtained a high school diploma or its equivalent and is enrolled or is planning to enroll in a postsecondary education, vocational, or technical school training program.

By expanding the scope of eligibility for benefits under the CalWORKs program, this bill would result in a state-mandated local program.

State funds are continuously appropriated to pay for a share of aid grant costs under the CalWORKs program.

This bill would provide that no appropriation shall be made pursuant to this provision for the purpose of funding the changes proposed by this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 440 (SB 1448) Chesbro. Deceased residents of state hospitals and developmental centers.

Existing law provides for various types of cemeteries, including public cemeteries, private cemeteries, and cemetery authorities. Existing law establishes recordkeeping requirements as to each type of cemetery.

Existing law provides for state hospitals under the jurisdiction of the State Department of Mental Health and developmental centers under the jurisdiction of the State Department of Developmental Services.

This bill would require the State Department of Mental Health, in coordination with other state entities and a task force composed as prescribed, to conduct and complete an inventory of all materials and records necessary to create the most complete record of persons who have died while residing at state hospitals and developmental centers and, within existing resources, to identify the locations of gravesites, as specified, and the names of patients whose remains were donated for medical research. This bill would also require these entities to assist the California Memorial Project in conducting research regarding the records of deaths and burials at state hospitals and developmental centers, in developing a plan for the restoration of gravesites and cemeteries at state hospitals and developmental centers and gravesites not located on state lands but designated by the state for burial of state hospital or developmental center residents, and to develop a protocol for the future interment of any patient who dies while residing at a state hospital or developmental center and whose remains are unclaimed by a family member.

This bill would require the department to submit a status update, as prescribed, as to the implementation of this bill to the Legislature no later than January 31, 2004.

Ch. 441 (SB 1740) Murray. Service authorities for freeway emergencies.

Existing law authorizes a county and a city within the county to create a service authority for freeway emergencies, including establishing emergency call boxes along highways.

This bill would permit a service authority for freeway emergencies to develop policies relating to retention of the authority's records, including records relating to the authority's operations, contracts, and programs, and the length of time that the authority will retain the records.

Ch. 442 (AB 2051) Dickerson. Vehicles: truck lengths: combinations transporting agricultural biomass.

Existing law regulates the length of certain combinations of vehicles, including lengths attributable to certain extension devices used in connection with vehicles. Violation of these provisions is an infraction pursuant to other provisions of existing law.

This bill would provide that, notwithstanding those provisions, a combination of vehicles designed and used to transport agricultural biomass, and that may consist of a truck tractor, a semitrailer, and a semitrailer or trailer, may extend to a total combined length of 75 feet, if the length of the front trailer does not exceed 32 feet, and the length of the rear trailer does not exceed 28 feet 6 inches. The bill would provide that the distance between the axles of the front trailer would have to be the same as that of a trailer that is 28.5 feet in length. The bill would also provide that no extension would be allowed for the front trailer. The bill would provide that the rear trailer could include an extension not to exceed 18 inches, or it could have  $\frac{1}{3}$  of a bale that extends off of the back of the trailer, or it could have both. This bill would authorize operation of these vehicles within the Counties of Butte, Colusa, Glenn, Placer, Sutter, Tehama, Yolo, and Yuba, but would not apply to highways designated as national network routes, as specified. Violation of these provisions would be an infraction, pursuant to other existing provisions of law.

By establishing provisions, the violation of which would be a crime, this bill would impose a state-mandated local program.

This bill would require the Department of the California Highway Patrol in consultation with the Department of Transportation to conduct a study on the effect of this act on public safety, and to report the findings to the Legislature on or before July 1, 2005.

This bill would provide that the provisions of this act would become inoperative on July 1, 2006, and would be repealed on January 1, 2007.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 443 (AB 2589) Cardoza. Controlled substances: destruction of hazardous chemicals.

(1) Existing law provides that at any time after seizure by a law enforcement agency of a suspected hazardous chemical believed to have been used or intended to have been used in the unlawful manufacture of controlled substances, that amount in excess of one fluid ounce if liquid, or one avoirdupois ounce if solid, of each different type of suspected hazardous chemical and its container may be disposed of without a court order by the seizing agency.

This bill would make the above provision expressly applicable to chemical containers and items contaminated with a hazardous substance, as specified.

(2) Existing law provides that the destruction of suspected hazardous chemicals shall not take place until specified requirements are met.

This bill would add to the requirements that must be met before destruction may take place a requirement to take photographs of the chemical containers and items contaminated with a hazardous substance that reasonably demonstrate their size. By increasing the duties of a local law enforcement agency, this bill would impose a state-mandated local program upon local governments.

(3) Existing law provides that subsequent to any disposal of a suspected hazardous chemical and its container, the law enforcement agency involved shall maintain records, as specified, and shall specify the date and time of the disposal. Existing law provides that subsequent to any destruction of a suspected controlled substance in combination with a hazardous chemical, an affidavit shall be filed within 30 days in the court that has jurisdiction over any pending criminal proceedings pertaining to that suspected controlled substance, reciting specified information.

This bill would, with respect to the destruction of a suspected controlled substance in combination with a hazardous chemical, provide that, if a search warrant was issued, an affidavit containing specified information shall be filed in the court that issued the search warrant.

(4) The bill would make conforming changes to related provisions.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 444 (AB 2785) Oropeza. Education finance.

Existing law appropriates \$503,433,000 from the Proposition 98 Reversion Account for transfer to Section A of the State School Fund, for allocation by the Superintendent of Public Instruction to school districts, county offices of education, and other agencies for the purposes of adult education, as specified, for costs incurred in the 2001–02 fiscal year.

This bill would specify that the appropriation is instead from the balance of the Proposition 98 Reversion Account, other specified amounts appropriated pursuant to the Budget Acts of 2001, 2000, and 1999, and the Child Care Facilities Revolving Fund.

The bill would declare that it makes appropriations for the usual and current expenses of the state, thereby taking effect immediately.

Ch. 445 (SB 1834) Committee on Budget and Fiscal Review. Transportation: funding.

(1) Existing law, the Traffic Congestion Relief Act of 2000, creates the Traffic Congestion Relief Fund (TCRF). The purpose of the act is to relieve traffic congestion, provide additional funding for local street and road deferred maintenance, and provide additional transportation capacity in high growth areas of the state. Under the act, the Legislature may authorize loans to the TCRF from the State Highway Account, not to exceed a cumulative total of \$180,000,000, for projects that are eligible for grants from the TCRF.

This bill would increase the cumulative total of the loan that the Legislature may authorize from the State Highway Account to the TCRF to \$654,000,000. The bill would require interest to be paid from the General Fund to the TCRF, for transfer to the State Highway Account, on any loan made under these provisions in excess of \$180,000,000. The bill would additionally allow the Director of Finance to authorize short-term loans from the General Fund to the State Highway Account. The bill would also authorize the Department of Finance to establish the accounting and reporting system used to determine the expenditures, cash needs, and balance in the TCRF, the Public Transportation account, the State Highway Account, and the Toll Bridge Seismic Retrofit Account. The bill would make other related changes.

(2) Existing law creates the State Highway Account in the State Transportation Fund in which are deposited various transportation revenues subject to Article XIX of the Constitution, including fuel tax revenues. The Constitution authorizes loans of these and other related revenues to the General Fund under certain circumstances.

This bill would authorize a \$173 million loan from the State Highway Account to the General Fund, to be repaid with interest no later than June 30, 2005.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 446 (SB 1901) Machado. Sales and use tax: resale certificates.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax, including an exemption for the sale or use of diesel fuel used in farming activities and food processing. That law requires the tax to be prepaid when purchasing the diesel fuel from the seller, unless the purchaser presents a resale certificate.

This bill would authorize a qualified person, as defined, to issue a resale certificate with respect to diesel fuel that qualifies for that exemption, as provided. By creating a new crime in connection with this authority, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute, but would become operative 30 days after its effective date.

Ch. 447 (AB 2216) Keeley. Intestate succession: domestic partners.

Under the existing law of intestate succession, the surviving spouse is entitled to a specified share of the decedent's separate property that is not effectively disposed of by will.

Effective July 1, 2003, this bill would extend this entitlement to a decedent's domestic partner, as specified. This bill would also make conforming and technical changes. The bill would further require the Secretary of State to send to each registered domestic partner who registered prior to January 1, 2003, a letter describing changes in the law of intestate succession proposed by this bill and the implication of those changes for domestic partners. The bill would require the Secretary of State to provide a similar notice with all requests for

a Declaration of Domestic Partnership form on and after January 1, 2003, and to make that notice available on the Internet.

Ch. 448 (SB 688) Burton. Civil actions: limitation of actions: summary judgment.

(1) Existing law specifies a one-year statute of limitations for actions for assault, battery, or injury to, or for the death of, a person caused by the wrongful act or neglect of another.

This bill would extend that statute of limitations to 2 years. The bill would also specify the same time limit for a civil action for injury or death to a terrorist victim of September 11, 2001.

(2) Existing law prescribes the service deadlines, continuance procedures, and appellate review of motions for summary judgment.

This bill would revise those provisions to extend the service deadlines from 28 to 75 days, to allow additional discovery after continuance, as specified, to require a reviewing court to allow supplemental briefing on grounds granting summary adjudication not relied upon by the trial court, and to make technical changes.

Ch. 449 (SB 1873) Escutia. Victims of crime: terrorist attacks.

Existing law provides for the indemnification of victims and eligible family members of victims, as defined, of specified types of crimes, for certain expenses for which the victim or family member has not been and will not be reimbursed from any other source. Indemnification is made under these provisions from the Restitution Fund, which is continuously appropriated to the California Victim Compensation and Government Claims Board for these purposes. The board may, until January 1, 2004, expand the scope of assistance to include victims' California resident family members who incur a pecuniary loss as a direct result of any of the 4 terrorist attacks that occurred at the World Trade Center and the Pentagon, and in Pennsylvania, on September 11, 2001.

This bill additionally would, until January 1, 2004, permit the board to authorize payment to specified family members, and other family members as determined by the board, of a victim of the terrorist attacks, equal to the loss of wages up to \$2,000 per eligible recipient who is unable to work due to traveling to or from, or attending, or all of these, memorial services or government-initiated events in honor of those victims, not to exceed a collective total of \$200,000. By providing for a new use for a continuously appropriated fund, this bill would make an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 450 (AB 1746) Liu. Postsecondary education: tuition and fees.

(1) Existing law requires the Regents of the University of California, the Board of Directors of the Hastings College of the Law, and the Trustees of the California State University to excuse the mandatory systemwide tuition and fees of any surviving spouse or surviving child, natural or adopted, of a deceased person who was a resident of the state, who was employed by a public agency, as defined, whose principal duties consisted of active law enforcement service or active fire suppression and prevention, and who was killed in the performance of active law enforcement or active fire suppression and prevention duties, and, until January 1, 2004, these provisions also apply to the surviving spouse or surviving child of a person who died while performing these duties, and who was employed as a contractor, or as an employee of a contractor, performing services for a public agency, as defined. This provision is applicable to the Regents of the University of California only if the regents, by resolution, make it applicable.

This bill would require any determination of eligibility under those provisions to be consistent with any findings of the Workers' Compensation Appeals Board, using the same procedures as in worker's compensation hearings, as to whether the death of the described person was industrial.

(2) Existing law requires the Regents of the University of California, the Board of Directors of the Hastings College of the Law, the Trustees of the California State University, and the governing board of each community college district to collect fees from students attending those postsecondary education institutions. This provision is applicable to the Regents of the University of California only if the regents, by resolution, make it applicable.

This bill would prohibit the regents, the trustees, and the governing board of each community college district from collecting any fees or tuition of any kind from any student in an undergraduate program who is the surviving dependent, as defined, of any individual killed in the September 11, 2001, terrorist attacks on the World Trade Center in New York City, the Pentagon building in Washington, DC, or the crash of United Airlines Flight 93 in southwestern Pennsylvania, if the dependent meets the financial need requirements of the Cal Grant A Program and the dependent was a resident of California on September 11, 2001, or if the individual killed in the attacks was a resident of California on that date. The bill would require the California Victim Compensation and Government Claims Board to identify all persons who are eligible for tuition and fee waivers pursuant to the bill, to notify these persons or their parents or guardians of their eligibility, and if requested by the public segments of postsecondary education in the state, on a case-by-case basis, to confirm the eligibility of persons requesting the waiver of tuition and fees. This prohibition would apply to the University of California only if the regents, by resolution, make it applicable.

(3) Existing law also prohibits the Regents of the University of California, the Board of Directors of the Hastings College of the Law, and the Trustees of the California State University from requiring or collecting any statewide fees or tuition from any surviving spouse or child, natural or adopted, of any deceased person who was killed in the performance of active law enforcement or active fire suppression and prevention duties or who died as a result of an accident or injury incurred in the performance of those duties, if that deceased person was a resident of the state, had the principal duty of law enforcement service or fire suppression or prevention, and was employed by a public agency, as defined. This provision is applicable to the Regents of the University of California only if the regents, by resolution, make it applicable.

This bill would expand that prohibition by requiring the governing board of each community college district to waive fee requirements for any surviving dependent, as defined, of any person meeting those requirements. The bill would add similar waiver requirements for any student in an undergraduate program who is a dependent as described in (2).

#### Ch. 451 (AB 2355) Bill Campbell. Limited liability companies.

Limited liability companies are regulated pursuant to the Beverly-Killea Limited Liability Company Act. Existing law authorizes a court of competent jurisdiction, upon application by a judgment creditor of a member of a limited liability company, to charge the membership interest of the member with payment of an unsatisfied judgment. Existing law provides that, to the extent charged, the judgment debtor has only the rights of an assignee of the membership interest.

This bill would extend these provisions to an application by a judgment creditor against an assignee of the membership interest, and would provide that service of a notice of motion for a charging order on a judgment debtor and on all members or the limited liability company creates a lien on the judgment debtor's assignable membership interest in the limited liability company. The bill would provide that the lien continue under the terms of the charging order, if granted, and would authorize the court to order a foreclosure on the membership interest at any time, subject to the charging order. The bill would delete the provision that, to the extent charged, a judgment creditor has only the rights of an assignee of the membership interest. The bill would provide that the purchaser at the foreclosure sale has the rights of an assignee.

This bill would also provide that, at any time before foreclosure, a membership interest charged may be redeemed by the judgment debtor, by other members with property other than property of the limited liability company, or by other members with property of the limited liability company with the consent of the members whose membership interests are not so charged.

This bill would authorize a court that has issued a charging order to appoint a receiver of the share of the distributions of the limited liability company and to make other orders, directions, accounts, and inquiries that the judgment debtor might have made or that the circumstances may require.

This bill would also make conforming changes.

Ch. 452 (AB 2364) Negrete McLeod. Medi-Cal: study.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

This bill would require the Legislature to commission a study on how the administration of the Medi-Cal program might be simplified, with a focus on creating efficiency in the system, and reducing costs to the program, health care service plans, and health care providers. This bill would require that the study be conducted without the use of state funds and that the results be given to the office of the Legislative Analyst and to the appropriate health policy committees of the Legislature on or before January 1, 2004.

Ch. 453 (AB 3055) Committee on Water, Parks and Wildlife. Fish and game.

(1) Under existing law, it is unlawful to import, transport, possess, or release alive into this state, except under a revocable, nontransferable permit, any wild animal of certain enumerated species.

This bill would authorize a veterinarian, a registered veterinary technician, or an unregistered assistant working under the supervision of a veterinarian, to provide veterinary care and treatment for any animal enumerated in the provisions summarized above for the period of time that veterinary care and treatment are necessary.

(2) Existing law provides that the Department of Fish and Game may authorize any person, with specified exceptions, to be a license agent to issue any license, permit, reservation, tag, or other entitlement upon the department's approval of the application. Existing law requires the license agent to retain those funds in a separate bank account, separate from the license agent's other funds.

This bill would delete the requirement that the fees be kept in a separate bank account and would instead require the license agent to account for those fees separately from other funds belonging to the license agent.

(3) Under existing law, no hunting license may be issued to a person unless he or she presents to the person authorized to issue the license evidence of a current or prior license or completion of a hunter safety course. Evidence of a current hunting license issued by another state or province is acceptable for issuance of a hunting license.

This bill would permit issuing a hunting license upon evidence that the applicant either holds a current hunting license, or a hunting license issued in either of the 2 previous hunting years by another state or province.

(4) Existing law generally provides that no person may break, train, hold field trials with, or practice dogs on any wild game bird or domesticated game bird during the closed season for the particular bird, with certain exceptions.

This bill would delete those exceptions and instead provide that no person may take those actions, except as authorized by the Fish and Game Commission. To the extent that the bill would expand the scope of an existing crime, the bill would impose a state-mandated local program.

(5) Existing law continuously appropriates money in the Fish and Game Fund to the department and the commission to carry out the Fish and Game Code.

By imposing new duties on the department, the bill would make an appropriation.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 454 (SB 1326) Committee on Local Government. Local Government Omnibus Act of 2002.

(1) Existing law requires the secretary of the governing body of a special district to deliver a notice to the county election official that, among other things, specifies the elective offices of the special district to be filled at the next general election.

This bill would require the secretary to specify which offices are for the balance of an unexpired term.

(2) Existing law specifies the declaration of candidacy form for a special district office. This bill would make technical corrections to the form.

(3) Existing law creates the California Debt and Investment Advisory Commission with various duties relative to the issuance of municipal bonds.

This bill would revise and recast certain of those provisions to, among other things, delete a requirement to select a vice chair and secretary, and require, by May 1, 2006, a specified report to the Legislature. The bill would make related and conforming changes in provisions relating to municipal investments.

(4) Existing law authorizes the lease of a portion of the Ione Youth Facility to the County of Amador on behalf of the Mother Lode Juvenile Facility Authority.

This bill would delete the reference to the Mother Lode Juvenile Facility Authority.

(5) Existing law sets forth the boundaries of Kern and Los Angeles Counties and authorizes counties to change, alter, or reform their boundaries by initiating a petition or by a resolution adopted by the legislative bodies.

This bill would revise the statutory descriptions of the boundaries of Kern and Los Angeles Counties, as specified.

(6) Existing law authorizes the board of supervisors to divide the county into election, school, road, supervisorial, sanitary, and other districts.

This bill would delete the references to school, sanitary, and other districts.

(7) Existing law authorizes a county board of supervisors to sell, exchange, quitclaim, or convey surplus real property without publishing and posting formal notices if the value of the property does not exceed \$10,000.

This bill would increase the maximum amount to which the provision applies to \$25,000.

(8) Existing law requires the county auditor or auditor-controller to exercise general supervision over the accounts of the county.

This bill would specify that those duties include the ability to review internal controls.

(9) Existing law authorizes the board of supervisors to apportion the compensation of county officers who perform municipal duties.

This bill would delete an obsolete reference from that provision.

(10) Existing law prescribes the duties of the county board of supervisors, district attorney, and auditor regarding counting money in the county treasury.

This bill would recast those provisions to generally require the county auditor to review the treasurer's statement of assets, as specified, thereby creating a state-mandated local program by imposing new duties on the county auditor and treasurer.

(11) Existing law requires the county auditor to report weekly to the board of supervisors regarding rejected claims.

This bill would delete that provision.

(12) Existing law requires a vote of at least 3 city council members for passage of specified resolutions, orders, and ordinances.

This bill instead would require a majority vote of the membership of the council.

(13) Existing law authorizes a city or its departments to lease or sublease land to the Department of Natural Resources for housing men, women, and equipment.

This bill instead would authorize a city or its departments to lease or sublease land to the state for housing personnel and equipment.

(14) Existing law authorizes local agencies to fund health and welfare benefits for spouses and children.

This bill would authorize those benefits to be funded for spouses and dependent children of retired officers and employees.

(15) Existing law authorizes specified persons to commence an action for a judicial determination that actions of a local agency violated specified public meeting laws.

This bill would include provisions relative to emergency meetings within those specified laws.

(16) Existing law authorizes a community services district to exercise powers, including, among other things, the constructing, opening, widening, extending, straightening, surfacing, and maintaining, in whole or in part, of any street in the district, subject to the consent of the governing body of the county or city in which the improvement is to be made.

This bill would authorize the Nipomo Community Services District to adopt by resolution the power to install or plant and maintain landscaping within public street rights-of-way or easements within the district.

(17) Existing law authorizes park and recreation districts to provide, among other things, community recreation programs, recreation facilities, parks, and open space.

This bill would authorize the Parker Dam Recreation and Park District, the Coachella Valley Recreation and Park District, and the Hesperia Recreation and Park District to provide street lighting facilities and services.

(18) Existing law contains provisions relative to establishing a system of coordinates for mapping and surveying purposes.

This bill would revise those provisions, as specified.

(19) Existing law provides for the election of trustees to the board of a reclamation district at a time and place designated by the county board of supervisors and requires the secretary of the board to publish a notice at least 7 days prior to the final date for receiving petitions for nominations for the office of trustee.

This bill would require that the notice state that the petition must indicate whether the nomination is for an unexpired term and would make technical corrections to the official filing petition.

(20) This bill would incorporate additional changes in Section 53635 of the Government Code proposed by AB 2122, to be operative only if AB 2122 and this bill are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

(21) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 455 (AB 138) Nation. Bidding procedures: alternative bids.

Existing law affecting state contracts prescribes procedures for determining the lowest bidder if additions or deletions from the base bid are considered, authorizes local agencies and the Trustees of the California State University to include alternatives that may be added

to, or deleted from, the final bid award for a project, and specifies how those alternatives shall be considered in determining who is the lowest responsible bidder. Existing law requires the lowest bid to be determined in a manner that prevents any information that would identify any of the bidders from being revealed to the public entity before the ranking of all bidders from lowest to highest has been determined.

This bill would also require the determination of the lowest bid to be made in a manner that prevents any information that would identify any of the proposed subcontractors or suppliers from being revealed to the public entity before the ranking of all bidders from lowest to highest has been determined.

Ch. 456 (AB 736) Oropeza. State employees: memorandum of understanding.

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions, that require the expenditure of funds or legislative action, of a memorandum of understanding entered into between the state employer and State Bargaining Unit 13, International Union of Operating Engineers, Stationary Engineers, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that provisions of the memorandum of understanding approved by this bill that require the expenditure of funds shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer, and the affected employee organization shall meet and confer to renegotiate the affected provisions.

Existing law prescribes contribution rates for state employees who are state miscellaneous, state industrial, or state safety members of the Public Employees' Retirement System.

This bill would reduce the contribution rates, as specified, for those members in State Bargaining Unit 13 until June 30, 2003.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 457 (AB 947) Jackson. Pesticides: schoolsites.

(1) Existing law authorizes the levy of civil penalties of not more than \$1,000 for each violation of any provision of a specified body of law relating to pesticides.

This bill would increase this penalty to not more than \$5,000 for each violation determined to be a serious violation. This bill would also require a county agricultural commissioner to charge a fee for monitoring subsequent pesticide applications made within  $\frac{1}{4}$  mile of a school by a person who has received a civil penalty for a specified violation of law relating to pesticides.

(2) Under existing law, the agricultural commissioner of any county may adopt regulations applicable in his or her county that are supplemental to those of the Secretary of Food and Agriculture that govern the conduct of pest control operations and records and reports of those operations.

This bill would authorize the commissioner of any county to apply these regulations to the agricultural use of any pesticide within  $\frac{1}{4}$  mile of a school, as specified, and would allow the Director of Pesticide Regulation to disapprove the conditions within 30 days of their submission.

(3) Existing law provides that each school district and county office of education is responsible for the overall development of comprehensive school safety plans for its schools.

This bill would provide that the school safety plan may include, at local discretion of the governing board of the school district, procedures for responding to the release of a pesticide or other toxic substance from properties within  $\frac{1}{4}$  mile of a school. This bill would provide that no funds received from the state may be used for this purpose.

Ch. 458 (AB 1342) Alquist. Postsecondary education: international education.

Existing law, known as the Donahoe Higher Education Act, sets forth, among other things, the missions and functions of California's public and independent segments of higher education and their respective institutions of higher education. Provisions of the act apply to the University of California only to the extent that the Regents of the University of California, by appropriate resolution, act to make a provision applicable.

This bill would encourage all public and private institutions of higher education in the state to develop, as their resources permit, programs that support learning about other cultures, global issues, and the exchange of Californians and international students and scholars. The bill would, among other things, encourage institutions to develop courses and programs in international studies, to promote the presence of international students, and to facilitate international exchange programs, as their resources permit.

Ch. 459 (AB 1936) Horton. Taxation: State Board of Equalization: returns.

The State Board of Equalization administers various tax laws, including the Sales and Use Tax Law, under which the board is authorized to accept sales and use tax returns by electronic media. That law also requires that returns filed with the board be authenticated in a manner prescribed by the board.

This bill would provide a similar authorization and authentication requirement under the Motor Vehicle Fuel Tax Law, the Use Fuel Tax Law, the Cigarette and Tobacco Products Tax Law, the Alcoholic Beverage Tax Law, the Energy Resources Surcharge Law, the Emergency Telephone Users Surcharge Law, the Hazardous Substances Tax Law, the Integrated Waste Management Fee Law, the Oil Spill Response, Prevention, and Administration Fees Law, the Underground Storage Tank Maintenance Fee Law, the Fee Collection Procedures Law, and the Diesel Fuel Tax Law.

Ch. 460 (AB 2002) Alquist. Urban search and rescue emergency response advisory committee.

Existing law generally sets forth the duties of the Seismic Safety Commission, in overseeing various emergency response activities in the state relating to earthquake hazard reduction and prediction.

This bill would require the Seismic Safety Commission, in consultation with the Director of Emergency Services, to establish an urban search and rescue emergency response advisory committee to prepare and submit to the commission chairperson a strategy, plan, and recommendations for addressing the resource needs of emergency urban search and rescue units.

Ch. 461 (AB 2406) Committee on Governmental Organization. Disaster assistance.

The Natural Disaster Assistance Act requires that the Director of the Office of Emergency Services provide financial assistance to local agencies for public real property that is damaged or destroyed by a natural disaster. The Natural Disaster Assistance Fund is continuously appropriated, without regard to fiscal years, for purposes of the act.

This bill would rename this act the Disaster Assistance Act, would delete from these provisions the requirement that the disaster qualifying for the assistance be from natural causes, and would include a terrorist act or epidemic as a disaster for this purpose.

This bill would rename the special fund described above the Disaster Assistance Fund and would, by expanding the purposes for which moneys in that continuously appropriated fund are available, thereby constitute an appropriation.

The bill would make technical, conforming changes.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Ch. 462 (AB 2425) Richman. The Los Angeles Unified School District: Inspector General.

Existing law, until January 1, 2005, authorizes the Los Angeles Unified School District's Office of Inspector General to subpoena witnesses, administer oaths or affirmations, take testimony, and compel the production of all information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence deemed material, relevant, and reasonably related to any inquiry or investigation undertaken by the inspector general when he or she has a reasonable suspicion that a law, regulation, rule, or district policy has been or is being materially violated. Existing law makes it a crime to knowingly provide the inspector general false information under oath.

This bill would extend that date to January 1, 2015, thereby imposing a state-mandated local program by extending the criminal sanctions for providing false information. The bill would, in addition, authorize the inspector general to perform audits that are reasonably related to any inquiry or investigation undertaken by the inspector general when he or she has a reasonable suspicion that a law, regulation, rule, or district policy has been or is being materially violated.

This bill would make certain findings and declarations regarding the inapplicability of a general statute within the meaning of Section 16 of Article IV of the California Constitution.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 463 (AB 2950) Strom-Martin. Instructional strategies: subject matter projects.

(1) Existing law provides for the establishment and maintenance of 6 subject matter projects by the Regents of the University of California with the approval of the Concurrence Committee. Existing law provides that these subject matter projects are to create opportunities for researchers, higher education faculty, and elementary and secondary school faculty to work together to identify exemplary teaching practices, examine and develop research on learning, knowledge, and educational materials and to provide support to teachers to develop and enhance content knowledge and pedagogical skills.

Existing law also requests the Regents of the University of California to jointly develop with the Trustees of the California State University and the independent colleges and universities, the California Professional Development Institutes that provide training to teachers in various subject matters taught in the elementary and secondary schools. Existing law provides that the provisions concerning the subject matter projects and the professional development institutes will become inoperative on June 30, 2002, and will be repealed as of January 1, 2003.

This bill would extend the inoperative date to June 30, 2007, and the repeal date to January 1, 2008, and would make these provisions applicable only to the subject matter projects, thereby eliminating the inoperative date and repeal date for the California Professional Development Institutes.

(2) Existing law requires a 4-year independent evaluation of the effectiveness of the subject matter projects to be reported to the State Board of Education, the Governor, and the Legislature by July 1, 2002, and requires annual reports of the preliminary results of this evaluation beginning July 1, 2000.

This bill would require the independent evaluation to be reported by February 1, 2006, and would require annual reports of the preliminary results of the evaluation beginning February 1, 2004.

Ch. 464 (AB 2964) Shelley. Hunters Point Shipyard Conversion Act of 2002.

(1) Existing law contains provisions governing military base closures.

This bill would grant to, and vest in, the San Francisco Redevelopment Agency, all of the state's right, title, and interest in the Hunters Point trust lands, and, upon conveyance by the federal government to the agency, in appurtenances located on Hunters Point submerged lands, subject to the public trust and the terms and conditions of this bill. The bill would authorize the agency to use, conduct, operate, maintain, manage, administer, regulate, improve, lease, and control the Hunters Point trust lands in conformance with this bill and the public trust. The bill would authorize the agency to grant franchises, permits, privileges, licenses, easements, or leasehold interests in connection with the Hunters Point trust lands, or any part thereof, for a term not exceeding 66 years.

The bill would require the agency to deposit all moneys collected by the agency arising out of the use or operation of any of the Hunters Point trust lands into a special fund maintained by the agency. The bill would require the agency to prepare an annual statement of financial conditions and operations and to submit the statement to the State Lands Commission each year on or before October 1, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 465 (SB 1251) Johannessen. Military and Veterans Code: veterans' farm and home purchase program: obsolete references.

The existing Military and Veterans Code contains various references that have been rendered obsolete by subsequent changes in the law.

This bill would correct some of these obsolete references.

Existing law provides for farm and home purchase benefits for qualifying veterans under the Veterans' Farm and Home Purchase Act of 1943, and subsequent acts.

Existing law authorizes the Department of Veterans Affairs to advance to any purchaser sums for certain purposes, including, but not limited to, paying taxes and assessments, or making certain improvements, and permits any of the money so advanced to be added to the deferred principal of the purchaser's account bearing interest at the same rate.

This bill would define purchaser for those purposes. The bill would instead permit any of the money so advanced to be added to the deferred principal of the purchaser's account bearing interest at the rate prescribed by the department.

This bill would authorize the department, out of any money available in the Veterans' Farm and Home Building Fund of 1943, to advance to a purchaser sums for the purpose of making alterations, repairs, or improvements on or in connection with the principal residence of the purchaser.

The bill also would require that all loans granted under these provisions be funded in accordance with federal laws governing the use of tax-exempt bonds.

The Veterans' Farm and Home Purchase Act of 1943 provides that the Department of Veterans Affairs shall not acquire a home in which the veteran has an interest of record, except in specified instances.

This bill would provide an additional exception where the veteran had a prior interest of record in the property as a result of property left in trust at the time of filing his or her application for a loan. The bill would also provide that the loan may only be used to pay the amount of any existing encumbrance.

The Veterans' Farm and Home Purchase Act of 1974 authorizes the Department of Veterans Affairs to prescribe and determine the qualifications for all veterans and requires that certain veterans be given preference over other veterans based upon the nature of their service.

This bill would revise the preference categories and provide that the preference categories shall be used whenever the department determines that a shortage of funds exists in any of the funding sources available.

Existing law provides that whenever applications for loans under the program exceed the amount of funds available, the department may establish, only once in each calendar year, a date so as to provide funding to veterans whose applications were filed on or before that date.

This bill would instead provide that whenever applications exceed the amount of funds available in any one or more of the available funding categories, the department may establish an eligibility date for each funding category.

Ch. 466 (SB 1281) Haynes. Veterans homes: accounting for charges.

Under existing law, a member of a veterans home is required to pay fees and charges as determined by the Department of Veterans Affairs.

This bill would require the administrator of the home to provide each member of the home upon admission, with a written notice, as specified, of the costs of care that may be incurred in excess of the member contribution fee, and with a quarterly statement or accounting of all charges for the costs of care rendered to the member in excess of the member fee, as defined.

Ch. 467 (SB 1416) Polanco. Charter schools: community day schools.

Existing law provides that a charter school that serves at-risk pupils and operates under a charter approved before June 1, 1997, by the Los Angeles County Board of Education may continue to operate until June 30, 2003.

This bill would extend the date until June 30, 2008, provided that the authority to continue operation is approved by the county board of education.

Existing law requires the county board of education to establish specific accountability criteria, to annually measure the performance of the charter school, and requires the performance criteria to include specified requirements.

This bill would delete the specified performance criteria requirements and instead require the county board of education to establish accountability criteria that are in compliance with the alternative accountability system developed by the Superintendent of Public Instruction for schools with fewer than 100 test scores contributing to the school's Academic Performance Index. The bill would require the county board of education to annually report the measurement to the State Department of Education, the Department of Finance, the Assembly Committee on Education, the Assembly Committee on Appropriations, the Senate Committee on Education, and the Senate Committee on Appropriations.

This bill would make certain findings and declarations regarding the inapplicability of a general statute within the meaning of Section 16 of Article IV of the California Constitution.

Ch. 468 (SB 1460) Ortiz. Capitol Area Plan: R Street Area.

Existing law establishes the capitol area and the project area boundaries of the Capitol Area Plan within the City of Sacramento. Existing law also grants the Capitol Area Development Authority (CADA) the powers of a redevelopment agency to direct the development of the project area within the capitol area of the Capitol Area Plan and authorizes CADA to adopt documents necessary or convenient to, among other things, the allocation of property taxes for the financing of redevelopment in the project area.

This bill would enlarge the capitol area and project area of the Capitol Area Plan to include an area referred to as the R Street Area, as defined. The bill would require CADA to prepare a redevelopment plan for the R Street Area that furthers the purposes and objectives of the Capitol Area Plan and would require that the plan be approved after published notice and at least one public hearing.

The bill would also require the rehabilitation, development, or construction of very low, low-, and moderate-income replacement housing, as specified, within 4 years of its

destruction or removal in the R Street Area. It would establish specified time limits for the activity of CADA in the R Street Area.

The bill would also authorize CADA to allocate and use rents from state-owned and leased property and property taxes for the R Street Area and to separately account for their use and allocation.

Ch. 469 (SB 1470) Johannessen. California State Military Museum.

Existing law authorizes the Adjutant General, the commander of all state military forces, to establish a California National Guard Military Museum and Resource Center as a repository for military artifacts, memorabilia, equipment, documents, and other items relating to the history of the California National Guard.

This bill would instead require the Adjutant General to establish a California State Military Museum and Resource Center and enter into an operating agreement with the California Military Museum Foundation to conduct the day-to-day operations of the museum, as specified. The bill would appropriate \$100,000 for each fiscal year from the General Fund to the California State Military Museum.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 470 (SB 1492) Perata. Transportation: Metropolitan Transportation Commission.

Existing law requires the Metropolitan Transportation Commission to provide comprehensive regional transportation planning for the region comprised of the City and County of San Francisco and the Counties of Alameda, Contra Costa, Marin, Napa, San Mateo, Santa Clara, Solano, and Sonoma.

This bill would impose a state-mandated local program by requiring the commission, to the extent funds are available, to establish certain goals and measurable objectives for planning corridors and subcorridors for, and to establish performance measurement criteria to evaluate certain new transportation projects and programs in, the regional transportation plan.

This bill would specify that all costs incurred by the commission in discharging these functions shall be paid solely from funds allocated to it for the conduct of the transportation planning and programming process.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new program or higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

Ch. 471 (SB 1656) Scott. Teacher credentialing: registered sex offenders.

(1) Existing law requires the Commission on Teacher Credentialing to deny an application for the issuance or renewal of a credential made by an applicant who has been determined to be a sexual psychopath, as defined, who has been convicted of a sex offense, as defined, or a controlled substance offense, as defined, or who has been found to be insane through a criminal proceeding, as prescribed.

This bill would additionally require the commission to deny the application of any applicant who is required to register as a sex offender, as prescribed.

(2) Existing law requires the commission to suspend the credential of any credential holder who is convicted of a sex offense, as defined, or a controlled substance offense, as defined, and to revoke that credential when the conviction becomes final or when the imposition of sentence is suspended. Existing law also sets forth a procedure that is

applicable when a credential holder makes a plea of nolo contendere that does not constitute a conviction, as defined, of a sex offense, as defined.

This bill would additionally require the commission to suspend the credential of any credential holder who is required to register as a sex offender, as prescribed. The bill would provide for reinstatement or revocation of the certificate upon final disposition of the underlying conviction, as provided.

(3) Existing law provides that, upon being charged, as specified, with certain sex or controlled substance offenses, a certificated employee of a school district be placed on compulsory leave of absence.

This bill would require a school district to forward a copy of the charge to the commission no later than 10 days after receipt, thus imposing a state-mandated local program. The bill would require the commission, upon receiving a copy of the complaint, information, or indictment containing the charge to automatically suspend the employee's credential. The bill would provide for the duration of the suspension to be not more than 10 days after the date of entry of the judgment in the proceedings.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 472 (SB 1768) Murray. Regional transportation improvement program.

Existing law requires that funds made available for transportation capital improvement projects be programmed and expended for specified program categories, including regional improvements. Under existing law, a regional transportation planning agency and a county transportation commission are required to submit to the Department of Transportation and the California Transportation Commission a 5-year regional transportation improvement program, including projects to be funded with regional improvement funds.

This bill would authorize the department to nominate or recommend projects to be included in the regional transportation program to improve state highways using regional transportation improvement funds. The bill would specify that the regional transportation planning agency or county transportation commission has the sole authority to determine whether the projects are included in the regional transportation improvement program.

#### Ch. 473 (SB 1893) Johannessen. Veterans' farm and home purchase program.

Existing law provides for farm and home purchase benefits for qualifying veterans under the Veterans' Farm and Home Purchase Act of 1974, and subsequent acts. For these purposes, existing law requires the purchase price of a home to the Department of Veterans Affairs, or a sum to be expended by the department pursuant to a contract for the construction of a dwelling house and other improvements, or the purchase price of a mobilehome, under specified conditions, not to exceed \$250,000.

This bill would instead require that the maximum amount be changed to the then current Fannie Mae maximum loan limit for a single-family home set annually by Fannie Mae.

Existing law establishes the maximum purchase price of a home and the maximum costs of construction of a home, and establishes requirements relating to the purchaser's payment responsibilities, including, but not limited to, the requirement that the purchaser pay interest at a rate determined by the Department of Veterans Affairs pursuant to a prescribed procedure.

This bill would authorize the department to establish separate rates of interest, as prescribed, payable on the amounts remaining unpaid under veterans' purchase contracts for any contractholder, called to active duty in the military service of the United States, who qualifies for relief under certain provisions of federal law.

Ch. 474 (SB 1900) McPherson. California Tourism Marketing Act.

The California Tourism Marketing Act authorizes the California Travel and Tourism Commission to levy assessments on certain businesses in the travel and tourism industry in the state according to referendum of the assessed businesses, to reach a level of \$25,000,000 per fiscal year. The act states the intent of the Legislature that the state shall be responsible for appropriating a minimum of \$7,300,000 each fiscal year for travel and tourism, and authorizes the industry to terminate the commission by referendum if the state fails to appropriate that amount in any fiscal year, while the state may decide not to appropriate funding in the event that the commission fails in any fiscal year to target its annual assessment level at or above a specified level.

The act provides that the commission may be terminated after the initial 4 years of operation by referendum of the assessed businesses held every 2 years. The act also requires, among other things, commencing with the 3rd referendum, the commission by adopted resolution to determine the individuals who will run for commissioner and the termination of the commission.

This bill would, instead, require that, commencing with the referendum held in 2007, and every 6 years thereafter, the resolution to also cover the continuation of the commission. It would also permit the commission to be terminated at any time by a referendum called by a minimum of 10% of the assessed businesses.

The bill would also delete obsolete provisions and make other conforming changes.

Ch. 475 (SB 1924) O'Connell. Vehicles.

Existing law requires a person under 18 years of age to wear a properly fitted and fastened bicycle helmet while operating a bicycle or riding upon a bicycle as a passenger upon the streets or any other public bicycle path.

This bill would also require that persons under 18 years of age wear a helmet while operating a nonmotorized scooter or skateboard, while wearing in-line or roller skates, or while riding upon a nonmotorized scooter or skateboard as a passenger. Because this bill would expand the scope of an existing crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 476 (AB 1748) Dickerson. Department of Forestry and Fire Protection: contract pilots: death benefits.

Under existing law, the Department of Forestry and Fire Protection is required, among other things, to provide fire prevention and firefighting equipment, organize crews and patrols, and employ necessary personnel.

This bill would require that all contracts entered into by the department to retain the services of pilots to fly firefighting aircraft contain an express provision that if the pilot dies while performing his or her duties under the contract, eligible survivors, if any, of the pilot shall receive a one-time lump-sum death benefit.

The bill would specify that it would not relieve the pilot's employer from the obligation to secure coverage for workers' compensation; eliminate or reduce any workers' compensation benefits otherwise available; or affect, alter, or eliminate any other remedy otherwise available at law.

Ch. 477 (AB 2328) Wayne. Medical experiments.

Existing law, the Protection of Human Subjects in Medical Experimentation Act, prohibits any person from being subjected to any medical experiment unless the informed consent of the person is obtained.

This bill would authorize certain persons to give surrogate informed consent for a person to be subjected to a medical experiment when conducted within an institution that holds an assurance with the United States Department of Health and Human Services in accordance with specified regulations, if that person is unable to give that consent. This bill would provide that these provisions apply only to medical experiments that relate to the cognitive impairment, lack of capacity, or serious or life threatening diseases and conditions of research participants.

Ch. 478 (AB 2352) Cedillo. Health facility financing.

Under existing law, the California Health Facilities Financing Authority Act, there is a California Health Facilities Authority, which is empowered to make loans under certain conditions from the continuously appropriated California Health Facilities Financing Authority Fund to nonprofit corporations or associations for financing or refinancing the acquisition, construction, or remodeling of health facilities. Existing law requires that no loan to finance a project exceed the cost of the project, as determined by the participating health institution and approved by the authority.

Existing law authorizes the authority to award grants to any eligible participating primary care clinic for purposes of financing capital outlay projects and requires the authority to develop selection criteria and a process for awarding these grants.

This bill would authorize the authority to award grants to any eligible health facility for purposes of financing projects. The bill would require the authority to develop selection criteria and a process for awarding these grants.

The bill would require that grants awarded under the bill be financed by funds from the California Health Facilities Authority Fund. Because the bill would expand the purposes for which a continuously appropriated fund may be used, it would result in an appropriation.

This bill, for purposes of the California Health Facilities Financing Authority Act, would revise the definition of "health facility" to, among other things, include a "nonprofit speech and hearing center" and a "blood bank," as defined, and would revise the definition of "cost" and "project."

Existing law provides for the selection of the officers of the authority and requires the authority to establish financial eligibility standards, as prescribed.

This bill would revise the method for the selection of officers of the authority and the criteria for establishing financial eligibility standards.

Ch. 479 (AB 2462) Bates. Victims of crime: domestic violence: children.

Existing law provides for the indemnification by the California Victim Compensation and Government Claims Board of victims of specified types of crimes, for certain expenses for which the victim has not been and will not be reimbursed from any other source. "Victim" is defined for these purposes to mean a person who sustains injury or death as a direct result of a crime. "Injury" is defined for these purposes to include physical and emotional injury, or both, subject to certain conditions, and until January 1, 2004, a child who has been the witness of a crime or crimes of domestic violence may be presumed by the board to have sustained physical injury for these purposes. Indemnification is made under these provisions from the Restitution Fund, which is continuously appropriated to the board for these purposes.

This bill would additionally provide, on a permanent basis, that a child who resides in a home where a crime or crimes of domestic violence have occurred may be presumed by the board to have sustained physical injury, regardless of whether the child has witnessed the

crime. By expanding the pool of persons eligible for payments from a continuously appropriated fund, this bill would make an appropriation.

Ch. 480 (SB 399) Ackerman. Business organizations: conversions.

Existing law provides for the creation of various forms of business organizations, including various forms of partnerships, corporations, and limited liability companies, and provides for conversion of certain of these forms of business organizations, other than corporations, into other forms of business organizations. Under existing law, a business organization is required to file specified documents with the Secretary of State. The Secretary of State is authorized to charge a fee in connection with the filing that is paid into the Secretary of State's Business Fees Fund.

This bill would establish procedures for the conversion of California corporations into domestic limited liability companies, limited partnerships, or general partnerships. The bill would also establish procedures for the formation of a California corporation upon the conversion of a foreign or domestic limited liability company, limited partnership, or general partnership or upon the conversion of a foreign corporation. The bill would impose a fee of \$250 for the conversion of an entity under these provisions, which would be decreased to \$150 on January 1, 2005.

This bill would incorporate additional changes to Section 25005.1 of the Corporations Code made by SB 1926 if it is enacted prior to this bill.

Ch. 481 (SB 564) Speier. Healing arts: training in spousal or partner abuse treatment.

Existing law provides for the licensing and regulation of psychologists; marriage, family, and child counselors; and social workers. Under existing law, an applicant for licensure in these professions is required to complete certain coursework or training in order to be eligible to sit for the licensing examination, including coursework in spousal or partner abuse assessment, detection, and intervention. Existing law also requires these professionals to participate in continuing education as a prerequisite for renewing their license. A violation of the laws regulating these professionals is a crime.

This bill would require an applicant for licensure as a psychologist; marriage, family, and child counselor; or social worker who began graduate study on or after January 1, 2004, to complete a minimum of 15 contact hours of coursework or training in spousal or partner abuse assessment, detection, and intervention strategies. The bill would also require a person licensed in these professions who began graduate study prior to January 1, 2004, to take a continuing education course in spousal or partner abuse assessment, detection, and intervention strategies. The bill would specify that this continuing education provision becomes operative on January 1, 2004.

Because a violation of the bill's requirements would be a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 482 (SB 423) Torlakson. Workforce Housing Reward Program.

Existing law establishes, among other housing programs, the Jobs-Housing Balance Improvement Program administered by the Department of Housing and Community Development.

This bill would establish the Workforce Housing Reward Program to be administered by the department to provide local assistance for the construction or acquisition of capital assets to cities, counties, and cities and counties that provide land use approval to affordable housing developments, as specified.

This bill would become operative only upon approval by the voters of the Housing and Emergency Shelter Trust Fund Act of 2002 as enacted by Chapter 26 of the Statutes of 2002, and would prescribe the use of certain funds that would be transferred to the Jobs-Housing Balance Improvement Account pursuant to that act.

Ch. 483 (SB 1315) Sher. Pharmaceuticals: purchasing.

Existing law authorizes certain state entities to purchase drugs for health purposes.

This bill would authorize the Department of General Services to enter into contracts on a bid or negotiated basis with manufacturers and suppliers of single source or multisource drugs, and would authorize the department to obtain from them discounts, rebates, or refunds as permissible under federal law.

This bill would require the State Department of Mental Health, the Department of Corrections, the Department of the Youth Authority, and the State Department of Developmental Services to participate in the program authorized by this bill. This bill would also authorize other state, local, and public agency governmental entities to elect to participate in the program.

This bill would authorize the Department of General Services to contract with a pharmaceutical benefits manager or other entity to negotiate price discounts, rebates, or other options for, and to purchase, prescription drugs and to act as a consultant to the department.

This bill would authorize the Department of General Services to explore additional strategies for managing drug costs. It would also require the department, on or before February 1, 2005, to submit a report containing specified information to certain committees of the Legislature regarding the program.

Ch. 484 (SB 1365) Speier. Personal income taxes: contributions: California Breast Cancer Research Fund.

The Personal Income Tax Law allows taxpayers, until January 1, 2003, to designate on their tax returns that a specified amount in excess of their tax liability be contributed to the California Breast Cancer Research Fund. Existing law requires money in that fund, upon appropriation by the Legislature, to be allocated to the University of California for the support of the Breast Cancer Research Program for the purposes of that program that are related solely to breast cancer research.

This bill would extend the operation of those provisions until January 1, 2008. The bill would also authorize the University of California to use up to 5% of the money allocated to it for administering and promoting the program.

Ch. 485 (SB 1379) O'Connell. Speech-language pathologists: endoscopies.

(1) Existing law, the Speech-Language Pathologists and Audiologists Licensure Act, authorizes the licensure, regulation and discipline of speech-language pathologists and audiologists by the Speech-Language Pathology and Audiology Board. Existing law defines the practice of speech-language pathology.

This bill would expand the definition of speech-language pathology by authorizing a speech-language pathologist who meets specified criteria, including having performed 25 flexible fiberoptic nasendoscopic procedures, to use a rigid or flexible endoscope in an acute care setting, as defined, to observe the pharynx and larynx areas of the throat in order to observe, collect data, and measure the parameters of communication and swallowing and to guide communication and swallowing assessment and therapy. The bill would require a speech-language pathologist who passes a flexible fiberoptic nasendoscopic instrument to be under the direct authorization of a certified otolaryngologist and the supervision of a physician and surgeon.

(2) Existing law provides that a person who has a valid certificate of clinical competence in speech-language pathology or audiology meets the educational and experience requirements for licensure.

This bill would require an applicant for licensure who has obtained any qualifications in violation of the act or who does not meet the licensing qualifications to correct the deficiency in order to qualify for licensure. The bill would additionally provide that a deficient application is deemed abandoned if the deficiency is not corrected within one year from the date of the deficiency notice.

(3) Existing law requires the board to adopt regulations that set forth the standards for approval of Associate Degree Speech-Language Pathology Assistant training programs based on established standards and curriculum guidelines.

This bill would authorize the board to establish a site review committee to conduct onsite evaluations, inspections, and investigations of speech-language pathology assistant training programs and to assess the training program's compliance with the board's practice act. The bill would prohibit the review committee members from receiving compensation but would require the members to be reimbursed for travel and per diem expenses by the institution that is the subject of the evaluation, inspection, or investigation. The bill would revise other provisions of the act.

Ch. 486 (SB 1493) Alpert. Medi-Cal: reimbursement procedures.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law establishes procedures for the reimbursement of providers under the Medi-Cal program.

This bill would authorize the department to negotiate or renegotiate settlements with any acute care hospital in San Diego County that has a distinct part pediatric convalescent facility, and that has violated any Medi-Cal reimbursement policy or procedure governing the operation of acute care hospitals. It would authorize the department, in a settlement negotiated or renegotiated pursuant to the bill, to waive all or part of any Medi-Cal overpayment that would otherwise be reimbursable to the department by an acute care hospital.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 487 (SB 1660) Scott. Income tax and bank and corporation taxes.

The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws, including a credit, calculated on the basis of either years of service or a specified formula, to a credentialed teacher for each taxable year beginning on or after January 1, 2000.

This bill would, for purposes of calculating this credit on the basis of years of service, make clarifying, technical changes to the definition of a qualified educational institution.

Existing law also authorizes a credit against certain taxes for each taxable year beginning on or after January 1, 2001, and before January 1, 2006, in an amount equal to 10% of the qualified cost, as provided, of property for use in the manufacture of a product for ultimate use in a Joint Strike Fighter, as specified, that is placed in service in this state. Existing law also allows a credit against the taxes for taxable years beginning on and after January 1, 2002, and before January 1, 2004, for certain amounts relating to the use of solar energy systems, as defined.

This bill would make a clarifying change to the definition of qualified cost for purposes of the Joint Strike Fighter credit, and to the definition of solar energy system for purposes of the solar energy system credit.

The Bank and Corporation Tax Law provides, for taxable years beginning on or after January 1, 1987, that gross income includes a debt obligation that is sold, exchanged, or matured, as provided.

This bill would repeal this provision.

Existing law requires the Department of Justice, in consultation with the Franchise Tax Board, to examine how to better collect various court-imposed payment obligations. Existing law repeals this requirement on January 1, 2003.

This bill would delete this repeal date to allow this examination to continue in perpetuity.

Ch. 488 (AB 2065) Oropeza. Sales and use taxes: income and bank and corporation taxes.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. Any unpaid taxes due and payable under that law are subject to penalties, interest, and any expenses and fees associated with the collection of the taxes owed.

This bill, for the period beginning on October 1, 2002, and ending on June 30, 2003, would authorize the State Board of Equalization to forgive any penalties and interest on unpaid taxes owed by eligible taxpayers, as defined, to the extent that the underlying tax liability is reduced by an eligible amount, as defined.

The Personal Income Tax Law imposes a tax measured by the income of residents and part-year residents. Any unpaid taxes due and payable under that law are subject to penalties, interest, and any expenses and fees associated with the collection of the taxes owed.

This bill, for the period beginning on October 1, 2002, and ending on June 30, 2003, would authorize the Franchise Tax Board to forgive any penalties, interest, and fees on unpaid taxes owed by eligible taxpayers, as defined, to the extent that the underlying tax liability is reduced by an eligible amount, as defined.

The Personal Income Tax Law authorizes various credits against the tax imposed by that law, including a credit for credentialed teachers in an amount equal to the lesser of (1) the applicable of specified amounts based upon years of service as a teacher, or (2) 50% of the amount of tax imposed upon the taxpayer's income that is attributable to service as a teacher at a qualifying educational institution.

This bill would suspend the credit for taxable years beginning on or after January 1, 2002, and before January 1, 2003.

Existing law allows individual and corporate taxpayers to utilize net operating loss carryovers for purposes of offsetting their individual and corporate tax liabilities.

This bill would disallow the deduction for specified net operating loss carryovers in the 2002 and 2003 taxable years. The bill would extend the carryover period for the net operating losses, thus allowing the taxpayers to have the same number of years to utilize the deduction as they would have if the change had not been enacted. For net operating losses incurred in taxable years beginning on and after January 1, 2004, this bill would allow a net operating loss carryforward deduction in an amount equal to 90% of the net operating loss incurred.

Existing law requires the transferee of real property to withhold  $3\frac{1}{3}\%$  of the purchase price of the property if the property was either acquired from a person, who is not a resident, or who after the transfer of the real property, will no longer be a resident of this state or from a corporation, if after the transfer that corporation has no permanent place of business in this state.

This bill, for taxable years beginning on or after January 1, 2003, would extend this  $3\frac{1}{3}\%$  withholding requirement to specified transfers of real property acquired from an individual.

Existing law requires the Franchise Tax Board to prepare wage withholding tables to be used by employers for purposes of withholding taxes on wages paid, but allows withholding at a rate of 6% with respect to supplemental wages in lieu of the withholding tables.

This bill would allow withholding at a rate of 9.3% with respect to stock options and bonus payments, in lieu of the withholding tables or the specified withholding rate with respect to supplemental wages, and would also make related conforming changes.

Existing law, with respect to the administration of income and corporate taxes, imposes penalties with respect to the underpayment of taxes.

This bill would provide for the waiver of certain penalties imposed for the underpayment of tax with respect to any law enacted during the 2002 calendar year.

The Bank and Corporation Tax Law, in specified conformity to federal income tax laws allows a deduction for bad debts, except that, among other things, the deduction of a savings and loan association, or bank or financial corporation is determined in accordance with special rules that allow a deduction for a reasonable addition to a reserve for bad debts.

This bill would, with respect to banks, modify that special rule to provide additional conformity to federal income tax laws relating to reserves for losses on loans of banks, except as otherwise provided. This bill would also make related changes with respect to the alternative minimum tax.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 489 (SB 1914) Committee on Insurance. Health.

Existing federal law, the Health Insurance Portability and Accountability Act of 1996 (HIPAA), establishes requirements to safeguard the privacy of medical information. The HIPAA specifies that its provisions supersede any contrary provision of state law, subject to specified exceptions. Existing state law, the Health Insurance Portability and Accountability Implementation Act of 2001, provides for the implementation of the HIPAA's requirements in this state, including requiring the Office of HIPAA Implementation to perform specified activities required for compliance with the act.

This bill would require the office to assume statewide leadership, coordination, direction, and oversight responsibilities for determining which provisions of state law concerning personal medical information are preempted by HIPAA. The bill would require state entities impacted by HIPAA, at the direction of the office, to assist in, and conform to, these determinations. The bill would also provide that any provision of state law concerning personal medical information is not applicable to the extent that it is superseded by HIPAA.

Ch. 490 (SB 1945) Kuehl. Discrimination.

(1) Under existing provisions of the California Fair Employment and Housing Act, a person filing a complaint for an unlawful practice with the Department of Fair Employment and Housing is required to file the complaint within one year, except that the period for filing may be extended as prescribed, under specified circumstances. Existing law provides that all persons within the jurisdiction of this state have the right to be free from any violence or intimidation by threat of violence, committed against their persons or property because of their race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, disability, or position in a labor dispute, or because another person perceives them to have one or more of those characteristics. A complaint for a violation of this provision may be filed with the Department of Fair Employment and Housing.

This bill would extend the time for filing a complaint with the department for an alleged violation of this prohibition for a period of time, not to exceed one year from the date the person aggrieved by the alleged violation becomes aware of a liable person, but in no case for a period of time that exceeds 3 years from the date of the alleged violation if during that period the person allegedly aggrieved by an alleged violation is unaware of the identity of any person liable for the alleged violation.

(2) The bill would also make other technical, conforming changes to existing law.

Ch. 491 (SB 2009) Morrow. Court documents: signature.

Existing law requires, until January 1, 2003, that all pleadings filed with a court be signed, except as specified, and that the filing of any paper with a court certifies specified conditions have been met. This provision also specifies the sanctions for violation of its requirements, but authorizes the withdrawal or correction of a pleading without sanction within 30 days, as specified.

This bill would shorten from 30 days to 21 days the period during which the challenged paper may be withdrawn or appropriately corrected, and extend the January 1, 2003, termination date of these provisions to January 1, 2006.

Ch. 492 (AB 1859) Papan. Special education: pupil suspension and expulsion.

Existing law requires school districts, county offices of education, and special education local plan areas to comply with state laws that conform to the federal Individuals with Disabilities Education Act (IDEA), in order that the state may qualify for federal funds available for the education of individuals with exceptional needs.

This bill would revise and recast those provisions relating to the education of a pupil with exceptional needs to conform those provisions with the IDEA.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 493 (AB 1948) Kelley. Local agency formation commissions.

Existing law prescribes the apportionment for the net operating expenses of the local agency formation commission among the county and the cities and special districts within the county.

This bill would revise the method of calculating independent special district revenues in order to determine independent special districts' apportionments of the net operating expenses of a commission, and would provide that no independent special district shall be apportioned a share of more than 50% of the total independent special districts' share of the commission's operational costs. The bill would provide, with respect to a district formed under the Local Health Care District Law that operates a hospital, that the district may not be apportioned any share until the fiscal year following positive net revenue, as defined, or, if the district has filed for and is operating under federal bankruptcy, until the fiscal year after its discharge from bankruptcy.

Ch. 494 (AB 2043) Salinas. Farmworker housing.

The existing Joe Serna, Jr. Farmworker Housing Grant Program requires the Department of Housing and Community Development to make grants from the Joe Serna, Jr. Farmworker Housing Grant Fund, for specified purposes, and authorizes grants and loans to be made from the fund for other purposes. One of the purposes for which grants and loans may be made is to directly rent or lease housing for short-term occupancy by migrant farmworker households.

This bill would limit the authorization for the making of grants and loans for this purpose only to instances where the department determines that there are extraordinary or emergency circumstances.

Ch. 495 (AB 2324) Diaz. Before and After School Learning and Safe Neighborhoods Partnerships Program.

Existing law, the Before and After School Learning and Safe Neighborhoods Partnerships Program requires every after school component of a program to operate a minimum of 3 hours a day and at least until 6 p.m. on every regular schoolday. Under the program, every after school component of the program is required to establish a policy regarding reasonable early daily release of pupils.

This bill would authorize an exception to the early daily release policy, as provided.

Ch. 496 (AB 2776) Simitian. Aviation: noise.

(1) Existing law requires any person who intends to offer subdivided lands within California for sale or lease to file with the Department of Real Estate an application for a public report consisting of a notice of intention and a completed questionnaire that includes,

among other things, the location of all existing airports, and of all proposed airports shown on the general plan of any city or county, located within 2 statute miles of the subdivision. Existing law requires that a copy of the public report of the Real Estate Commissioner, when issued, be given to the prospective purchaser by the owner, subdivider, or agent prior to the execution of a binding contract or agreement for the sale or lease of any lot or parcel in a subdivision or upon request by any member of the public.

This bill would require the notice of intention filed with the application for a public report, to include a statement regarding whether the property is encompassed within an airport influence area, as defined.

(2) The Davis-Stirling Common Interest Development Act regulates common interest developments and defines the declarations and other governing documents that govern the operation of common interest developments and the associations that manage common interest developments. A declaration is required to contain specified information. Existing law provides that an owner of a separate interest in a common interest development must provide certain items to a prospective purchaser prior to transfer of title, including, among other things, a copy of the governing documents of the common interest development.

This bill would require that any declaration, recorded after January 1, 2004, contain a statement regarding whether the property is encompassed within an airport influence area.

(3) Existing law requires a seller of residential property, to make disclosures upon the transfer of that property, and sets forth the content and form of these disclosures in a Real Estate Transfer Disclosure Statement and a Natural Hazard Disclosure Statement. Existing law requires certain sellers of residential real property who have actual knowledge that the property is affected by or zoned to permit certain manufacturing, commercial, or airport uses to give written notice of that knowledge, as soon as practicable before transfer of title. Existing law requires the disclosure statement to advise a purchaser that other reports and disclosures, such as an inspection report, have or will be made in connection with the transfer.

This bill would revise the Real Estate Transfer Disclosure Statement to require that statement to advise the prospective purchaser of other disclosures required by law, including the Natural Hazard Disclosure Report/Statement that may include airport annoyances, earthquake, fire, flood, or special assessment information, that have or will be made in connection with the transfer.

