This bill would set the delinquency fee at 150% of the timely fee, but not less than the renewal fee plus \$25.

Existing law regulates preneed contracts for funeral services, and requires a funeral establishment to file an annual report with the bureau.

This bill would require a funeral establishment that is exempt from filing an annual report or whose preneed trust funds are reported in a combined preneed trust report, to file a declaration of nonreporting status each year.

The bill would require the bureau to conduct a study on the need to regulate 3rd-party casket retailers and report to the department and the Joint Legislative Sunset Review Committee on or before September 1, 2004.

Existing law provides for the examination of applicants for a cemetery license or a crematory license by the bureau.

This bill would define a cemetery manager and a crematory manager. The bill would require a licensed cemetery to employ a cemetery manager to manage, direct, and supervise the cemetery and would require a crematory to employ a crematory manager to manage, direct, and supervise the crematory. The bill would require, among other things, a licensed cemetery manager and a licensed crematory manager to be at least 18 years of age and a resident of the state. The bill would provide that the fee for a crematory manager examination and reexamination shall be no more than \$500, and that the fee for a cemetery manager examination and reexamination shall be no more than \$900. The bill would additionally provide specified fees for the licensure and renewal of a crematory manager and a cemetery manager. The bill would provide that the fee for changing the name of a designated manager or to request approval to share a designated manager shall not be more than \$50. Because these items would lead to an increase in fees being deposited into the Cemetery Fund, which is continuously appropriated, the bill would make an appropriation.

Because a violation of the provisions regulating funeral establishments is a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 826 (SB 2076) Bowen. Vehicles.

Existing law requires the Department of Motor Vehicles to accept an endorsed salvage certificate for a total loss salvage vehicle, as defined, prior to its sale or disposal in lieu of the certificate of ownership or other evidence of ownership when accompanied by an application and other documents and fees. The salvage certificate, except as specified, must include a statement that the seller and any subsequent sellers are required to disclose to the purchaser at, or prior to, the time of sale that the vehicle has been declared a total loss salvage vehicle. A seller who fails to make the disclosure is subject to a specified civil penalty. Existing law provides that the disclosure requirement is satisfied if the seller obtains a properly endorsed salvage certificate and delivers it to the purchaser within 10 days or prominently posts a sign at his or her place of business stating that the seller sells total loss salvage vehicles. Existing law also provides that this disclosure requirement does not apply to a financial institution, leasing company, occupational licensee of the Department of Motor Vehicles, an insurer, or a self-insurer.

This bill would eliminate the provisions for satisfying the disclosure requirement by posting a sign stating that the seller sells total loss salvage vehicles. This bill would also remove the exceptions for certain types of institutions.

This bill would also provide for the addition to the Vehicle Code of a section with provisions comparable to those discussed above to become operative only if this bill and SB 1743 are both enacted and this bill is enacted last.

Ch. 827 (AB 1139) Thomson. Death certificates: forms.

Existing law requires that each death shall be registered with the local registrar of births and deaths in the district in which the death was officially pronounced or the body was found, within 8 calendar days after death and prior to any disposition of the human remains, and requires a funeral director, or person acting in lieu thereof, to prepare a certificate of death and register it with the local registrar.

Existing law requires that a certificate of death contain certain information, including items necessary to establish the fact of the death and personal data.

This bill would require that a certificate of death include information indicating whether the decedent was pregnant at the time of death or within the year prior to the death. By increasing the responsibilities of counties, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 828 (AB 2499) Frommer. Criminal procedure.

Existing law provides that, except as specified, evidence of a person's character is inadmissible when offered to prove his or her conduct on a specified occasion. Existing law creates exceptions to that rule, including that in a criminal action in which the defendant is accused of a sexual offense, as defined, evidence of the defendant's commission of another sexual offense or offenses is not inadmissible under that rule, except as specified. Existing law provides that the prosecution shall disclose this evidence of other sexual conduct to the defendant at least 30 days before the scheduled date of trial or at such later time as the court may allow for good cause.

This bill would instead require the prosecutor to supply the evidence in compliance with the provisions of law in the Penal Code governing discovery generally. These provide for disclosure 30 days in advance of trial unless there is good cause shown that disclosure should be denied, restricted, or deferred, and for immediate disclosure of any evidence which comes into the possession of the prosecutor less than 30 days before trial absent a similar showing. This bill would expand the definition of "sexual offense" for the purposes of the aforementioned exception to the rule against the admission of character evidence to include those violations of the law proscribing assault with the intent to commit a specified felony that require sexual intent.

Under existing law, annoying or molesting a child under 18 years of age is a misdemeanor, in the absence of specified additional factors. Under existing law, prosecution for a misdemeanor violation of this offense must be brought within a year after the commission of the offense, unless it is committed with or upon a minor under 14 years of age, in which case prosecution must be commenced within 2 years.

This bill would require prosecution for a misdemeanor violation of the offense committed with or upon a minor under 14 years of age to instead be commenced within 3 years of the commission of the offense.

Ch. 829 (AB 2539) Rod Pacheco. Parole: sex offenses.

Existing law specifies the period of parole for various crimes for which an inmate has been imprisoned in the state prison, and provides for the discharge of certain persons from parole prior to the end of that period, as specified, unless the Department of Corrections

recommends to the Board of Prison Terms that the person be retained on parole and the board, for good cause, determines that the person will be retained on parole.

This bill would add to the list of crimes for which an inmate shall be released on parole for a period of 5 rather than 3 years, those inmates convicted of an act of sexual penetration accomplished against the victims will, as specified, and inmates who have received a life sentence as an habitual sex offender.

The bill would also revise the provisions for discharge from parole after 2 years since release from confinement to apply only to inmates released on parole for a period not exceeding 3 years, and would add similar provisions for the discharge from parole after 3 years of inmates released on parole for a period not exceeding 5 years. The bill would also extend provisions for release from parole after 3 years since release from confinement that are applicable to inmates released after certain terms of imprisonment, to specified inmates released on parole for a period not exceeding 3 years or 5 years under other provisions of law, and would specify that the 3-year period for release shall follow release from confinement or the extension of parole.

#### Ch. 830 (AB 2695) Oropeza. Firearms.

Existing law provides that any willful and knowing violation of specified court orders involving family relations and domestic violence shall constitute contempt of court punishable by imprisonment for not more than one year.

This bill would make a clarifying change to this provision.

Existing law prohibits persons convicted of certain offenses from owning, possessing or exerting custody or control over a firearm, as specified. Violation of these provisions is a crime.

This bill would require the Attorney General, subject to available funding, to work with other specified entities to develop a protocol designed to facilitate the enforcement of restrictions on firearm ownership, as specified. The protocol would be required to be completed on or before January 1, 2005.

Existing law provides that, if a firearm or other deadly weapon seized by a law enforcement officer as a result of a domestic violence incident is not retained for specified reasons, the firearm or other weapon shall be made available to the owner or lawful possessor no later than 72 hours after the seizure.

This bill would provide that, if not retained, the firearm or other weapon shall be made available to the owner or lawful possessor no later than 5 business days after the seizure.

Existing law provides that, if a law enforcement agency has reasonable cause to believe that the return of a firearm or other deadly weapon would be likely to endanger the victim or the person reporting the threat, the agency shall, within 30 days of the seizure, initiate a petition in superior court to determine if the firearm or other weapon should be returned. Existing law allows the agency to seek an extension of this period, for good cause, to no more than 60 days after the date of the seizure.

This bill would extend to 60 days the period for the law enforcement agency to initiate a petition, and would extend to 90 days the period of extension for good cause.

Existing law requires that a receipt be given to the possessor of a firearm or other deadly weapon when the firearm or other weapon is taken into custody by a law enforcement officer. Existing law specifies the information to be included in the receipt.

This bill would add to that information the time limit for the possessor to recover the firearm or other weapon.

This bill would make nonsubstantive corrections to these provisions.

This bill would incorporate changes to Section 12028.5 of the Penal Code proposed by SB 1807 that would become operative only if both bills are enacted and this bill is enacted after SB 1807.

#### Ch. 831 (AB 2794) Reyes. Offenders: HIV and AIDS tests.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

(1) Existing law requires the court to order every person who is convicted of, or adjudged to be a ward of the court by reason of, a violation of a sexual offense, as specified, to submit to a blood test for evidence of antibodies to the probable causative agent of AIDS.

This bill would revise this provision to require the person to submit to a blood or saliva test. The bill also would revise the list of enumerated sexual offenses for which blood or saliva testing of the person would be required. Because the bill would increase the duties of local officials in connection with disclosing the results of blood tests for AIDS, it would impose a state-mandated local program.

(2) Existing law provides that when a defendant has been charged with any of a list of sexual offenses, as specified, the court may under certain circumstances issue a search warrant for the purpose of testing the accused's blood with any HIV test.

This bill would authorize the court to also issue a search warrant for the purpose of testing the accused's saliva with any HIV test. The bill would add to the list of sexual offenses for which a court may issue a search warrant for the purpose of testing an accused's blood or saliva with any HIV test.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 832 (SB 1320) Kuehl. Stalking.

Under existing law, any person who willfully, maliciously, and repeatedly follows or harasses another person when a credible threat, intended to place that person in fear for his or her safety or the safety of his or her immediate family, is made is guilty of the crime of stalking. Under existing law, as interpreted by the courts, a violation of this law may be committed by following maliciously and repeatedly or by harassing only once without malice. Under existing law, "harasses" refers to a course of conduct that would cause a reasonable person to suffer substantial emotional distress, and that actually causes such distress, as specified. Existing law provides that, for these purposes, a "course of conduct" is a pattern of conduct composed of a series of acts, as specified.

This bill would revise the definition of the crime of stalking to require willful, malicious, and repeated following or willful and malicious harassment. The bill would redefine course of conduct to mean 2 or more acts, as specified, would eliminate the requirement that the conduct be such as would cause a reasonable person substantial emotional distress to be considered harassment, and would eliminate the requirement that the conduct in fact cause substantial emotional distress to be deemed harassment under these provisions.

This bill would also clarify the definition of "credible threat" by specifying that constitutionally protected activity is not included within its meaning.

By revising the definition of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 833 (SB 1807) Chesbro. Firearms.

Existing law requires specified law enforcement officers who are at the scene of a domestic violence incident involving a threat to human life or physical assault to take temporary custody of any firearm or other deadly weapon in plain sight or discovered pursuant to a

consensual search, as necessary for the protection of the peace officer or other persons present. Existing law details a procedure for return or disposal of these weapons, depending on specified circumstances.

This bill would also require a peace officer to take custody of a firearm or other deadly weapon in these circumstances if it were discovered pursuant to any other lawful search, and would subject a weapon so taken to this same procedure. By imposing new duties on peace officers, the bill would impose a state-mandated local program.

Ordinarily, existing law provides for the return of the weapon within a specified period. However, a law enforcement agency with reasonable cause to believe that the return of a firearm or other deadly weapon taken pursuant to these provisions would be likely to result in endangering the victim or the person reporting the assault or threat, may initiate a petition in superior court to determine if a firearm or other deadly weapon should be returned. Existing law provides that a court shall order the return of the firearm or other weapon unless shown by clear and convincing evidence that the return would result in endangering the victim or the person reporting the assault.

This bill would require an order returning the firearm or other weapon unless shown by a preponderance of the evidence that the return would result in endangering the victim or the person reporting the assault.

Under existing law, if, at this hearing, the court does not order the return of the weapon, the owner or person who had lawful possession of it may petition for a 2nd hearing within 12 months.

This bill would specify that, at the 2nd hearing, unless it is shown by clear and convincing evidence that the return of the weapon would endanger the victim or the person reporting the assault or threat, the court shall order the return of the weapon and award reasonable attorney's fees to the prevailing party.

Under existing law, weapons taken pursuant to these procedures must be returned, auctioned off or destroyed, and are subject to certain storage requirements.

By expanding the number of weapons to which these requirements apply, this bill would impose a state-mandated local program.

This bill would also make technical changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would incorporate changes to Section 12028.5 of the Penal Code proposed by AB 2695 that would become operative if both bills become effective on or before January 1, 2003, and this bill is enacted after AB 2695.

#### Ch. 834 (SB 1894) Escutia. Domestic violence programs.

Existing law provides that the Maternal and Child Health Branch of the State Department of Health Services shall administer a comprehensive shelter-based services grant program to battered women's shelters, as specified.

This bill would require the department to fund specified domestic violence programs, using funds appropriated in a specified item in the Budget Act of 2002, payable from the Domestic Violence Training and Education Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 835 (AB 57) Wright. Electrical corporations: procurement plans.

(1) The Public Utilities Act imposes various duties and responsibilities on the Public Utilities Commission with respect to the purchase of electricity.

This bill would state findings and declarations regarding providing guidance to electrical corporations and the commission for the procurement of electricity and electricity demand reductions by an electrical corporation and providing for review by the commission of procurement plans of electrical corporations.

The bill would amend the act to require the commission to review and adopt a procurement plan for each electrical corporation in accordance with elements, incentive mechanisms, and objectives set forth in the bill.

The bill would authorize the commission to engage an independent consultant or advisory service to evaluate risk management and strategy. The bill would require the commission to adopt appropriate procedures to ensure the confidentiality of any market sensitive information submitted in an electrical corporation's proposed procurement plan or resulting from or related to its approved procurement plan, and to determine the impact of a proposed divestiture on an electrical corporation's procurement plan.

The bill would allow an electrical corporation that serves less than 500,000 retail customers within the state to file with the commission a request for exemption from the provisions of the bill. The bill would require the commission to grant the exemption upon a showing of good cause.

(2) Existing law makes a violation of the provisions of the act a crime.

This bill, by imposing new requirements on electrical corporations, would expand the scope of that crime, and thus impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) The bill would appropriate \$600,000 from the Public Utilities Commission Utility Reimbursement Account to the commission for the purposes of implementing this bill.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 836 (AB 58) Keeley. Net energy metering.

(1) Under existing law, the Public Utilities Commission is required to order the respective electrical corporations to collect and spend funds in accordance with a prescribed schedule. Under existing law, of the funds expended for in-state operation and development of emerging renewable resource technologies, a certain amount shall be used for programs designed to provide customer credits for purchases of renewable energy produced by certified energy providers.

This bill would require the commission, in its administration of these provisions, to establish a separate rebate for eligible distributed emerging technologies for affordable housing projects.

These provisions would only become operative if SB 1038 is also enacted and amends Section 383.5 of the Public Utilities Code.

(2) Existing law requires every electric service provider to develop a standard contract or tariff providing for net energy metering, and to make this contract available to eligible customer-generators, upon request. Existing law, commencing on January 1, 2003, requires every electric service provider, upon request, to make available to eligible customer-generators contracts for net energy metering subject to specified limitations on the number of contracts. Existing law requires, commencing in 1999, every electric service provider to make available to the ratemaking authority information on the total rated generating capacity used by eligible customer-generators that are customers of that provider in the provider's service area.

This bill would require every electric service provider, as defined, commencing January 1, 2003, to make available to the ratemaking authority information on the total rated

generating capacity used by eligible customer-generators that are customers of that provider in the provider's service area. The bill would require every electric service provider to ensure that requests for establishment of net energy metering service are processed in a time period not exceeding that for similarly situated customers requesting new electric service, but not to exceed 30 working days from the date the electric service provider receives a completed application form, including a signed interconnection agreement, from an eligible customer-generator and an electric inspection clearance. The bill would require an electric service provider to ensure that requests for an interconnection agreement be processed in a time period not to exceed 30 working days from the date the electric service provider receives the completed application. The bill would require an electric service provider that is unable to process the requests within these timeframes, to notify the customer-generator and the ratemaking authority. The bill would also require every electric service provider to make forms and contracts for net energy metering available for download from the Internet. The bill would specify special net-metering provisions for an eligible customer-generator with a capacity of more than 10 kilowatts, that receives electrical service from a local publicly owned electric utility that has elected to utilize a co-energy metering program. The bill would require, if the commission determines that there are cost or revenue obligations for an electrical corporation that may not be recovered from customer-generators acting pursuant to the bill, that those obligations remain within the customer class from which any shortfall occurred and would prohibit those obligations from being shifted to any other customer class. The bill would require that net energy metering and co-energy metering customers shall not be exempt from the public benefits charge. The bill would require the commission, in its report to the Legislature, to examine different methods to ensure the public benefits charge remains a nonbypassable charge. The bill would require net energy metering customers to reimburse the Department of Water Resources for all charges that would otherwise be imposed on the customer by the commission to recover bond-related costs, as specified. The bill would require the commission to report to the Governor and the Legislature by January 1, 2005, on the economic and environmental costs and benefits of net energy metering. The bill would express legislative intent that the Treasurer incorporate net energy metering and co-energy metering projects as sustainable building methods or distributive energy technologies for purposes of evaluating low-income housing projects.

This bill would require eligible customer-generators, unless approved by the electric service provider, that utilize wind energy co-metering, as defined by the bill, with a capacity of more than 50 kilowatts, but not exceeding one megawatt, to utilize described meters.

The bill would provide that the consumption of electricity from the electric service provider for wind energy co-metering by an eligible customer-generator is to be priced in accordance with the standard rate charged to the eligible customer-generator in accordance with the rate structure to which the customer would be assigned if the customer did not use an eligible wind electrical generating facility, and that the generation of electricity provided to the electric service provider is to result in a credit to the eligible customer-generator.

(3) Existing law provides that generation eligible for net energy metering installed on or before December 31, 2002, is entitled to the net energy metering terms in effect on the date of installation for the life of the installation.

This bill would make this provision applicable only to generation eligible for net energy metering that has all local and state permits required to commence construction on or before December 31, 2002, and has completed construction on or before September 30, 2003, regardless of any change in customer or ownership of the energy system. The applicable terms would be those in effect on the date local and state permits were acquired.

Ch. 837 (AB 80) Havice. Aggregation: Magnolia Power Project.

(1) Existing law suspends the right of retail end-use customers to acquire direct access service from certain electricity suppliers after a period of time to be determined by the Public

Utilities Commission until the Department of Water Resources no longer supplies electricity under a certain provision of law.

This bill would provide that, notwithstanding the above provision of law, a city with rights and obligations to the Magnolia Power Project, as defined, may serve as a community aggregator on behalf of all retail end-use customers within its jurisdiction, if the Magnolia Power Project has been constructed and is otherwise capable of beginning deliveries of electricity to the existing project participants. This provision would not become operative until the commission implements a cost-recovery mechanism applicable to customers electing to purchase electricity from an alternate provider beginning February 1, 2001, in accordance with specified criteria that are declared to be declaratory of existing law, and submits a report on that implementation to specified committees of the Legislature. The bill would require retail end-use customers purchasing power from a community aggregator to reimburse the department and the electrical corporation that previously serviced the customer, for specified costs, as determined by the commission. Because under the Public Utilities Act a violation of an order or decision of the commission is a crime, this bill would impose a state-mandated local program by expanding the definition of a crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 838 (AB 117) Migden. Electrical restructuring: aggregation.

(1) Existing law, relating to transactions between electricity suppliers and end-use customers, authorizes various entities to aggregate electrical loads, and defines an "aggregator" as one of those entities that provides power supply services, including combining the loads of multiple end-use customers and facilitating the sale and purchase of electrical energy, transmission, and other services on behalf of the end-use customers.

This bill would authorize customers to aggregate their electrical loads as members of their local community with community choice aggregators, as defined. The bill would authorize a community choice aggregator to aggregate the electrical load of interested electricity consumers within its boundaries. The bill would require a community choice aggregator to file an implementation plan with the Public Utilities Commission in order for the commission to determine a cost-recovery mechanism to be imposed on the community choice aggregator to prevent a shifting of costs to an electrical corporation's bundled customers. The bill would require a retail end-use customer electing to purchase power from a community choice aggregator to pay specified amounts for Department of Water Resources costs and electrical corporation costs, as described. The bill would require the commission to prepare and submit to the Legislature, on or before January 1, 2006, a report on community choice aggregation. Because a violation of an order or decision of the commission is a crime, this bill would impose a state-mandated local program.

(2) Existing law requires the Public Utilities Commission to order certain electrical corporations to collect and spend certain funds for public benefit programs, including cost-effective energy efficiency and conservation programs.

The bill would require the commission, not later than July 15, 2003, to establish policies and procedures by which any party, including, but not limited to, a local entity that establishes a community choice aggregation program, may apply to become administrators for cost-effective energy efficiency and conservation programs. The bill would require the commission, if a community choice aggregator is not the administrator, to require the administrator of cost-effective energy efficiency and conservation programs to direct a proportional share of its approved energy efficiency program activities for which the community choice aggregator's customers are eligible, to the community choice aggregator's territory without regard to customer class. Under the bill, the commission would be authorized to order an adjustment to the share of energy efficiency program

activities directed to a community aggregator's territory if necessary for an equitable and cost-effective allocation of program activities.

(3) Existing law defines "electric service provider" as an entity that offers electrical service to residential and small commercial customers, but not including an electrical corporation and requires these providers to register with the commission.

This bill would instead define "electric service provider" as an entity that offers electrical service to customers within the service territory of an electrical corporation, but not including an electrical corporation or a person employing cogeneration technology or producing electricity from other than conventional power sources, for its own use or the use of its tenants or an adjacent property and not for sale or transmission to others.

This bill would provide that, if a customer of an electric service provider or community choice aggregator is involuntarily returned to service provided by an electrical corporation, any reentry fees imposed on that customer are to be the obligation of the electric service provider or community choice aggregator, except as specified. The bill would require the electric service provider or community choice aggregator, as a condition to its registration, to post a bond or demonstrate insurance sufficient to cover paying those reentry fees.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 839 (AB 1234) Pescetti. Production and transmission of public utility commodities and services: natural gas.

Existing law permits 3 or more natural persons engaged in the production of gas to form a cooperative association for purposes of selling gas produced by the association's members and performing other specified related functions. Existing law permits an association to acquire a real property easement from a public utility for the purpose of accommodating the association's gas plant, and provides that the easement shall be deemed to be held for a public purpose by the association, provided that the Public Utilities Commission finds that the use by the association is in the public interest.

Under existing law no public utility may sell, lease, assign, or otherwise dispose of property necessary or useful in the performance of its duties to the public, including easement rights for the transmission of natural gas, without first having secured from the commission an order authorizing it to do so.

This bill would permit an individual, partnership, limited liability company, or corporation (person) that is involved in the production of natural gas, to exercise all privileges of ownership of real or personal property as may be necessary or convenient for the conduct and operation of, or incidental to, transmission of natural gas and to acquire a real property easement from a public utility for the purpose of accommodating the person's gas plant, and provides that the easement shall be deemed to be held for a public purpose by the person, provided the commission finds that the use by the person is in the public interest. The bill would require, within 10 days of submission to the commission of an application by a public utility for an order authorizing the transfer of a real property easement to a person, that the utility provide written notification of the application and of the commission's pending review to each owner of real property affected by the easement.

Ch. 840 (AB 1235) Leslie. Generation facilities: sale or transfer.

Under existing law, the Public Utilities Act, the Public Utilities Commission is granted jurisdiction over certain facilities for the generation of electricity owned by any public utility. The act prohibits any public utility from disposing of a facility for the generation of electricity prior to January 1, 2006.

This bill would exempt the four run-of-river hydroelectric project works located on the Truckee River and the two run-of-river hydroelectric project located on the Wapatox Canal on the Naches River in the State of Washington from these provisions.

The bill would declare that, due to the unique circumstances of the four run-of-river hydroelectric project works located on the Truckee River and the two run-of-river hydroelectric project located on the Wapatox Canal on the Naches River in the State of Washington, a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution, and the enactment of a special statute is therefore necessary.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 841 (AB 1823) Papan. Regional water systems.

(1) Under existing law, the City and County of San Francisco (city) operates the Hetch Hetchy Project as a regional water delivery system (bay area regional water system), supplying water to persons and entities in the city and the Counties of Alameda, San Mateo, and Santa Clara.

This bill would enact the Wholesale Regional Water System Security and Reliability Act, which would impose various requirements on wholesale regional water systems, as defined, thereby imposing a state-mandated program. The bill would require the city, by February 1, 2003, to adopt a capital improvement program. The bill would require the city, in consultation with other entities, to adopt an emergency response plan by September 1, 2003. The bill would require a regional wholesale water supplier, as defined, to distribute available water during any interruption to all customers on an equitable basis, to the extent feasible. The bill would require the city to continue its practice of operating reservoirs in the Counties of Tuolumne and Stanislaus in a manner that ensures that the generation of hydroelectric power will not cause any reasonably anticipated adverse impact on water service. The bill would require the city to assign higher priority to water delivery to the bay area than to electric power generation, unless the Secretary of the Interior notifies the city of a violation of federal law.

The bill would require the State Department of Health Services to conduct an audit relating to the bay area regional water system and an audit of other regional water systems. If the city and the bay area wholesale customers that are public agencies form a special district with authority to own, operate, and manage the bay area regional water system, the bill would impose the requirements of the act on that district instead of the city. The bill would require the State Department of Health Services to ensure that the bay area regional water system is operated in compliance with the California Safe Drinking Water Act and certain federal guidelines.

The bill would require the city to prepare various reports in connection with its operation of the bay area regional water system. The new requirements established by the bill for the city would impose a state-mandated local program. The bill would require a regional wholesale water supplier to reimburse the State Department of Health Services and the Seismic Safety Commission for costs incurred in connection with implementing the requirements imposed by the act. The bill would require the bay area wholesale customers to reimburse the city for their share of costs. The bill would require wholesale customers of other regional wholesale water suppliers to be responsible for reimbursing the regional wholesale water supplier for the proportional share of costs through the imposition of water charges.

The bill would make these provisions inoperative on the earlier of two specified dates and would repeal these provisions on January 1 immediately following that earlier date.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 842 (AB 1928) Jackson. Civil actions: gender-related violence.

Existing law sets forth various personal rights and provides that all persons within California have the right to be free from violence, or intimidation by the threat of violence because of, among other characteristics, their race, color, religion, ancestry, national origin, political affiliation, or sex. Existing law further permits an individual whose exercise or enjoyment of specified personal rights has been interfered with to bring a civil action for damages, including actual damages, exemplary damages, attorney's fees, injunctive relief, and other appropriate relief.

This bill would permit a person injured by a crime of violence motivated by gender to bring a civil action for damages against the responsible person or persons. The bill would provide that damages may include actual damages, compensatory damages, punitive damages, injunctive relief, or a combination of those damages, including any other appropriate relief, in addition to attorney's fees and costs. The bill would require the action to be commenced within a specified time period. The bill would specify that it does not establish any civil liability of a person because of his or her status as an employer, unless the employer personally committed an act of gender violence. The bill would include a statement of legislative findings and declarations regarding gender-related violence.

Ch. 843 (AB 1968) Nation. Income taxes: exclusions: energy conservation rebates.

The Personal Income Tax Law provides an exclusion from gross income for any amount received as a rebate from a local water agency or supplier for the purchase of a water conservation water closet.

This bill would allow an exclusion from gross income under both the Personal Income Tax Law and the Bank and Corporation Tax Law with respect to vouchers, rebates, or other financial incentives received from the California Energy Commission, the Public Utilities Commission, or a local publicly owned utility, as defined, for the purchase or installation of specified energy production systems.

This bill would take effect immediately as a tax levy.

Ch. 844 (AB 2058) Papan. Bay Area Water Supply and Conservation Agency.

(1) Under existing law, the City and County of San Francisco (San Francisco) operates the Hetch Hetchy Project as a regional water delivery system, supplying water to persons and entities in San Francisco and the Counties of Alameda, San Mateo, and Santa Clara.

This bill would enact the Bay Area Water Supply and Conservation Agency Act. The bill would provide for the formation of the Bay Area Water Supply and Conservation Agency by 26 public entities that purchase water from San Francisco. The bill would provide for the adoption of resolutions by those public agencies as to whether to form and join the agency. The bill would require the Board of Supervisors of San Mateo County to determine whether or not resolutions to form and join the agency have been adopted by at least 15 of those public entities representing collectively at least 60% of certain water deliveries. If so, the bill would require the clerk of that board of supervisors to file a certificate with the Secretary of State and would require the secretary to issue a certificate of formation. The bill would thereafter authorize certain public entities, including San Francisco, to become members of the agency, subject to certain procedures.

The bill would require each member of the agency to appoint one member to the board, and would require the Boards of Supervisors of San Mateo County and Santa Clara County to each appoint one member, to a 4-year term on the board. The bill would allow each director to receive compensation prescribed by the board, and would provide for the reimbursement of reasonable expenses incurred in the performance of duties. The bill would grant each director one vote on any ordinance, resolution, or motion, but would also provide for weighted voting.

The bill would authorize the agency to acquire water and water rights within or outside the state; develop, store, and transport water; provide, deliver, and sell water at wholesale for municipal, domestic, and industrial purposes to certain entities; and acquire, construct, operate, and maintain works and facilities to carry out the agency's purposes. The bill would authorize the agency to provide, sell, or deliver surplus water for beneficial uses. The bill would authorize the agency to exercise the right of eminent domain, except that the bill would prohibit the agency from acquiring by eminent domain, or exercising any control over, any water distribution facility owned and operated by any city, city and county, local public entity, or public utility without that entity's consent.

The bill would authorize the agency to issue revenue bonds, pursuant to certain procedures, to finance the construction, reconstruction, or improvement of any works carried out by the agency. The bill would authorize the agency to impose reasonable rates, fees, and charges on Stanford University, the California Water Service Company, its member public entities, and certain other entities that are sufficient to generate revenue to pay the principal and interest on any bonds issued by the agency.

The various requirements established by the bill for local public entities in connection with the formation and operation of the agency would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 845 (AB 2228) Negrete McLeod. Public utilities: net energy metering.

Under existing law, electric service providers, as defined, are required to provide eligible customer-generators with net energy metering, as defined.

This bill would require electrical corporations, as defined, to provide eligible biogas digester customer-generators with net energy metering, as defined, under a pilot program. The bill would define an "eligible biogas digester customer-generator," in part, as a customer of an electrical corporation that uses a biogas digester electrical generating facility, as defined, with a certain capacity that is located on or adjacent to the customer's premises, is interconnected and operates in parallel with the electric grid, and is sized to offset part or all of the customer's own electrical requirements and that receives certain funding. The bill would prescribe conditions under which these customers may participate in the pilot program established by the bill.

Ch. 846 (AB 2706) Cardoza. Irrigation districts.

The Irrigation District Law provides for the formation of irrigation districts and grants powers to those districts relating to, among other things, water, electric power, flood control, and sewage disposal.

This bill would authorize an irrigation district to enter into any forward contract or futures contract, or put, call, or swap agreement, or similar procurement method for electricity, natural gas, or coal, or any weather, fuel, or energy risk management contract determined to be in the best interests of the district by the board of directors of the district for any of the uses or purposes of the district.

Ch. 847 (SB 1753) Bowen. Independent System Operator: duties.

(1) Existing law provides for the establishment of an Independent System Operator, a nonprofit, public benefit corporation, to ensure efficient use and reliable operation of the electrical transmission grid.

This bill would require the Independent System Operator to conduct its operations consistent with applicable state and federal laws and consistent with the interests of the people of the state. The bill would also require the Independent System Operator to manage the transmission grid and related energy markets in a manner that makes the most efficient

use of available energy resources, reduces overall economic cost to the state's consumers, is consistent with applicable state law intended to protect the public's health and the environment, and maximizes the availability of electric generation resources necessary to meet the needs of the state's electricity consumers. The bill would also require the Independent System Operator to ensure that its purposes and functions are consistent with those of a nonprofit public benefit corporation, maintain open meetings consistent with the general policies of the Bagley-Keene Open Meetings Act, and provide public access to corporate records consistent with the general policies of the California Public Records Act. Since under existing law a violation of the bill's requirements would be a crime, this bill would impose a state-mandated local program by changing the definition of a crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 848 (SB 1755) Soto. County water districts and municipal water districts: electric power.

(1) The County Water District Law and the Municipal Water District Law of 1911 grant to county water districts and municipal water districts, respectively, prescribed powers relating to water and other services.

This bill would authorize those districts to provide, generate, and deliver electricity, and to construct, operate, and maintain works, facilities, improvements, and property for that generation and delivery. The bill would prohibit those districts from acquiring property employed in the generation or delivery of electricity, except by mutual agreement between the district and the property owner. If a district elects to provide for its own generation of electricity, the bill would require the Public Utilities Commission to determine a cost-recovery mechanism to be imposed through a nonbypassable charge, for reimbursement of the Department of Water Resources and the electrical corporation for certain electricity purchase costs, to prevent a shifting of costs to an electrical corporation's bundled customers. Because a violation of an order or decision of the commission is a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 849 (SB 1870) Speier. San Francisco Bay Area Regional Water System Financing Authority.

(1) Under existing law, the City and County of San Francisco (San Francisco) operates the Hetch Hetchy Project as a regional water delivery system, supplying water to persons and entities in San Francisco and the Counties of Alameda, San Mateo, and Santa Clara.

This bill would enact the San Francisco Bay Area Regional Water System Financing Authority Act. The bill would create the San Francisco Bay Area Regional Water System Financing Authority, consisting of San Francisco, certain public entities that purchase water from San Francisco, Stanford University, and the California Water Service Company.

The bill would require the governing body of each member public entity of the authority, other than San Francisco, and the Boards of Supervisors of San Mateo and Santa Clara Counties, to appoint one voting member to the board, and would require the governing body of San Francisco to appoint one nonvoting member, to a 4-year term on the board. The bill would require San Francisco to become a voting member of the authority if a certain requirement is met. The bill would allow each director who is not an officer or employee of an appointing entity to receive compensation prescribed by the board, and would provide for

the reimbursement of reasonable expenses incurred in the performance of duties. The bill would grant each voting director one vote on any ordinance, resolution, or motion.

The bill would authorize the authority to issue revenue bonds until December 31, 2020, pursuant to certain procedures, to improve the reliability of San Francisco's regional water system. The bill would require the bond proceeds to be made available upon terms and conditions that include San Francisco's entering contracts with the authority that, among other things, require San Francisco, on behalf of the authority, to impose a surcharge to generate revenue to pay the debt service on the revenue bonds issued by the authority and the operating expenses of the authority. The bill would require San Francisco to submit an annual report to the Joint Legislative Audit Committee describing the progress made on projects financed by the authority and on the implementation by the capital improvement program for the regional water system.

The bill would require the authority to dissolve upon the repayment of all revenue bonds issued by the authority and the satisfaction of all other debts and obligations of the authority.

The various requirements established by the bill for local public entities in connection with the formation and operation of the authority would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 850 (SB 1976) Torlakson. State Energy Resources Conservation and Development Commission: report: real-time pricing: electrical corporation: procurement plans.

(1) Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission) to conduct an ongoing assessment of the opportunities and constraints presented by all forms of energy.

Under existing law, the Public Utilities Commission is required to conduct a pilot study of real-time metering for nonresidential customers, to determine the effectiveness of real-time metering in reducing energy demand and overall energy consumption, to examine customer response, to determine how real time metering should be implemented, and to determine whether more widespread use of real-time metering is in the public interest. Real-time metering is a system for measuring a customer's usage of electricity on at least an hourly basis, variably pricing that electricity based on the cost of acquisition or production, and regularly providing and updating that usage and pricing information to the customer.

This bill would require the Energy Commission, in consultation with the Public Utilities Commission, to report to the Legislature and the Governor, by March 31, 2003, regarding the feasibility of implementing real-time, critical peak, and other dynamic pricing tariffs for electricity in California, as strategies which can either reduce peak demand or shift peak demand load to off-peak periods.

(2) The Public Utilities Act imposes various duties and responsibilities on the Public Utilities Commission with respect to the purchase of electricity.

The bill would amend the act to require the commission to review and adopt a procurement plan for each electrical corporation in accordance with elements, incentive mechanisms, and objectives set forth in the bill.

The bill would authorize the commission to engage an independent consultant or advisory service to evaluate risk management and strategy. The bill would require the commission to adopt appropriate procedures to ensure the confidentiality of any market sensitive information submitted in an electrical corporation's proposed procurement plan or resulting from or related to its approved procurement plan, and to determine the impact of a proposed divestiture on an electrical corporation's procurement plan.

The bill would allow an electrical corporation that serves less than 500,000 retail customers within the state to file with the commission a request for exemption from the

provisions of the bill. The bill would require the commission to grant the exemption upon a showing of good cause.

(3) Existing law makes a violation of the provisions of the act a crime.

This bill, by imposing new requirements on electrical corporations, would expand the scope of that crime, and thus impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 851 (AB 1219) Simitan. Criminal procedure: identity.

Existing law authorizes a person who reasonably believes that he or she is a victim of identity theft to petition a court for an expedited judicial determination of his or her factual innocence, where the perpetrator of the identity theft was arrested for or convicted of a crime under the victim's identity or where the victim's identity has been mistakenly associated with a record of criminal conviction. Existing law provides that a judicial determination of factual innocence may be heard and determined upon material, relevant, and reliable information submitted by the parties. Existing law requires a court that determines the petitioner is factually innocent to issue an order certifying the determination of factual innocence.

This bill would authorize the alleged victim of identity theft to petition for, or the court, on its own motion or upon application of the prosecuting attorney, to move for, an expedited judicial determination of the factual innocence of an alleged victim of identity theft, where the perpetrator of the identity theft was arrested for, cited for, or convicted of a crime under the victim's identity, or where a criminal complaint has been filed against the perpetrator in the victim's name, or where the victim's identity has been mistakenly associated with a record of criminal conviction. This bill would also increase the sources upon which a determination of factual innocence may be made to include material, relevant, and reliable information ordered to be part of the record by the court. This bill would authorize the court that has issued a finding of factual innocence to order the name and associated personal identifying information contained in court records, files, and indexes accessible by the public deleted, sealed, or labeled to show that the data is impersonated and does not reflect the defendant's identity.

Ch. 852 (AB 2067) Nakano. Nuclear emergencies: exposure to radioactive iodine.

Existing law provides for the regulation of various entities, and the administration of various programs, by the State Department of Health Services to protect persons from excessive and improper exposure to radiation.

This bill would require the department to work with the KI working group, coordinated by the Office of Emergency Services, to develop and implement a program to oversee the distribution of potassium iodide (KI) tablets to all persons who reside, work, visit, or attend school within the state-designated emergency planning zone of an operational nuclear powerplant, in the event of an accident causing leakage of radioactive iodine.

This bill would also require the department to develop and implement, in consultation with local health departments and local emergency management agencies, a plan for the prompt distribution of potassium iodide tablets, as specified, in the event of a nuclear emergency, and for the dissemination of instructions on the use of the tablets. The bill would require the department to work with the KI working group to develop and implement a plan and method for the efficient storage of the tablets. The bill would require the department to submit these plans to the Governor and the Legislature no later than July 1, 2004.

The bill would also require the department, in consultation with the KI working group, to evaluate areas in the state, other than those in specified areas around nuclear powerplants, in

which leakage of radioactive iodine is possible, and evaluate the need to store quantities of KI tablets in those areas. The bill would require the department to submit the evaluation to the Governor and the Legislature no later than July 1, 2004.

This bill would also provide that its provisions are to be implemented only to the extent that funds are appropriated for that purpose in the annual Budget Act or another measure.

Ch. 853 (AB 2191) Migden. Medical records: confidentiality.

(1) Existing law, the Confidentiality of Medical Information Act, prohibits providers of health care, health care service plans, and contractors, as defined, from disclosing medical information regarding a patient, without first obtaining authorization, except in specified instances.

This bill would prohibit pharmaceutical companies, as defined, or agents or representatives of pharmaceutical companies, from disclosing medical information regarding a patient, without first obtaining authorization, except as specified.

(2) The Confidentiality of Medical Information Act also prohibits providers of health care, health care service plans, and contractors from requiring a patient, as a condition of receiving health care services, to sign an authorization, release, consent, or waiver permitting the disclosure of medical information, except as specified, and further requires these entities to maintain, dispose of, and release medical information and records in a manner that preserves confidentiality, according to certain procedures.

This bill would prohibit pharmaceutical companies, or agents or representatives of pharmaceutical companies, as defined, from requiring a patient, as a condition of receiving pharmaceuticals, medications, or prescription drugs, to sign an authorization, release, consent, or waiver permitting the disclosure of medical information, except as specified. The bill would also require pharmaceutical companies to adhere to specified procedures regarding the maintenance, disposal, and release of medical information and records.

(3) A violation of the Confidentiality of Medical Information Act constitutes a crime. Because a violation of this bill would be a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 854 (AB 2251) Nation. Sudden oak death.

The Budget Act of 2001 appropriated funds to the Department of Forestry and Fire Protection to develop and implement prescribed measures designed to prevent, control, and manage the condition known as sudden oak death, and to perform control work on public and private lands where sudden oak death is occurring.

This bill would require the department to implement a program to detect, remove, and treat, if possible, trees infected with *Phytophthora ramorum* and would require that the program encourage tree management and replanting, as specified. The bill would additionally prescribe the duties of the Director of Forestry and Fire Protection with regard to the program.

The bill would require the department and the Department of Food and Agriculture to cooperate in enforcing quarantine and pest abatement provisions as they may relate to the program. In addition, the bill would require the department to provide information and technical assistance, as specified, to local agencies, and would authorize the department and other state agencies to assist local tree maintenance programs by making surplus equipment available on loan.

The bill would authorize the director to contract to provide assistance, as specified, for project costs associated with program implementation.

Subject to the appropriation of funds in the Budget Act of 2002, this bill would require the department to expend funds on various specified sudden oak death management activities and would require the Department of Food and Agriculture to expend funds on various specified sudden oak death regulatory activities.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 855 (AB 2409) Jackson. Emergency notification systems.

Existing law requires the Office of Emergency Services to conduct various investigations regarding the use of television and radio broadcast stations for transmitting emergency information to the public during an emergency.

This bill would require that the office conduct a study of the emergency notification systems at California television and radio broadcast stations to determine the ability of these stations to notify the public of emergency situations 24 hours a day. It would require the office to report its findings and any recommendations for improving the system to the Legislature no later than July 1, 2003.

Ch. 856 (AB 2441) Bates. Child abduction prevention.

Existing federal law implements the provisions of the Hague Convention on the Civil Aspects of International Child Abduction, which provides remedies for the wrongful removal or retention of a child in cases of international child abduction.

Existing state law requires a child custody determination made in a foreign country under factual circumstances in substantial conformity with the jurisdictional standards of specified laws of this state governing child custody proceedings to be recognized and enforced. Existing law also prohibits the abduction of a child in violation of the right of custody or visitation of a person.

This bill would enact the Synclair-Cannon Child Abduction Prevention Act of 2002. The bill would require a court, in cases in which the court becomes aware of facts which may indicate that there is a risk of abduction of a child, to consider specified factors in determining the risk of abduction of the child and to determine whether conditions are needed to prevent the abduction of the child. The bill would require the court to consider imposing specified conditions to prevent the abduction of the child.

The bill would also require the Judicial Council to make changes to child custody order forms necessary for the implementation of these provisions. This provision would be operative on July 1, 2003.

Ch. 857 (AB 2550) Nation. Electronic death registration.

Existing law requires that each death shall be registered with the local registrar of births and deaths in the district in which the death was officially pronounced or the body was found, within 8 calendar days after death and prior to any disposition of the human remains.

Existing law provides that the State Department of Health Services is charged with the uniform and thorough enforcement of those provisions relating to the registration of certain vital statistics and provides that the State Director of Health Services is the State Registrar of Vital Statistics, who shall have supervisory powers over local registrars.

Existing law authorizes the State Registrar of Vital Statistics to incorporate computer or telephone facsimile technology, or both, in the statewide program of death and fetal death registration.

This bill would require the State Department of Health Services to implement an Internet-based electronic death registration system on or before January 1, 2005.

Existing law imposes a fee on applicants for the issuance of a permit for the disposition of human remains to be paid to the local registrar of births and deaths. A portion of this fee is paid to the State Registrar.

This bill would impose an additional fee for the issuance of the permit and would require the local registrar of births and deaths to pay these fees to the State Registrar by a specified

date. The bill would require the funds derived from these fees, upon appropriation by the Legislature, to be used by the State Registrar to implement and maintain the electronic death registration system required by this bill.

Ch. 858 (AB 2672) Leonard. Child abuse reporting.

Existing law establishes the Child Abuse and Neglect Reporting Act, which requires that specified persons who have knowledge of or observe a child in their professional capacity or within the scope of their employment, who the person knows or reasonably suspects has been the victim of child abuse or neglect to report that information to a child protective agency, as defined. Existing law prohibits any supervisor or administrator from impeding or inhibiting these reporting duties, and prohibits any person from being sanctioned for making the report.

This bill would make a knowing violation of the above prohibition by a supervisor or administrator an infraction punishable by a fine not to exceed \$5,000. Because this bill creates a new crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 859 (SB 1236) Alarcon. Labor and Workforce Development Agency.

(1) Existing law does not provide for the establishment of a Labor and Workforce Development Agency in state government.

This bill would create a Labor and Workforce Development Agency in state government consisting of the Department of Industrial Relations, the Employment Development Department, the Agricultural Labor Relations Board, and the Workforce Investment Board. The agency would be under the supervision of the Secretary of Labor and Workforce Development who would be appointed by the Governor, subject to confirmation by the Senate. The bill would specify that funding for the new agency be achieved from reallocation of existing resources currently allocated to the various entities that would form the agency, but would provide that no funds may be provided by the Agricultural Labor Relations Board. It would also specify that no appropriation of new General Fund moneys would be permitted to implement the bill.

(2) Existing law provides for the Director of Industrial Relations to receive an annual salary of \$91,054, as adjusted.

This bill instead would provide for the director to receive an annual salary of \$85,402, as adjusted.

(3) This bill would make conforming changes and other related changes in governmental reorganization of state agencies.

Ch. 860 (SB 1239) Figueroa. Consumer credit reporting agencies.

Existing law, the Consumer Credit Reporting Agencies Act, governs the disclosure of consumer credit reports. A consumer credit reporting agency is required to make specified disclosures of information contained in a consumer credit report upon the request of a consumer and to provide a free disclosure if the consumer has been turned down for credit, employment, insurance, or a rented dwelling because of information in his or her credit report within the preceding 60 days. Existing law also requires consumer credit reporting agencies to provide a specified written summary of rights to consumers.

This bill would enact provisions, effective July 1, 2003, that would additionally require a consumer credit reporting agency to provide a statement describing the statutory rights of victims of identity theft, as specified, and to provide one free copy each month, for up to 12 consecutive months, of a consumer's file, upon the request of a consumer who is a victim of identity theft. The bill would except from its provisions certain credit reporting agencies that

act only as resellers of credit information collected from other credit reporting agencies, as specified.

The bill would also revise the content of the written summary of rights provided to consumers, as specified.

Ch. 861 (SB 1259) Ackerman. Payment card theft.

Existing law establishes various offenses for theft.

This bill would provide that the possession or use, knowingly, willfully, and with the intent to defraud, as specified, of a device designed to scan or reencode information from or to the magnetic strip of a payment card, as defined, would be punishable by a term of imprisonment in a county jail not to exceed one year, or a \$1,000 fine, or both the imprisonment and fine. This bill would also provide for destruction of those devices owned by the defendant and possessed or used in violation of these provisions, and seizure of various other computer equipment used to store illegally obtained data, as specified.

By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 862 (SB 1617) Karnette. Credit cards.

Existing law provides for the issuance of credit cards, as specified, and permits a card to be issued as a renewal of, or in substitution for, an accepted credit card.

The bill would permit a credit card to be issued in substitution for an accepted credit card only if the card issuer provides an activation process whereby the cardholder is required to contact the card issuer to activate the credit card prior to using the card. The bill would state that its provisions do not prohibit the completion of an overdraft protection advance or recurring-charge transaction that a cardholder has previously authorized on an accepted credit card.

Ch. 863 (SB 1657) Scott. International trade and investment office: Republic of Armenia.

Existing law provides for the administration of international trade and investment offices by the International Trade and Investment Division of the Technology, Trade, and Commerce Agency. The secretary of the agency is authorized to accept private donations for the operation of these offices, among other purposes, and these donations are to be deposited in the Economic Development and Trade Promotion Account, as specified.

This bill would require the Governor to instruct the Secretary of Technology, Trade, and Commerce to establish, on a contract basis, an international trade and investment office in Yerevan, in the Republic of Armenia. It would require the secretary to report to the Legislature on the success of the international trade and investment office no later than March 1, 2005. It would specify that its provisions shall be implemented only to the extent that funds are available to the agency for purposes of the bill from any source. The bill would require that private donations specified for the operation of this office be deposited in a separate subaccount within the Economic Development and Trade Promotion Account and be used only for that purpose. These provisions would be repealed as of January 1, 2006.

This bill would make various technical, conforming changes.

Ch. 864 (SB 1980) McPherson. Search warrants.

Existing law authorizes a court or magistrate to issue a warrant for the search of a place and the seizure of property or things identified in the warrant where there is probable cause to believe that specified grounds exist. Federal law requires a provider of electronic communication service or a remote computing service to disclose to a governmental entity the name, address, local and long distance telephone connection records, and other billing,

payment, service, and calling records, of a subscriber to or customer of the service when the governmental entity uses, among other means, a warrant, a court order, an administrative subpoena authorized by a federal or state statute, or a federal or state grand jury or trial subpoena. Federal law provides similar requirements for the collection of the contents of stored communications in the possession of a provider of electronic communication service or a remote computing service, with specified consumer notice requirements. State law provides for a warrant procedure for the acquisition of these records. Existing law provides that no cause of action shall lie against specified parties for assistance in accordance with a warrant.

This bill would detail state procedures, similar to those described in federal law, for a governmental entity to gather similar specified records, not including the contents of stored communications, from a provider of electronic communication service or a remote computing service by search warrant. This bill would specify that no notice need be given to a subscriber or customer by a governmental entity receiving records pursuant to these procedures. It would also provide for motions to quash or modify a warrant under these provisions in specified circumstances, and would require a provider of wire or electronic communication services or a remote computing service to preserve records and evidence on request of a peace officer as provided. This bill would specify that no cause of action shall be brought against specified parties for providing information, facilities, or assistance in good faith compliance with a search warrant.

This bill would incorporate additional amendments to Section 1524 of the Penal Code as proposed by SB 1637 and AB 2055, contingent upon the prior enactment of one or both of those bills.

Ch. 865 (AB 105) Rod Pacheco. Public employees: peace officers: employee organizations.

Existing law grants certain peace officers a right to be represented by an employee organization composed entirely of other peace officers. This provision has been interpreted to apply only to those persons designated as peace officers under specified sections of the Penal Code at the time this provision was amended in 1971. Existing law also provides that, for San Bernardino County only, no distinction shall be made between a position designated as a peace officer position at the time of the enactment of the 1971 amendments to this provision, and a welfare fraud investigator or inspector designated as a peace officer position at any time after the enactment of the 1971 amendments to this provision.

This bill would prohibit this distinction with respect to probation corrections officers in San Bernardino County, upon approval by the county board of supervisors by ordinance or resolution.

Ch. 866 (AB 486) Calderon. Workers' compensation: administration and benefits.

(1) Existing law provides that the Commission on Health and Safety and Workers' Compensation in the Department of Industrial Relations is to be funded by appropriations from the Workplace Health and Safety Revolving Fund, into which certain civil and administrative penalties are deposited. Existing law requires the commission to review and approve applications from employers and employee organizations, or both, for grants to assist in establishing effective occupational injury and illness prevention programs.

This bill would instead provide for the deposit of these penalties in the Workers' Compensation Administration Revolving Fund. This bill would authorize the department to expend these funds upon approval by the commission, and upon appropriation from the fund by the Legislature, to fund the grants and other activities and expenses of the commission.

(2) Existing law provides for the Department of Industrial Relations to be divided into at least 6 divisions, including the Division of Workers' Compensation, which is under the

direction of an administrative director. Existing law provides that the administrative director has various powers and duties with respect to the Workers' Compensation Appeals Board and workers' compensation administrative law judges who hear appeals of workers' compensation claims.

This bill would add various provisions, including certain qualifications and ethics requirements for workers' compensation administrative law judges and other provisions relating to the operation of the workers' compensation courts.

This bill would also require the administrative director, in consultation with the court administrator and the Commission on Judicial Performance, to adopt regulations to enforce the applicable ethics requirements for workers' compensation administrative law judges, and would authorize the court administrator to enforce these regulations.

(3) Existing law authorizes collective bargaining agreements between a private employer or groups of employers engaged in certain activities and a recognized or certified exclusive bargaining representative that establishes a dispute resolution process for workers' compensation instead of the hearing before the Workers' Compensation Appeals Board and its workers' compensation administrative law judges, or that provides for specified other alternative workers' compensation programs.

This bill would enact similar provisions with respect to employers in the aerospace and timber industries, as specified. By requiring certain information in connection with these provisions to be submitted by an employer under penalty of perjury, this bill would expand the definition of the crime of perjury, thereby imposing a state-mandated local program.

(4) Existing law makes certain conclusive presumptions regarding a child's or spouse's dependency on a deceased employee for support as it pertains to workers' compensation benefits.

This bill would require a finding by a trier of fact, as specified, as to the physical or mental incapacitation to earn by a dependent child of any age.

(5) Existing law requires every employer, except as specified, to secure the payment of compensation by either being insured against liability to pay compensation, or by securing from the Director of Industrial Relations a certificate of consent to self-insure.

Existing law establishes the Self-Insurers' Security Fund, governed by a 7-member board of trustees and administered by the Director of Industrial Relations, to provide for the continuation of workers' compensation benefits delayed as a result of the failure of a private, self-insured employer to meet its compensation obligations when the employer's security deposit is either inadequate or not immediately accessible for the payment of benefits.

Existing law requires every private, self-insuring employer to secure incurred liabilities for the payment of workers' compensation by making a deposit based on estimated future liability for compensation.

This bill would authorize the director to provide by regulation for an alternative security system, as an alternative to that required by existing law, that would require private, self-insured employers to collectively secure all, or a portion of, their aggregate liabilities through the Self-Insurers' Security Fund.

(6) Existing law requires the Self-Insurers' Security Fund to establish bylaws in order to carry out the purposes and responsibilities of the fund.

This bill would require that those bylaws include any obligations imposed on the director by the above provisions relating to the alternative security system whereby all private, self-insureds, collectively, would be required to secure all, or a portion of, their aggregate liabilities through the Self-Insurers' Security Fund. The bill would also authorize the director to impose specified financial obligations on fund members to satisfy the security requirements set by the director with respect to participation in the fund.

(7) Existing law provides certain methods for determining workers' compensation benefits payable to a worker or his or her dependents for purposes of temporary disability, permanent total disability, permanent partial disability, and in case of death.

This bill would provide for increased temporary disability and permanent partial disability and death benefits for injuries or deaths occurring on or after January 1, 2003, with additional increases in benefits phased in over several years.

(8) Existing law establishes certification requirements for specified health care organizations that provide health care services for injured employees.

This bill would revise these certification requirements.

(9) Existing law provides for the payment of death benefits to the dependents of an injured employee who has died. Existing law establishes varying amounts of death benefits, in the case of dependents who are totally or partially dependent, or both, based on the date of the injury and on the number of dependent children.

This bill would increase the amount of those death benefits for injuries occurring on or after January 1, 2006.

(10) Existing law requires injured employees to be provided with medical services, including surgical treatment.

The bill would provide that the administrative director has the sole authority to develop an outpatient surgery facility fee schedule for services not performed under contract.

(11) Existing law establishes various procedures for workers' compensation claims proceedings, and gives exclusive jurisdiction to the Workers' Compensation Appeals Board regarding those claims. Existing law establishes procedures for the filing of pleadings, and for setting the times for hearings.

This bill would make changes to that procedure and would require a court administrator, rather than the Workers' Compensation Appeals Board, to establish various forms and to perform various administrative functions relating to these proceedings. This bill would also require the court administrator to establish a priority conferences calendar in specified cases, and require that the conferences shall be conducted by a workers' compensation administrative law judge, as prescribed. This bill would provide that if the dispute cannot be resolved at the conference, the case would be set for trial, as specified.

(12) Existing law requires workers' compensation insurers to maintain or provide occupational safety and health loss control consultation services certified by the Director of Industrial Relations.

The bill would require the Commission on Health and Safety and Workers' Compensation to establish and maintain a worker and occupational safety and health training and education program and an insurance loss control services coordinator position, to be funded from the Workers' Occupational Safety and Health Education Fund that would be created by the bill. The bill would require the director to levy and collect fees from workers' compensation insurers for purposes of the program, with the fees to be deposited in the Workers' Occupational Safety and Health Education Fund. Moneys in the fund would be available for expenditure for the above purposes upon appropriation by the Legislature.

(13) This bill would make related and technical changes.

(14) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 867 (AB 500) Goldberg. School districts: short-term employees.

(1) Under existing law, the governing board of any school district is required to employ persons for positions not requiring certification qualifications, to be known as the classified service. Under existing law, the governing board of any community college district is required to employ persons for positions that are not academic positions, also to be known as the classified service. Existing law prohibits substitute and short-term employees, employed and paid for less than 75% of a school year, from being part of the classified service. Existing law requires each position in the classified service to have, among other

things, a specific statement of the duties required to be performed by the employees in each such position.

This bill would require the governing board of a school district and of a community college district, before employing a short-term employee and at a regularly scheduled board meeting, to specify the service required to be performed by the employee, pursuant to the definition of "classification" in existing law, and to certify the ending date of the service. By imposing new duties on school districts and community college districts regarding the employment of classified employees, the bill would impose a state-mandated local program.

(2) This bill would incorporate additional changes to Section 45103 of the Education Code proposed by AB 2849, to be operative only if this bill and AB 2849 are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 868 (AB 1506) Wesson. Public works.

Existing law generally requires the payment of the general prevailing rate of per diem wages for public works projects costing over \$1,000, unless the awarding body elects to initiate and enforce a labor compliance program, as defined, for every public works project under the authority of that awarding body.

This bill would require an awarding body that chooses to use funds from either the Kindergarten-University Public Education Facilities Bond Act of 2002 or the Kindergarten-University Public Education Facilities Bond Act of 2004 for a public works project to initiate and enforce, or contract with a 3rd party to initiate and enforce, a labor compliance program for that public works project. The bill would provide that the labor compliance law applies to a public works project that commences, as provided, on or after April 1, 2003.

This bill would also provide that, if any campus of the California State University chooses to use these funds and is required to implement a labor compliance program as provided, the "awarding body" for the purposes of this bill is the Chancellor of the California State University, in which case the Chancellor of the California State University would be required to review certain payroll records on at least a monthly basis, as provided. This bill would also require the review of similar payroll records on at least a monthly basis if any campus of the University of California is required to implement a labor compliance program under the bill. This bill would also require awarding bodies to make a written finding that the body has complied with this bill, and require the State Allocation Board or the Director of the Department of Industrial Relations, as applicable, to verify that this written finding has been made.

This bill would not become operative unless either the Kindergarten-University Public Education Facilities Bond Act of 2002 or the Kindergarten-University Public Education Facilities Bond Act of 2004 is approved by the voters.

This bill would also state legislative findings and declarations regarding the bill's intent.

#### Ch. 869 (AB 1825) Nakano. Leaves of absences: organ donors.

Existing law authorizes, and in certain cases requires, that the appointing power of any state agency, department, board, or commission grant leaves of absences. These provisions also differ as to whether these leaves of absence are to be with or without pay.

This bill would require the appointing power of every state agency, department, board, or commission to grant up to a 30-day leave of absence with pay to employees who have exhausted all available sick leave and who are organ donors and up to a 5-day leave of absence with pay to employees who have exhausted all available sick leave and who are bone marrow donors, subject to specified requirements.

The bill would impose the same employee leave requirements on the Trustees of the California State University, and would allow the Regents of the University of California to adopt, by resolution, the same employee leave requirements.

Ch. 870 (AB 1847) Correa. Public employees: public safety members: biochemical substances.

The County Employees Retirement Law of 1937 provides that, for purposes of qualification for disability retirement benefits, the development of a blood-borne infectious disease by specified safety members, firefighters, county probation officers, and members in active law enforcement, who have completed 5 or more years of service, as specified, shall be presumed to arise out of, and in the course of, employment if the member demonstrates that he or she was exposed to blood or blood products as a result of performance of job duties.

This bill would additionally provide that, for purposes of qualification for disability benefits, the development of an illness due to exposure to a biochemical substance, as defined, by specified peace officer or firefighter members is presumed to arise out of, and in the course of, employment.

Under existing law, a person injured in the course of employment is generally entitled to receive workers' compensation due to that injury. Existing law provides that, in the case of certain state and local firefighting and law enforcement personnel, the term "injury" includes hernia, tuberculosis, and meningitis that develops or manifests itself during a period while the member is in the service of the governmental entity, and establishes a disputable presumption in this regard.

This bill would provide that, for specified peace officers and firefighters, the term "injury" includes illness or resulting death due to exposure to a biochemical substance, as defined, during the period in which the member is in the service of the governmental entity, and also establishes a disputable presumption in this regard.

Existing workers' compensation law contains various provisions applicable to a firefighter, firefighting member, and member of a fire department.

This bill would specify that whenever these terms are used, the term shall include, but shall not be limited to, unless the context expressly provides otherwise, a person engaged in providing firefighting services who is an apprentice, volunteer, or employee on a partly paid or fully paid basis.

Ch. 871 (AB 1908) Cohn. Public employees: long-term care insurance.

Existing law requires that the full cost of enrollment in a long-term care insurance plan or health care service plan contract covering long-term care offered to active and retired public employees, as specified, and their spouses, parents, and spouses' parents by the Board of Administration of the Public Employees' Retirement System be paid by the enrollees.

This bill would delete that requirement and make related conforming changes.

Ch. 872 (AB 1316) Dickerson. Horse racing: satellite wagering facilities.

(1) Existing law requires that in order to encourage and develop the racing of all horses in California, regardless of breed, whenever a state designated fair conducts a program of horse races on which there is parimutuel wagering, the fair, so far as practicable, provide a program of racing that includes thoroughbred racing, quarter horse racing, Arabian racing, and Appaloosa racing, if a sufficient number of horses are available to provide competition in one or more races.

This bill would eliminate the requirement that the fair be state-designated.

(2) Existing law permits any fair in San Joaquin, Humboldt, or Fresno County, with the approval of the Department of Food and Agriculture and the authorization of the board, to operate one satellite wagering facility on leased premises within the boundaries of that fair.

This bill would permit Shasta County, with the approval of the department and the authorization of the board, to operate one satellite wagering facility within the boundaries of that fair.

(3) Existing law permits mule races to be conducted by any county fair, district agricultural association fair, or citrus fruit fair.

This bill would permit mule races to be conducted by any fair. Under existing law, all revenue distributed to the state as license fees from mule racing is required to be deposited in the Fair and Exposition Fund and is continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes. This bill would, by increasing the number of permissible meetings, increase the amount of continuously appropriated license fees, thereby making an appropriation. The bill would also authorize the imposition of a state tax for purposes of Article XIII A of the California Constitution.

Ch. 873 (AB 1985) Calderon. Insurance: workers' compensation: state rate supervision.

Existing law requires property and casualty insurers to file an annual risk-based capital report concerning various risks to the insurer's assets. Existing law requires that all insurers, including property and casualty insurers, take certain actions based on the report, and, in some instances authorizes the Insurance Commissioner to take action. Property and casualty insurer is defined for purposes of these provisions.

This bill would revise the definition of property and casualty insurer to include, among other things, workers' compensation insurance.

Existing law provides for the payment of workers' compensation benefits to employees injured in the course of employment.

Existing law regulates workers' compensation insurance rates, and among other things, provides for minimum rates. Existing law prohibits the use of rates that impair or threaten the solvency of an insurer or tend to create a monopoly in the market.

This bill would revise these workers' compensation insurance rate provisions to delete the prohibition against the use of rates that impair or threaten the solvency of an insurer and to require, instead, that rates be adequate to cover an insurer's losses and expenses. The bill would make conforming changes.

Existing law requires an insurer to file all rates, rating plans, and supplementary rate information with the commissioner. Existing law authorizes the commissioner, after a hearing and finding that an insurer's rates require closer supervision due to the insurer's financial condition, to require the insurer to file additional rates and information.

This bill would delete reference to rating plans. The bill would delete the authority of the commissioner, described above, to have a hearing based on the insurer's financial condition and require an insurer to file additional rates and information.

Existing law authorizes the commissioner to disapprove a rate if certain determinations are made, and specifies procedures for a hearing prior to the disapproval of rates, for the discontinuance of a disapproved rate, and for the use of an interim rate.

This bill would modify the basis upon which a rate is disapproved, and would revise the various procedures described above.

Ch. 874 (AB 2554) Thomson. Horse racing.

The California Horse Racing Law puts authority over the regulation of horse racing in the California Horse Racing Board. Existing law provides for the San Mateo County Fair to conduct races with board approval at any location if Bay Meadows closes.

This bill would authorize the board to permit the Solano County Fair to conduct live racing meetings at another site within or outside Solano County, if the site of its 2002 racing meeting

is no longer available for horse racing in any subsequent year. This bill would permit that fair, subject to the approval of the board, to conduct its racing dates at a facility operated by a thoroughbred racing association or fair licensed to conduct a racing meeting in the northern zone, as specified.

Existing law authorizes advance deposit wagering, as specified, and requires entities holding advance wagering accounts to provide a full accounting of deposits and wagers, as specified. After the payment of winning wagers and the deduction of contractual compensation and a host fee, where applicable, existing law requires payments to various racing entities in California. Existing law refers to the balance returned to the host licensee in California from advance deposit wagering as the market access fee. From this, existing law provides that 0.0011 percent of the amount handled on advance deposit wagers that originate in California for each racing meeting to be dedicated to the Kenneth L. Maddy Fund for equine health, 0.0003 percent of that amount to pay for specified auditing and reimbursement costs, and 0.00165 of that amount to augment a specified welfare fund and pension plans benefiting backstretch personnel, with the remaining funds to be distributed as commissions, purses, and incentive awards, as specified.

This bill would instead specify that 0.0011 multiplied by the amount handled on advance deposit wagers that originate in California for each racing meeting shall be dedicated to the Kenneth L. Maddy Fund for equine health, 0.0003 multiplied by that amount shall be used for specified auditing and reimbursement costs, and 0.00165 multiplied by that amount shall augment the specified welfare fund and pension plans benefiting backstretch personnel.

Existing law provides that if the total amount paid to the state by racing associations and fairs pursuant to the Horse Racing Law is less than \$40,000,000 in any calendar year, all associations and fairs that conducted live racing during the year of shortfall shall remit to the state, on a pro rata basis according to the amount handled in-state by each association or fair, the amount necessary to bring the total amount paid to the state to \$40,000,000.

This bill would specify that market access fees from advance deposit wagering are not to be considered for purposes of those calculations.

Existing law provides for and regulates satellite wagering by eligible county fairs subject to specified conditions, if approved by the Department of Food and Agriculture and the California Horse Racing Board. Fairs in certain counties have separate authorizations to operate satellite facilities.

This bill would authorize the board to approve the Solano County Fair to operate a satellite wagering facility on the fairgrounds or on leased premises in Solano County, if the Solano County Fair ceases to conduct live horse racing at the site of its 2002 racing meeting in any subsequent year, as specified.

By authorizing additional wagering, this bill would increase the amount of continuously appropriated license fees collected as a percentage of wagering, thereby making an appropriation. The bill would also authorize the imposition of a state tax for the purposes of Article XIII A of the California Constitution, and thus would require for passage the approval of  $\frac{2}{3}$  of the membership of each house of the Legislature.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 875 (AB 2060) Bates. County employees' retirement: death benefits.

The County Employees Retirement Law of 1937 provides that no amendment to that law shall affect the right to or amount of any retirement allowance payable to any member, or spouse or beneficiary of any member, who retired or died prior to the effective date of the amendment.

This bill would provide that, notwithstanding that provision, certain alternative death benefits may be made operative as of the date specified by the county board of retirement in its resolution making those benefits applicable in the county.

Under the County Employees Retirement Law of 1937, alternative death benefits may be payable to a surviving spouse provided, among other things, no other person has been designated in an order of a court in a domestic relations proceeding as a payee.

This bill would eliminate that proviso and would make other technical and clarifying changes.

Ch. 876 (AB 2125) Negrete McLeod. Workers' compensation: Lyme disease.

Existing law provides that an injury of an employee arising out of and in the course of employment is generally compensable through the workers' compensation system. Existing law provides that, in the case of certain law enforcement officers and firefighters, the term "injury" includes heart trouble, hernia, pneumonia, and other injuries and diseases, and establishes a disputable presumption in this regard.

This bill would provide that in the case of certain state law enforcement and California Conservation Corps personnel, the term "injury" also includes Lyme disease that develops or manifests itself during a period while the person is in that service.

Ch. 877 (AB 2131) Bogh. Workers' compensation: advanced disability pension benefits.

Existing workers' compensation law permits a city, county, special district, or harbor district that is a member of the Public Employees' Retirement System, is subject to the County Employees Retirement Law of 1937, or is subject to the Los Angeles City Employees' Retirement Systems, to make advanced disability pension payments to any local safety officer who meets certain criteria and is approved for a disability allowance.

Chapter 189 of the Statutes of 2002, commencing January 1, 2003, proposes to require these entities to make these advanced disability pension payments commencing no later than 30 days from the date of issuance of the employee's last regular payment for wages or salary, payment for specified benefits, or payment for sick leave, unless certain conditions exist.

Chapter 189 of the Statutes of 2002, commencing January 1, 2003, proposes to require these advanced disability pension payments to continue until the claimant is approved or disapproved for a disability allowance pursuant to final adjudication as provided by law.

This bill would, if the above requirements to commence January 1, 2003, become operative, specify that if an employee's disability application is denied, the local agency and the employee shall arrange for the employee to repay all advanced disability pension payments.

Ch. 878 (AB 2149) Chu. Unemployment insurance: disability benefits.

Existing law provides for the partial compensation, in a specified amount, for the wage loss suffered by eligible individuals unemployed because of sickness or injury, from the Unemployment Compensation Disability Fund, a special fund in the State Treasury that is continuously appropriated for these purposes. The fund consists, among other things, of contributions paid by workers subject to these provisions, at specified rates.

This bill would permit the state and the Trustees of the California State University to elect to become employers whose employees are eligible for payment of disability benefits from the Unemployment Compensation Disability Fund.

By increasing the pool of potential recipients of payments from, and potential contributors into, a continuously appropriated fund, this bill would result in an appropriation.

Ch. 879 (AB 2192) Chavez. Workers' compensation insurance: rating information.

Existing law authorizes a licensed rating organization to make available experience rating information in its records to insurers admitted to transact workers' compensation insurance if the insurer, agent, or broker submits a written request that meets certain requirements. Under existing law, a willful violation of these provisions is punishable as a misdemeanor offense.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would provide that a licensed rating organization may not enter into a contract or agreement that prohibits information services companies in the business of publishing or providing experience rating information prior to a specified date from continuing to receive and provide that information.

Ch. 880 (SB 1411) Speier. Health care coverage: maternity services.

Existing law provides for the regulation of health care service plans by the Department of Managed Health Care and for the regulation of disability insurers by the Department of Insurance. Under existing law, a violation of the provisions governing health care service plans is punishable as a crime. Existing law prohibits a health care service plan and a disability insurer from imposing certain restrictions with respect to maternity benefits provided, respectively, under its plan contract or policy.

This bill would, effective July 1, 2003, prohibit a health care service plan and a disability insurer from imposing a copayment or deductible for health care or health insurance for specified maternity services that exceeds the most common amount of the copayment or deductible imposed for services provided for other covered medical conditions.

Because the bill would impose additional requirements on health care service plans, the violation of which would be punishable as a criminal offense, it would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 881 (SB 1701) Peace. Tobacco taxes: tax stamps.

The Cigarette and Tobacco Products Tax Law requires that an appropriate stamp be affixed to, or that an appropriate meter impression be made upon, each package of cigarettes prior to distribution.

This bill would, as of January 1, 2005, require the State Board of Equalization to replace the stamps and meter impressions, currently required to be affixed to tobacco products, with a stamp or meter impression that can be read by a scanning or similar device, and encrypted with specified information.

Ch. 882 (AB 2612) Maldonado. Public employees: pension trusts.

Existing law provides that the legislative body of a local agency may establish a pension trust for the benefit of its officers and employees. Pursuant to these provisions, a county that has created a pension trust for its officers and employees may contract with the courts and other local agencies within the county to permit the officers and employees of the courts and local agencies to participate in the county's pension trust plan. These provisions also require the contracting court or local agency to determine if participation in the plan shall be optional or compulsory for its officers and employees.

This bill would delete that latter requirement.

Ch. 883 (AB 2766) Runner. Public employees' retirement: accumulated contributions.

Existing law provides members of certain public retirement systems, whose retirement benefits have vested, with the right, upon leaving service and entering the employment of a reciprocal retirement system within a specified timeframe, to leave accumulated contributions on deposit in the retirement fund, subject to specific limitations. Existing law also permits a former member of a public retirement system, under specified circumstances, to elect to redeposit in the retirement fund an amount equal to the accumulated contributions that he or she withdrew upon termination of employment.

This bill would expand those rights to provide a member of a county, city, or local agency retirement system, who is credited with less than the number of service years required for

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

benefits to vest, with the right to elect to leave his or her accumulated contributions, as defined, on deposit in the retirement fund, subject to specified conditions. The bill would additionally grant a former member of one of those retirement systems who is or was engaged in active law enforcement or firefighting and prevention service, as specified, and who, for specified reasons, did not leave his or her accumulated contributions within the retirement fund, the right to redeposit those withdrawn contributions, if he or she is an active member of a specified reciprocal public retirement system at the time of redeposit.

The bill would set forth the findings and declarations of the Legislature and would make related, conforming changes.

Ch. 884 (AB 2780) Corbett. Private security services.

Existing law provides for the regulation of private patrol operators by the Bureau of Security and Investigative Services in the Department of Consumer Affairs.

Existing law provides that the Director of Consumer Affairs may establish procedures so that certain public agencies may file charges with the director alleging that a registered person, or person who has applied for registration with the bureau, fails to meet registration standards.

This bill would allow any person in the state to file a complaint with the director alleging a registered person or a person who applied for registration with the bureau fails to meet registration or licensure standards. The bill would also require the bureau to issue a response to the charging or complaining party in accordance with established procedures.

This bill would also make it a violation of Section 1102.5 of the Labor Code for a private patrol operator to discharge, demote, threaten, or otherwise discriminate against an employee in the terms and conditions of his or her employment, because that employee has disclosed information to a government or law enforcement agency relating to conduct proscribed by this law. The bill would provide that a private patrol operator would be liable to the injured party in an action for damages if the private patrol operator intentionally violated these provisions. The bill would authorize a person who has been discharged or discriminated against to bring a claim against the private patrol operator within 3 years of the date of the discharge, demotion, threat, or discrimination. The bill would specify that neither the department nor the bureau would be responsible for resolving the claims.

The bill would incorporate additional changes in Section 7581 of the Business and Professions Code proposed by AB 248 to be operative only if AB 248 and this bill are enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 885 (AB 2837) Koretz. Safety in employment.

Existing law provides that the local registrar of births and deaths shall transmit each week to the State Registrar all original certificates accepted for registration by him or her during the preceding week.

In addition, this bill would require the local registrar of births and deaths to transmit a copy of each certificate of death for which the death has been marked as work related.

Under existing law, the Division of Occupational Safety and Health is not required to provide bilingual persons to assist in taking and investigating complaints, or to provide interpreters at hearings.

This bill would require the division to make all efforts to ensure that limited-English-proficient persons can communicate effectively with the division. The division would further be required to prepare a progress report containing specified information, by July 30, 2004, on the provision of information and services to non-English-speaking persons.

Existing law provides for a Bureau of Investigations in the Division of Occupational Safety and Health to direct investigations of specified employment accidents.

This bill would permit the Department of Industrial Relations, upon request by a county district attorney, to develop a protocol containing specified provisions for the immediate referral of cases by the bureau to the appropriate prosecuting authority.

Existing law requires an employer to immediately file a report to the division in every case involving a serious injury or illness, or death.

This bill would impose a civil penalty of not less than \$5,000 against any employer who fails to file a report as specified.

This bill would create in the General Fund the Worker Safety Bilingual Investigative Support, Enforcement, and Training Account (hereafter the account), to be expended by the department, upon appropriation, for employment safety purposes, as defined. The department would be authorized to receive and accept contributions for those purposes, to be immediately deposited in the account. The bill would prohibit the department from receiving or accepting a contribution made from proceeds of a judgment in certain criminal actions, relating to violations of the California Occupational Safety and Health Act of 1973.

Existing law requires a state, county, or local fire or police agency called to an industrial accident in which a serious injury or illness, or death occurs to report the accident to the nearest office of the division.

This bill would require that the division then notify the appropriate prosecuting authority of the accident.

Existing law provides that every employer, and every officer, management official, or supervisor having direction, management, control, or custody of any employment, place of employment, or employee is guilty of a misdemeanor if that person or entity, among other things, knowingly or negligently violates any standard, order, or special order, or any of certain provisions of law, or part thereof, authorized by the California Occupational Safety and Health Act of 1973, the violation of which is deemed to be a serious violation, as defined.

This bill would also provide that an employer, officer, management official, or supervisor who knowingly fails to report a death to the division or knowingly induces another to do so is guilty of a misdemeanor. This bill would prescribe a penalty of up to one year in jail, a fine of up to \$15,000, or both. If the violator is a corporation or a limited liability company, this bill would impose a fine of up to \$150,000.

By making certain violations of employee safety standards by employers subject to criminal penalties, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill also makes technical, nonsubstantive changes to existing law.

#### Ch. 886 (AB 2880) Chavez. Private security services.

Existing law provides for the regulation of private security services by the Bureau of Security and Investigative Services in the Department of Consumer Affairs. Existing law requires a person who is registered as a security guard to complete a course of training on the power to arrest and requires that the course meet certain requirements, including that it be approximately 3 hours in length and that it cover specified subjects. Existing law exempts peace officers meeting certain criteria from this requirement.

This bill would make certain revisions to the course of training, including increasing the length to approximately 8 hours and revising the subjects that the course of training is required to cover.

This bill would require the department to develop and approve, by regulation, a standard course and curriculum for security officer skills training, and to consult with specified persons in formulating the regulations. Commencing July 1, 2004, the bill would require a security guard, other than a peace officer meeting certain requirements, to complete the course of training within a specified time period from the date that a registration card is

issued, would authorize licensees or department-approved organizations to administer, test, and certify the security officer skills course of training, and would require a course provider to issue a certificate upon satisfactory completion of either the power to arrest or the security officer skills course of training.

Existing law requires a licensee as a private patrol operator to be responsible for ascertaining that employees subject to registration are currently registered or have made proper application for registration. Existing law prohibits a licensee from failing to maintain an accurate and current record of proof of completion by each employee of the mandated course of training in the exercise of the power to arrest.

This bill would additionally require a licensee, commencing January 1, 2005, to be responsible for ascertaining that employees subject to registration have, in the preceding 12 months, completed a specified amount of dedicated review or practice of security officers training. The bill would also prohibit a licensee from failing to maintain an accurate and current record of proof of completion of the required security officers skills training and annual practice and review.

Existing law authorizes the Director of Consumer Affairs to deny, suspend, or revoke a private patrol operator license if it is determined that the licensee has violated any provisions of the Private Security Services Act.

This bill would exclude the assessment or payment of fines as provisions the violation of which would subject a licensee to this disciplinary action.

Existing law sets forth a security guard registration fee not to exceed \$40 and a security guard registration renewal fee not to exceed \$30.

This bill would instead require that the registration fee be \$50 and that the renewal fee be \$35. The bill would authorize the Director of Consumer Affairs to reduce temporarily these fees upon receipt of federal funds, provided that the funds received are for implementation of the act or enhancement of private security services in the state and are sufficient to justify the reduction.

The bill would incorporate additional changes in Sections 7583.2, 7583.6, and 7583.7 of the Business and Professions Code proposed by AB 248 and SB 1241, to be operative only if either or both of the other bills are enacted and become effective on or before January 1, 2003, and this bill is enacted last.

The increase in fees would increase the moneys deposited in the Private Security Services Fund, a continuously appropriated fund, for the purpose of licensing and regulation of private security services and would thereby make an appropriation.

#### Ch. 887 (SB 1911) Ortiz. Children's mental health.

Existing law establishes the State Department of Mental Health and creates various programs for children with mental health issues.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. Among the benefits provided are mental health services for children.

This bill would require the State Department of Mental Health to develop, in consultation with prescribed entities, and submit to the Legislature by no later than 12 months after the department receives sufficient funds, an analysis, as prescribed, on the savings to the General Fund and to the county mental health system, and the increased federal funding and the improvements that could be realized to county mental health programs, foster care programs, juvenile justice programs, and local educational agency programs for the provision of mental health services, as specified, by applying for a federal medicaid waiver or by adopting a state option to provide home- and community-based services to children with mental health care needs, with respect to whom there has been a determination that, but for the provision of home- and community-based services, these children would require the level of care

provided in a hospital due to the severity of their mental health care needs, the cost of which could be reimbursed under the state plan.

The bill would specify that these provisions would only be implemented to the extent funding for this purpose is appropriated in the annual Budget Act or other statute, or the State Department of Mental Health has received private, nonstate donations for this purpose.

This bill would require the State Department of Mental Health to determine whether a home- and community-based services medicaid option or waiver would provide cost benefits to the General Fund and, if so, would authorize, but not require, the State Department of Health Services to submit to the appropriate federal agency a home- and community-based waiver application, or adopt a state home- and community-based services option, as appropriate, to provide services to the target population.

Ch. 888 (SB 1932) Vincent. California State Lottery.

The California State Lottery Act of 1984 prohibits the use of certain themes in lottery games, as specified.

This bill would delete the prohibition on the use of bingo themes in lottery games.

The Lottery Act provides that none of its provisions may be changed, except to further its purpose by a bill passed by a  $\frac{2}{3}$  vote of each house of the Legislature and signed by the Governor. This bill would declare that its provisions further the purpose of the act.

Ch. 889 (AB 2909) Wiggins. Public employees' retirement: contracting agencies.

Existing law authorizes the governing body of a public agency to ask the Board of Administration of the Public Employees' Retirement System for a quotation of the approximate contribution that would be required of the agency if it elected to participate in the system.

This bill would additionally authorize a recognized employee organization that represents employees of the public agency to ask for that quotation.

Existing law also authorizes a recognized employee organization that represents employees of a public agency to ask the board for a quotation of the approximate contribution that would be required of the agency if a specific change were made to the agency's contract with the system, if the organization pays for the quotation.

This bill would additionally authorize the governing body of the public agency to ask for that quotation and would eliminate the requirement that the employee organization pay for the quotation. The bill would require the governing body of the public agency to provide each employee organization representing employees that will be affected by a proposed participation or change with a copy of the quotation within 5 days of receipt of the quotation.

The bill would also require an employee organization to provide a public agency that will be affected by the proposed participation or change with a copy of a quotation within 5 days of receipt of a requested quotation.

The bill would also authorize the board to establish limits on the number of quotations it will provide for each contract and the fees, if any, to be assessed for each quotation provided.

Ch. 890 (AB 2929) Kehoe. Wage garnishment: unemployment compensation and disability overpayments.

Existing law provides a procedure for the state to follow to collect overpayments of unemployment compensation or disability benefits made to a person. Existing law requires the Director of Employment Development to enforce collection of any judgment seeking recovery of these overpayments.

Existing law provides that the levy of execution upon the earnings of an employee to satisfy a debt is to be made by service of an earnings withholding order upon the employer of the employee.

This bill would authorize the state to issue an earnings withholding order directly, without the use of a levying officer, for purposes of collecting overpayments of unemployment

compensation or disability benefits made to a person. The bill would require the earnings withholding order to be served by registered or certified mail, postage prepaid, with return receipt requested and would provide that service is deemed complete at the time the return receipt is executed by, or on behalf of, the recipient. The bill would provide for alternative enforcement of the earnings withholding order if the return receipt is not received.

Ch. 891 (SB 2065) Kuehl. Radioactive waste.

(1) Existing law, the Radiation Control Law, designates the State Department of Health Services as the agency responsible for the regulation of radiation control in the state, and imposes various duties on the department in connection with that designation, including developing programs for evaluating the health and safety hazards associated with using sources of ionizing radiation, licensing and regulating byproduct, source, and special nuclear materials, and adopting regulations relating to the control of sources of ionizing radiation. Existing law also requires the department to collect and disseminate information relating to the control of sources of ionizing radiation, as specified. A violation of the Radiation Control Law is a crime.

This bill would require the department to establish reporting procedures through a public hearing process for low-level radioactive waste (LLRW) and would require generators of LLRW to annually report specified information to the department, thereby imposing a state-mandated local program by creating a new crime. The bill would require the department to maintain a file of all LLRW transferred for disposal to a licensed LLRW disposal facility during the reporting period and a file on each generator's LLRW stored. The department would be required to prepare a report, including an annual set of tables summarizing data collected from the generators of LLRW. The bill would prohibit the department from making the report available to the public and would exclude the report from the operation of the California Public Records Act.

Under existing law, the fees, penalties, interest earned, and fines imposed under the Radiation Control Law and for the regulation of nuclear medicine and radiologic technology are deposited in the Radiation Control Fund in the State Treasury and the department is authorized to expend the money in the fund, upon appropriation by the Legislature, for the costs related to the enforcement of that law and for certain provisions regulating radiologic technology and nuclear medicine.

This bill would specify that the money in the fund is also available for expenditure by the department to implement the requirements of the bill.

The bill would require the department to implement the bill only to the extent that funding is appropriated for that purpose.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 892 (SB 278) Machado. Public works project: Water Security, Clean Drinking Water, Coastal and Beach Protection Act of 2002.

Existing law, with certain exceptions, requires the payment of not less than the general prevailing rate of per diem wages for work of a similar character in the locality in which a public works project is performed to all workers employed on that public works project. Existing law provides that the body awarding any contract for certain public works projects is prohibited from requiring the payment of the general prevailing rate of per diem wages if the awarding body elects to adopt and enforce a prescribed labor compliance program relating to the payment of general prevailing rate wages and related laws.

The Water Security, Clean Drinking Water, Coastal and Beach Protection Act of 2002, if approved by the voters at the November 5, 2002, statewide general election, would

authorize, for the purposes of financing a safe drinking water, water quality, and water reliability program, the issuance of bonds in the amount of \$3,440,000,000.

This bill would require the body awarding any contract for a public works project financed with funds made available by the Water Security, Clean Drinking Water, Coastal and Beach Protection Act of 2002, if that initiative measure is approved by the voters, to adopt and enforce that above-mentioned labor compliance program for application to that public works project.

Ch. 893 (SB 1407) Burton. Workers' compensation.

Existing law requires a rating organization, by June 1 of each year, to notify the Governor and the Legislature that a report containing an analysis of all losses and expenses for the prior year by all insurers who are members of the organization is available upon request.

This bill would require a rating organization designated as the Insurance Commissioner's statistical agent to report to the commissioner by April 1, 2003, on the potential underreporting of workers' compensation exposure in the taxicab industry. The bill would require the rating organization to report to the Governor, the Legislature, and the commissioner by May 1, 2003, on its findings.

Ch. 894 (SB 1419) Alarcon. Personal services contracting: school and community college districts.

(1) Under existing law, the governing board of any school district is required to employ persons for positions not requiring certification qualifications, to be known as the classified service. Under existing law, the governing board of any community college district is required to employ persons for positions that are not academic positions, also to be known as the classified service. Each position in the classified service is required to have a designated title, a regular minimum number of assigned hours, a specific statement of duties, and a regular salary range.

This bill would permit and establish standards for the use of personal services contracts in school districts and community college districts notwithstanding the above-described law pertaining to classified service. Under the bill, personal services contracting would be permitted to achieve cost savings, or when (1) the contract would be for new functions that the Legislature mandates or authorizes be performed by independent contractors, (2) the services would not be available within the school or community college district or cannot be satisfactorily performed by district employees, (3) the services would be incidental to a purchase or lease contract, (4) the policy, administrative, or legal goals and purposes of the district could not be accomplished through the regular or ordinary hiring process, (5) the work would meet criteria for emergency appointment, (6) equipment, materials, facilities, or support services would be provided that could not feasibly be provided by the district, or (7) the services would be of an urgent, temporary, or occasional nature. The bill would operate prospectively.

To the extent that the bill would require school districts and community college districts to change their practices with respect to personal services contracting, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 895 (SB 1422) Burton. Private Investigator Act: licensure requirements.

The Private Investigator Act, among other things, imposes licensure requirements on any person who conducts an investigation, as defined. Existing law exempts certain specified persons from these requirements.

This bill would provide for an additional exception from these requirements for any labor-management committee, established pursuant to the federal Labor Management Cooperation Act of 1978, and its employees, if the committee performs functions authorized by the Labor Management Cooperation Act of 1978.

Ch. 896 (SB 1464) Soto. Public employees' health care benefits: employer contributions.

The Public Employees' Medical and Hospital Care Act provides for health benefits plans and contracts for public employees and sets forth the public employer's contributions to those plans, which contributions are deposited into 2 continuously appropriated funds. Pursuant to these provisions, the public employer's contribution for each employee or annuitant is required to be the amount necessary to pay the cost of enrollment for that employee or annuitant, including any family members enrolled in a health benefit plan, or if less, \$16 per month.

This bill would increase the above amount to \$97 per month over 5 years commencing on January 1, 2004, and would require that amount to be adjusted annually thereafter by the board to reflect any change in the medical care component Consumer Price Index. By increasing the contributions to continuously appropriated funds, the bill would make an appropriation.

Ch. 897 (SB 1507) Romero. Intermodal chassis.

Existing law authorizes an ocean marine terminal that receives and dispatches intermodal chassis, as defined, to conduct an intermodal roadability inspection program, as described, in lieu of other provisions that require every operator of certain types of vehicles to cause the vehicle to be inspected at least every 90 days, or more often to ensure safe operation. Existing law also specifies that it is a misdemeanor to operate an intermodal chassis on the highway other than to a place of repair, until all defects discovered during the inspection have been corrected.

This bill would require ocean marine terminals that conduct the intermodal roadability inspection program to sign, under penalty of perjury, that the inspection was performed. The inspection program would require, among other things, and subject to exception, that a citation issued for the violation of any state or federal law related to the defective condition of an intermodal chassis subject to inspection that is not owned by that motor carrier or commercial driver, be issued to the entity responsible for the inspection and maintenance of the intermodal chassis. The bill would require the California Highway Patrol to recommend that the Department of Motor Vehicles suspend the operator's motor carrier property permit if any inspection of the ocean marine terminal results in an unsatisfactory rating due to conditions presenting an imminent danger to the public or due to the operator's repeated failure to inspect and repair intermodal chassis, as specified.

Because this bill would create a new crime by requiring a signature under penalty of perjury, it would impose a state-mandated local program.

This bill would also provide that any driver who believes that an intermodal chassis is in an unsafe operating condition may request that the chassis be reinspected by the entity responsible for the inspection and maintenance of the chassis. The bill would also require that the request for reinspection, any corrective action taken, or the reason why corrective action was not taken be recorded in the intermodal chassis maintenance file. The bill would also provide that no commercial driver could be threatened, coerced, or otherwise retaliated against by any ocean marine terminal operator for contacting a law enforcement agency with regard to the physical condition of an intermodal chassis or for requesting that the intermodal chassis be reinspected or repaired.

Violation of these provisions would be an infraction pursuant to existing provisions of law. By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 898 (SB 1536) Soto. Public Employees' Medical and Hospital Care Act: wage claims.

(1) Existing law, the Public Employees' Medical and Hospital Care Act, requires the Board of Administration of the Public Employees' Retirement System to compile and provide specified data regarding health benefits plans, costs, utilization, and other matters relating to public employee health benefits coverage.

This bill would authorize the board to audit the books and records of employers to determine their compliance with the act and to enter into joint purchasing arrangements with public or private entities, subject to specified conditions.

(2) The Public Employees' Medical and Hospital Care Act provides that rates charged under any health benefits plan may be readjusted in subsequent terms based on past experience and benefit adjustments under the subsequent contract, as specified. Existing law also authorizes the Board of Administration to make provisions, as necessary, to reduce the impact of adverse selection that would affect health care plans because of enrollment of annuitants.

This bill would instead provide that the board has unlimited authority to enter into contracts with carriers providing compensation based on carrier performance or to credit premiums to employers for expenditures that are likely to improve employee health or otherwise reduce health care costs. The bill would also authorize the board to make provisions, as necessary, to reduce the impact of adverse selection because of the enrollment of annuitants, including reimbursement of Medicare late enrollment surcharges, as specified.

(3) Existing law requires contracting agencies to remit employer and employee contributions for health benefits to the Public Employees' Health Care Fund.

This bill would authorize assessment of interest and penalties, as specified, on contracting agencies who fail to remit those contributions when due, thereby making an appropriation.

(4) Under existing law, employer and employee contributions for health benefits are credited to the Public Employees' Health Care Fund or the Public Employees' Contingency Reserve Fund, both of which are continuously appropriated special funds. Under existing law, the Public Employees' Contingency Reserve Fund may be used to defray rate increases, reduce contributions, increase benefits, and pay administrative expenses, as specified. Under existing law, the Public Employees' Health Care Fund consists of, among other moneys, health plan premiums paid by public agencies.

The bill would revise and recast the provisions relating to the Public Employees' Contingency Reserve Fund by, among other things, eliminating the continuous appropriation of the fund, creating a continuously appropriated separate account within the fund for health benefit plans that the board has approved or that have entered into a contract with the board, and authorizing the use of a specified portion of the funds for cost containment programs and health benefits plan performance incentives, as specified. The bill would also create a continuously appropriated account in the Public Employees' Contingency Reserve Fund for health plan premiums paid by public agencies, and remove these premiums from the Public Employees' Health Care Fund. By changing the purpose for which the Public Employees' Contingency Reserve Fund may be used, the bill would make an appropriation. The bill would also create a separate account in the Public Employees' Contingency Reserve Fund for administrative expenses consisting of funds deposited pursuant to specified sections of law. The bill would permit money in this account to be expended pursuant to approval by the Department of Finance and the Joint Legislative

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Budget Committee in the manner set forth for obtaining authorization for expenditures requiring a deficiency appropriation, as specified. The bill would revise the statement of legislative findings and declarations regarding the parties for whom the Public Employees' Health Care Fund is held in trust. The bill would also make conforming changes. The bill would also require the Board of Administration of the Public Employees' Retirement System to submit an annual report to the Joint Legislative Budget Committee concerning the utilization of funds for cost containment, as specified.

(5) Existing law authorizes contracting agencies subject to the Public Employees' Medical and Hospital Care Act to maintain another plan or program offering prepaid hospital and medical care for its employees in certain circumstances.

This bill would prohibit those contracting agencies from maintaining those other plans or programs, except that specified existing plans would be authorized to continue so long as they meet and maintain the minimum standards for approved health benefits plans prescribed by the board and subject to other specified conditions. The bill would also revise the procedures by which the board may terminate the participation of contracting agencies.

