Existing law authorizes the mill rates to be changed to, among other things, include an incremental rate of additional mills per high gross registered ton as is necessary and authorized by the Board of Pilot Commissioners to recover the pilots' costs of obtaining new pilot boats. All moneys received by the board are required to be deposited in the Board of Pilot Commissioners' Special Fund, a continuously appropriated fund.

This bill, additionally, would authorize the mill rates to be changed to include an incremental rate of additional mills per high gross registered ton as is necessary and authorized by the board to recover the pilots' costs of funding design and engineering modifications for the purposes of extending the service life of existing pilot boats, excluding costs for repair or maintenance. The bill would require net proceeds from the sale of existing pilot boats to be used for the additional purpose of reducing debt associated with the modification of pilot boats under these provisions. The bill would authorize the board to adjust a pilot boat surcharge to reflect any associated operational savings resulting from the

modification of pilot boats under these provisions, including reduced repair and maintenance expenses.

Because this bill authorizes the expenditure of money in a continuously appropriated fund for a new purpose, the bill would make an appropriation.

Ch. 130 (SB 124) Denham Horse racing: marketing.

Existing law permits racing associations, fairs, and the organization responsible for contracting with racing associations and fairs with respect to the conduct of racing meetings, to form a private, statewide marketing organization to market and promote thoroughbred and fair horse racing. Existing law requires the marketing organization to annually submit to the California Horse Racing Board a statewide marketing and promotion plan for thoroughbred and fair horse racing. Existing law also specifies funds to be distributed to the marketing organization for the promotion of thoroughbred and fair horse racing, and for workers' compensation, as specified. Existing law repeals these provisions on January 1, 2006.

This bill would extend the operation of these provisions until January 1, 2008, when they would be repealed.

Ch. 131 (SB 268) Campbell Local government investment.

Existing law, until January 1, 2007, prescribes the instruments in, and criteria by, which a county or a city and county may invest surplus funds.

This bill would additionally specify that up to 25% of the total assets of the investments may be invested in the first tier securities, as defined, of a single issuer for a period of up to 3 business days after acquisition and for only one issuer at a time.

Ch. 132 (AB 112) Cohn Protective orders: enforcement priority.

Existing law authorizes the court to issue certain protective orders after notice and a hearing.

This bill would provide that the provisions of an emergency protective order issued under specified provisions and meeting specified requirements shall have precedence in enforcement over the provisions of any other restraining or protective order, only with respect to those provisions of the emergency protective order that are more restrictive in relation to the restrained party.

Ch. 133 (AB 998) Chu Reporting: sexual assaults: medical exams.

Existing law requires health practitioners, as defined, who provide medical services to certain persons to immediately make a report to a local law enforcement agency that contains certain personal and medical information. Those certain persons include persons suffering from an injury inflicted by a firearm, and persons suffering from an injury inflicted as the result of assaultive or abusive conduct.

This bill would require health practitioners to also make a report to a local law enforcement agency upon providing medical services to persons in the custody of law enforcement from whom evidence is sought in connection with the investigation of a sexual assault crime. Because the bill would impose new duties on local agencies, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 134 (AB 1769) Negrete McLeod County employees' retirement.

The County Employees Retirement Law of 1937 authorizes counties to require specified safety members, except certain elective officers, sheriffs, undersheriffs, and court marshals, to be retired at 60 or 70 years of age.

This bill would, until April 1, 2009, and upon approval by the county board of supervisors, make those requirements inapplicable to the fire chief of a fire district in Los Angeles County whose primary duties are administrative and who is employed on a specified date. The bill would also specify that the fire chief is prohibited from receiving a salary increase that is disproportionate to any salary increase granted to other department heads of the same jurisdiction at the same time.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 135 (SB 47) Scott Clinics.

Existing law regulates the licensure of clinics, as defined, by the State Department of Health Services. Under existing law, specified types of clinics are exempted from these licensing provisions, including, until January 1, 2008, clinics that are nonprofit corporations and satisfy requirements regarding medical research and the receipt of charitable contributions and bequests.

This bill would delete the January 1, 2008, date for termination of the exemption from the licensure requirements for the nonprofit clinics described above, would require those clinics to have satisfied the requirements regarding medical research and receipt of charitable contributions and bequests on or before January 1, 2005, and would require each of those clinics to submit to the Legislature a related report by January 1, 2007, and every 5 years thereafter.

#### Ch. 136 (SB 282) Maldonado County offices.

Existing law authorizes the boards of supervisors of specified counties to provide, by ordinance, that the public administrator be appointed by the board, and authorizes the boards of supervisors of certain counties to appoint the same person to the offices of public administrator and public guardian. The boards of supervisors of certain counties are authorized to separate the consolidated offices of district attorney and public administrator for purposes of making these appointments.

This bill would include Lassen and Monterey Counties within those counties whose boards of supervisors are authorized to provide for the appointment of the public administrator by the board. It would also authorize the Board of Supervisors of Lassen and Monterey Counties to appoint the same person to the offices of public administrator and public guardian. The bill would also authorize the Board of Supervisors of Lassen County to separate the consolidated offices of district attorney and public administrator for the purpose of making these appointments.

Existing law authorizes a county, by the adoption of a resolution by a  $\frac{4}{5}$  vote of the county board of supervisors, to appropriate any of its available moneys to a revolving fund not to exceed \$1,000,000 to be used to provide in whole or in part one or more extended services to a county services area.

This bill would increase the amount that may be appropriated in that manner to \$2,000,000.

This bill would incorporate additional changes in Section 24011 of the Government Code, proposed by AB 1318, to be operative only if AB 1318 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

#### Ch. 137 (SB 383) Maldonado State Department of Mental Health: sexually violent predators.

Existing law requires the Director of Corrections, prior to the release of a person from custody resulting from conviction for certain crimes of a sexual nature against 2 or more victims, to refer the person to the State Department of Mental Health for evaluation. The law

authorizes civil commitment, as a sexually violent predator, to the custody of the State Department of Mental Health for treatment of the person's diagnosed mental disorder if the person is adjudicated to be likely to engage in sexually violent criminal behavior if discharged.

Under existing law, if the Director of Mental Health determines that the committed person's diagnosed mental disorder has so changed that the person is no longer likely to commit acts of predatory sexual violence while under supervision and treatment in the community, the director is required to forward a report and recommendation for conditional release to the superior court and the court is required to set a hearing. Also, under existing law, a person who has been committed as a sexually violent predator may petition the court for conditional release with or without the recommendation or concurrence of the Director of Mental Health.

Under existing law, if the court determines that the committed person no longer poses a danger, the court is required to order the committed person placed for one year with an appropriate forensic conditional release program operated by the state.

This bill would authorize the State Department of Mental Health to enter into an interagency agreement or contract with the Department of Corrections or with local law enforcement agencies for services related to supervision or monitoring of sexually violent predators who have been conditionally released into the community under the forensic conditional release program.

#### Ch. 138 (SB 630) Dutton Anatomical gifts: organs: inquests.

Existing law, until January 1, 2006, authorizes the county medical examiner or coroner to permit or deny removal of organs that constitute an anatomical gift from a decedent who died under circumstances requiring an inquest, on request from a qualified procurement organization, if certain conditions are met depending upon whether an autopsy is or is not required. Existing law requires the medical examiner or coroner to be present during the removal procedure under certain circumstances and requires the qualified procurement organization requesting removal of the organ, upon the request of the medical examiner or coroner, to reimburse the medical examiner or coroner for the actual costs incurred in being present during the removal procedure.

This bill would delete the January 1, 2006, repeal date, thereby extending the operation of these provisions indefinitely. To the extent the continuance of these procedures establish additional duties for county medical examiners and coroners, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 139 (SB 979) Committee on Environmental Quality Recreational uses of reservoirs.

Existing law prohibits the recreational use of reservoirs where water is stored for domestic use and defines recreational use for this purpose to include recreation in which there is bodily contact with the water by a participant.

Existing law exempts certain reservoirs from this prohibition, including, but not limited to, Bear Lake Reservoir and Canyon Lake Reservoir, and sets forth conditions and restrictions to ensure water purity.

This bill would, for the Bear Lake Reservoir and the Canyon Lake Reservoir, delete the requirement that the State Department of Health Services consult with the entity operating the reservoir at least 60 days prior to the effective date of any additional conditions or restrictions.

Existing law requires that, by January 1, 2006, the water disinfection meet prescribed federal standards.

This bill would delete that date and require that the treatment meet certain state and federal standards.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 140 (SB 1018) Simitian Elder and dependent adult abuse.

Existing law provides for the confidentiality of financial records but does not prohibit various state and local officers and agencies from requesting information from an office or branch of a financial institution and the office or branch from responding to the request, as to whether a person has an account or accounts at that office or branch and if so, any identifying numbers of the account or accounts.

This bill, from January 1, 2007, to January 1, 2013, inclusive, would provide that a county adult protective services office and a long-term care ombudsman when investigating the financial abuse of an elder or dependent adult is similarly not prohibited from requesting financial information and the office or branch is not prohibited from responding to the request.

Existing law, the Elder Abuse and Dependent Adult Civil Protection Act, establishes procedures for the reporting, investigation, and prosecution of elder and dependent adult abuse. These procedures require persons, defined as mandated reporters, to report known or suspected instances of elder or dependent adult abuse. Under existing law, care custodians of elder or dependent adults and local law enforcement agencies are mandated reporters. A violation of the reporting requirements by a mandated reporter is a misdemeanor.

This bill, from January 1, 2007, to January 1, 2013, inclusive, would include within these reporting requirements mandated reporters of suspected financial abuse, as defined, and would, with certain exceptions, make failure to comply with these requirements subject to a civil penalty.

Ch. 141 (AB 186) Bogh Occupational safety and health: fines.

Existing law permits, under specified circumstances, educational entities and institutions to apply for a refund of any civil or administrative penalty imposed against them for a violation of certain laws and orders relating to safety in employment. If the educational entities or institutions do not apply for a refund, existing law requires that the funds from the civil and administrative penalties imposed against them be expended to fund grants to assist schools in establishing effective occupational injury and illness prevention programs upon appropriation by the Legislature.

This bill would establish a similar refund plan for civil and administrative penalties imposed against public police and city, county, or special district fire departments and the California Department of Forestry and Fire Protection and would require that, if a police or fire department or the California Department of Forestry and Fire Protection does not apply for a refund, the unclaimed funds from the civil and administrative penalties be allocated to designated public entities to be used to fund grants for specific purposes, upon appropriation by the Legislature.

Ch. 142 (AB 208) Gordon School districts: priority for attendance: children of military personnel.

Existing law requires each person between the ages of 6 and 18 years, not otherwise exempt, to attend the public full-time day school in the district in which their parent or guardian is a resident. Existing law, until January 1, 2008, authorizes the governing board of a school district to adopt a resolution to become a school district of choice that accepts interdistrict transfers, as specified. Existing law establishes a transfer application procedure, as specified. Existing law authorizes the district to limit the number of pupils accepted for

transfer in specified circumstances, but requires the district to give priority for attendance to siblings of children already in attendance in that district.

This bill would also authorize a school district of choice to give priority for attendance to children of military personnel, if the school district elected to accept transfer pupils pursuant to the above provisions by a resolution adopted by the governing board of the school district prior to April 1, 2005. The bill would also make specified exceptions to, and provisions regarding, the transfer application procedure in existing law, with respect to pupils whose parents or legal guardians are enlisted in the military.

Ch. 143 (AB 357) Shirley Horton Taxpayer contributions: Veterans' Quality of Life Fund.

(1) Provisions relating to the administration of personal income taxes allow individual taxpayers to contribute amounts in excess of their tax liability for the support of specified funds.

This bill would allow taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the Veterans' Quality of Life Fund, which would be created by this bill. However, the bill would provide that a voluntary contribution designation for this fund may not be added on the tax return until another voluntary contribution designation is removed from that return.

This bill would provide for the expenditure of all moneys contributed to the fund pursuant to these provisions, upon appropriation by the Legislature, for administrative costs and for distribution into the Morale, Welfare, and Recreation Fund for each of the veterans' homes, as provided.

This bill would also provide that these voluntary contribution provisions are repealed on January 1 of the 5th taxable year following the taxable year the fund first appears on the tax return. This bill would also repeal these provisions for taxable years beginning on or after January 1 of the calendar year in which the Franchise Tax Board estimates by September 1 that the contributions made on returns filed in that calendar year will be less than \$250,000, and an adjusted amount for subsequent taxable years.

(2) Existing law requires the administrator of the veterans' homes to provide an annual report for all moneys deposited into the Morale, Welfare, and Recreation Fund and all expenditures from that fund. The report must be submitted to the Secretary of the Department of Veterans Affairs, the fiscal committees of the Assembly and the Senate, the committees of each house having jurisdiction over veterans affairs, and to the Veterans' Home Allied Council for each home.

This bill would require the report for the Chula Vista Veterans Home to be submitted to the Chula Vista Veterans Home Support Foundation until the Veterans' Home Allied Council for the Chula Vista Veterans Home is established.

Ch. 144 (AB 367) Nakanishi Physician and surgeon's fee waiver.

Existing law, the Medical Practice Act, provides for the licensure and regulation of physicians and surgeons by the Medical Board of California. Under the act, an applicant for a physician and surgeon's certificate is required to submit a fee payment with his or her application. The act waives this requirement for the renewal of a certificate if the applicant certifies to the board that the renewal is for the sole purpose of providing voluntary, unpaid service in specified settings.

This bill would also waive the application fee for the initial issuance of a physician and surgeon's certificate if the applicant makes this same certification to the board.

Ch. 145 (AB 495) Montanez Waste discharge requirements: penalties.

Existing law, the Porter-Cologne Water Quality Control Act, with certain exceptions, requires the imposition of a mandatory minimum penalty in the amount of \$3,000 for certain violations of waste discharge requirements, including for each serious violation, as defined,

and, under certain circumstances, for a violation of a waste discharge requirement effluent limitation, a failure to file a waste discharge report, or a violation of a toxicity effluent limitation. Existing law defines “effluent limitation,” for specified purposes, as a numeric or numerically expressed narrative restriction on the quantity, discharge rate, concentration, or toxicity units of a pollutant or pollutants authorized to be discharged from a location that is specified in waste discharge requirements.

This bill would redefine that term to mean a numeric restriction, or numerically expressed narrative restriction, on the quantity, discharge rate, concentration, or toxicity units of a pollutant or pollutants that may be discharged from an authorized location.

Ch. 146 (AB 720) Villines California State University: observance of Veterans Day.

Existing law prescribes the holidays in this state for state agencies, public schools, and community colleges. Among the holidays prescribed in this state is November 11, known as Veterans Day.

Existing law establishes the California State University under the administration of the Trustees of the California State University. Existing law authorizes the trustees to provide, by rule, for the holidays to be observed by the employees of the university.

This bill would require every campus of the California State University to observe November 11 as a holiday by closing on that day. The bill would also require the university to observe the following Monday as the Veterans Day holiday when November 11 falls on a Sunday, and to observe the preceding Friday as the Veterans Day holiday when November 11 falls on a Saturday.

Ch. 147 (AB 752) Karnette Oil spill contingency planning: financial responsibility.

Existing law establishes in state government the office of administrator for oil spill response and requires the administrator to adopt and implement regulations and guidelines governing the adequacy of oil spill contingency plans.

Under existing law, a nontank vessel, as defined, that is required to have a contingency plan may not enter marine waters of the state unless the nontank vessel owner or operator has provided to the administrator evidence of financial responsibility that demonstrates, to the administrator’s satisfaction, the ability to pay at least \$300,000,000 to cover damages caused by a spill, and the owner or operator of the nontank vessel has obtained a certificate of financial responsibility from the administrator for the nontank vessel. However, until January 1, 2006, the administrator is authorized to establish a lower standard of financial responsibility for specified nontank vessels.

This bill would extend indefinitely the authority of the administrator to establish a lower standard of financial responsibility for the specified nontank vessels.

Ch. 148 (AB 785) Karnette Vehicles: registration services: motor carriers of property permits.

(1) Existing law defines a “registration service” as a person engaged in the business of soliciting or receiving any application for the registration, renewal of registration, or transfer of registration or ownership, of any vehicle of a type subject to registration under the Vehicle Code, or of transmitting or presenting any of those documents to the Department of Motor Vehicles, when compensation is solicited or received for the service.

Existing law establishes a system for the issuance by the department of motor carrier permits to motor carriers of property.

This bill would include in the definition of “registration service” a person engaged in the business of soliciting or receiving an application for a motor carrier permit. The bill would make conforming changes in related provisions of existing law.

Because a violation of the licensing provisions governing registration services is a misdemeanor under other provisions of existing law, the bill would establish a state-mandated local program by expanding the scope of existing crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 149 (AB 1093) Matthews Employment: wages.

Existing law prohibits any person from issuing in payment of wages due or to become due, as an advance on wages to be earned, any order, check, draft, note, memorandum, or other acknowledgment of indebtedness, unless negotiable and payable on demand without discount at some established place of business in the state. Existing law provides that provision shall not prohibit an employer from depositing wages due or to become due or an advance on wages to be earned in an account on any bank, savings and loan association, or credit union of the employee's choice in this state, provided the employee has voluntarily authorized the deposit, and provides that if an employee is discharged or quits, the voluntary authorization for deposit shall be deemed terminated and existing law relating to payment of wages upon termination of employment shall apply.

This bill would instead provide that the employer may deposit the wages or advance on wages in an account in any bank, savings and loan association, or credit union of the employee's choice that has a place of business in this state. This bill would additionally modify existing law to provide that if an employee is discharged or quits, the employer may pay the wages earned and unpaid at the time the employee is discharged or quits by depositing that sum into the account authorized by the employee, and would provide that existing law relating to the payment of wages upon termination or quitting of employment shall continue to apply.

Existing law requires that an employee in the computer software field be exempt from the requirement that an overtime rate of compensation be paid if certain conditions are met, including a requirement the employee's hourly rate of pay is not less than \$41.

This bill would instead provide that requirement be that the employee's hourly rate of pay is not less than \$41 or the annualized full-time salary equivalent of that rate, provided that all the other requirements for exemption are met and that in each workweek the employee receives not less than \$41 per hour worked.

Ch. 150 (AB 1238) Plescia North County Transit District.

Existing law provides for creation of the North San Diego County Transit Development Board, with various powers and duties relative to the planning and operation of a transit system in a portion of San Diego County.

This bill would revise and recast these provisions and rename the board as the North County Transit District. The bill would conform to the provisions of the San Diego Regional Transportation Consolidation Act. The bill would also provide that a violation of a district fare ordinance is a crime. Because the bill would create a new crime, it would thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 151 (AB 1523) Blakeslee State employment: military leave of absence.

Existing law requires, upon presentation of a copy of orders for active duty in the Armed Forces, the National Guard, or the Naval Militia, the appointing power to grant a military leave of absence for the period of active duty specified in the orders, but not to exceed 4 years

for a permanent, probationary, or exempt employee, or for the remainder of a limited-term employee's appointment or a temporary employee's appointment.

This bill would require the appointing power to grant a military leave of absence for the period of active duty specified in the orders, not to exceed 5 years.

Ch. 152 (AB 1577) Benoit Unemployment insurance reform.

(1) Existing law states the intent of the Legislature to ensure that job order information registered with the Job Service of the Employment Development Department be shared among the department's field offices and requires all of the department's offices within a common labor-market area, as defined, to share job listing information, as specified, and display signs containing specified information for job seekers to review.

This bill would repeal the provisions requiring the department's offices within a common labor-market area to share job listing information and display specified signs, and would modify the provisions relating to legislative intent to state that job order information registered with the One-Stop Career Centers System shall be also shared among the department's field offices and one-stop career centers in the local labor market and throughout the state.

(2) Existing law requires the department to administer all job training and placement programs and services for eligible persons, as defined, to establish necessary data systems for purposes of providing administrative information on specified persons, including progress report data for clients in the manpower training program, as specified, and to conduct and administer, among other things, the California Migrant Master Plan.

This bill would delete the provisions requiring the department to submit progress report data, as provided, and to conduct and administer the California Migrant Master Plan.

(3) Existing law requires the Employment Development Department to develop and administer an amnesty program for a 3-month period beginning on April 1, 1995, under which an employer is eligible to apply for the waiver of unpaid penalties, and interest owed on those penalties, imposed on or before June 30, 1993, that are owed as a result of the nonpayment or underpayment of these tax liabilities or the failure to file reports; or penalties imposed, or that may be imposed, and taxes required to be withheld, that are owed as a result of the nonreporting or underreporting of these tax liabilities or the failure to file reports for periods that ended on or before June 30, 1993.

This bill would delete those obsolete provisions relating to that amnesty program.

(4) Existing law provides for the establishment of a self-employment assistance program, administered by the Director of the Employment Development Department, and establishes the eligibility requirements that an individual must satisfy in order to qualify for the self-employment assistance program. Existing law terminates that program as of the week ending December 5, 1998.

This bill would delete those obsolete provisions relating to the self-employment assistance program.

(5) Existing law requires the department to coordinate various employment programs, including work incentive programs, and to implement a federal welfare-to-work grant program pursuant to the federal Balanced Budget Act of 1997.

This bill would delete those provisions relating to the work incentive programs and the welfare-to-work grant program.

(6) Existing law authorizes the State Job Training Coordinating Council to develop a comprehensive and coordinated employment and training programs and services plan in accordance with the federal Job Training Partnership Act, which imposes various requirements on states to provide local employment and training services for economically disadvantaged individuals and displaced workers as a condition of receipt of federal funds. Existing law defines "employment and training programs and services" to include specified programs and prescribes certain guidelines for developing the coordination and special services plan, as provided.

This bill would delete those provisions relating to the guidelines for developing the coordination and special services plans, and the provisions relating to the definition of the phrase "employment and training programs and services."

(7) Under existing law, the Secretary of the Health and Welfare Agency, the Secretary of the Trade and Commerce Agency, the Chancellor of the California Community Colleges, and the Superintendent of Public Instruction, in collaboration with state and regional, as well as local workforce education and training providers, are required to develop and maintain a state workforce development plan to create an integrated, high-quality workforce development system in order to prepare emerging, transitional, and current workers to be employed in the state's global economy.

This bill would repeal those provisions relating to the Regional Work Force Preparation and Economic Development Act.

(8) Existing law establishes a job training program and a career opportunities development program for welfare recipients and other disadvantaged persons administered by the State Personnel Board, and requires the board to ensure that a sum of no less than \$1,000,000 be available to certain entities that develop jobs providing or leading to permanent employment for registrants of the Greater Avenues for Independence Act of 1985.

This bill would repeal the provisions relating to the career opportunities development program.

(9) This bill would also delete obsolete references, revise cross-references and make conforming and clarifying changes to the provisions relating to unemployment compensation, employment services programs and withholding tax on wages.

#### Ch. 153 (AB 1729) Houston Real estate.

(1) Existing law, the Real Estate Law, provides for the licensure and regulation of real estate brokers and makes a violation of its provisions a crime. Existing law requires a real estate broker who is performing certain acts in negotiating a loan to be secured by a lien on real property, or performing certain acts in negotiating the purchase of a real property sales contract or a note secured by a deed of trust, to provide the prospective lender or the prospective purchaser, as the case may be, with a specified disclosure statement. Existing law sets forth various exceptions to this requirement.

This bill would revise the requirements for those exceptions.

(2) Existing law requires a real estate licensee who undertakes to service a promissory note secured directly or collaterally by a lien on real property or a real property sales contract to comply with specified requirements, including the obtaining of a written authorization from the borrower, lender, or owner of the note or contract that is included within the terms of a written servicing agreement.

This bill would exempt from that requirement certain provisions requiring the trust accounts of a broker or person becoming the servicing agent of those notes or interests that are sold to be inspected by an independent certified public accountant.

(3) Existing law requires a real estate broker to file certain information with the commissioner relative to the conducting of a transaction that involves the sale of or offer to sell a series of notes secured directly by an interest in real property, or the sale of undivided interests in a note secured directly by real property equivalent to a series transaction. Existing law requires the notes or interests of the purchasers to be identical in their underlying terms but allows different selling prices for interests to the extent the differences are reasonably related to changes in the market value of the loan occurring between the sales of the interests. Existing law requires the interest of each purchaser to be recorded.

This bill would specify the recording procedures in this regard.

(4) Because a violation of the bill would be a crime, the bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 154 (SB 1082) Morrow Child support: military reservists.

(1) Existing law sets forth provisions by which a support order may be revised by the court and specifies that a support order may not be modified or terminated as to an amount that accrued before filing of a motion or an order to show cause to modify, except as specified.

This bill would create an additional exception to this rule to permit service members, activated to United States military duty or National Guard service and deployed out of state, to request modification of a support order, as specified. The bill would require the service member to indicate the date of deployment and would require the court, if possible, to schedule a hearing on the matter prior to that date, or grant a stay of the motion or order to show cause for modification consistent with certain federal timelines for stays. This bill would impose additional requirements on a court that fails to grant a discretionary stay and would provide that a service member, who does not file a notice of activation of military service and request to modify a support order prior to deployment out of state, is not subject to penalties on the amount of child support that would not have accrued if the order had been modified, as specified. The bill would also require the Judicial Council to develop any forms and procedures necessary to implement those provisions.

The bill would also provide that a party's absence, relocation, or failure to comply with custody and visitation orders is not, by itself, sufficient to justify a modification of a custody or visitation order if the reason for the absence, relocation, or failure is the party's activation to military service and deployment out of state.

(2) Existing law permits an order modifying or terminating a support order to be made retroactive to the date of the filing of the notice of motion or order to show cause to modify or terminate, or to any subsequent date, except as specified.

This bill would provide that if an order modifying or terminating a support order is entered due to a change in income resulting from the activation to military service or National Guard duty and deployment out of state for either the support obligor or support obligee, the order shall be made retroactive in accordance with specified requirements.

The bill would also require the Department of Child Support Services to work with the military and National Guard to ensure that information regarding the ability of service members to have support orders modified based on a change of income is made readily available to those service members. The bill would additionally require that department to develop a form for completion by the service member to allow the local child support agency to proceed with a motion for modification of a support order without the service member being required to appear. By placing new duties on local child support agencies, the bill would impose a state-mandated local program.

(3) Existing law establishes an arrears collection enhancement process pursuant to which the Department of Child Support Services may accept offers in compromise of child support arrears and interest accrued thereon owed to the state for reimbursement of aid paid pursuant to the California Work Opportunity and Responsibility to Kids Act (CaWORKs program).

This bill would provide that the acceptance of an offer in compromise shall be deemed to be in the state's best interest with regard to arrears that accrued as a result of a decrease in income when an obligor was a reservist or member of the National Guard, was activated to military service, and failed to modify the support order to reflect the reduction in income. The bill would also specify that those changes apply to all service members deployed out of state, regardless of whether those members were deployed before or after the effective date of the bill. The bill would also require the director of that department to establish specified rules in accordance with this provision.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 155 (AB 690) Saldana National Guard: weapons of mass destruction civil support team.

Existing law provides certain protection and benefits for members of the National Guard and reservists called to active duty, as specified.

This bill would authorize a state retention bonus in the amount of \$2,000 to be awarded annually to a member of the California National Guard Weapons of Mass Destruction Civil Support Team, as specified, provided that the member is a certified hazardous materials specialist or technician.

Ch. 156 (AB 341) Daucher County health care delivery systems.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons are provided health care services.

Existing law authorizes a county or counties to establish, by ordinance, a special commission in order to meet the problems of the delivery of publicly assisted medical care and to demonstrate ways of promoting quality care and cost efficiency, and to negotiate an exclusive contract with the California Medical Assistance Commission to provide or arrange for the provision of health care services provided under the Medi-Cal program.

Existing law also authorizes the commission operating in Santa Cruz and Monterey Counties pursuant to the above provisions to enter into contracts for the provision of health care services to persons who are eligible to receive medical benefits under any publicly supported program, if the commission and participating providers acting pursuant to subcontracts with the commission agree to hold harmless the beneficiaries of the publicly supported programs if the contract between the sponsoring government agency and the commission does not ensure sufficient funding to cover program costs.

This bill would reinstate provisions that took effect on June 9, 2005, which were superseded by Chapter 80 of the Statutes of 2005, to authorize a county, by ordinance, to authorize the special commission to provide delivery systems for persons eligible to receive health care services under the Medicare Program and under both the Medi-Cal program and Medicare Program. This bill would require a special commission providing delivery systems pursuant to this provision to obtain a license under the Knox-Keene Health Care Service Plan Act under certain circumstances, to conform to applicable state licensing and freedom of choice requirements as directed by the federal Centers for Medicare and Medicaid Services, and to provide notice that includes eligibility and enrollment information for those persons who are dually eligible to receive medical benefits under both the Medi-Cal program and the Medicare Program. These provisions would have continuous operation from June 9, 2005.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 157 (SB 118) Chesbro Alcoholic beverages: licenses and fees.

The Alcoholic Beverage Control Act imposes upon the Department of Alcoholic Beverage Control the responsibility to administer and enforce state laws with respect to alcoholic beverages, including the implementation of alcoholic beverage licensing. Among other things, the act authorizes any unlicensed adult resident of this state to apply to the department and be issued a permit to receive a shipment of wine from any state that allows adult residents of that state to receive shipments of wine from this state, as provided. The act

also provides that an individual or licensee in a state that affords California licensees or individuals an equal reciprocal shipping privilege, may ship, for personal use, and not for resale, no more than 2 cases of wine per month to any adult resident in this state.

This bill would eliminate the requirement that an unlicensed adult apply and be issued a permit to receive a shipment of wine.

This bill would also provide that a licensed winegrower who obtains a wine direct shipper permit, as described, may sell and ship wine directly to a California resident, for personal use, under specific conditions. Knowing violation of these provisions would be a misdemeanor.

By creating a new crime, this bill imposes a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 158 (SB 966) Committee on Local Government Local Government Omnibus Act of 2005 and state government.

(1) Existing law prescribes the procedures for special districts to retain and destroy their old records.

This bill would expressly refer to those procedures in the principal acts of 30 types of special districts.

(2) Existing law authorizes the Calaveras County Board of Supervisors to grant a county sheriff a leave of absence without salary for not to exceed one year for a specified purpose.

This bill would repeal that authorization.

(3) Existing law authorizes the Governor to take certain actions when the President, at the Governor's request, declares a major disaster to exist in the state and other actions when both the Governor proclaims a state of emergency and the President declares an emergency or major disaster to exist in this state.

This bill would authorize the Governor to take certain actions when both the Governor proclaims a state of emergency and the President declares an emergency or major disaster to exist in this state instead of when the President at the Governor's request declares a major disaster to exist in the state.

(4) Existing law, the Disaster Assistance Act defines certain terms for purposes of that act.

This bill would delete the definition of street and highway project and public facilities project and would revise the definition of project and project application. The bill would rename the act the California Disaster Assistance Act.

(5) Existing law creates within the Disaster Response Emergency Operations Account, the 1987 Higher Education Earthquake Account into which are paid funds for assistance to eligible higher education entities that incurred losses or expenses related to earthquake activity that began on October 1, 1987.

This bill would repeal provisions related to the 1987 Higher Education Earthquake Account.

(6) Existing law makes available for transfer by the Department of Finance to the State Highway Account in the State Transportation Fund any money in the Street and Highway Account that the Director of the Office of Emergency Services determines is not needed for immediate use for purposes of the Disaster Assistance Act. Existing law authorizes the director to advance to the Department of Transportation from the Street and Highway Account to the State Highway Account in the State Transportation Fund, funds that are necessary to provide for the restoration or repair of local federal aid system highway facilities when those funds are eligible for reimbursement with federal emergency relief funds.

This bill would repeal these provisions.

(7) This bill would make conforming changes and delete obsolete provisions relating to disaster assistance.

(8) Existing statutory law requires that certain county offices are to be elected, in addition to those that the California Constitution requires to be elected. Existing law establishes a process by which those offices that are required by statute to be elected may be converted to offices appointed by the board of supervisors.

This bill would explicitly state that those offices required by the California Constitution to be elective may not be made appointive by this process.

(9) Existing law contains an authorization for county boards of supervisors to impose a special ad valorem property tax, now made obsolete by the passage of Proposition 13 in 1978, to pay for comfort stations.

This bill would repeal that obsolete provision.

(10) Existing law requires that a county board of supervisors retain for at least 5 years records of any unaccepted bid or proposal for the construction or installation of any building, structure, bridge, highway or other public work.

This bill would reduce that period to 2 years.

(11) Existing law states that city representatives to regional coastal zone conservation commissions, which have been repealed, shall be appointed by a city selection commission.

This bill would repeal this obsolete provision.

(12) Existing law, the Joint Exercise of Powers Act authorizes 2 or more public agencies to perform jointly any program each agency is individually authorized to perform. Existing law also provides a procedure for counties and cities to jointly construct public buildings.

This bill would repeal the latter procedure.

(13) Existing law contains alternative procedures, enacted in 1973, for local voters to consolidate the County of Sacramento with its incorporated cities if a constitutional amendment on the subject was rejected by the voters. However, the constitutional amendment was approved.

This bill would repeal those alternative procedures.

(14) Existing law requires a certificate or statement by the county surveyor for the final map of a subdivision that lies within an unincorporated area or a certificate or statement by the city engineer or city surveyor if the subdivision lies within a city. Existing law also requires other specified information from that official.

This bill would also require that the final map contain the stamp of the seal of that official.

(15) Existing law requires that a final map contain the engineer's or surveyor's statement.

This bill would require that the statement contain a specified declaration regarding the proper placement of survey monuments.

(16) Existing law requires that whenever the governing board of a recreation and park district or a mosquito abatement and vector control district levies a special tax, benefit assessment, or a tax to pay for general obligation bonds, it is required to file specified documents with the State Board of Equalization.

This bill would delete that requirement.

(17) Existing law requires the deposit of a criminal laboratory analysis fee imposed by the courts upon conviction of specified offenses into a criminalistics laboratories fund maintained by the county treasurer to be used for specified purposes. Existing law requires the county treasurer, at the conclusion of each fiscal year, to determine the amount of any funds remaining in the fund and to distribute the surplus funds pursuant a specified allocation schedule.