(4) Existing law limits the liability of a transferor for failing to disclose natural hazards if the transferor obtains a report or opinion prepared by a licensed engineer, land surveyor, geologist, or expert in natural hazard discovery dealing with matters within the scope of the professional's license or expertise.

The bill would condition this limitation upon the expert in natural hazard discovery determining whether the property is within an airport influence area and if so, providing notice with the report or opinion.

This bill would provide that its provisions will become operative on January 1, 2004.

#### Ch. 497 (AB 2807) Firebaugh. Arts education.

Existing law, until January 1, 2003, provides for the Local Arts Education Partnership Program, a program that develops a locally based approach to arts education improvement by using existing community arts resources in a planned and coordinated way to strengthen basic arts skills in the state's public schools.

This bill would extend the date of repeal to January 1, 2008. The bill would, in addition, make a technical, nonsubstantive change to these provisions.

#### Ch. 498 (SB 284) Polanco. School facilities.

Existing law declares the policy of the state to use available resources at state facilities that can substitute for traditional energy and water supplies or produce electricity or water at its facilities when use or production will reduce long-term energy or water expenditures. Existing law, the State Building Construction Act of 1955, authorizes the State Public Works

Board, in furtherance of this policy, to develop energy and water conservation and cogeneration and alternative energy and water supply sources at state facilities, including, but not limited to, publicly funded schools that maintain kindergarten or any of grades 1 to 12, inclusive.

Existing law establishes certain siting and construction requirements for school facilities.

This bill would require the Energy Resources Conservation and Development Commission, in consultation with the State Department of Education and the Division of the State Architect and the Office of Public School Construction within the Department of General Services, to recommend best design practices that include energy efficiency measures for all new public schools, and to report the recommendations to the Governor and the Legislature by October 1, 2003.

Ch. 499 (SB 879) Brulte. Bipartisan California Commission on Internet Political Practices.

Existing law creates the Bipartisan California Commission on Internet Political Practices to study the issues presented by political activity on the Internet, including the issue of political cyberfraud, in relation to the goals and purposes of the Political Reform Act of 1974, and to report thereon to the Legislature by September 30, 2002. Existing law authorizes the chairperson of the commission to hire a director, a secretary, and a legal adviser to provide assistance to the committee.

This bill would extend the deadline for submittal of the report to December 31, 2003, and would extend the existence of the commission to January 1, 2004. The bill would also authorize the chairperson of the commission to hire staff, or retain independent contractors on a contractual basis, to provide assistance to the committee.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 500 (SB 1329) Chesbro. County funds.

(1) Existing law requires deposits of specified surcharges into certain funds for courthouse and criminal justice facilities construction established in Merced County for 30 years.

This bill would similarly require deposit of those surcharges in Sonoma County.

(2) The Community Redevelopment Law authorizes the establishment of redevelopment agencies in communities in order to address the effects of blight, as defined, in those communities. Existing law also authorizes a redevelopment plan adopted pursuant to that law to provide for an allocation to the relevant redevelopment agency of a portion of those ad valorem property tax revenues derived with respect to a redevelopment project. Existing property tax law also establishes certain parameters with respect to the subtraction of a redevelopment agency's share of ad valorem property tax revenues from those revenues otherwise allocated to other local jurisdictions within a redevelopment project area.

This bill would clarify the process by which incremental property tax revenues to be allocated to a redevelopment agency are withdrawn from those revenue shares allocated to other local jurisdictions in a redevelopment project area in the County of Stanislaus. This bill also would deem to be correct any apportionment of property tax revenues made for any fiscal year prior to the effective date of the bill that is inconsistent with the clarifications made by this bill.

(3) Existing law allows a county to establish a service authority for the abatement of abandoned vehicles. Existing law requires the Department of Motor Vehicles to establish guidelines for abandoned vehicle abatement programs that include, among other guidelines, a requirement that each service authority that receives moneys from the Abandoned Vehicle Trust Fund, a continuously appropriated fund, report annually to the Controller.

This bill would authorize the Controller, notwithstanding these reporting requirements, to allocate to the County of Humboldt abandoned vehicle abatement funds for calendar years

2000 and 2001. By liberalizing the conditions under which the Controller may allocate funds from the Abandoned Vehicle Trust Fund, this bill would make an appropriation.

Ch. 501 (SB 1374) Kuehl. Solid waste: construction and demolition waste materials: diversion requirements: model ordinance.

(1) Existing law, the California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. Existing law requires a city, county, or regional agency to submit an annual report to the board summarizing its progress in diverting solid waste from disposal. The report is required to include, among other things, specified information relevant to compliance with the solid waste diversion requirements.

This bill would additionally require that the report include a summary of progress made in diversion of construction and demolition waste materials, including information on programs and ordinances implemented by the local government and quantitative data, where available. By imposing new requirements on local agencies with respect to reporting requirements under the act, the bill would impose a state-mandated local program.

(2) Existing law requires the board to adopt a model ordinance for adoption by any local agency relating to adequate areas for collecting and loading recyclable materials in development projects. The board is required to develop the model ordinance in consultation with the League of California Cities, the County Supervisors Association of California, and certain other interested parties and to distribute the draft model ordinance to all local agencies and other interested parties for review. Local agencies are required to adopt an ordinance, not later than a specified date, relating to adequate areas for collecting and loading recyclable materials in development projects. If a local agency has not adopted that ordinance by the specified date, the model ordinance adopted by the board is required to take effect on that date and be enforced by the local agency and have the same force and effect as if adopted by the local agency as an ordinance.

This bill would require the board, not later than March 1, 2004, after holding a public hearing, to adopt one or more model ordinances suitable for modification by any local agency, that the agency may adopt that will require a range of diversion rates of construction and demolition waste materials from landfills from 50 to 75%, as determined by the board. The bill would also require the board on or before that date to consult with representatives of the League of California Cities, the California State Association of Counties, private and public waste services, and building construction and management personnel throughout the development of the model ordinances, and to fulfill various other requirements relating to reporting and posting information on the board's Internet Web site.

(3) Existing law requires the board, in determining whether or not to impose any penalties on a city, county, or city and county for violations of specified solid waste reduction and recycling requirements imposed by the act, to consider whether the jurisdiction has made a good faith effort to implement its source reduction and recycling element or its household hazardous waste element.

This bill would also require the board, in determining those penalties, to consider whether a local jurisdiction has provided information to the board concerning whether construction and demolition waste material is at least a moderately significant portion of the waste stream, and, if so, whether the local jurisdiction has adopted an ordinance for diversion of construction and demolition waste materials from solid waste disposal facilities, has adopted a model ordinance for diversion of construction and demolition waste materials from solid waste disposal facilities, or has implemented another program to encourage or require diversion of construction and demolition waste materials from solid waste disposal facilities.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay

the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 502 (SB 1455) Johannessen. Northern California Veterans Cemetery.

Existing law requires the department to apply to the State Cemetery Grant Program of the federal Department of Veterans Affairs for a grant of not more than \$6,000,000, which amount is designated to represent 100% of the estimated cost for designing, developing, constructing, and equipping the Northern California Veterans Cemetery.

The bill would increase that amount to \$7,000,000.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 503 (SB 1495) Torlakson. Balancing jobs and growth.

The Jobs-Housing Balance Improvement Program requires the Department of Housing and Community Development to award incentive grants to cities, counties, and cities and counties to be used for any project, service, or other local need determined by the city, county, or city and county to be in the community's best interest from specified funds transferred and appropriated pursuant to the Budget Act of 2000 and the Budget Act of 2001, as well as funds appropriated thereafter for these purposes. To be eligible for a grant, a local government is required to have a demonstrable and significant increase in the issuance of residential building permits issued between January 1 and December 31 of a prescribed allocation reporting year over the average number of building permits issued annually for the most recent 36-month period that can be calculated prior to the allocation reporting year.

This bill would require the calculation for the 36-month period prior to the allocation reporting year to be adjusted for incorporations and annexations.

Ch. 504 (SB 1514) Torlakson. California Beverage Container Recycling and Litter Reduction Act: reporting requirements.

The California Beverage Container Recycling and Litter Reduction Act, which is administered by the Department of Conservation, requires a distributor of specified beverage containers to pay a redemption payment to the Department of Conservation for each beverage container, as defined, sold or transferred, for deposit in the California Beverage Container Recycling Fund.

This bill would require the department, on or before January 1, 2004, to submit a report to the Legislature regarding beverage container recycling in California's public elementary, middle, and high schools. The bill would authorize the department to include in the report any recommended policies or programs that may increase beverage container recycling efforts in schools. The bill would require the department to complete the report using existing resources.

Ch. 505 (SB 1636) Figueroa. Congestion management: transportation: congestion management programs.

Existing law requires the development, adoption, and updating of a congestion management program for each county that includes an urbanized area, as defined. The plan is required to contain specified elements and to be submitted to regional agencies, as defined, for determination of whether the program is consistent with regional transportation plans. The regional agency is then directed to monitor the implementation of all elements of each congestion management program. The required elements include traffic level of service standards for a system of designated highways and roadways.

This bill would define an infill opportunity zone for purposes of the above-described provisions to mean a specific area designated by a city or county zoned for new compact residential or mixed use development, except as specified, within  $\frac{1}{3}$  mile of specified

transportation sites in counties with a population of over 400,000. It would exempt streets and highways in an infill opportunity zone from the level of service standards specified in the above-described provisions and instead require alternate level of service standards to be applied. It would provide that a city or county may not designate an infill opportunity zone after December 31, 2009.

Ch. 506 (SB 1667) Vasconcellos. School violence.

Existing law establishes the School Safety and Violence Prevention Strategy Program, administered by the Superintendent of Public Instruction for the purpose of promoting school safety and violence prevention programs in the public schools.

Existing law makes each school district and county office of education responsible for the overall development of comprehensive school safety plans that include specified components, including, among others, the development of a safe and orderly environment conducive to learning at the school and a discrimination and harassment policy consistent with existing law regarding educational equity. Existing law requires a schoolsite council or school safety planning committee to hold a public meeting before adopting its comprehensive school safety plan and requires each school to forward its comprehensive school safety plan to the school district or county office of education for approval. Existing law establishes the School/Law Enforcement Partnership to develop programs and policies necessary to implement the provisions regarding school safety plans.

Existing law establishes the School Safety and Violence Prevention Act to provide funds to school districts serving pupils in grades 8 to 12, inclusive, for the purpose of promoting school safety and reducing schoolsite violence.

Existing law establishes the Machado School Violence Prevention and Response Task Force to analyze and evaluate existing law and programs on school-based crisis prevention and response and to make appropriate policy recommendations on how to enhance state and local programs and training to adequately prepare school districts and county offices of education to meet the challenges stemming from disruptive and violent acts.

This bill would require the schoolsite council or school safety planning committee to provide written notification to specified persons of the public meeting that is required to be held before adopting a comprehensive school safety plan, thereby imposing a state-mandated local program. The bill would encourage the schoolsite council or school safety planning committee to provide written notification of the meeting to other specified persons.

This bill would establish the California Double Your Cash program to lead and encourage the development of a school's plan for preventing school violence. The bill would provide that, when a schoolsite council next reviews and updates its school safety plan, and to the extent it implements its plan, the schoolsite council is encouraged to recognize that assuring each pupil a safe physical environment and a safe, respectful, accepting and emotionally nurturing environment and that providing each child resiliency skills are essential components of a comprehensive strategic program for preventing school violence and to consider incorporating these components in its plan. The bill would encourage a schoolsite council to consider including specified elements in its school safety plan to assure a safe physical environment and to consider incorporating strategies to assure a safe, respectful, accepting, and emotionally nurturing environment and to provide each child resiliency skills.

The bill would require a school safety plan, before it is approved by the school district or county office of education, to be presented at a regularly scheduled public meeting of the governing board of the school district or county office of education, would require the governing board to discuss specified matters relating to the school safety plan at the meeting, and would encourage the governing board to provide written notification of the meeting to specified persons, thus imposing a state-mandated local program.

The bill would state the intent of the Legislature that any funds appropriated to implement existing school safety laws shall be available for expenditure to develop, implement, review, and update school safety plans. The bill would require state and federal funds appropriated in support of school safety and violence prevention programs to be considered additional revenues, as specified, and are to be used to offset any state-mandated costs incurred by school districts when complying with the bill.

The bill would make these provisions inoperative on June 1, 2007, and repeal them as of January 1, 2008.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 507 (SB 1717) Machado. City annexations.

(1) Existing law authorizes a city, county, or city and county to lease property owned, held, or controlled by it for not to exceed 99 years for stadium, park, recreational, fair, exposition, or exhibition purposes.

This bill would provide that the authority of a city, county, or city and county to lease property includes leasing property for general sports purposes but that a lease executed on or after April 24, 2002, for any authorized purpose shall not include a shopping center, hotel, motel, or lodging house.

(2) Under existing law, upon approval of the local agency formation commission, a city may annex noncontiguous territory not exceeding 300 acres, located in the same county, that the city owns and uses for municipal purposes. If, after the annexation, the city sells all or part of that territory, the territory no longer owned by the city ceases to be part of the city.

This bill would permit a city to lease this annexed territory for designated purposes but would provide that if the city enters into a lease on or after April 24, 2002, that would authorize the development of a shopping center, hotel, motel, or lodging house on that territory, the affected territory shall cease to be part of the city.

Ch. 508 (SB 1770) Burton. School districts: cursive handwriting: State Board of Education standards.

There is in existing law, the State Board of Education with prescribed powers and duties regarding the public school system.

This bill would state that the Legislature encourages school districts to comply with the State Board of Education's English Language and Arts Writing Arts Strategies on cursive handwriting standards whereby pupils are expected to write fluidly and legibly and would encourage school districts to teach methods of penmanship that may include, but are not limited to, the D'Nealian Method and the Palmer Method of penmanship.

Ch. 509 (SB 1832) Committee on Budget and Fiscal Review. Budget Act of 2001: contingencies or emergencies.

The Budget Act of 2001 appropriated specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies or emergencies upon written authorization from the Director of Finance. The Budget Act of 2001 also appropriated specified amounts for loans to state agencies for contingencies or emergencies.

This bill would appropriate \$305,411,000, as scheduled, in augmentation of these Budget Act appropriations. This bill would authorize the Director of Finance to withhold authorization for the expenditure of funds appropriated in the bill until preliminary estimates of potential deficiencies are verified.

This bill, in addition, would appropriate \$52,500,000 in augmentation of contingencies and emergencies for allocation to the Department of Corrections.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 510 (SB 1895) Escutia. Domestic violence.

Existing law provides that there is in the Office of Criminal Justice Planning a Comprehensive Statewide Domestic Violence Program which provides financial and technical assistance to local domestic violence centers.

This bill would provide that in implementing this program, the Office of Criminal Justice Planning shall, until January 1, 2010, collaborate closely with an expert advisory council the membership of which shall consist of domestic violence victims' advocates, battered women service providers, and representatives of women's organizations, law enforcement, and other groups involved with domestic violence, as specified.

Ch. 511 (SB 2095) Johnson. Independent expenditures.

Existing provisions of the Political Reform Act of 1974 require a committee that makes an independent expenditure of \$1,000 or more during an election cycle in connection with a candidate for elective state office or a state ballot measure to file, within 24 hours of the independent expenditure, electronically or online a report with the Secretary of State disclosing that independent expenditure.

This bill would require the Secretary of State to include this information on the Internet Web site of the Secretary of State's office, as part of the campaign finance activity that is publicly disclosed, and would require that this information be linked to the part of the Web site that the Secretary of State maintains concerning the candidate or ballot measure that is the subject of the independent expenditure.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a  $2/3$  vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the Political Reform Act of 1974, would therefore require a  $2/3$  vote.

Ch. 512 (AB 2083) Jackson. Public resources: oil spill prevention and response.

Existing law establishes oil spill prevention, inspection, response, containment, and cleanup programs.

This bill would require the State Lands Commission to develop a form that is to be completed by the responsible party, as defined, engaged in the internal shipment of oil. The form would be designed to enable the commission to obtain and track the amount and type of oil transported, as well as the name of the vessel, the vessel's route, and air emissions relating to the internal shipment of that oil.

The bill would require the commission, on or before April 1 of each year, for the calendar years 2004 to 2009, inclusive, to file a report with the Legislature summarizing certain information and transmit a copy of the report to any interested agency or member of the public, upon request.

The bill would require the commission to consult with the administrator for oil spill response, other state agencies, and agencies of the federal government, including the United States Coast Guard and the federal Department of Transportation, to the maximum extent feasible, before undertaking actions under these provisions.

The bill would require the administrator to reimburse the commission for the costs of administering these provisions from the Oil Spill Prevention and Administration Fund.

These provisions would be repealed on January 1, 2010.

The bill would incorporate additional changes to Section 8670.40 of the Government Code proposed by SB 849, to be operative only if SB 849 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

Ch. 513 (AB 2214) Keeley. Low-level radioactive waste disposal facility.

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

(1) The existing Radiation Control Law requires the State Department of Health Services, among other things, to issue licenses, and prohibits the department from issuing a license to receive radioactive material for disposal unless specified requirements are satisfied, including that the land on which the radioactive wastes are to be buried is owned by the federal or state government.

Under existing law, the Southwestern Low-Level Radioactive Waste Disposal Compact specifies that California is to serve as the state required to host the regional low-level radioactive waste disposal facility for the permanent isolation of low-level radioactive waste pursuant to specified federal requirements and the requirements of the host state. A violation of the provisions regulating radioactive waste is a crime.

This bill would define terms and would prohibit the department from issuing a license for the disposal of low-level radioactive waste, or renewing a license, unless the department determines that the siting, design, operation, and closure of the facility complies with specified federal regulations. The bill would prohibit the department from issuing or renewing a license unless the design and construction of the facility meets specified requirements. The bill would allow the department to issue a license to dispose of low-level radioactive waste only if the department makes a specified determination that there is not a hydrologic pathway whereby the Colorado River or any other agricultural or drinking water source could be contaminated with radioactive waste and harm public health or the environment. The bill would require a facility for the disposal of low-level radioactive waste to meet specified design objectives and would prohibit a facility from disposing of low-level radioactive waste using shallow land burial. The bill would prohibit the proposed Ward Valley radioactive waste disposal site from serving as the state's facility for purposes of the compact and would prohibit the state from accepting ownership or other property rights to the site of that facility.

Since a violation of the bill would be a crime, the bill would impose a state-mandated local program.

(2) Existing law requires the department to adopt emergency regulations for the licensing of persons engaged in the disposal of low-level radioactive waste by a specified date, and authorizes the department to establish and collect, by emergency regulation, a fee for the issuance or renewal of a license to receive radioactive material for disposal on land.

This bill would require the department to establish and collect a fee for the issuance or renewal of a license to dispose of low-level radioactive waste and would require that any fee collected be sufficient to cover the costs incurred by the state in reviewing an application, issuing or renewing the license, and inspecting and conducting oversight of the licensee.

The bill would require the department, when implementing the Radiation Control Law, to promote the reduction of low-level radioactive waste generated, by encouraging specified waste reduction practices.

(3) Existing law authorizes the State Director of Health Services, with the approval of the Director of General Services, to lease specified property to construct, operate, and close a low-level radioactive waste disposal facility.

This bill would repeal that authority.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 514 (SB 849) Torlakson. Oil spills: fees.

(1) Existing law, the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, establishes in state government the office of administrator for oil spill response and requires the administrator to adopt and implement regulations and guidelines governing the adequacy of oil spill contingency plans. A knowing violation of the act is a misdemeanor.

Existing law prohibits a nontank vessel, as defined, that is required to have a contingency plan, from entering the marine waters of the state unless the nontank vessel owner or operator provides to the administrator evidence of financial responsibility that demonstrates, to the administrator's satisfaction, the ability to pay at least \$300,000,000 to cover damages caused by a spill, and the owner or operator of the nontank vessel has obtained a certificate of financial responsibility from the administrator for the nontank vessel. The administrator is authorized to charge the owner or operator a reasonable fee to reimburse specified costs for processing that application. However, until January 1, 2003, the administrator is authorized to establish a lower standard of financial responsibility for a nontank vessel that has a carrying capacity of 6,500 barrels of oil or less, or a nontank vessel that is owned and operated by California or a federal agency and has a carrying capacity of 7,500 barrels of oil or less.

This bill would extend, until January 1, 2006, the expiration date on the authority of the administrator to establish a lower standard of financial responsibility for the specified nontank vessels.

The bill would require the administrator to charge a nontank vessel owner or operator a reasonable fee, to be collected with each application to obtain a certificate of financial responsibility, in an amount that is based upon the administrator's costs in implementing certain provisions relating to nontank vessels. The bill would authorize the administrator to charge a reduced fee for nontank vessels determined by the administrator to pose a reduced risk of pollution, including vessels used for research or training and vessels that are moored permanently or rarely move.

The bill would require the fees to be \$2,500 or less, before January 1, 2005.

The bill would require the administrator to deposit all revenue derived from the fees in the Oil Spill Prevention and Administration Fund. The bill would authorize revenue derived from the fees to be spent for certain, listed purposes relating to oil spill prevention, response, and preparedness, but not for responding to an oil spill.

(2) Existing law requires the administrator for oil spill response to adopt and implement regulations and guidelines governing the adequacy of oil spill contingency plans. Existing law requires the State Board of Equalization to collect an oil spill prevention and administration fee which is imposed upon every person owning crude oil at the time that the crude oil is received at a marine terminal, in an amount determined by the administrator for oil spill response, not to exceed 4¢ per barrel of crude oil or petroleum products. Under existing law, the revenues from the oil spill prevention and administration fee are deposited in the Oil Spill Prevention and Administration Fund in the State Treasury. Existing law provides that the money in the fund is available for appropriation by the Legislature and may only be used for the purposes of the act and the provisions governing oil spill prevention and response.

Existing law requires the administrator, on or before January 15, to prepare a plan annually that projects revenues and expenses over 3 fiscal years, including the current year. Existing law requires the administrator to set the fee based on the plan.

This bill would prohibit the annual assessment from exceeding 5¢ per barrel of crude oil or petroleum products.

The bill would change the date by which the administrator is required to prepare the plan to January 20.

Since a failure to pay the fees imposed by the bill would be a crime, the bill would impose a state-mandated local program.

(3) Existing law establishes the Oil Spill Technical Advisory Committee to provide public input and independent judgment of the actions of the administrator and the State Interagency Oil Spill Committee. The committee is required to consist of 9 members, of whom 5 are required to be appointed by the Governor, 2 by the Speaker of the Assembly, and 2 by the Senate Committee on Rules, as specified. The committee is required to report annually to the Governor and the Legislature on its evaluation of oil spill response and preparedness programs within the state.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would increase the membership of the committee by 1 member, who would be appointed by the Governor and would be required to have a demonstrable knowledge of the dry cargo vessel industry.

The bill would require the Department of Fish and Game to contract with the Department of Finance to prepare and submit to the Governor and the Legislature, on or before January 1, 2005, a detailed report on the financial basis and programmatic effectiveness of the state's oil spill prevention, response, and preparedness program.

The bill would require the committee to review, on or before August 1, 2005, the Department of Finances report and to prepare and submit to the Governor and the Legislature comments on the report, including recommendations for improving the state's oil spill prevention, response, and preparedness program.

(4) This bill would incorporate additional changes to Section 8670.40 of the Government Code proposed by AB 2083, to be operative only if AB 2083 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 515 (SB 1038) Sher. Renewable energy.

(1) Under the Public Utilities Act, the Public Utilities Commission (commission) requires electrical corporations to identify a separate rate component to fund cost-effective energy efficiency and conservation activities, public interest research and development, and development of renewable resources technology. This rate component is a nonbypassable element of local distribution and collected on the basis of usage. Existing law requires specified electrical corporations to collect specific amounts to support each of these programs. Existing law also requires the State Energy Resources Conservation and Development Commission (Energy Commission) to transfer funds collected for these programs to specified funds. Existing law requires the Energy Commission to develop, implement, and administer the Public Interest Research, Development, and Demonstration Program. Existing law requires the program to consist of a balanced portfolio that addresses California's energy and environmental needs, technology opportunities, and system reliability. Existing law, until January 1, 2000, required the Energy Commission to adopt regulations to ensure the success of electricity industry restructuring in the transition to a new market structure and to implement the program. Existing law authorizes the Energy Commission to solicit applications for awards, using a sealed competitive bid, competitive negotiation process, multiparty agreement, single source, or sole source method.

This bill would restate the goal of the program. The bill would require the Energy Commission to use a portfolio approach to achieve the goal.

This bill would require the Energy Commission to convene an advisory board on a regular basis, composed of representatives from the commission, consumer organizations, environmental organizations, and electrical corporations, to make recommendations to guide the Energy Commission's selection of programs and projects to be funded.

This bill would require the Energy Commission, not later than 3 months after the enactment of this bill to designate a panel of independent experts with special expertise in public interest research, development, and demonstration programs to conduct an evaluation of the program and to submit a preliminary report to the Governor and the Legislature not later than 15 months after the enactment of this bill, and a final report not later than 30 months after the enactment of this bill.

Existing law authorizes the Energy Commission to solicit applications for awards and specifies criteria for funding projects under the program.

This bill would require the Energy Commission to adopt regulations governing the administration of the program, in accordance with specified procedures, until January 1, 2007.

The bill would make technical and conforming changes.

(2) Existing law requires the Energy Commission to prepare and submit to the Legislature by March 31 of each year, an annual report on awards of grants made by the commission for public interest energy research and development projects.

This bill would require the report to set forth the actual costs and results of programs or projects funded by the Energy Commission, compared to their expected costs and benefits.

(3) Existing law requires the commission to order electrical corporations to spend a portion of the separate rate component discussed above, to fund cost-effective energy efficiency and conservation activities, public interest research and development, and development of renewable resources technology.

This bill would require the funding of in-state operation and development of existing and new and emerging renewable resources technologies to be made available pursuant to a specified provision of existing law. The bill would make additional technical, nonsubstantive changes.

The bill would require the Energy Commission to award electrical corporations up to 10% of the funds transferred to the Public Interest Research, Development, and Demonstration Fund, for public interest research, development and demonstration projects for transmission and distribution functions, in lieu of the commission ordering electrical corporations to collect and spend funds for investments in public interest research, development, and demonstration projects for transmission and distribution functions.

(4) Existing law defines "in-state renewable electricity generation technology" for the purposes of these provisions. Existing law defines, for the purposes of these provisions, "report" as the Policy Report on AB 1890 Renewables Funding (March 1997, Publication Number P500-97-002) submitted to the Legislature by the Energy Commission.

This bill would modify the definition of "in-state renewable electricity generation technology" to no longer only include facilities that were placed in operation after September 26, 1996. The bill would include within the definition of "in-state renewable electricity generation technology" a facility using fuel cells using renewable fuels, ocean thermal, tidal current, and wave energy generation technologies. The bill would exclude from the definition waste tire technologies. The bill would provide that on and after January 1, 2002, "report," for the purposes of these provisions, means the report entitled "Investing in Renewable Electricity Generation in California" (June 2001, Publication Number P500-00-022) submitted to the Governor and the Legislature by the Energy Commission.

(5) Existing law requires 45% of the money collected for in-state operation and development of existing and new and emerging renewable resources technologies, up to \$243,000,000, to be used for programs that are designed to improve the competitiveness of existing in-state renewable electricity generation technology facilities. Existing law requires 30% of the money collected for in-state operation and development of existing and new and emerging renewable resources technologies, up to \$162,000,000, to be used for programs that are designed to foster the development of new in-state renewable electricity generation technology facilities. Existing law requires 10% of the money collected for in-state operation and development of existing and new and emerging renewable resources technologies, up to \$54,000,000, to be used for a multiyear, consumer-based program to foster the development of emerging renewable technologies in distributed generation applications. Existing law requires 15% of the money collected for in-state operation and development of existing and new and emerging renewable resources technologies, up to \$81,000,000, to be used for programs designed to provide customer credits for purchases of renewable energy produced by certified energy providers, to disseminate information regarding renewable energy technologies, to promote purchases of renewable energy, to help develop a consumer

market for renewable energy, and to help develop a consumer market for renewable energy technologies.

This bill would instead require 20% of the funds collected to accomplish the funding of in-state operation and development of existing and new and emerging renewable resources technologies, to be spent by the San Diego Gas and Electric Company, the Southern California Edison Company, and the Pacific Gas and Electric Company, to be used for programs that are designed to improve the competitiveness of specified eligible existing in-state renewable electricity generation technology facilities. The bill would instead require 51.5% of the funds collected to accomplish the funding of in-state operation and development of existing and new and emerging renewable resources technologies, to be spent by the San Diego Gas and Electric Company, the Southern California Edison Company, and the Pacific Gas and Electric Company, to be used for programs that are designed to foster the development of new in-state renewable electricity generation technology facilities, including supplemental energy payments under the California Renewables Portfolio Standard Program, and would authorize the Energy Commission, in awarding funding, to provide preference to projects that provide tangible demonstrable benefits to communities with a plurality of minority or low-income populations. The bill would instead require 17.5% of the funds collected to accomplish the funding of in-state operation and development of existing and new and emerging renewable resources technologies, to be spent by the San Diego Gas and Electric Company, the Southern California Edison Company, and the Pacific Gas and Electric Company, to be used for a multiyear, consumer-based program to foster the development of emerging renewable technologies in distributed generation applications and would authorize the Energy Commission, in awarding funding, to provide preference to systems that provide tangible demonstrable benefits to communities with a plurality of minority or low-income populations. The bill would instead require 10% of the funds collected to accomplish the funding of in-state operation and development of existing and new and emerging renewable resources technologies, to be spent by the San Diego Gas and Electric Company, the Southern California Edison Company, and the Pacific Gas and Electric Company, to be used to provide customer credits to customers that entered into direct transactions on or before September 20, 2001, for purchases of electricity produced by in-state renewable electricity generation technology facilities. The bill would require 1% of the funds collected to accomplish the funding of in-state operation and development of existing and new and emerging renewable resources technologies, to be spent by the San Diego Gas and Electric Company and the Pacific Gas and Electric Company, to be used to promote renewable energy and to disseminate information on renewable energy technologies, and to help develop a consumer market for renewable energy and for small-scale emerging renewable energy technologies.

This bill would require the Energy Commission, in consultation with the commission, electrical corporations, publicly owned electric utilities, and the Independent System Operator, to prepare and submit to the Governor and the Legislature by December 1, 2003, a comprehensive renewable sources of electricity development plan that describes the renewable resources available in California, the costs of developing and connecting these resources into the transmission and distribution system, and recommendations for a plan for development to achieve the target of increasing the amount of electricity generated from renewable sources per year, so that it equals 17% of the total electricity generated for consumption in California. The bill would further require the Energy Commission to participate in commission proceedings that relate to or affect efforts to stimulate the development of electricity generated from renewable sources.

These changes would only become operative if SB 1078 or SB 1524 is enacted and becomes effective on or before January 1, 2003, and add the California Renewables Portfolio Standard Program.

(6) Existing law provides for the Renewable Resource Trust Fund in the State Treasury and establishes certain accounts in the Renewable Resource Trust Fund, including the Customer-Side Renewable Resource Purchases Account. Existing law provides that the money in the fund and the accounts are continuously appropriated to the Energy Commission. Existing law provides that unallocated funds in any account shall remain in the respective account until December 31, 2001.

This bill would instead establish the Customer-Credit Renewable Resources Account and the Renewable Resources Consumer Education Account. The bill would require that unallocated funds in any account remain in the respective account until the Energy Commission submits a specified report.

This bill would require the commission, by December 1, 2003, to prepare and submit to the Legislature, a comprehensive transmission plan for renewable electricity generation facilities, to provide for the rational, orderly, cost-effective expansion of transmission facilities that may be necessary to facilitate the development of renewable electricity generation facilities identified in the renewable electricity generation resource plan.

(7) Under existing law, the commission is vested with regulatory authority over public utilities and is required to establish requirements for the administration of power purchase contracts between electrical corporations and private energy producers.

This bill would authorize the City of Davis to receive a bill credit, as defined, to a benefiting account, as defined, for electricity supplied to the electrical grid by a photovoltaic facility located within and partially owned by the city (PVUSA). The bill would require the commission to adopt a rate tariff for the benefiting account. The bill would also, until January 1, 2008, authorize California State University, Fresno to receive a bill credit, as defined, to a benefiting account, as defined, for electricity supplied to the electrical grid by a biomass facility located in Reedley and owned by California State University, Fresno (the Dinuba Facility), and the bill would require the commission to adopt a rate tariff for the benefiting account. Because a violation of the Public Utilities Act, a filed tariff, or an order of the commission is a crime under existing law, the bill would impose a state-mandated local program by creating a new crime. The bill would declare that, due to the special circumstances applicable only to the PVUSA and the City of Davis, and to the Dinuba Facility and California State University, Fresno, a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution, and the enactment of a special statute is therefore necessary.

(8) The Public Utilities Act authorizes the commission to establish rates and fees for public utilities subject to its jurisdiction.

This bill would authorize the commission to consider energy efficiency and emissions performance to encourage early compliance with the air quality standards established by the State Air Resources Board for ultra-clean and low-emission distributed generation, as defined, in establishing those rates and fees.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 516 (SB 1078) Sher. Renewable energy: California Renewables Portfolio Standard Program.

(1) Under the Public Utilities Act, the Public Utilities Commission (PUC) has regulatory authority over public utilities, including electrical corporations, and authorizes the commission to establish just and reasonable rates and charges. The act requires retail suppliers of electric services to disclose sources of electrical generation and requires that those retail suppliers report information to the State Energy Resources Conservation and Development Commission (Energy Commission).

This bill would establish the California Renewables Portfolio Standard Program. The program would require that a retail seller of electricity, including electrical corporations, community choice aggregators, and electric service providers, purchase a specified minimum percentage of electricity generated by eligible renewable energy resources, as defined, in any given year as a specified percentage of total kilowatthours sold to retail end-use customers each calendar year (renewables portfolio standard).

The bill would require the PUC to implement the renewables portfolio standard for electrical corporations, if funds are made available as described. Each electrical corporation would be required to increase its total procurement of eligible renewable energy resources by at least 1% per year so that 20% of its retail sales are procured from eligible renewable energy resources. If an electrical corporation fails to procure sufficient eligible renewable energy resources in a given year to meet an annual target, the electrical corporation would be required to procure additional eligible renewable resources in subsequent years to compensate for the shortfall, if funds are made available as described. An electrical corporation with at least 20% of retail sales procured from eligible renewable energy resources in any year would not be required to increase its procurement in the following year.

This bill would require the PUC to direct electrical corporations to prepare within 90 days of being deemed creditworthy, and to review and update as necessary, renewable energy procurement plans that are sufficient to satisfy its obligations under the renewables portfolio standard. The PUC would be required to adopt rules, within 6 months of the effective date of these provisions, for electrical corporations establishing a process for determining market prices of electricity from renewable generators pursuant to specified criteria, a process for rank ordering and selection of least-cost and best-fit renewable resources to fulfill program obligations, flexible rules for compliance that permit electrical corporations to apply excess procurement in one year to subsequent years, or inadequate procurement in one year to the following 3 years, and standard terms and conditions to be used by electrical corporations in contracting with renewable electricity generators. The PUC would be required to review and accept, modify, or reject each electrical corporation's renewable procurement plan 90 days prior to the commencement of renewable procurement by the electrical corporation. The PUC would be required to review and accept, modify, or reject renewable solicitations by electrical corporations and proposed contracts by electrical corporations with renewable electricity generators. The PUC would be required to allow an electrical corporation to recover, in rates, electricity procurement and administrative costs associated with long-term contracts reasonably incurred consistent with a renewable energy procurement plan approved by the PUC.

Because a violation of the Public Utilities Act or an order of the PUC is a crime under existing law, the bill would impose a state-mandated local program by creating a new crime.

The bill would require the Energy Commission to certify eligible renewable energy resources, to design and implement an accounting system to verify compliance with the renewables portfolio standard by retail sellers, and to allocate and award supplemental energy payments to cover above-market costs of renewable energy.

(2) Existing law, the Warren-Alquist State Energy Resources Conservation and Development Act, requires the Energy Commission to certify sufficient sites and related facilities that are required to provide a supply of electricity sufficient to accommodate projected demand for power statewide. Under existing law, the PUC must grant a certificate of public convenience and necessity, upon application by a public utility, for the construction of a new transmission facility or electric transmission line within the state. As a basis for granting a certificate of public convenience and necessity, the PUC is required to give consideration to community values, recreational and park areas, historical and aesthetic values, and influence on the environment. No certificate of public convenience and necessity may be granted for an electrical transmission line without certification by the Energy Commission, and the decision by the Energy Commission is conclusive as to all matters determined thereby and take the place of consideration by the PUC.

This bill would provide that an application of an electrical corporation for a certificate for the construction of new transmission facilities, that are necessary to facilitate achievement of the renewable power goals, shall be deemed to be necessary by the PUC in determining to issue a certificate of public necessity and convenience. The bill would require the PUC to take all feasible actions to ensure that the transmission rates established by the Federal Energy Regulatory Commission are fully reflected in any retail rates established by the commission.

(3) Existing law requires each local publicly owned utility to establish a nonbypassable usage based charge to fund investments in specified public purpose programs, including cost-effective demand-side management services to promote energy efficiency and energy conservation, investment in renewable energy resources and technologies, and services for low-income electricity consumers. The charge is required to be not less than the lowest expenditure of the 3 largest electrical corporations in California based on a percentage of revenue.

This bill would require the governing board of a local publicly owned electric utility to be responsible for implementing and enforcing a renewables portfolio standard, as described, and to annually report to its customers upon expenditures of public goods funds on public purpose programs, thereby imposing a state-mandated local program. Because a violation of this provision would be a crime, this bill would also impose a state-mandated local program by creating a new crime.

(4) Existing law provides that subject to applicable contractual terms, energy prices paid to nonutility power generators by a public utility electrical corporation based on the commission's "short run avoided cost energy methodology" are required to be determined by specified law.

This bill would authorize any nonutility power generator using renewable fuels that entered into a contract with an electrical corporation specifying fixed energy prices for output prior to December 31, 2001, to elect an additional 5 years of fixed energy payments at a level to be determined by the PUC.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 517 (AB 415) Runner. Emergency services: Emergency Alert System.

Existing law authorizes use of the Emergency Alert System to inform the public of local, state, and national emergencies.

This bill would require law enforcement agencies that are informed of the abduction of a child 17 years of age or younger, or an individual with a proven mental or physical disability, and that determine the victim is in imminent danger of serious bodily injury or death and that there is information available that, if disseminated to the general public, could assist with the safe recovery of the victim, to request, absent extenuating investigative needs, activation of the Emergency Alert System within the appropriate local area. By imposing new duties on local law enforcement agencies, the bill would create a state-mandated local program.

This bill would require the California Highway Patrol, in consultation with the Department of Justice and representatives from other organizations, to develop policies and procedures providing instruction specifying how law enforcement agencies, broadcasters participating in the Emergency Alert System, and any other intermediate emergency services agencies that may institute activation of the Emergency Alert System and, where appropriate,

other supplemental warning systems shall proceed after a qualifying abduction has been reported to a law enforcement agency.

The bill would require the California Highway Patrol, in conjunction with the Department of Justice, to develop a comprehensive child abduction education program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 518 (SB 1962) Polanco. State coastal conservation: coastal access.

(1) Existing law requires the State Coastal Conservancy to implement and administer various coastal protection programs and projects, including a system of public accessways to and along the state's coastline. Existing law authorizes the conservancy to acquire, develop, and maintain areas for public access to significant coast resources and generally authorizes the conservancy to award grants to public agencies and nonprofit organizations for the purpose of acquiring land for public accessway purposes along the coast.

This bill would require the conservancy to accept any outstanding offer to dedicate a public accessway that has not been accepted by another public agency or nonprofit organization within 90 days of its expiration date. The bill would additionally require the conservancy to open at least 3 public accessways each year either directly or by awarding grants to public agencies or nonprofit agencies for that purpose. The bill would prohibit the use of moneys appropriated from the General Fund for those purposes.

This bill would additionally authorize the conservancy to transfer public access easements or other less-than-fee interests in property to a public agency or nonprofit organization for development, management, or public use, and would authorize the conservancy to enter into agreements with those entities for those same purposes.

(2) With certain exceptions, existing law generally requires the approval of the Director of Finance before the state may accept a gift or dedication of personal or real property. Existing law further requires that all contracts related to acquisition of real property by the state be reviewed and approved by the Director of General Services.

This bill would exclude from the above requirement offers to dedicate public accessways made to the conservancy pursuant to the California Coastal Act.

(3) Existing law requires that all real property and interests in real property to be acquired by or for any state agency, with specified exceptions, be acquired by the State Public Works Board.

This bill would exclude from the above requirement offers to dedicate public accessways made to the conservancy pursuant to the California Coastal Act.

(4) The bill would require the Executive Director of the California Coastal Commission to determine that specified requirements are met before an offer to dedicate an interest in real property may be transferred to a nonprofit organization. The bill would additionally provide that the conservancy shall retain a power of entry with the option to reclaim or assign the interest under specified circumstances.

Ch. 519 (AB 47) Simitian. School finance: juvenile court schools and county community schools.

Existing law sets forth a method for making computations to determine the revenue limits for juvenile court school programs operated by county superintendents of schools. Certain community schools are eligible to receive funding at that same rate. Existing law sets forth

a method for equalizing the revenue limits for juvenile court school programs and certain community school programs, over the 1996–97, 1997–98, 1998–99, 1999–2000, and 2000–01 fiscal years.

This bill commencing with the 2002–03 fiscal year would require a cost-of-living adjustment to be made to the revenue limits for these schools. The bill would make the provisions requiring equalization of the revenue limits for these schools inoperative in fiscal years in which the cost-of-living adjustment is made.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 520 (AB 2354) Dutra. Incorporated insurers: derivative transactions.

Existing law authorizes a domestic incorporated insurer that satisfies specified investment or financial stability requirements to make certain investments in bona fide hedging transactions and positions in, or options on, interest rate future contracts that are traded on a regulated exchange or board of trade.

This bill would repeal those provisions authorizing a domestic incorporated insurer to make those investments. The bill would enact new provisions authorizing a domestic incorporated insurer to engage in derivative transactions, as defined, subject to specified conditions.

Ch. 521 (SB 2057) O’Connell. Crime.

Existing law provides that any individual who reports to specified agencies that an emergency exists knowing that the report is false is punishable by imprisonment in a county jail for a period not exceeding one year, a fine not exceeding \$1,000, or by both that imprisonment and fine. An emergency includes any condition which results in, or could result in, the response of a public official in an authorized emergency vehicle.

This bill would expand this provision to include any condition that results in, or could result in, the response of a public official in an authorized emergency vehicle, aircraft, or vessel. By expanding the scope of a crime, the bill would impose a state-mandated local program.

Existing law provides that any individual who reports to specified agencies that an emergency exists knowing that the report is false, where great bodily injury or death is sustained by any person as a result of the report, is guilty of a felony.

This bill would also require that the individual knew or should have known that the response to the report is likely to cause death or great bodily injury.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 522 (AB 275) Aroner. Medi-Cal: developmentally disabled: dental care.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits, including dental care, are provided to public assistance recipients and certain other low-income persons.

Existing law, the Lanterman Developmental Disabilities Services Act, requires the State Department of Developmental Services to contract with regional centers for the provision of various services and supports to persons with developmental disabilities.

This bill would require the State Department of Health Services, in cooperation with the State Department of Developmental Services, and in consultation with the California Dental Association, to provide existing data regarding dental services received by Medi-Cal beneficiaries who are eligible to receive dental services under the act, to specified committees of the Legislature by April 1, 2003.

Ch. 523 (AB 1344) Cox. Etching cream.

Existing law provides that it is unlawful for anyone to sell, give away, or furnish a minor with an aerosol container of paint capable of defacing property except as specified. Existing law also requires retailers selling aerosol containers of paint to post a sign, as specified, stating that defacement of real or personal property with paint is unlawful. It is also unlawful for a minor to possess an aerosol container of paint for the purpose of defacing property while in any public place.

This bill would extend these provisions to include etching cream, as defined. By creating a new crime, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 524 (AB 1408) Hollingsworth. Agriculture.

Existing law provides that the Secretary of the Department of Food and Agriculture shall establish regulations and provide plans and specifications at cost for the construction of sanitary milk barns and milk houses.

This bill would remove the requirement that the secretary provide plans and specifications for the construction of milk barns and houses and make a technical, nonsubstantive change to this provision.

Existing law provides for a net operating loss carryover for a taxpayer who conducts a farming business that is affected by Pierce's disease and its vectors, as specified. Existing law also authorizes the Department of Agriculture to adopt regulations to implement these provisions.

This bill would delete the provisions authorizing the implementing regulations and instead require the Franchise Tax Board to develop a management agreement with the cooperation of the Department of Food and Agriculture to establish procedures by which the Franchise Tax Board may confirm the fact that the taxpayer's farming business was affected by Pierce's disease and its vectors during the year for which the qualified taxpayer seeks a deduction.

Existing law establishes the Milk Producers Security Trust Fund, and authorizes collection and expenditure of moneys in connection therewith.

This bill would authorize the expenditure of these funds for additional expenses in connection with the use of certain financial instruments, as specified.

By authorizing additional items for expenditure of funds in a continuously appropriated fund, this bill would make an appropriation. This amendment would only become operative if SB 1769 is enacted.

#### Ch. 525 (AB 1599) Negrete McLeod. Age discrimination in employment.

Existing provisions of the California Fair Employment and Housing Act make it an unlawful employment practice for any employer to refuse to hire or employ, or to discharge, dismiss, reduce, suspend, or demote any individual over the age of 40 on the ground of age, except where the law compels or provides for that action. Existing law specifies that these provisions do not preclude bona fide employment requirements or physical or medical examinations of applicants and employees to determine fitness for the employment.

This bill would delete this existing law and would instead make it an unlawful employment practice, subject to certain exceptions, for an employer on the basis of a person's age to refuse to hire or employ the person, to refuse to select the person for a training program leading to employment, to bar or discharge the person from employment or from a training program leading to employment, or to discriminate against the person in compensation or in the terms, conditions, or privileges of employment. In addition to exceptions, among other things, for age restrictions in other laws and bona fide occupational qualifications, the bill would specify that the bill does not preclude promotions within existing staff, hiring or promotion on the

basis of experience and training, or hiring under specified established recruiting programs. The bill would make technical conforming changes.

Existing provisions of the act make it an unlawful employment practice for a labor union to exclude, expel, or restrict membership, to provide second class or segregated membership, to discriminate in the election of officers, selection of staff, or to discriminate against its members, any employer, or any person employed by an employer on the basis of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, or sexual orientation. Existing provisions of the act make it an unlawful employment practice for any person to discriminate on any of these bases in the selection or training or persons in any apprenticeship training program or other training program leading to employment. Existing provisions of the act make it an unlawful employment practice for any employer or employment agency to have printed or circulated any publication, or to make specified non-job-related inquiries, that express any limitation, specification, or discrimination on any of these bases of discrimination.

This bill would add age to the bases of discrimination constituting these unlawful employment practices. The bill would, however, specify that the act does not prohibit employers or employment agencies from inquiring into the age of an applicant or specifying age limitations where compelled or provided by law.

Existing provisions of the act make it an unlawful employment practice for an employer or employment agency to print or circulate or to cause to be printed or circulated any publication, or to make a non-job-related inquiry, that expresses directly or indirectly any limitation, specification, or discrimination as to race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, or sexual orientation.

The bill would amend these provisions to add age as a prohibited basis. The bill would specify that, where compelled or provided by law, the act does not prohibit an employer or employment agency either from making age inquiries of employment applicants or specifying age limitations for employment. The bill would provide that it is the intent of the Legislature to clarify existing law and reject the interpretation given to the law in *Esberg v. Union Oil Company of California*.

Ch. 526 (AB 1835) Bates. Peace officers: refusal to receive or arrest charged person: criminal or civil liability.

(1) Existing statutory law makes it a felony for any peace officer who has the authority to receive or arrest a person charged with a criminal offense to willfully refuse to receive or arrest that person, including a person arrested by a private person under a citizen's arrest.

This bill would provide that the above provision shall not apply to arrests made pursuant to the provisions authorizing a private person to make a citizen's arrest.

(2) Existing law provides that there shall be no civil liability on the part of, and no cause of action shall arise against, any peace officer acting within the scope of his or her authority, for false arrest or false imprisonment arising out of any arrest under specified circumstances, including that the arrest was made pursuant to the requirements of specified provisions.

This bill would provide that the above provision limiting the civil liability of a peace officer with respect to specified arrests shall apply to arrests made pursuant to the provisions authorizing a private person to make a citizen's arrest.

Ch. 527 (AB 1867) Vargas. Smoking: playgrounds.

Existing law prohibits any person from smoking a cigarette, cigar, or other tobacco-related product, or from disposing of cigarette butts, cigar butts, or any other tobacco-related waste, within a playground or a tot lot sandbox area. Violation of these provisions is an infraction punishable by a \$100 fine.

This bill would increase the fine from \$100 to \$250, and would expand the prohibited smoking and disposal area to within 25 feet of a playground or a tot lot sandbox area. By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act.

Ch. 528 (AB 1906) Longville. Vehicle license fees.

Existing law provides that a license fee be assessed on every vehicle subject to registration for the privilege of operating on public roads. For most vehicles, the fee is a function of the cost to the purchaser and the number of years the purchaser has possessed the vehicle. However, a fixed vehicle license fee of \$2 applies to vehicles described in the law providing for special identification plates for vehicles of historic value.

This bill would provide that the special \$2 license fee applies to those vehicles that have been assigned an identification plate or plates pursuant to that law.

Ch. 529 (AB 2339) Steinberg. Rewards.

Existing law authorizes the Governor to pay rewards of varying amounts from the General Fund for information leading to the arrest and conviction of various persons under specified circumstances.

This bill would, for payment of a reward, require the recommendation of a United States Attorney, or the California Attorney General or the district attorney and chief law enforcement officer, or his or her designee, in the jurisdiction where the crime occurred.

This bill would provide that the reward may also be paid to the person giving the information if the arrest or conviction of the person for the pertinent offense is rendered impossible by an intervening event, including, but not limited to, the death of the person during a pursuit by law enforcement, or while in custody, and if the appropriate law enforcement officials, after reviewing the evidence related to the crime or crimes, determine that the person is the individual responsible for the crime or crimes for which the reward was offered, and that the information would have reasonably led to the arrest and conviction of that person. This bill would also provide that if more than one claimant is eligible for any reward issued pursuant to this section, the Governor may apportion the reward money in a manner the Governor deems appropriate.

This bill would declare these changes are declarative of existing law.

This bill would make an appropriation of General Fund money by authorizing the Governor to pay a reward of General Fund moneys in additional circumstances.

Ch. 530 (AB 2440) Keeley. All-American Roads.

Existing law provides that the Department of Transportation is responsible for the maintenance and operation of the state highway system.

This bill would require a state highway that has been designated by the federal government as an All-American Road on or before April 30, 2002, to be maintained and operated by the department consistent with the recommendations for context-sensitive design standards relative to aesthetics and safety that are contained in the road's corridor management plan.

Ch. 531 (AB 2459) Diaz. Physicians and surgeons: prostate cancer.

Existing law requires the State Department of Health Services to develop a standardized written summary with regard to alternative methods of treatment of prostate cancer, to be printed and made available by the Medical Board of California to physicians and surgeons.

This bill would require the department to approve and send an updated copy of the summary to the board every time the summary is modified and would require the board to make the updated summary available to its physicians and surgeons. The bill would authorize the department to use an existing publication from a recognized cancer authority

as the summary and would require the department, if it uses an existing publication as the summary, to review this summary every 3 years to ensure that it contains timely, new, and revised information regarding prostate cancer treatment options. The bill would require both the department and the board to update their Web sites every time the summary is modified.

Existing law requires that every person or entity who owns or operates a health facility or clinic or who is licensed as a physician and surgeon and rents or owns the premises where their practice is located to post specified signs or notices if prostate cancer screening or treatment is performed.

This bill would require these signs or notices to include the Web site addresses for the department and the board as well as a notice regarding the availability of an updated prostate cancer summary on these Web sites.

Ch. 532 (AB 2798) Aroner. Retail food facilities: transportation of food.

Existing law, the California Uniform Retail Food Facilities Law (CURFFL), provides for the regulation of health and sanitation standards for retail food facilities by the State Department of Health Services. A violation of any of these provisions is punishable as a misdemeanor.

Existing law defines an approved source for purposes of CURFFL as a producer, manufacturer, distributor, or food establishment that is acceptable to the enforcement agency based on a determination of conformity with applicable laws.

This bill would expand the definition of an approved source to include a transporter that meets the above criteria.

Existing law requires all potentially hazardous food, as defined, to be held at a specified temperature.

This bill would specify that this requirement applies to potentially hazardous food that is held at a retail food facility or is being transported to or from a retail food facility for longer than 30 minutes.

Existing law makes it unlawful to hold or display any potentially hazardous refrigerated food above a specified temperature.

This bill would additionally make it unlawful to transport a potentially hazardous refrigerated food above the specified temperature. This bill would also allow retail food facilities to accept potentially hazardous food that has been cooled to a specified temperature within 4 hours of receipt.

Existing law authorizes enforcement officers to undertake certain activities pursuant to the enforcement of CURFFL, including removing evidence from any food facility or any facility suspected of being a food facility.

This bill would extend the authority of the enforcement officers to remove evidence from a vehicle transporting food to or from a retail food facility under specified conditions, and would make related statements of legislative intent.

Because violation of the provisions relating to retail food facilities is a misdemeanor, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 533 (AB 2823) Strom-Martin. Organic products.

Existing law, a violation of which is a misdemeanor, provides that no food shall be sold as organic unless it meets certain criteria, as specified, and accurate and specific records are kept detailing its production, handling, and sale.

This bill would broaden the application of these provisions to all organic products whether 100% organic or made with organic ingredients, including food, pet food, nonfood plants, and cosmetics and provide that no product may be sold as organic unless it is produced in

accordance with the regulations of the National Organic Program. The bill would set forth other requirements relating to products containing organically produced ingredients and multi-ingredient cosmetic products sold as organic. By creating new crimes or expanding the scope of application of existing crimes, this bill would impose a state-mandated local program.

Existing law specifies substances that are prohibited from being used in organic products.

This bill would provide that prohibited products are any material prohibited under the federal Organic Foods Production Act of 1990. This bill would permit the Secretary of the Department of Food and Agriculture to adopt regulations allowing or prohibiting the use of substances in the processing of products that are exempt under the National Organic Program, cosmetics, and animal food sold as organic.

Existing law provides that persons engaged in the production or handling of raw agricultural products sold as organic or the processing or handling of processed food sold as organic shall register with the Secretary of the Department of Food and Agriculture.

This bill would expand this requirement to cover persons engaged in processing or handling dietary supplements, alcoholic beverages, animal food, and cosmetics sold as organic. This bill would also provide that it is unlawful to alter or falsify any organic registration form. By creating a new crime, and by imposing new duties on county agricultural commissioners this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, with regard to certain mandates, no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 534 (AB 2826) Daucher. Domestic violence and familial elder adult abuse.

Under existing law, domestic violence is defined as abuse committed against an adult or a fully emancipated minor who is involved in a specified relationship or who previously had a specified relationship with the suspect.

This bill would expand that definition of domestic violence to include abuse against any minor who is involved in one of those relationships or who previously had one of those relationships with the suspect.

Existing law provides that a peace officer may arrest a person without a warrant if he or she has probable cause to believe that the suspect has committed an assault or battery against a person with whom he or she has or has had a specified relationship and the arrest is made as soon as that probable cause arises.

This bill would expand these provisions to include an assault or battery against a person who is 65 years of age or older and who is related to the suspect by blood or legal guardianship.

By increasing the scope of domestic violence and elder parent abuse duties on local agencies, this bill would impose a state-mandated local program.

This bill would provide that it is the intent of the Legislature that any increased costs resulting from this act are offset by savings to local agencies with respect to domestic violence and elder parent abuse.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 535 (AB 2981) Committee on Agriculture. Agriculture.

(1) Existing law generally provides that it is a misdemeanor for any person to sell any nursery stock unless the person holds a valid license issued upon payment of the prescribed license fee. Existing law also provides that a person is not required to pay any license fee if the person's sales of plants amount to less than \$500 within any one fiscal year, the person has reported to the county agricultural commissioner his or her intention to make those sales, and all plants sold by the person are of his or her own production, and are sold for planting within the county in which the plants were grown.

This bill would enlarge the exemption from payment of license fees described above by including all persons who otherwise meet the criteria for exemption but whose sales of plants amount to less than \$1,000 within any one fiscal year.

(2) Existing law defines "rendering" and "transporter of inedible kitchen grease" for the purpose of regulating these activities.

This bill would expand these definitions to include other similar activities and make other clarifying changes. By expanding the scope of persons to whom existing crimes are applicable, this bill would impose a state-mandated local program.

(3) Existing law sets forth specified provisions relating to plant sanitation, poultry meat inspection for wholesomeness, and poultry classification, any violation of which is a misdemeanor. Existing law also provides an exemption from these provisions to a poultry plant where poultry which was produced on the premises is slaughtered, or to the poultry meat itself, if the poultry meat derived from the poultry is sold by the producer on or off the premises where it was produced to retail stores or public eating houses.

This bill would delete these exemptions. By expanding the scope of persons to whom existing crimes are applicable, this bill would impose a state-mandated local program.

(4) Existing law requires the Secretary of Food and Agriculture to appoint a Shell Egg Advisory Committee that is authorized to advise the secretary with respect to various issues related to eggs.

This bill would allow the committee to advise the secretary with respect to components of the Egg Quality Assurance Plan, a voluntary food safety program developed by the egg industry in cooperation with various public agencies that are consistent with and promote the purposes of California law regarding eggs and egg products.

(5) Existing law makes it unlawful for an egg handler to sell, offer for sale, or expose for sale eggs that are packed or graded for human consumption unless certain requirements are met, including that the consumer container is labeled with a warning to keep the eggs refrigerated. An existing federal regulation, effective September 4, 2001, requires that, except as specified, the label of a package of eggs bear the statement "SAFE HANDLING INSTRUCTIONS: To prevent illness from bacteria: keep eggs refrigerated, cook eggs until yolks are firm, and cook foods containing eggs thoroughly."

This bill would provide that a consumer egg container is adequately marked with a warning to keep the eggs refrigerated if its labeling complies with the safe-handling instructions required by the aforementioned federal regulation.

(6) Existing law provides that a California-grown seal shall be used in the labeling or advertising of agricultural products, as specified, and authorizes the creation, for marketing, advertising, or promotional purposes, of a California-grown seal for agricultural products only under the direction of the Secretary of Food and Agriculture and only to identify agricultural products that have been produced in the state. Existing law authorizes the secretary, upon petition of a grower or processor of California agricultural products, to adopt rules and regulations to provide methods of identifying and labeling agricultural products with the California-grown seal to prevent any misleading use of the seal. Existing law also provides that fraudulent use of the term "California-grown seal" or of the identifying label of the California-grown seal, or a deliberately misleading or unwarranted use of the term or identifying mark, is a misdemeanor, punishable as specified.

This bill would instead provide that the terms “California grown,” “California-grown,” and similar terms with identical connotations shall be used in the labeling or advertising of agricultural products, and authorizes the use of those terms for marketing, advertising, or promotional purposes, only to identify food or agricultural products that have been produced in the state or harvested in its surface or coastal waters. This bill would authorize the secretary to adopt guidelines, rules, and regulations to further define acceptable uses of those terms and to prevent any misleading use of those terms. This bill would also provide that fraudulent use of those terms, or of any seals or other identities officially adopted by the Department of Food and Agriculture in connection with those terms, or a deliberately misleading or unwarranted use of those items or terms is a misdemeanor, punishable as specified. By changing the definition of a crime, this bill would impose a state-mandated local program.

(7) Existing law provides, with specified exceptions, that every person who is engaged in the manufacture, packing, or holding of processed food in this state shall pay a food safety fee of \$100 to the State Department of Health Services to be deposited in the Food Safety Fund, a special fund, and upon appropriation by the Legislature, to be used by the department to assist in developing and implementing education and training programs related to food safety. Existing law provides that this provision shall remain in effect only until January 1, 2003, and as of that date is repealed.

This bill would provide that the food safety fee provision shall instead remain in effect until January 1, 2006, at which time it would be repealed.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 536 (AB 3049) Committee on Health. Public health.

(1) Existing law requires child day care facilities that are licensed by the State Department of Social Services to require proof of each child’s immunizations, including tuberculosis testing, and to maintain files of this proof on the premises.

This bill would exempt from these requirements any child day care center that exclusively offers a program of services for which there is no contract or agreement between the parent and the center for the regular care of the child, and there is no prearranged schedule of care for any child. It would require parents to sign a form acknowledging that they understand the center is not required to verify immunizations and tuberculosis testing for any children accepted for care.

(2) Existing law, the California Uniform Controlled Substances Act, sets forth the requirements with respect to the form and content of prescriptions for controlled substances, and for filling, compounding, and dispensing those prescriptions.

This bill would make a technical, conforming change to the act’s requirements for the form of prescriptions for controlled substances.

(3) Existing law establishes the American Indian Health Policy Panel, to advise the State Department of Health Services on the level of resources, priorities, criteria, and guidelines necessary to implement provisions for a program of various health services under the American Indian Health Service Program.

Existing law specifies the composition of the panel, and requires that, in addition to other members, 4 members be appointed by the Director of Health Services from a list of persons submitted by the California Urban Indian Health Council.

This bill would instead, require that 4 members be appointed from a list of persons submitted by the Western Indian Network.

(4) Existing law, the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983, requires for fiscal years 1994–95 through 1997–98, that an appropriation in the sum of \$318,000 be made from the Hospital Building Fund to the Office of Statewide Health Planning and Development, for the purpose of developing specified regulations.