(6) Existing law establishes lien rights and procedures for the recovery by specified health benefits trusts of medical costs paid on behalf of participants, as defined, for injuries caused by a 3rd party when the participant obtains a settlement, award or judgment against the 3rd party, as specified.

This bill would make those lien rights and procedures applicable to self-funded plans administered under the Public Employees' Medical and Hospital Care Act.

(7) Existing law authorizes the Labor Commissioner or his or her representatives to take assignments of certain claims for enforcement, including wage claims and incidental expense accounts and advances.

Existing law authorizes the State Department of Health Services, upon federal approval, to provide a supplemental rate adjustment to the Medi-Cal reimbursement rate for certain health care providers that have a collectively bargained contract or a comparable, legally binding, written commitment to increase salaries, wages, or benefits for nonmanagerial, nonadministrative, noncontract staff.

This bill would exclude those supplemental Medi-Cal reimbursement rate adjustments from the authority of the Labor Commissioner and his or her representatives to take assignments of wage claims and incidental expense accounts and advances for enforcement. This bill would vest enforcement of the supplemental rate adjustment provision with the State Department of Health Services.

#### Ch. 899 (SB 2093) Speier. Insolvency.

(1) Existing law provides for the regulation of insurers by the Insurance Commissioner. Existing law provides that every insurer desiring to reinsure the injury, disablement, or death portions of policies of workers' compensation insurance under the class of disability insurance shall maintain on file with the commissioner a bond, or a cash deposit in lieu of a bond, in favor of the commissioner as trustee for the beneficiaries of awards of compensation against the insurer, to the extent of that reinsurance. Existing law sets forth various requirements with respect to these provisions.

This bill would repeal these provisions and enact new provisions regulating insurers desiring to reinsure the injury, disablement, or death portions of policies of workers' compensation insurance under the class of disability insurance.

(2) Existing law provides for the regulation of title insurers and underwritten title companies by the Insurance Commissioner. Existing law provides that if an underwritten title company is placed into bankruptcy, receivership, or conservatorship by the commissioner and there is a shortage in a subescrow or escrow account, each title insurer operating under an underwriting agreement with the underwritten title company during the previous 6 months shall be liable for a proportionate share of the shortage.

This bill would also require an affected title insurer to be liable for a proportionate share of certain costs and expenses of the commissioner in administering the insolvency and in advancing funds from the Insurance Fund to temporarily cover a subescrow or escrow account shortage, which advances the bill would authorize. The bill would provide that a title insurer has a preferred claim for reimbursement of these payments from assets of the insolvent entity. The bill would enact other related provisions.

(3) This bill would make the operation of its provisions contingent upon the enactment of AB 2007.

Ch. 900 (SB 1637) Torlakson. Public employees: peace officers.

The Meyers-Milias-Brown Act, which governs local public employer-employee relations, establishes the right of local public employees to form, join, and participate in the activities of employee organizations of their own choosing for the purpose of representation on all matters of employer-employee relations. Under that act, the governing body of a public agency may not prohibit the right of its employees who are full-time peace officers to join or participate in employee organizations that are composed solely of peace officers, which concern themselves solely and exclusively with the wages, hours, working conditions, welfare programs, and advancement of academic and vocational training in furtherance of the police profession, and which are not subordinate to any other organization.

This bill would provide that an employee organization primarily comprised of peace officers that is a chapter of, or affiliated directly or indirectly in any manner with, a general nonprofit corporation formed for the specific and primary purpose to act as an employee organization for peace officers in this state that directly or indirectly represents less than 7,000 retired or active peace officers, that has not filed with the Secretary of State an agent of the employee organization who has been designated for purposes of service of process by the effective date of this provision is not qualified to be the exclusive or majority bargaining agent until January 1, 2007.

This bill also would prohibit any general nonprofit corporation formed for the specific or primary purpose to act as a recognized employee organization for peace officers in this state that directly or indirectly represents less than 7,000 retired or active peace officers, that has any affiliate, chapter, or member that has failed to file with the Secretary of State an agent who has been designated for purposes of service of process by the effective date of this provision, from establishing or recognizing any member, affiliate, or chapter that was not a bona fide member, affiliate, or chapter of the nonprofit corporation as of January 1, 2003, until January 1, 2007.

Ch. 901 (SB 1661) Kuehl. Disability compensation: family temporary disability insurance.

Existing law provides for the payment of disability compensation for the wage loss sustained by an individual unemployed because of sickness or injury, and finances that compensation by means of employee contributions at specified rates to the Disability Fund.

This bill instead would provide disability compensation for any individual who is unable to work due to the employee's own sickness or injury, the sickness or injury of a family member, or the birth, adoption, or foster care placement of a new child.

This bill would establish, within the state disability insurance program, a family temporary disability insurance program to provide up to 6 weeks of wage replacement benefits to workers who take time off work to care for a seriously ill child, spouse, parent, domestic partner, or to bond with a new child. This bill would provide the additional benefits through additional employee contributions. This bill would also authorize employers to require that employees utilize up to 2 weeks of earned but unused vacation leave prior to that employee's receipt of these additional benefits, as provided, and specify that these provisions may not be construed to relieve an employer of any collective bargaining duties. The bill would also make related, conforming changes in provisions relating to disability compensation. These

benefits would be payable for family temporary disability leaves that begin on and after July 1, 2004.

By providing for the deposit of additional moneys in the Disability Fund, a continuously appropriated special fund, for additional recipients of benefits from that fund, and for the expenditure of regulatory fee revenues for the administration of certain of its provisions, this bill would make an appropriation.

Existing law provides that it is unlawful to falsely certify the medical condition of any person in order to obtain disability benefits, to knowingly present a false statement in support of a claim for benefits, to knowingly solicit or receive any payment for soliciting a claimant to apply for disability insurance benefits, or to assist any person who engages in fraudulent or prohibited actions, as specified.

This bill would include family temporary disability insurance benefits within the disability benefits subject to the above proscriptions.

Because a violation of these provisions is a criminal offense, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 902 (SB 1801) O'Connell. Public employees' compensation.

(1) Existing law provides that a state employee who is a member of the California National Guard or a United States military reserve organization who elects a federally sponsored income protection program shall receive reimbursement for the costs of the insurance premium for a period not to exceed 365 days if he or she is ordered to serve on active duty on and after September 11, 2001, as a result of the War on Terrorism.

This bill would authorize the Governor to extend this benefit by executive order by up to 365 days.

(2) Existing law establishes the patrol member classification in the Public Employees' Retirement System for specified members of the Department of the California Highway Patrol and establishes the state miscellaneous member classification in the system for members employed by the state who are not subject to any other membership classification. Under existing law, retirement benefits of a patrol member of the system are based, in part, on the member's years of service credit, as defined, but may not exceed 90% of final compensation, as specified.

Under this bill, past state miscellaneous service performed by a current patrol member while he or she was a student at the Department of the California Highway Patrol's training school would be converted to patrol member service, as specified. The bill would require the department to notify the Board of Administration of the Public Employees' Retirement System of any department employee eligible for that conversion.

The bill would also provide that the service pension benefit for the California Highway Patrol Commissioner with respect to specified service may not exceed 100% of final compensation.

#### Ch. 903 (SB 1983) Soto. Teachers' Retirement Law.

(1) Existing law requires the Teachers' Retirement Board to administer and manage the investments of the Teachers' Retirement Fund.

This bill would authorize the board to make investments related to the planning, development, or acquisition of surplus real property owned by an employer, so long as the investment meets certain fiduciary standards.

(2) Existing law authorizes members of the Defined Benefit Program and the Defined Benefit Supplement Program of the State Teachers' Retirement Plan, prior to retirement, to

elect various alternative joint and survivor options providing actuarially modified retirement allowances.

This bill would revise the joint and survivor options available to those members under those programs. The bill would allow a member to designate multiple option beneficiaries, prior to the member's effective retirement date under the Defined Benefit Program, as specified. The bill would also require the Teachers' Retirement Board to evaluate on or before July 1, 2004, the existing options and annuities provided by the State Teachers' Retirement System and to adopt, as a plan amendment, appropriate changes to those options, as specified and subject to certain limitations. The bill would also prescribe procedures for designation of a new annuity beneficiary under the Defined Benefit Supplement Program if the designated annuity beneficiary predeceases the member.

(3) Under existing law, a retired member of the Teachers' Retirement Plan may perform specified types of service without reduction in his or her retirement allowance and without reinstatement if the compensation for that service, in any one school year, does not exceed \$22,000, adjusted annually by the Teachers' Retirement Board pursuant to the increase in a specified consumer price index.

Under this bill, that compensation limitation for any one school year would be \$22,000, adjusted annually by the Teachers' Retirement Board by the percentage increase in the average earnable salary of active members of the Defined Benefit Program, as specified.

(4) The bill would appropriate the sum of \$1,800,000 from the Teachers' Retirement Fund to the Teachers' Retirement Board to maintain and enhance customer service by the Teachers' Retirement System.

(5) The bill would also make technical, nonsubstantive changes to the Teachers' Retirement Law.

#### Ch. 904 (SB 1337) Vincent. Horse racing.

Existing law requires each licensed racing association to designate a certain number of racing days to be conducted as charity days for the purpose of the distribution of the net proceeds therefrom to beneficiaries. Existing law also requires that beneficiaries of these proceeds be exempt or entitled to exemption from state and federal income taxes, involved in specified beneficial activities, and approved by the California Horse Racing Board. Existing law also requires that at least 20% of the distribution from charity day racing go to charities associated with the horse racing industry.

This bill would provide that, in addition to the 20% of the distribution from charity day racing that is required to go to charities associated with the horse racing industry, another 5% of the distribution shall be provided to a welfare fund established for the benefit of horsemen and backstretch personnel, as specified, and another 5% of the distribution shall be provided to a nonprofit corporation assisting horsemen and backstretch personnel who are affected adversely as a result of alcohol or substance abuse. In addition, this bill would require that an additional 20% of the distribution from charity day racing, up to a maximum of \$2,000,000, shall be provided as an endowment for a nonprofit corporation or trust which assists disabled jockeys, as provided.

#### Ch. 905 (SB 2011) Burton. Judicial branch employees.

(1) Existing law governs the trial court employee personnel system.

The bill would revise existing provisions regarding trial court employees, employee transfers between trial courts and counties, agency shop provisions between a trial court and an employee organization, and trial court procedures concerning employee organizations. Among other changes, the bill would prohibit a trial court from offering to provide employees with benefits of any kind to induce employees to withdraw support from an employee organization, and would require a trial court to administer salary pay deductions for certain employees who join an employee organization and to provide certain personal

information regarding employees to the employee organization, except as specified. The bill would impose a state-mandated local program by imposing new duties on trial courts.

(2) Existing law requires every employer, except the state, to secure the payment of workers' compensation as provided by law. Existing law authorizes an employer, pursuant to this provision, to insure against liability in insurers duly authorized to write compensation insurance in the state or to secure from the Director of Industrial Relations a certificate of consent to self-insure.

This bill would provide that the state shall include the superior courts of the state for purposes of this provision. The bill would thereby except superior courts from the requirement to secure the payment of workers' compensation under these provisions.

(3) Existing law provides for the State Compensation Insurance Fund, which is authorized to transact workers' compensation insurance for California employers. Existing law provides for a board of directors of the fund, requires the appointment of a manager of the fund, and specifies the authority of the fund.

Existing law requires the trial courts to provide workers' compensation coverage for trial court employees under a workers' compensation program established, selected, or approved by the Administrative Office of the Courts.

This bill would create, commencing July 1, 2003, the Judicial Branch Workers' Compensation Fund for the purpose of funding workers' compensation claims for judicial branch employees. The bill would continuously appropriate the moneys in the fund without regard to fiscal years to be available for use by the Administrative Office of the Courts to pay workers' compensation claims of judicial branch employees and administrative costs, thereby making an appropriation.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 906 (AB 496) Koretz. Firearms.

Existing law provides that everyone is responsible for the result of willful acts and for injury to another occasioned by his or her want of ordinary care or skill in the management of his or her person or property, as specified.

This bill would additionally specify that the design, distribution, or marketing of firearms and ammunition is not exempt from the provisions described above. The bill would also make technical changes.

Existing law provides that no firearm or ammunition may be deemed defective in design for purposes of a products liability action, on the basis that the benefits of the product do not outweigh the risk of injury posed by the potential to cause serious injury, damage, or death when discharged, as specified.

This bill would repeal those provisions.

#### Ch. 907 (AB 1155) Dutra. Identity theft.

Existing law makes it a crime to manufacture, offer for sale, sell, or transfer a document that falsely appears to be a government-issued identification card or driver's license. In addition, existing law makes it a crime for a person to obtain the personal identifying information of another person without that person's authorization and to use that information for any unlawful purpose. Existing law also makes it a crime to conspire to commit any crime.

This bill would authorize a court to impose a fine of \$25,000 on a person who receives a felony conviction for conspiring to commit identity theft.

This bill would also make it a misdemeanor for a person to obtain, or assist another person in obtaining, a driver's license, identification card, vehicle registration certificate, or other official document issued by the Department of Motor Vehicles if the person has knowledge that the person obtaining the document is not entitled to it.

By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 908 (AB 1773) Wayne. Crime.

Existing law provides with respect to certain property crimes that occur in one jurisdictional territory and the property is taken to another jurisdictional territory, that jurisdiction of the offense is any court within either of those 2 jurisdictional territories or any contiguous territory, as specified.

This bill would also provide that the jurisdiction of a criminal action for unauthorized use of the personal identifying information of another is the county where the theft occurred or where the information was illegally used, and if multiple offenses of unauthorized use of personal identifying information occur in multiple jurisdictions, as specified, any one of those jurisdictions is a proper jurisdiction for all of the offenses.

This bill would provide that a court in which a complaint alleging multiple offenses of unauthorized use of personal identifying information occurring in multiple territorial jurisdictions has been filed shall hold a hearing to consider whether the matter should proceed in the county of filing or whether one or more counts should be severed, as specified. This bill would require the district attorney filing the complaint to present evidence to the court that the district attorney in each county where any of the charges could have been filed has agreed that the matter should proceed in the county of filing. Because this bill would increase the duties of prosecutors, this bill would impose a state-mandated local program.

This bill would state findings and declarations of the Legislature with respect to the effect of these provisions in reducing the number of separate prosecutions, which would, in turn, produce a cost savings to local governments and the courts.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 909 (AB 2080) Steinberg. Firearms: illegal trafficking.

Existing law defines various terms for the purpose of regulating firearms and other dangerous weapons.

This bill would define "gunsmith" for purposes of firearms regulation and firearms dealer licensure, as specified.

Existing law requires a licensed firearms dealer to comply with various requirements, including holding a federal firearms license.

This bill would require the Department of Justice to maintain certain records pertaining to licensed firearms dealers containing specified information.

Existing law charges the Department of Justice with various regulatory obligations relating to licensed firearms dealers.

This bill would, in addition, require the department to determine whether a person who holds a federal firearms license and is the intended recipient for firearms delivered from another holder of a federal firearms license, as specified, is properly licensed pursuant to state licensure provisions, and to provide to the inquiring party, a unique verification number to demonstrate verification of the intended recipient's state firearms licensure status has been confirmed. In the event the intended recipient is not properly licensed, the department would

be required to notify the inquiring party, and specified law enforcement authorities, as prescribed.

Existing law provides that no person who is a federally licensed firearms dealer, as specified, shall deliver, sell, or transfer a firearm to a person who is also federally licensed and whose licensed premises are located in this state unless the intended recipient presents proof of state licensure as a firearms dealer, or presents proof of exemption from that licensure requirement. Violation of these provisions is punishable as a misdemeanor or may be enhanced to a felony, as prescribed.

This bill would, in addition, commencing January 1, 2005, require that the person intending to deliver, sell, or transfer the firearms obtain from the department, prior to delivery, a unique verification number demonstrating that the person has verified with the department that the intended recipient is properly licensed pursuant to existing state requirements, as prescribed, and would require the person intending to deliver, sell, or transfer firearms to provide the unique verification number to the recipient along with the firearms upon delivery, as prescribed. Violation of these provisions would be punishable as a misdemeanor or could be enhanced to a felony, pursuant to existing provisions of law.

By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

This bill would make additional conforming changes relative to information submitted to the department regarding firearms transactions.

Existing law specifies the purposes for which funds from the Dealers' Record of Sale Special Account of the General Fund, upon appropriation by the Legislature for expenditure by the Department of Justice, may be used.

This bill would provide that these funds may also be used, upon appropriation by the Legislature, to offset the costs incurred for the verification of licensure provisions described above.

This bill would require additional information regarding the licensure of firearms dealers to be submitted to the Department of Justice, as specified. Violation of these provisions would be an infraction. This bill would also delay all new duties imposed by this bill on the department related to this additional submitted information and related to dealer licensing and records until the time on or after January 1, 2004, when a specified financial contingency is met to the department's satisfaction.

By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate additional changes in Section 12071 of the Penal Code proposed by AB 2793 that would become operative only if AB 2793 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

This bill would incorporate additional changes in Section 12076 of the Penal Code proposed by AB 2580, AB 2902, or both, that would become operative depending on the prior enactment of one or both of those bills and the chaptering of this bill last.

#### Ch. 910 (AB 2580) Simitian. Dangerous weapons.

Existing law requires that all sales, loans, or transfers of firearms, including those between private parties, be transacted through a law enforcement agency, or a licensed dealer. Those transactions involving a dealer require the delivery of the firearm to the dealer, who is then required to make specified inquiries and to deliver the weapon only upon satisfaction of specified requirements.

This bill would provide that a dealer who does not otherwise sell, transfer, or keep an inventory of handguns is not required to process private party transfers of handguns.

Existing law generally regulates various dangerous weapons, including short-barreled shotguns, short-barreled rifles, machine guns, assault weapons, and destructive devices.

This bill would require, in regard to those devices, that the Department of Justice would, for every person, firm, or corporation to whom a permit is issued relating to the device, annually conduct an inspection for security and safe storage purposes, and to reconcile the inventories of the devices, except as specified. The bill would also provide that, for a person, firm, or corporation with an inventory of fewer than 5 devices that require any Department of Justice permit, the department would conduct an inspection for security and safe storage purposes, and to reconcile inventories, once every 5 years, or more frequently if determined by the department, except as specified.

This bill would require the department to establish a schedule of fees to cover the costs of the inspection duties imposed on the department by this bill. This bill would provide that these fees shall be equitable and shall not exceed the costs of providing the required inspections. The bill would also indicate that the duties it imposes on the department are to be funded from those fees and, as may be needed, from a specified account.

This bill would incorporate additional changes in Section 12076 of the Penal Code proposed by AB 2080, AB 2902, or both, depending on the prior enactment of one or both of those bills and the chaptering of this bill last.

#### Ch. 911 (AB 2793) Pescetti. Firearms.

Existing law makes it a misdemeanor to manufacture or cause to be manufactured, import into the state for sale, keep for sale, offer or expose for sale, give, or lend any unsafe handgun, except as specified. Existing law additionally requires every person licensed to manufacture firearms pursuant to federal law who manufactures firearms in this state and every person who imports into the state for sale, keeps for sale, or offers or exposes for sale any firearm to certify under penalty of perjury that every model, kind, class, style, or type of pistol, revolver, or other firearm capable of being concealed upon the person that he or she manufactures or imports, keeps, or exposes for sale is not a prohibited unsafe handgun. Existing law exempts from these requirements certain pistols that are used in official Olympic-style international shooting competitions, as specified.

This bill would require the department to create a program to exempt new models of competitive firearms from the regulation of unsafe firearms. The exempt competitive firearms could be based on recommendations by USA Shooting consistent with the regulations contained in the USA Shooting Official Rules or could be based on the recommendation or rules of any other organization that the department deems relevant.

Existing law generally prohibits a firearms dealer, as defined, from delivering a handgun on or after January 1, 2003, unless the recipient performs a safe handling demonstration, as specified, with the handgun. The required demonstration includes a loading demonstration using a dummy round, the application of a firearm safety device, and for a semiautomatic pistol, a specified demonstration with the slide.

This bill would expand the type of "dummy round" that could be used in the loading and slide demonstrations. This bill would also exempt recipients from having to apply the firearm safety device as part of the safe handling demonstration if the gun being delivered is an Olympic competition pistol for which no firearms safety device, other than a cable lock that the Department of Justice has determined would damage the barrel of the pistol, has been approved, and the pistol is exempted from certain other requirements as a pistol that is used in official Olympic-style international shooting competitions.

Existing law requires any person who lawfully possesses an assault weapon, as defined, prior to specified periods, to register that weapon with the department, within a specified period of time. Existing law defines the term "assault weapon" by, among other things, designating a list of specified semiautomatic firearms and providing descriptive definitions concerning the capacity and function of the weapon. Existing law specifically exempts

certain pistols that are used in official Olympic-style international shooting competitions from the definition of "assault weapon."

This bill would require the department to create a program to exempt new models of competitive pistols that would otherwise be considered an "assault weapon" pursuant to these provisions from being classified as an "assault weapon."

This bill would incorporate additional changes in Section 12071 of the Penal Code proposed by AB 2080 that would become operative only if AB 2080 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

Ch. 912 (AB 2902) Koretz. Unsafe handguns: testing.

Existing law requires testing of handguns to meet specified standards in order to determine if they are unsafe, as defined. Existing law provides that handguns that are not unsafe are required to be listed on a roster maintained by the Department of Justice.

This bill would authorize the Attorney General to annually retest up to 5% of the handguns listed on the roster to ensure compliance with other provisions of law.

This bill would make operation of these changes contingent upon an appropriation for those purposes from the Dealers' Record of Sale Special Account. This bill would make other technical and conforming changes.

This bill would incorporate additional changes in Section 12076 of the Penal Code proposed by AB 2080, AB 2580, or both, depending on the prior enactment of one or both of those bills and the chaptering of this bill last.

Ch. 913 (SB 682) Perata. Firearms.

Existing law provides that everyone is responsible for the result of willful acts and for injury to another occasioned by his or her want of ordinary care or skill in the management of his or her person or property, as specified.

This bill would additionally specify that the design, distribution, or marketing of firearms and ammunition is not exempt from the provisions described above. The bill would also make technical changes.

Existing law provides that a firearm or ammunition may not be deemed defective in design for purposes of a products liability action, on the basis that the benefits of the product do not outweigh the risk of injury posed by the potential to cause serious injury, damage, or death when discharged, as specified.

This bill would delete those provisions.

Ch. 914 (SB 247) Speier. Birth and death certificates: certified copies: access.

Existing law prescribes the information to be included on a certificate of death, and on a certificate of live birth, including specified medical and social information that is required to be kept confidential as to a birth record. Existing law requires a State Registrar, local registrar, or county recorder, upon request and payment of the required fee, to supply to any applicant a certified copy of the record of birth or death, except information in a birth record that is designated confidential.

This bill would provide that the State Registrar, local registrar, or county recorder may provide a certified copy of a birth or death record to an authorized person, as defined, who submits a statement sworn under penalty of perjury that the requester is an authorized person. Because the bill would expand the scope of the crime of perjury, the bill would impose a state-mandated local program. If a requester does not meet the requirements of an authorized person, this bill would require the State Registrar, local registrar, or county recorder to issue the certified copy of a birth or death record with a legend stating "INFORMATIONAL, NOT A VALID DOCUMENT TO ESTABLISH IDENTITY." This bill would provide that these provisions would become operative on July 1, 2003.

This bill would, commencing July 1, 2003, require that each certified copy of a birth or death record contain specified information and be printed on sensitized security paper with

specified features. This bill would also require the State Registrar, local registrars, county recorders, and county clerks to take precautions to ensure that the security paper is maintained under secure conditions.

This bill would require an applicant for a certified copy of a birth or death record to pay an additional fee of \$2 to be used for specified purposes, including developing safety and security measures to protect against the fraudulent use of birth and death records. This bill would provide that the fee would be reduced to \$1 on January 1, 2006.

This bill would require the State Registrar to appoint a vital records protection advisory committee to, among other things, study and make recommendations to protect individual privacy, inhibit identity theft, and prevent fraud involving birth and death certificates while still preserving access to those seeking it for legitimate purposes. The bill would require the State Registrar to appoint specified individuals to the committee for a term of 3 years, except as provided, on a staggered basis.

This bill would authorize the department to create an automated system to accomplish these provisions.

By imposing new duties on local officials, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 915 (SB 1386) Peace. Personal information: privacy.

Existing law regulates the maintenance and dissemination of personal information by state agencies, as defined, and requires each agency to keep an accurate account of disclosures made pursuant to specified provisions. Existing law also requires a business, as defined, to take all reasonable steps to destroy a customer's records that contain personal information when the business will no longer retain those records. Existing law provides civil remedies for violations of these provisions.

This bill, operative July 1, 2003, would require a state agency, or a person or business that conducts business in California, that owns or licenses computerized data that includes personal information, as defined, to disclose in specified ways, any breach of the security of the data, as defined, to any resident of California whose unencrypted personal information was, or is reasonably believed to have been, acquired by an unauthorized person. The bill would permit the notifications required by its provisions to be delayed if a law enforcement agency determines that it would impede a criminal investigation. The bill would require an agency, person, or business that maintains computerized data that includes personal information owned by another to notify the owner or licensee of the information of any breach of security of the data, as specified. The bill would state the intent of the Legislature to preempt all local regulation of the subject matter of the bill. This bill would also make a statement of legislative findings and declarations regarding privacy and financial security.

#### Ch. 916 (SB 1490) Perata. Department of Justice: records.

Existing law requires, among other duties, that the Department of Justice, through its DNA Laboratory, administer and manage the state's DNA database and databank identification program.

This bill would provide that the Department of Justice's DNA Laboratory would be known as the Jan Bashinski DNA Laboratory.

Existing law requires the Attorney General to maintain a registry of specified information concerning pistols, revolvers, and other firearms capable of being concealed upon the person, and to include in the registry specified data provided to the Department of Justice on the Dealer's Record of Sale. Existing law also permits specified state and local officers and officials to obtain information contained in the registry.

This bill would add city attorneys who are prosecuting a civil action, solely for use in prosecuting that action, to the list of officials who may obtain the registry information.

#### Ch. 917 (SB 1670) Scott. Firearm safety devices.

Existing law requires all firearms sold or transferred by a firearms dealer, to be accompanied by a firearms safety device that is listed on the Department of Justice's roster of approved firearms safety devices, as specified. However, existing law exempts firearm sales and transfers from this requirement, if the seller or transferee proves ownership of a gun safe that meets specified standards, as provided.

This bill would define "firearms safety device," "gun safe," and "long-gun safe" for purposes of those provisions.

Existing law requires the Department of Justice to compile, publish, and maintain a roster listing all of the safety devices that have been tested by a certified testing laboratory, have been determined to meet the department's standards for firearms safety devices and may be sold in this state.

This bill would, in addition, authorize the department to randomly retest unused samples of firearm safety devices listed on the roster obtained from sources other than directly from the manufacturer to ensure compliance with the requirements established by the department.

This bill would additionally require the firearms safety device included with or accompanying the firearm be identified on the roster as being appropriate for that firearm by reference either to the manufacturer and model of firearm, or to the physical characteristics of the firearm that match those listed on the roster for use with the device.

Existing law requires the department to develop a minimum safety standard for gun safes.

This bill would require long-gun safes kept for commercial sale or commercially sold, as specified, that do not meet those requirements to carry a warning label, as specified.

The bill would also make a technical change by deleting a duplicate provision.

This bill would also provide that it would be unlawful to keep for commercial sale, offer or expose for commercial sale, commercially sell, or for any person to distribute as part of an organized firearm safety program, with or without consideration, any firearms safety device that is not listed on the roster maintained by the department, or that does not comply with the standards for firearms safety devices adopted by the department.

This bill would provide that no long-gun safe could be manufactured in this state for sale in this state that does not meet the minimum safety standards, unless the safe is labeled with a specified warning by the manufacturer.

This bill would further provide that if any person keeps for commercial sale, offers or exposes for commercial sale, or commercially sells a long-gun safe that does not meet the minimum safety standards, and the long-gun safe does not have the required warning, or the person removes the warning label, the person is in violation of certain provisions of the bill.

Violation of the provisions specifying the unlawful or prohibited acts described above would be punishable by a civil fine of up to \$500, and additionally, for a 2nd violation within 5 years of a previous offense by a civil fine of up to \$1,000, and if the violation is committed by a licensed firearms dealer, by a temporary ineligibility to sell firearms, as specified. A violation within 5 years of 2 or more previous offenses would be punishable by a civil fine of up to \$5,000, and in the case of a licensed firearms dealer, by permanent ineligibility to sell firearms, as specified.

This bill would also provide that the Attorney General, a district attorney, or a city attorney may bring a civil action for a violation of the provisions of the bill, as specified.

Ch. 918 (AB 1694) Committee on Human Services. Foster care: recipients of aid: dependent children.

(1) Existing law generally regulates the licensure and operation of community care facilities, including foster family agencies, foster family homes, and foster care group homes, which provide residential care to children who have been adjudged dependents of the court and have been removed from the custody of their parents or guardians.

Existing law requires each county welfare director to ensure that the county licensing staff or placement staff conducts one or more in-home interviews with a prospective foster parent prior to the issuance of any foster family home license, to obtain specified information for use by the placement agency. Under existing law, in counties that have not contracted with the state to license foster family homes, the in-home interview is required to be done by the placement agency.

This bill would delete the latter requirement.

(2) Under existing law, when a child is taken into temporary custody under specified circumstances, an able and willing relative who so requests may be assessed for suitability to care for the child.

This bill would extend these provisions to specifically include an able and willing nonrelative family member, as defined, who requests to care for the child. The bill would also extend application of foster care training and orientation requirements applicable to relative caregivers to nonrelative extended family member caregivers, thereby creating a state-mandated local program.

(3) Under existing law, in lieu of a national check of fingerprint records conducted by the Federal Bureau of Investigation through the California Department of Justice, state agencies are required to contract with an independent vendor to conduct a national search of the individuals' criminal records, in connection with specified state licensing provisions, including licensing by the State Department of Social Services of foster family homes.

This bill would also apply the above requirement to the county welfare department in carrying out its approval authority for relative and nonrelative extended family member foster care placements. The bill would also make related changes.

(4) Under existing law, when a parent has voluntarily relinquished his or her child to the custody of the state, as specified, or when a child has been removed from a parent's or guardian's custody, the juvenile court is required to order the social worker to provide designated child welfare services. Existing law provides, however, that reunification services need not be provided to parents or guardians under certain circumstances, including when the parent or guardian has a history of drug or alcohol abuse, and has resisted treatment.

This bill would provide that in the above situation the court would be relieved of its obligation to order reunification services only if the treatment for drug or alcohol abuse under the above circumstances were court-ordered.

(5) Existing law requires the juvenile court to conduct specified periodic hearings reviewing the status of any dependent child of the court who has been removed from the custody of his or her parent or guardian, including a permanency hearing at which the court is required to determine a permanent plan for the child.

This bill would require the court to determine at the permanency hearing whether each youth 16 years of age and older has received services to assist him or her with the transition from foster care to independent living.

(6) Under existing law, each county is charged with the local administration of various public social services programs. Existing law generally prohibits the disclosure of information about public social services program applicants and recipients except under specified circumstances. Among these circumstances are where a warrant has been issued for the arrest of the applicant or recipient for the commission of a felony or a misdemeanor, in

which case an authorized employee of a county welfare department may disclose to any law enforcement agency the name, address, telephone number, birthdate, social security number, and physical description of the applicant for, or recipient of, public social services, upon the request of the law enforcement agency.

Under existing law, a county welfare department may disclose this information, and the physical whereabouts of the applicant or recipient, to a law enforcement agency in other circumstances, if federal approval is obtained.

This bill would repeal the latter provision described above concerning the physical whereabouts and other information about an applicant or recipient.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 919 (AB 2075) Chavez. Probation costs.

In any case in which the defendant is convicted of an offense, existing law authorizes the court to make a determination of the ability of the defendant to pay all or a portion of certain costs that accrue to the county probation department. Those include the cost of probation, of conducting any presentence investigation, of preparing a specified presentence report, of conducting any preplea investigation, and of preparing a specified preplea report. Existing law requires the county probation department to make a recommendation to the court on the defendant's ability to pay these amounts, and the defendant can accept that finding or request a hearing.

This bill would extend these provisions to apply to the reasonable costs of other probation department activities, including pretrial monitoring, pretrial reports, and postsentence reports for defendants convicted of specified offenses or sets of offenses.

Under existing law, a court must order a defendant to pay that portion of those costs which is reasonable and compatible with the defendant's financial ability. Under existing law, the defendant's ability to pay is determined in part based on the probation costs chargeable to the defendant.

This bill would require the court also to consider the new probation costs described above when determining the defendant's ability to pay.

Because the county probation department would have to consider additional factors in making its recommendation on a defendant's ability to pay, this bill would impose a state-mandated local program.

This bill would repeal these changes to existing law on January 1, 2006.

This bill would declare the intent of the Legislature that this act increase local revenues by permitting courts to order defendants to repay specified local costs that are not currently subject to reimbursement.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new program or higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

#### Ch. 920 (AB 2279) La Suer. Minors: custody.

Existing law authorizes a peace officer to take into temporary custody, without a warrant, a minor who is in a hospital when the release of the minor to a parent poses an immediate danger to the child's health or safety.

This bill would enact a similar provision authorizing a peace officer to take into temporary custody a minor who is in a hospital if the release of the minor to a prospective adoptive parent poses an immediate danger to the minor's health or safety. The bill would also create a limited exception to this provision and to the provision described above if the minor is a newborn who tests positive for illegal drugs or whose birth mother tests positive for illegal drugs, the minor is the subject of a petition for adoption and an adoption placement agreement, and the release of the minor to a prospective adoptive parent or parents does not pose an immediate danger to the minor. The bill would include a statement of legislative findings and declarations regarding drug-exposed infants.

#### Ch. 921 (AB 2619) Strickland. Horse racing.

Existing law provides for the deduction of a portion of the proceeds of horse races as purses for the benefit of horsemen at the racing meeting, and provides for specific deductions from this portion for the benefit of owners' organizations, administrative expenses, and for other purposes as specified, depending on the type of horse race involved. In this connection, existing law provides that 1 $\frac{1}{2}$ % of this portion be deducted with reference to thoroughbred races held by any association other than a fair, with  $\frac{2}{3}$  of that amount going to the owners' association for administrative expenses and the other  $\frac{1}{3}$  going to the trainers' organization for administrative expenses. Existing law automatically repeals these provisions as of January 1, 2008, but replaces these provisions with alternate language that is identical except that only 1%, rather than 1 $\frac{1}{2}$ %, is to be divided between the owners' and trainers' organizations in connection with thoroughbred races held by any association other than a fair. Under existing law, "trainer" is defined for these purposes as a person currently licensed by the board as an owner and trainer or as a trainer.

This bill would change the definition of trainer for these purposes to mean a person currently licensed by the board as a trainer. This bill would repeal this change in definition on January 1, 2006.

Existing law provides for the recognition by the California Horse Racing Board of horsemen's organizations, including organizations solely representing owners and organizations solely representing trainers.

Existing law provides that each horsemen's organization, except an organization that solely represents owners or an organization that solely represents trainers shall provide for the representation of owners and trainers on its board of directors. Existing law provides that the bylaws of a horsemen's organization specify the composition of the board of directors, and that those bylaws, and changes to those bylaws, be approved by the Horse Racing Board.

This bill would allocate 3 positions on the board of directors of the organization representing thoroughbred owners for persons holding licenses as both owners and trainers, and for their spouses who are licensed as owners, as specified, and would make related and conforming changes. This bill would limit the board of the organization representing thoroughbred owners to 15 members of equal standing, as specified. This bill would repeal its provisions on January 1, 2006.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 922 (AB 2931) Horton. Horse racing.

(1) Existing law permits racing associations, fairs, and the organization responsible for contracting with racing associations and fairs with respect to the conduct of racing meetings, to form a private, statewide marketing organization to market and promote thoroughbred and fair horse racing. Existing law requires the marketing organization to annually submit to the California Horse Racing Board a statewide marketing and promotion plan for thoroughbred

and fair horse racing. Existing law also specifies distributions to be distributed to the marketing organization for the promotion of thoroughbred and fair horse racing.

This bill would specify that the marketing organization may also obtain, provide, or defray the cost of workers' compensation coverage for stable employees and jockeys of thoroughbred trainers. This bill would require the marketing organization to annually submit a thoroughbred trainers' workers' compensation defrayal plan for thoroughbred and fair horse racing to the board. This bill would permit specified funds distributed to the marketing organization to be used to defray the cost of workers' compensation coverage for stable employees and jockeys of thoroughbred trainers.

(2) Existing law provides that when satellite wagering is conducted on thoroughbred races, an amount not to exceed 1.25 percent of the total amount handled by satellite wagering facilities shall be deducted, for specified purposes, from specified funds and distributed to an organization formed and operated by thoroughbred racing associations, fairs conducting thoroughbred racing, and the organization representing thoroughbred horsemen.

This bill would permit any amount up to an amount equal to the difference between the 1.25 percent of the total amount handled by satellite wagering facilities, and the amount actually deducted, not to exceed \$4,000,000 statewide annually, to be utilized to obtain, provide, or defray the cost of workers' compensation coverage for licensed thoroughbred stable employees and jockeys, and an amount not to exceed \$1,000,000 statewide annually, to be paid to a welfare fund established for the benefit of horsemen and backstretch personnel if a written agreement between the owners' organization and certain racing associations and fairs regarding the use of those funds is entered into, and the agreement is filed with the board. This bill would make that agreement binding on the owners' organization and all of the racing associations and fairs that conduct thoroughbred races in California. This bill would give the board the authority to enforce the agreement.

(3) Existing law requires specified sums to be paid to or for the benefit of horsemen at a racing meeting.

This bill would specify that paying those sums to or for the benefit of the horsemen at the racing meeting may include obtaining, providing, or defraying the cost of workers' compensation coverage for stable employees and jockeys of licensed trainers.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 923 (AB 2384) Committee on Governmental Organization. Horse racing.

Existing law relating to harness races provides for the distribution of a portion of the parimutuel pool for purses, and provides for the allocation of the purse money. Under existing law, no horse owner's license or license to conduct a race meeting may be issued unless the applicant's liability for workers' compensation is secured. Existing law provides that any termination of liability coverage results in the immediate automatic suspension of the license during the period of that termination, and is also a ground for revocation of the license.

This bill would provide that, with respect to a harness race meeting, a portion of the money allocated for purses may be used to pay for obtaining, providing, or defraying the cost of workers' compensation coverage for stable employees and drivers of licensed standardbred trainers. The bill would require a written agreement, subject to the approval of the board, between the racing association that conducts the live harness race meeting and the organization representing the horsemen participating at the race meeting specifying the portion, if any, to be used for these purposes. It would require this portion to be jointly administered by the racing association and the organization representing the horsemen.

This bill also contains provisions incorporating amendments to Section 19613 of the Business and Professions Code proposed by AB 2619 and AB 2931 to become operative only if those two bills become effective on or before January 1, 2003, and (2) each of those bills amends Section 19613 of the Business and Professions Code, in which case the amendments of, or additions of, Section 19613 in AB 2619 and AB 2931 shall be repealed.

This bill would declare that it is to take effect immediately, as an urgency statute.

Ch. 924 (AB 2869) Horton. Horse racing.

Existing law permits mule races to be conducted by any county fair, district agricultural association fair, or citrus fruit fair, under specified circumstances. Existing law provides that a license to conduct a racing meeting granted to an association other than a fair shall be for only one type of racing, except where specified.

This bill would provide that a racing association licensed to conduct a live quarter horse racing meeting may also conduct mule racing at that meeting, with the approval of the California Horse Racing Board, and subject to other specified conditions.

Existing law requires thoroughbred racing associations to pay out certain percentages of the total amount handled, and of the portion deducted from the parimutuel pool, for license fees, purses, and commissions, as specified.

This bill would allow a thoroughbred racing association and the organization representing thoroughbred horsemen to agree to reduce the portion deducted from the parimutuel pool for purses and commissions provided that the change only affect funds available for purses and commissions. This bill would also provide that any collective bargaining agreement premised in part on the amount of commissions earned would continue to be calculated based on the amount of commissions that would have been earned had this provision not become law. It would make an agreement to reduce the portion deducted from the parimutuel pool for purses and commissions subject to the approval of the California Horse Racing Board, and would prohibit that approval unless notice has been given to any labor organization that could be affected by the agreement.

Ch. 925 (AB 2907) Cohn. Provider contracts.

The Knox-Keene Health Care Service Plan Act of 1975 provides for the regulation and licensing of health care service plans by the Department of Managed Health Care and makes the willful violation of any of its provisions a crime. Existing law also provides for the regulation of health insurers by the Department of Insurance. Under existing law, a plan and a health insurer are prohibited from including certain provisions in a contract with a licensed health care practitioner regarding the practitioner's provision of care to an enrollee or insured.

This bill would prohibit provisions in a contract between a health care service plan or health insurer and a health care provider, as defined, that would allow the plan or insurer to unilaterally change a material term of the contract without meeting specified requirements, that would require the provider to accept additional patients, as specified, and that would pertain to other specified aspects of the provider's practice. The bill would provide that a contract violating any of these prohibitions would be void, unlawful, and unenforceable. The bill would also require the Department of Insurance to report annually to the Legislature and the Governor complaints it receives concerning these requirements and would require the Department of Managed Health Care to report annually to the Legislature and the Governor information it receives from plans concerning their dispute resolution mechanism.

By creating new prohibitions applicable to health care service plans, the violation of which would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 926 (AB 2994) Wright. HIV reporting requirements.

Existing law establishes the federal Ryan White Comprehensive AIDS Resources Emergency (CARE) Act of 1990, as amended in 2000, which provides funds to all states to establish a comprehensive community-based continuum of care, including primary medical

care and support services for people with HIV infection and AIDS. This federal law requires a participating state to report certain information about HIV and AIDS, as specified. Noncompliance may result in ineligibility for federal funding.

This bill would require the State Department of Health Services, in consultation with various entities, to determine, no later than December 31, 2005, whether California's HIV reporting system has achieved compliance with standards and criteria necessary to ensure continued federal funding for California under that federal act, as specified. This bill would require the department to inform the appropriate committees of the Legislature of its findings by December 31, 2005, and to report to those entities all written communications from the Centers for Disease Control and Prevention that indicate that California's HIV reporting system has not or will not meet federal standards and criteria for an HIV reporting system pursuant to that act.

Ch. 927 (AB 3032) Committee on Judiciary. Child support enforcement.

Existing law requires each county to maintain a local child support agency for the purpose of establishing, modifying, and enforcing child support obligations. Existing law requires a local child support agency to obtain and send a completed state medical insurance form to the Department of Child Support Services in any action brought or proceeding instituted by the agency for the payment of child or spousal support. The local agency must also communicate with the Department of Child Support Services to determine whether there have been any lapses in health insurance coverage for public assistance applicants and recipients. Existing law also provides for state hearings for custodial or noncustodial parents who are dissatisfied with the local child support agency's resolution of a complaint, as specified.

Existing law also requires the Department of Child Support Services to collect information regarding child support enforcement and to report that information to the Legislature, as specified.

This bill would authorize an agency enforcing a support obligation to record a notice of support judgment. The bill would require a local child support agency to send the completed state medical insurance forms described above to, and, in order to determine whether there have been health insurance lapses, to communicate with, the State Department of Health Services, rather than the Department of Child Support Services. The bill would require a local child support agency to provide to a CalWORKs recipient or former recipient as to whom an assignment of his or her support rights is currently effective a notice of the amount of assigned support payments made on behalf of that recipient or former recipient or any other family member for whom public assistance is received. The bill would require a local child support agency to complete an administrative review of alleged arrearages within a specified timeframe. The bill would revise provisions governing the procedures for the conduct of state hearings for parents who are dissatisfied with the local child support agency's resolution of a complaint. The bill would revise the reporting requirements imposed on the Department of Child Support Services, as specified. The bill would also make technical and clarifying changes. By imposing additional duties on local agencies, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 928 (SB 398) Chesbro. Health care service plans: bankruptcy.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the regulation and licensure of health care service plans by the Department of Managed Health Care and makes a violation of the act's provisions a crime. Under the act, a plan is required to demonstrate to the Director of the Department of Managed Health Care that it has a fiscally sound operation and adequate provision against the risk of insolvency. The act also requires a plan to provide notice of any material modification of its license to the director.

This bill would require a health care service plan, except in extraordinary circumstances, to meet and confer with the director at least 10 business days prior to filing a petition for bankruptcy. The bill would require in extraordinary circumstances, that the plan meet and confer with the department 24 hours before filing the petition. The bill would also require the plan to provide certain information requested by the director. The bill would also require the department to adopt regulations that establish an extended geographic accessibility standard for access to health care providers served by a health care service plan in counties with a population of 500,000 or less that have 2 or fewer health care service plans providing coverage to the entire county in the commercial market. The bill additionally would require a health care service plan at least 30 days prior to filing a notice of material modification to withdraw with the director, to hold a public meeting in a county with a population of 500,000 or less if the plan intends to withdraw from that county. Because the violation of these requirements would be punishable as a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 929 (SB 1135) Polanco. Tissue banks.

Existing law provides for the licensure and regulation of tissue banks by the State Department of Health Services. Existing law authorizes the department to adopt rules and regulations governing the administration and enforcement of these provisions and permits regulations adopted by the department to include minimum standards for various aspects related to tissue banks.

This bill would require, rather than authorize, the department to adopt, on or before July 1, 2004, rules and regulations governing licensed tissue banks engaged in the collection of human musculoskeletal tissue, skin, and veins for transplantation in humans, and would require that the regulations be substantially based upon the criteria used by tissue bank trade associations in their respective accreditation processes. It would require, rather than permit, regulations adopted by the department, pursuant to the bill, to include minimum standards for various aspects related to tissue banks, and would also require the department, on or before July 1, 2003, to report to the appropriate policy and fiscal committees of the Legislature regarding the status of the proposed regulations.

#### Ch. 930 (AB 2912) Florez. Charter schools: funding.

Existing law requires the county superintendent of schools to determine a revenue limit for each school in the county pursuant to a prescribed formula, and requires, for purposes of that apportionment, that average daily attendance be calculated, as prescribed.

This bill would, notwithstanding any other provisions of law, make those provisions relating to the calculation of average daily attendance inapplicable for purposes of determining the base revenue limit or block grant average daily attendance for charter school pupils who reside in a school district in which all schools have been converted to charter schools and that elect not to receive funding under specified provisions, and would make conforming changes in related provisions.

#### Ch. 931 (SB 460) Ortiz. Lead abatement.

(1) The State Housing Law deems a building or portion thereof to be substandard if certain conditions exist.

This bill would deem a building or portion thereof to be in violation of the State Housing Law if it contains lead hazards, as specified, that are likely to endanger the health of the public or the occupants.

(2) The State Housing Law requires the housing department or, if there is no housing department, the health department, of every city, county, or city and county, or a specified environmental agency to enforce within its jurisdiction all of the State Housing Law, the building standards published in the State Building Standards Code, and other specified rules and regulations. A violation of the State Housing Law, related published building standards, or any other rule or regulation adopted pursuant to the law is a misdemeanor.

This bill instead would require the housing or building department or, if there is no building department, the health department, of every city, county, or city and county, or a specified environmental agency to enforce within its jurisdiction all of the State Housing Law, the building standards published in the State Building Standards Code, and other specified rules and regulations. It would authorize the State Department of Health Services to enforce the provisions relating to lead hazards if specified conditions are met. By creating a new crime and imposing additional duties upon local officials, this bill would impose a state-mandated local program.

(3) The State Housing Law requires the enforcement agency to institute any appropriate action or proceeding to prevent, restrain, correct, or abate the violation of the law, published building standards, specified rules and regulations, or nuisance. It also requires an enforcement agency, when it has determined that a building is a substandard building, to commence proceedings to abate the violation by repair, rehabilitation, vacation, or demolition of the building.

This bill would additionally require an enforcement agency, when it has determined that a building contains lead hazards, as described above, to commence proceedings to abate the violation by repair, rehabilitation, vacation, or demolition of the building.

(4) Existing law requires the State Department of Health Services to implement and administer a program that meets federal requirements regarding lead-based paint hazards, and requires the adoption of regulations regarding, among other things, the accreditation of providers of health and safety training to employees who engage in or supervise lead-related construction work.

This bill would make it a crime for a person to engage in specified acts relating to lead-related construction courses, and lead-related construction work, abatement, or lead hazard evaluation. It would also enact related inspection provisions.

The bill would also permit the department or a local enforcement agency, whenever it determines that a condition at a location or premises, or the activity of any person at the location or premises, is creating or has created a lead hazard at the location or premises, to order the owner of the location or premises to abate the lead hazard or to order the person whose activity is creating or has created the hazard, to cease and desist. It would make it unlawful to refuse to obey any order issued under this provision, with a violation of this requirement being an infraction punishable by a fine of not more than \$1,000.

(5) Under existing law, a portion of the moneys collected for criminal offenses constitute state penalties, a portion of which is retained by each county and a portion of which is deposited into the State Penalty Fund, to be allocated as prescribed.

This bill would provide instead that all state penalties collected for violations of the provisions described in (4) shall be deposited in the General Fund.

(6) Existing law requires all medical laboratories to report to the State Department of Health Services each detected case of a blood lead level that exceeds specified parameters.

This bill would revise and recast these reporting requirements.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for

making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 932 (SB 1397) Costa. Charter schools: funding.

Existing law authorizes a school district's revenue limit to be determined using either the current or prior fiscal year average daily attendance, whichever is greater. Under existing law, a charter school that was assigned a number by the State Board of Education before June 1, 1999, may choose to be funded for the 1999–2000, 2000–01, and 2001–02 fiscal years through the base revenue limit method or the block grant method.

This bill would authorize the revenue limit of an elementary school district to be determined using either the current or prior year second principal apportionment average daily attendance, whichever is greater, if all the schools in the district were converted to charter schools in the 2000–01 fiscal year and the district continued to be funded through the base revenue limit method.

Ch. 933 (AB 2412) Diaz. Enforcement of employees' access to payroll records.

Existing law provides that employers must furnish their employees with certain information regarding compensation and deductions therefrom. Existing law also provides that current or former employees of an employer have the right to inspect and copy these records.

This bill would require employers to comply with requests from current or former employees to inspect or copy these records within 21 calendar days from the date of the request. The bill would make a violation of this requirement an infraction, thereby imposing a state-mandated local program.

This bill also provides for a civil penalty against employers who fail to comply with requests to inspect and copy these records, and for injunctive relief to ensure compliance with employers' duties pursuant to current and former employees' payroll records.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 934 (AB 2895) Shelley. Private employment: working conditions.

Existing law provides that an employer may not require that an employee refrain from disclosing the amount of his or her wages, require an employee to sign a waiver denying him or her the right to disclose the amount of his or her wages, or discharge, formally discipline, or otherwise discriminate against an employee, for job advancement, who discloses the amount of his or her wages.

This bill would eliminate the requirement that the discharge, formal discipline, or discrimination must be for job advancement.

This bill would also provide for identical protections relating to disclosure of information about the employer's working conditions.

Ch. 935 (AB 14) Goldberg. School facilities.

(1) Existing law, the Leroy F. Greene School Facilities Act of 1998 (Greene Act of 1998), makes funding available to eligible school districts for various purposes related to school facilities, including construction and modernization.

This bill would specify that prescribed agencies are not “lead agencies” in this process for the purposes of the California Environmental Quality Act, would declare that the state special schools for the deaf and for the blind are eligible for modernization funding, and would make certain transitional changes regarding the funding of projects pursuant to subsequently approved state bonds.

(2) Existing law establishes, as a condition of receipt of state funding under the Greene Act of 1998, that the governing board of a school district comply with prescribed provisions relating to the environmental assessment of a proposed schoolsite prior to acquisition of the site, including, but not limited to, submission of the assessment, and related documents, through the State Department of Education to the Department of Toxic Substances Control for its review and approval.

This bill would, instead, require the submission directly to the Department of Toxic Substances Control, would require that notification be given to the State Department of Education and to the governing board of the school district if the Department of Toxic Substances Control determines that a preliminary endangerment assessment is needed, and would make related conforming and technical changes.

Existing law, the Greene Act of 1998, authorizes the board to provide additional funding to cover 50% of the evaluation and response costs related to hazardous materials on a proposed project site, not to exceed 50% of the result of subtracting the school district’s cost of the site from the appraised value of the site when the response action is complete, and provides a similar cap in the case of 100% hardship funding.

This bill would, instead, permit the board to provide additional funding for 50% of the evaluation and response cost as determined by the Department of Toxic Substances Control, pursuant to standards adopted by the board. The bill would, except in circumstances of extreme need, cap those costs at 50% of one and one-half times the appraised value of the uncontaminated site, would make similar adjustments in the case of hardship projects, permitting inclusion of those costs only if the State Department of Education certifies certain findings related to the project, and would make related and conforming changes.

(3) Existing law provides for submission to the voters of the Kindergarten-University Public Education Facilities Bond Acts of 2002 and 2004 which would, in part, authorize the issuance of bonds for the purpose of funding K-12 school facilities, including, but not limited to, charter school facilities pursuant to the Greene Act of 1998, as set forth in a subsequent act of the Legislature.

This bill would set forth the manner of funding charter school facilities under the Kindergarten-University Public Education Facilities Bond Act of 2002 including, among other provisions, that the State Allocation Board and the California School Finance Authority provide funding for charter school facilities projects. By increasing the related duties of school districts and chartering agencies, this bill would impose a state-mandated local program.

(4) Existing law establishes a mechanism for a school district governing board to render prescribed city or county ordinances inapplicable to school facilities.

This bill would prohibit a school district from rendering a city or county ordinance inapplicable to a charter school facility unless the facility is within the geographical jurisdiction of the school district.

(5) Existing law establishes the Homebuyer Down Payment Assistance Program to provide assistance in payment of the school facilities fee on an affordable housing development, to be funded with funds provided through the Housing and Emergency Shelter Trust Fund that are continuously appropriated for that purpose.

This bill would, instead, fund the program with funds provided through the Kindergarten-University Public Education Facilities Bond Acts of 2002 and 2004 if certain conditions occur, would continuously appropriate those funds for these purposes, and would make other technical and conforming changes.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(7) This bill would declare that its provisions are severable and that if any provision or application is held invalid, it shall not affect other provisions or applications of the bill that can be given effect.

#### Ch. 936 (AB 299) Rod Pacheco. Reporting requirements.

Existing law, the Child Abuse and Neglect Reporting Act, requires certain mandated reporters, including clergy members and family support officers, to report, as specified, incidents of child abuse or neglect of a person under the age of 18 years at least within 36 hours of receiving information on an incident. A failure to report as required is a misdemeanor.

The bill would, instead of family support officers, make local child support agency caseworkers mandated reporters.

This bill would allow a mandated reporter to include with this report any nonprivileged documentary evidence relating to the incident.

The bill would make any custodian of records of a clergy member a mandated reporter and would permit any clergy member or custodian of records for the clergy member to report, on or before January 1, 2004, a previously unreported incident of child sexual abuse that occurred prior to January 1, 1997, even if at the time of the report, the alleged victim is 18 years of age or older. The bill would provide that law enforcement agencies shall have jurisdiction to investigate these reports of child abuse. By imposing the reporting requirement on a new class of persons, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 937 (AB 629) Oropeza. Transportation.

Existing law requires, in the Santa Cruz Metropolitan Transit District, the Orange County Transportation Authority, the Alameda-Contra Costa Transit District, and the Santa Clara County Transit District, upon the adoption of a resolution, that the driver of a vehicle yield the right-of-way to a transit bus if, among other things, the bus is equipped with a yield right-of-way sign on its left rear, as specified. Existing law establishes a base fine of \$35 for a violation of these provisions. Existing law repeals these provisions on January 1, 2003.

This bill would extend the repeal date to January 1, 2004. Because a violation of these provisions is an infraction, this bill would create a new crime, thereby imposing a state-mandated local program.

Existing law makes it unlawful to operate any vehicle in violation of statutory equipment requirements.

This bill would require every transit bus operated by a motor carrier, whether that motor carrier is a private company or a public agency, that provides public transportation services to be equipped with a 2-way communication device, as defined, that enables the driver to contact the motor carrier in the event of an emergency. The bill would require the devices to

be maintained in good working order. Buses operated by or on behalf of a school district would be exempted.

The bill would also state the intent of the Legislature that the California Transportation Commission work with transportation agencies, and that transportation agencies make the purchase and maintenance of two-way communication devices a priority.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 938 (AB 630) Oropeza. Transportation: Los Angeles County Metropolitan Transportation Authority.

Existing law requires that the Los Angeles County Metropolitan Transportation Authority, at a minimum, reserve to itself exclusively, specified powers and responsibilities, including, among other things, the establishment of overall goals and objectives.

This bill would specify that the above responsibility as to the establishing of overall goals and objectives is to achieve optimal transport service for the movement of goods and people on a countywide basis. The bill would also make various findings regarding the terrorist attacks of September 11, 2001. The bill would require the authority to perform a security assessment in conjunction with other municipal operators in Los Angeles County to determine the safety and security measures required to protect their operations and passengers. By imposing this additional requirement on the authority, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 939 (AB 690) Wiggins. State Assistance Fund for Enterprise, Business, and Industrial Development Corporation.

Existing law defines "community development financial institution" for certain purposes related to taxation.

This bill would provide that the State Assistance Fund for Enterprise, Business, and Industrial Development Corporation (SAFE-BIDCO) meets the definition of community development financial institution for purposes of taxpayer eligibility for certain tax credits.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 940 (AB 1059) Keeley. Vessels.

(1) Existing law requires generally that any ordinance, law, regulation, or rule adopted by certain state or local entities relating to vessels pertain only to time-of-day restrictions, speed zones, special-use areas, and sanitation and pollution control.

This bill would require the Department of Boating and Waterways, upon request of the Director of Fish and Game, or his or her designee, to restrict or prohibit, based on the request, recreational vessel activity on waters of the state in general until January 1, 2004, and in Agua Hedionda Lagoon in San Diego County indefinitely, if that vessel activity would hinder or jeopardize efforts to control or eradicate *Caulerpa taxifolia*.

The bill would require that notice of the restriction or prohibition be posted conspicuously and, at a minimum, in areas where boats are launched into the waterway where the restriction or prohibition is in effect. The bill would subject the operator of a vessel who violates any

restriction or prohibition imposed pursuant to the bill to a fine of not more than \$250, thereby imposing a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the State. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 941 (AB 1163) Calderon. Water Replenishment District of Southern California.

(1) Existing law, the Water Replenishment District Act, authorizes the formation of water replenishment districts for the replenishment of groundwater within a district. The act requires the State Auditor to perform an audit with regard to the operations and management of the Water Replenishment District of Southern California and to submit a related report to the Legislature. The act provides that these provisions will be repealed on January 1, 2003.

This bill would require the State Auditor to submit its report to the Legislature not later than June 30, 2004. The bill would require the cost of the audit to be reimbursed by the district's ratepayers.

(2) The act prohibits the district from incurring any indebtedness on or after January 1, 2001, authorizes the district to increase its annual water replenishment district assessment under certain circumstances, and requires the district to pay for any capital project undertaken by the district with existing reserves or with funds generated from the imposition of its annual water replenishment assessment.

This bill would delete these provisions and would instead require the district to develop a 5-year capital improvement program in accordance with certain requirements. The bill would provide that these provisions will be repealed on January 1, 2005.

This bill would impose a state-mandated local program by imposing new duties on the district.

(3) The act requires the Central Basin Water Association and the West Basin Water Association to appoint 6 professionals with expertise relating to water to a technical advisory committee, and requires the district to consult with the technical advisory committee for certain projects relating to water quality improvement.

This bill would specify that capital improvement programs are included within those projects for which the district is required to consult with the technical advisory committee.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 942 (AB 1227) Canciamilla. Minimum instructional time: penalty waiver.

Existing law authorizes the State Board of Education to waive the fiscal penalties for a school district or county office of education that fails to maintain the prescribed minimum length of time for the instructional school year, minimum number of instructional days, or both, upon the condition that the school or schools in which the minutes, days, or both, were lost maintain minutes and days of instruction equal to those lost for twice the number of years that it failed to meet those requirements, commencing not later than the year in which the waiver is granted.

This bill would authorize a waiver to be granted for fiscal penalties incurred as a result of a shortfall on instructional time in the 2000–01 fiscal year or thereafter only if the makeup minutes or days, or both, are commenced not later than the school year following the year in which the waiver is granted.

Ch. 943 (AB 1793) Migden. Education: physical education.

(1) Under existing law, the State Department of Education is required to exercise general supervision over the courses of physical education in elementary and secondary schools of the state, and to perform other duties related to physical education in the schools.

This bill would impose new duties on the department regarding physical education, including monitoring the number of hours of physical instruction offered to pupils in grades 1 to 12, inclusive.

(2) Under existing law, the State Board of Education is required to adopt statewide academically rigorous content standards, pursuant to the recommendations of the Commission for the Establishment of Academic Content and Performance Standards, in the core curriculum areas of reading, writing, mathematics, history/social science, and science.

This bill would require the State Board of Education to adopt model content standards, pursuant to recommendations developed by the Superintendent of Public Instruction, in the curriculum area of physical education.

(3) Under existing law, the Superintendent of Public Instruction is required to select not less than 10 percent of the school districts of the state to report compliance with the provisions relating to physical education requirements for grades 7 to 12, inclusive, and for elementary schools maintaining any of grades 1 to 8. Each school district selected by the superintendent to report is required to report its compliance with those provisions in the Coordinated Compliance Review.

This bill would instead make those reporting requirements applicable to the physical education requirements for grades 1 to 6, inclusive, and would make clarifying changes in related provisions.

#### Ch. 944 (AB 1895) Wright. Education: special education.

Existing law, the federal Individuals with Disabilities Education Act, requires that all individuals with disabilities residing in the state, regardless of the severity of their disabilities, and who are in need of special education and related services, be identified, located, and assessed as required by federal law.

This bill would prohibit an employee of a school district, county office of education, or a special education local plan area from directly or indirectly using or attempting to use the official authority or influence of the employee for the purpose of intimidating, threatening, or coercing a person, or attempting any of those actions against a person, for the purpose of interfering with the right of that person to assist a parent or guardian of a pupil with exceptional needs to obtain services or accommodations for that pupil.

#### Ch. 945 (AB 1962) Hollingsworth. Electronic communication.

Existing law relating to evidence in court actions and specified administrative proceedings defines evidence as including a writing, which is defined as handwriting, typewriting, printing, photostating, photographing, and every other means of recording upon any tangible thing, any form of communication or representation, including letters, words, pictures, sounds, or symbols, or combinations thereof.

The California Public Records Act, which requires each state and local agency to make its records open to public inspection at all times during office hours, with specified exemptions, defines public records as including any writing containing information relating to the conduct of the public's business prepared, owned, used, or retained by any state or local agency regardless of physical form or characteristics. The act defines a writing as handwriting, typewriting, printing, photostating, photographing, and every other means of recording upon any form of communication or representation, including letters, words, pictures, sounds, or symbols, or combinations thereof, and all papers, maps, magnetic or paper tapes, photographic films and prints, magnetic or punched cards, discs, drums, and other documents.

This bill would define writing under these provisions to mean handwriting, typewriting, printing, photostating, photographing, photocopying, transmitting by electronic mail or

facsimile, and every other means of recording upon any tangible thing, any form of communication or representation, including letters, words, pictures, sounds, or symbols, or combinations thereof, and any record thereby created, regardless of the manner in which the record has been stored. By expanding the scope of public records that local agencies are required to make available for public inspection, this bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would state that it is declaratory of existing law.

This bill would incorporate additional changes in Section 6252 of the Government Code proposed by AB 2937 that would become operative if both bills are enacted and this bill is enacted last.

Ch. 946 (AB 2390) Cedillo. Agricultural products commissions.

(1) Existing law relating to the unlawful possession of agricultural commodities provides that if for any reason an unlawfully possessed commodity that has been seized is not released to the rightful owner after being in the custody of the county agricultural commissioner for a specified amount of time, the commissioner may sell the commodity by public auction or by private sale at fair market value to a commercial packer of the commodity, and if any seized commodity remains unsold after being offered for sale, the commissioner may donate the commodity to a nonprofit charitable organization.

This bill would instead provide that the commissioner may either sell the commodity as specified above or, after 72 hours from the time of seizure, may donate the commodity to a nonprofit charitable organization. If donated, the commodity may not be sold by the receiving party.

(2) Existing law provides that if for any reason unlawfully possessed avocados that have been seized are not released to the rightful owner after being in the custody of the Secretary of Food and Agriculture for a specified amount of time, the secretary may sell the commodity by private sale at fair grower market value and if any seized avocados remain unsold after being offered for sale, the secretary may donate them to a nonprofit charitable organization.

This bill would instead provide that the secretary may either sell the avocados as specified above or, after 72 hours from the time of seizure, donate the avocados to a nonprofit charitable organization. If donated, the avocados may not be sold by the receiving party.

(2.5) Existing law establishes the Navel and Valencia Orange Advisory Commission, an inspection program relating to those oranges, and imposes certain assessments upon producers of those oranges, as specified. Existing law requires that the assessments be paid into the Food and Agriculture Fund, a continuously appropriated fund, and be expended only for purposes related to the administration of the inspection program. Violation of certain of these provisions is a misdemeanor pursuant to other provisions of law. Existing law also provides that these provisions will be repealed on January 1, 2003.

This bill would extend the operation of the above described provisions indefinitely. By extending the operation of the provisions imposing assessments that are to be deposited into a continuously appropriated fund, this bill would make an appropriation. By extending these provisions of law, the violation of which is an offense, this bill would impose a state-mandated local program.

(3) Existing law provides that there is, within state government, the California Avocado Commission.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would change the composition of the commission to eliminate requirements for commission membership that require its members be affiliated with cooperatives handling avocados, and to make related changes.

(4) Existing law provides for the establishment of a California Avocado Commission for specified purposes.

This bill would expand and clarify those purposes.

(5) Existing law defines the term “distributor” as any person who engages, in this state, in the operation of selling, marketing, or distributing avocados which he or she has produced or purchased or acquired from a producer, or which he or she is marketing on behalf of a producer, whether as owner, agent, employee, broker, or otherwise, as a distributor; and the term “handler” as any person engaged, within this state, as a distributor in the business of distributing avocados or any person engaged as a processor in the business of processing avocados. Existing law makes reference to a distributor collecting, or making payment to the commission of, assessments to be used by the commission to defray its operating costs, provides that all assessments shall be paid to the commission by the handler first handling avocados, and provides that failure of a handler to pay any assessment as specified subjects the individual handler or the director or officer of a corporate handler to liability in the form of a penalty and interest, as specified.

This bill would replace the reference to “distributor” in the above described provisions with a reference to “handler,” and would expand the group of individuals and entities subject to the above liability for failure to collect or pay the assessment to include limited liability companies and managers and members of corporations or limited liability companies. The bill would make conforming changes to related provisions.

(6) Existing law describes 5 districts with specified boundaries and requires the commission to draw new district lines if the poundage in any existing district varies by more than 10% from the pro rata poundage, as defined.

This bill would instead require the commission to establish 5 districts within the state, each representing approximately 20% of the avocado production in California, would, beginning in the 2000–01 marketing season, require those districts to be reapportioned as set forth above every 5th year.

(7) Existing law provides that if a handler from any cooperative handling avocados or a handler who is not within any cooperative handling avocados markets 30% or more of the volume of avocados in the preceding marketing season, as annually determined by the secretary, that handler may nominate and elect one handler member to the commission.

This bill provides instead that any handler that handles 30% or more of the volume of avocados in the preceding marketing season may appoint one handler member to the commission.

(8) Existing law provides that a person nominated for election to the commission as (a) an independent producer or grower, or (b) a cooperative producer, must sign a sworn statement stating that he or she marketed at least 75% of his or her fruit in the preceding crop year through other than a membership agreement with a cooperative handler.

This bill would eliminate this requirement.

(9) Existing law provides that the commission has the power to conduct and contract with others to conduct scientific research, including the study, analysis, dissemination, and accumulation of information obtained from the research or elsewhere respecting the inventory, marketing, and distribution of avocados.

This bill would provide that the results of any research conducted by or on behalf of the commission may be used by the commission in any way it deems appropriate, and notwithstanding any other provision of law, may be maintained in confidence by the commission and not disseminated to any person not subject to the provisions relating to the California Avocado Commission. The bill would also require the commission to provide the secretary, on an annual basis, a summary of the programs, activities, and costs under review for the next marketing season.

(10) Existing law makes it a misdemeanor for one engaged in the shipping of avocados or in the wholesale or retail trade of avocados to fail or refuse to furnish to the commission or its duly authorized agents, upon request, information concerning the name and address of the persons from whom he or she has received avocados and the quantity and inventory, by variety, of the avocados.

This bill would delete the above offense and provide instead that it is a misdemeanor to willfully fail to render or furnish a report, statement, or record required by the commission. By revising an existing crime, this bill would impose a state-mandated local program.

(11) Existing law provides that the commission shall adopt regulations for the purpose of according individuals aggrieved by its actions or determinations an informal hearing before the commission or before a committee of the commission designated for that purpose, as specified.

This bill would instead require the commission to establish procedures with respect to aggrieved individuals, and would make various revisions to the provisions relating to those hearings.

(12) The bill would make various changes to provisions relating to the commission and its membership; the continued operation, or suspension of operation, of the provisions relating to the commission; and assessments. The bill would also make various technical, nonsubstantive, and clarifying changes to the above and related provisions.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 947 (AB 2397) Correa. Vehicles.

Existing law provides that it is unlawful for a lessor-retailer to sell a vehicle without a lessor-retailer license or temporary permit. Existing law prohibits lessor-retailers from engaging in certain practices, as specified.

This bill would add various other acts, the commission of which, by a licensed lessor-retailer, would be a crime.

Existing law provides that no person shall act as a motor vehicle dealer without having first been issued a license or temporary permit by the Department of Motor Vehicles. Existing law provides that no holder of this license shall disseminate or make any statement which is untrue or misleading that he or she knows or reasonably should know is untrue, or make any statement as part of a plan or scheme with the intent not to sell any vehicle or service so advertised at the price stated. Existing law provides that a licensee shall not advertise a vehicle for sale without identifying it, nor shall he or she exclude that certain fees will be added to the advertised price, as specified.

This bill would provide that vehicle identification must include the model, and model-year, as specified. With respect to the requirement to include information about additional fees, this bill would remove handbills from the definition of advertisement. This bill would restrict the use of the terms “no downpayment” and “zero downpayment” as specified. This bill would also prohibit the use of a picture in connection with an advertisement of the price of a specific vehicle or class of vehicles that depicts a vehicle with optional equipment or a design not offered at the advertised price.

This bill would also add various other acts, the commission of which, by a holder of a dealer’s license, would be a crime.

This bill would state the intent of the Legislature that on and after the operative date of these provisions, various sections of the California Code of Regulations shall have no force and effect, as specified.

By creating new crimes and expanding the scope of various existing crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 948 (AB 2457) Frommer. Rental car agencies.

Existing law prohibits an automobile rental agency from renting or leasing a motor vehicle unless the agency discloses both orally and in writing to the customer that the collision damage waiver protection may be duplicative of coverage the customer currently has through his or her automobile insurance policy.

This bill would, until January 1, 2006, make inoperative the requirement that the rental agency notify the customer about the possibility of this duplicate coverage and instead require, during that period, oral notice to be given to all renters who are not participants in the rental company's membership program.

Existing law regulates an automobile renter's liability for loss due to theft, a rental company's loss of use, or damage or loss to a rental vehicle, a renter's credit card liability, the submission of insurance claims, damage waivers and damage waiver fees, and the notice to a renter regarding financial responsibility and optional damage waivers. Existing law provides that a waiver of these provisions is void and unenforceable as contrary to public policy.

This bill would until January 1, 2006, provide an exception to this provision with respect to renters who are members of the rental company's membership program, as defined, if specified conditions are met.

Ch. 949 (AB 2469) Dickerson. Regional water management groups.

Existing law requires urban water suppliers, as defined, to prepare urban water management plans to facilitate long-term resource planning to ensure adequate water supplies to meet existing and future demands for water.

This bill would revise provisions proposed to be added to the Water Code by SB 1672, which would become operative only if SB 1672 is chaptered and becomes effective on or before January 1, 2003, and this bill is chaptered last. The bill would authorize a regional water management group to prepare and adopt a regional plan in accordance with certain procedures, that addresses programs, projects, reports, or studies relating to water supply, water quality, flood protection, or related matters over which a local public agency that is a participant in that group has authority to undertake.

Ch. 950 (AB 2525) Jackson. Accessible voting systems.

Existing law requires the Secretary of State to establish the specifications and the regulations governing voting machines, voting devices, and any software used, including the programs and procedures for vote tabulating and testing. The Secretary of State may not approve any voting system that does not fulfill statutory and regulatory requirements.

This bill would impose a state-mandated local program by requiring the Secretary of State to adopt rules and regulations governing any voting technology and systems used by the state or any political subdivision that provide blind and visually impaired individuals with access that is equivalent to that provided to individuals who are not blind or visually impaired. It would require the Secretary of State to obtain recommendations from representatives of blind consumer organizations, experts in accessible software and hardware design, and other individuals or organizations the Secretary of State deems appropriate.

This bill would further impose a state-mandated local program by requiring that at each polling place at least one voting unit approved by the Secretary of State provide access to individuals who are blind or visually impaired.

This bill would provide that a local agency is not required to comply with this requirement unless sufficient funds are available to implement that provision. It would provide that funds

received from the proceeds of the Voting Modernization Bond Act of 2002, from federal funds made available to purchase new voting systems, or from any other source except the General Fund, shall be used for that purpose.

This bill would authorize any person injured by a violation of the requirements of this bill to maintain an action for injunctive relief, within specified time limits.

The bill would not apply to voting by absentee ballot.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 951 (AB 2567) Committee on Business and Professions. State Agencies: reports: public contracts: acquisitions of goods and services.

Existing law authorizes any state agency, that receives delegated authority from the Department of General Services to acquire, without prior approval, materials, supplies, and equipment, to make specified purchases, including acquisitions not exceeding \$15,000 from vendors not listed on price schedules in specified circumstances, and from vendors at a price lower than state warehouse prices.

Existing law also requires the Department of General Services, on July 1 of each year, to establish the minimum dollar level below which a state agency has the authority to acquire goods without prior approval from the department. The current established minimum dollar level is set at \$25,000.

This bill would apply this annually established limit, in lieu of the current \$15,000 threshold, to acquisitions from vendors not listed on price schedules and from vendors at a price lower than state warehouse prices, made by any state agency that has been delegated authority to make specified purchases without prior approval from the Department of General Services.

Existing law requires the Department of General Services to make a written report to the Governor, embracing a record of the complete transaction of the Office of State Printing for the preceding fiscal year.

This bill would eliminate that reporting requirement.

Existing law requires various state agencies and officers to report to the Director of General Services and to the Chairperson of the Joint Legislative Budget Committee on their use of goods and services, as specified.

This bill would eliminate that reporting requirement.

Existing law authorizes a local agency to provide for a small business preference in construction, the procurement of goods, or the delivery of services, and to establish a subcontracting participation goal for small businesses on contracts with a preference for those bidders who meet the goal.

This bill would, for purposes of this authority, require the term "small business" to be defined by each local agency, and would also reduce, as specified, maximum contract value limits with respect to the awarding of state contracts, under certain authority, to small businesses, microbusinesses, or disabled veteran businesses.

Ch. 952 (AB 2574) Harman. Arbitration: conflicts of interest.

Existing law provides that in any arbitration pursuant to an arbitration agreement, if a person is to serve as a neutral arbitrator, the proposed neutral arbitrator is required to disclose

all matters that would cause a person aware of the facts to reasonably entertain a doubt that the proposed neutral arbitrator would be able to be impartial, as specified.

This bill would prohibit a private arbitration company from administering a consumer arbitration, or providing any other services related to a consumer arbitration, if the company has, or within the preceding year has had, a specified financial interest, in any party or attorney for a party. The bill would impose similar limitations on the provision of services by private arbitration companies based on the financial interests of any party or attorney for a party in the private arbitration company. The bill would state that its provisions become operative on January 1, 2003.

Ch. 953 (AB 2631) Matthews. Resources.

(1) Existing law requires each state agency to prepare an annual report containing information regarding consulting service contracts entered into during the previous fiscal year. Existing law requires state agencies to submit the report to specified entities within 30 working days after the end of the previous fiscal year. Existing law further requires the Department of General Services, 60 days after the close of the fiscal year, to furnish to those entities a list of the agencies that have not submitted the required report.

This bill would require state agencies to submit the report within 60 working days after the end of the previous fiscal year and would require the Department of General Services to furnish a list of the agencies that have not submitted the required report within 120 working days after the close of the fiscal year. This bill would additionally require the Department of General Services to annually submit to specified entities a report describing the information furnished pursuant to the provisions described above.

(2) Existing law requires the Director of Forestry and Fire Protection to report to the State Board of Forestry and Fire Protection and the Legislature by January 1 of each year regarding the enforcement of, and the penalties and fines collected pursuant to, various statutes.

This bill would require the report by January 15 of each year.

(3) Existing law provides for the establishment of state seashores within the state park system. Existing law requires the Department of Parks and Recreation to recommend to the Governor and the Legislature for inclusion in the annual Budget Bill land acquisitions for the establishment of additional state seashores or as additions to existing state seashores.

This bill would delete the latter requirement.

(4) Existing law grants the Department of Parks and Recreation exclusive jurisdiction with respect to property salvage and recovery operations in and upon lands of the state park system. Existing law requires the department to file an annual report with the Legislature, as prescribed, on any operations that have been undertaken during the previous year, the results of those operations, the permits that are pending and under consideration, and the extent of the public interest in those operations.

This bill would delete the latter requirement.

(5) Existing law authorizes the Department of Parks and Recreation to provide hostel facilities in state park system units, as specified, and to acquire land for, develop, and maintain recreational trails to and between units.

Existing law required the Department of Parks and Recreation to submit to the Legislature by February 1, 1975, a preliminary plan for the development of hostel facilities and the establishment of recreational trails. Existing law authorizes the Legislature to comment on the submitted plan by concurrent resolution.

This bill would delete the latter provisions.

(6) Existing law authorizes the Director of Parks and Recreation to contract for the construction for the preservation and restoration of the Leland Stanford Mansion State Historical Park and related facilities using a design-build process and requires the director to submit a related report to the Joint Legislative Budget Committee, as specified.

This bill would delete the latter requirement.

(7) Existing law requires the Department of Parks and Recreation to submit a plan to the Legislature by January 15, 1977, for the protection and management of the Mendocino Woodlands Outdoor Center.

This bill would delete that obsolete provision.

(8) Existing law requires that on and after July 1, 1994, the California Conservation Corps be designated a performance budget department, as specified. Existing law additionally contains a request by the Legislature that the Governor issue an Executive Order establishing performance goals for the corps, as specified.

This bill would delete those provisions.

(9) Existing law establishes the Collins-Dugan California Conservation Corps Reimbursement Account and authorizes the Department of Finance to loan money to the fund, as specified.

This bill would make a technical nonsubstantive change to those provisions.

(10) Existing law requires the California Conservation Corps to cooperate with, and seek the cooperation of the Private Industry Council of the local service delivery area, as specified, to secure employment and training services for corpsmembers. Existing law authorizes those employment and training services to include those provided under the federal Job Training Partnership Act.

This bill would instead require the California Conservation Corps to cooperate with, and seek the cooperation of, state and local workforce investment boards and youth councils designated pursuant to the federal Workforce Investment Act.

Ch. 954 (AB 2678) Aanestad. Public employees' retirement: death benefits.

The Public Employees' Retirement Law prescribes benefits that are payable to the surviving spouse of a member who, at the time of death, had attained the minimum age for voluntary service retirement. Those benefits are applicable to the employees of a contracting agency only after the contracting agency has amended its contract to be subject to those benefits.

This bill would authorize Butte County to amend its contract on or before February 1, 2003, to authorize the surviving spouse of a member to receive specified additional death benefits if the member was eligible to retire and was a public safety officer killed in the line of duty between July 26, 2001, and February 1, 2003.

Ch. 955 (AB 2683) Canciamilla. California Bay-Delta Authority Act.

Under existing law, certain state and federal agencies with management and regulatory responsibilities in the San Francisco Bay/Sacramento-San Joaquin Delta Estuary participate in the CALFED Bay-Delta Program for the purposes of improving ecosystem quality, water supply reliability, water quality, and the integrity of the levees and channels in the bay-delta.

SB 1653 of the 2001-02 Regular Session would enact the California Bay-Delta Authority Act and would establish the California Bay-Delta Authority in the Resources Agency.

This bill would revise provisions proposed to be added by SB 1653 relating to proposed budgets of implementing agencies, the powers and duties of the authority, and the staff of the authority. These provisions would become operative only if this bill and SB 1653 are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

Ch. 956 (AB 2704) Aroner. Flood damage reduction and urban creek restoration.

Existing law authorizes the Director of Water Resources to establish a program of flood control and urban creek restoration, consisting of the development of the capability by the Department of Water Resources to respond to requests from local agencies and organizations for planning and design assistance for low-cost and effective urban creek protection, restoration, and enhancement.

This bill would recast this provision to instead provide for a program of flood damage reduction and urban creek restoration to be known as the Urban Streams Restoration

Program that would consist of 2 components with the first component the same as existing law except the planning and design assistance would be for efficient and effective protection, restoration, and enhancement. The bill would provide that the second component of the program consist of, to the extent that funds are provided, a process for awarding competitive grants. The bill would revise the described activities to include adaptive management, as defined, necessary to meet flood damage reduction and flood plain acquisition, ecological, urban fisheries restoration, and recreation objectives.

The bill would require the department to maintain a balance in allocating the money annually available for grants to small urban creek restoration projects, as defined, and large urban stream restoration projects, as defined. The bill would also authorize the department to adopt regulations that define adaptive management, to establish criteria to fund projects, and to amend or utilize existing regulations for approving competitive grants. The department would be required to annually make available to the public, in a form that is readily accessible, information regarding the status of funds appropriated for these purposes and projects that received grants.

Ch. 957 (AB 2717) Hertzberg. Water: desalination: report. <sup>2</sup>

(1) The Cobey-Porter Saline Water Conversion Law authorizes the Department of Water Resources, either independently or in cooperation with public or private entities to conduct a program of investigation, study, and evaluation in the field of saline water conversion, to provide assistance to persons or entities seeking to construct desalination facilities, and after submission of a written report and upon appropriation from the Legislature, to finance, construct, and operate saline water conversion facilities.

This bill would require the department, not later than July 1, 2004, to report to the Legislature, on potential opportunities and impediments for using seawater and brackish water desalination, and to examine what role, if any, the state should play in furthering the use of desalination technology. The bill would require the department to convene a Water Desalination Task Force, comprised of representatives from listed agencies and interest groups, to advise the department in carrying out these duties and in making recommendations to the Legislature.

(2) Under existing law, the Bosco-Keene Renewable Resources Investment Fund is established for certain purposes.

This bill would appropriate \$600,000 from the Bosco-Keene Renewable Resources Investment Fund to the department for the purpose of establishing the Water Desalination Task Force and preparing the report required by the bill.

Ch. 958 (AB 2727) Keeley. State Coastal Conservancy: coastal zone land.

(1) Existing law establishes the State Coastal Conservancy with prescribed powers and responsibilities for implementing a program of agricultural land protection, area restoration, and resource enhancement within the coastal zone, as defined. The conservancy is authorized to acquire fee title, development rights, easements, and other interests in designated lands located in the coastal zone, subject to specified conditions.

Existing law authorizes the conservancy to enter into options to purchase land provided the cost of the option does not exceed \$100,000 and the Legislature makes funds available for the specified purpose. Those options include the option to purchase lands included in a coastal restoration project, coastal resource enhancement project, or urban waterfront project when necessary to reserve those lands during the preparation of the plan and acquisition proceedings.

This bill would revise and recast those provisions and provide that those options may not exceed \$600,000.

This bill would additionally authorize the conservancy to enter into an option to acquire interests in real property in connection with a public access project under the same conditions described above.

(2) Existing law authorizes the conservancy, as part of an approved coastal resource enhancement project, to fund up to 40% of any state agency land acquisition costs and up to 100% of any local agency land acquisition costs.

This bill would delete the above limitation and instead authorize the conservancy to fund all or part of the costs of land acquisition.

(3) Existing law provides that after the conservancy approves a local coastal restoration project or a local coastal enhancement project, the conservancy may provide up to \$100,000 of the cost of preparing the plans for the project.

This bill would instead authorize the conservancy to fund up to \$300,000 of the cost of preparing those plans.

(4) Existing law generally authorizes federal, state, and local public agencies or nonprofit organizations to acquire lands designated as significant coastal resource areas held by the conservancy for public purposes indicated in prescribed programs or plans that are consistent with the California Coastal Act of 1976. Existing law prohibits the conservancy from holding the lands described above for more than 10 years from the time of acquisition.

This bill would revise the acquisition procedures and authorize the conservancy to place permanent restrictions on the acquired land, limiting use to the acquisition purposes.

(5) This bill would authorize the conservancy to fund and undertake plans and feasibility studies for the purpose of implementing the provisions governing the conservancy.

(6) This bill would permit the conservancy to accept subscriptions and nonpolitical advertising for its publications and to accept proceeds related to each. The bill would require the proceeds to be deposited into the State Coastal Conservancy Fund.

(7) This bill would additionally make conforming changes to related definitions and provisions of law.

#### Ch. 959 (AB 2832) Shelley. Voter information: privacy.

Existing law requires that a state or local initiative petition contain, prior to the portion of the petition for voters' signatures, a specified statement in 12-point type that the petition may be circulated by a paid signature gatherer or a volunteer, and that the signer has a right to ask.

Existing law makes it a misdemeanor to knowingly and willfully permit the signatures on an initiative petition for any purpose other than qualification of the petition for the ballot, except as specified.

This bill would require that, immediately following the statement referred to above, an additional statement be printed in 12-point type, as specified, that the use of the signer's signature for any purpose other than qualification of this measure for the ballot is a misdemeanor, and that complaints about the misuse of the signer's signature may be made to the Secretary of State's office.

Existing law provides that a person may not be registered as a voter except by affidavit of registration. It requires that the form of the registration affidavit contain all the information required to register the affiant as an elector, and that it be included as part of a voter registration card. Existing law makes it a misdemeanor to use or permit the use of voter registration information for any purpose not permitted by law.

This bill would require that the form of the affidavit of registration also contain, at the top of the card, a statement that the use of voter registration information for commercial purposes is a misdemeanor, and any suspected misuse should be reported to the office of the Secretary of State, as specified, as well as a fraud hotline telephone number maintained by the Secretary of State at which the public may report suspected fraudulent activity concerning misuse of voter registration information.

This bill would further require that any online or downloadable voter registration form maintained on the Web site of the Secretary of State's office include a statement that the use of voter registration information for commercial purposes is a misdemeanor, and any suspected misuse should be reported to the office of the Secretary of State, as specified.

This bill would require the Secretary of State to appoint a task force of 7 members who have experience in campaigns, administration of elections, public interest organizations, law enforcement, and other relevant backgrounds to study and recommend to the Secretary of State appropriate standards for safeguarding voter file information in view of the different database formats and security procedures used by the various counties. It would require the task force to file its report with the Secretary of State and the Legislature no later than January 1, 2004.

This bill would require the Secretary of State to adopt uniform guidelines based upon the recommendations in the report filed by the task force not later than January 1, 2005.

This bill would require any person or committee who purchases data from a voter file and who uses any or all of that data to provide services to a candidate or another committee to include at the appropriate location in a contract for services a specified notice in bold type that state law prohibits the use of voter registration information for commercial purposes.

Existing law imposes various requirements concerning the circulation of initiative petitions, and prohibits, subject to misdemeanor penalties, the use of signatures on an initiative petition for a purpose other than qualification of the proposed measure for the ballot.

This bill would require the proponents of an initiative measure to ensure that any person, company, or other organization that is paid, or who volunteers, to solicit signatures to qualify the proposed measure for the ballot receive instruction on the requirements and prohibitions imposed by state law with respect to circulation of the petition and signature gathering thereon, with an emphasis on the prohibition on the use of signatures on an initiative petition for a purpose other than qualification of the proposed measure for the ballot.

This bill would require each proponent of an initiative measure to execute and submit, along with the request for a title and summary for the proposed measure, a signed statement, as specified, acknowledging that it is a misdemeanor under state law to knowingly or willfully allow the signatures on an initiative petition to be used for any purpose other than qualification of the proposed measure for the ballot, and certifying that he or she will not knowingly or willfully allow the signatures for the initiative to be used for any purpose other than qualification of the measure for the ballot.

This bill would require the person, company official, or other organizational officer who is in charge of signature gathering, prior to allowing any person to circulate an initiative petition for signatures, to execute and file a similar statement with the proponents. It would also require each circulator, prior to soliciting signatures on an initiative petition, to execute and submit to the person, company official, or other organizational officer who is in charge of signature gathering, a similar statement.

This bill, by requiring the proponents' certified statement required by this bill to be kept on file by the agency authorized to prepare the title and summary for the proposed initiative measure, would impose a state-mandated local program.

The provisions of this bill would remain in effect only until January 1, 2005.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 960 (AB 2851) Cogdill. Community facilities districts.

(1) Existing law, the Mello-Roos Community Facilities Act of 1982, authorizes the formation of community facilities districts and the issuance of bonds and levying of special taxes to finance designated public and utility facilities and services.

This bill would require any community facilities district formed after January 1, 1992, to prepare an annual report, if requested by a person who resides in or owns property in the district, containing specified financial information and to make it available to the public upon request. The bill would authorize the district to charge a fee for the report to cover the costs of the report. By imposing additional duties on districts created on or after January 1, 1992, the bill would constitute a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 961 (AB 2867) Kehoe. Joint powers agency: San Diego.

Under existing law, if authorized by their governing bodies, 2 or more public agencies may enter into a joint powers agreement to exercise jointly any power common to the contracting agencies.

This bill would authorize the Redevelopment Agency of the City of San Diego, the Housing Authority of the City of San Diego, the San Diego Housing Commission, the San Diego Unified School District, and the City of San Diego to enter into a joint powers agreement to create and operate a joint powers agency known as the San Diego Model School Development Agency, with all of the powers of a redevelopment agency, housing authority, the city, the school district, and a joint powers agency, to acquire property, and to construct, improve, and finance one or more schools, housing projects, parks, recreational facilities, and any other facilities reasonably necessary for their proper operation.

Ch. 962 (AB 2888) Strom-Martin. Fishing.

(1) Existing law, until January 1, 2007, establishes the Commercial Salmon Trollers Advisory Committee to recommend programs and a budget from the Commercial Salmon Stamp Account to the Department of Fish and Game.

This bill would authorize the committee to recommend to the Director of Fish and Game that a nonprofit organization or the California Salmon Council be authorized to create or contract to create salmon or salmon fishing artwork and other materials based on that artwork, including a stamp, and offer those items for sale to the public during 2003 and thereafter, for the purpose of augmenting funding for the Commercial Salmon Trollers Enhancement and Restoration Program established under existing law.

The bill would prohibit the committee from recommending a nonprofit organization or the California Salmon Council, as specified, unless all of certain conditions are met.

The bill would authorize the director, upon receiving the recommendation of the committee, and upon finding that there will be no new costs to the department, to authorize the recommended entity to create or contract to create salmon or salmon fishing artwork and other materials based on that artwork, including a stamp, and offer those items for sale to the public, for the specified purposes.

The bill would prohibit any person or entity, including any nonprofit organization, from using the name of the Commercial Salmon Stamp, the Commercial Salmon Trollers Advisory Committee, or the Commercial Salmon Trollers Enhancement and Restoration Program for the sale of artwork and other materials, unless that person or entity has been approved by the director under these provisions for that purpose. Because a violation of this prohibition would be a misdemeanor under other provisions of existing law, the bill would establish a state-mandated local program by creating a new crime.

The approval of the director under these provisions would be for one year, after which the approval could be renewed for an additional year, upon recommendation of the committee.

The bill would require that proceeds from the sales of artwork and other materials sold under these provisions, after deduction of all reasonable costs borne by the nonprofit organization or the California Salmon Council for creation of the artwork and conducting

the sales, be deposited in the Commercial Salmon Stamp Account, a continuously appropriated account in the Fish and Game Preservation Fund. By requiring a new source of revenue to be deposited in a continuously appropriated fund, the bill would make an appropriation.

(2) Existing law requires each commercial fisherman or his or her designee, who transports, causes to be transported, or delivers to another person for transportation, any fish, except herring, taken from the waters of this state or brought into this state in fresh condition, to fill out a transportation receipt according to the instructions and on forms provided by the department at the time the fish are brought ashore.

This bill would authorize any fisherman's retail licensee who is selling his or her fish to a licensed receiver to use a transportation receipt to transport those fish to the licensed receiver, who would be required to complete a landing receipt for those fish. The bill would prescribe the information required to be included in the transportation receipt. Because a violation of these provisions would be a misdemeanor under other provisions of existing law, the bill would establish a state-mandated local program by expanding the scope of an existing crime.

(3) Existing law requires the names used in certain landing receipts for designating the species of fish dealt with to be those in common usage, unless otherwise designated by the department.

This bill would make that requirement applicable also to the names used in transportation receipts, and would modify various other requirements relating to transportation receipts. Because a violation of these provisions would be a misdemeanor under other provisions of existing law, the bill would establish a state-mandated local program by expanding the scope of an existing crime.

(4) Existing law requires that a drift gill net shark and swordfish permit be issued to any prior permittee who possesses a valid drift gill net shark and swordfish permit issued under existing law, but only if the permittee meets certain requirements, including that during one of the 2 immediately preceding permit years, the permittee either have landed at least 2,500 pounds of swordfish or 1,000 pounds of shark or have landed shark or swordfish for which the permittee was paid at least \$1,000.

This bill, instead of the specified condition, would provide that any person holding a valid drift gill net shark and swordfish permit on or after January 1, 2000, who did not make, on or after January 1, 2000, the minimum landings specified above, is eligible for the specified permit when that person meets all other qualifications for the permit.

(5) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the department and the commission to carry out the Fish and Game Code.

By imposing new duties on the department and the commission, the bill would make an appropriation.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 963 (AB 2936) Aroner. Local government: fees.

Existing law requires fees charged by a local agency for specified purposes to not exceed the estimated reasonable cost of providing the service for which the fee is charged, unless a question regarding the amount of the fee charged in excess of this cost is submitted to, and approved by,  $\frac{2}{3}$  of the electors.

This bill would authorize these fees to include costs reasonably necessary to prepare and revise the plans and policies that a local agency is required to adopt before it can make any necessary findings and determinations.

Ch. 964 (AB 2969) Florez. Corporations.

Existing law provides exemptions from state usury provisions for loans that meet certain requirements, with specified financial statements as necessary evidence. The financial statements are required to meet specified requirements, including being prepared (1) in accordance with generally accepted accounting principles and, if the entity has consolidated subsidiaries, on a consolidated basis, and (2) in accordance with the rules and requirements of the Securities Exchange Commission.