This bill would authorize the county board of supervisors to assign that duty of the treasurer to determine the amount of any funds remaining in the fund at the end of the fiscal year to the auditor or another county officer.

(18) Existing law establishes the California Coordinate System, which contains the substantive requirements for surveying.

This bill would revise various provisions relating to that system to include surveying technologies such as Global Positioning Systems and Geographic Information Systems and would make related changes.

(19) Existing law grants the Kirkwood Meadows Public Utility District and the June Lake Public Utility District all of the powers of a mosquito abatement district or vector control district.

This bill would correct obsolete references to mosquito abatement districts and vector control districts in those public utility district laws.

(20) Existing law authorizes the consolidated agency consisting of the San Diego Association of Governments, the San Diego Metropolitan Transit Development Board, and the North San Diego County Transit Development Board to adopt bylaws and other rules.

This bill would specify the procedures for the publication of ordinances adopted by the board.

(21) Existing provisions of the San Diego County Regional Airport Authority Act provided for administration of the San Diego County Regional Airport Authority by an interim board with prescribed membership until December 2, 2002.

This bill would repeal obsolete provisions and make technical changes to provisions pertaining to that interim board.

(22) Existing law requires the appropriate appointing authority to fill a vacancy on the authority board occurring prior to the expiration of the member's term.

This bill would make a technical corrective change in the language of this provision.

(23) Existing open-meeting requirements of the Ralph M. Brown Act are applicable to all local agencies, including the authority.

This bill would amend the San Diego County Regional Airport Authority Act to explicitly restate the applicability of the Ralph M. Brown Act to the authority.

Ch. 159 (SB 547) Cox Vehicles: driving under the influence: vehicle impoundment.

Existing law authorizes a court to order the impoundment of a person's vehicle when the person has been convicted of violating certain provisions prohibiting driving a vehicle while under the influence of alcohol or any drug, or a combination of those.

Existing law authorizes the removal of a vehicle in accordance with a specified procedure when a peace officer undertakes the arrest of a person who was driving or in control of a vehicle, for an alleged public offense and the officer is required or authorized to take the person into custody, and does take the person into custody.

This bill would establish a pilot program in Sacramento County that would authorize, until January 1, 2009, the impoundment of a person's vehicle by a peace officer for a DUI offense that is undertaken in combination with an intervention and a referral of the person to a driving-under-the-influence program, as specified, if the person has one or more prior DUI convictions within the past 10 years. The bill would implement the program only to the extent that funds from private or federal sources are available to fund the program and only if the Board of Supervisors of Sacramento County enacts an ordinance or resolution authorizing the implementation of the pilot program in the county. The bill would require the county to report to the Legislature regarding the effectiveness of the pilot program, as specified.

Ch. 160 (AB 190) Negrete McLeod Taxpayer contributions: California Sexual Violence Victim Services Fund.

Provisions relating to the administration of personal income taxes allow individual taxpayers to contribute amounts in excess of their tax liability for the support of specified funds.

This bill would allow taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the California Sexual Violence Victim Services Fund, which would be created by this bill. However, the bill would provide that a voluntary contribution designation for this fund may not be added on the tax return until another voluntary contribution designation is removed from that return.

This bill would require that all moneys contributed to the fund pursuant to these provisions, upon appropriation by the Legislature, be allocated to the Franchise Tax Board, the Controller, and the Epidemiology and Prevention of Injury Control Branch of the State Department of Health Services for allocation to the California Coalition Against Sexual Assault, as provided.

This bill would provide that these voluntary contribution provisions are repealed on January 1 of the 5th taxable year following the taxable year the fund first appears on the tax return. The bill would further provide that these provisions are repealed for taxable years beginning on or after January 1 of the calendar year in which the Franchise Tax Board estimates by September 1 that the contributions made on returns filed in that calendar year will be less than \$250,000, or an adjusted amount for subsequent taxable years.

Ch. 161 (AB 483) Nunez Personal income tax: contributions: California Peace Officer Memorial Foundation.

Under existing law regulating the administration of personal income taxes and corporation taxes, individual taxpayers are allowed to contribute amounts in excess of their tax liability for the support of specified funds or accounts, including, among others, the California Firefighters' Memorial Fund and the California Peace Officer Memorial Foundation. Existing law provides for the repeal of the contribution provisions for these funds on January 1, 2006.

This bill would instead repeal those provisions on January 1, 2011.

Ch. 162 (AB 893) Shirley Horton Sex offenders: community placement.

Existing law provides that if the Director of Mental Health determines that a sexually violent predator's diagnosed mental disorder has so changed that the person is not likely to commit acts of predatory sexual violence while under supervision and treatment in the community, the director shall forward a report and recommendation for conditional release.

Existing law requires that when a community placement location is recommended, the department or its designee consider the victim or victim's next of kin's concerns and proximity.

This bill would, in addition, require that when a placement location is proposed for a sexually violent predator in the conditional release program, consideration shall be given to the age and profile, as defined, of the offender's victim.

This bill would incorporate additional changes in Section 6608.5 of the Welfare and Institutions Code, to become operative only if SB 723 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

Ch. 163 (AB 1188) Wolk Abuse: reporting.

Under existing law, the failure of a mandated reporter to report child, elder, or dependent adult abuse, is punishable by imprisonment in a county jail for up to 6 months, or by a fine of up to \$1,000, or by both that fine and imprisonment. A supervisor or administrator who impedes or inhibits a report of child abuse is guilty of an infraction that is punishable by a fine of up to \$5,000. Any mandated reporter who willfully fails to report elder or dependent abuse, where that abuse results in death or great bodily injury, is punishable by up to one year in a county jail, by a fine of up to \$5,000, or by both that fine and imprisonment.

This bill would make the impeding or inhibiting by a supervisor or administrator of the report of child, elder, or dependent abuse punishable by imprisonment in the county jail for up to 6 months, or by a fine of up to \$1,000, or by both that fine and imprisonment. This bill would provide that any mandated reporter who willfully and unlawfully fails to report abuse or neglect, or any person who impedes or inhibits a report of abuse or neglect, where that abuse or neglect results in death or great bodily injury, shall be punished by imprisonment in the county jail for up to one year, a fine of up to \$5,000, or both that fine and imprisonment.

Because the bill would revise existing or create new crimes, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 164 (AB 1353) Liu Driving-under-the-influence offenders: education and counseling programs.

If the court grants probation to any person punished for driving under the influence of alcohol or drugs or for driving under the influence of alcohol or drugs and causing bodily injury to another person, and if the county board of supervisors has approved, and the State Department of Alcohol and Drug Programs has licensed, an alcohol and other drug education and counseling program, in addition to other terms and conditions imposed by the court, existing law requires the court to require as a condition of probation that the driver enroll and participate in, and successfully complete, a driving-under-the-influence program.

Existing law requires the court to refer a first offender whose blood alcohol concentration was 0.20% or more, by weight, or who refused to take a chemical test, to participate for at least 6 months or longer in a licensed program that consists of at least 45 hours of program activities.

This bill would instead require a first offender whose blood alcohol concentration was 0.20% or more, by weight, or who refused to take a chemical test, to participate for at least 9 months or longer in a licensed program that consists of at least 60 hours of program activities. The bill would make conforming changes.

Ch. 165 (AB 665) Salinas Business of massage.

Existing law authorizes the legislative body of a city or county to enact an ordinance that provides for the licensing for regulation of the business of massage within that jurisdiction and permits the ordinance to provide for license denial upon a showing of proof that the massage personnel or the owners or operators of a massage business are required to register with local law enforcement agencies because of the conviction of specified criminal offenses.

This bill would also provide that the ordinance, if adopted, shall require license denial upon a showing of proof that the massage personnel or the owners or operators of the massage business are required to register as sex offenders.

Ch. 166 (AB 1637) Mountjoy Vehicles: refuse or garbage truck: horn: camera.

(1) Existing law requires a refuse or garbage truck purchased after September 1, 1983, to be equipped with an automatic backup audible alarm that sounds on backing more than 36 inches and that is capable of emitting a specified sound, or be equipped with an automatic backup device, as specified, that is in good working order. It is an infraction to violate this requirement.

This bill would apply the above requirements to a refuse or garbage truck, regardless of when it was purchased, and would delete the 36-inch requirement.

The bill would also require a refuse or garbage truck that is purchased after January 1, 2010, to be equipped with a functioning camera providing a video display for the driver that enhances or supplements the driver's view behind the truck for purposes of safely maneuvering the truck. The bill would except from these requirements a vehicle, known as a rolloff vehicle, that is used for the express purpose of transporting waste containers such as open boxes or compactors.

The bill would provide that a violation of these provisions is an infraction punishable by a fine of \$150 to a fine of not to exceed \$250, depending upon the number of prior convictions.

Because this bill would expand the scope of an existing crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 167 (AB 86) Levine Firearms.

Existing law directs local law enforcement to submit the description of serialized property which has been reported stolen, lost, found, recovered, or under observation, directly to an automated Department of Justice system. Existing law requires reports of stolen nonserialized property which has unique characteristics or inscriptions permitting accurate identification to be sent by each sheriff or police chief executive directly to the Special Services Section of the department.

This bill would delete the latter requirement. It would instead require local law enforcement to submit the description of uniquely inscribed property, as well as serialized property, to the Department of Justice's system.

This bill would also provide that any information entered into the Department of Justice system regarding a firearm would remain in the system until the firearm was found, recovered, no longer under observation, or the record was deemed to have been entered in error. The bill would require the costs resulting from this requirement to be reimbursed from funds other than those collected from specified fees relating to firearms.

Ch. 168 (AB 1437) Strickland California Film Commission.

Existing law establishes and generally sets forth the duties of the California Film Commission in encouraging and promoting the film industry in the state. Existing law requires the commission to develop and oversee the implementation of the Cooperative Motion Picture Marketing Plan.

This bill would establish the Film Promotion and Marketing Fund in the State Treasury, to be available to the commission upon appropriation by the Legislature, for activities performed consistent with the provisions of existing law related to the Cooperative Motion Picture Marketing Plan. The bill would require that proceeds that accrue to the state from the sales of location library documents, photocopying, and other film-related informational documents, be deposited in the fund. The bill would authorize the commission to receive and accept for deposit in the fund, moneys from any and all public or private sources that support the commission.

Ch. 169 (SB 122) Committee on Local Government Validations.

This bill would enact the Second Validating Act of 2005, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities. This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 170 (SB 123) Committee on Local Government Validations.

This bill would enact the Third Validating Act of 2005, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

Ch. 171 (SB 127) Chesbro Alcoholic beverages: licenses.

The Alcoholic Beverage Control Act imposes upon the Department of Alcoholic Beverage Control the responsibility to administer and enforce state laws with respect to alcoholic beverages, including the implementation of alcoholic beverage licensing. Among other things, the act provides for the issuance of an on-sale license for a wine, food and art cultural museum, and educational center that authorizes described persons to sell, furnish,

or give alcoholic beverages for consumption on the premises and for various off-sale privileges, but limits the off-sale privileges to the sale of no more than 6,000 cases per calendar year of wine labeled, as provided.

This bill would delete that limitation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 172 (SB 322) Migden Alcoholic beverages: reporting.

The Alcoholic Beverage Control Act provides for the issuance and transfer of alcoholic beverage licenses by the Department of Beverage Control.

This bill would require the department to submit to the State Board of Equalization a quarterly report of licenses issued and transferred, as specified.

Ch. 173 (SB 381) Denham Charitable annuities: exemptions.

Existing law allows certain organizations and persons, known as grants and annuities societies, to receive transfers of property, conditioned upon their agreement to pay an annuity to the transferor, after obtaining a certificate of authority from the Insurance Commissioner. Existing law exempts a grants and annuities society from specified regulatory requirements if it also holds a certificate of authority as an insurer from the commissioner.

This bill would add regulatory provisions relating to the maintenance of reserves, annuity agreement terms, the transaction of variable annuities, and the filing of a specified financial statement to the provisions from which a grants and annuities society is exempt if it also holds a certificate of authority as an insurer.

Ch. 174 (SB 487) Cox Group life insurance.

Existing law generally regulates group life insurance policies, and defines various forms of group life insurance.

This bill would provide that, in addition to the issuance of group life insurance otherwise permitted by specified provisions of law, the Insurance Commissioner may approve the issuance of group life insurance if the insurer or applicant proves specified facts to the commissioner's satisfaction, including facts regarding the insurer, the group to be insured, the premiums charged, and the public interest. The bill would allow an insurer under a policy covered by these provisions to exclude or limit the coverage on any person as to whom evidence of individual insurability is not satisfactory to that insurer.

Ch. 175 (SB 671) Cox Plumas County Flood Control and Water Conservation District: board of directors.

Existing law, the Plumas County Flood Control and Water Conservation District Act, establishes the Plumas County Flood Control and Water Conservation District and requires the Plumas County Board of Supervisors to serve ex officio as the board of directors of the district. The act requires the members of the board of supervisors to serve as directors on the board of the district without compensation.

This bill would authorize the board of directors to receive compensation, with a certain exception and subject to a specified limit, for performing duties as a director on that board.

Ch. 176 (SB 872) Denham Vertebrate pest control research.

Existing law, which is to be repealed on January 1, 2006, requires the Secretary of Food and Agriculture to establish and administer a research program and advisory committee to control vertebrate pests that pose a significant threat to the welfare of the state's agricultural economy and the public. Existing law requires county agricultural commissioners to pay an assessment on the vertebrate pest material sold, distributed, or applied by the county for vertebrate pest control purposes, as specified. Existing law also establishes the Vertebrate Pest Control Research Account in the Department of Food and Agriculture Fund and continuously appropriates the money in the account to the secretary for purposes of the program.

This bill would provide that these provisions would remain in effect until January 1, 2016, thereby imposing a state-mandated local program, and making an appropriation by continuing in effect a continuously appropriated fund. This bill would provide that county agricultural commissioners may withhold from the assessment paid to the secretary the amount necessary to recover the cost of complying with these provisions, as specified. This bill would expand the purposes of the research program to address vertebrate pests that pose a significant risk to the state's infrastructure. This bill would define research for purposes of these provisions to include both basic and applied research, as specified. This bill would also restrict expenditure of funds from the Vertebrate Pest Control Research Account, as specified.

Existing law provides that the Vertebrate Pest Control Research Advisory Committee shall consist of 11 representatives appointed by the secretary, including one representative of the county agricultural commissioners.

This bill would instead provide for a representative of the California Agricultural Commissioners and Sealers Association be appointed to the committee. This bill would also make other conforming changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

**Ch. 177 (SB 1097) Dunn State employees: State Bargaining Unit 12.**

The annual Budget Act appropriates specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for state employee compensation.

This bill would approve the provisions of the settlement agreement entered into by the state employer and State Bargaining Unit 12 on January 25, 2005, that requires the expenditure of funds, and would provide that the provisions of that settlement agreement that requires the expenditure of funds shall become effective even if the provisions of the settlement agreement are approved by the Legislature in legislation other than the Budget Act. This bill would provide that the provisions of the settlement agreement scheduled to take effect on or after July 1, 2005, that require the expenditure of funds shall not become effective unless the funds are expressly appropriated by the Legislature.

This bill would appropriate \$9,254,000 from the General Fund, unallocated special funds, and other unallocated nongovernmental cost funds for expenditure during the 2004-05 fiscal year for state employee compensation in augmentation of Items 9800-001-0001, 9800-001-0494, and 9800-001-0988 of Section 2.00 of the Budget Act of 2004, in accordance with the settlement agreement entered into by the state with State Bargaining Unit 12, the International Union of Operating Engineers, and approved by the Legislature.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual and current expenses of the state.

**Ch. 178 (AB 11) De La Torre Local agency legislative bodies: compensation.**

Existing law specifies the procedures for setting the compensation of city council members and establishes a compensation schedule based on city population.

This bill would prohibit a city council from authorizing compensation for any of its members for any purpose in an amount exceeding the existing schedules unless that additional compensation is authorized by statute. It also would provide that, unless otherwise specified by another statute, an elected member of a city council who serves on a commission, committee, board, authority, or similar body that is created by, or is under the jurisdiction of, a city council shall not receive compensation for that service in excess of \$150

per month for each commission, committee, board, authority, or similar body upon which the member serves. It would specify that any amount reimbursed for actual and necessary expenses, including traveling expenses, shall not be considered compensation for this purpose.

Existing law requires the legislative body of each community that has declared by ordinance that there is a need for the community development commission to function in that community to establish and provide the terms, compensation, and removal of commissioners.

This bill would provide that if that ordinance declares that need only with respect to a redevelopment agency the compensation of commissioners shall not exceed \$75 per meeting of the commission attended, not to exceed 2 meetings per calendar month. If the ordinance declares the need for the commission to function with respect to a redevelopment agency and a housing authority, the compensation shall not exceed \$150 for a commissioner per commission meeting attended, not to exceed 2 meetings per calendar month.

Ch. 179 (AB 52) Jerome Horton Horse racing: samples.

Existing law requires a blood or urine test sample required by the California Horse Racing Board to be taken from a horse to be divided or taken in duplicate, if there is sufficient sample.

This bill would exempt from that requirement total carbon dioxide testing. The bill would require emergency regulations to be adopted to establish policies, guidelines, and procedures that include a split sample process related to total carbon dioxide testing.

Existing law also requires the board to contract with the Regents of the University of California to have  $\frac{1}{3}$  of the required routine equine drug testing performed by the California Animal Health and Food Safety Laboratory.

This bill would instead require the board to contract with the Regents of the University of California to be the primary drug testing laboratory for any required equine drug testing.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 180 (AB 85) Maze Citrus fruit crops.

Existing law provides that there is within the Department of Food and Agriculture the Navel and Valencia Orange Advisory Committee which oversees an inspection program in specified counties pertaining to standards for orange maturity and freeze damage.

This bill would expand these provisions to also include lemons and mandarin citrus varieties. This bill would change the name of the advisory committee to the California Citrus Advisory Committee. This bill would include among the topics upon which the committee makes recommendation procedures for implementing a state crop estimating service and acreage survey.

Existing law provides that producers in specified counties shall pay an assessment not exceeding \$0.009 per carton of navel oranges shipped and \$0.004 per carton of Valencia oranges shipped to fund the inspection program and to establish a reserve to fund the frost inspection program, and an additional assessment of \$0.002 per carton, as specified, to fund a state crop estimating service and an acreage survey.

This bill would instead repeal the additional assessment and provide that a single assessment shall be paid by producers of navel oranges in the amount of \$0.011 per carton, by producers of lemons in the amount of \$0.005 per carton, and by producers of Valencia oranges and mandarin citrus in the amount of \$0.006 per carton which shall be used for all of the purposes listed above. This bill would provide that the committee may recommend to the Secretary of Food and Agriculture that no assessment be collected if no inspection program or crop survey exists, as specified. This bill would remove provisions that provide that the amount of the frost inspection fund shall not exceed the average annual expenditure for the program.

Because this bill would increase the assessments deposited into the Department of Food and Agriculture Fund, a continuously appropriated fund, this bill would make an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 181 (AB 182) Benoit Search warrants: individuals authorized to serve.

Existing law provides that investigators or inspectors employed in that capacity by the office of a district attorney are peace officers. Existing law also provides that a search warrant is an order, in writing, directed to a peace officer. Existing law also provides the form which a search warrant is required to follow, and provides that the warrant is to any sheriff, marshal, or police officer, but does not specifically mention peace officer.

This bill would conform the provisions specifying the form of a search warrant to the provisions specifying that a search warrant is directed to a peace officer.

Ch. 182 (AB 205) Ruskin Denture identification.

Existing law, the Dental Practice Act, regulates the practice of dentistry by the Dental Board of California in the Department of Consumer Affairs. Under existing law, a complete upper or lower denture fabricated by a licensed dentist, or fabricated pursuant to the dentist's work order, is required to be marked with the patient's name or social security number, unless the patient objects.

This bill would instead require that the dentures be marked with the patient's name unless the patient objects. The bill would also require the dentist to inform the patient that the markings are to be used for identification only and that the patient has the option whether the dentures are marked.

Ch. 183 (AB 223) Negrete McLeod Real estate licensure: education requirements.

Existing law, the Real Estate Law, requires the licensure of a person by the Real Estate Commissioner to engage in the business of, act in the capacity of, or advertise or assume to act as, a real estate broker or a real estate salesman. Existing law requires applicants for a real estate license renewal to meet certain education requirements.

This bill would revise these requirements on July 1, 2007, to include, among other things, completion of a 3-hour course in risk management that includes principles, practices, and procedures calculated to avoid errors and omissions in the practice of real estate licensed activities.

Ch. 184 (AB 346) Chu State claims.

(1) Existing law requires the California Victim Compensation and Government Claims Board to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board. Existing law authorizes the board to assess a surcharge in an amount not to exceed 15% of the total approval claim. The surcharge is to be deposited into the General Fund and may be appropriated in support of the board, as specified.

This bill would appropriate \$1,082,007.08 from various funds to the Executive Officer of the California Victim Compensation and Government Claims Board to pay claims accepted by the board. The bill would require the Controller, upon the request of the board, in a form prescribed by the Controller, to transfer surcharges and fees from the Budget Act items of appropriation identified in this bill to Item 8700-001-0001 of Section 2.00 of the Budget Act of 2004, but would provide that the surcharge does not apply to approved claims to reissue expired warrants.

(2) Existing law requires the payment of a \$25 filing fee for filing a claim against the state with the board, but provides that the fee does not apply to persons who have applied for and been granted permission to proceed as litigants in forma pauperis. Existing law requires the filing fee to be reimbursed to the claimant upon board approval of the claim.

This bill would provide that the filing fee does not apply to (a) persons who are receiving benefits pursuant to the Supplemental Security Income and State Supplemental Payments programs, the CalWORKS program, the Food Stamp program, or provisions of existing law relating county aid and relief to indigents, (b) persons whose income is below a specified level, (c) persons sentenced to imprisonment in a state prison or confined in a county jail, or are residents of a state institution, and within 90 days prior to the date the claim is filed has a balance of \$100 or less credited in the inmate's or resident's trust account. The bill would require the fee be paid to the board by the state entity against which the approved claim was filed if the claimant is granted a fee waiver. The bill would provide that the filing fee shall not be reimbursed if the approved claim was for the payment of an expired warrant. The bill would provide that the time for the board to determine the sufficiency, timeliness, or any other aspect of the claim is to begin when the claim is submitted with the filing fee, the fee waiver is granted, or the filing fee is paid to the board upon the board's denial of a fee waiver request if payment is received within 10 calendar days of the mailing of the notice of the denial. These provisions would become operative on July 1, 2005, or upon the enactment of the Budget Act of 2005, whichever occurs later.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 185 (AB 348) Arambula Small business certification and reciprocity program.

Existing law provides for various programs to encourage the participation of small businesses, as certified by the Department of General Services, in state agency contracts, and sets forth the duties of the Office of Small Business and Disabled Veteran Business Enterprise Services in this regard.

This bill would specify that a business that has been certified by, or on behalf of, another governmental entity may be eligible for certification as a small business if the certifying entity uses substantially the same or more stringent definitions as those set forth in existing law and substantially the same or a more stringent certification analysis than that used by the department under these provisions. It would require the office to make efforts to develop, in cooperation with associations representing counties, cities, and special districts, a core statewide small business certification application that may be adopted by all participating entities.

Ch. 186 (AB 370) Aghazarian Optometry.

The Optometry Practice Act provides for the licensing and regulation of optometrists by the State Board of Optometry. Existing law authorizes the board to initiate disciplinary proceedings against a licensee for violations of the act.

This bill would generally require the board to file an accusation against a licensee within 3 years after the board discovers the act or omission that is the subject of the proceeding, or within 7 years after the act or omission occurred, whichever comes first, subject to certain exceptions.

Ch. 187 (AB 489) Bermudez Ports: transportation network.

Existing law requires the Port of Los Angeles and the Port of Long Beach to evaluate changes to the goods movement network to gauge adherence by those ports to the certain state goals relative to utilization of and congestion at ports and to collect statistics regarding compliance with federal, state, and local efforts to achieve certain related objectives. Existing law requires the ports to report to the Business, Transportation and Housing Agency, the Office of Goods Movement of the Department of Transportation, and the Assembly and Senate Committees on Transportation in this regard by January 31, 2005, and annually thereafter through 2007.

This bill would instead require the ports to provide those reports by January 1, 2006, and annually thereafter through 2008. Because the bill would place increased duties on the ports, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 188 (AB 780) Chu Public meetings: Franchise Tax Board.

The Bagley-Keene Open Meeting Act generally requires that all meetings of a state body be open and public. Writings that are public records and are distributed to members of the state body prior to or during a public meeting, pertaining to any item to be considered during the public meeting, are required to be made available for public inspection, and any person may attend any public meeting of a state body, as provided. Existing law also provides that, prior to a state body taking a final action on any item of the Franchise Tax Board, any writings, as defined, which pertain to that item be made available to the public, as specified, to the extent that those writings are public records and are distributed by the Franchise Tax Board staff or individual members to the members of the state body.

This bill would specify that those writings must be not only distributed, but also prepared by the Franchise Tax Board staff or individual members of that board.

Ch. 189 (AB 818) Leslie Local agencies.

Existing law provides formulas for the computation of the allocation of property tax revenues among local agencies when various jurisdictional changes occur. One of those jurisdictional changes is a qualified annexation of unincorporated territory, which is defined as an annexation for which proceedings before the relevant local agency formation commission are initiated on or after January 1, 1998, and on or before January 1, 2005.

This bill would change the definition of a qualified annexation of unincorporated territory to mean an annexation for which an application or a resolution was filed on or after January 1, 1998, and on or before January 1, 2010.

Ch. 190 (AB 900) Benoit Investigators: Department of Food and Agriculture.

Existing law specifies certain persons who, although not peace officers, are authorized to exercise the powers of arrest, to serve search warrants, and to receive state summary criminal history information, as specified.

This bill would add to the list of persons so authorized investigators, investigator supervisors, and investigator managers who are employed by the Department of Food and Agriculture and designated by the Secretary of Food and Agriculture, as specified.

Ch. 191 (AB 947) Liu Postsecondary education: California Educational Facilities Authority.

(1) Existing law establishes the California Educational Facilities Authority Act, the purpose of which is to provide private institutions of higher education within the state an additional means by which to expand, enlarge, and establish dormitory, academic, faculty and staff housing, and related facilities, finance those facilities, refinance existing facilities, and to provide private and public institutions of higher education within the state an additional means to assist students in financing their costs of attendance. The act requires a "private college" to be a nonprofit private or independent degree-granting educational institution that is regionally accredited and empowered to provide a program of education beyond the high school level.

This bill would specify that, for purposes of obtaining financing under the act, a "private college" also includes a nonprofit affiliate, established on or prior to January 1, 2005, of one or more private colleges, whose sole or primary purpose is to provide administrative or other support services to the affiliated private college or colleges, and that undertakes a project for the exclusive use and benefit of one or more of the affiliated private colleges. The bill would

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

also specify that a “private college” includes a private nonprofit research organization affiliated with one or more private colleges and engaged in basic research and advanced education at the predoctoral and postdoctoral levels, but solely for the purpose of refunding bonds or other obligations previously issued by the authority.

Because this bill would authorize the authority to expend funds for new purposes, it would make an appropriation.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 192 (AB 1071) Chu Immediate Intervention/Underperforming Schools Program.

The existing Immediate Intervention/Underperforming Schools Program invites schools that score below the 50th percentile on certain achievement tests to participate in the program, and provides specified funding to those schools. Existing law requires the Superintendent of Public Instruction to take specified actions with regard to a school that is state monitored under this program if the school has not met certain growth targets, and the Budget Act of 2004 appropriates funds to the State Department of Education and provides that up to \$13,600,000 may be used for this purpose.

This bill would make an appropriation by increasing the amount that may be used for the program to \$17,648,050.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 193 (AB 1099) Leno Property tax: exclusion from new construction: active solar energy systems.

The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, “full cash value” is defined as the assessor’s valuation of real property as shown on the 1975–76 tax bill under “full cash value” or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. Pursuant to authority granted to the Legislature in the California Constitution, existing law excludes, for the 1999–2000 fiscal year to the 2004–05 fiscal year, inclusive, from the definition of “newly constructed” the construction or addition of an active solar energy system, as defined.

This bill would specify that this exclusion for the construction or addition of an active solar energy system applies from the 1999–2000 fiscal year to the 2008–09 fiscal year, inclusive.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

This bill would take effect immediately as a tax levy.

Ch. 194 (AB 1131) Torrico Health care districts: asset transfer.

(1) The existing Local Health Care District Law provides for the formation of local health care districts and, until January 1, 2006, authorizes each local district to transfer, at fair market value, any part of its assets to one or more corporations to operate and maintain the assets. After January 1, 2006, existing law changes that provision to refer to transfers to nonprofit corporations, rather than corporations.

This bill would extend a district’s authorization to transfer assets at fair market value to one or more corporations until January 1, 2011, and would thereafter only authorize the board to transfer assets at fair market value to one or more nonprofit corporations.

(2) Existing law, until January 1, 2006, authorizes the board of directors of a district to enter into lease agreements with one or more corporations. After January 1, 2006, existing

law changes this provision to refer to transfers to nonprofit corporations, rather than corporations.

This bill would extend the board's authorization to enter into lease agreements with one or more corporations until January 1, 2011, and would thereafter only authorize the board to enter into lease agreements with one or more nonprofit corporations.

(3) The bill would require a health care district to report to the Attorney General within 30 days of any transfer or lease of district assets to one or more nonprofit or for-profit corporations.

#### Ch. 195 (AB 1155) La Suer Grossmont Healthcare District.

Existing law provides for the formation of health care districts, provides for appointments of their governing boards, and sets forth their powers and duties, including, but not limited to, the power to enter into long-term leases for the operation of a hospital or a part of a hospital, and establishes standards for determining whether a transfer of assets by a local district is at fair market value.

This bill would, notwithstanding any provisions of law, permit renegotiation or extension of the lease executed between the Grossmont Healthcare District, and the Grossmont Hospital Corporation if approved by the voters of the district. The bill would make certain findings and declarations regarding the inapplicability of a general statute within the meaning of Section 16 of Article IV of the California Constitution.

#### Ch. 196 (AB 1419) Parra Finance lenders: business locations.

Existing law, the California Finance Lenders Law, provides for the licensure and regulation of finance lenders by the Commissioner of Corporations and makes a willful violation of that law a crime. That law requires the commissioner to investigate a licensure applicant and designated personnel of the applicant. A licensee under that law may file a short form license application to operate at an additional location.

This bill would specify application requirements for a licensee to operate at an additional location and would authorize the licensee to operate at that new location 10 days after the date of mailing the application. The bill would also require the commissioner to investigate any person responsible for the conduct of the lending activities of a licensure applicant and authorize the commissioner to deny an application based on the unlawful activities, as specified, of that person.

Because the bill would specify additional requirements under the California Finance Lenders Law, the violation of which is a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 197 (AB 1461) Salinas Community Development Block Grant Program Funds.

Under existing law, the Department of Housing and Community Development allocates federal community development block grant funds to cities and counties. Existing law specifies the percentage of the federal community development block grant funds that are to be used for economic development projects and programs, housing for persons and families of low or moderate income or for purposes directly related to the provision or improvement of housing opportunities for these persons and families, and for cities and counties that apply on behalf of certain Indian tribes. Existing law requires 10% of the total amount of funds to be awarded to small cities or counties for specified purposes. Existing law sets forth the maximum amount of the grants.

This bill would, until January 1, 2009, delete the limits on the maximum amount of grants. The bill would require the Department of Housing and Community Development, until

January 1, 2009, to determine, and announce in the applicable Notice of Funding Availability, the maximum amounts. The bill would, until January 1, 2009, delete the requirement that 10% of the total amount of funds be awarded to small cities and counties and would instead require the department to determine the percentage and maximum amount of these funds that would be allocated to small cities and counties. The bill would require the department to submit to the Legislature a report that indicates the number, amounts, and types of grants provided under these changes. The bill would reinstate existing law on January 1, 2009. The bill would make related conforming changes.

Ch. 198 (AB 1743) Committee on Judiciary Child support.

(1) Existing law requires the State Department of Social Services, in consultation with the Department of Child Support Services, to promulgate regulations by which the county child welfare department shall determine whether it is in the best interests of the child to have the case referred to the local child support agency for child support services, in cases that result in foster care assistance payments, as specified.

This bill would expand this program to include cases involving CalWORKs payments to a caretaker relative, as specified, Kin-GAP payments, and other specified aid, thereby imposing a state-mandated local program by expanding the duties of county child welfare departments.

(2) Existing law also requires the county child welfare department, pursuant to department regulation, to review determinations that it is not in a child's best interest to have his or her case referred to the local child support agency following each court hearing.

This bill would instead require the county child welfare department to make these reviews annually, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 199 (AB 1748) Committee on Transportation Vehicles: licenses: endorsements.

(1) Existing law authorizes the holder of a class C driver's license to operate a motorized scooter on the highway.

This bill, additionally, would authorize the holder of a class M1 or M2 driver's license to operate a motorized scooter on the highway.

(2) Under existing law, operative September 20, 2005, a person is prohibited from operating a schoolbus unless the person has a valid commercial driver's license with a passenger endorsement and possesses a schoolbus driver's certificate.

This bill would require the Department of Motor Vehicles to issue a schoolbus endorsement to operate a schoolbus without a schoolbus certificate for an operator who is employed as a schoolbus mechanic or a schoolbus driver-trainee and the endorsement is restricted to operation when there is no pupil being transported.

Ch. 200 (AB 1755) Committee on Elections and Redistricting Political Reform Act of 1974.

Existing provisions of the Political Reform Act of 1974 define a "sponsored committee" for purposes of the act.

This bill would make a nonsubstantive change to that definition.

Existing provisions of the act require financial reports in connection with campaigns, including provisions requiring certain committees to file these reports in odd-numbered

years prior to a March primary according to specified schedules. Existing law has moved the March primary date to the first Tuesday following the first Monday in June.