This bill would delete the above appropriation.

(5) Existing law establishes the California Children's Services (CCS) program in order to provide services to qualified children with disabilities.

Existing law also provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law provides for the department to enter into contracts with managed care systems, hospitals, and prepaid health plans for the provision of various Medi-Cal benefits.

Existing law prohibits the CCS covered services from being incorporated into a Medi-Cal managed care contract entered into after August 1, 1994, until August 1, 2005, except with respect to contracts entered into for county organized health systems in specified counties.

This bill would add the Counties of Yolo and Marin to those counties excepted from the prohibition against incorporating CCS covered services into Medi-Cal managed care contracts.

Ch. 537 (AB 3054) Committee on Aging and Long-Term Care. Long-term care integration pilot projects.

Existing law requires the State Department of Health Services to administer a pilot program, for the establishment of not more than 5 sites around the state, to integrate the financing and administration of long-term care services. Each pilot program is required to develop an administrative action plan and local project sites are required to have a long-term care services agency to be responsible for implementing the plan.

This bill would require the department to develop at least, but not limited to, one alternative model to the pilot program referenced above. The bill would require the department to consult with an established waiver technical advisory committee to assist in the development of an alternative model, and would require the department to report the recommendations of the committee to the Legislature on or before December 1, 2003.

Ch. 538 (SB 18) Alarcon. Transportation.

Existing law provides for the funding of various transportation agencies, including the Los Angeles County Metropolitan Transportation Authority.

This bill would request that a study be completed by the University of California, in consultation with the authority, cities within the County of Los Angeles, and users of services and facilities operated or provided by the authority, on the membership and governance structure of the authority. The bill would specify that if the University of California agrees to conduct the study, it may not use any state funds for that or any related purpose. The bill would require a report to be submitted to the Legislature by July 1, 2003, on the study. This bill would also declare legislative intent regarding the creation of the California Transit Riders Bill of Rights.

Ch. 539 (SB 97) Kuehl. Support orders.

Existing law provides that, unless the judgment provides otherwise, if a money judgment is payable in installments, interest commences to accrue as to each installment on the date the installment becomes due.

The California Court of Appeal, in *Dupont v. Dupont* (2001) 88 Cal.App.4th 192, held that a money judgment for child support arrearages that is payable in installments and does not otherwise provide for a different computation of interest is subject to the provision described above.

This bill would provide that, for the purposes of the provision of existing law described above, only the initial support order, whether temporary or final and whether contained in a judgment or not, shall be considered an installment judgment. The bill would also provide that a support order or other order or notice issued, which sets forth the amount of support owed for prior periods of time or establishes a periodic payment to liquidate the support owed

for prior periods, may not be considered a money judgment for purposes of that provision. The bill would include a statement of legislative findings and declarations.

Existing law requires the Director of Child Support Services to conduct an analytic evaluation of the current amount of uncollected child support and to consider factors that may influence collections.

The bill would require the Department of Child Support Services to submit to the Legislature the analysis described above, on or before March 31, 2003, and to include in the analysis its recommendations for improving efficiency in the collection of child support.

Ch. 540 (SB 492) Scott. Clinics: licensure exemptions.

Existing law relating to health facilities regulates the licensure of clinics, as defined, by the State Department of Health Services. Under existing law, specified types of clinics are exempted from these licensing provisions, including, until January 1, 2003, clinics that are nonprofit corporations, as described, and satisfy prescribed requirements regarding medical research and the receipt of charitable contributions and bequests.

This bill would extend the exemption from licensure requirements for the nonprofit clinics described above to January 1, 2008.

Ch. 541 (SB 953) Vasconcellos. Aging.

Existing law prescribes various programs relating to the health and welfare of senior citizens.

Existing law provides for the California Health and Human Services Agency that consists of, among other departments, the California Department of Aging.

Existing law requires the California Department of Aging, among other things, to administer the Mello-Granlund Older Californians Act, which establishes various programs that serve older individuals, including aging information and education programs.

This bill would also request that the Governor's Office on Service and Volunteerism, in coordination with various other entities, pursue resources to develop an Elder Corps master plan to expand opportunities for engaging California's seniors, and set standards for the effective training and supervision of volunteers. This bill would also request that the Governor's Office on Service and Volunteerism work with a specified entity to ensure that California's portion of federal funds from the USA Freedom Corps be used to enhance senior volunteer opportunities.

This bill would provide that the master plan is to be completed only if and when private funding is received for that purpose.

Existing law establishes, until January 1, 2007, a Long-Term Care Council within the California Health and Human Services Agency as an interdepartmental, interagency council to, among other things, coordinate long-term care policy development and program operations and develop a strategic plan for long-term care policy.

This bill would require the Long-Term Care Council, pursuant to specified federal requirements, to assess the current availability of home- and community-based services, identify gaps in service availability, and evaluate changes that could be made to enable consumers to be served in the most integrated setting possible.

This bill would also require the agency, by January 1, 2005, and with recommendations from the Long-Term Care Council, to set standards for CalCareNet, which is a statewide Internet-based application, with the goal of creating an Internet site that links counties and planning service areas, and provides information on the long-term care services available to the consumer. This bill would provide that state funds shall not be appropriated for this purpose, and that the agency is not required to undertake these tasks unless it receives federal or private funds.

This bill would also require the agency to link the CalCareNet Web site to local Internet information systems by January 1, 2004. This bill would also require the agency to permit

counties and planning service areas to design local information systems, contingent on the availability of funding and resources.

This bill would also require the agency, based on recommendations from the Long-Term Care Council, to recommend to the Legislature, by January 1, 2004, standards for care navigation, as defined, including suggestions for connecting consumers from acute care systems, to and through the long-term care system. This bill would provide that state funds shall not be appropriated for this purpose, and that the agency is not required to undertake this task unless it receives federal or private funds for that purpose, and that implementation of a care navigation program shall be subject to the enactment of legislation requiring its implementation.

Existing law establishes the StayWell Program within the California Department of Aging, and establishes various functions for that program relating to seniors and wellness.

This bill would add specified functions relating to aging to the StayWell Program, but would provide that state funds shall not be appropriated for the purpose of implementing those functions, and that the department is not required to undertake implementation of these functions unless it receives federal or private funds for that purpose.

This bill would request that the department work with specified stakeholders and the entertainment industry to change certain attitudes toward, and perceptions of, aging, in order to make the workplace more receptive to older workers. This bill would provide that state funding shall not be appropriated for these purposes of the bill, and that the department would not be required to undertake these activities, unless it receives federal or private funds for that purpose.

Existing law provides for the licensure and regulation of various healing arts practitioners, including those who provide counseling-related services, such as psychologists, social workers, and marriage and family therapists.

This bill would require any applicant for licensure as a psychologist, social worker, or marriage and family therapist, or for renewal of a license for any of these professionals, to complete specified educational requirements regarding aging and long-term care.

Existing law establishes a system of public schools in California, administered by the Superintendent of Public Instruction and sets forth the required course of study for grades 7 to 12, inclusive.

This bill would require the Superintendent of Public Instruction to make available to teachers a curriculum, as specified, on human growth, human development, and financial preparedness. This bill would also require the State Board of Education to integrate with specified academic areas components on human growth, human development, and contribution to society, across the life course, and financial preparedness.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges, the California State University under the administration of the Trustees of the California State University, and the University of California under the administration of the Regents of the University of California.

This bill would request that these systems, in consultation with specified entities, develop standards and guidelines, as specified, for the biological, social, and psychological aspects of aging, for specified professional degree programs, at the associate, bachelor, and graduate levels, that relate to aging.

Existing law establishes the Employment Development Department to administer various programs relating to employment.

This bill would request that the Senior Worker Advocate Office of the Employment Development Department work with specified entities to conduct outreach to the business community directed at educating employers regarding matters relating to aging. This bill would provide that state funds may not be appropriated for these purposes, and that the department is not required to undertake these tasks unless the department receives federal or private funds for that purpose.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Ch. 542 (SB 1278) Speier. Pharmacies: prescription benefits: Medicare beneficiaries.

(1) Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services, including prescription benefits. Under existing law, the department pays participating pharmacists a discounted price for drugs on the Medi-Cal drug formulary. Existing law, the Pharmacy Law, separately regulates the operation of pharmacies and makes the violation of its provisions a crime.

The Pharmacy Law requires until January 1, 2003, as a condition of Medi-Cal eligibility, that pharmacies charge Medicare beneficiaries a price not to exceed the Medi-Cal reimbursement rate for prescription medicines, and an amount to cover electronic transmission charges by Medicare beneficiaries, upon showing their Medicare card and prescription.

This bill would indefinitely extend these provisions and would specify that they do not apply to a prescription covered by insurance. The bill would require the department to conduct an outreach program to inform Medicare beneficiaries of this program and require participating pharmacists to prominently display a sign pertaining to its provisions. By imposing this requirement on a pharmacist and by extending the provisions of this program, the violation of which is punishable as a criminal offense, the bill would impose a state-mandated local program.

(2) Existing law, the Golden Bear State Pharmacy Assistance Program (the program), provides that in addition to receiving a discounted rate for prescription medicines under the Pharmacy Law, a Medicare beneficiary may participate in the program as well. Under the program, the State Department of Health Services is required to negotiate rebate amounts with drug manufacturers for prescription drugs purchased by Medicare beneficiaries. Under the program, a drug manufacturer is required to pay the department the negotiated rebate amount for a prescription drug provided to a Medicare beneficiary participating in the program. Existing law requires the department to deposit the rebates into the Golden Bear State Pharmacy Assistance Program Rebate Fund (the fund), which is continuously appropriated.

This bill would authorize the department to establish a system that allows a Medicare beneficiary access to programs operated by drug manufacturers providing a larger discount amount on prescription drugs. The bill would also authorize the department to collect prospective rebates from drug manufacturers, which would be deposited into the fund. Because the bill would increase the amount of revenue in a continuously appropriated fund, it would make an appropriation. The bill would require the department to negotiate a separate fee in an amount required to administer each pharmacy claim reimbursement submitted to the department under the program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 543 (SB 1447) Chesbro. Treatment of addicts: drug treatment programs.

Existing law provides that it is a misdemeanor or a felony for a physician treating a person for addiction to prescribe for, or furnish to, the person more than 180 milligrams of methadone or 200 milligrams of levoalphacetylmethadol (LAAM) during each day of the treatment.

This bill would repeal the limits on the amount of methadone and LAAM that a physician treating a person for addiction may lawfully prescribe for or furnish to that person during each day of the treatment.

Existing law provides for the Medi-Cal Drug Treatment Program, under which each county enters into contracts with the State Department of Alcohol and Drug Programs for

the provision of various drug treatment services to Medi-Cal recipients, or the department directly arranges for the provision of these services if a county elects not to do so.

Under existing law, the department is responsible for licensing narcotic treatment programs to use replacement narcotic therapy in the treatment of addicted persons whose addiction was acquired or supported by the use of a narcotic drug or drugs, not in compliance with a physician and surgeon's legal prescription.

Existing law provides for reimbursement for narcotic replacement therapy dosing and ancillary services provided by narcotic treatment programs, and limits reimbursement for narcotic treatment program services to those services specified in state law and state and federal regulations governing the licensing and administration of narcotic treatment programs.

Existing law defines the services reimbursable under this program, and establishes contracting, billing, and reimbursement procedures governing this program.

This bill would establish criteria, as specified, for determining the uniform statewide monthly reimbursement rate for narcotic replacement therapy dosing and ancillary services.

Existing law, added by initiative statute (Proposition 36), provides that effective July 1, 2001, except as specified, a person convicted of a nonviolent drug possession offense is required to receive probation with completion of a drug treatment program as a condition of probation. That initiative statute also provides that effective July 1, 2001, except as specified, a person's parole may not be suspended or revoked for the commission of a nonviolent drug possession offense or for violating a drug-related condition of parole, but that an additional condition of parole for those offenses or violations shall be completion of a drug treatment program.

Existing law provides that reimbursement to narcotic treatment program providers shall be limited to the lower of either the uniform statewide monthly reimbursement rate, or the provider's usual and customary charge to the general public for the same or similar service.

This bill would provide that reimbursement paid to a narcotic treatment program provider by a county for services provided to clients pursuant to Proposition 36, and for which the client is not liable for paying, does not constitute a usual and customary charge to the general public.

Existing law requires certified narcotic treatment program providers that are exclusively billing the state or county for services under these provisions to submit accurate and complete performance reports, as specified.

This bill would impose the same requirements on certified narcotic treatment program providers that are exclusively billing the state or county for services to persons pursuant to Proposition 36.

Ch. 544 (SB 1566) Polanco. California Community Colleges Economic and Workforce Development Program.

Existing law provides for the California Community Colleges Economic Development Program. Existing law provides for the awarding of grants for this program. Existing law provides that this program only be implemented during those fiscal years for which funds are appropriated for these purposes in the annual Budget Act. Existing law establishes the California Community Colleges Business Resource Assistance and Innovation Network Trust Fund in the State Treasury as a special fund administered by the Board of Governors of the California Community Colleges, and authorizes the board of governors to solicit direct contributions for deposit in the fund from various nonstate public and private sources for the purpose of funding the program for allocation upon appropriation by the Legislature. Existing law provides for the repeal of the program on January 1, 2003.

This bill would state the intent of the Legislature to reauthorize the program as the California Community Colleges Economic and Workforce Development Program, and would make related changes to the program. The bill would provide that funds be awarded on a competitive basis. The bill would provide that this program only be implemented during

those fiscal years for which funds are appropriated for these purposes in the annual Budget Act. The bill would require that the special funds in the California Community Colleges Business Resource Assistance and Innovation Network Trust Fund be placed in a surplus money investment account to earn interest for program purposes. The bill would require that an annual report about the program required by existing law to be provided on or about each January 1 by the Chancellor of the California Community Colleges instead be provided on or about March 1 of each year. The bill would extend the date on which the program is to be repealed to January 1, 2008.

Ch. 545 (SB 1852) Committee on Public Safety. Public safety.

(1) Existing law contains numerous provisions pertaining to crime and the implementation of the criminal laws of this state.

This bill would make various nonsubstantive changes to clarify and update these provisions.

(2) Existing law provides that individuals convicted of certain drug offenses must pay a drug program fee which is deposited into a drug program fund allocated to drug abuse programs in the county's schools and in the community. Existing law provides that a certain percentage of the money in the fund shall be used for an annual evaluation conducted by the county superintendent of schools in the counties where the program is operating containing certain information, as specified.

This bill would remove provisions requiring that an annual evaluation be conducted.

(3) Existing law provides that entry of judgment against certain defendants may be deferred with respect to defendants who are charged with certain enumerated crimes and meet certain criteria including that he or she has no prior convictions for any offense involving controlled substances and has had no prior felony convictions within the 5 years prior, as specified.

This bill would add possession of marijuana while driving a motor vehicle to the list of violations to which these provisions apply.

(4) Existing law provides that all records of the Department of Motor Vehicles relating to the registration of vehicles, other information contained on an application for a driver's license, abstracts of convictions, and other information, are open to public inspection during Department of Motor Vehicles office hours. Existing law requires the Department of Motor Vehicles to disclose to courts and law enforcement agencies certain types of felony convictions for a period of 10 years prior for the purpose of imposing penalties for offenses involving driving under the influence of an alcoholic beverage or drug.

This bill would require the department to disclose to courts and law enforcement agencies all convictions for felony gross vehicular manslaughter while intoxicated for the purpose of imposing penalties.

(5) Existing law provides that the Department of Motor Vehicles may suspend a person's privilege to operate a motor vehicle, as specified.

This bill would specify that for the purposes of determining the length of a license suspension, a conviction of any offense in any other state that would have been, if committed in this state, vehicular manslaughter, is to be considered a conviction of California law.

(6) Existing law provides that, with respect to any criminal proceeding against a person who has been issued a license to engage in a business or profession by a state agency, as specified, the state agency which issued the license may voluntarily appear, or may be ordered by the court to furnish pertinent information, make recommendations regarding specific conditions of probation, or provide any other assistance necessary if the crime charged is substantially related to the qualifications, functions, or duties of a licensee.

This bill would provide that a state agency issuing licenses pursuant to the Chiropractic Initiative Act is also subject to these provisions.

(7) Existing law provides various punishments for persons convicted of driving under the influence of drugs or alcohol including suspension or restriction of the driving privilege,

imprisonment, payment of fines, and attendance at driving-under-the-influence programs of various durations, as specified.

This bill would make numerous technical, nonsubstantive, and clarifying changes to these provisions. Because this bill would require proof of completion of a driving-under-the-influence program to be evidenced under penalty of perjury, it would impose a state-mandated local program by expanding the crime of perjury.

(8) Existing law requires the Department of Justice to maintain a statewide telecommunications system, entitled the California Law Enforcement Telecommunications System, for use by law enforcement agencies, and requires the Attorney General to appoint an advisory committee, with members from specified organizations, to assist with management of the system.

This bill would require that the advisory committee include a representative from the California Police Chiefs Association.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 546 (SB 2094) Committee on Public Employment and Retirement. Public employees' retirement: public service.

Under the Public Employees' Retirement Law, service retirement allowances are calculated, in part, based on years of credited service. Members may, under existing law, elect to receive service credit for public service as a volunteer in the Peace Corps or the AmeriCorps VISTA (Volunteers In Service To America) program. Member contributions to the Public Employees' Retirement System are deposited in the Public Employees' Retirement Fund, a continuously appropriated fund.

This bill would provide that members of the Public Employees' Retirement System may elect to receive service credit for public service as a volunteer in any other AmeriCorps program. By increasing the amount of employee contributions to the Public Employees' Retirement Fund, the bill would make an appropriation.

Ch. 547 (SB 1586) Haynes. District annexations.

Under the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, when any district to which annexation of territory is proposed has adopted and transmitted to the local agency formation commission a resolution requesting termination of proceedings within a prescribed time period, the commission is required to terminate the proceedings.

This bill instead would require the commission to terminate the proceedings after consideration of the district's resolution, which shall be based upon written findings supported by substantial evidence in the record that the request is justified by financial or service concerns, as defined. The bill would make the district's resolution subject to judicial review. The bill would make these provisions inapplicable if all districts to which annexation of territory is proposed have adopted and transmitted to the commission resolutions supporting the proposed change of organization or reorganization. The bill would make other conforming changes.

Ch. 548 (AB 2227) Harman. Local agency formation.

(1) The Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 governs the procedures for the formation and change of organization of cities and special districts. For purposes of the act, the terms "landowners" and "owner of land" are defined as any person shown as the owner of land on the most recent assessment roll being prepared by the county at the time the conducting authority adopts a resolution of application, except where that person is no longer the owner.

This bill would change these definitions to any person shown as the owner of land on the most recent assessment roll being prepared by the county at the time the proponent adopts a resolution of application or files a notice of intention to circulate a petition with the executive officer of a local agency formation commission, except where that person is no longer the owner, and would make related changes.

(2) For purposes of the act, the term "proponent" is defined as the person or persons who file a notice of intention to circulate a petition with the executive officer.

This bill would change that definition to the person or persons who file a notice of intention to circulate a petition with the executive officer or the local agency that adopts a resolution of application.

(3) Existing law requires that any action brought to determine the validity of any change of organization or reorganization be brought pursuant to specified procedures.

This bill would include within this requirement actions brought to determine the validity of sphere of influence determinations.

(4) Existing law specifies how required notice shall be mailed with respect to the proceedings of a local agency formation commission. With regard to mailed notice to landowners, existing law requires that notice be addressed to each person to whom land is assessed, as shown upon the most recent assessment roll being prepared by the county at the time the commission adopts a resolution of application. With regard to mailed notice to registered voters, existing law requires that notice be given to all registered voters within the property that is subject to the hearing and all registered voters within 300 feet of the exterior boundary of that property.

This bill would provide that required notice to landowners be addressed to each person to whom land is assessed as shown on the most recent assessment roll being prepared by the county at the time the proponent adopts a resolution of application or files a notice of intention to circulate a petition with the executive officer, and to all landowners within 300 feet of the exterior boundary of the property that is the subject of the hearing. This bill would also provide that required notice to registered voters be addressed to all registered voters within the affected territory at the address as shown on the most recent index of affidavits prepared by the county elections official at the time the proponent adopts a resolution of application or files a notice of intention to circulate a petition with the executive officer and to all registered voters within 300 feet of the exterior boundary of the property that is the subject of the hearing.

(5) Existing law permits a city or district to provide extended services, as defined, outside its jurisdictional boundaries only if it first requests and receives written approval from the local agency formation commission in the affected county. Approval is not required for an extended service that a city or district was providing on January 1, 1994.

This bill would extend that exemption from commission approval to an extended service that a city or district was providing on or before January 1, 2001.

(6) Existing law sets forth the various powers and duties of a local agency formation commission in reviewing and approving or disapproving proposals for changes of organization or reorganization. Among other things, a commission shall require, as a condition to annexation to a city, that the city prezone the territory to be annexed and require that approval of the annexation be consistent with the planned and probable use of the property based upon the review of the general plan and rezoning designations.

This bill would permit the commission not to require a city to prezone the territory to be annexed if satisfactory evidence is presented to the commission that the existing future development entitlements on territory to be annexed are vested or are already at buildout, and are consistent with the city's general plan land use element.

(7) Existing law allows a commission to approve an annexation to a city of island territory without an election or waive a protest hearing, as specified.

This bill would, subject to specified conditions, require the commission to approve the annexation and waive protest proceedings as to annexations initiated on or after January 1,

2000, and before January 1, 2007, and approve these annexations initiated on or after January 1, 2007.

(8) Existing law requires the local agency formation commission to mail notice of a public hearing regarding the adoption, amendment, or revision of spheres of influence, at least 15 days prior to the date of the hearing and to publish that notice in a newspaper at least 15 days prior to the hearing.

This bill would require instead that the mailed and published notice be made at least 21 days prior to the date of the hearing and specify publication in a newspaper of general circulation within the affected territory.

(9) Existing law requires a local agency formation commission to terminate any change of organization or reorganization, except a special reorganization, that includes the detachment of territory from any city if any city from which the detachment of territory is requested adopts and transmits a resolution requesting termination of the proceedings no later than 60 days after the date that the proposal is on the commission's meeting agenda.

This bill would make this requirement inapplicable if the commission receives a resolution in support of the proposed change of organization or reorganization from all cities from which the detachment of territory is proposed.

(10) Existing law requires a local agency formation commission to terminate any change of organization or reorganization that includes the annexation of territory to any district if any district to which the annexation of territory is requested adopts and transmits a resolution requesting termination of the proceedings no later than 60 days after the date that the proposal is on the commission's meeting agenda.

This bill would make this requirement inapplicable if the commission receives a resolution in support of the proposed change of organization or reorganization from all districts to which the annexation of territory is proposed.

(11) Existing law permits a local agency formation commission to make its approval of a change of organization or reorganization of local government entities subject to any of specified conditions.

This bill would require that any of the specified conditions imposed on a change of organization or reorganization constitute the exclusive conditions for the change of organization or reorganization, notwithstanding the general provisions of the act, and would make conforming changes.

(12) Existing law provides that protest proceedings with respect to a district formation that is not part of a reorganization shall be conducted pursuant to the principal act of the district to be formed, and that commission protest procedures shall not apply except as specified.

This bill would provide that protest proceedings of the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 shall prevail in the event of a conflict with the principal act of the district to be formed.

(13) Existing law requires the executive officer of the commission to give mailed notice of the protest hearing on a proposed annexation to a city of 75 acres or less to each landowner within the affected territory.

This bill would delete that requirement.

(14) Existing law authorizes a petition to be filed with the executive officer of the commission prior to the conclusion of the protest hearing by the commission on the issue of merging a district with a city or establishing a subsidiary district of a city, if the petition requests that any election on that question be called, held, and conducted only within the district.

This bill would require the commission to forward the proposal to the affected city and would require the affected city to call, hold, or conduct any election if the executive officer certifies the petition. The bill would also require the commission to forward the proposal to the principal county and would require the principal county to call, hold, and conduct any election upon the question of a merger or the establishment of a subsidiary district only

within the district to be merged or within the district to be established as a subsidiary district if the petition requesting the election is certified.

(15) Existing law requires the commission, in any resolution ordering a special organization, to call an election in both the territory to be detached from the city and the entire territory of the city from which the detachment is ordered to occur.

This bill would require that any resolution ordering a special reorganization require the principal county to call the election.

(16) This bill would make various related conforming changes.

(17) By imposing various duties described above on local agency formation commissions and local government agencies, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 549 (AB 1282) Cardoza. Health care service plans.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the regulation of health care service plans by the Department of Managed Health Care and makes a willful violation of the act's provisions a crime.

This bill would require the department to adopt regulations that establish an extended geographic accessibility standard for access to health care providers served by a health care service plan in counties with a population of 500,000 or less that have 2 or fewer health care service plans providing coverage to the entire county in the commercial market. The bill would also require a health care service plan to hold a public meeting in a county with a population of 500,000 or less if the plan intends to withdraw coverage from that county or a portion thereof.

Because a willful violation of these provisions by a health care service plan would be a crime, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 550 (AB 1946) Corbett. Written materials for patients.

(1) Existing law requires every contract of admission for a skilled nursing or intermediate care facility to contain a complete copy of specified patients' rights provisions, in legible print of no less than 10-point type.

This bill would instead require these provisions to be in legible print of no less than 12-point type.

(2) Existing law contains various provisions relating to personal health care and patient rights.

This bill would require specified printed materials that are provided to a patient by a general acute care hospital, skilled nursing, intermediate care, or nursing facility, or residential care facility for the elderly, to be printed in at least a 12-point font that is clear and legible. The bill would further require that, upon admission of a patient to a skilled nursing, intermediate care, or nursing facility, or to a general acute care hospital, the facility shall ask if the patient wishes specified patients' rights information to be provided to the patient's next of kin or agent under a durable power of attorney for health care, and to provide that information if the patient so directs. The bill would authorize the facility or hospital to provide materials regarding its expectations of patients and patients' responsibilities, as specified. This bill would also require a representative of the facility or hospital to explain these materials to the next of kin or agent under the durable power of attorney for health care, upon request.

Ch. 551 (AB 2202) Alquist. Gerontology: service delivery personnel: training.

Existing law provides generally for the prevention of disease and the promotion of health for all Californians, including older adults. Existing law declares the intent of the Legislature that the University of California provide, in a specified manner, academic courses and training in the field of geriatrics for medical students and existing internists and family physicians.

This bill would declare the intent of the Legislature that California State University (CSU) students who are receiving training to provide services to the senior population complete a curriculum in the field of gerontology. The bill would require the CSU system to provide academic courses and training in the field of gerontology for specified professional service delivery personnel. The bill would impose requirements on each CSU campus that educates professional service delivery personnel, relating to curriculum guidelines and recruitment. The bill would require the trustees to submit a progress report to the Legislature on or before a specified date, on the status of the establishment and implementation of the gerontology curricula required by the bill.

Ch. 552 (AB 2735) Chan. Elder and dependent adult abuse.

Existing law provides that all information and records obtained in the course of providing services, as specified, to persons with developmental disabilities and to either voluntary or involuntary recipients of certain mental health services, are confidential, except as specified.

This bill would add to the exceptions to the provisions restricting disclosure, a disclosure between persons who are trained and qualified to serve on defined multidisciplinary personnel teams that are involved in the prevention, identification, and treatment of abuse of elderly or dependent persons. The bill would require that the information and records sought to be disclosed shall be relevant to the prevention, identification, management, or treatment of an abused elder or dependent adult.

Existing law provides for the reporting of known or suspected physical or other abuse, as defined, of an elder or dependent adult by specified persons and entities. Existing law requires that the identity of any person who reports known or suspected abuse and information relevant to the actual or suspected abuse shall be kept confidential and disclosed only to specified persons or entities.

This bill would expand the category of persons and entities who may receive and disclose information relevant to the known or suspected abuse of an elder or dependent adult and the identity of any person reporting it to include the office of the district attorney, the office of the public guardian, and the probate court.

Existing law, implemented only to the extent funds are provided in the annual Budget Act, requires a county to establish an emergency response adult protective services program to respond in person immediately to reports of imminent danger to an elder or dependent adult or within 10 calendar days or as soon as practicably possible to all other reports of danger, except under specified circumstances.

This bill would exempt from these response and reporting requirements reports to the county that involve danger to an elder or dependent adult residing in specified facilities for the incarceration of prisoners when the abuse reportedly has occurred in one of those facilities. It would also make various other changes to these emergency response and reporting provisions.

This bill would incorporate additional changes to Section 15763 of the Welfare and Institutions Code, proposed by AB 444 and SB 1845, to be operative only if this bill and either or both AB 444 and SB 1845 are enacted and become operative on or before January 1, 2003, and this bill is enacted last.

Ch. 553 (SB 309) Ortiz. Continuing care retirement communities.

Under existing law, the State Department of Social Services is responsible for regulating activities relating to continuing care contracts that govern care provided to an elderly resident

in a continuing care retirement community for the duration of the residents' life or a term in excess of one year. Existing law contains provisions relating to supervision of life care contracts, also known as continuing care contracts, including requirements governing continuing care communities and contracts.

Existing law specifies rights of which no resident of a continuing care retirement community may be deprived.

This bill would also declare that residents of a continuing care community have the right to organize and participate freely in the operation of resident associations.

Existing law requires continuing care providers to permit the formation of a resident association by interested residents and to establish policies and procedures that promote the sharing of information, dialogue between residents and management, and access to the provider's governing body. Existing law requires that those policies and procedures shall be evaluated at a minimum of every 2 years.

This bill would, instead, require the provider to conduct a biannual resident satisfaction survey, that would be made available to the resident association or its governing body or to a committee of residents of continuing care communities at least 14 days prior to the next semiannual meeting of residents and the governing body of the provider. It would also require that a copy of the survey be posted in a conspicuous location at each facility.

Existing law requires that, at least 30 days prior to the implementation of any increase in the monthly care fee, the designated representative of a continuing care retirement community provider shall convene a meeting, to which all residents shall be invited, for the purpose of discussing the reasons for the increase, the basis for determining the amount of the increase, and the data used for calculating the increase.

This bill would require the provider to make certain data available at least 14 days prior to a meeting to discuss a monthly care fee increase, and would require that a copy of that information be posted in a conspicuous location at each facility. This bill would impose on a continuing care provider responsibilities to prepare and provide certain reports to residents, and to allow residents to make presentations at specified meetings.

Existing law provides that in a multifacility organization having more than one continuing care retirement community in the state, the governing body of the multifacility organization shall elect either to have at least one nonvoting resident representative to the provider's governing body for each California-based continuing care retirement community the provider operates or to have a resident-elected committee composed of representatives of the residents of each California-based continuing care retirement community that the provider operates select or nominate at least one nonvoting resident representative to the provider's governing body for every three California-based continuing care retirement communities or fraction thereof that the provider operates.

This bill would provide that, if a multifacility organization elects to have one representative for every 3 communities that the provider operates, the provider shall provide to the president of the residents association of each of the communities that do not have a resident representative, the same notice of board meetings, board packets, minutes, and other materials as the resident representative. It would, however, permit specified information to be withheld. It would also permit, except as prescribed, resident representatives to share information from board meetings with other residents.

This bill would also require the department, by April 1, 2003, and with input from the committee, to make recommendations to the Legislature as to whether any changes in current law regarding resident representation to the board is needed, and to provide written guidelines, available to residents and providers, that address specified issues.

Existing law requires the Continuing Care Contracts Branch of the department to perform various duties in the oversight of continuing care retirement community facilities.

Existing law requires the branch to respond to continuing care facility residents' rights, service-related, and financially related complaints by residents.

This bill would require the branch to provide the continuing care contracts advisory committee with a summary of all residents' rights, service-related, and financially related complaints by residents. This bill would also require the provider to disclose any citation issued by the department in its disclosure statement to residents.

Existing law provides that the Continuing Care Advisory Committee of the department, comprised of specified membership, shall act in an advisory capacity to the department on matters relating to continuing care contracts.

This bill would revise the membership of the committee.

Existing law provides that in the event of liquidation, all claims made against a continuing care provider based on the provider's continuing care contracts shall be preferred claims against all assets owned by the provider.

This bill would include claims against a continuing provider in the event of receivership within the scope of that requirement.

Ch. 554 (SB 339) Ortiz. Long-term health care facilities: status changes and patient transfers.

Existing law requires the State Department of Health Services to administer provisions relating to the licensing of health facilities, including long-term health care facilities. Existing law imposes various requirements upon long-term health care facilities when the facility transfers patients due to a change in the status of the license or operation of the facility, including a requirement for written notification to the affected patients or their guardians. Under existing law, these requirements include taking reasonable steps to medically assess the patient prior to the transfer, and, when 10 or more patients are likely to be transferred, the preparation and submission of a proposed relocation plan to the department for comment, if any.

Existing law also authorizes the department to provide or arrange for the provision of patient relocation and related services, under specified circumstances.

Under existing law, the willful or repeated violation by any person of the provisions regulating long-term health care facilities is a misdemeanor.

This bill would revise the above provisions relating to the transfer of long-term health care facility patients, by, among other things, replacing references to a "patient" in these facilities with the term "resident." The bill would also require the facility to obtain a social and physical functioning assessment, as well as a medical assessment, of each patient prior to giving the patient notice of the transfer. This bill would give a resident the right to remain in the facility for up to 60 days after notification of the intent to transfer, if an appropriate placement has not been made, and would impose staffing requirements upon facilities under these conditions. This bill would revise the procedures for submission by a facility, and review and approval by the department, of relocation plans for 10 or more residents. By changing the definition of an existing crime, this bill would create a state-mandated local program.

This bill would require the department to request that the Attorney General seek injunctive relief and damages against a facility that fails to provide the specified relocation services, under specified conditions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 555 (SB 1531) Speier. Health care coverage.

Existing law provides for the regulation of health care service plans by the Department of Managed Health Care and for the regulation of health insurers by the Department of Insurance. Under existing law, a violation of the provisions governing health care service plans is punishable as a crime.

Existing law requires a plan and a health insurer to issue a Medicare supplement policy on a guaranteed basis to specified individuals, including those enrolled in a Medicare+Choice plan, who satisfy designated criteria. Under existing federal law provisions regulating those plans, a Medicare+Choice organization may apply to the United States Department of Health and Human Services Centers for Medicare and Medicaid Services for a modification of a service area of a Medicare+Choice plan that it offers. Existing law additionally provides that a plan and a health insurer may not deny, condition the offering or effectiveness of, or discriminate in the pricing of a Medicare supplement policy or contract because of, among other things, the health status, claims experience, or a preexisting condition, of an applicant if the applicant satisfies designated criteria. Existing law provides an applicant for a Medicare supplement policy or contract with an open enrollment period in specified situations if the applicant, among other things, is at least 65 years old and was previously enrolled in Medicare.

This bill would expand eligibility for the guaranteed issuance of a Medicare supplement policy to include an individual enrolled in a Medicare+Choice plan if the plan reduces its benefits, increases the cost-sharing amount, or discontinues for other than good cause relating to the quality of care, a provider currently furnishing services to the individual. The bill would expand the ability of a qualified applicant to obtain a Medicare supplement policy or contract by, among other things, deleting the age requirement and expanding the open enrollment timeframe, as specified.

Because the bill would specify additional requirements with respect to the operation of a health care service plan, the violation of which would be punishable as a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 556 (SB 1633) Soto. Medi-Cal: transfer of property interest: notice.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law requires the department and any nursing facility, at the time of either application for Medi-Cal benefits or of the assessment of the resources of a married couple when one spouse is institutionalized, prior to admitting any person, to provide a clear and simple statement, in writing, to the applicant or recipient, to his or her spouse, and to his or her legal representative, if any, explaining how Medi-Cal eligibility requirements affect certain exempt resources, certain protections against spousal impoverishment, and certain circumstances under which an interest in a home may be transferred without affecting Medi-Cal eligibility.

This bill would similarly require the department, at the time of application by an aged, blind, or disabled Medi-Cal applicant who is not receiving aid under other programs, as specified, to provide a clear and simple statement, in writing, to the applicant, and to the applicant's spouse, legal representative, or agent, if any, explaining how Medi-Cal eligibility requirements affect certain circumstances under which an interest in a home may be transferred for less than fair market value without affecting Medi-Cal eligibility.

Ch. 557 (SB 1898) Soto. Residential care facilities for the elderly: fees and charges.

Existing law provides for the regulation and licensure of residential care facilities for the elderly by the State Department of Social Services. A violation of these provisions is a misdemeanor.

This bill would provide that if a licensee of a residential care facility for the elderly charges a preadmission fee, the licensee is required to provide the applicant with a written statement of specified costs relating to the preadmission fee and other matters.

This bill would prohibit the collection of any preadmission fee from a recipient of benefits under the State Supplementary Program for the Aged, Blind and Disabled who applies for admission to the facility. The bill would only authorize the collection of a rate increase from a recipient under this program under specified circumstances.

The bill would require a licensee to provide residents written notice of rate increases, as specified, and would prohibit the charge of nonrecurring lump-sum assessments, as defined, by a licensee except for charges for specific goods or services provided to an individual resident.

By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 558 (AB 410) Salinas. Rural programs.

Existing law establishes the California Rural Policy Task Force within the Office of Planning and Research in the Governor's office, specifies its composition, prescribes its duties, and requires each agency or department represented on the task force to develop a designated plan. Existing law also establishes the Rural California Technical Assistance Program in the Trade and Commerce Agency. Existing law repeals these provisions as of January 1, 2003.

This bill would extend the repeal date of these provisions to January 1, 2007.

The bill would revise the composition and duties of the California Rural Policy Task Force, and would require the task force to develop, on or before June 1, 2004, a strategic plan as prescribed.

#### Ch. 559 (AB 892) Keeley. Fisheries.

(1) Existing law, the Marine Life Management Act, generally establishes a comprehensive plan for the management of marine life resources, and utilizes fishery management plans as the primary basis for managing the state's sport and commercial marine fisheries. Existing law requires the Department of Fish and Game to submit fishery management plans to the Fish and Game Commission for adoption or rejection and also requires the Director of Fish and Game to report annually in writing to the commission on the status of sport and commercial marine fisheries managed by the state and identify those fisheries that do not meet the sustainability policies set forth in the act. Existing law authorizes the department, upon the recommendation of the commission, to adopt regulations that limit the taking of fish in a fishery, and permits those regulations to remain in effect until a fishery management plan is adopted, or for 12 months, whichever is shorter.

This bill would, instead, provide that those regulations shall remain in effect until a fishery management plan is adopted. The bill would delete obsolete references and would make other clarifying and technical changes to the act.

(2) Existing law requires the department to submit to the commission a draft of a master plan prepared pursuant to the Marine Life Protection Act on or before January 1, 2003, a proposed final master plan on or before April 1, 2003, and a final master plan on or before December 1, 2003.

This bill would instead require the department to submit to the commission a draft of the master plan on or before January 1, 2005, a proposed final master plan on or before April 1, 2005, and a final master plan on or before December 1, 2005.

(3) Existing law authorizes the director to adopt regulations to conform state law or regulations of the commission to the fishery management plan prepared pursuant to the federal Magnuson-Stevens Fishery Conservation and Management Act.

This bill would revise the definitions applicable to those provisions to conform with the existing act and with the federal Magnuson-Stevens Fishery Conservation and Management Act.

(4) Existing law prohibits the taking or landing of krill of the genus *Thysanoessa* or the genus *Euphausia* for commercial purposes until January 1, 2011, and prohibits that commercial taking or landing after January 1, 2011, unless permitted under regulations adopted by the commission.

This bill would expand those provisions to apply to the taking or landing of all species of krill.

By changing the definition of a crime, this bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) Existing law continuously appropriates money in the Fish and Game Preservation Fund to the department and the commission to carry out the Fish and Game Code.

By revising the duties of the department and the commission, this bill would make an appropriation.

Ch. 560 (AB 1742) Maldonado. Vehicles: combination lengths: agricultural product haulers.

Existing law prohibits any combination of vehicles coupled together, including any attachments, from exceeding a total length of 65 feet, with certain, specified exceptions.

This bill would exempt a combination of vehicles from the specified length limitation, and would authorize the combination to have a total length of not more than 75 feet, if the combination (1) consists of a motortruck and 2 trailers; (2) no trailer in the combination exceeds 28 feet 6 inches in length; (3) the combination is used exclusively to transport agricultural products from the field to the first point of handling and return, and each direction of transport does not exceed 80 miles; and (4) the combination is not operated on a highway that is designated as a national network route.

The bill would provide that these provisions would become inoperative on January 1, 2006. This bill would require the Department of the California Highway Patrol to study the effect of the provisions on public safety and to report the results of the study to the Legislature and the Governor no later than April 1, 2005.

Ch. 561 (AB 1881) Pescetti. Solar energy systems.

Existing law requires the Department of General Services, in consultation with the State Energy Resources Conservation and Development Commission (Energy Commission), to ensure that solar energy equipment, for which the primary purpose is using solar energy for electricity generation is installed, no later than January 1, 2007, on all state buildings and state parking facilities where feasible, as defined. Existing law also requires solar energy equipment to be installed where feasible as part of the construction of all state buildings and state parking facilities that commences after December 31, 2002.

This bill would establish a program to require the Department of General Services in consultation with the Energy Commission to ensure that solar energy equipment for which the primary purpose is using solar energy for heat production be installed where feasible, as defined, no later than January 1, 2007. The bill requires such solar energy equipment to be installed where feasible as part of the construction of all state buildings and state parking facilities for which construction commences on or after January 1, 2003.

The bill would require any solar energy equipment installed pursuant to the new program to meet specified standards and requirements imposed by state and local permitting authorities, including certification by the Solar Rating Certification Corporation and other applicable safety and performance standards.

This bill would subject any solar energy equipment that is installed pursuant to the program to the California Solar Rights Act of 1978.

Ch. 562 (AB 2045) Matthews. Pharmacists: disciplinary actions.

Existing law, the Pharmacy Law, requires each pharmacy to designate a pharmacist-in-charge who is responsible for the pharmacy's compliance with all state and federal laws and regulations pertaining to the practice of pharmacy. The law makes a pharmacist subject to disciplinary action by the California State Board of Pharmacy for the commission of unprofessional conduct, which may include an act or omission that arises in the course of the pharmacist's practice or in his or her ownership, management, administration, or operation of a pharmacy or other entity licensed by the board.

This bill would require the board in a disciplinary action against a pharmacist-in-charge for the violation by another person of a state or federal law or regulation pertaining to the practice of pharmacy, to use a report made by the pharmacist-in-charge of the violation or suspected violation as a mitigating factor, if specified conditions are met.

Ch. 563 (AB 2274) Keeley. Off-highway vehicle recreation.

The existing Off-Highway Motor Vehicle Recreation Act of 1988 requires the Division of Off-Highway Motor Vehicle Recreation in the Department of Parks and Recreation to implement and administer the Off-Highway Motor Vehicle Recreation Program, which provides for opportunities for off-highway motor vehicle recreation at specified areas throughout the state.

The act requires the Secretary of the Resources Agency to prepare and submit an environmental review on the implementation of the act to the Assembly Committee on Natural Resources, the Senate Committee on Natural Resources and Wildlife, and the Committee on Appropriations of each house every 5 years, and requires the Legislature to appropriate from the Off-Highway Vehicle Trust Fund an amount equal to the cost of preparing that review.

This bill would delete those provisions, and would require that the Division of Off-Highway Motor Vehicle Recreation in the department, not later than January 1, 2005, prepare and submit to the Legislature a report that identifies the extent to which nonmotorized recreationists contribute fuel tax revenues to the Off-Highway Motor Vehicle Recreation Program.

The bill would prescribe changes in the groups and organizations from which nominees to the Off-Highway Motor Vehicle Recreation Commission may be appointed, and would revise some of the functions and duties of the division with respect to the implementation and administration of the act, as specified. The bill would require the division to comply with various new reporting requirements, and to assist in the designation of corridors for a California Statewide Motorized Trail.

The existing act authorizes the issuance of grants to cities, counties, and appropriate districts for the planning, acquisition, development, construction, maintenance, administration, operation, and conservation of trails, trailheads, areas, and other facilities for the use of off-highway motor vehicles, as provided.

This bill would make various changes with respect to the procedures for grant application and funding, and would also authorize the issuance of grants to educational institutions and nonprofit organizations for certain projects that are designed to sustain a managed off-highway motor vehicle recreation program.

The existing act requires that specified funds allocated to the Off-Highway Motor Vehicle Trust Fund from fuel tax revenues and required to be used by the division, or by cities,

counties, or appropriate districts, or by agencies of the United States, solely for activities on lands in the off-highway motor vehicle recreation system.

This bill would revise that requirement to, instead, require that 30% of those revenues be used for restoration, as defined, and 70% of those revenues be used for specified conservation and enforcement activities, and for the construction of physical barriers and other means of traffic control regulating the use of off-highway motor vehicles.

Existing law requires the Department of the California Highway Patrol to prepare a course of instruction in off-highway motor vehicle safety and operation and principles of environmental preservation, as provided.

This bill would require the division to adopt those courses by January 1, 2005, and to consult with the Department of the California Highway Patrol and other public and private agencies or organizations in connection with the preparation of those courses.

Existing law authorizes the use of specified funds collected from off-highway motor vehicle license fees for reconstructing and repairing damage caused by the use of off-highway motor vehicles on property where the operation of those vehicles is prohibited by federal, state, or local law.

This bill would repeal those provisions. The bill would also impose various new requirements relating to noise emissions from off-highway motor vehicles, as provided.

Existing law requires that 50% of the revenues from fines and forfeitures collected for violations of specified vehicle laws be deposited in the fund for expenditure for the purposes of the act.

This bill would, instead, require that all of those revenues from fines and forfeitures be deposited in the appropriate fund in the county where the violation occurred, and be used for enforcing laws related to the operation of off-highway motor vehicles.

#### Ch. 564 (AB 2320) Strickland. Ventura County Flood Control District.

Existing law, the Ventura County Flood Control Act, creates the Ventura County Flood Control District and describes its boundaries and territory.

This bill would change the name of the district to the Ventura County Watershed Protection District, and the name of that law to the Ventura County Watershed Protection Act.

#### Ch. 565 (AB 2401) Thomson. Public resources: state park land acquisition.

Existing law requires the Department of Parks and Recreation to hold a public hearing within the county in which a proposed state park project is located, prior to submitting any proposal for an appropriation for an acquisition of real property for the project, if the real property is more than \$500,000 in value. The department is required to submit a summary of the public comments at the public hearing and a summary of the comments by the city or county in which the real property is located to the Legislature at the time the appropriation of funds for the acquisition is proposed. Existing law imposes similar requirements for property that is not proposed to be acquired through a purchase agreement.

This bill would increase the threshold amount specified above to \$5,000,000. The bill would delete the reporting requirements specified above. The bill would require the department to provide written notice of its intent to acquire the real property to the city or county, or both, having jurisdiction over the property, as early as possible in the acquisition process, but not less than 90 days from the date of acquisition. The bill would authorize a member of the city council or board of supervisors, to request the department to hold a public hearing regarding the acquisition of the property, if the acquisition is between \$500,000 and \$5,000,000.

The bill would impose similar requirements for property that is not proposed to be acquired through a purchase agreement.

#### Ch. 566 (AB 2461) Keeley. Taxation: vehicle license fees: low-emission vehicles.

The Vehicle License Fee Law provides that the annual amount of the license fee for any vehicle is 2% of the market value of the vehicle, as specified. It provides for the determination of the market value of any vehicle, for reclassification to increase the market value of a vehicle, and for the exemption of certain vehicles from the imposition of the license fee.

Existing law, until January 1, 2003, for purposes of determining the vehicle license fee, exempts from the determination of market value the incremental costs, as defined, that are incurred with respect to a new light-duty motor vehicle propelled by an alternative fuel that is certified by the State Air Resources Board as producing emissions that meet, or are lower than, the emission standards and other specifications for ultra-low-emission vehicles, as defined by the board.

This bill would extend these provisions until January 1, 2009, and would make certain legislative findings and declarations regarding vehicle emissions.

This bill would take effect immediately as a tax levy.

#### Ch. 567 (SB 1269) Peace. Powerplant site and facility certification.

The existing Warren-Alquist State Energy Resources Conservation and Development Act requires the State Energy Resources Conservation and Development Commission to certify sufficient sites and related facilities that are required to provide a supply of electric power sufficient to accommodate projected demand for power statewide. Existing law authorizes the commission, after hearings, to amend the conditions of, or revoke the certification for, any facility for specified reasons and to administratively impose a civil penalty for specified violations of a certification of up to \$50,000 per violation, as prescribed.

Existing law establishes in state government the California Consumer Power and Conservation Financing Authority, with powers and responsibilities as prescribed, including the power to issue revenue bonds for the purpose of augmenting electric generating facilities and to ensure a sufficient and reliable supply of electricity, financing incentives for investment in cost-effective, energy-efficient appliances and energy demand reduction, achieving a specified energy capacity reserve level, providing financing for the retrofit of inefficient electric powerplants, renewable energy and conservation, and, where appropriate, developing strategies for the authority to facilitate a dependable supply of natural gas at reasonable prices to the public.

This bill would authorize the commission to administratively impose a civil penalty for specified violations of up to \$75,000, as prescribed.

This bill would require a project owner to commence construction of a project within 12 months after the project has been certified by the commission and all accompanying project permits are final and administrative and judicial appeals have been completed. The bill would require a project owner to submit construction and commercial operation milestones within 30 days after project certification. If that 30-day deadline is not met, the bill would require the commission to establish construction milestones for the project. The bill would specify that the failure of the project owner to meet construction or commercial operation milestones, without a finding of good cause, is cause for revocation of certification or the imposition of other penalties. The bill would require the commission to extend the start of construction by 24 months under certain circumstances.

This bill would require the commission to provide immediate notice to the authority if the project owner fails to commence construction, without good cause, within 12 months after the project has been certified and the project owner has not received an extension. The bill would require the authority to evaluate whether to pursue the project independently or in conjunction with any other public or private entity, including the original certificate holder. If the authority demonstrates to the commission that it is willing and able to construct the project, the bill would authorize the commission to revoke the original certification and issue a new certification for the project to the authority, unless the authority's statutory authorization to finance or approve new programs, enterprises, or projects has expired. The bill would require the commission, if it issues a new certification, to adopt new deadlines and

milestones for the project that allow the authority up to 24 months to start construction or to start to meet the applicable deadlines and milestones. The bill would specify that those provisions do not apply to specified qualifying small power production facilities or qualifying cogeneration facilities, as provided, any other generation units installed, operated, and maintained at a customer site exclusively to serve that facility's load, or specified licenses issued to local publicly owned electric utilities that make a specified certification.

The bill would authorize the commission and authority, in consultation with each other, to adopt emergency regulations for the purposes of the bill.

Ch. 568 (SB 1389) Bowen. Energy: planning and forecasting.

The planning and forecasting provisions of the existing Warren-Alquist State Energy Resources Conservation and Development Act require the State Energy Resources Conservation and Development Commission to prepare various reports. These reports include a draft and final electricity report based on reporting and forecasting required to be submitted by electric utilities, a report regarding emerging trends in energy availability and use, a report related to energy conservation, and a report regarding emerging trends in use, availability, and price of transportation fuels, among other things.

This bill would repeal the provisions of law requiring various reports, and instead require the commission to prepare an integrated energy policy report on or before November 1, 2003, and every 2 years thereafter, as specified. The bill would require the commission to conduct assessments and forecasts as often as necessary, but no less frequently than every 2 years. The bill would require the commission to conduct workshops and hearings for purposes of the report. The bill would additionally require the commission to include in the report a description of the international energy market prospects and an evaluation of its export promotion activities, along with other related items.

The bill would also require the commission to manage a data collection system for obtaining the information necessary to develop specified energy policy reports and analyses, and energy shortage contingency planning efforts, and to support other duties of the commission, as prescribed. The bill would authorize the commission to impose a civil penalty to ensure timely and accurate compliance with the data collection system. The bill would include certain requirements relating to the confidentiality of the data.

Ch. 569 (SB 1420) Johannessen. Vehicles: noise citations.

Existing law generally restricts the noise levels of vehicular exhaust systems on motor vehicles subject to registration. Existing law requires the Commissioner of the California Highway Patrol to adopt regulations providing that exhaust systems comply with statutory noise restrictions if they are installed on motor vehicles, other than motorcycles and new motor vehicles, with a gross vehicular weight of less than 6,000 pounds and emit no more than 95 dbA.

Existing law also requires the commissioner to adopt regulations providing for the licensing of stations to implement noise level standards.

This bill would require licensed smog check stations that offer referee functions to consumers to provide for the testing of vehicular exhaust systems only for those vehicles that have been issued a citation for the violation of specified exhaust system requirements. It would require these stations to issue certificates of compliance for vehicles when tests of their exhaust systems demonstrate that the systems emit no more than 95 dbA. It would eliminate the requirement that the commissioner adopt regulations on that subject.

The bill would further require a station to charge a fee, as specified, to be deposited in the Vehicle Inspection and Repair Fund, for issuing a certificate of compliance.

Existing law gives a court discretion to dismiss a prosecution for violating vehicular noise level restrictions if it finds that both of the following conditions existed: (1) the vehicle was equipped with an exhaust system meeting regulations adopted by the commissioner and (2) the defendant had reasonable grounds to believe that the exhaust system was in good

working order and that the vehicle was not operated in violation of applicable noise restrictions.

This bill would allow a court to dismiss a prosecution for violating vehicular noise level restrictions if it finds either that a certificate of compliance has been issued regarding the exhaust system, as specified, or if the defendant had reasonable grounds to believe that the exhaust system was in good working order and that the vehicle was not operated in violation of those restrictions.

Ch. 570 (SB 1534) Bowen. Solar energy systems.

Existing law provides that any covenant, restriction, or condition contained in any deed, contract, security instrument, or other instrument affecting real property, as specified, that prohibits or restricts the installation or use of a solar energy system is void and unenforceable. Existing law requires that solar collectors meet the standards and requirements imposed by state and local permitting authorities, and specifically requires, in this regard, certification by the Solar Rating Certification Corporation or other nationally recognized certification agencies. Existing law requires this certification to be for the entire solar energy system and installation.

This bill would additionally require that a solar energy system meet all applicable safety and performance standards established by the National Electrical Code and the Institute of Electrical and Electronics Engineers, among others, and applicable rules of the Public Utilities Commission.

Ch. 571 (SB 1645) Sher. Trapping animals.

(1) Under existing law, a person who takes fur-bearing mammals or nongame mammals by means of a trap, or who sells furs of those mammals, is required to obtain a trapping license from the Department of Fish and Game, except persons taking mammals injurious to growing crops or other property.

Existing law authorizes the taking, in accordance with the Fish and Game Code, of nongame mammals and black-tailed jackrabbits, muskrats, and red fox squirrels that are found to be injuring growing crops or other property. Existing law also authorizes the taking, in accordance with the Fish and Game Code, of fur-bearing mammals that are injuring property.

This bill would prohibit the sale of raw furs taken under those provisions and also would prohibit raw furs taken by persons providing trapping services for profit from being sold. The bill also would specify that persons taking the mammals described in the preceding paragraph are not required to procure a trapping license, except when providing trapping services for profit.

Because a violation of the trapping license requirement is a crime and a violation of the provisions against the sale of raw furs would be a crime under existing law, the bill would impose a state-mandated local program by expanding the definition of a crime and creating a crime.

(2) The bill would require additional persons to obtain trapping licenses, for which a fee is required. Because the fees are required by other provisions of law to be deposited in the Fish and Game Preservation Fund, a continuously appropriated fund, the bill would make an appropriation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 572 (SB 2053) Sher. Air toxics.

Existing law requires the State Air Resources Board to compile and maintain a list of toxic air pollutants, as specified.

This bill would require the state board to include on the list certain substances designated by the state board as toxic air contaminants pursuant to the federal Clean Air Act. The bill would make other technical changes.

Ch. 573 (SB 2090) Committee on Natural Resources and Wildlife. Public resources.

(1) Existing law provides that a sport fishing license is not required to take fish for any purpose other than profit by any means of angling from a public pier in the ocean waters of the state.

This bill would provide, instead, that a sport fishing license is not required to take fish by any legal means, for any purpose other than profit, from a public pier, as defined by the Fish and Game Commission, in the ocean waters of the state.

(2) Existing law requires the operator of any vessel landing fish in California that will be taken in the far offshore fishery to file a declaration with the department on forms prescribed by the department, prior to departure from any port in the United States for the purpose of taking fish in that fishery.

This bill would exempt from that requirement any commercial fisherman using only troll lines, as defined, or gear for angling, as defined, for the taking of albacore and no other fish.

(3) Existing law authorizes the Director of Fish and Game, after consultation with the National Oceanic and Atmospheric Administration and the Director of the Oregon Department of Fish and Wildlife, to open commercial king salmon fishing in ocean waters of this state, in times and areas as may be appropriate, to harvest the underutilized spring run king salmon stocks.

This bill would delete that authority.

(4) Existing law authorizes rock crab to be taken in traps in any waters of the state at any time, except in certain fish and game districts, subject to specified provisions relating to commercial fishing.

This bill, additionally, would make the taking of rock crab subject to regulation by the commission under certain provisions relating to marine life management.

Because a violation of the regulations of the commission is generally a misdemeanor, the bill would impose a state-mandated local program by creating a new crime.

(5) Existing law authorizes the taking of surfperch of the family Embiotocidae only between July 16th and April 30th, except shiner surfperch (*Cymatogaster aggregata*), which may be taken, sold, or purchased at any time. Surfperch may be sold or purchased only between July 16th and May 10th. South of a line drawn east and west through Point Arguello, barred surfperch, redbtail surfperch, and calico surfperch are prohibited from being taken for commercial purposes.

This bill would authorize the Fish and Game Commission to adopt, upon the recommendation of the director regarding management measures for surfperch of the family Embiotocidae, regulations to manage the commercial surfperch resource and fisheries, including the adoption of changes to the prohibitions described above, consistent with certain provisions of existing law relating to conservation and management of marine living resources.

(6) Existing law continuously appropriates money in the Fish and Game Preservation Fund to the Department of Fish and Game and to the commission to pay all necessary expenses incurred in carrying out the Fish and Game Code and to pay the compensation and expenses of the commissioners and employees of the commission.

By imposing new duties on the commission and the department, this bill would make an appropriation.

(7) The bill would make additional, clarifying changes in existing law relating to fish and game and to oil spills.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 574 (AB 2156) Kehoe. San Diego River Conservancy.

Existing law authorizes various conservancies to acquire, manage, direct the management of, and conserve public lands in the state.

This bill would, until January 1, 2010, establish the San Diego River Conservancy to acquire and direct the management of specified public lands in the San Diego River Area, as defined, and would prescribe the management, powers, and duties of the conservancy.

Ch. 575 (AB 498) Chan. Environmentally preferable purchasing.

Existing law regulates the purchase of recycled products by state agencies and the Legislature.

This bill would provide that the Department of General Services, in consultation with the California Environmental Protection Agency, members of the public, industry, and public health and environmental organizations, shall provide state agencies with information and assistance regarding environmentally preferable purchasing, as provided.

This bill would state the intent of the Legislature in enacting these provisions.

Ch. 576 (AB 1923) Dickerson. Highway exit information signs.

Existing law requires the Department of Transportation to allow the placement of information signs on highways in rural areas. The signs are required to be placed near freeway exits and to identify specific roadside businesses offering fuel, food, lodging, or camping services. Under existing law, the Department of Transportation is prohibited from approving placement of the signs in any urban area with a population of 5,000 or more.

This bill would prohibit the department from removing information signs placed before January 1, 2003, in any urban area where population growth results in a population of 5,000 or more but less than 10,000. The bill would also require the department to provide equal access to all business applicants.

Ch. 577 (AB 2165) Strom-Martin. Pharmacy.

Existing law, the Pharmacy Law, provides for the licensure and regulation of pharmacies, pharmacists, and other associated persons and entities by the California State Board of Pharmacy. Existing law establishes the Joint Legislative Sunset Review Committee and specifies its duties with respect to the review of various boards and commissions.

This bill would require the Joint Legislative Sunset Review Committee to review the state's shortage of pharmacists and make recommendations on a course of action to alleviate the shortage.

Ch. 578 (AB 2360) Dutra. Freeway service patrols.

Existing law, the Freeway Service Patrol Act, authorizes a freeway service patrol system managed by the Department of the California Highway Patrol, the Department of Transportation, and a regional or local entity to provide emergency roadside assistance on a freeway located in an urban area. Under that act, funding is provided upon annual appropriation from the State Highway Account in the State Transportation Fund.

This bill would specify that the funding for this purpose be made using a formula-based allocation. The bill would create the Competitive Freeway Service Patrol Grant Program to provide funding for a freeway service patrol system to reduce traffic congestion. The bill would require the Department of Transportation to develop specified guidelines for this program and would specify that the funding be provided by appropriation in the annual Budget Act from the State Highway Account. The bill would specify that its provisions

establishing the program would be operative only if this funding is appropriated in the annual Budget Act.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 579 (AB 2413) Committee on Governmental Organization. Department of Alcoholic Beverage Control.

The Alcoholic Beverage Control Act is administered by the Department of Alcoholic Beverage Control. Existing law requires the department to make an annual report to the Legislature on the department's activities, including information for the previous calendar year on the number and type of enforcement activities conducted by the department.

This bill would also require that report to include information on the number and type of enforcement activities conducted by local law enforcement agencies in conjunction with the department.

Under the Alcoholic Beverage Control Act, the Department of Alcoholic Beverage Control may issue a special on-sale general license to any nonprofit theater company that meets specified requirements. Existing law permits a licensed manufacturer, winegrower, manufacturer's agent, California winegrower's agent, rectifier, distiller, bottler, importer, or wholesaler, or any officer, director, employee, or agent of that person, to serve on the board of trustees of a nonprofit theater company operating a theater in Napa County licensed pursuant to these provisions.

This bill would also permit any of the above persons or entities to serve as an officer, director or employee of that theater company.