This bill would instead require the financial statements to meet one of the above requirements, rather than both of those requirements.

Existing law prohibits a person from offering or selling securities in certain manners unless the security is qualified for sale or unless the security or transaction is exempted or not subject to qualification.

This bill would make nonsubstantive changes to these provisions.

Ch. 965 (AB 3025) Committee on Transportation. Public works: environmental enhancement projects.

(1) Existing law declares the Legislature's intent to allocate \$10,000,000 annually to the Environmental Enhancement and Mitigation Program Fund to be used for making grants to local, state, and federal agencies or to nonprofit entities to undertake environmental and mitigation projects relating to transportation facilities. Existing law requires the Department of Transportation to extend the completion date for specified mitigation projects to June 30, 2002.

This bill would require the department to extend the completion date for the Ueda Parkway Off-Road Recreation and Environmental Enhancement Project and the Eastern Sierra Interagency Visitor Center Environmental Enhancement and Mitigation Project to June 30, 2007. The bill would require the department to extend the completion date for the Cambria Community Services District and Dry Creek Parkway projects to June 30, 2004.

(2) The State Contract Act authorizes the Department of General Services to make partial payments for the mobilization costs of a contract subject to the act, not to exceed specified percentages of the original contract amount.

This bill would revise the partial payment amounts and limits with respect to projects over water requiring marine access, and which have a contract amount greater than \$25,000,000.

(3) Existing law provides for creation of a system of California historic parkways that are part of the state highway system.

This bill would designate a portion of State Highway Route 163 in San Diego County as a California historic parkway.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 966 (AB 3042) Wayne. Natural resources: California Tahoe Conservancy: Parks Project Revolving Fund: expenditures.

(1) Existing law establishes the California Tahoe Conservancy as a state agency within the Resources Agency and authorizes the conservancy to select and acquire real property or interests therein in the name of and on behalf of the state for the purposes of protecting the natural environment, providing public access or public recreational facilities, preserving wildlife habitat areas, or providing access to or management of acquired lands. The conservancy is authorized to award grants to local public agencies, state agencies, federal agencies, and nonprofit organizations for these purposes.

This bill would additionally authorize the conservancy to award grants to federally recognized Indian tribes and the Tahoe transportation district, as specified.

(2) Existing law vests with the Department of Parks and Recreation control of the state park system, and provides funds for the support and administration of the department, and specified park construction development, repair, and improvement projects.

This bill would establish the Parks Project Revolving Fund in the State Treasury, and would require, upon the approval of the Department of Finance, except as provided, the transfer to, or deposit in, the fund of all money appropriated, contributed, or made available from any source, including sources other than state appropriations, for expenditure on work within the powers and duties of the department with respect to the construction, alteration, repair, and improvement of state park facilities, as specified.

The bill would make money transferred from state sources for major construction available without regard to fiscal years and irrespective of specified limitations for encumbrance, thereby, making an appropriation.

These provisions would become inoperative on a date that is 3 years after the date that Section 5018.1 of the Public Resources Code is repealed, and would be repealed on the following January 1.

Ch. 967 (SB 238) Kuehl. County of Los Angeles: parks.

Existing law grants the property known as Schabarum Regional Park to the County of Los Angeles for use as a public park and recreation area, provided park improvements conform to specified requirements.

This bill would authorize the County of Los Angeles to construct and operate a public library in that park.

Ch. 968 (SB 1093) Costa. Recreational water use: Sly Park Recreational Area.

Existing law, with certain exceptions, prohibits bodily contact with water in a reservoir in which water is stored for domestic use.

This bill would exempt from this prohibition recreational activity in which there is bodily contact with water by any participant in Sly Park Reservoir provided that specified conditions are satisfied.

The bill would require the El Dorado Irrigation District to file a report concerning implementation of the provisions of the bill, with the State Department of Health Services by January 1, 2005, this constituting a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 969 (SB 1384) Costa. Governance.

(1) Existing law prescribes the apportionment for the net operating expenses of a local agency formation commission among the county and the cities and special districts within the county.

This bill would revise the method of calculating independent special district revenues in order to determine independent special districts' apportionments of the net operating expenses of a commission, and would provide that no independent special district shall be apportioned a share of more than 50% of the total independent special districts' share of the commission's operational costs without the consent of the district. The bill would provide, with respect to a district formed under the Local Health Care District Law that operates a hospital, that the district may not be apportioned any share until the fiscal year following positive net revenue, as defined, or, if the district has filed for and is operating under federal bankruptcy, until the fiscal year after its discharge from bankruptcy.

(2) The Urban Water Management Planning Act requires urban water suppliers to prepare and adopt urban water management plans for submission to the Department of Water Resources. The act requires those plans to include specified information, including demand factors affecting the supplier's water management planning, existing and planned sources of water available to the supplier in 5-year increments to 20 years or as far as data is available,

a description of the reliability of the water supply and vulnerability to seasonal or climatic shortage, and an urban water shortage contingency analysis.

This bill would require urban water suppliers that rely upon a wholesale agency for a source of water, to provide the wholesale agency with water use projections from that agency for that source of water in 5-year increments to 20 years or as far as data is available. The wholesale agency would be required to provide information to the urban water supplier for inclusion in the urban water supplier's plan that identifies and quantifies, to the extent practicable, existing and planned sources of water available from the wholesale agency to the urban water supplier over the same 5-year increments, and during various water-year types.

(3) The California Safe Drinking Water Bond Law of 1988 permits bond proceeds in the California Safe Drinking Water Fund to be used for a grant program to public agency supplies, subject to specific approval of the Legislature.

This bill would make an appropriation by authorizing the Department of Water Resources to make grants from the fund to 5 specified school districts in specified amounts for the purposes of financing domestic water system improvement projects to meet state and federal drinking water standards.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 970 (SB 1415) Perata. San Francisco Bay Area Rapid Transit District.

Existing law authorizes the San Francisco Bay Area Rapid Transit District to acquire, construct, own, operate, control, or use rights-of-way, rail lines, bus lines, stations, platforms, switches, yards, terminals, parking lots, and any and all other facilities necessary or convenient for rapid transit service within or partly without the district, as specified. The existing California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect. The act exempts from the requirement specified discretionary projects, including specific actions necessary to prevent or mitigate an emergency.

The bill would include in those exempt actions, until June 30, 2005, the San Francisco Bay Area Rapid Transit District's seismic retrofit work on any existing structures or facilities, as specified, necessary for rapid transit service if the district conducts 3 workshops and other outreach efforts to ensure public awareness of the proposed seismic retrofit work prior to commencement of construction.

#### Ch. 971 (SB 1468) Knight. General plans: military facilities.

(1) The Planning and Zoning Law requires that a city or county general plan consist of various elements, including, among other things, land use, circulation, housing, open space, and conservation elements, which are required to meet specified requirements.

This bill would require the land use element to consider the impact of new growth on military readiness activities carried out on military bases, installations, and operating and training areas, when proposing zoning ordinances or designating land uses covered by the general plan for land or other territory adjacent to those military facilities, or underlying designated military aviation routes and airspace. The bill would, with respect to the open-space element, define open-space land to include areas adjacent to military installations, military training routes, and restricted airspace.

The bill would also require the circulation element to consist of the general location and extent of existing and proposed military airports and ports. The bill would also provide that a city or county is not required to comply with these provisions until a specified agreement is entered into between the federal government and the state to fully reimburse all claims approved by the Commission on State Mandates and paid by the Controller that cities and counties would be eligible to file as a result of the enactment of this bill and until the city's

or county's next general plan revision. It would make these provisions inoperative on the January 1 following the date that this agreement is terminated.

By increasing the duties of local agency officials, the bill would impose a state-mandated local program.

(2) Existing law establishes the Governor's Office of Planning and Research as the comprehensive state planning agency, responsible for long-range planning with responsibilities to, among other things, provide planning assistance to city and county planning agencies. The office is required to develop and adopt guidelines for the preparation and content of the mandatory elements required in city and county general plans.

This bill would require the office, on or before January 1, 2004, if sufficient federal funds become available, to prepare and publish an advisory planning handbook for local officials, planners, and builders, and to develop and adopt guidelines that, among other things, explain how to reduce land use conflicts between the effects of civilian development and military readiness activities carried out on specified military installations and areas.

(3) Existing law requires the California Public Utilities Commission to formulate a comprehensive land use plan that provides, among other things, for the orderly growth of public airports and the area surrounding the airport that is within the jurisdiction of the commission. The plan may include the area within the jurisdiction of the commission surrounding any federal military airport.

This bill instead would require that the area within the jurisdiction of the commission surrounding any military airport be included in the plan, and would require that the plan be consistent with the safety and noise standards in the Air Installation Compatible Use Zone prepared for that military airport. The bill would also require that a county's general plan and any applicable specific plan be consistent with these safety and noise standards in each county where an airport land use commission does not exist, but where there is a military airport.

(4) This bill also would incorporate additional changes in Section 65040.2 of the Government Code proposed by AB 2175, to be operative if AB 2175 and this bill are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

This bill also would incorporate additional changes in Section 65560 of the Government Code proposed by AB 3057, to be operative if AB 3057 and this bill are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 972 (SB 1480) Speier. Outdoor advertising.

The Outdoor Advertising Act regulates the placement of advertising displays adjacent to and within specified distances of highways that are part of the national system of interstate and defense highways and federal-aid highways. The act defines relevant terms.

This bill would revise certain definitions of the act.

Existing law provides that the annual permit fee for each advertising sign or structure is \$20.

This bill would instead require the Director of Transportation of the State of California to set the annual permit fee and would prohibit the fee from exceeding the department's reasonable costs, including indirect costs, for providing services and enforcing regulations for which the fee is charged. The bill would prohibit the fee from exceeding \$100, as adjusted.

Existing law provides that the permit fee for each advertising sign or structure that an applicant has placed or maintained without a valid, unrevoked, and unexpired permit is \$95.

This bill would instead authorize penalties in the amount of \$100 for an advertising display placed or maintained without a valid permit in a location that conforms to applicable provisions, and in the amount of \$10,000 plus \$100 per each day a display is placed or maintained after receiving notice if the advertising display is placed or maintained in a location that does not conform to applicable provisions and is not removed within 30 days of written notice from the department or the city or county with land use jurisdiction over the property on which the display is located.

Existing law requires that an applicant for a permit offer evidence that the owner or other person in control or possession of the property upon which the location is situated has consented to the placing of the advertising display.

This bill would require evidence of consent to be in writing and would also require an applicant to offer written evidence that the city or county with land use jurisdiction over the property has consented to the placing of the advertising display.

This bill would require the department, at the request of the city or county with land use jurisdiction over the property, to reserve a location for an applicant for a limited time in advance of receiving evidence of written consent. The bill would also authorize a city or county with land use jurisdiction over the property to adopt an ordinance that establishes standards for the spacing and sizes of advertising displays that are more restrictive than those imposed by the state.

A violation of the Outdoor Advertising Act is a misdemeanor. Because this bill would change the scope of a crime by changing the definition of a landscaped freeway, it would change the definition of a crime and would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 973 (SB 1540) Alpert. Sea urchins.

Existing law provides for various commissions to promote the marketing and production of agricultural or seafood commodities.

This bill would create the California Sea Urchin Commission in state government, with a prescribed membership detailed in the bill, and would specify the powers, duties, and responsibilities of the commission in carrying out the bill. The commission would be authorized to approve payment of a stipend to commission members, as specified, and to consult with the Director of Fish and Game regarding the administration and enforcement of the bill's provisions. The commission would also be authorized to carry out programs of education, public information, promotion, marketing, and research relating to sea urchins. The bill would authorize the commission to levy an assessment, as specified, on sea urchin divers and handlers, and would authorize the expenditure of those funds for purposes of carrying out the bill. The bill would require the Secretary of Food and Agriculture to review the annual budget and expenditures of the commission to ensure that only reasonable and necessary administrative costs are paid for the proper operation of the commission's activities. The bill, except as necessary to conduct an election, would not become operative until the divers or handlers of sea urchins, by referendum, vote in favor of the bill, as prescribed. The bill would also provide for the suspension of the operation of its provisions and for concluding the operations of the commission. The bill would make rendering or furnishing false reports, secreting, destroying, or altering records, failing to furnish a report, or failing or refusing to furnish to the commission information concerning the name and address of persons from whom sea urchins are received or to whom they are provided, a misdemeanor. This bill would make other conforming changes.

By authorizing the creation of new crimes if the commission is formed, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 974 (SB 1607) Committee on Governmental Organization. State property.

Existing law requires the Department of General Services to perform various functions and duties with respect to state property. The proceeds of certain sales made or rents received that are deposited in the General Fund under specified provisions of law are available for appropriation to the department for the care, maintenance, and improvement of certain real property that is under the jurisdiction of, or being administered by, the department, or for specified associated payments.

Existing law requires all proceeds from the lease of armories to be deposited in the Armory Fund, to be available, upon appropriation by the Legislature, for the maintenance, acquisition, or construction of armories.

This bill would authorize the Director of General Services to exchange, lease, or transfer specified parcels of state property, including specified armory property. This bill would require the net proceeds of any armory property to be deposited into the Armory Fund, the net proceeds from a specified lease to the City of Los Angeles to be deposited in the State Highway Account in the State Transportation Fund, and the net proceeds from the disposition of any other parcels to be deposited into the General Fund, to be available for appropriation to the department in accordance with the provisions governing appropriations concerning property under its jurisdiction or administration. It would also require the reservation of mineral rights, as specified.

This bill would also rescind the authority of the director to sell, lease, exchange, or transfer other specified parcels of state property.

Ch. 975 (SB 1622) Murray. Parks and recreation: California Youth Soccer and Recreation Development Program: urban parks: Ballona Creek.

(1) Existing law establishes the California Youth Soccer and Recreation Development Program in the Department of Parks and Recreation to provide assistance to local agencies and community-based organizations with regard to funding, and fostering the development of, new youth soccer, baseball, and basketball recreation opportunities in the state. Existing law requires the department to report to the Assembly Committee on Budget and the Senate Committee on Budget and Fiscal Review on the need for soccer and baseball fields and basketball courts in the state and related facilities, and to coordinate with local agencies and community-based organizations to identify those areas in the state where there is a shortage of appropriate recreational facilities, as provided.

This bill would expand the purposes of the program to include funding and fostering softball recreation opportunities in the state, would require the department to report to those legislative committees after awarding those grants, and would eliminate the requirement that the department coordinate with local agencies and community-based organizations. The bill would require that administrative expenses be paid from funds authorized for the program, and would specify that the program would be implemented only upon appropriation of sufficient funds for this purpose.

(2) The State Urban Parks and Healthy Communities Act authorizes the department to expend moneys in the State Urban Parks and Healthy Communities Fund, upon appropriation by the Legislature, to provide grants to state agencies, local governments, and community organizations to provide environmental education and park opportunities for school-age children. The act requires the Director of Parks and Recreation, in consultation

with the State Department of Education, to develop guidelines for curriculum for outdoor education using state conservancy properties in existence on January 1, 2002.

This bill, instead, would require the director, in consultation with State Department of Education, to develop a competitive grant program to assist state parks, state conservancies in existence as of January 1, 2003, and urbanized and heavily urbanized local agencies and community-based organizations within those jurisdictions working in collaboration, to provide outdoor educational opportunities to children.

(3) The State Urban Parks and Healthy Communities Act requires the department to give special consideration to projects that wholly or partly replace an area of blight or that contribute significantly to the economic revitalization to the immediate community. The act requires that a Member of the Legislature first nominate a program or project in order for that program or project to qualify as an eligible program or project under the act.

This bill would delete those provisions. The bill would make various other changes affecting the administration of the programs and projects funded under the act, as provided.

The bill would require that all funds appropriated to the department pursuant to the act be encumbered within 3 years of the date of the appropriation, and expended within 8 years of the date of the appropriation. The bill would provide that any grants to state or local agencies, nonprofit organizations, or community groups, on or after January 1, 2003, pursuant to the act be contingent upon a future appropriation in the annual Budget Act.

(4) Existing law establishes the Baldwin Hills Conservancy, prescribes the functions and duties of the conservancy, and establishes the governing board of the conservancy. The board is required to perform a study relating to Ballona Creek, develop a proposed map for that area, and provide a report to the Legislature on those activities by January 1, 2003.

This bill would change the date the report is required to be provided to the Legislature to January 1, 2004.

#### Ch. 976 (SB 1759) Johannessen. Public works: local agencies.

Existing law requires public entities to comply with certain procedures in soliciting and evaluating bids and awarding contracts for the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement. Existing law authorizes specified state agencies, cities, and counties to implement alternative procedures for the awarding of contracts on a design-build basis.

This bill would authorize, until January 1, 2006, certain cities to enter into design-build contracts with a cost of at least \$5,000,000, according to specified bidding and contracting procedures.

The bill would require each contract to contain a provision prohibiting alteration of the performance criteria and design standards of any project without the prior written approval of the plans by the city.

The bill would also require the Legislative Analyst to report to the Legislature on the use of design-build contracting.

The bill would make a finding that a special law is necessary and that a general law cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution because of the unique circumstances of these cities.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 977 (SB 1858) Knight. Veterans affairs: administration.

Under existing law, the California Veterans Board consists of 7 members, all of whom are veterans. The Inspector General for Veterans Affairs provides ongoing and independent advice to the board. The Chief Administrative Officer of the Department of Veterans Affairs is the Secretary of Veterans Affairs.

This bill would require one member of the board to have an accounting or auditing background, as specified. The bill would also allow the inspector general and the board access to the documents and employees of the department. The bill would require the

secretary to conduct audits, as specified by statute, on internal controls, and to provide those audits to the inspector general.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 978 (SB 1896) Peace. San Diego County Regional Airport Authority.

(1) Existing law establishes the San Diego County Regional Airport Authority as a local entity of regional government with jurisdiction throughout the County of San Diego, and requires that the authority adopt a comprehensive airport land use plan for that county and coordinate the airport planning of public agencies. Existing law requires the authority to study and plan any improvements, expansions, or enhancements for the regional airport system in San Diego County. Existing law provides for a permanent authority board consisting of 9 members appointed by specific appointing authorities with 3 members of that board serving as an executive committee. Existing law provides a structure of the authority, requires the San Diego Unified Port District (port) to transfer the San Diego International Airport to the authority on December 2, 2002, assigns various powers and duties to the authority regarding the establishment and operation of airports within the county, including the requirement that the authority assume trusteeship of airport lands and exercise the power to issue bonds with interest thereon being tax free. Existing law provides for a transition plan and provides for an interim executive director until January 6, 2003. Existing law authorizes the authority to issue revenue bonds in accordance with existing statutes.

This bill would substantially revise the duties of the authority including, but not limited to, requiring the authority to implement, as well as study and plan, any improvements, expansions, or enhancements at existing and future airports under its jurisdiction. This bill would revise the appointing authorities to the board and would provide that the executive committee is responsible for overseeing the implementation of the administrative policy of the authority but would prohibit the executive committee from being included in the direct operation of the airport or in the chain of command for emergency purposes. The bill would require the appointment of the initial executive committee members on or before December 5, 2002, to be seated by December 16, 2002, and would establish the base salary of committee members to be commensurate with that of superior court judges in the County of San Diego. The bill would extend the term of office of the interim executive director until January 6, 2004, or until the time that a permanent executive director is appointed, whichever occurs first. The bill would also require the authority to adopt a comprehensive plan on the future of San Diego's regional international airport and the authority would be required to submit the particular airport site recommendation in the form of a local ballot proposition to the San Diego County Registrar of Voters for placement on either the November 2, 2004, or the November 7, 2006, countywide election ballot.

The bill would recast the provisions governing the transfer of real and personal property by the port to the authority including specifically described real properties that are not to be transferred and specifically described real properties that are to be transferred.

The bill would require the port, rather than the authority, to retain trusteeship of the lands underlying the airport, consistent with the State Lands Commission's requirement and would require the port to execute a described 66-year lease with the authority. The bill would require the transfer of the San Diego International Airport to be completed on or after December 16, 2002, rather than on December 2, 2002, subject to specific terms of transfer including, among other things, the services of port employees, including the Harbor Police. The bill would provide for the lead agency status with regard to the California Environmental Quality Act during the transfer period and would provide for the transfer from the port to the authority of a noise variance issued by the Department of Transportation.

The bill would require the port to fund the authority from airport operation revenues for not less than \$1,000,000 each year until that time that the transfer of the airport and assorted revenue sources have been completed.

The bill would recast the provisions governing the issuance of revenue bonds by the authority, including refunding bonds.

The bill would delete the tax-exempt interest provisions and would prohibit any other agency from applying for grants for funding airport facilities in San Diego County unless the application is first approved by the authority.

The bill would prohibit an employee of the port from suffering loss of employment or reduction in wages or benefits as a result of the enactment of the San Diego County Regional Airport Authority Act. The bill would permit employees of the authority to be eligible for retirement benefits under the California Public Employees' Retirement System, and, where permitted by the law governing that system, to receive full reciprocity with public employees' retirement systems in which they previously participated.

The bill would make technical, conforming changes.

To the extent that additional duties would be placed upon the authority, the port district, and other entities of local government, the bill would impose a state-mandated local program.

The bill would provide that its provisions are severable.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 979 (SB 1918) Torlakson. Vehicles: electric personal assistive mobility devices.

(1) Existing law regulates the use and operation of vehicles, including 2-wheeled, electric propelled devices such as scooters. Under existing law, among other requirements, a motorized scooter is required to be equipped with a specified type of braking system and, if operated on a highway in darkness, with specified lamps for visibility.

This bill would establish regulations regarding the use of electric personal assistive mobility devices. The term "electric personal assistive mobility device" or "EPAMD" would be defined as a self-balancing, nontandem, 2-wheeled device, that can turn in place, designed to transport only one person at a maximum speed of less than 12.5 miles per hour, as specified. This bill would also specify that "pedestrian" includes a user of an electric personal assistive mobility device. An electric personal assistive mobility device would be required, among other things, to be equipped with front, rear, and side reflectors, a system that enables the driver to bring the device to a controlled stop, lamps for nighttime visibility, and a sound emitting device. This bill would also provide that local authorities may adopt ordinances with respect to the time, place, and manner of operation of electric personal assistive mobility devices, as specified, and that state agencies may limit or prohibit the time, place, and manner of their use on state property. The bill also makes findings regarding the advantages of electric personal assistive mobility devices in promoting productivity, minimizing environmental impacts, and facilitating better use of public ways. The bill would provide that its provisions shall not become operative until March 1, 2003, and shall remain in effect only until January 1, 2008, and as of that date are repealed. Because a violation of these provisions would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 980 (SB 1937) Costa. Digital Arts Studio Partnership Demonstration Program Act.

Existing law sets forth the duties of the Arts Council in promoting the arts in the state.

This bill would enact the Digital Arts Studio Partnership Demonstration Program Act, to require the council to administer the Digital Arts Studio Partnership Demonstration Program, by designating 3 voluntary pilot digital arts studio partnerships in the state, for the purpose of providing digital media arts training to youths aged 13 to 18 years, inclusive. It would require the council to convene a meeting of specified entities to review and make recommendations on a model curriculum and state standards for digital media arts recommended by consortia associated with each partnership.

This bill would require the council to administer federal, local, or private moneys received by the Digital Arts Studio Partnership Demonstration Program Fund, which would be established by the bill. Private moneys received by the fund would be continuously appropriated to the council. The council would be required to submit specified reports on the program to the Legislature.

This bill would specify that its provisions shall only be implemented to the extent that private, federal, or local funds are available for those purposes, and would repeal these provisions as of January 1, 2006.

Ch. 981 (SB 1961) Polanco. Local government assessments.

Existing law, as set forth in Article XIII C of the California Constitution, requires voter approval, as specified, of any general or special tax that a local government proposes to impose, extend, or increase.

Existing law also prescribes specific procedures for notice, protest, and hearings for the levying of new or increased assessments by local government agencies on real property, including state property, that receives a special benefit pursuant to Article XIII D of the California Constitution. These statutory procedures supersede other statutory provisions applicable to the levying of these assessments and are subject to the approval process set forth in Section 4 of Article XIII D of the California Constitution.

This bill would require the Department of General Services to develop compliance standards in the State Administrative Manual (SAM) to inform owners of state property of their duties and responsibilities pursuant to these provisions.

Ch. 982 (SB 556) Costa. Agriculture: cooperative agreements.

Existing law allows the Secretary of Food and Agriculture to enter into cooperative agreements with individuals and public and private entities for specified purposes.

This bill would allow the secretary to enter into cooperative agreements with private and specified state and federal entities for the purpose of administering conservation, environmental enhancement, disaster assistance, compensation, indemnification, economic assistance, education, market promotion, research, and similar programs that promote and enhance agriculture. The bill would provide that grant awards shall be made by the Department of Food and Agriculture, as specified, and that the procedures, forms, and guidelines for grant programs are exempt from procedural requirements applied to the adoption of rules and regulations.

Existing law requires the State Board of Food and Agriculture to advise the Governor and the secretary as to how the agricultural industry and the consumer of agricultural products can best be served by the Department of Food and Agriculture.

This bill would require the board to make recommendations to the secretary regarding cooperative agreements involving the marketing of agricultural commodities in foreign countries.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 983 (AB 52) Wiggins. Agricultural land preservation: appropriation.<sup>3</sup>

(1) Existing law provides for the protection of public grazing lands.

This bill would establish the California Environmental Quality Improvement Revolving Loan Program within the Department of Conservation to provide loans to farmers to carry out practices approved for cost-share payments under the federal Environmental Quality Incentive Program. The bill would prescribe categories of loans that would be available under the program, and procedures for making those loans. This program would be repealed January 1, 2008.

This bill would also establish the Agricultural Protection Planning Grant Program within the department, to provide planning grants to improve the protection of agricultural lands and grazing lands, including oak woodlands and grasslands. The program would authorize a local government entity, nonprofit organization, authority, or joint powers authority to apply for a grant under the program, to be used for the protection of agricultural lands and grazing lands, including oak woodlands and grasslands, and would prescribe requirements and procedures for applying for such a grant.

This bill also would establish the Coastal Farmland Preservation Program, which would require the State Coastal Conservancy and the department to enter into a memorandum of understanding to ensure that the program is a coordinated effort and meets the goals of coastal farmland preservation and the California Farmland Conservancy Program Act. The bill would require that funds appropriated for purposes of the program be expended in accordance with specified requirements.

The bill would require the State Coastal Conservancy, the Wildlife Conservation Board, and the department, at the earliest possible time, to jointly prepare a single document describing programs within these entities that protect agricultural lands and grazing lands, including oak woodlands and grasslands, as specified.

(2) SB 984 of the 2001–02 Regular Session would establish the Rangeland, Grazing Land, and Grassland Protection Program and would appropriate funds from the California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Act of 2002 (Proposition 40) to protect those lands through the acquisition of conservation easements. Other provisions of the bill would specify that the expenditure of any bond funds for the purpose of that program may only be expended to cover the costs of construction or acquisition of capital assets.

This bill would repeal the latter limitation.

(3) The California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Act of 2002 (Proposition 40) authorizes the expenditure of \$75,000,000 of the proceeds from bonds issued and sold pursuant to the act for grants for the preservation of agricultural lands and grazing lands, including oak woodlands and grasslands.

This bill would appropriate \$9,600,000 of those proceeds from the bond act for the California Environmental Quality Improvement Revolving Loan Program and the Coastal Farmland Preservation Program established pursuant to the bill, and the Oak Woodlands Conservation Act, in accordance with a specified schedule.

Ch. 984 (SB 984) Costa. Rangeland, Grazing Land, and Grassland Protection Act.

Existing law provides for grazing rights on public land.

This bill would enact the Rangeland, Grazing Land, and Grassland Protection Act, which would establish a program to protect California's rangeland, grazing land, and grasslands through the use of conservation easements for specified purposes relating to the conservation and protection of rangeland, grazing land, and grassland in the state. The program would

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

provide for grants for the acquisition of conservation easements to protect, restore, or enhance rangeland, grazing land, or grassland, or to sustain the character of specified property, and would establish criteria and procedures for the award of those grants.

The bill would authorize the Wildlife Conservation Board to adopt guidelines to implement the program, including procedures and a schedule for submittal of applications for grants, and requirements that ensure that the conservation easements are monitored not less than every 2 years. The bill would permit the board to coordinate the program with the Oak Woodlands Conservation Act.

The bill would appropriate \$19,200,000 from funds made available pursuant to the California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Bond Act of 2002 (Proposition 40) to the board for the purpose of the bill. The bill would prohibit the board from expending more than 5% of the funds derived from the proceeds of bonds and appropriated by the bill for associated programmatic costs.

Ch. 985 (AB 858) Wiggins. Salmon and steelhead: effect of reduced waterflow.

The existing Salmon, Steelhead Trout, and Anadromous Fisheries Program Act requires the Department of Fish and Game, with the advice of the Committee on Salmon and Steelhead Trout and the Commercial Salmon Trollers Advisory Committee, to prepare and maintain a detailed and comprehensive program for the protection and increase of salmon, steelhead trout, and anadromous fisheries.

This bill would require the department, subject to the availability of funds, to contract with the University of California to conduct a study of the effects that reduced waterflows at the mouths and upstream estuaries of certain rivers selected by the department would have on existing salmon and steelhead populations and on existing or prospective salmon and steelhead population restoration or reintroduction programs.

The bill would require the department to limit its selection to rivers that are within the combined river systems that drain to the ocean from and including the Russian River System northward to the California-Oregon border and that are the subject of an application that has been filed with the State Water Resources Control Board to appropriate water in an amount that equals more than 3 cubic feet per second or more than 500 acre feet per annum of storage.

The bill would require the findings of the study to be a factor in any decision of the board to approve or deny an application to appropriate water from any river selected for the study. The bill would prohibit the board from approving that application until after the study has been completed, if the application involves the delivery of water, by means other than a pipeline or aqueduct, to any place of use that is outside the combined river systems that drain to the ocean from and including the Russian River Systems northward to the California-Oregon border.

These provisions would apply to the university only if the Regents of the University of California, by resolution, make them applicable to the university.

Ch. 986 (AB 879) Keeley. Vehicle registration fees: law enforcement: crime prevention programs.

Existing law provides for the imposition of a \$1 fee, upon adoption of a resolution by a county board of supervisors, as specified, in addition to other specified vehicle registration fees, on certain vehicles, as specified. Existing law also imposes in addition to that fee, a \$2 service fee on all commercial vehicles, as specified, upon implementation of the permanent trailer identification plate program, as specified. Existing law provides that in regard to these fees, the money generated by these fees and paid to the Controller is continuously appropriated, without regard to fiscal years, for disbursement by the Controller to each county that has adopted a resolution as described above, as specified, and that the money so disbursed may only be used for specified purposes related to law enforcement.

Existing law also provides that the fees imposed by these provisions shall remain in effect only for a period of 5 years from the date that the actual collection of the fee commences.

This bill would instead repeal these provisions as of January 1, 2006.

By extending existing provisions of law providing for disbursements from a continuously appropriated fund, this bill would make an appropriation.

The bill would require every county collecting this fee to issue a fiscal yearend report to the Controller, as specified. Failure to timely issue the report would result in suspension of the fee for one year for that county, as specified. The bill would also provide that if funds from this fee are not expended or encumbered by a county by the close of the fiscal year, the fee would be suspended for that county for one year, as specified. The bill would require an annual report on revenue and expenditure in regard to the fee by the Controller to the Legislature, as specified.

Ch. 987 (AB 1173) Keeley. Air pollution: indoor air pollution.

Under existing law, the State Air Resources Board is the state agency charged with coordinating efforts to attain and maintain ambient air quality standards. Existing law requires the state board to identify toxic air contaminants that are emitted into the ambient air of the state. Existing law also requires the state board to adopt airborne toxic control measures to reduce the emissions of toxic air contaminants from nonvehicular sources.

This bill would require the state board, by January 1, 2004, in consultation with the State Department of Health Services, the Office of Environmental Health Hazard Assessment, the State Energy Resources and Development Commission any other state agency the state board determines appropriate, affected indoor emission sources, and interested members of the public, to provide a report to the Legislature summarizing the best scientific information available on indoor air pollution, the potential adverse effects of indoor air pollution on public health in the state, readily available information about the effects of existing regulations, and current industry practices in mitigating those exposures, and listing the biological and radiological substance work performed by other state and federal entities. The bill would require the state board to contract with the National Academy of Sciences, the University of California, the California State University, or a similar institution of higher learning with scientific expertise, or with a scientist or group of scientists of comparable stature that is recommended by the President of the University of California, to conduct an external peer review of the report. The bill would require that peer review process to be completed, and the state board to present and review the contents of the report at a public meeting, prior to the state board providing the report to the Legislature.

Ch. 988 (AB 1412) Wright. Career education.

Existing law sets forth the required course of study for schools maintaining grades 7 to 12, inclusive, including, but not limited to, courses in vocational-technical education.

This bill would provide that the term “vocational-technical education” shall have the same meaning as “career technical education.”

Existing law requires the Superintendent of Public Instruction to coordinate the development of certain model curriculum standards regarding high school graduation requirements and for a vocational education course of study. Existing law also requires the superintendent to develop curriculum standards for education courses and adopt those standards by May 1, 1991.

This bill would extend the time for adoption of the curriculum standards to January 1, 2005, and would require the superintendent to work with an advisory group with a specified membership in developing the standards. This bill would state the intent of the Legislature that school districts not be required to make curriculum changes pursuant to these or related provisions.

Existing law, known as the Donahoe Higher Education Act, sets forth, among other things, the missions and functions of California’s public and independent segments of higher education, and their respective institutions of higher education. Provisions of the act apply to the University of California only to the extent that the Regents of the University of

California, by appropriate resolution, act to make a provision applicable. Among other things, the act sets forth legislative intent relating to admission to the University of California and the California State University.

This bill would require the California State University, and would request the University of California, to establish model uniform academic standards, develop, by January 1, 2006, a speedy process whereby high schools may obtain approval of their courses as satisfying specified admissions requirements, and develop a simple procedure to evaluate a career technical education course that is submitted by one high school that identifies it as a duplicate of a course offered by another high school that is approved by, and satisfies the admission criteria of, the university, with the duplicate course being approved to the same extent as the original.

Ch. 989 (SB 1934) McPherson. Career technical education.

(1) Existing law requires the Superintendent of Public Instruction to coordinate the development, on a cyclical basis, of model curriculum standards for a career technical education course of study necessary to assist school districts with those requirements. Existing law requires the standards for a career technical education course of study to be adopted no later than May 1, 1991.

This bill would instead require the adoption of those standards for career technical education by June 1, 2005, and would require the Superintendent of Public Instruction, upon adoption of the model curriculum standards by the State Board of Education, to develop a model curriculum framework for implementation of career and technical education no later than June 1, 2006, as specified. The bill would require the superintendent to develop the curriculum framework in consultation and coordination with an advisory group, as specified, and would prescribe related matters, including that adoption of the model curriculum framework by local educational agencies would be voluntary.

(2) Existing law requires school districts maintaining any of grades 7 to 12, inclusive, to offer to all otherwise qualified pupils in those grades a course of study that provides an opportunity for those pupils to attain entry-level employment skills in business or industry upon graduation from high school.

This bill would encourage school districts to provide all pupils with a rigorous academic curriculum that integrates academic and career skills, incorporates applied learning in all disciplines, and prepares all pupils for high school graduation and career entry.

(3) The bill would provide that implementation may only be with federal funds that are available for the purposes set forth in the bill.

Ch. 990 (AB 1855) Steinberg. Criminal history information.

Existing law provides that agencies responsible for determining the character and fitness of a person applying for employment or a license, or as a volunteer, within a human services field in which he or she would be involved in the care and security of, or would have supervisory or disciplinary power over, members of vulnerable populations, including children, the elderly, or the mentally impaired, may request, and the Department of Justice shall provide, the criminal history information of those applicants or volunteers, as specified, with respect to certain enumerated offenses.

This bill would provide that this information may also be provided in the case of individuals applying to become volunteers who would transport persons who are impaired by drugs or alcohol. This bill would also make various changes to the list of offenses about which the Department of Justice would be permitted to provide information and the time period after the commission or incarceration for commission of these offenses during which the Department of Justice would be permitted to provide the information, as specified.

This bill would incorporate certain changes made by SB 900 that would become operative if both bills are enacted and this bill is enacted after SB 900.

Ch. 991 (AB 1990) Liu. Forfeiture.

Existing law, known as the California Control of Profits of Organized Crime Act, provides for the forfeiture of assets of any person convicted of engaging in a pattern of criminal profiteering activity, as defined, and includes within that definition, any person convicted of engaging in a pattern of criminal gang activity, as specified.

This bill would delete the authority subjecting persons convicted of engaging in a pattern of criminal gang activity to the forfeiture provisions, and instead, revise that provision to apply to persons committing certain offenses in connection with participation in a criminal gang, as specified, or committing certain felonies subject to enhanced sentences under the criminal gang provisions, as specified.

Ch. 992 (AB 2166) Lowenthal. Hazardous waste: used oil recycling: transportation: household hazardous waste: liability.

(1) Existing law requires used oil to be managed as a hazardous waste, unless the used oil meets specified requirements. A violation of the laws regulating used oil is a crime.

This bill would require a hazardous waste transporter who transports used oil to provide a written acknowledgment to each generator of used oil from whom the transporter receives used oil. The bill would exempt a transporter from this requirement if the used oil will be transported to a specified authorized facility. The bill would provide that a person who makes a material misrepresentation implementing these requirements is in violation of the hazardous waste control laws. Since a violation of the bill's new requirements concerning the transportation of used oil would be a crime, the bill would impose a state-mandated local program.

(2) The existing Carpenter-Presley-Tanner Hazardous Substance Account Act imposes liability for hazardous substance removal or remedial actions and requires the Department of Toxic Substances Control to adopt, by regulation, criteria for the selection and for the priority ranking of hazardous substance release sites for removal or remedial action under the act. The act requires that the costs incurred by the department to carry out the act be recoverable from the liable person. Existing law prohibits a public agency operating a household hazardous waste collection program, a person operating such a program under a written agreement with a public agency, or, a person operating a certified used oil collection center, from being held liable in such a cost recovery action with regard to waste properly handled and transported to a treatment or disposal facility. Existing law also provides for the apportionment of costs and expenditures under the act and allows a person who has incurred removal or remedial action costs to seek indemnity or contribution from other liable persons.

This bill would additionally prohibit such a public agency or person from being held liable in an action seeking contribution or indemnity from any person who is liable under the act and would additionally include, in the immunity provision, any waste that has been transported to a storage facility. The bill would also correct obsolete references.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 993 (AB 2308) Chavez. Solid waste: inert waste.

(1) The California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. The act requires each county and city and county to prepare and submit to the board a countywide integrated waste management plan that includes, among other things, all city source reduction and recycling elements submitted to the county and the county's source reduction and recycling element. Each city or county source reduction and recycling element is required to include an implementation schedule that shows, among other things, a goal to divert 50% of all solid waste through source reduction, recycling, and

composting activities. Existing law requires a city, county, or regional agency to submit an annual report to the board summarizing its progress in diverting solid waste from disposal.

This bill would require a jurisdiction, as defined, to deduct, from the amount of disposed waste that is required to be included in that annual report submitted to the board, inert waste removed from the solid waste stream and not disposed of in a solid waste landfill in accordance with specified requirements, commencing with the report submitted for the year 2001. The bill would require a jurisdiction to make a specified identification in its annual report. The bill would require the board to verify whether the deduction is consistent with specified requirements and would require the board to approve the deduction made by the jurisdiction upon making this verification. The bill would specify a procedure if the board does not approve the deduction. The bill would impose a state-mandated local program by imposing new requirements upon local agencies with regard to the annual solid waste diversion report.

The bill would also specify procedures for a jurisdiction regarding the deduction of tonnage from a jurisdiction's base-year.

These provisions would be repealed on the January 1 following the operative date of any regulation adopted by the board that meets specified requirements.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 994 (AB 2312) Chu. Environmental justice: grant program.

Existing law requires the California Environmental Protection Agency to develop policies, and implement and coordinate various activities for boards, departments, and offices within the agency relating to environmental justice.

This bill would establish the Environmental Justice Small Grant Program under the jurisdiction of the agency. The bill would require the agency to award grants on a competitive basis to nonprofit entities, as defined, and federally recognized tribal governments, for certain, listed purposes. The bill would require the agency to adopt regulations to implement the grant program. The bill would require the agency to review, evaluate, and select grant recipients, and screen grant applications to ensure that they meet the requirements of the bill. The bill would limit the maximum amount of a grant to \$20,000, and would prohibit an individual from receiving a grant. These provisions would be implemented only during fiscal years for which an appropriation is provided for these purposes in the annual Budget Act or in another statute.

Ch. 995 (AB 2351) Canciamilla. Water quality: civil liability.

(1) Existing law, the Porter-Cologne Water Quality Control Act, with certain exceptions, subjects persons who violate various provisions of the act or the federal Clean Water Act to certain civil penalties, including a mandatory minimum penalty of \$3000 for the first serious violation, as defined, and each additional serious violation in any 6-month period. The act, under certain circumstances, authorizes the State Water Resources Control Board or a California regional water quality control board, in lieu of assessing the penalty applicable to the first serious violation, to elect to require the discharger to spend an amount equal to the penalty for a supplemental environmental project in accordance with the enforcement policy of the state board and any applicable guidance document or to develop a pollution prevention plan.

This bill, instead, with certain exceptions, would require the imposition of the \$3000 minimum penalty for each serious violation. The bill would authorize the state board or a regional board, in lieu of assessing that mandatory minimum penalty and with the concurrence of the discharger, to direct a portion of the penalty amount to be expended on a supplemental environmental project.

(2) The act requires the state board and the regional boards, for the purposes of carrying out these civil liability provisions, to construe a single operational upset that leads to simultaneous violations of more than one pollutant parameter as a single violation.

This bill would require those agencies, for the purposes of imposing certain mandatory minimum penalties, to treat a single operational upset in a wastewater treatment unit that treats wastewater using a biological treatment process as a single violation, if certain requirements are met.

(3) The act provides that the requirements relating to the imposition of mandatory minimum penalties do not apply to certain types of violations.

This bill also would make mandatory minimum penalties inapplicable to violations caused by the operation of a new or reconstructed wastewater treatment unit during a defined period of adjusting or testing, not to exceed 90 or 30 days, as applicable, if certain requirements are met.

(4) This bill would incorporate additional changes in Section 13385 of the Water Code, proposed by AB 1969, to be operative only if AB 1969 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

Ch. 996 (AB 2359) La Suer. Criminal law: destructive devices.

Existing law prohibits the possession of specified destructive devices and requires that any prohibited destructive device be surrendered to the Department of Justice. The department must destroy the device so as to render it unusable and unrepairable as a destructive device.

This bill would allow any prohibited destructive device to be surrendered to the sheriff or chief of police, in addition to the department, if the sheriff or chief of police has elected to perform services related to the removal of destructive devices. The bill would require the sheriff or chief of police to destroy the device so as to render it unusable and unrepairable as a destructive device.

Ch. 997 (AB 2473) Simitian. Gift certificates: bankruptcy.

Existing law generally provides that it is unlawful for any person or entity to sell a gift certificate to a purchaser containing an expiration date, and provides that a gift certificate sold without an expiration date is valid until redeemed or replaced.

This bill would provide that a gift certificate constitutes value held in trust by the issuer of the gift certificate on behalf of the beneficiary of the gift certificate, and that the value represented by the gift certificate belongs to the beneficiary, or his or her legal representative to the extent provided by law, and not to the issuer. The bill would require the issuer of a gift certificate who is in bankruptcy to continue to honor a gift certificate issued prior to the date of the bankruptcy filing. The bill would prohibit the terms of a gift certificate from making its redemption or other use invalid in the event of a bankruptcy. The bill would specify that it does not alter the terms of a gift certificate or require an issuer to perform specified acts.

Ch. 998 (AB 2474) Simitian. Automotive products.

Existing law requires the Department of Food and Agriculture to establish specifications for engine coolants or antifreeze that promote the public safety in the operation of motor vehicles.

This bill would require any engine coolant or antifreeze sold in this state after January 1, 2004, that is manufactured after July 1, 2003, and that contains more than 10% ethylene glycol, to include denatonium benzoate at a minimum of 30 parts per million as a bittering agent so as to render it unpalatable, or another equivalent aversive agent. The bill would require manufacturers and packagers of these products to maintain records and to furnish specified information to any member of the public upon request.

The bill would also provide that a manufacturer, distributor, recycler, or seller of an automotive product that is required to contain an aversive agent under these provisions is not

liable to any person for any personal injury, death, or property damage that results from the inclusion of denatonium benzoate in ethylene glycol antifreeze, with specified limitations.

Ch. 999 (AB 2481) Frommer. Underground storage tanks: unified program agencies: Porter-Cologne Water Quality Control Act: administrative civil penalties: drinking water: enforcement.

(1) Existing law generally regulates the storage of hazardous substances in underground storage tanks and requires underground storage tanks that are used to store hazardous substances and that are installed after January 1, 1984, to meet certain requirements, including that the primary containment be product tight and that the tank's secondary containment meet specified standards. These requirements are required to be implemented by the local agency. Under existing law, with specified exceptions, no person may own or operate an underground storage tank containing hazardous substances unless a permit for its operation has been issued. Existing law requires a permit issued for a petroleum underground storage tank system that meets specified requirements to include an upgrade compliance certificate and no person may deposit petroleum into an underground storage tank system unless the underground storage tank system meets those described requirements. A person depositing petroleum into an underground storage tank system is required to verify that the system meets those requirements by taking certain actions, including viewing the upgrade compliance certificate.

Existing law defines the term "product tight," for purposes of those requirements, as being impervious to the substance that is contained, so as to prevent the seepage of the substance from the primary containment and specifies that to be product tight, the tank not be subject to physical or chemical deterioration by the substance which it contains over the useful life of the tank. Existing law requires all tank integrity tests conducted with regard to these tanks to be performed by a tank tester with a valid tank testing license. Existing law requires owners or operators of an underground storage tank system with a single-walled component that is located within 1,000 feet of a public drinking water well to implement a program of enhanced leak detection or monitoring.

Under the existing Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, owners and operators of petroleum underground storage tanks are required to take corrective action to an unauthorized release of petroleum, including requirements for the preparation of a work plan. The act provides for the issuance of a specified closure letter relative to the completion of an investigation and corrective action for a petroleum underground storage tank. The board is authorized to suspend corrective action at a site, except for emergency sites.

This bill would revise and recast the provisions regulating the storage of hazardous substances in underground storage tanks and would make conforming changes in that regard. The bill would revise the definition of "product tight" to delete the reference to seepage from the primary containment and would delete the requirement that the tank not be subject to physical or chemical deterioration over the useful life of the tank. The bill would also define the term "compatible" for purposes of that act. The bill would exclude unburied fuel piping connected to an emergency generator tank, as defined, from the definition of underground storage tank.

The bill would require the owner or operator of a single-walled tank system to take appropriate actions if the results of an enhanced leak detection test indicate that any component of the underground storage tank system is leaking liquid or vapor, to correct the leakage, and retest the system. The bill additionally would require all other owners and operators of an underground storage tank system that is located within 1,000 feet of a public drinking water well to test the system once using enhanced leak detection before January 1, 2005, and if the results of the enhanced leak detection test indicate that any component of the underground storage tank system is leaking liquid or vapor, the owner or operator would be required to take appropriate actions.

The bill would establish requirements for each underground storage tank installed on or after July 1, 2003, including a requirement that the system be tested utilizing a specified method when the tank is installed. The bill would define "product tight," for purpose of those requirements, to mean impervious to the liquid and vapor of the substance that is contained.

The bill would delete the provisions requiring an upgraded certificate of compliance and would instead authorize a local agency, upon the discovery of a significant violation of any requirement that poses an imminent threat to human health or safety, to affix a red tag, in plain view, to the fill pipe of the noncompliant underground storage tank system. The bill would also establish a procedure for the issuance of a notice of significant violation by a local agency and would allow a local agency to affix a red tag if the owner or operator does not correct the violation, as specified. The bill would prohibit any person from depositing petroleum into, and would prohibit the owner or operator of a facility from depositing or allowing the deposit of petroleum into, an underground storage tank system that has a red tag affixed to its fill pipe. The bill would require the owner or operator of an underground storage tank with a specified spill containment structure to annually test the spill containment structure to demonstrate that it is capable of containing the substance until it is detected and cleaned up.

The bill would require a tank tester who conducts or supervises a tank or piping integrity test to prepare a report detailing the results of the tank test and to maintain a record of the report for at least three years, in a specified manner.

The bill would expand the corrective action requirements and related provisions for petroleum underground storage tanks to apply those requirements to all underground storage tanks and would make conforming changes. The bill would impose a civil penalty upon any person who violates a corrective action requirement.

The bill would prohibit a person who purchases or acquires real property on which an underground tank is located from being reimbursed for a claim, except under specified conditions.

Since the bill would impose new requirements upon local agencies with regard to the regulation of underground storage tanks, the bill would impose a state-mandated local program.

(2) Existing law, until January 1, 2004, requires the Trade and Commerce Agency to conduct a program to make loans to small businesses to upgrade, replace, or remove petroleum underground storage tanks to meet applicable local, state, or federal standards and to take corrective actions, and to conduct a grant program to assist small businesses to comply with the requirements regarding petroleum underground storage tanks and tanks with single-walled components that are located, as specified. Existing law specifies eligibility requirements for grant applicants and provides that the minimum amount of those grants is \$3,000.

This bill would revise the requirements for issuance of a grant, would increase the minimum amount of the grant to \$10,000, and would authorize the grant funds to be used for specified requirements imposed by the bill.

(3) Under the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board and the California regional water quality control boards are among the principal agencies with authority over water quality. Under the act, persons discharging waste are required to file with the appropriate regional board a report of the discharge and the discharge is subject to waste discharge requirements prescribed by that regional board. Under the act, persons are prohibited from initiating a new discharge of waste, or making any material changes in any discharge of waste, prior to the filing of the waste discharge report, and after the filing of that report unless waste discharge requirements have been prescribed or, under certain circumstances, 120 days have elapsed since the filing of that report. The act authorizes the regional boards to waive these requirements as to a specific discharge or type of discharge, for not more than 5 years, if the waiver is not against the public interest. Under

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

these provisions, a waiver that was in effect on January 1, 2000, remains valid until January 1, 2003, unless the regional board terminates the waiver.

This bill would instead provide that a waiver for onsite sewage treatment systems that is in effect on January 1, 2002, shall remain valid until June 30, 2004 unless the regional board terminates the waiver prior to that date.

(4) Existing law authorizes the executive officer of a regional board to issue a complaint for an administrative civil penalty under the Porter-Cologne Water Quality Control Act. The act authorizes the complaint to be served by personal notice or certified mail and requires that a hearing be conducted before at least a 3-member panel of the regional board not later than 60 days from the date the party is served. The act requires that orders imposing administrative civil liability be served by personal service or registered mail. The act also authorizes the state board to issue administrative civil liability for a violation of a waste discharge requirement.

This bill would revise the procedures for the service of a complaint for that penalty and the conduct of a hearing by the state board to instead require that the hearing before the regional board be conducted not later than 90 days from the date the party is served and would delete the requirement that the hearing be conducted before a 3-member panel of the regional board. The bill would instead authorize a complaint and an order to be served by certified mail or in any manner in which a summons may be served. The bill would require, in a proceeding before the state board to impose administrative civil liability for a violation of a waste discharge requirement, that the executive director of the state board issue the complaint, and that a hearing be held within 90 days of the date the party has been served.

(5) The existing Financial Assurance and Insurance for Redevelopment Program (FAIR) requires the Secretary for Environmental Protection to solicit proposals for a package of environmental insurance products from insurance companies through a competitive bidding process. The insurance company selected by the secretary is required to offer a prenegotiated package of environmental insurance products to any interested recipient of a loan under the Cleanup Loans and Environmental Assistance to Neighborhoods (CLEAN) Program, which provides loans to finance the performance of actions necessary to respond to the release or threatened release of hazardous material on an eligible property, and to any other person who conducts a response action in the state. Existing law provides that if the insurance company selected to provide prenegotiated environmental insurance products under the FAIR program terminates its contract or otherwise becomes unable to honor written policies, the FAIR program does not require the state to honor those policies or to pay any claims made on those policies.

This bill would, instead, provide immunity to the California Environmental Protection Agency, the secretary, the state, their respective employees and agents, and any of the state's other political subdivisions or employees thereof, for acts or omissions in implementing the FAIR program, the acts or omissions by an insurance company selected under the FAIR program, and any acts or omissions by any person that purchases a prenegotiated environmental insurance product. The bill would specify that this immunity includes, but is not limited to, immunity if the insurance company cancels, rescinds, or otherwise terminates its contract with the secretary, fails, for any reason, to compensate an insured for a loss covered by a policy, or delays payment to an insured, or otherwise breaches a duty or covenant. The bill also would provide that the agency, the secretary, the state, their respective employees and agents, in implementing the FAIR program, may not be construed to be an insurer, an insurance agent, an insurance solicitor, or an insurance broker; be construed to be transacting insurance; or be required to obtain a license or other authorization pursuant to specified provisions regulating insurance.

(6) Under the existing Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, every owner of an underground storage tank is required to pay a storage fee for each gallon of petroleum placed in the tank. The fees are required to be deposited in the Underground Storage Tank Cleanup Fund. The money in the fund may be expended by the State Water Resources Control Board, upon appropriation by the Legislature, for various

purposes, including the payment of claims, pursuant to a specified order of priority, to aid owners and operators of petroleum underground storage tanks who take corrective action to clean up unauthorized releases from those tanks.

This bill would additionally authorize the money in the fund to be expended to pay for expenditures by the board associated with discovering violations of, and enforcing, or assisting in the enforcement of, the requirements regulating petroleum underground tanks.

(7) Existing law requires the Secretary for Environmental Protection to adopt regulations and implement a unified hazardous waste and hazardous materials management regulatory program. A city or local agency that meets specified requirements is authorized to apply to the secretary to implement the unified program, and every county is required to apply to the secretary to be certified to implement the unified program.

This bill would define the term "minor violation," for purposes of the unified program, as the failure of a person to comply with any requirement or condition of any applicable law, regulation, permit, information request, order, variance, or other requirement, whether procedural or substantive, of the unified program that the Unified Program Agency (UPA) is authorized to implement or enforce pursuant to the program, excluding certain types of violations. The bill would repeal this definition on January 1, 2006.

This bill would authorize a unified program agency, if it determines that a person has committed, or is committing, a violation of any requirement that the UPA is authorized to enforce or implement pursuant to the unified program, to issue an administrative enforcement order requiring that the violation be corrected and imposing an administrative penalty. The bill would specify procedures for the conduct of a hearing, upon the request of a person served with an order, pursuant to one of 2 specified hearing processes, except under certain conditions. The bill would require, if the Unified Program Agency conducts the hearing, that a decision be issued by the Unified Program Agency within 60 days after the hearing is conducted by the Unified Program Agency. The bill would provide that an order issued by the Unified Program Agency setting a penalty pursuant to the hearing by the Unified Program Agency is final upon issuance.

This bill would require all administrative penalties collected from actions brought by a UPA to be paid to the UPA that imposed the penalty, and to deposit the penalties into a special account that would be required to be expended to fund the activities of the UPA in enforcing the unified program.

This bill would require an authorized representative of the UPA, who, in the course of conducting an inspection, detects a minor violation, to issue a notice to comply detailing the violation, thereby imposing a state-mandated local program by imposing new duties upon local agencies. The bill would require a person who receives a notice to comply to take specified actions within 30 days from the date of the notice and would provide that a false certification that a violation has been corrected is punishable as a misdemeanor, thereby imposing a state-mandated local program by creating a new crime. The bill would provide that a notice to comply is the only means by which a UPA may cite a minor violation.

The bill would repeal the provision requiring the enforcement of minor violations in this manner on January 1, 2006.

(8) Existing law requires businesses that handle hazardous materials to prepare a business plan and submit an annual inventory form to the administering agency. Existing law specifies procedures for the imposition of civil and administrative penalties for a violation of those provisions and requires the civil penalties collected to be apportioned in a specified manner, including \$200 for deposit in the Hazardous Materials Enforcement and Training Account, 75% to the administering agency, to reimburse specified local agencies for expenses, and 25% to the principal agency that assisted the administering agency. Existing law provides for the imposition of civil penalties upon stationary sources with regard to the program to prevent accidental releases of regulated substances.

This bill would require the issuance of an enforcement order or the imposition of an administrative penalty by an administering agency to instead be conducted using the

procedures established by the bill. The bill would also repeal those provisions requiring the apportionment of the civil penalty. The bill would require the issuance of enforcement orders or administrative penalties for a violation of the accidental release prevention program to be conducted using the procedures established by the bill.

(9) Existing law provides that the repeal of the Drinking Water Treatment and Research Fund on January 1, 2002, did not terminate any rights, obligations or authorities, or any provisions necessary to carry out these rights or obligations and the filing and payment of claims in the fund, until the moneys in the fund are exhausted. Existing law requires the State Water Resources Control Board to annually transfer \$5,000,000 from the Underground Storage Tank Cleanup Fund to the Drinking Water Treatment and Research Fund to be expended for specified purposes when a public drinking water well has been contaminated by an oxygenate and there is substantial evidence that a release has occurred from an underground storage tank.

This bill would reestablish the Drinking Water Treatment and Research Fund in the State Treasury and would continuously appropriate the money in the fund to the State Department of Health Services to make payments to public water systems for the costs of treating contaminated groundwater and surface water for drinking water purposes, investigating contamination, and acquiring alternate drinking water supplies. The bill would also authorize the department to expend not more than \$1,000,000 for research into treatment technologies and to pay the department's administrative costs, as specified. The bill would allow the department to make payments for treatment, investigation, or alternative water supplies without requiring the public water system to first incur expenditures, if the department makes a specified determination. The bill would also specify that these payments for treatment, investigation, or providing alternative water supplies may be made without regard to when the contamination occurred and would require the department, when evaluating these claims submitted for payment, to consider the findings of a specified report. The bill would provide for the repeal of the Drinking Water Treatment and Research Fund, except for specified rights and obligations, on January 1, 2010.

The bill would require a public water system that determines that an oxygenate is detected at any level in groundwater supplies utilized by the public water system for drinking water purposes to notify the State Department of Health Services and a California regional water quality control board. The state department or a regional board would be required to determine whether to shut down or curtail the use of a well within 30 days following receipt of this notification from a public water system.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

#### Ch. 1000 (AB 2486) Keeley. Environmental prosecution.

Under existing law, there are various specialized hazardous materials enforcement and training programs. In particular, existing law provides for special local toxics prosecution projects funded by grants from the Director of Toxic Substance Control. In addition, money has been provided in the Budget Act for several years for an environmental circuit prosecutor through the Secretary of the California Environmental Protection Agency.

This bill would recast the provisions concerning training and prosecution assistance programs for hazardous materials law enforcement to reflect a broader focus on environmental law. It would move responsibility for these programs from the Department of Toxic Substances Control and its director to the California Environmental Protection Agency and its secretary. It would create an account into which funds for these programs are directed, and would transfer a specified portion of the balance of the existing account currently funding these programs to the new account on a specified date. This bill would provide the Commission on Peace Officer Standards and Training 12 months to develop or

review and certify specified environmental law training programs. It would remove specification from the course of instruction for public prosecutors which is required to be developed and implemented by the California District Attorneys Association, and recast the description of the enforcement investigative personnel for whom that association is to develop and implement a course or courses of instruction.

This bill would repeal other existing provisions providing grants for the development by one or more statewide organizations with specified qualifications of another training program, and would repeal the provisions authorizing the awarding of grants for special local toxics prosecution projects. This bill would codify the Environmental Circuit Prosecutor Project, intended to discourage environmental law violations, with a fair, uniform, and effective statewide prevention, enforcement, and prosecution program, and to better integrate environmental prosecution into the criminal justice system, as specified. This bill would require the Secretary of the California Environmental Protection Agency to award project grants from the new account to the California District Attorneys Association for the purpose of the day-to-day operations of the program and would specify the division of funds provided to various aspects of the new program. This bill would require a report to the Governor and the Legislature, which is currently required concerning special local toxics prosecution projects, be provided instead concerning the environmental prosecution projects funded by this bill, and it would reduce the scope of that report.

Under existing law, businesses are required to have response plans for releases of specified hazardous materials, and are required to provide an annual inventory of hazardous materials handled, as specified. A portion of the civil and criminal penalties assessed for violations of these laws are made available for expenditure on the toxics training and prosecution projects described above.

This bill would discontinue the expenditure of a portion of each penalty assessed for these purposes.

Ch. 1001 (AB 2637) Cardoza. Air pollution: enhanced motor vehicle inspection and maintenance program: San Francisco Bay Area Basin.

(1) Existing law establishes the governing body of the Bay Area Air Quality Management District and requires a city selection committee organized in each county within the district to either make the appointments to the board in some instances, or in other instances, submit recommendations for appointments to the board.

This bill would permit certain board members to designate a deputy to act on their behalf on the bay district board or any of its committees.

(2) Existing law establishes an enhanced motor vehicle inspection and maintenance program (Smog Check II), administered by the Department of Consumer Affairs, in which vehicles are tested and repaired by licensed smog check stations. Existing law prescribes the area of the state in which the program is to be implemented, requires vehicles subject to the program to have a biennial inspection, and requires the department to ensure reductions in emissions as required by federal law. Existing law authorizes the department to establish a network of privately operated test-only stations, and requires the department, if it increases the capacity of the program for testing at test-only stations, to afford stations that are licensed and certified, as specified, the opportunity to perform the required inspections.

This bill would establish an enhanced smog check program in the San Francisco Bay Area Basin. The bill would require the department to commence operation of that program in that basin after the department determines that an adequate number of test-only stations, test and repair stations, referee services, and other facilities and equipment necessary to provide reliable and convenient service to vehicle owners subject to the program exist in that basin. The bill would require the board to submit, by January 1, 2004, for peer review a specified study produced by the University of California at Riverside and commissioned by the Bay Area Air Quality Management District, and any other available scientifically credible evidence, to determine the impact of the enhanced motor vehicle inspection and maintenance

program on Contra Costa County and surrounding areas. The bill would require the board to suggest mitigation measures, as specified, to the Legislature and to the respective air quality districts, if the peer review concludes that the program in the urbanized areas of the San Francisco Bay Area Basin results in adverse ozone and other air quality impacts in Contra Costa County or parts of Solano, San Joaquin, Alameda, and Santa Clara Counties.

Existing law requires all motor vehicles powered by internal combustion engines that are registered within an area designated for program coverage to be required biennially to obtain a certificate of compliance or noncompliance, except for, among other vehicles, prior to January 1, 2003, any motor vehicle manufactured prior to the 1974 model-year and, on and after January 1, 2003, any motor vehicle that is 30 or more model-years old. Existing law authorizes the department, by regulation, to increase that exemption to include any motor vehicle up to 6 or less model-years old.

This bill would exempt from that biennial certification requirement any vehicle up to 6 model-years old, unless the State Air Resources Board finds that providing an exception for those vehicles will prohibit the state from meeting the requirements of the federal Clean Air Act. Since, under other statutes, a violation of these requirements would be a crime, this bill would impose a state-mandated local program.

Existing law requires the department to develop a program for the voluntary certification of licensed smog check stations, or authorizes the department to accept a smog check certification program proposed by accredited industry representatives, known as a “gold shield” program, for the purposes of providing consumers, whose vehicles fail an emissions test at a test-only facility, an option of services at a single location to prevent the necessity for additional trips back to the test-only facility for vehicle certification.

This bill would require the department, as soon as is practicable, but not later than January 1, 2004, to adopt regulations that apply to all enhanced areas of the state, and permit any vehicle that fails a required smog test at a test-only facility or is identified as a gross polluter to be repaired, retested, and certified at such a “gold shield” facility.

Existing law authorizes the department to conduct a pilot program to allow vehicles initially identified as gross polluters to be repaired and issued a certificate of compliance by a licensed and certified smog check station.

This bill would require the department to implement that program on a permanent basis.

Existing law, until January 1, 2005, requires that, on or after July 1, 1998, in the event that the smog impact fee imposed for purposes of the program is ruled unconstitutional by an appellate court or the California Supreme Court, or if the state is in any manner prevented by either of these courts from imposing or collecting the fee, specified actions take place with respect to the imposition of motor vehicle fees.

This bill would extend the operative date of those provisions to January 1, 2010.

(3) This bill would only become operative if the petitioners in specified pending litigation are granted a motion to withdraw from the case, with prejudice, and the petitioners file a certified copy of that order with the Secretary of State.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) Existing law creates the Vehicle Inspection and Repair Fund in the State Treasury, and requires all fees and revenues derived pursuant to the motor vehicle inspection and automotive repair programs in the state to be deposited in the fund.

This bill would appropriate \$5,000,000 from the fund to the department for distribution to the Bureau of Automotive Repair for costs associated with the implementation of the Smog Check II program in the San Francisco Bay Area Basin.

Ch. 1002 (SB 1453) Alpert. Pupil records: California longitudinal pupil achievement data system.

(1) Existing law requires the California School Information Services Program administrator to submit to the State Board of Education a plan to administer, coordinate, and manage the development and implementation of an electronic statewide school information system to address current problems of information exchange. Existing law states that one of the missions of the California School Information Services Program is to assist local education agencies to transmit state and federal reports electronically to the State Department of Education.

This bill would make a local education agency participating in the California School Information Services Program eligible to receive one-time funding for startup costs.

(2) Existing law establishes the Standardized Testing and Reporting (STAR) Program under which each school district, charter school, and county office of education is required to administer to each of its pupils in grades 2 to 11, inclusive, a designated achievement test and a standards-based achievement test. Existing law requires the Superintendent of Public Instruction to apportion funds appropriated to enable school districts to use the English language development test to identify limited-English-proficient pupils, to determine their level of English language proficiency, and to assess their progress in acquiring the skills of listening, reading, speaking, and writing English. Existing law requires, commencing with the 2003–04 school year and each school year thereafter, each pupil completing grade 12 to successfully pass the high school exit examination as a condition of receiving a diploma of graduation or a condition of graduation from high school.

This bill would require that the State Department of Education contract for the development of proposals that will provide for the retention and analysis of longitudinal pupil achievement data on the STAR and English language development tests and the high school exit examination. The bill would require the department to convene an advisory board to establish privacy and access protocols, provide general guidance, and make recommendations on desirable data elements. The bill would require local education agencies and charter schools to retain certain individual pupil records in order to comply with federal law, thereby imposing a state-mandated local program. The bill would also require the department to contract with a consultant for independent project oversight and would require the consultant to submit written reports twice annually.

The bill would authorize the State Department of Education from \$6,880,000 appropriated and made available pursuant to the Budget Act of 2002 for the establishment of a longitudinal database, and for data collection requirements of the federal No Child Left Behind Act of 2001, pursuant to legislation enacted in the 2001–02 Regular Session, to use up to \$6,000,000 for the development and implementation of the California longitudinal pupil achievement data system established pursuant to this bill and to expend up to \$880,000 and the remaining funds for purposes of collecting or reporting data necessary to meet the requirements of the federal No Child Left Behind Act of 2001. The bill would make release of the appropriated funds contingent on the Department of Finance's approval of an expenditure plan.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1003 (SB 1542) Escutia. Solid waste management: environmental justice.

(1) The existing California Integrated Waste Management Act of 1989 requires the California Integrated Waste Management Board to develop a model countywide or regional siting element and a model countywide or regional agency integrated waste management plan that will establish prototypes of the content and format that counties or regional agencies may use in meeting the requirements of the act.

This bill would require the board, on or before April 1, 2003, and using existing resources, to provide local jurisdictions and private businesses with information and models to assist with consideration of environmental justice concerns, as defined, when complying with certain requirements relating to development and revision of countywide siting elements for solid waste disposal facilities.

The bill would require that countywide siting elements submitted or revised on or after January 1, 2003, include a description of the actions taken by the city or county to solicit public participation by the affected communities, including, but not limited to, minority and low-income populations. To the extent that this requirement would impose additional duties upon local governments, the bill would establish a state-mandated local program.

(2) Existing law requires the Secretary for Environmental Protection to convene an advisory group to assist a specified working group established under existing law, by providing recommendations and information to, and serving as a resource for, the working group. The secretary is required to appoint members to the advisory group according to certain categories.

This bill would revise the appointment categories to include an additional representative from a small business, a representative from a federally recognized Indian tribe, and two representatives from environmental justice organizations.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 1004 (SB 1684) Polanco. Redevelopment: hazardous substance releases.

The existing Polanco Redevelopment Act authorizes a redevelopment agency, until January 1, 2004, to take any action that the agency determines is necessary, consistent with other state and federal laws, to remedy or remove a release of hazardous substances on, under, or from a project area, subject to specified conditions. Existing law immunizes an agency that remedies or removes a hazardous substance release, pursuant to those provisions, from liability under specified state laws, and authorizes the recovery of cleanup and remedial costs from the liable party. Existing law specifies that these immunity and recovery provisions apply only to remedial or removal actions commencing before January 1, 2004.

Existing law, after January 1, 2004, requires that the department or regional board approve the actions taken by the redevelopment agency and does not provide the agency with immunity for those actions.

This bill would delete the January 1, 2004, repeal date specified above, thereby extending the operation of those provisions indefinitely, and would repeal the provision that would otherwise take effect on that date. The bill would also repeal the provision limiting the immunity and recovery provisions to remedial and removal actions commencing before January 1, 2004.

#### Ch. 1005 (SB 1884) Speier. Dietary supplements.

Existing law, the Sherman Food, Drug, and Cosmetic Law, contains various provisions regarding the packaging, labeling, and advertising of food, drugs, and cosmetics. Violation of any of these provisions is a crime.

This bill would prohibit the sale of dietary supplements containing ephedrine group alkaloids or steroid hormone precursors unless the product label of these products includes certain statements regarding content and warning statements regarding the use of the product.

This bill would make it a misdemeanor for any manufacturer, wholesaler, retailer, or other person to sell, transfer, or otherwise furnish a dietary supplement containing ephedrine group alkaloids or steroid hormone precursors to a person under 18 years of age. Because the bill would create a new crime, it would impose a state-mandated local program. The bill would

exempt a retail establishment that meets certain conditions from criminal liability under the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1006 (SB 1948) Figueroa. Dietary supplements: warning labels and advertisements.

Existing law, the Sherman Food, Drug and Cosmetics Law, provides for the regulation of various subjects relating to the processing, labeling, advertising, and sale of food, drugs, and cosmetics, as defined, under the administration and enforcement of the State Department of Health Services. Under existing law, any person who violates any of these provisions, or any regulation adopted pursuant thereto, if convicted, is subject to imprisonment, or a fine, or both. Existing applicable federal law includes dietary supplements, as defined, within the definition of food for these purposes.

This bill would require that any warning label on products defined as dietary supplements pursuant to specified federal law, that are manufactured or distributed in the state, shall be clear and conspicuous. The bill would provide that it shall be implemented to the extent permitted by federal law.

The bill would provide that its provisions shall not limit or restrict any rights, remedies, or duties otherwise applicable by law. The bill would provide that violation of its provisions by any person, as defined, constitutes an infraction, punishable by specified fines.

By changing the definition of a crime and by creating a new crime, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1007 (AB 2321) Hertzberg. Tort Claims Act: judiciary.

The existing Tort Claims Act provides for the liability and immunity of a governmental entity for its acts or omissions that cause harm to persons. Existing law provides that any claim for money or damages against the state is required to be presented to the State Board of Control within a specified period of time. Other provisions of existing law have renamed the State Board of Control, the Victim Compensation and Government Claims Board.

This bill would require, instead, in the case of a claim against a judicial branch entity, as defined, or a judge of one of those entities, that the Judicial Council act on the claim in accordance with the procedure that the Judicial Council would provide by rule of court. The bill would specify certain means of presentation and service of a claim against a judicial branch entity or one of its judges. The bill would authorize the Judicial Council to settle, adjust, or compromise any pending action arising out of the activities of a judicial branch entity or judge thereof, and to authorize the Controller to draw a warrant for payment of any final judgment or settlement based on claims arising out of the activities of a judicial branch entity. The bill would also require the Administrative Director of the Courts to report to the Judicial Council concerning any action the administrative office of the courts takes or proposes to take to prevent the future occurrence of circumstances similar to those upon which the claim was based.

This bill would also amend the references to the State Board of Control in the Tort Claims Act to instead refer to the Victim Compensation and Government Claims Board.

Ch. 1008 (AB 3028) Committee on Judiciary. Court procedures.

(1) Existing law authorizes a person who has suffered harassment, as defined, to seek a temporary restraining order and an injunction prohibiting the harassment. Existing law authorizes the court, on a showing of good cause, to issue a temporary restraining order which protects other named family or household members who reside with the person.

This bill also would authorize the court to issue an injunction which protects other named family or household members who reside with the person who is being subject to harassment under those circumstances.

(2) Under existing law, any employer, whose employee has suffered unlawful violence or a credible threat of violence from any individual, that can reasonably be construed to be carried out or to have been carried out at the workplace, may seek a temporary restraining order and an injunction on behalf of the employee prohibiting further unlawful violence or threats of violence by that individual. Existing law authorizes the court, on a showing of good cause, to issue a temporary restraining order which protects other named family or household members who reside with the person.

This bill also would authorize the court to issue an injunction which protects other named family or household members who reside with the person who is being subject to that violence under those circumstances.

(3) Existing law authorizes referees to hear trials in specified instances. Existing law requires the Judicial Council to collect information and report to the Legislature by January 1, 2003, regarding fees paid by the parties for the use of referees.

This bill would extend the reporting requirement to July 1, 2003.

(4) Existing law provides for the service of a responsible party if service of a subpoena is to be made on a minor.

This bill would also require service of the subpoena to be made upon the designated agent for service at the county child welfare department or probation department if the minor meets specified criteria.

(5) Under existing law, in effect until January 1, 2003, the members of the board of directors of a for-profit corporation, nonprofit public benefit corporation, nonprofit mutual benefit corporation, and nonprofit religious corporation may participate in a meeting through use of electronic video screen communication or similar communications equipment, as long as certain conditions are met such as all members participating in the meeting are able to communicate with all other members concurrently, and participation in a meeting under these circumstances constitutes presence in person at that meeting.

This bill would extend the operation of these provisions to January 1, 2004.

(6) Existing law requires a report of a child custody evaluator to be filed with the clerk of the court in which a contested custody or visitation rights hearing will be conducted and served on the parties and their attorneys at least 10 days before the hearing.

This bill also would require that report to be served on any counsel appointed, as specified, for the child.

(7) Existing law establishes the Trial Court Trust Fund, and provides for the apportionment of the moneys in these funds.

This bill would authorize the Judicial Council to direct payment or reimbursement, or both of actual costs from the Trial Court Trust Fund for trial court programs, contract costs, and other services to one or more participating courts upon appropriation of funding for these purposes in the annual Budget Act, as specified. The bill would also require the Judicial Council to file specified reports and establish certain procedures in this regard.

(8) Existing law provides for the retirement of judicial employees, as specified.

This bill would provide that if the Chief Justice of the California Supreme Court, by formal action, determines that because of an impending curtailment of, or change in the manner of performing, judicial branch services, the best interests of the state would be served by encouraging the retirement of judicial branch state employees from the Administrative Office of the Courts, the Supreme Court, the Courts of Appeal, or the Habeas Corpus Resource Center and the sufficient economies could be realized to offset any costs to the

judicial branch resulting from this action, an additional two years of service shall be credited to the affected members if specified conditions exist.

(9) Existing law establishes a salary increase for presiding judges of superior courts with 4 or more judges. Under the Constitution, laws that set the salaries of elected state offices constitute appropriations.

This bill would make an appropriation by establishing a 2% salary increase, operative January 2, 2003, for presiding judges of superior courts with 2 or 3 judges.

(10) Existing law provides that any officer whose office is created by the California Constitution and who is made a member of a state board, commission, or committee, or of the governing body of any state agency or authority may designate a deputy of his or her office holding a specified position to act as the member in the constitutional officer's place and stead, to all intents and purposes as though the constitutional officer were personally present. Existing law expressly provides the circumstances under which the Lieutenant Governor, Attorney General, and Superintendent of Public Instruction may designate a deputy of his or her office for that purpose.

This bill would expressly provide that the Chief Justice of the California Supreme Court may designate a judge or employee of a state court or an employee of the Administrative Office of the Courts to act as a deputy for those purposes.

(11) Under existing law, a majority of the judges of a superior court may order sessions of the court to be held at any place where a municipal court holds sessions within the county or, in a county in which there is no municipal court, where there is a court facility.

This bill instead would require each trial court to determine the number and location of sessions of the court, taking into consideration the employees and facilities of the court. The bill would authorize the session to be held outside the county of the court under certain circumstances.

(12) Existing law requires a county to assess the parent, parents, or other person charged with the support and maintenance of a proposed ward of the juvenile court, and the guardian, proposed guardian, or the estate of the proposed ward, for county expenses for any investigation or review conducted by the court investigator, probation officer, or domestic relations investigator.

This bill would require a court or a county to make that assessment with respect to the ward or proposed ward, and specify that the court may order reimbursement to the court or to the county in the amount of the assessment, unless the court finds that all or any part of the assessment would impose a hardship on the ward or the ward's estate.

(13) Existing law requires each county to assess each conservatee in the county for any investigation or review conducted by a court investigator at county expense with respect to that person, but specifies that the court may order reimbursement to the county for the cost of the investigations, unless the court finds that all or any part of the assessment would impose a hardship on the estate.

This bill would transfer this duty to the court and would make related changes.

(14) Existing law requires that any amount otherwise owing to a county pursuant to Article XIII B of the California Constitution and related statutory provisions for costs incurred by the county for the costs of investigation or review by court investigators be reduced by the amount of any assessments actually collected during the fiscal year.

This bill would delete this provision.

(15) By requiring new duties of the courts, the bill would impose a state-mandated local program.

(16) Existing law provides that after a petition has been filed to declare a child a dependent child of the juvenile court, and after a petition has been filed to declare a child a ward of the juvenile court, the court may issue ex parte orders enjoining any person from molesting, attacking, threatening, sexually assaulting, stalking, or battering the child, among other things.

Existing law provides that if a temporary restraining order is granted without notice, the matter is required to be made returnable on an order requiring cause to be shown why the order should not be granted, on the earliest day that the business of the court will permit, but not later than 15 days or, if good cause appears to the court, 20 days from the date the temporary restraining order is granted. Existing law authorizes the court, on the motion of the person seeking the restraining order, or on its own motion, to shorten the time for service on the person to be restrained of the order to show cause.

This bill would permit the court, upon its own motion or the filing of an affidavit by the person seeking the restraining order, to find that the person to be restrained could not be served within the time required by law and to reissue an order previously issued and dissolved by the court for failure to serve the person to be restrained.

(17) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 1009 (AB 2030) Goldberg. Protective orders: fees.

Existing law prohibits the imposition of a fee for filing a petition that alleges that a person has inflicted or threatened violence against the petitioner, or stalked the petitioner, or acted or spoken in any other manner that has placed the petitioner in reasonable fear of violence, and that seeks a protective or restraining order or injunction restraining stalking or future violence or threats of violence, in any action seeking a temporary restraining order and injunction prohibiting harassment.

This bill would provide that upon application of the petitioner, there is no fee for the service of process of a protective order, restraining order, or injunction if that order or injunction is based upon specified acts or threats. The bill would impose duties on the Judicial Council to prepare and develop application forms to assist petitioners in obtaining and serving these orders.

Existing law provides that no fee may be charged for filing an application, a responsive pleading, or an order to show cause to obtain, modify, or enforce a protective order issued in connection with a proceeding involving domestic violence, marital dissolution, or a child custody matter, among other things.

This bill would prohibit a fee from being charged for filing a subpoena in connection with those applications, pleadings, or orders.

Existing law permits the sheriff or marshal, in connection with the service of process of notices, to require that all fees that a public agency or other person or entity is required to pay be prepaid prior to the performance of the official act, with certain exceptions.

This bill would exempt from this prepayment requirement, a fee for the service of process of a protective order, restraining order, or injunction involving stalking, credible threats of violence resulting from a threat of sexual assault, domestic violence, marital dissolution, or a child custody matter. The bill would permit the sheriff, marshal, or constable to submit a billing to the superior court for the payment of fees in a manner prescribed by the Judicial Council.

The changes made by this bill would be operative only until January 1, 2007.

#### Ch. 1010 (SB 1396) Dunn. Judicial security.

The California Rules of Court, as adopted by the Judicial Council, provide a framework for the operation of the courts, including the respective costs deemed necessary for court security. Existing law requires the sheriff's office or marshal's department of any county to provide court security services.

This bill would enact the Superior Court Law Enforcement Act of 2002, which would require the sheriff or marshal and presiding judge of any county to develop a court security plan to be utilized by the court, as specified, and require the sheriff or marshal to provide specified information to the court by April 30 of each year, with actual court security allocations subject to the approval of the Judicial Council. The bill would require the superior court and the sheriff or marshal of any county to enter into an annual or multiyear memorandum of understanding specifying the level of court security services, costs of services, and terms of payment, and permit the court to contract for those services, as specified. The bill would permit, if no agreement is reached, the court, sheriff, or marshal to request mediation assistance, as specified, for a period of 45 days. The bill would further permit the court to use court attendants, as defined. The bill would also define related terms, declare the intent of the Legislature to modify Function 8 of Rule 810 of the California Rules of Court, and impose various duties on the Judicial Council.

Existing law requires a sheriff to attend all superior courts within the county, whenever required, as specified, and obey all lawful orders and directions of the courts. Existing law, as of July 1, 1998, and under specified circumstances, requires a sheriff to provide court security.

This bill would revise and recast those provisions, and require a sheriff to attend a noncriminal, nondelinquency action, under a specified circumstance. The bill would permit the use of court attendants, as defined, in a court hearing those actions.

This bill would impose additional duties on local employees, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new program or higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

Ch. 1011 (SB 2021) Committee on Business and Professions. Business and Professions.

(1) Existing law, the Speech-Language Pathologists and Audiologists Licensure Act, provides that, until July 1, 2004, the Speech-Language Pathology and Audiology Board is under the jurisdiction of the Medical Board of California. Existing law authorizes the board to impose fees for specified services that are deposited into the Speech-Language Pathology and Audiology Board Fund, a continuously appropriated fund.

This bill would remove the board from the auspices of the Medical Board of California and would place the board within the Department of Consumer Affairs. The bill would extend this board to July 1, 2005. The bill would require the department to enforce and administer the board functions. The bill would additionally authorize the board to impose a fee for issuing a license status and history certification letter. Because the bill would lead to an increase of fees that would be deposited into the continuously appropriated Speech-Language Pathology and Audiology Board Fund, the bill would make an appropriation.

(2) Existing law, the Occupational Therapy Practice Act, authorizes the licensing and regulation of occupational therapists by the California Board of Occupational Therapy. Existing law provides that a person who meets the qualifications to be admitted to the examination for licensure or certification and is waiting for the announcement of the results

of the next examination may practice under the direct supervision of a licensee. Existing law additionally authorizes the board to impose fees for specified services, which are deposited into the Occupational Therapy Fund. Existing law authorizes the board to take disciplinary action against a licensee.

This bill would additionally authorize a person to practice under the direct supervision of a licensee if the individual was waiting to take the first available examination or had just taken the examination and was waiting for its results. The bill would authorize the board to charge an application fee of up to \$50, which would be deposited into the Occupational Therapy Fund. The bill would make other conforming changes.

(3) Existing law, the Nursing Practice Act, provides for the licensing and regulation of registered nurses by the Board of Registered Nursing. Existing law also authorizes the board to take disciplinary action against a licensee. Existing law provides that a licensee may participate in an alcohol or drug diversion program, provided the licensee complies with certain conditions.

This bill would authorize the board to accept the surrender of a license through a settlement agreement in lieu of a formal pleading when the surrender is based upon a mental or physical illness of a licensee that is affecting his or her ability to safely practice nursing. The bill would additionally provide that the stipulated agreement be a form of discipline, and would allow the licensee to petition the board for license reinstatement after one year from the effective date of the board's decision to accept the stipulated agreement. The bill would require the board, under certain circumstances, to report the name and license number of a licensee who is denied admission to the drug or alcohol diversion program to the board's enforcement program.

(4) Existing law provides for the licensing and regulation of hearing aid dispensers by the Hearing Aid Dispensers Bureau. Existing law authorizes the bureau to employ personnel necessary to carry out bureau functions except for inspections or investigations which are required to be made by personnel from the department's Division of Investigations. Existing law allows the bureau to impose fees for the issuance of a replacement license when the original license is lost or when the licensee changes his or her name. These fees are deposited into the continuously appropriated Hearing Aid Dispensers Fund.

This bill would authorize the bureau to employ personnel to conduct inspections and investigations. The bill would additionally authorize the bureau to impose fees for issuing a replacement license. Because this would lead to additional fees being deposited into the continuously appropriated Hearing Aid Dispensers Fund, the bill would make an appropriation.

(5) Existing law requires the Dental Board of California, by August 1, 2002, to contract and submit a completed followup study to the Legislature regarding, among other things, staffing requirements for the board's enforcement program, the use of peace officers, trends in board reported dental-related crimes, and recommendations for improving the board's enforcement program.

This bill would extend the submission date for this study to December 31, 2003.

Ch. 1012 (SB 2025) Committee on Business and Professions. Professions and vocations.

(1) Under existing law, specified persons are required to file a report, designated as an "805 report," with the Medical Board of California if a peer review body takes one of several specified actions against a physician and surgeon licensed by that board. Existing law requires the board to establish a pilot program of early detection of potential quality problems and to report its findings on these matters to the Legislature before April 1, 2003.

This bill would change this reporting date to April 1, 2004.

Existing law requires designated persons to file an 805 report if a licentiate resigns, requests a leave of absence, or withdraws or abandons an application to obtain or renew staff

privileges or membership after notice of an investigation or impending denial or rejection of the application.

This bill would instead require that the 805 report be filed if the licentiate takes any of those specified actions after notice of an impending investigation or denial or rejection of the application.

(2) Existing law provides for the Joint Legislative Sunset Review Committee, which is authorized to act until January 1, 2004. Existing law provides for, within the Board of Consumer Affairs, the existence of (a) the Board of Psychology, which is repealed January 1, 2006, (b) the Veterinary Medical Board, which is repealed January 1, 2005, (c) the Board of Behavioral Sciences, which is repealed January 1, 2006, (d) the California Architects Board, which is repealed January 1, 2005, (e) the Board for Professional Engineers and Land Surveyors, which is repealed January 1, 2005, (f) the Board for Geologists and Geophysicists, which is repealed on January 1, 2006, (g) the Court Reporters' Board of California, which is repealed January 1, 2006, and, (h) the Structural Pest Control Board, which is repealed January 1, 2006. Existing law provides that these boards are subject to the review of the Joint Legislative Sunset Review Committee upon their repeal. Existing law also requires the Joint Legislative Sunset Review Committee to hold hearings during the interim recess of 2003 on the need to continue the existence of the Osteopathic Medical Board of California.

This bill would extend the repeal dates for the boards by one year. The bill would also extend the time by which the Joint Legislative Sunset Review Committee is required to hold hearings on the Osteopathic Medical Board of California to the interim recess of 2004.

(3) The Osteopathic Medical Board of California is required to prepare an analysis and submit a report to the Joint Legislative Sunset Review Committee on or before September 1, 2003.

The bill would extend the date by which the board is required to submit the report to September 1, 2004.

(4) This bill would incorporate additional provisions to Section 473.15 of the Business and Professions Code, to take effect if both this bill and SB 1954 are enacted and become effective on or before January 1, 2003, and this bill is enacted last.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1013 (SB 2026) Committee on Business and Professions. Professions and vocations.

(1) Existing law provides for the licensure and regulation of marriage and family therapists by the Board of Behavioral Sciences.

This bill would change references to the obsolete term "marriage, family, and child counselor" to "marriage and family therapist" and would also change references to the term "Board of Behavioral Science Examiners" to "Board of Behavioral Sciences." The bill would make other related changes.

(2) Existing law, the Professional Engineers Act, regulates the licensing and regulation of professional engineers. The act prohibits and makes it a misdemeanor to use certain engineering titles without being registered as such, and provides that an engineer-in-training certificate does not authorize a person to use those titles. The act also subjects a person who violates certain misrepresentation provisions in connection with the offer or performance of engineering services for the repair of damage to a residential or nonresidential structure caused by a natural disaster for which a state of emergency is proclaimed by the Governor to certain fines and imprisonment.

This bill would include in the prohibitions against the unauthorized use of specified titles the title of "soil engineer," and would make such a misrepresentation a misdemeanor. The bill would provide that an engineer-in-training certificate does not authorize a person to use that title. The bill would also, with regard to the fines and penalties for misrepresentations in connection with services for damage caused by natural disaster, remove the requirement

that the disaster be natural, and would instead apply them to any disaster for which a state of emergency is proclaimed by the Governor.

By expanding the titles that a person is prohibited from using without licensure, the violation of which is a crime, the bill would impose a state-mandated local program.

(3) Existing law provides a “Good Samaritan” immunity with respect to liability in negligence for personal injury, wrongful death, or property damage for an engineer who voluntarily and without compensation provides structural inspection services at the scene of a declared national, state, local emergency caused by earthquake, flood, riot, or fire, at the request of certain public officials.

This bill would expand the immunity to apply to any declared national, state, or local emergency.

(4) Existing law provides for the regulation of locksmiths by the Bureau of Security and Investigative Services in the Department of Consumer Affairs. Existing law exempts certain people from the provisions regarding locksmiths.

This bill would also exempt from the provisions a new motor vehicle dealer or an employee of a new motor vehicle dealer acting within the scope of employment at the dealership.

(5) Existing law, the Contractors’ State License Law, provides for the licensure and regulation of contractors by the Contractors’ State License Board. The registrar is the executive officer who carries out the board’s administrative duties and tasks delegated by the board and who is authorized to issue a citation for a violation of specified provisions that may result in the assessment of a civil penalty.

Existing law authorizes the board to hire licensed professionals for site investigations of consumer complaints and specifies what type of contracts a general contractor may undertake while acting as a subcontractor. Existing law exempts certain contractors from testing for a specialty contractors’ license and provides that the registrar may continue investigating a contractor if the contractor’s license has expired or has been suspended. Existing law additionally authorizes the registrar to renew a license that has been expired for up to 3 years if the appropriate form is filed and fee is paid to the board and prohibits the current annual cost index adjustment from taking effect until the registrar performs the necessary calculations.

This bill would authorize the board to contract with other professionals, including interpreters, manufacturer’s representatives, and accountants when conducting an investigation or prosecuting a licensee. The bill would specify that a general contractor may subcontract with an appropriately licensed contractor. The bill would provide that the registrar would have jurisdiction over a contractor even if the contractor’s license has been canceled or forfeited by operation of law, and would revise the type of actions that constitute a course of disciplinary action. The bill would also remove the exemption from testing for a specialty contractor’s license. The bill would authorize an automatic adjustment to the current annual cost index March 1 of each year. The bill would make conforming changes.

(6) Existing law repeals the Structural Fumigation Enforcement Program on July 1, 2003. This bill would extend that program to July 1, 2006.

(7) Existing law, the Professional Land Surveyors’ Act, provides for the licensure and regulation of professional land surveyors by the Board for Professional Engineers and Land Surveyors. Existing law prohibits a person from using certain terms to describe his or her professional activity unless the person has a valid land surveyors’ license. Existing law requires a county recorder to provide a survey preparer with specified data within 10 days of filing a survey. Existing law provides that a violation of the act is a crime.

This bill would prohibit a person from using the term “geomatics engineer” unless the person has a valid land surveyors’ license. The bill would require a county recorder to provide a survey preparer with specified data within 10 days of filing a survey only if the survey preparer provides the recorder with a postage-paid, self-addressed envelope. The bill would make conforming changes.

By expanding the use of prohibited terms used to identify land surveyors, the violation of which is a crime, the bill would impose a state-mandated local program.

(8) Existing law, the Uniform Controlled Substances Act defines Schedule IV drugs to include narcotic drugs, depressants, and stimulants as drugs containing certain quantities of specified substances. Existing law makes the unauthorized possession, use, and sale of these drugs unlawful, as specified.

This bill would expand the definition of narcotic drugs to include a drug containing butorphanol. The bill would expand the definition of depressants to include drugs containing Clobazam, Estazolam, Halazepam, Midazolam, Nitrazepam, Zaleplon, and Zolpidem. The bill would expand the definition of stimulants to include drugs containing Mezendol and Modafinil.

By increasing the number of drugs that are classified as Schedule IV drugs, this bill would impose a state-mandated local program.

(9) Existing law requires that controlled substances be stored in a warehouse licensed by the California State Board of Pharmacy, with specified exceptions. Existing law sets forth licensure and regulation requirements for licensed warehousemen.

This bill would delete these provisions.

(10) Existing law provides that a patient or patient representative is entitled to inspect patient records upon presenting a written request to a health care provider and payment of reasonable clerical costs.

This bill would include physical therapists in the definition of health care providers for these purposes.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1014 (SB 2083) Polanco. English language learners.

(1) Existing law relating to English language education for immigrant children, with certain exceptions, requires that all children in California public schools be taught English by being taught in English, and in particular, requires that all children be placed in English language classrooms.

This bill would enact the English Learner and Immigrant Pupil Federal Conformity Act (the act) to ensure that instructional services are provided to pupils with limited English proficiency and immigrant pupils in conformity with federal requirements that are designed to ensure that all pupils have reasonable access to educational opportunities with regard to English and other core curriculum areas of instruction. New duties imposed on school districts by this bill would result in a state-mandated local program.

This bill would authorize a local education agency to form a consortium with one or more other local educational agencies or one or more other local educational agencies, in collaboration with an institution of higher education, community-based organization, or a state education agency to apply for federal Title III funds.

(2) The bill would provide that federal funds appropriated in the Budget Act of 2002 pursuant to the federal No Child Left Behind Act of 2001 are to be used for purposes of this act.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would declare that it is to take effect immediately as an urgency state.

Ch. 1015 (AB 55) Shelley. Corporations: disclosure statements.

Existing law, the General Corporation Law, requires a domestic corporation and a foreign corporation to file statements with the Secretary of State disclosing specified information concerning its operation biennially.

This bill would require the statement to instead be filed annually. The bill would specify additional information that a publicly traded corporation is required to include in these statements. The bill would make the information contained in the statements open to public inspection and would require the Secretary of State, prior to December 31, 2004, to make this information available on an online database. The bill would also require a corporation to pay a \$5 disclosure fee when filing the statement in addition to any other fees required. The bill would specify the use of this fee, including the deposit of one-half of the fee revenue into the Victims of Corporate Fraud Compensation Fund, which would be established by the bill. The bill would require the Secretary of State to administer the fund and to adopt regulations regarding its administration and the eligibility of victims to receive compensation.