This bill would repeal specified provisions of the act that address reporting requirements relating to the former March primary date.

Existing provisions of the act require a candidate or committee that makes or receives a late contribution, or a committee that makes a late independent expenditure, to report the contribution or expenditure by specified means. In addition, provisions of the act require certain of these types of contributions and expenditures to be reported online, and provide that those expenditures and contributions that are required to be reported online need not also be reported by the alternative means in the act.

This bill would clarify that the alternative reports are not required for a candidate or committee that has disclosed the expenditures and contributions online.

Existing law requires holders of specified public offices to file disclosures of investments, real property interests, and income within specified periods of assuming or leaving office. The act provides that a holder of one of these offices who completes a term of an office within 30 days of beginning a term of the same office or another of these specified offices of the same jurisdiction is not deemed to assume office or leave office.

This bill would provide instead that a holder of one of these offices who completes a term of an office within 45 days of beginning a term of the same office or another of these specified offices of the same jurisdiction is not deemed to assume office or leave office.

Existing provisions of the act require statements of economic interest to be filed by certain public officers, employees, and candidates for office, and specify with whom the statements must be filed according to the employing agency or office of the officer, employee, or candidate. The act requires city treasurers to file these statements.

This bill would provide that candidates for city treasurer must also file these statements.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing potential criminal penalties on candidates for city treasurer who fail to file statements of economic interests as required by the bill, and by requiring city clerks to copy, forward, and file the copies of, the original statements.

Existing law requires candidates for judge to file statements of economic interest with the clerk of the court, as do judges and court commissioners.

This bill would provide that candidates for judge shall instead file those statements with the person with whom the candidate's declaration of candidacy is filed.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a  $2/3$  vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a  $2/3$  vote.

Ch. 201 (AB 1757) Committee on Elections and Redistricting Elections: precinct board members.

Existing law requires the local elections official to publish, not less than one week before the election, a list of polling places designated for each election precinct, followed by a list of precinct board members appointed.

This bill would instead require the elections official, not less than one week before the election, to post a list of all current polling places in each precinct and a list of precinct board members appointed by the 15th day before the election and, not later than 28 days after the election, to post a list of precinct board members who actually served on election day. The bill would require the elections official to post these lists at his or her office and on his or her official Web site, to divide and distribute these lists for posting at the City Clerk's office, as specified, and to keep, archive, and make available these lists, as specified. By increasing the duties of local elections officials, this bill would impose a state-mandated local program. The bill would also make conforming changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 202 (AB 1763) Committee on Natural Resources Beverage containers: redemption payments: processing fees.

The existing California Beverage Container Recycling and Litter Reduction Act requires a distributor of specified beverage containers to pay a redemption payment to the Department of Conservation for each beverage container, as defined, sold or transferred, for deposit in the California Beverage Container Recycling Fund. Except for distributors of beer or other malt beverages, the act requires beverage distributors to make the payment within 40 days of any sale. For beer or other malt beverage distributors, the act requires the payment be made not later than the last day of the 3rd month following the sale. The act provides for an increase in that payment if a specified condition is not met by July 1, 2007. Under the act, the department is required to calculate a processing fee for each beverage container with a specified scrap value, which is required to be paid by beverage manufacturers for each beverage container sold or transferred to a dealer.

The act allows a distributor, upon the approval of the department, to elect to make a single annual payment, if the distributor meets specified conditions and notifies the department of its intent to make annual redemption payments. The act also allows a beverage manufacturer, upon the approval of the department, to elect to make a single annual payment of processing fees, if the beverage manufacturer meets specified conditions and notifies the department of its intent to make an annual redemption payment.

This bill would require all beverage distributors to make the payment no later than the last day of the 3rd month following the sale of beverage. This bill would revise the conditions under which a distributor or beverage manufacturer is authorized to make a single annual payment, and would revise the requirement to provide advance notice to the department with regard to this payment.

Ch. 203 (SB 220) Chesbro Alcoholic beverage control: school property.

Existing law generally prohibits the sale, possession, or consumption of alcoholic beverages at a public schoolhouse. Existing law provides that this prohibition does not apply if certain conditions apply.

This bill would exempt from the prohibition wine produced by a bonded winery owned or operated as part of an instructional program in viticulture and enology.

This bill would incorporate additional changes in Section 25608 of the Business and Professions Code proposed by AB 767, to be operative only if AB 767 and this bill are both

chaptered and become effective on or before January 1, 2006, and this bill is chaptered last. These changes would become operative on the operative date of AB 767.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 204 (AB 767) Mullin Alcoholic beverages: places of consumption.

Existing law generally prohibits the sale or consumption of alcoholic beverages at a public schoolhouse or any grounds thereof. Existing law provides that this prohibition does not apply if the alcoholic beverage is acquired, possessed, or used at a professional minor league baseball game conducted at the stadium of a community college located in a county with a population of less than 250,000 inhabitants, as specified.

This bill would provide that the prohibition against the sale or consumption of alcoholic beverages on the grounds of a public schoolhouse does not apply if the grounds on which the alcoholic beverage is acquired, possessed, used, or consumed is property that has been developed and is used for residential facilities or housing that is offered for rent, lease, or sale exclusively to faculty or staff of a public school or community college district.

This bill would incorporate changes in Section 25608 of the Business and Professions Code proposed by SB 220, to be operative only if SB 220 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

Ch. 205 (SB 488) Soto Contractors.

Existing law, the Contractors' State License Law, creates the Contractors' State License Board within the Department of Consumer Affairs and provides for the licensure and regulation of contractors. Existing law makes it a misdemeanor for any person to engage in the business or act in the capacity of a contractor without having a license. Existing law requires, with exceptions, that a repeat offender be confined in a county jail for not less than 90 days. Existing law requires a court to state on the record its reasons if the court imposes a jail sentence of less than 90 days or only a fine.

This bill would also make 3rd and subsequent convictions of these offenses punishable by a fine of not less than \$4,500 nor more than the greater amount of either \$10,000 or 20% of the contract price under which the unlicensed person performed contracting work or by imprisonment or by both that fine and imprisonment.

Existing law generally requires an applicant for a contractors' license or a licensee to have on file with the board a Certificate of Workers' Compensation Insurance or a Certification of Self-Insurance. Existing law provides that failure to comply with these provisions constitutes cause for disciplinary action.

This bill would also make any qualifier for a license guilty of a misdemeanor for committing or failing to prevent the commission of any of these acts that are cause for disciplinary action.

Because failure to comply with the bill would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 206 (SB 375) Speier Medicare supplement coverage.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care and makes a violation of the act a crime. Existing law provides for the licensure and regulation of health insurers by the Department of Insurance. Under existing law, a plan or insurer that issues a Medicare supplement contract or policy, as defined, is required to comply with requirements in addition to those generally imposed on health care service plan contracts and health insurance policies.

This bill would make certain changes to these Medicare supplement coverage provisions corresponding to revisions made to the Medicare program by the federal Medicare Prescription Drug, Improvement, and Modernization Act of 2003. The bill would revise eligibility requirements for Medicare supplement coverage, including the guaranteed issue of coverage, and would add 2 benefit plans. The bill would also revise application procedures for this coverage.

Because a violation of the new requirements for Medicare supplement coverage issued by a health care service plan would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 207 (SB 708) Speier Drug discount program: conditions of participation.

Existing law establishes the federal Medicaid program, administered by each state, California's version of which is the Medi-Cal program. The Medi-Cal program, which is administered by the State Department of Health Services, provides qualified low-income persons with health care services.

Existing federal law requires the United States Secretary of Health and Human Services to enter into an agreement with each manufacturer of covered drugs that are not subject to a rebate under an agreement between the state Medicaid program and the manufacturer under which the amount required to be paid to the manufacturer for covered drugs, with certain exceptions, purchased by a covered entity, as defined, does not exceed an amount equal to the average manufacturer price for the drug under the federal Medicaid program in the preceding calendar quarter, reduced by the rebate received pursuant to the Medicaid agreement.

This bill would require the State Department of Health Services to develop a standard contract for private nonprofit hospitals whereby a hospital that elects to participate in the drug discount program established under federal law shall agree to provide charity care on a continuing basis.

Ch. 208 (SB 665) Migden California Career Resource Network.

Existing law establishes various career preparation programs, including the School-to-Career Program, which provides grants for local agencies to build connections between educators, employers, local government, and the community, as specified. Existing law also establishes the California Occupational Information Coordination Committee for the purposes of, among other things, developing a plan for the use of available resources to design and implement a statewide comprehensive labor market and occupational supply and demand information system.

This bill would repeal the California Occupational Information Coordination Committee and instead establish the California Career Resource Network for the purpose of providing career development information and resources, as provided. The bill would also make conforming changes.

Ch. 209 (SB 467) Lowenthal Carl Moyer Memorial Air Quality Standards Attainment Program.

Existing law establishes the Carl Moyer Memorial Air Quality Standards Attainment Program, which provides grants to offset the incremental cost of eligible projects that reduce oxides of nitrogen from heavy-duty mobile sources in the state. Existing law requires the State Air Resources Board to establish or update grant criteria and guidelines consistent with the program for covered vehicle projects.

This bill would require the state board to revise the grant criteria and guidelines to incorporate projects in which an applicant turns in nonroad internal combustion technology and equipment that the applicant owns and that still has some useful life, coupled with the purchase of new nonroad zero-emission technology and equipment that is in a similar category or that can perform the same work. The bill would impose certain restrictions on the state board's evaluation of the cost-effectiveness of a project.

Ch. 210 (SB 376) Soto Three Valleys Municipal Water District: standby charge authority.

The existing Municipal Water District Law of 1911 authorizes a municipal water district, by ordinance or resolution, as specified, to impose an annual water standby assessment or availability charge in any portion of the district to which the water is made available by the district, whether the water is actually used or not. The existing Uniform Standby Charge Procedures Act generally authorizes a local agency that is authorized to provide water service to impose, in any given year and in accordance with prescribed procedures, a water standby charge on land to which water service is made available by that local agency. Article XIII C and Article XIII D of the California Constitution subject local governmental entities to various requirements prior to imposing or increasing certain taxes, fees, or assessments.

This bill would authorize the Three Valleys Municipal Water District, by resolution, to adopt an assessment with a schedule of annual adjustments, and to adjust the amount of an assessment in a specified manner, if certain conditions are met. The bill would impose prescribed notice and hearing requirements. The bill would state that, for the purposes of those constitutional provisions, the district has not increased an assessment if the district adjusts an assessment in a specified manner.

Ch. 211 (SB 157) Ackerman Taxation: installment payment agreements: business taxpayers.

Existing law allows an individual taxpayer to enter into an installment payment agreement with the Franchise Tax Board for the payment of the amount of the taxpayer's tax liability, but permits all taxpayers, including business entities, to enter into installment agreements, regarding the payment of tax liability, during the tax amnesty period from February 1, 2005, until March 31, 2005. Under existing law, certain nonindividual taxpayers are subject to a 50% amnesty penalty, as provided, if they have a balance due after March 31, 2005, and have not entered into installment payment agreements with the Franchise Tax Board by that time, even though they might have informally agreed to pay the amount of the tax owed.

This bill would expand the category of taxpayers that are allowed to enter into installment payment agreements with the Franchise Tax Board to include nonindividual taxpayers. This bill would also require that certain informal payment plan arrangements between the Franchise Tax Board and nonindividual taxpayers be treated as installment payment agreements for amnesty purposes, and would postpone until July 1, 2005, the imposition of the specialized tax services fee, as provided, for specified installment agreements.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 212 (SB 878) Dunn Charitable solicitation disclosures.

Existing law requires certain disclosures to be made prior to any solicitation or sales solicitation for charitable purposes.

This bill would revise the requirements for these disclosures, including deleting provisions requiring disclosure of the percentage of the amount collected that is used for charitable purposes.

Ch. 213 (SB 1085) Migden Infrastructure financing districts: public trust lands.

Existing law authorizes the formation by local legislative bodies of infrastructure financing districts, which may include specified types of areas, to incur debt, as defined, or provide for tax increment allocation, to finance the purchase, construction, expansion,

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

improvement, seismic retrofit, or rehabilitation of specified types of real or tangible property, including specified types of facilities, pursuant to an infrastructure financing plan adopted pursuant to specified procedures.

This bill would include a public agency that owns all the land to be included in a proposed district within the definition of “landowner” for purposes of these provisions.

This bill would, with respect to the City and County of San Francisco, expand the definition of “debt” for these purposes, include environmental remediation and certain types of repairs within those projects that may be financed, include various facilities within those qualifying for financing, and make various conforming changes. It would, with respect to the City and County of San Francisco, include tidelands and submerged lands subject to the public trust for commerce, navigation, and fisheries, and the applicable statutory trust grant or grants, among the areas that may be included in an infrastructure financing district and make related changes, would make various changes in the procedures for formation of the district and adoption of an infrastructure financing plan if all the land in the district would be publicly owned, and would authorize the amendment of an infrastructure financing plan to extend time limitations for receipt of property tax increment, subject to specified conditions.

Ch. 214 (SB 772) Ducheny Environment: border region: waste and used tires.

The existing California Tire Recycling Act requires the California Integrated Waste Management Board to administer a tire recycling program that promotes and develops alternatives to the landfill disposal of used whole tires. The board is required to adopt and biennially update a 5-year plan to establish goals and priorities for the waste tire program, including specified program elements. The budget for implementation of the act and the funding of the tire recycling program are based upon the 5-year plan.

This bill would additionally require the plan to include specified border region activities, conducted in coordination with the California Environmental Protection Agency, including training programs, environmental education, waste tire abatement, tracking tire flow across the border, and coordination with regard to environmental and control requirements.

Ch. 215 (AB 220) Committee on Public Safety Domestic violence.

Existing law permits the Board of Prison Terms, at parole hearings, to consider evidence that a prisoner suffered from battered women’s syndrome at the time the crime was committed.

This bill would change the reference from battered women’s syndrome to intimate partner battering.

Existing law provides that commissioners and deputy commissioners who conduct parole hearings must be trained in domestic violence and battered women’s syndrome.

This bill would change the reference from battered women’s syndrome to intimate partner battering.

Existing law directs that health care providers be trained in the dynamics of victimization, including battered women’s syndrome.

This bill would change the reference to intimate partner battering.

Existing law provides that a court may consider expert testimony about battered women’s syndrome when considering whether or not to grant custody to a parent who has been convicted of murdering the other parent of the child who is the subject of the order.

This bill would change the reference from battered women’s syndrome to intimate partner battering.

Existing law precludes a civil action against a defendant based upon a conviction for murder or attempted murder if the defendant presented substantial evidence at trial that he or she was the victim of battered women’s syndrome, or if the defendant’s parole was granted due to evidence of battered women’s syndrome that was presented to the Board of Prison Terms.

This bill would change the reference from battered women's syndrome to intimate partner battering.

The bill would incorporate additional changes to Section 3030 of the Family Code made by this bill and SB 594 to take effect if both bills are chaptered and this bill is chaptered last.

Ch. 216 (AB 268) Matthews Unprofessional conduct.

Existing law requires reporting by a physician and surgeon and various other persons, including a coroner, clerk of court, prosecutor, and professional liability insurer, to the Medical Board of California or the California Board of Podiatric Medicine relative to criminal indictments, criminal convictions, negligence, patient deaths, and other matters concerning a physician and surgeon or podiatrist.

This bill would instead require reporting to the Osteopathic Medical Board of California with respect to licensees of that board.

Ch. 217 (AB 297) Yee State employees: requirements to file charges.

Existing law permits any person, except for a current ward of the California Youth Authority or a current inmate of the Department of Corrections, with the consent of the State Personnel Board or the appointing power, to file charges against a state employee requesting that adverse action be taken for one or more causes for discipline.

This bill would specify that a current patient of a facility operated by the State Department of Mental Health also may not file these charges against a state employee.

Ch. 218 (AB 493) Frommer Multiple employer welfare arrangements: investments.

Existing law allows creation of multiple employer welfare arrangements (MEWAs) to allow employer members or trade associations to create trust funds for the purpose of providing health care benefits to their employees or members. Under existing law, a MEWA is required to comply with specified investment requirements.

This bill would revise the requirements for the investment of the assets of a MEWA.

Ch. 219 (AB 512) Richman Clinical laboratories.

Under existing law, the State Department of Health Services licenses and regulates clinical laboratories and clinical laboratory personnel. A violation of these provisions is a misdemeanor. Under existing law, the department may deny, suspend, or revoke a license or registration for specified reasons.

This bill would also authorize the department to deny, suspend, or revoke a license or registration for failure to comply with specified disease reporting requirements.

Existing law authorizes the department to impose specified penalties in lieu of, or in addition to, revocation or suspension of a license or registration.

This bill would also authorize the department to impose civil monetary penalties for failure to comply with specified disease reporting requirements.

Because a violation of the bill would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 220 (AB 520) Parra Civil administrative penalties: food and agriculture violations.

Under existing law, persons who sell certain agricultural commodities are required to provide a record of proof of ownership, as specified. Existing law prohibits any person knowingly falsifying those records or causing those records to be falsified. Violation of these provisions is a misdemeanor pursuant to other provisions of law.

This bill would authorize the Secretary of Food and Agriculture, or the County Agricultural Commissioner to, in lieu of prosecution, levy a civil fine against persons violating those provisions, as specified.

Under existing law, in lieu of civil prosecution, the Secretary of Food and Agriculture or the County Agricultural Commissioner may levy a civil penalty against any person for a violation relating to the use of a California Grown seal on agricultural products of not more than \$500 for each violation.

This bill would authorize the secretary or the commissioner to levy a civil penalty against any person violating provisions relating to fruit, nut, and vegetable standards. The civil penalties would range from not more than \$500 or \$3,000 for first violations, as specified, to fines up to \$1,000 or \$5,000 for subsequent or other violations, as specified.

Ch. 221 (AB 599) Gordon Mental health account: primary goals: California veterans.

Existing law authorizes a county to appoint a county veterans service officer and to prescribe the duties of that office.

Existing law sets forth the primary goals of the mental health account of a local mental health trust fund, including, but not limited to, services for seriously emotionally disturbed children and adolescents, and adults and older adults who have a serious mental disorder.

This bill would specifically include within this priority, veterans in need of mental health services who are not eligible for care by the federal Department of Veterans Affairs or other federal health care providers and would require the county to refer the veteran to the county veterans service officer, if any, prior to denying eligibility, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 222 (AB 621) Cogdill Milk.

Existing law requires the Secretary of Food and Agriculture to require inspections at least quarterly of all milk products plants that pasteurize milk or milk products, manufacture cheese, or manufacture raw milk cheese, and requires that the inspection procedures include specified elements.

This bill would provide that milk products plants that have been approved to use Hazard Analysis Critical Control Points (HACCP) procedures under the auspices of the National Conference of Interstate Milk Shipments, or a state or federal regulatory agency, may adhere to the inspection protocol of the HACCP regulatory enforcement procedures.

Existing law prohibits a dairy cow farm that was marketing market milk on August 1, 1996, from marketing manufacturing milk, except as specified.

This bill would apply this prohibition to a dairy cow farm that was marketing market milk on August 1, 2005, and would prohibit a dairy cow farm that begins operation on or after January 1, 2006, from marketing manufacturing milk, except as specified. A violation of this provision would be a misdemeanor. Because this bill would expand an existing crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 223 (AB 856) Bass Baldwin Hills Conservancy.

Existing law establishes the Baldwin Hills Conservancy to acquire and manage public lands within the Baldwin Hills area, and to provide recreational, open space, wildlife habitat restoration and protection, and lands for educational uses within the area. Existing law requires that the governing board of the conservancy consist of 6 nonvoting members.

This bill would increase from 6 to 7 the number of nonvoting members of the board and add the Director of the Department of Conservation, or his or her designee, as a nonvoting member.

The bill would require that all meetings of the board be subject to the Bagley-Keene Open Meeting Act instead of the Ralph M. Brown Act. The bill would also eliminate the requirement that the conservancy obtain and maintain liability insurance for the acts or omissions of the conservancy's agents, employees, and volunteers.

Ch. 224 (AB 885) Keene Real property: mortgages.

(1) Existing law requires a person recording a notice of default or a notice of sale under any deed of trust or mortgage with power of sale to perform specified actions. These actions include, but are not limited to, mailing a copy of the notice with the recording date shown and a copy of the notice of the time and place of sale, as specified, to each person requesting a copy and to each trustor or mortgagor at his or her last known address if different than the address specified in the deed of trust or mortgage with power of sale.

This bill would modify the definition of "last known address" for purposes of these provisions.

(2) Existing law provides that all sales of property under the power of sale contained in any deed of trust or mortgage shall commence at the time and location specified in the notice of sale, and requires any postponement to be announced at that time and location or at any time prior to the completion of the sale at the discretion of the trustee or upon instruction by the beneficiary to the trustee that the sale proceedings be postponed. Existing law permits a maximum of 3 postponements of the sale proceedings, and requires a new notice of sale to be given before any further sale proceedings may be scheduled. Existing law also requires the trustee to postpone the sale upon the order of any court of competent jurisdiction, or where stayed by operation of law, or by the mutual agreement of any trustor and any beneficiary or any mortgagor and any mortgagee; however, any such postponement does not count in determining the maximum number of postponements permitted without giving a new notice of sale.

This bill, instead, would permit any number of postponements of the sale proceedings at any time prior to the completion of the sale, for any period of time not to exceed a total of 365 days from the date set forth in the notice of sale, upon the order of any court of competent jurisdiction, where stayed by operation of law, by mutual agreement of any trustor and any beneficiary or any mortgagor and any mortgagee, at the discretion of the trustee, or upon instruction by the beneficiary to the trustee that the sale proceedings be postponed. Any postponements beyond the 365-day period would require a new notice of sale to be given before any further sale proceedings may be scheduled.

Ch. 225 (AB 983) Laird Housing: downpayment assistance.

Existing law governing housing and home finance generally defines the term "affordable housing cost," with respect to very low, lower, and moderate-income households receiving assistance on or after January 1, 1991. Pursuant to that definition, housing costs may not exceed the product of a specified percentage times a specified percent of the area median income. This definition is used for determining, among other things, the affordability of housing made available pursuant to a requirement that a redevelopment agency allocate 20% of tax-increment revenues for housing available at affordable housing cost.

Existing law, until January 1, 2006, authorizes any redevelopment agency in Santa Cruz County to make assistance available from its low- and moderate-income housing fund

directly to a home buyer and separately defines affordable housing cost for these purposes. Existing law imposes specified reporting requirements on those redevelopment agencies.

This bill would extend the repeal date of these provisions for redevelopment agencies within Santa Cruz County to January 1, 2008, and would make related changes in the reporting requirements. The bill would make the provisions that separately define affordable housing costs in Santa Cruz County for purposes of making assistance available from the low- and moderate-income housing fund directly to a home buyer also applicable to the Contra Costa County Redevelopment Agency and the Monterey County Redevelopment Agency for those purposes. The bill would require the Controller to furnish to the Legislature and the Director of Housing and Community Development the additional information these redevelopment agencies are required to include in their annual reports.

Ch. 226 (AB 1048) Pavley Motor carriers.

Existing law imposes various requirements upon owner-operators providing transportation services to a motor carrier under the direction and control of that motor carrier, as specified. Existing law makes a motor carrier that engages an owner-operator responsible for the compliance of that owner-operator with certain laws and regulations relating to commercial motor vehicle safety, if the owner-operator meets certain requirements.

This bill, instead, would make a motor carrier that engages a person who owns, leases, or otherwise operates not more than one commercial motor vehicle to provide transportation services under the direction and control of the motor carrier, responsible for the compliance of that person with the specified laws and regulations. The bill would revise the definition of “direction and control” for these purposes.

Ch. 227 (AB 1201) Laird Sierra Nevada Conservancy.

Existing law establishes the Sierra Nevada Conservancy, to undertake various activities related to the Sierra Nevada Region, as defined, and prescribes the management, powers, and duties of the conservancy. Existing law authorizes the conservancy to acquire from willing sellers or transferors an interest in real property, but prohibits the conservancy from acquiring a fee interest in real property. Existing law authorizes the conservancy to receive, among other things, gifts, donations, and a fee interest in real property.

This bill would revise the description of the Sierra Nevada Region for purposes of the conservancy.

This bill would specify that the conservancy may not acquire a fee interest in real property by purchase. The bill would also authorize the conservancy to receive bequests and devises. The bill would make various technical, nonsubstantive changes in those provisions.

Ch. 228 (AB 1329) Wolk Design-build contracting: cities.

Existing law requires public entities to comply with certain procedures in soliciting and evaluating bids and awarding contracts for the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement. Existing law, until January 1, 2006, permits certain counties, with the approval of the board of supervisors, to enter into design-build contracts, as defined, in accordance with specified provisions.

This bill would, until January 1, 2011, permit cities in the Counties of Solano and Yolo, with the approval of the city council, to enter into specified design-build contracts, as defined, in accordance with specified provisions. This bill would require cities that elect to use the described design-build contract procurement process to report to the Legislative Analyst’s office before December 1, 2009.

This bill would also require the Legislative Analyst’s office to report to the Legislature regarding the effectiveness of the design-build program.

This bill makes legislative findings of the necessity to enact special legislation with respect to cities located in the Counties of Solano and Yolo.

This bill would require specified information to be verified under oath, thus imposing a state-mandated local program by expanding the scope of an existing crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 229 (AB 1358) Mullin Acquisition of proposed schoolsites: notice.

Existing law requires the governing board of each school district, before acquiring title to property for a new schoolsite, to provide the State Department of Education written notice of the proposed acquisition, along with any information required by the department, if the proposed site is within two miles, measured by air line, of that point on an airport runway or potential airport runway included in an airport master plan that is nearest to the site. Existing law requires the State Department of Education, upon receipt of the notice, to notify the Department of Transportation in writing of the proposed acquisition. Existing law requires the Department of Transportation to investigate the proposed site and submit a report of its findings and recommendations concerning acquisition of the site to the State Department of Education. Existing law requires the State Department of Education to forward the report to the governing board of the school district. Existing law provides that state or local funds may not be apportioned or expended for acquisition of a site if the Department of Transportation's recommendation does not favor acquisition of the site.

This bill would require a school district to provide the Department of Transportation with that notice before leasing property for a new schoolsite. This bill also would make these provisions applicable to charter schools.

Ch. 230 (AB 1359) Chan Prescription drug plans.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, the willful violation of which is a crime, provides for the licensure and regulation of health care service plans and specialized health care service plans by the Department of Managed Health Care and other provisions of law provide for the regulation of life and disability insurers by the Department of Insurance.

This bill would require a sponsor of a prescription drug plan authorized by the federal Medicare Prescription Drug, Improvement, and Modernization Act of 2003 in this state to be licensed as a health care service plan or as a life and disability insurer.

Because a willful violation of the bill would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 231 (AB 1424) Saldana Taxation: delinquent tax liabilities: surplus line brokers.

Existing law imposes a gross premiums tax on, among others, surplus line brokers, which is measured by gross premiums less return premiums with certain exceptions, and provides for the processing and auditing of tax returns by the Department of Insurance, for the issuing of deficiency assessments, and the processing of petitions and refunds by the State Board of Equalization. Existing law provides that the tax levied upon an insurer, as specified, is a lien upon all property owned by the insurer, imposes a penalty on any insurer who fails to pay any tax, as specified, and disallows a corporate dissolution or bankruptcy discharge unless all tax obligations are paid.

This bill would clarify that surplus line brokers are subject to these same lien provisions that apply to other insurers.

Ch. 232 (SB 546) Dutton Office of Emergency Services: public-private partnerships.

The California Emergency Services Act sets forth the duties of the Office of Emergency Services in overseeing and coordinating various emergency response programs in the state.

This bill would authorize the office to share facilities and systems that would, among other things, include private businesses and nonprofit organizations in a voluntary program that would integrate private sector emergency preparedness measures into governmental disaster planning programs to the extent that the cost of the program is reimbursed by the private sector.

The bill would create the Disaster Resistant Communities Account in the General Fund and would require that any new activity undertaken by the office under these provisions is contingent upon the receipt of private donations to the account.

Ch. 233 (AB 823) Nava Disaster response.

Existing law ratifies, approves, and sets forth the provisions of the Interstate Civil Defense and Disaster Compact.

This bill would, until March 1, 2007, ratify, approve, and set forth the provisions of the Emergency Management Assistance Compact. The bill would also require the state to indemnify and make whole any officer or employee who is a resident of California, or his or her heirs, if the officer or employee is injured or killed in another state when rendering aid pursuant to the compact. It would require the Attorney General or other legal counsel provided by the state to defend local government or special district personnel who are officially deployed under the provisions of the compact, as specified, and would require indemnification of these personnel subject to the same conditions and limitations applicable to state employees.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 234 (AB 128) Committee on Budget Education finance.

(1) Existing law requires the Superintendent of Public Instruction, with the approval of the State Board of Education, to develop the California High School Exit Examination in English language arts and mathematics in accordance with state academic content standards. Existing law requires, commencing with the 2003–04 school year and each school year thereafter, each pupil completing grade 12 to successfully pass the exit examination as a condition of graduation from high school.

Existing law requires the governing board of each school district maintaining any or all of grades 2 to 9, inclusive, to offer, and authorizes a charter school to offer, programs of direct, systematic, and intensive supplemental instruction to pupils enrolled in grades 1 to 9, inclusive, who have been recommended for retention or who have been retained, and authorizes a school district or charter school to require a pupil who has been retained to participate in supplemental instructional programs.

This bill would provide specified funding for eligible pupils, as defined, who are required to pass the California High School Exit Examination, to be used for intensive instruction and services for those pupils, and provides for the allocation of those funds to schools. The bill would make an appropriation as it would revise items of the Budget Act of 2005 to provide funds for this purpose. The bill would also make an appropriation as it would provide that funds received for supplemental instruction may also be used for these purposes.

(2) Existing law, the Budget Act of 2005, appropriates certain funds for purposes of special education instruction to fund the costs of children placed in licensed children's institutions who attend nonpublic schools based on a funding formula specified in existing law, and appropriates funds for various special education purposes.

This bill would make an appropriation as it would revise the amounts available for these purposes and would place certain requirements on the use of these funds.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 235 (SB 12) Escutia School food nutrition.

(1) Existing law prohibits the sale of certain beverages and food items at elementary schools, and at middle and high schools participating in a pilot program.

This bill would, commencing July 1, 2007, limit those provisions, revised as specified, to elementary schools.

The bill, additionally, would prohibit the sale of certain beverages and food items, as specified, at all middle, junior high, and high schools, commencing July 1, 2007.

The bill would provide the intent of the Legislature that the governing board of a school district annually review its compliance with certain nutrition standards.

(2) Existing law requires the Superintendent of Public Instruction to monitor school district compliance with specified pupil nutrition and activity requirements, as specified, and requires certain school districts to report their compliance to the Superintendent, as specified.

This bill would, instead, authorize the Superintendent to monitor that school district compliance and would require those monitored school districts to report their compliance, as specified.

(3) The bill would make additional, nonsubstantive, conforming changes.

Ch. 236 (SB 281) Maldonado California Fresh Start Pilot Program.

Existing state and federal laws require all schools participating in meal programs to provide nutritious food and beverages to pupils.

Existing law requires that the sale of all foods on school grounds at an elementary school be approved for compliance with specified nutrition standards.

Existing law requires that a minimum of 50% of the food items, except as specified, offered for sale each schoolday at any schoolsite by any entity or organization during regular school hours be selected from a list of specified items, including specified fruits, vegetables, and fruit and vegetable juices.

Existing law requires the State Department of Health Services to establish and implement, to the extent funds other than state general funds are available, a "5 A Day—For Better Health" program for the purpose of promoting public awareness of the need to increase the consumption of fruits and vegetables as part of a low-fat, high-fiber diet in order to improve health and prevent major chronic diseases, including diet-related cancers.

This bill would establish, within the State Department of Education, the California Fresh Start Pilot Program, to be administered by the department, in consultation with the Department of Food and Agriculture and the State Department of Health Services, in order to encourage public schools maintaining kindergarten or any of grades 1 to 12, inclusive, to provide fruits and vegetables that have not been deep fried to pupils in order to supplement other fruits and vegetables that have not been deep fried and that are available to those pupils, and in order to promote the consumption of nutritious fruits and vegetables by schoolage children.

The bill would make an appropriation by requiring that, of the funds appropriated in a specified item of the Budget Act of 2005, \$400,000 shall be available for the department to provide grants to a county office of education or a community college selected on a competitive basis, to be allocated in the amount of not more than \$100,000 to develop an online professional development seminar for schoolsite staff on serving, marketing, and promoting nutritious fruits and vegetables, and not more than \$300,000 to contract with an independent evaluator to conduct a comprehensive evaluation, as specified.

The bill would require the department, in consultation with the Department of Food and Agriculture, the State Department of Health Services, and the State Board of Education, to

develop emergency regulations necessary to implement the program and to establish guidelines for the administration and evaluation of the program.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 237 (SB 965) Escutia Pupil nutrition: beverages.

Existing law requires the governing board of a school district to give diligent care to the health and physical development of pupils. Existing law restricts the sale of beverages to pupils at an elementary school to certain specified beverages, including water, milk, and 100% fruit juices, and at a middle or junior high school at specified times to certain specified beverages.

This bill would modify the list of beverages that may be sold to pupils at an elementary or a middle or junior high school, and would restrict the sale of beverages to pupils at a high school at specified times to certain specified beverages.

Ch. 238 (SB 972) Poochigian Crime victims: restitution.

Existing law requires a court to impose a restitution fine and order upon a person who is convicted of a crime.

This bill would authorize a court to specify that funds confiscated at the time of arrest may be applied to the restitution fine or order, if the funds are not otherwise exempt from confiscation.

Existing law created a 4-year pilot program whereby the State Board of Control collaborated with judges to amend restitution orders, as specified.

This bill would repeal that pilot program.

Under existing law, if a defendant is incarcerated at a state prison with a 2-way audiovideo communication capability, the Department of Corrections may arrange for a hearing to impose or amend a restitution order.