Ch. 580 (AB 2743) Lowenthal. Barbering and cosmetology apprenticeship.

Existing law requires the Bureau of Barbering and Cosmetology in the Department of Consumer Affairs to adopt regulations for the submittal of preapplications for admission to examination of students of approved cosmetology, electrology, or barbering school who have completed a specified percentage of the requirements.

This bill would also require the bureau to adopt regulations for the submittal of preapplications for admission to examination by a person licensed as an apprentice in barbering, cosmetology, skin care, or nail care who has completed 75% of apprenticeship requirements. The bill would authorize the bureau to require an additional fee for an apprenticeship preapplication.

Ch. 581 (AB 2967) Wright. Bureau for Private Postsecondary and Vocational Education.

(1) The existing Private Postsecondary and Vocational Education Reform Act of 1989 sets minimum standards of instructional quality, ethical and business practices, health and safety, and fiscal responsibility for private postsecondary and vocational educational institutions, as defined. The act establishes the Bureau for Private Postsecondary and Vocational Education in the Department of Consumer Affairs, which succeeded to the rights and functions of the former Council for Private Postsecondary and Vocational Education. The bureau, among other things, is required to review and investigate all institutions, programs, and courses of instruction approved under the act, which establishes administrative and judicial procedures for the bureau to follow in carrying out these duties. Existing provisions of the act require that, if action is brought against an institution, notice of the action must be served upon the institution, and if the institution requests a hearing, that the hearing be held within 10 days of the bureau receiving the request.

This bill would require that the hearing be held within 30 days of the bureau receiving the request. This bill would make additional technical and conforming changes to delete references to the former council.

(2) Existing law requires the bureau to assess sums from each institution, based upon the course tuition paid over the calendar year, according to a prescribed formula, for purposes

of the Student Tuition Recovery Fund. This assessment is calculated only for those students who are California residents and are eligible to be reimbursed from the fund. This assessment is not applicable if the institution receives all of its students' total charges from 3rd-party payers, as defined. Each institution is required to collect the amount assessed by the bureau in the form of a Student Tuition Recovery Fund fee from its new students, and remit those fees to the bureau in the quarter following their collection.

This bill would provide that the assessment be based upon the assessment rate in effect when the student enrolled at the institution. The bill would authorize an institution to waive collection of the Student Tuition Recovery Fund fee, and to assume the fee as a debt of the institution, which must be disclosed to the student in the enrollment agreement. The bill would provide that the fee shall be assessed as tuition is paid or loans are funded on behalf of the student, based upon academic term, and that the subsequent disenrollment at the institution shall not relieve the institution of the obligation to pay the fee to the bureau, nor be the basis for refund of the fee to the student. The bill would define a "new student" as a student who signs the enrollment agreement on or after January 1, 2002. The bill would declare that students signing enrollment agreements prior to that date shall be charged the Student Tuition Recovery Fund fee in effect on that date. The bill would declare these provisions to be declaratory of existing law.

(3) Existing law requires the bureau to investigate complaints from any person claiming damage as a result of any act or practice by a postsecondary or vocational educational institution or its agent, or both, that is a violation of the act and requires the bureau to adopt regulations that prescribe procedures for complaint handling and complaint disclosure. The bureau is required to report evidence of violations to the Attorney General and is authorized to commence an action to revoke an institution's approval to operate. The bureau is required to make an annual report to the Legislature summarizing its activities during the previous fiscal year.

This bill would require the bureau to include, in its annual report to the Legislature, a statistical summary of complaints filed with the bureau, the bureau's disposition of those complaints and the bureau's enforcement actions relative to those complaints.

(4) Under existing law, institutions may register with the bureau to offer intensive English language programs, short-term career training programs, short-term seminar training programs, programs offered to assist students to prepare for a licensure examination, and continuing education programs. To register, institutions must file a registration form, containing specified information, with the bureau for public disclosure. Continuing education programs are exempt from these registration requirements.

This bill would authorize the bureau to require that registered institutions, at least every 3 years following the initial registration, verify all or a portion of the information required to accompany a registration form. The bill would make additional technical and conforming changes.

#### Ch. 582 (SB 192) O'Connell. Education technology.

Existing law, establishes various programs to enhance technology education, including, but not limited to, the Digital High School Education Technology Grant Act of 1997, to provide all high school pupils with basic computer skills so as to, among other things, improve pupil achievement in all academic subjects. Existing federal law, the Enhancing Children Through Technology Act of 2001, provides funding to improve pupil academic achievement through the use of technology in elementary schools and secondary schools.

This bill would establish the Education Technology Grant Program of 2002 to provide technology education grants for schools serving pupils in grades 4 to 8, inclusive, consistent with that federal law.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 583 (SB 1333) Alpert. Claims against the state: appropriation.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law requires the Attorney General to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state.

This bill would appropriate \$1,360,702.74 from the General Fund to the Attorney General to pay judgments and settlement claims in accordance with a specified schedule.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 584 (SB 1463) Machado. Structural pest control.

Existing law authorizes the Structural Pest Control Board to regulate the practice of structural pest control operators in this state. Existing law, among other things, authorizes the board or a county agricultural commissioner to impose administrative fines or temporarily suspend a structural pest control licensee or registered company from working in a county.

This bill would also authorize the board or a county agricultural commissioner to require the licensee to attend and pass a board-approved course for specified violations. The bill would prohibit the board from renewing a licensee's license if the licensee did not attend and pass the required course.

Ch. 585 (SB 2012) Margett. Special education: interagency agreements.

Existing federal law, the Individuals with Disabilities Education Act, provides that a state is eligible for funding under that act if the state demonstrates to the satisfaction of the Secretary for Education that the state has in effect policies that assure that it meets certain conditions. The policies include, among others, that the state chief executive officer or his or her designee ensure that an interagency agreement or other mechanism for interagency coordination is in effect between each public agency that provides certain services and the state educational agency, that all certain services that are needed to ensure a free appropriate public education are provided, and that the interagency agreement meets certain conditions.

This bill would require the Governor or the designee of the Governor, in accordance with those requirements of federal law, to ensure that each agency under the Governor's jurisdiction enters into an interagency agreement with the Superintendent of Public Instruction that meets the requirements of federal law, and would prescribe related matters.

Under existing law, if a school district, special education local plan area, or county office of education does not make the placement decision of an individual with exceptional needs in a licensed children's institution or in a foster family home, the court, regional center for the developmentally disabled, or public agency, excluding an educational agency, is required to be responsible for the residential costs and the cost of noneducational services of the individual.

This bill would require that any public agency other than an educational agency that places a disabled child or a child suspected of being disabled in a facility out of state without the involvement of the school district, special education local plan area, or county office of education in which the parent or guardian resides, assume all financial responsibility for the child's residential placement, special education program, and related services in the other state unless the other state or its local agencies assume responsibility. To the extent that this bill imposes new duties on local agencies, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 586 (SB 2039) O'Connell. Charter schools.

Existing law established the Charter School Facility Grant Program, administered by the State Department of Education, for the purpose of providing assistance with facilities rent and lease costs for pupils in charter schools. Existing law makes a charter schoolsite physically located in the attendance area of a public elementary school in which 70% or more of pupil enrollment is eligible for free or reduced price meals eligible for funding under the program.

This bill would instead require, to be eligible for funding under the program, that a charter schoolsite physically located in the attendance area of a public elementary school in which 70% or more of pupil enrollment is eligible for free or reduced price meals give a preference in admissions to pupils who are currently enrolled in that public elementary school, and to pupils who reside in the elementary school attendance area where the charter school is located. The bill would also make a charter schoolsite at which 70% or more of the pupil enrollment at the schoolsite is eligible for free or reduced price meals eligible to receive funding under the grant program. The bill would require the State Department of Education to report to the Legislature no later than June 30, 2005, on the number of charter schools that have participated in the grant program under this expanded eligibility for funding and to provide recommendations and suggestions on improving the program.

The bill would, notwithstanding specified provisions, authorize a charter school with a schoolsite physically located in the attendance area of a public elementary school in which 50% or more of the pupil enrollment is eligible for free or reduced price meals to give a preference in admissions to pupils who are currently enrolled in that public elementary school, and to pupils who reside in the elementary school attendance area where the charter schoolsite is located.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 587 (AB 467) Strom-Martin. Integrated waste management: landfill closure program.

The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program.

This bill would establish the Landfill Closure Loan Program, to be implemented by the board, for the purpose of providing loans to operators of unlined, older-technology landfills, who are interested in early closure of their landfills. The bill would authorize the board to provide loans for this purpose and would require the board to give loan priority to operators of landfills that if closed, would create a potential threat to the public health, safety, or the environment.

The bill would authorize the board to expend funds from the Integrated Waste Management Fund in the State Treasury, upon appropriation by the Legislature, to make those loans and to administer the program. The bill would prescribe the terms of the loans and would specify requirements for applying for a loan.

The bill would require the board, the California Pollution Control Financing Authority, the Treasurer, and other state officers and agencies to coordinate activities that would finance the program and encourage joint activities that would protect public health and the environment.

The bill would make these provisions inoperative on July 1, 2012, and would repeal these provisions on January 1, 2013, unless a later enacted statute deletes or extends these dates.

Ch. 588 (AB 666) Dutra. Rail passenger capacity enhancement demonstration projects: coordinated environmental review process.

Existing law sets forth the responsibilities of the Department of Transportation with respect to rail passenger service.

This bill, until January 1, 2007, would establish a coordinated environmental review process for three rail passenger capacity enhancement demonstration projects on corridors

with intercity and commuter passenger and freight service. The bill would require the projects to be identified by the department and selected by the California Transportation Commission, in accordance with specified criteria, and would provide for the department to be designated as the consolidated permit agency. The bill would require the department to seek and invite participation by federal resources agencies. The bill would provide for the department to provide staff support for the demonstration projects to the extent funds are identified for this purpose. The bill would enact other related provisions.

Ch. 589 (AB 709) Wayne. Codisposal sites: cleanup.

The California Integrated Waste Management Act of 1989 requires the California Integrated Waste Management Board to initiate a program for the cleanup of solid waste disposal sites and for cleanup of solid waste at codisposal sites where no responsible party is available to pay for timely remediation, and where cleanup is needed to protect public health and safety or the environment. In developing and implementing the program, the board is required to consult with enforcement agencies and California regional water quality control boards.

This bill would require the board, in consultation with the State Water Resources Control Board and the Department of Toxic Substances Control, to develop, on or before June 30, 2003, protocols to be utilized by the board and the local enforcement agencies for site investigation and characterization of hazardous substances at burn dump sites, as defined.

The bill would require the board to use the protocols to investigate and characterize hazardous substances at a site whenever it receives an application for funding under the site cleanup program.

The bill would prescribe a protocol to be used by the board, the department, the State Water Resources Control Board, and the appropriate California regional water quality control board in determining which entity may provide remediation oversight on cleanup projects.

The bill would authorize the board to require the placement of environmental restrictions on any burn dump site property on which any solid waste or residual is left in place.

The bill would require the board to enter into an agreement, on or before March 30, 2003, with the department, relating to the funding of any activities of the department appropriately conducted pursuant to these provisions. The board's activities in compliance with these provisions would be funded with allocations from the Solid Waste Disposal Site Cleanup Trust Fund, a continuously appropriated fund in the State Treasury. Thus, the bill would make an appropriation by requiring additional payments to be made from that continuously appropriated fund.

Ch. 590 (AB 1886) Jackson. Vehicles: school zone fines.

Existing law, in the case of specified violations relating to rules of the road and driving under the influence, doubles the fine in the case of misdemeanors, and increases the fine, as specified, in the case of infractions, if the violation is committed by the driver of a vehicle within a highway construction or maintenance area during any time when traffic is regulated or restricted by the Department of Transportation or local authorities pursuant to existing law or is committed within a designated Safety Enhancement Double Fine Zone.

This bill would double or increase the fines as described above for a designated violation occurring in a specially posted school zone, as specified, in Alameda County, Santa Barbara County, Ventura County, or in any city in any of those counties where the program is adopted by a vote of the city council, or the county board of supervisors, as appropriate, and is established in collaboration with local school districts within those jurisdictions, if that county or city opts for the application of this law. This bill would require any city or county that adopts the program to promptly notify specified law enforcement agencies and would require the county treasurer to deposit the amount of the enhanced portion of the fine in a special account in the county treasury to be used exclusively to pay for the cost of school pedestrian-bicyclist safety programs administered as provided. The bill would also require

the California Highway Patrol to report to the Legislature on or before July 1, 2006, on the effectiveness of the pedestrian-bicyclist safety programs and whether the added fines improved traffic and pedestrian safety within participating school zones. This bill would state findings and declarations of the Legislature explaining the use of a special statute in lieu of a statute of general applicability. The bill would repeal these provisions on January 1, 2007.

By increasing the duties of the county treasurer if a city opts into the program, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 591 (AB 2356) Keeley. Solid waste: compost contamination.

Existing law provides that the Director of Pesticide Regulation shall endeavor to eliminate from use in the state any pesticide that endangers the agricultural or nonagricultural environment, is not beneficial for the purposes for which it is sold, or is misrepresented. Existing law specifies the circumstances under which the director may cancel the registration of, or refuse to register, a pesticide.

This bill would make findings and declarations regarding the potential threat to composting programs posed by the herbicide clopyralid. It would provide that no person, except a licensed pest control dealer, as specified, may sell a pesticide that contains the active ingredient clopyralid. The bill would further provide that pesticides containing this active ingredient that are labeled for use on lawn and turf may only be sold to qualified applicators, as specified. The bill would require the Department of Pesticide Regulation to make determinations regarding the residues in compost created by lawn and turf uses of clopyralid and to impose appropriate restrictions on those uses or cancel the uses that are likely to result in persistent residues in compost. Because a violation of these provisions would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 592 (AB 2436) Frommer. Land use restrictions: cleanup and abatement.

(1) Existing law requires the Department of Toxic Substances Control to notify the planning and building department of each city, county, or regional council of governments of certain land use restrictions imposed upon property designated as hazardous waste property or border zone property, sites listed for remedial or removal action, and remedial action land use controls. Existing law requires the planning department of those local agencies to file those restrictions and take specified actions and authorizes the city, county, or regional council to assess a fee to cover the costs of taking those actions. Existing law requires the department to maintain this list of land use restrictions in a specified manner and to make the list available electronically, as specified.

This bill would require the California Environmental Protection Agency (Cal-EPA), the California Integrated Waste Management Board, the State Water Resources Control Board, each California regional water quality control board, and the department to maintain a list of all instruments and agreements restricting land uses imposed by those agencies and would require the list to provide specified information. The bill would require each agency to update its list, as specified. The bill would require each agency to display the list on the agency's Web site and to make the list available to the public upon request.

The bill would require Cal-EPA to oversee the implementation of these requirements, including maintaining hyperlinks on its Web site to the individual lists, providing a search

function to search and retrieve information from each of the individual lists, and creating and posting a list of all instruments and agreements restricting land uses that would be imposed by the bill with regard to Environmental Restriction covenants, as specified in (3) below.

(2) The Porter-Cologne Water Quality Control Act prohibits the state and the regional boards from considering cleanup or site closure proposals from the primary or active responsible discharger, issuing a closure letter, or making a determination that no further action is required, with respect to a site subject to a cleanup or abatement order, unless all current record owners of fee title to the site of the proposed action have been notified, as specified.

This bill would additionally, if the state board or regional board finds the property is not suitable for unrestricted use and that a land use restriction is necessary for the protection of public health or safety or the environment, prohibit the state board or regional board from taking those actions with regard to a site that is not an underground storage tank site, unless a land use restriction is recorded or required to be recorded.

(3) Existing law provides for the recording of an instrument containing an Environmental Restriction covenant made by an owner of land or by the grantee of land to do or refrain from doing an act that is reasonably necessary to protect present or future human health or safety or the environment as a result of the presence on the land of hazardous materials.

This bill would authorize the office of the county recorder, if an instrument containing an Environmental Restriction covenant is recorded, to send a certified copy of the instrument to the Cal-EPA for posting on its Web site, for informational purposes only, pursuant to the requirements imposed by the bill, except as specified. The bill would provide the office of the county recorder and any of its employees immunity from any liability under any state law or in any action for damages if the office of the recorder does not send a certified copy of the instrument pursuant to the requirements of the bill.

The bill would authorize the office of the recorder to assess a reasonable fee, as determined by resolution of its governing body, to cover the costs of taking the action authorized by the bill.

Ch. 593 (AB 2701) Wyman. Sales and use taxes: exclusions: Indian taxes.

The Sales and Use Tax Law imposes a state sales and use tax on the gross receipts from the sale of tangible personal property sold at retail in this state, or on the sales price of tangible personal property purchased from a retailer for the storage, use, or other consumption of that property in this state by the purchaser.

This bill would provide, for purposes of that law, that the terms "sales price" and "gross receipts" do not include taxes imposed by an Indian tribe measured by a percentage of the sales price or purchase price of tangible personal property. This bill would provide that this exclusion from the terms "sale price" and "gross receipts" would only apply to an Indian tribe that is in substantial compliance with the Sales and Use Tax Law.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemption from state sales and use taxes enacted by the Legislature are incorporated into the local taxes. Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 594 (AB 2783) Strom-Martin. Fish and game: endangered species: income tax contributions: steelhead trout reports.

(1) Existing law requires any person taking steelhead trout in inland waters to have in his or her possession a steelhead trout catch report-restoration card issued by the Department of Fish and Game. Existing law requires cardholders to record certain information on the card relative to fishing whenever the cardholder finishes fishing for the day, moves to another river or stream, or retains steelhead trout. Existing law requires the commission to adopt regulations requiring a voluntary return of the cards to the department.

This bill would require that information to be recorded immediately upon finishing fishing, moving to another river or stream, or retaining steelhead trout.

The bill would require the cardholder to return the card to the department on a schedule or date established by the department. The bill would require the regulations adopted by the department to make return of the cards to the department mandatory. Because a violation of these requirements would be a misdemeanor under existing law, the bill would establish a state-mandated local program by creating new crimes.

The bill would make these provisions inoperative on July 1, 2007, and would repeal them as of January 1, 2008.

(2) Existing law restricts the use of the revenue from the fees for the cards, until July 1, 2002, to monitoring, restoring, and enhancing steelhead trout resources, and to administering the catch report-restoration card program.

This bill would extend the restriction on the use of the revenues for those purposes until July 1, 2007.

(3) Existing law relating to the administration of income tax laws allowed individual taxpayers, until January 1, 2002, to contribute amounts in excess of their tax liability to the Endangered and Rare Fish, Wildlife, and Plant Species Conservation and Enhancement Account in the Fish and Game Preservation Fund. All moneys contributed to the fund pursuant to these provisions were continuously appropriated to the Department of Fish and Game for specified purposes, and were subject to review by the budget committees of the Legislature.

This bill would reinstate those endangered and rare fish, wildlife, and plant species contribution provisions, and would extend their operation until January 1, 2008. This bill would also require that all moneys contributed to the account pursuant to these provisions, upon appropriation by the Legislature, be allocated to the Franchise Tax Board and the Controller for the costs of collection and administration of the funds, and to the Department of Fish and Game for specified purposes.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 595 (AB 2891) Koretz. Santa Monica Mountains Conservancy.

(1) The Santa Monica Mountains Conservancy Act establishes the Santa Monica Mountains Conservancy within the Resources Agency, and prescribes its functions with respect to the Santa Monica Mountains Zone, as specified. Existing law provides that nothing in the act supersedes or limits a local government's exercise of its police powers, as specified.

This bill would provide that the act does not authorize the conservancy to regulate private property.

(2) Existing law specifies conditions of use that apply to property owned or subject to the interim management of the conservancy. Those conditions include authorizing property to be closed to public use only when fire, mudslide, landslide, or flood dangers pose a substantial risk of injury or loss of life and requiring property to be reopened as soon as those conditions no longer pose a danger of injury or loss of life.

This bill would modify the conditions of use that apply to property owned or subject to the management of the conservancy. This bill would authorize property to be closed when

a federal, state, or local disaster or emergency declaration has been made by an authorized person or public agency, or where there is an emergency or potential emergency situation of a temporary nature that involves substantial risk or potential risk to life or property, and the temporary closure or restriction of access is necessary to protect the public health or safety. The bill would require property to be reopened when a federal, state, or local disaster or emergency declaration is no longer in effect, or where there is no longer an emergency or potential emergency situation of a temporary nature that involves substantial risk or potential risk to life or property.

(3) Existing law requires vehicles to park only in designated areas on conservancy property and prohibits vehicles from being operated off of roads. Existing law requires trails, campsites, and other public use areas on property owned or subject to the interim management of the conservancy to be designated and posted with prohibited activities and use restrictions clearly indicated.

This bill would require all vehicle use, including bicycles, to conform to posted laws. This bill would specify prohibited activities and use restrictions to be posted on public use areas owned or subject to the management of the conservancy. The bill would authorize the conservancy to exercise its discretion in determining whether to authorize any license, permit for special use, easement, project, or activity to be undertaken by the conservancy or its agents for the use of conservancy owned or managed land if that authorization is consistent with specified purposes, and certain requirements governing the lease of conservancy lands.

(4) Existing law prohibits the dumping of any refuse matter, except by permit, on property owned or managed by the conservancy, and posted against that dumping. Existing law prohibits injuring, defacing, or destroying any property owned or managed by the conservancy. Existing law prohibits the violation of the posted conditions of use of property owned or managed by the conservancy. Existing law makes the dumping of refuse matter, the injuring, defacing, or destroying of property, or the violation of posted conditions of use of property owned by the conservancy, a misdemeanor punishable by a fine of not more than \$500 or imprisonment or both that fine and imprisonment. Existing law authorizes the reduction of the charged offense of violating posted conditions from a misdemeanor to an infraction punished by a fine of not less than \$5 and not more than \$500.

This bill would make the dumping of refuse matter, the injuring, defacing, or destroying of property, or a violation of the posted conditions of use of conservancy property, a misdemeanor punishable by a fine of not more than \$1,000 or imprisonment or both that fine and imprisonment. If the charged offense of violating posted conditions is reduced from a misdemeanor to an infraction, this bill would make the minimum fine \$100.

Ch. 596 (AB 2993) Firebaugh. Urban wildland interface communities: prefire activities.

Existing law requires the State Board of Forestry and Fire Protection to make and enforce regulations that are necessary and proper for the organization, maintenance, government, and direction of the fire protective system for the prevention and suppression of forest fires. Existing law also requires supervising forest officers, under the direction of the Director of Forestry and Fire Protection, to have charge of the firefighting system.

This bill would require the director to establish a working group consisting of representatives of state or local government, or both, representatives of industries and environmental groups with experience in state forestry and fire suppression policy, and representatives with experience in state forestry and fire suppression policy from sectors of the public that are not otherwise represented in the working group. The bill would require the working group to identify potential incentives for landowners to implement prefire activities in state responsibility areas and urban wildland interface communities, as defined, and to identify all federal, state, or local programs, private programs, or any other programs requiring a cost share that involves prefire activities, as defined.

The bill would require the department to report the findings of the working group to the Legislature on or before January 1, 2004, and would require the department to include in that report any recommendations identified by the working group to provide potential incentives for consideration by the Legislature.

Ch. 597 (SB 1372) Machado. State Water Resources Control Board: agricultural drainage: solar evaporators.

(1) Under the Agricultural Water Conservation and Management Act, water suppliers, as defined, individually, or in cooperation with other public agencies or persons, may institute a water conservation or efficient water management program consisting of farm and agricultural related components. Existing law, the Toxic Pits Cleanup Act of 1984, prohibits a person from discharging liquid hazardous wastes into a surface impoundment if the surface impoundment, or the land immediately beneath the impoundment, contains hazardous wastes and is within  $\frac{1}{2}$  mile upgradient from a potential source of drinking water.

This bill would require the State Water Resources Control Board to adopt, on or before April 1, 2003, emergency regulations that establish minimum requirements for the design, construction, operation, and closure of solar evaporators, as defined. The bill would require any person who intends to operate a solar evaporator to file a notice of intent with the regional water quality control board. The bill would specify a procedure for the issuance of a notice of authority by the regional board to operate a solar evaporator, including requiring the regional board to inspect the solar evaporator prior to authorizing the operation of the solar evaporator. The bill would prohibit a regional board from issuing a notice of authority to operate a solar evaporator on and after January 1, 2008.

The bill would require any person operating a solar evaporator to submit annually, according to a schedule established by the regional board, groundwater monitoring data and other information deemed necessary by the regional board. The bill would require the regional board to inspect any solar evaporator at least once every 5 years to ensure continued compliance with the provisions of the bill.

The bill would exempt any solar evaporator operating under a valid written notice of authority to operate issued by the regional board, including any facility that the regional board determines is in compliance with the requirements of the bill, from the provisions of the toxic pits act and other specified waste discharge requirements imposed under the Porter-Cologne Water Quality Control Act.

Because the provisions added by the bill would be located within the hazardous waste control laws and a violation of those laws is a crime, the bill would impose a state-mandated local program by creating new crimes regarding the operation of solar evaporators.

(2) Existing law, the toxic pits act, requires the state board to impose a fee upon any person discharging any liquid hazardous waste or hazardous waste containing free liquids into a surface impoundment. The state board is required to collect and deposit the fees in the Surface Impoundment Assessment Account in the General Fund. The money within that account is available, upon appropriation, to the state board and the regional boards for purposes of administering the toxic pits act.

This bill would additionally authorize the board to expend the fees deposited in the account for the purpose of administering the surface impoundments that would be exempted from the toxic pits act by the bill, thereby imposing a tax for purposes of Article XIII A of the California Constitution.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 598 (SB 1381) Kuehl. Santa Monica Bay Restoration Commission.

Existing law creates the Santa Monica Bay Restoration Project within the State Water Resources Control Board, as an informational forum, planning body, and grant-making agency, to assess the biological condition and state of Santa Monica Bay, as provided.

This bill would recast those provisions to eliminate references to the project and instead establish, within the state board, the Santa Monica Bay Restoration Commission, which would assume the functions of the project.

The bill would require the Secretary for Environmental Protection, the Secretary of the Resources Agency, and the Chair of the Bay Watershed Council of the Santa Monica Bay Restoration Commission to enter into a memorandum of understanding that ensures the coordination of state programs affecting Santa Monica Bay, and that delineates the authority of the commission, and its governance structure with respect to the implementation of those programs. The bill would specify the authority of the commission related to the protection, restoration, and enhancement of Santa Monica Bay and its watershed. The bill would establish the Santa Monica Bay Restoration Account in the State Treasury, and would authorize the expenditure of moneys in the account, upon appropriation by the Legislature, to support the activities of the commission. This bill would provide for the transfer of the balance of any funds appropriated to the Santa Monica Bay Restoration Project by the Legislature, prior to January 1, 2003, to the account for expenditure as specified.

Ch. 599 (SB 1573) Karnette. Interagency Aquatic Invasive Species Council.

(1) Existing law governs aquatic nuisance species.

This bill would establish the Interagency Aquatic Invasive Species Council, consisting of representatives of the Department of Food and Agriculture, the Department of Boating and Waterways, the Department of Parks and Recreation, the Department of Water Resources, the State Water Resources Control Board, the California Coastal Commission, the State Coastal Conservancy, the University of California, and the State Lands Commission. The bill also would authorize the Governor to appoint to the council persons representing certain interest groups, which groups would be required to have expertise in aquatic invasive species, as defined. The bill also would authorize members of the council to invite representatives of federal agencies and tribal groups to join the council as members. The Director of Fish and Game would serve as the chairperson of the council.

The bill would require the Department of Fish and Game, in cooperation with the council, and using existing funds and current personnel of the Department of Fish and Game, to support and coordinate the development of a comprehensive plan for dealing with aquatic invasive species in California. The bill would require the council to submit its first working version of the plan to the Legislature on or before January 1, 2004.

The bill would provide that no provision of the bill would apply to the University of California, unless the Regents of the University of California, by appropriate resolution, make it applicable.

(2) Existing law continuously appropriates money in the Fish and Game Preservation Fund to the Department of Fish and Game and the Fish and Game Commission to carry out the Fish and Game Code.

By requiring this program to be funded through existing funds and current personnel of the department, thus imposing new duties on the department, the bill would make an appropriation.

Ch. 600 (SB 1777) Sher. Salmon and steelhead trout conservation and restoration.

Existing law sets forth a process that governs the expenditure of any funds received by the state from the federal government for the purposes of salmon and steelhead trout conservation and restoration and the expenditure of funds authorized for the Coastal Watershed Salmon Habitat Program.

This bill would also make that process applicable to the expenditure of funds appropriated to the Department of Fish and Game for salmon and steelhead trout conservation and

restoration from the California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Fund.

Existing law requires the department to grant funds from the Salmon and Steelhead Trout Restoration Account in the Resources Trust Fund for designated projects. Existing law requires the Director of Fish and Game to appoint a citizen's advisory committee to give advice on the grant program. Existing law prescribes the membership and duties of the committee.

This bill would prohibit an advisory committee member from participating in reviewing or making recommendations on certain grant applications if the advisory committee member, or a member of his or her immediate family, is employed by a grant applicant, the employer of a grant applicant, or a consultant or independent contractor employed by a grant applicant.

Existing law requires a certain percentage of the money in the Salmon and Steelhead Trout Restoration Account to be allocated for prescribed uses.

This bill would include within the prescribed uses monitoring projects related to anadromous fish, certain artificial propagation programs designed to restore depleted stocks of salmonids, and the acquisition and installation of fish screens to protect juvenile and adult salmon and steelhead trout from entrapment in water diversions.

Ch. 601 (SB 1790) Bowen. Energy resources.

(1) Existing law establishes the State Energy Conservation Assistance Account to carry out the provisions of the Energy Conservation Assistance Act of 1979. Existing law provides that it is the intent of the Legislature that the account be administered by the State Energy Resources Conservation and Development Commission to provide grants and loans to local governments and public institutions to maximize energy use savings through technical assistance, demonstrations, and identification and implementation of cost-effective energy efficiency measures and programs.

This bill would amend related legislative findings and declarations and would state the intent of the Legislature that the energy efficiency measures and programs for which grants and loans may be provided are for existing and planned buildings and facilities. This bill would make conforming changes to various definitions under the act.

(2) Existing law defines "technical assistance program" for the purposes of the act, as specified assistance to schools, hospitals, local government, and public care institutions.

This bill would include in that definition specialized studies related to energy and cost savings likely to be realized as a result of new construction activities, and the development and evaluation of alternative project implementation and proposals.

(3) Existing law requires the commission to approve only those applications for projects that will recover costs through savings in the cost of energy to the institution during repayment.

This bill would require the commission to prescribe the manner in which the savings would be calculated.

Existing law further requires the commission to give priority to projects that, based on anticipated savings in the cost of energy, will most quickly recover the cost of the allocation.

This bill would delete that provision.

(4) Existing law requires each eligible institution to which an allocation has been made to repay the principal amount of the allocation, plus interest, in not more than 22 equal semiannual payments.

This bill would instead require the institution to repay the amount in not more than 30 payments.

The bill would additionally prohibit the repayment period from exceeding the life of the equipment or lease term of the relevant building.

(5) Existing law authorizes the commission to contract and provide grants for specified services to be performed for eligible institutions. Existing law provides that the amount

expended for those services may not exceed 10% of the annual appropriation from the account.

This bill would instead provide that the amount may not exceed 10% of the balance of the account on July 1 of each year.

Existing law authorizes the commission to charge a fee for services provided to institutions and local jurisdictions, provided that the funds used for the payment of services has been made available as a result of the realization of savings in energy costs. Existing law further provides that, if anticipated savings do not result from the project, the repayment of fees shall be forgiven.

This bill would delete those restrictions.

(6) Existing law authorizes the commission to borrow money from, sell loans to, or enter into loan agreements or other contracts with, the California Economic Development Financing Authority and the California Infrastructure and Economic Development Bank, for specified purposes.

This bill would include the California Consumer Power and Conservation Financing Authority among those entities.

(7) Existing law authorizes the commission to make loans to local jurisdictions for energy project assistance. Existing law provides that the loans may not exceed \$1,000,000 for any one local jurisdiction and provides that the loan may not exceed 75% of the project costs.

This bill would delete the above provision and instead provide that the loan may not exceed \$5,000,000.

(8) Existing law provides that loans to local jurisdictions be evaluated according to specified factors.

This bill would delete certain of these factors.

(9) Existing law authorizes the commission to make loans to local governments owning, or leasing from entities other than privately owned electrical utilities, street lighting systems for conversion of such systems from incandescent or mercury vapor lighting to sodium vapor lighting or another lighting system of equivalent energy efficiency, if the conversion results in comparable illumination.

This bill would repeal that provision.

(10) Existing law provides that financial assistance provided to local jurisdictions for staff training and support services, as specified, may not exceed 75% of the cost of carrying out the activity, except as specified.

This bill would repeal that provision.

The bill would additionally delete various obsolete provisions of law.

(11) Existing law provides for regulation of electrical corporations by the Public Utilities Commission.

This bill would require the Public Utilities Commission, in consultation with the State Energy Resources Conservation and Development Commission, to develop a program for residential and commercial customer air-conditioning load control, as an element of each electrical corporation's tariffed service offerings paid for with electric rates. The bill would provide that the goal of the program is to contribute to the adequacy of electricity supply and to help customers reduce their electric bills in a cost-effective manner.

Because a violation of a rule or order of the Public Utilities Commission is a crime under existing provisions of law, the bill would impose a state-mandated local program by creating a new crime.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 602 (SB 1927) Soto. Omnitrans: bus fueling stations.

(1) Existing law imposes various requirements on transit operators.

This bill would require the Omnitrans Joint Powers Authority to contract with an independent third party to prepare and submit to the Legislature and the Governor a report on the environmental and public health impacts of transit bus fueling stations located within its jurisdiction that are owned or operated by the authority. The bill would require the authority to hold at least one noticed public hearing in the vicinity of each bus fueling station for the purposes of soliciting input from persons who may be affected by those impacts, and to consult with the South Coast Air Quality Management District and other appropriate federal, state, local agencies, and community groups representing residents of the affected areas, in conducting the assessment. The bill would require the Omnitrans Joint Powers Authority to solely use state transit funds allocated to it or its member agencies pursuant to the State Transportation Assistance Program in order to comply with these provisions.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new program or higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

Ch. 603 (SB 1938) Machado. Groundwater management: state funding.

Existing law authorizes a local agency to prepare and implement a groundwater management plan. Existing law establishes the Local Groundwater Assistance Fund and provides that, upon appropriation by the Legislature, money in the fund may be used by the Department of Water Resources to assist local public agencies by awarding grants to those agencies to conduct groundwater studies or to carry out groundwater monitoring and management activities.

This bill would require a local agency that elects to develop a groundwater management plan to make available to the public a written statement describing the manner in which interested parties would be allowed to participate in the development of that plan. The bill would require a local agency, for the purposes of qualifying as a groundwater management plan under certain provisions of law, or, with certain exceptions, for the purposes of receiving state funds administered by the department for the construction of groundwater projects or groundwater quality projects, to prepare and implement a plan that includes certain basin management objectives and components, and to adopt certain monitoring protocols. The bill would require the local agency to submit a copy of the plan to the department, in an electronic format, if practicable, approved by the department, and the department would be required to make copies available to the public. The bill would provide, that upon appropriation by the Legislature, money in the Local Groundwater Assistance Fund may be used by the department to assist local public agencies in the development of groundwater management plans.

Ch. 604 (SB 1949) Soto. Public participation.

Under existing law, the State Water Resources Control Board has duties relating to the administration of water rights. Under existing law, the board and the California regional water quality control boards are among the principal state agencies that regulate water quality.

This bill would require the state board to undertake a review of the regional boards' public participation procedures. Upon completion of this review, the state board would be required to report to the Legislature regarding its findings and include recommendations to improve regional board public participation processes. The bill would also require the state board to provide training to regional board members to improve public participation procedures, if funding is provided for that purpose.

Ch. 605 (AB 74) Washington. Interception of communication.

Existing law makes it unlawful to possess, acquire, retain, produce, develop, manufacture, transfer, use, or threaten to use weapons of mass destruction, or to possess restricted biological agents, as specified. Existing law also makes unlawful the possession of destructive devices, as specified, and various types of conduct relating to those devices. Under existing law, courts can permit the interception of certain wire or electronic communications if an application authorized by a specified senior prosecutor shows, among other things, probable cause to believe that the subject of the intercepted communications had committed, or was going to commit, one of a list of enumerated offenses. These offenses include large quantity drug crimes, murder, solicitation to murder, bombing of property, felony gang participation, or a conspiracy to do any of these.

This bill would add to those prosecutors who can authorize an application for an order to intercept communications the person designated to act as district attorney in the district attorney's absence. It would also add to those enumerated offenses that permit a court to order the interception of wire or electronic communications the provisions relating to weapons of mass destruction and destructive devices, as well as large quantity drug precursor cases. This bill would also authorize an interception of communications for attempts to commit any of the enumerated offenses.

Under existing law, an application for an order to intercept communications must include certain information, and there is no provision for an applicant to modify an existing order except by a full application for a new order.

This bill would explicitly authorize an application to modify an existing order when there is probable cause to believe that the person or persons identified in the original order have commenced to use a facility or device that is not subject to the original order. It would specify the contents of an application to modify an order in this way.

Under existing law, only electronic digital pagers are subject to interception orders, as provided.

This bill would subject all electronic pagers to these interception orders.

Under existing statutory law, only a presiding judge of the superior court, or one other judge designated by the presiding judge, may hear an application for an order to intercept communications. An appellate court upheld an order by a 2nd alternate judge, designated by the presiding judge to hear applications when the first designee was unavailable.

This bill would explicitly permit an application for a wire interception order to be heard by the presiding judge, one other judge designated by the presiding judge, or the first available judge in a succession that could be designated by the presiding judge. The bill would also authorize the Judicial Council to establish guidelines for judges to follow when hearing applications for these orders.

Under existing law, an application for an order to intercept communications must include a complete statement of all previous similar applications known to the parties involved in the application concerning the targets of the interception, and the actions taken on those prior applications. Under existing law, the California Attorney General is required to collect from local agencies and report annually on statewide statistical information concerning the results of this wire interception authority.

This bill would provide that an order to intercept communications must require a specified report to the Attorney General not less than 10 days after the order was issued. This bill would provide that the applicant's duty to disclose prior related applications is satisfied if the application includes the results of inquiries to the California Attorney General and the United States Department of Justice concerning prior applications. This bill would require the California Attorney General to provide information known from his or her reporting requirement in response to an inquiry of this type, and would specify additional statistical information which must be provided to the Attorney General and reflected in the Attorney General's annual report.

Under existing law, the party receiving an order permitting the interception of communications must report to the issuing judge on progress toward the authorized objective of the order, and the need for continued interception. If a judge finds no progress without sufficient explanation, or no need for continued interception, he or she must order immediate termination of the interception. Under existing law, the reports must be made at least every 72 hours.

This bill would change that requirement to at least every 6 days.

Under existing law, a transcript of communications intercepted under an order must be provided to all parties at least 10 days before any proceeding in which the communication or any evidence derived from it is to be received in evidence. This 10-day requirement can be waived by a court if compliance is not possible, and the defendant will not be prejudiced by the delay.

This bill would require the prosecution to notify a defendant that he or she has been identified as the result of an interception of communication before a plea of guilty or nolo contendere, or at least 10 days prior to specified proceedings. It would require the prosecution to provide to the defendant all recorded interceptions from which evidence against the defendant was derived, as well as other specified materials not already specified in this law, not less than 10 days before any trial, hearing, or proceeding in which the contents of an interception, or evidence derived from the interception is to be introduced. It would permit a court to limit the required disclosures described in this paragraph on a showing of good cause.

Under existing law, if a lawful interception of communication yields evidence of a crime other than that for which the order was granted, that evidence may be used and disclosed for proper law enforcement and prosecution purposes if it concerns one of the other offenses for which a court can order an interception of communications. However, if an authorized interception of communications yields evidence of crime other than those crimes for which a court may authorize an interception, then that evidence may only be used or disclosed to prevent the commission of a crime.

This bill would additionally allow evidence of any of the crimes commonly called "violent felonies" to be disclosed to other prosecutors and law enforcement officers, and to be used to the extent appropriate for official law enforcement and prosecution duties, when lawfully intercepted pursuant to court order.

Existing law specifies obligations for parties applying for and carrying out orders to intercept communications, and makes a violation of these provisions a misdemeanor or felony. The law that authorizes the interception of communications is set to be repealed by its own terms on January 1, 2003.

This bill would delay the repeal of the provisions authorizing interceptions of communications to January 1, 2008.

By extending the duration of a law creating crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would become operative only if SB 1391 also is enacted and becomes effective.

Ch. 606 (AB 1838) Hertzberg. Weapons of mass destruction.

Existing law, as amended by initiative statute, specifies those acts that constitute first degree murder. The initiative statute provides that any amendment of its provisions by the Legislature shall require a  $\frac{2}{3}$  vote of the membership of each house.

This bill would add to those acts, murder perpetrated by means of a weapon of mass destruction.

By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

Existing law provides for a list of crimes called “serious felonies” and “violent felonies.” Existing law provides specified enhancements to the punishments of certain repeat, state prison bound offenders with prior violent or serious felony convictions. Existing law provides for the possibility of a reduction of time served on a sentence for work performance, but limits the sentence reduction available to 15%, rather than the usual 50% for prison, or 33% for county jail, if a defendant is committed on charges that include one or more violent or serious felonies. Proposition 21, in initiative statute, provides that any amendment of these provisions by the Legislature shall require a  $\frac{2}{3}$  vote of the membership of each house.

This bill would add to the list of violent felonies specified offenses perpetrated by means of a weapon of mass destruction, as specified.

This bill would also add to the list of serious felonies specified violations perpetrated with weapons of mass destruction, as defined, and any conspiracy to commit any serious felony.

Existing law defines “weapon of mass destruction.” Existing law also provides that, absent lawful authority, the possession, development, manufacture, production, transfer, acquisition, or retention of any weapon of mass destruction is a felony.

This bill would expand that definition to include restricted biological agents, and an aircraft, vessel, or vehicle that is used as a destructive weapon. This bill would also define “used as a destructive weapon” for purposes of those provisions.

By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

Existing law provides that, absent lawful authority, the possession, development, manufacture, production, transfer, acquisition, or retention of any weapon of mass destruction is a felony.

This bill would, in addition, provide that a person who employs, as specified, a weapon of mass destruction in a form that may cause widespread great bodily injury or death and causes the death of any human being would be punishable by imprisonment in the state prison for life without the possibility of parole.

By creating a new crime, this bill would impose a state-mandated local program.

This bill would increase the penalty for related crimes.

Existing law provides that a threat, as specified, to use a weapon of mass destruction is a crime.

This bill would, in addition, provide that giving, mailing, sending, or causing to be sent a false or facsimile weapon of mass destruction, as specified, would be a misdemeanor. It would further provide that if the prohibited conduct causes another person to be placed in sustained fear, as defined, the conduct would be punishable by imprisonment in a county jail not exceeding one year, or imprisonment in the state prison for 16 months or 2 or 3 years and a fine not exceeding \$250,000.

By creating a new crime, this bill would impose a state-mandated local program.

The bill would make related changes.

Because this bill would amend initiative statutes, it would require a  $\frac{2}{3}$  vote of the membership of each house of the Legislature for enactment by the Legislature under the terms of the initiative statutes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 607 (SB 489) Romero. Hazardous waste of concern: handling: transportation.

(1) Under existing law, it is unlawful for any person to carry on, or engage in, the transportation of hazardous waste unless the person holds a valid registration issued by the Department of Toxic Substances Control. Existing law provides that a person who holds a valid registration issued by the department is a registered hazardous waste transporter. Existing law requires any person generating hazardous waste that is transported, or submitted for transportation, for offsite handling, treatment, storage, disposal, or any combination thereof, to complete a manifest prior to the time the waste is transported or offered for transportation and to submit the manifest to the department. Existing law requires any application to use and operate a hazardous waste facility to include a specified disclosure statement, but exempts from this requirement a person operating pursuant to a permit-by-rule, conditional authorization, or conditional exemption.

A violation of the laws regulating hazardous waste is a crime.

This bill would require the department, by July 1, 2003, to adopt a list of hazardous wastes of concern, including the minimum quantities for those hazardous wastes that are required to be reported when missing, which would include hazardous waste that the department determines requires special handling restrictions and requirements as specified, based on its potential to harm the public in a terrorist or other criminal act.

The bill would require the department to develop the list of hazardous wastes of concern, and the reportable quantities for those hazardous wastes, in consultation with other affected local, state, and federal agencies that have technical expertise on the storage, transportation, and potential hazards of those hazardous wastes.

The bill would require any person handling any hazardous waste of concern on and after July 1, 2003, to comply with various requirements, including requiring a hazardous waste transporter or the owner or operator of a hazardous waste facility who discovers that a reportable amount of hazardous waste of concern is missing during transportation or storage to immediately, as specified, provide a verbal notification to the department, to later report the discrepancy to the department in writing, and to comply with specified manifest discrepancy reporting requirements. The bill would require the department to determine, within 24 hours after receiving notice of a missing hazardous waste of concern, whether there is a potential risk to public safety and to notify the Department of the California Highway Patrol and the Office of Emergency Services if the department determines that the missing hazardous waste of concern reported presents a significant potential risk to public safety from its use in a terrorist or other criminal act. The bill would authorize the Department of the California Highway Patrol to enter and investigate a hazardous waste facility, upon the department's request, for an investigation regarding missing hazardous waste.

The bill would require any person applying for a hazardous waste facilities permit or other grant of authorization to use and operate a hazardous waste facility that would handle hazardous waste of concern, or a person applying for registration as a hazardous waste transporter, on and after January 1, 2004, who would transport that waste, to submit a disclosure statement to the department, except as specified. The bill would also require any person owning or operating a hazardous waste facility that handles a hazardous waste of concern to submit a disclosure statement to the department by January 1, 2004, and would require any registered hazardous waste transportation to submit such a disclosure form upon the request of the department. The department would be required to conduct a background check, as defined, on or before 180 days after receiving a disclosure statement.

The bill would require the department to adopt emergency regulations, prior to July 1, 2003, to implement the bill's requirements and would require that the regulations be filed with, but not be repealed by, the Office of Administrative Law and remain in effect until revised by the department. The bill would require the regulations to be consistent with the federal Hazardous Materials Transportation Authorization Act of 1994, except as specified.

Since a violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program.

(2) Existing law requires any application to use and operate a hazardous waste facility to include a specified disclosure statement and requires certain persons listed on the disclosure statement to submit properly completed fingerprint cards to the department.

This bill would instead require those persons to submit fingerprint images and related identification information. The bill would require the department to submit the fingerprint cards or electronic fingerprint images and related identification information to the Department of Justice for a specified criminal offender record information check.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 608 (SB 510) Scott. Transportation facilities: offenses.

Existing law makes it a crime to bring or possess specified weapons within certain public buildings, unless exempted.

This bill would make it a misdemeanor to possess specified weapons, replica weapons, parts of weapons, and ammunition within a sterile area of an airport, as defined, to which access is controlled by screening of persons and property, except as provided.

By creating a new crime, this bill would impose a state-mandated local program.

Existing law makes it unlawful for persons to engage in certain acts of trespass. In particular, existing law makes it unlawful for a person to knowingly enter upon any airport operations area, as defined, if the area has been posted with notices restricting access, as provided. Under existing law, a first violation of this provision is an infraction punishable by a fine not exceeding \$100, while a subsequent violation, or any violation involving a refusal to leave a posted area when requested to leave by a peace officer, is a misdemeanor.

This bill would provide that a refusal to leave a posted airport area after a request to leave from a peace officer or authorized personnel, as specified, would make the offense a misdemeanor.

By expanding the scope of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would also declare that it is to take effect immediately as an urgency statute.

#### Ch. 609 (SB 1241) Figueroa. Private security services.

The Private Security Services Act provides, among other matters, for the licensure and regulation of private patrol operators by the Bureau of Security and Investigative Services within the Department of Consumer Affairs, and makes a violation of its provisions a crime. Under existing law, an employee of a licensee may be assigned to work with a temporary registration card if specified requirements are met.

This bill would delete the provisions relating to temporary registration cards and would require that a background check be completed and a determination made by the bureau prior to the issuance of a registration card. The bill would authorize a person to work as a security guard or security patrolperson pending receipt of a registration card if he or she has been approved by the bureau and carries on his or her person a hardcopy printout of the bureau's approval from the bureau's Web site and a valid picture identification.

Existing law requires a person, upon accepting employment by a private patrol operator performing the function of a security guard or security patrolperson, to, among other things, submit fingerprint cards to the Department of Justice if he or she is not currently registered with the bureau. Existing law exempts law enforcement officers meeting specified criteria from the fingerprinting requirement.

This bill would remove the exemption for law enforcement officers, and instead would authorize an officer who meets the criteria to immediately perform the functions of a security guard or security patrolperson prior to the completion of a background check, provided that he or she has submitted an application, the applicable fees, and his or her fingerprints to the bureau for a security guard registration.

The bill would incorporate additional changes in Sections 7583.2, 7583.8, and 7583.9 of the Business and Professions Code proposed by AB 248, AB 1840, or AB 2880, to be operative only if any or all of the other bills are enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Because a violation of any of the provisions regulating private patrol operators is a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 610 (SB 1257) Murray. Vehicles: hazardous materials transportation.

(1) Existing law prohibits any person from operating a commercial motor vehicle carrying hazardous materials unless that person has in his or her possession a valid commercial driver's license for the appropriate class of vehicle, and an endorsement from the Department of Motor Vehicles to permit the operation of the vehicle. Existing law relating to hazardous waste control imposes various requirements with respect to the transportation of hazardous waste. A violation of the above provisions is a crime, punishable as specified.

This bill would also provide that an authorized representative of the generator or facility operator that is responsible for loading hazardous waste into a transport vehicle shall, prior to that loading, ensure that the driver of the transport vehicle is in possession of the appropriate class of driver's license and any endorsement required to lawfully operate the transport vehicle with its intended load. By creating a new crime, this bill would impose a state-mandated local program upon local governments.

(2) Existing law provides that the Commissioner of the California Highway Patrol may adopt and enforce regulations and standards with respect to fuel containers and fuel systems on vehicles using compressed or liquefied natural and petroleum gasses, as specified.

This bill would also allow the commissioner to adopt and enforce regulations with respect to vehicles using compressed or liquefied hydrogen gas or liquid fuels that generate hydrogen gas.

(3) Existing law generally requires every motor carrier that transports for a fee in excess of 500 pounds of hazardous materials for which placards are required to be licensed, as specified. Existing law exempts from these licensure requirements specified persons hauling only hazardous waste who are registered under the Health and Safety Code.

This bill would provide that these persons hauling only hazardous waste who are registered under the Health and Safety Code shall nonetheless be subject to specified licensing provisions relating to inspections, vehicle equipment, and compliance with specified laws and regulations.

(4) Existing law relating to the transportation of hazardous material makes it a crime for any motor carrier to direct the transportation of any shipment of hazardous material in any vehicle unless the vehicle and shipment meet specified requirements and the motor carrier holds a valid license for the transportation of hazardous material.

This bill would also require, with specified exceptions, (a) a vehicle or combination of vehicles transporting specified dangerous substances to be equipped with a 2-way communication device, maintained in good working order, that enables the driver to contact the personnel responsible for the safety operations of the motor carrier in the event of an emergency; and (b) a vehicle or combination of vehicles transporting specified dangerous substances that has an enclosed cargo body, as defined, to be locked and remain locked

during transit of the hazardous materials so as to prevent any unauthorized entry; to be opened only during loading, unloading, or at the direction of a peace officer, an authorized employee of the department, or a person authorized as specified; and, if the vehicle has been left unattended for any length of time, that the driver verify that all locks are in place and note this in his or her log book. By creating new crimes, this bill would impose a state-mandated local program upon local governments.

(5) Existing law provides that the Department of Motor Vehicles shall inspect, at least every 25 months, every terminal of specified motor carriers, including vehicles transporting hazardous material.

This bill would require the department to place an inspection priority on those terminals operating vehicles transporting hazardous material.

(6) This bill would require the California Highway Patrol, by July 1, 2004, to prepare a report on the feasibility and cost-effectiveness of requiring all commercial motor vehicles required to display warning placards when transporting any amount of explosives, radiological materials, poisonous materials, or extremely hazardous waste to be equipped with global positioning devices.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 611 (SB 1287) Alarcon. Weapons of mass destruction.

Existing law defines “weapon of mass destruction.” Existing law also provides that, absent lawful authority, the possession, development, manufacture, production, transfer, acquisition, or retention of any weapon of mass destruction is a felony.

This bill would expand that definition to include restricted biological agents, and an aircraft, vessel, or vehicle that is used as a destructive weapon. This bill would also define “used as a destructive weapon” for purposes of those provisions.

By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

Existing law provides that a threat, as specified, to use a weapon of mass destruction, that results in “sustained fear,” as defined, is a crime punishable by a specified term in county jail, state prison, or by a fine, or by both the fine and imprisonment.

This bill would delete a requirement that the threat actually cause isolation, quarantine, or a decontamination effort to violate this law. It would expand the definition of evidence showing “sustained fear” to include any isolation, quarantine, or decontamination effort and delete language specifying that any action taken in direct response to a threat to use a weapon of mass destruction is evidence of sustained fear. It would also provide that the offense would be punishable only by the imprisonment and fine in conjunction. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

Existing law provides that possession of a restricted biological agent, as defined, is punishable by imprisonment in the state prison for 4, 8, or 12 years, or a fine not exceeding \$250,000, or by both that imprisonment and fine.

This bill would revise the penalties to provide that the offense would be punishable only by the prison term and the fine in conjunction. The bill would also expand the list of restricted biological agents to include bioengineered products, as specified.

By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

The bill would make related changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 612 (SB 1350) McPherson. Emergency services: terrorism.

(1) Existing law creates the Office of Emergency Services in the office of the Governor, with specified powers and duties relative to coordinating emergency services. Existing law establishes the Emergency Medical Services Authority to assess emergency medical services areas and to perform other activities relating to planning, implementing, and assisting local and regional emergency medical services. The State Fire Marshal is authorized to develop firefighter training and education standards.

This bill would establish the Emergency Response Training Advisory Committee, with specified membership, to recommend specified training criteria relative to terrorism awareness. The bill would require the authority and the State Fire Marshal, separately, to establish additional training standards that include the criteria for the curriculum content recommended by the committee, involving the responsibilities of first responders to terrorism incidents. It would require the Office of Emergency Services to contract with the California Fire Fighter Joint Apprenticeship Program to develop a fire service specific course of instruction regarding first responder to terrorism incidents. The bill would also require the Commission on Peace Officer Standards and Training to establish training standards and develop a specified course of instruction on the responsibilities of first responders to terrorism incidents and would require specified local agency and other peace officers to complete the training.

The bill would provide that it is to be implemented only when federal funds are received for the purposes of the bill.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 613 (AB 1997) Thomson. Land conservation.

The existing Subdivision Map Act requires the legislative body of a city or county to deny, except under specified circumstances, approval of a tentative map, or a parcel map for which a tentative map was not required, if it finds that the land is subject to a contract entered into pursuant to the California Land Conservation Act of 1965 and that either the resulting parcels following a subdivision of that land would be too small to sustain their agricultural use or the subdivision will result in residential development not incidental to the commercial agricultural use of the land.

This bill would also apply these provisions to land that is subject to an open-space easement, agricultural conservation easement, or conservation easement, but would make these provisions inapplicable during the 3-year period preceding the termination of contracts entered into pursuant to the California Land Conservation Act of 1965.

The bill would also provide that where an easement contains language addressing allowable land divisions, the terms of the easement shall prevail, and would specify that its provisions would apply only to contracts or easements entered into on or after January 1, 2003.

Ch. 614 (AB 2370) Thomson. Local agency formation: annexation.

Existing law prohibits a local agency formation commission from approving or conditionally approving a change of organization or reorganization that would result in the annexation to a special district of territory that is within a farmland security zone if that special district provides or would provide facilities or services or services related to sewers, nonagricultural water, or streets and roads unless the facilities or services benefit land uses that are allowed under the contract and the landowner consents.

This bill would prohibit the commission from approving or conditionally approving a change of organization or reorganization or a change in a sphere of influence of a local government agency that would result in the annexation to a city or special district of territory that is subject to a contract in a farmland security zone or a contract to conserve agricultural

land under prescribed conditions if the city or special district provides or would provide those facilities or services, unless the facilities or services benefit land uses that are allowed under the contract and the landowner consents. The bill would nevertheless authorize the commission to approve such a change of organization or reorganization if it makes a specified finding. The bill would also make various conforming changes.

Ch. 615 (AB 2587) Matthews. Food: water usage forecasts.

Existing law establishes the Department of Food and Agriculture and charges it with various duties and obligations.

This bill would require the Department of Food and Agriculture to estimate food, fiber, livestock, and other farm products production, as specified, and provide that information to the Department of Water Resources for estimating related water usage, and the Chairs of the Assembly Committee on Agriculture, the Assembly Committee on Water, Parks, and Wildlife, and the Senate Committee on Agriculture and Water Resources, as specified, for inclusion in a bulletin by the Department of Water Resources estimating the state's water needs. This bill would also state the intent of the Legislature in regard to that bulletin.

Ch. 616 (SB 1864) Costa. Agricultural land conservation.

(1) The Williamson Act, until January 1, 2003, to facilitate a lot line adjustment, authorizes parties to mutually agree to rescind the contract or contracts and simultaneously enter into a new contract or contracts covering the adjustment if the board or council makes specified findings.

This bill would extend the termination date of those provisions to January 1, 2004.

(2) The California Farmland Conservancy Program Act requires moneys in the California Farmland Conservancy Fund, upon appropriation by the Legislature in the annual Budget Act, to be used for the purposes of the program, which include the purchase of agricultural conservation easements, land improvement and planning grants, technical assistance provided by the department, technology transfer activities of the department, and specified department administrative costs.

This bill would include fee title acquisition grants among those purposes for which moneys in the fund may be used.

(3) The California Farmland Conservancy Program Act requires the Department of Conservation to implement and administer a program to provide grants for the acquisition of agricultural conservation easements. The act prescribes procedures for the implementation of the grant program, and establishes criteria for grant applications.

This bill would revise various procedures for the application and funding of grants for agricultural conservation easements under the act, and would make various statutory conforming changes, relating to the valuation of agricultural conservation easements as specified.

Ch. 617 (SB 482) Kuehl. Salton Sea.

(1) Existing law provides that the Imperial Irrigation District is not liable for any effects to the Salton Sea or its bordering area resulting from specified conservation measures.

This bill would make legislative findings concerning the Salton Sea and a Quantification Settlement Agreement. The bill would require the Resources Agency and the Technology, Trade, and Commerce Agency, in consultation with specified entities and individuals, to review and report to the Governor and the Legislature, on or before June 30, 2003, on certain matters pertaining to the implementation of the Quantification Settlement Agreement. The bill would authorize the Department of Fish and Game, contingent upon the execution of the Quantification Settlement Agreement among other things, to authorize the take of species resulting from specified environmental impacts attributable to the implementation of the agreement. The bill would make related conforming changes.

The bill would provide that, during the period that the Quantification Settlement Agreement is in effect and the Imperial Irrigation District is meeting its water delivery obligations under the Quantification Settlement Agreement, if the Imperial Irrigation District utilizes land following conservation measures that ensure compliance with specified criteria set forth in the bill for the environmental impacts of a water transfer to implement the Quantification Settlement Agreement, no person or local agency, as defined, may seek to obtain additional conserved Colorado River water from the district, voluntarily or involuntarily, until the district has adopted a resolution offering to make conserved Colorado River water available.

The bill also would require the Secretary of the Resources Agency to establish an advisory committee representing the parties interested in the future of the Salton Sea.

(2) Existing law establishes the Fish and Game Preservation Fund, a fund that is continuously appropriated to the department to carry out the Fish and Game Code. By imposing new duties on the department, this bill would make an appropriation.

Ch. 618 (SB 1473) Machado. Water Security, Clean Drinking Water, Coastal and Beach Protection Act of 2002.

The Water Security, Clean Drinking Water, Coastal and Beach Protection Act of 2002, if approved by the voters at the November 5, 2002, statewide general election (Proposition 50), would authorize, for the purposes of financing a safe drinking water, water quality, and water reliability program, the issuance of bonds in the amount of \$3,440,000,000.

This bill would require the Department of Water Resources to administer 50% of certain funds made available by the initiative measure for a regional water management program, and the State Water Resources Control Board to administer the remaining 50% of those funds.

The bill would require a state agency that makes a grant for a project financed by those funds that includes any modification of a river or stream channel, to determine, prior to awarding the grant, whether the environmental impacts resulting from that modification will be fully mitigated by considering all of the impacts of that modification and any mitigation, environmental enhancement, and environmental benefit resulting from the project, and, on balance, whether any environmental enhancement or benefit equals or exceeds any negative environmental impacts of the project. The bill would provide that the costs of mitigation or enhancement may be included in the project costs eligible for that described funding made available by the initiative measure.

The bill would declare the intent of the Legislature that up to \$150,000,000 of the total funds made available by the initiative measure be used for projects that facilitate the water transfers pursuant to the Quantification Settlement Agreement. The bill would additionally declare the intent of the Legislature that 40% of the funds made available by the initiative for integrated regional water management projects be made available for projects in northern California and 40% of the funds be made available for projects in southern California.

These provisions would only become operative if the initiative measure is approved by the voters at the November 5, 2002, statewide general election.

Ch. 619 (AB 310) Goldberg. Female parolees: parole violation: reintegration program in lieu of parole revocation.

Existing law provides that the Department of Corrections shall establish three pilot programs that provide intensive training and counseling programs for female parolees to assist in the successful reintegration of those parolees into the community upon release or discharge from prison and after completion of in-prison therapeutic community substance abuse treatment programs.