Ch. 1016 (AB 857) Wiggins. Infrastructure planning: priorities and funding.

(1) Existing law requires the Governor, in conjunction with the Governor's Budget, to submit annually to the Legislature a proposed 5-year infrastructure plan containing specified information concerning infrastructure needed by state agencies, schools, and postsecondary educational institutions and a proposal for funding the needed infrastructure.

This bill would clarify the information that is required to be included in a proposal for funding state infrastructure identified in the 5-year plan.

(2) Existing law requires the Governor to prepare and cause to be maintained, reviewed, and revised a comprehensive State Environmental Goals and Policy Report.

This bill would require any revision to the report on and after January 1, 2004, to provide that the goals are consistent with state planning priorities, and would require a state agency that requests infrastructure to specify how that infrastructure is consistent with those priorities. This bill would define those priorities, which relate to infrastructure that supports infill development and redevelopment, cultural and historic resources, environmental and agricultural resources, and efficient development patterns.

(3) Existing law establishes proceedings for the mediation and resolution of land use disputes and makes those proceedings applicable to specified actions filed prior to January 1, 2002.

This bill would extend that date to January 1, 2006.

Ch. 1017 (AB 1421) Thomson. Mental health: involuntary treatment.

Existing law, the Lanterman-Petris-Short Act, makes provision for the involuntary treatment of any person with a mental disorder who, as a result of the mental disorder, is a danger to others or to himself or herself, or is gravely disabled.

This bill, until January 1, 2008, would enact the Assisted Outpatient Treatment Demonstration Project Act of 2002, which would create an assisted outpatient treatment program for any person who is suffering from a mental disorder and meets certain criteria. The program would operate in counties that choose to provide the services.

The program would involve the delivery of community-based care by multidisciplinary teams of highly trained mental health professionals with staff-to-client ratios of not more than 1 to 10, and additional services, as specified, for persons with the most persistent and severe mental illness. This bill would specify requirements for the petition alleging the necessity of treatment, various rights of the person who is the subject of the petition, and hearing procedures. This bill would also provide for settlement agreements as an alternative to the hearing process. This bill would provide that if the person who is the subject of the petition fails to comply with outpatient treatment, despite efforts to solicit compliance, a licensed mental health treatment provider may request that the person be placed under a 72-hour hold based on an involuntary commitment.

This bill would also require each county operating an outpatient treatment program pursuant to the bill to provide certain data to the State Department of Mental Health, and would impose requirements upon the department to report to the Legislature, as specified.

The bill would also require the department to develop a specified training and education program for use in counties participating in the program pursuant to the bill.

Ch. 1018 (AB 1698) Committee on Judiciary. Legal assistants.

Existing law defines and regulates the activities of a legal document assistant and unlawful detainer assistant. Existing law requires a legal document assistant or unlawful detainer assistant to register in the county in which his or her principal place of business is located and restricts the type of information that he or she may provide for compensation. Existing law exempts from this regulation certain persons, including immigration consultants, registered process servers, and providers of services that are regulated by federal law. Existing law prescribes minimum qualifications to register as a legal document assistant or unlawful detainer assistant.

Existing law requires an applicant for registration as a legal document assistant or unlawful detainer assistant to be denied if, among other things, the applicant has suffered certain criminal convictions. Existing law requires each county to maintain a register of legal document assistants and unlawful detainer assistants. Existing law proscribes certain fraudulent conduct by a legal document assistant or unlawful detainer assistant. Existing law makes a violation of certain of its provisions by a legal document assistant or unlawful detainer assistant a misdemeanor.

Existing law provides for the repeal of these provisions on January 1, 2003, or the date the Director of the Department of Consumer Affairs suspends those requirements, whichever first occurs.

This bill instead would make these requirements operative indefinitely. By extending indefinitely the definition of a crime and the registration of legal document assistants duties and unlawful detainer assistants applicable to counties, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1019 (AB 1969) Bill Campbell. Water quality: civil liability.

(1) Existing law, the Porter-Cologne Water Quality Control Act, with certain exceptions, subjects persons who violate various provisions of the act or the federal Clean Water Act to civil penalties, including a mandatory minimum penalty of \$3,000 for the first serious violation and each additional serious violation in any period of 6 consecutive months, except that if no serious violation has occurred in the prior 6 months, the state board or regional board, in lieu of assessing the penalty applicable to the first serious violation, may elect to require the discharger to spend an amount equal to the penalty for a supplemental environmental project in accordance with the enforcement policy of the state board and any applicable guidance document, or to develop a pollution prevention plan. Existing law also provides that a mandatory minimum penalty of \$3,000 be assessed for each violation whenever the person meets certain requirements four or more times in any period of 6 consecutive months. Existing law provides that those penalties do not apply to a violation of an effluent limitation where the waste discharge is in compliance with either a cease and desist order if the cease and desist order or time schedule order is issued on or after July 1, 2000, and prescribes the actions that the discharger is required to take in order to correct the violations and the regional board finds that the discharger is not able to consistently comply with one or more of the effluent limitations established in the waste discharge requirements applicable to the waste discharge.

This bill would permit the regional board to find that the discharger is not able to consistently comply with one or more of the effluent limitations established in the waste discharge requirements applicable to the waste discharge if the discharger is a publicly owned treatment works located in Orange County that is unable to meet effluent limitations for biological oxygen demand, suspended solids, or both, because the publicly owned treatment works was previously operating under modified secondary treatment requirements, voted on July 17, 2002, to not apply for a renewal of the modified secondary treatment requirements, and is in the process of upgrading its treatment facilities to meet the secondary treatment standards.

(2) Under existing law, the State Water Resources Control Board and the California regional water quality control boards prescribe waste discharge requirements for the discharge of wastewater by publicly owned treatment works in accordance with the federal national pollutant discharge elimination system (NPDES) permit program and the Porter-Cologne Water Quality Control Act.

This bill, on and after the date determined by the Santa Ana Regional Water Quality Control Board, or January 1, 2013, whichever is earlier, would require all wastewater discharged by the Orange County Sanitation District into the Pacific Ocean to be subject to at least secondary treatment requirements of federal law, and any more stringent requirements determined to be appropriate by the state board or that regional board. The waste discharge requirements established by the bill for the district would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would incorporate additional changes in Section 13385 of the Water Code, proposed by AB 2351, to be operative only if AB 2351 and this bill are both enacted and become effective on or before January 1, 2003, and this bill is enacted after AB 2351.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 1020 (AB 312) Strom-Martin. Public education.

(1) Under the Bagley-Keene Open Meeting Act, a state agency is required to provide notice of a meeting to any person who requests it at least 10 days in advance of the meeting. The notice is required to include a specific agenda that contains a brief description of the items of business to be transacted or discussed.

This bill would require that when the board provides information to subscribers on its Internet site, concerning an agenda item, that it provide the same information that is otherwise provided to board members, and would prescribe related matters.

(2) Existing federal law, the No Child Left Behind Act of 2001 (20 U.S.C. Sec. 6301 et seq.), requires, as a condition of receipt of certain federal funds, that states meet various requirements including, at a minimum, proficiency on challenging state academic achievement standards and state academic assessments.

This bill would establish a 15-member liaison team, appointed as specified, to advise the Superintendent of Public Instruction and the State Board of Education on all appropriate matters related to the implementation of the federal No Child Left Behind Act of 2001, would require the State Department of Education staff to assist the liaison team, and would prescribe other, related matters.

The bill would require the State Department of Education to establish a Statewide System of School Support to provide a statewide system of intensive and sustained support and technical assistance for school districts and county offices of education with schools in need of improvement. The bill would require that system to be composed of regional consortia that work collaboratively with school districts and county offices of education to meet the needs of schools and school districts in need of improvement, would prescribe the order of priority

in which support would be provided under that program, and would prescribe other, related matters.

(3) Existing law, the Public Schools Accountability Act of 1999, establishes the Public Schools Performance Accountability Program that consists of the state Academic Performance Index, the Immediate Intervention/Underperforming Schools Program, and the Governor's High Achieving/Improving Schools Program. Existing law authorizes invited schools that score below the 50th percentile on specified achievement tests to receive planning grants under the Immediate Intervention/Underperforming Schools Program. Under the Immediate Intervention/Underperforming Schools Program, a school that has not met its growth targets 24 months after receiving grant funding under that program is required to be deemed a low-performing school, and may be, among other things, placed under the management of designated entities, or may be required to enter into a contract with a school assistance and intervention team for purposes of implementing the recommendations contained in the report prepared by that team for purposes of school improvement.

This bill would require the State Department of Education to allocate the amount appropriated by Schedule 4 of Item 6110-123-0001 of Section 2.00 of the Budget Act of 2002 for purposes of corrective actions undertaken at schools in need of improvement and the amount of \$29,086,000 from the amount appropriated by Schedule 1 of Item 6110-136-0890 of Section 2.00 of the Budget Act of 2002 for purposes of Title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. Sec. 6301 et seq.) to school districts and county offices of education, for expenditure during the 2002–03 fiscal year, (1) to provide \$150 per pupil for each pupil in a school that is required to enter into a contract with a school assistance and intervention team, (2) to provide an \$150 per pupil for each pupil in a school that is managed by an entity designated to manage a low-performing school under the Immediate Intervention/Underperforming Schools Program, (3) to provide funding for the support of each entity that is assigned to manage a low-performing school, (4) to provide \$75,000 for the support of each school assistance and intervention team assigned to an elementary or middle school and \$100,000 for each team assigned to a high school that enters into a contract with a school district under the Immediate Intervention/Underperforming Schools Program and would authorize such a school to receive up to \$125,000, if the State Department of Education determines that additional funding is justified, (5) to provide \$7,500,000 to the State Department of Education for purposes of the Statewide System of School Support established by the bill, (6) to provide \$75,000 to each regional consortium established by the Statewide System of School Support established by the bill, that has at least one school that has been identified as being in need of corrective action under the federal No Child Left Behind Act of 2001, and would prescribe related matters.

The bill would also transfer \$1,500,000 from Schedule 1 of Item 6110-123-0890 of Section 2.00 of the Budget Act of 2002 to Item 6110-001-0890 of Section 2.00 of the Budget Act of 2002 for purposes of state operations costs related to the bill.

The bill would state that 36 months after the Superintendent of Public Instruction undertakes certain specified actions at a state-monitored school or requires a school to contract with a school assistance and intervention team, that a school would no longer be eligible to receive funding under the Immediate Intervention/Underperforming Schools Program.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 1021 (AB 428) Shelley. State Supplementary Program.

Existing law provides for the State Supplementary Program for the Aged, Blind and Disabled (SSP), which requires the State Department of Social Services to contract with the United States Secretary of Health and Human Services to make payments to SSP recipients to supplement supplemental security income (SSI) payments made available pursuant to the federal Social Security Act.

Under existing law, benefit payments under the SSP program are calculated by establishing the maximum level of nonexempt income and federal (SSI) and state (SSP) benefits for each category of eligible recipient. The state SSP payment is the amount, when added to the nonexempt income and SSI benefits available to the recipient, that would be required to provide the maximum benefit payment.

Existing state law provides for the annual adjustment, on a calendar year basis, of the total level of combined state and federal benefits as established by statutory schedule and adjusted to reflect prior adjustments to reflect changes in the cost of living, as defined. Under existing law, any increase in state funds necessary to defray the cost of a cost-of-living adjustment in SSI/SSP payments is offset to the extent of any cost-of-living increase provided under federal law.

Existing law has provided that with respect to certain calendar years there shall be no cost-of-living adjustment to the payment schedules, but specifies that with respect to those calendar years, there shall be a pass-along of the increase in federal SSI benefits.

This bill would, commencing with the 2004 calendar year, provide, in any calendar year in which no cost-of-living adjustment is made to the combined SSI/SSP benefit, that there shall be a pass-along of any cost-of-living increase in federal SSI payments.

#### Ch. 1022 (AB 444) Committee on Budget. Human services.

Existing law requires the Department of Child Support Services to pay to each county a child support incentive payment to encourage child support enforcement efforts. Existing law requires the department to pay an additional incentive, from specified county collections, to the counties with the 10 best performance standards in certain child support-related activities.

This bill would suspend, for the 2002–03 fiscal year, the operation of the provision requiring the payment of this additional incentive.

Existing law requires the Department of Community Services and Development to administer the California Community Services Block Grant Program. Existing law provides for the designation of community action agencies and requires that each agency that qualified under specified minimum funding guidelines receive a minimum level of \$160,000 annually.

This bill would, instead, establish a formula for calculating the minimum level of funding. The bill would also provide that all eligible entities currently in good standing in the California Community Services Grant Program shall receive an increase in funding for the 2002 program year that is proportionate to the increase provided in the 2002 calendar year federal Community Services Block Grant to the state.

Existing law, the California Child Day Care Center Act, establishes certain requirements for child day care facilities, with certain exceptions.

This bill would include schoolage child care centers within the scope of the exceptions to those requirements.

Existing law requires that a site visitation be made at least annually to each licensed day care center.

This bill would provide that a site visitation shall be made to schoolage child day care centers at least triennially.

Existing law requires that the State Department of Social Services shall make unannounced spot visits to 20% of all licensed child care centers.

This bill would exclude schoolage child care centers from that requirement.

The Comprehensive Drug Court Implementation Act of 1999 requires the county alcohol and drug administrator and the presiding judge in a county to develop and submit a comprehensive multiagency drug court plan for implementing cost-effective local drug court systems.

This bill would state the intent of the Legislature that the State Department of Social Services, within its available resources, conduct an independent evaluation of a model

program in San Diego County that provides substance abuse treatment to parents who are involved in dependency court cases.

The Drug Court Partnership Act of 1998 establishes a competitive grant program to which county alcohol and drug program administrators may submit grant requests to the State Department of Alcohol and Drug Programs as part of multiagency plans that identify the resources and strategies needed for effective drug court programs. This act specifies the components of these submitted plans, and defines standards for the awarding of grants. The act also requires the department, together with the Judicial Council, to submit specified reports to the Legislature relating to the evaluation and analysis of the grant program.

This bill would repeal the Drug Court Partnership Act of 1998 on January 1, 2004, and would establish the Drug Court Partnership Act of 2002, to be administered by the department for the purpose of providing grants to assist drug courts that accept only defendants who have been convicted of felonies and placed on probation on the condition that they participate in the drug court program.

This bill would require the program to be designed and implemented by the department and the Judicial Council. The bill would specify the use of grant funds under the program, and would require the department to submit annual reports to the Legislature regarding the cost savings of the program, as specified.

This bill would state legislative intent that the program be funded by an appropriation in the annual Budget Act, and would limit the department's program administrative costs to 5% of funds appropriated for purposes of the act.

Existing law, commencing January 1, 2008, limits the use of any general acute care hospital building that is determined to be a potential risk of collapse or pose significant loss of life to nonacute care hospital purposes, and authorizes a delay in the deadline upon a demonstration by the owner that compliance would result in a loss of health care capacity that may not be provided by other general acute care hospitals within a reasonable proximity.

This bill would require a hospital requesting an extension of the deadline to state why the hospital is unable to comply with the deadline requirements, and would require the establishment of a procedure to be followed before a deadline extension grant is made.

Existing unemployment insurance law provides unemployment compensation benefits to eligible unemployed individuals.

This bill would provide that an unemployed individual shall not be disqualified for benefits solely on the basis that he or she is a student.

This bill would also require the Employment Development Department to convene a committee comprised of specified representatives to conduct a study of the state's Unemployment Trust Fund to evaluate the merits of both pay-as-you-go and counter-cyclical funding methods, and to transmit the results of the study to the Legislature on or before December 31, 2003.

Existing law authorizes the Legislature to appropriate \$61,500,000 from the Employment Training Fund in the Budget Act of 2001 to fund the local assistance portion of welfare-to-work activities under the CalWORKs program.

This bill would authorize the Legislature to appropriate \$30,000,000 in the Budget Act of 2002 from the Employment Training Fund to fund the local assistance portion of welfare-to-work activities under the CalWORKs program.

Existing law requires the Director of Employment Development to employ a staff of job agents sufficient to provide direct service to all persons enrolled in the job training and placement program in each economically disadvantaged area.

This bill would repeal that requirement and would make conforming changes.

Existing law requires the Department of Child Support Services to authorize the quarterly transfer of any portion of an amount equivalent to the "state share of collections" attributable to the enforcement of parental fiscal liability and requires the department to authorize the transfer of any portion of that amount for any particular fiscal year exceeding \$3,750,000 to the Treasurer for deposit in the Foster Children and Parent Training Fund.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would refer instead to an amount equivalent to the net state share of foster care collections and would limit to \$3,000,000, commencing with the 2002–03 fiscal year, the amount that may be transferred to the fund in any fiscal year.

Existing law requires the California Health and Human Services Agency Data Center to implement a statewide automated welfare system for specified public assistance programs.

This bill would require the data center and the State Department of Social Services, in consultation with specified entities, including the Interim Statewide Automated Welfare System (ISAWS) Consortium, to develop a plan for migration of the ISAWS Consortium counties to one or more statewide automated welfare system consortia.

Under existing law, whenever any person has by means of false statement or representation or, by impersonation or other fraudulent device, obtained or retained aid under public social service program provisions for himself or herself or for a child not in fact entitled thereto, the person obtaining this aid shall be punished according to a schedule related to the amount of benefits received.

This bill would, instead, require that these crimes be committed willfully and knowingly, with the intent to deceive, and would also include the failure to disclose a material fact within the crimes subject to these criminal penalties.

By changing the definition of a crime, this bill would result in a state-mandated local program.

Existing federal law provides for allocation of federal funds through the federal Temporary Assistance for Needy Families (TANF) block grant program to eligible states, with California's version of this program being known as the California Work Opportunity and Responsibility to Kids (CalWORKs) program.

Existing law provides for the CalWORKs program, under which each county provides cash assistance and other benefits to qualified low-income families and individuals who meet specified eligibility criteria.

Existing law continually appropriates money from the General Fund to pay for a share of aid grant costs under the CalWORKs program.

Existing law establishes maximum aid grant amounts to be provided under the CalWORKs program, and provides, with certain exceptions, that the aid grant amounts shall be adjusted annually to reflect any increases or decreases in the cost of living. It provides, however, that in any fiscal year commencing with the 2001–02 fiscal year through the 2003–04 fiscal year, when there is an increase in tax relief in the vehicle license fee, then the cost-of-living increase in CalWORKs maximum aid payment levels shall occur, and, with respect to any of those fiscal years where there is no vehicle license fee tax relief, any maximum aid payment level cost-of-living increase shall be suspended.

This bill would specify that notwithstanding the limitations on CalWORKs cost-of-living adjustments during the 2001–02, 2002–03, and 2003–04 fiscal years, a cost-of-living adjustment to maximum aid payment levels shall be made for the 2002–03 fiscal year, to become operative June 1, 2003. By increasing the maximum aid payment levels under the CalWORKs program, for which a continuing appropriation is made to pay a share of those costs, this bill would result in an appropriation.

Because each county is required to administer the CalWORKs program, and pay for a portion of CalWORKs aid grant and administrative costs, the bill would create a state-mandated local program.

This bill would also revise CalWORKs requirements applicable to overpayments and underpayments of aid and would specify that any CalWORKs aid overpayment shall not be based on any difference between actual payments and the amount that would have been paid if no county error occurred or the recipient had timely reported as required. It would also exclude CalWORKs program recipients from certain excess property limitations. By imposing limitations upon the criteria for determining overpayments, and by modifying eligibility criteria with respect to property, the bill would authorize additional CalWORKs aid grant payments, thus resulting in an appropriation. Because each county is required to

administer the CalWORKs program, and pay for a portion of CalWORKs aid grant and administrative costs, the bill would create a state-mandated local program.

This bill would revise CalWORKs recipient reporting requirements. It would also require that counties make eligibility determinations based on a quarterly system, rather than a monthly system, and would provide for the implementation of a prospective budgeting system, to be applied on a quarterly basis.

This bill would provide that a recipient's eligibility shall not be redetermined for a quarter if the recipient provides information that would revise eligibility in the third month of any quarter, but would apply the changes to the following quarter. By applying the provisions for the redetermination of eligibility for aid payments for the payment during the quarter following the month for which information affecting eligibility applies, this bill would result in additional aid payments not permitted under existing law, thereby resulting in an appropriation.

Because each county is required to administer the CalWORKs program, and pay for a portion of CalWORKs aid grant and administrative costs, the bill would create a state-mandated local program.

Existing law provides for the Food Stamp Program, under which food stamps are allocated by each county in accordance with federal requirements.

Existing law provides, however, that, to the extent permitted by federal law, the department shall conform food stamp requirements to CalWORKs reporting requirements.

This bill would provide that, to the extent permitted by federal law, the department shall conform food stamp requirements to the CalWORKs reporting and budgeting requirements provided for in this bill.

Because each county is required to administer the Food Stamp Program, the bill would constitute a state-mandated local program.

The bill would make the CalWORKs budgeting and reporting provisions and Food Stamp Program provisions operative, as prescribed, upon a declaration of the State Director of Social Services that federal Food Stamp Program waivers have been granted.

Under existing law, with respect to an individual under the age of 18 years who is pregnant or has a dependent child in his or her care, income of the parent or parents of the individual is not deemed to be available to the individual for purposes of determining CalWORKs eligibility or grant level. Existing law requires the Director of Social Services to obtain any necessary federal waiver to implement these provisions, unless the federal waiver process is repealed or modified so as to make a waiver unnecessary.

This bill would delete the prohibition against deeming a parent's income available to an individual in the above circumstances, for purposes of determining CalWORKs eligibility or grant level, and would also delete the related waiver provisions. The bill would authorize the department to implement these provisions through an all county letter, or similar instructions from the director.

Existing law provides for the State Supplementary Program for the Aged, Blind and Disabled (SSP), that requires the State Department of Social Services to contract with the United States Secretary of Health and Human Services to make payments to SSP recipients to supplement Supplemental Security Income (SSI) payments made available pursuant to the federal Social Security Act.

Existing law provides for the annual adjustment of benefits under the SSP program based on changes in the cost of living, with certain exceptions, and specifies that the adjustment of the benefits shall become effective January 1 of each year.

This bill would delay the implementation of the annual 2003 calendar year cost-of-living adjustment of benefits under the SSP program until July 1, 2003.

Existing law requires that specified necessary supportive services be made available to any participant in welfare-to-work activities under the CalWORKs program. Under existing law, these supportive services include paid child care, in accordance with specified conditions.

This bill would require all CalWORKs applicants and recipients to be provided with written notice at the time of application and when they sign an original or amended welfare-to-work plan of the availability of paid child care. The bill would specify the contents of the notice to be provided, and would require the applicant or recipient to sign an acknowledgment of receipt of the child care notice required by the bill. The bill would limit payment for child care services to those services provided 30 or fewer days prior to the recipient's initial request for payment, when the written notice required by the bill has been provided. By imposing new duties on county welfare departments, this bill would create a state-mandated local program.

Existing law requires each county to develop a plan that describes how the county intends to deliver the full range of activities and services necessary to move CalWORKs recipients from welfare to work, and requires the plan to include a plan for the development of mental health employment assistance services.

This bill would authorize counties to participate in a pilot program to set aside a specific amount of funds appropriated by the Legislature to cover the costs of CalWORKs mental health employment assistance services for utilization as part of a Medi-Cal mental health managed care program. By revising the purposes for which appropriated funds may be used, this bill would result in an appropriation.

Existing law continuously appropriates money from the General Fund for the payment of benefits under the CalWORKs program.

Existing state law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, pursuant to which certain needs of eligible children in foster care are provided.

Existing law establishes a schedule of payments for providers of foster care.

This bill would revise the schedule of foster care provider payments to increase the level of payments for group home providers.

Existing law continuously appropriates funds for payments for foster care providers, and, by increasing the level of payments for foster care providers, this bill would increase the amount of funds continuously appropriated for that purpose, and would result in an appropriation.

Existing law requires that as a condition of receiving the AFDC-FC rate for a group home or foster family agency, the provider shall submit a financial audit to the State Department of Social Services.

This bill would revise the schedule of required financial audits and would require the dependent to terminate the rate of a provider who fails to submit a copy of its most recent financial audit, as prescribed.

Existing law imposes sanctions for the receipt of aid paid under the CalWORKs program, and provides that each county shall receive 25% of the actual state share of savings, including federal funds under the TANF program resulting from the detection of fraud.

This bill would provide, instead, that each county shall receive 12.5% of the amount of aid under the CalWORKs program that is repaid or recovered by a county resulting from the detection of fraud.

Existing law provides, until September 1, 2003, for the establishment of an hourly rate for supported employment services provided to clients receiving individualized services and for the reduction of that rate by the percentage necessary to ensure that projected total General Fund expenditures and reimbursements for habilitation services and vocational rehabilitation supported employment services do not exceed the General Fund and reimbursement appropriations for those services in the annual Budget Act. Existing law requires the Department of Rehabilitation to annually make 3 projections of General Fund expenditures and reimbursements.

This bill would reduce the number of projections of General Fund expenditures and reimbursements the department is required to make to 2 and specify that they shall be in a form and timeframe as determined by the Department of Finance.

Existing law establishes the hourly rates of reimbursement of providers of supported employment services provided for adults with developmental disabilities, and specifies the method of calculating the rates.

This bill would revise that method of calculating the rate for work activity programs, would increase the rate for supported employment and group services, and would require the department to suspend, for one year, rate adjustments for work-activity program services.

Existing law provides for the determination of the maximum allowable reimbursement rates for Medi-Cal drug treatment programs.

This bill would revise the method of making this determination for the 2005–06 fiscal year and subsequent fiscal years.

Existing law requires the Department of Child Support Services to provide payments to the local child support agency of \$50 per case for obtaining 3rd-party health coverage or insurance of beneficiaries.

This bill would limit that requirement to transfer those funds to the Treasurer by requiring that the authorization shall be made to the extent that funds are appropriated in the annual Budget Act.

Existing law states the intent of the Legislature to provide funds, through a single allocation of state and federal funds, to counties for the support of administrative activities undertaken by counties for the provision of benefits under the CalWORKs program and to provide work activities and supportive services in order to carry out the purposes of the program.

This bill would provide, for the 2002–03 fiscal year only, that the single allocation shall include an adjustment in the amount of \$128,000,000 of funds appropriated in the Budget Act, according to a methodology determined by the department.

Existing law requires provision of specified adult protective services on the state and local levels, including requiring each county to establish an emergency response adult protective services program to provide in-person response to reports of abuse of an elder or dependent adult. Existing law requires an immediate response to certain reports of abuse, and requires a 10-day response to reports of abuse in other circumstances, unless the county determines and documents that the elder or dependent adult in question is not in imminent danger or that a 10-day response is not necessary, as specified.

Existing law sets forth the criteria for county evaluations of abuse reports under these circumstances, and requires these criteria to be followed until specified criteria and standards are developed.

Existing law requires the State Department of Social Services to annually report to the Legislature regarding the number of cases determined not to require an immediate or 10-day in-person response, and the disposition of those cases.

This bill would delete the above requirement that the department report to the Legislature. The bill would also delete the criteria for the county's evaluation of the necessity for a 10-day response with respect to reports of abuse in a long-term care or residential care facility, and would delete a documentation requirement. This bill would instead require the State Department of Social Services to develop guidelines for implementation of the above requirements and any applicable documentation requirements.

Existing law authorizes the County of Los Angeles to pursue the development and evaluation of a pilot Internet-based health and education passport system for children in foster care. Under existing law, authorization for the pilot project is contingent on obtaining federal approval of the pilot project by January 1, 2003.

This bill would extend the date by which the county is required to gain federal approval for the pilot project to January 1, 2004.

Existing law imposes sanctions for the receipt of aid paid under the CalWORKs program, and provides that each county shall receive 25% of the actual state share of savings, including federal funds under the TANF program resulting from the detection of fraud.

Existing law states the intent of the Legislature to conform state statutes to the federal Adoption and Safe Families Act of 1997, and to reinvest any incentive payments received through implementation of the federal act into the child welfare system in order to provide increased postadoption social services, as needed, to families with adopted children from the public foster care system.

This bill would revise that statement of intent to state the intent of the Legislature to reinvest any incentive payments received through implementation of the federal act into the child welfare system in order to provide adoption services.

Existing law contains various programs for job training and employment investment. Among other things, provisions are made for local workforce investment boards. In addition, a California Workforce Investment Board has been established in accordance with federal law.

This bill would also require the California Workforce Investment Board to convene a one-stop data stakeholder's group by January 1, 2003, to discuss and make findings as to specified matters relating to one-stop centers and to report those findings to the Joint Legislative Budget Committee.

Existing law, the Habilitation Services Program, which is administered by the Department of Rehabilitation, provides for reimbursement of various employment-related services for persons with developmental disabilities.

This bill would modify reimbursement rate, service delivery, and other Habilitation Services Program provisions.

Existing law, the Budget Acts of 1998, 1999, and 2001, provides that certain funds appropriated to the State Department of Social Services for local assistance for CalWORKs services shall be for payment of county incentives to move CalWORKs recipients to employment.

This bill would prohibit any additional use of those funds for county incentives, as specified.

Under existing law, the State Department of Social Services generally administers the CalWORKs program.

This bill would require the department to convene a working group, with specified membership, to discuss policy changes and other issues relating to the federal TANF program, and the CalWORKs program. The bill would require the working group to meet at least 3 times during the fall of 2002, and to produce specified documents. This bill would require the department to report to the Legislature regarding the outcome of the working group.

Under existing law, the State Department of Alcohol and Drug Programs administers various grant programs under which grants are provided to counties for alcohol and drug abuse services.

The bill would require the State Department of Alcohol and Drug Programs to apply for specified federal State Incentive Grant funds.

This bill would provide that the provisions of this act are severable.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1023 (AB 593) Oropeza. State government.

(1) This bill would amend and supplement the Budget Act of 2002 by providing for various reductions in appropriations contained in that act.

(2) Existing law, with certain exceptions, requires the Controller, commencing July 1, 2001, to abolish any state position that was vacant continuously for 6 consecutive monthly pay periods during the period between July 1 and June 30 of the preceding fiscal year. Existing law also requires that positions that were continuously vacant for 6 consecutive monthly pay periods during a fiscal year because of a hiring freeze in effect during part or all of that period be abolished unless the Director of Finance is notified of the need for, and approves of, the continuance of the positions.

This bill would require at least 1,000 positions in state government to be abolished, not later than June 30, 2004, by the Director of Finance, according to specified criteria, and a report to the Joint Legislative Budget Committee and the Joint Legislative Audit Committee, as specified.

(3) This bill would provide that total expenditure authorizations from the General Fund for the 2003–04 fiscal year shall be limited to the total revenues to the General Fund for the 2003–04 fiscal year.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1024 (AB 692) Aroner. Human services.

(1) Existing law, operative upon the receipt of specified federal funds for the purpose of the establishment of an individual development account project, provides for the establishment of a program that is consistent with the requirements of federal law, to be known as the California Savings and Asset Project. The Governor is required to designate an agency or department to administer the project.

This bill instead would establish an individual development account program to be known as the California Savings and Asset Project, to be administered by the Employment Development Department through a contract with a qualified nonprofit facilitator, as defined, according to specified criteria. It would require that these provisions become operative upon an appropriation of funds by the Legislature, or the allocation of existing specified federal funds by the Governor, for the purpose of establishing the project. This bill would make various conforming changes.

(2) Existing federal law provides for allocation of federal funds through the federal Temporary Assistance for Needy Families (TANF) block grant program to eligible states, with California's version of this program being known as the California Work Opportunity and Responsibility to Kids (CalWORKs) program.

Under the CalWORKs program, each county provides cash assistance and other benefits to qualified low-income families and individuals who meet specified eligibility criteria.

Existing law requires an annual redetermination of eligibility for benefits under the CalWORKs program, and, in addition to the requirement for the annual redetermination of eligibility, requires the State Department of Social Services to establish regulations consistent with federal law to implement a recipient periodic reporting system for use in determining monthly eligibility and the amount of the grant.

This bill would additionally require a recipient to report certain changes to the county orally or in writing within 10 days of the change.

Because each county is required to administer the CalWORKs program, this bill would create a state-mandated local program.

(3) Existing law provides for the State Supplementary Program for the Aged, Blind and Disabled (SSP), which requires the State Department of Social Services to contract with the United States Secretary of Health and Human Services to make payments to SSP recipients to supplement supplemental security income (SSI) payments made available pursuant to the federal Social Security Act.

Under existing law, benefit payments under the SSP program are calculated by establishing the maximum level of nonexempt income and federal (SSI) and state (SSP) benefits for each category of eligible recipient. The state SSP payment is the amount, when added to the nonexempt income and SSI benefits available to the recipient, that would be required to provide the maximum benefit payment.

Existing state law provides for the annual adjustment, on a calendar year basis, of the total level of combined state and federal benefits as established by statutory schedule and adjusted to reflect prior adjustments to reflect changes in the cost of living, as defined. Under existing law, any increase in state funds necessary to defray the cost of a cost-of-living adjustment in SSI/SSP payments is offset by any cost-of-living increase provided under federal law.

This bill would delay the implementation of the annual 2003 calendar year state cost-of-living adjustment of benefits under the SSP program until June 1, 2003, but would provide that the SSP payment schedules shall include the pass-along of any federal cost-of-living increases in federal SSI benefits in that period.

(4) Existing law provides for the Food Stamp Program, under which food stamps are allocated by each county in accordance with federal requirements.

Existing law provides, however, that, to the extent permitted by federal law, the department shall conform food stamp requirements to CalWORKs reporting requirements.

This bill would provide that, to the extent permitted by federal law, the department shall conform food stamp requirements to certain CalWORKs reporting and budgeting requirements.

Because each county is required to administer the Food Stamp Program, the bill would constitute a state-mandated local program.

The bill would provide that the food stamp and CalWORKs provisions shall become operative only if AB 444 becomes operative.

(5) Existing law provides for the enactment of an annual Budget Act for the usual and ordinary expenses of government.

This bill would revise a provision of AB 425, which proposes to enact a Budget Act for the 2002–03 fiscal year, that limits certain federal penalty allocations in implementing child support services. This revision would become operative only if AB 425 becomes operative.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1025 (AB 1984) Steinberg. After school programs: high school pupils.

Existing law establishes the Before and After School Learning and Safe Neighborhoods Partnerships Program to create incentives to establish locally driven before and after school enrichment programs for pupils in kindergarten and grades 1 to 9, inclusive.

This bill would establish the 21st Century High School After School Safety and Enrichment for Teens program to create incentives for establishing locally driven after school enrichment programs for high school pupils in the hours after the regular schoolday. The bill would require the State Department of Education to select a minimum of 10 programs to receive funding, would set forth guidelines for operating the programs, and would prescribe application requirements and selection criteria.

This bill would require the department to implement the program only to the extent that federal funds are appropriated for the program. The bill would state the intent of the Legislature that available federal funds be appropriated annually for the program through the

annual Budget Act. The bill would authorize a successful applicant to receive a 5-year grant, subject to annual reporting and recertification requirements.

Ch. 1026 (AB 2217) Strom-Martin. Education: Quality Education Model.

Under existing law, the Superintendent of Public Instruction is required to coordinate the development of model curriculum standards and to design and implement a statewide pupil assessment program involving systematic achievement testing of pupils in kindergarten and grades 1 to 12, inclusive.

This bill would establish the California Quality Education Commission for the purpose of developing, evaluating, validating, and refining a quality education model, as specified, for prekindergarten through grade 12. The bill would require the commission to report its findings and recommendations to the Governor and the Legislature no later than 12 months after the commission first convenes. Upon delivery of the report, the bill would require the commission to continue as a standing commission with specified responsibilities.

The bill would repeal the provisions of the bill as of January 1, 2008.

Ch. 1027 (AB 2334) Nakano. Alcoholic beverages.

Existing law permits the Department of Alcoholic Beverage Control, under certain conditions, to revoke or suspend the licenses granted to alcoholic beverage licensees.

This bill would authorize the department to revoke or suspend an alcoholic beverage license, if the licensee, or the agent or employee of the licensee, violates a specified provision of statutory law relating to the furnishing of drug paraphernalia.

Ch. 1028 (AB 2531) Steinberg. School accountability: pupil performance.

Existing law, the Public Schools Accountability Act of 1999, requires the Superintendent of Public Instruction, with approval of the State Board of Education, to develop the Academic Performance Index (API), consisting of a variety of indicators, to be used to measure performance of schools. The act requires the Superintendent of Public Instruction to develop, and the State Board of Education to adopt, expected annual percentage growth targets for all schools based on their API baseline score and prescribes a minimum percentage growth target annually.

This bill would establish the High School Pupil Success Act, to provide grants and consultation to school districts with high schools, pursuant to a request for proposals process, to develop a reform and redesign plan for their high school systems to raise pupil achievement. The bill would be administered by the Superintendent of Public Instruction and the Secretary for Education, in consultation with an advisory committee made up of representatives of the State Department of Education, the State Board of Education, the California School Boards Association, the Association of California School Administrators, teacher associations, the California Parent Teacher Association, the California County Superintendents Educational Services Association, and others appointed by the Secretary for Education. The bill would appropriate \$100,000 from the General Fund to the Superintendent of Public Instruction for purposes of the program. The appropriation would be included in the amounts appropriated by the state for purposes of meeting the state's minimum funding obligation to school districts and community college districts under Section 8 of Article XVI of the California Constitution. The provisions of the bill would become inoperative on January 1, 2010.

Ch. 1029 (AB 2868) Wright. Personal information reporting.

(1) Existing law relating to defamation provides that libel is a false and unprivileged written publication that injures the reputation, and that slander is a false and unprivileged publication, orally uttered, that injures the reputation, as specified. Existing law makes privileged, and therefore protected from the threat of civil action, certain publications and communications, including those communications regarding job performance and qualifications, as specified.

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would revise the provisions concerning the privileged character of communications regarding job performance and qualifications to specify their application to applicants for employment and to authorize a current or former employer, or the employer's agent, to answer whether or not the employer would rehire a current or former employee.

(2) Existing law establishes a process by which a consumer may dispute the accuracy of information in a consumer credit report. Existing law requires a consumer credit reporting agency to promptly and permanently block information in specified instances, and establishes requirements for unblocking information after an allegation of identity theft.

This bill would exclude from these provisions a consumer reporting agency that acts only as a reseller of credit information, as specified, and that does not maintain a permanent database of credit information from which new credit reports are produced.

(3) Existing law requires an investigative consumer reporting agency to keep a copy of an investigative consumer report for at least 3 years.

This bill would reduce the period of time the report must be made available to the consumer to 2 years after the report is provided.

(4) Existing law prohibits an investigative consumer reporting agency from making or furnishing an investigative consumer report containing specified items of information, except where the report is used in the underwriting of life insurance, as specified.

This bill would provide an additional exception to the above-described prohibition on specified items of information when an employer is explicitly required by a governmental regulatory agency to check for records that investigative consumer reports are prohibited from containing when the employer is reviewing a consumer's qualification for employment.

(5) Existing law requires an investigative consumer reporting agency to require that prospective users of information identify themselves and to certify the purposes for which the information sought will be used. Existing law further requires an investigative consumer reporting agency to keep a record of the purposes for which information is sought. Existing law provides that an investigative consumer reporting agency that violates these and other specified provisions is liable to the affected consumer for not less than \$25,000, in addition to liability for actual damages or \$10,000, whichever is greater, as specified, reasonable attorneys' fees, costs of the action, and punitive damages, in the discretion of the court, when the violation is willful or grossly negligent.

This bill would permit an investigative consumer reporting agency to assume that the purpose for which a user seeks information remains the same as that which a user has previously stated. The bill would require the investigative consumer reporting agency to inform the user that the user is obligated to notify the agency of any change in the purpose for which information will be used. The bill would also limit the liability of an investigative consumer reporting agency as described above, to an amount not less than \$25,000, reasonable attorneys' fees, and the costs of the action, as specified.

(6) Existing law requires an investigative consumer reporting agency to promptly notify a consumer, as specified, when information deleted from a consumer's file is reinserted, and requires the agency to provide a notice to the consumer stating that the consumer has a right to a reinvestigation of the information and to add a statement to the file, as specified.

This bill would provide an exception to the notice regarding reinvestigation of the information and the right to add a statement when the reinsertion results from the resolution of a prior dispute, and was made at the request of, or with the prior approval of, the consumer.

(7) Existing law requires an investigative consumer reporting agency to provide certain notices to specified parties who have received, in the prior 2 years, an investigative consumer report regarding a consumer when information is deleted from a consumer's file or following the filing of a specified dispute regarding the information, unless the consumer explicitly requests this notification not be given.

This bill would provide that the notifications described above be furnished, instead, to any person specifically designated by the consumer.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1030 (AB 1068) Wright. Personal information.

(1) The Consumer Credit Reporting Agencies Act regulates consumer credit reporting agencies and the manner in which these agencies assemble and evaluate consumer credit information, as specified. Existing law prohibits the sale of a consumer debt if the file of the consumer is blocked, as specified, or if the consumer provides in writing that the debt is not his or her obligation due to identity theft. Existing law exempts from those prohibitions the sale of a debt to a subsidiary or affiliate of the creditor.

This bill would revise and recast those provisions, and define the term “debt collector.” The bill would additionally require, for continual exemption from those prohibitions, that a subsidiary or affiliate not take any action to collect on the debt.

(2) Existing law establishes a process by which any person who uses a consumer credit report in connection with a credit transaction is required to verify the address of the consumer, confirm that the transaction is not the result of identity theft, and verify the identity of the consumer, under specified circumstances.

This bill would delete those provisions and establish a different process by which any person who uses a consumer credit report in connection with the approval of credit based on an application for an extension of credit is required to make verifications and confirmations, under specified circumstances. The bill would require a creditor to provide written notice to a victim of identity theft of his or her rights, pursuant to specified provisions. The bill would exempt certain entities, as specified, from certain notice requirements. The bill would also exclude from these provisions a United States Army or Air Force post office address or a United States Fleet post office address.

(3) Existing law requires that a person that procures or causes to be prepared an investigative consumer report in connection with the underwriting of insurance or for employment purposes other than suspicion of wrongdoing meet specified conditions, including, but not limited to, the name and address of the agency conducting the investigation, the nature and scope of the investigation, and information on consumer inspection.

This bill would impose further requirements on the recipient of an investigative consumer report, as specified, unless the report is procured or caused to be prepared by an employer for employment purposes due to suspicion of wrongdoing or misconduct.

(4) Existing law establishes a process by which a consumer may dispute the accuracy of information in a consumer credit report. Existing law requires an investigative consumer reporting agency to make reinvestigations, as specified, and, if information is deleted or modified, to notify the appropriate source from which the disputed information was obtained and the consumer.

This bill would provide that notification to the consumer need not provide the identity of the source of the disputed information.

(5) Existing law requires an investigative consumer reporting agency to attach notices as cover sheets to any report, in at least 16-point type, setting forth disclosures and warnings, as specified, and to send a copy to the subject of the report.

This bill would require those notices to be placed on the first page of an investigative consumer report in 12-point boldface type, including a notice providing that information generated as a result of identity theft, including evidence of criminal activity, may be inaccurately associated with the subject of the report. The bill would also delete the copy requirement.

(6) Existing law permits an investigative consumer reporting agency to prepare an investigative consumer report for various purposes and entities.

This bill would provide that if an investigative consumer report results in the denial of a specified insurance policy or the increase of the hiring of a dwelling unit, the user of the report is to notify the consumer of that adverse action and the name and address of the agency that made the report.

(7) Existing law provides that any person that collects consumer information, without the services of an investigative consumer reporting agency, provide that information to the consumer, as specified.

This bill would instead require that any person that collects or receives consumer information for employment purposes that constitute matters of public record, as defined, to provide that information on no more than one occasion to the consumer in a specified form. The bill would require that any person prior to taking adverse action in response to that information give the consumer a copy of the public record. The bill would also require that person to provide specified information on any job application form, or any other written form, to permit a consumer to waive his or her right to receive that information, except as specified.

(8) Existing law requires an employer to make employee personnel records available for review, with specified exceptions, and permits an employer or employment agency to obtain employee information without the use of an investigative consumer reporting agency. Existing law generally provides that attorney-client communications and attorney work product are privileged, with exceptions.

This bill would declare that these provisions are unaffected by the bill.

(9) Existing law prohibits any person or entity, not including a state or local agency, as of July 1, 2002, from using an individual's social security number in certain ways, including posting it publicly or requiring it for access to products or services.

This bill would exempt any financial institution from that prohibition until July 1, 2003, for specified purposes.

(10) This bill would provide that the requirement that a creditor is to provide written notice to a consumer identified as a victim of identity theft of his or her rights is to become operative 90 days after the effective date of this measure.

(11) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1031 (AB 2997) Committee on Budget. Parks and recreation and coastal protection: grants.

(1) The existing Roberti-Z'berg-Harris Urban Open-Space and Recreation Program Act provides for grants to cities, counties, and districts to supplement, but not supplant, local expenditures for park and recreation areas or facilities. The act provides, with respect to grant moneys received for high priority park and recreation projects that satisfy the most urgent park and recreation needs, that local matching money is not required with respect to an applicant that has urgent unmet needs for recreational lands and lacks the financial resources to acquire recreational lands, as determined pursuant to a formula set forth in regulations adopted by the Director of Parks and Recreation after a public hearing.

This bill would provide that local matching money shall not be required with respect to an applicant that has urgent unmet needs for recreational lands or facilities, and lacks the financial resources to acquire or develop recreational lands or facilities.

(2) Existing law requires that 50% of the amount of funds received by the state pursuant to Section 8 (g) of the federal Outer Continental Shelf Lands Act over the amount received in the 1996 calendar year be available, on an annual basis, for appropriation to the Secretary of the Resources Agency for grants to coastal counties and cities pursuant to the Coastal Resources and Energy Assistance Act (CREA).

This bill would prohibit the allocation, for the 2002-03 fiscal year, of those federal funds received by the state to or by the secretary for grants to coastal counties and cities pursuant to the CREA.

The bill would repeal this provision on January 1, 2004.

- (3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1032 (AB 3005) Committee on Budget. Education.

(1) Existing law, the California High School Coaching Education and Training Program, encourages the California Interscholastic Federation to establish a statewide panel for purposes of implementing the program, subject to funds being appropriated for that purpose.

This bill would further condition implementation of the program on funds being appropriated for that purpose in the annual Budget Act.

(2) Existing law requires the governing board of a school district to notify, as prescribed, the parent or guardian of all pupils registered in schools of the district of the availability of rules of the district pertaining to pupil discipline. Existing law requires each public school to adopt, every 4 years, rules and procedures on school discipline and requires the school to solicit the participation, views, and advice of representatives of parents, teachers, school administrators, school security personnel, and pupils.

This bill would delete these required actions and would instead authorize school districts and schools to take these actions at their discretion.

(3) Existing law provides funding to school districts for the purpose of establishing and implementing school development plans.

This bill would repeal the provisions of law regarding school development plans.

(4) Existing law provides for the establishment of resource agencies and consortia.

This bill would repeal the provisions of law regarding resource agencies and consortia.

(5) Existing law, until July 1, 2003, authorizes the governing board of a school district to accept the interdistrict transfer of pupils. If a school district accepts these transfers, existing law requires a school district to follow certain procedures. Existing law authorizes the parent or guardian of a pupil who is prohibited from transferring to appeal the decision to the county board of education.

This bill would make following the procedures regarding the interdistrict transfer optional for school districts and would delete the right of a parent or guardian to appeal a school district's negative decision regarding an interdistrict transfer.

(6) Existing law, which sunset on June 30, 1995, provided for demonstration programs in intensive instruction. Existing law requires that funding for a sunset program continue for the general purposes of that program.

This bill would repeal those programs and the sunset provision.

(7) Under existing law, when elections are consolidated, the governing body ordering consolidation may provide for the expenses of the election.

This bill would prohibit the cost to administer absentee ballots from being prorated to a school district where issues and elective offices related to school districts are included on a ballot election with noneducation issues and elective offices. The bill would require the Commission on State Mandates to delete school districts, county boards of education, and community college districts from the list of eligible claimants in the Parameters and Guidelines for the Absentee Ballot Mandates.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1033 (AB 3009) Committee on Budget. Personal income and corporation taxes: credits: energy surcharge.

(1) The Natural Heritage Preservation Tax Credit Act of 2000 requires the Wildlife Conservation Board to implement a program under which property, as defined, may be contributed to the state, any local government, as defined, or to any nonprofit organization designated by a local government, based on specified criteria, in order to provide for the protection of wildlife habitat, open space, and agricultural lands.

The Personal Income Tax Law and the Bank and Corporation Tax Law authorize a credit against the taxes imposed by those laws in an amount equal to 55% of the fair market value of any qualified contribution, as defined, contributed during the taxable year pursuant to the

Natural Preservation Tax Credit Act of 2000, as provided. The total amount of tax credits that may be awarded in the fiscal years 2001–02, 2002–03, 2003–04, and 2004–05 is limited to \$100,000,000, as provided.

This bill would suspend the award of tax credits in the 2002–03 fiscal year.

(2) The Energy Surcharge Law imposes a surcharge on the consumption of electrical energy purchased from an electric utility at a rate fixed by the State Board of Equalization, as specified.

This bill would, with respect to electrical energy purchased from an electric utility on or after January 1, 2003, require that the rate not exceed \$0.0003 per kilowatt-hour, or a lower rate fixed by the Energy Commission at a public meeting held each November for the following calendar year.

(3) This bill would result in a change in state taxes for the purpose of increasing state revenues within the meaning of Section 3 of Article XIII A of the California Constitution, and thus would require for passage the approval of  $\frac{2}{3}$  of the membership of each house of the Legislature.

This bill would take effect immediately as a tax levy.

#### Ch. 1034 (SB 199) Torlakson. Pollution control: grants and loans.

Existing law authorizes the California Pollution Control Financing Authority to finance various pollution control projects to control and eliminate pollution hazards to the environment. The authority is empowered, among other things, to provide grants and loans to any city or county to assist California neighborhoods suffering from high poverty or unemployment levels, or from low-income levels, to assist cities and counties in developing and implementing growth policies and programs that reduce pollution hazards and the degradation of the environment, or to promote infill development to revitalize these communities. The authority, or any other agency implementing a loan program pursuant to an interagency agreement with the authority, is authorized to adopt emergency regulations relating to the loans. The Office of Administrative Law is required to consider the adoption of the regulations to be necessary for the immediate preservation of the public peace, health and safety, and general welfare and the regulations are required to be repealed 180 days after their effective date, unless the adopting authority or agency complies with the rulemaking provisions of the Administrative Procedure Act.

Existing law prohibits the authority from awarding more than \$2,500,000 of these grants and loans.

This bill would include, within the provisions governing the adoption of emergency regulations, the adoption of emergency regulations relating to those grants and would increase the amount of those grants and loans that the authority is authorized to award to \$5,000,000.

#### Ch. 1035 (SB 1310) Alpert. School accountability: sanctions.

(1) Existing law establishes the Public Schools Accountability Act of 1999 which contains the Immediate Intervention/Underperforming Schools Program (IIUSP) and the High Priority Schools Grant Program for Low Performing Schools and requires the Superintendent of Public Instruction to develop an Academic Performance Index (API) to measure the performance of schools and to develop expected annual percentage growth targets for all schools based on their API baseline score.

Existing law requires the API to consist of a variety of indicators currently reported to the State Department of Education including, but not limited to, the results of achievement tests and high school exit examinations, and provides that only the test scores of pupils who were enrolled in a school district in the prior fiscal year may be included in the test results reported in the API.

This bill would instead provide that only the test scores of pupils who were counted as part of a school district's enrollment in the October California Basic Educational Data System's

data collection for the prior fiscal year and were continuously enrolled during that year may be included in the test results reported in the API.

(2) Existing law requires the test scores of pupils who are in the first year of enrollment in a high school district, but who, in the prior year, were enrolled in an elementary school district that normally matriculates to the high school district, to be included in the API.

This bill would repeal these provisions.

(3) Existing law deems a school that does not meet its growth targets within prescribed periods and fails to show significant growth to be a low-performing school and subjects that school to various sanctions, including the assumption by the Superintendent of Public Instruction of all the legal rights, duties, and powers of the governing board with respect to that school, reassignment of the principal, and other specified actions.

This bill would recast the various sanctions and would use the term state-monitored school for schools failing to meet growth targets within the prescribed period and failing to show significant growth. When a school is deemed to be a state-monitored school, the bill would require the governing board of the school district to inform the parents and guardians of pupils enrolled at that school that it is a state-monitored school and that it is subject to certain sanctions. The bill would specify additional requirements relating to an entity chosen to assume the management of a school, including requiring the school district to pay the costs of the entity chosen to assume management of the school.

The bill would set deadlines regarding the sanctions applied to state-monitored schools, allow the Superintendent of Public Instruction to place a trustee at a state-monitored school, and specify the duties and obligations of the school district with regard to a state-monitored school. The bill would specify how a state-monitored school would be relieved from the sanctions and would specify sanctions to which a schoolsite would be subject if a management team, trustee, or a school assistance and intervention team is assigned to a schoolsite fails to assist the school in making significant growth on the Academic Performance Index 36 months after it is assigned to the schoolsite. The bill would require the Superintendent of Public Instruction to annually withhold 20% of its contractual obligation to a management team or trustee until the superintendent is satisfied that the management team or trustee has met the contractual obligation to improve pupil learning.

Ch. 1036 (SB 1478) McPherson. Community learning center program.

Existing law establishes the Before and After School Learning and Safe Neighborhoods Partnerships Program to create incentives to establish locally driven before and after school enrichment programs for pupils in kindergarten and grades 1 to 9, inclusive.

This bill would state the intent of the Legislature that federally-funded 21st Century Community Learning Centers complement the existing Before and After School Learning and Safe Neighborhoods Partnerships Program by utilizing the existing funding provided under that existing program, and to provide the local flexibility needed to implement the federal 21st Century Community Learning Centers program through direct grants. The bill would, in accordance with the 21st Century Community Learning Centers program contained in the federal No Child Left Behind Act of 2001, allocate funds appropriated in Item 6110-197-0890 of Section 2.00 of the Budget Act of 2002 as follows, in order of priority: (1) \$1,000,000 to the State Department of Education for purposes of providing technical assistance, evaluation, and training services related to the 21st Century Community Learning Centers program; (2) up to \$3,500,000 to programs serving middle and elementary school pupils for the purpose of providing equal access to, and participation in, community learning center programs, as specified; (3) up to \$1,000,000 for direct grants for providing family literacy services to specified schoolsites; and (4) \$2,500,000 to be allocated on a priority basis for grants to community learning center programs serving high school pupils and middle and elementary pupils. The bill would prescribe other requirements related to the allocation of funds, including that grant awards be restricted to those applicants that propose primarily to serve pupils that attend schools identified as Title I schoolwide programs under

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

federal law. The bill would also include a statement that the provisions of the bill would only become operative to the extent that federal funds are made available for these purposes.

Ch. 1037 (SB 1595) Escutia. Pupils: English learners.

Existing law gives the parents and guardians of pupils enrolled in public schools the right to be informed by the school and to participate in the education of their children and specifies the information they have a right to receive and the ways they may participate in the education of their children. Among the parental rights listed in a particular provision are the right to be informed in advance about school rules, attendance policies, dress codes, and procedures for visiting the school.

This bill would add disciplinary rules and procedures and retention and promotion policies, which are provided for in other provisions of existing law, to the list of things about which parents have a right to be informed. The bill would add to the list of rights the right to be notified, as early in the school year as practicable, and as required by existing law, if their child is identified as being at risk of retention and of their right to consult with school personnel responsible for a decision to promote or retain their child and to appeal a decision to retain or promote their child.

The bill would provide that a parent or guardian's lack of English fluency does not preclude a parent or guardian from exercising the rights guaranteed by existing law, would specify that a school district take all reasonable steps to ensure that parents and guardians who speak a language other than English are notified, as required by existing law, of the rights and opportunities available to them pursuant to existing law, and would list rights and opportunities available to parents and guardians of pupils who speak a language other than English.

Ch. 1038 (SB 1821) Dunn. Assisted housing.

(1) Existing law prescribes the notices that an owner of governmentally assisted housing is required to give tenants prior to the anticipated date of termination of a subsidy contract, termination of rental restrictions, or prepayment of the mortgage on an assisted housing development. Existing law also prohibits the owner from terminating a subsidy contract, prepaying the mortgage, or disposing of the property if that would result in the termination of low-income use restrictions unless designated entities have been given an opportunity to purchase the property.

This bill would require those notices to be given prior to the expiration, as specified, rather than prior to the termination of rental restrictions. The bill would prohibit the owner from disposing of the property if that would result in the expiration of low-income use restrictions unless those designated entities have been given an opportunity to purchase the property. The bill would provide that these provisions would not become operative if both this bill and SB 1468 are enacted and become effective and both bills amend these provisions.

(2) Existing law specifies a maximum aggregate of \$2,250,000,000 of revenue bonds that a city or county may issue for the financing of multifamily rental housing pursuant to specified provisions of law.

This bill would repeal that provision.

(3) Existing law establishes provisions known as the Special Occupancy Parks Act that are to become operative January 1, 2003, except as specified, and requires the Department of Housing and Community Development to adopt implementing regulations by October 30, 2002.

This bill would delay that operative date until January 1, 2004, and require those regulations to be adopted by October 30, 2003.

(4) The bill would make a nonsubstantive conforming change.

Ch. 1039 (SB 1925) Sher. California Environmental Quality Act: exemptions.

Existing law, the California Environmental Quality Act (CEQA), requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if it finds that the project will not have that effect, unless the project is exempt from the act.

CEQA provides for various exemptions from the requirements of the act relating to housing, including exemptions for agricultural housing, affordable housing projects in urbanized areas, as defined, and projects in the central business district in the City of Oakland.

This bill would recast, recodify, and consolidate those exemptions. The bill would revise the definition of an urbanized area for purposes of those provisions to include any incorporated city with a population of at least 100,000 persons or an incorporated city of less than 100,000 persons if the population of that city and not more than 2 contiguous incorporated cities combined equals at least 100,000 persons. An urbanized area would also be defined to include any unincorporated area that is completely surrounded by one or more incorporated cities that meet specified population criteria or that is located within an urban growth boundary, as defined, and has an existing residential population of at least 5,000 person per square mile, if the board of supervisors with jurisdiction over the unincorporated area has previously issued a finding that the general plan, zoning ordinance, and related policies and programs applicable to the area are consistent with specified compact development principles, and the board of supervisors had previously submitted a draft of that finding to the Office of Planning and Research at least 30 days prior to issuing a final finding, and allowed the office 30 days to submit comments on the draft finding.

The bill would also provide an exemption from CEQA for any residential project located on an infill site within an urbanized area that meets specified criteria.

The bill would prohibit the division of a project into smaller projects to qualify for one or more exemptions from CEQA.

Ch. 1040 (AB 1788) Reyes. University of California: cardcheck agreements.

Existing law establishes the University of California under the administration of the Regents of the University of California.

This bill would require a service contractor of the university, as defined, to enter into a cardcheck agreement, as defined, with any labor organization that requests the agreement for the purpose of seeking to represent the service contractor's employees. The bill would require the university to include in any service contract, as defined, a provision requiring any service contractor to abide by the requirements imposed by the bill.

The bill would be applicable to the university only to the extent that the regents act, by resolution, to make it applicable.

Ch. 1041 (AB 2006) Cedillo. Local public employees: health benefit plans.

Existing law requires the governing body of a public agency and boards and commissions designated by law or by the governing body to give reasonable written notice, except in cases of emergency, as specified, to each recognized employee organization affected of any ordinance, rule, resolution, or regulation directly relating to matters within the scope of representation proposed to be adopted by the governing body or the designated boards and commissions.

This bill would prohibit the governing body of a public agency with a population in excess of 4,000,000 or the board and commission of such a public agency from discriminating against employees by removing or disqualifying them from a health benefit plan, or otherwise restricting their ability to participate in a health benefit plan, on the basis that the employees have selected or supported a recognized employee organization. These provisions would be retroactive to July 1, 2001.

Ch. 1042 (AB 2410) Frommer. Employment: motion picture industry.

(1) Existing law specifies the duties of the California Film Commission.

This bill would require the commission to release annually the number of motion picture starts that occurred within the State of California.

(2) Existing law establishes the Employment Development Department in the California Health and Human Services Agency and vests the department with specified duties and responsibilities.

This bill would require the department, in consultation and coordination with the film and movie industry, the Technology, Trade, and Commerce Agency, and the California Film Commission, to research and maintain data on film industry employment, to determine the economic impact of the film industry, to monitor film industry employment and activity and competing states and countries, to examine the ethnic diversity and representation of minorities in the entertainment industry, to review the effect of federal, state, and local laws on the filmed entertainment industry, and to report that information to the Legislature biannually, provided that funds are appropriated by the Legislature in the annual Budget Act for these purposes.

Ch. 1043 (AB 2444) Dutra. State special schools and diagnostic centers: salaries.

Existing law requires the State Department of Education to fix the compensation of officers, teachers, and employees of the state special schools and diagnostic centers.

This bill would require the State Personnel Administration to consider making salaries for teachers, specialists, and administrators of the state special schools and diagnostic centers competitive with the salaries of similarly qualified school teachers, specialists, and administrators who are employed by the encompassing school districts.

Ch. 1044 (AB 2477) Steinberg. State employees: excluded and exempt employees: salaries and benefits.

Existing law provides that the Department of Personnel Administration shall establish and adjust salary ranges for each class of position in the state civil service subject to any merit limits contained in the California Constitution. Existing law further provides that these salary ranges shall be based on the principle that like salaries shall be paid for comparable duties and responsibilities and that the department, in establishing or changing these ranges, consider the prevailing rates for comparable service in other public employment and in private business.

This bill would establish the State Excluded and Exempt Employees Salary-Setting Task Force, to consist of no more than 12 participants, as specified, to create a new process to address the status of salary and benefit levels of excluded and exempt employees, as defined, and to recommend that process to the Governor and the Legislature prior to July 1, 2004. The bill would require the task force, in preparing its recommendations, to consider the cost of living as reflected in specified indices, the compensation paid to comparable occupations or benchmark classes in California cities, counties, and special districts, the University of California System, the California State University, the federal government, and the private sector, the wages, benefits, and other compensation paid to rank-and-file state employees under approved memoranda of understanding, and excluded employee salaries, benefits, and other compensation items.

The bill would make the provisions governing the task force inoperative as of June 30, 2005, and would repeal these provisions on January 1, 2006.

Ch. 1045 (AB 2549) Nation. Public employees' retirement: part-time employees.

The Public Employees' Retirement Law excludes from membership in the system specified persons, including part-time employees serving on less than a full-time basis, unless specified circumstances are satisfied. Pursuant to these provisions, a temporary faculty member of the California State University who works 2 consecutive semesters or 3 consecutive quarters at half time or more, subject to certain teaching requirements and

limitations, and who is not otherwise excluded, is entitled to membership at the start of the next consecutive semester or quarter if the appointment requires half-time service or more.

This bill would also provide that temporary faculty members, who work 2 consecutive semesters or 3 consecutive quarters at a minimum teaching load of 6 weighted units, are entitled to membership in the Public Employees' Retirement System on or after July 1, 2004, pursuant to the above provisions, if agreed upon pursuant to a collective bargaining agreement or otherwise authorized by the trustees of the university, as specified.

Existing provisions of the Public Employees' Retirement Law continuously appropriate the money in the Public Employees' Retirement Fund.

This bill would expand eligibility for membership in the system and would result in increased contributions to the fund, thereby making an appropriation.

Ch. 1046 (AB 2883) Aroner. Higher education labor relations: University of California and Hastings College of the Law: impasse procedures.

Existing law establishes the University of California, and provides for its administration by the Regents of the University of California. Existing law, known as the Higher Education Employer-Employee Relations Act, contains provisions relating to employer-employee relations between the State of California and the employees of state institutions of higher education, including the various campuses of the University of California and the California State University, as well as the Hastings College of the Law. These provisions assign major responsibilities for implementation to the Public Employment Relations Board.

Under the act, an impasse is defined as a situation where the parties have reached a point in meeting and conferring at which their differences in positions are such that further meetings would be futile. Existing law sets forth procedures for an impasse situation, including the appointment of a mediator and the appointment of a factfinding panel in the event that the appointment of a mediator does not resolve a dispute.

This bill would require, with respect to a dispute relating to the faculty, as defined to mean teachers employed to teach courses and authorize the granting of credit for the successful completion of courses and to exclude employees whose employment is contingent on their status as students, and librarians of the University of California or the Hastings College of the Law, and in the event of the appointment of a factfinding panel under the act and the absence of an agreement within a 10-day period after the submission to the parties of the findings and recommendations of the panel, the Regents of the University of California or the Directors of the Hastings College of the Law, as appropriate, to make these findings and recommendations available to the public. The bill would express the intent of the Legislature that the regents or the directors, as appropriate, act upon the findings and recommendations of the panel at an open and public meeting within 90 days of their submission to the parties by the panel.

Ch. 1047 (SB 371) Escutia. Courts: interpreters.

Existing law sets forth the provisions and procedures governing employer-employee relations for the trial courts, as specified.

This bill would establish the Trial Court Interpreter Employment and Labor Relations Act setting forth provisions and procedures governing the employment and compensation of certified and registered trial court interpreters, and court interpreters pro tempore, employed by the trial courts, as specified.

The bill would impose a state-mandated local program by requiring new duties of the trial courts with respect to employer-employee relations regarding court interpreters.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1048 (SB 972) Costa. Public works: prevailing wages.

Existing law defines a project as a "public work" if the project involves construction, alteration, demolition, installation, or repair work that is done under contract and paid for in whole or in part out of public funds, as specified. Existing law generally requires that not less than the general prevailing rate of per diem wages, as specified, be paid to workers engaged in a public work, as defined, but excludes certain types of housing projects from these requirements.

This bill would exclude from the requirements of public works and prevailing wage laws the construction, expansion, or rehabilitation of privately owned residential projects that are self-help housing projects, operated on a not-for-profit basis as housing for homeless persons, or that provide for housing assistance.

This bill would specify that this provision and amendments made by a prior statute do not preempt local ordinances requiring the payment of prevailing wages on housing projects.

This bill would also make technical, nonsubstantive changes.

Ch. 1049 (SB 1580) Burton. Teachers' Retirement Board.

Under existing law, the State Teachers' Retirement System and the State Teachers' Retirement Plan are administered by the 12-member Teachers' Retirement Board, as specified.

This bill would, operative January 1, 2004, revise the composition of the membership of the board, as specified. The bill would also provide for the election or appointment of those members, and specify the terms and qualifications of those members who do not serve ex officio.

Ch. 1050 (SB 1629) Soto. Emergency services: training.

Existing law, the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act, requires the Emergency Medical Services Authority to adopt standards for a statewide scope of practice to be used for the training and certification testing of Emergency Medical Technician-Paramedic (EMT-P) personnel.

This bill would authorize, to the extent permitted by federal law and upon appropriation, the Director of Finance to transfer to the Emergency Medical Services Authority any moneys in the Federal Trust Fund if the money is made available by the United States for expenditure by the state for purposes consistent with the implementation of the bill. This bill would provide for the allocation of funds to the California Fire Fighter Joint Apprenticeship Program to offset the cost of paramedic training course development, to enter into certain reimbursement contracts with eligible state and local agencies that may contract with educational institutions for the delivery of paramedic training, and to allocate grants to state and local agencies to defray the cost of providing paramedic training for fire service personnel.

The bill would also authorize the authority to recover administrative costs for the bill from specified funds transferred pursuant to the bill, to the extent permitted by federal law.

Ch. 1051 (SB 1992) Perata. Public safety: gas appliances.

Existing law relating to state building standards and seismic safety requires the installation of earthquake sensitive or excess flow gas shutoff devices in specified buildings, and generally regulates the manufacture and sale of these devices. Existing law requires the State Architect to certify specified gas shutoff devices that are activated by motion or phenomena other than motion, as specified.

This bill would require the Department of Housing and Community Development, in consultation with the Office of the State Architect and the State Fire Marshal to consider

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

whether to propose for adoption and approval by the Building Standards Commission, in the code adoption cycle that begins after January 1, 2003, the requirement that seismic gas shutoff devices or excess flow gas shutoff devices, installed on customer-owned gas piping, be installed in all or a portion of dwelling units, motels, hotels, and lodgishouses.

Ch. 1052 (AB 3041) Committee on Natural Resources. Environmental quality: use of State Clearinghouse by lead agencies.

(1) The existing California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report (EIR) on a project that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect. CEQA also requires a lead agency to prepare a mitigated negative declaration for a project that may have a significant effect on the environment, if revisions in the project would avoid or mitigate that effect and there is no substantial evidence that the project, as revised, would have a significant effect on the environment. CEQA also requires any draft EIR, EIR, or negative declaration prepared pursuant to CEQA be prepared directly by, or under contract to, a public agency, and requires the lead agency to circulate draft documents that reflect its independent judgment to appropriate state agencies for review. CEQA defines a responsible agency as a public agency other than a lead agency that has responsibility for carrying out or approving a project, and existing guidelines adopted by the Office of Planning and Research define a trustee agency as a state agency that has jurisdiction by law over natural resources affected by a project that are held in trust for the people of the state. Existing guidelines require each lead agency to submit draft EIRs and negative declarations to the State Clearinghouse in order to be distributed to applicable state agencies for review, and require each lead agency to submit not less than 10 copies of draft EIRs and negative declarations to the State Clearinghouse, unless the State Clearinghouse approves a lower number in advance.

This bill would require any mitigated negative declaration prepared pursuant to CEQA to be prepared directly by, or under contract to, a public agency. The bill would require each lead agency to submit a sufficient number of copies of a draft EIR, proposed negative declaration, or proposed mitigated negative declaration to the State Clearinghouse for review and comment by state agencies, and to submit a copy of that document in an electronic form, if a state agency is the lead agency, a responsible agency, trustee agency, or otherwise has jurisdiction over the project, or if the project is of statewide, regional, or areawide environmental significance. By imposing additional duties on local lead agencies, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1053 (AB 15) Harman. Land use: business license.

Existing law authorizes the legislative body of a city for incorporated areas or county for unincorporated areas to enact an ordinance that provides for the licensure of a massage business. This authorization does not apply to cosmetologists, barbers, or persons licensed to practice any healing art pursuant to specified provisions.

This bill would include chiropractors among the persons for whom the authorization does not apply and would provide that the above described authorization does apply to an independent contractor of any of these persons if the independent contractor is engaged in, or is purported to be engaged in, the business of massage.

Ch. 1054 (AB 700) Simitian. Personal information: privacy.

Existing law regulates the maintenance and dissemination of personal information by state agencies, as defined, and requires each agency to keep an accurate account of disclosures made pursuant to specified provisions. Existing law also requires a business, as defined, to take all reasonable steps to destroy a customer's records that contain personal information when the business will no longer retain those records. Existing law provides civil remedies for violations of these provisions.

This bill, operative July 1, 2003, would require a state agency, or a person or business that conducts business in California, that owns or licenses computerized data that includes personal information, as defined, to disclose in specified ways, any breach of the security of the data, as defined, to any resident of California whose unencrypted personal information was, or is reasonably believed to have been, acquired by an unauthorized person. The bill would permit the notifications required by its provisions to be delayed if a law enforcement agency determines that it would impede a criminal investigation. The bill would require an agency, person, or business that maintains computerized data that includes personal information owned by another to notify the owner or licensee of the information of any breach of security of the data, as specified. The bill would state the intent of the Legislature to preempt all local regulation of the subject matter of the bill. This bill would also make a statement of legislative findings and declarations regarding privacy and financial security.

Ch. 1055 (AB 1381) Florez. Postsecondary education: Governor's Scholarship Programs.

Existing law establishes the Governor's Scholarship Programs, under which qualified pupils may receive a Governor's Scholars or Governor's Distinguished Mathematics and Science Scholars award for attaining specified scores on portions of the statewide achievement tests administered under the Standardized Testing and Reporting Program. In order for a pupil to be eligible for a scholarship award, the pupil is required, among other things, to have been enrolled at a California public school for at least 12 consecutive months immediately preceding the administration of the statewide achievement test.

This bill would additionally allow a pupil to be eligible for a Governor's Scholars award or Governor's Distinguished Mathematics and Science Scholars award if the pupil has been enrolled at a California public school for at least 110 days of the school year in which the test is administered and at least 110 days of the school year immediately preceding the administration of the test.

Ch. 1056 (AB 1795) Reyes. Kerman Unified School District.

Existing law requires the Kerman Unified School District and other school districts to pay a fiscal assessment for audit exceptions with respect to independent study apportionments made to the school district. Existing law gives school districts no less than 4 years, nor more than 8 years, to complete the payment.

This bill would, notwithstanding existing law, extend the maximum repayment period for the Kerman Unified School District to 11 years.

This bill would make legislative findings and declarations regarding the need for special legislation.

Ch. 1057 (AB 1868) Koretz. Controlled substances: nuisance abatement.

(1) Existing law provides that every building or place used for the purpose of specified unlawful transactions involving controlled substances is a nuisance and if the existence of the nuisance is shown to the satisfaction of a court, the court shall allow a temporary writ of injunction to abate and prevent the continuance of the nuisance.

This bill would provide that a court may issue a temporary restraining order or injunction to enjoin subsequent owners, commercial lessees, or agents who acquire the building or place where the controlled substances nuisance exists with notice of the order or injunction, specifying that the owner of the property subject to the temporary restraining order or

injunction shall notify any prospective purchaser, commercial lessee, or other successor in interest of the existence of the order or injunction, and of its application to successors in interest, prior to entering into any agreement to sell or lease the property. The bill would provide that the order or injunction shall not constitute a title defect, lien, or encumbrance on the real property.

(2) Existing law sets forth various remedies available to a court in a controlled substances nuisance abatement action, including ordering the owner to make cosmetic improvements to the property.

This bill would add to the list of remedies available to a court in a controlled substances nuisance abatement action that of ordering the nuisance defendant to reside in the property until the nuisance is abated, as specified.

(3) Existing law provides that a court may assess a civil penalty not to exceed \$25,000 against a controlled substances nuisance defendant, as specified.

This bill would provide that one-half of the civil penalties collected shall be deposited in the Restitution Fund, the proceeds of which shall be available only upon appropriation by the Legislature to indemnify crime victims who file claims for pecuniary losses they suffer as a direct result of criminal acts, and the other half shall be paid to the city in which the judgment was entered or to the treasurer of the county in which the judgment was entered.

(4) Existing law provides that every building or place used for the purpose of illegal gambling, as defined, lewdness, assignation, or prostitution is a nuisance with respect to which the county district attorney is required, and a city attorney of an incorporated city is authorized, to maintain an action to abate the nuisance.

This bill would provide instead and in addition that the county district attorney and the city attorney of any city and county are authorized to maintain an action to abate a gambling or prostitution nuisance.

(5) Existing law provides that if the existence of a gambling or prostitution nuisance is shown to the satisfaction of a court, the court shall allow a temporary writ of injunction to abate and prevent the continuance of the nuisance.

This bill would provide that a temporary restraining order or injunction may enjoin subsequent owners, commercial lessees, or agents who acquire the building or place where the gambling or prostitution nuisance exists with notice of the order or injunction, specifying that the owner of the property subject to the temporary restraining order or injunction shall notify any prospective purchaser, commercial lessee, or other successor in interest of the existence of the order or injunction, and of its application to successors in interest, prior to entering into any agreement to sell or lease the property. The bill would provide that the order or injunction shall not constitute a title defect, lien, or encumbrance on the real property.

(6) Existing law provides that if the existence of a gambling or prostitution nuisance is established in a nuisance abatement action, the court, in lieu of ordering the building or place where the gambling or prostitution nuisance exists closed, may order the person who is responsible for the existence of the nuisance to pay damages, as specified, to be deposited in the Restitution Fund, as specified.

This bill would require that damages be paid to the city or county in whose jurisdiction the nuisance is located.

This bill would additionally provide that the court may assess a civil penalty not to exceed \$25,000 against any and all defendants, based upon the severity of the nuisance and its duration. The bill would provide that one-half of the civil penalties collected shall be deposited in the Restitution Fund, and the other half shall be paid to the city in which the judgment was entered or to the treasurer of the county in which the judgment was entered.

Ch. 1058 (AB 1994) Reyes. Charter schools: operation.

(1) Existing law requires the governing board of each school district to approve an annual statement of all receipts and expenditures for the district for the preceding fiscal year with the county superintendent of schools.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would require each charter school to approve that statement and submit it to the entity that approved the charter school and would make other, related changes, thereby imposing a state-mandated local program.

(2) The Charter Schools Act of 1992 authorizes a limited number of charter schools to operate in the state each school year, and, for purposes of implementing that provision, requires the State Board of Education to assign a number to each charter petition that it grants under the act.

This bill would require that each number assigned by the state board, on or after January 1, 2003, correspond to a single petition that identifies a single charter school. The bill would provide that schoolsites shall not be considered separate schools if they share a common educational program.

(3) Existing law permits the governing board of a school district to approve a charter school to operate independently from the existing school district structure as a method of accomplishing, among other things, improved pupil learning. Under the act, if the governing board of a school district denies a petition for the establishment of a charter school, the petitioner may elect to submit the petition for the establishment of a charter school to either the county board of education or directly to the State Board of Education. The act does not expressly authorize a school district to approve a petition for a charter school that would operate outside the boundaries of the school district. Under the act, a petition for the establishment of a charter school is required to describe specified elements, including, among others, the educational program of the school and information on the facilities to be used by the charter school.

This bill would require, except as specified, that each petition for the establishment of a charter school that is submitted to a chartering agency, or for which a renewal is sought, on or after January 1, 2003, identify a single charter school and would specify the geographic and site requirements for the establishment of a charter school. The bill would modify the process by which a petitioner appeals the denial of a charter petition, to require a petitioner to appeal to a county office of education before appealing to the State Board of Education.

The bill would require the petition for the establishment of a charter school to describe how a charter school that will serve high school pupils will inform parents about the transferability and eligibility of courses to other public high schools and to meet college entrance requirements, the procedures to be used if the charter school closes, and would prescribe related matters.

(4) The act requires a charter school to respond promptly to all reasonable inquiries, including, but not limited to, inquiries regarding its financial records, from its chartering authority or from the Superintendent of Public Instruction and to consult with the chartering authority or the Superintendent of Public Instruction regarding those inquiries.

This bill would grant general authority to the county superintendent of schools to monitor the operations of a charter school located within that county, to conduct an investigation into the operations of that charter school, based on parental complaints or other information that justifies the investigation, and would limit the liability of a county superintendent of schools when conducting those activities. The bill would, in addition, require a charter school to consult with the county office of education regarding inquiries.

(5) Existing law authorizes a petition to be submitted directly to a county board of education for a charter school that will serve pupils for whom the county office of education would otherwise be responsible for providing direct education and services.

This bill would also authorize a county board of education to approve a charter for the operation of a charter school that would operate at multiple sites throughout the county. The bill would prescribe the petition and approval process for such a school, the applicable requirements for operation, and other related matters.

(6) The bill would authorize a petition for the operation of a charter school to be submitted directly to the State Board of Education, would authorize the state board to approve a petition

for a charter school that would operate at multiple sites throughout the state, and would prescribe related matters.

(7) The bill would require that a charter school that is granted a charter from the governing board of a school district or from a county office of education after July 1, 2002, and commences providing educational services to pupils on or after July 1, 2002, locate within the geographic and site limitations specified in the act, except as specified, and would prescribe related matters.

(8) The act provides that average daily attendance may not be generated by a pupil who is not continuously enrolled in public school and who makes satisfactory progress toward a high school diploma.

This bill would declare that these conditions do not apply to certain specified charter schools.

(9) The act requires the Superintendent of Public Instruction, in the 1999–2000, 2000–01, and 2001–02 fiscal years, to make apportionments to a charter school that elects not to be funded pursuant to the block grant funding model set forth in the act in each fiscal year that the charter school so elects.

This bill would require the Superintendent of Public Instruction to make those apportionments in a school district in which all schools have been converted to charter school in each fiscal year that a charter school so elects.

(10) The act requires that a charter school in its first year of operation be eligible to receive funding for an advanced apportionment based on an estimate of average daily attendance for the current fiscal year, approved as specified.

This bill would authorize a charter school in its first year of operation to commence instruction within the first 3 months of the fiscal year beginning July 1 of that year, would make a charter school ineligible for an apportionment for a fiscal year in which instruction commenced after September 30 of that fiscal year, and would prescribe related matters.

(11) By imposing new duties on school districts county offices of education, and charter schools, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1059 (AB 2055) Robert Pacheco. Attorney work product.

(1) Under existing law, an attorney's work product, material prepared by or for a lawyer for planned or pending litigation, is generally exempt from discovery or compelled disclosure unless a court finds prejudice to a party seeking discovery or injustice. Under existing law, the work product protection for an attorney's impressions, conclusions, opinions, or legal research or theories is complete. However, existing law places certain matters outside of the work product rule, as where work product is relevant in an action between an attorney and client, or when the State Bar is investigating an attorney discipline case, as provided. Under existing law, although attorneys suspected of criminal activity are not entitled to the protection of the work product doctrine directly, they are obligated to assert it on behalf of their clients, when appropriate.

This bill would eliminate the protection of work product in existing law when a lawyer is suspected of knowingly participating in a crime or fraud in any official investigation or proceeding or action brought by a public prosecutor in the name of the People of the State of California, if the services of the lawyer were sought or obtained to enable or aid anyone to commit or plan to commit a crime or fraud.

(2) Under existing law, when records are to be seized from an attorney pursuant to a search warrant, a procedure involving the appointment of a special master, an opportunity for the attorney to object to the release of the records, and an in camera review of the records must be followed. Under existing law, there are various specified limitations of time after which crimes may not be filed against defendants. Existing law permits those times to be extended for various specified reasons.

This bill would extend any limitation of time for filing charges as to a crime, the proof of which depends substantially upon any evidence seized from an attorney under a warrant, by the amount of time it takes to resolve any claims of privilege or work product, as specified.

(3) Attorney work product and attorney-client privilege can both be asserted when records are to be seized from an attorney pursuant to a search warrant. The burden of proof for release of evidence otherwise protected by the attorney-client privilege is that the party opposing the privilege, generally the prosecutor, must establish a prima facie case of fraud, and a reasonable relationship between the fraud and the attorney-client communication. However, case law provides that it is the burden of the party asserting the work product privilege to prove that the material in question is work product, and therefore protected.

This bill would specify that burden of proof, and require a court to deny any work product claim where there is probable cause to believe that a lawyer is engaging or has engaged in criminal activity relating to seized documents unless it is established at the hearing that the services of the lawyer were not sought or obtained to facilitate a crime or fraud.

(4) This bill would also provide, with regard to the provisions concerning the special master procedure and the work product protections, that nothing in those provisions of law is intended to limit an attorney's ability to request an in camera hearing, as approved in a specified Supreme Court case.

(5) This bill would incorporate additional amendments to Section 1524 of the Penal Code as proposed by SB 1637 and SB 1980, contingent upon the prior enactment of one or both of those bills.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1060 (AB 2295) Oropeza. School-sponsored athletic programs: State Department of Education: California Postsecondary Education Commission: report.

Existing law prohibits public funds from being used in connection with any athletic program, conducted under the auspices of a school district governing board or any student organization within the district, that does not provide equal opportunity to both sexes for participation and for use of facilities.

This bill would require the State Department of Education and the California Postsecondary Education Commission jointly to contract with an independent evaluator for the preparation of a report on interscholastic athletics in this state to be submitted to the Legislature no later than January 1, 2004. The bill would require that the report include the findings of the independent evaluator relating to the percentage of participating women athletes, the percentage of funding, the percentage of scholarships, and the overall level of compliance with relevant federal law by educational institutions in the state, as well as the recommendations of the department and the commission with respect to improvement. The bill would require the independent evaluator to study these issues as they relate to secondary schools and as they relate to the public segments of higher education in the state. The bill would specify topics to be included in the report. The bill would provide that its implementation is subject to the provision of funds for its purposes in the Budget Act of 2002 or in another statute enacted during the 2001–02 Regular Session.

Ch. 1061 (AB 2330) Migden. Landlord and tenant.

(1) Existing law regulates the amount of security a landlord may demand or receive pursuant to a rental agreement for residential property to be used as a dwelling. It limits that amount to 2 months' rent for unfurnished residential property, and to 3 months' rent for

furnished residential property, in addition to rent for the first month, as specified. Existing law defines security for these purposes. Existing law permits landlords to apply security only if reasonably necessary for specified purposes, and prohibits the application of security for defective conditions that preexisted the tenancy or for ordinary wear and tear. Existing law requires a landlord to furnish to the tenant, within 3 weeks of vacating the premises, a copy of an itemized statement indicating the security received and the disposition of the security, as specified.

This bill would redefine security to include any charges imposed at the beginning of tenancy, excepting application screening fees, and would specifically include within the definition costs associated with processing a new tenant and costs associated with cleaning the property, as specified. The bill would require the landlord under specified circumstances to notify the tenant in writing of the tenant's option to request an initial inspection and the tenant's right to be present at the inspection. If the tenant requests an initial inspection, the bill would require the landlord to make that inspection prior to a final inspection, after the tenant vacates, and to provide the tenant with an itemized list of potential deductions from the security, as specified. The bill would require that the tenant have the opportunity to remedy identified deficiencies, as specified, during the period following the initial inspection until the end of the tenancy. The bill would change the amount of statutory damages for certain violations from \$600 to twice the amount of the security.

(2) Existing law regulates the times and circumstances under which a landlord may enter a tenant's dwelling.

This bill would permit a landlord to enter a tenant's dwelling for the purpose of making an inspection related to the application of a tenant's security to repairs and cleaning.

(3) This bill would incorporate changes to Section 1954 of the Civil Code made by SB 1403 to become operative only if both bills are chaptered and this bill is chaptered last.

Ch. 1062 (AB 1866) Wright. Housing: density bonuses.

(1) The Planning and Zoning Law requires the housing element of the general plan of a city or county, among other things, to identify adequate sites for housing, including rental housing, factory-built housing, and mobilehomes, and to make adequate provision for the existing and projected needs of all economic segments of the community. That law permits the Department of Housing and Community Development to allow a city or county to identify adequate sites by a variety of methods.

This bill would authorize the department to also allow a city or county to identify sites for 2nd units based upon relevant factors, including the number of 2nd units developed in the prior housing element planning period.

(2) The Planning and Zoning Law authorizes a local agency to provide by ordinance for the creation of 2nd units on parcels zoned for a primary single-family and multifamily residence, as prescribed.

This bill would require, when a local agency receives its first application on or after July 1, 2003, that the application shall be considered ministerially without discretionary review or hearing, notwithstanding other laws that regulate the issuance of variances or special use permits.

The bill would authorize a local agency to charge a fee to reimburse the agency for costs it incurs as a result of these provisions.

(3) The Planning and Zoning Law also requires, when a developer of housing proposes a housing development within the jurisdiction of the local government, that the city, county, or city and county provide the developer with incentives or concessions for the production of lower income housing units within the development if the developer meets specified requirements. Existing law requires the local government to establish procedures for carrying out these provisions.

This bill would revise those provisions to refer to an applicant who proposes a housing development and would recast them to, among other things, revise criteria for making written

findings that a concession or incentive is not required, add criteria for continued affordability of housing in a condominium project, authorize an applicant to request a meeting on its proposal for a specific density bonus, incentive, or concession or for the waiver or reduction of development standards, and exempt developments meeting certain affordability criteria from specified laws. By increasing the duties of local public officials, the bill would impose a state-mandated local program.

The bill would also authorize an applicant to initiate judicial proceedings if the city, county, or city and county refuses to grant a requested density bonus, incentive, or concession in violation of these provisions, and would require the court to award the plaintiff reasonable attorney's fees and costs of suit. It would authorize a local agency to charge a fee to reimburse it for costs that it incurs as a result of these provisions.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 1063 (AB 2338) Papan. Satellite wagering.

Existing law provides for and regulates satellite wagering by eligible county fairs subject to specified conditions, if approved by the Department of Food and Agriculture and the California Horse Racing Board. Fairs in certain counties have separate authorizations to operate satellite facilities.

This bill would authorize the San Mateo County Fair to operate a satellite wagering facility on the fairgrounds or on leased premises in San Mateo County, if the racing association licensed in the year 2002 to conduct thoroughbred race meetings there is not so licensed in any subsequent year, and if approved by the board, as specified. This satellite racing facility would be required to make specified distributions to the same beneficiary that received those distributions in 2002 from the San Mateo County Fair and the racing association licensed in 2002 to conduct thoroughbred race meetings in San Mateo County.

Existing law provides for the San Mateo County Fair to conduct races with board approval at any location if Bay Meadows closes.

This bill would specify that if the racing association licensed in the year 2002 to conduct a thoroughbred race meeting there is not licensed to do so in any subsequent year, the fair could conduct its racing dates at a facility operated by a thoroughbred racing association or fair licensed to conduct a meeting in the northern zone, as specified.

Under existing law, all revenues distributed to the state as license fees from horse racing are required to be deposited in the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes.

This bill would authorize additional wagering, and would increase the amount of continuously appropriated license fees, thereby making an appropriation. The bill would also authorize the imposition of a state tax for the purposes of Article XIII A of the California Constitution, and thus would require for passage the approval of  $\frac{2}{3}$  of the membership of each house of the Legislature.

#### Ch. 1064 (AB 2442) Keeley. Child abuse.

Existing law establishes the Child Abuse and Neglect Reporting Act (CANRA), which requires specified persons to make a report to any police department or sheriff's department, county probation department, or county welfare department whenever the mandated reporter, in his or her professional capacity or within the scope of his or her employment, has knowledge of or observes a child whom the mandated reporter knows or reasonably suspects has been the victim of child abuse or neglect. Existing law also requires the Department of Justice to act as a repository of all reports of child abuse and severe neglect submitted by mandated reporters to police and sheriff's departments, county probation departments, and

county welfare departments. Existing law requires the Department of Justice to maintain and continually update an index of these reports designated the Child Abuse Central Index. The agencies submitting reports are responsible for their accuracy, completeness, and retention in the index; the department is responsible for ensuring that the index accurately reflects the reports it receives from the submitting agencies.

This bill would create a task force for the purpose of reviewing the Child Abuse and Neglect Reporting Act and the Child Abuse Central Index. The task force would be chaired by a designee of the Attorney General and be comprised of 16 members who would serve at the pleasure of their respective appointing authority without compensation, except for reimbursement for necessary expenses. This bill would provide that the task force would meet at least once every 2 months and on or before January 1, 2004, report its findings and recommendations to the Governor, the Attorney General, the Speaker of the Assembly, and the Senate Committee on Rules. This bill would specify that these provisions shall remain operative only until March 1, 2004.

Ch. 1065 (AB 2495) Correa. Mobilehomes.

Existing law authorizes certain factory-built housing, mobilehomes, manufactured homes, or multiunit manufactured housing to be affixed to a foundation system within a mobilehome park if the installation conforms to the rules of the mobilehome park, the installation is approved, as specified, and no single structure exceeds 2 stories in height or contains more than 4 dwelling units.

This bill would delete the requirement that no single structure contain more than 4 dwelling units. The bill would provide that the number of dwelling units per structure for any manufactured home or mobilehome consisting of 2 or more dwelling units, or multiunit manufactured housing, sited in a mobilehome park on or after January 1, 2003, shall conform to a zone designation or conditional use permit that currently applies to the park or an amended or new zone designation or conditional use permit that is additionally granted to the park. The bill would make other, technical, nonsubstantive changes.

Ch. 1066 (AB 2583) Chu. Postsecondary education: sexual assault.<sup>4</sup>

Existing law, known as the Donahoe Higher Education Act, sets forth, among other things, the missions and functions of California's public and independent segments of higher education, and their respective institutions of higher education. Among other things, the act requires the governing board of each community college district, the Trustees of the California State University, the Regents of the University of California, to the extent the regents make the act applicable, and the governing board of independent postsecondary institutions, as defined, to adopt rules requiring each of their respective campuses to enter into written agreements with local law enforcement agencies that clarify operational responsibilities for investigations of Part I violent crimes, as defined, occurring on each campus.

The act also requires the governing board of each community college district, the Trustees of the California State University, the Board of Directors of the Hastings College of the Law, and the Regents of the University of California, to the extent the regents make the act applicable, to each adopt, and implement at each of their campuses or other facilities, a written procedure or protocols to ensure, to the fullest extent possible, that students, faculty, and staff who are victims of sexual assault, as defined, committed at or upon grounds of, or upon off-campus grounds or facilities maintained by the institution, or upon grounds or facilities maintained by affiliated student organizations, receive treatment and information.

This bill would establish a 15-member California Campus Sexual Assault Task Force, and provide for the appointment of those members and their duties. The bill would require the task force, assisted by an entity selected through a competitive bidding process, to gather data about sexual assault issues from the various campuses of the University of California, the California State University, and the California Community Colleges, and from a sample of

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

the private institutions of higher education in the state. The bill would require the task force to submit a report incorporating this data to the Legislature on or before April 1, 2004.

The bill would require the Office of Criminal Justice Planning to administer the task force and to administer the competitive bidding process used to select the data gathering entity. The bill would appropriate \$125,000 from the General Fund to the Office of Criminal Justice Planning for expenditure for the support of the task force until December 31, 2004, and for the other purposes of the bill. The provisions of the bill would be repealed as of January 1, 2005, unless a later enacted statute deletes or extends that date.

Ch. 1067 (AB 2750) Wesson. Adult education: classes in correctional facilities.

Existing law limits increases in funding for schools or classes for adults in correctional facilities offered by school districts and county boards of education to 2.5% per fiscal year unless the Legislature approves a greater increase for a fiscal year in the annual Budget Act.

This bill would permit increases in the maximum average daily attendance calculations for schools and classes for adults in correctional facilities, as prescribed.

Ch. 1068 (AB 2842) Harman. Depositions: recordings.

Under existing law, a person who is not a party to an action may be compelled to provide discovery in the action by means of a deposition subpoena. Existing law provides that a deposition subpoena that commands only the attendance and testimony of the deponent is required to specify certain information, including whether the deposition will be recorded by videotape.

This bill also would require the deposition subpoena to specify whether the deposition will be recorded by audio or video technology or whether the deposition will be conducted using instant visual display.

Existing law provides that any party may obtain discovery by taking in California the oral deposition of any person after having served written notice to the deponent, as specified. Existing law requires the deposition notice to include, among other things, any intention to record the testimony by videotape and any intention to record the testimony by stenographic method through the instant visual display of the testimony.

This bill would revise that provision to instead require the deposition notice to include any intention by the party noticing the deposition to record the testimony by video technology and any intention to record the testimony by stenographic method through the instant visual display of the testimony.

Existing law provides that the deposition is required to be conducted under the supervision of an officer who is authorized to administer an oath. Existing law prohibits a deposition officer from suspending the taking of testimony without stipulation of the party conducting the deposition and the deponent, unless any party attending the deposition demands that suspension for certain reasons.

This bill would instead provide that the deposition officer may not suspend the taking of testimony without the stipulation of all parties present, except as specified. The bill would also authorize any party attending the deposition, including the deponent, to demand the deposition officer to suspend taking testimony, as specified.