This bill would authorize the department to collaborate with a court in any county to arrange for that hearing, if the victim has received assistance from the Restitution Fund.

Existing law sets forth procedures for the disposition of an estate.

This bill would provide that when a deceased person has an heir who is confined in a state or local correctional facility, the estate attorney, or beneficiary, personal representative, or person in possession of property of the decedent shall give the Director of the California Victim Compensation and Government Claims Board notice of the decedent's death and the name and location of the decedent's heir not later than 90 days after the date of death, as specified.

Existing law provides for restitution to a victim of crime committed by a minor.

This bill would make nonsubstantive, technical changes to that provision.

Ch. 239 (SB 180) Kuehl Human trafficking.

Existing law establishes various task forces for purposes of crime prevention and law enforcement.

This bill would establish the California Alliance to Combat Trafficking and Slavery (California ACTS) Task Force and require it to evaluate various programs available to victims of trafficking and various criminal statutes addressing human trafficking, and report to the Legislature, Governor, and Attorney General on or before July 1, 2007.

Existing law establishes the Commission on Peace Officer Standards and Training.

This bill would require the commission to develop a course or courses for peace officers relating to human trafficking, as specified. The bill would provide that participation in the courses by law enforcement would be voluntary.

Ch. 240 (AB 22) Lieber Trafficking in persons.

Existing law establishes the offenses of slavery and involuntary servitude. Existing law also makes it an offense to entice an unmarried female minor for purposes of prostitution, as specified, or to aid or assist with the same, or to procure by fraudulent means, any female to

have illicit carnal connection with any man. Existing law also makes it a crime to take away any minor as specified, for purposes of prostitution.

This bill would establish the crime of trafficking of a person for forced labor or services or for effecting or maintaining other specified felonies, and the crime of trafficking of a minor for those purposes, punishable by terms of imprisonment in the state prison for 3, 4, or 5 years, or 4, 6, or 8 years, respectively. The bill would permit a victim of trafficking to bring a civil action for actual damages, provide for restitution and punitive damages, and would establish a victim-caseworker privilege.

By creating new crimes, this bill would impose a state-mandated local program.

The bill would require state and local law enforcement agencies to issue a Law Enforcement Agency Endorsement for all trafficking victims within 15 business days of initial contact with the victim.

By imposing new duties on local law enforcement agencies, this bill would impose a state-mandated local program.

Existing law establishes various advisory bodies in connection with domestic violence.

The bill would establish a task force to study various issues in connection with human trafficking and to advise the Legislature, as specified. The provisions relating to the task force would be repealed January 1, 2008.

Existing law requires the Attorney General to give priority to matters involving organized crime, gang activities, drug trafficking, and cases involving a high degree of risk to the witness.

This bill would include human trafficking in that list of priorities.

This bill would incorporate additional changes in Section 186.2 of the Penal Code proposed by AB 988 to become operative only if this bill and AB 988 are enacted and become effective on or before January 1, 2006, and this bill is enacted last.

This bill would incorporate additional changes in Section 1202.4 of the Penal Code proposed by SB 972 to become operative only if this bill and SB 972 are enacted and become effective on or before January 1, 2006, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 241 (SB 13) Bowen Personal information.

The existing Information Practices Act of 1977 generally prohibits a state agency from disclosing any personal information in a manner that would link the information to the individual to whom it pertains unless the disclosure of the information is, among other things, to the University of California or a nonprofit educational institution conducting scientific research if specified confidentiality requirements are met.

This bill would revise the provision authorizing a state agency to disclose personal information to those institutions by permitting that disclosure only if the request is approved by the Committee for the Protection of Human Subjects for the California Health and Human Services Agency. The bill would also establish criteria for the review and approval of the request, as specified.

Existing law prohibits the disclosure of confidential information regarding applicants and recipients of public assistance benefits, with certain exceptions that include allowing the State Department of Social Services to make case records available for research purposes provided that the research will not result in the disclosure of the identity of applicants for or recipients of public social services.

This bill would allow the department to make these case records available provided that making them available will not result in disclosure of the identity of applicants for or recipients of public social services and will not disclose personal information in a manner that would link the information to the individual to whom it pertains, except as specified.

The bill would also make a statement of legislative intent regarding the protection of personal information.

Ch. 242 (SB 14) Campbell Income tax: underpayment penalty relief.

The Personal Income Tax Law and the Corporation Tax Law impose a penalty on a taxpayer who underpays an estimated income tax. Those laws also specify that a penalty may not be imposed for an underpayment in specified taxable years if the underpayment was created or increased by specified changes in law.

This bill would preclude a penalty from being imposed under these laws for an underpayment in a specified taxable year or in any taxable year thereafter if the underpayment was created or increased by a change in law in that same taxable year, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 243 (SB 35) Florez California Children and Families Program.

(1) The California Children and Families Act of 1998, an initiative measure, requires that the California Children and Families Program, established by the act, be funded by surtaxes imposed on the sale and distribution of cigarettes and tobacco products and deposited into the California Children and Families Trust Fund, and that the fund be used for the implementation of comprehensive early childhood development and smoking prevention programs. Existing law establishes a state commission, First 5 California, with powers and duties relating to the administration of the act on a state level, and authorizes a county's board of supervisors to establish a county children and families commission to administer the act on a county level.

Existing law requires county commissions, for each fiscal year, to receive the portion of the total moneys available to all county commissions equal to the percentage of the number of births recorded in the relevant county (for the most recent reporting period) in proportion to the number of births recorded in all of the counties participating in the California Children and Families Program (for the same period), if certain requirements are met.

Existing law requires each county commission, on or before October 15 of each year, to conduct an audit of, and issue a written report on the implementation and performance of, its functions during the preceding fiscal year, and requires the state commission to prepare a written report that consolidates, summarizes, analyzes, and comments on the annual audits and reports submitted by all of the county commissions.

This bill would require each county commission, on or before November 1 of each year, to submit its audit and report to the state commission. It would require the report to be in a format prescribed by the state commission, if the state commission approves that format in a public meeting prior to the fiscal year in which it is to be utilized. The bill would require that the state commission's report include a listing, by category, of the aggregate expenditures on program areas funded by the state and county commissions. It would also authorize the state commission to withhold funds that would otherwise be allocated to the county commission from the California Children and Families Trust Fund in the event a county commission does not submit required information for the written report.

This bill, in addition, would require the Controller to issue guidelines for expanded annual audits of each county commission and associated quality control functions, subject to funding by the state commission, and to present the final audit guidelines and implementation plan to the state commission in a public meeting on or before April 30, 2006.

This bill would only become operative if AB 109 of the 2005-06 Regular Session is enacted and becomes operative.

(2) The California Constitution provides that the Legislature may amend an initiative statute by another statute that becomes effective only when approved by the voters unless the initiative statute permits amendment without voter approval. The act provides that it may be amended only by a vote of  $\frac{2}{3}$  of the membership of both houses of the Legislature and that all amendments pursuant to this provision shall be to further the act and must be consistent with its purposes.

This bill, in conformance with those requirements, would declare that its provisions further the act and are consistent with its purposes.

Ch. 244 (SB 45) Alarcon Intermodal marine terminals.

Existing law imposes special regulations on various business activities but does not specifically regulate detention and per diem charges imposed by intermodal terminals on intermodal equipment used by motor carriers.

This bill would prohibit an intermodal marine equipment provider or marine terminal operator from imposing per diem, detention, or demurrage charges, as defined, on an intermodal motor carrier relative to transactions involving cargo shipped by intermodal transport under certain circumstances. The bill would also prohibit an intermodal marine equipment provider from terminating, suspending, or restricting equipment interchange rights of a motor carrier for specified reasons and from charging back, deducting, or offsetting per diem, detention, or demurrage charges or certain other charges from the motor carrier's freight bill.

Ch. 245 (SB 49) Machado Land conservation contracts.

Existing law makes the current fair market valuations required to determine the cancellation fee for removing land from a Williamson Act conservation contract subject to appeal to the county board of equalization. Existing law requires the county assessor to send a notice to the assessee that indicates the current fair market value of the land as though it were free of the contractual restriction and to notify the landowner and the Department of Conservation of the opportunity to request formal review from the assessor. Existing law permits the Department of Conservation or the landowner, if either believes that the current fair market valuations are inaccurate, to request formal review from the county assessor in the county considering the cancellation petition. Existing law permits the assessor to formally review the valuation pursuant to specified procedures and to recompute the cancellation fee, as specified.

This bill would require the county assessor to formally review the valuation upon receiving a request for formal review if he or she determines that additional information submitted by the requesting party may have a material effect on the valuation of the property, thereby imposing a state-mandated local program. It would also make other related changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 246 (SB 78) Committee on Budget and Fiscal Review Budget Act of 2004: contingencies and emergencies.

The Budget Act of 2004 appropriated specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies or emergencies upon written notification from the Director of Finance. The Budget Act of 2004 also appropriated specified amounts for loans to state agencies for contingencies or emergencies.

This bill would appropriate \$89,426,000, as scheduled, in augmentation of these Budget Act appropriations. The bill would provide that certain of these funds will revert to the General Fund if unencumbered as of the effective date of this act.

This bill would declare that it is to take effect immediately as a statute providing for the usual current expenses of the state.

Ch. 247 (SB 97) Murray Commercial electronic mail: penalties.

Existing law prohibits a person or entity from using commercial e-mail advertisements containing certain falsified, misrepresented, obscured, or misleading information. Existing law authorizes the Attorney General, an e-mail service provider, or the recipient of an unsolicited commercial e-mail advertisement transmitted in violation of these provisions to bring an action to recover actual damages and liquidated damages of \$1,000 per unsolicited commercial e-mail advertisement transmitted in violation of the provisions, up to \$1,000,000 per incident, subject to reduction by the court.

This bill would make a violation of these provisions a misdemeanor punishable by a fine of up to \$1,000, imprisonment of up to 6 months, or both that fine and imprisonment. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 248 (SB 110) Florez Fresno County Transportation Authority.

(1) The Fresno Transportation Improvement Act establishes the Fresno County Transportation Authority, which is authorized to impose a sales tax in Fresno County for up to 30 years for transportation purposes, subject to voter approval. Existing law specifies the wording of the proposition to be presented by the board of supervisors to voters in that regard.

This bill would delete the specific language for the proposition, and instead would require the language presented to the voters to include the nature of the tax to be imposed, the tax rate or maximum tax rate, the period during which the tax will be imposed, and the purposes for which the revenue from the tax will be used. The bill would authorize the board of supervisors to designate an agency to place the matter before the voters of Fresno County.

(2) Existing law provides that the authority shall consist of 7 members and authorizes the authority to amend the expenditure plan for the sales tax revenues by a majority vote.

This bill would expand the authority to 9 members and revise the composition of the authority. The bill would require the authority to establish a citizens oversight committee. The bill would modify the process for amending the expenditure plan to require approval of amendments by the board of supervisors and a majority of the cities in Fresno County constituting a majority of the county's incorporated population. The bill would thereby impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 249 (SB 135) Kehoe Community services districts.

Existing law contains provisions relating to the establishment of community services districts, including the formation of a district, the selection of a district governing board, the powers and duties of the board, and procedures for changing those powers.

This bill would repeal those provisions and enact the Community Services District Law which would specify the procedures for district formation, procedures for the selection of

district governing board members, the powers and duties of the board, and the procedures for changing those powers and duties. The bill would also make other conforming changes.

This bill would specify that a violation of any rule, regulation, or ordinance adopted by a board of directors of a community services district would be a misdemeanor. By creating a new crime, the bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 250 (SB 141) Soto Residential care facilities: preadmission fee refunds.

Existing law regulates the licensure and operation of residential care facilities for the elderly, including setting forth the basic services a facility is required to provide. Existing law requires that a licensee of a residential care facility for the elderly, if the licensee charges a preadmission fee, provide the applicant or his or her representative with a written general statement describing costs associated with the preadmission fee charges and stating whether or not the preadmission fee is refundable. If the preadmission fee or some portion thereof is refundable, existing law requires the statement to describe the conditions for the refund. A violation of the provisions relating to the licensure or operation of a residential care facility for the elderly is a crime.

This bill would provide that if the applicant decides not to enter the facility prior to the facility's completion of a preadmission appraisal or if the facility fails to provide full written disclosure of the preadmission fee charges and refund conditions, the applicant or the applicant's representative would be entitled to a refund of 100% of the preadmission fee. It would also require a preadmission fee in excess of \$500 to be refundable under certain conditions, and would require the licensee to provide the applicant or his or her representative with a written statement, stating that the preadmission fee is refundable and describing the conditions for the refund. By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 251 (SB 158) Machado Powers of attorney: social security numbers.

The Uniform Statutory Form Power of Attorney Act establishes the procedures by which a person may appoint another person as his or her agent with various powers over property, business, estate, trust, and other decisions. Existing law sets forth a statutory form to be used for granting power of attorney and this form includes a line requiring the social security number of the person designating power of attorney.

This bill would delete that line for the social security number. The bill would also include a statement on the form that a third party may seek identification.

Ch. 252 (SB 197) Cox Sly Park Reservoir.

Existing law prohibits the recreational use of reservoirs where water is stored for domestic use to include recreation in which there is bodily contact with the water by a participant. Existing law exempts certain reservoirs from this prohibition and sets forth conditions and restrictions to ensure water purity. Existing law exempts Sly Park Reservoir from this prohibition if certain conditions are met. Among those conditions is the requirement that the water receive ongoing treatment by June 30, 2005, including, but not limited to, an advanced technology treatment.

This bill would remove the requirement that the ongoing water treatment commence on or before June 30, 2005, and instead require the water treatment to commence before the

reservoir may be used for recreational activity in which there is bodily contact with the water. The bill would also remove the advanced technology treatment requirement and instead require a treatment that complies with a specified federal standard.

Existing law requires that the recreational use of the reservoir be subject to additional conditions and restrictions adopted by the entity operating the reservoir that are designed to further protect public health.

This bill would, instead, make the reservoir subject to additional conditions and restrictions adopted by the entity or the State Department of Health Services that are necessary to further protect public health.

Existing law requires the El Dorado Irrigation District to file a report with the department on the recreational uses and water treatment program at the Sly Park Reservoir.

This bill would require the department to prescribe the degree of treatment necessary to abate any increased hazards in the Sly Park Reservoir resulting from body contact recreation based on information provided in the El Dorado Irrigation District report.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 253 (SB 271) Scott Charitable gift annuities.

Existing law generally regulates grants and annuities societies, which may receive transfers of property conditioned upon an agreement to pay an annuity to the transferor. Existing law limits the investments that the reserve for each annuity contract may be invested in, as specified.

This bill would state the intent of the Legislature that the reserve required to be maintained by a grants and annuities society be invested in a manner generally consistent with the provisions of law governing the investment of trust assets.

The bill would allow the reserves for these annuities contracts to be invested in investment companies registered under the federal Investment Company Act of 1940.

Existing law requires every grants and annuities society holding a certificate of authority to file with the Insurance Commissioner a copy of each agreement entered into between the permit or certificate holder and the transferor.

This bill would require such a grants and annuities society to file information regarding each agreement in the manner and at the times prescribed by the commissioner.

Existing law requires each annuity agreement covered by these provisions to show specified information, including the reasonably commensurate value of the benefits created.

This bill would eliminate the requirement that such an agreement show the reasonably commensurate value of the benefits created, and would add requirements that the agreement show the signature of each donor and a specified statement regarding the unprotected nature of the annuity. The bill would require each grants and annuities society holding a certificate of authority to certify annually to the commissioner that all agreements entered into during the time period covered by the certification show all of the information required pursuant to these provisions.

This bill would declare that it is to take effect immediately as an urgency statute, but that certain changes to existing law would become operative on January 1, 2006.

#### Ch. 254 (SB 274) Romero Incompatible offices: elected and appointed positions.

Existing statutory law forbids specified officers or employees from engaging in any employment, activity, or enterprise for compensation which is inconsistent, incompatible, or in conflict with, or inimical to, his or her duties as an officer or employee or with the duties, functions, or responsibilities of his or her appointing power or the agency by which he or she is employed, except as specified. The common law forbids the simultaneous holding of 2 offices that exercise sovereign power that are incompatible, the test for which is satisfied in each of the following circumstances: (1) when one office is superior to and exercises some supervisory power over the other, or has the power to remove the incumbent of the other or to audit the accounts of the other, (2) when there are inconsistent functions or divided

loyalties between the offices, or (3) when the nature and duties of the 2 offices render it improper, from consideration of public policy, for one incumbent to retain both. Existing law authorizes the Attorney General to bring an action against any person who unlawfully holds or exercises any public office.

This bill would, except as specified, provide that a public officer, including, but not limited to, an appointed or elected member of a governmental board, commission, committee, or other body, shall not simultaneously hold 2 public offices that satisfy this common law test for incompatibility. It would provide when 2 offices are incompatible that a public officer shall be deemed to have forfeited the first office upon acceding to the 2nd. It would state that this provision is enforceable by the Attorney General. It would further state that its provisions do not apply to a position of employment, as specified, or to a governmental body with only advisory powers.

The bill would state that it codifies the common law rule prohibiting an individual from holding incompatible public offices. It would further state that nothing in its provisions is intended to expand or contract the common law, and that it is intended that courts interpreting its provisions be guided by judicial and administrative precedent developed under the common law.

Ch. 255 (SB 353) Migden Claims against the state.

Existing law requires the California Victim Compensation and Government Claims Board to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate \$739,417.96 from various funds to the Executive Officer of the California Victim Compensation and Government Claims Board to pay claims accepted by the board. The bill would require the Controller, upon the request of the board, in a form prescribed by the Controller, to transfer surcharges and fees from the Budget Act items of appropriation identified in this bill to Item 1870-001-0001 of Section 2.00 of the Budget Act of 2005.

This bill would appropriate \$6,384,798.15 from the Proposition 98 Reversion Account to the Executive Officer of the California Victim Compensation and Government Claims Board for payment of Sunnyvale School District desegregation claims and interest owed through the 1991-92 fiscal year.

This bill would approve the report submitted by the board on specified victim compensation claims.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 256 (SB 389) Morrow Automated teller machine fees.

Existing law prohibits an operator of an automated teller machine from imposing a surcharge upon a customer unless the surcharge is disclosed to the customer.

This bill would provide that an agreement to operate or share an automated teller machine may not prohibit, limit, or restrict the right of the operator or owner of the automated teller machine to charge a customer conducting a transaction using an account from a financial institution that is located outside the United States an access fee or surcharge.

Ch. 257 (SB 408) Margett Escrow agents.

Existing law provides for the licensing and regulation of escrow agents by the Commissioner of Corporations. Existing law requires the commissioner, until January 1, 2006, to charge and collect specified fees and assessments. Existing law, commencing January 1, 2006, revises the fees and assessments the commissioner is required to charge and collect.

This bill would change these dates to January 1, 2010, and would make related changes.

Existing law authorizes the commissioner to impose penalties on a person who fails to provide specified information to the commissioner.

This bill would impose a limit on the amount of those penalties.

Existing law requires a person seeking employment with an escrow agent to complete a specified employment application that asks certain questions, including whether the person has a criminal history.

This bill would provide that the question regarding a person's criminal history excludes inquiry into minor traffic citations that do not constitute a misdemeanor or felony offense.

Ch. 258 (SB 439) Simitian Public records: disclosure: public investment funds.

The California Public Records Act provides that, except for exempt records, every state or local agency, upon request, shall make records available to any person upon payment of fees to cover costs.

This bill would provide that, notwithstanding these provisions, specified records regarding alternative investments, as defined, in which public investment funds invest are not subject to disclosure under these provisions, unless the information is already publicly released by the keeper of the information. The bill would subject specified information contained in these records regarding alternative investments in which public investment funds invest to public disclosure and would provide that the information is not to be considered a trade secret exempt from disclosure.

Ch. 259 (SB 460) Margett Offender access to personal information.

Existing law prohibits specified offenders who are confined in county facilities or in facilities under the jurisdiction of the Department of Corrections and Rehabilitation from performing work that would give them access to the personal information of private persons, as specified.

This bill would, instead, prohibit any offender confined in a county facility or in a facility under the jurisdiction of the Department of Corrections and Rehabilitation from gaining other than incidental access to personal information, as specified.

By directing county agencies to limit who may participate in county and community work programs, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 260 (SB 502) Kehoe Weed and vegetation management.

(1) Existing law, relating to fire protection, requires firebreaks with respect to the maintenance of flammable vegetation or other combustible growth around occupied buildings located within very high fire hazard severity zones, as designated. Existing law exempts certain vegetation from those requirements.

This bill would revise that exemption, as specified.

Existing law defines the term "weeds" for the purposes of the abatement of hazardous weeds and rubbish as a public nuisance.

This bill would revise that definition, as specified.

(2) This bill would incorporate additional changes in Section 51182 of the Government Code and Section 4291 of the Public Resources Code, proposed by AB 1718, to be operative only if AB 1718 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

Ch. 261 (SB 513) Soto California National Guard: benefits and protection: deferral of interest on financial obligations.

Existing law provides certain protection for members of the California National Guard and reservists called to active duty, as specified, during the period of military service, with respect

to, among other things, taxes or assessments, health or medical insurance, and death benefits payable to the surviving spouse or designated beneficiary of any member of the California National Guard, as specified.

This bill would create an additional benefit, subject to specified limitations, for members of the California National Guard killed in the line of duty in the service of the state or federal government by requiring a deferral, without penalty or accrual of any additional interest, for a period of 6 months after the member's death, of any interest on a financial obligation or liability, as specified, incurred by that member, or his or her surviving spouse, including any financial obligation or liability incurred by the member for which the member's beneficiary, as defined, is liable, before the member's entry into service.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 262 (SB 527) Alquist Redevelopment: senior housing.

The Community Redevelopment Law requires not less than 20% of all property tax increment funds that are allocated to a redevelopment agency to be used by the agency for purposes of increasing, improving, and preserving the community's supply of low- and moderate-income housing. These funds are required to be deposited in a separate Low and Moderate Income Housing Fund. This law requires each redevelopment agency to expend, over the duration of its redevelopment implementation plan, the moneys in the Low and Moderate Income Housing Fund to assist housing that is available to all persons regardless of age in at least the same proportion as the population under the age of 65 years bears to the total population of the community as reported in the most recent census of the United States Census Bureau.

This bill would specify that the housing assistance be available in at least the same proportion as the number of low-income households with a member under the age of 65 years bears to the total number of low-income households of the community.

Ch. 263 (SB 543) Margett State Water Project.

(1) Under existing law, the Department of Water Resources operates the State Water Resources Development System (State Water Project).

This bill would establish a permit program, administered by the department, for encroachments on State Water Project rights-of-way. The bill, with certain exceptions, would make any person who makes an alteration, improvement, encroachment, or excavation within the right-of-way acquired for the State Water Project, without a permit, guilty of a misdemeanor. The bill would provide for civil penalties, and, with certain exceptions, would also make it unlawful for any person to drain water, or permit water to be drained from the person's lands onto the State Water Project right-of-way, or to obstruct any natural watercourse or store or distribute water in a described manner. The bill would allow persons to continue certain authorized encroachments.

By creating new crimes, this bill would impose a state-mandated local program.

(2) Existing law authorizes the Director of General Services to enter into an agreement to lease state-owned real property to any provider of wireless telecommunications services for the location of its facilities.

This bill would require the Director of General Services to consult with the Department of Water Resources before making any state-owned real property that is part of the State Water Project available for leasing for that purpose.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 264 (SB 555) Machado Taxation.

(1) The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, “full cash value” is defined as the assessor’s valuation of real property as shown on the 1975-76 tax bill under “full cash value” or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. For purposes of these provisions, existing property tax law presumes that new construction is completed on the date of completion, unless the owner does not intend to occupy or use the property, in which case the owner is required to notify the county assessor within 30 days of commencing the construction, as specified. Existing property tax law requires a supplemental assessment to be made when property undergoes a change in ownership or has had new construction completed after the period in which the property was assessed in an assessment year.

This bill would exclude from this notice requirement, and presume that a supplemental assessment is not required for, certain property that the owner does not intend to occupy or use upon the completion of the new construction.

(2) The California Constitution and existing property tax law excludes from a “change in ownership” specified property transfers between parents and their children and grandparents and their grandchildren if, among other conditions, a claim is filed for the exclusion. For purposes of the exclusion of transfers between grandparents and their grandchildren, existing law establishes a condition that “all of the parents” of the grandchildren must be deceased at the time of the transfer to qualify for a change in ownership exclusion, as provided. Existing law authorizes a person aged 55 years or older or who is severely and permanently disabled to transfer the base year value, as defined, of his or her principal residence to a comparable replacement dwelling, as specified, if, among other conditions, the person files a claim for this transfer.

This bill would specify that claims filed for the parent-child or grandparent-grandchild transfer change in ownership exclusion or for the authority to transfer a base year value to a replacement dwelling are not public documents and are not open for public inspection, except to specified parties. This bill would also make findings regarding the bill’s purposes and make conforming changes to a related provision. This bill would also specify, for purposes of a grandparent to grandchild transfer, that a son-in-law or daughter-in-law of the grandparent that is a stepparent to the grandchild need not be deceased on the date of the transfer.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them to the bill.

(3) Existing law exempts from property taxation specified types of property or property owned by specified taxpayers. Existing law specifies that a property tax exemption applies to a supplemental assessment if the person claiming the exemption meets the qualifications for the exemption no later than 90 days after the date the new construction or change in ownership occurred.

This bill would instead provide that, in the case of a supplemental assessment on property that has undergone a change in ownership, an exemption that was granted to that property does not apply as of the date of the change in ownership if the transferee does not otherwise qualify for that exemption on the date of the change in ownership, as specified. This bill would exclude from these provisions property that qualifies for the homeowners’ exemption, as provided.

By changing the manner in which supplemental assessments are administered by county assessors, this bill would impose a state-mandated local program.

(4) Existing property tax law requires the county assessor to audit the books and records of a profession, trade, or business at least once every 4 years in the case of a taxpayer engaged

in a profession, trade, or business, that owns, claims, possesses, or controls locally assessable trade fixtures and business tangible property with a full value of at least \$400,000. The California Constitution and existing law exempt from property taxation specified property and property owned by specified entities.

This bill would instead require the assessor to perform these audits only with respect to taxpayers that are not fully exempt from property taxation, as specified.

(5) Existing property tax law provides that a notice of supplemental and escape assessments be made to an assessee on a form approved by the State Board of Equalization. The California Constitution requires the State Board of Equalization to assess specified properties owned by specified entities for purposes of property taxation. Existing property tax law requires the board to assess electric generation facilities, as defined. Existing law requires that the assessed value of an electric generation facility that is assessed by the board to be allocated entirely to the county in which the facility is located. Existing law requires the board to transmit to county assessors an estimate and a property tax roll that contain the assessed value of property that is assessed by the board, but does not expressly require the board to include within that estimate or roll the assessed value of electric generation facilities.

This bill would provide that, for specified counties, receipt by the assessee of the tax bill based on the assessment shall suffice as notice if the tax bill advises the assessee of the right to appeal the assessment. This bill would also require the board to additionally transmit the assessed value of electric generation facilities that are assessed by the board with that estimate and property tax roll.

(6) Existing property tax law authorizes a county to appoint an assessment hearing officer to conduct hearings on specified taxpayer assessment protest applications and to make recommendations on these applications to the county board of equalization or county assessment appeals board.

This bill would authorize a county board of supervisors to adopt a resolution providing that the assessment hearing officer's decision constitutes the final administrative action by the county board of equalization or county assessment appeals board.

(7) Existing law authorizes a county tax collector to sell tax-defaulted property in a cash or a credit transaction. Existing law authorizes a county tax collector to postpone a public auction sale of tax-defaulted property if certain conditions regarding notice of that postponement are met.

This bill would instead specify that a county tax collector may sell tax-defaulted property in a cash or a deferred-payment transaction. This bill would also authorize a county tax collector to postpone a tax sale that is conducted in the form of a sealed-bid sale. This bill would also make technical, nonsubstantive changes to the provisions relating to tax sale postponements.

(8) The Senior Citizens Property Tax Postponement Law provides that certain individuals who have an ownership interest, as defined, in a residential dwelling may request postponement of property taxes.

This bill would delete obsolete language and provide that houseboats and floating homes on which the property taxes are delinquent at the time for application for postponement are not eligible for postponement.

(9) The Private Railroad Car Tax Law requires the State Board of Equalization to assess private railroad cars, as specified, at their full value, and imposes a tax as prescribed by that law. That law provides for estimated and escape assessments and reassessments, as provided.

This bill would make technical, nonsubstantive changes to those provisions.

(10) The Personal Income Tax Law and the Corporation Tax Law authorize the Franchise Tax Board to require any person to withhold from items of income the tax due under those laws from the recipient of that income, as specified.

This bill would clarify that a limited liability company's tax payments under those laws are reduced by the amounts previously withheld and paid by that company.

This bill would also repeal an obsolete statute pertaining to deductions under the Corporation Tax Law for a state or federal savings and loan association.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 265 (SB 570) Migden Mentally incompetent minors.

(1) Existing law requires the Judicial Council to perform various duties designed to assist the judiciary.

This bill would require the Judicial Council, to the extent resources are available, to provide education on mental health and developmental disability issues affecting juveniles in delinquency proceedings to judicial officers and other public officers and entities, as specified.

(2) Existing law establishes various criteria for evaluating whether a minor is seriously emotionally disturbed or has a developmental disability.

This bill would authorize the court, in counties that agree to be subject to these provisions pursuant to a resolution adopted by the board of supervisors, as specified, to order a minor who may be a ward of the juvenile court to be referred for evaluation of whether the minor has a serious mental disorder, is seriously emotionally disturbed, or has a developmental disability either when it appears to the court that the minor may have one of these conditions or upon request of the prosecutor or the minor's counsel. The bill would also require an evaluation ordered by the court to be made by an appropriate and licensed mental health professional with specified credentials, and would require the evaluator to personally examine the minor and submit to the court a written report of his or her findings to guide the court.

The bill would establish dispositional procedures for the court to follow for wards of the court who are determined to be seriously emotionally disturbed, or who have serious mental disorders or developmental disabilities. Those procedures would include referral of the minor to a multidisciplinary team for review, as specified, development and review of a treatment plan by the multidisciplinary team, and a dispositional order by the court, consistent with the protection of the public and the minor's treatment needs identified in the team's report and other specified factors. The bill would make related findings and declarations.

Ch. 266 (SB 614) Figueroa Certified nurse-midwives.

Existing law, the Nursing Practice Act, authorizes the Board of Registered Nursing to issue a certificate to practice nurse-midwifery. The act describes the scope of practice authorized by the certificate, including that a certified nurse-midwife may furnish or order Schedule III, IV, or V controlled substances, and if ordered in a hospital, Schedule II controlled substances.

This bill would delete the requirement that Schedule II controlled substances be ordered in a hospital. The bill would authorize a certified nurse-midwife to furnish or order Schedule II controlled substances under conditions applicable to Schedule III, IV, or V controlled substances. The bill would require that a certified nurse-midwife with an active furnishing number provide specified documentation of continuing education relating to Schedule II controlled substances.

Ch. 267 (SB 648) Margett CEQA: lead agencies: determinations. The existing California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on a project, as defined, that it proposes to carry out or approve that may have a

significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect. Existing law specifies time periods for public review for a draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration, and for review by the State Clearinghouse.

This bill would establish time periods for public review and for review and comment by state agencies as established by the State Clearinghouse of these documents, as specified.

CEQA authorizes any public agency, or in certain cases, the project applicant, in the event that a dispute arises with respect to a project to be carried out or approved by two or more public agencies, as to which is the lead agency, to submit the question to the Office of Planning and Research, and the office is required to designate, within 21 days of receiving the request, the lead agency, giving due consideration to the capacity of the agency to adequately fulfill the requirements of the act.

This bill would provide that, for purposes of those provisions requiring the designation by the office of a lead agency, a “dispute” means a contested, active difference of opinion between 2 or more public agencies as to which of those agencies shall prepare any necessary environmental document, and that a dispute exists where a public agency claims that it either has or does not have the obligation to prepare an environmental document. The bill would prohibit the office from designating a lead agency in the absence of such a dispute.

Ch. 268 (SB 679) Simitian Aid to Families with Dependent Children-Foster Care: group homes: definition.

Existing law establishes the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which counties provide payments to foster care providers, including group homes, on behalf of qualified children in foster care. The program is funded by a combination of federal, state, and county funds, with money from the General Fund being continuously appropriated to pay for the state’s share of AFDC-FC costs.

Existing law designates the various placements which may be made for a child eligible for AFDC-FC benefits, including a licensed group home. Existing law defines a group home for purposes of the AFDC-FC program as a nondetention privately operated residential home, organized and operated on a nonprofit basis only, of any capacity, that provides services in a group setting to children in need of care and supervision.

This bill would also include within the definition of a group home for purposes of the AFDC-FC program a nondetention, licensed residential home operated by the County of San Mateo, with a capacity of up to 25 beds, that provides services in a group setting to children in need of care and supervision. This bill would provide that no appropriation shall be made pursuant to the provision continuously appropriating funds for the AFDC-FC program, for the purposes of funding the bill.

Existing law requires foster care providers licensed as group homes to have rates established by the State Department of Social Services only if the group home is organized and operated on a nonprofit basis.

This bill, notwithstanding existing law, would authorize the department to establish a rate for a foster family group home operated by the County of San Mateo, as provided for in the bill.

Ch. 269 (SB 724) Scott Public postsecondary education: California State University: Doctor of Education degrees.

Existing law, known as the Donahoe Higher Education Act, sets forth, among other things, the missions and functions of California’s public and independent segments of higher education, and their respective institutions of higher education. Provisions of the act do not apply to the University of California unless the regents of the university act, by resolution, to make them applicable.

Among other things, the act provides that the University of California has exclusive jurisdiction in public higher education to award the doctoral degree in all fields of learning,

except that it may agree with the California State University to award joint doctoral degrees in selected fields. With respect to doctoral degrees, the act limits the California State University to awarding these degrees jointly with the University of California, as described above, or jointly with independent institutions of higher education, provided that the proposed doctoral program is approved by the California Postsecondary Education Commission.