This bill would provide that, with respect to a female parolee who violates her parole, the Board of Prison Terms may order initial or continued participation in one of the above-described programs, in lieu of revocation of parole, provided the department approves

the program participation, the parolee meets all eligibility criteria for the program, and the parole violation was nonviolent. The bill would further provide that the Department of Corrections shall prepare an informational handout explaining the pilot programs, a copy of which shall be given to each eligible female inmate or parolee.

Ch. 620 (AB 2127) Matthews. Taxpayer contributions: Asthma and Lung Disease Research Fund.

Provisions relating to the administration of personal income taxes allow individual taxpayers to contribute amounts in excess of their tax liability for the support of specified funds.

Existing law allowed, until September 1, 2001, taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the California Lung Disease and Asthma Research Fund.

This bill would repeal those obsolete provisions and instead allow taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the Asthma and Lung Disease Research Fund, which would be created by this bill. However, the bill would provide that a voluntary contribution designation for this fund shall not be added on the tax return until another voluntary contribution designation is removed from that return.

This bill would provide that all moneys contributed to the fund pursuant to these provisions, upon appropriation by the Legislature, would be allocated to the Franchise Tax Board and the State Department of Health Services, as provided.

This bill would also provide that these voluntary contribution provisions are repealed on January 1 of the 5th taxable year following the taxable year the fund first appears on the tax return. The provisions are repealed for taxable years beginning on or after January 1 of the calendar year in which the Franchise Tax Board estimates by September 1 that the contributions made on returns filed in that calendar year will be less than \$250,000, and an adjusted amount for subsequent taxable years.

Ch. 621 (AB 2238) Dickerson. Public Safety Officials Home Protection Act.

Existing law prohibits any state or local agency from posting the home address or telephone number of any elected or appointed official on the Internet without first obtaining the written permission of that individual.

This bill would, in addition, prohibit any person from knowingly posting the above information of any elected or appointed official, as defined, or the official's residing spouse or child, on the Internet knowing that person is an elected or appointed official and intending to cause imminent great bodily harm that is likely to occur, or threatening to cause imminent great bodily harm, to that individual. The bill would include public safety officials, as defined, within the list of covered officials. This bill would make a violation of these provisions a misdemeanor, and would make the violation a misdemeanor or a felony if it leads to the bodily injury of the official or his or her residing spouse or child. By creating new crimes, this bill would impose a state-mandated local program.

Under existing law every person who maliciously, and with the intent to obstruct justice or the due administration of the laws, publishes, disseminates, or otherwise discloses the residence address or telephone number of any peace officer, nonsworn police dispatcher, or employee of a city police department or county sheriff's office, or that of the spouse or children of these persons, whether living with them or not, while designating the peace officer, nonsworn police dispatcher, or relative of these persons as such, without the authorization of the employing agency, is guilty of a misdemeanor.

This bill would include with the intent or threat to inflict imminent physical harm in retaliation for the due administration of the laws in the above prohibition, and would include public safety officials, as defined, among the list of those who may not have their information published. It would prohibit disclosure of the addresses and telephone numbers of only the

spouses and children residing with the specified persons. Because this bill would create a new crime, it would impose a state-mandated local program.

The bill would create an advisory task force to determine how to protect a public safety official's home information. The task force would be chaired by the Attorney General and would be comprised of various representatives from law enforcement, the legal community, and the business community. The bill would require the task force, by September 1, 2003, to file a report with the Legislature on, among other things, how to protect a public safety official's home information.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 622 (AB 2471) Robert Pacheco. Criminal punishment.

Existing law defines the offense of gross vehicular manslaughter and provides punishment therefor.

This bill would require that certain facts be alleged in the information or indictment and admitted by the defendant in open court, or found true by the trier of fact in order for specified enhancements to apply.

By imposing additional duties on local prosecuting authorities, this bill would impose a state-mandated local program.

Existing law establishes in each county a board of parole commissioners, consisting of, among others, the sheriff, or, in a county with a department of corrections, the director of that department, and the probation officer.

This bill would, in addition, authorize as members of the board, the designee of the sheriff, as applicable, or the designee of the probation officer.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 623 (AB 2659) Runner. Fingerprinting.

Existing law requires the Attorney General to procure from any available source, and file for record and report in the office of the bureau, all descriptions, information, photographs, and measurements of all persons convicted of a felony, imprisoned, and of all well-known habitual criminals. Existing law permits the Department of Justice to use, among other things, the fingerprint system of identification. Existing law requires the department to maintain an automated system to retain fingerprints files and identify latent fingerprints.

This bill would require the department to establish, implement, and maintain a certification program to process fingerprint-based criminal background clearances on individuals who roll applicant fingerprint impressions for licensure, certification, or employment purposes, and would require those persons to be certified, commencing January 1, 2004. The bill would authorize the department to charge a fee sufficient to cover costs of the program. This bill would require any person who rolls fingerprint impressions for individuals who are being fingerprinted for nonlaw enforcement purposes, to submit to the department 2 sets of fingerprints, along with appropriate fees and documentation in order to process a criminal background clearance. The bill would prohibit the certification of a fingerprint roller if, among other things, the person has been convicted of a felony.

Ch. 624 (AB 2965) Wiggins. Gaming: cheating.

Existing law makes it unlawful for a person to use any game, device, sleight of hand, pretension to fortune tell, trick, or other means, by use of cards or other implements or instruments, or while betting on sides or hands of any play or game, to fraudulently obtain

from another person, money or property of any description. Existing law defines the term “fraudulently obtain” for these purposes to include cheating by gaining an unfair advantage for any player in any game through a technique or device not sanctioned by the rules of the game.

This bill would make unlawful various acts of cheating in the playing of gambling games. The bill would define the term “cheat” for these purposes.

The bill also would make it unlawful to use at a gambling establishment, or to possess with the intent to use, any device to assist in projecting the outcome of the gambling game, keeping track of the cards played, analyzing the probability of the occurrence of an event relating to the game, or analyzing the strategy for playing or betting to be used in the game, except as permitted by the California Gambling Control Commission or a tribal gaming agency.

The bill also would make it unlawful for any person to use counterfeit chips, counterfeit debit instruments, or other counterfeit wagering instruments in a gambling game, associated equipment or a cashless wagering system. The bill would also make it unlawful for any person, to possess any paraphernalia for manufacturing slugs, as defined.

The bill would make it unlawful to manufacture, sell, or distribute any cards, chips, dice, game, or any device which is intended to be used to cheat and would also make it unlawful to mark, alter, or otherwise modify any associated equipment or gaming device in a manner that either affects the result of a wager by determining win or loss or alters the normal criteria of random selection, which affects the operation of a gambling game or which determines the outcome of a gambling game. The bill would prescribe terms of imprisonment and fines for violations of these prohibitions.

Because the bill would define various new crimes, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 625 (SB 649) Committee on Environmental Quality. Environmental quality: solid waste management: mercury added novelties: used and waste tires.

(1) Existing law authorizes the Department of Boating and Waterways to make loans to cities, counties, and districts for the planning, acquisition, construction, improvement, maintenance, or operation of small craft harbors and facilities in connection with those harbors, and connecting waterways. Existing law requires the department to establish, by rules and regulations, policies and standards to be followed in making these loans, and authorizes these rules and regulations to include policies and standards for restrooms, vessel pumpout facilities, oil recycling facilities, and receptacles for the purpose of separating, reusing, or recycling all solid waste materials.

This bill would, instead, require the rules and regulations established by the department under this provision to include policies and standards for restrooms, vessel pumpout facilities, oil recycling facilities, and receptacles for the purpose of separating, reusing, or recycling all solid waste materials.

(2) Existing law defines a “mercury-added novelty” as a mercury-added product intended mainly for personal or household enjoyment or adornment.

This bill would exclude from that definition a product that contains no mercury other than in a mercury-added button cell battery.

(3) The existing California Environmental Quality Act requires that all public and private activities or undertakings pursuant to, or in furtherance of, a redevelopment plan be deemed to be a single project.

This bill would specify that an environmental impact report for a redevelopment plan may be a master environmental impact report, a program environmental impact report, or a project

environmental impact report. The bill would require the environmental impact report for a redevelopment plan to specify the type of environmental impact report to be prepared for that plan.

(4) The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. Under existing law, the act requires each city, county, city and county, and regional agency, if any, to develop a source reduction and recycling element of an integrated waste management plan containing specified components. The first and each subsequent revision of the element is required to divert 50% of the solid waste subject to the element, on and after January 1, 2000, except as specified.

This bill would revise the requirements for the granting of a time extension from these diversion requirements applicable to cities incorporated after January 1, 1990, and before January 1, 2001, and applicable to cities incorporated on or after January 1, 2001. The bill would make related and conforming changes.

(5) Existing law requires a community service district or sanitary district that provides solid waste handling services or implements source reduction and recycling programs to comply with the source reduction and recycling element and household hazardous waste element of the jurisdiction in which the district is located, and to provide the city, county, or regional agency in which it is located information on the programs implemented by the district and the amount of waste disposed and diverted within the district. A district is authorized to impose a fee, in a specified manner, for the costs of complying with these requirements.

This bill would additionally include a public utility district that provides these services or implements these programs within those requirements. The bill would impose a state-mandated local program by imposing new duties upon local agencies.

(6) Existing laws relating to the storage and disposal of used and waste tires and the transportation of waste tires define "used tire" to mean a tire meeting specified requirements, including a requirement of being stored by size in a rack or a stack, but not in a pile.

This bill would amend this requirement to specify that, for purposes of the storage and disposal of used tires, the used tire is ready for resale, stored by size in a rack or a stack not more than 2 rows wide, and stored in accordance with local fire and vector control requirements and with state minimum standards, but for purposes of the transportation of used tires, the bill would delete the storage requirement.

(7) Existing law relating to the storage and disposal of used and waste tires exempts from the definition of "minor waste tire facility" a tire dealer or an automobile dismantler, as defined, who stores used or waste tires on the dealer's or dismantler's premises for less than 90 days under prescribed conditions.

This bill would delete a tire dealer or automobile dismantler who stores used tires from this exemption from the definition of "minor waste tire facility."

(8) Existing law authorizes the California Integrated Waste Management Board to refuse to issue or renew or to suspend or revoke a waste tire facility permit under certain conditions. Any person who stores, stockpiles, or accumulates waste tires at a location for which a waste tire facility permit is required, or in violation of the terms and conditions of the permit, existing law, or the regulations adopted under existing law, is required, upon order of the board, to clean up those waste tires or abate the effects thereof, or, in the case of threatened pollution or nuisance, take other necessary remedial action. The board is authorized, individually or in cooperation with any other governmental agency, to expend available moneys to perform any cleanup, abatement, or remedial work required under these circumstances if that action is required by the magnitude of endeavor or the need for prompt action to prevent substantial pollution, nuisance, or injury to the public health or safety. A governmental agency that cooperates with the board in the cleanup, abatement, or remedial work is authorized to recover its costs in a civil action.

This bill would provide that any costs or damages incurred under these provisions by the board constitute a lien upon the real property owned by any responsible party that is subject to the remedial action. The bill would prohibit the board from being considered a responsible party for a remediated site merely because a lien is imposed under this provision. The bill would require all funds recovered under this provision on behalf of the board's waste tire stabilization and abatement program to be deposited in the California Tire Recycling Management Fund, which contains money that is available, upon appropriation, for expenditure for specified purposes.

(9) Existing law requires the board to initiate a program for the cleanup of solid waste disposal sites and for the cleanup of solid waste at codisposal sites, as defined, where the responsible party either cannot be identified or is unable or unwilling to pay for timely remediation, and where cleanup is needed to protect public health and safety or the environment. The board is required, to the extent possible, to seek repayment from responsible parties for its expenses incurred under the cleanup program, in an amount equal to the amount expended, a reasonable amount for the board's cost of contract administration, and an amount equal to the interest that would have been earned on the expended funds. The amount of any cost incurred by the board under these provisions are recoverable from responsible parties in a civil action brought by the board or, upon the request of the board, by the Attorney General.

This bill would provide that, in addition to the remedies in existing law described above, any costs or damages incurred under these provisions by the board constitute a lien upon the real property owned by any responsible party that is subject to the remedial action. The bill would prohibit the board from being considered a responsible party for a remediated site merely because a lien is imposed under this provision. The bill would require all funds recovered under this provision on behalf of the solid waste disposal and codisposal site cleanup program to be deposited in the Solid Waste Disposal Site Cleanup Trust Fund, which is a continuously appropriated fund in the State Treasury. The bill thereby would make an appropriation by increasing the amount of funds available for appropriation in a continuously appropriated fund.

(10) Existing law imposes a California tire fee in a specified amount on every person who purchases a new tire.

This bill would exempt from the California tire fee any tire sold with, or sold separately for use on, any self-propelled wheelchair, any motorized tricycle or motorized quadricycle, as defined, and any vehicle that is similar to a motorized tricycle or motorized quadricycle and is designed to be operated by a person who, by reason of the person's physical disability, is otherwise unable to move about as a pedestrian.

(11) Existing law requires the board to adopt a 5-year plan, to be updated every 2 years, to establish goals and priorities for the waste tire program and each program element. Existing law requires the 5-year plan to describe the effectiveness of each program element, including, among other things, a description of the effectiveness of cleanup, abatement, or other remedial action related to tire stockpiles throughout the state, and a description of the research directed at promoting and developing alternatives to the landfill disposal of tires.

This bill would specify that these descriptions relate to waste tires.

(12) Under existing law, the money in the California Tire Recycling Management Fund is authorized to be expended by the board, upon appropriation in the annual Budget Act, for specified purposes concerning tire recycling, the disposal of used tires, and for a program of grants to local government entities.

This bill would make technical revisions to the authorized purposes for expenditure of the money in the fund.

(13) Existing law requires the Department of Transportation to annually report to the Legislature and the board on the use of waste tires in transportation and civil engineering projects during the previous 5 years, including, but not limited to, the approximate number of tires used every year.

This bill would specify that this report is to include the approximate number of waste tires used every year.

(14) Existing law defines, among other things, “tire derived product” and “used tire” for the purposes of the provisions regulating the transportation of used and waste tires.

This bill would make technical changes in these definitions, and would add definitions of the terms “waste tire generator” and “waste tire generating business” to those provisions.

(15) Existing law requires a registered waste and used tire hauler to only transport waste or used tires to a facility that is permitted by the board, or exempted to accept waste and used tires, or to a facility that lawfully accepts waste or used tires for reuse or disposal.

This bill would, instead, require a registered waste and used tire hauler to only transport waste or used tires to a facility that is permitted, excluded, exempted, or otherwise authorized by the board, by statute, or by regulation, to accept waste and used tires, or to a facility that lawfully accepts waste or used tires for reuse or disposal.

(16) Existing law provides that a person who hauls waste or used tires is exempt from registration if the person meets at least one of 9 specified standards, including status as a solid waste collector operating under a license or franchise from any local government who transports fewer than 10 waste or used tires at any one time.

This bill would delete that standard.

(17) The bill would also make various technical changes in existing law relating to solid waste and hazardous waste.

(18) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(19) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 626 (SB 1011) Sher. Household hazardous waste: environmental quality assessment: mercury-containing light switches.

(1) Existing law requires a public agency, or its contractor, that intends to operate a household hazardous waste collection facility, to submit specified information to the Department of Toxic Substances Control and authorizes the department to adopt and revise regulations for household hazardous waste collection facilities. Existing law authorizes the department to allow any household hazardous waste collection facility to accept hazardous waste from conditionally exempt small quantity generators (CESQGs). Existing law defines the term “curbside household hazardous waste collection program” for purposes of these provisions, as a service authorized by a public agency that collects recyclable household hazardous waste materials, including latex paint, used oil, used oil filters, and small batteries, and that is operated in accordance with specified requirements. The term “recyclable household hazardous waste material” is defined for these purposes as specified materials for which proven and authorized recycling technology exists. Existing law imposes specified requirements upon the operation of curbside household hazardous waste collection programs, including prohibiting the collection of spent lead-acid batteries and antifreeze. A violation of the hazardous waste control laws is a crime.

This bill would revise the definition of “curbside household hazardous waste collection program” to delete the authorization regarding small batteries and additionally include a program that collects household hazardous waste that is designated as a universal waste pursuant to the hazardous waste control laws or the regulations adopted by the department.

The bill would revise the definition of “recyclable household hazardous waste material” to include specified materials, including universal waste. The bill would also define the term “universal waste” for purposes of the hazardous waste control laws.

The bill would additionally prohibit a curbside household hazardous waste collection program from collecting hazardous waste containing mercury, unless the waste is contained as specified, and from collecting fluorescent light tubes that are 4 feet or greater in length.

The bill would delete prohibitions on a curbside program collecting spent lead-acid batteries and antifreeze and on the amount of small batteries that the program may collect.

Since a violation of the bill's requirements would be a crime pursuant to other provisions of the hazardous waste control law, the bill would impose a state-mandated local program.

(2) The existing Environmental Quality Assessment Act of 1986 authorizes the Director of Environmental Health Hazard Assessment, in consultation with various state agencies, to develop, adopt by regulation, and publicize criteria for 2 classes of environmental assessors. Existing law specifies procedures for the registration and renewal of an environmental assessor's registration by the Director of Environmental Health Hazard Assessment. The Director of Environmental Health Hazard Assessment is authorized to perform audits of work performed by a class II environmental assessor and to rescind a class II assessor's registration, under specified circumstances.

This bill would transfer, to the Department of Toxic Substances Control, all of the duties, powers, purposes, responsibilities, and jurisdiction of the Office of Environmental Health Hazard Assessment with regard to the Environmental Quality Assessment Act of 1986. The bill would authorize the department to expend the unexpended balance of funds available for expenditure by the office in connection with the performance of that transferred function and would provide for the transfer of specified employees and property of the office to the department with regard to that function. The bill would make conforming changes with regard to this transfer.

The bill would require the Director of Toxic Substances Control to additionally determine minimum standards of performance for environmental assessors and would revise the requirements for establishing criteria for registration. The bill would authorize the director to perform an audit of work performed by any environmental assessor and would authorize the director to deny, suspend, or rescind any environmental assessor's registration if the assessor's performance falls below the minimum standards, or based upon specified grounds.

The bill would require the director to deposit all fees paid by an applicant for registration as an environmental assessor in the Environmental Quality Assessment Fund, which the bill would establish in the State Treasury. The bill would authorize the director to expend the funds in the Environmental Quality Assessment Fund, upon appropriation by the Legislature, to implement the Environmental Quality Assessment Act of 1986.

(3) Existing law authorizes the department to prequalify bidders for remedial or removal actions taken pursuant to the Carpenter-Presley-Tanner Hazardous Substance Account Act, by adopting and applying a uniform system of rating bidders. The act requires the department to request annual statements of qualifications from interested firms for each type of engineering, architectural, environmental, landscape architectural, construction project management, or land surveying services work for which the department elects to use the prequalified list process.

This bill would permit, instead of require, the department to request annual statements of qualification from interested firms.

(4) Under the existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, any mercury-containing motor vehicle light switch that becomes a hazardous waste when released or removed from a vehicle is required to be managed pursuant to specified regulations adopted by the Department of Toxic Substances Control regarding the management of universal waste and other applicable regulations.

This bill would delete the requirement that a mercury-containing light switch that becomes a hazardous waste when released from a vehicle be managed in accordance with those requirements.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 627 (SB 900) Ortiz. Criminal history information.

Existing law requires the Department of Justice to furnish various agencies and entities with a person's state summary criminal history information when that information is used for employment, licensing, or certification purposes. Existing law generally provides for the destruction or return of specified records generated in connection with requests for criminal history information.

This bill would state the Legislature's findings and declarations with respect to the complexity of the provisions regarding dissemination of state summary criminal history information and resulting problems. It would state the Legislature's intent to consolidate statutory criteria on dissemination of criminal history information, not to overrule specified court cases, and not to discourage further legislative review of the amount and type of summary criminal history information that should be disseminated.

This bill would consolidate much of the law regarding disclosures of criminal history information for employment, licensing, or certification purposes. It would state a general rule applicable to those whose criminal history information is authorized to be released for employment, licensing, or certification purposes, a rule that limits the release to convictions and arrests for which the applicant is pending trial. It would state special rules for applicants for positions, licenses, or certification in law enforcement, in-home care, residential care, child day care, foster care, community care, banking, security services, and others. These special rules would detail what information should be disseminated concerning these applicants, according to the nature of the position, license, or certification sought, incorporating certain variations in existing laws authorizing the dissemination, while making some substantive and conforming changes. The bill would also eliminate the requirement that specified applications for criminal history information be destroyed. This bill would provide that it is not to be construed to relieve the department of its other statutory notification duties.

This bill would incorporate amendments to Section 11105.3 of the Penal Code proposed by AB 1855 that would become operative if both bills are enacted and this bill is enacted after AB 1855.

Ch. 628 (SB 1328) Chesbro. Solid waste: illegal disposal: abatement grants.

Existing law requires the California Integrated Waste Management Board to establish a grant program for cities and counties for purposes of cleaning up and abating the effects of solid waste that is illegally disposed of on farm or ranch property. Existing law authorizes the board to expend the funds in the Farm and Ranch Solid Waste Cleanup and Abatement Account, upon appropriation by the Legislature, to make these grants.

This bill would expand the program to include Native American tribes and all public entities, which the bill would define to include a city, county, or resource conservation district.

The bill would increase the amounts for which the grants may be awarded and the percentage of the grant that may be expended for project administrative costs.

The bill would modify certain reporting requirements relating to the grant program.

The bill would delete obsolete provisions in, and make conforming changes to, existing law.

Ch. 629 (SB 1735) Karnette. Victims of crime: domestic violence.

(1) Existing law provides for the indemnification of victims and derivative victims of specified types of crimes, for certain expenses for which the victim or derivative victim has not been and will not be reimbursed from any other source, subject to specified conditions. No victim or derivative victim may receive assistance under these provisions if the board finds that the victim or derivative victim failed to cooperate reasonably with a law

enforcement agency in the apprehension and conviction of a criminal committing the crime. Indemnification is made under these provisions from the Restitution Fund, which is continuously appropriated to the California Victim Compensation and Government Claims Board for these purposes.

This bill would prohibit an application for a claim based on domestic violence from being denied solely because no police report was made by the victim. It would require the board to adopt guidelines that allow the board to consider and approve applications for assistance based on domestic violence relying upon evidence other than a police report to establish that domestic violence crime has occurred. By expanding the pool of potential recipients of funds from a continuously appropriated fund, this bill would make an appropriation.

(2) Existing law generally sets forth the duties of domestic violence counselors, as defined, with respect to the disclosure of confidential communication between a victim and a domestic violence counselor.

This bill would require a domestic violence counselor to inform a domestic violence victim of any applicable limitations on confidentiality of communications between the victim and the domestic violence counselor.

#### Ch. 630 (SB 1867) Figueroa. Victims of crime: indemnification.

(1) Existing law provides for the indemnification of victims of specified types of crimes, for certain expenses for which the victim has not been and will not be reimbursed from any other source. Indemnification is made under these provisions from the Restitution Fund, which is continuously appropriated to the California Victim Compensation and Government Claims Board for these purposes. No victim is eligible for assistance under these provisions if the board determines that the victim knowingly and willfully participated in the commission of the crime, except that until January 1, 2004, this restriction does not apply if the injury occurred as a direct result of a specified crime.

This bill would provide for a permanent exception to this restriction for an injury received as a direct result of other specified crimes.

(2) Existing law prohibits a victim from being eligible for assistance under these provisions if the board finds that the victim failed to cooperate reasonably with a law enforcement agency in the apprehension and conviction of a criminal committing the crime.

This bill would, in the case of a victim of domestic violence or sexual assault, require the board to consider specified factors in determining whether the victim is eligible for assistance pursuant to these provisions.

(3) By expanding the pool of persons eligible for payments from a continuously appropriated fund, this bill would make an appropriation.

#### Ch. 631 (SB 2099) Vasconcellos. State property: surplus.

Existing law requires each state agency, on or before December 31 of each year, to make a review of all proprietary state lands, with specified exceptions, over which it has jurisdiction, to determine what, if any, land is in excess of its foreseeable needs, and to report thereon in writing to the Department of General Services. Existing law transfers to the department jurisdiction of all land reported as excess.

The department is required to sell the land or otherwise dispose of the property pursuant to the authorization, by sending a specified written offer to sell or lease the property to certain local public entities. The department may not sell the land to a local governmental agency for less than fair market value. Any sale is subject to any other terms, conditions, reservations, and exemptions as the department may deem to be in the best interests of the state.

This bill would authorize the Director of General Services, subject to specified conditions, to sell, lease, or exchange a specified parcel of real property in the City of Santa Clara upon terms and conditions and subject to reservations and exceptions that the director determines are in the best interests of the state.

Ch. 632 (SB 1242) Brulte. Criminal identification: specimen or sample collection: use of reasonable force.

Existing law makes it a misdemeanor for persons convicted of specified offenses to refuse or fail to provide 2 specimens of blood, a saliva sample, and a thumb and palm print impression for law enforcement identification analysis after receiving written notice of the requirement to do so.

This bill would provide that, notwithstanding the above, authorized law enforcement, custodial, or corrections personnel, including specified peace officers, may employ reasonable force to collect required specimens, samples, or print impressions from individuals who, after request, refuse to provide those specimens, samples, or print impressions. The bill would require the Department of Corrections and the Department of the Youth Authority to adopt regulations regarding the use of reasonable force. The bill would require the Board of Corrections to adopt regulations regarding the use of reasonable force for local detention facilities. The bill would also require the Department of Corrections, the Department of the Youth Authority, and the Board of Corrections to report to the Legislature, no later than January 1, 2005, regarding implementation of the provisions of the bill, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 633 (SB 1887) McPherson. Actions against felons.

Under existing law, unless a longer period is prescribed for a specific action, in any action for damages against a defendant based upon the defendant's commission of a felony offense for which the defendant has been convicted, the time for commencement of the action is within one year after judgment is pronounced, as specified.

This bill would provide, as an exception thereto, that an action for damages against a defendant based upon the defendant's commission of a felony offense for which the defendant has been convicted may be commenced within 10 years of the date on which the defendant is discharged from parole if the conviction was for any of certain serious felonies, as defined, except as specified.

The bill would further provide that this provision would apply to any action commenced before, on, or after the effective date of the provision, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 634 (AB 320) Reyes. Portable classrooms.

Existing law authorizes the State Allocation Board to lease portable classrooms to school districts and county superintendents of schools.

This bill would require the Office of the State Architect to conduct a study to evaluate the safety of the various means currently available for providing emergency exit from portable classrooms and to report the results of the study along with recommendations to the Legislature by July 1, 2003.

Ch. 635 (AB 364) Aroner. Child welfare services.

Existing law requires each county to provide child welfare services.

Existing law provides for the administration of various child welfare services pursuant to regulations and procedures adopted by the State Department of Social Services.

Existing law requires the department to contract with an appropriate and qualified entity to conduct an evaluation of the adequacy of current child welfare services budgeting methodology, and to convene an advisory group. The Director of Social Services has convened an advisory group, the Child Welfare Services Stakeholders Group, to address concerns facing the child welfare system.

This bill would provide that it is the intent of the Legislature that the Human Resources Workgroup of the Child Welfare Services Stakeholders Group include in its next planned report the core strategies needed to establish minimum caseload standards under the

redesigned child welfare services system. This bill would also provide that it is the intent of the Legislature that the Human Resources Workgroup make recommendations for implementing the new caseload standards.

Ch. 636 (AB 966) Wesson. Baldwin Hills Conservancy: Kenneth Hahn State Recreation Area.

Under existing law, the Baldwin Hills Conservancy is authorized to acquire and manage public lands within the Baldwin Hills area, which is defined to include land within the Kenneth Hahn State Recreation Area. The Budget Act of 2001 appropriated \$4,000,000 to the Department of Parks and Recreation for capital outlay projects within the Kenneth Hahn State Recreation Area. Chapter 400 of the Statutes of 2001 reappropriated the unencumbered balance of that sum for the acquisition, development, and planning of that project.

This bill would reappropriate to the department the unencumbered balance of the funds appropriated pursuant to those provisions for the acquisition, planning, preliminary plans, working drawings, equipment, and construction of the project specified in that schedule, and would make the funds available for expenditure in the 2002–03, 2003–04, and 2004–05 fiscal years.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 637 (AB 1000) Simitian. Public works: design-build contracts.

Under existing law, a community college district governing board is required to award any contract for a public project that costs \$15,000 or more to the lowest responsible bidder.

Existing law also requires community college districts constructing community college facilities to meet various requirements, including requirements pertaining to seismic safety, the contents of plans for school construction, and the acquisition of proposed schoolsites.

This bill would authorize the governing boards of 3 specified community college districts and 5 community college facility construction projects selected by the Chancellor of the California Community Colleges to enter into a design-build contract, as defined, until January 1, 2008. The bill would authorize factors in addition to price and cost to be considered in awarding a contract for the design and construction of a community college facility for an amount that exceeds \$10,000,000. The bill would require the Board of Governors of the California Community Colleges to develop guidelines for design-build projects no later than June 30, 2003. The bill, among other things, would require each contract to prohibit construction or alteration of any community college facility without the prior written approval of the plans by the Department of General Services. The bill would require a community college district that elects to use the design-build process to submit a report to the Legislative Analyst, and would require the Legislative Analyst to submit an interim report and a final report to the Legislature.

Ch. 638 (AB 1108) Pavley. Environmental quality: scoping meetings: military areas.

(1) The existing California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report (EIR) on any project that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds the project will not have that effect. CEQA also requires a lead agency to call at least one scoping meeting for a proposed project that may affect highways or other facilities under the jurisdiction of the Department of Transportation, and for a project of statewide, regional, or areawide significance. The existing federal National Environmental Policy Act and existing federal regulations authorize a lead agency to hold a scoping meeting, and permit that meeting to be integrated with any other early planning meeting the agency holds on a project that is subject to the federal act.

This bill would provide that any scoping meeting that is conducted in the city or county in which a project is located pursuant to the NEPA is deemed to satisfy the state scoping meeting requirement with regard to projects of statewide, regional, or areawide significance, if the lead agency provided notice to interested parties in conformance with the existing state requirements. The bill would also impose additional requirements on a lead agency, if the United States Department of Defense or a military service, as defined, notifies that lead agency of the contact person and address for the military service and the specific boundaries of a low-level flight path, military impact zone, or special use airspace, as those terms are defined by the bill.

The bill would require the lead agency to submit notices to the military service if the project is within those boundaries and the project includes a general plan amendment, the project is of statewide, regional, or areawide significance, or the project is required to be referred to the airport land use commission or appropriately designated body. The bill would exempt from those notification requirements specified hazardous waste response actions and corrective action orders. The bill would specify that a project's effect or potential effect on military activities would not itself constitute an adverse effect for the purposes of CEQA. By imposing additional duties on local lead agencies, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 639 (AB 1119) Migden. Transitional housing placement services.

Under existing law, the Supportive Transitional Emancipation Program (STEP), emancipated foster youth are eligible to receive support while participating in an educational or training program, or any activity consistent with the youth's transitional independent living plan up to 21 years of age. Existing law provides that any person less than 21 years of age who is receiving aid pursuant to STEP, and who has emancipated from a county that has elected to participate in a transitional housing placement program for youths between 18 and 21 years of age, shall also be eligible for specified county transitional housing placement program services that provide supervised housing services.

This bill would eliminate the requirement that a youth receive aid pursuant to STEP in order to be eligible for the transitional housing placement services described in the bill.

#### Ch. 640 (AB 1314) Havice. Parking.

(1) Existing law provides that no person shall stop, park, or leave a vehicle in front of a curb that has been constructed to provide wheelchair accessibility to the sidewalk so designated by either a sign or red paint.

This bill would provide that it is unlawful to stop, park, or leave a vehicle in front of or upon a curb that has been constructed to provide wheelchair accessibility to the sidewalk. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(2) Existing law authorizes local authorities to enact ordinances governing various types of vehicle parking.

This bill would authorize local authorities to enact an ordinance or resolution regulating parking spaces for electric vehicles, as specified.

(3) Existing law requires the Department of Motor Vehicles to issue distinctive decals, labels, or other identifiers for low-emission vehicles and super ultralow emission vehicles for the purposes of implementing a high-occupancy vehicle lanes program. Existing law makes it unlawful for any person to park or leave standing any vehicle in a stall or space designated for disabled persons and disabled veterans unless the vehicle displays either a special identification license plate or a distinguished placard. Existing law also provides a procedure

for the removal of vehicles unlawfully parked in the designated stalls or spaces of public or private offstreet parking facilities.

This bill would provide that no person may park or leave standing any vehicle in a stall or space designated for parking and fueling of zero-emission vehicles, as defined, unless the vehicle displays a decal issued by the department for zero-emission vehicles. The bill would require the department to make decals available beginning July 1, 2003.

Because a violation of this prohibition would be an infraction punishable by a \$100 fine, the bill would impose a state-mandated local program by creating a new crime.

This bill would set forth a procedure for the removal of a vehicle unlawfully parked in a stall or space designated for parking and fueling zero-emission vehicles in an offstreet parking facility that would be similar to the existing procedure governing the removal of unauthorized parking in a disabled parking stall or space.

This bill would also provide that an agency that issues a fine for failure to display a disabled placard may, in lieu of collecting a fine, charge an administrative fee not to exceed \$25 if the individual who received the citation can show proof that he or she had been issued a valid placard at the time he or she was cited.

(4) This bill would make other technical, nonsubstantive changes.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 641 (AB 1379) Thomson. Family planning services.

Existing law imposes various functions, powers, and duties on the State Department of Health Services and the Office of Family Planning, which is established in the department, with respect to the provision of family planning services to eligible individuals. Among these powers is the authority to enter into contracts with individuals and various entities as deemed necessary and advisable to carry out the general intent and purposes of providing family planning services.

This bill would instead authorize the department and the office to award grants to these individuals and entities for the provision of family planning services, and would make related changes. It would also specify that all grants awarded by the office would be exempt from provisions governing state contracts.

#### Ch. 642 (AB 1454) Thomson. Mental health: facilities: criminal record checks: managed care.

Existing law requires the State Department of Mental Health to perform various functions and duties with respect to the provision of mental health services, including the licensure of facilities that provide these services.

This bill would require the department, prior to the initial licensure or first renewal of a license of any person to operate or manage certain facilities, upon the employment of any direct care staff, as defined, and prior to the provision of services by a direct care contractor, to submit fingerprint images and related information pertaining to these persons to the Department of Justice for purposes of a criminal record check, as prescribed.

This bill would also require the department, except under specified circumstances, to deny any application for any license, suspend or revoke any existing license, and disapprove or revoke any employment or contract for direct services, if the applicant, licensee, direct care staff person, or direct services contractor has been convicted of or incarcerated for specified crimes within the preceding 10 years.

Existing law requires the State Department of Mental Health to implement managed mental health care for Medi-Cal beneficiaries through fee-for-service or capitated rate contracts with mental health plans, including individual counties, counties acting jointly, any

qualified individual or organization, or a nongovernmental entity. Existing law further requires that contract renewal be on an annual basis.

This bill would instead provide that, at the discretion of the department, each contract may be renewed for a period not to exceed 3 years.

Ch. 643 (AB 1901) Cohn. Pupils: expulsion.

(1) Existing law specifies those acts for which a pupil may be suspended from school or recommended for expulsion, including the damage, theft, or receipt of stolen school property.

This bill would specifically include electronic files and databases within the meaning of “school property.”

(2) Under existing law, a pupil in any of grades 4 to 12, inclusive, may be suspended or expelled for intentionally engaging in harassment, threats, or intimidation directed against a group of pupils.

This bill would also authorize a pupil to be suspended or expelled for harassing, threatening, or intimidating school district personnel.

(3) This bill would incorporate additional changes in Section 48900 of the Education Code proposed by AB 662 that would become operative only if AB 662 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

Ch. 644 (AB 1957) Robert Pacheco. Public guardians: criminal history information.

Existing law provides that a public guardian is a county officer and permits a public guardian to be appointed as a conservator for a person when no one else is available who is qualified and willing to act and when the appointment of a guardian or conservator would be in the best interest of the person, as specified.

This bill would permit, until January 1, 2007, a public guardian, as specified, or a county conservatorship investigator, as defined, upon a referral from a court or an adult protective services agency, to submit fingerprints and related information to the Department of Justice on a person being considered as a potential conservator, except as specified. The bill would also permit a potential conservatee to request that the information described above be submitted to the Department of Justice under specified circumstances. The bill would require the Department of Justice to provide a record of specified convictions and arrests. The bill would prohibit the Department of Justice from retaining fingerprints and related information to provide subsequent arrest information. The bill would require the Department of Justice to charge a fee to cover the cost of processing these requests, to be paid by the requesting agency. The bill would also require that information received by a public guardian and disclosed to the attorney of a proposed conservatee be kept confidential, except as specified. The bill would require that the information be disclosed to the subject of the background check. The bill would also require the Legislative Analyst’s office to make a specified sampling of counties of criminal history information requested regarding potential conservators and recommendations regarding the utility of this information, as part of its 2006–07 fiscal year budget analysis.

Ch. 645 (AB 2013) Harman. Native California trout.

(1) Existing law contains provisions governing freshwater fish.

This bill would designate native California trout.

The bill would authorize the Fish and Game Commission to designate “Heritage Trout Waters” to recognize the beauty, diversity, historical significance, and special values of California’s native trout. The bill would require the commission’s designation to meet certain criteria.

(2) Existing law continuously appropriates money in the Fish and Game Preservation Fund to the department and to the commission to pay all necessary expenses incurred in

carrying out the Fish and Game Code and to pay the compensation and expenses of the commissioners and employees of the commission.

By authorizing the commission to designate “Heritage Trout Waters” and requiring that the designation meet specified criteria, the bill would make an appropriation.

Ch. 646 (AB 2024) Nakano. After school programs: nutrition education.

The existing Before and After School Learning and Safe Neighborhoods Partnerships Program creates incentives for schools and communities to partner together to establish after school enrichment programs that provide academic and literacy support and safe, constructive alternatives for youth. Existing law requires an after school program established pursuant to the program to provide an educational enrichment component that may include recreation and prevention activities.

This bill would also authorize nutrition education to be provided as part of the educational enrichment component.

Ch. 647 (AB 2036) Liu. Taxpayer contributions: State Children’s Trust Fund.

Provisions relating to the administration of personal income taxes allowed individual taxpayers, until January 1, 2002, to contribute amounts in excess of their tax liability to the State Children’s Trust Fund by way of a designation on their tax returns.

The bill would reinstate those contribution provisions for taxable years beginning on or after January 1, 2002, and ending on or before January 1, 2008, unless a later enacted statute enacted before January 1, 2008, deletes or extends that date. This bill would also provide that the provisions would be repealed with respect to taxable years beginning on or after January 1 of the calendar year in which the Franchise Tax Board estimates by September 1 that the contributions made on returns filed in that calendar year will be less than a specified amount. This bill would, upon appropriation by the Legislature, provide for the specified allocation from the State Children’s Trust Fund of the contribution amounts obtained pursuant to this bill.

Ch. 648 (AB 2044) Salinas. Mental health realignment: reports.

Existing law requires the State Department of Mental Health to cooperate and coordinate with other state and local agencies engaged in research and evaluation studies regarding mental health.

Existing law requires the department, in collaboration with the California Mental Health Directors Association and other relevant parties, to submit specified data on the current status of county mental health programs to the Legislature by April 1, 2002.

This bill would require, instead, that all of the data be submitted by October 1, 2002.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 649 (AB 2178) Goldberg. Health care.

Existing law provides for the regulation of health care service plans by the Department of Managed Health Care and of disability insurers by the Insurance Commissioner. Existing law regulates plans and insurers that provide access to coverage for small employers and defines the term “small employer” for those purposes. A willful violation of the provisions governing health care service plans is a crime.

This bill would provide that an employer subject to a local living wage law or other legislation enacted by a local government that regulates the minimum hourly compensation of employees shall be a small employer for purposes of obtaining coverage under the small employer provisions. The bill would require an employer, effective January 1, 2003, who elects to provide health care coverage to employees subject to a local living wage law to obtain that coverage under the small employer provisions only for covered employees. The bill would repeal these provisions on January 1, 2007.

Because a violation of the bill’s requirements on health care service plans would be a crime, the bill would impose a state-mandated local program.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 650 (AB 2184) Cohn. Transit districts.

Existing law prescribes the powers and duties of transit districts and their governing boards.

This bill would prohibit the unauthorized operation of, interference with, entry into, or climbing on or in, transit facilities, property, or vehicles. The bill would make a violation of these provisions an infraction, punishable by specified fines or community service. The bill would require transit districts to maintain records of violations and citations issued pursuant to these provisions until January 1, 2005, and would require the transit districts to report to the Legislature by January 1, 2006. Because this bill would impose new responsibilities on transit districts and create new crimes, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 651 (AB 2264) Wyland. Public schools: home economics and career technical education.

Existing law, to be repealed on January 1, 2003, establishes an incentive grant program for the purpose of improving, expanding, and establishing instructional programs in home economics and technology career technical education.

This bill would delete the repeal date and would extend the program until January 1, 2008.

Ch. 652 (AB 2267) Kelley. Water rights.

(1) Existing law authorizes the executive director of the State Water Resources Control Board to issue a complaint to any person on whom civil liability may be imposed for an unauthorized water diversion or certain misstatements relating to water diversions. Existing law provides that no person may be subject to both administrative civil liability and civil liability imposed by the superior court for unauthorized water diversions pursuant to statute.

This bill would extend the authority of the state board to issue a complaint to any person on whom civil liability may be imposed for failure to pay an application fee for a permit to appropriate water and for the violation of a cease and desist order, and would provide that no person may be subject to both administrative civil liability and civil liability imposed by the superior court for those violations.

(2) Existing law requires the State Water Resources Control Board to cancel an application for a permit to appropriate water if an application fee is not received by the board within 30 days after notice by the board.

This bill, instead, would authorize the board to cancel the application and specify that civil liability may be imposed both administratively and by the superior court. The bill would provide that the applicant may be liable in an amount not to exceed \$500 for each day until the application fee is received, or the application is otherwise canceled or withdrawn.

(3) Existing law authorizes the board to issue a preliminary cease and desist order to any person holding a permit or license to appropriate water if the board determines that person is violating a term or condition of that permit or license and provides for the issue of a final cease and desist order. Existing law requires the Attorney General, upon the failure of any person to comply with a final cease and desist order and, if so requested by the board, to petition the superior court for the issuance of relief.

This bill would delete references to a preliminary or final cease and desist order and, instead, would authorize the board to issue a cease and desist order to any person who the board determines is violating, or threatening to violate, a prohibition against unauthorized diversion or use of water, any term or condition of a permit, license, certification or registration issued by the board, or prescribed orders or decisions of the board. The bill would revise provisions relating to notification by the board in the event of a violation or a threatened violation. The bill would specify that civil liability may be imposed by the superior court.

(4) Existing law makes a statement of legislative intent regarding the need for the state to take action to enforce the terms and conditions of permits and licenses to appropriate water.

This bill, in addition, would declare that it is the intent of the Legislature that the state take action to enforce certifications and registrations to appropriate water and to enforce the orders and decisions of the board.

Ch. 653 (AB 2326) Frommer. Braille reading standards.

Existing law requires school districts, special education local plan areas, and county offices of education, to provide opportunities for braille instruction for pupils who have a need for braille as a reading medium.

This bill would require the Superintendent of Public Instruction to form an advisory task force, with prescribed membership approved by the State Board of Education, to develop standards for mastery of the braille code by pupils, and to report to the Governor and the Legislature by June 30, 2004.

Ch. 654 (AB 2366) Dickerson. Political Reform Act of 1974: conflicts of interests.

Under the existing Political Reform Act of 1974, a public official at any level of state or local government may not make, participate in making, or in any way attempt to use his or her official position to influence a governmental decision in which he or she knows or has reason to know he or she has a financial interest. Existing law states that a public official has a financial interest in a decision if it is reasonably foreseeable that the decision will have a material financial effect, distinguishable from its effect on the public generally, on any source of income aggregating \$500 or more in value to the public official within 12 months prior to the time when the decision is made. Existing law, however, makes an exception to this provision, and states that a retail customer of a business entity engaged in retail sales of goods or services to the public generally is not a source of income to an official who owns a 10-percent or greater interest in the entity if the retail customers of the business entity constitute a significant segment of the public generally, and the amount of income received by the business entity from the customer is not distinguishable from the amount of income received from its other retail customers.

This bill would, with respect to a jurisdiction with a population of 10,000 or less that is located in a county with 350 or fewer retail businesses, instead apply the exception if the amount of income received by the business entity from the customer does not exceed one percent of the gross sales revenues of the business entity, as specified.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a  $2/3$  vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a  $2/3$  vote.

Ch. 655 (AB 2511) Dutra. Public utilities: Santa Clara Valley Transportation Authority: relocation.

Under existing law, certain transit districts may exercise the right of eminent domain to take any property necessary or convenient to the exercise of their powers. Under existing law,

the transit district when exercising this power is, in addition to the damage for the taking, injury, or destruction of property, also required to pay the cost of removal, reconstruction, or relocation of any structure, railways, mains, pipes, conduits, wires, cables, or poles of any public utility which is required to be moved to a new location.

This bill would authorize a relocation agreement between certain utilities, cable television corporations, or cable operators and the Santa Clara Valley Transportation Authority, entered into in connection with a transit or transportation capital improvement project, to contain certain elements, and would provide that, if a utility, cable television corporation, or cable operator abandons utility relocation work under a relocation agreement, the authority may, pursuant to the terms of the relocation agreement, assume from the utility, cable television corporation, or cable operator the work of relocating related utilities. The bill would provide that the rights and remedies available to the authority under the bill are nonexclusive and are cumulative of remedies available under other laws or pursuant to contract. The bill would require that for the provisions of this act to apply, certain conditions must have occurred related to a formal, written utility relocation agreement.

Ch. 656 (AB 2751) Pavley. State highways: soundwalls.

Existing law requires the Department of Transportation to establish a priority system for soundwalls on freeways. Existing law, the Connelly-Areias-Chandler Rice Straw Burning Reduction Act of 1991, limits the burning of rice straw in the Sacramento Valley Air Basin, and prescribes conditions and procedures for the issuance of conditional rice straw burning permits.

This bill would require the Department of Transportation to construct a demonstration noise attenuation barrier from rice straw, subject to certain conditions and requirements, including a requirement that a manufacturer of an approved rice straw barrier system provides funding.

Ch. 657 (AB 2753) Aanestad. Health care: bone densitometers.

Existing law provides for the regulation of various entities by the State Department of Health Services to protect persons from excessive and improper exposure to ionizing radiation in radiologic technology, and establishes standards of education, training, and experience for persons who use X-rays on any person.

This bill would provide for certification, by the department, of a physician and surgeon to operate and supervise the operation of an X-ray bone densitometer, as specified, if the physician and surgeon provides the department a certificate by a manufacturer of a densitometer machine or by a radiologic technology school that evidences the completion of training by the physician and surgeon in the use of the bone densitometer. This bill would require that if the physician and surgeon uses a bone densitometer other than for which he or she was certified, that he or she must complete training, as specified, in the use of that bone densitometer, and provide to the department, on the request of the department, evidence of training in the use of that bone densitometer. This bill would require the department to charge a fee for these certificates, to the extent necessary to administer certification, in an amount sufficient to cover the department's costs of implementing the provisions of this bill.

Ch. 658 (AB 2760) Simitan. Elections: special elections.

Existing law provides procedures for special elections to fill vacancies in congressional offices. These procedures provide for the issuance of a gubernatorial proclamation calling for a special election, the nomination of candidates, the setting of a date for a special primary election, and, if no candidate receives a majority of the votes cast, the setting of a date for a special general election.

This bill would provide procedures for expedited special elections to fill vacancies in congressional offices caused by a natural or manmade catastrophe that results in the death or disappearance, as defined, of at least  $\frac{1}{4}$  of the total membership of the United States House

of Representatives, including any number of California Representatives, or at least  $\frac{1}{4}$  of the total membership of the California congressional delegation. It would require the Governor to issue a proclamation within 7 days of the catastrophe calling for a special election to fill a vacancy on a Tuesday at least 56 days, but not more than 63 days, following the issuance of the proclamation, as specified.

This bill, by increasing the duties of local election officials, would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 659 (AB 2811) Migden. Student financial aid: Child Development Teacher and Supervisor Grant Program.

Existing law, which will become inoperative on June 30, 2002, and will be repealed on January 1, 2003, establishes the Child Development Teacher and Supervisor Grant Program, which is administered by the Student Aid Commission. Under the program, qualified students attending California public or private 2-year or 4-year postsecondary educational institutions who intend to teach or supervise in the field of childcare and development in a licensed children's center may receive grants of up to \$2,000 for each academic year.

This bill would delete the provision that renders the program inoperative as of June 30, 2002, and repeals the program as of January 1, 2003, thereby extending the program indefinitely.

Existing law establishes a Child Development Teacher Loan Assumption Program through which participants agree to teach or supervise in the field of childcare and development in exchange for assumption of both state and federal loans.

This bill would repeal the Child Development Teacher Loan Assumption Program.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 660 (AB 2855) Strom-Martin. Local government: allocations and apportionments: prison geocodes.

Under existing law the Controller is authorized to allocate and apportion moneys derived from specified taxes and fees to local governments, in accordance with specified formulas, some of which are based on population ratios.

This bill would, upon notice from the Department of Finance and for a specified period, reallocate and reapportion to local governments those moneys collected under the Vehicle License Fee Law, the Motor Vehicle Fuel License Tax Law, the Use Fuel Tax Law, and the Diesel Fuel Tax Law in a manner that corrects prior apportionments and allocations that were calculated using population ratios based on erroneous prison geocoding contained in the 2000 census.

Ch. 661 (AB 2879) Strom-Martin. Judges' retirement.

Existing law prescribes the rates and terms of compensation applicable to a retired judge assigned to serve in a trial court, and prescribes different rates and terms of compensation applicable to a retired judge assigned to sit in a court of appeal or the Supreme Court.

Under this bill, the rates and terms of compensation applicable to a retired judge assigned to serve in a trial court shall be applicable to retired judges assigned to serve in any court of record.

Existing law, the Judges' Retirement Law, authorizes judges to elect one of 4 optional settlements in lieu of the retirement allowance for his or her life alone. Three of those optional settlements provide for a reduced allowance payable to the judge for life and a payment or allowance payable to his or her surviving spouse, as specified.

This bill would authorize a judge who elects one of those 3 optional settlements to designate a beneficiary other than his or her spouse to receive the payment or allowance after his or her death, subject to the community property rights of the judge's spouse. The bill would also require that, if a judge elects, on or after January 1, 2003, to receive specified benefits, and the judge and his or her optional settlement beneficiary both die before receiving in annuity payments the full amount of the judge's accumulated contributions at retirement, the balance of the judge's accumulated contributions be paid to the judge's estate.

Ch. 662 (AB 2985) Committee on Labor and Employment. Private employment: wages and hours.

Existing law generally provides for the regulation of employee wages and working hours.

This bill would direct the Labor and Workforce Development Agency to contract with a research organization with certain characteristics, to study the enforcement of wage and hour laws, including the identification of federal and state resources that may be utilized to enforce wage and hour laws.

This bill also provides that the study shall be completed by December 31, 2003, and paid from existing funds not to exceed \$50,000.

Ch. 663 (AB 3022) Special Committee on Assembly Legislative Ethics. State agencies: ethics orientation.

Existing law requires each state agency to offer at least semiannually an orientation course on the relevant ethics statutes and regulations that govern the official conduct of state officials. It requires certain exempt and management-level state officials and employees to attend the orientation course once every 2 years.

This bill would expand these training requirements to include all employees of a state agency who are required to file statements of economic interest pursuant to the Political Reform Act of 1974. It would require attendance at the orientation course at least once during each consecutive period of 2 years.

Ch. 664 (AB 3034) Committee on Judiciary. Maintenance of the codes.

Existing law directs the Legislative Counsel to advise the Legislature from time to time as to legislation necessary to maintain the codes.

This bill would restate existing provisions of law to effectuate the recommendations made by the Legislative Counsel to the Legislature for consideration during 2001, and would not make any substantive change in the law.

Ch. 665 (AB 3059) Cardoza. Voter registration: notification.

Existing law requires the county elections official to send out a voter notification form upon receipt of a properly executed affidavit of registration, informing the voter that he or she is registered to vote, and may vote in any election held 15 or more days after the date shown on the reverse side of the notice.

This bill would revise the required notice, as specified, to include notification on how the voter's party affiliation has been recorded and to direct the voter to call his or her county elections office if information on the voter notification form is incorrect.

Existing law requires the Secretary of State to print blank forms of the voter notification described above, and to supply the forms to county elections officials as requested.

This bill would provide that the Secretary of State may continue to supply existing voter notification forms prior to printing new or revised forms as required by any changes to the notice requirements.

This bill would declare that it is to take effect immediately as an urgency statute.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Ch. 666 (SB 180) Speier. Proof of insurance: vehicles.

Existing law generally requires a person who applies for renewal of registration of a motor vehicle to provide proof that the applicant is in compliance with the financial responsibility laws of this state. Existing law also generally requires the driver of a motor vehicle to provide proof of financial responsibility upon demand to a peace officer or traffic collision investigator, as specified, and provides for issuance of a notice to appear for failure to do so.

Existing law, operative January 1, 2004, exempts vehicle owners residing in the City and County of San Francisco or the County of Los Angeles, and motorists who drive upon a highway in the City and County of San Francisco or the County of Los Angeles, respectively, from these financial responsibility requirements.

This bill would change the operative date of these exemptions to January 1, 2007.

This bill would provide that its provisions would become operative only if SB 1427 is also enacted.

Ch. 667 (SB 283) Speier. Healthy Families Program.

Existing law establishes the Healthy Families Program, administered by the Managed Risk Medical Insurance Board, to arrange for the provision of health services to eligible children based upon applications submitted by applicants to the program. Existing law authorizes the board to establish a list of designated eligible individuals or categories of individuals and organizations that may be compensated for assisting an applicant in completing a program application.

Existing law authorizes a plan participating in the program to provide application assistance in specific situations directly to an applicant acting on behalf of an eligible child who requests application assistance or to an applicant who is completing the program's annual eligibility review package on behalf of a subscriber enrolled with a participating plan. Under existing law, these provisions will be repealed on January 1, 2003.

This bill would, until January 1, 2006, authorize a plan participating in the program to provide application assistance directly to an applicant who is acting on behalf of an eligible person, subject to specified conditions. The bill would provide that a participating plan that directly provides application assistance to an applicant or subscriber is not eligible to receive the application assistance fee. The bill would delete the repealing provision. The bill would require the board to provide the Legislature with a specified report on the impact of the bill's provisions on or before March 1 of every other year.

Ch. 668 (SB 319) Alarcon. Teaching As A Priority Block Grant.

Existing law establishes the Teaching As A Priority Block Grant administered by the State Department of Education under which block grants are awarded to school districts to provide incentives to attract credentialed teachers to be employed and retained in low-performing schools.

This bill would require a school district, except as specified, to demonstrate a net decrease in the number of teachers holding an emergency permit or waiver at each school ranked in the bottom half of the academic performance index to be eligible to receive a full block grant in the third year of participation and would reduce the amount of a school's block grant after the second year by the amount of funds generated by pupils enrolled in a school where the school district fails to demonstrate a net decrease in the number of teachers holding an emergency permit or waiver. These provisions would be applicable only when there is no more than a 5% variation from one fiscal year to the next in funding made available for the program in the annual Budget Act.

Ch. 669 (SB 646) Ortiz. Child care employee registry: pilot program.

Existing law authorizes the State Department of Social Services to adopt regulations to create substitute care facility employee registries for persons working at more than one

facility licensed by the department, in order to permit these registries to submit fingerprint cards and child abuse index information for child care registries.

This bill would additionally authorize the department to operate a substitute child care employee registry pilot program for the above purposes, and to charge an administrative fee to participating registry facilities. The bill would specify the conditions under which the pilot program could be operated, including, among other things, limiting the pilot program to screening employees for facilities licensed as child care facilities.

Ch. 670 (SB 1331) Speier. Salvage vehicles.

Existing law requires an inspection by the Department of Motor Vehicles of any total loss salvage vehicle, or certain dismantled vehicles, when application is made to register the vehicle. Existing law also provides that the department may request an inspection of the vehicle by the Department of the California Highway Patrol, as specified. These provisions of law will be repealed as of January 1, 2003.

Existing law defines a "total loss salvage vehicle."

This bill would provide that an inspection by the Department of Motor Vehicles would not preclude referral to the Department of the California Highway Patrol for an additional inspection of the vehicle, as specified. This bill would also provide that if the vehicle was originally manufactured with a "supplemental restraint system" as defined, the reconstructed vehicle would be required to be equipped with a supplemental restraint system in good working order, as specified. This bill would also delete those provisions repealing the above-described provisions of law. This bill would also make a technical, conforming change to these provisions.

This bill would define the terms "revived salvage vehicle," "salvage vehicle rebuilder," and "supplemental restraint system."

Existing law defines various terms for purposes of the Vehicle Code.

This bill would define the term "vehicle frame" and would make other conforming technical changes.

Existing law defines "vehicle identification number" for purposes of vehicle identification.

This bill would specify determination of the vehicle identification number when the vehicle is constructed of component parts identified with more than one vehicle identification number.

Existing law authorizes the imposition of a \$50 fee to cover the costs of implementing an inspection program pertaining to inspecting salvage vehicles for purposes of registration. Existing law also provides that these provisions will be repealed on January 1, 2003.

This bill would extend those provisions of law indefinitely by deleting the provisions requiring repeal on January 1, 2003.

This bill would require a salvage vehicle rebuilder who has not applied for and received a title, as specified, to provide the buyer of a salvaged vehicle, as specified, with a certificate of inspection or certain other documentation, upon sale or transfer of the vehicle, as specified. Violation of these provisions would be a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

This bill would incorporate by reference additional changes to the Vehicle Code proposed by SB 1743 that would become operative only if that bill adds Section 11568 to the Vehicle Code, and both bills are enacted and become effective.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 671 (SB 1346) Kuehl. Solid waste: tire recycling program: rubberized asphalt concrete: public works projects.

The existing California Tire Recycling Act requires the California Integrated Waste Management Board to administer a tire recycling program that promotes and develops alternatives to the landfill disposal of used whole tires. The board is authorized to implement various grant, subsidy, and loan programs to encourage the recycling of waste tires. The board is required to adopt and biennially update a 5-year plan to establish goals and priorities for the waste tire program, including specified program elements. The budget for implementation of the act and the funding of the tire recycling program are based upon the 5-year plan.

This bill would authorize the board to implement a program, until June 30, 2006, to award grants to cities, counties, districts, and other local governmental agencies for the funding of public works projects that use rubberized asphalt concrete. The grants would be funded by an appropriation in the annual Budget Act from the California Tire Recycling Management Fund.

The bill would require the board, in cooperation with its Rubberized Asphalt Concrete Technology Centers, to create, annually update, and post on each center's Internet Web site a data base of public works projects that include rubberized asphalt concrete that were completed by local agencies. The bill would require the Department of Transportation to post on its public Internet Web site data and descriptions regarding state public works projects using rubberized asphalt concrete. The board would be required to post on its public Internet Web site links to connect to all of this information.

The bill would require the board to include the rubberized asphalt concrete technology grant program as a program element in the 5-year plan.

#### Ch. 672 (SB 1410) Chesbro. Mobilehome parks: homeowners: renting.

Existing law, the Mobilehome Residency Act, provides that the owner of any park, and a person employed by the owner, is subject to all rules and regulations of the mobilehome park, with specified exceptions. Existing law defines management to mean the owner of a mobilehome park or an agent authorized to act on the owner's behalf in connection with park tenancy. Existing law further provides that these provisions do not validate, invalidate, or express a legislative policy regarding the subletting of a mobilehome park space by a tenant.

This bill would delete the provisions concerning the subletting of a mobilehome park space by a tenant and the status of legislative policy in this regard. The bill would require management to permit a homeowner to rent his or her home that serves as the homeowner's primary residence or sublet his or her space if a medical emergency or treatment requires the homeowner to be absent from his or her home, subject to an attending physician's written confirmation. The bill would require that rentals or subleases under these circumstances conform to specified provisions. The bill would prohibit a homeowner from charging a renter or sublessee under these provisions more than an amount necessary to cover the cost of space rent, utilities, and scheduled loan payments on the mobilehome, if any.

Existing law specifies the reasons for termination of a tenancy in a mobilehome park, and prohibits a tenancy in a mobilehome park from being terminated to make the homeowner's site available for a person who purchased a mobilehome from a park owner or his or her agent.

This bill would also prohibit a tenancy in a mobilehome park from being terminated to make the homeowner's site available for a person who purchased or proposes to purchase, or who rents or proposes to rent, a mobilehome from a park owner or the owner's agent.

#### Ch. 673 (SB 1530) Torlakson. Vehicles.

Existing law provides that vehicles carrying aggregate material only carry that material in the cargo area of the vehicle, that the material be covered, and that the cargo area be maintained without any holes, cracks, or openings through which material could escape. Existing law also requires vehicles carrying aggregate material to be fitted with certain equipment, as specified. Existing law provides that a subsequent violation of provisions

relating to the prevention of the escape of aggregate materials from vehicles, as specified, is a misdemeanor.

This bill would require a person who provides property on which aggregate material or any other material is loaded into vehicles, unless there are 100 yards or less between the scale houses where trucks are weighed and the point of egress to the public road, to provide a location at which vehicle operators can comply with these provisions before entering a highway. Drivers leaving locations exempted from this provision would be authorized to operate on public roads until they are able to safely cover their load but no further than 200 yards from the point of egress to the public road. Because this bill would expand the scope of an existing crime, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 674 (SB 1563) Polanco. Telecommunications: services.

Existing law, the Public Utilities Act, sets forth the findings and declarations of the Legislature regarding described policies for telecommunications in California.