Existing law provides that unless the court issues an order to the contrary, a copy of a transcript videotape or other recording of the testimony at the deposition, if still in the possession of the deposition officer, is required to be made available to any person requesting a copy upon payment of a reasonable charge.

This bill would revise that provision to require that unless the court issues an order to the contrary, a copy of a transcript of the deposition testimony, or audio or video recording of the deposition testimony made by, or at the direction of, any party, if still in the possession of the deposition officer, is to be made available to any person requesting a copy upon payment of a reasonable charge.

Existing law regulates the stenographic recording of depositions, including recording by audiotape or videotape, as specified and requires that the deposition notice include specified information, including any intention to record the testimony by audiotape or videotape in addition to the stenographic method, and any intention to record the testimony by instant visual display of the testimony.

This bill would specify that any party or attorney requesting the provision of the instant visual display of deposition testimony or rough draft transcripts, shall pay the reasonable cost of those services, which may be no greater than the costs charged to any other party or attorney.

This bill would incorporate additional changes in Section 2025 of the Code of Civil Procedure, proposed by AB 421 that are not otherwise in conflict, to be operative only if AB 421 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

Ch. 1069 (AB 2859) Aroner. School finance.

(1) Existing law requires the Superintendent of Public Instruction and the Director of Finance to establish a repayment plan for funds that a local education agency received on the basis of average daily attendance, or other data, that did not comply with statutory or regulatory requirements that were conditions of the apportionments. Existing law authorizes the Controller to withhold the disallowed amount from a school district's next principal apportionment.

This bill would reallocate specified amounts withheld from the Berkeley Unified School District's 2000-01 and 2001-02 principal apportionments and the district's 2002-03 first principal apportionment to the Kern County Office of Education for use by the County Office Fiscal Crisis and Management Assistance Team for purposes of conducting specified assessments and improvement plans, this constituting an appropriation. This bill would impose a state-mandated local program by requiring the County Office Fiscal Crisis and Management Assistance Team to prepare the assessments and improvement plans and by requiring the Berkeley Unified School District, commencing with the 2003-04 fiscal year and continuing through the 2004-05 fiscal year, to allocate a specified sum, in accordance with a specified schedule, to implement the improvement plans. The bill would require an additional amount to be withheld from the district's 2005-06 first principal apportionment if a certain sum is not expended for purposes consistent with the improvement plans.

(2) Existing law provides that whenever a person has rendered service in a position requiring certification qualifications for a period of service during which the person did not have a valid credential, the rendering of service shall be deemed legal if the Commission for Teacher Preparation and Licensing approves the service.

This bill would provide that, except as specified above, for the fiscal year 2001-02 and any fiscal year thereafter in which a person renders service as a teacher in kindergarten or any of grades 1 to 12, inclusive, who does not have a valid certification document, the school district or county office of education in which the person is employed shall be assessed a penalty, calculated pursuant to a specified formula.

(3) This bill would provide that for the 2000-01 school year every person employed by the Emery Unified School District as a teacher in kindergarten or any of grades 1 to 12, inclusive, shall be deemed to have possessed a valid certification document and received specified training.

(4) The bill would make certain findings and declarations regarding the Berkeley Unified School District and the Emery Unified School District and the inapplicability of a general statute within the meaning of Section 16 of Article IV of the California Constitution.

(5) The funds appropriated by this bill would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution for that fiscal year.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1070 (AB 2913) Firebaugh. Bracero workers: statute of limitations.

Existing law establishes certain statutes of limitations, which require actions to be brought within specified periods of time. Existing law establishes special statutes of limitations for particular actions, including those relating to claims of Holocaust victims and World War II slave labor and forced labor victims.

This bill would provide that a bracero, as defined, or an heir or beneficiary of a bracero, may bring an action in a court of competent jurisdiction relative to a claim arising out of a failure to pay savings fund amounts deducted from bracero wages between 1942 and 1950. The bill would provide that an action shall not be dismissed for failure to comply with the otherwise applicable statute of limitation, provided the action is commenced on or before December 31, 2005.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1071 (SB 1818) Romero. Employment laws: enforcement actions.

Existing law provides protections, rights, and remedies to persons who have applied for employment, or persons who are employed, in this state pursuant to provisions in the Civil Code, the Government Code, the Health and Safety Code, and the Labor Code.

This bill would make a legislative finding and declaration that all protections, rights, and remedies available under state law, except as prohibited by federal law, are available to individuals regardless of immigration status who have applied for employment, or who are or who have been employed, in this state. The bill would further find and declare that for the purposes of enforcing state labor, employment, civil rights, and employee housing laws, a person's immigration status is irrelevant to the issue of liability and no inquiry shall be permitted into a person's immigration status except when necessary to comply with federal immigration law.

This bill would add similar provisions to the Civil Code, the Government Code, the Labor Code, and the Health and Safety Code relative to enforcement actions relating to the rights of employees.

Ch. 1072 (AB 2928) Matthews. Counties.

(1) Existing law establishes the office of Marshal of Merced County and specifies the duties of the sheriff in that county.

This bill would permit the Board of Supervisors of Merced County to abolish, by ordinance, the office of Marshal of Merced County and establish a court security division in the sheriff's department in that county, as specified.

Ch. 1073 (AB 2937) Shelley. Public records: entities.

(1) The California Public Records Act establishes the right of every person to inspect and obtain copies of public records not exempt from disclosure from specified state and local agencies. The act defines local agency to include, among other things, specified nonprofit entities that are legislative bodies of a local agency for purposes of open meeting requirements.

This bill would delete nonprofit from this definition.

(2) The Ralph M. Brown Act generally requires that the meetings of legislative bodies of local agencies be conducted openly. The act defines legislative body as including, among

other things, a board, commission, committee, or other multimember body that governs a private corporation or entity that either is created by the elected legislative body in order to exercise authority that may lawfully be delegated to it or receives funds from a local agency and the membership of whose governing body includes a member of the legislative body of the local agency appointed to that governing body as a full voting member by the legislative body of the local agency, as specified.

This bill would specifically include within the definition of legislative body a board, commission, committee, or other multimember body that governs a limited liability company, as specified.

This bill would incorporate additional changes in Section 6252 of the Government Code proposed by AB 1962 that would become operative if both bills are enacted and this bill is enacted last.

Ch. 1074 (AB 2972) Aroner. Discrimination: homeless youth.

(1) Existing law prohibits discrimination on the basis of age under any program or activity that is conducted, operated, or administered by the state or by any state agency, is funded directly by the state, or receives any financial assistance from the state.

This bill would specify that the provision of housing for homeless youth, as defined, is authorized by the state, and shall not be considered age discrimination, notwithstanding any provision of state law or of local ordinances.

(2) Existing law establishes the Emergency Housing and Assistance Program and prohibits the program from conflicting with the federal Steward B. McKinney Homeless Assistance Act. It also requires the Department of Housing and Community Development to adopt regulations regarding the administration of the program and prohibits these provisions from being construed to preclude a provider of emergency shelter or transitional housing from restricting occupancy on the basis of sex or, in the case of an emergency shelter or transitional housing offered exclusively to persons 24 years of age or younger, on the basis of age.

The bill would make a conforming change.

Ch. 1075 (SB 21) Escutia. Lead-safe schools.

Under existing law, known as the Lead-Safe Schools Protection Act, the State Department of Health Services is required to conduct a sample survey of public elementary schools, public preschools, and public day care facilities for the purpose of developing risk factors to predict lead contamination in those public schools.

Existing law, the Class Size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998, provides for the issuance, pursuant to the State General Obligation Bond Law, of state general obligation bonds in an amount not to exceed \$9,200,000,000, exclusive of refunding bonds, to provide aid to school districts, county superintendents of schools, and county boards of education in accordance with prescribed provisions, including, but not limited to, the Leroy F. Greene State School Facilities Act of 1998.

This bill would authorize state modernization funding for the identification, assessment, control, management, or abatement of lead. The bill would require any application for modernization funding after January 1, 2004, to certify that it has considered the potential for the presence of lead-containing materials in the modernization project and will follow all relevant standards.

The bill would authorize the use of school district deferred maintenance funds for the inspection, identification, sampling, analysis, control, management, and removal of lead-containing material.

Ch. 1076 (SB 170) Escutia. Insurers: data call: enforcement.

Existing law provides for regulation of insurers by the Insurance Commissioner. Existing law requires insurers issuing certain types of insurance policies to provide data to the Department of Insurance on request.

This bill would authorize the department to impose a civil penalty on any person subject to these data call provisions that fails to comply with the data call request.

Ch. 1077 (SB 174) Kuehl. Mediation proceedings.

Existing law governs mediation proceedings for child custody and visitation issues, including the notice of mediation. These provisions also authorize a mediator to make specified recommendations to a court regarding custody investigations and protective orders if the parties have not reached agreement as a result of the mediation proceedings. Existing law also authorizes a mediator to submit a recommendation to the court regarding the custody of or visitation with the child. Existing law provides that these provisions do not prohibit a mediator from recommending to the court that counsel be appointed to represent a minor child. In making this recommendation, existing law requires the mediator to inform the court of the reasons why it would be in the best interest of the minor child to have counsel appointed.

This bill would enact alternative provisions applicable to courts in 4 or more counties selected by the Judicial Council, as specified, that would become operative only upon the appropriation of funds in the annual Budget Act, as specified. The bill would authorize a selected court to voluntarily adopt a confidential mediation program that would prohibit the mediator from making a recommendation as to custody or visitation to anyone other than the disputing parties, except as specified. These alternative provisions would also authorize a mediator to report to the court whether total or partial agreement is reached in mediation. The alternative provisions would also provide that the mediator may not inform the court of the reasons why it would be in the best interest of the minor child to have counsel appointed when making that recommendation to the court. The bill would also make related, conforming changes.

Ch. 1078 (SB 330) Morrow. Interstate Compact for the Supervision of Adult Offenders.

Existing law adopts the Interstate Compact for the Supervision of Adult Offenders, which, among other things, requires the creation of a state Council for Interstate Adult Offender Supervision.

This bill would, in addition, revise the selection of the commissioner representing California on the Interstate Commission for Adult Offender Supervision, revise the appointment of members of the council, and require the council to make a report, not later than July 1, 2005, as specified, in regard to the implementation of the Interstate Compact, and the organization of certain supervisory entities pursuant to the Interstate Compact. The bill would make additional technical changes.

Ch. 1079 (SB 1244) Figueroa. Professions and vocations.<sup>5</sup>

(1) Existing law provides for the licensing and regulation of various professions and vocations by specified boards within the Department of Consumer Affairs. Existing law authorizes a board to designate an executive officer.

This bill would authorize the Director of Consumer Affairs to appoint an interim executive officer if a new board replaces an existing or previous board. The bill would provide that the interim executive officer would serve temporarily until the new board appoints a permanent executive officer.

(2) Existing law provides for the professional review of specified healing arts licentiates through a peer review process. Existing law provides for a peer review study by the Medical Board of California which is required to contract with the Institute for Medical Quality for the study. The institute is required to submit a written report of its findings and

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

recommendations to the Medical Board of California and to the Legislature by November 1, 2002. Existing law provides for disciplinary actions by the boards and commissions within the Department of Consumer Affairs. Existing law authorizes the imposition of a requirement that a licentiate found in violation of the licensing law pay the costs of investigation and enforcement, and provides that payment be deposited into the appropriate fund.

This bill would extend the deadline for the written report to the Legislature to November 1, 2003. The bill would also authorize the board to expend, for purposes of the peer review study, the first \$300,000 deposited into the Contingent Medical Board Fund in the 2002-03 fiscal year that are derived from licentiates' paying the costs of investigation and enforcement of the licensing laws.

Because the bill would authorize the expenditure of money in the Contingent Medical Board Fund for a new purpose, the bill would make an appropriation.

(3) Existing law provides for the licensure of occupational therapists and the certification of occupational therapy assistants by the California Board of Occupational Therapy. The board is authorized, after a hearing meeting certain requirements, to deny a license or certificate to an applicant for licensure or to suspend or revoke the license or certificate of, or place on probation, reprimand, censure, or otherwise discipline, a licensee or certified person.

This bill would delete the provisions authorizing censure or other discipline of a licensee or certified person by the board. The bill would instead specify disciplinary methods and application, define unprofessional conduct, and authorize a holder of a license to petition the board for reinstatement or for modification of a penalty.

(4) Existing law establishes the California Board of Accountancy in the Department of Consumer Affairs for the purpose of licensing and regulating public accountants.

Existing law sets forth certain education requirements for license applicants, and requires that the education meet certain criteria, including that it be from a university, college, or other institution of learning accredited by a regional institutional agency meeting specified requirements.

This bill would require that the university, college, or institution be degree granting, and would allow it to be accredited by either a regional or national accredited agency meeting specified requirements.

(5) Existing law provides for the certification and regulation of shorthand reporters and for the regulation of shorthand reporting corporations by the Court Reporters Board. Under existing law, shorthand reporting corporations are professional corporations, governed generally under the Moscone-Knox Professional Corporations Act, that render professional services through certified shorthand reporters. Existing law authorizes the board between January 1, 2001, and July 1, 2002, to examine, evaluate, and investigate complaints against shorthand reporting entities, as defined, for the purpose of determining the necessity to register these entities and requires the board to report its findings in this regard to the Legislature on or before July 1, 2002.

This bill would extend the board's authorization to examine, investigate, and evaluate complaints to January 1, 2004. The bill would specify that partnerships, unincorporated associations, and limited liability companies are entities for the purpose of qualifying as shorthand reporting entities. The bill would extend the board's reporting deadline to January 1, 2004.

Existing law requires an applicant for a certificate as a shorthand reporter to file an application at least 45 days before the date set for the licensing examination.

This bill would delete the 45-day deadline and instead authorize the board to set the deadline by regulation.

Under existing law, an applicant for a shorthand reporter certificate is required to satisfy certain requirements within the 5-year period immediately preceding the date of his or her application. Existing law, effective January 1, 2004, changes the time period to require that

the applicant satisfy these requirements within the 3-year period immediately preceding the date of his or her application

This bill would remove the time limit for fulfilling the requirements.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1080 (SB 1405) O'Connell. Paraprofessionals: instructional aides.

Existing law provides that no person shall be initially assigned to assist in instruction as an instructional aide, as defined, or to assist in instruction as a teacher aide for kindergarten and grades 1 to 12, inclusive, unless the person has demonstrated proficiency in basic reading, writing, and mathematics skills up to or exceeding that required for high school seniors, as provided.

This bill would apply those requirements to paraprofessionals and would define paraprofessional to include an instructional aide or a teacher aide. The bill would set forth qualifications for paraprofessionals consistent with the federal No Child Left Behind Act of 2001. The bill would impose a state-mandated local program by imposing new duties on school districts to comply with the requirements of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1081 (SB 1624) Romero. Educational facilities: California Educational Facilities Authority.

Existing law establishes the California Educational Facilities Authority Act, the purpose of which is to provide private institutions of higher education within the state an additional means by which to expand, enlarge, and establish dormitory, academic, faculty and staff housing, and related facilities, finance those facilities, refinance existing facilities, and to provide private and public institutions of higher education within the state an additional means to assist students in financing their costs of attendance.

This bill would authorize the authority to make up to a total of \$2,000,000 in grants in aid to private colleges to provide a program of academic assistance to high school pupils attending a qualified school, as defined, in accordance with prescribed selection criteria. This provision would be repealed as of January 1, 2009.

Because this bill would authorize the authority to expend funds for new purposes, it would make an appropriation.

Ch. 1082 (SB 1732) Escutia. Court facilities.

Existing law provides that no county is responsible for funding court operations, as defined, but that each county is responsible for providing necessary and suitable court facilities. Existing law authorizes counties to impose a specified penalty assessment on fines, penalties, and forfeitures collected by the courts for certain criminal offenses and a specified surcharge on parking penalties, to be used for courthouse construction, criminal justice facilities construction, automatic fingerprint identification funding, forensic laboratory funding, emergency medical services funding, and DNA identification funding. Certain counties are also authorized to surcharge civil filing fees for courthouse construction.

This bill would enact the Trial Court Facilities Act of 2002, revising the provisions governing courthouse construction. The bill would provide for a Court Facilities Dispute Resolution Committee to, among other things, hear and determine specified disputes in relation to the construction or transfer of court facilities, membership and financing to be determined, as specified. The bill would provide for the transfer of the responsibility of a county to provide necessary and suitable court facilities by authorizing the transfer of that responsibility from a county to the Judicial Council pursuant to an agreement to be negotiated between a county and the Judicial Council, as specified, between July 1, 2003,

and June 30, 2007. Among other things, the bill would require new duties of the Judicial Council, the Administrative Office of the Courts, and the Department of Finance. In this regard, the bill would impose a state-mandated local program by expanding various duties of a county with respect to court facilities.

This bill would establish the Court Facilities Trust Fund to be financed by specified payments by each county, and the State Court Facilities Construction Fund to be financed by specified state court construction penalty assessments, parking surcharges, and filing fee surcharges on civil actions, as specified. The bill would also establish the Transitional State Court Facilities Construction Fund to finance certain court facilities transferred to the Judicial Council pursuant to the bill, together with the reduction of a specified portion of penalty assessments imposed by the county.

This bill would further declare that a specified provision would become operative only upon the enactment of another specified provision or provisions, and become inoperative, as provided.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1083 (SB 1771) Alarcon. University of California: curriculum and research on diversity: institute.

Existing provisions of the California Constitution establish the University of California as a public trust under the administration of the Regents of the University of California.

This bill would request the Regents of the University of California to identify those resources and efforts that currently exist, at a statewide level, within the university for the development and coordination of curriculum and research on diversity in order to accomplish certain goals, and to report these findings and related recommendations to the Legislature on or before March 1, 2003.

Ch. 1084 (SB 1915) Alarcon. Deferred maintenance.

Existing law authorizes the governing board of a school district to establish a restricted deferred maintenance fund, provides for the deposit of prescribed local funds, and provides for the deposit of matching state funds.

Existing law requires the Superintendent of Public Instruction to certify whenever, in any given fiscal year, a school district has budgeted prescribed amounts in its deferred maintenance fund.

This bill would delete this requirement.

Existing law requires the State Allocation Board to apportion to school districts the state matching funds for deferred maintenance, and establishes the maximum required local deferred maintenance budget, on the basis of the school district's current-year revenue limit average daily attendance.

This bill would, instead, base those calculations upon the school district's second prior fiscal year revenue limit average daily attendance, would require the allocation to be made after December 1 of each fiscal year, and would make conforming changes.

Ch. 1085 (SB 1950) Figueroa. Healing arts.

(1) Existing law, the Medical Practice Act, creates the Medical Board of California within the Department of Consumer Affairs. Under the act, the board, consisting of 19 members, is responsible through its Division of Licensing for the licensure of physicians and surgeons

and for fixing the amount of the initial and biennial licensure fee at a sum not to exceed \$600. The act provides for the deposit of the fees into the Contingent Fund of the Medical Board of California, which is continuously appropriated. The act makes the practice of medicine without a license issued by the division punishable as a misdemeanor offense. The act additionally makes the board responsible through its Division of Medical Quality, consisting of 12 members, for the regulation of the practice of physicians and surgeons. Under the act, the board is authorized to employ an executive director and other assistance in discharging its duties. Under existing law, the act's provisions creating the board and authorizing it to employ this assistance become inoperative on July 1, 2003, and are repealed on January 1, 2004.

This bill would extend the dates on which these provisions become inoperative and are repealed to July 1, 2005, and January 1, 2006, respectively. The bill would increase the membership of the board and its Division of Medical Quality by 2 and would require the Director of Consumer Affairs to retain, prior to March 31, 2003, an enforcement program monitor who would evaluate the board's disciplinary system for a period of 2 years and report his or her findings to the Legislature, the board, and the Department of Consumer Affairs.

This bill would authorize the board to increase the initial license fee and biennial renewal fee, to an amount not to exceed \$610. By providing for an increase in licensure fees paid into a continuously appropriated fund, the bill would thereby make an appropriation. The bill would also revise certain licensure provisions pertaining to out-of-state practitioners and would allow a physician and surgeon whose license has been expired for less than 5 years and who meets specified criteria, to obtain licensure without paying fees that would otherwise be associated with issuance of the license. The bill would additionally include mental illness as a basis for participation in a diversion program and would revise other diversion program requirements.

This bill would, with respect to disciplinary actions, require any proposed decision or decision issued in those proceedings finding that the physician and surgeon has engaged in specified sexual activity to contain an order revoking his or her license. The bill would require the board to prioritize its investigative and prosecutorial resources in a specified manner and would require the board and the enforcement program monitor to report in its annual report certain information regarding priority cases. The bill would require that complaints involving quality of care contain certain information and be subject to specified expert review before being referred for further investigation. The bill would also authorize certain penalties against a licensee who has entered into a stipulation for disciplinary action. The bill would make a person who conspires with or aids or abets another in the unlicensed practice of medicine guilty of a public offense and would increase the punishment that may be imposed for the commission of this offense by allowing imprisonment in the state prison, by increasing the allowable term of imprisonment in a county jail, and by increasing the maximum amount of the fine.

Because the bill would create a new crime and would increase the allowable term of imprisonment in a county jail, it would impose a state-mandated local program.

(2) The Medical Practice Act provides for licensure of the practice of midwifery by the board's Division of Licensing and requires that the licensed midwife practice under the supervision of a licensed physician and surgeon.

This bill would require the board to adopt regulations defining the appropriate standard of care and level of supervision required for the practice of midwifery.

(3) Existing law, the Physician Assistant Practice Act, creates the Physician Assistant Committee within the Medical Board of California that, in conjunction with the board, licenses and regulates the practice of a physician assistant. The provisions creating the committee become inoperative on July 1, 2003, and are repealed on January 1, 2004. Under the act, a physician may supervise no more than 2 physician assistants at any one time except as specifically provided.

This bill would extend the dates on which these provisions become inoperative and are repealed to July 1, 2007, and January 1, 2008, respectively. The bill would authorize the committee, under the name of the board, to issue a probationary license to practice, subject to particular terms and conditions. The bill, until July 1, 2007, would also authorize a physician who provides services in a medically underserved area, as defined, to supervise not more than 4 physician assistants.

(4) Existing law requires every professional liability insurer to report either to the Medical Board of California or to the Osteopathic Medical Board of California any settlement over \$30,000, and any arbitration award in any amount of a malpractice claim or action against a licensee of that board. Under existing law, a physician and surgeon who is uninsured is required to report this information to his or her licensing board, and a failure to comply with this requirement is punishable as a public offense. Existing law also requires the Medical Board of California and the California Board of Podiatric Medicine to disclose to an inquiring member of the public specified information concerning the practice status of their licensees, and the Medical Board of California is additionally required to post this sort of information regarding its licensees on the board's Internet Web site.

This bill would require a professional liability insurer to report a civil judgment in any amount in a malpractice action, whether or not the judgment was subsequently vacated by a settlement, if the judgment is not reversed on appeal and would include this information, as well as other specified data, among the items that the Medical Board of California and the California Board of Podiatric Medicine are required to disclose to an inquiring member of the public. The bill would specify the type of settlements the boards are required to disclose to the public and the manner of disclosure and would also make the Osteopathic Medical Board of California subject to these public disclosure requirements. The bill would require the Medical Board of California to post on its Internet Web site specified information regarding licensees, including the material that it is required to disclose to any inquiring member of the public. The bill would specify that these materials are not a part of the central file maintained by the board for each of its licensees and would provide specified time periods for which the information would remain posted on the board's Internet Web site before being removed. The bill would require the boards to develop certain regulations regarding disclosure, and to notify the licensee and allow for the correction of inaccuracies. The bill would require reports of malpractice settlements or arbitration awards to contain the specialty or subspecialty of the physician and surgeon involved.

The bill would expand the types of settlements that an uninsured physician and surgeon is required to report to his or her licensing board. Because the failure to include those settlements would be punishable as a public offense, the bill would impose a state-mandated local program.

(5) Existing law establishes a Medical Quality Hearing Panel within the Office of Administrative Hearings, consisting of administrative law judges with specified medical training. Under existing law, the provisions creating the panel and determining its functions become inoperative and are repealed on January 1, 2003.

This bill would delete the inoperative and repeal date from these provisions.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1086 (SB 2010) Alpert. Community renewal.

Existing law designates the California Tax Credit Allocation Committee as the state's housing credit agency for the purpose of the federal Internal Revenue Code.

This bill would designate the committee as the state's commercial revitalization agency for the purpose of federal law, and require the committee to develop and implement a plan to allocate commercial revitalization expenditure amounts. For that purpose, the bill would

create the Community Revitalization Fee Fund in the State Treasury, and moneys in the fund would be available to the committee upon appropriation by the Legislature. These provisions would be repealed on January 1, 2010.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1087 (SB 2029) Alarcon. Teacher certification: district interns.

Existing law authorizes the Commission on Teacher Credentialing, as a pilot program, to issue district intern certificates authorizing persons employed by the Los Angeles Unified School District to provide classroom instruction to pupils with mild and moderate disabilities in special education classes. Under existing law, prior to assignment to teach pupils with disabilities, persons holding district intern certificates are required to teach one complete school year in a general education program, as specified.

This bill, instead, would authorize the commission until January 1, 2008, to issue those district intern certificates to persons employed by any school district. The bill would eliminate the requirement that a district intern teach one complete school year in a general education program, and instead, would require a school district's professional development plan for district interns teaching in special education programs to include, among other things, training and fieldwork in instructional practices and procedures and pedagogy of general education programs and special education programs.

This bill would require the commission to prepare and submit a report to the Legislature on or before January 1, 2007, that summarizes the regulations adopted by the commission to expand statewide the issuance of those district intern certificates, and that evaluates the effectiveness of persons that hold those certificates.

Ch. 1088 (AB 925) Aroner. Employment of persons with disabilities.

Existing law contains various programs to assist persons with disabilities to obtain employment.

This bill would require the California Health and Human Services Agency and the Labor and Workforce Development Agency, using existing resources, to create a sustainable, comprehensive strategy to accomplish various goals aimed at bringing persons with disabilities into employment.

The bill would require the Governor to rename and authorize the existing California Governor's Committee on Employment of Disabled Persons, as the "California Governor's Committee on Employment of People with Disabilities," would require the committee to be established in the Labor and Workforce Development Agency, and would specify the membership and duties of the committee.

The bill would also require the committee, to the extent that funds are available, to make grants to counties and local workforce investment boards in order to develop local strategies for enhancing employment opportunities for people with disabilities, and to fund comprehensive local and regional benefits planning and outreach programs to assist persons with disabilities in removing barriers to work.

Existing law contains various programs for job training and employment investment. Among other things, provisions are made for local workforce investment boards. In addition, a State Workforce Investment Board has been established in accordance with federal law.

This bill would require each local workforce investment board to establish at least one comprehensive one-stop career center and would impose various requirements related to ensuring that those one-stop centers provide universal access to services pursuant to the federal Workforce Investment Act of 1998 for persons with disabilities.

The bill would also require that, if permitted by federal law, the California Workforce Investment Board and local workforce investment boards include persons with disabilities.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law specifies procedures under which personal care services meeting certain conditions, when provided to a categorically needy person, as defined, are a covered Medi-Cal benefit to the extent federal financial participation is available. Under existing law, these provisions become inoperative on July 1, 2002, and as of January 1, 2003, are repealed.

This bill would require these personal care services to include services in the recipient's place of employment, under specified conditions. By expanding the scope of personal care services, the bill would create a state-mandated local program. The bill would also delete the inoperative and repeal dates described above, thereby making these Medi-Cal benefit coverage provisions operative on and after January 1, 2003.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1089 (AB 1140) Thomson. Nursing: workforce planning.

Existing law, the Nursing Practice Act, provides for the licensure and regulation by the Board of Registered Nursing of the practice of registered nurses. Under existing law, all moneys received pursuant to the provisions of this act are deposited into the Board of Registered Nursing Fund, which is continuously appropriated.

This bill would require the board to obtain workforce data from its licensees for purposes of work force planning and produce reports on the issue at least biennially. The bill would authorize the board to expend the sum of \$145,000 from the Board of Registered Nursing Fund for this purpose. Because the bill would authorize the expenditure of revenues in a continuously appropriated fund for a new purpose, it would make an appropriation. The bill would require the board to implement these provisions before July 1, 2003.

Ch. 1090 (AB 1858) Hollingsworth. County Sexual Assault Felony Enforcement Team Program.

Existing law provides for the development of a course of training for district attorneys in the investigation and prosecution of sexual assault cases in order to encourage the establishment of sex crime prosecution units in district attorneys' offices throughout the state. Existing law further provides for a statewide sexual habitual offender program in order to identify, locate, apprehend, and prosecute sexual habitual offenders.

This bill would provide, in addition, that any county may establish and implement a sexual assault felony enforcement (SAFE) team program. The members of the team would be specified federal, state, and local law enforcement officers and agents. The objectives of the program would be to: (1) identify, monitor, arrest, and assist in the prosecution of habitual sexual offenders who violate the terms and conditions of their probation or parole, who fail to comply with registration requirements, or who commit new sexual assault offenses; (2) collect data to determine if the proactive law enforcement procedures adopted by the program are effective in reducing violent sexual assault offenses; and (3) develop procedures for operating a multijurisdictional regional task force.

Ch. 1091 (AB 2018) Nakano. Public safety: communication system.

Existing law provides for the coordination of state and local public safety agencies and emergency response teams to respond to emergencies. Existing law administered by the Federal Communications Commission authorizes public safety agencies or entities to operate radio communication systems on specified frequencies of the radio spectrum and directs states to oversee interoperability of public safety spectrum. The existing Public Safety

Radio Strategic Planning Committee, which consists of representatives of specified state agencies, was established in recognition of the need to improve existing public radio systems and to develop interoperability among public safety departments.

This bill would provide that the committee shall have primary responsibility in state government for developing and implementing a statewide integrated public safety communication system for state government agencies that facilitates interoperability and other shared uses of public safety spectrum with local and federal agencies, consistent with decisions and regulations of the Federal Communications Commission. The bill would require the committee to consult with specified organizations and entities and require each of these organizations or entities to designate a representative to work with the committee to develop agreements for interoperability or other shared use of public safety spectrum with a local or federal agency. This bill would require the committee to determine which agencies need new or upgraded communication equipment, with consideration of a specified technical standard, in order to enter into an agreement for interoperability or other shared use of public safety spectrum and to establish a program for equipment purchase. This bill would require the committee to report to the Legislature, no later than January 1, 2004, on its progress in implementing these provisions.

Ch. 1092 (AB 2211) Horton. Study: community impact statements.

Existing law provides that the victim of any crime, or the parents or guardians, if the victim is a minor, or the next of kin if the victim has died, have the right to reasonably express his, her, or their views concerning the crime, the person responsible, and the need for restitution.

This bill would require the Judicial Council to conduct a study of the potential effects of, implementation issues surrounding, and alternatives to, a policy requiring courts to consider community impact statements, as specified.

Ch. 1093 (AB 2314) Thomson. Nursing education.

Existing law establishes the California State University and provides for its administration by the Trustees of the California State University. Existing law designates 25 institutions of higher education as components of the California State University, and authorizes these institutions to provide various academic programs. Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state.

This bill would require, by September 1, 2005, the Chancellor of the California Community Colleges to encourage community college districts, and the Chancellor of the California State University to require campuses of the California State University, to standardize all nursing program prerequisites on a statewide basis. The bill would require the Chancellor of the California Community Colleges to encourage community college districts to negotiate and implement articulation agreements with campuses of the California State University to which they send a significant number of nursing students, and require the Chancellor of the California State University to require the campuses of the university that maintain nursing education programs to negotiate and implement articulation agreements with community college districts from which they receive a significant number of nursing students. The bill would require the Chancellor of the California Community Colleges and the Chancellor of the California State University to implement the recommendations of the Intersegmental Major Preparation Articulated Curriculum (IMPAC) project not later than September 1, 2004.

Ch. 1094 (AB 2504) Jackson. Judges: arbitration.

Existing law sets forth the grounds for the required disqualification of a judge, as specified.

This bill would require the disqualification of a judge who has a current arrangement concerning prospective employment or other compensated service as a dispute resolution neutral, as defined, or is participating in, or, within the last two years, has participated in, discussions regarding such prospective employment or other service, and further, specified conditions apply.

Existing law requires a proposed neutral arbitrator in an arbitration pursuant to an arbitration agreement to disclose, among other things, the existence of grounds for the required disqualification of a judge.

This bill require disclosure of whether or not an arrangement or discussion described above applies.

Ch. 1095 (AB 2506) Steinberg. State Teachers' Retirement System: investment products.

Existing law creates the State Teachers' Retirement System (STRS) as a unit within the State and Consumer Services Agency to administer a retirement program for public school teachers, teachers in schools supported by the state, and other persons employed in connection with the schools. STRS is managed by the Teachers' Retirement Board.

This bill would require the board to establish a registration process for vendors seeking to offer retirement investment products to employees of all local school districts, community college districts, and county offices of education. The bill would require the initial registration process to be completed by July 1, 2004. The bill would require the board to provide those entities access to an impartial information bank to compare the registered vendors and the investment options being offered. The bill would require registration to be offered once annually and that vendors renew their registration at least every 5 years. The bill would establish requirements for the amendment of information required by the vendors. The bill would permit the board to remove a vendor from the registry, as specified. The board would be required to provide registry information and objective investment performance information on the Internet. The bill would require the actual costs associated with the establishment and administration of the investment registration process and the provision of the information bank to be borne equally by the registered vendors, as specified.

The bill would provide immunity to the board, STRS, and its officers and employees from liability for information in the bank and actions of the registered vendors. The bill would restrict the forwarding of consideration for unregistered retirement investment products, as specified, and would limit employee selection of investment products, as specified. The bill would prohibit specified personnel from receiving consideration for promoting a particular vendor's products. The bill would enact other related provisions.

Ch. 1096 (AB 2532) Rod Pacheco. Textbook weight.

Existing law requires the governing board of a school district to give diligent care to the health and physical development of pupils.

This bill would require the State Board of Education, on or before July 1, 2004, to adopt maximum weight standards for elementary and secondary school textbooks.

Ch. 1097 (AB 2578) Shelley. Contracts: breach of confidentiality: proprietary information.

Existing law provides for the prosecution of specified criminal actions against persons in violations of public contracts.

This bill would provide that it is a misdemeanor for a contracting party to intentionally disclose any proprietary information, as defined, obtained during the negotiation, execution, or performance of a contract with a state agency or the Independent System Operator when the contracting party knew or should have known that the disclosure was likely to cause harm.

This bill would, by expanding the definition of a crime, impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1098 (AB 2816) Shelley. Workers' compensation: contractors: temporary labor.

Existing workers' compensation law generally requires employers to secure the payment of workers' compensation for injuries incurred by their employees that arise out of or in the course of employment. Recovery under workers' compensation law is the sole and exclusive remedy of an employee or his or her dependents against the employer. The failure to secure workers' compensation as required by the workers' compensation law is a misdemeanor.

Existing law, the Contractor's State License Law, provides for the regulation of licensed contractors.

This bill, for purposes of the workers' compensation law, would provide that when a contractor enters an agreement with a temporary employment agency, employment referral service, labor contractor, or other similar entity for the entity to supply the contractor with an individual to perform acts or contracts under the contractor's license and the contractor is responsible for supervising the individual, the temporary employment agency, employment referral service, labor contractor, or other similar entity shall pay workers' compensation premiums, in accordance with specified criteria, and shall be solely responsible for the individual's workers' compensation. This bill would also require these entities to report to insurers certain information pertaining to these workers and the licensed contractors to whom these workers are provided, and allow these entities to pass through costs incurred as a result of this bill to licensed contractors.

This bill would require the contractor to notify the entity that is supplying the temporary worker pursuant to these provisions when the temporary worker is being used on a public works project or the contractor reassigns the temporary worker to a position other than the classification to which the worker was originally assigned.

Ch. 1099 (AB 2817) Maddox. Sex education: course content.

Existing law sets forth specified criteria that are required to be included in the content of sex education courses if those courses are offered.

This bill would require, as an additional course criteria, sex education classes to advise pupils of specified provisions of law relating to parents and others who voluntarily surrender physical custody of a minor child 72 hours old or younger at a hospital emergency room or other designated location without being subject to criminal prosecution for certain crimes.

Ch. 1100 (AB 2849) Washington. Classified school employees.

(1) Existing law requires the governing board of a school district or the personnel commission in a school district that has adopted the merit system to classify all employees and positions not requiring certification qualifications. These employees and positions are known as the classified service. Existing law exempts part-time playground positions from the classified service.

This bill would instead provide that part-time playground positions are not part of the classified service unless the employee in the position is otherwise employed in a classified position. The bill would also prohibit a school district from reducing the hours of, or terminating, as a result of the implementation of the bill, a classified employee who was assigned to a part-time playground position.

(2) This bill would incorporate additional changes to Section 45103 of the Education Code proposed by AB 500, to be operative only if this bill and AB 500 are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 1101 (AB 2915) Wayne. Arbitration.

Existing law regulates the conduct of arbitration proceedings, providing for, among other things, the powers and duties of a neutral arbitrator or arbitrators, the appointment of times and places for hearings, the exchange of witness lists, and the right of representation by counsel.

This bill would prohibit a neutral arbitrator or private arbitration company from administering any consumer arbitration that requires a nonprevailing consumer who is a party to the arbitration to pay the opposing party's costs or fees. The bill would require a private arbitration company to waive the fees and costs of arbitration, exclusive of arbitrator fees, for an indigent consumer, as defined. The bill would also require a private arbitration company to provide written notice to any consumer of the right to obtain a fee waiver, as specified, and to keep specified information concerning a consumer confidential, with certain exceptions.

Ch. 1102 (SB 105) Burton. Services: blind: visually impaired: deaf: hard of hearing.

Existing law provides for the Department of Rehabilitation, which administers various programs and services for disabled persons, including the blind and visually impaired.

This bill would establish the Division of Services for the Blind and Visually Impaired and the Deaf and Hard of Hearing, would establish the responsibilities of the division, would require the director of the division to report to the Legislature and the Governor on programs administered by the division, would require the director to appoint a Blind Advisory Committee and a Deaf Advisory Committee to advise the director on certain issues, and would make related and conforming changes.

This bill would incorporate additional changes in Section 11135 of the Government Code, proposed by AB 3035, to be operative only if AB 3035 and this bill are both chaptered and become effective January 1, 2003, and this bill is chaptered last.

Ch. 1103 (SB 621) Costa. Water bonds.

Under existing law, various bond acts have been approved by the voters to provide funds for water projects, facilities, and programs. The Costa-Machado Water Act of 2000 authorizes, for the purposes of financing a safe drinking water, water quality, watershed protection, and flood protection program, the issuance of bonds in the amount of \$1,970,000,000, of which \$60,000,000, upon appropriation by the Legislature to the Department of Water Resources, is required to be expended by the department for grants for infrastructure rehabilitation projects.

This bill would appropriate \$2,100,000 from bond funds made available to the department for infrastructure rehabilitation projects for allocation to the Tulare County Water Works District No. 1 and the Alpaugh Irrigation District for the repair and replacement of domestic water supply and treatment systems owned and maintained by those districts. The bill would require those districts to complete a feasibility study to be approved by the department before allocation of the funds.

The bill would additionally appropriate \$1,000,000 from those bond funds for allocation to Madera County for the repair and replacement of domestic water supply and treatment systems for the Oakhurst area.

Ch. 1104 (SB 1164) Sher. Local coastal programs: costs.

Existing law provides that litigation costs incurred by a local government as a result of the operation of a certified local coastal program may be reimbursed under certain conditions.

This bill would permit litigation costs to be paid to the local government prior to the time that a final judgment is rendered in an action if the Attorney General has intervened in support of the local government's position, the amount paid does not exceed \$500,000, and the amount paid is equal to or greater than 5% of the local government's general revenues as published in the most recent version of "Cities Annual Report" by the Controller. The bill would require that payment of prejudgment costs comply with procedures established by the Executive Director of the Coastal Commission in consultation with the Attorney General, and that the local government reimburse the state from any costs it recovers after a final judgment is rendered in the action.

Ch. 1105 (SB 1391) Burton. Criminal procedure.

Under existing law, pretrial discovery in criminal cases is governed by a detailed statutory scheme, but discovery issues in postconviction habeas corpus proceedings are decided largely on a case-by-case basis.

This bill would require that discovery materials to which a defendant would have been entitled at the time of trial be made reasonably accessible to the defendant if he or she has been sentenced to death or life in prison without the possibility of parole and files a specified motion or writ of habeas corpus that makes a specified showing. This bill would require a defendant be given access to physical evidence only upon a separate court finding, as specified, and would specify that the only means of obtaining access to physical evidence for postconviction DNA testing is through other specified procedures.

By authorizing the court to require local agencies to provide access to physical evidence under certain circumstances, this bill would impose a state-mandated local program.

Under existing law, although persons not presently restrained of liberty may seek certain types of relief from the disabilities of a conviction, the writ of habeas corpus is generally not available to them. A writ of habeas corpus generally will not issue unless all other remedies at law are exhausted, and must be filed within a reasonable time, as provided.

This bill would create an explicit right for a person no longer unlawfully imprisoned or restrained to prosecute a motion to vacate a judgment based on newly obtained evidence of fraud or misconduct by a government official, as specified. The right would extend for one year from the later of the effective date of the bill or the date that the moving party discovered, or could have discovered with the exercise of due diligence, additional evidence of the misconduct or fraud by a government official beyond the moving party's personal knowledge.

Existing law grants a person who was convicted of a felony and is currently serving a term of imprisonment the right to make a written motion under specified conditions for the performance of forensic DNA testing. Existing law, to be repealed by its own terms on January 1, 2003, requires that DNA evidence secured in connection with a criminal case be retained by an appropriate governmental entity, and may be disposed of only at specified times and under specified conditions.

This bill would eliminate the repeal of these provisions relating to the retention of DNA evidence.

By requiring local authorities to maintain DNA evidence that would otherwise be subject to disposal after January 1, 2003, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1106 (SB 1312) Peace. Public safety.

(1) Existing law provides for the coordination of state and local public safety agencies and emergency response teams to respond to emergencies. Existing law administered by the Federal Communications Commission authorizes public safety agencies or entities to operate radio communication systems on specified frequencies of the radio spectrum and directs states to oversee interoperability of public safety spectrum.

This bill would provide that, of the amounts received from the federal government for homeland security and appropriated in the Budget Act of 2002, not more than \$15,000,000 may be allocated to the security advisor to the Governor for disbursement to state and local government public safety agencies to procure and operate specified radio equipment. It would require each state and local government public safety agency that receives these funds to provide an annual report to the Legislature, as specified.

(2) Existing law requires every dealer, manufacturer, importer, and exporter of any destructive device, or any motion picture or television studio using destructive devices in the conduct of its business, to obtain a permit for the conduct of that business from the Department of Justice. Existing law requires each applicant for a permit to pay an application fee not to exceed the application processing costs of the Department of Justice. Existing law limits the rate at which this fee may increase.

This bill would require the department to annually conduct an inspection, for security and safe storage purposes, and with specified exceptions, of every person, firm, or corporation to whom a permit is issued for destructive devices. The bill would allow the department to set a permit fee sufficient in amount to cover processing costs and the costs of required departmental inspections.

This bill would specify that the cost of these inspections are to be funded through the inspection fees and, if necessary, and only until January 1, 2006, through the Dealers' Record of Sale Special Account.

This bill would provide that its provisions relating to the operation and funding of inspections for holders of permits for destructive devices would only become operative if AB 2580 is enacted and this bill is enacted after AB 2580.

Ch. 1107 (SB 1471) Romero. Sick leave.

Existing law requires an employer who provides sick leave to employees, as defined, to permit an employee to use sick leave to attend to an illness of a child, parent, spouse, or domestic partner. An employer is prohibited from retaliating against an employee who uses sick leave for this purpose. An employee aggrieved by a violation of this law may recover legal and equitable relief from his or her employer.

This bill would provide that if an employer maintains an absence control policy that counts sick leave used to attend to an illness of a child, parent, spouse, or domestic partner as a basis for discipline, demotion, discharge, or suspension, the policy would be a per se violation of the law, entitling an employee working under the policy to appropriate relief.

Ch. 1108 (SB 1977) Johannessen. Bank and corporation taxes: reorganizations.

The Bank and Corporation Tax Law provides that certain provisions of federal law, relating to corporate distributions and adjustments, including distributions, liquidations, and reorganizations, apply for purposes of determining the tax under the state law, except as otherwise specified.

This bill would provide that the contribution or other transfer of assets from a mutual water company that is federally tax exempt, but that is a taxable entity under California law, to a community service district is not a transfer subject to tax under that law.

This bill would take effect immediately as a tax levy.

Ch. 1109 (SB 2055) Sher. Subdivisions.

(1) Under the Subdivision Map Act, a local agency may, prior to January 1, 2003, approve or approve conditionally an environmental subdivision, which is defined as a subdivision of land for biotic and wildlife purposes, if the local agency finds that specified conditions have been met.

This bill would extend the authority of a legislative body to approve or conditionally approve an environmental subdivision through December 31, 2004.

(2) The Subdivision Map Act also authorizes local legislative bodies to regulate, by ordinance, the design and improvement of subdivisions for which a tentative and final map or parcel map is required. The act also defines "design" to include such other specific physical requirements in the plan and configuration of the entire subdivision as may be that are necessary to ensure consistency with, or implementation of, the general plan or any applicable specific plan.

This bill would revise this definition to include a reference to the requirement that the design and improvement of the subdivision be consistent with the general plan or any specific plan.

(3) The Subdivision Map Act also provides that a local agency is not required to disapprove either a tentative or final map solely on the basis that the reasonable public access required by the act is not provided through or across the subdivision itself, if the local agency makes a finding that the reasonable public access is otherwise available within a reasonable distance from the subdivision.

This bill would also require the local agency to identify the location of the reasonable public access.

(4) The bill would also make other technical, nonsubstantive changes to these provisions.

(5) This bill would also amend Section 65041.1 of the Government Code as proposed to be added by AB 857 to make clarifying changes, to be operative only if AB 857 is enacted and becomes effective on or before January 1, 2003.

#### Ch. 1110 (SB 2073) Johannessen. Vehicle dealers: bonds.

Existing law requires an applicant for a vehicle dealer's license to procure and file with the Department of Motor Vehicles a bond executed by an admitted surety in the amount of \$10,000. An applicant for a remanufacturer's license is required to file a bond in the amount of \$25,000.

Senate Bill 1458 would increase the amount of the dealers's bond and the remanufacturer's bond to \$50,000, except the bond amount of dealer who deals exclusively in motorcycles would remain at \$10,000.

This bill would provide that the bond amount of a dealer who sells vehicles on a wholesale basis only, and who sells fewer than 25 vehicles per year, shall be \$10,000. This bill would provide that this provision shall become operative only if both this bill and SB 1458 are enacted.

#### Ch. 1111 (AB 2289) Kehoe. Common interest developments.

(1) The Davis-Stirling Common Interest Development Act defines and regulates common interest developments and permits the association that manages the development to levy assessments to fulfill its obligations under the act, but also prohibits certain actions.

This bill would prohibit an association from denying an owner physical access to his or her separate interest, except pursuant to an order of a court or an order pursuant to a final and binding arbitration decision.

(2) Existing law permits any member of the association of a common interest development to attend meetings of the board of directors of the association, except when the board adjourns to executive session to consider litigation, matters relating to the formation of contracts with 3rd parties, member discipline, or personnel matters.

This bill would revise the matters that the board may consider in executive session to include meeting with a member, upon the member's request, regarding the member's

payment of assessments. This bill would require that matters discussed in executive sessions be noted in the minutes of the immediately following meeting open to the entire membership. The bill would also revise notice provisions regarding the times and places of board meetings.

(3) Existing law requires an association to prepare and distribute to its members specified documents, including documents related to the association's budget, finances, and policies and practices in enforcing lien rights or other legal remedies for default in payment of its assessments against its members.

This bill would require an association to deliver a specific notice to each member of the association regarding assessments and foreclosure.

(4) Existing law provides that a regular or special assessment of the association, late charges, reasonable costs of collection, and interest, as specified, are a debt of the owner of the separate interest at the time the assessment or other sums are levied, and are a lien on the owner's separate interest when the association records a specified document and follows a specified process. Existing law permits the association to enforce the lien in any manner permitted by law including a sale by a trustee, also known as a nonjudicial foreclosure.

This bill would require that an association that fails to comply with that specified process, prior to placing a lien, recommence the notice process at the expense of the association. This bill also requires that parties recording liens against separate interests in error follow a timely procedure for recording a lien release, as specified.

(5) Existing law requires an association to provide notice to its members by first-class mail of any increase in the assessments within a specified timeframe. Existing law permits the association to recover various costs, fees, and interest in collecting a delinquent assessment.

This bill would clarify the timeframe in which notice is required, and the amount of interest the association is permitted to recover, as specified.

(6) Existing law provides a specified process for disputes related to association assessments, including an exception to that process if the owner of the separate interest chooses to pay certain charges and mail a written notice that the amount is paid under protest. Under this exception, the association is required to inform the owner of his or her right to resolve the dispute through alternative dispute resolution.

This bill would require, as a condition for the exception to apply, that only reasonable fees and charges be paid, including reasonable attorney's fees not to exceed \$425.

(7) Existing law further requires an association to notify an owner of record of the penalty procedures and provide an itemized statement of charges.

This bill would require, for liens created on and after January 1, 2003, that an association, 30 days prior to placing a lien on the separate interest of the owner of record, to notify the owner by mail of the association's collection and lien procedures, as specified, and of the owner's right to request a meeting before the board of directors to discuss amounts constituting the owner's debt that are in dispute or delinquent, and any payment plan proposed by the owner, as specified. The bill would require the board, under specified circumstances, to respond in writing to an owner's dispute of a debt when an owner submits a written explanation to the board, and would require the board to meet with a homeowner to discuss a payment plan, as specified. The bill would except owners of time-share projects, time-share estates, and time-share uses from the right to submit a payment plan to the board and meet with the board to discuss that plan. The bill would also make conforming changes.

(8) This bill would incorporate additional changes in Section 1368 of the Civil Code proposed by AB 643, to be operative if AB 643 and this bill become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 1112 (AB 746) La Suer. Nonresident petitioners: adoption.

Existing law provides that a prospective adoptive parent may file a petition for an agency adoption or an independent adoption of a child in the county in which the petitioner resides.

This bill would further provide that if the petitioner is not a resident of this state, he or she may file a petition for an agency adoption or an independent adoption in the county in which the birth parent or birth parents resided when the relinquishment of parental rights for purpose of adoption was signed, or in the county in which the birth parent or birth parents resided when the adoption placement agreement was signed or the county in which the placing birth parent or birth parents resided when the petition was signed, respectively. The bill would, in the instances in which the petitioner is the resident of another state, require that an updated and current homestudy report, conducted and approved by a licensed adoption agency or other authorized resource in the state in which the petitioner resides, be reviewed and endorsed by the State Department of Social Services, as specified.

Ch. 1113 (AB 2072) Mountjoy. Open meetings: closed sessions: security.

The Bagley-Keene Open Meeting Act requires, with specified exceptions for authorized closed sessions, that all meetings of a state body be open and public and all persons be permitted to attend any meeting of a state body.

This bill would also authorize a state body, until January 1, 2006, to hold closed sessions to consider matters posing a threat or potential threat of criminal or terrorist activity against the personnel, property, buildings, facilities, or equipment, including electronic data, owned, leased, or controlled by the state body, where disclosure of these considerations could compromise or impede the safety or security of the personnel, property, buildings, facilities, or equipment, including electronic data, owned, leased, or controlled by the state body.

This bill would provide that, notwithstanding any other provision of law, a state body may meet in a closed session under these provisions upon a  $2/3$  vote of the members present at any regular or special meeting. It would require the body, after meeting in closed session under these provisions, to reconvene in open session and report that a closed session was held pursuant to these provisions, the general nature of the matters considered, and whether any action was taken in closed session, and to submit written notification of these matters to the Legislative Analyst, who would be required to retain the notification for no less than 4 years.

Ch. 1114 (SB 1298) Ortiz. Public health emergencies: state aid: local health administration.

Existing law provides for the allocation of state aid to the administrative bodies of qualifying local health departments according to a specified formula. Among other things, the formula provides for a minimum basic allotment to each local health jurisdiction of \$100,000, or \$0.212426630 per capita, whichever is greater, with the balance allotted on a per capita basis. Existing law specifies the purposes for which the allocated funds may be used.

This bill would revise the purposes for which the allocated funds may be used.

Ch. 1115 (AB 3036) Corbett. Guardianship.

(1) Existing law provides for the establishment of guardianships.

This bill would require the court, to the extent resources are available, to implement procedures to ensure that every guardian annually completes and returns a status report. The bill would require the form to include a specified statement. The bill would provide that a guardian who willfully submits any material information required by the form which he or she knows to be false is guilty of a misdemeanor. By creating a new crime, the bill would impose a state-mandated local program.

The bill would require the clerk of the court to mail to the guardian one month prior to the date the status report is required to be returned a blank status report form and a notice informing the guardian that he or she is required to complete and return the status report. The bill would provide for the confidentiality of the report. The bill would require the court to attempt to obtain the information required in the report from the guardian or from other sources if the status report is not completed and returned or if the court finds that further

information is needed. The bill would also require the court to order the guardian to make himself or herself available to the investigator for purposes of investigation of the guardianship, or to show cause why the guardian should not be removed, if the court is unable to obtain the information required in the report within 30 days after the status report is due. By imposing additional duties on court employees, the bill would create a state-mandated local program.

The bill would also require the Judicial Council to develop a form for the status reports, as specified, and report to the Legislature no later than December 31, 2004, regarding the costs and benefits of utilizing the annual status reports.

(2) Existing law requires the Department of Justice to maintain a Statewide Registry of conservators and guardians, and requires all persons who wish to serve as a conservator or guardian, or who are currently serving as a conservator or guardian, to register and reregister with the Statewide Registry, except as provided. Existing law allows the Department of Justice to charge a reasonable fee to persons registering and reregistering with the Statewide Registry for the cost of that registration. Existing law also prohibits a superior court from appointing or permitting a person to serve as a private professional conservator or private professional guardian unless the person has filed certain information with the county clerk.

This bill would except certain nonrelated guardians of the person of a minor, appointed under specified circumstances by the juvenile court or the probate court, from the registration and filing requirements.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 1116 (AB 555) Dutra. Common interest development managers.

(1) Existing law, the Davis-Stirling Common Interest Development Act, establishes a scheme for the regulation of common interest developments.

This bill would require a person, in order to be called a "certified common interest development manager" to have either passed an examination or achieved certification designated by a professional association for community association managers within the previous 5 years and to have satisfied other specified educational requirements. The bill would also require a person who provides or contemplates providing management services to a community association to disclose to that association whether that person is a certified common interest development manager. The bill would also make it an unfair business practice for a common interest development manager and certain other persons, to use the title of "certified common interest development manager" without meeting specified requirements, or to state or advertise that he or she is certified or licensed by a governmental agency to act as certified common interest development manager. The bill would provide that the above provisions would remain in effect only until January 1, 2008, unless extended.

(2) Existing law requires applicants for the real estate broker license examination and applicants for a real estate license renewal to meet certain education requirements.

This bill would include on July 1, 2004, in those requirements education in the subject of California law relating to common interest developments. The bill would also provide on July 1, 2003, that successful completion of coursework for renewal of a real estate license requires an applicant to demonstrate that he or she has passed a final examination.

(3) Existing law requires the articles of incorporation of common interest development associations to include specified information, including a statement that identifies the name and address of the association's managing agent, if any.

This bill would additionally require the articles of incorporation of a common interest development to state whether the association's managing agent is certified. The bill would further require a common interest development association to distribute to its members a summary of its fidelity insurance policies within 60 days preceding the start of the association's fiscal year.

Ch. 1117 (AB 643) Lowenthal. Common interest developments: community association assessments.

(1) Existing law requires a common interest development association's articles of incorporation filed with the Secretary of State on or after January 1, 1995, to include a statement of information identifying the corporation as a common interest development, specified information about the corporate office, and specified information about the association's managing agent. Existing law further requires that the statement of principal business activity in the annual statement filed by an incorporated association with the Secretary of State also include this information.

This bill would require a common interest development association, whether incorporated or unincorporated, to submit to the Secretary of State, on a form and for a fee not to exceed \$30 to be prescribed by that office, information regarding the common interest development. The fee would be deposited in the Secretary of State's Business Fees Fund, as specified. Among other things, and in addition to the information described above, this information would include the address and either the daytime telephone number or the e-mail address of the president of the association, specified information about the location of the common interest development, and the number of separate interests in the development. The bill would require this information to be submitted according to specified criteria and within certain timeframes. The bill would limit access to specified information concerning the directors of the association, making it available only for governmental purposes and to members of the Legislature and the Business, Transportation and Housing Agency. The bill would provide for the suspension of the unincorporated association's rights, privileges, and powers as a corporation and would subject it to monetary penalties for failure to comply with those provisions. The bill would also make related changes.

(2) Existing law requires an owner of a separate interest, as specified, to provide the prospective purchaser with a copy of the governing documents of the common interest development.

This bill would additionally require an owner to provide the purchaser with a statement from an authorized representative of the common interest development's association indicating if the association is not incorporated, as specified.

(3) This bill would incorporate additional changes in Section 1368 of the Civil Code proposed by AB 2289, to be operative if AB 2289 and this bill become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 1118 (AB 1938) Aroner. Guardianship: conservatorships: custody.

(1) Existing law authorizes a defendant in any litigation pending in any court of this state, at any time until final judgment is entered, to move for a court order requiring the plaintiff to furnish security as a vexatious litigant, as defined. Existing law requires the litigation to be dismissed as to the defendant for whose benefit the security was ordered, if it is not furnished.

This bill would specifically extend these provisions to any petition, application, or motion other than a discovery motion, in a proceeding under the Family Code or Probate Code, for any order.

(2) Under existing law, before making an order granting custody to a person or persons other than a parent, without the consent of the parents, a court is required to make a finding that granting custody to a parent would be detrimental to the child and that granting custody to a nonparent is required to serve the best interest of the child.

This bill would, instead, require that the finding be made before making that order over the objection of, rather than without the consent of, a parent. The bill would define detriment to a child, and require a finding that parental custody is detrimental to the child to be supported by clear and convincing evidence unless the court finds by a preponderance of the evidence that custody would be granted to a person who has assumed the role of a parent for a substantial period, and would make related changes. This finding would constitute a finding that the custody is in the best interest of the child and that parental custody would be detrimental to the child, absent a showing by a preponderance of evidence to the contrary, as specified. A finding of detriment to the child would not require any finding of unfitness of the parents for these purposes.

(3) Under existing law, upon the petition of the guardian, a parent, or the ward, a court may make an order terminating the guardianship if the court determines that it is no longer necessary that the ward have a guardian or that it is in the ward's best interest to terminate the guardianship.

This bill would delete the determination that the guardianship is no longer necessary as grounds for an order terminating guardianship. The bill would make various legislative findings, and specify that certain petitions filed in a guardianship proceeding are grounds for the court to determine that the petitioner is a vexatious litigant.

Ch. 1119 (AB 1945) Simitian. Open meetings: closed sessions: confidential information.

The Ralph M. Brown Act generally requires that the meetings of the legislative body of a local agency be conducted openly and publicly, but also provides that the legislative body of a local agency may hold closed sessions for specified purposes. The act provides that a member of a legislative body who attends a meeting of that body where action is taken in violation of the act, and where the member intends to deprive the public of information to which the member knows or has reason to know the public is entitled under the act, is guilty of a misdemeanor.

This bill would provide that a person may not disclose confidential information, as defined, that has been acquired by being present in a closed session authorized under the act, as specified, unless the legislative body authorizes disclosure of that confidential information.

The bill would provide that a violation of these provisions may be addressed by the use of remedies that are currently available by law, including, but not limited to, injunctive relief to prevent the disclosure of confidential information under these provisions, disciplinary action against an employee who has willfully disclosed confidential information, and the referral of a member of a legislative body who has willfully disclosed confidential information to the grand jury for investigation and possible accusation under specified procedures. The bill would provide that a local agency may not take any of these actions against a person for making a confidential inquiry or complaint to a district attorney or grand jury concerning a perceived violation of law, expressing an opinion concerning the propriety or legality of actions taken by a legislative body in closed session, including disclosing specified facts to a district attorney or grand jury to establish the illegality of action taken or potential illegality of action deliberated upon that would be illegal if the action is taken, or disclosing information acquired by being present in a closed session that is not confidential information.

Ch. 1120 (AB 2645) Aanestad. Local agencies: security information.

Under the Ralph M. Brown Act, the meetings of the legislative body of a local agency are required to be conducted openly and publicly, with specified exceptions.

Under the act, if certain information is disclosed in an open and public session prior to holding a closed session, the legislative body of a local agency may hold closed sessions with the Attorney General, district attorney, sheriff, or chief of police, or their respective deputies, on matters posing a threat to the security of public buildings or a threat to the public's right of access to public services or public facilities.

This bill would also permit these closed sessions to include a security consultant or security operations manager.

This bill would also provide that the legislative body of a local agency may hold closed sessions with those law enforcement officials, agency counsel, or a security consultant or security operations manager on a threat to the safety and delivery of essential public services, including water, drinking water, wastewater treatment, natural gas service, and electric services.

#### Ch. 1121 (SB 1393) Kuehl. California Environmental Quality Act.

(1) The existing California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect. CEQA authorizes a plan or other written documentation required by a certified regulatory program or state agency to be submitted in lieu of an environmental impact report pursuant to prescribed procedures.

This bill would require the Secretary of the Resources Agency, by July 1, 2003, to develop a protocol for reviewing the prospective application of certified regulatory programs to evaluate the consistency of those programs with the requirements of CEQA, and would require the secretary to provide a report to the Senate Committee on Environmental Quality and the Assembly Committee on Natural Resources regarding the need for a grant of additional statutory authority authorizing the secretary to undertake a review of the certified regulatory programs. The bill would also require the secretary to provide a significant opportunity for public participation in developing that protocol.

(2) CEQA requires the Office of Planning and Research to implement a public assistance and information program that includes establishing a public education and training program, a data base to assist in the preparation of environmental documents, and a central repository for the collection, storage, retrieval, and dissemination of specified CEQA notices.

This bill would require, commencing January 1, 2003, that copies of any documents submitted in electronic format to the office pursuant to CEQA be furnished by the office to the California State Library, and would require the California State Library to be the repository for those documents and to make them available for viewing by the general public upon request.

(3) CEQA authorizes the appeal of the certification of an environmental impact report by a local lead agency that is not elected to that lead agency's elected decisionmaking body, if that body exists.

This bill would expand that authorization to include any environmental review document that is certified or authorized by a local lead agency that is not elected.

(4) CEQA requires, in any action or proceeding to attack, review, set aside, void, or annul specified actions by a public agency pursuant to CEQA, except the Public Utilities Commission, that the plaintiff or petitioner file a request that the public agency prepare a record of proceedings relating to the subject of the action or proceeding. CEQA also requires that the request, together with the complaint or petition, be served on the public agency not later than 10 business days from the date that the action or proceeding was filed.

This bill would require that request to be served personally on the state agency.

This bill would also require the petitioner or plaintiff to name any recipient of an approval that is the subject of the action or proceeding as a real party in interest, and to serve the petition or complaint on that real party in interest with the petition or complaint not later than 20 business days following service of the petition or complaint on the public agency. The bill would specify that a failure to name any other potential parties would not be grounds for dismissal of the action or proceeding. The bill would also require the public agency to provide the petitioner or plaintiff, not later than 10 business days following service of the petition or complaint on the public agency, with a list of responsible agencies and public agencies with jurisdiction over a natural resource affected by the project, and would require the petitioner or plaintiff to provide those responsible agencies and public agencies with notice of the action or proceeding within 15 days of receipt of that list. By imposing additional duties on local public agencies, this bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 1122 (SB 1467) Bowen. Public contracts: conflict of interest.

Existing law, with specified exemptions, including the acquisition of information technology goods and services, regulates the procurement of materials, supplies, equipment, and services by state agencies. These provisions do not apply to the Regents of the University of California or to the Trustees of the California State University.

This bill would apply certain of these procurement provisions to the Trustees of the California State University.

Existing law includes various prohibitions with respect to conflicts of interest of persons who are awarded state contracts or officers or employees of the state who are contracting with the state either directly or through other entities, as well as remedies for violation of any of the provisions.

This bill would apply specified conflict-of-interest provisions to transactions, except as provided, under those provisions regulating the acquisition of information technology goods and services.

This bill would also add similar conflict-of-interest and remedies provisions with regard to contracting with the University of California.

By making violations of these provisions a felony, or in some cases a misdemeanor, thereby creating a new crime, this bill would impose a state-mandated local program.

This bill would require the Department of Finance to report to the Legislature regarding the effect of this bill on the state's contracting costs.

Certain provisions of the bill would become operative on July 1, 2003.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 1123 (SB 1919) Figueroa. Contractors.

Existing law, the Contractors' State License Law, provides that the Contractors' State License Board, within the Department of Consumer Affairs, is responsible for the licensure and regulation of contractors. Existing law requires a contractor to provide a \$7,500 bond

for the benefit of homeowners and other persons that are damaged by the licensee. Existing law requires a swimming pool contractor to provide the bond in the amount of \$10,000.

The bill would require, on and after January 1, 2004, that all classifications of contractors provide a \$10,000 bond. The bill would increase the bond to \$12,500 on and after January 1, 2007.

Ch. 1124 (AB 3000) Committee on Budget. State and local government.

(1) Existing law provides for the licensing and regulation of persons engaged in barbering and cosmetology by the Bureau of Barbering and Cosmetology of the Department of Consumer Affairs. Existing law establishes the conditions for issuance of a license by the bureau.

This bill would require the bureau to issue the license on the same day as an applicant satisfactorily passes the examination.

(2) Existing law prohibits certain unfair business practices, including certain advertising practices. Existing law, effective January 1, 2003, requires the Attorney General to maintain a "do not call" list, containing the telephone numbers and ZIP Codes of residential or wireless telephone subscribers who do not wish to receive unsolicited and unwanted telephone calls from telephone solicitors and prohibits solicitors from calling those numbers, subject to certain exceptions. Existing law requires fees paid in connection with the "do not call" list to be deposited in the Special Telephone Solicitors Fund, including a fee charged by the Attorney General to subscribers, which may not exceed \$1 on a triennial basis.

This bill would provide that this fee may not exceed \$5 on a triennial basis.

(3) Existing law provides for the payment of interest at specified rates on the amount of unclaimed property claims, overpayments of estate taxes, and overpayments of corporation taxes.

This bill would provide that the interest rate shall be the lesser of 5% or the bond equivalent rate of 13-week United States Treasury bills, as specified.

(4) Existing law creates the Cesar Chavez Day of Service and Learning program and authorizes the California Commission on Improving Life Through Service to make grants to local and state operated Americorps or Conservation Corps programs that submit proposals to engage pupils through their schools and school districts in community service that qualifies as instructional time on Cesar Chavez Day and that honors the life and work of Cesar Chavez, and makes an annual appropriation of \$5,000,000 for these purposes.

This bill instead would provide that the Governor's Office on Service and Volunteerism shall administer the program. The bill also would authorize the Governor's Office on Service and Volunteerism to make grants to community-based organizations that have a capacity to design and implement high quality service and learning opportunities to pupils in kindergarten and in grades 1 to 12, inclusive.

(5) Existing law establishes the holidays to which state employees in the executive branch of government, including the Legislative Counsel and the employees of the Legislative Counsel Bureau, are entitled.

This bill would require that the Legislative Counsel and the employees of the Legislative Counsel Bureau observe any holiday to which the Legislative Counsel and the employees of the Legislative Counsel Bureau are entitled and that is also observed by the Legislature on the same day that the holiday is observed by the Legislature.

(6) The existing Tort Claims Act provides for the liability and immunity of a governmental entity for its acts or omissions that cause harm to persons. Existing law provides that any claim for money or damages against the state or local agency is required to be presented to the State Board of Control, in the case of a claim made against the state, or a local board, in the case of a claim made against a local agency, within a specified period of time. Existing law permits the appropriate board to provide forms specifying the information required to be contained in the claim and specifies the circumstances under which a claim is deemed to have been presented in conformity with law.

This bill would instead require the appropriate board to provide those forms and would require each claim made against the public entity to be presented using those forms, as specified. By requiring a board of a local agency to provide those forms, the bill would impose a state-mandated local program.

Existing law requires a claim to be acted on within 45 days after the claim has been presented. Existing law specifies that a claim is deemed to have been presented and received at the time it is deposited in the United States mail system.

This bill would provide that any period of notice and any duty to respond after receipt of service of a claim, amendment, application, or notice is extended for a specified period of days depending upon whether the place of address is within California, the United States, or outside the United States.

Existing law permits the Department of Transportation to adjust and pay any claim against the department if, among other things, the amount paid is \$1,000 or less.

This bill would increase that applicable amount to \$5,000 or less.

Other provisions of existing law have renamed the State Board of Control the Victim Compensation and Government Claims Board.

This bill would amend the references to the State Board of Control in the Tort Claims Act to refer to the Victim Compensation and Government Claims Board.

(7) The Dymally-Alatorre Bilingual Services Act requires each state agency to conduct a survey of its local offices every 2 years regarding their public contact positions and the provision of bilingual services as specified. Existing law also requires the State Personnel Board to compile the results of the survey, and provide it in a report to the Legislature every 2 years.

This bill would require the survey to include additional information, as specified. The bill would require each state agency to conduct an assessment and to develop and update an implementation plan that complies with the act. The bill would require the implementation plan to include specified information regarding the agency's procedures used to implement the act. The bill would revise and expand the duties of the State Personnel Board with regard to the surveys and implementation plans, and the report required to be submitted by the board.

(8) Existing law requires the Controller, commencing July 1, 2001, to abolish any state position that was vacant continuously for 6 consecutive monthly pay periods during the period between July 1 and June 30 of the preceding fiscal year. Existing law also requires that positions that were continuously vacant for 6 consecutive monthly pay periods during a fiscal year because of a hiring freeze in effect during part or all of that period be abolished unless the Director of Finance is notified of the need for, and approves of, the continuance of the positions. Existing law provides that the only exceptions to abolishment under these provisions are positions exempt from civil service or instructional and instruction-related positions authorized for the California State University. Existing law also imposes upon the Controller reporting requirements related to these provisions.

This bill would, operative July 1, 2002, repeal and reenact these provisions. The bill would specify that the 6 consecutive monthly pay periods need not occur within a single fiscal year. The bill would also permit the Director of Finance to authorize the reestablishment of positions abolished under these provisions for certain additional reasons, would require the Controller to reestablish positions if specified criteria are met, would modify the Controller's reporting requirements, and would impose specified reporting requirements on each state department, as defined.

(9) Existing law requires the Department of Finance to prepare an annual audit report examining any expenditures made pursuant to allocations authorized to be made from the Transportation Investment Fund pursuant to specified provisions of the California Constitution, and to make the report available to the public and submit it to both houses of the Legislature.

This bill, instead, would authorize the department to perform audits, as it deems necessary, of the allocations or expenditures made in accordance with those constitutional provisions, and would require that any audit performed be reported to both houses of the Legislature. It would also make a technical, nonsubstantive change.

(10) Existing law requires the Department of General Services to commit itself to 2 specified categories of services, and sets forth the conditions pursuant to which the director of the department, notwithstanding existing statutes and regulations, is required or authorized, among other things, to transfer funds, provide relief from accountability for debts, procure goods from the private sector even though the goods may be available through the Prison Industry Authority, certify funds for the payment of specified legal settlements and tort claims, and approve specified departmental forms in lieu of the Director of Finance.

Existing law also exempts state agencies from using the Office of State Publishing for their printing needs and requires state agencies, when soliciting bids for printing services from the private sector, to solicit a bid from the Office of State Publishing when the project is anticipated to cost more than \$5,000.

Existing law provides that these provisions become inoperative on the effective date of the Budget Act of 2002, or June 30, 2002, whichever occurs later, and are repealed on January 1, 2003.

This bill would provide that these provisions shall remain operative only until the effective date of the Budget Act of 2003, or June 30, 2003, whichever occurs later, and as of January 1, 2004, are repealed.

Existing law permits the state to enter into personal services contracts only when specified criteria are met.

This bill would provide that for state printing procurement purposes, printing is not considered a personal service contract.

(11) Existing law authorizes the Director of General Services to hire, lease, lease-purchase, or lease with the option to purchase any real or personal property for the use of any state agency, if the director deems the hiring or leasing is in the best interests of the state.

This bill would authorize the director to acquire, develop, design, and construct a regional criminal justice laboratory, necessary infrastructure, and related parking on the California State University's Los Angeles campus. The director would also be authorized to enter into a long-term ground lease, for 75 years, with the Trustees of the California State University for the land, within the Los Angeles campus, upon which the project would be constructed. This bill would authorize the State Public Works Board to issue lease revenue bonds, negotiable notes, or negotiable bond anticipation notes, not to exceed \$92,000,000 plus additional specified sums, for the acquisition, development, design, and construction of the project. The board and the Office of Criminal Justice Planning would be authorized to borrow funds for project costs from the Pooled Money Investment Account or from any other appropriate source. This bill would provide that if the authorized bonds are not sold, the Office of Criminal Justice Planning shall commit a sufficient amount of its support appropriation to repay any loans made for the project.

This bill would authorize the Office of Criminal Justice Planning to execute a contract with the board for the lease of the regional crime laboratory facilities that are financed with the proceeds of the board's bonds. This bill would also authorize the Office of Criminal Justice Planning, with the consent of the board and the Department of General Services, to enter into contracts and subleases with specified parties for the use, maintenance, and operation of the regional crime laboratory facilities. This bill would require the Department of General Services to assign the ground lease to the Los Angeles Regional Crime Laboratory Facility Authority, or its successor agency, once the specified bonds or notes have been paid in full.

(12) Existing law generally sets forth the duties of the Technology, Trade, and Commerce Agency in developing and implementing various programs for the promotion of economic opportunities in the state.

This bill would require the agency to develop an agencywide strategic plan covering a minimum of five years, and to include specified components, in order to better integrate program efforts and to highlight current state priorities. It would require the agency to ensure that short-term plans for programs within the agency are aligned with the agencywide strategic plan, and, commencing February 15, 2003, to report annually to specified committees of the Legislature on its progress in implementing a strategic approach to its planning.

(13) Existing law creates within state government the Technology, Trade, and Commerce Agency and requires it to maintain regional offices in specified locations in the state, including the greater San Diego area. Under existing law, the San Diego regional office is required at least annually to make recommendations to the Governor and Legislature to improve the economic status of the San Diego border area.

This bill would authorize, rather than require, the agency to maintain regional offices in these specified locations. The bill would additionally authorize the agency to maintain regional offices in other areas of the state. The bill would also require the San Diego regional office to submit as appropriate rather than annually.

Existing law provides for the establishment of international trade and investment offices and the administration of those offices by the International Trade and Investment Division within the Technology, Trade, and Commerce Agency.

This bill would require the proponent of any new international trade and investment office to submit a proposed business plan for the office, with specified information, to the agency. It would require the agency, to the extent funds are available for that purpose, to evaluate the business plans and submit the evaluations to the Legislature.

The bill would require each international trade and investment office to annually provide specified baseline information and a report to the agency, and would require the agency to submit these annual reports to the Legislature.

(14) The California Constitution provides that specified persons are exempt from civil service. Existing law requires the Governor to determine the distribution in executive agencies of deputies or employees selected pursuant to specified provisions of the California Constitution. Existing law also imposes various duties on the State Board of Equalization.

This bill would authorize each member of the State Board of Equalization to request that the Governor convert one civil service position of the board to be exempt from civil service, as provided.

(15) Existing law establishes the California Victim Compensation and Government Claims Board consisting of the Director of General Services, the Controller, and a 3rd member appointed by the Governor. Existing law requires the board to schedule its meetings for the purposes of receiving and acting upon claims so that meetings are held in southern California at least once in every 2 consecutive calendar months, and to hear a claim at the location designated as a preferred location where the board holds its meetings.

This bill instead would require the board to hold regular meetings in Sacramento and would authorize other meetings within the state as a majority of the board directs.

(16) Existing law establishes and authorizes the expenditure of moneys from various accounts and funds in the State Treasury, including continuously appropriated funds. Existing law authorizes loans between accounts and funds under specified circumstances and subject to specified conditions, and sets forth the duties of the Director of Finance in that regard.

This bill would authorize, unless otherwise prohibited by law, moneys in the State Treasury to be loaned from one state fund or account to any other state fund or account to address the 2002–03 fiscal year budgetary shortfall, subject to specified conditions. It would authorize the Director of Finance to order the repayment of all or a portion of any of these loans if he or she determines that either of specified circumstances exists, and to make specified reports to the Chairperson of the Joint Legislative Budget Committee with respect

to the loans. By providing for the addition of moneys to continuously appropriated funds, this bill would make an appropriation.

(17) Existing law establishes in the State Treasury the continuously appropriated Local Agency Investment Fund to which a local agency, local governmental unit, or local governmental official, with the consent of the governing body of the agency, may remit money in its treasury that is not required for immediate needs for the purpose of investment to be held for a time determined by the local governmental unit. Existing law requires, immediately at the conclusion of each calendar quarter, that all interest earned and other increment derived from investments be distributed by the Controller to the contributing governmental units or trustees or fiscal agents, nonprofit corporations, and quasi-governmental agencies in amounts directly proportionate to the respective amounts deposited in the fund and the length of time the amounts remained therein.

Existing law requires, however, that an amount equal to the reasonable costs incurred in carrying out duties related to the administration of the fund, not to exceed  $\frac{1}{2}$  of 1% of the earnings of the fund, be deducted from the earnings prior to distribution, and that this amount be credited as reimbursements to the state agencies having incurred costs in carrying out duties related to the administration of the fund.

This bill would specify that these state agencies include the Treasurer, the Controller, and the Department of Finance.

Existing law requires moneys in the Surplus Money Investment Fund to be invested by the State Treasurer as a part of the Pooled Money Investment Account. Existing law requires, as of each December 31 and June 30, that all interest earned and other increment derived from these investments, upon order of the Controller, to be deposited into the Surplus Money Investment Fund. Existing law further requires the Controller, after deducting an amount equal to the reasonable costs incurred by the Treasurer and the Controller in carrying out provisions related to the Surplus Money Investment Fund, to apportion interest earned and other increment derived from these investments into various funds. Existing law also provides that as of December 31 and June 30 each year all interest earned and other increment derived from investment of money in the Fish and Game Preservation Fund, less related expenses concerning investment of those funds incurred by the Treasurer and the Controller, shall be transferred to the Fish and Game Preservation Fund.

This bill would require the amount of the deductions described above also to include costs incurred by the Department of Finance in carrying out these investment provisions.

The General Obligation Bond Law prescribes the contents of state general obligation bond acts and the process by which these bonds are sold and issued. This law requires that there be transferred from any bond fund created for the proceeds of sales of state general obligation bonds, the amounts necessary to reimburse the Treasurer for specified expenses, including expenses incurred in administering loans from the Pooled Money Investment Account to the bond fund.

This bill instead would provide that there be transferred from any bond fund created for the proceeds of sales of state general obligation bonds, the amounts necessary to reimburse the Treasurer, the Controller, the Department of Finance for these specified expenses, and would include within these expenses those incurred in administering or reviewing loans from the Pooled Money Investment Account to the bond fund, including review by the Public Works Board staff. The General Obligation Bond Law also specifies the purposes for which proceeds from the sale of bonds issued pursuant to that law may be used, with one of these purposes being payment of the costs of a state agency with responsibility for administering the bond program.

This bill would specify that these costs include those incurred by the Treasurer, the Controller, the Department of Finance, and, for the Public Works Board, for staff, operating expenses and equipment, and consultants' costs.

Existing law appropriates \$250,000 from the General Fund without regard to fiscal years, to be set aside in the State Notes Expense Account, to be used to pay expenses incurred by

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

the Treasurer in providing for the preparation, sale, issuance, advertising, legal services, or any other act which, in the Treasurer's discretion, is necessary to carry out provisions of law relating to the issuance of warrants by the Controller.

This bill, in addition, would allow these funds to be used by the Controller or the Department of Finance, to pay the expenses for the services described above, or any other act which in the discretion of either the Treasurer or the Department of Finance is necessary to carry out those provisions of law. By expanding the purposes for which these funds may be used, this bill would constitute an appropriation.

(18) Existing law provides for the assessment of specified fees in connection with civil court proceedings to pay for trial court costs.

This bill would institute a state surcharge of 10% on specified fees connected with civil court proceedings, to be levied in addition to any other court-related fee. The bill would specify that this provision would remain in effect only until July 1, 2007.

Existing law imposes a state penalty, in a specified amount, upon every fine, penalty, or forfeiture imposed and collected by the courts for criminal offenses other than parking offenses.

This bill would impose a 20% surcharge on the criminal fine used to calculate this state penalty, to be levied in addition to the state penalty. The bill would specify that this provision would remain in effect only until July 1, 2007.

Existing law allows the board of supervisors of a county to determine the order of priority in which disbursements are made from funds provided by installment payments on criminal fines and fees, or collected by the Franchise Tax Board for criminal fines and fees that are delinquent. Existing law also allows the board of supervisors to determine the priority of payment between court orders or parts of orders when defendants have been ordered to pay more than one court order.

This bill would require the board of supervisors to mandate the following order of priority for disbursement of these funds: (a) restitution to the victim; (b) the 10% state surcharge; (c) fines, penalty assessments, and restitution fines, in an amount for each that is proportional to the total amount levied for all of those items; and (d) other reimbursable costs. The bill would also require the board of supervisors to apply these priorities to orders or parts of orders when defendants have been ordered to pay more than one court order.

(19) Existing law requires the Commission on State Mandates to hear and decide upon a claim by a local agency or school district that the local agency or school district is entitled to be reimbursed by the state for costs mandated by the state as required under the California Constitution.

This bill would authorize the commission to review claims only if the test claim is filed not later than 3 years following the date the mandate became effective, or in the case of mandates that became effective before January 1, 2002, one year from the effective date of this act.

Existing law requires the Controller to notify the claimant in writing within 30 days after issuance of a remittance advice of any adjustment to a claim for reimbursement that results from an audit or review by the Controller.

This bill would require the notice to specify the interest charges on claims adjusted to reduce the overall reimbursement to the local agency or school district.

Existing law prescribes the time for submitting claims for reimbursement and requires that any claim for initial reimbursement that is filed after the filing deadline be reduced by 10% of the amount that would have been allowed had the claim been timely filed, provided that the reduction does not exceed \$1,000.

This bill would delete the \$1,000 limit on the claim reduction.

Existing law declares the intent of the Legislature to establish a method for regularly reviewing the costs of state-mandated local programs.

This bill would require the Controller and the Legislative Analyst to submit reports regarding mandates, as specified, and would require the Legislative Analyst to make

recommendations on whether certain mandates should be repealed, funded, suspended, or modified.

Existing law prohibits claims and payments on claims unless the claims exceed \$200, but permits a county superintendent of schools or a county to submit combined claims on behalf of school districts, direct service districts, or special districts within their county if the combined claim exceeds \$200.

This bill would increase the minimum amount that may be claimed and the minimum claim payment from in excess of \$200 to in excess of \$1,000.

(20) The California Building Standards Law requires all state agencies, including the Occupational Safety and Health Standards Board, that adopt or propose adoption of any building standard to submit the building standard to the California Building Standards Commission for approval or adoption.

This bill would exempt from these requirements any regulation adopted by the Occupational Safety and Health Standards Board and make various conforming changes.

(21) Existing law makes the Department of Insurance responsible for regulating the business of insurance and authorizes its commissioner to employ a staff to discharge those duties.

This bill would require that appointment to 3 designated positions within the department be made by the Governor and would provide that the positions are exempt from the state civil service system.

(22) Existing law establishes the Workers' Compensation Administration Revolving Fund as a special account in the State Treasury. Under existing law, money in the fund may be expended for the administration of the workers' compensation program, pursuant to specified provisions of law, except as provided, and may not be used for any other purpose.

This bill instead would provide that money in the Workers' Compensation Administration Revolving Fund may not be used for any but the specified purposes, except as determined by the Legislature.

Existing law requires contractors on public works who employ journeymen or apprentices to contribute to the Apprenticeship Training Contribution Fund from which funds are continuously appropriated to administer certain apprenticeship programs and to make prescribed grants to apprenticeship programs at the end of each fiscal year.

This bill would postpone, until the 2003–04 fiscal year, the making of grants to apprenticeship programs. This bill also would permit the Division of Apprenticeship Standards to utilize moneys in the fund for the general expenses of that division and thereby would make an appropriation from a special fund.

(23) Under existing law, certain persons are designated as peace officers whose authority extends to any place in the state while engaged in the performance of the duties of their respective employment and for the purpose of carrying out the primary function of their employment or as required when an emergency has been declared, or in furtherance of certain mutual aid agreements. Pursuant to these provisions, peace officers may carry firearms as authorized and under the terms and conditions specified by their employers. Existing law includes in this category of peace officers any medical technical assistant series employee designated by the Director of Corrections or designated by the Director of Corrections and employed by the State Department of Mental Health to work in the California Medical Facility.

This bill would delete the requirement that these medical technical assistant series employees work in the California Medical Facility to be peace officers.

The Public Employees' Retirement Law provides increased benefits and higher contribution rates for peace officer/firefighter members than those provided for state miscellaneous members. Member contributions are deposited in the Public Employees' Retirement Fund, a continuously appropriated special fund.

Because this bill would provide that more medical technical assistant service employees are peace officers, thereby including these additional employees within the category of peace

officer/firefighter members, it would make an appropriation by increasing the amount of employee contributions to the Public Employees' Retirement Fund.

Existing law authorizes the Department of Corrections to reduce a prisoner's sentenced term of imprisonment through the accumulation of worktime credits by performance in work, training, and education programs established by the Director of Corrections. Existing law specifies that for every 6 months of full-time performance in a credit qualifying program, as designated by the director, a prisoner shall be awarded worktime credit reductions from his or her term of confinement of 6 months, as specified. However, existing law provides that under no circumstances shall any prisoner receive more than 6 months' credit reduction for any 6-month period.

This bill would provide that any inmate assigned to a conservation camp by the Department of Corrections who is eligible to earn one day of worktime credit for every one day of service pursuant to existing law shall instead earn 2 days of worktime credit for every one day of service, as specified.

Under existing law, a person convicted of a crime who is addicted, or in imminent danger of becoming addicted, to narcotics may be committed for treatment by the Department of Corrections to the narcotic detention, treatment, and rehabilitation facility, as specified. Under existing law, if at any time the director concludes that a person at the facility, because of excessive criminality or for other relevant reason, is not a fit subject for confinement or treatment in the facility, the director shall return the person to the court in which the case originated for such further proceedings on the criminal charges as that court may deem warranted. Under existing law the director is not explicitly authorized to limit the number of persons who may be committed to the facility or to refer a person committed to the facility back to court in order to achieve this limit.

This bill would specify that eligibility for treatment pursuant to Proposition 36, an initiative statute that provides for narcotics treatment in lieu of incarceration in specified circumstances, would be a proper reason for the return of a person to court by the director. This bill would specify that the director is authorized to limit the number of persons who may be committed to the facility and that the director may refer a committed person back to the court in which the committed person's case originated, in order to achieve the limit.

(24) Existing law provides that commencing on June 30, 2000, and annually thereafter until December 31, 2004, the Board of Corrections, in consultation with other state agencies, shall submit a report to the Legislature assessing mentally ill offender crime reduction grants, as specified.

This bill, in addition, would require an interim report be submitted on March 1, 2003.

(25) Existing law establishes within the Youth and Adult Correctional Agency a Commission on Correctional Peace Officer Standards and Training, known as CPOST. CPOST is required to develop, approve, and monitor standards for the selection and training of state correctional peace officers apprentices. Those standards are subject to approval by the State Personnel Board. The State Personnel Board is required to ensure that, prior to training, each applicant who has otherwise qualified in all physical and other testing requirements to be a peace officer in a youth or adult correctional facility, is determined to be free from emotional and mental conditions that might adversely affect the exercise of his or her duties and powers as a peace officer.

This bill would expand the latter provision to additionally require the Department of the Youth Authority to ensure that applicants are determined to be free from those emotional and mental conditions.

(26) Existing law, the Public Utilities Act, establishes the Office of Ratepayer Advocates (division) within the Public Utilities Commission to represent the interests of public utility customers and subscribers within the jurisdiction of the commission by obtaining the lowest possible rate for service consistent with reliable and safe service levels. The act requires that the annual budget for the division be separately identified in the commission annual budget request.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill instead would require the commission, on or before January 10 of each year, to provide the chairs of the fiscal committee of each house of the Legislature and to the Joint Legislative Budget Committee the number of personnel years assigned to the division, the total dollars expended by the division in the prior year, the estimated dollars expended in the current year, the total dollars proposed for appropriation in the budget year, and the workload standards and measures for the division.

Under existing law, the California Consumer Power and Conservation Financing Authority is charged with various duties relating to the financing and constructing of generating facilities and other projects to supplement private and public sector power supplies, financing programs to encourage consumers and businesses to invest energy efficiency programs to reduce the demand for energy in California, and financing retrofits of electric powerplants to improve the efficiency and environmental performances of those powerplants. Under existing law, the chief executive officer of the authority is authorized to contract for the services of other officers or employees, subject to the approval of the board. Under existing law, those contracts are not subject to otherwise applicable provisions of the Government Code and the Public Contract Code.

This bill would delete the provision exempting those contracts from the provisions of the Government Code and the Public Contract Code.

(27) The Cigarette and Tobacco Products Tax Law requires that an appropriate stamp be affixed to, or that an appropriate meter impression be made upon, each package of cigarettes prior to distribution.

This bill would define "stamps and meter impressions" for purposes of this requirement. This bill would also require the State Board of Equalization to prescribe and approve the types, and the method of applying, stamps and meter impressions.

(28) The Energy Surcharge Law imposes a surcharge on the consumption of electrical energy purchased from an electric utility at a rate fixed by the State Board of Equalization, as specified.

This bill would, with respect to electrical energy purchased from an electric utility on or after January 1, 2003, require that the rate not exceed \$0.0003 per kilowatt-hour, or a lower rate fixed by the Energy Commission at a public meeting held each November for the following calendar year.

(29) The Porter-Cologne Water Quality Control Act imposes on a person for whom waste discharge requirements have been prescribed, an annual fee established by the State Water Resources Control Board, not to exceed \$10,000, with the fees calculated based on total flow, volume, number of animals, and area involved. Existing law requires fees that are collected to be deposited in the Waste Discharge Permit Fund, which is expended, upon appropriation, for purposes of carrying out the act.

This bill would increase the fee limit to not more than \$20,000, would require the state board, in calculating the amount of fees, to also base the fees on the threat to water quality, and would require the maximum fee amount to be adjusted annually to reflect changes in the cost of living as measured by the Consumer Price Index prepared by the Department of Industrial Relations or a successor agency.

(30) Existing law authorizes the Legislature to provide for minimum wage and for the general welfare of employees, and for those purposes, to confer on a commission legislative, executive, and judicial powers. Under existing law, the Department of Industrial Relations is responsible for investigation and enforcement of the labor laws, including, but not limited to, the laws governing safe and healthful working conditions on the job, wages, hours of work, and conditions of employment.

This bill would require the Department of Industrial Relations to procure a case management system that has the capability to ultimately provide the public with free, web-based access to a searchable database containing information regarding the status of all complaints, citations, and administrative proceedings of the department, as specified.

(31) Existing law establishes the Department of the Youth Authority for the commitment of certain youthful offenders.

This bill would require the Department of the Youth Authority to submit to the Department of Finance and the fiscal committees of the Legislature on or before November 1, 2002, a written plan to close at least 3 other facilities by June 30, 2007. The bill would also require the Department of the Youth Authority to close one of those facilities pursuant to the plan by June 30, 2004, as specified.

(32) Existing law establishes the Renewable Resources Trust Fund, a continuously appropriated fund appropriated to the State Energy Resources Conservation and Development Commission, for the purposes of funding programs designed to foster the development of new in-state renewable electricity generation technology facilities, and to secure for the state the environmental, economic, and reliability benefits that continued operation of those facilities provides.

Existing law establishes the California Consumer Power and Conservation Financing Authority (Power Authority), with certain powers and responsibilities, including the issuance of up to \$5,000,000,000 of revenue bonds, augmenting electrical generating facilities, to ensure a sufficient and reliable supply of electricity, providing financial incentives for investment in cost-effective energy-efficient appliances and energy demand reduction, and providing financing for the retrofit of inefficient electrical powerplants, renewable energy, and conservation. Existing law establishes in the State Treasury the California Consumer Power and Conservation Financing Authority Fund, a continuously appropriated fund, for the support of the Power Authority.

This bill would authorize funds in the Renewable Resources Trust Fund to be expended for a loan to the California Consumer Power and Conservation Financing Authority Fund in an amount not to exceed \$8,900,000. The bill would further provide the terms for repayment of the loan, including that it be repaid by June 30, 2004. If not repaid, the bill would appropriate moneys for a loan from the Energy Resources Program account in the General Fund to repay the balance owed the Renewable Resources Trust Fund.

(33) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

(34) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1125 (AB 625) Oropeza. International trade and investment offices: proposals.

(1) Existing law provides for the establishment of international trade and investment offices and the administration of those offices by the International Trade and Investment Division within the Technology, Trade, and Commerce Agency.

This bill would require the proponent of any new international trade and investment office to submit a proposed business plan for the office, with specified information, to the agency. The bill would require the proponent of an international trade and investment office to submit a letter of intent to the agency 90 days prior to submitting the proposed business plan. It would require the agency, to the extent funds are available for that purpose, to evaluate the business plans, and submit reports on the evaluations that would be required to include specified information, to the Legislature. It would require that the agency's costs for evaluating each plan not exceed \$10,000.

This bill would prohibit the establishment of any international trade and investment office authorized by law on or after January 1, 2003, until after January 1, 2005, and as of January 1, 2005, this provision would be repealed.

(2) AB 3000, if enacted, would add provisions to the Government Code that require the proponent of any new international trade and investment office to submit a proposed business plan for the office, with specified information, to the agency. It would require the agency, to the extent funds are available for that purpose, to evaluate the business plans and submit the evaluations to the Legislature. It would also require each international trade and investment office to provide annually to the agency specified baseline information about the region served by that office and to prepare annual reports regarding its clients and changes in its baseline information. It would also require the agency to submit those annual reports to the Legislature.

This bill would repeal these provisions.

#### Ch. 1126 (AB 716) Firebaugh. California Cultural and Historical Endowment.<sup>6</sup>

Existing law contains various provisions relating to historical and cultural resource projects and programs, including the development, restoration, and preservation of historical sites.