This bill would instead authorize the California State University to award the Doctor of Education degree, and prescribe standards for the awarding of that degree. The bill would require the California State University, the Department of Finance, and the Legislative Analyst's Office to jointly conduct, in accordance with prescribed criteria, a statewide evaluation of the doctoral programs implemented under the bill and to report the results of the evaluation, in writing, to the Legislature and the Governor on or before January 1, 2011.

Ch. 270 (SB 731) Torlakson State and local government.

(1) Existing law requires motor vehicle dealers to be responsible for having a smog check inspection performed on motor vehicles offered for retail sale, except as specifically provided.

This bill would modify this provision.

(2) Existing law requires the bidder, in a court proceeding to obtain relief from a bid for a public contract, to demonstrate to the satisfaction of the court that, among other things, a mistake was made and that the bidder gave the public entity written notice of the mistake within 5 days after the opening of the bids.

This bill would exclude Saturdays, Sundays, and state holidays from that 5-day period.

(3) Existing law, the Off-Highway Motor Vehicle Recreation Act of 2003, until January 1, 2007, provides for the acquisition, operation, and funding of a system defined as the state vehicular recreation areas, the California Statewide Motorized Trail, designated areas within the state park, and areas supported by a specified off-highway vehicles grant program.

This bill would make technical, conforming changes to certain provisions of the act.

(4) Existing law requires applications for funding from the Aeronautics Account in the State Transportation Fund to be processed in accordance with the procedures adopted by the California Transportation Commission for processing applications by local entities for projects included in the state transportation improvement program.

This bill would revise the process used by the commission for funding projects from the Aeronautics Account.

(5) Existing law establishes the Equipment Service Fund in the State Treasury and continuously appropriates all money in the fund to the Department of Transportation to pay for mobile equipment services. Existing law provides that if the unencumbered balance remaining in the fund at the end of any fiscal year is more than 25% of the total annual appropriation made to the fund under the most recent Budget Act, the unencumbered balance is required to be refunded to programs that were assessed mobile equipment service charges during that fiscal year, as specified.

This bill would instead provide that if the balance remaining in the fund at the end of any fiscal year exceeds the amount allowable for billed central services under the Federal Office of Management and Budget Circular A-87, the balance is required to be treated consistent with that circular.

(6) Existing law specifies the membership, by rank, of the California Highway Patrol, and includes "deputy chiefs" among the ranks.

This bill would change the reference to "deputy chiefs" to "chiefs."

(7) Existing law defines a motor vehicle "dealer" as a person who sells a vehicle subject to registration under the Vehicle Code, a motorcycle or all-terrain vehicle subject to identification under that code, or a trailer subject to identification pursuant to that code.

This bill would add to the list of vehicles sold by dealers a snowmobile subject to identification under that code.

(8) Existing law authorizes the Department of Motor Vehicles to accept registration fees not more than 60 days prior to the expiration of the current registration or certification for a vehicle.

This bill would instead authorize the department to accept those registration fees not more than 75 days prior to the expiration of the current registration or certification for a vehicle.

(9) Existing law authorizes a vehicle to be equipped with not more than 2 red fog tail lamps mounted not lower than 15 inches.

This bill would authorize the tail lamps to be mounted not lower than 12 inches.

Ch. 271 (SB 822) Margett San Gabriel Basin restoration.

Under existing law, the San Gabriel Basin Water Quality Authority administers cleanup operations on behalf of the San Gabriel Basin.

This bill would authorize the authority to receive state funds in connection with those cleanup projects for the purpose of meeting a certain federal requirement for nonfederal matching funds.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 272 (SB 837) Dutton Alternative Protest Pilot Project.

Existing law provides for a pilot project for alternative protest procedures in connection with state agency acquisition of goods and services, including the acquisition of information technology goods and services, and requires the Department of General Services to administer the project until January 1, 2007, or until the pilot project has been applied to at least 25 contracts, including at least 5 information technology contracts, whichever occurs later.

This bill would delete the minimum contract attainment provisions, and would extend the repeal date until December 31, 2011, as specified. The bill would rename the project as the Alternative Protest Process.

This bill would also prohibit an unsuccessful bidder from using the Alternative Protest Process, and would instead provide for the filing of a writ of mandate, as specified.

Existing law requires the Department of General Services to submit electronically to the Legislature a report regarding the pilot project within 90 days after the termination of the project.

This bill would instead require the department to submit to the Legislature a report and recommendations regarding the Alternative Protest Process on or before January 1, 2007, and on or before January 1, 2010, as specified.

Ch. 273 (SB 894) Dunn Practice of law.

Existing law provides for the licensing and regulation of the practice of law by the State Bar of California. Under existing law, it is a misdemeanor for a person who is not a member of the State Bar or authorized to practice law in this state to advertise or hold himself or herself out as practicing or entitled to practice law or to otherwise practice law, subject to specified fines and imprisonment.

This bill would authorize a superior court, on its own motion or upon application by the State Bar, to assume jurisdiction over the practice of a person where there is probable cause to believe that the above provisions have been violated if certain requirements are met. The bill would also, under specified circumstances, authorize the court to appoint attorneys to take specified action with regard to the person's files, clients, and accounts.

Existing law provides for an Attorney Diversion and Assistance Program, which provides services for the treatment and recovery of attorneys due to the abuse of drugs or alcohol or mental illness and who may be enrolled as inactive members of the State Bar. Existing law provides that, upon successful completion of the program, participants on inactive status who complied with all conditions of probation are eligible for reinstatement to active status and a dismissal of the underlying allegations or a reduction in the recommended discipline.

This bill would also provide that, upon the successful completion of the program, attorney participants on inactive status as a condition of program participation who have complied with all conditions of probation may receive credit for the period of inactive enrollment toward any period of actual suspension imposed by the Supreme Court.

Ch. 274 (SB 919) Cox Meetings.

(1) The Bagley-Keene Open Meeting Act requires, with specified exceptions for authorized closed sessions, that all meetings of a state body be open and public and all persons be permitted to attend meetings of a state body.

This bill would authorize the California Gambling Control Commission to hold closed sessions, as specified, when discussing matters that are confidential pursuant to the Tribal-State Gaming Compacts.

(2) Existing constitutional provisions require that a statute that limits the right of access to the meetings of public bodies or the writings of public officials and agencies be adopted with findings demonstrating the interest protected by the limitation and the need for protecting that interest.

This bill would find that, in order for the California Gambling Control Commission to meet its obligation, as imposed by the Tribal-State Gaming Compacts, to maintain the confidentiality of trade secrets, nonpublic financial data, and other confidential or proprietary data and information, it is necessary that the commission meet in closed session.

Ch. 275 (SB 1009) Florez Water storage districts: election rolls.

(1) Existing law, the California Water Storage District Law, requires the board of directors of a water storage district to use the most recent county assessment rolls or to prepare an election roll to determine the ownership and value of parcels for the purpose of carrying out district elections. Existing law requires the district board to hold a public hearing to receive testimony regarding a preliminary election roll, to make any changes to the preliminary election roll following a hearing and deliberations, and to finalize the election roll in accordance with those changes.

This bill would revise the manner in which a district election roll is prepared. The bill would require the district board to have a registered civil engineer prepare a preliminary election roll, and assign votes on the basis of one vote for each acre of land or portion thereof owned by that voter within the district, or on the basis of the benefits derived by each parcel from being within the boundaries of the district, or from receiving services from the district, or both. The bill would require the district board, after making any changes to the preliminary election roll, to adopt the election roll. Under the bill, for a district organized on a one-vote-per-acre basis, the adopted election roll would be deemed the final election roll. For a district organized on a benefits-derived basis, the bill would require the board of supervisors of the principal county to approve the adopted election roll, as prescribed. By imposing duties on a district board and a board of supervisors, the bill would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 276 (SB 1053) Scott Schoolsite funding: Local Improvement Program.

Existing law establishes various categorical aid programs under which funding is provided for specific educational purposes.

This bill would, until June 30, 2010, establish the Local Improvement Program as a pilot project which would allow school districts to apply to the State Board of Education to

participate in the program and would limit participation to no more than 15 school districts. This bill would require school districts participating in the program to allocate instructional program funding to participating schools with maximum flexibility in the development and implementation of schoolsite funding in order to support and improve pupil learning.

**Ch. 277 (SB 1069) Soto Redevelopment: bonds.**

The Community Redevelopment Law limits the effectiveness of every redevelopment plan adopted on or before December 31, 1993, to 40 years from the adoption of the redevelopment plan or January 1, 2009, whichever is later, after which the agency has no authority to act pursuant to the redevelopment plan except to pay previously incurred indebtedness, to comply with provisions governing compliance with an agency's affordable housing obligations, and to enforce existing covenants, contracts, or other obligations. After 10 years from the termination of the effectiveness of the redevelopment plan pursuant to this provision, a redevelopment agency may not pay indebtedness or receive tax increment revenues, except as specified. Existing law prohibits these provisions from being construed to affect the validity of any bond, indebtedness, or other obligation, including any mitigation agreement authorized by the legislative body or the agency pursuant to this law before January 1, 1994, or to affect the right of an agency to receive tax increment revenues to pay the bond, indebtedness, or other obligation.

This bill would provide that the provisions regarding the time limits on the effectiveness of a redevelopment plan do not affect the right of an agency to receive tax increment revenues to pay refunding bonds issued to refinance, refund, or restructure indebtedness authorized prior to January 1, 1994, as specified.

**Ch. 278 (SB 1084) Kehoe Forest practices.**

Under existing law, the State Board of Forestry and Fire Protection is required to classify all lands within the state to determine areas in which the financial responsibility of preventing and suppressing fires is primarily the responsibility of the state.

The bill would prohibit a person from selling, offering for sale, leasing, or renting to a person equipment powered by a specified internal combustion engine, unless the equipment has a permanent warning label attached warning of the danger of starting a fire from sparks created by the operation of the equipment. This bill would require a person who manufacturers the described equipment to attach to that equipment the above-described permanent warning label. The bill would make it an infraction to violate these prohibitions and requirements, thereby imposing a state-mandated local program by creating a new crime.

The bill would revise the definition of "wild land" and define "hazardous fuel reduction" for purposes of a state responsibility area.

The bill would make related changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 279 (SB 1107) Committee on Public Safety Public safety: omnibus bill.**

Existing law generally regulates public safety.

This bill would make various technical, nonsubstantive changes to provisions related to, among other things, domestic violence, summary criminal history information, and child abuse reporting.

Existing law provides that the presiding judge of the superior court in Contra Costa County may appoint an alternate for the public member on the county board of parole commissioners.

This bill would repeal that provision.

Existing law identifies certain persons as mandated reporters of child abuse and neglect, and requires their reports to law enforcement to contain specified information, including the name of the child victim, and to include additional information if it is known.

This bill would provide that the name of the child shall be included if it is known.

Existing law provides that the Department of Justice shall maintain an index of all reports of child abuse and severe neglect it receives. Existing law provides that the department may charge a fee whenever this information is furnished to specified persons or entities as the result of an application for employment or licensing.

This bill would provide that the department may charge this fee when furnishing this information to a government agency conducting a background investigation of a person seeking employment as a peace officer.

Ch. 280 (SB 1112) Committee on Business, Professions and Economic Development Contractors and architects.

(1) Existing law provides for the licensing and regulation of architects by the California Architects Board in the Department of Consumer Affairs. Existing law provides that appointments to the board expire on June 1 of the 4th year following the year in which the previous term expired.

This bill would instead provide that board appointments expire on June 30 of the 4th year following the year in which the previous term expired.

(2) Existing law, the Contractors' State License Law, provides for the licensing and regulation of contractors by the Contractors' State License Board in the Department of Consumer Affairs. Existing law requires cities and counties that require issuance of a permit as a condition precedent to the construction, alteration, improvement, demolition, or repair of a building or structure to give specified notices.

This bill would revise the above notice requirement to conform with certain provisions of existing law.

Existing law establishes an arbitration process administered by the board to resolve disputes between contractors and consumers. Existing law authorizes the registrar of contractors, after investigating complaints and finding possible violations, to refer the alleged violation and complaint to arbitration if damages are more than \$7,500, and if certain other conditions are met.

This bill would instead require that, for referral to arbitration, the damages or potential damages be greater than the amount of the licensing bond required.

Existing law requires the registrar, upon receipt of a certified copy of the Labor Commissioner's finding of a willful or deliberate violation of certain provisions, to initiate formal disciplinary action against a license within 30 days of notification.

This bill would delete the requirement that the disciplinary action be formal.

Existing law requires an action not to recover wages or fringe benefits against a deposit to be brought within a certain time period after expiration of a license, or after the license was inactivated, canceled, or revoked. Existing law provides that a deposit in lieu of a bond shall not be released until a complaint is adjudicated.

This bill would also require a claim to recover wages or fringe benefits to be brought within 6 months of discovery of the wage or fringe benefit delinquencies, but not later than 2 years from the date the wage or fringe benefit contributions were due. The bill would provide that legal fees can't be charged by the board against a deposit posted. The bill would delete the provisions that a deposit shall not be released until a complaint is adjudicated and would instead provide that, if the board receives written notification of a civil action against a deposit, the bond will not be released except as ordered by the court.

Existing law authorizes the registrar to deny an application for licensure for specified reasons.

This bill would authorize the registrar, in lieu of denying licensure, to issue a probationary license, and would enact provisions relating to revocation and renewal of a probationary license.

This bill would make other nonsubstantive changes to the provisions relating to contractors.

Ch. 281 (AB 14) Harman Property tax: subdivisions: separate assessments and valuations.

Existing law provides for the creation of an assessor's office in each county, and requires the assessor's office to determine the new base year value for taxable real property that has been newly constructed. Existing law provides for the separate assessment of any parcel on the current tax roll and for specified classes of real property, and authorizes a payment of taxes on any parcel of real property separately from the whole assessment, if that parcel is either described in any duly executed and recorded deed or other specified document or has a separate valuation on the current roll, as provided.

The bill would prohibit an assessor from assigning parcel numbers or preparing a separate assessment or separate valuation to divide any existing residential structure into a subdivision, as defined, until a subdivision final map or parcel map, as specified, has been recorded as required by law.

Ch. 282 (AB 27) Mullin Homicide trial costs.

Existing law provides that when a court orders a change of venue to a court in another county, all costs incurred by that court or county, which are not payable by the state, as specified, shall be a charge against the court or the county in which the action originated. Existing law further requires that claims for these costs be forwarded to the treasurer and auditor of the county in which the action originated, and require the treasurer of the county of origin to pay the amount of county costs out of the general funds of the county of origin.

This bill would revise these provisions to instead provide that when a court orders a change of venue to a court in another county, all costs, as defined, incurred by the receiving county that are not payable by the state shall be paid by the transferring court or county. If the change of venue costs are court operations, those costs would be considered court costs to be charged against and paid by the transferring court to the receiving court, as specified. The Judicial Council would adopt specified financial policies and procedures to ensure the timely payment of these court costs. If the change of venue costs incurred by the receiving county are not court operations, those costs would be considered county costs to be paid by the transferring county to the receiving county, as specified.

Ch. 283 (AB 83) Leslie Public swimming pools: Cameron Park Community Services District.

Existing law requires the State Department of Health Services to supervise the sanitation, healthfulness, and safety of public swimming pools. Violation of these provisions is a crime.

Existing law sets forth construction standards for swimming pools, but excludes facilities in excess of 20,000 square feet of surface area, including, but not limited to, a manmade lake or swimming lagoon with sand beaches. The law establishes a requirement for lifeguard duties at public swimming pools of wholly artificial construction where a direct fee is charged.

This bill would, notwithstanding any provision of law to the contrary, until January 1, 2008, exempt any manmade lake or swimming lagoon with a beach or sand bottom operated by the Cameron Park Community Services District of El Dorado County from state water clarity standards if approved by the local health officer. This bill would require the department to form an advisory committee to adopt recommendations and to submit them to the department by January 1, 2007.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 284 (AB 109) Chan California Children and Families Program.

(1) The California Children and Families Act of 1998, an initiative measure, requires that the California Children and Families Program, established by the act, be funded by surtaxes imposed on the sale and distribution of cigarettes and tobacco products and deposited into the California Children and Families Trust Fund, and that the fund be used for the implementation of comprehensive early childhood development and smoking prevention programs. Existing law establishes a state commission, First 5 California, with powers and duties relating to the administration of the act on a state level, and authorizes a county's board of supervisors to establish a county children and families commission to administer the act on a county level.

Existing law requires county commissions, for each fiscal year, to receive the portion of the total moneys available to all county commissions equal to the percentage of the number of births recorded in the relevant county (for the most recent reporting period) in proportion to the number of births recorded in all of the counties participating in the California Children and Families Program (for the same period), if certain requirements are met.

This bill would add to these requirements (1) that the county commission, in a public hearing, adopt policies regarding conflict of interest of commission members and commission contracting and procurement policies, (2) that the county adopt a limit on the percentage of the county commission's operating budget that may be spent on administrative functions, pursuant to guidelines issued by the state commission, and (3) that the county commission adopt, in a public hearing, policies and processes establishing the salaries and benefits of employees of the county commission.

This bill would only become operative if SB 35 of the 2005–06 Regular Session is enacted and becomes operative.

(2) The California Constitution provides that the Legislature may amend an initiative statute by another statute that becomes effective only when approved by the voters unless the initiative statute permits amendment without voter approval. The act provides that it may be amended only by a vote of  $\frac{2}{3}$  of the membership of both houses of the Legislature and that all amendments pursuant to this provision shall be to further the act and must be consistent with its purposes.

This bill, in conformance with those requirements, would declare that its provisions further the act and are consistent with its purposes.

Ch. 285 (AB 204) Harman Decedents' estates: posthumously conceived children.

(1) Existing law provides for the distribution of a decedent's estate among heirs and beneficiaries. Existing law provides that, for purposes of determining rights to property to be distributed upon the death of a decedent, a child of the decedent conceived after the decedent's death, other than a child conceived as a result of human cloning, is deemed to have been born in the decedent's lifetime if the child or his or her representative proves by clear and convincing evidence that specified conditions are satisfied. Those conditions include the requirement that the decedent specify in writing that his or her genetic material shall be used for posthumous conception of a child of the decedent, and that the specification may be revoked or amended only by a signed writing.

This bill would require that specification, and any revocation or amendment thereof, to be dated. The bill would additionally delete a requirement that the specification, and revocation or amendment thereof, be signed by at least one competent witness.

(2) Existing law, for purposes of determining rights to property to be distributed upon a decedent's death, requires the person designated by the decedent to use his or her genetic material to be either the spouse or registered domestic partner of the decedent or some other person designated by the decedent, as specified. This provision also requires a posthumously conceived child or his or her representative to give written notice by certified mail that the decedent's genetic material was available for posthumous conception.

This bill would revise that provision to delete the reference to the spouse or registered domestic partner and would require the person designated by the decedent to control the use of the genetic material to give that written notice.

(3) Existing law provides that a person with the power to control the distribution of the decedent's property or death benefits does not incur liability for making a distribution or payment if that distribution or payment occurred prior to receiving notice or actual knowledge of the existence of genetic material.

This bill would also provide that each person to whom payment, delivery, or transfer of the decedent's property is made shall be personally liable to any person who has a superior right to the payment, delivery, or transfer of the decedent's property. The bill would specify the limitations on that liability and would provide that an action to impose liability shall be barred 3 years after distribution to the holder of the decedent's property or 3 years after discovery of fraud, whichever is later.

Ch. 286 (AB 241) Harman Mergers: certificate of satisfaction.

Existing law requires that the surviving corporation of a corporate merger assume the liability of the domestic disappearing corporation for specified tax obligations and allows the Secretary of State to file the merger without a certificate of satisfaction from the Franchise Tax Board, if the surviving corporation is a domestic corporation or a foreign corporation qualified to do business in this state.

This bill would specify that upon a merger, the surviving domestic or foreign corporation or other business entity would be deemed to have assumed the tax liability, as specified, of the disappearing domestic or foreign entity. The bill would extend the Secretary of State's authority to file the merger without a certificate of satisfaction from the Franchise Tax Board if the surviving entity is a domestic limited liability company or registered limited liability partnership or a foreign limited liability company or foreign limited liability partnership that is registered or qualified to do business in this state.

Ch. 287 (AB 276) Baca State employees: military benefits.

Existing law authorizes a state employee who is a member of the California National Guard or a United States military reserve organization to receive specified compensation benefits for a period not to exceed 365 days if he or she is ordered to serve on active duty on and after September 11, 2001, as a result of the War on Terrorism. Existing law authorizes the Governor to extend this benefit by executive order by up to 365 days.

This bill would specify that a state employee is entitled to retain hazardous duty pay, hostile fire pay, imminent danger pay, or any other special and incentive pay from the federal government because they would not be included as military pay and allowances for the purposes of these compensation benefits.

Ch. 288 (AB 277) Mountjoy Open meetings: closed sessions.

The Bagley-Keene Open Meeting Act requires, with specified exceptions for authorized closed sessions, that all meetings of a state body be open and public and all persons be permitted to attend any meeting of a state body. Pursuant to one of these exceptions, the act authorizes a state body, until January 1, 2006, to hold closed sessions to consider matters posing a threat or potential threat of criminal or terrorist activity against the personnel, property, buildings, facilities, or equipment, including electronic data, owned, leased, or controlled by the state body, where disclosure of these considerations could compromise or impede the safety or security of the personnel, property, buildings, facilities, or equipment, including electronic data, owned, leased, or controlled by the state body, as specified. It requires the state body holding a closed session under these provisions to make specified disclosures about the closed session.

This bill would extend indefinitely the duration of these provisions. This bill also would authorize the Board of Administration of the Public Employees' Retirement System to hold

closed sessions when considering matters relating to the development of rates and competitive strategy for long-term care insurance plans.

This bill would incorporate additional changes in Section 11126 of the Government Code, proposed by SB 234, to become operative only if SB 234 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

#### Ch. 289 (AB 280) Oropeza Trespass.

Existing law prohibits a person from knowingly possessing specified weapons and other items within any sterile area, as defined, of an airport, except as specified.

This bill would apply this prohibition to the sterile area of a passenger vessel terminal, as defined, except as specified. By expanding an existing crime, the bill would impose a state-mandated local program.

Existing law prohibits an unauthorized person from knowingly entering any airport operations area, as defined, if the area has been posted with certain notices. Existing law provides that a person convicted of violating this provision is punishable by a specified fine or term of imprisonment, or both, if he or she refuses to leave the area after being requested to do so by a peace officer or authorized personnel.

This bill would apply this prohibition and penalty, in addition, to the shoreside boundary of a passenger vessel terminal operations area, as defined, and to the waterside boundary of such an operations area if notices have been posted in accordance with these requirements or in another specified manner. By expanding an existing crime, the bill would impose a state-mandated local program.

Existing law prohibits a person from intentionally avoiding submission to screening and inspection when entering or reentering a sterile area of an airport, except as specified. Existing law provides that a violation of this prohibition that is responsible for the evacuation of an airport terminal is punishable by a specified term of imprisonment under certain circumstances.

This bill would apply this prohibition, in addition, to the sterile area of a passenger vessel terminal, and would apply this penalty, in addition, to the evacuation of a passenger vessel terminal under similar circumstances. By expanding an existing crime, the bill would impose a state-mandated local program.

This bill would incorporate additional changes to Section 602 of the Penal Code proposed by SB 735 and SB 584, to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 2006, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 290 (AB 287) Negrete McLeod Rapid Disaster Response Act of 2005.

Under existing law, the Department of Forestry and Fire Protection is required, among other things, to provide fire prevention and firefighting equipment, organize crews and patrols, and employ necessary personnel.

Existing law authorizes the department, with the approval of the Department of General Services, to enter into cooperative agreements for the purpose of preventing and suppressing forest fires or other fires in any lands within any county, city, or district that makes an appropriation for that purpose.

This bill would enact the Rapid Disaster Response Act of 2005. The bill would require the Director of Forestry and Fire Protection to draw upon eligible federal funds to augment any state funds appropriated by the Legislature for the purpose of replacing the department's aging helicopter fleet.

#### Ch. 291 (AB 306) Baca Military service: benefits.

(1) Existing law provides certain protections for specified members of the United States Military Reserve ordered into active state service by the President of the United States pursuant to a specified order.

This bill would authorize members of the United States Military Reserve and National Guard, as defined, who are called to active duty as a result of the Iraq or Afghanistan conflicts, to defer payments on specified obligations for the period of active duty, plus 60 calendar days, or 180 days, whichever is the lesser.

The bill would apply only to specified obligations which were incurred prior to the date a reservist was called to active duty and shall not apply to any active duty served after the close of the Iraq or Afghanistan conflicts or to any member of the United States Military Reserve or National Guard of this state on active duty as part of the Iraq or Afghanistan conflict prior to the effective date of the bill.

This bill would provide that a deferral of payments shall not be a basis for affecting credit, as specified. It would allow the deferment of payments on mortgages, credit cards, retail installment accounts and contracts, real property taxes and assessments, and vehicle leases during the specified period and would require reinstatement of health insurance, as specified. This bill would also allow a lender to extend the term of the obligation by the amount of time the obligation was deferred. This bill would require a holder of a loan or retail installment sales contract with respect to which a debtor has purchased prepaid credit disability insurance to give notice, as provided, to the debtor that the debtor will not be protected unless the insurance is extended or, in the case of an open-ended loan or retail installment account with respect to which the debtor has purchased credit disability insurance with premiums payable monthly along with payments on the loan or account, the debtor elects to continue payment of premiums, as provided.

This bill would also prohibit foreclosure or repossession of property, as defined, on which payment has been deferred.

This bill would, in instances when a specified financial obligation is sold, transfer a requirement to defer payments to the purchaser of the obligation.

(2) This bill, by requiring a reservist to provide information under the penalty of perjury, expands the scope of an existing crime, thereby imposing a state-mandated local program.

This bill would additionally impose a state-mandated local program by imposing additional duties on county assessors and auditors.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 292 (AB 324) Mountjoy Correctional facilities: faith- and morals-based programs.

Existing law generally regulates the confinement and treatment of inmates in correctional facilities. Existing law provides that it is the intention of the Legislature that all prisoners confined in local detention facilities and state prisons be afforded reasonable opportunities to exercise religious freedom.

This bill would make specified findings and declarations regarding the benefits of faith- and morals-based programs in jails and state prisons, and would encourage local entities and the Department of Corrections to allow certain faith- or morals-based programs, educational and rehabilitation programs, and other secular volunteer programs in their correctional facilities.

Ch. 293 (AB 327) De La Torre Steven M. Thompson Physician Corps Loan Repayment Program: fees.

Existing law, the Medical Practice Act, establishes the Steven M. Thompson Physician Corps Loan Repayment Program in the Division of Licensing of the Medical Board of California. Under existing law, the program provides financial incentives, as specified, to a physician and surgeon for practicing in a medically underserved community. Existing law creates the Medically Underserved Account for the purposes of the program in the Contingent Fund of the Medical Board of California.

This bill would require the board to assess an applicant a \$50 fee for the issuance and renewal of a physician and surgeon's certificate. The bill would specify that payment of the fee is voluntary and would direct the deposit of the fees received by the board into the Medically Underserved Account for the Steven M. Thompson Physician Corps Loan Repayment Program.

Ch. 294 (AB 333) Harman Civil discovery.

(1) Under existing law, a party to a limited civil case, as defined, is permitted to take only one oral or written deposition as to each adverse party.

This bill would provide that a deposition of an organization shall be treated as a single deposition for purposes of this provision even though more than one person may be designated or required to testify, as specified.

(2) Existing law generally requires depositions to be conducted under the supervision of an officer who shall put the deponent under oath. The testimony, as well as any stated objections, are required to be taken stenographically, except as specified. Existing law also authorizes the party who notices the deposition to record the testimony by audio or video technology, as specified. Existing law permits any other party to make a simultaneous audio or video record of the deposition.

This bill would require the deposition officer to put the deponent under oath or affirmation. The bill also would require the testimony and any stated objections, when taken stenographically, to be taken by a certified shorthand reporter. This bill would delete the requirement that the making of the audio or video record of a deposition by a nondeposing party be simultaneous.

(3) Existing law, the Civil Discovery Act, authorizes a person who expects to be a party to a lawsuit in a California state court to petition to conduct discovery before the lawsuit is filed under specified circumstances.

This bill also would authorize prelitigation discovery when the contemplated lawsuit would be filed by or against the petitioner's successor in interest, under specified conditions. The bill would make other technical, nonsubstantive changes to the act.

(4) The Civil Discovery Act provides that a deposition taken pursuant to its provisions or under comparable provisions of the laws of another state, or the federal courts, or a foreign nation, is admissible in a court of this state.

This bill would provide that a deposition is admissible in a court of this state if it was taken under the provisions of the act or under comparable provisions of another state in which it was taken, or the federal courts, or a foreign nation in which it was taken.

(5) The Civil Discovery Act generally provides for the scope of discovery in civil actions and proceedings, the use of technology in conducting discovery in a complex case, the attorney work product, the methods and sequence of discovery, nonparty discovery, sanctions, the time for completion of discovery, the oral deposition inside California, the oral deposition outside California, depositions by written questions, depositions in actions pending outside California, written interrogatories, inspection and production of documents, tangible things, land and other property, physical or mental examination, requests for admission, form interrogatories and requests for admission, simultaneous exchange of expert witness information, the perpetuation of testimony or preservation of evidence before

filing an action, and the perpetuation of testimony or preservation of information pending appeal.

This bill would make various nonsubstantive, technical, and conforming changes to these and related provisions.

(6) This bill would incorporate additional changes in Section 1985.6 of the Code of Civil Procedure, proposed by AB 496, to become operative only if AB 496 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

#### Ch. 295 (AB 361) Sharon Runner Notaries public.

Existing law generally sets forth the procedures for proof and acknowledgment of instruments executed before notaries public and prescribes administrative penalties and civil fines for violation of provisions that govern notaries public.

This bill would make it a misdemeanor for a notary public to willfully fail to perform the required duties of a notary public or to willfully fail to keep the seal of the notary under his or her direct and exclusive control. The bill would require a court to revoke the commission of a notary public, upon conviction of any offense related to his or her duties, or of any felony and would require surrender to the court of the seal of the notary public, which would then be forwarded to the Secretary of State. The bill would make other related changes. By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 296 (AB 363) Chu Child and Family Service Review System.

Under existing law, the State Department of Social Services oversees the administration of county public social services, including child welfare services. Existing law requires the department to establish, by April 1, 2003, the California Child and Family Service Review System, in order to review, commencing January 1, 2004, all county child welfare systems. Existing law requires the department, beginning with the 2002–03 fiscal year, to report to the Assembly and Senate Budget Committees and appropriate legislative policy committees regarding the department’s progress relating to federal and state child and family service reviews.

This bill would revise the department’s duty to report the above information to instead require the department to provide information to the designated legislative committees. The bill would add to the information required to be provided, to include findings and recommendations for child welfare system improvements identified in county self-assessments and county system improvement plans, including common barriers that inhibit system improvements, and recommendations to overcome the barriers.

This bill would, to the extent that funds are appropriated in the annual Budget Act to enable counties to improve their performance on child welfare service outcome indicators provided for under existing law, require the department, in consultation with counties, to establish a process for allocating those funds to counties, and would require a county, to the extent possible, to use those funds in a manner designed to access additional federal, state, and local funds.

This bill would also require the department to include information regarding the allocation and use of the funds as part of its reporting requirement under existing law, as discussed above.

#### Ch. 297 (AB 394) Niello Housing: discrimination.

Existing law prohibits discrimination in housing through restrictive covenants based on race, color, religion, sex, sexual orientation, familial status, marital status, disability, national origin, source of income, or ancestry and provides that discrimination in housing through a

restrictive covenant includes the existence of a restrictive covenant regardless of whether accompanied by a statement that the covenant is repealed or void.

Existing law authorizes a person who holds an ownership interest of record in property that he or she believes is the subject of a restrictive covenant based on race, color, religion, sex, familial status, marital status, disability, national origin, or ancestry, to file an application with the Department of Fair Employment and Housing requesting a determination of whether the restrictive covenant violates the fair housing laws and is void. Existing law requires the department to provide the applicant with a written statement entitled "RACIALLY OR OTHERWISE UNLAWFULLY RESTRICTIVE COVENANT MODIFICATION" if the department determines that the document contains a restrictive covenant that violates the law. Existing law authorizes the applicant to strike out a void restrictive covenant identified by the department, complete and attach a copy of the written statement from the department to the front of the document, and cause the modified document to be recorded if all other requirements of recordation are met, including the payment of any recordation fee.

This bill would delete the provisions authorizing a person to file an application with the Department of Fair Employment and Housing, requiring the department to respond, and authorizing the person to strike out the restrictive covenant, attach a statement to the document, and record the modified document. The bill would instead authorize a person who holds an ownership interest of record in property that he or she believes is the subject of an unlawfully restrictive covenant based on race, color, religion, sex, sexual orientation, familial status, marital status, disability, national origin, source of income, or ancestry, to record a document titled Restrictive Covenant Modification, which would include a copy of the original document with the illegal language stricken. The bill would impose a state-mandated local program by requiring a county recorder to make available to the public forms for restrictive covenant modification.

The bill would require the county recorder before recording the modification document to submit the modification document and the original document to the county counsel who would be required to determine whether the original document contains an illegal restriction based on race, color, religion, sex, sexual orientation, familial status, marital status, disability, national origin, source of income, or ancestry. The bill would require the county counsel to return the documents and inform the county recorder of its determination. These new duties would impose a state-mandated local program on the county recorder and county counsel.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 298 (AB 453) Benoit Grade separation projects.

Existing law requires the California Transportation Commission to make allocations for grade separation projects, as defined. Existing law requires, in order for an allocation for construction costs, or for preconstruction costs if not already allocated, to be made, that a local agency furnish certain evidence satisfactory to the Department of Transportation, including that all matters prerequisite to the award of the construction contract can be accomplished within one year after the allocation.