This bill would include within those policies, assisting in bridging the “digital divide” by encouraging expanded access to state-of-the-art technologies for rural, inner-city, low-income, and disabled Californians, and encouraging fair treatment of consumers through consumer-oriented conduct.

The bill would also require the Public Utilities Commission, not later than April 1, 2003, to convene a proceeding to develop a plan for encouraging the widespread availability and use of advanced communications infrastructure, and would require the proceeding to encourage participation from a broad cross section of the communications industries, including those entities that the commission does not regulate, as well as users and community representatives. The bill would require the commission to encourage participation by community-based organizations, including nonprofit community technology programs, as defined, and libraries.

The bill would require the commission to submit a report to the Governor and the Legislature no later than December 31, 2004, of its findings and recommendations regarding the plan, that identifies factors preventing the ubiquitous availability and use of advanced communications services, and assesses the consequences of and develops strategies for addressing this inadequacy while encouraging the deployment of adequate investment.

The bill would provide that the provisions concerning the commission’s convening of a proceeding and the related report would be repealed on January 1, 2005.

This bill would incorporate additional changes to Section 709 to be operative if this bill and SB 1863 are enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 675 (SB 1613) Dunn. Long-term care insurance.

(1) Existing law requires an insurer of long-term care in California to provide specified continuing education to agents and insurer representatives authorized to solicit individual consumers for the sale of long-term care insurance.

This bill would require the evidence of the continuing education to be filed with and approved by the Insurance Commissioner for specified nonresident licensees.

(2) Existing law requires an insurer of long-term care in California to notify current holders of its policies within 12 months of developing new benefits or benefit eligibility or new policies with new benefits or benefit eligibility.

This bill would instead require, until June 30, 2003, the notification to be provided within 18 months if certain conditions are met.

(3) Existing law requires an insurer to file with the Insurance Commissioner by January 1, 2002, premium rate schedules and new policy forms for all group long-term care insurance policies that it will offer, sell, issue, or deliver on or after January 1, 2003.

This bill would specify that an insurer is not prohibited from filing new group and individual policy forms with the commissioner after January 1, 2003. The bill would authorize an insurer that has filed premium rate schedules and new policy forms by March 1, 2002, to continue to offer and market long-term care policies approved prior to January 1, 2002, until 90 days after approval of the premium rate schedules and new policy forms or June 30, 2003.

Ch. 676 (SB 1630) Chesbro. Services for the developmentally disabled: state council: area boards.

Under existing law, services are provided to persons with developmental disabilities and their families pursuant to the authority of various entities, including the State Department of Developmental Services, the State Council on Developmental Disabilities, and on a localized level, area boards on developmental disabilities. Under existing law, membership appointments for the council and the boards are made by the Governor and the governing bodies of each county, in accordance with specified criteria. Existing law also establishes the Organization of Area Boards, consisting of the respective chairpersons or their designees from among the volunteer board members of the individual boards. In addition, existing federal law, the Developmental Disabilities Assistance and Bill of Rights Act of 2000, imposes specified requirements on states that provide services to persons with developmental disabilities, as a condition of receiving federal funding.

This bill would recast and revise the provisions relating to the composition, powers, and duties of the council and the boards, and would make various technical and conforming changes, including changes to conform state law with federal requirements. The bill would increase the membership of the council from 19 to 29, would specify that one member of each area board shall serve on the council, and would revise the Governor's other council appointments. The bill would eliminate the Organization of Area Boards, and would transfer certain of its powers and duties to the council.

This bill would provide that, as of January 1, 2003, no further expenditures shall be charged against a specified item of the Budget Act of 2002 for support of area boards on developmental disabilities. The bill would further require all remaining area board appropriation authority to be transferred to another specified budget item, for support of the State Council on Developmental Disabilities, thereby making an appropriation.

Ch. 677 (SB 1690) Margett. Criminal procedure: persons committed to medical facilities: study.

Existing law establishes procedures for determining a person found not guilty by reason of insanity has been restored to sanity, and procedures for placing persons who have been committed to medical institutions by criminal procedures to obtain outpatient status.

This bill would direct the State Department of Mental Health to undertake a study regarding the application and impact of those procedures, and the potential advantages and disadvantages of certain proposed procedures, as specified. This bill would require a report to the Legislature not later than January 1, 2004.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 678 (SB 1695) Escutia. Drug overdose deaths.

Existing law, the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act, requires the Emergency Medical Services Authority to establish minimum standards and regulations for the training and scope of practice of an emergency medical technician-I. Under existing law, an emergency medical technician-II is authorized to administer naloxone, within the scope of his or her practice.

This bill would authorize counties to establish training and certification programs to permit an emergency medical technician-I, as specified, to administer naloxone hydrochloride, the antidote to heroin overdose, by means other than intravenous injection if he or she has completed training and passed a test, as specified. The bill would require the Emergency Medical Services Authority to develop guidelines relating to the county certification programs. These provisions would be operative until a specified date.

This bill would require the State Department of Alcohol and Drug Programs to place on its Internet Web site, for a period of not less than 6 months, information, as specified, regarding drug overdose trends and death rates.

Ch. 679 (SB 1726) Vasconcellos. Pool and spa safety.

(1) Existing law establishes the Swimming Pool Safety Act, which makes provision for various safety requirements for swimming pools and spas.

This bill would require, whenever a construction permit is issued for the construction of a new swimming pool or spa, that the suction outlet of the pool or spa meet specified standards to provide circulation throughout the pool or spa, and protection against physical entrapment of bathers. The bill would also prescribe standards for any owner of a new swimming pool or spa who chooses to install a backup system in addition to the above requirements. By increasing the inspection duties of local officers, this bill would impose a state-mandated local program.

The bill would also require the Director of Health Services to review standards relating to entrapment hazards in swimming pools and spas within 90 days of their adoption by the United States Consumer Product Safety Commission and to make recommendations to the Governor and the Legislature regarding their adoption by the state.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 680 (SB 1749) Polanco. Boxing and martial arts.

Existing law, the Boxing Act, provides for the licensure of boxers and martial arts fighters by the State Athletic Commission and makes a violation of its provisions a misdemeanor. The act requires that applicants for licensure and for licensure renewal as a professional boxer or as a professional martial arts fighter submit documentation of negative test results for the human immunodeficiency virus and hepatitis B virus.

This bill would additionally include within this requirement testing for hepatitis C virus and would require professional boxers and martial arts fighters to submit to the commission negative results for all of the required tests prior to competing in a match that occurs 180 days or more after the date of the tests submitted by the boxer or fighter for issuance or renewal of his or her license.

Because the bill would specify an additional requirement under the Boxing Act, a violation of which would be punishable as a misdemeanor, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 681 (SB 1954) Figueroa. State Board of Chiropractic Examiners.

Existing law requires the State Board of Chiropractic Examiners to prepare an analysis and submit a report outlining the board's mission, goals, objectives, complaint data, fund condition, licensing process, and legislative efforts to the Joint Legislative Sunset Review Committee on or before September 1, 2001.

This bill would extend the time the board would have to prepare this analysis and submit this report to the committee to September 1, 2005, and would make a related change.

Ch. 682 (SB 2018) Figueroa. Consumer boards and committees: funds subject to appropriation.

Existing law creates certain funds for the boards, committees, and programs under the jurisdiction of the Department of Consumer Affairs established to regulate various professions and vocations. Under existing law, the boards, committees, and programs obtain revenue from licensing and other regulatory fees collected from the persons subject to their licensing and regulatory provisions, which revenue is deposited into a particular fund. Existing law provides in some cases for revenue derived from administrative fines, civil penalties, and criminal penalties or other enforcement actions imposed or undertaken by the regulating board, committee, or program to be deposited in the same fund. Existing law provides in some cases that the money in the fund, including both regulatory fees and penalties, is continuously appropriated for certain purposes. Thus, a proposed statute changing the purposes for which money in a continuously appropriated fund may be expended, or providing an increase in the revenues deposited in a continuously appropriated fund, constitutes an appropriation.

This bill, notwithstanding any other provision of law, would provide that the money in certain funds that is attributable to fines, penalties, or other enforcement actions is not continuously appropriated. The bill would provide that these moneys shall only be available for expenditure upon appropriation by the Legislature. The bill would also authorize the annual Budget Act to appropriate, in a single budget item for each individual fund, the entire amount available for expenditure in the budget year from that individual fund. That appropriation could include the portion of a fund that is continuously appropriated and the portion that is not continuously appropriated.

Ch. 683 (SB 2019) Speier. Health care practitioners: student loans.

Existing law provides for the licensure and regulation of health care practitioners, as defined.

This bill would authorize a licensing board or agency having jurisdiction over a licensee to cite and fine a licensed health care practitioner who is in default on a United States Department of Health and Human Services education loan, including a Health Education Assistance Loan. The bill would require a board, prior to issuing a citation, to take into account the population served by the health care practitioner and his or her economic status. The bill would authorize the board to deny a license to an applicant to become a health care practitioner or deny renewal of a license if he or she is in default of a loan until the applicant or licensee clears the default or makes satisfactory repayment arrangements.

This bill would require that each board that issues citations and imposes fines retain the money from these fines for deposit into its appropriate fund. Because some of these fines would be deposited into funds which are continuously appropriated, the bill would make an appropriation.

This bill would become operative on July 1, 2003.

Ch. 684 (AB 2197) Koretz. Medi-Cal: benefits for persons infected with HIV who are not disabled.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. Counties are responsible for

making eligibility determinations under the Medi-Cal program. One of the methods by which services are provided under the Medi-Cal program is through enrollment of recipients in Medi-Cal managed care plans.

This bill would require the State Department of Health Services to expand eligibility for benefits under the existing Medi-Cal program, with certain exceptions, to include nondisabled persons with HIV enrolled in the AIDS Drug Assistance Program, and who would be eligible for Medi-Cal if disabled. This bill would provide that the expansion would be implemented on the date all applicable federal waivers are granted, as specified. The bill would provide that enrollment in Medi-Cal pursuant to the bill would be limited pursuant to an allocation system to be developed by the department. The bill would require the department to meet federal revenue neutrality requirements through the savings generated by voluntary enrollment into Medi-Cal managed care of persons who are disabled as a result of AIDS, and who are either receiving Medi-Cal benefits on a fee-for-service basis as of January 1, 2003, or who become eligible to receive Medi-Cal benefits on or after that date. The bill would require the department to seek appropriate federal waivers. The bill would prohibit the department from enrolling persons in the program established by this bill until the department can ensure sufficient savings equal to or greater than the cost of providing benefits to these persons.

By increasing counties' responsibilities for Medi-Cal eligibility determinations, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

**Ch. 685 (AB 1830) Frommer. Tobacco products: sales to minors.**

Existing law creates the Stop Tobacco Access to Kids Enforcement (STAKE) Act. The STAKE Act is designed to reduce the availability of tobacco products to minors through specified sales restrictions and enforcement activities. Existing law authorizes the State Department of Health Services to assess civil penalties against any person, firm, or corporation that furnishes a tobacco product to a minor.

This bill would prohibit any person from distributing or selling tobacco products via the United States Postal Service, or any other public or private postal or package delivery service, to any purchaser who is a minor. This bill would require a specified distributor or seller, among other things, to verify that a purchaser of tobacco products is 18 years of age or older, and to telephone the purchaser after 5 p.m. to confirm the order prior to shipping the tobacco products.

This bill would authorize a city attorney, district attorney, or the Attorney General to assess specified civil penalties against a person, firm, corporation, or other entity that violates any of these provisions.

**Ch. 686 (SB 1766) Ortiz. Tobacco products: sales.**

Existing law, known as the Stop Tobacco Access to Kids Enforcement (STAKE) Act, requires the State Department of Health Services to establish and administer a program to reduce the availability of tobacco products to minors. The STAKE Act prescribes certain civil penalties for violations of its provisions, which the department is required to enforce.

Existing law imposes taxes at specified rates upon the distribution of cigarettes and tobacco products within the state. Existing law provides that any person who knowingly violates these provisions is guilty of a misdemeanor and may be subject to a fine.

This bill would require each retail sale of cigarettes in the state to be a vendor-assisted, face-to-face sale. The bill would define a “face-to-face sale” as a sale in which the buyer and seller or the seller’s employee or agent are within each other’s physical presence at the time of the sale, and would exclude from this definition any transaction that is conducted by mail order, the Internet, telephone, or any other anonymous transaction method. The bill would not prohibit any lawful sales that occur by means of a cigarette vending machine. This bill would also provide that a person may engage in a non-face-to-face sale of cigarettes if the seller complies with specified requirements concerning payment of applicable state taxes.

This bill would provide that any person who violates its provisions is subject to specified civil penalties, and that the Attorney General or a city attorney, county counsel, or district attorney may bring a civil action to enforce the provisions of the bill.

Existing law provides that, except as expressly provided by statute, a prevailing party is entitled as a matter of right to recover costs, including attorney fees when authorized by contract, statute, or law, in any action or proceeding.

Existing federal law, known as the Jenkins Act, requires any person that sells or transfers in interstate commerce cigarettes into a state that taxes the sale or use of cigarettes to file certain information with the tobacco tax administrator of that state.

This bill would provide that in an action in the name of the people of the state against any person for failure to comply with the Jenkins Act the court, to the extent not expressly prohibited by federal law, shall award fees and costs, including reasonable attorney’s fees, to the people if the people succeed on any claim to enforce the Jenkins Act.

Ch. 687 (AB 2205) Koretz. Tobacco products: prevention of sales of untaxed cigarettes: multiagency task force.

The existing Cigarette and Tobacco Products Tax Law imposes a specified tax on the distribution of cigarettes. Existing law also imposes a penalty of \$100 for each carton of 200 cigarettes, or portion thereof, upon any person who knowingly possesses, keeps, stores, or retains for the purpose of sale, or sells, or offers to sell, any package of cigarettes to which there is not affixed a stamp or meter impression. Existing law requires, with regard to the \$100 penalty for the distribution of a carton of black-market cigarettes, that the court transmit 50% of the penalty assessed to the local prosecuting jurisdiction and 50% of the penalty assessed to the State Board of Equalization for transmittal to the Treasurer for deposit in the General Fund.

This bill would, for the period beginning on January 1, 2003, and ending on January 1, 2006, impose an additional penalty for the distribution of black-market cigarettes in an amount equal to \$100 per carton, and would provide for the additional \$100 penalty to be deposited in the Unlawful Sales Reduction Fund, which the bill would create, for appropriation by the Legislature to the Office of Criminal Justice Planning to be allocated for the funding of a competitive grant program, to be established by the Legislature, to award grants to local jurisdictions to establish a multiagency task force for the purpose of significantly reducing the sales of black-market cigarettes and creating a deterrent to those sales, through the focused investigation and prosecution of sales of black-market cigarettes and other associated offenses and crimes.

Ch. 688 (AB 1010) Correa. Transportation: franchise agreements.

(1) Existing law authorizes the Department of Transportation to enter into agreements with private entities for the construction by and lease to private entities of 4 transportation demonstration projects, including at least one in northern California and one in southern California. Existing law authorizes these private entities to charge tolls for the use of the privately constructed facilities. Existing law requires that any excess toll revenue be applied to any debt the entity incurred building the facilities to be paid into the State Highway Account in the State Transportation Fund. Existing law provides that the department may

continue to charge tolls for use of these facilities after the lease held by the private entity has expired.

This bill would provide that the collection of tolls for the use of these facilities would terminate at the expiration of the franchise agreement. The bill would also delete the provisions specifying the location of the demonstration projects and would preclude the department from entering into a new agreement for these projects after January 1, 2003.

(2) Existing law authorizes the Orange County Transportation Authority to acquire, construct, develop, lease, or dispose of rights-of-way, rail lines, buslines, and other facilities necessary for transit purposes.

This bill would additionally authorize the authority with respect to the segment of State Highway Route 91 between Interstate Highway Route 15 and State Highway Route 55 only, to acquire streets, highways, bridges, tunnels, and connector roads necessary for transit or transportation purposes. The bill would require the department, if requested by the Orange County Transportation Authority, to approve the assignment of a franchise agreement between the department and the California Private Transportation Company for State Highway Route 91 to the Orange County Transportation Authority. The bill would provide that the authority shall not sell or assign its interest in the franchise agreement without approval of the Legislature by the enactment of a statute. The bill would authorize the authority to impose tolls on State Highway Route 91 to be used for specified purposes. The bill would specify that the authority's authorization to impose the toll would terminate upon its payment in full of certain bonded indebtedness or on December 31, 2030, whichever occurs earlier, and that the segment of State Highway Route 91 between Interstate Highway Route 15 and State Highway Route 55 would revert to the department at that time. The bill would provide that neither the state nor any other public agency is liable for any debt of the authority. The bill would create an advisory committee composed of 5 voting members each from the board of the Orange County Transportation Authority and the Riverside County Transportation Commission, and 3 nonvoting members from the San Bernardino Associated Governments and the department to review and make recommendations to the authority regarding the facilities acquired, tolls imposed, and the maintenance and operations of State Highway Route 91. The bill would make the exercise of the authority's powers in Riverside County subject to the approval of the Board of Supervisors of Riverside County and the Riverside County Transportation Commission and in consultation with the advisory committee. The bill would specify that all costs associated with the advisory committee would be paid by the Orange County Transportation Authority.

Ch. 689 (AB 1840) Diaz. Private security services: peace officers.

Existing law, the Private Security Services Act, provides for the licensure of private patrol operators and the registration of security guards by the Director of Consumer Affairs and requires that they comply with certain terms in the conduct of their operations, including submitting a set of fingerprints to the Department of Justice and paying specified fees for licensure, registration, and various other purposes. Existing law exempts certain peace officers and reserve officers from the provisions requiring the submission of fingerprints.

This bill would require a peace officer who is engaged as a security guard to pay registration fees and would exempt the peace officer from any other fees imposed on security guards under certain conditions. The bill would require a peace officer exempt from the provisions requiring the submission of fingerprints to submit verification of their active duty status to the Bureau of Security and Investigative Services, subject to certain conditions.

Existing law regulates the possession and use of a firearm by a private patrol operator or security guard.

The bill would permit a peace officer who has complied with specified conditions to carry a firearm while working as a security guard or security officer.

The bill would incorporate additional changes in Section 7583.9 of the Business and Professions Code proposed by AB 248 or SB 1241, to be operative only if any or all of the

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

other bills are enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 690 (AB 2670) Wyman. Income taxes: victims of terrorism.

The Personal Income Tax Law provides for, in specified conformity to federal income tax laws, the exclusion of certain items from gross income, the tax treatment of certain survivor benefits, provisions relating to estates, trusts, beneficiaries, and decedents, postponement of certain tax deadlines, and disclosure of tax return information.

This bill would also provide conformity to the federal Victims of Terrorism Tax Relief Act of 2001, as specified.

Existing law provides for the waiver of interest accrued against the income tax liability of an individual during a filing extension period authorized for individuals determined to be affected by a presidentially declared disaster, if that individual is located in an area affected by a presidentially declared disaster or in a county or city that is proclaimed by the Governor to be in a state of disaster.

This bill would extend this waiver provision to any taxpayer, including a business entity, located in an area affected by a presidentially declared disaster or in a county or city proclaimed by the Governor to be in a state of disaster.

This bill would take effect immediately as a tax levy.

Ch. 691 (AB 2818) Aanestad. Registered dental hygienists.

Existing law requires the Dental Board of California to license a person as a dental hygienist who completes a board-approved education program, and performs satisfactorily on certain exams. Existing law authorizes the board to impose various fees upon dental hygienists for deposit in the State Dental Auxiliary Fund, a continuously appropriated fund.

This bill would authorize the board to license a person who has not taken an examination as a dental hygienist if the person is licensed in another state and meets additional specified requirements.

By providing for the licensure of additional registered dental hygienists and thereby increasing the source of funds from fees and fines for deposit into a continuously appropriated fund, the bill would make an appropriation.

The bill would require the board to report to the Legislature by January 1, 2006, on the impact of the bill.

This bill would incorporate additional changes in Section 1758 of the Business and Professions Code, proposed by SB 2022, to be operative only if SB 2022 and this bill are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 692 (AB 2875) Vargas. Military bases: recovery: retention.

The existing Local Agency Military Base Recovery Area Act authorizes local agencies to propose to the Technology, Trade, and Commerce Agency specific geographic areas to receive regulatory, tax, and other governmental program incentives to offset federal military base closures by being designated local agency military base recovery areas. Under existing law, a designation as a local agency military base recovery area is binding for a period of 8 years.

This bill instead would specify that the designation would be for an 8-year period that shall expire 8 years after the Technology, Trade, and Commerce Agency has determined that the later of specified conditions has been met.

Ch. 693 (SB 1578) Johannessen. Emission control: specially constructed vehicles.

Existing law defines a specially constructed vehicle as a vehicle that is built for private use, not for resale, and is not constructed by a licensed manufacturer or remanufacturer, and requires all specially constructed vehicles to be subject to the emission control system testing and certification requirements established by the Department of Consumer Affairs. Existing

law also requires a passenger vehicle or pickup truck that is a specially constructed vehicle to be inspected by stations authorized to perform referee functions, and requires the Department of Motor Vehicles to provide an initial registration to no more than the first 500 vehicles that meet the specified criteria and are presented to the department each year for registration.

This bill would eliminate the requirement that the registration provided to the first 500 vehicles by the Department of Motor Vehicles be an initial registration for that vehicle, and would specify that the 500-vehicle limit does not apply to the renewal of registration of a vehicle previously registered pursuant to those provisions.

This bill would require the department, if it receives during a calendar year an application for registration of a specially constructed passenger vehicle or pickup truck after it has registered 500 specially constructed vehicles during that calendar year, and the vehicle has not been previously registered, to assign the same model year as the calendar year in which the application is submitted, for purposes of determining emissions control equipment and inspection requirements for the vehicle. The bill would require the department to deny an application for registration during a calendar year of a specially constructed passenger vehicle or pickup truck that was previously registered, if the application for registration is received after the department has registered 500 specially constructed vehicles during that calendar year and the application requests a model-year determination different from the model-year determination assigned in the previous application. The vehicle owner would be subject to the emission control and inspection requirements applicable to the model-year assigned in the previous registration. The bill would permit the vehicle owner to apply for a different model-year determination in a subsequent calendar year subject to the 500-vehicle annual limitation.

Ch. 694 (SB 2051) Bowen. Income and corporation taxes: information privacy.

Existing law prohibits the disclosure of any information concerning any taxpayer by the State Board of Equalization, the Franchise Tax Board, and the Director of Employment Development to any person, except as specifically authorized by statute.

Existing law, until December 31, 2008, permits, under specified conditions, the disclosure of tax information to tax officials of any city.

This bill would express the intent of the Legislature that the board continue to implement the provisions permitting disclosure of this tax information to city tax officials if the specified conditions are met.

Existing income and corporation tax laws provide for determinations of liability for tax, penalty, interest, fine, forfeiture, or other imposition or offense thereunder.

This bill would provide that specified provisions of the Information Practices Act of 1977, relating to privacy of individuals, shall not be applied to those determinations.

Ch. 695 (SB 2100) Torlakson. Contra Costa County: retirement benefits.

The County Employees Retirement Law of 1937 authorizes counties and districts, if authorized by the county board of supervisors, to provide service retirement allowances for safety members based on a 3% at age 50 formula.

This bill would authorize the Contra Costa County Board of Supervisors and the governing boards of districts within that county, if authorized by the board of supervisors, to negotiate with a recognized employee organization representing safety members regarding the conditions, as specified, to be required of employees who are or may become subject to the 3% at age 50 formula.

The County Employees Retirement Law of 1937 authorizes counties and districts, if authorized by the county board of supervisors, to provide service retirement allowances for general members based on a 2% at age 55 formula. Existing law also authorizes the Contra Costa County Board of Supervisors to adopt a Tier Two and a Tier Three retirement benefit program for county officers and employees.

This bill would authorize the Contra Costa County Board of Supervisors and the governing boards of districts within the county, if authorized by the board of supervisors, to make the Tier Three program applicable to all new employees and to all current employees in Tier Two, and to provide members in Tier Three or Tier One, or both, with retirement allowances based on the 2% at age 55 benefit formula.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 696 (SB 796) Costa. High-Speed Rail Authority.

Existing law creates the High-Speed Rail Authority with specified powers and duties relating to the development and implementation of an intercity high-speed rail system. Existing law provides for termination of the authority on December 31, 2003. Existing law authorized the authority to submit a high-speed rail financial plan, including various financing mechanisms, to the Secretary of State for placement on the general election ballot of 1998 or 2000 for voter approval.

This bill would delete the termination date and the now-obsolete provisions relating to submission of the plan to the voters at the 1998 or 2000 general election. The bill would instead authorize the authority to submit the financial plans to the Legislature and the Governor and to keep the public informed of its activities.

Existing law allows an action against a state agency that is required to be filed in a court in the County of Sacramento to also be filed in a court in any county in which the Attorney General has an office.

This bill would require any legal or equitable action against the authority to be filed solely in an appropriate court in the County of Sacramento.

This bill would incorporate additional changes to Section 185020 of the Public Utilities Code proposed by SB 1799, to become effective only if SB 1799 and this bill are enacted and become effective on or before January 1, 2002, and this bill is enacted last.

Ch. 697 (SB 1856) Costa. Safe, Reliable High-Speed Passenger Train Bond Act for the 21st Century.

Existing law creates the High-Speed Rail Authority with the responsibility of directing the development and implementation of intercity high-speed rail service.

This bill would enact the Safe, Reliable High-Speed Passenger Train Bond Act for the 21st Century, which, subject to voter approval, would provide for the issuance of \$9.95 billion of general obligation bonds, \$9 billion of which would be used in conjunction with available federal funds for the purpose of funding the planning and construction of a high-speed train system in this state pursuant to the business plan of the authority. Nine hundred fifty million dollars of the bond proceeds would be available for capital projects on other passenger rail lines to provide connectivity to the high-speed train system and for capacity enhancements and safety improvements to those lines. Bonds for the high-speed train system would not be issued earlier than January 1, 2006.

The bill would provide for the submission of the bond act to the voters at the general election on November 2, 2004.

Ch. 698 (SB 1560) Figueroa. Telephone solicitations.

Existing law prohibits certain unfair business practices, including certain advertising practices. Existing law requires the Attorney General, not later than January 1, 2003, to maintain a "do not call" list, containing the telephone numbers and ZIP Codes of residential or wireless telephone subscribers who do not wish to receive unsolicited and unwanted telephone calls from telephone solicitors. Existing law requires telephone solicitors to pay a fee to the Attorney General to obtain copies of the "do not call" list. Existing law provides that it is unlawful for a person to obtain a "do not call" list for specified purposes. Existing law makes it a crime to violate any of the provisions governing advertising.

This bill would delay until April 1, 2003, the requirement that the Attorney General maintain a “do not call list.” The bill would provide that it is unlawful for a person to obtain the list for the purpose of selling or leasing it to a person other than a telephone solicitor or for the purpose of a telephone solicitor selling or leasing the list. The bill would prohibit any person, other than the Attorney General, from selling or leasing the list. The bill would also prohibit a person from purchasing the list except from the Attorney General.

Because a violation of this bill’s provisions with respect to advertising would be a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 699 (AB 1769) Leslie. Advertising: unsolicited cellular telephone and pager text messages.

Existing law provides for the regulation of advertising and specifically prohibits a person conducting business in this state from faxing or electronically mailing unsolicited advertising material, unless certain conditions are satisfied. Existing law provides that a violation of the provisions regulating advertising is a misdemeanor, and also provides for imposition of civil penalties and injunctive relief.

This bill would, subject to certain exceptions, generally prohibit a person or entity conducting business in this state from transmitting or causing to be transmitted a text message advertisement to a cellular telephone or pager equipped with short message or a similar capability. By creating a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 700 (AB 2944) Kehoe. Advertising: facsimile machines.

Existing state law prohibits a person conducting business in this state from faxing or electronically mailing unsolicited advertising material, unless certain conditions are met.

This bill would delete the existing state law prohibition relative to the faxing of unsolicited advertising material.

Ch. 701 (AB 989) Chan. Holocaust restitution payments.

Existing law establishes programs for education grants, priorities, and program enrollments, state disability insurance benefits, and public social services.

The Personal Income Tax Law provides various exclusions from gross income in determining tax liability.

Existing law excludes from the determination of state personal income taxes and eligibility for various public assistance program benefits certain compensation or settlements for unrecovered property of victims of the holocaust.

This bill would provide an exclusion of holocaust restitution payments, as defined, received by an eligible individual, or the individual’s heirs or estate, and for any excludable interest, as defined, for purposes of determining eligibility for state education grants, priorities, and program enrollments, state disability insurance benefits, and public social services, to the extent permitted by federal law, and for purposes of determining personal income taxes.

Under existing law, moneys in the Disability Fund are continuously appropriated to the Employment Development Department for purposes of paying disability benefits.

Because this bill would expand eligibility for disability benefits, it would constitute an appropriation.

Under existing law, certain public social services programs, the State Supplementary Program for the aged, blind, and disabled and the CalWORKs program, are funded through a continuing appropriation, and, by excluding benefits from the determination of eligibility for benefits under those programs, this bill would increase the number of persons who would be eligible for those program benefits, resulting in an increase in the level of funding under those programs, thus resulting in an appropriation.

Under existing law, counties are responsible for the administration of, and determination of eligibility for, those public social service programs. By increasing the number of persons who would be eligible for benefits under those programs, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 702 (AB 2003) Koretz. The Holocaust and genocide.

Existing law requires the State Department of Education to incorporate into prescribed materials, frameworks on history and social science that deal with civil rights, human rights violations, genocide, slavery, and the Holocaust, and encourages all state and local professional development activities to provide teachers with content background and resources to assist in teaching about civil rights, human rights violations, genocide, slavery, and the Holocaust.

This bill would declare that the Legislature encourages the incorporation of survivor, rescuer, and liberator testimony into the teaching of human rights, genocide, and the Holocaust. The bill would also require the Model Curriculum for Human Rights and Genocide to be made available to schools in grades 7 to 12 as soon as funding is available and would require the State Department of Education to make the curriculum available on its Web site.

Existing law requires the Superintendent of Public Instruction to designate nonprofit agencies to serve as regional social tolerance resource centers and provides one-time funding for support of the centers. Existing law requires that the agencies selected have demonstrated success in prescribed activities, including, but not limited to, providing teacher training activities and curricular materials.

This bill would, in addition, until January 1, 2005, establish the California Taskforce on Holocaust, Genocide, Human Rights, and Tolerance Education, as an advisory body, and would establish the Center for Excellence on the Study of the Holocaust, Genocide, Human Rights, and Tolerance as a pilot program at the California State University, Chico to promote education regarding the Holocaust, genocide, human rights, and tolerance, including, but not limited to, providing teachers with the knowledge and training to effectively teach pupils about the Holocaust, genocide, human rights, and tolerance.

The bill would authorize the use of certain funds made available pursuant to the Budget Act of 2002 for purposes of the CSU Centers for Excellence to be used to establish the Center for Excellence on the Study of the Holocaust, Genocide, Human Rights, and Tolerance, as a pilot program at California State University, Chico.

Ch. 703 (AB 1902) Reyes. Automobile insurance: damaged child safety restraint systems.

Existing law provides for regulation of insurers by the Insurance Commissioner and describes the coverage required to be provided by various categories of automobile

insurance. Under these provisions, coverage is required to be provided for the replacement of a child passenger restraint system that was in use by a child during an accident for which the policy is applicable due to the liability of an insured.

This bill, upon the filing of a claim pursuant to a policy, would impose an obligation upon an insurer to ask, unless it is otherwise determined, whether a child passenger restraint system was in use by a child during an accident that is covered by the policy, and if so, to replace the child passenger restraint system in accordance with these provisions or reimburse the cost to a claimant for purchasing a new child passenger restraint system.

This bill would also provide that an insured may surrender a replaced child passenger restraint system to the nearest office of the Department of the California Highway Patrol.

Existing law prohibits a manufacturer, wholesaler, or retailer from selling or installing a child passenger restraint system in a motor vehicle if the system does not conform to all applicable federal motor vehicle safety standards on the date of sale or installation. A violation of this provision is a misdemeanor.

This bill would prohibit an individual from selling or offering for sale a child passenger restraint system that was in use by a child during an accident, subject to a fine of \$100. By creating a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 704 (AB 1914) Kehoe. Hearing aids.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. Existing law provides for hearing aids as a covered benefit, subject to utilization controls.

This bill would provide that hearing aids are a covered Medi-Cal benefit only after specified examinations and evaluations are completed by certain individuals.

This bill would make one hearing aid assessment in a 12-month period a covered benefit under Medi-Cal. In the event a beneficiary receives more than one hearing aid assessment within a 12-month period, Medi-Cal would reimburse the first valid claim for only one hearing aid assessment unless additional assessments are deemed to be medically necessary.

#### Ch. 705 (AB 1999) Correa. Immigration consultants.

Existing law, the Immigration Consultants Act, authorizes a person claiming to be aggrieved by an immigration consultant to bring a civil action for injunctive relief or damages, or both. An injured party may also seek civil penalties against an immigration consultant in an amount not to exceed \$100,000. Existing law also allows any other party to bring a civil action on behalf of the general public against an immigration consultant for injunctive relief.

This bill would authorize the Attorney General, district attorney, or city attorney to seek civil penalties not exceeding \$100,000 against immigration consultants for a violation of the act. The bill would expand the types of civil remedies available to include restitution and other equitable relief and would require that an action for civil penalties brought by the Attorney General, a district attorney, or a city attorney seek these remedies. The bill would provide that an action being brought on behalf of the people would not preclude an action being brought by an injured person.

Existing law requires that a court impose a civil penalty for a violation of the Immigration Consultants Act, and that the court, in imposing the penalty, consider certain relevant circumstances presented by the parties to the case.

This bill would instead authorize the court to consider the relevant circumstances in assessing the civil penalty.

Existing law prohibits a person from representing himself or herself as an immigration consultant unless the person has a bond on file with the Secretary of State. Existing law permits a person awarded damages in a civil action to recover the damages from that bond.

This bill would provide that in an action brought by the Attorney General, a district attorney, or a city attorney the court may order relief for the benefit of the injured parties to be paid from the bond.

Ch. 706 (AB 2292) Dutra. General plans: residential density.

The Planning and Zoning Law requires a city, county, or a city and county to adopt a general plan that consists of a statement of development policies and a diagram or diagrams and text setting forth objectives, principles, standards, and plan proposals, including a land use element that sets forth a statement of the standards of population density and building intensity recommended for districts and other territory covered by the plan. The act also requires that the maximum allowable residential density be consistent with the applicable zoning ordinance and the adopted general plan.

This bill would prohibit a city, county, or a city and county, by administrative, quasi-judicial, or legislative action, from reducing, requiring, or permitting the reduction of the residential density for any parcel to a lower residential density that is below the density that was utilized by the Department of Housing and Community Development in determining compliance with housing element law, unless the city, county, or city and county makes written findings supported by substantial evidence that the reduction is consistent with the adopted general plan, including the housing element, and the jurisdiction's share of the regional housing need, as specified.

The bill would also require, until January 1, 2007, a court to award attorney's fees and costs of suit to specified plaintiffs or petitioners if the court finds that an action of a city, county, or city and county is in violation of these provisions, except as specified.

Ch. 707 (AB 2470) Jackson. Minors: statements.

Under existing law, evidence of a statement that was made other than by a witness while testifying at a hearing and that is offered to prove the truth of the matter stated as hearsay evidence is inadmissible, unless otherwise specified by law.

Existing law provides that certain statements made by a minor child under 12 years of age out of court may not be inadmissible under the hearsay rule in certain circumstances with respect to the establishment of the elements of certain crimes.

Existing law provides that hearsay evidence may be used for the purpose of supplementing or explaining other evidence, but over timely objection shall not be sufficient in itself to support a finding unless it would be admissible over objection in civil actions.

Existing law authorizes the administrative law judge conducting a hearing with respect to the licensing, registration, or permitting of a community care facility, residential care facility for persons with chronic life-threatening illness, residential care facility for the elderly, or child day care facility to permit the testimony of a child witness, or a similarly vulnerable witness, including a witness who is developmentally disabled, to be taken outside the presence of the respondent or respondents if certain conditions exist.

This bill would specify that certain out-of-court statements made by a minor under 12 years of age who is the subject of an allegation at issue in an administrative hearing shall be admissible in any of those types of administrative hearings unless an objection is made and the objecting party establishes that the statement is unreliable because it was the product of fraud, deceit, or undue influence.

Ch. 708 (AB 2865) Koretz. Appellate issues: judges.

Existing law sets forth the matters that trial court judges may decide in chambers, as specified.

This bill would add thereto that, upon the written request of any party or his or her counsel, or at his or her own discretion, a trial court judge may indicate in any interlocutory order a belief that there is a controlling question of law as to which there are substantial grounds for a difference of opinion, appellate resolution of which may materially advance the conclusion of the litigation. There would be no grounds for a writ or appeal from the decision of the trial judge in this regard.

Ch. 709 (AB 3023) Committee on Insurance. Insurance: unfair practices.

Existing law provides for the regulation of insurers by the Insurance Commissioner. Existing law prohibits unfair methods of competition and unfair or deceptive acts or practices in the business of insurance. Existing law requires the commissioner to commence hearings when the commissioner has reason to believe that a person has been engaged or is engaging in any unfair method of competition or any unfair or deceptive act or practice, as specified. Existing law requires the hearings to be conducted in accordance with the Administrative Procedure Act.

This bill would authorize those hearings to be conducted by an administrative law judge in the administrative law bureau that provides administrative hearing services in the Department of Insurance if certain conditions are satisfied. The bill would prohibit an administrative law judge appointed by the commissioner from being supervised by the commissioner or by an employee in the legal branch of the Department of Insurance.

Ch. 710 (SB 1357) Vincent. Pet shops.

Under existing law, a pet shop operator must carry out specified duties with respect to the care, sale, trade, and adoption of pet animals. A pet shop operator's failure to carry out these duties is punishable by a fine of not to exceed \$1,000, or by imprisonment in the county jail for not more than 90 days, or by both the fine and imprisonment.

This bill would require private or public retail sellers of pet animals to provide buyers with written recommendations for the generally accepted care of the class of pet animal sold. It would specify that sellers shall not be liable for damages caused by erroneous information in material provided by 3rd parties unless sellers fail to exercise ordinary care. This bill would also provide that charges brought against a seller of pet animals for a first violation of these provisions shall be dismissed if proof of compliance is shown, as specified. This bill would provide that second or subsequent violations shall be infractions punishable by a fine. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 711 (SB 1432) Alpert. Housing elements: self-certification.

Under existing law, a city, county, or city and county is required to submit a draft housing element or draft amendment to its housing element for the general plan for its jurisdiction to the Department of Housing and Community Development for a determination of whether the draft complies with state law governing housing elements. Existing law, until June 30, 2009, exempts any local government within the jurisdiction of the San Diego Association of Governments from this review requirement if it instead submits to the department with its housing element a self-certification of compliance with state law. In an action brought by any party to review the conformity of a housing element with applicable state law, a court review extends to whether the housing element, or portion thereof or revision thereto, substantially complies with that law.

This bill would provide that, notwithstanding any other provision of law, any city or county that self-certified its housing element shall be considered to be fully eligible to participate in any program created by, or receiving funds through, the Housing and

Emergency Shelter Trust Fund Act of 2002 in an identical manner and to the same degree, as those jurisdictions deemed in substantial compliance by the department.

Ch. 712 (SB 1614) Speier. Public records: vital statistics.

Existing law requires the Director of Health Services, as the State Registrar of Vital Statistics, to administer the registration of births, deaths, fetal deaths, and marriages. Existing law requires the State Registrar to arrange and permanently preserve the certificates in a systematic manner and to prepare and maintain a comprehensive and continuous index of all certificates registered.

Existing law, the California Public Records Act, requires state and local agencies to make records that are not otherwise exempt from disclosure available to the public upon receipt of a request that reasonably describes an identifiable record, and upon payment of fees to cover costs.

This bill would require the comprehensive index described above, and comprehensive birth and death record indices prepared or maintained by local registrars and county recorders, to be kept confidential, except that these indices may be disclosed to government agencies. This bill would exempt these indices from disclosure under the California Public Records Act.

This bill would prohibit a government agency from selling or releasing these indices, except as specified, and from posting these indices on the Internet.

This bill would require the State Registrar to prepare and maintain separate noncomprehensive indices of all California birth and death records for public release, as well as indices for purposes of law enforcement or preventing fraud. The bill would also provide for the release of certain birth and death data files, as defined, by the State Registrar, local registrars, and county recorders in accordance with specified requirements. It would require requesters of these indices and data files to provide proof of identity, complete a form containing prescribed information, and sign the form under penalty of perjury, and would prohibit these indices and data files from being used for fraudulent purposes or from being posted on the Internet unless certain requirements are met.

This bill would also make it a misdemeanor for any person to violate the above provisions and would provide that any violators may be denied further access to the indices or data files maintained by the department.

By expanding the scope of the crime of perjury, creating new crimes, and by increasing the duties of local officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 713 (SB 1778) Dunn. Mobilehomes and manufactured homes.

(1) The existing Mobilehomes-Manufactured Housing Act of 1980 authorizes the Director of Housing and Community Development or his or her designee to issue a citation that assesses a civil penalty, payable to the Department of Housing and Community Development, to any licensee who violates specified provisions of the act. The act requires those funds to be deposited in the Mobilehome-Manufactured Home Revolving Fund, a continuously appropriated fund.

This bill would authorize the issuance of such a citation to any licensee who violates additional specified provisions of the act, thereby making an appropriation by authorizing the expenditure of additional funds from a continuously appropriated fund.

(2) The act requires any manufactured home, mobilehome, vehicle, or transportable structure manufactured, remanufactured, altered, used, or converted for use as a commercial coach or special purpose commercial coach to comply with the act and the regulations adopted thereunder relating to insignia and inspection requirements, construction, fire safety, electrical, heating, mechanical, plumbing, occupancy, and energy conservation. Other existing provisions impose requirements relating to sanitation, structural, and safety requirements for mobile food preparation units.

This bill would require that special purpose commercial coach mobile food preparation units shall also meet requirements for mobile food preparation units and stationary mobile food preparation units.

(3) The act requires all used mobilehomes and manufactured homes sold in this state on and after January 1, 1986, to be equipped with an operable smoke detector.

This bill would provide that on and after January 1, 2003, this requirement is satisfied if, within 45 days prior to the date of transfer of title, the transferor signs a declaration stating that each smoke detector in the manufactured home or mobilehome is operable on the date that the declaration is signed.

(4) The act specifies that in the case of the sale of a manufactured home or mobilehome to be installed on a foundation system, other provisions of the act generally governing the escrow of manufactured home and mobilehome sales transactions are not applicable.

This bill would impose additional requirements for escrow instructions and disbursements in the case of manufactured homes and mobilehomes to be installed on a foundation system.

#### Ch. 714 (SB 1951) Figueroa. Professional boards: acupuncture board.

Existing law provides for the regulation of various professions by professional boards within the Department of Consumer Affairs, including the regulation of the practice of acupuncture by the Acupuncture Board. Existing law provides, until July 1, 2003, that the board consists of 9 members. Existing law requires the board, until July 1, 2003, to employ an executive officer and other personnel necessary for the administration of the laws regulating the practice of acupuncture. Existing law provides that those provisions of law are repealed on January 1, 2004. Under existing law, all revenue received by the board in the course of regulating the practice of acupuncture is deposited into the Acupuncture Fund, which is continuously appropriated.

This bill would delete the July 1, 2003, and January 1, 2004, dates upon which those provisions establishing the board and requiring it to employ an executive officer and other personnel become inoperative and are repealed. The bill would instead extend the operation of those provisions until July 1, 2005, and would repeal those provisions on January 1, 2006.

Existing law requires the Acupuncture Board to include 4 acupuncturists that are not licensed as physicians and surgeons.

This bill would instead require the board to include 3 acupuncturists who are not licensed as physicians and surgeons and one acupuncturist who is a faculty member of an acupuncture college approved by the board.

Existing law provides that a majority of the appointed board members constitutes a quorum for the conduct of business.

This bill would provide that 5 members of the board constitutes a quorum for the conduct of business.

This bill would request the Milton Marks "Little Hoover" Commission on California State Government Organization and Economy to conduct separate reviews addressing specified issues with respect to the practice of acupuncture and report its findings to the Legislature by September 1, 2004. The bill would appropriate up to \$250,000 to the board from the Acupuncture Fund to pay for all costs associated with this review. By authorizing

the use of revenue in a continuously appropriated fund for a new purpose, the bill would make an appropriation. The bill would also require the board to conduct certain studies and reviews relating to acupuncture assistants and report its findings to the department and the Joint Legislative Sunset Review Committee by September 1, 2004.

Existing law provides that it is a misdemeanor for a person to practice acupuncture or to hold himself or herself out as practicing or engaging in the practice of acupuncture without a current and valid acupuncturist's license. Existing law authorizes the Acupuncture Board to deny, suspend, revoke, or impose probationary conditions upon, the license of an acupuncturist if the acupuncturist is guilty of specified acts of unprofessional conduct.

This bill would provide that it is a misdemeanor for a person to fraudulently buy, sell, or obtain a license to practice acupuncture or to violate the provisions of law regulating the practice of acupuncture. The bill would specify that misdemeanor punishment for a violation of these provisions includes specified fines and imprisonment in a county jail. The bill would revise the list of specified acts that constitute unprofessional conduct.

Because a violation of the bill's requirements would be a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 715 (SB 1356) Murray. Film California First Program: film costs.

(1) Existing law establishes the Film California First Program, pursuant to which the Technology, Trade, and Commerce Agency may pay and reimburse film costs incurred by a public agency, and the California Film Commission, within the agency, is required to develop alternate procedures for reimbursement of public agency costs incurred by a production company. "Film costs" are defined for this purpose to include, among other things, local public entity employee costs for fire services and nonpolice public safety, including, but not limited to, municipal utilities, transportation and street maintenance, and recreational agencies, as well as rental costs for equipment mandated and owned by a public agency in connection with the film.

This bill would delete the provisions restricting local public entity employee costs to costs for fire services and nonpolice public safety, including, but not limited to, municipal utilities, transportation and street maintenance, and recreational agencies. It would also revise the rental cost restriction on equipment mandated and owned by a public agency in connection with the film, to apply instead to equipment owned and operated by public agency in connection with the film.

(2) Existing law expresses the intent of the Legislature that funding for the Film California First Program be provided from the General Fund through the annual Budget Act in a specified amount for three years, commencing with the 2000–01 fiscal year.

This bill instead would express the intent of the Legislature that, commencing with the 2002–03 fiscal year, funding for the program from the General Fund shall not exceed the General Fund funding level for the prior fiscal year.

(3) Existing law requires the Technology, Trade, and Commerce Agency to reimburse only actual costs incurred by a public agency or production company, under the Film California First Program.

This bill would, notwithstanding this provision, prohibit the Technology, Trade, and Commerce Agency from reimbursing costs at rates exceeding those in effect as of January 1, 2002.

(4) This bill would make various technical, nonsubstantive changes.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 716 (AB 116) Nakano. Commission on Asian and Pacific Islander American Affairs.

Existing law establishes various advisory boards and commissions in state government with specified duties and responsibilities.

This bill would create the Commission on Asian and Pacific Islander American Affairs consisting of 13 members appointed as specified. The duties of the commission include advising the Governor, the Legislature, and state agencies, departments, and commissions on issues relating to the social and economic development, and the rights and interests of Asian Pacific Islander American (APIA) communities.

The bill would also require the commission to act as a liaison with APIA communities, hold meetings on issues affecting the APIA community, and submit an annual report with specified recommendations by December 1 of each year to the Governor and the Legislature that details the commission's activities and sets forth its action plan for the following year. The bill would also provide that the commission may apply for and accept public and private funding, as specified.

Ch. 717 (AB 1872) Canciamilla. Vital records: certificate of death: mass fatalities incident.

Existing law permits a verified petition to be filed by any beneficially interested person with the county clerk of certain superior courts for an order to judicially establish the fact of, and the time and place of, a birth, death, or marriage that is not registered or for which a certified copy is not obtainable.

This bill would permit a coroner, medical examiner, or other beneficially interested person, in the event of a mass fatalities incident, to also file such a petition. The bill also would permit a coroner or medical examiner, in the event of a mass fatalities incident, to file a similar single verified petition with respect to all persons who died.

Existing law requires the county clerk to set the time of hearing not less than 5 nor more than 10 days after the filing of the petition.

This bill, notwithstanding the above provision, would provide that upon the filing of a petition for a determination of the fact of death in the event of a mass fatalities incident, the clerk shall set a hearing no later than 15 days from the date the petition was filed. It would also require the petitioner to make a reasonable effort to provide notice of the hearing to the known heirs of the deceased up to the 2nd degree of relationship, but failure to provide this notice would not invalidate the judicial proceedings regarding the determination of the fact of death.

Existing law requires the State Registrar to send certified copies of the court order delayed certificate to the local registrar and the county recorder within the area in which the event occurred and in whose offices copies of records of the year of occurrence of the event are on file.

This bill would require the State Registrar, in the event of a mass fatalities incident, without delay, to send these certified copies of the court order delayed death certificates to the local registrar and the county recorder of the county in which the incident occurred and in whose offices copies of records of the year of occurrence of the incident are on file, and to the spouse or next of kin of the decedent, if there is no spouse, provided the spouse or next of kin's name and address information are included in the court order or on the application form submitted by the spouse, next of kin, coroner, or medical examiner.

The bill would also define "mass fatalities incident" for purposes of the above provisions.

Ch. 718 (AB 2041) Vargas. Liability: emergency care.

Existing law provides immunity from civil liability to any person who completes a basic cardiopulmonary resuscitation (CPR) or automatic external defibrillator (AED) course that complies with regulations adopted by the Emergency Medical Services (EMS) Authority and the standards of the American Heart Association or the American Red Cross, and who,

in good faith, renders emergency care by the use of an AED at the scene of an emergency, without the expectation of receiving compensation for providing the emergency care.

This bill would revise those provisions by deleting the requirement that a person complete a basic CPR or AED course. The bill would further provide immunity from civil liability to a person or entity that acquires an AED for emergency use and renders emergency care, if that person or entity is in compliance with specified requirements.

Existing law authorizes the EMS Authority to establish minimum standards for AED use and training by unlicensed or uncertified individuals. Existing law requires specified persons to meet those standards.

This bill would expand the authorization to establish standards and would delete the requirement that specified persons meet those standards.

This bill would also require that the supplier of an AED notify the local EMS authority of the existence, location, and type of AED acquired, and provide to the acquirer specified information governing the use and maintenance of the AED. The bill would additionally require certain persons or entities that have acquired an AED to ensure employee training in CPR and AED use, as specified, and to follow particular emergency safety procedures. The bill would specify that the above requirements shall remain effective until January 1, 2008.

#### Ch. 719 (AB 374) Matthews. Central Valley Rural Crime Prevention Program.

Existing law authorizes specified counties to develop Rural Crime Prevention Programs to address the problems of agricultural and rural crime. Existing law also requires the creation, by participating counties, of the Rural Crime Task Force, as specified, to perform specific functions, including developing rural crime prevention programs, as specified. Under existing law, these provisions are scheduled to become inoperative on July 1, 2002, and to be repealed on January 1, 2003.

This bill would extend the operation of these provisions to July 1, 2005, and provide for their repeal, instead, on January 1, 2006, and rename the programs "Central Valley Rural Crime Prevention Programs." This bill would require the Central Valley Rural Crime Task Force to develop a uniform procedure for all participating counties to collect, and would require each county to collect, data on agricultural crimes by June 30, 2003. The bill would also require the task force to establish a central database for the collection and maintenance of data on agricultural crimes and designate one participating county to maintain the database by June 30, 2003.

This bill would provide that funds appropriated for rural crime prevention programs, as specified, shall be allocated based on counties' compliance with specified requirements.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 720 (SB 1457) Johannessen. Law enforcement funding.

Existing law allocates annually prescribed amounts from the General Fund to the Controller for allocation to county sheriffs' departments to enhance law enforcement efforts, and until July 1, 2002, requires those funds to supplement rather than supplant existing law enforcement resources.

This bill would extend that requirement indefinitely.

The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 721 (SB 372) Dunn. Preservation interim loan programs.

Existing law prescribes the responsibilities of the Department of Housing and Community Development and the California Housing Finance Agency with respect to the provision and preservation of housing; establishes the Housing Rehabilitation Loan Fund, which is continuously appropriated for purposes of specified deferred payment housing rehabilitation loans; and prescribes requirements for the notification of tenants by owners proposing termination or prepayment of governmental assistance.

This bill would establish preservation interim loan programs known as the Preservation Opportunity Program and the Interim Repositioning Program, and require the department to make loans on prescribed terms, including requiring a borrower under the Preservation Opportunity Program to also receive a loan from the agency's Preservation Acquisition Program, to preserve and maintain the affordability of assisted housing developments pursuant to those programs. The bill would also authorize the department to administer the Interim Repositioning Program through a notice of funding availability that is exempt from the provisions of the Administrative Procedure Act.

This bill would create the Preservation Opportunity Fund for purposes of these programs and require any money made available by the Legislature, received as loan repayments, or received from other sources to be deposited in the fund, which would be continuously appropriated to the department for purposes of the programs.

This bill would declare that it is to become operative only upon voter approval of the Housing and Emergency Shelter Trust Fund Act of 2002.

Ch. 722 (SB 800) Burton. Liability: construction defects.

Existing law provides for stipulated judgments in construction defect actions, as defined.

The bill would specify the rights and requirements of a homeowner to bring an action for construction defects, including applicable standards for home construction, the statute of limitations, the burden of proof, the damages recoverable, a detailed prelitigation procedure, and the obligations of the homeowner.

This bill would also provide that there is no personal monetary liability on the part of, and no cause of action for damages shall arise against, any person, in any of the specified categories, who is under contract with an applicant for a residential building permit to provide independent quality review of the plans and specifications provided with the application in order to determine compliance with all applicable requirements imposed pursuant to the State Housing Law or any rules or regulations adopted pursuant to that law, or to inspect a work of improvement to determine compliance with these plans and specifications, except as specified. The bill would also set forth specified findings and declarations of the Legislature regarding construction defects.

Ch. 723 (AB 1008) Lowenthal. Housing assistance: property tax notices.

(1) Existing law establishes the Code Enforcement Incentive Program pursuant to which the Department of Housing and Community Development, upon appropriation by the Legislature, is required to make funds available as matching grants to cities, counties, and cities and counties through December 31, 2003, to increase staffing dedicated to local building code enforcement efforts.

This bill would also authorize these grant funds to be used for capital expenditures and require grants to be made to grantees that operate local building code enforcement programs for more than 3 years.

(2) Existing law also requires that grant recipients submit a report, on or before June 30, 2004, to their local legislative bodies and to the department regarding the results of the expanded code enforcement efforts, and requires the department to summarize the results and transmit the reports to the Legislature by December 31, 2004.

The bill would instead require grant recipients to submit the report to their local legislative bodies within 6 months after completion of each program cycle funded by the Legislature and require the department to transmit the reports within 6 months after the grant recipient's submission date.

(3) Existing law also establishes, until January 1, 2005, the Community Code Enforcement Pilot Program pursuant to which the Department of Housing and Community Development awards grants to communities that develop a code enforcement pilot program meeting specified criteria that would operate until December 31, 2003. Pilot program administrators are required to evaluate the pilot programs and report that information to the

department by June 30, 2004, and the department is required to report to the Legislature by December 31, 2004.

This bill would delete the repeal date for the program. It would require grants to be made to programs that operate for more than 3 years.

The bill would permit grant funds to be used for capital expenditures. It would also require that each pilot project submit its evaluation within 6 months after completion of each program cycle approved by the department and funded by the Legislature.

(4) Existing law requires the tax collector to publish annually a notice of impending default for failure to pay taxes on real property and to publish annually the affidavit that real property on which taxes, assessments, penalties, and costs had not been fully paid are in default.

This bill would permit the tax collector to include in those notices only properties that have been tax delinquent for 3 or more years in specified cases.

The bill would, pursuant to legislative findings and declarations, permit the University of California to do a study of tax-delinquent properties and would require the Controller to provide the university with specified information relating to these properties upon receiving that information from the tax collector. By imposing new requirements upon tax collectors, this bill would impose a state-mandated local program.

The bill would revise and limit the requirement to notify assesses of tax delinquent properties, and would express the intent of the Legislature in making this revision to offset costs incurred by the tax collector with regard to providing information, as required by this bill, for the study of the tax-delinquent properties.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 724 (AB 1170) Firebaugh. Housing: downpayment assistance.

Existing law requires the Department of Housing and Community Development, the California Housing Finance Agency, and various other state and local agencies to administer programs to provide affordable housing through incentives to developers, rental housing assistance, and loans or grants for downpayment, interest subsidy, relocation, veterans' programs, and other home purchase assistance. Existing law requires the housing element of a local general plan to identify adequate sites for affordable housing to be made available through appropriate zoning and development standards, including those relating to density.

This bill would create the Building Equity and Growth in Neighborhoods (BEGIN) Program and BEGIN Fund. Moneys in the fund would be made available, upon appropriation, to the department for grants to cities, counties, and cities and counties for assistance in the form of 2nd mortgage loans for downpayment purposes to qualifying new home buyers in those cities, counties, and cities and counties that have taken prescribed actions to remove barriers to affordable housing.

This bill would specify that its provisions would become operative only if the Housing and Emergency Shelter Trust Fund Act of 2002 is enacted by the voters.

#### Ch. 725 (AB 1891) Diaz. Housing trust funds.

Existing law creates, among other housing programs, the Multifamily Housing Program, and the Emergency Housing and Assistance Program.

This bill would require the Department of Housing and Community Development to establish a program to make matching grants to local agencies or nonprofit entities that have housing trust funds, to provide financing for rental housing projects affordable to very low income families, as prescribed. Unused funds would revert for use in the Multifamily Housing Program.

The bill would become operative only if the Housing and Emergency Shelter Trust Fund Act of 2002, as proposed by Senate Bill 1227 of the 2001–02 Regular Session, is enacted by the voters, and would provide that specified amounts appropriated pursuant to that act would be used for purposes of this bill.

Ch. 726 (AB 2787) Aroner. Building standards: universal design.

Existing law presumes that a housing development for senior citizens constructed on or after January 1, 2001, is designed to meet the physical and social needs of senior citizens for purposes of meeting existing laws regarding age discrimination in housing if the housing development includes specified elements.

Existing law also encourages developers of these housing developments to implement in their construction the principles of universal design or any other design guidelines for home modifications for seniors that may be promulgated by the California Department of Aging.

This bill would, instead, by December 31, 2003, require the Department of Housing and Community Development, in consultation with specified state agencies, and without significantly impacting housing cost and affordability, to develop guidelines and at least one model ordinance for new construction and home modifications that are consistent with particular principles of universal design or other similar design guidelines, as specified.

Under the existing State Housing Law the California Building Standards Code applies to any city or county that does not amend, add, or repeal ordinances or regulations that impose the same requirements as the code, except that the law authorizes a city or county to make changes or modifications as it determines are reasonably necessary because of local climatic, geological, or topographical conditions if the findings of reasonable necessity and the modification or change are filed with the California Building Standards Commission.

The bill would authorize, commencing January 1, 2005, a city, county, or city and county to make, by ordinance, changes or modifications to the requirements of the code if the city, county, or city and county determines that the ordinance is reasonably necessary and is substantially the same as the guidelines or model ordinance prepared by the department pursuant to the bill.

The bill would encourage developers of housing for senior citizens, persons with disabilities, and other persons and families, in a city or county where a universal design ordinance has not been adopted, to seek information regarding the principles of universal design, as specified.

The bill would authorize the California Department of Aging, in partnership with specified entities, to develop and provide consumer advice regarding home modification for seniors and persons with disabilities.

Ch. 727 (AB 2534) Pavley. Watershed, Clean Beaches, and Water Quality Act.

Existing law provides for the protection and preservation of the coast of California, and regulates water quality in the state.

This bill would enact the Watershed, Clean Beaches, and Water Quality Act, which would provide for a program of grants to public agencies and nonprofit organizations for projects designed to improve water quality at public beaches, improve water quality monitoring and sewer capability, protect water quality by reducing runoff pollution, and controlling nonpoint source water pollution. The bill would prescribe procedures for funding projects under the act, as provided.

The bill would appropriate specified amounts derived from the proceeds of bonds issued under the California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Act of 2002 (Proposition 40 at the March 5, 2002, primary election) to the State Water Resources Control Board, the State Coastal Conservancy, and the Department of Forestry and Fire Protection for expenditure for the purposes of the bill.

Ch. 728 (AB 34) Runner. Veterans' Home of California.

The Veterans' Homes Bond Act of 2000 requires the proceeds from the sale of the bonds issued under that act to be deposited in a newly established Veterans' Home Fund. That act provides that upon appropriation by the Legislature, the moneys in that fund are to be allocated first to meet state funding requirements for the renovation or construction of those veterans' homes identified by a specified statute, and then to fund any additional homes established pursuant to the bond act.

Existing law continuously appropriates the moneys in the Veterans' Home Fund, without regard to fiscal years and in an amount not to exceed \$31,000,000, to meet state funding requirements for the construction of veterans' homes, located in the City of Lancaster and in the community of Saticoy, that are identified by the same specified statute, and a veterans' home located in West Los Angeles, that is an additional home established pursuant to the bond act.

This bill would provide that this appropriation is subject to the approval of the Department of Finance. The bill would also continuously appropriate, without regard to fiscal years, certain federal matching funds, as specified.

This bill would state the intent of the Legislature in enacting these provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 729 (AB 42) Negrete McLeod. Public Employees' Retirement System.**

Existing law establishes the Board of Administration of the Public Employees' Retirement System and the composition of its membership.

This bill would authorize a specified member of the board to designate a deputy to act in the member's absence, as specified.