This bill would enact the California Cultural and Historical Endowment Act, which would establish the California Cultural and Historical Endowment, consisting of specified members, in the California State Library and to require the endowment to use funds allocated and appropriated from the California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Act of 2002, and from other sources, including federal grants, to make grants and loans to public agencies and nonprofit organizations, as defined, including museums, relating to historical resources and to develop various programs and projects to protect and preserve California's cultural and historic resources. The bill would require the endowment to conduct a comprehensive survey of the state of cultural and historical preservation, accessibility, and interpretation in California and to report on the survey to the Legislature and the Governor by November 1, 2005. The bill would prohibit the endowment from utilizing more than 5% of the funds appropriated from the California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Act for associated programmatic costs.

This bill would provide that, notwithstanding the bill that enacts the 2002–03 budget, the Director of Finance shall not abolish the vacant positions within the State Library but allow the positions to be used by the State Library for purposes of the California Cultural and Historical Endowment Act.

The bill would appropriate \$219,765,000 from the California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Fund and allocate \$128,415,000 to the California State Library for purposes of the endowment, \$91,350,000 to the Department of Parks and Recreation for opportunity grants, as provided, and appropriate \$74,680,000 from that fund to the Department of Parks and Recreation for recreational grants, as provided.

#### Ch. 1127 (AB 1768) Oropeza. State and local government.<sup>7</sup>

(1) Existing law provides for the coordination of state and local public safety agencies and emergency response teams to respond to emergencies. Existing law administered by the Federal Communications Commission authorizes public safety agencies or entities to operate radio communication systems on specified frequencies of the radio spectrum and directs states to oversee interoperability of public safety spectrum.

This bill would provide that, of the amounts received from the federal government for homeland security and appropriated in the Budget Act of 2002, not more than \$15,000,000 may be allocated to the security adviser to the Governor for disbursement to state and local government public safety agencies to procure and operate specified radio equipment. It

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

would require each state and local government public safety agency that receives these funds to provide an annual report to the Legislature, as specified.

(2) Existing law authorizes the Secretary of State to appoint one Assistant Secretary of State, and deputies and other assistants necessary for the proper conduct of his or her office. The Assistant Secretary of State and all deputies are civil executive officers. The California Constitution specifies that state officers directly appointed by the Governor are exempt from state civil service.

This bill would require, notwithstanding any other provision of law, that 2 employees of the Secretary of State's office be appointed by the Governor and be exempt from civil service.

(3) Existing law requires a redevelopment agency, during the 1993–94 and 1994–95 fiscal years, to allocate to the county auditor an amount of revenue, determined in accordance with specified calculations made by the Director of Finance and based on a specified report of the Controller, for deposit the Educational Revenue Augmentation Fund in each county for allocation to school entities.

This bill would require a redevelopment agency to make a similar allocation in the 2002–03 fiscal year, as provided, and would make conforming changes to related provisions. This bill would authorize a redevelopment agency to defer the payment of a portion of this allocation if that agency finds that it is unable, for either of certain reasons, to pay the full allocation, and if the agency adopts a specified resolution. By imposing additional duties on local tax officials in connection with the allocation of property tax revenues, this bill would impose a state-mandated local program.

(4) Existing law provides for the payment of interest at specified rates on the amount of unclaimed property claims, overpayments of estate taxes, and overpayments of corporation taxes.

This bill would provide, in the case of corporations, that the interest rate shall be the lesser of 5% or the bond equivalent rate of 13-week United States Treasury bills, as specified.

(5) This bill would authorize the Secretary of the Technology, Trade, and Commerce Agency, with the approval of the Director of Finance, to direct the Controller to transfer specified funds of the agency to the General Fund to be credited toward an unallocated reduction in the agency budget.

(6) This bill would also amend and supplement the Budget Act of 2002.

(7) Proposition 40 approved by the voters provides for bond funds to be deposited in the California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Fund. Assembly Bill 716 of the 2001–02 Regular Session appropriates \$219,765,000 from the fund and allocates \$128,415,000 to the California State Library for purposes of the California Cultural and Historical Endowment, \$91,350,000 to the Department of Parks and Recreation for opportunity grants, as provided, and appropriates \$74,680,000 from that fund to the Department of Parks and Recreation for recreational grants, as provided.

This bill would require the \$91,350,000 that would be appropriated to the Department of Parks and Recreation for allocation as opportunity grants from the fund to be available to the Department of Parks and Recreation for those opportunity grants, and for state capital outlay projects. The bill would require the department, on or before December 15, 2002, and on or before December 15 annually thereafter, to report to the Joint Legislative Budget Committee on all state capital outlay projects funded from that appropriation and would require that to the extent the funds are used for a state capital outlay project, the project be subject to specified provisions regarding the State Public Works Board review and approval. This provision would take effect only if AB 716 is enacted and becomes effective on or before January 1, 2003.

(8) This bill would appropriate \$5,000,000 from the Public Transportation Account in the State Transportation Fund to the Department of Transportation, for local assistance to the City of Schafer for the Southern San Joaquin Valley Intermodal Facility.

(9) This bill would make specified funds appropriated by the Budget Act of 1998 and the Budget Act of 1999 to the Western Center for Archaeology and Paleontology and by the

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Budget Act of 1999 the Regional Aquatic Center swimming pool in the City of San Jacinto available for liquidation until June 30, 2005.

(10) Item 1760-001-0666 of the Budget Act of 2002 appropriates funds for the support of the Department of General Services, payable from the Service Revolving Fund, pursuant to a specified schedule. Provision 3 of Item 1760-001-0666, among other things, provides that departments shall not develop or implement e-government systems to the extent such systems already exist within the state's centralized e-government systems.

This bill would delete that provision.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(12) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1128 (AB 2834) Migden. School districts: audits.

(1) Existing law requires the Controller, on an annual basis, to review and monitor the audit reports performed by independent auditors to determine the practicability and effectiveness of school district audits.

This bill, instead, would require the Controller to review and monitor audits of local education agencies.

The bill, in addition, would require the Controller to consult with the Director of Finance in developing a format for the audit reports.

(2) Existing law requires the Controller, in consultation with the Department of Finance and the State Department of Education, to develop a plan to review and report on financial and compliance audits. Existing law requires the Controller, in consultation with the Department of Finance, the State Department of Education, a representative of the county offices of education, and representatives of the California Society of Certified Public Accountants, to recommend the statements and other information to be included in the audit reports filed with the state and to propose the content of an audit guide. Existing law requires the Controller to submit a copy of the audit guide to the Department of Finance for review.

This bill would, on and after July 1, 2003, authorize a supplement to the audit guide to be suggested in the audit year, as prescribed, to address issues resulting from new legislation in that year that changes the conditions of apportionment. The bill would require the audit guide and any supplements to the audit guide to be submitted by the Controller to the Education Audits Appeal Panel, would require that panel to adopt the audit guide and any supplements to the audit guide pursuant to the rulemaking procedures of the Administrative Procedure Act, and would prescribe other, related matters.

(3) Existing law requires the Controller, if a school district received an emergency apportionment, to conduct a quality control review of the audit working papers of the independent auditor who performed the audits for a school for the prior 3 fiscal years.

This bill would change the reference in that requirement from a school district to a local education agency and would also require the Controller to conduct a quality control review if the budget of a local education agency is disapproved or if a local education agency has received an emergency apportionment or a negative certification on any budget or interim financial report during the current or preceding fiscal year or if the responsible county superintendent of schools has otherwise determined that a lack of going concern exists for a local education agency. The bill would require a local education agency's audit to include an evaluation on whether there is substantial doubt about the agency's ability to continue as a going concern for a reasonable period of time.

The bill would provide that a contract to perform the audit of a local education agency that has a disapproved budget or has received a negative certification on any budget or interim financial report during the current fiscal year or either of the 2 preceding fiscal years, or for which the county superintendent of schools has otherwise determined that a lack of going concern exists, is not valid unless approved by the responsible county superintendent of schools and would prescribe related matters.

(4) Existing law requires the audits be made by certified public accountants or licensed public accountants.

This bill would require local education agencies to select these accountants from a directory approved by the Controller. The bill would require the directory to be published not later than December 31 of each year and would require the accountants included in the directory to be in good standing with the Board of Accountancy and to have no prior history of noncompliance in the education context.

The bill would make it unlawful, commencing with the 2003–04 fiscal year and except as specified, for a public accounting firm to provide audit services to a local educational agency if the lead or coordinating audit partner having primary responsibility for the audit or the audit partner responsible for reviewing the audit, performed audit services for the local education agency for each of the 6 previous fiscal years. The bill would require that a nonauditing, management, or other consulting service provided to a local education agency by a certified public accounting firm while the certified public accounting firm is performing an audit of the agency pursuant to this section to be in accord with specified standards.

(5) Existing law requires each county superintendent of schools to make certain specified certifications to the Superintendent of Public Instruction regarding audits of school districts under his or her jurisdiction.

This bill, in addition, would require that the county superintendent of schools make those certifications to the Controller, as well, thereby imposing a state-mandated local program.

(6) Existing law defines a compliance audit as an audit that verifies that funds provided for the support of a public school have been expended as required by either law or regulation.

This bill would change that definition to include verification that funds provided for the support of a public school also have been disbursed as required by either law or regulation.

(7) Under existing law, there is a panel consisting of the Superintendent of Public Instruction, the Director of the Department of Finance, and a Chief Administrative Officer of the Fiscal Crisis and Management Assistant Team with prescribed duties relating to the review of audit reports.

This bill would establish the Education Audits Appeal Panel, comprised of the same members, as a separate state agency, and would authorize the panel to expend funds, hire staff, make contracts, sue and be sued, and to issue regulations in furtherance of its duties. The bill would authorize the panel to hear appeals of audit reports, and would prescribe related matters.

(8) Existing law states the intent of the Legislature that responsible school district officials be held fully accountable for the sum and substance of attendance accounting and reporting and that minor and inadvertent instances of noncompliance be resolved in a fair and equitable manner to the satisfaction of the Superintendent of Public Instruction and the Department of Finance. Existing law authorizes the Superintendent of Public Instruction with the approval of the Department of Finance, to waive strict compliance by school districts with the statutes and regulations relating to attendance accounting for purposes of making apportionments from Section A of the State School Fund if the superintendent makes a specified determination.

This bill would recast and revise those provisions.

(9) Existing law requires, for purposes of computing average daily attendance, a local educational agency's prior fiscal year average daily attendance to be reduced by an amount equal to the average daily attendance disallowed in the current fiscal year by an audit or review. Under existing law, a local education agency may be required to repay an

apportionment significant audit exception resulting from an audit or review, which may not be waived by the State Board of Education.

This bill would hold in abeyance all completed audits and appeals of audits, withdraw any findings made pursuant to audits, and provide that no loss of apportionment pursuant to an audit shall be realized, as specified. The bill would, in addition, discontinue all ongoing audits to excused absences for specified fiscal years, and would require the Controller to notify all school districts, charter schools, and county offices of education that it is no longer necessary to retain records supporting pupil attendance and reported excused absences used for purposes of calculating average daily attendance for the 1996–97 fiscal year, as specified.

(10) The bill would appropriate \$2,950,000 from the General Fund for allocation as follows: \$525,000 to the Controller for purposes of reviewing annual financial and compliance audits performed for local education agencies and developing and maintaining the directory of certified public accountants and public accountants, \$1,600,000 to the Controller for the purpose of auditing reimbursable state mandate claims filed by local government entities and local education agencies; and \$750,000 to the Controller for allocation to the Education Audits Appeal Panel established by the bill for general support of hearing appeals of audit reports, and \$75,000 to the State Department of Education for a staff position and operating expense for workload associated with implementing this act.

(11) This bill would make other conforming changes.

(12) This bill would incorporate additional changes to Section 17558.5 of the Government Code proposed by AB 3000, to be operative only if this bill and AB 3000 are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1129 (AB 2650) Lowenthal. Air pollution: diesel emissions: California Port Community Air Quality Program: Bay Area Air Quality Management District and South Coast Air Quality Management District.

(1) Existing law requires the State Air Resources Board to endeavor to achieve the maximum degree of emission reduction possible from vehicular and mobile sources of air pollution in order to accomplish the attainment of the state ambient air quality standards at the earliest practicable date. Existing law delegates to air quality management districts and air pollution control districts primary responsibility for all nonvehicular sources of air pollution.

This bill would require each marine terminal in the state to operate in a manner that does not cause the engines on trucks to idle for more than 30 minutes while waiting to load or unload at the terminal, and would charge the district with geographical jurisdiction over that marine terminal with enforcing the requirement. The bill would make any owner or operator of a marine terminal that acts in violation of that requirement subject to a fine. The bill would also make any action taken by a marine terminal to pass the costs of that fine onto the owner or operator of a truck a violation of nonvehicular air pollution control laws. Because other enforcement provisions of law make a violation of those laws a crime, this bill would create a state-mandated local program by creating a new crime and by imposing additional enforcement duties on local districts. The bill would impose a fine on the owner or operator of the marine terminal or port for taking any action to divert idling trucks to area freeways or alternate staging areas. The bill would exempt from the requirement any marine terminal that provides specified staffing at receiving and delivery gates. The bill also would exempt

from the requirement, until July 1, 2003, any marine terminal that implements, or begins to implement, a scheduling or appointment system for trucks to enter the marine terminal. The bill would require a marine terminal implementing a scheduling or appointment system to adhere to specified criteria.

(2) Existing law establishes the Carl Moyer Memorial Air Quality Standards Attainment Program, administered by the state board, which provides grants through the districts to offset the incremental cost of projects that reduce emissions of oxides of nitrogen (NO<sub>x</sub>) from specified onroad vehicles, offroad nonrecreational equipment and vehicles, locomotives, diesel marine vessels, stationary agricultural engines, and other high-emitting diesel engine categories.

This bill would create the California Port Community Air Quality Program in the Bay Area Air Quality Management District and the South Coast Air Quality Management District, to be administered and implemented by those districts within their jurisdictions. The bill would require those districts to provide grants to offset the advanced introduction costs of eligible projects that reduce onroad emissions of particulate matter within communities adjacent to marine terminals or ports within the jurisdiction of those districts. The bill would authorize those districts to utilize moneys derived from fines imposed within the district's jurisdiction for a violation of the provisions described in (1) to offset the costs incurred in administering, enforcing, and monitoring the activities described in (1). The bill would authorize any moneys derived from those fines that remain after the district offsets its costs to be used by the district to fund the grant program.

(3) The bill would make certain findings and declarations regarding the inapplicability of a general statute within the meaning of Section 16 of Article IV of the California Constitution.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 1130 (AB 2769) Lowenthal. Tidelands: City of Los Angeles.

Existing law grants to the City of Los Angeles all the right, title, and interest of the State of California in and to all tidelands and submerged lands situated below the line of mean high tide of the Pacific Ocean within the boundaries of the city in trust for certain purposes, including promotion of commerce, navigation, and fishery, and for certain specific uses relating to these purposes. Tidelands under the jurisdiction of the city's Board of Harbor Commissioners, as described in certain provisions of the city's charter, are exempt from the provisions of existing law authorizing specific uses.

This bill would delete the exemption specified above.

Existing law requires the city to file with the State Lands Commission a detailed description of specified capital improvements on the granted lands.

This bill would exclude from this requirement capital improvements on tidelands under the jurisdiction of the city's Board of Harbor Commissioners, as described in certain provisions of the city's charter.

The bill also would correct obsolete references to the city's charter in other provisions of law governing the tidelands and submerged lands.

#### Ch. 1131 (AB 982) Firebaugh. Health care.

Existing law, the Dental Practice Act and the Medical Practice Act, regulate the practice of medicine and dentistry in this state.

This bill would establish the California Medical and Dental Student Loan Repayment Program of 2002 which would be administered by the Office of Statewide Health Planning and Development and would provide conditional warrants for loan repayment to individuals enrolled in a postsecondary institution studying medicine or dentistry who agree to practice in medically and dentally underserved areas. The bill would authorize repayment of these conditional warrants, up to a specified amount, to participating, qualified, and licensed physicians and dentists who practice in underserved areas of the state. The bill would require the office to administer financial or other incentives to experienced dentists and physicians in an effort to market the programs at medical and dental schools in the state. The bill would provide that this program would not become operative unless appropriate funding, as determined by the office, is made available.

This bill would establish the Dental Corps Loan Repayment Programs of 2002 in the Dental Board of California and would create the Dentally Underserved Account in the State Dentistry Fund. The bill would authorize the Dentally Underserved Account to be funded by a \$3,000,000 transfer from the State Dentistry Fund, and beginning July 1, 2003, \$3,000,000 would be appropriated over a 3-year period in \$1,000,000 yearly increments from the State Dentistry Fund to the Dentally Underserved Account for loan repayments.

This bill would establish the California Physician Corps Loan Repayment Program of 2002 in the Division of Licensing of the Medical Board of California. The bill would create the Medically Underserved Account in the Contingent Fund of the Medical Board of California. The bill would authorize the Medically Underserved Account to be funded by a \$3,450,000 transfer from the Contingent Fund of the Medical Board of California, and beginning July 1, 2003, \$3,450,000 would be appropriated over a 3-year period in \$1,150,000 yearly increments from the Contingent Fund of the Medical Board of California to the Medically Underserved Account for loan repayments.

This bill would require reports to the Legislature on an annual basis regarding the number of program participants, practice locations, and the costs of the programs.

Ch. 1132 (AB 1357) Wiggins. Personal services contracts: employee compensation.

Existing law permits state agencies to enter into personal services contracts when certain conditions are met. These conditions include requiring a state agency that enters into a personal services contract for certain types of workers to include provisions for employee benefits that are valued at least 85% of the state employer cost of providing comparable benefits to state employees performing similar duties. For these purposes, existing law defines "benefits" to include health, dental, and vision benefits. The types of workers covered by this requirement include persons that provide janitorial and housekeeping services, custodians, food service workers, laundry workers, window cleaners, and security guards.

This bill would require these personal services contracts to also include provisions for employee wages that are valued at no less than 85% of the state employer cost of wages and benefits provided to state employees for performing similar duties. The bill would also include retirement benefits, holiday pay, sick pay, and vacation pay in the definition of benefits.

This bill would provide that it applies only to those personal services contracts and lease subcontracts entered into, renewed, or extended on or after July 1, 2003.

Ch. 1133 (AB 1974) Pescetti. Public employees' retirement: risk pools.

The Public Employees' Retirement Law authorizes the creation of separate risk pools for local and school miscellaneous, local safety, and school safety members, as specified, and

permits the assets and liabilities of contracting agencies to be combined for purposes of setting employer rates.

This bill would revise and recast these provisions. The bill would require the Board of Administration of the Public Employees' Retirement System to establish the criteria under which contracting agencies shall participate in a risk pool and the criteria under which contracting agencies, county offices of education, school districts, and community college districts may participate in a risk pool. The bill would prohibit requiring contracting agencies with more than 100 active members in a member classification to participate in a risk pool. The bill would provide that specified provisions regarding service credit and benefit payments are applicable to local members of a contracting agency participating in a risk pool without election by the contracting agency. The bill would establish the method of determining employer contribution rates, and would require that these rates take into account assets and liabilities brought into the pool, as specified. The bill would specify that the contribution rate made to the Public Employees' Retirement System by a county office of education, school district, or community college district participating in a risk pool, as specified, is equal to the rate that the county office of education or the district would have paid had the county office of education or the district participated in a single account under a specified provision. The bill would make definitional changes to conform with and further these provisions.

Ch. 1134 (AB 2145) Chu. Theft: advertising services.

Under existing law, the attachment or insertion of any unauthorized advertisement, as defined, into, and the actual or intended redistribution of, a newspaper that is offered for retail sale or is distributed without charge, except with the consent of the publisher or authorized distributor, is a misdemeanor. Existing law also makes it a misdemeanor to act in concert with another to distribute newspapers with unauthorized advertisements, in violation of this provision.

This bill would expand these provisions by including in the crime the attachment or insertion of unauthorized advertisements into magazines, periodicals, or other publications.

By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

This bill would also recast and renumber these provisions to correct an inaccurate cross-reference, and to specify that these provisions do not apply to a distributor who attaches or inserts an unauthorized advertisement if the distributor has been directed to insert or attach the advertisement by the person or company supplying the newspapers, as specified, and the distributor is not aware that the advertisement is unauthorized. The bill would further specify that a conviction for this crime shall not constitute a conviction for petty theft.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1135 (AB 2235) Vargas. IHSS: wages: employer of record.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program.

Existing law requires the State Department of Social Services to assure the performance of various rights, duties, and obligations of an IHSS recipient, relating to contributions and premiums for benefits and taxes, if the state or a county makes or provides for direct payment to a provider chosen by a recipient or direct payment to the recipient for the purchase of in-home supportive services. These duties include withholding in trust from the payments made to or on behalf of a recipient amounts to be withheld from the wages of the provider

by the recipient as an employer and transmitting those amounts to the appropriate person or state or federal agency.

Existing law requires the Controller to provide for the administration of payroll deductions for purposes of state employees. Existing law authorizes the Controller to make certain deductions requested by employee organizations and bona fide associations from the salaries and wages of their members.

This bill would require the Controller to make certain deductions from the wages of in-home supportive services personnel related to employee organizations.

Existing law requires that on or before January 1, 2003, each county shall act as, or establish, an employer for IHSS providers for certain purposes.

This bill would require each county to provide the department with documentation, as prescribed, to demonstrate compliance with that requirement.

This bill would provide that if a county fails to provide the above documentation, in the manner specified, the county shall be deemed by operation of law to be the employer of IHSS providers for purposes of these provisions. By imposing these requirements upon each county, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 1136 (AB 2872) Thomson. Healing arts: physicians and surgeons.

Existing law, the Medical Practice Act, establishes requirements that a graduate of a medical school located outside of the United States or Canada is required to satisfy for licensure by the Medical Board of California as a physician and surgeon. These requirements include the successful completion of one academic year of a supervised clinical training program that is under the direction of an approved medical school.

This bill would make various findings by the Legislature, including that medical schools located within California no longer offer this clinical training program, described as the "Fifth Pathway Program." The bill would require the board, in consultation with these medical schools, the Office of Statewide Health Planning and Development, and other designated persons to study methods to reactivate the Fifth Pathway Program in medical schools located in this state. The bill would require the board to report its findings to the Legislature on or before July 1, 2003.

#### Ch. 1137 (AB 2908) Goldberg. Local public employee organizations.

The Meyers-Milias-Brown Act delegates jurisdiction to the Public Employment Relations Board to resolve disputes and enforce the statutory duties and rights of local public agency employers and employees. The act, among other things, requires the board to process as an unfair labor practice charge a complaint alleging violation of the act or rules or regulations adopted by a public agency under the act.

This bill would provide that the board shall not find it an unfair practice for an employee organization to violate a rule or regulation adopted by a public agency if that rule or regulation is in violation of the act.

The bill would permit any charging party, respondent, or intervenor aggrieved by a final decision or order of the board made under this authority and any party to a final decision or order of the board in specified matters not brought as an unfair practice case, to petition for a writ of extraordinary relief from the district court of appeal under prescribed procedures. The bill would permit the board, if the time to petition for review has expired, to seek

enforcement of any final decision or order by applying to the district court of appeal or superior court having jurisdiction over the county where the events giving rise to the decision or order occurred. It would also impose related requirements pertaining to enforcement of board decisions.

Ch. 1138 (AB 2935) Strom-Martin. Health professions: education: pharmacists: scholarship and loan repayment program.

Existing law provides for the licensure and regulation of pharmacists and pharmacies by the California State Board of Pharmacy. Existing law authorizes the imposition of a biennial license renewal fee upon pharmacists and an annual license renewal fee upon pharmacies.

This bill would authorize a pharmacist and pharmacy to make a \$25 contribution at the time of renewing a license, the proceeds to be deposited in the California Pharmacist Scholarship and Loan Repayment Program Fund described below.

Existing law requires the Office of Statewide Health Planning and Development to perform various functions and duties with respect to health policy and planning and health professions development, including administering the federal National Health Service Corps Scholarship Program and the federal National Health Service Corps Loan Repayment Program. Under the existing programs, federal funds are provided to states for the purpose of providing scholarships to health professions students or repaying qualifying educational loans of specified health care professionals who commit to serve a specified time period as a provider of health services, at practice sites in designated health professional shortage areas. Under the existing programs, the practice site is also responsible for repaying a portion of the health care professional's outstanding loan amount.

Existing law establishes the Health Manpower Policy Commission and prescribes the powers and duties of the commission, which include identifying specific areas of the state where unmet priority needs for primary care family physicians exist.

This bill would establish in the office the California Pharmacist Scholarship and Loan Repayment Program to provide scholarships to pay for the educational expenses of pharmacy students and to repay qualifying educational loans of pharmacists who agree to serve in areas of the state where unmet priority needs for primary care family physicians exist as determined by the Health Manpower Policy Commission.

The bill would require the office to administer the California Pharmacist Scholarship and Loan Repayment Program utilizing the same general guidelines applicable to the federal National Health Service Corps Scholarship Program and the federal National Health Service Corps Loan Repayment Program, with the exception that no matching funds shall be required from any entity in the practice site area.

The bill would establish the California Pharmacist Scholarship and Loan Repayment Program Fund in the State Treasury, and would require that the moneys in the fund be available for expenditure, upon appropriation by the Legislature, for purposes of implementing the program. The bill would provide that the program shall be implemented only to the extent that sufficient moneys are available in the fund.

Ch. 1139 (AB 3040) Committee on Public Employees, Retirement and Social Security. Retirement.

(1) The Public Employees' Retirement Law provides for the election of 6 members of the Board of Administration of the Public Employees' Retirement System at elections conducted by the board.

This bill would provide that if an incumbent member of that board, as specified, does not deliver his or her completed nomination documents to the election coordinator for reelection by the applicable filing deadline, the filing deadline for otherwise eligible candidates for the seat is extended by 10 days after the filing deadline.

(2) The Public Employees' Retirement Law requires contributions to the retirement fund based on compensation earnable by a member, which includes the member's payrate and

special compensation, as specified. "Payrate" is defined, for members other than state members, as the normal monthly rate of pay or base pay of the member, as specified.

This bill would include in that definition of "payrate" any amount deducted from a member's salary for participation in a deferred compensation or specified retirement plan, a money purchase pension plan, or a flexible benefits program.

(3) Existing law authorizes contracting agencies of the Public Employees' Retirement System who have a specified level of assets to have employer assets applied to satisfy all member contributions.

This bill would clarify that a transfer of assets may not be made unless the member contributions of each member in a membership classification, for a period of at least one month and not more than one year, are satisfied thereby.

(4) Existing law requires the Board of Administration of the Public Employees' Retirement System to provide for conducting structured preretirement information seminars.

This bill would additionally require a meeting between a member and his or her employer to provide the member with oral and written information regarding his or her compensation earnable, as specified, if requested by the member.

Ch. 1140 (SB 1162) Polanco. University of California: Charles R. Drew/UCLA Undergraduate Medical Education Program.

Existing law establishes the University of California system as a public trust administered by the Regents of the University of California.

This bill would request the regents, as a component of the current assessment of the system's medical education program, to consider the expansion of the Charles R. Drew/UCLA Undergraduate Medical Education Program. The bill would also request the regents to submit a report summarizing their findings regarding the Charles R. Drew/UCLA Undergraduate Medical Education Program to the Governor, the Legislature, and the California Postsecondary Education Commission no later than June 30, 2003.

Ch. 1141 (SB 1423) Chesbro. Victims of crime: compensation.

(1) Existing law provides for the indemnification of victims of specified types of crimes by the California Victim Compensation and Government Claims Board, subject to specified criteria for, among other things, submission and verification of applications, eligibility for emergency awards and compensation for specified services, procedures for hearings with respect to denial of awards, and publicization of the program by the board. Various provisions authorizing compensation for losses incurred for specified mental health counseling services or as a result of specified types of crimes, and specified treatment of applications by, or on behalf of, minors and victims of domestic violence, are repealed as of January 1, 2004. Payment is made under these provisions from the Restitution Fund, which is continuously appropriated to the board for these purposes.

This bill would recodify and recast these provisions, and would revise various criteria for the application and verification processes, the scope of compensation for emergency awards, procedures for hearings, and provisions relating to publicizing the program. It would expand the scope of mental health counseling available to derivative victims, and would indefinitely extend provisions authorizing compensation for losses incurred for specified mental health counseling services or as a result of specified types of crimes, and specified treatment of applications by, or on behalf of, minors and victims of domestic violence. By expanding the scope of services for which continuously appropriated funds are available, and by indefinitely extending the duration of provisions authorizing certain uses of those continuously appropriated funds, this bill would make an appropriation.

(2) This bill would incorporate additional changes to existing sections of the victims of crime program provisions proposed by AB 2462, AB 2542, and AB 2729, to be operative only upon the occurrence of specified conditions.

(3) This bill would make various technical, conforming changes.

Ch. 1142 (SB 1591) Burton. Unemployment: job and preparation training.

Existing unemployment insurance law requires the establishment of regulations and procedures to govern job preparation, training services, and placement.

This bill would also require that standards be developed to ensure that no participant in these job preparation and training programs fills a job when any other individual is on layoff from the same or any substantially equivalent job, or when the employer has terminated the employment of any regular employee or otherwise reduced its workforce with the intention of filling the resulting vacancy with a program participant, or, with respect to the construction industry, when the employer has not rehired a seasonal employee with a history of regular seasonal employment.

Existing law prohibits the creation of any employment or training program position that results in the displacement of current employees, as specified.

This bill would, with respect to the construction industry, prohibit an employer from filling a work assignment if that placement is in lieu of rehiring a seasonal employee with a history of regular seasonal employment.

Ch. 1143 (AB 930) Keeley. Mobilehome parks: conversion to resident ownership.

Existing law requires a subdivider, at the time of filing a tentative or parcel map for a subdivision to be created from the conversion of a rental mobilehome park to resident ownership, to avoid the economic displacement of nonpurchasing residents by limiting the amount of rent increases, as specified. The subdivider is required to offer each existing tenant the option to purchase his or her condominium unit and is subject to a hearing on the matter, the scope of which is limited to the issue of compliance with these provisions.

This bill would require the subdivider to obtain a survey of support of residents of the mobilehome park for the proposed conversion pursuant to a written ballot, to be conducted as specified, with results to be submitted to the local agency upon filing of the tentative or parcel map, and considered as part of the hearing.

Ch. 1144 (AB 1243) Wiggins. Public employment: payroll deductions.

Existing law provides that a state employee may authorize deductions to be made from his or her salary or wages for payment for support of an employee's child, family, or former spouse, and for other purposes as specified.

This bill would provide that a public agency, which is defined to include counties, cities, municipal corporations, political subdivisions, public districts, and other public agencies of the state, may establish wage deduction programs for the purpose of payment for the support, maintenance, or care of an employee's child, children, family, or former spouse for whom the employee has a duty of support, payment of an employee's legal judgment, garnishment or deduction of an employee's wages pursuant to a court order, and payment of an employee's loan or obligation to a commercial lending institution.

Ch. 1145 (SB 1156) Burton. Agricultural employer-employee collective bargaining and mediation.

Existing law establishes a procedure pursuant to which backstretch employees working for a licensed trainer or horseman in the horse racing industry may join a labor organization for purposes of collective bargaining with their employers. It authorizes the California Horse Racing Board to order the parties to engage in good faith negotiations for employment agreements on an individual employer basis and to participate in mandatory mediation if no agreement is reached. If an impasse is declared the board may appoint an arbitrator to determine the issues and issue a binding order. Existing law authorizes specified disputes to be adjudicated by the stewards, who have the authority to order any remedy therefor, and authorizes the California Horse Racing Board to require the parties to submit to binding arbitration subject to judicial review.

This bill would provide a mediation procedure applicable to specified agricultural employers and a labor organization certified as the exclusive bargaining agent of a bargaining unit of agricultural employees. It would permit either party to file with the Agricultural Labor Relations Board, following a specified period, a declaration that the parties have failed to reach a collective bargaining agreement. It would require the board, upon receipt of a declaration pursuant to this procedure, to immediately issue an order directing the parties to mandatory mediation and conciliation of the issues for a specified period.

This bill would require the mediator, if the parties do not resolve the issues to their mutual satisfaction, to certify that the mediation process has been exhausted. It would require the mediator to issue a report that determines all unresolved issues and establishes the final terms of a collective bargaining agreement.

This bill would permit either party, within a specified period, to petition the board to review the mediator's report, and would permit the board to accept for review only those portions of a petition that establish a prima facie case of grounds therefor, as specified. It would require the board, if it does not accept a petition for review, to issue an order confirming the mediator's report and order it into immediate effect. It would require the board, if it finds grounds to grant review, to order the provisions of the report that are not the subject of the petition for review into effect as a final order of the board. If the board does not accept a petition for review the mediator's report would become the final order of the board.

This bill would require the board to issue a decision concerning the petition and under specified conditions to issue an order requiring modification of the collective bargaining agreement in the mediator's report. It would require the mediator to meet with the parties for an additional mediation period and, at the end of this mediation period, to prepare a 2nd report resolving any outstanding issues, and to file it with the board.

This bill would permit either party within a specified period after the issuance of the mediator's 2nd report, to petition the board for a review of the mediator's 2nd report. If no petition is filed, the mediator's report would take immediate effect as a final order of the board. If a petition is filed, the board would be required to issue an order confirming the mediator's report and order it into immediate effect, unless it finds that the report is subject to review on any of the grounds specified by this bill, in which case the board shall determine the issues and shall order the mediator's report, as modified by the board, into immediate effect as a final order of the board. It would permit the board to set aside the mediator's report on specified grounds.

This bill would permit either party, within a specified period after the mediator's report takes effect, to file an action to enforce the provisions of the mediator's report, as specified. It would also permit either party, within a specified period after the mediator's report takes effect, to petition for a writ of review in the court of appeal or the California Supreme Court for a writ of review, and would specify the basis for review by the court.

Ch. 1146 (AB 2596) Wesson. Agricultural labor mediation procedures.

SB 1156 of the 2001-02 Regular Session would provide a mediation procedure applicable to specified agricultural employers and a labor organization certified as the exclusive bargaining agent of a bargaining unit of agricultural employees. It would permit either party to file with the Agricultural Labor Relations Board, at any time following 90 days after certification of the labor organization, a declaration that the parties have failed to reach a collective bargaining agreement and a request for an order directing the parties to mandatory mediation and conciliation of their issues.

This bill would permit the filing of a declaration with the board at any time following 90 days after a renewed demand to bargain by an agricultural employer or a labor organization certified prior to January 1, 2003, or 180 days after an initial request to bargain by an agricultural employer or a labor organization certified after January 1, 2003.

SB 1156 would permit either party to file with the board, following a specified period of mediation and conciliation, a petition for review of a report issued by a mediator selected by

the parties that determines all issues not resolved by the parties. It provides a procedure whereby the board may grant a review of the mediator's report, order the provisions that are not the subject of the petition into effect, and order an additional mediation period on the controverted items, among other things.

SB 1156 would apply the mediation and conciliation procedures of the bill to all election certifications issued by the board before or after the effective date of the bill.

This bill would permit the filing of a demand with the board for mediation of issues only for cases that meet specified criteria.

SB 1156 would not permit a party to file with the board more than a specified number of declarations per calendar year, as specified.

This bill would not permit a party to file with the board more than 75 declarations with the board.

This bill would provide that the mediation procedures added by SB 1156 shall remain in effect only until January 1, 2008, and as of that date is repealed, unless a later enacted statute that is enacted before January 1, 2008, deletes or extends that date.

Ch. 1147 (AB 2838) Canciamilla. Public Utilities Commission: fees: water rates.<sup>8</sup>

(1) Existing law authorizes the Public Utilities Commission to collect penalties, or bring an action for the collection of fees and penalties, from public utilities that fail to submit certain reports and fees required by the commission. Existing law requires that the penalties collected be deposited in the Public Utilities Commission Utilities Reimbursement Account in the General Fund.

This bill would instead require that these penalties be deposited in the General Fund.

(2) Existing law requires the Public Utilities Commission to establish rates for water corporations.

This bill would require the commission to issue a final decision, within a specified timeframe, on a water corporation's application, involving a water corporation with greater than 10,000 service connections, for a general rate increase pursuant to the commission's rate case plan for general rate increase applications. The bill would authorize the applicant to file a tariff implementing interim rates that may be increased by an amount equal to the rate of inflation as compared to existing rates if the commission decision is not effective in accordance with the specified timeframe. The bill would require the commission to establish a schedule to require every water corporation that is subject to the rate case plan for water corporations to file an application pursuant to the plan every 3 years. The bill would provide that its provisions may be waived at any time by mutual consent of the executive director of the commission and the water corporation.

The bill would appropriate \$445,000 from moneys derived from regulatory fees deposited in the Public Utilities Commission Utilities Reimbursement Account in the General Fund for costs incurred by the commission in the administration of these provisions.

Ch. 1148 (SB 1482) Polanco. Barbering and cosmetology.

The Barbering and Cosmetology Act establishes the Bureau of Barbering and Cosmetology in the Department of Consumer Affairs.

Existing law authorizes the Director of Consumer Affairs to perform specified functions regarding the bureau.

This bill would repeal the Bureau of Barbering and Cosmetology. The bill would establish the State Board of Barbering and Cosmetology in the department consisting of 9 members. The bill would require the board, subject to the approval of the director, to appoint an executive director to perform the duties delegated by the board. The bill would provide that the provisions relating to the board and the executive director become inoperative on July 1, 2007 and are repealed on January 1, 2008. The bill would make conforming changes.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would become operative only if SB 1957 is enacted and becomes effective on or before January 1, 2003.

Ch. 1149 (SB 1886) Torlakson. Elevators and other conveyances.

Under existing law, with certain exceptions, no elevator may be operated unless it has a permit issued by the Division of Occupational Safety and Health of the Department of Industrial Relations. These provisions of existing law provide for annual inspections of elevators by the division, by inspectors of specified municipalities, or by qualified inspectors of insurance companies. Existing law permits elevators subject to a full maintenance service contract to be inspected every 2 years. Existing law also authorizes elevator permits to be issued on the basis of municipal inspections, as specified. Persons inspecting elevators are required by existing law to obtain a certificate of competency from the division. Existing law provides specified enforcement authority to the division and provides for fees for elevator inspections and permits and field consultations.

This bill would substantially revise and recast this existing law to additionally cover, subject to certain exceptions, defined conveyances, including, in part, escalators, platform and stairway chair lifts, dumbwaiters, material lifts, moving walks, and automated people movers. Among the changes the bill would make, it would require that on or after June 30, 2003, no conveyance, except a platform lift or stairway chair lift installed in a private residence, may be erected, constructed, installed, or materially altered without a permit from the division. The bill would require the Occupational Safety and Health Standards Board to adopt regulations for emergency signal devices for conveyances in addition to elevators. The bill would require the division to adopt prescribed procedures for 30-day renewable certification of emergency certified qualified elevator mechanics to provide elevator service when a disaster or other emergency exists and there are insufficient regularly certified competent elevator mechanics to cope with the emergency. The bill would require the division to adopt prescribed procedures for 30-day renewable certification of temporary certified competent elevator mechanics where there are no certified qualified elevator mechanics available.

The bill would impose a state-mandated local program by expanding misdemeanor provisions applicable to the operation of an elevator without a permit to also cover other conveyances, except conveyances in a defined private residence. The bill would also revise the applicable misdemeanor penalties. The bill would impose a state-mandated local program by making it a misdemeanor to contract for or authorize the erection, construction, installation, or alteration of a conveyance without a permit in violation of the bill. The bill would also impose a state-mandated local program by making it a misdemeanor for any employer or contractor to engage in the erection, construction, installation, or material alteration of a conveyance without a permit in violation of the bill.

The bill would revise the authority of the division to seek injunctions restraining the operation of elevators without a permit and in a dangerous condition to include all conveyances, would exempt the division from any requirement for an injunction bond, and would make any person who intentionally violates such an injunction subject to prescribed civil penalties.

The bill would make the inspection requirements applicable to all conveyances.

The bill would impose a state-mandated local program by making it a misdemeanor with prescribed punishment for any person owning or having custody, management, or control of the operation of a conveyance, to operate the conveyance while a repair order of the division is outstanding. The bill would revise current inspection requirements to require initial inspection by division inspectors and reinspection by the division's inspectors or any other defined elevator inspector certified as qualified by the division. On and after June 30, 2003, the bill would prohibit these reinspections unless the inspector is certified by the division. The bill would, with certain exceptions, on and after June 30, 2003, prohibit the erection, construction, material alteration, testing, maintenance, repair, or servicing of a

conveyance except by a person, firm, or corporation certified by the division, as specified. On and after June 30, 2003, the bill would prohibit any person from erecting, constructing, materially altering, testing, maintaining, repairing, servicing, removing, or dismantling a conveyance without supervision, unless the person is certified by the division.

The bill would provide for biennial renewal of division certifications under the bill and would provide for fees and continuing education requirements. The bill would make failure of an elevator inspector to comply with certain reporting requirements grounds for revocation of certification. The bill would authorize the division to issue temporary permits to operate a conveyance pending receipt of the applicable fee. The bill would revise civil penalties that may be assessed for operating or permitting the operation of a conveyance that is dangerous or in violation of an order prohibiting use. The bill would provide for an order prohibiting use and provide for civil penalties that may be assessed for constructing, installing, or materially altering a conveyance that is dangerous. The bill would impose a state-mandated local program by making it a misdemeanor with prescribed penalties (1) to enter, use, or direct or cause another to enter or use a conveyance after a prescribed notice has been attached and before it is made safe or (2) to deface, destroy, or remove such a notice without authority of the division. The bill would also make it a misdemeanor with prescribed penalties for any person to operate a conveyance without a permit or without paying the required fee.

The bill would require the division by December 31, 2003, to propose specified final rulemaking proposals for conveyances for review and adoption by the Occupational Safety and Health Standards Board, require the board to provide public notice of the rulemaking proposals, and provide for adoption of those proposals pursuant to specified requirements. The bill would also require prescribed revisions to the regulations. The bill would specify that standards imposed pursuant to it shall not be applied retroactively.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 1150 (SB 1955) Figueroa. Professions and vocations.

(1) Existing law prohibits a public member appointed to a board in the Department of Consumer Affairs from, among other things, having within the previous 5 years of their appointment a specified business relationship with a licensee of that board or having been engaged in the business or industry being regulated by that board.

This bill would additionally prohibit a public member appointed to a board from being a current or past licensee of that board or from being a close family member of a licensee of that board. The bill would additionally require all newly appointed board members to complete a training and orientation program sponsored by the Department of Consumer Affairs regarding the functions, responsibilities, and obligations of board members. The bill would require the department to adopt regulations necessary to establish the training and orientation program, including its content.

(2) Existing law provides for the licensing and regulation of the practice of dentistry by the Dental Board of California. Existing law requires that a fact sheet be given to all patients prior to the performance of dental restoration work, except for any procedure where a patient does not have a structure or device placed in his or her mouth with the intent that it remain there indefinitely.

This bill would instead apply the exemption only to a surgical, endodontic, periodontic, or orthodontic dental procedure meeting that requirement in which dental restorative materials are used.

(3) Existing law provides for the licensure and regulation of podiatric medicine by the Board of Podiatric Medicine. Existing law terminates the existence of the board on July 1, 2003.

This bill would extend the existence of the board to July 1, 2007.

Existing law requires, for certification as a podiatrist, that an applicant meet specified requirements, including examination requirements. Existing law also requires the board to impose specified continuing education requirements, including an examination requirement.

This bill would also require for certification that a disciplinary data bank report regarding the applicant has been directly presented to the board from the Federation of Podiatric Medical Boards. The bill would revise examination requirements.

Existing law provides for a biennial certificate renewal fee of \$900 until January 1, 2004, and reduces the fee to \$800 as of that date.

This bill would continue the \$900 biennial certification renewal fee until January 1, 2006, and would reduce it to \$800 as of that date.

Moneys from these fees are deposited into the Contingent Fund of the Medical Board of California, which is a continuously appropriated fund. Because this bill would increase the amount of money deposited into this fund, it would make an appropriation.

(4) Existing law provides for the licensing and regulation of the practice of optometry by the State Board of Optometry and provides for the employment of an executive officer, as specified. The existence of the board and the executive officer will be terminated on July 1, 2003.

This bill would instead terminate the existence of the board and the executive officer on January 1, 2003, and, as of that date, would provide for the formation of a new board and employment of a new executive officer both of which would be terminated on July 1, 2005. The bill would grant the new board certain authority parallel with the authority of the previous board. The bill would also provide for the appointment and staggering of terms of board members, as specified.

This bill would authorize the board to adopt regulations clarifying the level of training and level of supervision of assistants to optometrists.

(5) Existing law provides for the licensure and regulation of respiratory care practitioners by the Respiratory Care Board of California and provides for the employment of an executive officer, as specified. The existence of the board and the executive officer will be terminated July 1, 2003.

This bill would extend the existence of the board and the executive officer to July 1, 2007.

Existing law authorizes the board or appointees of the board to inspect specified reports and records regarding respiratory care, treatment, services, or staff, and requires an employer to report specified employee information to the board.

This bill would revise the inspection requirements to include, in certain instances, copying records, and would provide that the failure to provide certain documents and records, as specified, is punishable by an administrative fine of up to \$10,000 per violation.

Moneys from these fines would be deposited into the Respiratory Care Fund, which is a continuously appropriated fund. Because this bill would increase the amount of money deposited into this fund, it would make an appropriation.

Existing law requires applicants for licensure to meet and provide verification of specified education requirements, and requires respiratory therapy schools to meet certain requirements. Existing law prohibits certain fees imposed on respiratory therapy schools from exceeding specified limits.

This bill would revise the educational requirements. The bill would also revise the requirements for respiratory therapy schools, and would delete the maximum limit on the fees imposed on respiratory therapy schools.

Existing law authorizes the board to deny, suspend, or revoke the license of an applicant or licenseholder who has committed certain actions, including using alcoholic beverages in a dangerous or injurious manner, as specified.

This bill would require instead that, in order for the board to take this action with regard to alcohol use, the person have applied for employment or worked in any health care profession or environment while under the influence of alcohol.

Existing law authorizes a person whose license has been revoked or suspended, or who has been placed on probation to petition the board for reinstatement, modification, or termination of probation, if certain conditions are met.

This bill would authorize the holder of a conditional or probationary license issued prior to February 1, 2002, on specified grounds, to submit a petition to terminate probation prior to December 31, 2003.

Existing law authorizes an administrative disciplinary decision imposing terms of probation to require the licensee probationer pay the monetary costs associated with monitoring the probation.

This bill would prohibit the renewal or reinstatement of the license of a licensee who has failed to pay all of these costs once he or she has served the term of probation.

Existing law authorizes the board to punish a person representing himself or herself as a respiratory care practitioner without a license by the issuance of a citation and the assessment of an administrative fine of \$1,000.

This bill would revise and expand this authorization. The board would authorize a person with a citation to appeal the board within a certain time period of service of the citation, and would provide procedures whereby a person could contest the citation.

Moneys from the fines are deposited into the Respiratory Care Fund, which is a continuously appropriated fund. Because this bill would increase and expand money derived from fines that is deposited into this fund, it would make an appropriation.

The bill would also make nonsubstantive changes to the provisions governing respiratory care practitioners and would delete an obsolete reporting requirement imposed on the board.

(6) Existing law provides for the regulation, licensure, and discipline of public accountants by the California Board of Accountancy in the Department of Consumer Affairs. Among other things, on January 1, 2003, it defines "director" and "officer" and prohibits a person practicing public accountancy from performing services for a client, an officer or director of a client, or a client-sponsored retirement plan for a commission. On January 1, 2003, the board is authorized to issue subpoenas for the attendance of witnesses and the production of documents pertinent to any inquiry, investigation, hearing, proceeding, or action conducted by the board in any part of the state.

This bill would provide that a director and an officer does not include a director or an officer of a nonprofit corporation or a corporation that meets the certain small business workforce or annual receipts requirements. The bill would limit the subpoena authority to its investigations and proceedings.

(7) Existing law provides for the licensure and regulation of physical therapists and physical therapy assistants by the Physical Therapy Board of California. The existence of the board would terminate July 1, 2003.

This bill would extend the existence of the board to July 1, 2007.

Existing law requires that to renew a license for the practice of physical therapy a licensee apply for renewal and pay a renewal fee, as specified.

This bill would require a licensee to disclose on the license renewal application any misdemeanor or other criminal offense for which he or she has been found guilty or to which he or she has pleaded guilty or no contest.

Existing law authorizes the Physical Therapy Board of California to conduct disciplinary proceedings against a licensee, including imposing probationary conditions, for specified causes.

This bill would require the board to establish a probation monitoring program. The bill would authorize the program to employ nonpeace officer staff to perform its probation monitoring and would provide that the program be funded with moneys in the Physical Therapy Fund.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

The Physical Therapy Fund is a continuously appropriated fund. Because funding this program would allow an existing appropriation to be made for a new purpose, it would make an appropriation.

This bill would authorize the board to refuse a license to an applicant guilty of specified unprofessional conduct or sexual activity, or issue the applicant a license subject to certain conditions. The bill would authorize the applicant to appeal the board's action.

Existing law provides for specified boards, not including the Physical Therapy Board of California, to keep certain records relating to unprofessional conduct, civil actions, and complaints against persons licensed or certified by the boards.

This bill would add the Physical Therapy Board of California to the list of boards to which these provisions apply.

Existing law requires a physical therapist to document specified patient information.

This bill would additionally require a physical therapist to document the care actually provided and to legibly sign the patient record.

Existing law requires certain health care professionals to provide patient record access to patients, as specified.

This bill would add physical therapists to the list of health care professionals subject to this requirement.

Existing law provides the authority for the board to take disciplinary action for specified actions by a licensee.

This bill would characterize these acts as unprofessional conduct, would expand the acts, and would make both physical therapists and physical therapy assistants subject to disciplinary action for all of the acts listed.

(8) Existing law provides for the regulation of tax preparers and makes a violation of the provisions regulating tax preparers a crime. Existing law specifies that each violation of the provisions regulating the practice of tax preparers constitutes a separate offense.

This bill would include a failure to register as a tax preparer with the California Tax Education Council as a violation and would require the Franchise Tax Board to notify the council when it identifies an individual who has violated specific provisions regulating tax preparers and requires the council to notify the Attorney General, a district attorney, or a city attorney. The bill would authorize those entities, in this regard, to cite a violating individual, levy a fine of up to \$1,000 per violation, and issue a cease and desist order. The bill would authorize the California Tax Education Council to enter into an agreement with the board that would reimburse the board for any expenses the board incurs for the purpose of enforcing those provisions.

(9) This bill would declare the intent of the Legislature, upon enactment of SB 2022 of the 2001–02 Regular Session, to pursue the creation of an independent board that would regulate the practice of dental hygienists.

(10) Existing law provides for the Board for Professional Engineers and Land Surveyors in the Department of Consumer Affairs, and terminates the existence of the board on July 1, 2004. Existing law provides for the adoption by the board of rules and regulations of professional conduct, and terminates that authority on July 1, 2004. Existing law also provides for the appointment by the board of an executive officer, and terminates that authority on July 1, 2004.

The bill would extend these termination dates by one year.

(11) The bill would incorporate additional changes in Section 800 of the Business and Professions Code, proposed by SB 1950, to be operative only if SB 1950 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

The bill also would incorporate additional changes in Section 123105 of the Health and Safety Code, proposed by SB 2026, to be operative only if SB 2026 and this bill are both chaptered and become effective on or before January 1, 2003, and this bill is chaptered last.

Ch. 1151 (SB 1957) Polanco. Barbering and cosmetology.

The Barbering and Cosmetology Act establishes the Bureau of Barbering and Cosmetology in the Department of Consumer Affairs. Existing law requires the licensure of a person by the bureau to practice barbering, cosmetology, or electrolysis. Existing law provides that an apprentice shall not work more than 3 months after completing the required training without applying for and taking the examination for licensure.

The bill would delete the provision that would allow an apprentice to continue to work after 3 months if the apprentice applies and takes the examination.

Existing law requires the bureau to inspect an establishment within 90 days after the bureau issues an establishment license.

The bill would also authorize the bureau to inspect the premises prior to the issuance of the license.

Existing law requires a licensed barber, cosmetologist, or electrologist to notify the bureau within 30 days of a change of address.

The bill would authorize a licensee to provide the bureau with an alternate address if the bureau's address of record is the licensee's residence address.

Existing law authorizes an administrative law judge to order a person to pay the bureau reasonable costs for the investigation and adjudication in a proceeding to revoke, suspend, or deny a license.

The bill would provide that a person who fails to pay costs would not be issued a license or allowed to renew a license until the costs are paid.

The bill would become operative only if SB 1050 of the 2001–02 Regular Session is enacted, and is effective on or before January 1, 2003.

Ch. 1152 (AB 2023) Frommer. Public employees' retirement: local safety members.

Under existing law, attorneys in the offices of the Attorney General and the State Public Defender are state miscellaneous members of the Public Employees' Retirement System (PERS) and city and county prosecutors, public defenders, and public defender investigators are local miscellaneous members of PERS or general members of retirement systems established pursuant to the County Employees Retirement Law of 1937. Under existing law employees of contracting agencies of PERS classified as state or local safety members and employees of counties and districts classified as safety members under the County Employees Retirement Law of 1937 are entitled to generally higher benefits, and subject to higher contribution rates, than employees classified as miscellaneous or general members. Member contributions to PERS are deposited in the Public Employees' Retirement Fund, a continuously appropriated fund. Under existing law, persons employed in any policeman's or fireman's position, as defined, may be excluded from coverage under federal social security.

This bill would authorize state prosecutors and state public defenders, as defined, to be included within the state safety member classification under PERS, if agreed to in a memorandum of understanding, as specified. The bill would also authorize contracting agencies and counties and districts to include employees who are or, on or after January 1, 2002, were local prosecutors, local public defenders, and local public defender investigators, as defined, within the local safety member classification under PERS, or within the safety member classification under the County Employees Retirement Law of 1937, and would authorize the exclusion of current employees in those positions from coverage under social security. The bill would require a local entity that elects to be subject to its provisions to include all local prosecutors, local public defenders, and local public defender investigators, but would authorize any of those members to elect not to become safety members. The bill would provide that prior service as a state prosecutor, state public defender, local prosecutor, local public defender, or local public defender investigator shall be deemed safety service, at the employer's cost, as specified. The bill would provide that state prosecutors, state public

defenders, local public prosecutors, local public defenders, and local public defender investigators who are safety members shall be subject to retirement benefits applicable to safety members, except as specified, but may not be subject to industrial disability or special death benefits applicable to safety members, except as specified. The bill would make an appropriation by increasing the amount of employee contributions to the Public Employees' Retirement Fund.

The bill would also authorize other city and county retirement systems to provide employees who are or, on or after January 1, 2002, were local prosecutors, local public defenders, and local public defender investigators, as defined, with the same benefits provided to safety members under their respective retirement systems, subject to a specified limitation. The bill would require an entity that elects to be subject to its provisions to include all local prosecutors, local public defenders, and local public defender investigators, but would authorize any of those members to elect not to be subject to those benefits.

The bill would declare the Legislature's intent to recognize the public obligation to provide all local prosecutors, local public defenders, and local public defender investigators in the state with commensurate retirement benefits.

The bill would also state that its provisions are severable, and would set forth the findings and declarations of the Legislature.

The bill would incorporate additional changes to Section 21151 of the Government Code proposed by SB 1984, to take effect if both bills are enacted and become effective on or before January 1, 2003, and this bill is enacted last.

This bill would make certain of its provisions operative only if SB 362 is enacted, as specified.

Ch. 1153 (SB 1984) Soto. Public employees' retirement: industrial disability and death benefits.

Under existing law, patrol, state safety, state industrial, and state peace officer/firefighter members of the Public Employees' Retirement System, among others, who are incapacitated as the result of an industrial disability, are retired for disability, regardless of age or amount of service, and receive a disability retirement allowance equal to the greater of 50 percent of the member's final compensation plus an annuity, as specified, or, if qualified for service retirement, the member's service retirement allowance. The Public Employees' Retirement Law also provides that a special death benefit, as specified, is payable to a qualified survivor of any of those members if the member's death was industrial.

This bill would make those industrial disability benefits and the special death benefit applicable to state miscellaneous members in State Bargaining Unit 12 and employed by the Department of Transportation who are injured or killed in the course of their duties with the department, if those benefits are approved in a memorandum of understanding between the state and the recognized employee organization, as specified.

The bill would incorporate additional changes to Section 21151 of the Government Code proposed by AB 2023, to take effect if both bills are enacted and become effective and this bill is enacted last.

Ch. 1154 (SB 483) Sher. Surface mining and reclamation.

(1) The existing Surface Mining and Reclamation Act of 1975 prohibits a person from conducting surface mining operations without obtaining a permit from the lead agency for the operation, and submitting and receiving approval for a reclamation plan and financial assurances from that lead agency.

This bill would prohibit a lead agency from approving a reclamation plan and financial assurances for a surface mining operation for gold, silver, copper, or other metallic minerals that is located on, or within one mile of, any Native American sacred site, as defined, and in an area of special concern, as defined, unless the reclamation plan requires that all excavation be backfilled and graded to achieve the approximate original contours of the mined lands

prior to mining, and the financial assurances are sufficient in amount to provide for the backfilling and grading.

The bill would exempt from those provisions any surface mining operation in existence on January 1, 2003, for which the lead agency has issued final approval of a reclamation plan and the financial assurances prior to September 1, 2002, and any amended reclamation plan or financial assurances that are necessary for the continued operation or expansion of a surface mining operation in existence on January 1, 2003, that otherwise satisfies those requirements.

By imposing additional duties on lead agencies, this bill would impose a state-mandated local program.

(2) The act establishes a state abandoned minerals and mineral materials mine reclamation program for the purpose of administering funds received by the state under the federal Surface Mining Control and Reclamation Act of 1977, or through amendments to specified federal general mining laws. Existing law authorizes funds appropriated by the Legislature to be used for the state abandoned minerals and mineral materials mine reclamation program. Existing law also, until January 1, 2003, authorizes the Director of Conservation to remediate or complete reclamation of abandoned mined lands that meet specified requirements and to make the costs of remediation a lien on the affected property.

This bill would extend the time for the director to remediate or complete reclamation of abandoned mined lands to January 1, 2007.

This bill would require the director, not later than January 1 of each year to report to the Legislature on any abandoned mine remediation projects that are proposed for the following year.

(3) SB 1828 of the 2001–02 Regular Session would provide that a federally recognized Indian tribe would be considered a “public agency having jurisdiction over natural resources” for purposes of other provisions added by SB 1828.

This bill would repeal that provision.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) This bill would become operative only if SB 1828 is enacted and becomes effective on or before January 1, 2003.

Ch. 1155 (SB 1816) Chesbro. Historical resources: Native American sacred sites: violations.

(1) Existing law prohibits a public agency, or a private party using or occupying public property, or operating on public property, under a public license, permit, grant, lease, or contract made on or after July 1, 1977, from in any manner interfering with the free expression or exercise of Native American religion as provided in the United States Constitution and the California Constitution, or from causing severe or irreparable damage to any Native American sanctified cemetery, place of worship, religious or ceremonial site, or sacred shrine located on public property, except on a clear and convincing showing that the public interest and necessity so require.

This bill would establish the Native American Historic Resource Protection Act, which would provide that any person who unlawfully and maliciously excavates upon, removes, destroys, injures, or defaces a Native American historic, cultural, or sacred site that is listed or may be listed in the California Register of Historic Resources, including any historic or prehistoric ruins, burial ground, any archaeological or historical site, any inscriptions made

by Native Americans at the site, any archaeological or historic Native American rock art, or any archaeological or historic feature is guilty of a misdemeanor if the act was committed with the specific intent to vandalize, deface, destroy, steal, convert, possess, collect, or sell a Native American art object, inscription, or feature, or site and the act occurs on public land or, if on private land, is committed by a person other than the landowner, as described. The bill would subject a person found guilty of the violation to imprisonment in the county jail for up to one year, by a fine not to exceed \$10,000, or by both that fine and imprisonment. By creating a new crime, the bill would impose a state-mandated local program. The bill would also subject a person found guilty of a violation of those provisions to a civil penalty in an amount not to exceed \$50,000 per violation. The bill would require that all civil penalties collected pursuant to this provision as a result of an enforcement action brought by a city or county be distributed to the city or county treasurer of the city or county that brought the action. The bill would require the moneys to be utilized first to repair or restore the damaged site and would require the remaining moneys to be available to the city or county to offset enforcement costs.

The bill would require all civil penalties collected as a result of an action by the Attorney General to be first distributed to, and utilized by, the Native American Heritage Commission to repair or restore the damaged site. The bill would require the remaining moneys to be available to the Attorney General to offset enforcement costs.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1156 (SB 1516) Romero. Public safety officers: procedural bill of rights.

The Public Safety Officers Procedural Bill of Rights Act makes it unlawful for any public safety department to deny or refuse to public safety officers the rights and protections guaranteed to them by the act.

This bill would provide that, upon a finding by a superior court, any public safety department, its employees, agents, or assigns, acting within the scope of employment, who maliciously violates any provision of the act with intent to injure a public safety officer, shall be liable to the public safety officer whose right or protection was denied for a civil penalty and attorney's fees. The department would also be liable for actual and exemplary damages if the court finds that actual damages are established. This bill would specifically authorize a court to order specified sanctions if the court finds that a bad faith or frivolous action or a filing for an improper purpose has been brought pursuant to the act.

Ch. 1157 (AB 1045) Firebaugh. Healing arts: practice.

Existing law provides for a Task Force on Culturally and Linguistically Competent Physicians and Dentists in the Department of Consumer Affairs. Pursuant to existing law there is a subcommittee within the task force to examine the feasibility of a pilot program allowing Mexican and Caribbean licensed physicians and dentists to practice in nonprofit community health centers in medically underserved areas. Existing law requires the subcommittee to report to the task force by March 1, 2001, and requires the report to be forwarded to the Legislature by April 1, 2001, with any additional comments.

This bill would delete the provisions for the subcommittee.

The bill would create the Licensed Physicians and Dentists from Mexico Pilot Program. The bill would set forth the program's provisions related to eligibility, licensing, location, and hiring. The bill would also provide for an evaluation of the program, and for funding of administrative and evaluation costs by philanthropic entities. The bill would authorize a 3-year nonrenewable license for physician participants and a 3-year nonrenewable dental permit for participating dentists and would prohibit these medical licenses and dental permits

from being used as the standard for issuing a license to practice medicine or dentistry in this state on a permanent basis.

The bill would additionally specify certain requirements international medical graduates are required to meet to participate in a separate pilot program and to receive an applicant status letter. The bill would provide the Medical Board of California the authority to issue a license to practice medicine to an international medical graduate participating in the program if specified criteria are met.

The bill would require the Medical Board of California and the Dental Board of California, in consultation with other entities, to provide oversight of these programs. The bill would require the Medical Board of California to report to the Legislature every January regarding the physicians program and the international medical graduate program. The bill would also require the Dental Board of California to report to the Legislature every January regarding the dental program.

The bill would provide that these programs shall only be implemented if the necessary amount of nonstate funding is obtained.

Ch. 1158 (AB 2656) Corbett. Arbitration: private arbitration companies.

Existing law regulates arbitration conducted pursuant to an arbitration agreement, as specified.

This bill would require a private arbitration company involved in consumer arbitration cases to make certain information regarding those cases available to the public, as specified, and would provide that no private arbitration company shall have any liability for collecting, publishing, or distributing the information.

Ch. 1159 (AB 3030) Corbett. Arbitration.

(1) Existing law permits consumers to contract to arbitrate and regulates the conduct of arbitrations.

This bill would provide that a private arbitration company or self-regulatory organization (SRO) that administers a consumer arbitration in violation of specified provisions of law shall, in the court's discretion, be subject to disgorgement of any administrative fee obtained as a result of that violation.

(2) Existing law requires a court to vacate an arbitration award under specified circumstances.

This bill would prohibit an arbitrator or private arbitration company involved in a consumer arbitration from conducting or administering further arbitration of the dispute if a court vacates the award, unless the consumer party elects otherwise in writing prior to any re-arbitration of the matter.

(3) This bill would provide that it shall become operative only if it and Assembly Bills 2574, 2915, and 3029 are enacted and become effective on or before January 1, 2003.

Ch. 1160 (AB 2294) Liu. Foster care.

Existing law requires the Office of the State Foster Care Ombudsperson to be established in the State Department of Social Services with prescribed powers and duties relating to the management of foster children, including the dissemination of information on the rights of children and youth in foster care.

Existing law requires the Director of Social Services, in consultation with a committee of interested individuals chosen by the director, to appoint the ombudsperson for a term of 2 years.

This bill would instead provide that the ombudsperson shall be appointed for a term of 4 years, and would permit the director to reappoint the ombudsperson for consecutive terms.

This bill would expand the duties of the State Foster Care Ombudsperson to require him or her to compile and make available to the Legislature additional information, as specified, including the type and source of complaints received by the ombudsperson.

This bill would require the ombudsperson to present this data to various interested entities at appropriate child welfare conferences, forums, and other events, as determined by the department. This bill would state legislative intent that representatives of these interested entities consider this data in the development of any recommendations made toward improvements in the child welfare system.

This bill would also require the ombudsperson to make this information available to the public by posting it on his or her existing Web site.

This bill would incorporate additional changes in Section 16164 of the Welfare and Institutions Code proposed by AB 2651, to be operative only if AB 2651 and this bill are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

Ch. 1161 (AB 442) Committee on Budget. Health: budget trailer.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law requires, as a condition of a pharmacy's participation in the Medi-Cal program, the pharmacy to charge a price that does not exceed the Medi-Cal reimbursement rate for prescription medicines and an amount to cover electronic transmission charges by Medicare beneficiaries. Existing law requires the department to monitor pharmacy participation under these provisions, conduct a study of the adequacy of the Medi-Cal pharmacy reimbursement rates, and report the results of the study to the Legislature by July 1, 2002. Under existing law, these provisions are repealed as of January 1, 2003.

This bill would delete the repeal of these provisions, thereby extending the operation of these provisions indefinitely. The bill would delete the requirement of the department to report the results of the study by July 1, 2002.

Existing law provides for a school lunch program under which eligible pupils receive free or reduced price meals. Existing law, effective July 1, 2002, authorizes the incorporation into the school lunch program application packet, or notification of eligibility, various notifications to parents and guardians, including those with regard to the confidentiality of school lunch application information and its use for purposes of the Medi-Cal program.

This bill would change the effective date of the above notification provisions from July 1, 2002, to July 1, 2003. It would also revise the notifications that may be incorporated under this provision regarding the confidentiality of the school lunch application information and its use for purposes of the Medi-Cal program and would make related and technical changes.

Existing law provides for the regulation and licensure of health care service plans, administered by the Department of Managed Health Care. Existing law requires a health care service plan to reimburse the director for the actual cost of processing an application for licensure as a health care service plan and for a health care service plan's share of all costs and expenses reasonably incurred in the administration of these regulatory provisions. In addition, existing law authorizes the director, by notice on or before September 15, 2000, to require a health care service plan to pay an additional assessment to provide the department with sufficient revenues to support various costs and expenses for the 2000-01, 2001-02, and 2002-03 fiscal years.

This bill would require that notice for the additional assessment be provided each year, rather than on or before September 15, 2000. The bill would expressly require, if a health care plan fails to pay the additional assessment for the 2001-02 fiscal year, the assessment of the amount due for the 2001-02 fiscal year in the 2002-03 fiscal year, in addition to the amount due in the 2002-03 fiscal year.

Existing law establishes the Trauma Care Fund, effective August 10, 2001, which is continuously appropriated to the Emergency Medical Services Authority for purposes of allocating funds to local emergency medical services (EMS) agencies for certain trauma centers. Existing law requires the authority, within 30 days of the effective date of the

establishment of the fund and related provisions, to request all local EMS agencies with an approved trauma plan to submit specified information.

This bill, instead, would require the authority to request all local EMS agencies to submit this information within 30 days of the effective date of the enactment of an appropriation for purposes of implementing provisions relating to the Trauma Care Fund.

Existing law establishes the Toxic Mold Protection Act of 2002, which requires the State Department of Health Services to take specified steps related to reducing toxic mold exposure. The act declares that it shall be implemented only to the extent that the department determines that funds are available for its purposes.

This bill would authorize the department to receive voluntary contributions to support the department's activities pursuant to the act. It would establish the Public Health Protection from Indoor Mold Hazards Fund, a continuously appropriated fund, into which those contributions would be deposited for use by the department in implementing the act, thereby making an appropriation.

The existing California Statewide Supportive Housing Initiative Act requires the State Department of Mental Health to award grants to local government or private nonprofit agencies for services to a target population. The act requires the department to make all grant awards from funds allocated in the Budget Act of 2000 for the supportive housing initiative no later than June 30, 2002, and to expend the funds allocated for those grants no later than June 30, 2004.

This bill would revise this provision to require, instead, the department to make all grant awards from funds allocated in the Budget Act of 2001 for the supportive housing initiative no later than June 30, 2002, and to expend the funds allocated for those grants no later than June 30, 2005.

Existing law vests the State Department of Health Services with various powers, functions, and duties with respect to the administration and oversight of various health programs and facilities. Existing law requires that any adjudicative hearing that the department is authorized or required to conduct be conducted pursuant to the Administrative Procedure Act. The staff assigned to the hearing office of the State Department of Health Services is authorized to determine the time and place of an administrative adjudication hearing conducted pursuant to these procedures.

This bill would require that formal hearings requested by institutional Medi-Cal providers and health facilities be held in Sacramento and would authorize informal conferences concerning appeals by those entities to be held in Sacramento or Los Angeles.

Existing law provides for the allocation of state aid to the administrative bodies of qualifying local health departments according to a specified formula.

This bill would establish procedures and requirements to govern the allocation to, and expenditure by, local health jurisdictions of federal funding received for the prevention of, and response to, bioterrorist attacks and other public health emergencies.

The bill would provide that federal funding received by the State Department of Health Services for bioterrorism preparedness and emergency response is subject to appropriation in the annual Budget Act.

Existing law requires the State Department of Health Services to establish and administer the Cancer Research Program and authorizes the department to award grants under the program.

This bill would establish a maximum indirect cost rate that may be charged on any cancer research program grant awarded to any institution under these provisions.

Existing law requires the Director of Health Services to develop a list of drugs to be provided under a program for the treatment of persons infected with the human immunodeficiency virus (HIV) and requires manufacturers of drugs on the list to pay the department a rebate that is equal to the rebate that would apply to the drug under certain provisions of federal law.

This bill would require these manufacturers to pay an additional rebate to be negotiated by each manufacturer with the department.

Under existing law, the governing body of each county is required to establish a community child health and disability prevention program for the purpose of providing early and periodic assessments of the health status of children in the county.

This bill would require, commencing July 1, 2003, that all applications for services under the child health and disability prevention program be filed electronically as provided under the bill. The bill would define “child health and disability prevention provider” for purposes of the provisions concerning child health and disability prevention programs, and would make related changes.

Existing law requires the State Department of Health Services to conduct a community outreach and awareness campaign relative to a specified newborn hearing screening program and the value of early hearing testing.

This bill, instead, would authorize the department to conduct this outreach and awareness campaign.

Existing law requires the Maternal and Child Health Branch of the department to administer a comprehensive shelter-based services grant program to battered women’s shelters. In implementing the program, the department is required to consult with a designated advisory council that shall remain in existence until January 1, 2003.

This bill would provide that the advisory council shall remain in existence until January 1, 2006.

Existing law requires the department to charge a fee to all payers for any tests or activities performed pursuant to provisions relating to genetic disorder prevention services, including the Hereditary Disorders Act. Existing law requires that any fee charged for screening and followup services provided to Medi-Cal eligible persons, health care service plan enrollees, or persons covered by disability insurance policies be paid directly to the Genetic Disease Testing Fund, a continuously appropriated fund, to be used for purposes of the Hereditary Disorders Act.

This bill, commencing July 1, 2002, would recast these provisions to require, instead, the department to charge a fee to the hospital of birth or to families of a newborn, for births not occurring in a hospital, for newborn screening and followup services. The bill would require that payments pursuant to this provision be made to the Genetic Disease Testing Fund. The bill would prohibit the department from charging or billing Medi-Cal beneficiaries for services provided under these provisions relating to genetic disorder prevention services.

Existing law requires the State Department of Health Services to establish and administer a program for the medical care of persons with genetically handicapping conditions.

This bill would provide that the department is considered to be the purchaser, but not the dispenser or distributor, of blood factor products, under the Genetically Handicapped Person’s Program.

Existing law requires that all health facilities, except those owned and operated by the state, be charged each year a designated fee established, in accordance with certain requirements, by the Office of Statewide Health Planning and Development to pay for certain functions required to be performed by the office.

This bill would authorize the State Department of Health Services to expend \$200,000 of the fees collected pursuant to this provision for use in the 2002–03 fiscal year for data collection on, analysis of, and reporting on, maternal and perinatal outcomes, if funds are appropriated in the Budget Act of 2002 for that purpose.

Existing law establishes the Healthy Families Program, administered by the Managed Risk Medical Insurance Board, to arrange for the provision of health services to eligible children, and defines “family contribution sponsor” for purposes of these provisions.

This bill would revise the definition of family contribution sponsor.

Existing law provides for reimbursement to providers participating in the Healthy Families Program for certain services provided up to 90 days prior to the effective date of coverage under the program.

This bill would repeal these reimbursement provisions and would require instead, effective April 1, 2003, the board, in consultation with the State Department of Health Services, to implement a preenrollment program into the Healthy Families Program or the Medi-Cal program. The bill would authorize the board to adopt emergency regulations to implement this preenrollment program. The bill would make various other changes in program requirements related to family contributions, disenrollment, and eligibility to participate in the program.

Existing law establishes the Healthy Families-to-Medi-Cal Bridge Benefits Program to provide any person enrolled for coverage under the Healthy Families Program who meets certain criteria with a two calendar-month period of health care benefits in order to provide the person with the opportunity to apply for Medi-Cal. Existing law authorizes the implementation of this program only if a specified State Children's Health Insurance Program waiver is approved, and at the time the waiver is implemented.

This bill would delete this waiver restriction on implementation of the Healthy Families-to-Medi-Cal Bridge Benefits Program.

Existing law requires the State Department of Social Services to establish a foster care rate for each community treatment facility program, and requires for the 2001-02 fiscal year that a community treatment facility program be paid a community treatment facility supplemental rate. Subject to the availability of funds, this payment is required to be shared by the state and the counties.

This bill would extend to the 2002-03 fiscal year the requirement that the supplemental rate be paid.

Existing law requires the Director of Mental Health to award matching grants to local educational agencies to pay the state share of the costs of providing programs that provide school-based early mental health intervention and prevention services to eligible pupils at schoolsites of eligible pupils, based on certain priorities and specifications.

This bill would revise these priorities and specifications.

Existing law states the intent of the Legislature relating to the transition process of persons with developmental disabilities from a developmental center to a community living arrangement through the development of an individual program plan process.

This bill would require the State Department of Developmental Services to establish policies and procedures for the development by regional centers of an annual community placement plan, would require the department to review the plans, and would authorize the department to make allocations to regional centers to develop the plans. It would also require, until July 1, 2004, a regional center to take specified actions upon the department's determination of the amount of unallocated reduction in the regional center's purchase of service budget.

The bill also would specify additional requirements for the State Department of Developmental Services, developmental centers, and regional resource development projects pertaining to the coordination of efforts among those entities, the provision of services to consumers, and the collection and availability of data.

Existing law provides for the provision of services to persons with developmental disabilities by regional centers, pursuant to contracts with the State Department of Developmental Services. Existing law imposes various requirements on the department and the regional centers with respect to these contracts.

The bill would provide that any contract between the department and a regional center entered into on and after January 1, 2003, shall require that all employment contracts entered into with regional center staff or contractors be available to the public for review, except with respect to the social security number of the contracting party. It would also prohibit any

employment contract, or portion thereof, from being deemed confidential or unavailable for public review.

Existing law requires that a regional center perform initial intake, including deciding whether to provide assessment, within 15 days following a request for assistance. Existing law requires that if assessment is needed, the assessment shall be performed within 60 days following the initial intake.

This bill, instead, would require, before July 1, 2003, that the assessment be performed within 120 days following initial intake, and on or after July 1, 2003, that the time limit for performing the assessment be within 60 days following initial intake.

Existing law requires the development of an individual program plan for an individual with developmental disabilities eligible for regional center services. Existing law requires the State Department of Developmental Services to annually review a random sample of individual program plans at each regional center.

This bill, instead, would require a biennial review by the department pursuant to this provision.

The bill, with certain exceptions, would prohibit, for the 2002–03 fiscal year only, a regional center from expending any purchase of service funds for the startup of any new program unless certain conditions exist.

Existing law requires the State Department of Developmental Services to coordinate, or require each regional center to coordinate, a meeting within each regional center catchment area between the regional center, the local health facility providers, the State Department of Health Services representatives from the local district office, and the State Department of Developmental Services center staff for purposes of better coordinating services and supports provided to regional center consumers in licensed health facilities.

This bill would repeal this requirement.

Existing law authorizes the State Department of Developmental Services to allocate funds appropriated in a specified item of the Budget Act of 2000 to county mental health programs that meet programmatic goals and model adult system of care programs to the satisfaction of the department or for Children's System of Care programming.

This bill, instead, would authorize the department to allocate funds appropriated in a specified item of the annual Budget Act for these purposes.

Under the Children's Mental Health Services Act, the State Department of Mental Health is authorized to enter into annual performance contracts with participating counties, known as system of care counties, for the delivery of mental health services to seriously emotionally disturbed children. Existing law requires the department to provide participating counties with a contract with an independent evaluator to measure performance outcomes and provide technical assistance to the state and counties and provide training, consultation, and technical assistance for county applicants and participants.

This bill would eliminate the requirement that the department provide the above-described independent evaluator and the training, consultation, and technical assistance, and would require instead that the department provide technical assistance related to system evaluation. The bill would make related changes.

Existing federal law requires that California's state plan for medical assistance under the medicaid program, known as the Medi-Cal program, provide for entering into cooperative arrangements with the state agencies responsible for the administration of health services and vocational rehabilitation services in the state looking toward maximum utilization of these services in the provision of medical assistance under the plan.

This bill would provide, notwithstanding any other provision of law, upon additional funds being appropriated and budgeted for the support of the services identified within the scope of work of an agreement of the type specified under federal law and previously entered into by the State Department of Health Services, the amount of the encumbrance in such an agreement shall be amended, by operation of law, to reflect the newly appropriated and budgeted funds. It would also provide that once an agreement is entered into by the

department, the agreement shall continue in effect indefinitely and need not be amended unless the department changes the scope of work to be provided under the agreement.

Under existing law, the Medi-Cal program is administered by the State Department of Health Services.

This bill would authorize the Director of Health Services, on a regional pilot project basis, to enter into contracts with one or more nonprofit organizations to perform the functions of the department's Office of the Ombudsman, with services provided by the ombudsman to be made available to any person who may be eligible for, or who is receiving, benefits under the Medi-Cal program.

Existing law provides that any child who is less than 6 years of age and who has been determined to be eligible for free meals under the National School Lunch Program has met the income eligibility requirements for participation in the Medi-Cal program, without a share of cost.

This bill would revise this provision to replace the reference to income eligibility requirements with income documentation requirements and would make conforming changes.

Existing law, effective July 1, 2002, requires each county to participate in a statewide pilot project to grant Medi-Cal program eligibility to, and enroll in the Medi-Cal program, any child under 6 years of age enrolled in school and eligible for free meals under the National School Lunch Program.

This bill would change the effective date of this and related provisions from July 1, 2002, to July 1, 2003. It would also revise this provision to require each county, instead, to determine Medi-Cal program eligibility for any child described above, and would authorize the department to exercise a specified federal option for eligibility determinations.

Existing law requires the State Department of Health Services to exercise certain options provided under federal law to implement a program for accelerated enrollment of children in the Medi-Cal program.

This bill would require a county, upon receipt of an application for a child who has accelerated enrollment coverage under this program, to determine whether the child is eligible for Medi-Cal benefits and to report this finding to the medical eligibility data system. The bill would provide that this provision shall become operative on July 1, 2002, or the date that the program of accelerated enrollment coverage for children takes effect, whichever is later.

This bill would require the State Department of Health Services and the Managed Risk Medical Insurance Board to exercise certain options provided under federal law to implement a program for preenrollment of children into the Medi-Cal program and the Healthy Families Program. The bill would require the department to develop an electronic application before July 1, 2003, to serve as the application for preenrollment into the Medi-Cal program or the Healthy Families Program and to also serve as an application for the Child Health and Disability Prevention program. The bill would specify requirements for the processing of the electronic application.

The bill would provide for the termination within a designated time of benefits provided to an individual pursuant to a preliminary determination under Medi-Cal as described under federal law, unless an application for medical assistance under the state plan is filed.

The bill would require the State Department of Health Services, on or before October 1, 2002, to issue instructions to all counties to establish an automated system for tracking the status of applications received by county welfare departments from the centralized processing entity, which screens applications for eligibility benefits under the Medi-Cal program and forwards the applications to the appropriate county.

Existing law provides that a beneficiary or any person on behalf of the beneficiary who has paid for health care services otherwise covered by the Medi-Cal program received by the beneficiary shall be entitled to a return from the provider of any part of the payment that meets

specified requirements. Existing law also provides for the Medi-Cal reimbursement of a provider upon submission of proof of eligibility.

This bill would require the State Department of Health Services, to the extent permitted by federal law, to waive overpayments made to a pharmacy provider that would otherwise be reimbursable to the department for prescription drugs returned to the pharmacy provider from a nursing facility upon discontinuation of the drug therapy or death of the beneficiary.

Under existing law, for purposes of the Medi-Cal program, "medically needy person" is defined to include, among other described persons, until October 1, 2002, a child who is eligible to receive Medi-Cal benefits under an interstate agreement for adoption assistance and related services and benefits to the extent federal financial participation is available.

This bill would delete reference to October 1, 2002, and thereby include the above-described child within the definition of a medically needy person indefinitely.

Existing law requires the county in which a person resides to determine a person's eligibility for Medi-Cal benefits and continued eligibility.

To the extent this bill would increase the counties' responsibilities for eligibility determination, it would impose a state-mandated local program.

Existing law creates the Medi-Cal Medical Education Supplemental Payment Fund, and the Large Teaching Emphasis Hospital and Children's Hospital Medi-Cal Medical Education Supplemental Payment Fund, in the State Treasury as continuously appropriated funds, which consist of various moneys for use by public agencies for health care programs or purposes. Under existing law, these provisions become inoperative on July 1, 2002, and as of January 1, 2003, are repealed.

This bill would extend the inoperative dates to July 1, 2004, and the repeal dates to January 1, 2005. By extending the operation of continuously appropriated funds, this bill would result in an appropriation.

Existing law authorizes the State Department of Health Services to require that a provider receive prior authorization before providing Medi-Cal services when it is determined that the provider has been rendering unnecessary services.

This bill would authorize the department to contract for staff to accomplish treatment authorization request reviews and to carry out contracting activity with manufacturers of single-source drugs.

Existing law requires the State Department of Health Services to administer various health programs, including the California Children's Services Program, Genetically Handicapped Person's Program, Breast and Cervical Cancer Early Detection Program, State-Only Family Planning Program, and Family Planning, Access, Care, and Treatment (Family PACT) Waiver Program.

This bill would require that provider rates of payment for services rendered in all of these programs be identical to the rates of payment for the same service performed by the same provider type pursuant to the Medi-Cal program, would authorize the director to identify, by regulation, other programs that would be subject to this requirement, and would authorize reimbursement at rates greater than the Medi-Cal rate if provided by regulation of the director.

Existing law under the Medi-Cal program prohibits the allowable markup payable for the dispensing of medical supplies by assistive device and sickroom supply dealers and pharmacies from exceeding 25% of the cost of the item dispensed, as defined by the department.

This bill would prohibit the allowable markup payable for these supplies from exceeding 23% of the cost of the item dispensed. It would also prohibit payment for diabetic testing supplies from exceeding the cost of the item dispensed, as defined by the department, plus a fee equal to the maximum professional fee component used in the payment for legend generic drug types.

Existing law provides that certain contracts entered into by the department on a bid or negotiated basis for drugs, product-type health services, and clinical laboratory services

under the Medi-Cal program have no force and effect unless approved by the Department of Finance. Existing law exempts these contracts from certain requirements under the Public Contract Code, including a requirement of approval by the Department of General Services.

This bill would delete the requirement that these contracts be approved by the Department of Finance, would provide for additional exemptions from various requirements under the Public Contract Code and the Government Code, and would make related changes.

Existing law authorizes the State Department of Health Services to contract with less than all manufacturers or clinical laboratories including only one manufacturer or clinical laboratory, on a bid or nonbid basis.

This bill would delete this authorization and would require the department to take specified actions for purposes of implementing certain contracting provisions.

Existing law authorizes the State Department of Health Services to enter into contracts with manufacturers of single-source and multiple-source drugs on a bid or nonbid basis pursuant to specified procedures and to maintain a list of contract drugs. Under existing law, these provisions are repealed as of January 1, 2003, and replaced with alternative provisions implementing the Medi-Cal drug formulary program.

This bill would delete the repeal of these provisions, thereby extending the authority of the department to enter into the above-described contracts indefinitely. The bill would repeal the alternative provisions related to the implementation of the Medi-Cal drug formulary program.

Existing law provides for various increases to the reimbursement to pharmacists for all drug prescription claims reimbursed through the Medi-Cal program.

This bill, until July 1, 2004, would require the department to reduce reimbursement to pharmacists in the amount reimbursement was increased pursuant to these provisions with respect to pharmacy services rendered on and after the date that this bill is enacted, and would exempt claims submitted by pharmacists for beneficiaries in a nursing facility.

Existing law provides that if certain conditions are met, a new drug designated as having an important therapeutic gain and approved for marketing by the federal Food and Drug Administration shall be immediately included on the list of contract drugs for 3 years.

This bill would delete this provision.

Existing law permits any drug suspended from the list of contract drugs for at least 12 months to be deleted from the list of contract drugs.

This bill would remove the 12-month time period as a condition prior to deletion of a drug from the list of contract drugs. It would also establish a list of preferred prior authorization drugs as a subset of the list of contract drugs and would permit a manufacturer of a drug deleted from, or not added to, the list of contract drugs to request inclusion on that list.

Existing law specifies conditions under which certain drugs for use in the treatment of acquired immune deficiency syndrome (AIDS) or an AIDS-related condition or cancer are deemed approved for addition to the Medi-Cal list of contract drugs or considered a Medi-Cal benefit.

This bill would require, commencing July 1, 2002, all pharmaceutical manufacturers to provide to the State Department of Health Services a state rebate in addition to rebates pursuant to other provisions of state or federal laws for any drug products that have been added to the Medi-Cal list of contract drugs pursuant to the above described provisions related to drugs used to treat AIDS and cancer. This provision would become inoperative on July 1, 2005, and would be repealed on January 1, 2006.

Existing law requires the State Department of Health Services to establish a list of Maximum Allowable Ingredient Costs (MAIC) for drugs based on reference to certain drug brands.

This bill would revise the basis for establishing the list of MAIC for drugs. The bill would require the department to update MAICs at least every 2 months and to establish the estimated acquisition cost, as defined, of legend and nonlegend drugs, as defined. The bill would also require the department to establish a list of medical supplies, including utilization

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

controls applied to each medical supply product, and a list of Maximum Allowable Product Costs (MAPC) for medical supplies. The bill would require the department to repeal certain regulations related to medical supplies.

This bill would authorize the State Department of Health Services to enter into contracts with manufacturers of enteral formulae that can be used as a therapeutic regimen to prevent serious disability or death in patients with medically diagnosed conditions that preclude the full use of regular food. The bill would require the department to maintain a list of those products for which contracts have been executed.

Existing law provides for the establishment of provider reimbursement rates for incontinence medical supplies covered by the Medi-Cal program.

This bill would revise the method for determining the reimbursement rate.

Under the Medi-Cal program, specified medical benefits are provided to public assistance recipients and certain other low-income persons.

This bill would include the purchase of prescribed enteral formulae and diabetic testing supplies as a covered benefit subject to utilization controls. It would also revise the covered benefits related to dental care.

Existing law requires the State Department of Health Services to develop a federal waiver program to test the efficacy of providing an assisted living benefit to beneficiaries under the Medi-Cal program. Existing law prohibits the department from implementing the waiver program developed under this provision if the program will result in additional costs to the state.

This bill, instead, would prohibit the department from implementing the waiver program if the benefits provided pursuant to the program will result in additional costs to the Medi-Cal program.

Under existing law, certain telemedicine services are reimbursable under the Medi-Cal program.

This bill would require the State Department of Health Services to allow psychiatrists to receive fee-for-service Medi-Cal reimbursement for services provided through telemedicine until June 30, 2004, or until a method for reimbursement is developed, as provided.

Existing law specifies procedures under which personal care services meeting certain conditions, when provided to a categorically needy person, as defined, are a covered Medi-Cal benefit to the extent federal financial participation is available. Under existing law, these provisions become inoperative on July 1, 2002, and as of January 1, 2003, are repealed.

This bill would delete the inoperative and repeal dates, thereby extending these Medi-Cal benefit coverage provisions indefinitely.

Existing law specifies procedures for the monthly advancement of state funds to counties for costs of administration of the Medi-Cal program.

This bill would require, within 60 calendar days of the date that the annual Budget Act is chaptered, the State Department of Health Services to notify the chairpersons of the fiscal committees of each house of the Legislature, the Chairperson and the Vice Chairperson of the Joint Legislative Budget Committee, and appropriate county representatives if the department plans to withhold and not allocate any of the baseline allocation for county Medi-Cal eligibility activities that are appropriated for Medi-Cal administration.

Under existing law, the Medi-Cal program provides for a special methodology of reimbursement of disproportionate share hospitals for the provision of inpatient hospital services. Existing law establishes the Medi-Cal Inpatient Payment Adjustment Fund in the State Treasury, as a continuously appropriated fund, to be used as the source for the nonfederal share of payments to disproportionate share hospitals. Existing law transfers \$29,757,690 from the fund to the Health Care Deposit Fund for the 2000–01 fiscal year and each fiscal year thereafter.

This bill would transfer \$85,000,000 to the Health Care Deposit Fund for the 2002–03 fiscal year and each fiscal year thereafter. Because the Health Care Deposit Fund is continuously appropriated, this bill would make an appropriation.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law requires the State Department of Health Services to establish a pilot program to provide continuous skilled nursing care as a benefit of the Medi-Cal program when those services are provided in accordance with an approved federal waiver meeting certain requirements. Existing law repeals this provision as of January 1, 2003.

This bill would extend the repeal date of the provision from January 1, 2003, to January 1, 2006.

Existing law authorizes the board of supervisors of a county that contracted with the State Department of Health Services pursuant to a specified provision of law during the 1990–91 fiscal year and any county with a population under 300,000, as determined in accordance with the 1990 decennial census, to elect to participate in the County Medical Services Program (CMSP) for the state administration of health care services to eligible persons in the county. Existing law specifies a formula under which counties and the state share the risk for cost increases of the CMSP not funded through other sources.

This bill would revise this formula.

Existing law authorizes, until January 1, 2003, a county to establish a County Medical Services Program Governing Board, with a specified membership, to administer the CMSP.

This bill would extend the operation of these provisions until January 1, 2008.

Existing law requires that the contract between the State Department of Health Services and the County Medical Services Program Governing Board require that the state provide a designated minimum level of administrative support to the CMSP.

This bill would require, instead, that the County Medical Services Program Governing Board reimburse up to \$3,500,000 for the state costs of providing administrative support to the CMSP.

Existing law establishes the County Medical Services Program Account in the County Health Services Fund, which is continuously appropriated, and specifies the purposes for which moneys in the account may be used.

This bill would provide that moneys in the account also may be used to reimburse the State Department of Health Services for state costs of providing administrative support to the CMSP, thereby making an appropriation.

Existing law requires the State Department of Health Services, in conjunction with the State Department of Social Services, to implement a simplified eligibility process as part of the Food Stamp program to expedite Medi-Cal program and Healthy Families Program enrollment.

This bill, instead, would provide that these provisions shall be implemented on and after July 1, 2003, but only if and to the extent that federal financial participation is available.

This bill would authorize the State Department of Health Services to adopt emergency regulations to implement the applicable provisions of this bill in accordance with the rulemaking provisions of the Administrative Procedure Act.

The bill would prohibit the State Department of Health Services from recouping any overpayment made to a provider before October 1, 2002, under a specified provision of the Medi-Cal Act for ambulance transport services, if the overpayment is not due to the fault of the provider. It would also add to the requirements of the State Department of Health Services with regard to completing the design and implementation of the Children's Medical Services Network (CMS Net).

The bill would require the California Health and Human Services Agency to develop a comprehensive plan that responds to the decision of the United States Supreme Court in *Olmstead v. L.C.* and that describes the actions that California may take to improve its long-term care system so that its residents have available an array of community care options that allow them to avoid unnecessary institutionalization.

This bill would specify requirements of the State Department of Developmental Services related to the use of funds appropriated in Item 4300-101-0001 of the Budget Act of 2002 pertaining to regional centers.

The bill would provide that of the amounts appropriated in Item 4260-111-0001 of the Budget Act of 2002 from the Hospital Services Account, the Physician Services Account, and the Unallocated Account in the Cigarette and Tobacco Products Surtax Fund, \$24,803,000 shall be administered and allocated for the 2002–03 fiscal year, as provided in the bill, for distribution through the California Healthcare for Indigents Program and the rural health services program.

The bill would provide that the unencumbered balances of the amounts appropriated in Item 4260-001-0589 of Chapter 50 of the Statutes of 1999, Item 4260-001-0589 of Chapter 52 of the Statutes of 2000, and Item 4260-001-0589 of Chapter 106 of the Statutes of 2001 are reappropriated and shall be available for encumbrance and expenditure until July 30, 2005, thereby making an appropriation.

This bill, in order to implement changes in the level of funding for Medi-Cal services in the Budget Act of 2002, would require the Director of Health Services to eliminate, with specified exceptions, all provider rate increases that were provided, effective August 1, 2000, for services rendered in the Medi-Cal program. The bill would define “provider” for purposes of this requirement.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1162 (AB 551) Papan. Industrial banks: acquisition.

Existing law provides for the regulation of financial institutions, including industrial banks, by the Commissioner of Financial Institutions and by various federal agencies.

This bill would prohibit a person, except as specified, from acquiring control of an industrial bank unless the person is engaged only in the activities that are permitted for a financial holding company as provided in federal law, or the person is a credit union when the industrial bank is a credit union service organization as provided in state law.

Ch. 1163 (AB 1634) Chan. Nutrition education.<sup>9</sup>

Existing law requires the State Department of Education to develop a summary of state law and regulations pertaining to nutrition and physical activity.

This bill would require the State Department of Education to incorporate nutrition education curriculum content into the health curriculum framework at its next revision.

This bill would, commencing July 1, 2004, require the State Department of Education to make competitive grants available for school districts and county offices of education to start up or expand instructional school gardens and school garden salad bars with a compost program.