This bill would require, in order for an allocation for construction costs, or for preconstruction costs if not already allocated, to be made, that a local agency furnish evidence satisfactory to the department that all matters prerequisite to the award of a construction contract can be accomplished within 2 years after the allocation.

Ch. 299 (AB 462) Tran Disability access.

Existing law requires the Department of General Services, for the purpose of ensuring access and use by persons with disabilities, to issue a written approval before a contract may be awarded where state funds are used for specified buildings or facilities, or where funds of counties, municipalities, or other political subdivisions are utilized for the construction of specified educational buildings or facilities.

This bill would authorize the Department of Transportation to approve plans for specified transportation facilities located within state highway rights-of-way to ensure access and use by persons with disabilities. The bill would require the Department of Transportation to use engineers certified through a specified program, if the State Architect establishes the program, to verify that the Department of Transportation's standards, guidelines, and design exceptions comply with requirements ensuring access and use by persons with disabilities.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 300 (AB 496) Aghazarian Service of process.

(1) Existing law requires every person who makes service of process in this state for compensation more than 10 times a year to register as a process server with the county clerk, with specified exceptions, including attorneys and their employees.

This bill would limit the latter exceptions to persons when serving process related to cases for which the attorney is providing legal services.

(2) Existing law provides that a plaintiff may have the clerk issue one or more summons for any defendant.

This bill would require the clerk, in that connection, to keep each original summons in the court records and provide a copy of each summons issued to the plaintiff who requested issuance of the summons.

(3) Existing law requires a summons to be returned to the court together with its proof of service, and provides specified procedures for a summons that is lost after service.

This bill would delete the requirement that the summons be returned, and would delete those procedures for lost summons. The bill would also make conforming changes to a related provision.

(4) Existing law authorizes the court to electronically transmit a summons with the court seal and the case number to the party filing the complaint.

This bill would instead require the court, upon request of the party filing the action, to issue that summons and to keep a copy thereof, as specified.

(5) Existing law requires the service of a subpoena duces tecum upon a consumer or an employee to be made, among other requirements, with a copy of the subpoena duces tecum, the affidavit supporting the issuance of the subpoena, if any, specified notice, and proof of service.

This bill would provide that if the subpoenaing party is the consumer or the employee, and the consumer or the employee is the only subject of the subpoenaed records, notice to the consumer or the employee, and delivery of the other documents, are not required.

(6) Existing law requires a sheriff or jailer upon whom a paper in a judicial proceeding is served, to forthwith deliver it to the prisoner with a note thereon of the time of its service. Existing law provides that if he or she neglects to do so, he or she is liable to the prisoner for all resulting damages.

This bill would provide that service directed to a person who is incarcerated may be served by any person who may lawfully serve process.

(7) This bill would incorporate additional changes in Section 1985.6 of the Code of Civil Procedure, proposed by AB 333, to become operative only if AB 333 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

Ch. 301 (AB 497) Negrete McLeod Drug wholesalers and manufacturers: nonresident wholesalers.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law, the Pharmacy Law, provides for the licensure and regulation by the California State Board of Pharmacy of pharmacies and other persons. Under that law, a person located outside of this state that ships, mails, or delivers dangerous drugs or dangerous devices into this state at wholesale is considered an out-of-state distributor that must be licensed by the board prior to engaging in those activities. Existing law, operative January 1, 2006, to January 1, 2011, requires an applicant for the issuance or renewal of a nonresident wholesaler license to submit a surety bond of \$100,000, or an equivalent means of security, for each site to be licensed by the nonresident wholesaler through which dangerous drugs or dangerous devices are to be shipped, mailed, or delivered to a site located in California. Existing law requires a fee of \$550, which may be increased up to \$600, for a wholesaler or nonresident wholesaler license and annual renewal.

This bill would instead require a single \$100,000 surety bond, or an equivalent means of security, to be submitted by an applicant for the issuance or renewal of a nonresident wholesaler license. The bill would except from that bond requirement certain nonresident wholesalers to whom an approved new drug application has been issued by the federal Food and Drug Administration, as specified. The bill would also reduce certain application fee amounts required to be paid for a nonresident wholesaler license.

#### Ch. 302 (AB 541) Harman Guardians.

(1) Existing law, until January 1, 2008, authorizes a court to require any parent who is seeking custody of, or visitation with, a child who is the subject of a custody proceeding, to undergo testing for the illegal use of controlled substances and the use of alcohol under specified circumstances. Existing law requires the court to order the least intrusive method of testing. Existing law requires that testing be in conformity with certain federal procedures, provides that the results of this testing shall be confidential and maintained as a sealed record, and permits a parent or legal custodian who is tested to contest the test results at a hearing.

This bill would also authorize a court to require any person who is seeking custody of, or visitation with, a child who is the subject of a guardianship proceeding, to undergo drug testing pursuant to the above-described procedures.

(2) Existing law requires the Department of Justice to maintain a Statewide Registry of conservators and guardians, and requires all persons who wish to serve as a conservator or guardian, or who are currently serving as a conservator or guardian, to register and reregister with the Statewide Registry. Existing law authorizes the court to require any person who is the guardian for only one ward unrelated to the guardian by blood or marriage to comply with those provisions.

This bill would further authorize the court to require any person who is the guardian of the person, unrelated to the ward, and who receives compensation for acting as guardian of the person to comply with those provisions.

#### Ch. 303 (AB 550) Goldberg Correctional institutions: sexual abuse.

Existing law provides that an employee with a department, board, or authority under the Youth and Adult Correctional Agency or a facility under contract with a department, who, during the course of his or her employment directly provides treatment, care, control, or supervision of inmates, wards, or parolees, and who engages in sexual activity with a consenting adult who is an inmate, ward, or parolee, is punishable by a fine not exceeding \$1,000, imprisonment in a county jail for a period not exceeding 6 months, or by both that imprisonment and fine, or by a fine of not more than \$10,000, imprisonment in a county jail for a period not exceeding one year or in the state prison, or by both that fine and imprisonment. Existing law provides that a 2nd or subsequent violation of these provisions is punishable by imprisonment in the state prison and that anyone who is convicted of a felony violation of this section shall be terminated, as specified, and shall not be eligible to be hired or reinstated by a department, board, or authority within the Youth and Adult Correctional Agency.

This bill, the Sexual Abuse in Detention Elimination Act, would make legislative findings and declarations to the effect that its purpose would be to protect all inmates and wards from sexual abuse while held in institutions operated by the Department of Corrections and Rehabilitation.

This bill would require the agency to provide inmates and wards with informational handbooks regarding sexual abuse in detention published by outside organizations, as specified.

This bill would require the Department of Corrections and Rehabilitation to adopt specified policies, practices, and protocols related to the placement of inmates, physical and mental health care of inmate victims, and investigation of sexual abuse.

This bill would also create the Office of the Sexual Abuse in Detention Elimination Ombudsman to ensure impartial resolution of inmate and ward sexual abuse complaints.

This bill would require the Department of Corrections and Rehabilitation to develop guidelines for allowing outside organizations and service agencies to provide resources and counseling to inmates and wards.

#### Ch. 304 (AB 592) Yee Physicians and surgeons.

Existing law, the Medical Practice Act, creates the Medical Board of California and makes it responsible through its Division of Licensing and Medical Quality for licensing and regulating physicians and surgeons. Under the act, disciplinary action may be taken against a physician and surgeon for engaging in unprofessional conduct, which includes gross negligence, repeated negligent acts, and incompetence. Existing law provides that a physician and surgeon is not subject to discipline for these particular aspects of unprofessional conduct solely on the basis that the treatment or advice he or she rendered to a patient is alternative or complementary medicine, as defined, if specified conditions are satisfied.

This bill would also provide that a physician and surgeon is not subject to discipline for these particular aspects of unprofessional conduct solely on the basis that the treatment or advice he or she rendered to a patient is alternative or complementary medicine, including the treatment of persistent Lyme Disease, if those conditions are satisfied.

#### Ch. 305 (AB 620) Negrete McLeod Criminal proceedings: examination of witnesses.

Existing law provides for the conditional examination of a witness by the defendant in all cases and by the people in cases where the punishment may be other than death. Existing law further provides that when the defendant has been charged with a serious felony, as defined, the people may have a witness examined conditionally if the people have evidence the life of the witness is in jeopardy.

This bill would permit the people or the defendant, when the defendant is charged with a serious felony, to have a witness examined conditionally if there is evidence that the life of the witness is in jeopardy.

Existing law provides that the defendant or the people may apply for an order that the witness be examined conditionally when the material witness is about to leave the state, or is so sick as to afford reasonable grounds he or she will be unable to attend the trial, or is a person 70 years of age or older, or a dependent adult. Further, existing law provides the people may apply for the conditional examination of a prosecution witness when the people have evidence that the witness' life is in jeopardy.

This bill would lower the age at which a conditional examination application for a material witness may be made to 65 years of age or older. This bill would permit a conditional examination to be sought by either the people or the defendant when there is evidence a witness, not just a prosecution witness, is in jeopardy.

Existing law outlines specified information that must be provided upon an affidavit when applying for a conditional examination, including the nature of the offense, the state of the

proceedings in the action, witness information, and the specified grounds that make the conditional examination necessary.

Existing law prohibits a conditional examination unless the reasons for the exam, as provided for in statute, are shown to the satisfaction of the magistrate.

This bill would make other conforming changes to reduce the witness age to 65, from 70, for purposes of granting a request for a conditional examination, and to conform the definition of “dependent adult.”

Ch. 306 (AB 627) Leslie Parole: religious advisers.

Existing law generally authorizes members of the clergy or spiritual advisers to visit inmates while in prison. Existing regulation prohibits employees of the Department of Corrections and Rehabilitation from contacting, corresponding, or otherwise communicating with an inmate or parolee, except in the execution of their assigned duties.

This bill would authorize a departmental or volunteer chaplain who has ministered to or advised an inmate while incarcerated to continue to minister to or advise the inmate while he or she is on parole, as long as the chaplain so notifies the warden and the parolee’s parole agent in writing.

Ch. 307 (AB 646) Sharon Runner Body piercing.

Existing law makes it a misdemeanor to tattoo or offer to tattoo a person under the age of 18 years.

This bill would make it an infraction, punishable by a fine not exceeding \$250, for any person to perform or offer to perform body piercing, as defined, upon a person under the age of 18 years, unless performed in the presence of, or as directed by a notarized writing by, that person’s parent or guardian. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 308 (AB 671) Klehs Use taxes: collection: deficiencies: returns.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. The State Board of Equalization issues forms for the computation and payment of sales and use taxes collected or owed by those retailers. There is no requirement for persons, other than retailers, that owe use taxes to register with the State Board of Equalization for the reporting and payment of use taxes owed by those persons to the state.

This bill makes findings with respect to the loss of use tax revenue attributable to those persons that fail to pay use tax that is owed to this state. This bill states the intent of the Legislature to inform taxpayers of their obligation to report and pay their use tax liability that is currently owed to this state.

The Sales and Use Tax Law provides for an 8-year statute of limitations for the collection of use taxes that are not reported under that law. That law, until January 1, 2006, in the case of a qualified purchaser, limits the statute of limitations to 3 years for the collection of unreported use taxes on specified purchases, if a determination is made that the failure to report and pay the tax was due to reasonable cause.

This bill would extend the operation of those provisions limiting the statute of limitations to 3 years until January 1, 2008, as provided. This bill would require the Franchise Tax Board to revise information accompanying income tax returns to inform taxpayers of their obligation to report and pay use taxes and the benefit of paying use taxes prior to the expiration of specified provisions of law.

Ch. 309 (AB 691) Hancock Transit village plans.

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

The Transit Village Development Planning Act of 1994 authorizes a city or county to prepare a transit village plan for a transit village development district that includes all land within not less than  $\frac{1}{4}$  mile of the exterior boundary of the parcel on which is located a transit station and addresses specified characteristics, including all of the demonstrable public benefits that are specified. Existing law provides that a transit village plan shall be prepared, adopted, and amended in the same manner as a general plan.

This bill would authorize a city, county, or city and county to declare that a previously adopted specific plan or redevelopment plan that conforms to specified requirements constitutes a village transit plan, after publishing a notice stating the intent to make the declaration, describing the general location of the proposed plan, and stating the time, date, and place of the public meeting.

Ch. 310 (AB 706) Parra California State University: investigation of reported improper governmental activities.

(1) Existing law establishes the California State University and its various campuses under the administration of the Trustees of the California State University.

Existing law, the California Whistleblower Protection Act, sets forth the circumstances and procedures under which a state employee may report improper governmental activities or make a protected disclosure to the State Auditor, and prohibits retaliation or reprisal against a state employee for these acts. An existing provision of the California Whistleblower Protection Act defines any employee of the California State University as a state employee and the California State University as a state agency for the purposes of some provisions of this act.

Existing law authorizes a California State University employee to file a written complaint with his or her supervisor or manager, or with any other designated university officer, alleging actual or attempted acts of reprisal, retaliation, threats, coercion, or similar improper acts for having made a protected disclosure. It is a misdemeanor for any person to intentionally engage in acts of retaliation, reprisal, threats, coercion, or similar acts against an employee of the California State University for having made a protected disclosure under these provisions.

This bill would enact the California State University Investigation of Reported Improper Governmental Activities Act. The bill would establish a procedure for the investigation of written complaints submitted to a designated administrator of the California State University by employees of, or applicants for employment at, the university.

(2) An existing provision of the California Constitution requires that a statute, court rule, or other authority adopted after November 4, 2004, that limits the public's right of access be adopted with findings demonstrating the interest protected by the limitation and the need for protecting that interest.

The bill would, with respect to this constitutional provision, express findings and declarations of the Legislature regarding the individual privacy interests that are protected under the bill.

Ch. 311 (AB 716) Canciamilla Vessels: abandonment: abatement.

(1) Existing law authorizes the officer who has custody of wrecked vessel property to sell it at public auction and transmit the proceeds of the sale, after deducting salvage, storage, property tax liens, other liens, and other expenses, to the Treasurer for deposit in the General Fund, if, among other things, no claimant of the property appears within 90 days after the wrecked property was saved.

This bill, instead, would authorize the wrecked property to be sold at auction if no claimant of the property appears within 60 days after the wrecked property was saved.

(2) Existing law authorizes a peace officer, as defined, an employee or officer of the State Lands Commission designated by the State Lands Commission, or a lifeguard or marine safety officer employed by a county, city, or district while engaged in the performance of

official duties, to remove, and, if necessary, store a vessel removed from a public waterway under certain, listed circumstances.

This bill, additionally, would authorize removal of a vessel when it is found or operated upon a waterway with a registration expiration date in excess of one year before the date on which it is found or operated on the waterway.

(3) Existing law makes it an infraction with a maximum \$1,500 fine for a person to abandon a vessel upon a public waterway or public or private property without the express or implied consent of the owner or person in lawful possession or control of the property, except for urgent and immediate concern for the safety of those aboard the vessel.

This bill would increase the maximum fine to \$3,000. The bill would also authorize the court to order the violator to pay the enforcing agency the actual costs incurred by the agency for the removal and disposition of the abandoned vessel.

(4) Existing law authorizes wrecked property, abandoned property, or property removed from a navigable waterway, as specified, to be sold or otherwise disposed of by the public agency that removed or caused the removal of the property, subject to certain conditions, including that the property have been appraised by disinterested persons, and have an estimated value of less than \$300.

This bill would limit the sale or disposal by a public agency of wrecked property or property removed from a navigable waterway to property that is an unseaworthy derelict or hulk, and would modify the specified condition to require the property to have an estimated value of less than \$2,000.

#### Ch. 312 (AB 729) Koretz Production agencies: regulation.

Existing law generally regulates the business of insurance, including insurers, brokers, agents, and production agencies.

Existing law requires a limited liability company, at the time of licensing as an insurance production agency and at all times during which it transacts business, to provide security for claims against it, as specified. Existing law requires this type of company to disclose various kinds of information to the commissioner.

This bill would make certain changes to the nature of the security required under this provision, and would impose additional disclosure requirements on limited liability companies, as specified. It would allow the commissioner to summarily deny or decline to act upon an application for the issuance or renewal of a license, or to summarily inactivate an existing license, for failure to comply with these requirements, and would also allow the commissioner to impose administrative penalties in connection with the filing of false or misleading information.

Existing law requires that an applicant for a license as an agent or broker pass a licensing examination administered by the Department of Insurance.

This bill would prohibit cheating, subverting, or attempting to subvert any licensing examination given by the department. A willful violation of this provision would be a misdemeanor. By creating a new crime, the bill would impose a state-mandated local program. The bill would require the Insurance Commissioner to impose certain administrative sanctions on a person who violates this provision.

Existing law imposes various regulatory requirements on insurance agents, brokers, and production agencies.

This bill would make specified changes and additions to certain of these requirements relating to the issuance and renewal of licenses, and the disclosure of information to the commissioner and the public.

The bill would make other changes, as specified.

The bill would incorporate changes made by SB 367 that would become operative if both bills are enacted and this bill is enacted after SB 367.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 313 (AB 800) Yee Medical records: patient's spoken language.

Existing law provides for access by a patient to his or her health records and requires that a patient's clinical laboratory test results be conveyed in plain language and in oral, written, or electronic form.

This bill would require all health facilities and all primary care clinics, except long-term care facilities meeting certain criteria, to include a patient's principal spoken language on the patient's health records.

Ch. 314 (AB 846) Liu Driver education: Internet: private secondary schools.

Existing law does not provide by statute the course requirements of an automobile driver education course offered by a private secondary school. Existing law provides that the satisfactory completion of a course in automobile driver education offered by such a school satisfies specified driver education instructional requirements, under specified conditions.

This bill would revise and recast those provisions and would instead provide that the satisfactory completion of an Internet-based, correspondence, or other distance-learning course offered by a private secondary school meets those instructional requirements. The bill would set forth additional automobile driver education course requirements for those private schools that offer that course and would specify other requirements.

Ch. 315 (AB 847) Berg Program for All-Inclusive Care for the Elderly.

Existing law establishes the federal Medicaid program, administered by each state, California's version of which is the Medi-Cal program. The Medi-Cal program, which is administered by the State Department of Health Services under the direction of the Director of Health Services, provides qualified low-income persons with health care services.

Existing federal law establishes the Programs of All-Inclusive Care for the Elderly (PACE), which provides specified services for older individuals so that they may continue living in the community. Federal law permits states to implement the PACE program as a Medicaid state option.

Existing state law authorizes the department to establish the California Program of All-Inclusive Care for the Elderly, and to contract with up to 10 demonstration projects to develop risk-based long-term care pilot programs, and establishes PACE program services as a covered benefit of the Medi-Cal program.

This bill would authorize the State Department of Health Services, and as applicable, the State Department of Social Services, and the California Department of Aging to grant exemptions to a PACE program from licensing and regulatory requirements applicable to clinics, residential care facilities for the elderly, and home health agencies. The bill would require the department to approve or deny any request for an exemption in writing within 60 days of submission. The bill would authorize the department to suspend or revoke an exemption that has been granted to a PACE program if the department determines the PACE program is operating in a manner contrary to the terms of the exemption or if the exemption is applicable to one or more license categories or locations.

Ch. 316 (AB 865) Ruskin Finance lender exemptions.

Existing law, the California Finance Lenders Law, provides for the licensure and regulation of finance lenders, as defined, by the Commissioner of Corporations and prohibits a person from engaging in the business of a finance lender or broker without a license. The law exempts from its requirements specified categories of organizations.

This bill would until January 1, 2010, exempt from the provisions of the California Finance Lenders Law a program-related investment by a private foundation, tax-exempt

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

organization and a loan, guaranty, or investment made by a public charity, tax-exempt organization meeting specified requirements.

Ch. 317 (AB 920) Aghazarian California Physicians Corps Program.

Existing law establishes the Steven M. Thompson Physician Corps Loan Repayment Program in the Division of Licensing of the Medical Board of California. Under existing law, the program provides financial incentives to a physician and surgeon for practicing in a medically underserved community. The Medical Board of California has developed a program for volunteering physicians.

Existing law requires the Office of Statewide Health Planning and Development to establish a nonprofit public benefit corporation known as the Health Professions Education Foundation to perform various duties with respect to implementing health professions scholarship and loan programs.

This bill would repeal the Steven M. Thompson Physician Corps Loan Repayment Program in the Division of Licensing of the Medical Board of California. The bill would instead establish within the foundation, the California Physician Corps Program. The bill would provide that, operative July 1, 2006, the Steven M. Thompson Physician Corps Loan Repayment Program and the Physician Volunteer Program shall be transferred from the Medical Board of California to the foundation's California Physician Corps Program. The bill would require the foundation to establish and consult with an advisory committee to use guidelines for selection and placement of applicants until the office adopts other guidelines by regulation. It would authorize the foundation to appoint a selection committee that provides policy direction and guidance over the program.

Existing law establishes the Health Professions Education Fund the purpose of which is to provide scholarships and loans to students from underrepresented groups who are accepted to or enrolled in schools of medicine, dentistry, nursing, or other health professions, and to fund the Geriatric Nurse Practitioner and Clinical Nurse Specialist Scholarship Program. All money in the fund is continuously appropriated to the office for the purposes of the foundation.

Existing law establishes the Medically Underserved Account in the Contingent Fund of the Medical Board of California.

This bill would establish within the Health Professions Education Fund the Medically Underserved Account for Physicians primarily to fund the Steven M. Thompson Physician Corps Loan Repayment Program, and also to fund the Physician Volunteer Program. The bill would transfer funds in the Medically Underserved Account to the Medically Underserved Account for Physicians established under the bill. Funds in this account would be continuously appropriated for the repayment of loans under the California Physician Corps Program.

Under existing law, the foundation is governed by a board consisting of 11 members.

This bill would, until January 1, 2011, add 2 members to the foundation board to be appointed by the Medical Board of California from its membership. The bill would require that these appointed members be reimbursed by the Medical Board of California for any actual and necessary expenses incurred in connection with their duties as members of the foundation board. It would also require the foundation, the office, the Medical Board of California, and the advisory committee, on or before January 1, 2010, to evaluate the success of the programs' operation and the foundation's fundraising and to make recommendations to the Legislature for improvements to the programs or for the programs to be carried out by another agency or a foundation to be established within the Medical Board of California.

Ch. 318 (AB 961) Committee on Higher Education Postsecondary education: Golden State Scholarshare Trust: Board of Governors of the California Community Colleges: California Educational Facilities Authority: California State University.

(1) The Golden State Scholarshare Trust Act establishes the Golden State Scholarshare Trust, under the administration of the Scholarshare Investment Board, to provide financial aid for postsecondary education costs of participating students. The act authorizes the board to appoint a program administrator and determine his or her duties and compensation. The act authorizes the program administrator to enter into contracts on behalf of the board.

This bill would delete those provisions relating to a program administrator and, instead, authorize the board to appoint an executive director with similar powers. The bill would also authorize the executive director to conduct any business necessary for efficient operations of the board. The bill would additionally authorize the board to invest specified moneys under contract with investment managers, and would make related conforming changes.

(2) The act requires that participants in the program be permitted to make up payments, in full or in part, for years in which they were eligible to contribute, but did not, for the benefit of a designated beneficiary. The act authorizes the amendment of participation agreements to provide for adjusted levels of payments based upon changed circumstances or changes in educational plans. The act requires that participation agreements be freely amended throughout their terms to enable participants to increase or decrease the level of participation.

The bill would delete the make up payment provision, delete the participation agreement payment adjustment option for changed circumstances or changes in educational plans, and delete the participation level adjustment provision.

(3) The act requires program administrators to develop adequate measures to prevent certain excess contributions, to pay the balance of a participant's account to the participant under certain circumstances, to develop a method to make payment of qualified higher education expenses directly to higher education institutions for the benefit of designated beneficiaries and to control for fraud under any direct reimbursement method of payment. The act authorizes program administrators to develop a method to make payment of qualified higher education expenses directly to beneficiaries in a manner that is consistent with applicable federal requirements and restrictions.

The bill would delete references to program administrators, and instead impose the described responsibilities and powers on the board. The bill would delete that provision requiring the development of measures to prevent excess contributions.

(4) The act requires the board to submit an annual audited financial report on the operations of the trust by September 30.

This bill would change that date to October 31.

(5) The act requires the trust to provide an annual listing to the Franchise Tax Board on magnetic tape or other machine-readable form, and in a manner agreed upon by the Franchise Tax Board and the Scholarshare trust, of all distributions, including payment of benefits and refunds, to any individual with respect to an interest in a participation agreement. The act requires the listing to include the names, addresses, tax identification numbers, and type and amounts of each distribution, including interest earned and penalties imposed. The act requires the trust to make a report to each participant or beneficiary of the type and amount of each distribution, including payment of benefits and refunds. The act requires the trust to report annually to each participant or beneficiary on the investment goal the participant will achieve if all future contributions with respect to that beneficiary are timely made.

The bill would specifically impose those requirements and other trust responsibilities on the board. The bill modifies the annual listing requirement to instead require an annual listing of distributions to individuals with respect to an interest in a participation agreement to the Franchise Tax Board at a time and in a manner and form as specified by the Franchise Tax Board. The bill would modify the individual report requirement to require the board to make a report to the appropriate individual of any distribution to any individual with respect to an interest in a participation agreement, at a time and in a form and manner as required by the Franchise Tax Board. The bill would delete the individual investment goal reporting requirement, and instead would require the board's report to include information on

investments and education costs that participants can use to set savings goals and contribution amounts.

(6) Existing law establishes the California State University under the administration of the Trustees of the California State University. Existing law authorizes the establishment of auxiliary organizations of the university for various purposes consistent with the mission of the university. Existing law requires the governing board of each auxiliary organization to meet on at least a quarterly basis.

This bill would instead require that the governing boards of these auxiliary organizations meet on at least an annual basis.

(7) Existing law establishes the California Educational Facilities Authority Act, the purpose of which is to provide private institutions of higher education within the state an additional means by which to expand, enlarge, and establish dormitory, academic, faculty and staff housing, and related facilities, finance those facilities, refinance existing facilities, and to provide private and public institutions of higher education within the state an additional means to assist students in financing their costs of attendance.

This bill would prohibit a city, county, city and county, district, or other local jurisdiction from operating, authorizing, or requesting an entity, including a corporation, to take any of several specified actions with respect to student loans. The bill would also require any entity that, as of January 1, 2006, is not qualified to be awarded an allocation of the state's annual private activity volume cap to issue qualified scholarship funding bonds, as defined, to obtain approval from the authority to operate as a qualified scholarship funding corporation, as defined.

(8) Existing law, the California State University Contract Law, provides, among other things, that when, in the opinion of the Trustees of the California State University, the best interests of the university so dictate, the trustees may enter into an agreement with a contractor to provide all or significant portions of the design services and construction services relating to the erection, construction, alteration, painting, repair, or improvement of a state structure, building, road, or other state improvement of any kind.

This bill would require that, when the design of portions of the building project permits the selection of subcontractors, the contractor competitively bid those portions. The bill would also require the contractor to provide to the trustees a list of subcontractors whose work is in excess of 1/2 of 1% of the total project cost as soon as the subcontractors are identified. The bill would further require that, once the subcontractors are listed, they shall have the rights provided in the Subletting and Subcontracting Fair Practices Act.

The bill would, notwithstanding a provision of existing law that requires the Department of General Services to approve, with respect to access compliance, plans and specifications for state buildings that are intended for use by the public and constructed with state funds, authorize the trustees to perform this function for California State University buildings and facilities that are intended for use by the public and constructed with state funds.

(9) Existing law establishes the various campuses of the California State University, including the campus of California State University, Channel Islands, under the administration of the Trustees of the California State University.

Existing law authorizes the trustees to exchange a portion of a prescribed parcel located approximately 8 miles from, and maintained by, the California State University, Channel Islands, for land, or for a combination of land and money, in accordance with prescribed criteria. Existing law provides that any funds received from the transaction authorized by this provision would be appropriated to the trustees for expenditure, without regard to fiscal years, for construction and capital development of projects that are eligible for state support, following review and approval by the Department of Finance. Existing law requires that the expenditure of funds received under these provisions be consistent with the master plan of the campus for which the project is proposed. Existing law also requires that any funds received under these provisions that are not encumbered prior to January 1, 2007, revert to the General Fund.

This bill would additionally authorize the university to sell all or a portion of the 262-acre parcel and to use the proceeds of that sale to acquire a specified parcel or to meet commitments made in an environmental impact report. The bill would require any exchange or sale of properties to be for no more than fair market value for any land acquired. The bill would require any funds received to be held in trust and used for either of those purposes. Any proceeds of the sale of land authorized by the bill would be deposited into a continuously appropriated fund. Because the bill would authorize the deposit of moneys into that continuously appropriated fund from a new source, the bill would make an appropriation. The bill would move to January 1, 2012, the date on which any funds, received under these provisions and not previously encumbered, would revert to the General Fund.

Ch. 319 (AB 980) Umberg California militia: disability benefits.

Existing law provides for specified benefits and compensation for any officer or enlisted member of the National Guard, the organized militia when not in the active service of the state, or the unorganized militia when called into the active service of the state.

This bill would require the Military Department to determine the difference between the amount of disability benefits to which an officer, warrant officer, or enlisted member of the California National Guard or the organized militia, as specified, who is injured, wounded, or disabled in the line of duty, as specified, is entitled to receive from the federal government and the amount of disability benefits that comparably ranked and injured regular military personnel would receive. If the Military Department determines that the amount of disability benefits that regular military personnel would receive are greater than the amount of disability benefits that the officers, warrant officers, or enlisted members would receive, this bill would require that department, upon an appropriation of funds by the Legislature for this purpose, to provide to those officers, warrant officers, or enlisted members an amount equal to the difference between those 2 amounts.

Ch. 320 (AB 982) Laird Community colleges: fees.

Under existing law, community college district governing boards are required to adopt regulations exempting from health supervision and services fees all low-income students, including students who demonstrate financial need (1) in accordance with the methodology set forth in federal law or regulation for determining the expected family contribution of students seeking financial aid or (2) according to specified income standards established by the Board of Governors of the California Community Colleges.

This bill would express findings and declarations of the Legislature with respect to the funding of student health services in the California Community Colleges. The bill would delete the provision requiring the exemption of certain students from health supervision and services fees.

Ch. 321 (AB 1043) Harman Insurance: unearned premium.

Existing law requires that, whenever any admitted or nonadmitted insurer rejects, declines, or cancels any of certain policies of insurance and the unearned premium is tendered to an insurance broker or agent of record as the insurer's agent, the unearned premium be tendered by the broker or agent to the insured or the person entitled thereto within 30 days of his or her receipt of the unearned premium from the insurer, except as specified.

This bill would delete the above requirement.

Existing law requires that, whenever an insurer endorses, rejects, declines, cancels, or surrenders any of certain automobile or property insurance policies, the unearned premium be tendered to the insured or to the person entitled thereto or to the insurance agent of record as the insurer's agent for transmittal within 25 days after the cessation or amendment of coverage. Existing law requires that, if this unearned premium is tendered to the insurer's

agent, the agent tender this premium to the insured or to the person entitled to the premium within a specified period after the agent receives the premium.

Existing law requires that whenever a policy not covered by the above provisions is canceled pursuant to certain provisions of law relating to premium financed policies, the unearned premium be tendered to the person entitled thereto or to the insurance agent of record as the insurer's agent for transmittal within 120 days after the cessation of coverage.

This bill would revise and recast these provisions. The bill would apply the provisions to all policies of personal lines insurance, as defined, that are terminated for any reason or for which coverage is reduced. It would eliminate the 120-day deadline for the return of unearned premium for premium financed policies, and would apply a 25-day deadline for the return of gross unearned premium. The bill would impose an 80-day deadline for the return of gross unearned premium when a policy other than a policy of personal lines insurance terminates for any reason, or when coverage is reduced, as specified.

The bill would impose specified requirements on insurers, brokers, and others with respect to returning unearned premiums, providing notice, and applying offsets to amounts owed to insureds. It would require an insurer to provide an accounting to the insured regarding the calculation of an unearned premium refund, and would provide that the Insurance Commissioner may adopt regulations regarding this accounting.

The bill would allow an insurer to solicit at any time the insured's consent, or in its policy to reserve the right, to apply the unearned premium generated by an amendment or endorsement removing or reducing coverage for an insured person or property to the balance owed on the policy as a whole, rather than tendering a refund of the unearned premium, except as specified.

The bill would make other technical changes.

#### Ch. 322 (AB 1044) Aghazarian Public officers: retirement benefits forfeiture.

Existing law provides that any person receiving an allowance from a public retirement system who is charged with any of certain felonies arising out of his or her former official duties shall have that allowance suspended if he or she leaves the jurisdiction of the court, as specified.

This bill would provide that any elected public officer, who takes office, or is reelected to office, on or after January 1, 2006, shall forfeit specified retirement benefits that accrue during his or her term of office if he or she is convicted of any of those felonies arising out of his or her official duties, unless the governing body authorizes the public officer to receive benefits. The bill would provide that any contributions made by the elected public officer that arose directly from or accrued solely as a result of his or her forfeited service as an elected public officer shall be returned, as specified.

The bill would require the officer's employer to notify the retirement system of the officer's conviction, as specified. The bill would also provide that a person ceases to be a member of the Public Employees' Retirement System, a county retirement system, or a city retirement system for the portion of his or her service as an elected public officer that is forfeited.

#### Ch. 323 (AB 1051) Benoit Pocket bikes: restrictions.

Existing law regulates the operation of vehicles and combinations of vehicles upon the highways, imposes certain disclosure requirements on the sale of motor vehicles and vehicles by licensed dealers, and imposes sanctions for violating these regulations and requirements.

This bill would require a manufacturer of a pocket bike, as defined by the bill, to affix on the pocket bike a sticker with a specified printed disclosure stating that the pocket bike is prohibited from being operated on a sidewalk, roadway, or any part of a highway, or on a bikeway, bicycle path or trail, equestrian trail, hiking or recreational trail, or on public lands open to off-highway motor vehicle use.