**Ch. 730 (AB 65) Strom-Martin. Reading First Plan.**

Under existing law, the required course of study for grades 1 to 6, inclusive, includes instruction in English, including knowledge of, and appreciation for literature and the language, as well as the skills of speaking, reading, listening, spelling, handwriting, and composition.

This bill would establish the Reading First Plan to provide reading instruction to pupils in kindergarten and grades 1 to 3, inclusive, and to special education pupils in kindergarten and grades 1 to 12, inclusive. Under the bill, the State Department of Education would administer the program that would be funded from moneys allocated pursuant to the federal No Child Left Behind Act of 2001. The bill would require the plan submitted pursuant to the federal act to authorize a local educational agency to use specific instructional materials and to receive grants of up to \$6,500 per teacher in kindergarten and any of grades 1 to 3, inclusive, to enhance reading instruction. The bill would authorize up to \$6,600,000 of federal funds appropriated in the annual Budget Act for the Reading First Plan to be allocated annually, pursuant to a schedule, to reading implementation centers identified in the state's Reading First Plan and to 6 regional lead agencies for technical assistance, and for other specified purposes in accordance with the Reading First Plan.

**Ch. 731 (AB 669) Hertzberg. State nonemergency telephone number system.**

Existing law requires local public safety agencies to maintain, in addition to a "911" emergency telephone number, a separate number for nonemergency calls. Existing law also sets forth the duties of the Division of Telecommunications of the Department of General Services in providing management oversight of statewide telecommunications systems developments, among other things.

This bill would authorize every local public agency, as defined, to establish a nonemergency telephone system and would specify that the digits "311" would be the dedicated nonemergency telephone number within the system. It would authorize the Division of Telecommunications of the Department of General Services to, among other things, aid local public agencies in the formulation of concepts, methods, and procedures that

will improve the operation of systems authorized by this bill and that will increase cooperation among public agencies.

Ch. 732 (AB 1889) Horton. Civil service: hearings.

Existing law authorizes the legislative body of a city to provide for the appointment of a civil service commission or personnel officer to which it may delegate powers and duties in relation to the civil service.

This bill would require that where an audio or stenographic recording is permitted of a hearing before the commission or a personnel officer, a copy of the recording shall be provided, upon request, to the employee bringing the appeal.

The bill would also require the city or its civil service commission or officer ordering or making a transcript of the recording to notify the affected employee of the transcription and the employee's right to obtain a copy of it and to provide a copy of the transcript promptly to the employee at the employee's request.

The bill would authorize the city to charge fees covering direct duplication costs for these recordings or transcripts.

Ch. 733 (AB 2059) Rod Pacheco. Public employee health benefits: survivors of firefighters and peace officers.

(1) The Public Employees' Medical and Hospital Care Act provides that, upon the death of a specified firefighter or peace officer from injury or disease relating to his or her official duties, the uninsured surviving spouse, as defined, and uninsured family members may enroll in an approved health benefits plan and a portion of the cost of that enrollment is paid by the state. Employer and employee contributions for health benefits are deposited into one of 2 continuously appropriated funds.

Under this bill, if the eligible family members of a deceased firefighter or peace officer, as specified, employed by a contracting agency were validly enrolled in an approved health benefits plan on the date of the employee's death, the contracting agency would be required to continue to pay the employer's contribution for the continued enrollment of those family members for a specified period. By increasing the contributions to a continuously appropriated fund, the bill would make an appropriation.

(2) Existing law limits the amount of money that a surviving spouse, or the guardian or conservator of the estate of the surviving spouse, may collect in salary or compensation owed from the employers of his or her deceased spouse to no more than \$5,000, as specified, without procuring letters of administration or awaiting probate of the deceased's will.

This bill would exempt from that \$5,000 limitation the surviving spouse or the guardian or conservator of the estate of the surviving spouse of specified firefighters or peace officers subject to the Public Employees' Medical and Hospital Care Act. The bill would also make that \$5,000 amount subject to an annual cost-of-living adjustment, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 734 (AB 2157) Papan. Credit unions.

The California Credit Union Law provides for the organization and regulation of credit unions by the Department of Financial Institutions, headed by the Commissioner of Financial Institutions.

This bill would recast the provisions of the law and revise the regulatory requirements with respect to a number of subjects, including organization, filing and certification, formation, and enforcement. The bill would make other related changes.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 735 (AB 2198) Lowenthal. Schools: violent crime.

Existing law makes each school district and county office of education responsible for the overall development of comprehensive school safety plans for its schools.

This bill would authorize a principal, or his or her designee, to notify each pupil's parent or legal guardian and each school employee in writing of the general nature of a violent crime, as defined, that occurs on the school site of an elementary or secondary school of which he or she is the principal. The bill would provide that, if a local law enforcement agency determines that disclosure of the crime would hinder an ongoing investigation, the notification would occur within a reasonable time, to be determined by the local law enforcement agency and the school district.

This bill would declare that it does not create any liability in a school district or its employees for providing notice of the occurrence of a violent crime.

Ch. 736 (AB 2206) Salinas. Transportation: rail service.

Existing law prescribes the allocation of funds from the Public Transportation Account and the State Highway Account, both in the State Transportation Fund.

This bill would require that funds previously allocated to the City of Seaside for the Fort Ord rail station right-of-way acquisition could also be used by the Transportation Agency for Monterey County for work at the Monterey Bay rail station and would require the commission to oversee the timely use of these funds in accordance with the requirements specified in current law.

By expanding the use of the funds originally authorized for expenditure for the Fort Ord rail station, the bill would make an appropriation.

Ch. 737 (AB 2399) Committee on Governmental Organization. Gambling: licensee; premises.

The existing Gambling Control Act provides for the licensure and regulation of gambling establishments operating in California. The act establishes the California Gambling Control Commission as the state agency charged with administering its provisions.

Existing law authorizes a person possessing a license to operate a gambling establishment to remove from his or her licensed premises any person who, while on the premises interferes with a lawful gambling operation or is intoxicated.

This bill also would expressly permit a person possessing a license to operate a gambling establishment to remove from his or her licensed premises any person who, while on the premises, is under the influence of a controlled substance.

Ch. 738 (AB 2431) Committee on Governmental Organization. Gambling control.

Existing law, the Gambling Control Act, provides for the licensure and regulation of various legalized gambling activities and establishments by the California Gambling Control Commission and the investigation, and discipline of those activities and establishments by the Division of Gambling Control within the Department of Justice, as specified.

This bill would renumber various sections and article headings within the Gambling Control Act; delete obsolete references to the former California Gambling Control Board; delete outdated operative date provisions within the act; and make other clarifying, technical, nonsubstantive changes.

The bill would also increase the salary of the chairperson of the commission; authorize additional commission offices in addition to the principal office; revise the deadline for the payment of license fees; and redistribute various powers and duties between the executive officer of the commission, the commission, and the division. The bill would also prohibit the Gaming Policy Advisory Committee from advising the commission on Indian gaming.

Ch. 739 (AB 2709) Wyland. Education: curriculum.

Under existing law, the adopted course of study for grades 7 to 12, inclusive, is required to include instruction in the social sciences, as prescribed.

This bill would require that instruction to contain instruction on World War II and the American role in that war. The bill would express the Legislature's intent to encourage that

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

the instruction include a component drawn from personal testimony of American soldiers who were involved in World War II and those men and women who contributed to the war effort on the homefront. The bill would specify that this instruction shall be carried out in a manner that does not result in any new duties or programs being imposed on school districts.

Ch. 740 (AB 2770) Matthews. Solid waste: conversion technologies.

Existing law, the California Integrated Waste Management Act, requires the California Integrated Waste Management Board to administer state programs to recycle solid waste, plastic trash bags, plastic packaging containers, waste tires, newsprint, and other specified materials. Existing law provides for an external scientific peer review process to review the scientific basis of a regulation or policy proposed by the agencies, boards, and departments within the California Environmental Protection Agency.

This bill would define the term “gasification” for purposes of the act. The bill would revise the definition of the term “solid waste facility” to include a gasification facility, and would revise the definition of the term “transformation” to exclude gasification. The bill would require the board to include, as part of the annual report required to be submitted by the board to the Legislature on or before March 1, 2003, a report on new and emerging conversion technologies, including, but not limited to, noncombustion thermal technologies, including gasification and pyrolysis, chemical technologies such as acid hydrolysis or distillation, and specified biological technologies. The bill would require the report to be subject to a specified external scientific peer review process and to consult with the State Energy Resources Conservation and Development Commission and other state, federal, or international governmental agencies in preparing the report.

The bill would appropriate \$1,500,000 from the Integrated Waste Management Account to the board to prepare the report.

Ch. 741 (AB 2890) Wiggins. Pests.

Under existing law, the Pierce’s Disease and Glassy-winged Sharpshooter Board is charged with collecting and handling assessments on grape producers for expenditure on research and other activities related to the plant killing Pierce’s disease bacteria. It is empowered to submit recommendations to the Secretary of Food and Agriculture on the expenditure of these assessments, to receive money, and adopt appropriate procedures for its operation.

This bill would explicitly empower the board to coordinate its activities with the secretary’s science advisory board and agricultural/governmental advisory task force and would provide, in addition, that, notwithstanding any other provision of law, the secretary, upon the recommendation of the board, may contract with any nonprofit authoritative scientific body with expertise in agricultural issues in order to expedite research relating to the eradication of Pierce’s disease.

Existing law requires the Department of Food and Agriculture to establish a competitive grants program to make funds available to qualified private and public entities to conduct pest management research projects. Existing law specifies procedures and requirements relating to the awarding of these grants.

This bill would provide that the disbursement of research funds obtained from the assessment imposed by the Pierce’s Disease and Glassy-winged Sharpshooter Board shall be exempt from these procedures and requirements. It would specify that disbursement of these research funds shall be on a competitive bid basis.

Existing law imposes various requirements relating to the expenditure of research funds and requires that researchers protect the confidentiality of data and related information and materials produced in the course of these research projects, as specified. However, existing law exempts the University of California from these restrictions.

This bill would make the same exception provided to the University of California applicable to other public agencies or public institutions that are subject to interagency agreements.

Existing law requires the Secretary of Food and Agriculture to provide the Pierce's Disease and Glassy-winged Sharpshooter Board with a written statement of the reasons for a decision by the secretary, as specified, not to accept a recommendation of the board.

This bill would no longer require the secretary to provide the reasons for the decision in a written statement, but would, in addition, require the secretary to provide the board with the reasons for the decision within 15 days of the decision. The bill would make a clarifying change to the provision.

The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 742 (SB 1427) Escutia. Low-cost automobile insurance.

Existing law establishes, until January 1, 2004, low-cost automobile insurance pilot programs for the County of Los Angeles and the City and County of San Francisco within the California Automobile Assigned Risk Plan. Existing law establishes the initial annual rate for low-cost automobile insurance in Los Angeles at \$450 and in San Francisco at \$410. Existing law requires a person to meet certain requirements to be eligible for a low-cost automobile insurance policy under the pilot programs, including being in a household with a gross annual income that does not exceed 150% of the federal poverty level. Existing law provides for minimum automobile liability insurance requirements, as specified. Existing law requires these low-cost automobile insurance policies to include certain attributes, including offering coverage in specified amounts for bodily injury and property damage that results from an accident. Existing law provides until January 1, 2004, that these amounts, which are lower than those generally required for automobile liability insurance, satisfy applicable financial responsibility requirements, as specified. Existing law authorizes the California Automobile Assigned Risk Plan to make available to an insured under the pilot programs a premium installment option that requires the insured to pay \$100 upon issuance of a low-cost policy followed by 6 other payments. Existing law provides that producers certified by the California Automobile Assigned Risk Plan that issue a low-cost automobile insurance policy pursuant to the pilot programs are entitled to the same commission rate as is paid by the plan.

This bill would delete the January 1, 2004, repeal date for the provisions establishing the low-cost automobile insurance pilot programs for the County of Los Angeles and the City and County of San Francisco and for certain provisions declaring that low-cost policies satisfy financial responsibility requirements, and would instead provide for the repeal of those provisions on January 1, 2007. The bill would require a low-cost automobile insurance policy to offer medical payments and uninsured motorist coverage but would authorize the charging of an additional premium for that coverage. The bill would increase the gross annual household income limit to be eligible for a low-cost automobile insurance policy from 150% of the federal poverty level to 250% of the federal poverty level. The bill would authorize the Insurance Commissioner to establish a commission for the sale of a low-cost automobile insurance policy issued pursuant to the pilot programs. The bill would require the commissioner to prepare and propose annually a plan to the Senate and Assembly Committees on Insurance setting forth the methods the commissioner intends to implement to inform households eligible for the pilot programs about the availability of low-cost automobile insurance.

The bill, effective March 1, 2003, would reduce the initial annual rate for low-cost automobile insurance in the County of Los Angeles to \$347 and in the City and County of San Francisco to \$314, per covered vehicle, unless the commissioner establishes a rate prior to that time, and would limit the initial premium installment payment authorized under the plan to 15% of the total policy cost. The bill would also require the policy to offer coverage for medical payments and would require an agent or representative of an insurer to inform

prospective policyholders that the policy is available to qualifying motorists. The bill would also specify that an additional premium may be charged for medical payments and uninsured motorist insurance coverage.

The bill would also provide that it would be operative only if SB 180 of the 2001–02 Regular Session is enacted and becomes effective.

Ch. 743 (SB 1703) Peace. San Diego: consolidated transportation agency.

Existing law, the San Diego County Regional Transportation Commission Act, requires the Board of Directors of the San Diego Association of Governments to serve as the San Diego County Regional Transportation Commission. Existing law provides that any board, commission, or department succeeding to the functions of the association is granted the powers and duties of the association.

This bill would create a consolidated transportation agency in San Diego from specified existing agencies, including the San Diego Association of Governments (SANDAG), the Metropolitan Transit Development Board (MTDB), and the North County Transit Development Board (NCTD), and would authorize that agency to assume certain responsibilities and functions of those agencies. The consolidated agency would be governed by a board of 20 members selected from specified areas within the county. The bill would provide that this agency assumes the powers of the transportation commission and would be designated the transportation planning agency for its area. The bill would allocate the agency's votes among the board and specify a weighted vote formula. The bill would create the executive, transportation, regional planning, and borders policy committees and would authorize these committees to perform specific functions. The bill would authorize the agency to own, operate, and maintain property and to adopt regulations regarding specified transportation matters. The bill would authorize the agency to, among other things, contract for goods and services, employ legal counsel, provide retirement benefits to its employees, enter joint powers agreements, provide insurance, and issue bonds. The bill would provide that the executive director is the administrator of the agency. The bill would require the agency to submit a report to the Governor and the Legislature beginning in 2005 regarding its progress in carrying out the provisions of this bill. The bill would make related conforming changes.

Ch. 744 (SB 1953) Figueroa. Contractors.

(1) Existing law, the Contractors' State License Law, creates the Contractors' State License Board within the Department of Consumer Affairs. Existing law authorizes the board to appoint a registrar of contractors who is responsible for all of the board's administrative duties. Under existing law, these provisions will become inoperative on July 1, 2003, and will be repealed on January 1, 2004.

This bill would extend these provisions to January 1, 2008. This bill would state that the highest priority for the board, in performing its licensing, regulatory, and disciplinary functions, is the protection of the public.

(2) Existing law requires the board, within 30 days prior to the meeting of the general session of the Legislature, to submit a report to the Governor and the Legislature describing its transactions for the preceding biennium.

This bill would require the board to submit an additional report to the Legislature, by October 1 of each year, containing statistical and case aging information, as specified, pertaining to complaints the board received the previous year.

(3) Existing law requires the Director of Consumer Affairs to appoint a Contractors' State License Board Enforcement Program Monitor who is responsible for monitoring and evaluating the board's disciplinary system and reforming the board's enforcement program. Existing law repeals this provision and this position on January 31, 2003.

This bill would extend this provision and this position until April 1, 2003.

(4) Existing law prohibits an applicant, officer, director, partner, associate, and a managing employee from committing any acts or crimes that are grounds for denial of a license. Existing law requires a home improvement salesperson to submit an application for licensure to the board with the appropriate fee.

This bill would require, on and after January 1, 2004, that all applicants for a contractor's license or a home improvement salesperson license submit a set of fingerprints to the board with his or her application. The bill would require the board to obtain and receive criminal history information from the Department of Justice and the Federal Bureau of Investigation for a criminal history records check.

(5) Existing law statutorily provides the fees that the board may charge for, among other things, an application for an original license, rescheduling an examination, and the renewal of an active or an inactive license.

This bill would authorize the board to set these fees by regulation, subject to increased fee maximums for specified licenses and services. Because these fees would be deposited into the Contractors' License Fund, which is continuously appropriated, the bill would make an appropriation.

(6) Existing law provides that the board may set fees at a level necessary to generate a 3-month reserve fund based on annual board expenses.

This bill would authorize the board to set fees to maintain the amount of the reserve fund at a level not to exceed approximately 6 months of annual authorized board expenditures.

(7) Existing law authorizes the Director of the Employment Development Department to permit the use of information in his or her possession for specified purposes.

This bill would additionally authorize the director to release information to the board so the board may verify the employment history of an individual applying for a contractor's license.

(8) This bill would incorporate additional changes in Section 144 of the Business and Professions Code proposed by SB 1952, to be operative only if SB 1952 and this bill are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 745 (AB 381) Salinas. Transportation: transit operators: farebox ratio: study.

Existing law authorizes transit operators to file specified claims for operating costs from local transportation funds with the applicable transportation planning agency under the Transportation Development Act. Existing law also provides for allocation of State Transit Assistance funds to transit operators by transportation planning agencies. Existing law establishes certain farebox ratio and other efficiency requirements that transit operators are required to meet in order to receive those transit operating funds, subject to various exceptions.

This bill would require the Legislative Analyst, in consultation with transit operators, providers of community transit services, and the Department of Transportation, to conduct a specified analysis of changes in operating costs experienced by transit operators and providers that are beyond the control of those operators and providers, relative to farebox ratio requirements and other efficiency requirements imposed by law as a condition of receiving transit operating funds. The bill would require the Legislative Analyst to include findings in this regard in the analysis of the 2003-04 Budget Bill.

Ch. 746 (AB 499) Rod Pacheco. State Building 101: transfer of title.

Existing law generally authorizes the Department of General Services, with the approval of the State Public Works Board, to transfer surplus state land at no cost to a governmental agency when specified conditions apply.

This bill would require the Director of General Services to transfer title of state Building 101 to the City of Norco at no cost to the city, other than costs related to the actual transfer, in accordance with specified conditions.

Ch. 747 (AB 915) Frommer. Medi-Cal provider reimbursement.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons, and provides for the reimbursement of providers of Medi-Cal benefits.

This bill would provide for the payment of a supplemental reimbursement to adult day health centers and acute care hospitals owned by certain public entities that provide specified services to Medi-Cal beneficiaries.

The bill would make provision of supplemental reimbursement under the bill subject to the obtaining of any necessary federal approvals, and would require that it shall be funded wholly out of federal funds. It would also make the provisions of the bill inoperative in the event, and on the date, of a final judicial determination of any court of appellate jurisdiction or a final determination by the administrator of the federal Centers for Medicare and Medicaid Services that the supplemental reimbursement must be made to any facility not covered by the bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 748 (AB 1956) Vargas. Video arcades.

Existing law regulates the operation of various types of businesses.

This bill would require a video arcade, as defined, to post a sign notifying consumers that an industry-created rating system is available to aid in the selection of a game. The bill would also require a video arcade to make a brochure available upon request to consumers explaining this system.

Ch. 749 (AB 2012) Frommer. Insurance.

Existing law defines automobile insurance to include any warranty or guaranty that promises service, maintenance, parts replacement, repair, money, or any other indemnity in the event of loss or damage to a motor vehicle or any part thereof from any cause.

This bill would exclude from that definition a warranty issued by a manufacturer or provider of vehicle protection products covering the theft of a vehicle. The bill would require a warrantor to file certain information with the Insurance Commissioner and would impose other related requirements. The bill would authorize the commissioner to issue a stop order against a warrantor that is acting in violation of these provisions.

Ch. 750 (AB 2078) Kelley. Joint powers authorities: self-insurance.

Existing law authorizes a private nonprofit health care services corporation to participate, under specified conditions, when 2 or more health care districts have joined together to pool their self-insurance claims.

This bill would define "self-insurance claims or losses" for that purpose to include claims or losses incurred pursuant to specified provisions of law that require every employer except the state to secure the payment of compensation in a prescribed manner. The bill would also provide that the Self-Insurers' Security Fund established under the law governing workers' compensation shall owe no duties or obligations to any entity that participates pursuant to the above-described authorization.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 751 (AB 2132) Matthews. Medi-Cal: medical supplies: contracts.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. Existing law authorizes the department to enter into contracts with manufacturers of single-source and multiple-source drugs, on a bid or nonbid basis, for drugs from each major therapeutic category, and requires the department to maintain a list of those drugs for which contracts have been executed.

This bill would require the department to enter into demonstration contracts with manufacturers of medical supplies for four items of medical supplies existing on a designated pharmacy claims processing system. It would also require the department to maintain a list of the supplies for which contracts have been executed.

Ch. 752 (AB 2271) Aanestad. Health facilities: licensing and certification requirements.

Existing law provides for the licensure and regulation of health facilities by the State Department of Health Services. Existing law makes each hospital designated by the department as a critical access hospital under the federal Medicare Rural Hospital Flexibility Program eligible for supplemental payments, as specified.

This bill would provide that with respect to each hospital designated by the department as a critical access hospital, and certified as such by the Secretary of the United States Department of Health and Human Services under the federal Medicare Rural Hospital Flexibility Program, the department may develop criteria to waive any regulatory licensing and certification requirements that are in conflict with the federal requirements for designation in the federal program, if the department finds that it is in the public interest to do so, and the department determines that the waiver would not negatively affect the quality of patient care.

The bill would provide that the criteria established by the department shall not be considered regulations within the meaning of specified law, and would also prohibit the criteria from being adopted as regulations pursuant to that law. The bill would state that its provisions shall not be construed to mean that a critical access hospital is not a general acute care hospital, even if otherwise applicable regulatory requirements are waived pursuant to the bill.

Ch. 753 (AB 2277) Keeley. Absentee ballots: applications.

Existing law requires the Secretary of State to prepare and distribute to appropriate elections officials a uniform application format for an absent voter's ballot that conforms to statutory requirements.

This bill would require the Secretary of State, in addition, to prepare a uniform electronic application format for an absent voter's ballot, as specified. This bill would allow a local elections official to use the uniform electronic application and would require the official to deliver an absent voter's ballot to a person who submits an electronic application within the proper time that contains the required information.

This bill would require local elections officials who use the electronic application format to deliver a notice of defect to persons who submit an electronic application that does not contain the required information.

Existing law requires any individual, group, or organization that distributes applications for absent voter ballots to return the completed application forms to the appropriate elections official within a specified time period of receiving them.

This bill would impose a state-mandated local program by prohibiting, subject to infraction penalties for a violation, anyone other than the registered voter from submitting an electronic application for another voter.

This bill would require the Secretary of State to report to the Legislature, within one year of the first statewide election following implementation of this bill, on the impact, if any, of permitting electronic application for absentee ballots, including the impact of the electronic applications on voter participation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 754 (AB 2630) Cogdill. Airport security: airport improvement grants.

Under the Federal Aviation Administration Authorization Act of 1994, airport sponsors may submit applications to the Secretary of Transportation for financial assistance for airport improvement projects. Under the act, upon approval by the Secretary of Transportation, the United States government may pay for certain project costs.

Existing law establishes the Aeronautics Account in the State Transportation Fund. Existing law requires that funds in the account be paid to certain public entities owning and operating an airport for projects for airport and aviation purposes, as defined, or operation and maintenance purposes, as defined. Existing law authorizes any balance remaining in the fund to be used as a portion of the local match for federal Airport Improvement Program grants for general aviation airports, as defined, or reliever airports, as defined. Existing law prohibits the California Transportation Commission from allocating funds until the federal grant offer is accepted by the public entity. Existing law authorizes the Department of Transportation, upon allocation of the funds by the commission, to pay a public entity 5% of the amount of a federal Airport Improvement Program grant.

This bill would authorize the department, until December 31, 2006, upon allocation of the funds by the commission, to pay a public entity 10% of the local matching share of a federal Airport Improvement Program grant for security projects, as defined, at small general aviation airports, as defined.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 755 (AB 2668) Zettel. Pupil curricula: brain and spinal cord injury prevention.

Existing law sets forth the required, authorized, and prohibited course of study and requires the State Department of Education to adopt related curricula.

This bill would require the California Healthy Kids Resource Center, in consultation with the State Department of Education, and contingent upon receipt of funds for this purpose, to review, acquire, and circulate brain and spinal cord injury prevention curricula, as specified, for use, on a voluntary basis, by school districts maintaining kindergarten and any of grades 1 to 12, inclusive. The bill would also require the California Healthy Kids Resource Center to notify school districts regarding the availability of the approved curricula. The bill would require funding for these purposes to be provided by nonstate sources.

Ch. 756 (AB 2674) Chu. Medi-Cal: federally qualified health centers: primary care providers.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Under existing law, one of the methods for the provision of Medi-Cal services is through contracts between the department and local initiatives. Existing law provides that, except as otherwise specified, managed care subcontracts offered to a federally qualified health center or a rural health clinic by a local initiative, county organized health system, commercial plan, or a health plan contracting with a geographic managed care program, as defined, shall be on the same terms and conditions offered to other subcontractors providing a similar scope of service.

This bill would provide that any beneficiary, subscriber, or enrollee of a program or plan who affirmatively selects, or is assigned by default to, a federally qualified health center or rural health clinic under the terms of a contract between a plan, government program, or any subcontractor of a plan or program and a federally qualified health center or rural health clinic, would be assigned directly to the federally qualified health center or rural health clinic, and not to any individual provider performing services on behalf of the federally qualified health center or rural health clinic.

Existing law provides that a federally qualified health center or rural health clinic may voluntarily agree to enter into a capitated or other at-risk contract with a managed care program health plan if the federally qualified health center or rural health clinic agrees to specified conditions regarding cost, reimbursement, and supplemental reimbursement.

This bill would delete those provisions of existing law.

Existing law requires the department to afford public assistance recipients a choice of managed care arrangements and a choice of primary care providers under those arrangements.

This bill would provide that Medi-Cal beneficiaries shall be entitled to affirmatively select, or to be assigned by default to, any primary care provider, as defined.

This bill would also provide that when a Medi-Cal beneficiary is assigned, from any source, to a primary care physician, as defined, and that primary care physician is an employee of a primary care provider, as defined, the assignment shall constitute an assignment to the primary care provider.

This bill would incorporate additional changes in Section 14087.325 of the Welfare and Institutions Code proposed by SB 1413, that would become operative only if SB 1413 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

#### Ch. 757 (AB 2963) Aroner. Income taxes: dependent care.

The Personal Income Tax Law, in modified conformity to federal income tax law, authorizes a refundable credit for household and dependent care expenses necessary for gainful employment, as provided. The credit is allowed only if the taxpayer furnishes more than one-half of the cost of maintaining a household that includes a qualifying individual.

This bill would expand the credit by providing that a child of parents who never married each other is a qualifying individual, if specified requirements are met.

The Tax Relief and Refund Account in the General Fund is continuously appropriated to make all payments required to be made to taxpayers or other persons, as specified.

By authorizing an increase in a refundable income tax credit to be paid from that account, this bill would make an appropriation.

This bill would incorporate additional changes in Section 17052.6 of the Revenue and Taxation Code, proposed by SB 1724, to become operative only if SB 1724 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

This bill would declare that it is to take effect immediately as a tax levy.

#### Ch. 758 (AB 3024) Committee on Transportation. Vehicles.

Existing law imposes specified licensing and regulatory requirements on dealers of motor vehicles, as defined. The term "dealer" does not generally include persons engaged in the sale, purchase, or exchange of vehicles that are not intended for use on the highways, but does include persons who are engaged in the purchase, sale, or exchange of motorcycles subject to identification under the Vehicle Code that are not intended for use on the highways. A violation of any of the requirements is a crime, punishable as specified.

This bill would, in addition, impose these licensing and regulatory requirements on persons engaged in the purchase, sale, or exchange of trailers subject to identification under the Vehicle Code even though they are not intended for use on the highways. The bill would make a conforming change to a related provision. By making existing crimes applicable to a new category of persons, this bill would impose a state-mandated local program.

Existing law requires mileage records for vehicles operated under fleet registration to be maintained for 5 years, or until audited, whichever occurs first. Existing law also requires declared gross or combined gross weight records for those vehicles to be maintained for 3 years following the date the vehicle is deleted from the fleet. A violation of any of these provisions is a crime, punishable as specified.

This bill would instead require mileage records to be maintained for 3 years after the close of the registration year and declared gross and combined gross weight records to be maintained for 4 years after the close of the registration year in which the vehicle was deleted. By revising existing crimes, this bill would impose a state-mandated local program.

Existing law requires the Department of Motor Vehicles to impose a penalty of \$50 or 10% of underpaid fees, whichever is greater, for underpaid fees due in connection with apportioned registration, as specified.

This bill would make imposition of that penalty discretionary. This bill would also specify when waivers of the penalty would be authorized, and when penalty provisions imposed by other provisions of existing law would control, as specified.

Existing law provides that fees, including penalties and service fees, due for the operation of a fleet apportionately registered vehicle are a lien upon all vehicles operated as part of the fleet, and upon any other fleet vehicles operated by the registrant, and that these liens expire 3 years from the date the fee or penalty first becomes due, unless the lien is perfected, in which case the lien expires 5 years from the date of perfection, as specified. This bill would provide that liens arising because of an audit shall instead expire 4 years from the date the registration fees first become due, unless perfected, in which case the lien expires 5 years from the date of perfection, as specified.

Existing law provides for the imposition of a transfer fee by the owner of a trailer, trailer coach, or commercial vehicle.

This bill would delete the provision imposing the transfer fee in the case of a trailer.

Existing law provides for issuance of a temporary permit for a person applying for a vehicle salesperson's license. Existing law also provides that the permit becomes invalid when the Department of Motor Vehicles issues, or refuses to issue, a license, unless the applicant demands a hearing as provided.

This bill would delete the provisions relating to the provision of a hearing, and instead would provide that the permit shall become invalid when canceled or when the applicant's license is issued or issuance has been refused.

Existing law provides that any person, while having in his or her possession a valid instruction permit, may operate a motor vehicle, other than a motorcycle or motorized bicycle, when either taking driver training instruction or when practicing that instruction, provided the person is accompanied by, and is under the immediate supervision of, a California licensed driver 25 years of age or older whose driving privilege is not on probation. Existing law further provides that any driver's license issued to a person who is at least 16 years of age but under 18 years of age shall be issued pursuant to a provisional licensing program, as specified.

This bill would instead authorize a person who possesses a valid instruction permit that was not issued pursuant to a provisional licensing program to operate a motor vehicle, other than a motorcycle or motorized bicycle, provided the person is accompanied by, and is under the immediate supervision of, a California licensed driver 18 years of age or older whose driving privilege is not on probation.

Existing law generally requires the driver of a commercial motor vehicle that carries hazardous materials or that is hauling hazardous waste, as specified, to obtain an endorsement issued by the Department of Motor Vehicles in order to operate the vehicle. This requirement is not applicable to specified persons operating a vehicle transporting asphalt or coal tar pitch, as specified, or to specified persons transporting hazardous waste, as specified.

This bill would delete the above exemptions from the endorsement requirement and would make a clarifying change.

Existing law requires proof of financial responsibility for vehicles used by motor carriers. Existing law also specifies the acceptable documentation for proof of financial responsibility.

This bill would add to the list of acceptable documentation, proof of insurance coverage provided by a charitable risk pool, as specified.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would make other technical, conforming, or clarifying changes to provisions relating to vehicles, the Resources Agency, and aeronautics.

This bill would also (1) incorporate additional amendments to Section 12805 of the Government Code as proposed by AB 103, contingent upon the prior enactment of AB 103; (2) incorporate additional amendments to Section 12509 and 12814.6 of the Vehicle Code as proposed by AB 2273, contingent upon the prior enactment of AB 2273; and (3) incorporate additional amendments of Section 286 of the Vehicle Code as proposed by SB 1743, contingent upon the prior enactment of SB 1743.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 759 (AB 3033) Committee on Judiciary. Family law.

(1) Existing law authorizes a court to order temporary spousal support during the pendency of any proceeding for dissolution of marriage or legal separation, consistent with specified criteria.

This bill would delete all criteria except those relating to domestic violence, as specified.

(2) Existing law creates, in the Department of Justice, the California Parent Locator Service and Central Registry which is required to collect and disseminate specified information with respect to any parent, putative parent, spouse, or former spouse. Existing law also requires the Director of the Department of Child Support Services to assume responsibility for implementing and managing all aspects of a single statewide automated child support system.

This bill would provide, instead, that upon implementation of the California Child Support Automation System, the Department of Child Support Services shall assume responsibility for the California Parent Locator Service and Central Registry pursuant to a letter of agreement, as specified, and would make related, conforming changes.

(3) Existing law authorizes the staff appraisers of specified state agencies to examine the records, including nonpublic records, of the county assessor.

This bill would authorize the staff appraisers of the Department of Child Services to examine those records.

Ch. 760 (AB 3048) Committee on Health. Health care.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensing and regulation of health care service plans by the Department of Managed Health Care.

This bill would correct various obsolete references.

Existing law provides for the regulation of disability insurers by the Insurance Commissioner. Existing law, the California Major Risk Medical Insurance Program, provides major medical insurance coverage to subscribers who may not otherwise qualify for coverage due to a preexisting medical condition and provides that the Managed Risk Medical Insurance Board shall administer the program. Existing law authorizes the exclusion of coverage or benefits during the subscriber's first 6 months of participation in the program for any condition that an ordinary person would have sought diagnosis, care, or treatment for or for which medical advice, care, or treatment was recommended or received during the 6 months immediately preceding the subscriber's enrollment in the program. Existing law, however, prohibits exclusion of coverage for a preexisting condition if the subscriber has satisfied a specified waiting period for prior health insurance that was involuntarily terminated if the subscriber has applied to enroll in the program no later than 31 days after the involuntary termination of the prior coverage.

This bill would instead authorize the exclusion of coverage or benefits for a preexisting condition during the subscriber's first 6 months of participation in the program only for any

condition for which medical advice, diagnosis, care, or treatment was recommended or received during the 6 months immediately preceding the subscriber's enrollment in the program. The bill would prohibit the exclusion of coverage for a preexisting condition if the subscriber was covered under any creditable coverage, as defined, that was terminated if the subscriber applies to enroll in the program no later than 63 days after termination of the prior coverage or within 180 days of termination of the prior coverage if the subscriber lost his or her creditable coverage for specified reasons.

Ch. 761 (SB 68) Battin. Local agency investments.

Under existing law, all money in the possession of or collected by any state agency or department is state money and is subject to provisions governing its deposit and handling in trust accounts. Existing law also establishes the Local Agency Investment Fund, authorizes a local government having money in its treasury not required for immediate needs to remit it to the Treasurer for deposit in that fund for the purpose of investment, and prescribes the handling of that money.

This bill would designate money in the Local Agency Investment Fund as nonstate money and would enact additional separate provisions governing the deposit and handling of that money in trust accounts.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 762 (SB 540) Sher. Forest practices: penalties.

Existing law requires the Attorney General or a district attorney, upon the request of the Director of Forestry and Fire Protection, to, as part of a misdemeanor action brought for a violation of the Z'berg-Nejedly Forest Practice Act of 1973 or any rules or regulations of the State Board of Forestry and Fire Protection, petition the superior court to impose, assess, and recover a civil penalty, as specified.

This bill would delete the requirement that the petition to the superior court be made as part of a misdemeanor action.

Ch. 763 (SB 843) Perata. Omnibus Tuberculosis Control and Prevention Act of 2002.

Existing law establishes various communicable disease prevention and control programs, including one for tuberculosis. That program provides for testing of various persons for tuberculosis by prescribed licensed health professionals.

This bill would enact the Omnibus Tuberculosis Control and Prevention Act of 2002.

This bill would until January 1, 2006, permit any local health department to provide for certification, by the local health officer, of tuberculin skin test technicians, as defined, in accordance with specified requirements.

Existing law requires each health care provider who treats a person for active tuberculosis disease, each person in charge of a health facility, or each person in charge of a clinic providing outpatient treatment for active tuberculosis disease to promptly provide a disease notification report and written treatment plan to the local health officer at the times that the health officer requires, but no less frequently than when there are reasonable grounds to believe that a person has active tuberculosis disease, and when a person ceases treatment for tuberculosis disease.

Existing law prohibits a health facility, local detention facility, or state correctional institution from discharging or releasing a person known to have active tuberculosis disease or a person the medical staff of the health facility or of the penal institution has reasonable grounds to believe has active tuberculosis disease, unless the notification report and individual treatment plan requirements specified above have been met.

This bill would provide that when a person described above is released on parole from a state correctional institution, the notification and written treatment plan shall be provided to both the local health officer for the county in which the parolee intends to reside and the local

health officer for the county in which the state correctional institution is located. It would require the Department of Corrections to inform the parole agent, and other parole officials as necessary, that the person has active or suspected active tuberculosis disease and provide information regarding the need for evaluation or treatment. In addition, the bill would require the parole agent and other parole officials to coordinate with the local health officer in supervising the person's compliance with medical evaluation or treatment related to tuberculosis, and to notify the local health officer if the person's parole is suspended as a result of having absconded from supervision. The imposition of new duties on local health officers in connection with these provisions would create a state-mandated local program.

Existing law provides that in the case of a parolee under the jurisdiction of the Department of Corrections, the local health officer shall notify the medical officer of the parole region or the physician and surgeon designated by the Director of Corrections when there are reasonable grounds to believe that the parolee has active tuberculosis disease and when the parolee ceases treatment for tuberculosis.

This bill would instead require the local health officer to notify the assigned parole agent, when known, or the regional parole administrator.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 764 (SB 993) Figueroa. Nursing.

Existing law, the Nursing Practice Act, provides for the issuance of a certificate by the Board of Registered Nursing to practice nurse-midwifery or to practice as a nurse practitioner, and describes the scope of practice authorized by the certificate. The act specifies in this regard that a certified nurse-midwife or a nurse practitioner may order or furnish drugs or devices pursuant to a standardized procedure, unless the certified nurse-midwife or nurse practitioner is in solo practice.

This bill would require a state department to consult with the board in promulgating regulations that affect the scope of practice of a certified nurse-midwife or nurse practitioner. The bill would also delete the practice restriction on the furnishing of drugs or devices applicable to a certified nurse-midwife or nurse practitioner in solo practice.

#### Ch. 765 (SB 1353) Perata. Harbors: Monterey Bay and the Bays of San Francisco, San Pablo, and Suisun: pilotage rates.

(1) Existing law specifies the rates of pilotage for vessels entering or leaving the Bays of San Francisco, San Pablo, and Suisun through the Golden Gate Bridge. The Board of Pilot Commissioners for those bays is required to adopt a schedule of pilotage rates for those operations that are not otherwise provided for under existing law. Existing law imposes a board operation surcharge of 7.5% of those pilotage fees, requires those funds to be deposited in the Board of Pilot Commissioners' Special Fund, and continuously appropriates those funds for the payment of the compensation and expenses of the board and its officers and employees and to fund pilot training programs.

This bill would require the rates specified for those vessels and the rates in the schedule adopted by the board to be increased by certain percentages pursuant to a specified schedule. The bill thereby would make an appropriation by increasing the amount of money deposited in a continuously appropriated fund.

(2) Existing law establishes the mill rate chargeable to the vessels specified above and authorizes that rate to be changed under certain circumstances, including when the number of licensed pilots is reduced to 60 pilots or falls below 60 pilots.

This bill would suspend until January 1, 2007, the authority to increase the mill rate under those circumstances.

Ch. 766 (SB 1590) Karnette. Motor vehicles: reportable property damage minimum.

Existing law requires the driver of every motor vehicle who is involved in an accident that has resulted in damage to the property of any one person in excess of \$500 or in bodily injury or in the death of any person to report the accident to the Department of Motor Vehicles within 10 days after the accident, as specified.

This bill would increase the minimum property damage that is required to be reported to \$750. The bill would make conforming changes to related provisions.

Ch. 767 (SB 1672) Costa. Integrated Regional Water Management Planning Act of 2002.

Existing law requires urban water suppliers, as defined, to prepare urban water management plans to facilitate long-term resource planning to ensure adequate water supplies to meet existing and future demands for water.

This bill would enact the Integrated Regional Water Management Planning Act of 2002. The bill would authorize a regional water management group, as defined, to prepare and adopt a regional plan, in accordance with certain procedures, that addresses programs, projects, reports, or studies relating to water supply, water quality, flood protection, or related matters, over which any local public agency, as defined, that is a participant in that group has authority to undertake.

The bill would require the Department of Water Resources, the State Water Resources Control Board, the State Department of Health Services, or CALFED, as appropriate, to include in any set of criteria used to select the projects and programs they administer under specified provisions of law or under a specified CALFED program a criterion that provides a benefit for qualified projects or programs.

Ch. 768 (SB 1699) Ortiz. Health care programs: denial of continued enrollment, suspension, and withholding of payment.

Existing law imposes various functions and duties on the State Department of Health Services and the Director of Health Services with respect to the administration and oversight of various health programs and facilities, including the Medi-Cal program.

Existing law provides that a Medi-Cal provider may be denied continued enrollment in, suspension from, or have payments withheld in connection with, the Medi-Cal program, if certain actions relating to fraud, abuse, or misrepresentation have been found to have taken place.

This bill would require the director to review the evidence supporting the denial of continued enrollment, suspension, or withholding of payments in cases where there is evidence of fraud, abuse, or willful misrepresentation on the part of a provider, as defined, for any health care program administered by the department, including the Medi-Cal program, and would authorize the director to deny continued enrollment, suspend, or withhold payments to, an applicant or provider with respect to other health care programs administered by the department if the director finds that certain conditions relating to fraud, abuse, and willful misrepresentation exist. The bill would also authorize the director to deny the application of an applicant or provider to participate in any health care program administered by the department when certain conditions relating to fraud, abuse, or willful misrepresentation exist or when utilization controls have been imposed on an applicant or provider.

Ch. 769 (SB 1769) Machado. Market milk.

Existing law authorizes the Secretary of Food and Agriculture to establish and administer a milk producers security trust fund and creates a Milk Producers Security Trust Fund Advisory Board to advise the secretary on the administration of the fund. Existing law directs the secretary to collect security charges on milk, and deposit those charges into the fund until the fund reaches the maximum provided for, as specified. Under existing law, when the fund reaches the maximum provided for in these provisions, the secretary is required to discontinue collection of the security charges except for the purpose of replacing periodically any withdrawals from the fund in order that the maximum amount in the fund is maintained.

This bill would authorize the secretary, in consultation with the board, to consider and use alternative financial instruments as an alternative to solely using security charges to meet the above security requirements. This bill would make other nonsubstantive, clarifying, and conforming changes.

Ch. 770 (SB 1879) Poochigian. Real estate: disclosures.

Existing law requires certain disclosures to be made upon the transfer of real estate and prescribes the manner and form of the disclosures. Existing law requires the seller of real property subject to a continuing lien securing the levy of special taxes pursuant to the Mello-Roos Community Facilities Act, or a fixed lien assessment collected in installments to secure bonds issued pursuant to the Improvement Bond Act of 1915, to make a good faith effort to obtain a disclosure notice concerning the tax assessment from each local agency that levies the tax or collects the assessment, on the property being transferred and deliver it to the prospective purchaser, as long as the notices are made available by the local agency.

Existing law, the Proposition 218 Omnibus Implementation Act, imposes prior notice, protest, and hearing requirements when a local agency levies a new or increased tax or assessment upon real property. Existing law also requires the legislative body of the local agency to designate an office, department, or bureau to prepare a "Notice of Special Assessment" and to furnish a seller of real property with a notice upon request.

This bill would provide that a seller of real property may satisfy its disclosure notice requirement by delivering a disclosure notice that is substantially equivalent, as specified, and obtained from another source, until December 31, 2004.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 771 (AB 337) Correa. Real estate: disclosures.

Existing law requires certain disclosures to be made upon the transfer of real estate and prescribes the manner and form of the disclosures. Existing law requires the seller of real property subject to a continuing lien securing the levy of special taxes pursuant to the Mello-Roos Community Facilities Act, or a fixed lien assessment collected in installments to secure bonds issued pursuant to the Improvement Bond Act of 1915, to make a good faith effort to obtain a disclosure notice concerning the tax assessment from each local agency that levies the tax or collects the assessment, on the property being transferred, and to deliver it to the prospective purchaser, as long as the notices are made available by the local agency.

Existing law, the Proposition 218 Omnibus Implementation Act, imposes prior notice, protest, and hearing requirements when a local agency levies a new or increased tax or assessment upon real property. Existing law also requires the legislative body of the local agency to designate an office, department, or bureau to prepare a "Notice of Special Assessment" and to furnish a seller of real property with a notice upon request.

This bill would provide that a seller of real property may satisfy the seller's disclosure notice requirement regarding the Improvement Bond Act of 1915 by delivering a disclosure notice that is substantially equivalent, as specified, and obtained from another source, until December 31, 2004.

The bill would also permit a seller of real property to satisfy the disclosure notice requirements described above by delivering a disclosure notice, obtained from a

nongovernmental source, that meets specified requirements. The bill would permit a notice provided by a private entity other than a designated office, department, or bureau of a levying entity to be modified as specified for clarity and accuracy, and would require that notice to include certain information.

Ch. 772 (SB 1926) Costa. Commissioner of Corporations.

(1) Existing law, the California Finance Lenders Law, provides for the regulation and licensure by the Commissioner of Corporations of persons engaging in the business of making consumer loans and commercial loans. A willful violation of the California Finance Lenders Law is a crime.

This bill would prohibit those persons from producing, advertising, offering, selling, distributing, or transferring for use in this state, any live check, as defined, unless the check contains a specified disclosure. The bill would prohibit live checks from being negotiable 30 days after the date printed on the live check. The bill would require a loan solicitation made through a live check to be honored in its full amount unless the account on which the solicitation is made is closed prior to the date the check is cashed. The bill would provide safeguards to protect consumers in the event a live check is used by someone other than the intended recipient of the live check. The bill would also authorize the commissioner to levy administrative penalties against licensees for willfully violating the bill.

Because a violation of this provision would be a crime, the bill would impose a state-mandated local program.

(2) Existing law requires a finance lender to retain specified records for 2 years.

The bill would increase the time for retaining these records to 3 years. The bill would make other changes with respect to the commissioner's authority to issue orders and enforce regulations relating to broker-dealers, escrow agents, finance lenders, and residential mortgage lenders.

(3) Existing law requires any person who engages in business as a broker-dealer to be licensed and regulated by the Commissioner of Corporations. Existing law, the Escrow Law, requires any person who engages in business as an escrow agent to be licensed and regulated by the commissioner. Existing law authorizes the commissioner to bring a civil action against a person who is in violation of a law or order regulating broker-dealers.

This bill would specify that in a case brought by the commissioner where a defendant is ordered to pay restitution, the order is deemed a money judgment and is fully enforceable by the victim as if it were a separate civil judgment.

(4) Existing law establishes the Escrow Law Advisory Committee and provides for the appointment and terms of its 11 members.

The bill would delete the requirement that the members from the Escrow Agents' Fidelity Corporation and the Escrow Institute of California serve 2-year terms.

(5) Existing law defines entity conversion transactions. Existing law authorizes the commissioner to charge and collect specified fees from broker-dealers regarding applications to sell specified securities.

This bill would expand the definition of entity transactions to include a conversion that occurs entirely out of state. The bill would require broker-dealers to pay a specified application fee to the commissioner if the broker-dealer engages in entity conversion transactions.

(6) This bill would incorporate additional changes to Section 25005.1 of the Corporations Code made by SB 399 if it is enacted prior to this bill.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 773 (SB 1982) Perata. Community care facilities: definition.

Existing law, the California Community Care Facilities Act, provides for the licensure and regulation of community care facilities, as defined, by the State Department of Social Services.

Existing law defines a community care facility to include an adult day care facility as a facility that provides nonmedical care to persons 18 years of age or older in need of personal services, supervision, or assistance essential for sustaining the activities of daily living or for the protection of the individual on less than a 24-hour basis. Under existing law, a community care facility also includes an adult day support center, which is a community-based group program designed to meet specified needs of functionally impaired adults, in a protective setting on less than a 24-hour basis.

This bill would delete the definition of an adult day care facility for purposes of the act, and would revise the definition of an adult day support center to mean any community-based facility or program that provides care to persons 18 years of age or older in need of personal services, supervision, or assistance essential for sustaining the activities of daily living or for the protection of these individuals on less than a 24-hour basis. The bill would also redesignate adult day support centers as adult day programs.

This bill would require the department to adopt regulations to combine the existing categories of adult day care centers and adult day support centers into the new adult day program category. The bill would make additional conforming changes.

Ch. 774 (SB 2079) Burton. Driving instruction: motor carriers: drug testing.

Existing law generally regulates driving schools and driving instructors.

This bill would provide that these regulations may not be construed to direct or restrict driver education courses offered by private secondary schools, as defined, or to require credentialed or certified instructors in courses offered by those schools. The bill would make technical changes.

The bill would provide that these changes would remain in effect only until July 1, 2004.

Existing law imposes various requirements upon owner-operators providing transportation services to a motor carrier under the direction and control of that motor carrier, as specified. Existing law defines, for those purposes, "under the direction and control" as, among other things, the performance of transportation services by the owner-operator for a minimum of 60 days within the past 90 days, as specified.

This bill would specify that the relevant period would be 60 calendar days within the past 90 calendar days.

Existing law requires motor carriers and drivers to comply with federal requirements relating to, among other things, controlled substances and alcohol use and testing for the same. Existing law prohibits an applicant for employment as a commercial driver from being placed on duty by the motor carrier until compliance with certain federal regulations concerning controlled substance and alcohol use and employment history has occurred, as specified.

This bill would require an owner-operator to notify all other motor carriers with whom he or she is under contract when these requirements have been met. Violation of these provisions would be an infraction.

By creating a new crime, this bill would impose a state-mandated local program.

Existing law establishes a classification of motor carrier of property known as owner-operators.

This bill would require every motor carrier who is within the owner-operator classification to notify all other motor carriers with whom he or she is under contract when the status of the motor carrier changes so that he or she is no longer within the owner-operator classification. Violation of these provisions would be a crime pursuant to other provisions of law.

By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would provide that it is to take effect immediately as an urgency statute.

Ch. 775 (SB 2092) Committee on Revenue and Taxation. Taxation: property taxation: local sales and use taxes.

(1) The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975-76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. The California Constitution also excludes from the terms "purchased" and "change in ownership" the purchase or transfer of the principal residence of the transferor, or the purchase or transfer of the first \$1,000,000 of all other real property, in the case of a purchase or transfer between parents and their children, or grandparents and grandchildren as defined by the Legislature. Statutory law that implements this constitutional exclusion specifies various requirements and procedures.

This bill would, for purposes of those statutory provisions, require an additional certification, as provided, by claimants of the exclusion as to their kinship status and other matters.

(2) Existing property tax law, pursuant to the authorization of the California Constitution, permits persons over 55 years of age and persons who are severely and permanently disabled, as specified, to transfer, under certain conditions, the property tax base year value of their home to a replacement home in the same county, and if a county ordinance so providing has been adopted, to a replacement home in a different county.

This bill would permit persons over the age of 55 years and disabled persons to transfer a base year value of land, as well as the manufactured home, to and from manufactured home parks owned by resident-controlled entities.

The bill would permit these residents to file a claim for the same base year value transfer within 3 years of the reappraisal, within a specified period, of the pro rata share of the manufactured home park, instead of within 3 years from the day they sold an original property.

This bill would also clarify how specified amendments made by prior law, relating to transfer of base year value where the original home was damaged or destroyed, shall apply.

(3) Existing law provides that all property is taxable unless otherwise provided. Existing law permits a county board of supervisors to provide for the cancellation of a supplemental tax bill where the amount of the taxes to be billed is less than the cost of administration, not to exceed \$20, or \$50 for mobilehome accessories.

This bill would increase the maximum amount of taxes permitted to be canceled from \$20 to \$50, and would eliminate obsolete provisions relating to mobilehome accessories.

(4) The California Constitution authorizes the Legislature to exempt from taxation property that is used exclusively for religious, hospital, or charitable purposes, and is owned or held in trust by a nonprofit entity. Pursuant to this constitutional authority, existing law exempts from property taxation lower income housing, that meets specified conditions, that is owned and operated by the housing entity of a federally designated Indian tribe.

This bill would designate this latter exemption as the "tribal housing exemption" and would, for purposes of the exemption, specify the requirements for the filing of an exemption affidavit, and revise the definition of lower income housing to also include lower income households as defined by government financing agreements. The bill would provide for filing deadlines for the exemption, add provisions for partial exemptions in the case of late filing and for postlien date acquisition of property, and for other administrative matters.

(5) Existing law provides that if any property on the local roll has escaped assessment, the assessor is required to assess the property upon discovery.

This bill would permit a county board of supervisors to require that the assessor not make an escape assessment if the assessment would result in the amount of tax due being less than the cost of assessing and collecting the tax, not to exceed \$50.

(6) Existing property tax law provides, pursuant to the authorization of the California Constitution, for the exemption from property taxation of specified amounts of the assessed value of the home of a disabled veteran, or a veteran's spouse in the case in which the person has, as a result of a service-connected disease or injury, died while on active duty in military service. It also provides for partial exemptions, each applicable as provided and contingent upon an affidavit being filed, as specified.

This bill would make various revisions to these provisions to permit the disabled veterans' exemption to apply to property owned, but not resided in, by the individual on the lien date, and to terminate the exemption on the individual's prior residence as of the lien date. The bill would also establish an alternative final filing date, and make conforming changes with respect to escape assessments on property for which the exemption has been terminated.

(7) Existing property law requires each person owning taxable personal property with an aggregate cost of \$100,000 or more to file a signed property statement with the county assessor.

This bill would permit these statements to be filed electronically, subject to authentication, as specified.

(8) The existing Manufactured Home Property Tax Law currently refers to "manufactured homes," rather than mobilehomes.

This bill would conform various other references in property tax law provisions to make similar reference changes, and would clarify various provisions relating to manufactured homes.

(9) The bill would make various other technical, conforming changes to correct various cross-references and to conform provisions to related, current law.

(10) By imposing additional administrative duties on local tax officials, this bill would impose a state-mandated local program.

(11) The Bradley-Burns Uniform Local Sales and Use Tax Law requires that the place of use for reporting and transmitting any use tax with respect to a leased vehicle, as defined, is determined according to specified criteria.

This bill would define the term "motor vehicle," for purposes of these provisions, to mean a self-propelled passenger vehicle, other than a house car, or a pickup truck rated less than one ton.

(12) Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 776 (AB 2388) La Suer. Franchise Tax Board: debt collection program.

Existing law generally provides that fines, state or local penalties, forfeitures, restitution fines, restitution orders, or any other amounts imposed by a superior or municipal court of the State of California upon a person or any other entity that are due and payable in an amount totaling no less than \$250, in the aggregate, for criminal offenses, may be referred, by the county or the state, to the Franchise Tax Board for collection, as specified.

Existing law also provides that, for purposes of a manageable implementation and evaluation of this debt collection program, the Franchise Tax Board may limit referrals to 17 counties and requires the Franchise Tax Board to report to committees of the Legislature the results of the debt collection program, to specifically address the feasibility and advisability of expanding the debt collection program so that it may accept referrals from all 58 counties in the state.

Existing law provides that the provisions authorizing the debt collection program shall remain in effect until January 1, 2003.

This bill would extend the provision of the debt collection program to January 1, 2006.

Ch. 777 (SB 898) Perata. Check cashers: deferred deposit transactions.

Existing law provides for regulation by the Department of Corporations of finance lenders engaged in the business of making consumer or commercial loans. Existing law requires every owner of a check casher's business to obtain a permit from the Department of Justice.

This bill would enact the California Deferred Deposit Transaction Law, which except for specified provisions would become operative March 1, 2004, to provide for specific regulation of persons engaged in the business of making or negotiating deferred deposit transactions, which are transactions in which the lender defers depositing a consumer's personal check until a specific date pursuant to a written agreement. The bill would provide for the licensing of those persons by the Commissioner of Corporations and for the charging of unspecified fees. The bill would impose various duties on a person engaged in the business of making or negotiating deferred deposit transactions, and would specify the rights of a consumer in that regard. The bill would enact certain transition provisions relative to the transfer of responsibilities from the Department of Justice to the Department of Corporations. The bill would exempt persons engaged in the business of making or negotiating deferred deposits under the bill from the usury limitation in Section 1 of Article XV of the California Constitution. Because a violation of these provisions would be a crime, the bill would impose a state-mandated local program by creating new crimes. The bill would make related changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 778 (AB 2244) Wayne. Prepaid calling cards and services.

Existing law regulates the sale of prepaid calling cards and services. Existing law requires a company that sells prepaid calling cards and services to make certain disclosures regarding fees and surcharges, and regulates the manner in which these fees are imposed.

This bill would add to the list of specified fees and charges that are required to be disclosed and would impose additional restrictions on the manner in which these fees and charges are imposed.

Existing law requires a company that sells prepaid calling cards and services to maintain a toll-free customer service number.

This bill would impose additional requirements in operating and maintaining the company's customer service number.

The bill would include certain transition provisions and make other related changes.

Ch. 779 (AB 2293) Liu. Consumer credit counseling organizations.

The Check Sellers, Bill Payers and Proraters Law provides for licensing and regulation by the Commissioner of Corporations of various licensees. That law provides for licensing and regulation of proraters, defined as persons who receive money from a debtor for the purpose of distributing the money among the debtor's creditors in full or partial payment of the debtor's obligations. Existing law provides an exemption from licensing and regulation under these provisions for certain nonprofit community service organizations that provide prorating services if those organizations comply with certain requirements.

This bill would establish new regulatory provisions exempting nonprofit community service organizations that engage in prorating activities from regulation if certain requirements are met. The new regulatory provisions would, among other things, authorize the commissioner to investigate violations of the Check Sellers, Bill Payers and Proraters Law, impose various civil penalties for a violation of that law, and would require moneys collected from certain penalties to be deposited in the State Corporations Fund. The bill would require the Department of Corporations to conduct a study of the consumer credit counseling industry in California and make certain recommendations to the Legislature by March 1, 2003.

Ch. 780 (AB 2957) Koretz. Employment: mass layoffs, relocations, and terminations.

Existing law provides for a system of labor standards enforcement administered by the Labor Commissioner.

This bill would preclude employers from ordering a mass layoff, relocation, or termination, as defined, of an industrial or commercial facility employing a prescribed number of people, without first giving 60 days' notice to affected employees and specified government agencies. An employer would not be required to comply with the 60-day notice requirement established by this bill if the employer is actively seeking capital or business that would enable the employer to avoid or postpone a relocation or termination, and the employer reasonably and in good faith believed that giving the 60 days' notice would preclude the employer from obtaining the capital or business.

This bill would further provide for civil penalties against an employer who fails to provide the required notices. Employees who bring a civil action to enforce the provisions of this bill would, at the discretion of the court, be entitled to recover attorney's fees. The court would also have discretion to reduce the amount of an employer's liability if the employer conducted a reasonable investigation in good faith and had reasonable grounds to believe that it was not violating the law. Payments to a person by an employer who is liable to that person under this bill would not be considered wages or compensation for personal services for purposes of unemployment insurance, and unemployment insurance benefits would not be denied or reduced by those payments.

Ch. 781 (AB 1943) Chu. Acupuncture.

Existing law, the Acupuncture Licensure Act, regulates the practice and licensure of acupuncture and establishes the Acupuncture Board to enforce and administer these provisions.

Existing provisions of the act require the board to establish standards for the approval of schools and colleges offering education and training in the practice of an acupuncturist.

This bill would require that those standards include a minimum of 3,000 hours of study in curriculum pertaining to the practice of an acupuncturist and would require that the revised standards be established by the board on or before January 1, 2004. The bill would provide that the standards would apply to all students entering programs on or after January 1, 2005.

This bill would declare the intent of the Legislature, if SB 1951 of the Statutes of 2002 is passed, to consider for implementation recommendations to increase curriculum hours for the licensure of acupuncturists in excess of 3,000 hours up to 4,000 hours. The bill would also declare the intent of the Legislature that the commission provide recommendations for

reviewing the competence of certain licensed acupuncturists and recommendations for training, testing, or continuing education of those acupuncturists.

Ch. 782 (SB 701) Torlakson. Redevelopment.

(1) The existing Community Redevelopment Law prohibits the Redevelopment Agency of the City of Oakland from receiving specified property tax revenue that the East Bay Regional Park District would be entitled to receive if a redevelopment plan had not been amended.

This bill would delete this prohibition.

(2) Existing law requires a redevelopment agency to use moneys in its Low and Moderate Income Housing Fund to increase, improve, and preserve the supply of low- and moderate-income housing, which is defined to include the preservation of certain units for a specified period of time.

This bill, instead, would require those units to be preserved for the longest feasible time, but not less than 55 years. It would also require the redevelopment agency to comply with its affordable housing obligation prior to exceeding a limit on the number of tax dollars that may be divided and allocated if required by specified provisions.

(3) Existing law requires a redevelopment agency that adopts a redevelopment plan to also adopt an implementation plan containing prescribed information, including how the project will implement, among other things, a requirement that the agency expend, over the duration of the implementation plan, the moneys in the Low and Moderate Income Housing Fund to assist housing for persons of low income and very low income in at least the same proportion as the total number of housing units needed for each of those income groups bears to the total number of units needed for persons of moderate, low, and very low income within the community, and to assist housing that is available to families with children, as prescribed.

This bill would, among other things, require the implementation plan to address specified matters relating to that requirement. It would, until January 6, 2012, exempt the Redevelopment Agency of the City of Covina from specified expenditure requirements regarding these moneys.