This bill would appropriate \$200,000 from the United States Department of Agriculture Specialty Crop Block Grant in the Federal Trust Fund to the department, pursuant to a prescribed schedule, for the purposes of providing these grants.

Ch. 1164 (AB 3006) Committee on Budget. Health: Medi-Cal: provider rate increases.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Assembly Bill 442 of the 2001–02 Regular Session, among other things, proposes to add provisions that would require, in order to implement changes in the level of funding for Medi-Cal services in the Budget Act of 2002, the Director of Health Services to eliminate, with specified exceptions, all provider rate increases that were provided, effective August 1, 2000, for services rendered in the Medi-Cal program. The bill would define “provider” for purposes of this requirement.

This bill would repeal the above provisions, contingent on the enactment of AB 442.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1165 (SB 1045) Polanco. Public employment and contracting.

Existing provisions of the California Constitution prohibit discrimination or preferential treatment based on race, ethnicity, and gender in the operation of public employment, public education, and public contracting.

This bill would declare the intent of the Legislature to reaffirm diversity as a public policy goal in public employment and public contracting. The bill would authorize governmental agencies to engage in various general recruitment and outreach programs and focused outreach activities to increase diversity in public employment and public contracting. The bill would require each state department or agency awarding a contract or procuring goods or services, and would authorize each local agency receiving state funds, to collect information and report annually to the Governor and the Legislature on the participation level of minority, women, and disabled veteran-owned business enterprises in these contract and procurement activities.

Ch. 1166 (SB 1868) Torlakson. Physical education.

(1) Under existing law, the State Department of Education is required to adopt rules and regulations that it deems necessary and proper to secure the establishment of courses in physical education in the elementary and secondary schools and to compile or cause to be compiled and printed a manual in physical education for distribution to teachers in the public schools of the state.

This bill would require the department to encourage school districts offering instruction in kindergarten and any of grades 1 to 12, inclusive, to the extent that resources are available, to provide quality physical education that develops the knowledge, attitudes, skills, behavior, and motivation needed to be physically active for life, as specified.

(2) Existing law authorizes the governing board of a school district or the county superintendent of schools to grant an exemption to a consenting pupil from courses in physical education for 2 years during grades 10 to 12, inclusive. Existing law requires the governing board of a school district maintaining any of grades 5, 7, and 9 to administer to each pupil a physical performance test designated by the State Board of Education.

This bill would permit the exemption only if the pupil has passed the designated physical performance test administered in the 9th grade.

This bill would require that pupils be provided with the individual results after completing the physical performance testing, thereby imposing a state-mandated local program.

This bill would authorize the governing board of a school district to also administer to pupils in grades 10 to 12, inclusive, the designated physical performance test required in 9th grade and would make a pupil who passes the test in any of grades 10 to 12, inclusive, eligible for an exemption from courses in physical education, as specified.

(3) Existing law, the Classroom Instructional Improvement and Accountability Act, requires each school district that maintains an elementary or secondary school to develop and implement a School Accountability Report Card, as prescribed. The act prohibits any change except to further its purposes by a bill passed by a vote of  $\frac{2}{3}$  of the membership of both houses of the Legislature and signed by the Governor.

This bill would require the governing board to report the aggregate results of its physical performance testing in its annual school accountability report card, and would declare that

this bill furthers the purposes of the act. By requiring this information to be included within the school accountability report card, this bill would impose a state-mandated local program.

(4) Existing law, the Public Schools Accountability Act of 1999, requires the Superintendent of Public Instruction, with the approval of the State Board of Education, to develop an Academic Performance Index (API) to measure the performance of schools. Based on the API, the Superintendent of Public Instruction is required to develop, and the State Board of Education to adopt, expected annual percentage growth targets for all schools based on their API baseline score. The act contains a High Achieving/Improving Schools Program to provide monetary and nonmonetary awards to schools that meet or exceed API growth targets, and allows, in addition to, or in substitution of monetary awards, the Superintendent of Public Instruction to establish nonmonetary awards that may include, but are not limited to, classification as a distinguished school, as specified.

This bill would also authorize the Superintendent of Public Instruction, in addition to any other criteria that are used to determine whether a school shall be classified as a distinguished school, for purposes of the High Achieving/Improving Schools Program, to consider a school's performance on the physical performance tests of its pupils, as specified.

(5) This bill would incorporate additional changes to Section 52057 of the Education Code, proposed by AB 741, to be operative only if this bill and AB 741 are both enacted and become effective on or before January 1, 2003, and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1167 (AB 2781) Oropeza. Education finance. <sup>10</sup>

(1) Existing law, until January 1, 2003, establishes the Educational Telecommunication Fund in order for the governing board of the County Office Fiscal Crisis and Management Assistance Team to carry out its responsibilities regarding the establishment of telecommunications standards to support the efficient sharing of school business and administrative information.

This bill would change the date upon which the Educational Telecommunication Fund becomes inoperative to January 1, 2004.

(2) Existing law requires, for the 1990–91 fiscal year and each fiscal year thereafter, that moneys to be applied by the state for the support of school districts and community college districts be distributed in accordance with certain calculations. This provision does not apply to the fiscal years between the 1992–93 fiscal year and the 2001–02 fiscal year, inclusive.

This bill would, instead, make this provision inapplicable to the fiscal years between the 1992–93 fiscal year and the 2002–03 fiscal year, inclusive.

(3) Existing law requires the county superintendent of schools to adjust the total revenue limit for each school district in the jurisdiction of the county superintendent of schools by the amount of increased or decreased employer contributions to the Public Employees' Retirement System (PERS) and sets forth a method for calculating that amount for the 1995–96 fiscal year and each fiscal year thereafter. Existing law provides that funding appropriated in the Budget Act of 2001, or legislation amending that act, for the purpose of limiting reductions to revenue limits for the 2001–02 fiscal year is to be allocated on a one-time basis. Existing law appropriates \$35,000,000 from the General Fund to Section A of the State School Fund for purposes of limiting the reductions to revenue limits for the 2003–04 fiscal year and limits reductions to revenue limits for the 2004–05 fiscal year and

each fiscal year thereafter to \$35,000,000 increased annually by cost-of-living adjustments, as specified.

This bill would provide that funding appropriated in the Budget Act of 2002 for the purpose of limiting reductions to revenue limits for the 2002–03 fiscal year is to be allocated on a one-time basis and that total allocations for this purpose may not exceed \$36,000,000.

(4) Existing law requires the Superintendent of Public Instruction to compute an equalization adjustment for the 2001–02 fiscal year for each school district, so that no district's prior year base revenue limit per unit of average daily attendance is less than the prior year base revenue limit per unit of average daily attendance above which fall not more than 10% of the total statewide units of average daily attendance for the appropriate size and type of district.

This bill would require the superintendent also to compute an equalization adjustment for the 2002–03 fiscal year, so that no district's prior year adjusted base revenue limit per unit of average daily attendance is less than the prior year adjusted base revenue limit above which fall not more than 10% of the total statewide units of average daily attendance for the appropriate size and type of district.

(5) Existing law, the Fairness in Education Funding Act, requires the Superintendent of Public Instruction to compute an equalization adjustment for the 2003–04 fiscal year for each school district, so that no district's prior year base revenue limit per unit of average daily attendance is less than the prior year base revenue limit per unit of average daily attendance above which fall not more than 10% of the total statewide units of average daily attendance for the appropriate size and type of district.

This bill would require the superintendent to also compute an equalization adjustment for the 2003–04 fiscal year, so that no district's prior year adjusted base revenue limit per unit of average daily attendance is less than the prior year adjusted base revenue limit above which fall not more than 8.25% of the total statewide units of average daily attendance for the appropriate size and type of district. The bill would provide a formula for calculating the adjusted base revenue limit and would require the average daily attendance of a charter school to be included in calculating the size of, and target amounts for, a school district that is a chartering agency.

(6) This bill would provide that if the appropriations made for purposes of the equalization adjustments are insufficient to provide funding equal to the amounts computed by the equalization formulas, the amounts appropriated shall be allocated to school districts on a pro rata basis.

(7) This bill would appropriate \$406,000,000 from the General Fund to the Superintendent of Public Instruction for the 2003–04 fiscal year, pursuant to a schedule, for purposes of the equalization adjustments, to be allocated to school districts on a pro rata basis.

The bill would require the appropriation to be included in the amounts appropriated by the state in the 2003–04 fiscal year for purposes of meeting the state's minimum funding obligation to school districts and community college districts under Section 8 of Article XVI of the California Constitution for that fiscal year.

(8) Existing law authorizes the governing board of a school district to terminate the services of certificated employees during the time period between 5 days after the enactment of the Budget Act and August 15 of the fiscal year to which the Budget Act applies, according to a schedule of notice and hearing adopted by the governing board, if the district determines that its revenue limit has not increased by 2% more and it is necessary, therefore, to decrease the district's permanent employees.

This bill would make this provision inoperative from July 1, 2002, to July 1, 2003, inclusive.

(9) Existing law establishes, until July 1, 2006, the Principal Training Program to provide incentive funding to provide schoolsite administrators with instruction and training and requires<sup>1</sup>/<sub>3</sub> of a local education agency's schoolsite administrators be trained in each of the 3 years of program implementation.

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would instead require that 50% of the schoolsite administrators be trained in each of the 2002–03 and 2003–04 fiscal years.

(10) Existing law requires the Director of Finance to make certain computations annually regarding charter school block grant funding and to provide that information as part of the May revision to the Governor’s Budget.

This bill would instead require the Director of Finance to make that computation, as specified, and provide that information to the Superintendent of Public Instruction within 30 days of the enactment of the annual Budget Act.

(11) Existing law establishes the Kindergarten Readiness Pilot Program, to be implemented in the 2002–03 school year, and requires a participating school district to offer admission to 1st grade at the beginning of the school year, or at a later time in the same school year, only to children who will have their 6th birthday on or before September 1 of that school year.

This bill would delay the implementation of that program until the 2003–04 school year and make conforming changes.

(12) Existing law establishes the Digital High School Education Technology Grant Program to provide one-time installation grants and ongoing technology support and staff training grants to school districts and county offices of education for projects at high schools. Existing law requires the Superintendent of Public Instruction, commencing in the second fiscal year following the year in which a high school receives a technology installation grant and upon certification of completion of the installation project, to allocate to each high school an annual technology support and staff training grant.

This bill would specify that technology support and staff training grants would not be provided to school districts and county offices of education for the 2002–03 fiscal year and would prohibit the Superintendent of Public Instruction from allocating those grants for the 2002–03 fiscal year. The bill would state the intent of the Legislature that the funding that would otherwise have been provided for the 2002–03 fiscal year be provided in the 2003–04 fiscal year.

(13) Existing law requires the Secretary for Education to contract for development and establishment of a public involvement campaign to inform Californians that promoting reading in the public schools as a key to success in life is the responsibility of all Californians.

This bill would make the provision subject to funding being appropriated in the annual Budget Act for this purpose.

(14) Existing law establishes the Targeted Instructional Improvement Grant Program and requires the amount of a school district’s grant to be adjusted for inflation.

This bill would provide that commencing with the 2001–02 fiscal year, and each fiscal year thereafter, the total amount a school district shall receive in any fiscal year is at a minimum the same total amount it received in the 2000–01 fiscal year adjusted annually for inflation.

(15) Existing law combines the funding for court-ordered desegregation programs and for voluntary integration programs in the Targeted Instructional Improvement Grant Program and calculates a per pupil amount of funding for school districts based on the amounts received in the 2000–01 fiscal year for court-ordered desegregation and voluntary integration claims.

This bill would require the Superintendent of Public Instruction, commencing with the 2001–02 fiscal year, to calculate an apportionment of state funds for a basic aid district that was entitled to reimbursement pursuant to repealed provisions regarding court-ordered voluntary pupil transfer programs and that received an apportionment under the repealed provisions because a court order directs pupils to transfer to that district as part of the court-ordered voluntary pupil transfer program. The amount of the apportionment would be 70% of the district revenue limit that would have been apportioned to the school district from which the pupils were transferred.

(16) Existing law requires the Superintendent of Public Instruction, for purposes of calculating funding for each special education local plan area, to determine the statewide total average daily attendance for the 2000–01 fiscal year, to increase the amount per unit of average daily attendance for the 2001–02 fiscal year by a specified quotient, and to increase the statewide target per unit of average daily attendance for the 2001–02 fiscal year, as provided.

This bill would require that determination and those increases also to be made for the 2001–02 and 2002–03 fiscal years, respectively, and would make conforming changes.

(17) Existing law establishes the Governor’s Teaching Fellowships Program and provides, beginning in the 2001–02 fiscal year, for 1,000 nonrenewable graduate teaching fellowships to be awarded annually in the amount of \$20,000 each.

This bill would provide that commencing with the 2002–03 fiscal year and each fiscal year thereafter, the number of fellowships awarded shall be determined pursuant to an appropriation in the annual Budget Act for this purpose.

(18) Existing law establishes, until July 1, 2005, the Mathematics and Reading Professional Development Program, under which a local education agency, as defined, receives incentive funding to provide training in mathematics and reading to teachers and also to provide training to instructional aides and paraprofessionals, as defined, who directly assist with classroom instruction in mathematics and reading, through professional development programs conducted by institutions of higher education or an approved provider of training.

This bill would extend the program until July 1, 2006, and would reduce the number of teachers, instructional aides, and paraprofessionals for whom a local education agency may receive an incentive award.

(19) Under existing law, a local agency may not be required to implement or give effect to any statute or executive order during any fiscal year and for the period immediately following that fiscal year for which the Budget Act has not been enacted for the subsequent fiscal year if specified conditions are met. Existing law excepts from that provision, any state-mandated local program for which reimbursement funding counts toward the minimum General Fund requirements of Section 8 of Article XVI of the California Constitution.

This bill would specify that a school district may not be required to implement or give effect to the School Bus Safety II mandate statutes and the School Crimes Reporting II mandate statutes if certain conditions are met.

(20) Existing law, the Bronzan-McCorquodale Act, organizes and finances community mental health services for the mentally disordered in every county through locally administered and locally controlled community mental health programs and states the intent of the Legislature that certain funding provisions related to financing community mental health services not affect the responsibilities to fund psychotherapy and other mental health services for handicapped and disabled pupils that are required by law.

This bill would prohibit the funding provisions related to financing community mental health services from affecting the responsibility of the state to fund psychotherapy and other mental health services for handicapped and disabled pupils required by law and would require the state to reimburse counties for all allowable costs incurred by counties in providing those services to handicapped and disabled pupils. The bill would require the state to provide reimbursement for those services through an appropriation included in either the annual Budget Act or other statute. The bill would provide that counties are not required to provide any share of those costs or to fund the cost of any part of these services with money received from the Local Revenue Fund for reimbursement claims for services delivered in the 2001–02 fiscal year and thereafter to handicapped and disabled pupils.

The bill would provide that county reimbursement claims submitted to the Controller for reimbursement for services associated with providing allowable mental health treatment services required by an individualized education program in fiscal years up to and including

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

the 2000–01 fiscal year are not subject to dispute by the Controller’s office regarding the percentage of reimbursement claimed by any county. The bill would prohibit a county that previously submitted a reimbursement claim for services delivered in the 2000–01 fiscal year or prior for less than 100% of the allowable mental health treatment services to special education pupils from amending its claim for a higher percentage of those same allowable costs.

(21) This bill would set the cost-of-living adjustment for certain items contained in the Budget Act of 2002 and for revenue limit determinations at 2%.

(22) This bill would require the Commission on State Mandates, to amend the parameters and guidelines of the School Bus Safety II mandate to specify that costs associated with implementation of transportation plans are not reimbursable claims and would require the amended parameters and guidelines to be applied retroactively as well as prospectively.

(23) The Budget Act of 2002 makes various appropriations for the support of the public elementary and secondary schools for the 2002–03 fiscal year.

This bill would revise the Budget Act of 2002 by augmenting certain appropriations, by reducing certain appropriations, and by making a new appropriation, as provided.

(24) This bill would appropriate \$681,000,000 from the General Fund in the 2003–04 fiscal year to the State Department of Education pursuant to a schedule for specified school improvement programs, for home to school transportation, for targeted instructional improvement grants, and for other supplemental grants, as specified. The funds appropriated by this bill would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution for the 2003–04 fiscal year.

(25) Existing law requires the Controller to draw warrants on the State Treasury from the State School Fund in favor of the county treasurer of each county in each month in certain amounts determined pursuant to specified calculations. Existing law requires warrants in the months of September to November, inclusive, to include one-tenth of the estimated total amounts of the special purpose apportionment. Under existing law, warrants in December are required to include one-tenth of the amounts certified by the Superintendent of Public Instruction as the special purpose apportionment, as adjusted, if necessary, to correct excesses or deficiencies in the estimates made for purposes of the warrants issued in September to November, inclusive. Existing law requires an additional one-tenth apportionment to be included in the warrants for January to June, inclusive.

This bill would apply that formula for purposes of apportioning funds from the State School Fund for economic impact aid programs as part of the special purpose apportionment in the 2002–03 fiscal year. The bill would apply a revised formula, based on a one-seventh apportionment, for purposes of apportioning funds from the State School Fund for home to school transportation programs as part of the special purpose apportionment in the 2002–03 fiscal year.

(26) The California Constitution requires that the amount appropriated by the Legislature for the support of school districts, as defined, and community college districts in any fiscal year be not less than a specified amount and authorizes the suspension of this minimum funding obligation for one year.

This bill would require the state’s minimum funding obligation for the support of school districts, as defined, and community college districts to be increased, as specified, for the 2003–04 fiscal year. If the state’s minimum funding obligation for the support of school districts, as defined, and community college districts is suspended, the bill would require the amount of the maintenance factor to be computed in a manner that includes this increase.

(27) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1168 (AB 1818) Committee on Education. Education.

(1) Existing law authorizes an adjustment in the revenue limit of any county superintendent of schools by an amount sufficient to provide additional revenue equal to the

expenditure estimated to be incurred by the county superintendent of schools in complying with certain unemployment insurance laws.

This bill would exclude expenditures for employees of charter schools funded by the Charter School Block Grant.

(2) Existing law requires the county superintendent of schools to adjust the total revenue limit by the amount of increased or decreased employer contributions to the Public Employees' Retirement System, excluding from the calculation certain positions.

This bill also would exclude employer contributions for employees of charter schools funded by the Charter School Block Grant.

(3) Existing law requires the school accountability report card to provide data by which parents can make meaningful comparisons between public schools enabling them to make informed decisions on which school to enroll their children and requires certain information regarding school conditions to be included in this report card.

This bill would require the report card to include the rate of pupils who earn Governor's scholarship awards. The bill would require the Scholarshare Investment Board to provide these rates to the State Department of Education which would be required to post that information on the Internet. The bill would impose a state-mandated local program by requiring schools to post on the Internet the rates that pertain to them. The bill would state that the Legislature finds and declares that the bill furthers the purposes of the Classroom Instructional Improvement and Accountability Act.

(4) Existing law limits the amount of compensation a member of the governing board of a school district may receive for his or her services, but permits the governing board to increase the compensation of individual board members beyond those limits. Existing law specifies that voters in a district may vote in a referendum to reject an increase authorized by the governing board.

This bill would delete the provision regarding a referendum to reject an increase in compensation.

(5) Existing law requires the Superintendent of Public Instruction to certify to the Controller the amount of money needed to fund the revenue limits of school districts, county superintendents of schools, and charter schools.

This bill would, commencing in the 2004–05 fiscal year, delete the certification requirement regarding charter school revenue limits.

(6) Existing law repealed, on January 1, 2000, the School Violence Reduction Program, a statewide grant program, but made certain provisions of that program operative in fiscal years in which the Superintendent of Public Instruction certifies that over \$2,000,000 are available for purposes of the program.

This bill would delete all of the provisions governing the School Violence Reduction Program.

(7) Existing law, inoperative on July 1, 2003, prohibits the state board from adopting standards and criteria for a budget reserve for economic uncertainties in excess of 1% of a school district's total expenditures, transfers out, and other uses of the school district for a school district with an average daily attendance greater than 125,000.

This bill, instead, would make these provisions inoperative on July 1, 2004.

(8) Existing law requires the computation of the base revenue limit per unit of average daily attendance.

This bill would require the recomputation of the base revenue limit per unit of average daily attendance of a high school district that receives 7th and 8th grade pupils transferring from an elementary school district.

(9) Existing law requires a school district that receives bequests or gifts of money not required for the immediate necessities of the district to place that money in a district special fund designated as the Foundation Trust Fund and authorizes the district to invest that money.

This bill would rename the Foundation Trust Fund the Foundation Fund.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

(10) Existing law requires the Superintendent of Public Instruction to report annually to the Controller, on or before September 25, the total average daily attendance during the preceding fiscal year.

This bill would change the reporting date to October 20.

(11) Existing law permits, upon receipt from the governing board of a school district of an application for exemption from the requirement regarding minimum expenditures for salaries of classroom teachers, the county superintendent of schools to recommend to the Superintendent of Public Instruction that the district be granted an exemption, if the amount is \$1,000 or greater.

This bill, instead, would permit the county superintendent of schools to grant an exemption.

(12) Existing law requires the Superintendent of Public Instruction to determine the portion of the average salaries paid administrative employees of a school district attributable to state support.

This bill instead would require the Superintendent of Public Instruction to determine the reduction in state support resulting from excess administrative employees.

(13) Existing law requires school districts to submit reports to the Superintendent of Public Instruction regarding the ratio of teaching to nonteaching certificated employees to the extent necessary for effective performance of the superintendent's responsibilities in that regard.

This bill would delete this requirement.

(14) Existing law requires school districts to provide for an annual audit.

This bill would specifically include in this audit provisions governing the maximum ratios of administrative employees to each 100 teachers.

(15) Existing law requires the governing board of each school district to adopt an annual budget and requires the county superintendent of schools to approve or disapprove the adopted budget for a school district by August 15 of the preceding fiscal year. If the budget is disapproved, the county superintendent is required to call for the formation of a budget review committee. Existing law requires the school district budget to be made in the format prescribed by the Superintendent of Public Instruction.

This bill would require the budgets to be adopted to be prepared in accordance with the format prescribed by the Superintendent of Public Instruction and would authorize the governing board of a school district whose budget is disapproved and the county superintendent of schools to agree to waive the requirement that a budget review committee be formed.

(16) Existing law authorizes adjustments in the revenue limit of any elementary, high, or unified school district for purposes of the employer contribution to the Public Employees Retirement System and for purposes of complying with certain unemployment insurance laws.

This bill would exclude from those adjustments charter schools funded by the Charter School Block Grant.

(17) Existing law requires that a school district or county office of education offer 180 days of instruction in order to obtain an additional apportionment based on average daily attendance, or if it is a year-round school that it maintain its school for 5 more days than maintained in the previous fiscal year not to exceed 180 days.

This bill would make a multitrack year-round school that offers a minimum of 163 days of instruction eligible for this apportionment.

(18) Existing law requires the Superintendent of Public Instruction, if the governing board of a school district offers less instructional time than the amount required, to withhold a school district's revenue limit for the average daily attendance of each affected grade level, the sum of the apportionment multiplied by the percentage of instructional minutes that the district failed to offer.

This bill would instead require, for the 2001 fiscal year or a prior fiscal year, the Superintendent of Public Instruction to reduce the school district's apportionment by the average percentage increase in the base revenue limit for districts of similar type and size multiplied by the district's units of average daily attendance.

(19) Existing law specifies the components of a nutritionally adequate meal for purposes of providing meals for needy pupils and allows a cup of unsweetened yogurt as an option for pregnant or lactating pupils.

This bill would instead allow a cup of yogurt as an option for pregnant or lactating pupils.

(20) Existing law requires the state to establish a partnership with the National Academy Foundation to create up to 100 Information Technology Career Academies in public high schools throughout the state and requires the Superintendent of Public Instruction to award grants to high schools selected by the partnership.

This bill would delete the specification that the partnership select the grant recipients.

(21) Existing law requires a regional occupational program or center to be maintained by, and subject to the authority and control of, its governing board. Existing law provides that the governing board of a regional occupational program or center maintained by a county superintendent of schools is the county board of education and that the governing board of a regional occupational program or center maintained by a single school district is the governing board of the school district.

This bill would provide that the governing board of a regional occupational center or program maintained by either a county or a single school district is not entitled to an additional stipend merely to carry out governance of the operations of the regional occupational center or program.

(22) Existing law makes a pupil eligible to be admitted to a regional occupational center or program if the pupil is referred to the center or program and the referral is reviewed and approved by the principal and director of the regional occupational center or program, among other things.

This bill would authorize a designated administrator to complete that review and approval.

(23) Existing law defines certain terms for purposes of the California School Age Families Education program.

This bill would define "expectant parent" as a female who is pregnant or a male who voluntarily identifies himself as the parent of an unborn child, and who meets the eligibility criteria.

(24) Existing law requires a special education local plan area to submit a local plan meeting specified criteria to the Superintendent of Public Instruction. Existing law requires the State Board of Education to adopt criteria and procedures for the review and approval by the board of local plans and authorizes the approval of local plans for up to 4 years.

This bill would delete the authority to approve a local plan for up to 4 years.

(25) Existing law requires the Superintendent of Public Instruction to maintain the state special schools so that their services are coordinated with the services of a school district, special education local plan area, or county office of education.

The bill would also require the Superintendent of Public Instruction to maintain the diagnostic school so that their services are similarly coordinated.

(26) Existing law requires the Superintendent of Public Instruction to develop an annual program evaluation plan and report of special education programs for submission to the board.

This bill, instead, would require the Superintendent of Public Instruction to develop a biennial performance report for submission to the board.

(27) Existing law requires a special education local plan area's annual budget plan to be adopted at a public hearing held by the district, special education local plan area, or county office, as appropriate.

This bill would authorize the governance body of the special education local plan area to designate a local educational agency board, a county office board, or the responsible local agency board to hold the hearing at which the budget plan is adopted.

(28) Existing law requires the Advisory Commission on Special Education, on or before July 1, 2000, to study and report on the practice of awarding certificates or documents of educational achievement or completion and diplomas to individuals with exceptional needs.

This bill would delete this requirement.

(29) Existing law provides that diagnostic centers diagnose disabled children, determine the treatment and educational program for those children and provide temporary residence for disabled children who need educational diagnostic services not available in regular public school.

This bill would delete this provision and instead provide that these centers provide specified services to school districts, county offices of education, and special education local plan areas.

(30) Existing law requires the Superintendent of Public Instruction, in relation to the diagnostic centers, to fix the compensation of teachers, determine the length of and time for vacations of teachers, and contract with the University of California for the establishment and maintenance of diagnostic service and treatment centers for disabled children.

This bill would delete this requirement.

(31) Existing law requires the Superintendent of Public Instruction, in connection with diagnostic centers, to make diagnostic assessments of individuals referred for that service, to provide instructional planning services for individuals assessed, to provide counseling services for parents, guardians, and families of disabled children, and to maintain a model assessment service and demonstration classrooms to assist local school districts.

This bill would delete this requirement.

(32) Existing law permits the Superintendent of Public Instruction to authorize diagnostic centers to establish and maintain teacher training courses designed to prepare teachers to instruct disabled children. Existing law also permits the diagnostic centers to enter into one or more agreements with accredited universities or colleges as a teacher training educational institution.

This bill would delete this provision.

(33) Existing law entitles residents of California who are less than 21 years of age and who are determined by diagnostic centers to be of suitable age and capacity, to free services at diagnostic centers. Existing law permits disabled children who are not residents of California to be admitted to a diagnostic center upon paying the actual support cost.

This bill would delete the provision relating to nonresidents of California and would specify that residents of California are to be accepted by a diagnostic center pursuant to criteria adopted by the Superintendent of Public Instruction.

(34) Existing law requires the Superintendent of Public Instruction to give diagnostic centers not more than \$389 per fiscal year per unit of average daily attendance and requires administrators of the centers to arrange for transportation of the pupils.

This bill would delete this requirement.

(35) Existing law requires publishers of instructional materials to submit standards maps to local districts prior to purchase for the purpose of allowing districts to determine the extent to which instructional materials are aligned to the content standards and requires the maps to be filled out using a standard form created and approved by the State Board of Education.

This bill would require the standards maps to be grade level content standards maps and would require the publisher to distribute the maps free of charge. The bill would require the State Department of Education to develop the standards maps used by the publishers and would require the State Board of Education to approve the standards maps developed by the department by July 1, 2003.

(36) Existing law makes the Schiff-Bustamante Standards-Based Instructional Materials Programs inoperative on June 30, 2002, and repeals the programs on January 1, 2003.

This bill would extend the inoperative and repeal dates one year.

(37) Existing law requires the Superintendent of Public Instruction, with approval of the State Board of Education, to provide for the development of an assessment instrument, to be called the California Standards Tests, to measure the degree to which pupils are achieving the academically rigorous content standards and performance standards, to the extent standards have been adopted by the State Board of Education. This standards-based achievement test is required to contain the areas of reading, writing, mathematics, history-social science, and science for grades 9 to 11, inclusive.

This bill would exclude history-social science from being included in the grade 9 assessment unless the State Board of Education adopts academic content standards for a grade 9 history-social science course.

(38) Existing law requires a county office of education that has a qualified or negative certification of its ability to meet its financial obligations to allow the Superintendent of Public Instruction at least 6 working days to review and comment on any proposed agreement between the exclusive representative and the public school employer.

This bill would make this provision applicable to a school district for which the county board of education serves as the governing board.

(39) The bill would update cross-references and make conforming and other technical changes.

(40) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(41) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1169 (SB 2028) Vasconcellos. Community colleges: equal employment opportunity hiring.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state.

Existing statutes, relating to affirmative action hiring by the community colleges, that have been invalidated by order of the California Court of Appeal, require the board of governors, out of funds appropriated for that purpose, to provide assistance to local community colleges in maintaining high-quality affirmative action programs. The invalidated statutes also established the Faculty and Staff Diversity Fund in the State Treasury. Money in this fund was available to the board of governors, upon appropriation by the Legislature, for the purpose of enabling the community colleges as a system to address a goal of making the system's workforce reflect proportionately the adult population of the state.

This bill would repeal these invalidated provisions. The bill would instead enact provisions relating to equal employment opportunity hiring by the community colleges, and establish the Employment Opportunity Fund, to be administered by the board of governors, upon appropriation by the Legislature, for the purpose of promoting equal employment opportunities in hiring and promotion at the community colleges. The bill would make conforming changes.

The bill would require the governing board of each community college district that opts to participate under the bill to periodically submit to the board of governors an affirmation of compliance with the article. The bill would require the board of governors to adopt

regulations to ensure that each participating community college district implements processes for ensuring equal employment opportunities. The bill would require the board of governors to develop systemwide strategies for encouraging community college students to become qualified for, and seek, employment as community college faculty or administrators. The bill would require the board of governors to develop and disseminate to community college districts a model equal employment opportunity plan.

The bill would require the board of governors to adopt regulations for the use of the fund, including outreach and recruitment, in-service training on equal employment opportunities, accommodations for applicants and employees with disabilities, and other activities to promote equal employment opportunities. The bill would prohibit the board of governors from using more than 25% of the revenues in the fund to provide technical assistance, service, monitoring, and compliance functions. The bill would authorize the board of governors to allocate the remaining balance in the fund to the individual community college districts.

Ch. 1170 (SB 1835) Committee on Budget and Fiscal Review. State government.

(1) This bill would amend and supplement the Budget Act of 2002 by providing for various reductions in appropriations contained in that act.

(2) Existing law, with certain exceptions, requires the Controller, commencing July 1, 2001, to abolish any state position that was vacant continuously for 6 consecutive monthly pay periods during the period between July 1 and June 30 of the preceding fiscal year. Existing law also requires that positions that were continuously vacant for 6 consecutive monthly pay periods during a fiscal year because of a hiring freeze in effect during part or all of that period be abolished unless the Director of Finance is notified of the need for, and approves of, the continuance of the positions.

This bill would require at least 1,000 positions in state government to be abolished, not later than June 30, 2004, by the Director of Finance, according to specified criteria, and would require the director to report to the Joint Legislative Budget Committee and the Joint Legislative Audit Committee, as specified.

(3) This bill would provide that total expenditure authorizations from the General Fund for the 2003–04 fiscal year shall be limited to the total revenues to the General Fund for the 2003–04 fiscal year.

(4) This bill would also direct the Governor to issue an Executive order to provide certain state employees with additional service credit, as specified.

(5) This bill would not take effect unless other specified bills are chaptered.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

---

**DIGEST OF STATUTE  
ENACTED IN 2002**

2001–02 SECOND EXTRAORDINARY SESSION

---

---

**BILL CHAPTER****Ch. 19 (SB 39) Burton. Public utilities.**

(1) Under existing law, the Public Utilities Act, the Public Utilities Commission is authorized to supervise and regulate every public utility in the state, and is authorized to do all things that are necessary and convenient in the exercise of that power and jurisdiction. Existing law also provides for the establishment of an Independent System Operator (ISO), a nonprofit, public benefit corporation, to ensure efficient use and reliable operation of the electrical transmission grid and an Electricity Oversight Board (Oversight Board) to oversee the ISO.

This bill would establish the California Electricity Generation Facilities Standards Committee, to adopt and revise standards for the maintenance and operation of facilities for the generation of electricity located in California. The committee would consist of three members, one appointed by the commission, one appointed by the ISO, and a 3rd member with expertise regarding electric generation facilities jointly appointed by the commission and the ISO. The bill would make these provisions inoperative as of January 1, 2005.

This bill would require the commission to implement and enforce the standards adopted by the committee for the maintenance and operation of facilities for the generation of electricity located in the state, or owned by an electrical corporation, to ensure their reliable operation. The bill would require the commission to enforce the protocols for the scheduling of powerplant outages of the ISO. Since a violation of an order of the commission is a crime under existing provisions of law, the bill would impose a state-mandated local program by expanding the definition of a crime.

This bill would exempt from the above provisions nuclear powered generating facilities that are federally regulated and subject to standards developed by the Nuclear Regulatory Commission, but would require the owner or operator of nuclear generating facilities to file with the Oversight Board and the commission an annual schedule of maintenance for each generating facility and require a good faith effort to conduct maintenance in compliance with the plan and to report any significant variations from the plan to the Oversight Board and the ISO. The owner and operator would be required to report on a monthly basis, to the Oversight Board and the commission, all actual planned and unplanned outages of each nuclear facility during the prior month and to report on a daily basis, to the Oversight Board and the ISO, the daily operational status and availability of each facility for the production of electricity. The bill would exempt from the above provisions facilities that generate electricity using cogeneration and qualifying small power production facilities, as defined. The bill would require an electrical corporation that has a contract with a cogeneration or small qualifying facility with a name plate rating of 10 megawatts or greater to report to the Oversight Board and the commission maintenance schedules. The bill would require each facility with a name plate rating of 10 megawatts or greater to directly report to the Oversight Board and the ISO maintenance schedules.

This bill would require that its provisions not result in the modification, delay, or abrogation of any deadline, standard, rule, or regulation adopted by a federal, state, or local agency for purposes of protecting public health or the environment. The bill would require the ISO to consult with the State Air Resources Board and appropriate local air pollution control districts and air quality management districts to coordinate scheduled outages.

This bill would require the ISO to maintain records of generation facility outages and to provide those records to the Oversight Board and the commission on a daily basis. The bill would require certain entities that own or operate electric generating units in the state to provide a monthly report to the ISO that identifies when, during the preceding month, the unit was unavailable or was only available at reduced capacity, and the reasons therefor. The bill would require the ISO to immediately transmit the information to the Oversight Board and the commission. Since a violation of the act is a crime under existing provisions of law, the bill would create a state-mandated local program by expanding the definition of a crime.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would exempt from the above provisions facilities owned by a local publicly owned electric utility, as defined, any public agency that may generate electricity incidental to the provision of water or wastewater treatment, and facilities owned by a city and county operating as a public utility furnishing electric service.

(2) Existing law requires the Public Utilities Commission, in proceedings, to ensure that facilities needed to maintain the reliability of the electricity supply remain available and operational, consistent with maintaining open competition and avoiding an overconcentration of market power.

This bill would require the commission to require that generation facilities located in California that have been disposed of pursuant to specified provisions of existing law are operated by the persons or corporations who own or control them in a manner that ensures their availability to maintain the reliability of the electric supply system.

(3) Under provisions that would be added by Chapter 16 of the Statutes of 2001, Second Extraordinary Session, until January 1, 2003, or the occurrence of a specified event, whichever is earlier, electric generation and transmission facilities would be subject to various standards related to their availability. The Oversight Board, in consultation with the commission and the ISO, would be required to prepare and adopt protocols for the scheduling of transmission and generation equipment outages for the purpose of maintenance, repair, or upgrade and to prepare and adopt a schedule of outages in accordance with those protocols. The Oversight Board would be required to direct the ISO to develop and submit to the Oversight Board and the commission proposed generation facility maintenance, operating, and availability standards for generator units with a certain capacity. The commission would be authorized to adopt those standards and ensure compliance with those standards.

This bill would repeal those provisions.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) This bill would provide that its provisions shall become operative only if AB 28 of the 2001–02 Second Extraordinary Session is enacted and becomes effective.

---

---

**DIGESTS OF STATUTES  
ENACTED IN 2002**

2001–02 THIRD EXTRAORDINARY SESSION

---

---

**BILL CHAPTERS****Ch. 1 (SB 1) Peace. Budget Act of 2001.**

The Budget Act of 2001 (Ch. 106, Stats. 2001), made appropriations for the support of state government during the 2001–02 fiscal year.

This bill would amend the Budget Act of 2001 by revising various items of appropriations, as specified, and authorizing the Director of Finance to revert additional amounts from specified funds to the General Fund.

This bill would provide that it is to take effect immediately as an urgency statute. Appropriation: yes.

**Ch. 2 (SB 5) Peace. Education.**

(1) Existing law requires the county superintendent of schools to adjust the total revenue limit for each school district in the jurisdiction of the county superintendent of schools by the amount of increased or decreased employer contributions to the Public Employees' Retirement System (PERS) and sets forth a method for calculating that amount for the 1995–96 fiscal year and each fiscal year thereafter. Existing law provides that certain funding appropriated in the Budget Act of 2001 is for the purpose of limiting reductions to revenue limits made for purposes of the decreased employer contributions to PERS and sets forth parameters for apportionment reductions in the 2002–03 fiscal year.

This bill would provide that funding appropriated in the Budget Act of 2001, or legislation amending that act, for the purpose of limiting reductions to revenue limits for the 2001–02 fiscal year is to be allocated on a one-time basis. The bill would appropriate \$35,000,000 from the General Fund to Section A of the State School Fund for purposes of limiting the reductions to revenue limits for the 2003–04 fiscal year and would limit reductions to revenue limits for the 2004–05 fiscal year and each fiscal year thereafter to \$35,000,000 increased annually by cost-of-living adjustments, as specified.

The funds appropriated by this bill for the 2003–04 fiscal year would be applied toward that fiscal year's minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(2) Existing law requires the Superintendent of Public Instruction to compute an equalization adjustment, for the 2001–02 fiscal year, for each school district so that no district's prior year base revenue limit per unit of average daily attendance is less than the prior year base revenue limit per unit of average daily attendance above which fall not more than 10% of the total statewide units of average daily attendance for the appropriate size and type of district. Existing law appropriates \$40,000,000 from the Proposition 98 Reversion Account for purposes of funding the equalization adjustment for the 2001–02 fiscal year.

This bill would require the equalization adjustment to be made on a one-time basis and would exclude that adjustment from the school district base revenue limits. The bill would require the Superintendent of Public Instruction to compute a similar equalization adjustment for the 2003–04 fiscal year that would be included in the school district base revenue limits. The bill would require the Superintendent of Public Instruction to compute a similar equalization adjustment for the 2003–04 fiscal year that would be included in the school district base revenue limits.

(3) Existing law establishes the California Peer Assistance and Review Program for Teachers and sets forth a formula for determining the amount of funding the Superintendent of Public Instruction is required to apportion to each participating school district.

This bill would prohibit the State Board of Education from waiving certain provisions of the program.

(4) Existing law establishes the High-Tech High School Grant Program to provide 10 one-time grants for the purposes of establishing new high-tech high schools. Existing law requires the grants to be awarded in 2 phases. Existing law repeals the program on January 1, 2003.

This bill would reduce the number of grants to 5 and would eliminate the second phase of the program. The total amount of a grant would be awarded over a 2-year period. The bill would require the Superintendent of Public Instruction to report to the Legislature on the status of the program by May 1, 2003, and would extend the repeal of the program until January 1, 2004.

(5) Existing law establishes the High Priority Schools Grant Program for Low Performing Schools within the Public Schools Accountability Act of 1999 with priority for participation being given to lowest ranked schools. Existing law requires the Superintendent of Public Instruction to allocate \$200 per pupil to participating schools for implementation of their school action plans, as specified.

This bill would specify that the program will be implemented only if the annual Budget Act contains an appropriation for this purpose.

(6) Existing law requires the Controller to allocate \$66,728,000 appropriated for the payment of state-mandated local program claims from school districts for schoolbus related costs incurred from July 1, 1996, to June 30, 2002, inclusive.

This bill would require the Controller to make that allocation only if funds are provided in the Budget Act of 2001, as amended by legislation enacted during the 2001–02 Third Extraordinary Session or future Budget Acts.

(7) Existing law appropriates \$40,000,000 from the Proposition 98 Reversion Account to the Superintendent of Public Instruction for purposes set forth in prescribed provisions of law relating to equalization funding.

This bill would amend this appropriation to, instead, appropriate those funds pursuant to similar, but different, provisions of law relating to equalization funding.

(8) This bill would declare that it is to take effect immediately, as an urgency statute. Appropriation: yes.

### Ch. 3 (SB 4) Peace. Budget Act of 2001.

This bill would disencumber and revert any funds from General Fund appropriations for specified projects and would instead appropriate \$370,936,000 from the Public Building Construction Fund for these projects.

The bill would authorize the State Public Works Board to issue lease-revenue bonds, notes, or bond anticipation notes to finance the design or construction, or both, of these projects and would authorize the State Public Works Board and affected state agencies and departments to obtain interim financing for project costs, as specified.

The bill would authorize and direct participating agencies or departments to execute and deliver all leases, contracts, agreements, or other documents necessary or advisable to consummate the sale of bonds or otherwise effectuate the financing of these projects.

The bill would authorize the State Public Works Board to authorize the augmentation of the cost of construction of these projects and authorize the board to authorize any additional amount necessary to establish a reasonable construction reserve and to pay the cost of financing including the payment of interest during the design and construction of the projects, the costs of financing a debt service fund, and the cost of issuance of permanent financing for the projects, including interest payable on any interim financing obtained.

The bill would provide that notwithstanding any other provision of law, approvals by the State Public Works Board for these projects apply only to the allocation of state capital outlay funds appropriated by the Legislature, including land acquisition and equipment funds.

The bill would provide that in the event the bonds authorized for these projects are not sold, the agency or department that initiated loans is required to commit a sufficient portion of its current support appropriation, as determined by the Department of Finance, to repay any interim financing.

The bill would provide that notwithstanding any other provision of law, the funds appropriated for these projects shall be available for encumbrance until June 30, 2007.

The bill would provide that notwithstanding any other provision of law, the Department of Finance may transfer, on or before June 30, 2002, any unallocated or unencumbered funds, or both, previously transferred from the General Fund to the Inmate Construction Revolving Account, and any unallocated or unencumbered funds, or both, previously transferred from the General Fund to the Architectural Revolving Fund back to the General Fund.

This bill would declare that it is to take effect immediately as an urgency statute. Appropriation: yes.

Ch. 4 (SB 2) Alarcon. Unemployment insurance: benefits compensation.

Under existing law, for new claims filed on or after January 1, 1992, and prior to January 1, 2002, the weekly unemployment compensation benefit for an individual whose highest wages in the quarter of his or her base period exceeded \$4,966.99 is 39% of those wages divided by 13, not to exceed \$230. In the case of new claims filed with an effective date beginning on or after January 1, 2002, and prior to January 1, 2003, the weekly benefit amount for individuals whose highest wages in the quarter of his or her base period exceeds \$2,781.99 is 45% of those wages not to exceed \$330.

This bill would, instead, apply this provision to existing and new claims, as provided, filed on or after September 11, 2001, and prior to January 1, 2003. This bill would also state the intent of the Legislature that certain provisions of the bill be construed to allow the benefit period of a qualified unemployed person, as defined, to run from the date that the qualified unemployed person became unemployed, as provided.

Existing federal law, the Job Creation and Worker Assistance Act of 2002, authorizes the United States Secretary of the Treasury, in the 2002-03 fiscal year, to transfer to each state's Unemployment Trust Fund a specified amount of money that may be utilized by each state for specified purposes.

This bill would require that \$600,000,000 of the moneys transferred to the state's Unemployment Trust Fund pursuant to this federal law be utilized for the payment of unemployment compensation and for ensuring the solvency of the state's Unemployment Trust Fund.

Because these provisions would increase the amount of unemployment compensation paid, these provisions would increase the amount payable from the Unemployment Fund, a continuously appropriated special fund, and thereby would make an appropriation. Appropriation: yes.

---

---

**DIGESTS OF RESOLUTIONS AND PROPOSED  
CONSTITUTIONAL AMENDMENTS  
ADOPTED IN 2002**

2001–02 REGULAR SESSION

---

---

**RESOLUTION CHAPTERS**

Res. Ch. 1 (ACR 128) Horton. Dr. Martin Luther King, Jr. Day.

This measure would designate that January 21, 2002, be observed as the official memorial of the late Rev. Dr. Martin Luther King, Jr.'s birth, commemorating Dr. Martin Luther King, Jr. Day, the work of Dr. Martin Luther King, Jr., and the Civil Rights Movement in changing public policy in California and in the United States of America.

Res. Ch. 2 (ACR 134) Wesson. Rosa Parks Freeway.

This measure would designate a specified portion of the Interstate Highway Route 10 in the County of Los Angeles as the Rosa Parks Freeway.

Res. Ch. 3 (ACR 144) Wright. Black History Month.

This measure would recognize February 2002 as Black History Month, urge all citizens to join in celebrating the accomplishments of African-Americans during Black History Month, and encourage the people of California to recognize the many talents, achievements, and contributions that African-Americans make to their communities.

Res. Ch. 4 (SCR 51) Torlakson. California Fitness Month.

This measure would proclaim the month of March 2002 as California Fitness Month, and would encourage all Californians to enrich their lives through proper diet and exercise.

Res. Ch. 5 (ACR 147) Mountjoy. Abraham Lincoln's birthday.

This measure would declare that Abraham Lincoln be honored on his birthday as the virtual symbol of the American dream whereby an ordinary person from humble beginnings can reach the pinnacle of American society as President of the country and serve with honor and courage.

Res. Ch. 6 (ACR 150) Strom-Martin. Spay Day USA 2002.

This measure would declare February 26, 2002, to be Spay Day USA 2002, and would request that Californians observe that day by having their dogs or cats spayed or neutered or by contributing to organizations that provide spay or neuter services.

Res. Ch. 7 (SJR 22) Torlakson. Gasoline: MTBE.

This measure would memorialize the United States Environmental Protection Agency to reconsider granting an administrative waiver of the act's oxygenated gasoline requirement for the State of California, to the extent permitted by the federal Clean Air Act. The measure would also memorialize the United States Congress, if an administrative waiver is not granted, to enact legislation that would permit California to waive the oxygen content requirement for reformulated gasoline only if the fuel meets other requirements of the federal Clean Air Act for reformulated gasoline, and would memorialize the President of the United States to sign that legislation, if enacted.

Res. Ch. 8 (SCR 58) Machado. California Eating Disorders Awareness Week.

This bill would proclaim the week of February 24 to March 3, 2002, as California Eating Disorders Awareness Week.

Res. Ch. 9 (ACR 130) Havice. Gold Star Mothers Week.

This measure would designate the week of May 27 to June 2, 2002, inclusive, as Gold Star Mothers Week, and urge Californians to pay heed to the heroic sacrifices of our fallen men and women and be aware of the sacrifices made by them.

Res. Ch. 10 (ACR 145) Matthews. Nutrition Week 2002.

This measure would proclaim the week of February 24 to March 2, 2002, as Nutrition Week 2002.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Res. Ch. 11 (ACR 153) Strom-Martin. Read Across America.

This measure would proclaim March 2, 2002, as Read Across California Day.

Res. Ch. 12 (SCR 61) Chesbro. California Nonprofits and Philanthropy Week.

This measure would proclaim March 31 to April 6, 2002, inclusive, as California Nonprofits and Philanthropy Week.

Res. Ch. 13 (ACR 129) Havice. Crime Victims' Rights Week.

This measure would recognize the week of April 22 through 28, 2002, as Crime Victims' Rights Week in California.

Res. Ch. 14 (ACR 133) Havice. Merchant Marine Remembrance Week.

This measure would recognize June 10 through June 16, 2002, as Merchant Marine Remembrance Week, and encourage all Californians to join in this observance.

Res. Ch. 15 (ACR 138) Papan. Greek Independence Day.

This measure would designate March 25, 2002, as Greek Independence Day.

Res. Ch. 16 (ACR 139) Wayne. Colorectal Cancer Awareness Month.

This measure would proclaim the month of March 2002 to be "Colorectal Cancer Awareness Month."

Res. Ch. 17 (ACR 155) Dutra. Afghan New Year.

This measure, in recognition of the contributions Afghan-Americans have made to the richly diverse State of California, would recognize March 21 as the first day of the Afghan New Year.

Res. Ch. 18 (ACR 162) Aroner. Professional Social Work Month.

This measure would proclaim the month of March 2002 as Professional Social Work Month.

Res. Ch. 19 (ACR 164) Corbett. Irish-American Heritage Month.

This measure would designate March 2002 as Irish-American Heritage Month in honor of the multitude of contributions that Irish-Americans have made to the country and state.

Res. Ch. 20 (ACR 160) Bates. Endometriosis Awareness Month.

This measure would proclaim the month of March 2002 as Endometriosis Awareness Month.

Res. Ch. 21 (SCR 60) Murray. Arts Education Month.

This measure would declare March 2002, Arts Education Month and would encourage California educational communities to celebrate the arts through activities and programs designed for that purpose.

Res. Ch. 22 (SCR 71) Haynes. California Wildland Firefighters Memorial Highway.

This measure would designate the portion of State Highway Route 74 between Lake Elsinore and San Juan Capistrano in the Counties of Riverside and Orange as the California Wildland Firefighters Memorial Highway.

This measure would also request the Department of Transportation to determine the cost of appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 23 (ACR 141) Wayne. California Holocaust Memorial Week.

This measure would designate the week of April 7 through April 14, 2002, as California Holocaust Memorial Week, and would urge Californians to observe these days of remembrance for the victims of the Holocaust in an appropriate manner.

Res. Ch. 24 (AJR 28) Robert Pacheco. Pancreatic cancer.

This measure would provide that the California Legislature urges the President and the Congress of the United States to expand federally funded research efforts aimed at developing a reliable means of detecting pancreatic cancer in its early stages.

Res. Ch. 25 (SCR 67) Polanco. César Chávez Day.

This measure would recognize March 31 as the anniversary of the birth of César Chávez, and would call upon all Californians to participate in appropriate observances to remember César Chávez as a symbol of hope and justice to all citizens.

Res. Ch. 26 (SCR 72) Escutia. Women's History Month.

This measure would proclaim the month of March 2002 as Women's History Month and would call on all Californians to join in the celebration of International Women's Day on March 8, 2002.

Res. Ch. 27 (ACR 132) Havice. Law Enforcement Resolution.

This measure would declare Sunday, April 28, 2002, through Saturday, May 4, 2002, Law Enforcement Appreciation Week and would encourage the participation of all Californians in commending law enforcement officers.

Res. Ch. 28 (ACR 166) Mountjoy. Work Zone Awareness Week.

This measure would designate the 2nd week of April of 2002, and the 2nd week of April annually thereafter, as Work Zone Awareness Week.

Res. Ch. 29 (AJR 27) Oropeza. Social HMO's.

This measure would memorialize the President and Congress of the United States, the federal Department of Health and Human Services, and the Centers for Medicare and Medicaid Services to take various actions with respect to social health maintenance organizations.

Res. Ch. 30 (SCR 56) Johannessen. POW Recognition Day.

This measure would designate April 9, 2002, as POW Recognition Day in California.

Res. Ch. 31 (SJR 36) Murray. Federal highway funding.

This measure would support the efforts of the House of Representatives and the United States Senate to restore federal highway funding for 2003 to not less than the levels anticipated in the Transportation Equity Act for the Twenty-First Century.

Res. Ch. 32 (ACR 111) Cardoza. California Highway Patrol Officer James J. Schumacher, Jr., Memorial Highway.

This measure would dedicate a specified portion of State Highway 99 to the memory of California Highway Patrol Officer James J. Schumacher, Jr., and would specify that this portion of State Highway 99 shall be known as the "CHP Officer James J. Schumacher, Jr., Memorial Highway." The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation, and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 33 (ACR 127) Oropeza. September 11, 2001.

This measure would recognize September 11 of each year as a Day of Remembrance and Service and would call upon Californians to participate in appropriate observances to remember those who lost their lives in the terrorist attacks of September 11, 2001.

Res. Ch. 34 (ACR 186) Alquist. Equal Pay Day.

This measure would declare April 16, 2002, to be Equal Pay Day, and would urge the citizens of the State of California to recognize the full value of women's skills and significant contributions to the labor force.

Res. Ch. 35 (SCR 59) Battin. Child Abuse Prevention Month.

This measure would acknowledge the month of April 2002, as Child Abuse Prevention Month, and encourage the people of the State of California to support child abuse prevention activities in their communities and schools.

Res. Ch. 36 (SCR 63) Margett. Random Acts of Kindness Week.

This measure would recognize the week of February 11 through February 17, 2002, as Random Acts of Kindness Week and would urge the public to observe this week with appropriate activities.

Res. Ch. 37 (ACR 131) Havice. California Peace Officers' Memorial Day.

This resolution would make observations about the work and sacrifices of California peace officers, and would resolve that the Members of the Legislature designate May 3, 2002, as California Peace Officers' Memorial Day and urge all Californians to act in accordance.

Res. Ch. 38 (ACR 151) Leslie. California chaplains.

This measure would recognize California chaplains for their outstanding service, commitment, and dedication to helping others at Ground Zero in New York City and at the scene of other disasters.

Res. Ch. 39 (AJR 44) Simitian. Armenian Genocide: Days of Remembrance.

This measure would designate April 24, 2002, as "California Day of Remembrance for the Armenian Genocide of 1915–1923." It would memorialize the Congress of the United States to likewise commemorate the Armenian Genocide.

Res. Ch. 40 (SCR 53) Battin. California Hispanic Heritage Month.

This measure would proclaim September 15 to October 15, 2002, as California Hispanic Heritage Month, and would encourage all Californians to observe this event in communities throughout the state.

Res. Ch. 41 (SCR 65) Alpert. California Museum Month.

This measure would proclaim May 2002, as California Museum Month.

Res. Ch. 42 (SCR 73) Kuehl. Sexual Assault Awareness Month.

This measure would proclaim that, henceforth, the month of April shall be designated as Sexual Assault Awareness Month.

Res. Ch. 43 (ACR 142) Hertzberg. Judge Harry Pregerson Interchange.

This measure would officially name the interchange where State Highway Route 105 connects with State Highway Route 110 as the "Judge Harry Pregerson Interchange." The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing the special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 44 (ACR 152) Cedillo. Salvadoran Day.

This measure would declare each August 6 to be “El Dia del Salvadoreño” (Salvadoran Day) in recognition of all Salvadorans for their hard work and dedication, and their contributions to the stability and well-being of the people of California, and to the California economy.

Res. Ch. 45 (ACR 181) Harman. National Volunteer Week.

This measure would proclaim the week of April 21 through 27, 2002, as National Volunteer Week 2002 and would acknowledge the valuable gifts of service of the thousands of community volunteers throughout the state.

Res. Ch. 46 (SCR 57) Romero. Cervical Cancer Awareness Month.

This measure would proclaim the month of January of every year to be “Cervical Cancer Awareness Month.” This measure would also declare the resolve of the Legislature to encourage and promote the efforts of people and health care practitioners in the state to increase awareness about cervical cancer, including the early detection, prevention, risk factors, and early warning symptoms and signs of the disease.

Res. Ch. 47 (SCR 75) Margett. California Volunteer Week.

This measure would declare the support of the Legislature for National Volunteer Week by proclaiming the week of April 21 to 27, 2002, as California Volunteer Week 2002.

Res. Ch. 48 (ACR 157) Chu. Girl Scouts.

This measure would commend the Girl Scouts for 90 years of service and for inspiring millions of girls with the highest ideals of character, conduct, and patriotism.

Res. Ch. 49 (ACR 161) Negrete McLeod. Public Service Recognition Week.

This measure would recognize the week of May 5 through May 11, 2002, as Public Service Recognition Week, to honor those individuals who devote their careers to professional civil service, and encourage the people of the state, counties, cities, and special districts to observe this week with appropriate programs, ceremonies, and activities.

Res. Ch. 50 (ACR 185) Corbett. California Earthquake Preparedness Month.

This measure would declare the month of April to be California Earthquake Preparedness Month and urge all Californians and government agencies to engage in education, evaluation of seismic hazards, mitigation, safety activities, and the exchange of information related to earthquake preparedness with other states and nations during that month.

Res. Ch. 51 (AJR 35) Kelley. Mexicali/Calexico border crossing: SENTRI program.

This measure would memorialize the President and Vice President of the United States, the United States Congress, and certain federal agencies, including the Immigration and Naturalization Service and the United States Customs Service, to take the necessary steps to implement the SENTRI program at the Mexicali/Calexico border crossing.

Res. Ch. 52 (SCR 70) Knight. Aviation Maintenance Technician Day.

This measure would proclaim May 24, 2002, and every May 24 thereafter, as Aviation Maintenance Technician Day in the State of California.

Res. Ch. 53 (SCR 76) Ackerman. Autism Treatment Awareness Month.

This measure would proclaim the month of April 2002, as Autism Treatment Awareness Month, and acknowledge the contributions made in the area of early autism intervention treatment by experts in the field and the families involved. This measure would also, among other things, urge the United States Department of Health and Human Services to continue to press for the swift and full implementation of the Children’s Health Act of 2000.

Res. Ch. 54 (SCR 62) Margett. United States Military Academy: bicentennial.

This measure would commemorate the Legislature to commemorate the bicentennial of the founding of the United States Military Academy at West Point, New York.

Res. Ch. 55 (SJR 34) Speier. Oral cancer drugs.

This measure would memorialize the President and Congress of the United States to adopt legislation requiring the Medicare program to cover all oral anticancer drugs.

Res. Ch. 56 (SJR 35) Brulte. Federal Indian Health Care Improvement Act.

This measure would memorialize the President and Congress of the United States to pass legislation reauthorizing the Indian Health Care Improvement Act in the 107th Session of Congress.

Res. Ch. 57 (SJR 44) Haynes. Amyotrophic Lateral Sclerosis Awareness Month.

This measure would proclaim the month of May 2002 as Amyotrophic Lateral Sclerosis Awareness Month, and would memorialize the President and Congress of the United States to enact legislation to provide additional funding for research in order to find a treatment and a cure for amyotrophic lateral sclerosis.

Res. Ch. 58 (ACR 176) Daucher. Breast cancer.

This measure would proclaim the support of the Legislature for the Race for the Cure by encouraging all Californians to show their support, love, and commitment to someone who has battled breast cancer and to raise public awareness of the need for early breast cancer screening and treatment.

Res. Ch. 59 (ACR 180) Strom-Martin. California Earth Day 2002.

This measure would declare April 22, 2002, as "California Earth Day," would reaffirm the Legislature's commitment to the fundamental principles of environmental laws, and would encourage the state's residents to promote the goals of Earth Day 2002.

Res. Ch. 60 (ACR 197) Strom-Martin. Day of the Teacher.

This measure would proclaim May 8, 2002, to be Day of the Teacher and would urge Californians to observe that day.

Res. Ch. 61 (AJR 31) Thomson. Antiterrorism funding.

This measure would memorialize the President and the Congress of the United States to enact legislation to provide funds to states and local governments to provide the necessary security and relief measures to protect local citizens from terrorism.

Res. Ch. 62 (SCR 66) Johannessen. California marine transportation system.

This measure would proclaim the month of May as California Marine Transportation System Month, and would declare the intent of the Legislature to promote the funding and programs necessary to the advancement of the California marine transportation system.

Res. Ch. 63 (SCR 80) Machado. Grandmothers for Peace International.

This measure would recognize May 19, 2002, as the 20th anniversary of Grandmothers for Peace International.

Res. Ch. 64 (ACR 174) Wayne. Women's Health Month.

This measure would proclaim the month of May as Women's Health Month and would encourage efforts to increase awareness about all women's health issues.

Res. Ch. 65 (ACR 187) Nakano. Fall of Bataan.

This measure would recognize April 9, 2002, as the 60th anniversary of the fall of Bataan and honor the services of the Filipino-American World War II veterans now living in the State of California.

Res. Ch. 66 (ACR 195) Hollingsworth. Motorcycle Awareness Month.

This measure would declare May 2002 to be Motorcycle Awareness Month.

Res. Ch. 67 (ACR 199) Richman. National Public Works Week.

This measure would recognize the week of May 19, 2002, to May 25, 2002, as National Public Works Week, acknowledge the role of infrastructure in the development of California's economy, and recognize the work of the California Rebuild America Coalition.

Res. Ch. 68 (ACR 203) Chu. Asian and Pacific Islander American Heritage Month.

This measure would commend Asian and Pacific Islander Americans for their notable accomplishments and outstanding service to the state and recognize May 2002 as Asian and Pacific Islander American Heritage Month.

Res. Ch. 69 (SJR 37) Romero. Alzheimer's disease.

The measure would memorialize the President and Congress to immediately invest in various activities to prevent Alzheimer's disease, such as increasing the number of large-scale clinical trials, increasing funding of Alzheimer's disease research grants, launching an initiative on vascular disease and dementia, conducting additional research on Alzheimer's disease risk factors, and developing specified early detection methods.

Res. Ch. 70 (SCR 43) Poochigian. Deputy Sheriff Erik Jon Telen Memorial Highway.

This measure would dedicate a specified portion of State Highway 168 within the City of Clovis, to the memory of Deputy Erik Jon Telen of the Fresno County Sheriff's Department, and would specify that this portion of State Highway Route 168 shall be known as the Deputy Sheriff Erik Jon Telen Memorial Highway. The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 71 (AJR 8) Briggs. Choinumni Tribe: federal recognition.

This measure would memorialize the President and the Congress of the United States and the Assistant Secretary for Indian Affairs in the United States Department of the Interior to grant the Choinumni Tribe full federal recognition and all the rights and privileges that arise from that declaration.

Res. Ch. 72 (ACR 74) Leach. National Scholarship Month.

This measure would recognize May 2002, and each May thereafter, as National Scholarship Month.

Res. Ch. 73 (ACR 173) Alquist. Osteoporosis Awareness Month.

This measure would recognize May 2002 as Osteoporosis Awareness Month, and would encourage all people in the state to become educated about their risks of developing osteoporosis, the methods of diagnosis of this disease, and the methods of treatment.

Res. Ch. 74 (ACR 183) Zettel. Charter Schools Week.

This measure would declare April 29 through May 3, 2002, Charter Schools Week.

Res. Ch. 75 (ACR 192) Zettel. Elder Abuse Prevention Month.

This measure would declare the month of May 2002 as Elder Abuse Prevention Month.

Res. Ch. 76 (ACR 196) La Suer. Memorial Day.

This measure would recognize May 27, 2002, as Memorial Day, and urge the people of California to honor the men and women of the United States who died in the pursuit of freedom and peace.

Res. Ch. 77 (ACR 206) Bates. National Military Appreciation Month.

This measure would honor those men and women who have served and are serving in our nation's military, and would recognize May 2002 as National Military Appreciation Month.

Res. Ch. 78 (ACR 207) Robert Pacheco. Arthritis Awareness Month.

This measure would proclaim the month of May 2002 as Arthritis Awareness Month.

Res. Ch. 79 (SCR 87) Burton. Legislative Counsel of California.

This measure designates Diane F. Boyer-Vine as the Legislative Counsel of California.

Res. Ch. 80 (SJR 29) Murray. Taxation of film and television productions.

This measure would memorialize the President of the United States and the Congress to enact the Independent Film and Television Production Incentive Act of 2001 to address the problem of economic runaway film and television productions.

Res. Ch. 81 (ACR 146) Correa. California Police and Fire Games.

This measure would thank all police and fire departments in the state for their continued dedication and commitment to the citizens of the state, and thank the City of Santa Ana and its police department for their efforts in ensuring the success of the 2002 California Police and Fire Games.

Res. Ch. 82 (SCR 83) Figueroa. Reflex Sympathetic Dystrophy (RSD) Syndrome Awareness Month.

This measure would proclaim May 2002 as Reflex Sympathetic Dystrophy (RSD) Syndrome Awareness Month.

Res. Ch. 83 (ACR 119) Runner. Aerospace Highway.

This measure would dedicate a specified portion of State Highway 14 as the "Aerospace Highway." This measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 84 (ACR 120) Runner. The Aerospace Valley Monument.

This measure would request the Department of Transportation to grant, without charge, an encroachment permit authorizing a specified historical monument and plaque dedicated to commemorate the major milestones in the aerospace industry that have taken place in the Antelope Valley, to be erected on the vista point overlooking Palmdale Lake on State Highway Route 14. This measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect those plaques and markers or to permit an appropriate private source to erect the monument.

Res. Ch. 85 (ACR 214) Mountjoy. Flag Day.

This measure would designate June 14, 2002, as Flag Day of the State of California, and would urge all citizens of the State of California to pause at 7 p.m. EDT on June 14, 2002, for the 23rd annual national "Pause for the Pledge of Allegiance."

Res. Ch. 86 (SCR 74) Machado. Food and agriculture.

This measure would recognize and honor the men and women of California who have contributed to the excellence of the agricultural industry, and would recognize that many steps are taken and millions of people are involved in the delivery of safe food and agricultural products to consumers everyday.

Res. Ch. 87 (SCR 77) Vincent. Juneteenth, Emancipation Day.

This measure would declare June 19 permanently as Juneteenth, Emancipation Day, throughout the State of California and that all Californians celebrate freedom from the vestiges of racial discrimination and the abolition of all badges and incidents of slavery and would urge all Californians to take this opportunity to reflect on the significant role that African-Americans have played in the history of the United States, and California in particular, and on the positive impact that African-Americans continue to make on society.

Res. Ch. 88 (ACA 15) Wayne. Court consolidation.

The California Constitution provides for the division of each county into municipal court districts, but also provides for the abolition of municipal courts within a county, and for the establishment of a unified superior court for that county, upon a majority vote of superior court judges and a majority vote of municipal court judges within the county. By July 2001, all 58 counties had merged the superior and municipal courts.

This measure would delete obsolete references to municipal courts from the California Constitution and make conforming and related changes.

Res. Ch. 89 (ACR 135) Strickland. Ventura County Vietnam Veterans Memorial Highway: Korean War Veterans' Memorial Highway.

This measure would designate that portion of State Highway Route 1 located in Ventura County as the "Ventura County Vietnam Veterans Memorial Highway" and that portion of State Highway Route 126 between the City of Santa Paula and State Highway Route 101 as the "Korean War Veterans' Memorial Highway." The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing these special designations and, upon receiving donations from nonstate sources covering that cost, to erect those plaques and markers and signs.

Res. Ch. 90 (ACR 156) Vargas. Kumeyaay Highway.

This measure would name Interstate Highway Route 8 from Greenfield Drive on the eastern city boundary of El Cajon to Nimitz Boulevard in Mission Bay in San Diego County as the "Kumeyaay Highway." The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing the special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 91 (ACR 172) Koretz. Postpartum Mood and Anxiety Disorder Awareness Month.

This measure would proclaim the month of May 2002 as "Postpartum Mood and Anxiety Disorder Awareness Month" in California, and would request the State Department of Health Services and the State Department of Mental Health to work together to explore ways to improve women's access to mental health care at the state and local levels, to facilitate increased awareness and education about postpartum mood and anxiety disorders, to explore and encourage the use of prenatal screening tools, and to improve the availability of effective treatment and support services.

Res. Ch. 92 (ACR 175) Nation. Day of the Horse.

This measure would designate December 14, 2002, as the Day of the Horse.

Res. Ch. 93 (ACR 194) Maldonado. Physical education.

This measure would proclaim May 1, 2002, to May 7, 2002, inclusive, as Physical Education and Sports Week and proclaim the month of May as Physical Fitness and Sports Month.

Res. Ch. 94 (ACR 212) Liu. Groundwater Awareness Month.

This measure would proclaim the month of June 2002, as Groundwater Awareness Month in California.

Res. Ch. 95 (ACR 218) Cogdill. Harmful, nonnative weeds.

This measure would designate and recognize the 2nd week of July as Harmful, Nonnative Weeds Awareness Week, and would encourage Californians to participate in activities during that week to raise awareness of issues concerning harmful, nonnative weeds.

Res. Ch. 96 (AJR 26) Havice. Military reserve personnel.

This measure would memorialize the President and Congress to take various actions to ensure the fair treatment of military reservists when they apply for loans.

Res. Ch. 97 (AJR 34) Hollingsworth. Disabled military retirees.

This measure would respectfully urge the Congress of the United States to fund the National Defense Authorization Act For Fiscal Year 2002, to eliminate the penalty imposed against disabled military retirees for concurrent receipt of retirement and disability compensation.

Res. Ch. 98 (SJR 25) Scott. Oxygenate requirements in gasoline: waiver of federal requirement.

This measure would request the Congress of the United States to review California's request to be exempted from the gasoline oxygenate additive requirement imposed by the Clean Air Act.

Res. Ch. 99 (ACR 126) Richman. Invasive species.

This measure would request funding from the United States Congress and the United States Department of Agriculture for various purposes related to the protection of California agriculture from invasive plant and animal-destroying insects, diseases, and micro-organisms.

Res. Ch. 100 (AJR 43) Robert Pacheco. Federal Medicaid Assistance Percentages.

This measure would memorialize the President and Congress to take into consideration the 4.4 million Californians who are living below poverty thresholds by taking into account the total number of persons living in poverty rather than the per capita income when establishing the formula that will be used for calculating the federal share of Medicaid costs under the federal Medicaid Assistance Percentages (FMAP).

Res. Ch. 101 (ACR 81) Hollingsworth. Regional transportation corridor: Riverside County and Orange County.

This measure would urge the Department of Transportation and the regional transportation planning agencies to expeditiously consider both alternative transportation corridors between Riverside County and Orange County and taking action to utilize all other modes of transportation.

Res. Ch. 102 (ACR 209) Aroner. Affordable Housing Week.

This measure would proclaim the week of June 1, 2002, to June 9, 2002, inclusive, as Affordable Housing Week and call upon Californians to learn about and honor the contributions of affordable housing.

Res. Ch. 103 (ACR 210) Cedillo. Resurrection Blvd.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This measure commends Resurrection Blvd., a television program for its creative vision in depicting minority populations in a positive light, and encouraging future endeavors in the diversification of the American entertainment industry.

Res. Ch. 104 (SCR 50) Ackerman. Mark Denis Melbourne Memorial Interchange.

This measure would designate the interchange of State Highway Routes 55 and 91 in the City of Anaheim in the County of Orange as the Mark Denis Melbourne Memorial Interchange. The measure would also request the Department of Transportation to determine the cost for appropriate plaques and markers showing this designation and, upon receiving donations from nonstate sources covering that cost, to erect those plaques and markers.

Res. Ch. 105 (SCR 64) Margett. Police Officer Louie Pompei Memorial Interchange.

This measure would name the interchange of State Highway Route 30 and Interstate Highway Route 210 as the Police Officer Louie Pompei Memorial Interchange. The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing the special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 106 (SCR 45) Costa. The William H. "Harry" Armstrong Interchange.

This measure would designate the Herndon Avenue Interchange on State Highway Route 168 in the City of Clovis as the William H. "Harry" Armstrong Interchange in honor and recognition of Mayor and Council Member William H. "Harry" Armstrong. The measure also would request the Department of Transportation to determine the cost for appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 107 (SCR 52) O'Connell. James Dean Memorial Junction.

This measure would designate the junction of State Highway Routes 41 and 46 near Cholame in the County of San Luis Obispo as the James Dean Memorial Junction. The measure would also request the Department of Transportation to determine the cost for appropriate plaques and markers showing this designation and, upon receiving donations from nonstate sources covering that cost, to erect those plaques and markers.

Res. Ch. 108 (SCR 82) Polanco. Korean-Americans.

This measure would recognize the achievements and contributions of Korean-Americans to the United States over the past 100 years and request that the people of California and interested organizations observe the 100th anniversary of Korean immigration to the United States with appropriate programs, ceremonies, and activities.

Res. Ch. 109 (SJR 42) Escutia. Child Care and Development Block Grant.

This measure would memorialize the United States Congress to approve legislation that increases and reauthorizes funding for the Child Care and Development Block Grant.

Res. Ch. 110 (ACR 136) Florez. Rosa Parks Highway.

This measure would designate a portion of State Highway Route 58 in Kern County as the Rosa Parks Highway.

Res. Ch. 111 (ACR 169) Aroner. California youth.

This measure would request that state agencies and the Legislature include young people in the decisionmaking process regarding matters that affect California's young people.

Res. Ch. 112 (ACR 179) Leslie. Highway 50 Association: annual wagon train event.

This measure would designate the Highway 50 Association annual wagon train event as a state historic event.

Res. Ch. 113 (ACR 220) Diaz. How to Live in America Program.

This measure would commend the Counties of Santa Clara, Contra Costa, and San Mateo for their successful implementation of the How to Live in America Program and urge other counties to implement the program.

Res. Ch. 114 (ACR 228) Rod Pacheco. Sheriff Larry D. Smith.

This measure would request the Riverside County Board of Supervisors to name an existing or planned county building in Riverside County after Sheriff Larry D. Smith.

Res. Ch. 115 (ACR 230) Ashburn. Valley Fever Awareness Month.

This measure would proclaim August 2002 as Valley Fever Awareness Month.

Res. Ch. 116 (ACR 233) Bogh. California Medal of Honor recipients.

This measure would recognize and commend the bravery and selflessness of the Medal of Honor recipients of California, and express the Legislature's appreciation for their service and dedication to the citizens of California and the United States.

Res. Ch. 117 (AJR 47) Jackson. Commending Title IX of the Education Amendments of 1972.

This measure would memorialize the President and Congress of the United States to uphold the intent and substance of the current provisions of Title IX of the Education Amendments of 1972, to pursue a stronger enforcement policy for Title IX, and to support the continuation of the strong compliance standards that are in place for Title IX. The measure also would memorialize the President and Congress of the United States to encourage all Americans to participate in the national celebration, "Celebrating 30 Years of Title IX".

Res. Ch. 118 (AJR 48) Papan. Cyprus: reunification and accession to the European Union.

This measure would memorialize the President to increase the administration's efforts to encourage initiatives that will help promote and achieve reunification, reconciliation, stability, and prosperity in Cyprus within the context of the ongoing efforts of the United Nations Secretary General's auspices and on the basis of the relevant United Nations Security Council Resolutions. The measure would also request the United States government to continue to strongly support the accession of Cyprus to the European Union, without the settlement of the Cyprus problem being a precondition for accession.

Res. Ch. 119 (ACR 202) Corbett. Seniors: bill of rights.

This bill would declare that it is the goal of the Legislature that every senior in California receive the best possible health care and that, in order to achieve this goal, the Legislature finds and declares that seniors ought to have specified rights.

Res. Ch. 120 (ACR 211) Nation. Integrating walking and biking into transportation infrastructure.

This measure would encourage all cities and counties to implement the policies of the California Department of Transportation Deputy Directive 64 and the United States Department of Transportation's design guidance document on integrating bicycling and walking when building their transportation infrastructure.

Res. Ch. 121 (AJR 6) Canciamilla. Retirement security and savings.

This measure would memorialize the President and the Congress to enact new legislation that would embody provisions of the Retirement Security and Savings Act of 2000, which was considered by Congress in 2000.

Res. Ch. 122 (AJR 25) Firebaugh. Forest resources.

This bill would memorialize the Congress to declare its encouragement of public and private investment in economically and environmentally sound forest management practices that ensure sustainable forests for the benefit of present and future generations.

Res. Ch. 123 (AJR 42) Calderon. Federal proposal to devolve the administration of the unemployment insurance system.

This measure would urge the President and Congress of the United States to abandon the federal proposal to devolve the administration of the unemployment insurance system. It would also urge the President and Congress of the United States to instead work with the state to ensure that the state receives a greater level of workload-based federal appropriations for administrative financing, and to provide new dedicated federal funding to help the state cover the workers who are now having the most difficulty collecting unemployment benefits.

Res. Ch. 124 (SCR 84) Costa. Sister states: Azores.

This measure would extend an invitation on behalf of the people of California to the people of the Azores, Portugal, to join with California in a sister state relationship.

Res. Ch. 125 (SCR 85) Johannessen. California Highway Patrol Officer Arthur E. Dunn Memorial.

This measure would request the Department of Transportation to grant, without charge, encroachment permits authorizing appropriate memorials, funded by nonstate sources, to be placed within the right-of-way of State Route 89 in the vicinity of milepost markers 89SHA36.00 and 89SHA41.00 to honor the memory of California Highway Patrol Officer Arthur E. Dunn.

Res. Ch. 126 (SCR 86) Johannessen. CHP Officer George W. Redding Memorial.

This measure would request the Department of Transportation to grant, without charge, encroachment permits authorizing appropriate memorials funded by nonstate sources to be placed within the right-of-way of State Highway Route 273 in Shasta County to honor the memory of California Highway Patrol Officer George W. Redding.

Res. Ch. 127 (SCR 100) Chesbro. Family History Month.

This measure would recognize the month of October 2002 as Family History Month and would encourage the people of the state to take an interest in tracing their family's history and to observe the month with appropriate ceremonies and activities.

Res. Ch. 128 (SCR 101) Johnson. Parent-Teacher Association Membership Month.

This measure would proclaim September 2002 as Parent-Teacher Association Membership Month in California.

Res. Ch. 129 (SJR 40) Kuehl. International investment agreements.

This measure would memorialize the President and Congress of the United States that the Congress and the United States Trade Representative should preserve the traditional powers of state and local governments by requiring that negotiators of international investment agreements perform specified duties in that regard.

Res. Ch. 130 (ACR 102) Florez. Senator Jim Costa Highway.

This measure would dedicate a portion of State Highway Route 180 in the County of Fresno as the "Senator Jim Costa Highway." The measure also would request the

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 131 (SCR 95) Torlakson. Sister states.

This measure would invite the State of Baja California Sur, Mexico, to join California in a sister state relationship.

Res. Ch. 132 (SJR 48) Polanco. California fire service terrorism preparedness.

This measure would request the President and Congress of the United States to make sufficient funds available to California to support the state's Fire Service first responder preparedness needs.

Res. Ch. 133 (SCR 91) Knight. "Partnerships for Preparedness" symposiums.

This measure would commend the Office of Military Base Retention and Reuse within the California Technology, Trade, and Commerce Agency for its efforts, including its sponsorship of the "Partnerships for Preparedness" symposiums, and encourage other California cities, counties, and military bases to participate in these symposiums.

Res. Ch. 134 (SCR 99) Torlakson. California Task Force on Youth and Workplace Wellness.

This measure would expand, by 4 members, the California Task Force on Youth and Workplace Wellness. It would provide that 2 of the additional members shall be appointed by the Speaker of the Assembly, and shall include one person from the field of health and one member from the field of education, and that the other 2 additional members shall be appointed by the Senate Committee on Rules, and shall include one person from the field of health and one member from the field of education.

Res. Ch. 135 (SCR 103) Vasconcellos. Legislative Principles of Inclusion.

This measure would declare legislative principles of inclusion and encourage all Californians to consider and adopt these principles for themselves or define their own separate principles of inclusion.

Res. Ch. 136 (SJR 39) Burton. Cuba: removal of restrictions.

This measure would urge the President and Congress of the United States to consider the removal of trade, financial, and travel restrictions to Cuba.

Res. Ch. 137 (SJR 49) Ortiz. Human exposure to environmental chemicals.

This measure would memorialize the President of the United States, the United States Secretary of Health and Human Services, the Director of the Centers for Disease Control and Prevention (CDC), and the California Congressional delegation to seek the immediate release to the State Department of Health Services, and thereby to the California public, of the California-specific findings from the 1999 CDC, National Report on Human Exposure to Environmental Chemicals. This measure would further memorialize the Director of CDC to release all California-specific findings from the National Report on Human Exposure to Environmental Chemicals that is due by December 2002, at the time the report is issued.

Res. Ch. 138 (SJR 50) Brulte. Bicentennial anniversary of the United States Military Academy at West Point.

This measure would respectfully request the United States Congress to recognize the 200th anniversary of the United States Military Academy at West Point.

Res. Ch. 139 (SJR 51) Karnette. United Nations Population Fund.

This measure would respectfully request the President and the Congress of the United States to reinstate funding for the United Nations Population Fund.

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Res. Ch. 140 (ACR 168) Cogdill. Jerry Medina Memorial Freeway.

This measure would designate a specified section of State Highway Route 99 as the Jerry Medina Memorial Freeway. The measure would request the Department of Transportation to determine the cost of appropriate signs and markers designating that specified section of State Highway Route 99, and, upon receiving donations from nonstate sources covering that cost, to erect appropriate signs and markers.

Res. Ch. 141 (ACR 177) Diaz. Foreign teacher recruitment and support.

This measure would urge school districts, schools, and school administrators to review and renew their systematic and sustained efforts to fully support the teachers they recruit from other countries, and to provide those credentialed teachers with improved access to specified development and orientation programs and activities.

Res. Ch. 142 (ACR 178) Diaz. University of California: admissions process.

This measure would request the Regents of the University of California to implement a comprehensive approach in the respective admissions processes of the university's various graduate programs and professional schools, to include a broad variety of academic and personal qualifications, by the end of the 2002–03 academic year. The review requested would include revising the admissions policies of graduate programs and professional schools, to include a broader variety of important qualifications, and evaluation of the weight and value given to these qualifications, so that standardized test scores are not the overriding criterion used to determine admissions. The measure would also request the regents to prohibit, by the end of the 2002–03 academic year, standardized test scores from being used as the sole criterion for consideration of the applicant for, or as the primary criterion to end consideration of the applicant for, admission to the university's various graduate programs and professional schools. The measure would request the regents to make a description of the factors considered by each graduate program or professional school in making admissions decisions reasonably available to any interested person, by publishing the description of the factors in each graduate program and professional schools' catalogue, and making the information available on their respective Internet Web sites.

Res. Ch. 143 (ACR 193) Hollingsworth. Career technical education.

This measure would state that protecting and encouraging career technical education in the secondary public schools will help to ensure that providing economic and educational opportunities for every public high school pupil in this state remains a priority for the Legislature and that it is the purpose and intent of the Legislature to promote career technical education in California's public high schools.

Res. Ch. 144 (ACR 223) Dutra. Alice Livingston Memorial Overcrossing.

This measure would designate the Mather Field Road overcrossing on State Highway Route 50 in Rancho Cordova in the County of Sacramento as the Alice Livingston Memorial Overcrossing.

Res. Ch. 145 (ACR 225) La Suer. Off-Highway Motor Vehicle Recreation Program.

This measure would commend the Off-Highway Motor Vehicle Recreation Program and the off-highway recreationists community on the 30th year anniversary of their program.

Res. Ch. 146 (ACR 237) Steinberg. Childhood Cancer Month.

This measure would declare September as Childhood Cancer Month, and state the commitment of the Legislature in supporting efforts to find cures for, and achieve prevention of, childhood cancer.

Res. Ch. 147 (AJR 30) Dickerson. Wildland fires.

This measure would memorialize the United States Congress and the United States Department of Justice to include the families of wildland firefighting pilots and their crews, past and present, who have worked or who now work on a contract basis as eligible for death benefits on the same basis as public safety officers.

Res. Ch. 148 (AJR 39) Alquist. Airport security workers.

This measure would memorialize the President and the Congress to suspend or eliminate the requirement that security screening personnel be citizens, and instead provide that they must meet the same requirements as persons that serve in the National Guard. The measure would further memorialize the President and the Congress to act to ensure that any legal immigrant that has applied for citizenship be allowed to keep his or her security screening job absent certain evidence.

Res. Ch. 149 (AJR 49) Aroner. Home health care.

This measure would memorialize the President and Congress of the United States to enact legislation to ensure that Medicare home health care recipients are guaranteed the best care, and that home health care providers are not further harmed by administrative changes. This measure would also state the opposition of the Legislature to the 15% cut in home health care payments scheduled for October 1, 2002.

Res. Ch. 150 (AJR 50) Dickerson. Veterans benefits.

This measure would request the President and the Congress of the United States to enact legislation to establish a federal/state partnership to use local county veterans service officers to assist the United States Department of Veterans Affairs in eliminating the veterans claims processing backlog.

Res. Ch. 151 (ACR 188) Reyes. Water as a vital resource.

This measure would resolve that state leaders should continue to examine water issues in order to resolutely and deliberately address these important issues.

Res. Ch. 152 (ACR 190) Shelley. Elections: youth participation.

This measure would express the support of the Legislature for specified steps that would promote civic participation by youth in the democratic process.

Res. Ch. 153 (SCR 55) Ortiz. Stem cell research.

This measure would establish a panel to advise the Legislature on stem cell research.

Res. Ch. 154 (SCR 88) Karnette. John William Coltrane.

This measure would recognize the 75th anniversary of the birth of musician John William Coltrane.

Res. Ch. 155 (SCR 89) Machado. CHP Officer Dale E. Newby Memorial Highway.

This measure would designate the portion of State Highway Route 5 in Stockton that is between Eight Mile Road and French Camp Road as the CHP Officer Dale E. Newby Memorial Highway. The measure would also request the Department of Transportation to determine the cost of appropriate plaques and markers, and upon receiving donations from nonstate sources to cover the cost, to erect those plaques and markers within the right-of-way of the state highway.

Res. Ch. 156 (SCR 92) Alpert. Joint Committee to Develop a Master Plan for Education.

This measure would continue the existence of the Joint Committee to Develop a Master Plan for Education—Kindergarten through University until November 30, 2004, would extend the authority for the ongoing operations of the committee until November 30, 2004, would require the committee to submit a report on its activities to the Legislature at the end

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

of the 2001–02 Regular Session, and would rename the committee the “Joint Committee to Develop a Master Plan for Education.”

Res. Ch. 157 (SCR 93) Alpert. Joint doctoral programs: California State University; University of California.

This measure would express legislative support for the Joint Education Doctorate Initiative of the California State University and the University of California. The measure would encourage the Joint Ed.D. Board and the respective universities to take actions, including the submission of periodic joint reports to the Legislature, that will implement these joint doctoral programs.

Res. Ch. 158 (SCR 94) Costa. Deran Koligian Memorial Highway.

This measure would designate a specified portion of State Highway Route 180 as the “Deran Koligian Memorial Highway.” The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation and, upon receiving donations from nonstate sources covering that cost, to erect those plaques and markers.

Res. Ch. 159 (SCR 102) Polanco. Binational Health Week.

This measure would call on all the people of California to join the people of Mexico and all Californians of Mexican origin in observing and participating in Binational Health Week, to take place the week of October 12 to 19, 2002.

Res. Ch. 160 (SCR 104) Murray. Dosan Ahn Chang Ho Memorial Interchange.

This measure would name the interchange where Interstate Highway Route 10 meets Interstate Highway Route 110 the “Dosan Ahn Chang Ho Memorial Interchange.” The measure would request the Department of Transportation to determine the cost of appropriate plaques and markers showing the special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 161 (SCR 105) Burton. Caltrans Maintenance Worker Memorial Bridge.

This measure would dedicate a bridge on Interstate Route 80 in Sacramento and Yolo Counties as the Caltrans Maintenance Worker Memorial Bridge. The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 162 (SCR 106) O’Connell. September 11, 2001, memorial.

This measure would request the Department of General Services to plant commemorative rose bushes near the east steps of the State Capitol along with the placement of a plaque memorializing those Californians who lost their lives on September 11, 2001.

Res. Ch. 163 (SJR 38) Ortiz. Stem cell research.

This measure would memorialize the President and Congress of the United States to reject legislation impeding stem cell and therapeutic cloning research, and to enact legislation that would impose a ban on reproductive cloning, permit research involving therapeutic cloning, establish a process to facilitate the donation of stem cell materials to researchers, and create guidelines to oversee stem cell research in the United States.

Res. Ch. 164 (SJR 41) Speier. Permanent resident alien airport security screeners.

This measure would memorialize Congress to enact S. 1829 or H.R. 3505, or both of these measures, as the Airport Security Personnel Protection Act to provide for transitional

employment for qualified resident alien airport security screeners until their naturalization processes are completed, as required by these measures.

Res. Ch. 165 (SJR 52) Kuehl. California Wild Heritage Act of 2002.

This measure would memorialize the President of the United States and Congress to enact Senate Bill 2535, the California Wild Heritage Act of 2002.

Res. Ch. 166 (ACR 123) Wayne. California Law Revision Commission: studies.

Under existing law, the California Law Revision Commission is required to study, and is limited to studying, those topics approved for its study by concurrent resolution of the Legislature.

This measure would grant approval to the commission to continue its study of designated topics that the Legislature previously authorized or directed the commission to study.

Res. Ch. 167 (ACR 125) Papan. Relative to the protection of personal information.

This measure would request and authorize the California Law Revision Commission to study, report on, and prepare recommended legislation concerning the protection of personal information relating to or arising out of financial transactions if funding is provided in the 2002-03 Budget Act. The measure would direct that the recommended legislation address specified objectives.

Res. Ch. 168 (ACR 154) Washington. 48th Anniversary of Brown v. Board of Education.

This measure would designate May 17 as California's official day to commemorate Brown v. Board of Education (1954) 347 U.S. 483.

Res. Ch. 169 (ACR 158) Wiggins. Career and vocational education.

This measure would declare that the Legislature is committed to improving career and technical education programs and practices and ensuring that these programs are a major component in the efforts to improve California's system of K-12 education.

Res. Ch. 170 (ACR 189) Longville. California State University, San Bernardino: Chicano/Latino Studies Department.

This measure would urge the Trustees of the California State University to consider establishing a Chicano/Latino Studies Department at California State University, San Bernardino, and request the trustees to submit a report to specified legislative policy committees regarding their decision on this matter.

Res. Ch. 171 (ACR 204) Wayne. City of San Diego's Little Italy.

This bill would designate specified exits on Interstate 5 as the route for the destination of Little Italy and would request the Department of Transportation to determine the costs of appropriate plaques and markers and, upon receipt of donations, to erect these plaques and markers.

Res. Ch. 172 (ACR 205) Zettel. Myositis Awareness Day.

This measure would designate September 21, 2002, as Myositis Awareness Day.

Res. Ch. 173 (ACR 213) Migden. Clean Air Vehicles.

This measure would urge the Golden Gate Bridge, Highway and Transportation District to provide toll-free passage on the Golden Gate Bridge during commute hours to vehicles bearing a distinctive Clean Air Vehicle decal issued by the Department of Motor Vehicles.

Res. Ch. 174 (ACR 215) Aroner. Public postsecondary education: social work education programs.

This measure would urge the California Community Colleges, the California State University, and the University of California to expand their enrollment in social work preparation programs. The measure would also request the California Association of Deans and Directors of Schools of Social Work and the California Social Work Education Center to collaborate with the California Community Colleges, the University of California, the California State University, the Association of Independent California Colleges and Universities, and other interested persons, to develop a master plan for social work education in the state that addresses the state's shortage of social workers and reflects the state's diverse population, to be submitted to the Legislature by January 1, 2004.

Res. Ch. 175 (ACR 221) Nakano. Japanese-American World War II veterans.

This measure would recognize and thank the Nisei World War II veterans for their extraordinary and heroic service to America during World War II, and declare that their sacrifice and valor should forever be a reminder of the true spirit of democracy in America.

Res. Ch. 176 (ACR 234) Canciamilla. Louis J. Papan Highway.

This measure would designate a portion of State Highway Route 1 in San Mateo County as the Louis J. Papan Highway. The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing the special designation and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect appropriate plaques and markers.

Res. Ch. 177 (ACR 235) Richman. Public pension funds: University of California: divestiture of funds.

This measure would urge the University of California to reject calls to divest its pension funds from companies with ties to Israel. The measure would also urge leaders of the Palestinian Authority to clearly renounce terrorism as a form of political expression and to embrace peaceful negotiations.

Res. Ch. 178 (ACR 236) Salinas. Agricultural Worker Health and Housing Commission.

This measure would resolve that an Agricultural Worker Health and Housing Commission, consisting of 10 members and funded solely through private sources, be established. The measure would require the commission to report to the Legislature regarding the agricultural industry's ability to compete in the global marketplace and the commission's recommendations of how to improve the housing and health conditions of agricultural workers.

Res. Ch. 179 (ACR 238) Bogh. California Economic Literacy Week.

This measure would designate the week of October 7, 2002, through October 11, 2002, as California Economic Literacy Week, and would urge Californians to observe these days by working for a better understanding of our economic system.

Res. Ch. 180 (ACR 240) Aroner. Adoption and permanent placement.

This measure would proclaim November 2002, to be Court Adoption and Permanency Month.

Res. Ch. 181 (ACR 241) Papan. Macedonia.

This measure would recognize that the ancient Macedonians were Hellenes, and that the inhabitants of Macedonia today are their Hellenic descendants and part of the northern province of Greece, Macedonia.

Res. Ch. 182 (AJR 52) Chan. National Memorial: Flight 93.

This measure would request the President and the Congress of the United States to enact legislation to designate a National Memorial at the crash site of Flight 93 in Somerset County, Pennsylvania.

Res. Ch. 183 (AJR 57) Diaz. Immigration enforcement.

This measure would state concerns of the Legislature about the use of state and local law enforcement agents to enforce immigration law. It would state legislative findings that, state and local law enforcement agencies lack authority to stop, arrest, or detain persons based upon suspected or alleged violations of the civil provisions of the federal immigration laws, as specified. It would provide for transmittal to the United States Attorney General.

Res. Ch. 184 (AJR 60) Goldberg. Kumeyaay Nation.

This measure would memorialize the United States Immigration and Naturalization Service to continue to work with the Kumeyaay Nation to allow for the pass and repass of Baja Kumeyaay over the international border separating the United States and Mexico.

Res. Ch. 185 (ACA 11) Richman. Infrastructure: finance.

Existing law, commencing on January 10, 2002, requires the Governor to submit to the Legislature a proposed 5-year infrastructure plan. The plan is required to be submitted annually, in conjunction with the Governor's Budget, and to cover a 5-fiscal year period, beginning with the fiscal year that is the same as that covered by the Governor's Budget with which the plan is submitted.