This bill would prohibit the operation of a pocket bike on a sidewalk, roadway, or any other part of a highway, or on a bikeway, bicycle path or trail, equestrian trail, hiking or recreational

trail, or on public lands open to off-highway motor vehicle use. The bill would authorize a peace officer, as defined, to cause the removal and seizure, for a specified minimum period, of a pocket bike that is found to be operating on a highway in a violation of the offense, created by the bill, prohibiting the operation of a pocket bike on a sidewalk, roadway, or any other part of a highway, or on a bikeway, bicycle path or trail, equestrian trail, hiking or recreational trail, or on public lands open to off-highway motor vehicle use. The bill would authorize a city, county, or city and county to adopt a regulation, ordinance, or resolution imposing charges equal to its administrative costs relating to the removal, seizure, and storage costs of a pocket bike, as provided.

Ch. 324 (AB 1052) Leslie Vehicles: school transportation vehicles: driver drug and alcohol testing.

(1) Existing law requires motor carriers and drivers of commercial vehicles, including schoolbus drivers, to comply with certain federal regulations relating to the use of controlled substances and alcohol, including testing requirements for the use of those substances. A willful violation of these requirements is a misdemeanor punishable by certain fines and terms of imprisonment.

This bill would define a “school transportation vehicle” as a vehicle that is not a schoolbus, school pupil activity bus, or youth bus, and is used by a school district or county office of education for the primary purpose of transporting children.

The bill would require a school district or county office of education that employs a driver to drive a school transportation vehicle, and that driver of the vehicle, to participate in a program that is consistent with the federal controlled substance and alcohol use testing requirements that apply to schoolbus drivers. The bill thereby would establish a state-mandated local program by imposing additional duties upon school districts and county offices of education.

Because it would be an infraction, under other provisions of existing law, for a person to fail to comply with these requirements, the bill would establish a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 325 (AB 1064) Cogdill Mobilehome parks.

Existing law authorizes, until January 1, 2007, a mobilehome or cabana that is installed above 5,000 feet in elevation that does not have the capacity to resist the minimum snow loads established for residential buildings by local ordinance, to be installed only in a mobilehome park that has an approved snow load maintenance program, on the condition that the installation complies with all other applicable regulations and is approved by the enforcement agency. Existing law requires a conditional permit to operate subject to the snow roof load maintenance program to be obtained from the enforcement agency.

This bill would allow a manufactured home that does not have the capacity to resist the minimum snow load established for residential buildings by local ordinance to be installed above 5,000 feet in elevation if (1) it has the capacity to resist a roof live load of at least 60 pounds per square foot and the mobilehome park where it is to be installed has an approved snow load maintenance program or (2) the manufactured home is protected by a ramada designed to resist minimum snow loads established by local ordinance.

The bill would allow a cabana to be installed in a mobilehome park above 5,000 feet in elevation only if it has the capacity to resist the minimum snow load requirements established by local ordinance for residential buildings.

The bill would state the intent of the Legislature to require the revision of specified regulations that relate to minimum roof live load requirements for manufactured homes installed at elevations above 5,000 feet and that regulations adopted by the Department of Housing and Community Development to implement and interpret the changes enacted by this bill be deemed editorial changes pursuant to the Administrative Procedure Act if those regulations are amendments, repeals, or adoptions that are substantially the same in content as the statutory changes enacted by this act.

Ch. 326 (AB 1069) Montanez Deceptive identification documents.

Existing law prohibits a deceptive identification document, as defined, from being manufactured, sold, offered for sale, furnished, offered to be furnished, transported, offered to be transported, or imported or offered to be imported into this state, except as specified. Existing law defines “deceptive identification document” with reference to a document not issued by a governmental agency of this state, another state, or the federal government. A violation of this provision is a crime.

This bill would, in addition, prohibit a document-making device, as defined, from being possessed with the intent that the device will be used to manufacture, alter, or authenticate a deceptive identification document. A conviction would be punishable by imprisonment in a county jail not exceeding one year, or a fine not exceeding \$1,000, or by both imprisonment and that fine.

The bill would also revise the definition of “deceptive identification document” to include a document not issued by a governmental agency of a foreign government, a political subdivision of a foreign government, an international government, or an international quasi-governmental organization. By expanding the scope of an existing crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 327 (AB 1123) Wyland Insurance: renewal: liability.

Existing law provides that there shall be no liability on the part of, and no cause of action of any nature shall arise against, any insurer, agent, broker, or other specified person for any statement made, unless shown to have been made in bad faith with malice in fact, by any of them in specified communications involving the cancellation of a policy, or in evidence submitted at certain proceedings in which the cancellation is an issue.

This bill would, until January 1, 2011, apply these protections, in addition, to communications and evidence involving the nonrenewal of a policy for insurers that issue professional liability insurance policies to health care providers. For liability purposes, there would not, however, be a required showing of malice in fact.

Ch. 328 (AB 1166) Canciamilla Public employees’ benefits.

(1) Under existing law, the Board of Administration of the Public Employees’ Retirement System is authorized to appoint and fix the compensation of certain employees of the system whose positions are designated as managerial, notwithstanding specified provisions of law.

This bill would clarify the board’s ability to make appointments and fix compensation notwithstanding several provisions establishing salary limits.

(2) The Public Employees’ Retirement Law permits certain adjustments to be made with respect to employer and employee contributions if more or less than the correct amount is paid, and further specifies that losses or gains resulting from errors within the limits set by

the State Board of Control for automatic writeoff shall be debited or credited to specified reserves, losses, or contingencies.

This bill would change references to the State Board of Control to the Victim Compensation and Government Claims Board.

(3) Under existing law, state employees who become members of the Public Employees' Retirement System after a certain date do not immediately make contributions nor receive service credit for their service during their first 24 months of employment.

This bill would clarify that a member who separates from state employment shall remain subject to that provision for the duration of the 24-month period prescribed if he or she returns to state employment within that period, as specified.

(4) Existing law refers to the University of California Retirement System.

This bill would change those statutory references to the University of California Retirement Plan.

(5) Under existing law, patrol, state safety, state industrial, state peace officer/firefighter or local safety members, among others, who are incapacitated as a result of an industrial disability are retired for disability, except as specified.

This bill would exclude from that provision state safety members who are state prosecutors or state public defenders.

(6) The Public Employees' Retirement Law establishes the circumstances in which a retired person may serve without reinstatement from retirement or loss or interruption of benefits. Under that law, certain appointments may be made of limited duration if they do not exceed 960 hours in any calendar year.

This bill would change the basis for calculating the maximum number of hours a retired person may serve from a calendar year to a fiscal year and would make related changes to those provisions.

(7) Existing law authorizes a special death benefit for deceased state, school, or local miscellaneous members and for specified local safety members, if the death of the member was a direct consequence of a violent act that arose during his or her official duties.

This bill would make that provision applicable to state safety members who are state prosecutors and state public defenders.

(8) The Public Employees' Retirement Law establishes the Public Employees' Retirement System, and sets forth the provisions for its administration and the delivery of benefits to its members.

This bill would authorize any retired member whose allowance is not sufficient to pay his or her contributions for health benefit plan coverage provided by his or her employer to continue that coverage by paying the Board of Administration of the Public Employees' Retirement System the balance of the contributions plus the related administrative costs. Participating retired members would be required to make these payments quarterly in advance. The bill would authorize the system to charge participating retired members a one-time setup charge and a monthly maintenance charge in amounts sufficient to ensure the ongoing support of the program. All moneys received under those provisions would be deposited in the Public Employees' Contingency Reserve Fund, which is established in the Public Employees' Medical and Hospital Care Act, thereby making an appropriation.

(9) The Public Employees' Retirement Law defines the term "public agency" for purposes of certain provisions relating to the federal Social Security Act. Until January 1, 2005, that definition included a school district, a county superintendent of schools, and a regional occupational center or program established pursuant to specified provisions, with respect to employees eligible for membership in the State Teachers' Retirement Plan.

This bill would again include those entities within the definition of that term. The bill would also authorize the State Teachers' Retirement Plan to provide Medicare coverage for employees of a public agency, as so defined, upon request of the public agency. The bill would also specify the conditions by which a member of such a public agency may elect Medicare coverage.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

(10) Existing law establishes the Public Employees' Medical and Hospital Care Act.

This bill would revise the definition of state service as used within the act, would specify the percentage of employer contributions for certain postretirement health benefits, and would make other related changes to that act, including changes related to the judicial branch and beneficiary designations.

Ch. 329 (AB 1180) Torrico Horse racing: jockeys.

Existing law, the Horse Racing Law, generally regulates horse racing. The California Horse Racing Board administers horse racing regulations. The board licenses jockeys. Violations of the Horse Racing Law are generally misdemeanors.

The bill would provide that a jockey who agrees to exercise a racehorse shall be paid no less than the standard rate paid to exercise riders, unless the jockey has been employed to ride that horse in a parimutuel race or is engaged in an official timed and recorded workout. Further, this bill would require the board to adopt regulations consistent with existing practice with respect to determining whether a jockey is entitled to receive a mount fee or riding fee, as specified.

The bill would preclude horses from being ridden at a racetrack unless the rider and horse are equipped with specified safety equipment. This bill would require the board to conduct an investigation regarding the use of safety reins, as specified, and adopt regulations mandating their use if it is determined that they would enhance safety. The bill would also require the board to approve and participate in a health assessment study of jockeys to provide information relevant to the determination of a scale of weights and weight control practices and to adopt regulations to establish new requirements if the current scale is determined to be detrimental to jockeys.

Existing law requires the board establish safety standards governing the race tracks, equipment, medical services, and other facilities to ensure the safety of horses, riders, and workers at the racetrack.

This bill would require every racing association and racing fair, as supervised by the board, to maintain specified equipment and staff for an on-track first aid facility. A qualified and licensed physician would be required to be on duty at all times during live racing, except as specified. Further, every racing association or racing fair would be required to adopt and maintain plans and contact with area hospitals to coordinate procedures for emergency hospital treatment, to designate and have on duty a health and safety manager or assistant to ensure compliance with these provisions. This bill would require the stewards to prepare reports on all on-track accidents that occur and are investigated at the racetrack. This bill would require the board to adopt regulations to implement these provisions.

Existing law prohibits entry in a race of a horse that tests positive for drug substances, as specified. A positive drug test disqualifies a horse from a race and requires any purse or award be forfeited.

This bill would permit a jockey to receive fees and pay, as specified, if the horse the jockey was engaged to ride tests positive for a prohibited substance if the board, including hearing officers and stewards find that a person other than the jockey administered the substance, as specified.

By imposing new requirements on licensees under the Horse Racing Law, the violation of which would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 330 (AB 1202) Laird Military and Aerospace Support Act.

Existing law specifies a single reuse entity for certain specified military bases subject to closure pursuant to the federal Defense Base Closure and Realignment Act and also specifies

a procedure for the recognition of a single local reuse entity for any military base that is closed in this state. Existing law authorizes the Director of Planning and Research under specified circumstances to appoint a mediator to reach agreement among the affected jurisdictions on a single local reuse entity.

This bill would change obsolete references of the “Defense Conversion Council” to the Office of Military and Aerospace Support and revise the definition of military base. The bill would specify that the Director of Planning and Research shall select a mediator in consultation with the federal Office of Economic Adjustment prior to 120 days from the effective date of the base closure decision.

This bill would revise the procedure for the recognition of a single local reuse entity for any military base that is closed in this state by providing, among other things, that recognition is subject to the regulations of the federal Office of Economic Adjustment and by requiring the Office of Military and Aerospace Support to consult with that office pursuant to specified procedures.

#### Ch. 331 (AB 1296) Hancock San Francisco Bay Area Water Trail.

Existing law establishes the jurisdiction of the San Francisco Bay Conservation and Development Commission over the waters of San Francisco Bay and Suisun Marsh. Existing law also establishes the State Coastal Conservancy with prescribed powers and responsibilities for implementing a program of agricultural land protection, area restoration, and resource enhancement within the coastal zone.

This bill would enact the San Francisco Bay Area Water Trail Act. The act would establish the San Francisco Bay Area Water Trail to link access to the waters of the San Francisco Bay and Suisun Marsh that are available for navigation by human-powered boats and beachable sail craft, and provide for diverse water-accessible overnight accommodations. On or before January 1, 2008, the San Francisco Bay Conservation and Development Commission would be required to prepare and submit to the Legislature the San Francisco Bay Area Water Trail Plan making recommendations, as specified, on the development of the water trail. The act would require the commission, in collaboration with the State Coastal Conservancy and the Association of Bay Area Governments, to establish and coordinate a collaborative partnership with other interested parties in the development of the plan.

The bill would designate the State Coastal Conservancy as the lead agency in the funding and development of projects to implement the San Francisco Bay Area Water Trail Plan, and would authorize the conservancy to undertake projects and award grants to advance the preparation or implementation of the plan. The bill would require the conservancy to help coordinate a collaborative partnership with the San Francisco Bay Conservation and Development Commission, the Association of Bay Area Governments, and other interested parties, to advance the preparation of the plan. Upon the completion of the plan, the bill would require the conservancy to consider the plan’s adoption and inclusion of appropriate elements of the plan in the conservancy’s strategic plan.

#### Ch. 332 (AB 1322) Evans Judges: disqualification.

Existing law sets forth the grounds for disqualification of a judge, including, but not limited to, the judge has a current arrangement concerning prospective employment or other compensated service as a dispute resolution neutral or is participating in, or, within the last 2 years has participated in, discussions regarding such prospective employment or service, and specified conditions apply.

This bill would add to those grounds for disqualification when the judge has been engaged in employment or service as a dispute resolution neutral, and would modify the conditions under which these grounds for disqualification apply. The bill would define “participating in discussions” for purposes of these provisions, and would provide a statement of legislative intent.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 333 (AB 1346) Richman Acute care hospitals: surgical and anesthesia services.

Existing law provides for the licensure and regulation by the State Department of Health Services of health facilities, including general acute care hospitals. A violation of these provisions by a health facility is a crime.

Existing law defines “general acute care hospital” as a health facility that provides 24-hour inpatient care, including basic medical, nursing, surgical, anesthesia, laboratory, radiology, pharmacy, and dietary services. Existing law provides exceptions to this definition for certain general acute care hospitals by authorizing them to provide for the required surgical and anesthesia services through a contract with another acute care hospital.

This bill would allow the general acute care hospital operated by the State Department of Developmental Services at Agnews Developmental Center to provide surgery and anesthesia services through a contract or agreement with another acute care hospital until June 30, 2007, and would allow a general acute care hospital operated by the Department of Corrections and Rehabilitation or the Department of Veterans Affairs that provides surgical and anesthesia services to provide the services on less than a 24-hour basis. It would also require any personal care services contract for surgical or anaesthesia services in a general acute care hospital operated by the Department of Corrections and Rehabilitation or the Department of Veterans Affairs, or the State Department of Developmental Services to meet specified requirements regarding when personal service contracts are permissible.

Ch. 334 (AB 1431) Saldana Fishing: trawl gear: halibut.

(1) Existing law generally permits the use of trawl nets, as defined, for the taking of fish and other marine life, except as otherwise prohibited for specific species or in various areas of the state. Existing law specifically authorizes the taking of shrimps and prawns by use of a trawl net under a permit issued by the Department of Fish and Game.

Existing law requires, commencing April 1, 2006, any vessel using bottom trawl gear in state-managed halibut fisheries to possess a halibut bottom trawl permit issued by the department that authorizes the use of trawl gear by that vessel for the take of California halibut. Existing law requires, commencing with the 2006 permit year, a halibut bottom trawl vessel permit to be issued annually, and commencing with the 2007–08 season, requires an applicant to have previously held a valid California halibut bottom trawl vessel permit.

Existing law prohibits the department from issuing a bottom trawl vessel permit for use in the halibut fishery unless that vessel has landed a minimum of 200 pounds of California halibut and reported that landing on fish tickets as being caught with bottom trawl gear within a specified timeframe. Existing law authorizes those permits to be transferred in certain circumstances. Existing law makes all these provisions inoperative upon the adoption by the Fish and Game Commission of a halibut fishery management plan, as specified.

This bill would delete a request for transfer because of the death or permanent disability of the permitholder, or because of the decision of the permitholder to retire from fishing upon reaching or exceeding the age of 65, from the circumstances under which the transfer of these permits is authorized, and would permit the commission to consider requests from a vessel permitholder or his or her conservator or estate representative to transfer a permit with the vessel if the permitholder has died, is permanently disabled, or is at least 65 years of age and has decided to retire from commercial fishing and if California halibut landings contributed significantly to the record and economic income derived from the vessel. The bill would also permit the commission to adopt regulations to implement that provision.

(2) Existing law designates the ocean waters lying between one and 3 nautical miles from the mainland shore lying south and east of a line running due west (270° true) from Point Arguello and north and west of a line running due south (180° true) from Point Mugu as the California halibut trawl grounds.

Existing law prohibits any trawl net that exceeds a certain entrance size, wing panel length, mesh size, or that uses trawl doors that exceed a certain weight from being used in the California halibut trawl grounds.

This bill would delete the specific entrance size, wing panel length, mesh size, and trawl door weight standards from this provision, and would instead authorize the commission to determine size, weight, and configuration of all parts of the trawl gear, including, but not limited to, net, mesh, doors, appurtenances, and towing equipment as it determines is necessary to ensure trawl gear is used in a sustainable manner within the California halibut trawl grounds.

(3) Existing law grants the Fish and Game Commission authority over all state-managed bottom trawl fisheries not managed under a federal or state fishery management plan, and over other types of gear targeting the same species as those fisheries. Existing law subjects every commercial bottom trawl vessel issued a state permit to the requirements and policies of the federal groundfish observer program. Existing law prohibits the commission from authorizing additional fishing areas for bottom trawls, unless the commission determines that adequate evidence establishes that additional fishing areas are sustainable, do not harm bottom habitat, and do not reasonably conflict with other users.

Existing law prohibits the use of roller gear more than 8 inches in diameter, and commencing April 1, 2006, makes it unlawful to fish commercially for prawns or pink shrimp, unless an approved bycatch reduction device is used with each net. Existing law specifies that a rigid grate fish excluder device is the approved type of bycatch reduction device, unless the commission, the Pacific Fishery Management Council, or the National Marine Fisheries Service determines that a different type of fish excluder device has an equal or greater effectiveness in reducing bycatch.

This bill would grant the commission authority to manage specified fisheries and would permit the commission to authorize additional fishing areas for bottom trawls, as provided. The bill would require the commission, on or before April 1, 2006, to approve one or more bycatch reduction devices for use in the bottom trawl fishery. The bill would specify that a rigid grate fish excluder device is the approved type of bycatch reduction device, unless the commission, the Pacific Marine Fishery Management Council, or the National Marine Fisheries Service determines that a different type of fish excluder device has an equal or greater effectiveness at reducing bycatch. The bill would, if the commission does not approve a bycatch reduction device prior to April 1, 2006, deem approved a device that is approved by the Pacific Marine Fishery Management Council or the National Marine Fisheries Service.

(4) Existing law makes a violation of the Fish and Game Code a misdemeanor punishable by fine, imprisonment, or both.

This bill would impose a state-mandated local program by creating new crimes for a violation of its provisions.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 335 (AB 1434) Shirley Horton Home health agencies: licensing enforcement.

Existing law requires private or public organizations, including, but not limited to, any partnership, corporation, political subdivision of the state, or other governmental agency within the state, to obtain a home health agency license before providing or arranging for the provision of skilled nursing services in the home. Existing law provides for licensing of home health agencies by the State Department of Health Services. Existing law gives the department full range of authority over accredited home health agencies to ensure that the licensure and accreditation requirements are met, including the entire scope of enforcement

sanctions and options available for unaccredited home health agencies. Existing law makes a violation of these licensing provisions a crime.

This bill would require the department to ensure that unlicensed entities are not providing skilled nursing services in the home, except as specified, would require field staff to be informed of these requirements, and would make technical and conforming changes. The bill would preclude unlicensed entities from using “home health” or similar words in their name or advertising or making related statements. The bill would also preclude unlicensed entities from using the words “skilled” or “nursing,” in their name to imply licensure as a home health agency to provide those services. By expanding the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 336 (AB 1471) McCarthy Acute Orphan Well Account.

Existing law generally regulates the drilling, operation, maintenance, and abandonment of oil and gas wells. Under existing law, on October 1, 2009, the Department of Conservation is required to report to the Legislature on the department’s progress toward meeting various goals of orphan well abandonment.

This bill would require the Division of Oil, Gas, and Geothermal Resources in the Department of Conservation to impose a fee upon the person operating each oil and gas well in the state, or owning royalty or other interests in respect to the production from the well, and upon the person operating each idle well in the state, as specified. Unless subsequently authorized by the Legislature, the bill would prohibit the division from collecting the fees after January 1, 2008. Revenue from these fees would be deposited into the Acute Orphan Well Account, which the bill would establish in the Oil, Gas, and Geothermal Administrative Fund.

The bill would provide that the moneys in the account would be available to the division, upon appropriation, for expenditure to administer the account, as prescribed, to cover certain other administrative costs, and for the purpose of plugging, abandoning, and further securing acute orphan wells, as defined. Use of moneys in the account would be limited to the minimum work necessary to eliminate any immediate risk to life, health, or natural resources.

The bill would appropriate the sum of \$1,500,000 from the account to the division for the purpose of carrying out these provisions. The bill would prohibit the division from expending any of the funds appropriated under these provisions until it has received notice from the Controller that there are sufficient funds in the account to cover all proposed expenditures for these purposes.

#### Ch. 337 (AB 1474) Maze Provisional licensing program.

(1) Existing law, the Brady-Jared Teen Driver Safety Act of 1997, allows for the issuance of a driver’s license to a person at least 16 years of age but under 18 years of age under the provisional licensing program.

Under that act, except as specified, during the first 12 months after the issuance of a provisional driver’s license, the licensee is prohibited from driving between the hours of 12 midnight and 5 a.m., and during the first 6 months after issuance, the licensee is also prohibited from transporting passengers who are under 20 years of age, unless in either situation the licensee is accompanied and supervised by a licensed driver who is the licensee’s parent or guardian, a licensed driver who is 25 years of age or older, or a licensed or certified driving instructor.

This bill instead, would provide that during the first 12 months after issuance of a provisional driver’s license, the licensee is prohibited from driving between the hours of 11 p.m. and 5 a.m. and is prohibited from transporting passengers who are under 20 years of age,

unless in either situation the licensee is accompanied and supervised as currently provided or an existing exception applies.

Because these changes would expand the scope of an existing crime, the bill would impose a state-mandated local program.

(2) This bill would incorporate additional changes in Section 12814.6 of the Vehicle Code, to become operative only if AB 806 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 338 (AB 1512) Garcia California Housing Finance Agency.

(1) Existing law authorizes the Executive Director of the California Housing Finance Agency to employ as general counsel for the agency an attorney at law licensed in this state to advise the board of the agency, the chairperson, and the executive director when so requested, with regard to all matters in connection with the powers and duties of the agency and its board members and officers.

This bill would authorize the general counsel, in his or her absence, to designate someone else to act in his or her behalf.

(2) Existing law requires the California Housing Finance Agency to administer the California Homebuyer's Downpayment Assistance Program for the purpose of assisting first-time low- and moderate-income home buyers utilizing existing mortgage financing.

Existing law establishes an expenditure allocation schedule of housing bond revenues in the Housing and Emergency Shelter Trust Fund. One of those allocations is the transfer of \$85,000,000 to the California Housing Loan Insurance Fund for bond and loan insurance purposes, as specified. The schedule provides that funds not utilized for those purposes within 30 months shall revert for general use in the California Homebuyer's Downpayment Assistance Program. Under existing law, the agency is authorized to make development loans, construction loans, property improvement loans, mortgage loans, and advances in anticipation of these loans to housing sponsors to finance housing developments and residential structures.

This bill would authorize the agency, at its discretion, to use not more than \$75,000,000 of the reversion funds available pursuant to the downpayment assistance program to finance, through short-term loans, the acquisition of land and construction and development of for-sale residential structures, pursuant to its authority under specified authority governing loans for housing developments. The bill would require the agency to make certain downpayment assistance a priority use for these funds, but not downpayment assistance for the purchase of a residence in a community revitalization area targeted by a nonprofit organization as a neighborhood in need of economic stimulation, renovation, and rehabilitation, as specified. By authorizing continuously appropriated funds to be used for this additional purpose, the bill would make an appropriation.

#### Ch. 339 (AB 1517) Sharon Runner Department of Managed Health Care: employee information.

Existing law authorizes the Department of Motor Vehicles to require fingerprint images and associated information from any employee or prospective employee whose duties include or would include access to certain confidential information, access to cash or checks, responsibility with respect to a critical automated system, or making decisions regarding licenses and other matters.

This bill would require the Department of Managed Health Care to require fingerprint images and associated information from any prospective employee whose duties would include access to medical information. This bill would require the department to require that

any services contract or interagency agreement that may include review of medical information for compliance with the Knox-Keene Health Care Service Plan Act of 1975 and entered into, renewed, or amended after January 1, 2006, include a provision requiring the contractor to agree to permit the department to run criminal background checks on its employees, contractors, agents, or subcontractors who will have access to this information. This bill would authorize those fingerprint images and associated information to be furnished to the Department of Justice for the purpose of obtaining information as to the existence and nature of a record of state or federal level convictions and arrests, as specified. The bill would authorize the Department of Justice to assess a fee sufficient to cover the processing costs for providing that information.

Ch. 340 (AB 1527) Liu Financial institutions: accounts.

Existing law provides for the regulation of certain depository institutions by the Department of Financial Institutions, including banks, savings associations, and industrial banks.

This bill would prohibit a supervised financial institution from issuing a consumer deposit account number to a customer if the account number was previously held by another customer until at least 3 years have passed since that account was closed.

Ch. 341 (AB 1529) Jones Attorneys: membership fees.

Existing law, the State Bar Act, provides for the licensure and regulation of attorneys by the State Bar of California, which is governed by the board of governors. Existing law provides that a member of the board of governors must disqualify himself or herself from making, participating in the making of, or attempting to influence any decision of the board or a committee of the board if it is reasonably foreseeable that the decision will have a material financial effect, distinguishable from its effect on the public or members of the State Bar generally on specified interests of the member.

This bill would instead require self-disqualification by a member with regard to any decision in which he or she has a financial interest, as defined, which it is reasonably foreseeable may be affected materially by the decision.

Existing law authorizes the State Bar, until January 1, 2006, to charge an annual membership fee of up to \$310 to active members of the State Bar.

This bill would increase the amount that the bar may charge active members to up to \$315 per year as of January 1, 2007. The bill would change the termination date relating to the State Bar's authority to charge this membership fee to January 1, 2008.

Existing law authorizes the State Bar to increase the annual membership fees up to \$35 for active members in any year, to be applied to the Client Security Fund.

This bill would instead authorize the State Bar to increase the annual membership fees up to \$40 for active members and up to \$10 for inactive members in any year for this purpose.

Existing law authorizes the State Bar to increase the annual membership fees for active members by up to \$25 for active members for costs of the disciplinary system.

This bill would also authorize the State Bar to increase the annual membership fees for inactive members by that amount.

Existing law establishes the Client Security Fund for the purpose of relieving or mitigating pecuniary losses caused by the dishonest conduct of active members of the State Bar.

This bill would expand the purpose of the Client Security Fund to include relieving or mitigating pecuniary losses caused by the dishonest conduct of Foreign Legal Consultants registered with the State Bar and attorneys registered with the State Bar under the Multijurisdictional Practice Program.

Existing law establishes the Attorney Diversion and Assistance Program and authorizes the State Bar to charge active members an annual fee of \$10 for administration of the program.

This bill would also authorize the State Bar to charge inactive members an annual fee of \$5 for this purpose.

Existing law authorizes the State Bar to charge an annual membership fee of up to \$40 for inactive members.

This bill would instead authorize the State Bar to charge inactive members an annual fee of up to \$65 until December 31, 2006, and an annual fee of up to \$75 on and after January 1, 2007.

Existing law requires a waiver of 25% of the State Bar annual membership fee if the member's income derived from the practice of law, including dispute resolution services, is less than \$40,000, and a waiver of 50% of the fee when income is less than \$30,000.

This bill would instead require a waiver of 25% of the annual membership fee when income from all sources is less than \$40,000.

Ch. 342 (AB 1594) Umberg Military service: California National Guard Surviving Spouses and Children Relief Act of 2004: death benefits.

Existing law requires the state to pay a \$10,000 death benefit to the surviving spouse or designated beneficiary of any member of the California National Guard, State Military Reserve, or Naval Militia who dies or is killed after March 1, 2003, in the performance of duty, as determined by the Military Department. Existing law provides, however, that those provisions will become operative upon an appropriation by the Legislature for the purpose of funding the payments of those military benefits.

This bill would appropriate the sum of \$130,000 from the General Fund to the Military Department for the purpose of paying those death gratuity benefits, as prescribed, to the families of those members who died or were killed after March 1, 2003, in the performance of duty.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 343 (AB 1595) Evans Public official: personal information.

Existing law prohibits a state or local agency from posting the home address or telephone number of any elected or appointed official on the Internet without first obtaining the written permission of that individual. Existing law also prohibits a person from knowingly posting on the Internet the home address or telephone number of an elected or appointed official or of the official's residing spouse or child with intent to cause imminent great bodily harm to that individual.

This bill would prohibit a person, business, or association from publicly posting or publicly displaying on the Internet the home address or telephone number of any elected or appointed official if that official has made a written demand of that person, business, or association to not disclose his or her home address or telephone number, or from soliciting, selling, or trading on the Internet the home address or telephone number of an elected or appointed official with the intent to cause bodily harm to the official or to any person residing at the official's home address. It would provide various remedies for violation of these provisions. It would limit the liability of an interactive computer service or access software provider under these provisions. This bill also would add to the list of elected or appointed officials covered by all of the foregoing provisions state administrative law judges, federal judges, and federal defenders, Members of the United States Congress, and appointees of the President.

Ch. 344 (AB 1642) Salinas School districts: reorganization.

Existing law authorizes a county committee on school district organization, except as specified, to establish, rearrange the boundaries of, and abolish trustee areas and make specified changes to the governing boards of school districts. Under existing law, a resolution of the county committee approving a proposal to establish or abolish trustee areas or to make

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

specified changes to the governing boards of school districts constitutes an order of election, as specified.

Existing law authorizes the county committee on school district organization to establish a common governing board for a high school district and an elementary school district within the boundaries of the high school district, and requires that the resolution of the county committee approving the establishment of a common governing board be presented to the electors of the school districts, as specified.

This bill would extend these provisions to the abolition of a common governing board.

This bill would prohibit an election from being called for a petition to transfer territory if the election area for that petition is uninhabited territory, as defined, and would require the county committee, if it approves such a petition, to order that the petition be granted and to notify the county board of supervisors, and would authorize an appeal of this action.

Existing law specifies that the reorganization of any school district or districts shall not affect the classification of certificated employees already employed by any school district affected. With respect to probationary employees, existing law provides that if the employee is a probationary employee of the district that formerly maintained the school or other place of employment, he or she is to be employed by the district that thereafter maintains the school or other place of employment, unless the probationary employee is terminated by the district pursuant to specified provisions of existing law.

This bill would specify additional grounds, under which the probationary employee may be terminated.

Existing law requires that exchanges of property tax revenues between school districts as a result of reorganization be determined pursuant to specified provisions of existing law.

This bill would, instead, make this requirement applicable to exchanges of property tax revenues between school districts as a result of reorganization only if one or more of those districts is a basic aid district.

Existing law requires a county committee to hold a public hearing with respect to reorganization in the area proposed for reorganization at least 30 days prior to the submission of a final recommendation for unification or other reorganization to the State Board of Education.

Existing law requires that, after the public hearing or the last public hearing required with respect to reorganization of a school district, the county committee may adopt a final recommendation for unification or other reorganization and shall transmit the recommendation together with the petition to the State Board of Education.

This bill would, in addition, require the county committee to transmit the recommendation together with the resolution to reorganize a school district without an election.

Existing law authorizes the State Board of Education to approve proposals for the reorganization of school districts, if the state board determines, with respect to the proposal and the resulting districts, that specified conditions are substantially met.

This bill would modify and rephrase several of those conditions.

Existing law requires that an election to transfer territory of a school district to be conducted, as specified.

Existing law authorizes a local, special, or consolidated election to be conducted wholly by mail provided that specified conditions are met.

This bill would authorize a county superintendent of schools to conduct an election based on a petition to transfer territory of a school district either pursuant to existing law governing elections for the transfer of territory of a school district, or in accordance with existing law that authorizes a local special, or consolidated election to be conducted wholly by mail if specified conditions are met.

Because this bill would impose additional duties on local agencies, it would impose a state-mandated local program.

This bill would incorporate additional changes to Section 5019 of the Education Code, proposed by AB 835, to be operative only if this bill and AB 835 are both enacted and become effective on or before January 1, 2006, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 345 (AB 1666) Frommer Military service: benefits.

Existing law provides certain protections for members of the National Guard ordered into active state service by the Governor or active federal service by the President of the United States for emergency purposes, and for reservists called to active duty, as specified.

This bill would, in addition, provide protections for these persons in connection with their military service with respect to recording fees for a power of attorney, termination of a mobile telephony services contract, military leave of absence from specified educational institutions, waiver of attorney membership fees, payment of arrearages under terminated motor vehicle leases, and continuation of gas and utility services, as provided.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 346 (AB 1718) Mountjoy Forestry and fire prevention: screens.

(1) Existing law requires any person who owns, leases, controls, operates, or maintains any occupied dwelling or occupied structure in, upon, or adjoining any mountainous area, forest-covered land, brush-covered land, grass-covered land, or any land that is covered with flammable material, which area or land is within a very high fire hazard severity zone designated by a local agency, to take specified actions to prevent fires including, among other things, providing and maintaining at all times a screen over the outlet of every chimney or stovepipe that is attached to any fireplace, stove, or other device that burns any solid or liquid fuel.