(4) Existing law requires the agency to periodically hold a hearing to review the redevelopment plan and the implementation plan, and requires notice of that hearing to be published, as specified.

This bill would require that review to address prescribed matters relating to replacement dwelling units, project area housing, and the disposition of Low and Moderate Income Housing Fund moneys. The bill would additionally require notice of that hearing to also be mailed to persons and agencies that have requested notice.

(5) Existing law authorizes until January 1, 2006, the Redevelopment Agency for the City of Lancaster to purchase or otherwise acquire, or cause by regulation or agreement the purchase or other acquisition of, long-term affordability covenants on mobilehome parks in which residents rent spaces and either rent or own the mobilehome occupying their spaces, that restrict the cost of renting or purchasing those units, under prescribed conditions.

This bill would authorize until January 1, 2006, the Redevelopment Agency for the City of Fairfield to purchase or otherwise acquire, or cause by regulation or agreement the purchase or other acquisition of, long-term affordability covenants on mobilehome parks in which residents rent spaces and either rent or own the mobilehome occupying their spaces, that restrict the cost of renting or purchasing those units, under prescribed conditions.

(6) The bill would make additional conforming and clarifying changes relating to redevelopment agency assistance for low- and moderate-income housing units.

Ch. 783 (SB 772) Bowen. Electronic mail: service providers.

Existing law regulates the sending of unsolicited electronic mail advertisements.

This bill would require an electronic mail service provider, as defined, to give each customer notice at least 30 days prior to permanently terminating the customer's electronic

mail address, unless otherwise provided by law or contract. The bill would prohibit a contract from permitting termination of service without cause with less than a 30-day notice. The bill would provide that it supersedes and preempts all local agency provisions regarding notice of electronic mail termination by providers of electronic mail service. The bill would also provide that its provisions would become inoperative if a federal law or regulation is enacted regulating notice requirements in the event of termination of electronic mail service.

Ch. 784 (SB 1316) Committee on Judiciary. Court unification.

The California Constitution provides for the abolition of municipal courts and their unification within the superior courts, as specified.

This bill would conform various statutory provisions of law to the abolition of municipal courts and their unification within the superior courts.

The bill would also make related statutory changes with respect to certain superior court rules; the discontinuation of law libraries; jury service, to become operative January 1, 2004; funding of certain jury costs; the definition of subordinate judicial officers and their powers, duties, and compensation; the appointment, duties, and fees of court reporters; the setting of various court and related fees; the transfer of various duties from the county clerk to the clerk of the superior court; the duties of the Judicial Council and the California Law Revision Commission; provisions affecting county employees who work for the courts; the duties of sheriffs and marshals with respect to the courts; state and county charges for court fees and costs; the boundaries of judicial districts; the appointment and duties of various officers and employees of the superior court; and the definition of court operations for purposes of trial court funding.

The bill would also set forth the intent of the Legislature and the operation of the bill with respect to existing rights under the law. The bill would also provide that any other bill enacted in the year 2002 that takes effect on or before January 1, 2003, and that affects any section affected by this bill, except AB 3034, shall prevail over the changes made by this bill.

Ch. 785 (SB 1677) Alpert. Surrogate parents.

(1) Existing law authorizes a court to limit the control exercised over a minor by a parent or guardian in all cases where the minor is adjudged a ward or dependent child of the court.

Existing law provides for the appointment of an individual to act as a surrogate parent upon the referral of a child who is adjudged a ward or dependent child of the court to a local educational agency for special education and related services, or in cases where the child already has a valid individualized education program. Existing law provides that an individual acting as a surrogate parent has the same authority as a parent with respect to educational decisions concerning the child. Existing law prohibits the appointment of a surrogate parent under certain conditions. Existing law requires the local educational agency to appoint another surrogate parent if the child is moved from the home of the relative caretaker or foster parent who has been appointed as a surrogate parent.

Existing law defines a parent, for purposes of specified provisions governing special education programs, to include a person who has custody of a minor if neither a parent nor a legal guardian can be notified of education actions under consideration.

This bill would revise and recast these provisions. The bill would require that the local educational agency appoint a surrogate parent under the circumstances described above, if the court has specifically limited the right of the parent or guardian to make educational decisions for the child, and the child has no responsible adult to represent him or her as specified. The bill would also revise the definition of a parent, as described above, to also include persons acting in the place of a parent, as specified.

The bill would require the local educational agency to appoint a new surrogate parent if a dependent child or ward is moved from the home of the surrogate parent only if necessary to ensure adequate representation of the child. The bill would specify the requirements, duties, and term of service of a person who serves as a surrogate parent. The bill would

require a local educational agency to terminate the appointment if the surrogate parent is not properly performing the duties of a surrogate parent or if the person has a conflict of interest. The bill would also require the State Department of Education to develop a model surrogate parent training module and manual to be made available to local educational agencies.

By imposing new duties and a higher level of service upon local educational agencies, the bill would impose a state-mandated local program.

(2) Existing law requires that each social study or evaluation concerning a dependent child or a ward that is made by a social worker or child advocate appointed by the court and that is required to be received into evidence include a factual discussion of specified subjects. Existing law also requires the status of every dependent child or ward in foster care to be reviewed at least every 6 months. Existing law requires the court to make specified factual determinations regarding the dependent child or ward, and requires supplemental reports that include a factual discussion of specified subjects concerning the dependent child or ward.

This bill would require the social studies and evaluations described above to include a factual discussion of whether the right of the parent or guardian to make educational decisions for the dependent child or ward should be limited and, if it makes that recommendation, whether there is a responsible adult available to make educational decisions for the dependent child or ward. The bill would also require the court to make similar factual determinations regarding a dependent child or ward at the status review hearing and to appoint a responsible adult to make those educational decisions. The bill would require the supplemental reports filed concerning the dependent child or ward to include similar information. By imposing additional duties on local employees, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(4) The bill would provide that amendments made to Sections 358.1, 366, 366.1, 366.3, 706.5, and 727.2 of the Welfare and Institutions Code by its provisions take effect only if AB 886 of the 2001–02 Regular Session is enacted.

The bill also would recommend that the Judicial Council adopt appropriate rules, standards, and forms regarding the implementation of these provisions and the provisions of AB 886 of the 2001–02 Regular Session if this bill and AB 886 are enacted.

Ch. 786 (SB 1730) Bowen. Personal information.

(1) Existing law authorizes a consumer to place a security alert in his or her credit report by making a request in writing or by telephone to a consumer credit reporting agency, as specified. Existing law requires consumer credit reporting agencies to take specified actions in response to a request by a consumer to place a security freeze, as defined, on his or her credit report. Existing law makes various entities exempt from that requirement.

This bill would additionally exempt from those requirements the use of a consumer credit report by any person or entity administering a credit file monitoring subscription service to which the consumer has subscribed or by any person or entity for the purpose of providing a consumer with a copy of his or her credit report upon the consumer's request. The bill would also exempt a fraud prevention services company from the requirement to place a security alert or a security freeze in a credit report, as specified.

(2) Existing law prohibits a person or entity, except as specified, from publicly posting or displaying an individual's social security number, printing that social security number on

a card required for the individual to access products or services or on materials mailed to the individual, or otherwise requiring an individual to transmit or use that social security number. These provisions become operative in the case of a health care service plan, a provider of health care, and other, specified health care related entities as the requirements pertain to individual policyholders, employer groups, and enrollees of state medical insurance programs on various dates, as specified.

This bill would revise those provisions to additionally provide that they shall become operative in the case of the provision by any person or entity of administrative or other services relative to health care or insurance products or services on various dates, as specified.

Ch. 787 (SB 1798) Ackerman. Crime.

Existing law contains numerous provisions pertaining to crime and the implementation of the criminal laws of this state.

This bill would make numerous, nonsubstantive changes to these provisions.

Ch. 788 (AB 2653) Chu. Criminal procedure.

Under existing law, to continue a hearing in a criminal proceeding specified procedures must be followed. Existing law makes an exception to these procedures and allows a party to make a motion for a continuance in which the moving party shows good cause for the failure to comply with the above requirements. "Good cause" is defined as those cases involving specified crimes in which the prosecuting attorney assigned to the case has another trial, preliminary hearing, or motion to suppress in progress in that court or another court. Existing law permits only one continuance per case for specified cases. Existing law also permits superior and municipal courts of a county to adopt consistent rules regarding the method of giving notice or waiver of service when a continuance is sought because of a schedule conflict.

This bill would include a hate crime within the list of crimes that constitute "good cause" for a continuance. This bill would only permit one continuance for cases involving hate crimes. This bill would remove provisions permitting courts to adopt rules regarding the method of service when there is a schedule conflict, as specified.

Ch. 789 (SB 253) Ortiz. Stem cells: human tissue: research.

Under existing law, it is unlawful for any person to knowingly acquire, receive, sell, promote the transfer of, or otherwise transfer any human organ, for purposes of transplantation, for valuable consideration.

Under existing law, human tissue may be removed in certain circumstances from human remains for the use of the tissue by authorized donees, including, but not limited to, physicians, hospitals, and educational institutions, for transplant, therapeutic, or scientific purposes.

This bill would declare that the policy of the state shall be that research involving the derivation and use of human embryonic stem cells, human embryonic germ cells, and human adult stem cells from any source, including somatic cell nuclear transplantation, shall be permitted, as specified. This bill would require a health care provider delivering fertility treatment to provide his or her patient with specified information. The bill would authorize a donation of a human embryo pursuant to specific requirements and would prohibit the purchase or sale of embryonic or cadaveric fetal tissue for research purposes.

Ch. 790 (SB 686) Ortiz. Health care service plans.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care and provides for the department to be supported from the Managed Care Fund. Existing law requires health care service plans to pay an amount each fiscal year as a reimbursement of its share of all costs and expenses reasonably incurred in the administration of the act.

Existing law requires health care service plans to pay \$12,500 plus an amount up to an amount computed in accordance with a specified schedule, and requires specialized health care service plans to pay \$7,500 plus an amount up to an amount computed in accordance with a specified schedule as reimbursement for that cost. Existing law authorizes the director to impose an additional assessment, for the 2000–01, 2001–02, and 2002–03 fiscal years in order to provide the department with sufficient revenues to support costs and expenses, including maintaining a prudent reserve. Existing law permits the director to require a health care service plan to pay an additional assessment to provide the department with sufficient revenue.

This bill would change the maximum rate for reimbursement for the administration expenses to \$10,000 per plan. The bill would require non-specialized health care service plans to pay 65% of the department's costs and expenses for the ensuing fiscal year and specialized plans to pay 35% of the department's costs and expenses for the ensuing fiscal year, calculated on a per enrollee basis. The bill would, effective July 1, 2003, remove the director's authority to require a health care service plan to pay an additional assessment to provide the department with sufficient revenue.

Ch. 791 (SB 842) Speier. Health care: prescription drug benefits.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the regulation of health care service plans by the Department of Managed Health Care. Existing law requires health care service plan contracts to provide specified coverage to enrollees and subscribers, including specified benefits regarding prescription drugs. Existing law provides that a violation of the act is a crime.

This bill would specify that certain provisions of the act requiring a health care service plan to include prescription drug benefits shall not be construed to deny or restrict the authority of the Department of Managed Health Care to ensure a plan's compliance with the act when a plan provides coverage for prescription drugs.

The bill would also specify procedures for a plan to request approval from the department for a copayment, deductible, limitation, or exclusion to its prescription drug benefits and would require the department to adopt regulations outlining the standards it uses in reviewing these requests. The bill would require the department to review periodically these regulations and, commencing on or before July 1, 2004, to report annually to the Legislature regarding the implementation of these provisions.

In addition, this bill would provide, subject to specified exceptions, that nonformulary prescription drugs include any drug for which an enrollee's copayment or out-of-pocket costs are different than the copayment for a formulary prescription drug.

Ch. 792 (SB 1092) Sher. Health care service plans.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the regulation of health care service plans by the Department of Managed Health Care. Existing law requires each plan licensed by the department to pay various fees associated with the department's regulatory activities, including a share of costs and expenses associated with financial examinations, grievances, and complaints.

This bill would require until January 1, 2007, that the Director of the Department of Managed Health Care adopt regulations on or before July 1, 2003, to establish the Consumer Participation Program, which would allow for the director to award reasonable advocacy and witness fees to any person or organization demonstrating that the person or organization represents the interests of consumers and has made a substantial contribution on behalf of consumers to the adoption of any regulation or to an order or decision, as specified, made by the director. The bill would provide that fees awarded under these provisions would be considered costs and expenses of the department that may be recovered from health care service plans but would prohibit an increase in the amount of the fees. The bill would also

require the department to report to the Legislature before March 1, 2004, and annually thereafter, specified information concerning the Consumer Participation Program.

Ch. 793 (SB 1913) Committee on Insurance. Department of Managed Health Care and Department of Insurance: joint working group.

Existing law requires the Director of Managed Health Care in the Department of Managed Health Care to consult with the Insurance Commissioner in the Department of Insurance to ensure consistency of regulations relating to health care.

This bill would require the Department of Managed Health Care and the Department of Insurance to maintain a joint senior level working group to ensure clarity in enforcement and consistency in regulations. The bill would require the joint working group to review and examine certain procedures in the departments and to report its findings to the Insurance Commissioner and the Director of the Department of Managed Health Care to submit to the Legislature by January 1 of every year for 5 years.

Ch. 794 (AB 1401) Thomson. Health benefit coverage.

(1) The California COBRA Program (Cal-COBRA) and other provisions of existing law require health care service plans and health insurers to offer health benefit coverage to specified individuals who are without that coverage. Existing law also creates the Managed Risk Medical Insurance Board which administers the California Major Risk Medical Insurance Program (MRMIP) to provide major risk medical coverage to residents who are unable to secure adequate private health coverage. Under existing law, designated amounts from the Cigarette and Tobacco Products Surtax Fund are deposited annually into the Major Risk Medical Insurance Fund, which is continuously appropriated to pay for the MRMIP expenses. Existing law imposes requirements relating to the obligation of a health insurance issuer to provide coverage through a converted policy to certain individuals after they become ineligible for coverage through a group plan.

This bill would revise certain provisions of Cal-COBRA and other existing laws that require plans and insurers to offer health benefit coverage to certain individuals. The bill, in this regard, would, effective September 1, 2003, revise coverage requirements for converted policies and would also require a health care service plan and a health insurer to offer specified individuals who begin receiving continuation coverage on or after January 1, 2003, and who have exhausted their continuation coverage under federal continuation coverage provisions an opportunity to extend the term of their coverage to 36 months. The bill would also extend continuation coverage for specified individuals under Cal-COBRA to 36 months.

This bill additionally would establish a 4-year pilot program, commencing September 1, 2003, and terminating September 1, 2007, requiring that health care service plans and health insurers offer a standard benefit plan, based on benefit designs offered through the MRMIP. Under the pilot program, plans and insurers would be precluded from rejecting an application for coverage from an individual who was previously covered under the MRMIP for a period of 36 consecutive months. The bill would specify the amount of the individual or insured contribution required in the pilot program and would require the board to make payments from the Major Risk Medical Insurance Fund to plans and insurers for the provision of health care services under the standard benefit plan. Because the bill would authorize the expenditure of funds in a continuously appropriated fund for a new purpose, it would make an appropriation.

This bill would require the Legislative Analyst to report to the Legislature on the effectiveness of these provisions in providing health benefits to individuals who otherwise are unable to obtain that coverage. The bill would authorize the Managed Risk Medical Insurance Board, the Department of Managed Health Care, and the Department of Insurance to adopt emergency regulations to implement the provisions of the bill.

(2) Under existing law, a violation of the provisions of Cal-COBRA or the Knox-Keene Health Care Service Plan Act of 1975 which regulates the operations of health care service plans is punishable as a misdemeanor offense.

Because this bill would impose additional requirements with respect to the Knox-Keene Health Care Service Plan Act of 1975 and Cal-COBRA, the violation of which would be punishable as a criminal offense, it would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 795 (AB 1996) Thomson. University of California: analysis of legislation mandating health care benefits and services.

Existing law regulates the provision of health care benefits by a health care service plan and by a health insurer.

This bill would request the University of California to assess legislation proposing mandated health care benefits to be provided by health care service plans and health insurers, and to prepare a written analysis in accordance with specified criteria.

This bill would request the University of California to develop and implement conflict-of-interest provisions that would prohibit a person from participating in any analysis in which he or she knows or has reason to know he or she has a material financial interest.

This bill would provide funding for the University of California's work from fees imposed upon health care service plans and health insurers, which would not exceed a total of \$2,000,000. The fees would be deposited in the Health Care Benefits Fund, which would be created by the bill. Initial startup funding would be loaned to the Health Care Benefits Fund from the Managed Care Fund and the Insurance Fund.

This bill would request the University of California to submit a report to the Governor and the Legislature by January 1, 2006, on the implementation of the bill's provisions.

The bill's provisions would remain in effect until January 1, 2007.

Ch. 796 (AB 2085) Corbett. Health care.

Under existing law, the Knox-Keene Health Care Service Plan Act of 1975, health care service plans are regulated by the Department of Managed Health Care. A violation of the act by a health care service plan is a crime.

Existing law requires a health care service plan to establish and maintain a grievance system approved by the department, under which enrollees and subscribers may submit their grievances to the plan.

This bill would require a health care service plan to provide a written acknowledgment of the receipt of a grievance within 5 calendar days of receipt unless the grievance is received by telephone, fax, e-mail, or online and meets specified requirements or unless the grievance is subject to expedited review. The bill would require the plan to keep a log recording specified information for certain grievances exempted from the requirement.

This bill would require every health care service plan to maintain a Web site and, effective July 1, 2003, would require a health care service plan to allow subscribers and enrollees to submit grievances to the plan online through its Web site. The bill would provide guidelines detailing the specific requirements for the online grievance submission process, including providing access to the department's Web site. The bill would exempt from the requirements, until January 1, 2006, health plans that utilize a hardware system that does not have the minimum system requirements to support the software necessary to meet those requirements.

Existing law requires every health care service plan to publish the Internet address of the Department of Managed Health Care and the plan's telephone number, as well as the California Relay Service's toll-free telephone numbers for the hearing and speech impaired, on every plan contract, on every evidence of coverage, on copies of plan grievance

procedures, on plan complaint forms, and on all written notices to enrollees required under the grievance process of the plan. Existing law specifies the language that is required to be used in the statement.

This bill would change the requirement that a health care service plan instead publish the California Relay Service's toll-free telephone numbers for the hearing and speech impaired to a requirement that the plan publish the department's TDD line for the hearing and speech impaired. The bill would also revise the language that is required in the statement to include more specific information regarding grievances, and to include information regarding eligibility for Independent Medical Review.

Because a violation of this bill's requirements regarding online grievances by a subscriber or enrollee would be a crime, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 797 (AB 2179) Cohn. Health care coverage.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care. The act requires that the services provided by health care service plans be available to enrollees at reasonable times and makes a violation of its provisions a crime. Existing law also provides for the regulation of health insurers by the Insurance Commissioner.

This bill would require the Department of Managed Health Care and the commissioner to adopt, not later than January 1, 2004, regulations to ensure access to needed health care services in a timely manner. The bill would require the department and the commissioner to make specified reports to certain committees of the Legislature on March 1, 2003, and March 1, 2004, regarding the progress towards the implementation of these requirements. The bill would also authorize the Director of the Department of Managed Health Care to assess an administrative penalty against a plan in specified circumstances for its failure to comply with requirements concerning timely access to care.

By placing additional requirements on health care service plans, the violation of which is a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 798 (AB 2420) Richman. Health care service plans.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the regulation and licensing of health care service plans by the Department of Managed Health Care and makes the willful violation of any of the act's provisions a crime. This act prohibits a contract between a health care service plan and a risk-bearing organization, as defined, from including any provision that requires the risk-bearing organization to be at financial risk for the provision of health care services unless the provision has been first negotiated and agreed to by the parties or is included within a contract meeting specified criteria.

This bill would provide that no health care service plan contract that is issued, amended, or renewed in this state on or after July 1, 2003, shall require or allow a health care service provider, as defined, to assume or be at any financial risk, as defined, for certain designated items that would, instead, be reimbursed, as specified, by the health care service plan, subject to any applicable copayment or deductible. The bill would specify, however, that a health care service provider may request in writing to assume the financial risk for these items when negotiating an initial contract or renewing a contract with a health care service plan.

Because this bill would impose a requirement regulating health care service plans, the willful violation of which would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 799 (AB 424) Thomson. Health insurance: conversion coverage.

Existing law imposes requirements relating to the obligation of a health insurance issuer to provide coverage through a converted policy to certain individuals after they become ineligible for coverage through a group plan. Under existing law, these requirements pertain to a group health insurance policy issued, amended, or renewed on or after January 1, 1983.

This bill would specify that certain existing requirements to provide coverage through a converted policy do not apply to a group policy that is issued, amended, or renewed on or after September 1, 2003. The bill would provide that its provisions would become operative on September 1, 2003, only if this bill and AB 1401 are both enacted on or before January 1, 2003.

Ch. 800 (SB 59) Escutia. Healthy Families Program.

Existing federal law establishes the State Children's Health Insurance Program, which provides funds to the states to expand the provision of health assistance to uninsured, low-income children. In California, this program is known as the Healthy Families Program and is administered by the Managed Risk Medical Insurance Board.

This bill would require the board to report to the Legislature on or before January 30, 2004, if federal funding is obtained, regarding its recommendations with respect to various initiatives regarding the State Children's Health Insurance Program. The bill would also include a statement of legislative findings and declarations.

Ch. 801 (AB 885) Daucher. Average daily attendance: Internet classroom.

Existing law prescribes the method for computing average daily attendance of pupils under the direct supervision, as defined, of school district personnel for the purpose of determining school district apportionments.

This bill would, notwithstanding any other provision of law, for the purposes of an online classroom program conducted over the Internet, as defined, in a secondary school, include as "immediate supervision," pupil participation in an online asynchronous interactive curriculum, as defined, provided by certificated school personnel. The bill would require schools that provide an online asynchronous interactive curriculum to meet certain requirements including, applying to the State Department of Education for participation in the program. The bill would limit total participation in the program to 40 schoolsites, and would restrict any one school district under the program to no more than 5 schoolsites. The bill would permit courses other than high school courses to be eligible for online classroom programs pursuant only to a waiver from the State Board of Education.

This bill would repeal these provisions on January 1, 2006.

This bill would require the Controller to provide for a financial audit of online classroom programs conducted over the Internet that are subject to the provisions of the bill.

Ch. 802 (AB 1781) Hertzberg. Instructional materials: funding.

(1) Existing law establishes the California Classroom Library Materials Act of 1999 to provide state funding for classroom library materials and establish the Business Organizations and Opportunities for Kids Fund for the donation of moneys by private entities for classroom reading materials.

This bill would repeal certain provisions in the California Classroom Library Materials Act of 1999 regarding state funding.

(2) Existing law provides for the State Instructional Materials Fund as a means of annually funding the acquisition of instructional materials. Existing law requires the State Board of Education to encumber the fund for the purpose of establishing an allowance for the governing board of each school district, which may reflect increases or decreases in average daily attendance, that the district board may use for instructional materials, tests, textbooks, and in-service training.

This bill would additionally authorize a school district to use the funding to purchase classroom library materials for kindergarten and grades 1 to 4, inclusive, on the condition that the school district develop a districtwide classroom library plan, as specified. The bill would authorize the allowances to reflect increases or decreases in enrollment instead of average daily attendance.

(3) Existing law requires the Controller, during each fiscal year, to transfer from the General Fund to the State Instructional Materials Fund, a specified amount per pupil in average daily attendance in the public elementary schools during the preceding fiscal year, as provided, and requires the superintendent to annually apportion to each school district \$14.41 per pupil enrolled in grades 9 to 12, inclusive, in the school district in the prior fiscal year for the purpose of purchasing instructional materials.

This bill would make those funding provisions inoperative on January 1, 2003, and would provide for their repeal on January 1, 2007.

(4) Existing law provides for the Pupil Textbook and Instructional Materials Incentive Account in the State Instructional Materials Fund to ensure availability of textbooks and instructional materials.

This bill would make those provisions relating to the account inoperative on January 1, 2003, and would provide for their repeal on January 1, 2007.

(5) This bill would establish the Instructional Materials Funding Realignment Program to provide funding for instructional materials to school districts, as defined, on the basis of an equal amount per pupil enrolled in kindergarten and grades 1 to 12, inclusive, in the prior year, except as specified.

This bill would authorize the State Board of Education to permit a school district to use any state basic instructional materials allowance to purchase standards-aligned materials, as specified.

This bill would require a local governing board to use funding received pursuant to the program to ensure that each pupil is provided with a standards-aligned textbook or basic instructional materials, as adopted by the state board or the local governing board, as specified. The bill would provide that if any funds received pursuant to the program remain after providing each pupil with a standards-aligned textbook or basic instructional materials in core curriculum areas and if the local governing board has met certain eligibility requirements, the remaining funds may only be used for instructional materials, as specified. The bill would permit the State Board of Education to grant additional time to the school district to meet the purchasing requirements if the governing board of the school district meets specific criteria.

This bill would provide that specified funds appropriated in the Budget Act of 2002 shall be used for purposes of the program. Under the bill, the program would become inoperative on July 1, 2007, and would be repealed as of January 1, 2008.

#### Ch. 803 (AB 1926) Horton. Discrimination: housing.

(1) Existing law authorizes any person holding an ownership interest of record in property containing a restrictive covenant determined by the Department of Fair Employment and Housing to violate the fair housing laws to cause the recording of a modified document with the covenant stricken, as prescribed.

This bill would, under specified circumstances, authorize any person holding an ownership interest of record in property that he or she believes is subject to an unlawfully restrictive covenant to submit for recordation a modified document with the covenant

stricken. The bill would authorize the county recorder to record the document and, if recorded, would require the recorder to provide a specified form for attachment to the front of the document. The bill would create a state-mandated local program by imposing new duties on the county recorder.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 804 (AB 2533) Jackson. Postsecondary education: campus crime reporting.

Existing law establishes the California Postsecondary Education Commission as the statewide postsecondary education coordinating and planning agency, which serves as a fiscal and program adviser to the Governor and the Legislature on postsecondary educational policy. The federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act requires that eligible institutions of higher education participating in federal student assistance financial grant programs or federal work study programs, to collect, and annually prepare, publish, and distribute to current students and employees, and to applicants for enrollment or employment upon request, an annual security report containing information with respect to the campus security policies and campus crime statistics of that institution. The act further requires that the institutions annually file statistics concerning the occurrence of crimes on campus or on noncampus buildings or property, with the federal Secretary of Education.

This bill would require the State Auditor, by January 1, 2004, and every 3 years thereafter, to report the results of an audit of a sample of not less than 6 institutions of postsecondary education that receive federal student aid, to evaluate the accuracy of their statistics and the procedures used by the institutions to identify, gather, and track data for publishing, disseminating, and reporting accurate crime statistics in compliance with the Clery Act and to report the results of those audits to the respective chairs of the Assembly Higher Education Committee and the Senate Education Committee. The bill would further require the commission to provide on its Internet Web site a link to each California institution of higher education's Web site that includes that institution's criminal statistics information.

Ch. 805 (AB 2996) Committee on Budget. Transportation.

(1) Existing law authorizes the California Transportation Commission to allocate federal and state transportation funds to the Department of Transportation for an enforceable commitment to the California Economic Development Financing Authority for implementing the purposes of the Transportation Finance Bank, relative to funding guarantees for loans and other instruments of credit for transportation projects that have a dedicated revenue source and are eligible under a federal demonstration program.

This bill would revise these provisions to instead require the department to act as a lender in administering the Transportation Finance Bank. The bill would require the department to develop guidelines and loan documents for the program and to present them to the commission for adoption. The bill would revise the program to delete the provisions for loan guarantees. The bill would create the Local Transportation Loan Account in the State Highway Account in the State Transportation Fund for the management of funds for loans to local entities under these provisions. The bill would require specified funds and interest and penalties to be deposited in the new account. The money in the new account would be continuously appropriated to the department, thereby making an appropriation. The bill would require the department to report to the Legislature annually on the program.

(2) Existing law creates the Seismic Safety Retrofit Account in the State Transportation Fund, and requires each annual proposed transportation budget to include an amount recommended to be transferred from the State Highway Account to the Seismic Safety Retrofit Account based upon the Department of Transportation's estimate of state funds

necessary to fund the seismic retrofit program during the budget year. Under the program, publicly owned state and local bridges throughout the state, including pedestrian and rail transit bridges, are evaluated for seismic structural sufficiency and projects funded from the Seismic Safety Retrofit Account are undertaken to remedy any deficiency.

This bill would repeal these provisions. The bill would transfer any funds remaining in the Seismic Safety Retrofit Account to the State Highway Account effective June 30, 2002, with any outstanding encumbrances to be paid from the State Highway Account. The bill would authorize the department to administer local seismic safety bridge retrofit projects consistent with requirements applicable to other local bridge projects and to allocate State Highway Account funds to those projects to the extent funding is provided through the annual Budget Act.

(3) Existing law creates the Toll Bridge Seismic Retrofit Account in the State Transportation Fund for the purpose of funding seismic retrofit or replacement of state-owned toll bridges, and the money in the account is continuously appropriated to the Department of Transportation for this purpose. Existing law generally requires state agencies seeking to invest funds or to sell or exchange securities to obtain prior approval from the Department of Finance, with certain exceptions.

This bill would authorize the Department of Transportation, in consultation with the Department of Finance and the Office of the State Treasurer, to invest bond or commercial paper proceeds deposited into the account in obligations permitted by the Treasurer, and would require those investments to be included as cash balance for purposes of reporting the condition of the account. The bill would also require notification by the Department of Finance of certain legislative committees prior to the initial issuance of bonds or commercial paper pursuant to these provisions and would enact other related financial provisions relative to the use of interest income and the reserve funds created to support the financing. The bill would prohibit the use of this interest income or of reserve funds to pay project costs in excess of a specified amount, and would prohibit the existence of reserve funds, other than debt service reserve funds, subsequent to the completion of seismic retrofit projects. The bill would authorize the Department of Finance to establish the accounting and a reporting system used to determine the expenditures, cash needs and the balance of the account.

(4) Under existing law, certain fines and fees collected from motor carriers of property, as defined, are deposited in the Motor Carriers Permit Fund.

This bill would abolish the Motor Carriers Permit Fund effective July 1, 2003, and cause those fines and fees to be deposited in the Motor Vehicle Account in the State Transportation Fund instead. This bill would require any unencumbered balance remaining in the Motor Carriers Permit Fund on June 30, 2003, to be transferred and deposited into the Motor Vehicle Account by the end of that day. This bill would require that any other amounts collected or received as revenues or transfers directed to the Motor Carriers Permit Fund after June 30, 2003, shall also be transferred and deposited into the Motor Vehicle Account.

(5) Existing law requires the Department of Motor Vehicles to publish and distribute copies of the California Vehicle Code, and other specified laws, to specified government entities and to public secondary schools who request a copy, at no cost. Existing law requires the department to provide a copy upon request to any other person at a cost not to exceed \$3.

This bill instead would require the department to distribute the copies at a charge sufficient to pay the entire cost of publishing and distribution.

(6) Existing law establishes fees for original and renewal registration of vehicles, and weight fees for commercial vehicles, to be collected by the Department of Motor Vehicles. Existing law also establishes various penalty fees for late registration of vehicles.

This bill would revise the provisions relating to late fees, to be applied on or after January 1, 2003, and would appropriate \$3,693,000 from the funds collected from the registration, but not specified penalty fees to the Department of Motor Vehicles for purposes of implementing certain provisions of this act.

(7) Existing law authorizes the Department of Motor Vehicles to permit inspection of, or sell, or both, information from its records concerning the registration of any vehicle or information from the files of drivers' licenses, with specified limitations, at a charge sufficient to pay the actual cost to the department for providing the inspection or sale of the information, with the charge to be determined by the director of the department.

This bill would revise these provisions to be consistent with other related provisions that allow the department to sell copies of its records at a charge sufficient to pay at least the actual cost to the department.

(8) Existing law authorizes the Department of Motor Vehicles to allow access to the department's database, with specified limitations, by special permit for the purpose of obtaining vehicle registration information for commercial use. Existing law provides that the director of the department must charge fees for the direct-access service permits, and must charge fees sufficient to pay at least the entire actual cost to the department for any information copied from the files.

This bill would expand the authorization of the director to permit access to the department's database for any information rather than merely vehicle registration information, as provided. This bill would also provide that the director must charge fees sufficient to pay at least the actual cost to the department for any information copied from the files, as specified.

(9) Existing law requires the Department of Motor Vehicles to notify a person by certified mail, return receipt requested, when the department suspends or revokes the person's privilege to operate a motor vehicle. Existing law also provides a conclusive presumption that a person has knowledge of the suspension or revocation if notice is sent pursuant to these provisions.

This bill would instead, require the department to send the notice by first-class mail, and would provide that the presumption of notice is rebuttable, and that the presumption affects the burden of proof. The bill would make other technical and conforming changes to these provisions.

(10) Existing law provides for the payment of a \$12 fee in conjunction with an application for an original driver's license, as specified.

This bill, on or after July 1, 2003, would require the payment of an additional \$5 for any person who fails to successfully complete the driving skill test on the first attempt, for each additional driving skill test administered under that application.

(11) Existing law provides for the payment of a \$15 fee in conjunction with an application for a renewal of a driver's license, as specified.

This bill, in addition, on or after July 1, 2003, would require the payment of an additional \$5 for any person who fails to successfully complete the driving skill test on the first attempt, for each additional driving skill test administered under that application.

(12) Existing law requires the payment of a \$100 fee for administrative costs before a driver's license may be issued, reissued, or returned to a person, where the person's privilege to operate a motor vehicle was suspended or revoked by the department for specified reasons.

This bill would increase that fee to \$125.

(13) Existing law provides that persons subject to a hearing for suspension or revocation of their driver's license for specified reasons may request a departmental review of the decision taken pursuant to the hearing.

This bill would impose an administrative fee of \$120 to pay for the costs of the departmental review.

(14) The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 806 (AB 3027) Committee on Judiciary. Courts.

(1) Existing law provides that a public entity, its employees, and volunteers are not liable under the Governmental Tort Liability Act for advice provided to small claims litigants.

This bill would provide that independent contractors, as well as employees and volunteers, who provide advice to small claims litigants or potential litigants as a public service on behalf of a court or county are not liable for that advice under that act.

(2) Existing law specifies the deadlines for service of a claim and order on a defendant in small claims court.

This bill would extend those deadlines, as specified, set a deadline for the postponement of a small claims court hearing, and require a request for postponement to be for good cause.

(3) Existing law provides for the unification of municipal and superior courts.

This bill would delete obsolete provisions regarding the transfer of cases between a municipal and superior court.

(4) Existing law authorizes a superior court in a county in which there is no municipal court to transfer a limited civil case to another branch or location of the superior court in the county.

This bill would repeal this provision and enact new provisions regarding the proper location of the superior court in a county in which a particular matter shall be heard. The bill would authorize a superior court, by local rules, to designate the nearest or most accessible location for the trial of specified cases, and to provide for the transfer of cases to the proper location in the county. The bill would also make related changes.

(5) Existing law authorizes a trial court, on the motion of a party or its own motion, to strike a pleading, dismiss an action, enter a default judgment, or impose lesser penalties, as well as to require the opposing party or his or her counsel to pay the reasonable expenses of the moving party.

This bill would prohibit the imposition of any penalty under this provision without prior notice to, and an opportunity to be heard by, the party against whom the penalty is sought to be imposed.

(6) Existing law provides for the advance deposit of jury fees and mileage or transportation allowance, and the ways in which a jury trial may be waived for failure to provide these advance deposits, in a civil action. Existing law also provides the ways in which an opposing party may reinstate the jury trial following waiver by the party who originally requested a jury trial.

This bill would revise the provisions for the advance deposit of jury fees and mileage or transportation allowance, and the ways in which a jury trial may be waived for failure to provide these advance deposits, in a civil action. The bill would also delete the provisions for an opposing party to reinstate a jury trial following waiver by the party who originally requested a jury trial.

(7) Existing law prescribes the form of an oath, affirmation, or declaration in an action or proceeding.

This bill would make a technical, nonsubstantive change in that provision.

(8) Existing law specifies the methods for service of papers opposing a motion and all reply papers.

This bill would extend these provisions to apply to opposition and reply papers regarding motions for summary judgment or summary adjudication.

(9) Existing law establishes the evidentiary privilege between the clergy and their penitents.

This bill would make technical, nonsubstantive changes in those provisions.

Ch. 807 (SB 219) Scott. Income taxes: federal conformity: victims of terrorism.

The Personal Income Tax Law provides for, in specified conformity to federal income tax laws, the tax treatment of certain survivor benefits, provisions relating to estates, trusts, beneficiaries, and decedents, postponement of certain tax deadlines, and disclosure of tax return information.

This bill would also provide conformity to the federal Victims of Terrorism Tax Relief Act of 2001, as specified.

The Personal Income Tax Law or the Bank and Corporation Tax Law, or both, as applicable, provide conformity to federal income tax law with respect to, among other things, an exclusion of certain items from gross income including amounts received as qualified scholarships, the Ricky Ray Hemophilia Fund, deferred compensation, retirement plans, special rules for nondealers with respect to installment obligations, and an election to be an "S" corporation.

This bill would provide additional conformity to federal law relating to secured indebtedness with respect to nondealers, the election to be an "S" corporation, and the exclusion from gross income with respect to qualified scholarships. The bill would also clarify the taxable years to which specified federal provisions apply and make various technical changes.

Existing law provides for the waiver of interest accrued against the income tax liability of an individual during a filing extension period authorized for individuals determined to be affected by a presidentially declared disaster, if that individual is located in an area affected by a presidentially declared disaster or in a county or city that is proclaimed by the Governor to be in a state of disaster.

This bill would extend this waiver provision to any taxpayer, including a business entity, located in an area affected by a presidentially declared disaster or in a county or city proclaimed by the Governor to be in a state of disaster.

Existing income tax laws authorize the Franchise Tax Board to provide for the filing of a group return for electing nonresident partners, as specified.

This bill would authorize the board to adjust the income of those taxpayers to properly reflect income, as provided.

Existing law pertaining to personal income taxes provides for a specified statute of limitations for filing a claim for refund.

This bill would suspend the running of that statute of limitations in the case of an individual who is financially disabled, as provided.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 808 (SB 1476) O'Connell. High school exit examination.

Under existing law, the Superintendent of Public Instruction, with the approval of the State Board of Education is required to develop a high school exit examination in language arts and mathematics in accordance with the statewide academically rigorous content standards adopted by the State Board of Education.

This bill would provide that language arts refers to English language arts.

This bill would require a school principal, at the request of a parent or guardian, to submit a request for a waiver of the requirement to successfully pass the high school exit examination to the governing board of the school district for a pupil with a disability who has taken the high school exit examination with modifications, as defined for that purpose, that alter what the test measures and has received the equivalent of a passing score on one or both subject matter parts of the high school exit examination. The bill would authorize the governing board of the school district to waive the requirement to successfully pass one or both subject matter parts of the high school exit examination for a pupil with a disability if specified conditions are met. By imposing new duties on schools regarding that waiver process, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would incorporate additional changes to Section 60851 of the Education Code proposed by AB 1794, to become effective only if AB 1794 and this bill are chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

Ch. 809 (SB 1504) Ackerman. Instruments.

(1) Existing law requires a person recording a notice of default of a mortgage or deed of trust to perform specified actions, one of which is to provide a copy of a notice of sale to the Internal Revenue Service if a "Notice of Federal Tax Lien" has been recorded against the real property to which the notice of sale applies.

This bill would provide that the failure to provide the Internal Revenue Service the notice of sale is sufficient cause to rescind the trustee's sale and invalidate the trustee's deed, at the option of either the successful bidder at the trustee's sale or the trustee, and in either case with the consent of the beneficiary. The bill would permit the rescission of the trustee's deed to be recorded, as specified.

(2) Existing law provides that when an obligation secured by a deed of trust has been satisfied, the beneficiary, or its assignee, shall execute and deliver to the trustee the original note, deed of trust, request for a full reconveyance, and other documents as may be necessary to reconvey, or cause to be reconveyed, the deed of trust. Existing law requires that the trustee deliver a copy of the reconveyance to the beneficiary if known, and requires that the reconveyance instrument to specify the trustor as the person to whom the recorder will deliver the recorded instrument.

This bill would permit the reconveyance instrument to alternatively specify that the recorder shall deliver the recorded instrument to the trustee's address or the address of the trustor or successor in interest, but specify that the recorder has no duty to validate those addresses. The bill would require that, if the trustee's address is specified for delivery, the trustee mail the recorded instrument to the trustor or the successor in interest at the last known address for that party. The bill would also permit the reconveyance instrument to specify the successor in interest of the trustor as the person to whom the recorder will deliver the recorded instrument, as provided.

(3) Existing law, the Uniform TOD Security Registration Act, provides for the transfer of the ownership or proceeds of a security, as defined, upon the death of the owner, without probate or estate administration, and defines a security account for these purposes.

This bill would add the term cash equivalents, as defined, and an investment management or custody account with a trust company or a trust department of a bank with trust powers, as specified, to the definition of security account for purposes described above.

Ch. 810 (SB 2022) Figueroa. Healing arts.

(1) Existing law provides for the regulation of dental auxiliaries by the Committee on Dental Auxiliaries, under the jurisdiction of the Dental Board of California. Existing law authorizes a registered dental hygienist to perform certain functions, as prescribed by the board by regulations.

This bill would define the practice of dental hygiene. The bill would delete the authorization that the board determine authorized functions for dental hygienists and would instead set forth procedures that a properly trained dental hygienist is authorized to perform under direct supervision and procedures that he or she is authorized to perform under general supervision. The bill would authorize a dental hygienist to provide educational services, oral health training programs, and oral health screenings without supervision, but would require that a patient with possible oral abnormalities be referred to a dentist. The bill would also authorize a dental hygienist to provide dental hygiene preventative services without supervision in a public health program. The bill would require the board to adopt regulations necessary to define the functions that may be performed, the supervisory requirements, and the settings in which a registered dental hygienist may work.

This bill would authorize a dental hygienist to use any material or device approved for use in the performance of a service or procedure within his or her scope of practice if the dental hygienist has the appropriate education and training.

Existing law requires the board to license as a registered dental hygienist in alternative practice a person who passes an examination required by the board and meets certain other requirements.

The bill would require the board, in consultation with the committee, to adopt regulations necessary to implement these licensing requirements.

This bill would prohibit a person other than a licensed dental hygienist or a licensed dentist from engaging in the practice of dental hygiene or the performance of dental hygiene patient procedures, and would set forth certain exceptions to this prohibition. The bill would require the board to adopt regulations necessary to implement the provisions of law relating to dental auxiliaries.

This bill would make nonsubstantive changes to the provisions regulating dental auxiliaries.

(2) Existing law, the Nursing Practice Act, provides for the licensure of registered nurses by the Board of Registered Nurses. Existing law provides that any fees required by the board may be paid by customary mediums of exchange, including a postal money order.

This bill would delete the specification that a money order be a postal money order.

(3) Existing law, the Vocational Nursing Practice Act, creates the Board of Vocational Nursing and Psychiatric Technicians of the State of California that is composed of 11 members. Under existing law, 5 members of the board constitute a quorum for transaction of business at a meeting.

This bill would instead require 6 members of the board to constitute a quorum.

(4) This bill would incorporate additional changes in Section 1758 of the Business and Professions Code, proposed by AB 2818, to be operative only if AB 2818 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

The bill would incorporate additional changes in Section 1770 of the Business and Professions Code, proposed by SB 1589, to be operative only if SB 1589 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

#### Ch. 811 (SB 1589) Perata. Dentistry: dental hygienists.

Existing law requires the Board of Dental Examiners of the State of California to license registered dental hygienists. Existing law authorizes a registered dental hygienist in alternative practice to practice as an employee of a dentist or of another registered dental hygienist in alternative practice. Existing law provides that it is a crime for a person without a license to represent that he or she is a registered dental hygienist in alternative practice.

This bill would authorize a registered dental hygienist in alternative practice to be an employee of specified clinics.

This bill would incorporate additional changes in Section 1770 of the Business and Professions Code proposed by SB 2022, to be operative if this bill and SB 2022 are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

#### Ch. 812 (SB 1653) Costa. California Bay-Delta Act.

Under existing law, certain state and federal agencies with management and regulatory responsibilities in the San Francisco Bay/Sacramento-San Joaquin Delta Estuary participate in the CALFED Bay-Delta Program for the purposes of improving ecosystem quality, water supply reliability, water quality, and the integrity of the levees and channels in the bay-delta.

This bill would enact the California Bay-Delta Authority Act. The bill would establish in the Resources Agency the California Bay-Delta Authority, consisting of representatives from 6 state agencies and 6 federal agencies if those federal agencies are authorized to

participate, 7 public members, one member of the Bay-Delta Public Advisory Committee, and 4 nonvoting, ex officio Members of the Legislature. The bill would prescribe the authority's organization, powers, and purposes.

The bill would require the authority and the implementing agencies, as defined, to carry out the programs, projects, and activities necessary to implement the Bay-Delta Program, defined to mean those projects, programs, commitments and other actions that address the goals and objectives of the CALFED Bay-Delta Program Record of Decision, dated August 28, 2000, or as it may be amended.

The bill would require the Governor to appoint a director, in consultation with the Secretary of the Interior, and would prescribe the director's salary, duties, and powers. The bill would require the authority to appoint a lead scientist and would require the lead scientist to nominate, and the authority to establish, an Independent Science Board that would advise and make recommendations to the authority and the Bay-Delta Public Advisory Committee.

The bill would require the authority to review, approve, and make recommendations regarding certain annual program plans and project expenditures submitted by the implementing agencies. The bill would require the director to prepare and submit to the Department of Finance an annual state proposed budget for identified program elements of the Bay-Delta Program and the authority's oversight and coordination duties.

The bill would repeal these provisions on January 1, 2006, unless the Secretary of the Resources Agency makes a certain determination.

#### Ch. 813 (AB 1772) Harman. Escheat: financial accounts.

The Unclaimed Property Law provides for the escheat to the state of abandoned property, including certain deposits, accounts, shares, or other interests with a banking or financial organization, business association, or other holder of personal property. Existing law further requires a banking or financial organization, business association, or other holder of personal property, if it has in its records an address for the apparent owner, which the records do not disclose to be inaccurate, to make reasonable efforts to notify by mail any customer that the customer's deposit, account, shares, or other interest in the banking or financial organization will escheat to the state, as specified.

This bill would, operative January 1, 2004, add to the required contents of these notices a statement, in bold or in a font a minimum of 2 points larger than the rest of the notice, specifying that since the last date of activity, or for the last 2 years, there has been no customer activity on the deposit, account, shares, or other interest in the banking or financial organization, business association, or other holder of personal property; identifying the deposit, account, shares, or other interest by number or identifier; indicating the danger of escheat to the state; and specifying that the Unclaimed Property Law requires banks, banking organizations, and financial organizations to transfer funds of the deposit, account, shares, or other interest if it has been inactive for 3 years.

#### Ch. 814 (AB 2020) Correa. Optometry.

(1) Existing law provides for the regulation of prescription lenses and prohibits any person other than a physician and surgeon or optometrist from prescribing ophthalmic or contact lenses or plano contact lenses. Existing law also prohibits any person other than licensed physicians and surgeons, licensed optometrists, or registered dispensing opticians from dispensing, selling, or furnishing prescription lenses.

This bill would prohibit the expiration date of a contact lens prescription from being less than one to 2 years from the date of issuance, with certain exceptions. The bill would also require a prescriber or registered dispensing optician to provide the patient with a copy of his or her prescription, subject to certain exceptions. The bill would prohibit the prescriber or optician from conditioning the release of the prescription on the patient paying a fee or purchasing contact lenses. The bill would make the prescriber's willful violation of these requirements unprofessional conduct. The bill would provide that it is a deceptive marketing

practice to represent by advertisement or sales presentation that contact lenses may be obtained without confirmation of a prescription. The bill would provide that a violation of the laws regulating prescription lenses is punishable by a fine, not to exceed \$2,500 that would be available upon appropriation to the Medical Board of California. The bill would also require money derived from fines on optometrists to be deposited in the Optometry Fund and to be available upon appropriation to the State Board of Optometry.

(2) Existing law requires a person located outside California to be registered with the Medical Board of California in order to ship, mail, or deliver contact lenses at retail to a patient at a California address.

This bill would require a nonresident contact lens seller to provide a toll-free telephone number, facsimile line, or e-mail address where contact lens prescribers may confirm their prescriptions. The bill would also provide that violation of the provisions regulating nonresident contact lens sellers is punishable by a fine not to exceed \$2,500 that would be available upon appropriation to the Medical Board of California.

Ch. 815 (AB 2331) Wayne. Waivers: obligations: consumers.

Existing law, the Song-Beverly Credit Card Act and federal law, regulates the use of credit cards, as specified. The Areias Credit Card Full Disclosure Act and the Areias-Robbins Charge Card Full Disclosure Act of 1986, requires specified credit card applications and solicitations to disclose certain information. Existing law limits a debit cardholder's liability for the unauthorized use of the card. Existing law prohibits the sale of gift certificates that contain an expiration date. The Supermarket Club Card Disclosure Act of 1999, regulates the terms and conditions of issuing and using supermarket club cards. Existing law, the Consumer Credit Reporting Agencies Act, regulates the activities of consumer credit reporting agencies and the provision of consumer credit report information. Existing law excepts from these provisions and otherwise regulates the activities of commercial credit reporting agencies. The Investigative Consumer Reporting Agencies Act, regulates the activities of investigative consumer reporting agencies and the provision of investigative consumer credit report information. The Holden Credit Denial Disclosure Act of 1976, requires a creditor to provide an applicant who is denied credit a specified statement.

Existing law, the Rosenthal Fair Debt Collection Practices Act, regulates the activities of debt collectors. The Electronic Commerce Act of 1984 requires an electronic commercial service provider to provide certain information to consumers. Existing law also regulates the activities of check cashers, and a violation of these provisions are, under specified conditions, a misdemeanor. Existing law requires a business to destroy certain customer records, as specified. Existing law prohibits a person or entity from using or displaying a person's social security number, as specified. Existing law prohibits certain loans from requiring the payment of precomputed interest in specified circumstances. Existing law prohibits certain contracts from requiring the payment of a precomputed finance charge in specified circumstances. Existing law regulates the terms and conditions of consumer credit contracts. The Consumer Contract Awareness Act of 1990 requires a seller to deliver a copy of a consumer contract at the time it is signed at a seller's place of business, except as specified, and regulates the terms of the contract. Existing law regulates the terms and conditions of membership camping contracts. Existing law regulates the activities of auctioneer and auction companies, and a violation of these provisions are a misdemeanor.

This bill would make a waiver of any of the provisions described above contrary to public policy, void, and unenforceable. The bill, by changing the definition of an existing crime, would impose a state-mandated local program. The bill would also make a statement of legislative findings and declarations.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 816 (AB 2385) Bill Campbell. Healing arts.

Existing law, the Medical Practice Act, regulates the practice of medicine in this state and authorizes the Medical Board of California to take disciplinary action against a licensee.

This bill would require the board to keep, for a period of 7 years or until the statute of limitations for filing an accusation against a licensee has expired, whichever period is shorter, a copy of a complaint it receives concerning the unprofessional conduct of a licensee if the board finds after an investigation that there is insufficient evidence to proceed with disciplinary action.

Ch. 817 (AB 2546) Nation. Common interest developments: marketing and sales.

Existing law, the Davis-Stirling Common Interest Development Act, requires that a common interest development be managed by an association, as defined.

This bill would provide that any rule or regulation of an association that arbitrarily or unreasonably restricts an owner's ability to market, as defined, his or her interest in a common interest development is void. The bill would also prohibit an association from adopting, enforcing, or otherwise imposing any rule or regulation that: (1) imposes an assessment or fee in connection with the marketing of an owner's interest in the common interest development in an amount that exceeds the association's actual or direct costs; or (2) establishes an exclusive relationship with a real estate broker through which the sale or marketing of interests in the development is required to occur, except for sales and marketing by the association, as specified. The bill would include a specified exception from these provisions.

Ch. 818 (AB 2732) Washington. Automatic checkout systems.

The Rosenthal-Roberti Item Pricing Act requires every retail grocery store or grocery department within a general retail merchandise store which uses an automatic checkout system to cause to have a clearly readable price indicated on 85% of the total number of packaged consumer commodities offered for sale, unless the commodities are otherwise exempted.

Existing law authorizes any sealer to levy a civil penalty against a person who violates specified laws or regulations governing weights and measures. A violation of the laws governing weights and measures is a misdemeanor unless otherwise specified.

This bill would add new provisions to the laws governing weights and measures that would require a business establishment that uses an automatic checkout system to sell goods or services to consumers to ensure that the price of each good or service to be paid by the consumer is conspicuously displayed to the consumer at the time the price is interpreted by the system. The bill would authorize the Attorney General, the district attorney, or city attorney to enforce this requirement in accordance with certain provisions of law. This bill would, in addition, authorize the sealer to levy a civil penalty for a violation of these provisions.

The bill would require all automatic checkout systems used by a business establishment on and after January 1, 2007, to comply with its provisions.

Because a violation of the laws governing weights and measures is a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 819 (SB 17) Figueroa. Health and safety: cemeteries: human remains: vital records.

(1) Existing law, the Cemeteries Act, provides for the licensing and regulation of cemeteries and crematories by the Cemetery and Funeral Bureau.

This bill would, on and after July 1, 2003, require all cemeteries for which a certificate of authority is required and all crematories which are licensed, to be supervised by a manager that has passed a written examination demonstrating an understanding of applicable provisions regarding, among other things, the disposal of human remains. This bill would, on and after July 1, 2003, require the bureau to inspect the books, records, and premises of any cemetery for which a certificate of authority from the bureau is required. This bill would require that the bureau have access to all books, records, buildings, mausoleums, columbariums, and storage areas during specified times and that the bureau conduct, on and after July 1, 2003, at least one annual unannounced inspection of a cemetery for which a certificate of authority is required. This bill would, on and after July 1, 2003, prohibit a person from engaging in the business of, acting as, or advertising as, a cemetery or crematory manager without a license from the bureau.

(2) Existing law provides that, unless specified, it is a misdemeanor to deposit or dispose of human remains except in a cemetery. Existing law additionally provides that it is a misdemeanor to fail to inter a corpse within a reasonable period of time if one has a legal duty to do so, that it is a misdemeanor to fail to furnish or to furnish false information affecting specified certificates or records, and that it is a misdemeanor to willfully alter or knowingly possess altered documents or to falsify a birth certificate, death certificate, or marriage certificate. Existing law provides that a misdemeanor is punishable by imprisonment in a county jail for 6 months, by a \$1,000 fine, or by both that imprisonment and fine, unless a different punishment is prescribed by law.

This bill would specify that punishment of licensees and certain unlicensed persons for these actions would include imprisonment in a county jail not exceeding 1 year, or by a fine not exceeding \$10,000, or by both that imprisonment and fine. By increasing the imprisonment for these misdemeanors, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 820 (SB 577) Burton. Health: complementary and alternative health care practitioners.

Existing law regulates the practice of medicine in the state, and in that regard prohibits persons who are not licensed as physicians and surgeons from engaging in certain activities constituting the practice of medicine.

This bill, notwithstanding any other provision of law, would provide that a person engaging in certain medical treatments who makes specified written disclosures to a client shall not be in violation of certain provisions of the Medical Practice Act unless that person engages in specified diagnosis, treatment, and other activities. The bill would require a person who advertises himself or herself as performing the services that are subject to those requirements to state in the advertisement that he or she is not licensed by the state as a healing arts practitioner.

This bill would also make various findings of the Legislature concerning the utilization of complementary and alternative health care services.

Ch. 821 (SB 1230) Alpert. Human cloning.

Existing law, until January 1, 2003, prohibits a person from cloning a human being, and from purchasing or selling an ovum, zygote, embryo, or fetus for the purpose of cloning a human being, and authorizes the State Department of Health Services to levy administrative penalties for violation of these provisions. Existing law, until January 1, 2003, further

provides that violation of this prohibition constitutes unprofessional conduct for purposes of the Medical Practice Act, and requires city business licenses and county business licenses to be revoked for violation of the prohibition.

This bill would prohibit a person from engaging in “human reproductive cloning,” as defined. It would also delete the January 1, 2003, repeal dates thereby extending the operation of the above provisions indefinitely.

The bill, in addition, would require the department to establish an advisory committee, composed of specified representatives, including not less than 3 bioethicists, for purposes of advising the Legislature and the Governor on human cloning and other issues relating to human biotechnology. The bill would require the department to fund the activities of the advisory committee from its existing resources, to the extent that funds are available.

It would also require the department, on or before December 31, 2003, and annually thereafter, to report to the Legislature and the Governor regarding the activities of the committee.

#### Ch. 822 (SB 1345) Kuehl. Biologics.

(1) Existing law provides for the licensure and regulation of persons engaging, or proposing to engage, in the production of biologics that are specified products used for the diagnosis and detection of, and for the prevention or treatment of, disease in animals other than humans. Existing law defines “animal” to include, but not be limited to, any domesticated fowl and any wild fowl or bird which is reduced to captivity.

This bill would revise the definition of animal for the purposes of the provisions relating to biologics to also specifically include any domesticated nonhuman or wild mammal.

(2) Existing law provides that the Secretary of Food and Agriculture shall license biologic establishments that meet specified requirements.

This bill would require biologic commercial blood banks for animals licensed by the Department of Food and Agriculture to maintain onsite records containing information documenting how the animal was acquired and any history of blood draws or use of anesthesia on the animal.

(3) Existing law provides that an application for a license for any establishment that produces, or proposes to produce, biologics shall contain specified information.

This bill would provide that the application shall also contain a written protocol that addresses specified topics relating to animal blood donors.

(4) Existing law provides that the secretary may adopt reasonably necessary rules and regulations for the administration and enforcement of the provisions relating to biologics, and provides for that enforcement by the denial, suspension, or revocation of any license for any establishment or registration of any biologic that fails to meet specified requirements or that violates specified provisions. Existing law also provides for licensing fees that may be fixed at less than, but may not exceed, \$250.

This bill would, in addition, provide that for commercial blood banks for animals licensed by the department (a) the department, or humane officers under contract with the department, shall inspect the establishments at least once a year to ensure compliance with required protocols; (b) anesthesia shall be performed by a California licensed veterinarian or a registered veterinary technician under the direct supervision of a California licensed veterinarian; and (c) existing fees may be increased by the department to cover the department’s reasonable costs incurred in connection with required inspections.

(5) The bill would exempt certain federally inspected facilities and federal biologics licensees from its requirements, as well as private veterinarians who maintain their own, in-office blood donor animals for use in their own practice. The bill would also provide that all records held by the department relating to the provisions on biologics shall be confidential and not subject to disclosure under the California Public Records Act, except that the records shall be accessible to specified law enforcement officers.

Ch. 823 (SB 1402) Murray. Occupational therapy.

Existing law, the Occupational Therapy Practice Act, provides for licensure and regulation of occupational therapists by the California Board of Occupational Therapy. Existing law defines "hand therapy" as it relates to occupational therapy and authorizes an occupational therapist to perform feeding or swallowing assessments, evaluations, and interventions if the therapist has satisfactorily demonstrated to the board that he or she has the necessary requirements.

This bill would revise the definition of "hand therapy" in the act. The bill would specify that the advanced practices an occupational therapist could perform include hand therapy and the use of physical agent modalities if the occupational therapist demonstrated to the board that he or she had the necessary educational training and competency requirements. The bill would require the board to develop and adopt regulations, in collaboration with the Speech-Language Pathology and Audiology Board, the Board of Registered Nursing, and the Physical Therapy Board of California, concerning the educational training and competency requirements for these advanced practices.

The bill would require the provisions that are related to advanced practices to become operative no later than on January 1, 2004, or when the board adopts regulations for training and competency requirements, whichever first occurs.

Ch. 824 (SB 1724) Speier. Income taxes: dependent care.

The Personal Income Tax Law, in modified conformity to federal income tax law, authorizes a refundable credit for household and dependent care expenses necessary for gainful employment, as provided.

This bill would, in further conformity to federal income tax law, increase the amount of the credit for taxable years beginning on or after January 1, 2002, but would, for taxable years beginning on or after January 1, 2003, also reduce those percentage factors that are applied to calculate the amount of the credit.

The Tax Relief and Refund Account in the General Fund is continuously appropriated to make all payments required to be made to taxpayers or other persons, as specified.

By authorizing an increase in the refundable income tax credit, for each taxable year beginning on or after January 1, 2002, and before January 1, 2003, to be paid from that account, this bill would make an appropriation.

This bill would incorporate additional changes in Section 17052.6 of the Revenue and Taxation Code, proposed by AB 2963, to become operative only if AB 2963 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

This bill would take effect immediately as a tax levy.

Ch. 825 (SB 1952) Figueroa. Cemetery and Funeral Bureau.

Existing law creates a Joint Legislative Sunset Review Committee and authorizes it to review and evaluate various boards and commissions having duties and responsibilities relating to professions and occupations.

This bill would provide for the committee review and evaluations of the Cemetery and Funeral Bureau in the Department of Consumer Affairs.

Existing law provides for the regulation of funeral establishments, embalmers, cemeteries, and crematories by the Cemetery and Funeral Bureau in the Department of Consumer Affairs. Existing law requires a cemetery authority to display and make available to certain consumers a copy of the consumer guide for funeral and cemetery purchases.

The bill would require a cemetery authority or a cemetery licensee to provide a copy of the consumer guide to a consumer prior to drafting a contract for cemetery goods or services.

Existing law requires a person who is delinquent in renewing a cemetery license or a crematory license or a cremated remains disposer registration to pay the fee plus an additional 50% of the renewal fee, but no more than the renewal fee plus \$25.