This measure would establish the California Twenty-First Century Infrastructure Investment Fund in the State Treasury. Beginning in the 2006-07 fiscal year, the measure would cause a specified percentage of revenues to be transferred from the General Fund to the infrastructure fund 4 times during the fiscal year. The measure would increase the percentage of revenues to be transferred each year, subject to the rate of increase of total General Fund revenues compared to the prior fiscal year as estimated by the Department of Finance. The measure would require the Department of Finance to prepare an annual plan to expend these funds, unless the Governor directs another state agency to carry out this responsibility.

This measure would require that the funds in the infrastructure fund be allocated by the Legislature for capital outlay purposes, of which 50% would be for acquisition, construction, rehabilitation, modernization, or renovation of state-owned infrastructure and 50% would be for acquisition, construction, rehabilitation, modernization, or renovation of local government infrastructure, excluding school districts and community college districts.

Res. Ch. 186 (ACR 79) Briggs. Highways: entertainment park exit signs.

This measure would state that a county with a population of not more than 900,000 persons that contains an entertainment park that is visited by 120,000 patrons or more per year should be authorized to apply to the Department of Transportation to have an exit sign placed on the nearest major highway access point to the park if the park is located not more than 2 miles from the highway and the street on which the park is located has the same name as the park.

Res. Ch. 187 (ACR 229) Diaz. Mexican Consular identification cards.

This measure would urge cities and counties throughout California, including their respective agencies, and state agencies to accept the Mexican Consular identification cards, known as the "Matricula Consular," as an official form of identification.

Res. Ch. 188 (ACR 242) Mountjoy. Jury Rights Day.

This measure would honor the role juries play in the judicial system and proclaim Thursday, September 5, 2002, as Jury Rights Day.

Res. Ch. 189 (ACR 243) Mountjoy. Constitution Week and Constitution Day.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This measure would declare the week of September 15-21, 2002, as Constitution Week and September 17 as Constitution Day and would request the Governor to proclaim Constitution Week and Constitution Day in a proclamation that would include specified provisions.

Res. Ch. 190 (ACR 249) Pavley. Year of Clean Water: Clean Water Month.

This measure would declare the year 2002 as the "Year of Clean Water" and October 2002 as "Clean Water Month," and would encourage all Californians to recognize the importance of making a personal commitment to do their part to protect water quality and to recommit to achieving the goals of the federal Water Pollution Control Act.

Res. Ch. 191 (ACR 250) Cedillo. Hepatitis C.

This measure would recommend implementation of various prevention and educational activities in order to address the health crisis associated with the hepatitis C virus.

Res. Ch. 192 (ACR 251) Canciamilla. Colorado River: Quantification Settlement Agreement.

This measure would express the finding and declaration of the Legislature that it is of the utmost importance to the people of California that the Quantification Settlement Agreement (QSA) be executed on or before December 31, 2002, with respect to Colorado River water.

Res. Ch. 193 (AJR 37) Lowenthal. Labor negotiations: waterfront workers.

This measure would declare the opposition of the California Legislature to any action by the President and the administration that would impose a federal injunction against waterfront workers, remove waterfront workers from the coverage of the National Labor Relations Act, or send military personnel to West Coast docks to assist in a lockout of waterfront workers.

Res. Ch. 194 (AJR 45) Canciamilla. Independent System Operator.

This measure would urge the Federal Energy Regulatory Commission (FERC) to maintain long-standing federal policies to promote the development of customer generation resources and to ensure the California electricity load served by customer generation does not incur costs for any transmission related service in excess of the transmission costs included in standby service rates developed using ratemaking principles that existed prior to the establishment of the Independent System Operator (ISO). The measure would also urge FERC to reject the cost allocation provisions of the ISO's proposed gross metering policy, provided that the reliability standards, established by an official determination of the Western Electricity Coordinating Council, do not require the ISO to procure ancillary services according to the gross load of customer generators.

Res. Ch. 195 (AJR 53) Aroner. Temporary Assistance for Needy Families (TANF) program.

This measure would urge federal policymakers, in reauthorizing the Temporary Assistance for Needy Families (TANF) program, to, among other things, adjust the TANF block grant for inflation, and maintain state flexibility to spend TANF funds, provide a safety net to vulnerable children, and design the most effective ways to move people into work.

Res. Ch. 196 (AJR 61) Koretz. Holocaust insurance claims.

This measure would urge the International Commission on Holocaust Era Insurance Claims (ICHEIC), the National Association of Insurance Commissioners, and the Department of Insurance to take immediate action to encourage insurers to comply with the ICHEIC claims process, and would urge ICHEIC insurers to continue to fund the ICHEIC operation. This measure would also urge the ICHEIC to advocate more forcefully for

claimants, and to do everything it can to require ICHEIC insurers, the German Insurance Association, and the German Foundation to comply with the ICHEIC claims process.

Res. Ch. 197 (AJR 63) Richman. Extradition.

This measure would memorialize the Executive Branch of the Federal Government to ensure that the federal government addresses Mexico's refusal to extradite to the United States criminals facing life sentences.

**DIGEST OF RESOLUTION  
ADOPTED IN 2002**

2001 – 02 THIRD EXTRAORDINARY SESSION

---

---

**RESOLUTION CHAPTER**

Res. Ch. 1 (SCR 2) Burton. Final adjournment: 2001–02 Third Extraordinary Session.

This measure would provide that the 2001–02 Third Extraordinary Session of the Legislature shall adjourn sine die.

## 2002 DIGEST CHAPTERS SUPERIOR NUMBERS

1 [Ch. 379] I object to the following appropriations contained in Assembly Bill 425.

Item 0450-101-0932—For local assistance, State Trial Court Funding. I reduce this item from \$2,069,477,000 to \$2,068,677,000 by reducing:

(1) 10—Support for the operation of the Trial Courts from \$1,872,495,000 to \$1,871,695,000.

I am deleting the \$800,000 legislative augmentation to increase funding for family court services activities. Although this program is meritorious, deletion of funding for this program expansion is necessary in light of current fiscal constraints. With this action, \$111.5 million remains to support family court services.

Item 0450-111-0001—For transfer by the Controller to the Trial Court Trust Fund. I reduce this item from \$1,108,568,000 to \$1,079,568,000.

I am deleting the \$800,000 legislative augmentation to increase funding for family court services activities to conform to the action taken in Item 0450-101-0932.

I am reducing this transfer by \$28,200,000 on a one-time basis. This is a technical adjustment consistent with the January 10 proposal to reduce the 2001–02 transfer by this amount. Since the transfer to the Trial Court Trust Fund for fiscal year 2001–02 was inadvertently not reduced, this action is necessary and will still provide sufficient resources in the Trial Court Trust Fund to meet the level of appropriation provided in this act for 2002–03.

Item 0860-490—Reappropriation, Board of Equalization. I revise this item from \$639,000 to \$339,000 as follows:

“Notwithstanding any other provision of law, as of June 30, 2002, the unencumbered balance of the appropriation, not to exceed ~~\$639,000~~ \$339,000, provided in the following citations are reappropriated until June 30, 2003, upon review and approval of the Department of Finance for (1) preliminary plans, working drawings, or construction of any project for the alteration of a state or leased facility to facilitate the transition of new Board of Equalization members; and (2) the upgrade of one of the two CEA 1 allocations to the CEA 2 level in each of the elected Board Member offices to recognize the increased level of duties and responsibilities required.

0001—General Fund

(1) Item 0860-001-0001, 10000000—Personal services, Budget Act of 2001 (Ch. 106, Stats. 2001)

(2) Item 0860-001-0001, 30000000—Operating Expenses and Equipment, Budget Act of 2001 (Ch. 106, Stats. 2001)”

I am deleting \$300,000 of the \$639,000 reappropriation, which was for the purposes of facility upgrades for incoming Board members and upgrades of Board member positions. My reduction will enable \$300,000 to revert to the General Fund.

Item 0954-101-0001—For local assistance, Scholarshare Investment Board. I revise this item by deleting Provision 2.

I am deleting Provision 2, which states legislative intent to delay payments for 9th and 10th grade awards for the Governor’s Scholars Program by one year. Current law requires that awards be provided to all students who meet the criteria for an award under this program. Therefore, this language expresses intent to enact a substantive change of law, which can only be included within a single subject bill, not the Budget Act.

Item 1730-001-0001—For support of the Franchise Tax Board. I reduce this item from \$402,384,000 to \$401,298,000 by reducing:

(1) 10-Tax Programs from \$384,174,000 to \$383,088,000.

I am deleting the legislative augmentation of \$250,000 for the City Business Tax Program that allows the Franchise Tax Board to purchase information regarding local

business tax licenses from cities. This reduction is necessary to provide for a prudent General Fund reserve in light of the State's current fiscal condition.

I am deleting the legislative augmentation of \$836,000 and 21.5 personnel years, which would provide funding for the tax assistance call center. While I am supportive of efforts in this area, I am unable to support this augmentation due to fiscal constraints and limited resources in the General Fund. With this action, approximately \$15 million in funding remains for the call center.

Item 2240-104-0001—For transfer, upon order of the Director of Finance, to the Farmworker Housing Grant Fund. I reduce this item from \$13,984,000 to \$10,984,000 and by deleting Provision 2.

I am reducing this item by \$3,000,000 and deleting Provision 2. This reduction is necessary to keep State spending growth in line with revenues and provide for a prudent General Fund reserve for economic uncertainties. At my Homelessness Summit in April 2002, I signed the Housing and Emergency Shelter Trust Fund Act of 2002, which places a \$2.1 billion housing bond on the November 5, 2002, general election ballot. If approved by the voters, that bond would provide an unprecedented \$200 million for farmworker housing programs.

I am deleting Provision 2 to conform to this action. That provision would decrease this item by \$8,500,000 only if the voters in the November general election approve the Housing and Emergency Shelter Trust Fund Act of 2002.

Item 2640-102-0046—For local assistance, Special Transportation Programs. I delete this item.

I am deleting the \$5,100,000 legislative augmentation for Special Transportation Programs. The program will receive its statutory allocation of \$98,018,000 even with this deletion. I am taking this action to conform the budget to the extent possible to the 2002 State Transportation Improvement Program (STIP) Fund Estimate. The Fund Estimate identifies \$39.2 million of Public Transportation Account funds available for allocation by the California Transportation Commission for intercity rail and other projects through the STIP. I cannot support an augmentation for Special Transportation Programs at this time because the resources available for STIP allocations will be less than estimated and I want to ensure the retention of any available resources for that purpose.

Item 2660-013-0042—For transfer by the Controller, upon order of the Director of Finance, from the State Highway Account, State Transportation Fund, to the Traffic Congestion Relief Fund. I revise this item by deleting Provision 2.

I am deleting Provision 2 that requires the transfer from the State Highway Account to the Traffic Congestion Relief Fund be made on an "as needed" basis rather than once at the beginning of the fiscal year. This language would require additional monitoring and accounting activities by the Department of Transportation, the Department of Finance, and the State Controller's Office that would otherwise not be necessary, which results in additional costs to the State. As such, this language is unnecessarily restrictive and interferes with the Administration's ability to manage State programs.

Item 2660-491—Reappropriation, Department of Transportation. I revise this item by deleting Schedule (3) under 0001-General Fund of this item.

I am deleting Schedule (3) by reducing the amount available for reappropriation by \$1,500,000 in unexpended funds in Item 2660-101-0001, Budget Act of 2000, for the purpose of a transit station project in Santa Clara County. My veto will enable the \$1,500,000 to revert to the General Fund. The reappropriation would have redirected the funds to a child care facility project adjacent to the transit station. Notwithstanding the merits of this project, this action is essential due to limited resources in the General Fund. It should be noted that this Budget Act contains \$1,403,396,000 in State funds

for the Department of Education to fund child development and childcare programs. Additionally, the Department of Housing and Community Development administers a loan program for the construction of new childcare facilities.

Item 2660-496—Reversion, Department of Transportation. I revise this item by decreasing Schedule (1) by \$16,937,000 and Schedule (2) by \$48,720,000.

I am revising Schedules (1) and (2) as follows to provide funds for unanticipated encumbrances for transportation projects:

0042—State Highway Account

(1) Item 2660-101-0042, Budget Act of 1998 (Ch. 324, Stats. 1998)

(a) 20.25-Highway Transportation—State Local Partnership ~~\$88,937,000~~  
\$72,000,000

(2) Item 2660-101-0042, Budget Act of 1999 (Ch. 50, Stats. 1999)

(a) 20.30-Highway Transportation—Local Assistance ~~\$65,720,000~~ \$17,000,000

Item 2920-001-0001—For support of Technology, Trade, and Commerce Agency. I reduce this item from \$20,719,000 to \$20,468,000 by reducing:

(3) 10-Economic Development from \$7,445,000 to \$7,345,000;

(4) 20-International Trade and Investment from \$3,814,000 to \$3,664,000;

(8) 60-Economic Research and Strategic Initiatives from \$563,000 to \$562,000;

and by deleting Provision 2.

I am reducing funding for the Office of Military Base Reuse and Retention by \$100,000. This reduction is necessary to help provide for a prudent General Fund reserve in light of the State's current fiscal condition. This reduction is consistent with the reductions I proposed for this program in the May Revision. With this reduction, \$193,000 still remains to support the Office of Military Base Reuse and Retention. The next round of military facility closures will not take place until 2005, allowing time to reconsider this program's funding in 2003-04 to the extent fiscal conditions then allow.

I am reducing funding for the evaluation of the foreign trade offices by \$150,000. AB 3000, the general government trailer bill to the 2002-03 Budget Bill includes provisions that will require any proponents of a new foreign trade office to submit a proposed business plan for any newly proposed international trade office. The Technology, Trade, and Commerce Agency will evaluate any new offices proposed by this Administration from within its existing funding. As such, additional funds are not required for this activity.

I am reducing this item by \$1,000 from Economic Research and Strategic Initiatives and deleting Provision 2, which would declare the Legislature's intent that, although no additional funds are appropriated in this item, the activities of the California Economic Strategy Panel shall be funded from this item. This agency's budget constraints do not permit redirecting resources to fund the activities of the panel.

Item 2920-011-0001—For support of Technology, Trade, and Commerce Agency. I reduce this item from \$5,192,000 to \$4,692,000 by reducing:

(1) For transfer to the Small Business Expansion Fund (0918) from \$5,162,000 to \$4,662,000,

and by deleting Provision 1.

I am reducing this item by \$500,000 and deleting Provision 1, which would specify that these funds are for the establishment of the Small Business Financial Development Corporation in southeast Los Angeles. The need for such a new financial development corporation has not been demonstrated, and there are several of the 11 existing financial development corporations already located in the Los Angeles area. This reduction is also necessary to limit program expansions and provide for a prudent General Fund reserve in light of the State's current fiscal condition.

Item 3110-001-0001—For support of Special Resources Programs. I reduce this item from \$430,000 to \$200,000 and delete Provision 1.

This item provides matching funds for federal grants under the National Sea Grant College Program Act. Over the past three years, I have provided over \$2.3 million for grants associated with this program. I believe this program has merit and have committed this Administration to increased participation in accordance with my environmental protection priorities. However, these reductions are necessary to limit program expansions and provide for a prudent General Fund reserve in light of the State's current fiscal condition. With these reductions, \$200,000 still remains to support the Sea Grant program. Matching grants for this year should be evaluated and prioritized within the \$300 million research budget for the University of California.

I am deleting Provision 1, which would have allocated \$80,000 of this item to the University of Southern California. I support the existing grant allocation process that is the statutory responsibility of the Resources Agency, acting upon recommendation from the Sea Grant Advisory Panel. This deletion conforms to the appropriation reductions specified above.

Item 3360-001-0465—For support of Energy Resources Conservation and Development Commission. I reduce this item from \$51,247,000 to \$49,247,000 by reducing:

- (2) 20-Energy Resources Conservation from \$23,532,000 to \$21,532,000.

I am reducing the legislative augmentation for Dairy Waste-to-Energy Programs from \$5,000,000 to \$3,000,000. I believe that this level of funding will serve the important goals of helping to address water pollution problems associated with dairies and providing an additional source of fuel to generate energy without resulting in the need to increase surcharges on California's electric customers.

Item 3810-301-6029—For capital outlay, Santa Monica Mountains Conservancy. I reduce this item from \$20,000,000 to \$12,000,000 by reducing:

- (1) 50.20.001-Capital outlay acquisitions from \$20,000,000 to \$12,000,000.

I have submitted an expenditure plan for Proposition 40 that meets current environmental acquisition priorities for the Santa Monica Mountains Conservancy Zone and the Rim of the Valley Corridor, and is fiscally responsible. Reduction of this item corresponds to the expenditure priorities associated with that plan.

Item 3835-301-6029—For capital outlay, Baldwin Hills Conservancy. I reduce this item from \$20,000,000 to \$15,000,000.

- (1) 20-Capital Outlay Acquisition and Improvement Program from \$35,000,000 to \$30,000,000.

I have submitted an expenditure plan for Proposition 40 that meets current environmental acquisition priorities for the Baldwin Hills Conservancy and is fiscally responsible. Reduction of this item corresponds to the expenditure priorities associated with that plan.

Item 3860-001-6029—For support of Department of Water Resources. I delete this item and Provision 1 to make a technical correction to the Budget Bill.

This technical veto will conform to the Legislature's intent; the funding provided in this item is duplicative of Item 3860-001-6031. Therefore, in order to correct this technical error in the Budget Bill, I am deleting this item.

Item 3900-001-0044—For support of State Air Resources Board. I reduce this item from \$55,654,000 to \$53,854,000 by reducing:

- (1) 15-Mobile Source from \$101,157,000 to \$99,357,000.

I am deleting the \$1,300,000 legislative augmentation for Community Health and the \$500,000 legislative augmentation for Global Warming. Although meritorious, these program expansions cannot be funded at this time because of fiscal constraints and limited resources in the Motor Vehicle Account. With this action, \$2,235,000 still remains to support the Community Health program.

Item 3900-101-0044—For local assistance, State Air Resources Board. I reduce this item from \$15,111,000 to \$10,111,000 by reducing:

- (1) 35-Subvention from \$15,111,000 to \$10,111,000.

I am deleting the \$5,000,000 legislative augmentation for subventions to local air districts. This action is necessary because of fiscal constraints and limited resources in the Motor Vehicle Account. With this action, \$10,111,000 still remains for local air districts.

Item 3980-001-0001—For support of Office of Environmental Health Hazard Assessment. I reduce this item from \$12,929,000 to \$12,220,000 by reducing:

- (1) 10-Health Risk Assessment from \$15,997,000 to \$15,288,000.

I am deleting the \$709,000 legislative augmentation for risk assessments, evaluations of contaminants, and the development of standards. This action is necessary to keep State spending growth in line with revenues and provide for a prudent General Fund reserve for economic uncertainties. With this action, \$15,288,000 still remains to support the Office of Environmental Health Hazard Assessment.

Item 4120-101-0001—For local assistance, Emergency Medical Services Authority. I reduce this item from \$31,486,000 to \$26,486,000 by reducing:

- (1) 10-Emergency Medical Services Authority from \$40,005,000 to \$35,005,000, and by revising Provision 7.

I am sustaining \$20,000,000 and vetoing \$5,000,000 of the \$25,000,000 legislative augmentation for support of the state's trauma system providers. Recognizing trauma centers have experienced increasing fiscal pressure, I sustained \$25,000,000 in 2001-02 to assist the State's trauma care providers. This reduction is necessary in light of the State's current fiscal constraints.

I am revising Provision 7 to conform to this action.

- “7. The State Controller shall transfer \$25 \$20 million in funds appropriated in this item to the Trauma Care Fund.”

Item 4130-490—Reappropriation, California Health and Human Services Agency Data Center. I revise this item by revising Provision 1.

In order to correct a technical error in the Budget Bill, I am amending Provision 1 by deleting the requirement that the amount of funding reappropriated for automation projects be consistent with the amount approved by the Department of Information Technology (DOIT) in a special project report or equivalent document. As statutory authority for the DOIT expired on June 30, 2002, this language is no longer applicable.

- “1. It is the intent of this item to continue funding approved activities for the automation projects that, due to schedule changes, result in unexpended appropriations one year and the need for additional funding in the following year. Therefore, notwithstanding any other provision of law, the balance of the appropriations for these automation projects may, upon approval of the Department of Finance, be reappropriated for transfer to and in augmentation of the corresponding items in this act. The funds reappropriated by this provision shall be made available consistent with the amount approved by the Department of Finance and the Department of Information Technology based on an approved special project report or equivalent document not sooner than 30 days after providing notification in writing to the chairperson of the fiscal committee of each house of the Legislature and the Chairperson of the Joint Legislative Budget Committee.”

Item 4260-001-0001—For support of Department of Health Services. I revise this item by reducing:

- (1) 10-Public and Environmental Health from \$309,846,266 to \$284,446,266;
- (41) Amount payable from the Federal Trust Fund (Item 4260-001-0890) from -\$358,240,000 to -\$332,840,000;

and by deleting Provision 4.

I am reducing the amount payable from the Federal Trust fund by \$25,400,000 as a technical adjustment. This funding, intended to support the State's efforts to combat bioterrorism, has been included in a separate appropriation bill, SB 406. Therefore, inclusion in Budget Act totals is no longer necessary. I am also deleting \$25,400,000 from the Federal Trust Fund in Item 4260-001-0890 to conform to this action.

The May Revision proposed, and the Legislature approved, 91 State positions and funding for 43 contract staff for the Department to expand the Medical Case Management Program (MCMP). The MCMP provides in-home care to severely ill Medi-Cal beneficiaries, allowing them to avoid costly institutional care. Savings of \$18 million (\$9 million General Fund) were adopted to reflect this expansion. To achieve the budgeted savings, the Department requires a total of 91 staff. Therefore, the total of 134 staff approved for this activity is overstated by 43.

In addition to the MCMP expansion, the Legislature also approved additional savings-generating activities proposed in the May Revision. However, an insufficient number of positions were proposed, and subsequently approved by the Legislature, to achieve the estimated savings through those activities. Therefore, I am directing the Department of Health Services to utilize 12 of the excess 43 MCMP positions as appropriate to ensure that the Department meets the savings targets adopted by the Legislature. I am eliminating the remaining 31 excess positions. However, I am allowing the department to retain the funding and directing Department of Health Services to fill the positions as soon as possible to ensure that the savings are achieved.

I am deleting Provision 4 as a technical adjustment. This language was included in the 2001-02 Budget Act to govern funding for the Medi-Cal assisted living waiver benefit. A portion of the funding is reappropriated to 2002-03 through Item 4260-490. Therefore, this provision is no longer necessary.

Item 4260-001-0890—For support of Department of Health Services. I reduce this item from \$357,215,000 to \$331,815,000.

I am reducing this item by \$25,400,000 to conform to the action I have taken in Item 4260-001-0001.

Item 4260-101-0001—For local assistance, Department of Health Services. I reduce this item from \$9,789,639,000 to \$9,749,203,000 by reducing:

- (1) 20.10.010-Eligibility (County Administration) from \$1,523,866,000 to \$1,464,257,000;
- (3) 20.10.030-Benefits (Medical Care and Services) from \$23,172,770,000 to \$23,156,945,000;
- (5) Amount payable from the Federal Trust Fund (Item 4260-101-0890) from -\$14,951,031,000 to -\$14,916,033,000;

and by deleting Provisions 12 and 15.

I am deleting Provision 12. Due to the delay of the budget, September 30, 2002 is no longer a meaningful date for a facility to apply for reimbursement through the Wage Adjustment Rate Program, as described in Section 14110.65 of the Welfare and Institutions Code. Nonetheless, a specific timeframe for when nursing homes can submit a plan is necessary. As such, I am directing the Department of Health Services to issue instructions that allow submittal of a rate adjustment request form up until 30 days after the effective date of the final regulations.

Partially restoring the rates paid to Medi-Cal providers is a priority of my Administration as well as the Legislature. In order to accomplish the intent of the Legislature,

the Director of the Department of Health Services will be reducing the provider rates to the pre-August 2000 level, pursuant to AB 442. I am sustaining funding to allow exemptions, as prescribed in AB 442, from provider rate reductions for the following services: California Children's Services, non-emergency medical transportation, home health services, shift nursing, and family planning physician services. However, the Director can then use existing authority to develop regulations that would partially restore Medi-Cal provider rates by implementing my January 10 budget proposal and rescinding the May Revision rate reductions. The rescission of the May Revision provider rate reductions would take effect retroactively to the date of my signing AB 442, the omnibus health trailer bill. Any funding adjustments needed to effectuate these outcomes will be addressed in my revised 2002–03 budget submitted to the Legislature in January 2003.

I am sustaining \$58,959,000 of the \$87,959,000 legislative augmentation which restored the 20 percent reduction I proposed in Medi-Cal county administration funding. The total funding provided represents an approximate 6 percent reduction for counties to continue the work they perform on behalf of the State. This reduction is necessary in light of the State's fiscal constraints and is consistent with General Fund reductions being applied to State agencies and departments. In addition, I am sustaining the \$58,959,000 of the \$87,959,000 legislative augmentation to the Federal Trust Fund, Item 4260-101-0890, to conform to this action.

I am deleting the \$5,997,000 legislative augmentation for implementation of the Medi-Cal expansion that on July 1, 2002, would link children's Medi-Cal eligibility with eligibility for the National School Lunch Program, pursuant to Chapter 894, Statutes of 2001 (AB 59). Although I am supportive of this program, it would not be fiscally prudent to implement this program expansion given the current economic situation. I am deleting \$5,998,000 from the Federal Trust Fund, Item 4260-101-0890 to conform to this action. I am also deleting Provision 15 to conform to this action.

I am deleting the \$5,439,000 legislative augmentation that reflected the rejection of my proposal to implement a county share of cost associated with the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) program. The May Revision proposed to require counties to provide a 10 percent match to any new growth in the cost of the EPSDT Program. It is my intention to proceed administratively to implement this reform. This match will give counties an incentive to control costs for this program, which have recently been increasing by over 30 percent per year.

Item 4260-101-0890—For local assistance, Department of Health Services. I reduce this item from \$14,951,031,000 to \$14,916,033,000.

I am reducing this Item by \$34,998,000 to conform to the action I have taken in Item 4260-101-0001.

Item 4260-111-0001—For local assistance, Department of Health Services. I reduce this item from \$425,121,000 to \$423,121,000 by reducing:

- (2) 10.20.010-Environmental Management from \$26,344,000 to \$944,000;
- (9) 20.40-Primary Care and Family Health from \$1,502,101,430 to \$1,498,101,430; and
- (20) Amount payable from the Federal Trust Fund (Item 4260-111-0890) from -\$1,078,375,000 to -\$1,050,957,000.

I am deleting the \$2,000,000 legislative augmentation to update the Children's Health and Disability Prevention Program (CHDP) periodicity schedule. The Department of Health Services reviews the appropriateness of care provided in CHDP within programmatic and fiscal constraints. Due to fiscal constraints and limited General Fund resources, I cannot support an augmentation for this program expansion. In addition, the administration has proposed the CHDP Gateway to pre-enroll children into Medi-Cal or the Healthy Families Program so that they would receive comprehensive medical care in addition to health screening.

I am also deleting the \$2,000,000 legislative augmentation from the Federal Trust Fund in Item 4260-111-0890 to conform to this action.

I am reducing the amount payable from the Federal Trust fund by \$25,400,000 as a technical adjustment. This funding, intended to support the State's efforts to combat bioterrorism, has been included in a separate appropriation bill, SB 406. Therefore, inclusion in Budget Act totals is no longer necessary. I am also deleting \$25,400,000 from the Federal Trust Fund in Item 4260-111-0890 to conform to this action.

Item 4260-111-0236—For local assistance, Department of Health Services. I revise this item by deleting Provision 1.

I am deleting Provision 1 which would redirect funding from the California Healthcare for Indigents Program to the Children's Treatment Program (CTP). Although I am very supportive of children's health care programs, this provision reduces the Administration's flexibility in providing funds to local health care providers. In addition, the new Child Health and Disability Prevention Gateway Program should greatly mitigate the need for CTP funding by placing large numbers of children in comprehensive health care in either the Medi-Cal or Healthy Families Program.

Item 4260-111-0890—For local assistance, Department of Health Services. I reduce this item from \$1,078,357,000 to \$1,050,957,000.

I am reducing this item by \$27,400,000 to conform to the action I have taken in Item 4260-111-0001.

Item 4260-113-0001—For local assistance, Department of Health Services. I reduce this item from \$29,791,000 to \$22,125,000 by reducing:

- (1) 20.10.010-Eligibility (County Administration) from \$12,709,000 to \$11,547,000;
- (3) 20.10.030-Benefits (Medical Care and Services) from \$80,620,000 to \$59,722,000; and
- (4) Amount payable from the Federal Trust Fund (Item 4260-113-0890) from -\$63,630,000 to -\$49,236,000.

I am deleting the \$7,666,000 legislative augmentation for the Medi-Cal to Healthy Families two-month bridge. I have already provided \$13.6 million (\$4.7 million General Fund) for a one-month coverage bridge for children. Although I am supportive of providing a coverage bridge for children transitioning from Medi-Cal to the Healthy Families Program, I cannot support extending this program for an additional month or expanding the program to include parents due to fiscal constraints and limited General Fund resources.

I am also deleting the \$14,394,000 legislative augmentation from the Federal Trust Fund in Item 4280-113-0890 to conform to this action.

Item 4260-113-0890—For local assistance, Department of Health Services. I reduce this item from \$63,630,000 to \$49,236,000.

I am reducing this item by \$14,394,000 to conform to the action I have taken in Item 4260-113-0001.

Item 4260-301-0001—For capital outlay, Department of Health Services. I delete this item to make a technical correction to the Budget Bill.

The May Revision proposed deletion of this item with which the Legislature concurred. However, the item was inadvertently left in the final version of the Budget Bill. This technical veto will conform the Budget Act to the May Revision.

Item 4260-490—Reappropriation, Department of Health Services. I revise this item by revising Provision 1.

In order to correct a technical error in the Budget Bill, I am amending Provision 1 by deleting the requirement that the amount of funding reappropriated for automation projects be consistent with the amount approved by the Department of Information

Technology (DOIT) in a special project report or equivalent document. As statutory authority for the DOIT expired on June 30, 2002, this language is no longer applicable.

“1. It is the intent of this item to continue funding approved activities for the automation projects that, due to schedule changes, result in unexpended appropriations one year and the need for additional funding in the following year. Therefore, notwithstanding any other provision of law, the balance of the appropriations for these automation projects may, upon approval of the Department of Finance, be reappropriated for transfer to and in augmentation of the corresponding items in this act. The funds reappropriated by this provision shall be made available consistent with the amount approved by the Department of Finance and the Department of Information Technology based on an approved special project report or equivalent document not sooner than 30 days after providing notification in writing to the chairperson of the fiscal committee of each house of the Legislature and the Chairperson of the Joint Legislative Budget Committee.”

Item 4280-101-0001—For local assistance, Managed Risk Medical Insurance Board. I reduce this item from \$69,709,000 to \$19,695,000 by reducing:

- (2) 40-Healthy Families Program from \$771,619,000 to \$634,791,000; and
- (4) Amount payable from the Federal Trust Fund (Item 4280-101-0890) from -\$479,448,000 to -\$392,634,000.

I am deleting the \$50,014,000 legislative augmentation for the Healthy Families Program (HFP) Parent Expansion. Although I am supportive of expanding Healthy Families coverage to include parents, I cannot support this augmentation and program expansion due to fiscal constraints and limited General Fund resources. I am also deleting the \$86,814,000 legislative augmentation from the Federal Trust Fund in Item 4280-101-0890 to conform to this action.

Item 4280-101-0890—For local assistance, Managed Risk Medical Insurance Board. I reduce this item from \$479,448,000 to \$392,634,000.

I am reducing this item by \$86,814,000 to conform to the action I have taken in Item 4280-101-0001.

Item 4280-102-0001—For local assistance, Managed Risk Medical Insurance Board. I reduce this item from \$4,009,000 to \$1,593,000 by reducing:

- (1) 40-Healthy Families Program from \$48,292,000 to \$41,788,000, and
- (3) Amount payable from the Federal Trust Fund (Item 4280-102-0890) from -\$32,869,000 to -\$28,781,000.

I am deleting the \$2,416,000 legislative augmentation for the Healthy Families Program Parent Expansion. Although I am supportive of expanding Healthy Families coverage to include parents, I cannot support this augmentation and program expansion at this time due to fiscal constraints and limited General Fund resources. I am also deleting the \$4,088,000 legislative augmentation from the Federal Trust Fund in Item 4280-102-0890 to conform to this action.

Item 4280-102-0890—For local assistance, Managed Risk Medical Insurance Board. I reduce this item from \$32,869,000 to \$28,781,000.

I am reducing this item by \$4,088,000 to conform to the action I have taken in Item 4280-102-0001.

Item 4300-101-0001—For local assistance, Department of Developmental Services. I reduce this item from \$1,458,170,000 to \$1,452,555,000 by reducing:

- (2) 10.10.020-Purchase of Services from \$1,780,703,000 to \$1,775,088,000.

I am deleting the \$5,615,000 legislative augmentation for Community Placement Plan activities. The Legislature provided an augmentation for one-time grants to develop community resources. In my January Budget, I proposed a total of \$50,220,000 for Community Placement Plan activities, including an augmentation of

\$20,400,000. This reflected my ongoing commitment to provide community-based services to developmentally disabled consumers. With this base reduction, the funding level I proposed in my January Budget will be maintained to facilitate the movement of Developmental Center consumers into the community.

Item 4440-001-0001—For support of Department of Mental Health. I reduce this item from \$28,442,000 to \$28,172,000 by reducing:

(1) 10-Community Services from \$33,679,000 to \$33,409,000, and by deleting Provision 2.

I am deleting \$150,000 for county plans for children's mental health services pursuant to legislation (AB 2740) to be enacted during the 2001–02 regular session. The counties are already required to assess mental health needs and develop plans to meet those needs. Section 5772 of the Welfare and Institutions Code requires the local mental health boards at the county level to complete these responsibilities. Since these bodies already exist and have the responsibility for developing plans to meet mental health needs, additional systems and funding do not appear to be needed. Consequently, I cannot support this augmentation at this time.

I am also deleting \$120,000 and Provision 2, which requires that \$120,000 in General Fund savings achieved through the elimination of vacant positions be redirected for the Protection and Advocacy, Inc., contract. In my January Budget, I proposed to reduce the contract for patient rights advocacy from \$800,000 to \$680,000 to achieve General Fund savings. The reduction to the patients' rights contract will reduce administrative expenses and will not affect the availability of services to assist individuals with mental illness. However, the Legislature subsequently redirected \$120,000 to restore the proposed reduction to the patients' rights contract. Although I am supportive of patient rights advocacy, I cannot support this legislative augmentation at this time due to fiscal constraints and limited General Fund resources.

Item 4440-101-0001—For local assistance, Department of Mental Health. I reduce this item from \$106,128,000 to \$80,328,000 by reducing:

(1) 10.25-Community Services—Other Treatment from \$1,142,885,000 to \$1,127,446,000;

(3) 10.47-Community Services—Children's Mental Health Services from \$33,800,000 to \$20,000,000; and

(6) Reimbursements from  $-\$1,081,852,000$  to  $-\$1,076,413,000$ ; and by deleting:

(2) 10.40-Community Services—Adult System of Care (\$2,000,000).

I am sustaining \$20,000,000 of the \$33,800,000 legislative augmentation provided for Children's System of Care (CSOC). I note with concern that this program has been unable to provide outcome data for all the children served by this program or documented cost savings in the same manner as the Integrated Services for Homeless Adults (ISHA) program. However, I remain supportive of children's mental health programs, and note that, this Administration provided sufficient funding to implement the CSOC statewide with a \$15.5 million General Fund augmentation in 2000–01, bringing total funding to \$41.9 million General Fund. I reduced the program by \$2.1 million last year because of the State's economic situation. At that time, I noted that \$13 million for mental health services for children in the Healthy Families Program was available to assist children who were not eligible for Medi-Cal. This year, the fiscal challenges facing the State are even greater. Finally, I am directing the Department of Mental Health to restructure the CSOC to provide better accountability and documented cost savings.

I am reducing \$10,000,000 for ISHA. I note that this Administration launched this program in 1999–00 with \$10 million, and subsequently provided significant augmentations: \$45.6 million in 2000–01, and \$10 million in 2001–02, for a total funding of \$65.6 million. However, the State's current fiscal challenges necessitate this \$10

million reduction. At my Homelessness Summit in April 2002, I signed the Housing and Emergency Shelter Trust Fund Act of 2002, which places a \$2.1 billion housing bond on the November 5, 2002, general election ballot. If approved by the voters, this bond would provide \$195 million for 2,380 to 2,530 of units of transitional housing and \$195 million for emergency shelters to assist an estimated 31,160 homeless adults.

I am eliminating \$2,000,000 for the Adult Systems of Care. I proposed this reduction as part of the May Revision, and the Legislature restored the funding. The Adult Systems of Care program is a categorical program, supplementing the realignment funding the counties receive. The counties will receive over \$1.1 billion in Realignment funding for mental health services and have an incentive to continue this program as offsetting savings occur predominately at the local level.

I am reducing reimbursements by \$5,439,000 to delete the legislative augmentation that reflected the rejection of my proposal to implement a county share in the costs associated with the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) program. The May Revision proposed to require counties to provide a 10 percent match to any new growth in the cost of the EPSDT Program. It is my intention to proceed administratively to implement this reform. This match will give counties an incentive to control costs for this program, which have recently been increasing by over 30 percent per year. This conforms to my action in Item 4260-101-0001. I am highly supportive of children's mental health programs and note that I am sustaining \$20 million for the CSOC program.

Item 4440-101-0890—For local assistance, Department of Mental Health. I reduce this item from \$59,629,000 to \$57,629,000 by deleting:

(1.5) 10.47-Community Services—Children's Mental Health Services (\$2,000,000).

I am reducing \$2,000,000 for the Children's Mental Health Services to conform to my action for the Children's Systems of Care Program in Item 4440-101-0001.

Item 4700-101-0001—For local assistance, Department of Community Services and Development. I revise this item by reducing:

(2) 47-Naturalization Services from \$8,476,000 to \$7,601,000, and

(3) Reimbursements from -\$5,875,000 to -\$5,000,000.

I am deleting the \$875,000 legislative augmentation in reimbursements from the Employment Development Department for the Naturalization Services Program (NSP) to conform to the actions taken in Item 5100-001-0869. With these actions, the Budget retains \$7.9 million General Fund for the NSP.

Item 5100-001-0869—For support of state programs under the Workforce Investment Act, Employment Development Department. I revise this item by deleting Provisions 3, 4, and 5.

I am deleting Provision 3, which would require the Employment Development Department (EDD) to allocate \$875,000 to the Department of Community Services and Development for naturalization and citizenship services. Under the federal Workforce Investment Act (WIA), the Governor has the authority to allocate 25 percent of WIA dislocated workers funding for Rapid Response allocation to areas that experience disasters, mass layoffs or plant closings, or other events that precipitate substantial increases in unemployment. This provision would decrease the funding available to the Administration to quickly respond to such events.

I am also deleting Provision 4 because it places a limit of \$4 million on the amount of funds available for the Faith-Based Initiative. Section 128 of the federal WIA allows the Governor to allocate 15 percent of the WIA funds allotted to California, for the purposes of statewide and employment training activities. Although this funding is subject to legislative appropriation, the language in Provision 4 impinges on the authority of this Administration to allocate funding for this critical program, which

provides job services and training to many individuals not traditionally served by the current system of workforce development.

However, I have no concerns with the compromise language developed in Provision 4 that pertains to issues other than the funding limitation. I am directing the EDD to provide grants to community organizations, including faith-based and secular organizations that are not owned or operated as pervasively sectarian institutions, and that have been limited in their ability to take advantage of this funding due to limited resources and a lack of experience in dealing with the competitive contracting process and the allocation processes currently in place at the local level. No pervasively sectarian religious organization is eligible for funds under this item, but a separate nonprofit entity or affiliate that is a tax-exempt organization under the federal Internal Revenue Code, may apply for and receive grants under its own auspices. In awarding grants, the EDD shall use a competitive bidding process that includes provisions regarding existing constitutional protections. Grants or contracts awarded shall comply with the California Constitution, State and federal civil rights laws, and the United States Constitution with regard to pervasively sectarian organizations.

Of the amount allocated for the Faith-Based Initiative, it is my intent that the department may use up to \$250,000 for administrative expenses, subject to approval by the Department of Finance.

I am also deleting Provision 5, which would require the EDD to allocate \$300,000 to the Youthbuild program. I sustained General Fund augmentations for this program of \$1 million in 2000–01 and \$250,000 in 2001–02. However, this legislative augmentation is inappropriate. Specifically, Section 128 of the federal WIA authorizes the Governor to allocate 15 percent of the WIA funds allotted to California, for the purposes of statewide and employment training activities. This Provision would decrease the amount of funding available to the Administration to address critical workforce development needs.

Item 5100-001-0870—For support of Employment Development Department. I revise this item by reducing:

- (1) 10-Employment and Employment Related Services from \$206,768,000 to \$204,749,000;
- (2) 21-Tax Collections and Benefit Payments from \$728,916,000 to \$588,751,000; and
- (14.5) Amount payable from the Unemployment Fund-Federal (Item 5100-001-0871) from -\$177,120,000 to -\$34,936,000.

I am revising this item to conform to the action I have taken in Item 5100-001-0871.

Item 5100-001-0871—For support of Employment Development Department. I reduce and revise this item from \$177,120,000 to \$34,936,000 and revise Provisions 2 and 3.

I am sustaining \$500,000 of the \$140,665,000 legislative augmentation from Reed Act funds for various information technology (IT) and infrastructure projects, so that \$140,165,000 can remain in the Unemployment Insurance (UI) Trust Fund. Providing full funding for these projects at this time may increase UI taxes paid by employers in the future. After the IT project proposals have been subjected to the Feasibility Study Review and budget review processes, the projects could be considered for available Reed Act funding at that time. However, I am sustaining the expansion of the Tax System Review, in order to include an analysis of enhanced data capability for Employment Development Department (EDD) information technology systems into an existing study of EDD Tax Branch business processes and automated systems. This analysis is scheduled to be completed in 2002–03.

I am revising this item and Provision 2 to conform to this action.

“5100-001-0871—For support of Employment Development Department, for payment to Item 5100-001-0870, payable from the Unemployment Fund Federal; to be available for expenditure until the end of the 2006–07 fiscal year, except that moneys subject to Provision 3 of this item are available for expenditure during the 2002–03 fiscal year.....\$177,120,000 \$34,936,000”

“2. The following amounts shall be used as follows:

- (a) \$20,000,000 for administrative costs to create an alternate base period; which would allow for expansion of the Unemployment Insurance (UI) program by using recent wages for the purpose of establishing benefit eligibility.
- (b) \$65,000 for administrative costs to create and implement a trigger mechanism for UI extended benefits.
- (c) \$500,000 for the review of the Employment Tax System through a contract with a qualified consulting firm to review business operations and automated systems of EDD’s tax programs.
- (d) \$6,500,000 to upgrade the UI call centers to expand capacity and improve customer service.
- (e) \$5,100,000 to develop electronic UI claim filing over the Internet.
- (f) \$500,000 to fund a study with a qualified consultant for improving EDD’s single client database system to enhance efficiency and effectiveness of claim filing and benefit payments; to improve program integrity; and to reduce fraud.
- (g) \$100,000,000 to upgrade EDD’s single client database.
- (h) \$7,000,000 to redesign the UI benefit payment system to enable claimants to certify by using the telephone and Internet.
- (i) \$1,000,000 to redesign the UI adjudication process by the development of a computer-based application.
- (j) \$500,000 to be allocated via competitive process for support of physical and program access to one-stops. These are in addition to any Workforce Investment Act funds allocated for this purpose.”

I am also deleting the \$1,519,000 augmentation in Reed Act funds to continue employment services for veterans, so that these funds can remain in the UI Trust Fund and possibly reduce UI taxes paid by employers in the future. In addition, veterans still receive high priority for employment services and benefits in the EDD Employment Services Program, and the EDD indicates that veterans will not lose any assistance as a result of this action. As a result, it is not necessary to appropriate Reed Act funds for this purpose.

I am revising Provision 3 to conform to this action.

“3. During the 2002–03 fiscal year only, \$34,436,000 shall be used to support Employment and Employment Services and Tax Collection and Benefit Payment Programs and \$1,519,000 shall be used to support veteran’s employment activities.”

Item 5100-011-0890—For support of Employment Development Department. I reduce this item from (\$775,267,000) to (\$633,083,000).

I am revising this item to conform to the action I have taken in Item 5100-001-0870.

Item 5120-001-0890—For support of the California Workforce Investment Board. I revise this item by deleting Provision 3.

Provision 3 would make the expenditure of \$1,120,000 contingent upon the California Workforce Investment Board (CWIB) submitting a report to the Legislature on the role of the CWIB and the Employment Development Department in the California Labor and Workforce Development Agency with respect to the implementation of the Workforce Investment Act (WIA) and other specified information. I believe it would be premature to require the CWIB to define its role within the new agency, before the

Secretary for the new agency has a chance to formulate and communicate the agency's plans to simplify, strengthen, and improve the operation of the State's workforce development programs. In addition, the CWIB has indicated it has recently released reports to the Legislature demonstrating progress in implementing the WIA. However, I am directing the CWIB to update the Legislature on its progress in the development of certification protocols for local One-Stop Centers during legislative hearings on the 2003-04 Budget.

Item 5175-101-0001—For local assistance, Department of Child Support Services. I revise this item by reducing:

(1) 10-Child Support Services from \$974,893,500 to \$974,893,000, and by deleting Provision 8.

In order to correct a technical error in the Budget Bill, I am reducing Schedule (1) by \$500 and deleting Provision 8, which requires a county share of costs for any penalty imposed by the federal government for California's failure to implement an automated statewide child support collection system. This provision was inadvertently left in the final version of the Budget Bill.

Item 5175-101-0890—For local assistance, Department of Child Support Services. I reduce this item from \$282,224,000 to \$281,899,000.

In order to correct a technical error in the Budget Bill, I am reducing this item by \$325,000. This technical veto will conform to the Legislature's intent, and is consistent with the legislative action taken in Item 5175-101-0001, which reduced the funding for the increase in postage costs.

Item 5175-495—Reversion, Department of Child Support Services. I revise this item from \$25,215,000 to \$10,935,000 as follows:

"As of June 30, 2002, ~~\$25,215,000~~ \$10,935,000 of the unencumbered balance of the appropriation provided in the following citation shall revert to the fund from which the appropriation was made:

0001—General Fund

(1) Item 5175-101-0001, Budget Act of 2001 (Ch. 106, Stats. of 2001)

(a) 10.01-Child Support Administration .....\$640,000

(b) 10.02-Child Support Incentive .....~~\$24,575,000~~ \$10,295,000."

On June 19, 2002, the California State Supreme Court denied the State's petition for hearing the Statewide Automated Child Support System (SACSS) case. This was the State's final opportunity to have the amount of the SACSS judgment reduced. The State is now obligated to pay Lockheed Martin the amount of an appellate court ruling, plus interest on the principal amount of the judgment. I am reducing the amount of this reversion by \$14,280,000 to enable the Department of Child Support Services to use these funds towards payment of the judgment, to prevent additional interest charges to the State.

Item 5180-101-0001—For local assistance, Department of Social Services. I revise this item by deleting Provision 10:

I am deleting Provision 10, which allows counties to direct \$100,000 from the Mental Health and Substance Abuse services allocation to develop a replicable outcome system for CalWORKs mental health and substance abuse treatment. This language could create a future fiscal pressure to exceed the available amount of federal Temporary Assistance for Needy Families Block Grant funds and maintenance-of-effort funding pursuant to funding outcome systems in other counties, or could force a decrease in CalWORKs spending in other areas because of budgetary constraints in 2003-04.

Item 5180-141-0001—For local assistance, Department of Social Services. I reduce this item from \$421,675,000 to \$414,875,000 by reducing:

- (1) 16.80-County Administration from \$717,951,000 to \$701,437,000; and
- (4) Amount payable from the Federal Trust Fund (Item 5180-141-0890) from -\$537,945,000 to -\$528,231,000.

I am reducing this item by \$16,514,000 (\$6,800,000 General Fund) to reduce funding for county administration of the Food Stamp Program. This action is necessary due to the significant decline in General Fund revenue. I am sustaining \$372.9 million (\$157.5 million General Fund) for county administration of the Food Stamp Program.

Item 5180-141-0890—For local assistance, Department of Social Services. I reduce this item from \$776,573,000 to \$528,231,000.

I am reducing this item by \$9,714,000 to conform to actions taken in Item 5180-141-0001.

I am also reducing this item by \$238,628,000 to correct a technical error in the Budget Bill. This technical veto is consistent with the Legislature's intent and legislative actions taken in this item.

Item 5180-151-0001—For local assistance, Department of Social Services. I reduce this item from \$782,148,000 to \$745,606,000 by reducing:

- (1) 25.25-Children's Services from \$1,903,347,000 to \$1,848,623,000;
  - (a) 25.25.010-Child Welfare Services from \$1,802,078,000 to \$1,752,554,000;
  - (b) 25.25.020-Adoptions from \$81,286,000 to \$76,086,000;
- (4) Reimbursements from -\$69,879,000 to -\$68,817,000; and
- (6) Amount payable from the Federal Trust Fund (Item 5180-151-0890) from -\$1,195,571,000 to -\$1,172,876,000.

I am deleting \$17,150,000 General Fund and \$9,974,000 Federal Trust Fund from the Child Welfare Services Program augmentations; and \$10,817,000 General Fund, \$10,521,000 Federal Trust Fund, and \$1,062,000 reimbursements in order to suspend the cost-of-doing business adjustment for the Child Welfare Services Program. I am retaining \$1.8 billion (\$616.7 million General Fund) for the Child Welfare Services Program. As cost-of-living adjustments are not being granted for other social services programs, I am suspending the proposed 2002-03 cost-of-doing business adjustment due to the State's current fiscal situation.

For the last three years, this Administration has aggressively funded the Adoptions and Kinship Guardianship Assistance Payment programs. These two programs, among others, have significantly reduced the caseload for much of the Child Welfare Services (CWS) program. Notwithstanding this reduction in caseload, this Administration has provided funding for the CWS program in excess of that justified by current social worker caseload and workload standards, providing a total of \$420.4 million (\$237.9 million General Fund) more over the last three years to counties than caseload requires: \$68.4 million (\$40 million General Fund) in 1999-00, \$125.9 million (\$74.3 million General Fund) in 2000-01, and \$226.1 million (\$123.6 million General Fund) in 2001-02. In light of the State's current fiscal situation, these reductions are necessary to more closely align funding to current caseload standards.

Similarly, I am deleting \$3,000,000 General Fund and \$2,200,000 Federal Trust Fund for recent Adoptions Program cost-of-doing business augmentations due to fiscal constraints and limited resources in the General Fund. I am retaining funding of \$76.1 million (\$38.5 million General Fund) for the Adoptions Program.

I am reducing this item by \$5,575,000 to correct a technical error in the Budget Bill. This technical veto will conform to the Legislature's intent, and is consistent with the legislative action to reduce funding for the Adult Protective Services program by \$5.6 million General Fund. This reduction was correctly reflected in schedule (2) (e) 25.35.050-County Services Block Grant; however, it was not included in the total for this item.

Item 5180-151-0890—For local assistance, Department of Social Services. I reduce this item from \$1,195,571,000 to \$1,172,876,000.

I am reducing this item by \$22,695,000 to conform to the actions taken in Item 5180-151-0001.

Item 5180-491—Reappropriation, Department of Social Services. I revise this item by revising Provision 1.

In order to correct a technical error in the Budget Bill, I am amending Provision 1 by deleting the requirement that the amount of funding reappropriated for automation projects be consistent with the amount approved by the Department of Information Technology (DOIT) in a special project report or equivalent document. As statutory authority for the DOIT expired on June 30, 2002, this language is no longer applicable.

“1. It is the intent of this item to continue funding approved activities for the automation projects that, due to schedule changes, result in unexpended appropriations one year and the need for additional funding in the following year. Therefore, notwithstanding any other provision of law, the balance of the appropriations for these automation projects may, upon approval of the Department of Finance, be reappropriated for transfer to and in augmentation of the corresponding items in this act. The funds reappropriated by this provision shall be made available consistent with the amount approved by the Department of Finance and the Department of Information Technology based on an approved special project report or equivalent document not sooner than 30 days after providing notification in writing to the chairperson of the fiscal committee of each house of the Legislature and the Chairperson of the Joint Legislative Budget Committee.”

Item 5460-485—Reappropriation (Proposition 98), Department of the Youth Authority. I delete this item.

I am deleting the \$2,600,000 reappropriation from the Proposition 98 Reversion Account, provided on a one-time basis to the Department of the Youth Authority for the enrichment of educational services. The additional funding for educational services has not been justified. This action will maintain Proposition 98 funding consistent with the level of the current ward population.

Item 6110-001-0001—For support of Department of Education. I reduce this item from \$45,131,000 to \$45,081,000 by reducing:

- (2) 20-Instructional Support from \$74,829,840 to \$74,779,840;
- (3) 30-Special Programs from \$43,401,280 to \$43,291,280; and
- (9) Amount Payable from Federal Trust Fund (Item 6110-001-0890) from -\$126,105,000 to -\$125,995,000.

I am reducing this item by \$50,000 to reflect savings that will occur in this item as a result of sustaining a legislative augmentation of \$53,000 as reflected in Provision 17 of Item 6110-001-0890, for monitoring and technical assistance for the California Youth Authority special education activities. That augmentation enables the Department to recover indirect costs that are billable to federal funds. Because the Department's costs for oversight of this activity will not significantly increase overall departmental indirect costs, funds in this General Fund item can be reduced with no effect on services to other programs.

I am reducing Schedules (3) and (9) by \$110,000 to conform to the action taken in Item 6110-001-0890.

Item 6110-001-0890—For support of Department of Education. I reduce this item from \$126,105,000 to \$125,995,000.

I am reducing the \$388,000 legislative augmentation for two additional staff for implementation of the 21st Century Community Learning Centers Program by \$110,000. While I am sustaining the two additional positions and \$278,000, the amount

reduced reflects indirect costs which have not been adequately justified. Five positions and \$523,000 remain available for the purposes of implementing the new federal program, which should be sufficient.

Item 6110-113-0001—For local assistance, Department of Education. I revise this item by reducing:

- (4) 20.70.030.006-STAR Program from \$15,827,000 to \$15,027,000.

This reduction is a technical adjustment to reflect the correct amount in Schedule (4). While the item total reflects the intended funding level, Schedule (4) contains \$800,000 more than intended.

Item 6110-123-0890—For local assistance, Department of Education. I delete Provision 2.

I am deleting Provision 2, which would require legislative notification prior to the adoption or amendment of any plan for disbursement of \$39,131,000 in federal funds for innovative programs to local education agencies. This is inconsistent with federal law, which required California to submit its application for funding under the No Child Left Behind Act prior to enactment of the budget. I understand this language was only intended to apply to new programs where allocation is subject to legislative direction. Consistent with this, I am deleting this provision because the reporting requirements for this existing program would needlessly delay the disbursement of these federal funds, which are disbursed based on a federally-mandated formula.

Item 6110-130-0001—For local assistance, Department of Education. I reduce this item from \$12,300,000 to \$10,300,000 by revising Provision 1.

I am deleting \$2,000,000 of the legislative augmentation for provision of Advanced Placement teacher training or tutoring services pursuant to Section 52247 of the Education Code. These reductions are necessary to limit program expansions and provide for a prudent General Fund reserve in light of the State's current fiscal condition. With these reductions, \$10,300,000 still remains to support the Advancement Via Individual Determination program.

I am revising Provision 1 to conform to this action.

- “1. Of the funds appropriated, \$1,300,000 is available for administration of the Advancement Via Individual Determination (AVID) centers and \$6,000,000 is available for competitive outreach grants to local education agencies for the AVID program. Notwithstanding any other provision of law, the remaining ~~\$5,000,000~~ \$3,000,000 shall be used solely for the provision of advanced placement teacher training or tutoring services, pursuant to Section 52247 of the Education Code.”

Item 6110-136-0890—For local assistance, Department of Education. I revise this item by deleting Provision 8.

I am deleting Provision 8 of this item, which makes the receipt of \$1,495,541,000 in Title I federal funds by school districts contingent upon the reporting of unspecified data that is necessary to meet the data reporting requirements of the federal No Child Left Behind Act of 2001. While it will likely be necessary for school districts to provide data to the State to meet these reporting requirements, federal law does not allow the State to condition the receipt of these funds on the provision of data. Thus, this language may constitute a state mandate requiring reimbursement from the General Fund. Item 6110-113-0890 contains \$6,880,000 for federally required data collection.

Item 6110-137-0890—For local assistance, Department of Education. I revise this item by deleting Provision 1.

I am deleting Provision 1 of this item, which requires legislative notification prior to adopting or amending any plan for the expenditure of \$2,426,000 in federal Rural and Low Income School Grant funds pursuant to the federal No Child Left Behind Act.

This provision conflicts with federal law that required the State Board of Education to submit the State's consolidated application prior to enactment of the budget bill. These funds are provided on a formula basis and are intended to provide small school districts with general purpose discretionary funding. I believe the notification requirement would delay the allocation of the funds and also impede the intended flexibility.

Item 6110-156-0001—For local assistance, State Department of Education. I reduce this item from \$605,038,000 to \$582,038,000 by reducing:

- (2) 10.50.010.008-Remedial education services for participants in the CalWORKs from \$31,739,000 to \$8,739,000,

and by revising Provision 2.

I am reducing the \$23,000,000 augmentation for remedial education services for CalWORKs participants. This augmentation consisted of \$10,000,000 for support services and \$13,000,000 for additional instruction for CalWORKs recipients in adult education programs or regional occupation centers and programs (ROC/Ps). With this action, \$9,900,000 in federal Temporary Assistance for Needy Families (TANF) funds remains in the Adult Education and ROC/P items to provide additional instruction for CalWORKs recipients in programs that are at or above their authorized average daily attendance cap. Support services are also provided through the federal Perkins Vocational and Technical Education Act, funded at \$138,445,000 and required to target CalWORKs participants in the welfare-to-work program. The funds reduced from this item are reserved for Proposition 98 contingencies in 2002–03. I am revising Provision 2 to conform to this action.

“2. The funds appropriated in Schedule (2) constitute the funding for both remedial education and job training services for participants in the CalWORKs program (Art. 3.2 (commencing with Section 11320) of Chapter 2 of Part 3 of Division 9 of the Welfare and Institutions Code). Funds shall be apportioned by the Superintendent of Public Instruction for direct instructional costs only to school districts and Regional Occupational Centers and Programs (ROC/Ps) that certify that they are unable to provide educational services to CalWORKs recipients within their adult education block entitlement or ROC/P block entitlement, or both. However, of the funds appropriated in Schedule (2) of this item, an amount not to exceed \$10,000,000, as negotiated through an interagency agreement between the State Department of Education and the State Department of Social Services, shall be provided for Adult Education Programs, and ROC/Ps for the purposes of providing instructional and training supportive services for CalWORKs eligible members. These services shall include any of the following:

- (a) Career and educational guidance and counseling.
- (b) Training-related assessment.
- (c) Transportation to the classroom or worksite during training.
- (d) Job readiness training and services.
- (e) Job development and placement.
- (f) Postemployment support and followup to ensure job retention.
- (g) Coordination and referrals to other services provided through the State Department of Social Services; the Employment Development Department; the Local Workforce Investment Boards; community colleges; the Department of Rehabilitation; the Economic Development Agency; and other community resources.
- (h) Curriculum and instruction development to provide short-term integrated programs leading to employment.

- (i) Staff development costs resulting from policy development and training occurring between instructional staff and county welfare agencies in the coordination of the program.
- (j) One-time excess program startup costs.

Allocations shall be distributed by the Superintendent of Public Instruction as equal statewide dollar amounts, based on the number of CalWORKs eligible family members served in the county and subject to instructional and training support services needed annually by each agency as identified in the county CalWORKs Instruction and Job Training Plan required by Section 10200 of the Education Code.”

Item 6110-161-0001—For local assistance, Department of Education (Proposition 98). I am revising this item by revising Provision 15.

I am revising Provision 15 of this item by \$754,000 to conform to reductions required as a result of the Legislature’s revision to the level of Education Revenue Augmentation Fund available in 2002–03, and as a result of technical changes required to conform to providing a 2.0 percent cost of living adjustment for special education.

“15. Of the amount provided in Schedule (1) of this item, ~~\$8,943,000~~ \$8,189,000 shall be appropriated in the following priority sequence:

- (a) The Superintendent of Public Instruction shall allocate any additional amount, if needed, to augment the amounts appropriated in Schedules (1) and (2) of this item to ensure full funding for the 2002–03 fiscal year.
- (b) Once the Superintendent of Public Instruction has determined that none of the programs in Schedules (1) and (2) of this item require any additional funding pursuant to the statutory formulas contained in Chapter 854 of the Statutes of 1997 (AB 602), the remaining amount shall be allocated pursuant to Section 56836.158 of the Education Code.”

Item 6110-161-0890—For local assistance, Department of Education. I reduce this item from \$800,319,000 to \$798,369,000 by reducing:

- (4) 10.60.050.021-IDEA, Capacity Building, Special Education from \$44,858,000 to \$42,908,000,

and by revising Provisions 3 and 12.

I am deleting the \$1,700,000 legislative augmentation provided to expand the existing Family Empowerment Centers on Disabilities. I share the desire to improve results for all children, especially those with disabilities, which is why I signed legislation last year establishing the Family Empowerment Centers funded in this item. However, given that my Budget already provides \$2,372,000 for local assistance grants for Family Empowerment Centers on Disabilities, and given that the 12 centers funded through the existing resources have only recently been established, I believe funding to expand this program would not be prudent until results from existing efforts are reviewed.

I am deleting the \$250,000 legislative augmentation to fund licensed children’s institution growth. My Budget already provides \$1,000,000 for local assistance grants for emergency impactation on Special Education Local Plan Areas as the result of licensed children’s institution growth, and I have not been provided with adequate justification to warrant a program augmentation.

I am revising Provisions 3 and 12 to conform to these actions.

“3. Of the funds appropriated in Schedule (4) of this item, up to ~~\$1,250,000~~ \$1,000,000 may be used to fund licensed children’s institution growth pursuant to Section 56836.18 of the Education Code.”

“12. Of the funds appropriated in Schedule (4) of this item, ~~\$4,072,000~~ \$2,372,000 shall be used for the purposes of establishing Family Empowerment Centers on Disabilities pursuant to Chapter 690, Statutes of 2001.”

Item 6110-194-0001—For local assistance, Department of Education. I reduce this item from \$1,105,000 to \$105,000 by deleting:

(1) 20.60.101.001-Administrator Training and Evaluation Program (\$1,000,000), and by revising Provision 2.

I am reducing the legislative augmentation of \$1,000,000 in support costs for the Administrator Training and Evaluation Program. This reduction is necessary to provide for a prudent General Fund reserve and eliminate the former Administrator Training and Evaluation Program. With this reduction, \$14,336,000 still remains for Principal and Administrator Training and Evaluation Program training activities in programs established by this Administration.

Item 6110-194-0890—For local assistance, Department of Education. I reduce this item from \$5,000,000 to \$4,350,000, and delete Provisions 2, 3 and 4.

I am deleting \$250,000 and Provision 2 which would be used for data collection and evaluation related to the effectiveness of professional development programs. While I recognize the importance of evaluating the effectiveness of programs, given many of these programs are relatively new and the scarcity of resources, I believe funds should be focused on providing training.

I am deleting \$400,000 and Provisions 3 and 4 which would earmark these funds for an evaluation of cultural competency training for teachers and provide professional development to substitute teachers, respectively. Both of these programs could be established by pending legislation. I believe it is premature to set aside these funds before the policy merits of the respective related legislation have been decided. In addition, according to the legislation which would establish the substitute teacher training, funding would not be necessary until 2003–04.

Item 6110-195-0890—For local assistance, Department of Education. I reduce this item from \$317,526,000 to \$317,026,000 by reducing:

(1) 20.60.280-Improving Teacher Quality Local Grants from \$315,472,000 to \$314,972,000,

and by deleting Provision 1.

The reduction in Schedule (1) funding is a technical veto to account for this item over-appropriating the total amount of available federal funds by \$500,000.

I am deleting Provision (1), which specifies the uses of these federal funds. I would have preferred language that would have directed these funds to be used on a priority basis to ensure that class size reduction programs are maintained and teachers receive standards-aligned training. As federal law requires, the State has submitted an application for these funds that specifies their uses; therefore this language is unnecessary.

Item 6110-197-0890—For local assistance, Department of Education. I revise this item by deleting Provisions 2(b), 2(c), 2(d), and 2(h), and revising Provision 2(i).

I am deleting Provision 2(b) because this language is unnecessarily restrictive. It would limit the availability of \$3,500,000 to direct grants for programs serving middle and elementary school pupils to provide equitable access to and participation in programs. Analysis has not been performed to indicate the level of need for these types of grants. Furthermore, placing restrictions on these funds would limit the number of slots that could be created to serve additional children.

I am deleting Provision 2(c) because this language would restrict the availability of \$1,000,000 to fund direct grants for family literacy services for families of students participating in the 21st Century Community Learning Programs. Although I support family literacy programs, this allocation duplicates existing efforts funded through federal Title 3 Literacy funds and other available federal and state funding sources to provide family literacy. Limiting the availability of these funds would restrict the creation of additional before and after school slots.

I am deleting Provision 2(d) because this language is unnecessarily restrictive. It would limit the availability of \$2,500,000 to grants for high school programs. Denying accessibility to these funds to middle and elementary school programs, would restrict the creation of additional slots in an area where there is a known need. I am also deleting Provision 2(h) because the language would establish a program with reimbursement policies that conflict with those contained in existing statute, Article 22.5 (commencing with Section 8483.7) of Chapter 2 of Part 6 of Division 1 of the Education Code.

I am revising Provision 2(i) because this language conflicts with language contained in Provision 2(f) of this Item which requires programs to adhere to daily funding rates pursuant to Article 22.5 (commencing with Section 8482.5) of Chapter 2 of Part 6 of Division 1 of the Education Code.

“(i) Earned but unexpended funds may be carried forward to subsequent years consistent with federal requirements. ~~In year one, the full grant may be retained.~~”

As stated above, this language is unnecessarily restrictive and would result in higher costs per pupil. There is approximately \$14 million in quality applications pending for the existing Before and After School Learning and Safe Neighborhoods Partnership Program. The overall state need, however, is much greater. Given the success of this program in showing consistent patterns of positive results on student achievement, attendance, behavior, and reductions in grade attendance, I would prefer that the 21st Century federal funds be used to expand the existing program rather than creating additional cost pressures.

Item 6110-200-0001—For local assistance, Department of Education. I reduce this item from \$19,000,000 to \$2,000,000.

I am reducing the legislative augmentation of \$19,000,000 for Healthy Start Support Services by \$17,000,000. This reduction is necessary to limit program expansions and provide for a prudent General Fund reserve in light of the State’s current fiscal condition. The program level started with this augmentation would cause costs to multiply in future years. This action will have no effect on schools currently operating this program, as full funding for the multi-year grant period has been provided in past budgets.

The funds reduced from this item are reserved for Proposition 98 contingencies in 2002–03.

Item 6110-205-0001—For local assistance, Department of Education. I revise this item by deleting Provision 3.

I am deleting Provision 3 of this item, which authorizes the Department of Education to establish a pilot program for allocating this funding for the Elementary School Intensive Reading Program as a block grant for up to 20 districts, rather than through hourly reimbursement for services rendered. This proposed pilot is a significant alteration in the program’s current structure. The proposal does not contain any reasonable accountability to ensure that students receive necessary remedial services through this program, and may in fact reduce the total hours of service provided to students. Any program change of this magnitude should be considered in policy legislation, including review by legislative policy committees rather than solely through the budget process.

Item 6110-211-0001—For local assistance, Department of Education (Proposition 98). I reduce this item from \$49,721,000 to \$35,650,000.

I am reducing this Item for two reasons. First, technical reductions are necessary to reflect both the Legislature’s action to shift the calculation methodology for the block grant to appropriations made in the final Budget Act as well as the adjustments made to final school district funding levels, including the deferrals and reductions to categorical programs included in the final version of the Budget, that have the effect

of reducing this item's statutory growth calculation. Second, I am reducing the item to reflect my objection to the Legislature's intent to include the Instructional Materials Realignment Program (IMRP) in the block grant. I believe that allowing charter schools to use equivalent funding intended for IMRP purposes in any manner they choose would both undermine the Administration's objective to ensure availability of standards-aligned instructional materials for all students and unnecessarily increase state costs. Charter schools would still be eligible to receive their share of over \$400,000,000 available for IMRP remaining in the Budget.

The funds reduced from this item are reserved for Proposition 98 contingencies in 2002-03.

Item 6110-223-0001—For local assistance, Department of Education. I delete this item and Provisions 1 and 2.

I am deleting the legislative augmentation of \$36,000,000 for PERS offset mitigation because the May Revision already provided \$97,000,000 to fund the state's share of PERS costs for school classified employees. As rates increase in the future, the state will fund the entire amount of the employer's share of this cost, and the offset will diminish.

I am also deleting the legislative augmentation of \$42,000,000 for equalization adjustments for school district revenue limit apportionments. Given the subsequent \$406,000,000 augmentation contained in AB 2781 to be provided commencing with 2003-04 for revenue limit equalization, this one-time appropriation should be set aside for Proposition 98 contingencies in light of the State's current fiscal conditions.

The funds reduced from this item are reserved for Proposition 98 contingencies in 2002-03.

Item 6110-241-0001—For local assistance, Department of Education. I delete this item and Provision 1.

I am deleting this item, which provides \$150,000 for low-performing high schools, as it inadvertently made an appropriation for local assistance that was intended to provide state operations funding to support a new program to be created in pending legislation. This local assistance appropriation cannot be used for the intended purpose. In addition, I believe it is premature to earmark funding in the Budget until the policy merits of the legislation are decided.

The funds reduced from this item are reserved for Proposition 98 contingencies in 2002-03.

Item 6360-001-0407—For support of the Commission on Teacher Credentialing. I revise this item by deleting Provision 6.

I am deleting Provision 6, which would require the Commission to reduce processing times for first-time and new-type credential applications to 25 days. This is inconsistent with current statute that requires credentials to be processed in 60 days. The Teacher Credentialing Service Improvement Project will not be sufficiently complete to allow the Commission to realize significant savings in the staff time required to process credential renewal applications in 2002-03. Consequently, this provision could force the Commission to redirect resources from the processing of credential renewal applications, thereby generating an unacceptable increase in the time required to process these applications. Alternatively, this language could result in the Commission requesting additional funding and positions to meet this timeframe.

Item 6610-001-0001—For support of California State University. I reduce this item from \$2,617,173,000 to \$2,616,983,000 by reducing:

(1) Support from \$3,494,437,000 to \$3,494,247,000, and by deleting Provisions 18, 19, and 20.

I am deleting \$190,000 legislative augmentation to conduct a California State University (CSU) Export Delivery Study (\$140,000) and to fund the CSU Centers for

Excellence (\$50,000), pursuant to separate legislation. Notwithstanding the potential merits of the subject legislation, it is premature to include funding in the budget for these activities. I am willing to consider the legislation on its merits, and any funding necessary, once it is approved by the Legislature. I am deleting Provisions 18 and 19 to conform to these actions.

I am deleting Provision 20 because it requires the CSU to defer new expenditures for the CMS/Peoplesoft project, prohibits the University from entering into any new agreements needed to maintain the implementation schedule, and delays the completion of the project by one year. This language would increase project costs for the University and would delay the operational efficiencies the University believes will be achieved when the project is completed and delay staff training. I encourage the University to cooperate fully in the audit currently in progress of the project and expect continued adherence to all relevant information technology policies and bid procedures.

Item 6870-101-0001—For local assistance, Board of Governors of the California Community Colleges (Proposition 98). I reduce this item from \$2,670,792,000 to \$2,659,792,000 by reducing:

(12) 20.10.070-Matriculation from \$64,307,000 to \$54,307,000;  
and by deleting:

(12.5) 20.20.015-Faculty and Staff Development (\$1,000,000);  
and by revising Provision 1.

I am reducing the legislative augmentation for Matriculation by \$10,000,000, and I am also deleting the proposed augmentation of \$1,000,000 to continue the Faculty and Staff Development program. With this action, \$54,307,000 still remains to support Matriculation services. I also note that the general apportionment funding increase of over \$192 million in this Budget is more than \$43 million above the statutory requirement. Therefore, this Budget provides sufficient funds for colleges to sustain matriculation services if they are a priority. Further, funding for the Faculty and Staff Development program contains little meaningful accountability and represents only a fraction of the funds used by districts for training. I believe this is a significantly lower priority for state assistance than direct classroom instruction. Districts may use discretionary funds, as necessary, to fund these activities on a priority basis. I am revising Provision 1 to conform to this action.

“1. The funds appropriated in Schedules (1), (2), (3), (4), (5), (6), (8), (10), (11), (12), ~~(12.5)~~ (14), (15), (16), (17), (18), (22), and (25) are for transfer by the Controller during the 2002–03 fiscal year to Section B of the State School Fund.”

The funds reduced from this item are reserved for Proposition 98 contingencies in 2002–03.

Item 6870-485—Reappropriation, (Proposition 98) California Community Colleges. I revise this item from \$53,189,000 to \$34,497,000 by deleting Schedule (3).

In order to correct a technical error in the Budget Bill, I am reducing this item by \$9,692,000. I am also deleting the legislative augmentation of \$9,000,000 for Special Services for CalWORKs Recipients. I am supportive of this program as indicated by the \$20,000,000 General Fund restoration I provided for this program in the May Revision, for which local districts will provide an additional \$20,000,000. With this reduction, a total of \$63,000,000, will remain to support CalWORKs recipients attending community colleges.

Item 6870-486—Reappropriation, (Proposition 98) California Community Colleges. I delete this item.

I am deleting Item 6870-486, which would provide authority for the Chancellor to reappropriate for specified purposes up to \$20 million in prior year savings from categorical programs in Item 6870-101-0001. Such authority would limit the flexibility

of the Administration and Legislature to allocate Proposition 98 Reversion Account funds for future high priority K-14 demands.

Item 7980-001-0001—For support of Student Aid Commission. I revise this item by reducing:

- (1) 15-Financial Aid Grants Program from \$12,342,000 to \$12,244,000, and
- (5) Reimbursements from -\$3,195,000 to -\$3,097,000.

I am revising this Item to delete a \$98,000 legislative augmentation for reimbursements from the Student Loan Operating Fund to cover administrative costs for the Assumption Program of Loans for Education related to 1,000 additional awards added as part of an action to suspend the Governor's Teaching Fellowships for one year. The 2001 Budget Act included \$253,000 for three additional positions to administer this program, conduct a study to assess the administrative process for this and other Specialized Programs, and make recommendations for efficiency measures. The need for additional resources for this purpose has not been justified. In addition, it would be premature to provide additional funding until those recommendations have been made and considered.

Item 8100-101-0001—For local assistance, Office of Criminal Justice Planning. I reduce this item from \$45,856,000 to \$45,687,000 by reducing:

- (6) 50.20.352-Youth Emergency Telephone Referral from \$338,000 to \$169,000.

This reduction is necessary to provide for a prudent General Fund reserve for economic uncertainties. With this action, \$169,000 remains to support the Youth Emergency Telephone Referral program. I am revising Provision 3 to make two technical changes to this provision.

- “3. Of the amount appropriated in this item, \$800,000 appropriated in Schedule (20.5) shall be available for competitive grants for the California Innocence Protection Program. The OCJP shall make the funds available for the purpose of assisting convicted persons who are attempting to establish their actual innocence through the use of postconviction DNA testing. Grants shall only be used to represent indigent inmates convicted of a crime in a California court. Applications for funding provided pursuant to this item shall only be received from qualified nonprofit organizations meeting guidelines established by the American Bar Association for operating legal clinics using law students. It is the intent of the Legislature that funds provided to qualifying nonprofit organizations shall be made *available* as soon as possible in the interest of justice and shall be disbursed within 60 days of receipt of an application for funding. For qualified nonprofit organizations receiving funding under this program, at least 25 percent of their total budget for these purposes must come from other sources, which may include in-kind contributions.

Funding for this program shall not be expended for the purpose of court-approved DNA forensic testing under Section 1405 of the Penal Code.

Entities receiving funding under this program shall report to the OCJP the number of the requests received and the number of cases in which any of the following have occurred: (1) a preliminary investigation was conducted, (2) a full investigation was conducted and DNA testing was sought, (3) the appellant was represented in court proceedings or an attempt was made to vacate a conviction, and (4) an appellant's conviction was vacated or overturned as a direct result of the representation by the entity **or attorney**. The entities shall also provide detailed expenditure reports semiannually and annually on the use of funds provided under this program. These semiannual and annual reports shall also list all staff positions supported by this funding and their compensation. The OCJP shall prepare and submit a report to the Joint Legislative Budget Committee on or before February 1, 2003, on the foregoing information for each entity receiving funding under this program.”

Item 8100-112-0001—For transfer by the Controller to the High Technology Theft Apprehension and Prosecution Program Trust Fund. I reduce this item from \$13,518,000 to \$13,300,000.

I am reducing the amount available for transfer to the High Technology Theft Apprehension and Prosecution Program Trust Fund by \$218,000. This is a technical correction to this General Fund transfer item. The amount shown here reflects the total local assistance program funding, including federal funds, rather than the General Fund transfer portion that is appropriately scheduled in this item.

Item 8350-001-0001—For support of Department of Industrial Relations. I reduce this item from \$141,031,000 to \$136,815,000 by reducing:

(3) 30-Workers' Compensation Administration from \$99,405,000 to \$94,805,000;

(5) 36-Commission on Health & Safety and Workers' Compensation from \$2,666,000 to \$1,408,000; and

(20) Amount payable from the Workers' Compensation Administration Revolving Fund (Item 8350-001-0223) from -\$20,992,000 to -\$19,938,000;

and by deleting:

(38) Amount payable from the Workers' Occupational Safety and Health Education Fund (Item 8350-001-3030) (-\$588,000).

I am deleting the legislative augmentations provided to the Department of Industrial Relations for AB 749-related activities for training grants, workers' compensation studies, and workload in the Division of Workers' Compensation. Although I agree that AB 749 will increase the responsibilities of the department, these augmentations have not been fully justified. AB 749 does not take effect until January 1, 2003, and in light of the state's current fiscal condition, I have instructed the department to absorb the associated workload during the first six months of implementation for these purposes. To the extent that a comprehensive justification based on actual workload needs is available in the future, I would consider funding at that time. I am, however, retaining the \$1 million augmentation included in this item for fraud prevention activities.

Item 8350-001-0223—For support of Department of Industrial Relations. I reduce this item from \$20,992,000 to \$19,938,000 to conform to my action in Item 8350-001-0001.

Item 8350-001-3030—For support of Department of Industrial Relations. I delete this item.

I am deleting this item to conform to my previous action in Item 8350-001-0001.

SEC. 9.40—Proposition 40 Administration Cost Limits. I delete this Control Section.

I am deleting this control section which would restrict administrative expenditures for Proposition 40 bond funds to five percent of budget appropriations for all grant programs and property acquisitions made in the budget year. This is inconsistent with the provisions of Proposition 40, which require all program delivery and administrative costs be paid through the Bond Act. I have submitted an expenditure plan for Proposition 40 that meets current environmental acquisition priorities and is fiscally responsible. This plan sets aside adequate funds to deliver these necessary projects in a timely manner, in accordance with the intent of the electorate. I am directing all affected agencies and departments to provide for effective program delivery while controlling their administrative costs.

With the above deletions, revisions, and reductions, I hereby approve Assembly Bill 425.

GRAY DAVIS, Governor

- 2 [Ch. 957] I am signing Assembly Bill 2717, however, I am reducing the appropriation from the Renewable Resources Investment Fund to \$100,000.

This bill would require the Department of Water Resources to convene a Water Desalination task force to make recommendations related to potential opportunities for the use of seawater and brackish water desalination.

The revenues from the Renewable Resources Investment Fund are below projections and the fund is expected to have a significant shortfall this year. At a time when the state is dealing with a \$24 billion shortfall, any available funds should be used for on-going environmental activities and programs now supported by the General Fund that would otherwise be reduced or eliminated.

Studying the potential opportunities and impediments for the use of water desalination is an important step toward helping the state meet its water needs. Therefore, I am directing the Department of Water Resources to explore funding partnerships with interested local and private entities to accomplish this goal.

GRAY DAVIS, Governor

- 3 [Ch. 983] I am signing Assembly Bill 52, however, I am vetoing the \$2.4 million appropriation for the California Environmental Quality Improvement Loan Program and the \$2.4 million appropriation for the Coastal Farmland Preservation program.

Proposition 40 requires funds to be used for grants for the preservation of agricultural and grazing lands, including oak woodlands and grasslands. The California Environmental Quality Improvement Loan Program is not a grant program and is therefore ineligible.

Additionally, this bill creates the Coastal Farmland Preservation program at the Department of Conservation. This program is duplicative of the existing California Farmland Conservancy Program and other efforts by the State Coastal Conservancy to protect coastal agricultural and rangeland currently funded through Propositions 12 and 40.

GRAY DAVIS, Governor

- 4 [Ch. 1066] I am signing Assembly Bill 2583.

This bill would establish the California Campus Sexual Assault Task Force to develop a uniform system for gathering information pertaining to campus sex crimes and to create a set of model guidelines for addressing these crimes on higher education campuses. The 15-member task force would be required to present a report to the Legislature by April 1, 2004. The bill also appropriates \$125,000 to the Office of Criminal Justice Planning (OCJP).

Addressing campus sex crimes is a worthwhile endeavor.

This bill appropriates \$125,000 General Fund at a time when the State is experiencing a severe revenue shortfall. Therefore, I am deleting the funding and directing OCJP to absorb the costs of the task force from within existing resources.

GRAY DAVIS, Governor

- 5 [Ch. 1079] I am signing Senate Bill 1244. However, I am vetoing Section 2 (8) (d) of this measure, which would authorize the Medical Board of California to expend the first \$300,000 deposited in the Contingent Fund of the Medical Board of California in the 2002-03 fiscal year pursuant to Section 125.3. Existing law already requires the Board to complete the peer review study for which this funding would be provided and I do not support appropriating additional funds for this purpose, especially given the already insecure fiscal condition of the fund.

GRAY DAVIS, Governor

- 6 [Ch. 1126] I am signing Assembly Bill 716 because it highlights the importance of the state's historical and cultural resources and because it appropriates funds specified in Proposition 40. In particular, it is important to disburse the monies that Proposition 40 allocated for San Francisco, Los Angeles and other specific areas in a timely manner that meets the local recreation needs of these communities and the expectations of the voters.

However, with respect to the \$128 million earmarked for the California Cultural and Historical Endowment that this bill seeks to create, I regret that I must delete the monies for this purpose. There are several reasons for this action. First, given the state's fiscal condition, now is not the time to establish a new, permanent bureaucratic entity with broad new duties. Second, the duties of the Endowment as proposed in this measure extend well beyond competitive grant-making responsibilities and would create significant general fund cost pressure. For example, while the comprehensive study the bill would require by January 1, 2005 may be desirable, such a multi-million dollar study could not be funded with bond money.

Moreover, the proposed endowment appears to be significantly redundant and unnecessary given the duties and expertise of the Department of Parks and Recreation, the Office of Historic Preservation (OHP) and the State Historic Resources Commission. In particular, by directing the Endowment to conduct competitive grantmaking for historical preservation purposes, the bill undermines the successful efforts of the OHP and the Commission in disbursing Proposition 12 historical preservation monies. Failure to take advantage of such expertise will lead to unnecessary costs and delays in implementation of competitive grants. For this reason, I am directing the Secretary for Resources to seek \$10 million in the budget to fund an initial competitive grants program to be administered by the Office of Historic Preservation that will build upon the success of its current program.

Additionally, while I applaud the authors for their admirable efforts to craft a high-profile structure for enhancement of historical and cultural resources, I am concerned that the timing of the conference committee and the conference report language did not allow for meaningful discussion among stakeholders. Such stakeholder input is key to ensuring that an effective, efficient and respected process for disbursing Proposition 40 monies is crafted. For this reason, I am directing the Secretary for Resources to conduct a series of stakeholder meetings during the legislative recess for the purpose of discussing the best approaches for funding historical, cultural and museum projects.

Finally, there are many significant, high-priority state and local cultural and historical projects that should be funded. These include the Department of Parks and Recreation's projects as included in the May Revise-the Statewide Indian Museum, California Heritage Center, the John Marsh home and the Adamson House collection, as well as local assistance funding for the California Academy of Sciences in San Francisco. For this reason, I am directing the Department of Parks and Recreation to utilize \$5 million in Proposition 40 monies for the development of the Statewide Indian Museum. Moreover, the other projects should be directly funded from the cultural and historical monies and I am directing the Department of Finance to include these important projects in my 2003-04 budget.

GRAY DAVIS, Governor

- 7 [Ch. 1127] I have signed Assembly Bill 1768, but I am deleting the provision for funding up to \$15,000,000 for the Governor's Security Advisor upon receipt of funding from federal allocations for Homeland Security. Given the uncertainty of the availability of federal funds, it is premature to require that the expenditure be limited to equipment standards placed in statute given that the existing Public Safety Radio Strategic Planning Committee is developing a statewide solution for radio interoperability

systems for all first responders. Their standards will assure that California's emergency first responders will have equipment that complies with the statewide interoperability radio standards and that this equipment, subject to federal funding, will provide badly needed equipment for all of the State's emergency personnel in the improvement of public safety.

Use of these funds should be consistent with established communication plans and systems authorized under the California Emergency Services Act including the California Emergency Plan, the California State Mutual Aid Radio System Plan, and other state and local plans providing for multi-discipline radio interoperability. This bill would unnecessarily specify a technology standard that could be overly restrictive. It is my preference that instead of being restrictive, the State in its procurements should maximize the use of business competition, thereby ensuring reasonable cost to the State and acquisition of proven, established, stable technology and equipment.

GRAY DAVIS, Governor

- 8 [Ch. 1147] I am signing Assembly Bill 2838, but reducing the appropriation from the Public Utilities Commission Utilities Reimbursement Account from \$445,000 to \$222,500.

This bill requires the Public Utilities Commission (PUC) to act on water utilities' rate applications within specified timelines and allows water utilities to enact interim rates at the rate of inflation when their rate cases are delayed, subject to refunds by the PUC. The bill also requires water utilities to file a rate application with the PUC every three years.

GRAY DAVIS, Governor

- 9 [Ch. 1163] I am signing Assembly Bill 1634, which would require new curriculum development in nutrition and would create a new school garden grant program.

I certainly share the author's belief in the importance of nutrition education. Many studies have demonstrated that infancy, toddler years, and early childhood are the most important developmental states for children. During these early years of a child's development, it is essential to establish healthy eating and exercise patterns.

As evidenced by a letter to the Assembly Journal, the author intended that the \$200,000 appropriation contained in this bill would be a subset of an appropriation contained in the Budget Act for similar purposes. While she has committed to carrying cleanup language next year to rectify the error, a more expeditious remedy is for me to strike the \$200,000 appropriation from this legislation.

Lastly, it is my intent that the State Department of Education will develop the nutrition curricula and related best practices from existing departmental resources.

With that understanding, I am pleased to sign this legislation, but am vetoing the \$200,000 appropriation.

GRAY DAVIS, Governor

- 10 [Ch. 1167] I am signing Assembly Bill 2781. However, I am reducing the portion of the appropriation for school district revenue limit equalization by \$203,000,000 that is based on revenue limits prior to the re-benching of excused absences in 1997-98. I intend to set this amount aside for subsequent legislation that accomplishes the intent of legislation I signed last year (Chapter 165, Statutes of 2001), which established a statewide equalization goal.

Let me be clear. I am fully committed to providing full funding for equalization in the 2003-04 Budget Year. However, I am opposed to the formula used to determine equalization funding in this bill. By splitting equalization into disparate allocation

methods, as proposed by AB 2781, the State does not actually reach an equalized endpoint. Consequently, this bill creates continued pressure to fund further rounds of equalization in future years. It is estimated that an additional \$195 million to \$200 million would still be required to fully equalize revenue limits computed on the basis of current state policy. As mentioned above, I intend to sign subsequent legislation that appropriates up to \$203,000,000 to complete full equalization consistent with the current statutory goal. That subsequent legislation should also delete Section 7 and subdivision (c) of Section 42 of this statute to conform.

Further, I am reducing the appropriation for the Standardized Testing and Reporting (STAR) program by \$800,000 to correct an unintentional overappropriation of the item.

The effect of my actions are reflected as follows:

SEC. 44. The sum appropriated in Item 6110-113-0001 of Section 2.00 of the Budget Act of 2002 is hereby augmented by forty-five million eight hundred nine thousand dollars (\$45,809,000) and the amount appropriated in Schedule (4) of that item is augmented by forty-five million eight hundred nine thousand dollars (\$45,809,000).

SEC. 51. (a) The amount of two hundred three million dollars (\$203,000,000) is hereby appropriated from the General Fund to the Superintendent of Public Instruction for the 2003-04 fiscal year for the following purposes:

(1) Two hundred three million dollars (\$203,000,000) for purposes of Section 42238.44 of the Education Code, to be allocated to school districts on a pro rata basis.

(b) For purposes of making the computations required by Section 8 of Article XVI of the California Constitution, the appropriation made by this section shall be deemed to be "General Fund revenues appropriated to schools districts," as defined in subdivision (c) of Section 41202 of the Education Code for the 2003-04 fiscal year and be included within the "total allocations to schools district and community college districts from General Fund proceeds of taxes appropriated pursuant to Article XVII B," as defined in subdivision (e) of Section 41202 of the Education Code for the 2003-04 fiscal year.

GRAY DAVIS, Governor

  - recognition of men and women who have contributed to excellence of agricultural industry, 86
  - taxation, 34, 35
  - water—
    - drainage management: solar evaporators, 597
    - usage forecasts, water, 615
- AGRICULTURE DAY, CALIFORNIA
- designation, 348
- AHN CHANG HO, DOSAN
- highway interchange designation, 160
- AID TO FAMILIES WITH DEPENDENT CHILDREN-FOSTER CARE PROGRAM.
- See FOSTER CARE.
- AIDS (ACQUIRED IMMUNE DEFICIENCY SYNDROME)
- drug rebates, aids, 1161
  - federal funding, 926
  - hiv—
    - medi-cal. See MEDI-CAL—*acquired immune deficiency syndrome (aids)*.
    - reporting system, 926
    - testing—
      - blood or patient sample from source of first responder exposure, available, 342
      - boxers and martial arts fighters, 680
      - counselor training, 273
      - criminal offenders, 831
    - medi-cal. See MEDI-CAL—*acquired immune deficiency syndrome (aids)*.
- AIR CONDITIONERS AND AIR CONDITIONING
- electrical corporations: air conditioning load control program, 601
- AIR POLLUTION
- carbon dioxide absorption, conservation of native forest reservoirs to increase, 423
  - diesel engine exhaust, 1129
  - greenhouse gas emissions, 200, 423
  - indoor air contaminants, 987

## AIR POLLUTION—Continued

## motor vehicles—

- alternative fuel vehicles, 566

- carbon dioxide emissions, 200

- clean air vehicles: toll-free passage on golden gate bridge, 173

- electric vehicles. See MOTOR VEHICLES—*electric vehicles*.

- fuel, motor vehicle—

- oxygenation waiver, 7, 98

- penalties for violations of rules, regulations, etc., 287

- greenhouse gas emissions, 200

- inspection programs, smog check stations, etc.—

- compliance or noncompliance certificate: validity period, 127, 405

- exempt vehicles, 1001

- gold shield facilities, 1001

- gross polluters, 1001

- noise level tests, 569

- smog check II, 1001

- specially constructed vehicles, 693

- test-only smog check stations, 569

- low-emission vehicles: license fees, 566

- passenger vehicle and light truck emissions, 200

- smog check programs. See subheading, *motor vehicles—inspection programs, smog check stations, etc.*

- smog impact fees, 1001

- zero-emission vehicles—

- electric vehicles. See MOTOR VEHICLES—*electric vehicles*.

- parking or fueling space violations, 640

- particulate matter, 1129

- toxic air contaminants, 572

## AIRCRAFT AND AVIATION. See also AIRPORTS.

- firefighting aircraft: pilots and crews killed in the line of duty: death benefits, 476, 147

- flight 93 crash site: somerset county, pennsylvania: national memorial designation, 182

- historical significance, aircraft of, 214

## WORKERS' COMPENSATION—Continued

## death benefits—

- dependent children, 6, 866
- determination of benefits, 6, 866
- safety officers, local, 296

## disability benefits—

- dependent children, 6, 866
- determination of benefits, 6, 866
- medical treatment, 6, 866
- payments, disability indemnity: negotiation of written instrument, 6
- reinsurance, 899
- safety officers, local, 189, 877

## employers—

- aerospace industry employers, 6, 866
- assessments levied on employers, 6, 866
- contractors, 311, 1098
- coverage, lack of: penalties, etc., 6
- employment agencies, etc.: coverage for temporary labor, 1098
- loss control plans, programs, etc., 6, 866
- medical information, employee: disclosure, etc., 6
- notices, informational: posting requirements, 6
- premium, factors affecting employer's, 6
- self-insured employers: alternative security system, 866
- timber industry employers, 6, 866
- uninsured employers, 6

## firefighters, 870

## fraud: investigation, prosecution, etc., 6

## horse racing—

- harness racing stable employees, etc., 923
- thoroughbred stable employees and jockeys, 922, 923

## information services companies, 879

## injury and illness prevention programs, 6, 866

## injury: definition, 870, 876

## insurers—

- audits, 6
- experience rating information, 879
- injury and illness prevention programs, 6, 866
- loss control consultation services, 6, 866
- premium, factors affecting employer's, 6
- property and casualty insurers, 873
- rates. See subheading, *rates*.
- reinsurance, 899

## judges, workers' compensation administrative law, 6, 866

## judicial branch employees, 905

## medical treatment, evaluation, etc., 6, 866

## peace officers, 870, 876

## rates—

- adequacy, approval process, etc., 873
- increases, 6
- rating organizations, 893

## return-to-work program, 6

## rights, benefits, and obligations: information, assistance, etc., 6

---

NOTE: Citations are to chapter numbers; resolution chapters are indicated in *italics*. Second or Third Extraordinary Session chapter or resolution numbers are followed by (2X) or (3X).

- WORKERS' COMPENSATION—Continued  
 taxicab drivers, 893  
 vocational rehabilitation services, 6
- WORKERS' COMPENSATION, COMMISSION ON HEALTH AND SAFETY AND  
 funding, 6, 866
- WORKFORCE INVESTMENT BOARD, CALIFORNIA  
 disabled persons, inclusion of, 1088
- WORLD WAR II  
 holocaust. See HOLOCAUST.  
 japanese americans: recognition, etc., 175  
 schools: instruction on world war II, 739
- WORLD WIDE WEB. See INTERNET.