Existing law also requires that a person that owns, leases, controls, operates, or maintains a building or structure in, upon, or adjoining any mountainous area, forest-covered lands, brush-covered lands, grass-covered lands, or any land that is covered with flammable material, take specified actions to prevent fires, including, among other things, providing and maintaining a screen over the outlet of every chimney or stovepipe that is attached to a fireplace, stove, or other device that burns any solid or liquid fuel, and requires that the screen be constructed of nonflammable material with openings of not more than 1/2 inch.

This bill would delete those provisions relative to providing and maintaining screens.

The bill would require the State Fire Marshal, not later than July 1, 2006, to develop and submit to the California Building Standards Commission for adoption and approval, building regulations that strengthen and improve existing requirements in the California Building Standards Code governing the location of screens and required screen mesh size for purposes of fire protection, and would specify that the proposed regulations shall be accompanied by a specified analysis justifying the approval of the regulations.

(2) This bill also would incorporate additional changes in Section 51182 of the Government Code and Section 4291 of the Public Resources Code proposed by SB 502, to be operative only if SB 502 and this bill are both enacted and become effective on or before January 1, 2006, and this bill is enacted last.

Ch. 347 (AB 1746) Committee on Local Government Local government reorganization.

(1) The Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 governs the procedures for the formation and change of organization of cities and special districts. In the case of a petition for an annexation, a detachment, or a reorganization consisting solely of annexations or detachments, or both, signed by all of the landowners in the territory affected by the proposal, the local agency may approve or disapprove the proposal without notice or hearing, if prescribed conditions are met. With respect to uninhabited territory, the commission may waive protest proceedings if all the owners of land have given written consent and all subject agencies have consented in writing to a waiver of protest proceedings. With respect to inhabited city and district annexations or detachments, or both, the commission may waive protest proceedings if the commission has provided written notice of commission proceedings to all registered voters and landowners within the affected territory and has received no written opposition from registered voters or landowners within the affected territory, and all subject agencies have consented in writing to a waiver of protest proceedings.

This bill would, in those 2 circumstances, delete the requirement that all subject agencies consent in writing to a waiver of protest proceedings in order for the commission to waive proceedings and instead, add the requirement that all subject agencies have not submitted written opposition to a waiver of protest proceedings.

(2) Existing law requires the board of supervisors of a county to include in the Local Appointments List all appointments of public members and alternate public members made to the local agency formation commission pursuant to specified provisions of the act. Existing law requires the board of supervisors, whenever an unscheduled vacancy occurs in a local agency formation commission, to cause a special vacancy notice to be posted and provides that a final appointment to fill the vacancy may not be made for at least 10 working days after the posting of the notice.

This bill would require the commission, whenever a vacancy occurs in the public member or alternate public member position, in addition to posting a notice, to send a copy of the notice to the clerk or secretary of the legislative body of each local agency within the county. This bill would provide that a final appointment to fill the vacancy may not be made for at least 21 days after the posting of the notice.

(3) Existing law requires the commission to adopt a proposed budget by May 1 and a final budget by June 15 and prescribes the apportionment for the net operating expenses of a local agency formation commission among the county and the cities and special districts within the county. Existing law authorizes the board of supervisors to loan the commission funds if, during the fiscal year, the commission is without adequate funds to operate and to recover those funds in the commission's budget for the following fiscal year.

This bill, instead of authorizing the board of supervisors to recover the funds, would require the commission to appropriate sufficient funds in its budget for the subsequent fiscal year to repay the loan.

(4) Existing law requires the commission to develop and determine the sphere of influence of each local governmental agency within the county. For any sphere of influence or a sphere of influence that includes a special district, the commission is required to perform certain duties.

This bill would require on or before January 1, 2008, and every 5 years thereafter, the commission, as necessary, to review and update each sphere of influence.

(5) Existing law provides that where a change of organization consists of a dissolution, disincorporation, consolidation, or merger, the commission within a prescribed time period is required to make a finding regarding the value of written protests and take the action of terminating the proceedings, ordering the change of organization subject to confirmation of the voters or landowners, except under specified circumstances, or ordering a change of

organization without an election if the change of organization meets specified requirements of existing law.

This bill would delete the prescribed time period by which the commission is to make a finding with regard to the protests and eliminate the option to terminate the proceeding.

(6) Existing law authorizes the City of Willits, upon approval of the commission, to annex noncontiguous territory not exceeding 3,100 acres in an area that is located within the same county as that in which the city is situated, and that is owned by the city and is being used for municipal water purposes at the time preliminary proceedings are initiated.

This bill would authorize the City of Willits and the City of Arcata to annex noncontiguous territory, as described, that is being used for municipal water purposes, wildlife habitat, or sustainable forestry that is subject to an adopted city forest management plan at the time preliminary proceedings are initiated.

(7) Existing law permits any owner of land or registered voter within inhabited territory proposed to be annexed or detached, or any owner of land within uninhabited territory proposed to be annexed or detached to file a written protest against the annexation or detachment at any time prior to the conclusion of the noticed protest. Upon the conclusion of the protest hearing the commission is required to determine the value of written protests filed and not withdrawn.

This bill instead would permit the filing of those written protests with respect to territory that is the subject of a proposed change of organization or reorganization.

(8) Existing law specifies how required notice shall be mailed with respect to the proceedings of a local agency formation commission.

This bill would make technical changes to certain mailed notice requirements and would make other technical changes.

(9) By increasing the duties of local officials and the local agency formation commission as described above, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 348 (AB 1754) Committee on Housing and Community Development Housing.

(1) Existing law governing common interest developments requires the association to prepare and distribute to all of its members certain documents, including a report on reserve calculations.

This bill would make a change in this requirement.

(2) Existing law, for purposes of avoiding conflicts of interests, provides that a public officer or employee is deemed not to be interested in a contract if his or her interest is one that is specified in the law.

This bill would specify that an officer, employee, or member of the Board of Directors of the California Housing Finance Agency would not be deemed to be interested in a contract involving a loan product or program if the officer, employee, or member participated in the planning, discussions, development, or approval of the loan product or program, the loan product or program is or may be originated by lenders approved by the agency, and the loan product or program is generally available to qualifying borrowers on terms and conditions that are substantially the same for all qualifying borrowers at the time the loan is made.

(3) Existing law requires the work of the Department of Housing and Community Development to be divided into 3 divisions, one of which is named the Division of Community Affairs.

This bill would change the name of that division to the Division of Financial Assistance.

(4) Under existing law, no officer or employee of the California Housing Finance Agency may be employed by, hold any paid official relation to, or have any financial interest in, any

housing sponsor or any housing development financed or assisted under these provisions. A violation of this provision constitutes grounds for disqualification of a member from the board of directors or the officer or employee of the agency from his or her office or employment with the board or agency.

This bill would remove officers of the agency from the purview of this provision.

(5) Under existing law, the California Housing Finance Agency has, as its primary purpose, meeting the housing needs of persons and families of low or moderate income. Existing law authorizes the agency to issue bonds in the principal amount that the agency determines necessary to provide sufficient funds for financing housing developments and other residential structures, the payment of interest on bonds of the agency, the establishment of reserves, and other expenditures of the agency incidental to issuance of the bonds.

This bill would authorize the agency to issue bonds for the purpose of making loans to local public entities, and for the purposes of the agency, pursuant to specified provisions of existing law.

Ch. 349 (AB 1767) Committee on Revenue and Taxation Franchise Tax Board: administration: collections and seizures: erroneous levies: required disclosures: claim of right.

(1) Existing law authorizes the Franchise Tax Board, as part of its administrative duties with respect to the collection of taxes, to seize assets of a delinquent taxpayer. Existing law authorizes the board to issue an order to specified financial institutions to withhold and remit liquid assets of a delinquent taxpayer in order to satisfy the tax obligations of that taxpayer.

This bill would require a financial institution, in compliance with an order to withhold assets, to liquidate specified noncash assets of a delinquent taxpayer, in a specified manner.

(2) Existing law authorizes a person to file a reimbursement claim against the board for bank charges assessed against that person as a result of an erroneous levy by the board.

This bill would expand this provision to include any 3rd-party fees or charges assessed against a person as a result of an erroneous levy, erroneous processing action, or erroneous collection action by the board. This bill would provide that a penalty for underpayment of tax would not apply if the underpayment is based on an erroneous levy, erroneous processing action, or erroneous collection action by the board.

(3) Existing law generally provides that all taxpayer information obtained by the board is to remain confidential. Existing law provides exceptions to this general requirement, including a provision that requires the board, upon the request of the Department of Justice, a court, or any California law enforcement agency, to provide the address of any person represented to be a person for whom there is an outstanding arrest warrant.

This bill, in compliance with existing law, would require the board, upon the request of the Department of Justice, to provide the address of a sex offender, as specified.

(4) The Personal Income Tax Law, in specified conformity to federal income tax law, provides that if a taxpayer includes an item of income in gross income because it appears that the taxpayer has an unrestricted right to that income, and the taxpayer is subsequently required to repay that item, the taxpayer may deduct the repayment in the year the repayment is made and the taxes are to be calculated in a specified manner.

This bill would provide further conformity to federal income tax law with respect to dispositions of stock in trade and net operating losses, and by clarifying language relating to specified deductions and credits.

Ch. 350 (AB 1511) Evans Design-build contracting.

Existing law requires public entities to comply with certain procedures in soliciting and evaluating bids and awarding contracts for the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement.

Existing law, until January 1, 2006, authorizes certain counties, with the approval of the board of supervisors, to enter into design-build contracts, as defined, in accordance with

specified provisions. These provisions require that contracts with a cost ranging from \$10,000,000 to \$20,000,000 be awarded to the lowest responsible bidder, and authorizes contracts costing more than \$20,000,000 to be awarded to the lowest responsible bidder or by best value.

This bill would extend the authorization for these contracts to January 1, 2011, would extend the authorization to contracts with costs in excess of \$2,500,000, would authorize the Counties of Del Norte, Humboldt, Los Angeles, Mendocino, Napa, and Yolo to use the design-build process on certain projects, as defined, would delete the requirement that contracts with costs ranging from \$10,000,000 to \$20,000,000 be awarded to the lowest responsible bidder and instead authorize the counties to award projects using either the lowest responsible bidder or best value method, and would require counties utilizing the design-build method and the Legislative Analyst to submit specified reports by certain dates. This bill would also make legislative findings and declarations as to the necessity of a special statute for these counties.

This bill would incorporate additional changes in Section 20133 of the Public Contract Code, proposed by SB 287, to be operative only if SB 287 and this bill are both chaptered and become effective January 1, 2006, and this bill is chaptered last.

Ch. 351 (AB 224) Negrete McLeod Teachers' retirement.

(1) Existing law requires the Teachers' Retirement Board to report to the Governor and the Legislature on the purchasing power of benefits under the Defined Benefit Program of the State Teachers' Retirement Plan no later than April 1, of each year. Existing law permits the Teachers' Retirement Board to fix compensation for certain positions notwithstanding specified authority granted to the Department of Personnel Administration. Existing law permits a member of the Defined Benefit Program of the State Teachers' Retirement Plan who is retired for service to terminate the retirement allowance upon written request to the system.

This bill would, among other things, change the date that the Teachers' Retirement Board is required to report to the Governor, as described above, to June 1. The bill would broaden the authority of the Teachers' Retirement Board to fix compensation for certain positions, as described above. The bill would further specify the procedure by which a member may terminate a retirement allowance upon written request.

(2) The Teachers' Retirement Law defines "final compensation" as the highest average annual compensation earnable during any 12 consecutive months for purposes of calculating various benefits, and specifies that the last 12 consecutive months of employment shall be used by the system in determining final compensation unless designated to the contrary in writing by the member.

This bill would delete that latter provision that requires the member to make a designation.

(3) The Teachers' Retirement Law authorizes the governing board of a school district, community college district, or county superintendent of schools to establish regulations allowing an employee who is a member of the Defined Benefit Program to reduce his or her workload from full time to part time and receive service credit if certain requirements are satisfied, as specified.

This bill would provide that a member who retires or separates from service prior to the end of the school year is in violation of those provisions and the member's service credit for that period of the contract will be computed in accordance with other provisions.

(4) The Teachers' Retirement Law authorizes certain members who are employed by a community college district that provides the Cash Balance Benefit Program to elect to become participants of that program, as specified.

This bill would provide that if an employee was excluded from participation in the Cash Balance Benefit Program for that service, the employee may elect to become a participant provided specified conditions regarding employment are met. The bill would also make various technical changes to the Teachers' Retirement Law.

Ch. 352 (SB 70) Scott Vocational education.

Existing law establishes economic and workforce regional development centers to provide specified services, and to perform specified functions relating to economic and workforce development.

This bill would require the Board of Governors of the California Community Colleges to assist economic and workforce regional development centers and consortia, including middle and junior high schools or high schools and regional occupational centers and programs, to improve linkages and career-technical education pathways between high schools and community colleges for the benefit of pupils and students in both education systems, as described. The bill would require the board of governors to ensure that elementary and secondary school educators strongly collaborate with college faculty in implementing this provision.

The bill would require the board of governors, in collaboration with the State Department of Education, to submit a report to the Legislature, the Governor, and the Director of Finance no later than July 1, 2007, regarding prescribed topics relating to the implementation of the bill.

The bill would appropriate \$20,193,000, as scheduled, to the board of governors for allocation for local assistance grants to consortia of community colleges and their public elementary and secondary school partners, and for associated workload, for purposes of the bill. To the extent the funds appropriated by this bill are allocated to a community college district or school district, as defined by existing law for purposes of Section 8 of Article XVI of the California Constitution, those funds may be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

Ch. 353 (SB 875) Runner After School Education and Safety Program: career technical education.

(1) The After School Education and Safety Program creates incentives to establish after school enrichment programs that partner schools and communities to provide academic and literacy support and safe constructive alternatives for pupils in kindergarten and grades 1 to 9, inclusive, at participating public elementary, middle, junior high, and charter schools.

Existing law requires that local program components provide, among other things, education enrichment, which may include, but need not be limited to, fine arts, recreation, physical fitness, and prevention activities.

The existing act continuously appropriates to the department specified funds to provide training and support to ensure quality program implementation, development, and sustainability. The existing act prohibits any change to these provisions, except to further its purpose by a bill passed by a majority of the Legislature and signed by the Governor.

This bill would expand the above-referenced educational enrichment component to include career technical education.

The bill would require a majority of the time of participation by a pupil who is in kindergarten or any of grades 1 to 8, inclusive, in a career technical education component of a program to physically take place at a schoolsite, as specified.

Because this bill would make money that is continuously appropriated specifically available for this new purpose, the bill would make an appropriation.

(2) Existing law requires the State Department of Education to consider specified criteria in selecting schools to participate in the program, including, among others, the school's capacity to facilitate better integration with the regular schoolday and other extended learning opportunities, which may include arts, recreation, computer use, and other activities to broaden a pupil's learning experience.

This bill would specify that those extended learning opportunities may include career technical education.

The bill would declare that its provisions further the purposes of the act.

Ch. 354 (AB 1609) Liu Vocational education: requirements.

The existing Classroom Instructional Improvement and Accountability Act, enacted by initiative statute, requires a school accountability report card to be prepared for each school. Existing law requires each card to provide data by which a parent can make meaningful comparisons between public schools that will enable him or her to make informed decisions on which school to enroll his or her children. Existing law requires the school accountability report card to include assessment of specified school conditions, including, among others, the degree to which pupils are prepared to enter the workforce. The existing act permits the Legislature to change its provisions to further its purposes by a bill passed by a vote of the 2/3 of the membership of both houses of the Legislature and signed by the Governor.

This bill would amend the act to also require the school accountability report card to include assessment of career-technical education data measures, such as the number of pupils participating in career technical education and the percentage of pupils that complete a career technical education program and earn a high school diploma. The bill would also require the school accountability report card to include certain information relating to a declared insufficiency of textbooks or instructional materials. The bill would state findings and declarations of the Legislature that the changes made to the act by its provisions further the purposes of the act.

This bill would incorporate additional changes in Section 33126 of the Education Code proposed by SB 687, that would become operative only if SB 687 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 355 (SB 319) Migden Charter schools: funding.

(1) Existing law, the Charter Schools Act of 1992, allows for the establishment of charter schools that operate independently from the existing school district structure as a method of accomplishing specified goals.

Existing law requires a revenue limit to be calculated for each school district and each county superintendent of schools and requires the amount of the revenue limit to be adjusted for various factors.

This bill would, for the 2005-06 fiscal year only, revise, as specified, the revenue limit funding of a unified school district with respect to the funding associated with the average daily attendance of pupils attending a charter school established prior to July 1, 2005, as specified.

(2) Existing law requires the Superintendent of Public Instruction to annually compute a general purpose entitlement, as defined, and a categorical block grant amount, as defined, for each charter school, pursuant to a specified formula.

Existing law requires, for purposes of computing eligibility for, and entitlements to, revenue limit funding, that the average daily attendance of a unified school district, other than a unified school district that has converted all of its schools to charter status, as specified, include all attendance of pupils who attend charter schools for which the district is the sponsoring local educational agency and reside in, and would otherwise have been eligible to attend a noncharter school of the district.

This bill, instead, would include all attendance of pupils who reside in the unified school district and who would otherwise have been eligible to attend a noncharter school of the unified school district if the unified school district was a basic aid school district in the prior fiscal year, or if the pupils attended a charter school of a school unified district that converted to charter status on or after January 1, 2005. The bill would also subject to different funding

provisions, as specified, a charter school in a unified school district that was converted to charter status after January 1, 2005, and that would otherwise be subject to the above provisions of existing law.

Ch. 356 (SB 352) Scott Chief Business Officer Training Program.

Existing law establishes various training programs for employees of school districts.

This bill would establish, within the State Department of Education, the Chief Business Officer Training Program, to be administered by the Superintendent of Public Instruction, with the approval of the State Board of Education.

The bill would authorize the Superintendent to award funding to school districts and to county offices of education, to provide eligible candidates, as defined, with instruction and training in the areas of school finance, school operations, and leadership. The bill would authorize the Superintendent to award funding to a school district or to a county office of education that has submitted an application, as specified, to the department.

The bill would require the state board, by September 15, 2005, to commence the process of developing rigorous criteria for the approval of state-qualified training providers, and to establish an application process for training providers, with certain requirements.

The bill would require the department, by July 1, 2007, to develop, subject to the review and approval of the state board, an interim report for submission to the Legislature regarding the status of the program established pursuant to this measure, as specified, and would require the state board to submit the report to the Legislature no later than September 30, 2007. The bill would require the department, by June 30, 2008, to develop, subject to the review and approval of the state board, a final report for submission to the Legislature regarding the status of the program established pursuant to the bill, as specified, and would require the state board to submit the report to the Legislature no later than August 31, 2008.

The bill would provide that its provisions are to become inoperative on July 1, 2009, and are repealed as of January 1, 2010.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 357 (SB 430) Runner Charter schools.

Existing law establishes the County Office Fiscal Crisis and Management Assistance Team to provide, among other things, fiscal management assistance at the request of any school district or county office of education.

This bill would permit a county superintendent of schools to request the County Office Fiscal Crisis and Management Assistance Team to review the fiscal or administrative condition of a school district or charter school under his or her jurisdiction. The bill would, in addition, permit a charter school to request specified assistance from the County Office Fiscal Crisis and Management Assistance Team.

This bill would incorporate additional changes in Section 42127.8 of the Education Code proposed by AB 1366, that would become operative only if AB 1366 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

Ch. 358 (SB 687) Simitian School accountability report card: reporting requirements: standardized template: review and revisions.

The Classroom Instructional Improvement and Accountability Act requires each school district to develop and implement a school accountability report card, as prescribed. The act prohibits any change to its provisions, except a change to further its purpose enacted by a bill passed by a vote of  $\frac{2}{3}$  of the Legislature and signed by the Governor.

The act requires that the school accountability report card provide data by which a parent can make meaningful comparisons between public schools that will enable him or her to make informed decisions on which school to enroll his or her children, including providing an assessment of estimated expenditures per pupil, among other assessments.

This bill would impose a state-mandated local program by specifying reporting requirements for the assessment of estimated expenditures per pupil, and would require that assessment of estimated expenditures per pupil include salaries of personnel at the schoolsite, as specified.

Existing law also requires the State Department of Education to develop and recommend for adoption by the State Board of Education a standardized template intended to simplify the process for completing the school accountability report card and to make the school accountability report card more meaningful to the public.

This bill would require that the department, by July 1, 2006, recommend for adoption by the State Board of Education a revision to the standardized template, described above.

The bill would require that the revision to the standardized template recommended by the department include a field for reporting the actual restricted funding, per pupil, allocated for the specific benefit of the school or for the benefit of all schools in the district equally. The bill would also require that this revision to the standardized template include a comparison of the actual unrestricted funding per pupil allocated for the specific benefit of the school or for the benefit of all schools in the district equally, compared to the districtwide average and the state average of the same computation, and also a comparison of the average of actual salaries paid to certificated instructional personnel, compared to the districtwide average and state average of the same computation.

This bill would declare that these provisions further the purposes of the Classroom Instructional Improvement and Accountability Act.

This bill would incorporate additional changes in Section 33126 of the Education Code, proposed by AB 1609, to be operative only if AB 1609 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 359 (AB 740) Huff Charter schools: funding.

(1) Existing law establishes the targeted instructional improvement block grant and authorizes school districts, if they are not in violation of a court order regarding desegregation, to expend funds received pursuant to the grant for purposes related to specified programs.

This bill would allow schools to continue to receive funding, as specified, for purposes of a court-ordered desegregation program after they convert to charter schools if the court order remains in effect and they continue to serve the same population and implement the intended goals of the court order.

(2) Existing law requires the Superintendent of Public Instruction annually to compute a categorical block grant amount for each charter school, as specified.

This bill would repeal that provision of existing law as of July 1, 2006, and would establish a categorical block grant to provide charter schools with funding for general education and educationally disadvantaged pupil programs that would be in lieu of the funding received by charter schools pursuant to various categorical programs. The bill would establish, for the 2005–06 fiscal year, for the 2006–07 fiscal year, and for the 2007–08 fiscal year and thereafter, a different method for calculating the categorical block grant for charter schools.

(3) Existing law authorizes charter schools to apply for federal and state categorical programs, as provided.

This bill would revise those provisions and make related changes.

(4) Existing law requires the Director of Finance to make certain computations annually regarding charter school block grant funding and to provide that information to the Superintendent within 30 days of the enactment of the annual Budget Act.

This bill would repeal that provision of existing law.

(5) Existing law, the Budget Act of 2005, appropriates \$62,158,000 to the State Department of Education for categorical programs for charter schools.

This bill would require the department to distribute base block grant funds using a single funding rate per unit of average daily attendance, as provided. The bill would specify the manner in which supplemental educationally disadvantaged pupil block grant funds are to be distributed.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 360 (AB 1366) Lieber Community colleges: fiscal accountability: County Office Fiscal Crisis and Management Assistance Team.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Under existing law, community college districts throughout the state provide instruction at the campuses they operate and maintain. Existing law provides for an annual audit of each community college district, and requires the board of governors to establish standards and procedures to encourage sound fiscal management practices by community college districts.

Existing law establishes the County Office Fiscal Crisis and Management Assistance Team (FCMAT), which consists of persons having extensive experience in school district budgeting, accounting, data processing, telecommunications, risk management, food services, pupil transportation, purchasing and warehousing, facilities maintenance and operation, and personnel administration, organization, and staffing. Among other duties, FCMAT provides fiscal management assistance at the request of any school district or county office of education. A FCMAT unit is selected and governed by a 23-member governing board with prescribed membership.

This bill would add the Chancellor of the California Community Colleges or his or her designee and a member of a community college district governing board chosen by the chancellor to the FCMAT governing board, thus increasing its membership to 25.

The bill would authorize the board of governors to request the FCMAT to assist a community college district to establish or maintain sound financial and budgetary conditions and to comply with principles of sound fiscal management. The bill would specify the conditions under which the board of governors would be authorized to request the FCMAT to assist a community college district under the bill.

The bill would require that the costs of any activities undertaken by the FCMAT pursuant to this bill would be paid, as specified, by the district that was assisted by the FCMAT. The bill would require the FCMAT to submit a progress report to the affected district, to the board of governors, and to the chancellor at least every 6 months, or more frequently if that is required by the chancellor.

In the event that an assignment is made under this bill for the purpose of providing management or fiscal crisis intervention, or both, for a community college district where a crisis presents an imminent threat to the fiscal integrity and security of that district, the bill would require the chancellor to submit a report, including specified data, to the board of governors.

The bill would authorize community college districts to request the FCMAT to provide specified services, at that district's expense, as specified, irrespective of whether the board of governors has requested the FCMAT to assist the district in that instance.

The bill would require the board of governors to develop and adopt any regulations that are necessary for the implementation of the bill.

The bill would incorporate additional changes in Section 42127.8 of the Education Code proposed by SB 430 that would become operative only if SB 430 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

Ch. 361 (AB 1385) Laird School meals.

Existing law requires school districts and county superintendents of schools to provide free or reduced-price meals to needy pupils as part of the National School Lunch and School Breakfast Programs.

This bill would require the State Department of Education to create a computerized data-matching system, as specified, using existing databases from the State Department of Education and the State Department of Health Services to directly certify recipients of public assistance programs for enrollment in the National School Lunch and School Breakfast Programs. This bill would require the State Department of Education to determine the availability of and request or apply for, as appropriate, federal funds to assist the state in implementing new direct certification requirements mandated by federal law. The bill would make its provisions operative upon receipt of federal funds to assist the state in implementing new direct certification requirements mandated by federal law.

Ch. 362 (AB 1480) Maze Agricultural education: California Community Colleges.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law establishes community college districts throughout the state, and authorizes these districts to provide instruction at the community college campuses they maintain.

This bill would express various findings and declarations of the Legislature with respect to agricultural education in the community college system. The bill would require the California Community Colleges Agriculture and Natural Resources Advisory Committee to identify and develop quality program criteria that may be used to uniformly evaluate the effectiveness of the agricultural education programs in community colleges throughout California. The bill would require that these criteria be developed in consultation with instructors, administrators, students, industry representatives, and other interested parties, and build upon the local program evaluation previously developed by the advisory committee. The bill would further require that these criteria be submitted, no later than June 30, 2007, in a written report to the Chancellor of the California Community Colleges and the Legislature.

This bill would require the advisory committee to perform all of the activities specified in this bill within a prescribed allotment of federal funding.

Ch. 363 (AB 1492) Evans Community college districts: property: sale or lease.

Existing law authorizes the governing board of any community college district to sell or lease, under specified conditions, real property, as defined, that the community college district owns. Existing law also requires state and local agencies, including community college districts, to comply with specified requirements prior to the disposal of surplus land.

This bill would exclude from provisions governing the construction of community college facilities and governing the disposal of property owned by community college districts certain transactions involving the sale or lease of property owned by a community college district if the proceeds of these transactions are expended for capital outlay purposes relating to qualified community college facilities, as defined, and if the district complies with other specified conditions.

Ch. 364 (AB 430) Nava Principal Training Program.

Existing law establishes the Principal Training Program administered by the Superintendent of Public Instruction, with the approval of the State Board of Education. Existing law requires the Superintendent to award incentive funding to local educational

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

agencies to provide schoolsite administrators, as defined, with instruction and training in specified areas. Existing law makes the program inoperative on July 1, 2006, and repeals it as of January 1, 2007.

This bill would change the name of the program to the Administrator Training Program and would change the reference “schoolsite administrator” to “school administrator.” The bill would require the State Department of Education, by July 1, 2008, and subject to review and approval by the state board, to develop an interim report concerning the program, as specified, for submission to the Legislature. The bill would require the department, by January 30, 2013, and subject to review and approval by the state board, to develop a final report concerning the program, as specified, for submission to the Legislature. The bill would additionally make related, conforming, and technical changes.

This bill would extend the date on which the program becomes inoperative to July 1, 2012, and the repeal date to January 1, 2013.

#### Ch. 365 (SB 975) Ashburn Air quality: biodiesel fuel.

Existing law imposes various limitations on emissions of air contaminants for the control of air pollution from vehicular and nonvehicular sources. Existing law generally designates the State Air Resources Board as the state agency with the primary responsibility for the control of vehicular air pollution. Existing law requires the state board to establish, by regulation, various standards for gasoline and motor vehicle fuel.

This bill would provide that any public agency, or regulated utility, or owner or operator of a solid waste collection or collection vehicle, as defined, may use a biodiesel blend fuel, as defined, in any retrofitted vehicular or off-road diesel engine certified by the state board.

This bill would repeal its provisions on January 1, 2008, as specified.

#### Ch. 366 (SB 1037) Kehoe Energy efficiency.

(1) The Warren-Alquist State Energy Resources Conservation and Development Act establishes the State Energy Resources Conservation and Development Commission (Energy Commission) and requires it to certify sufficient sites and related facilities that are required to provide a supply of electricity sufficient to accommodate projected demand for power statewide. Under that act, the Energy Commission also administers existing law with respect to energy conservation and renewable electricity generation sources.

Existing law authorizes the Public Utilities Commission to regulate public utilities, including electrical and gas corporations. The Public Utilities Act requires the commission to review and adopt a procurement plan for each electrical corporation. The act prohibits any electrical corporation from beginning the construction of, among other things, a line, plant, or system, or of any extension thereof, without having first obtained from the commission a certificate that the present or future public convenience and necessity require or will require that construction. Under existing law, a person is guilty of a crime for failing to comply with provisions of the act, or with an order or decision of the commission.

This bill would require the commission, in consultation with the Energy Commission, to identify all potentially achievable cost-effective electricity efficiency savings and to establish efficiency targets for an electrical corporation to achieve pursuant to its procurement plan. The bill would require that an electrical corporation’s procurement plan include a showing that the electrical corporation will first meet its unmet resource needs through all available energy efficiency and demand reduction resources that are cost effective, reliable, and feasible.

The bill would require the commission, in consultation with the Energy Commission, to identify all potentially achievable cost-effective natural gas efficiency savings and to establish efficiency targets for the gas corporation to achieve these targets and to require that a gas corporation first meet its unmet gas resource needs through all available natural gas efficiency and demand reduction resources that are cost effective, reliable, and feasible.

The bill would require the commission, in considering an application for a certificate of public convenience and necessity for an electric transmission facility, to consider cost-effective alternatives to transmission facilities that meet the need for an efficient, reliable, and affordable supply of electricity, including specified demand reduction resources.

The bill, by requiring the commission to impose new requirements on electrical and gas corporations, the violation of which would be a crime, would create new crimes, thereby imposing a state-mandated local program.

(2) Existing law relating to electrical restructuring imposes certain requirements on local publicly owned electric utilities.

This bill would require each local publicly owned electric utility, in procuring energy, to first acquire all available energy efficiency and demand reduction resources that are cost effective, reliable, and feasible. The bill would require each local publicly owned electric utility to report annually to its customers and to the Energy Commission, its investment on energy efficiency and demand reduction programs. The bill, by imposing new requirements on local publicly owned electric utilities, would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 367 (AB 380) Nunez Electricity: electrical restructuring: resource adequacy.

(1) The California Constitution establishes the Public Utilities Commission, and provides it with jurisdiction over all public utilities. The Constitution grants the commission certain general powers over all public utilities, subject to control by the Legislature, and authorizes the Legislature, unlimited by the other provisions of the Constitution, to confer additional authority and jurisdiction upon the commission, that is cognate and germane to the regulation of public utilities.

The existing Public Utilities Act imposes various duties and responsibilities on the commission with respect to the purchase of electricity and requires the commission to review and adopt a procurement plan and a renewable energy procurement plan for each electrical corporation pursuant to the California Renewables Portfolio Standard Program. Existing law relative to electrical restructuring, authorizes electrical service to be provided, in certain circumstances, by electric service providers, as defined, and community choice aggregators, as defined.

This bill would require the commission, in consultation with the Independent System Operator (ISO), to establish resource adequacy requirements for all load-serving entities, as defined, in accordance with specified objectives. The bill would require each load-serving entity to maintain physical generating capacity adequate to meet its load requirements, including, but not limited to, peak demand and planning and operating reserves, deliverable to locations and at times as may be necessary to provide reliable electric service. The bill would require each load-serving entity to meet, at a minimum, the most recent minimum planning reserve and reliability criteria approved by the Board of Trustees of the Western Systems Coordinating Council or the Western Electricity Coordinating Council. The bill would require the commission to implement and enforce the resource adequacy requirements established pursuant to the bill in a nondiscriminatory manner. The bill would subject each load-serving entity to the same requirements for resource adequacy and the renewables portfolio standard program that are applicable to electrical corporations, or otherwise required by law, or by order or decision of the commission. The bill would require

that the costs of an electrical corporation in meeting resource adequacy requirements, as specified, be fully recoverable from those customers taking service from the electrical corporation, at the time the commitment to incur the cost is made or thereafter, on a fully nonbypassable basis, as determined by the commission. The bill would require the commission to determine the most efficient and equitable means for achieving prescribed objectives. The bill would exclude from the definition of a "load-serving entity" a local publicly owned electric utility, as defined, the State Water Resources Development System commonly known as the State Water Project, or certain customer generation.

(2) Existing law relative to electrical restructuring states the intent of the Legislature that the state's local publicly owned electric utilities, as defined, and electrical corporations should commit control of their transmission facilities to the ISO.

The existing Warren-Alquist State Energy Resources Conservation and Development Act establishes the State Energy Resources Conservation and Development Commission (Energy Commission) and requires it to undertake a continuing assessment of trends in the consumption of electricity and other forms of energy and to analyze the social, economic, and environmental consequences of those trends and to collect from electric utilities, gas utilities, and fuel producers and wholesalers and other sources, forecasts of future supplies and consumption of all forms of energy. Existing law requires the Energy Commission, beginning November 1, 2003, and every 2 years thereafter, to adopt an integrated energy policy report which includes an assessment and forecast of system reliability and the need for resource additions, efficiency, and conservation.

This bill would require that each local publicly owned electric utility serving end-use customers prudently plan for and procure resources that are adequate to meet its planning reserve margin and peak demand and operating reserves, sufficient to provide reliable electric service to its customers. The bill would exempt certain customer generation from these requirements. The bill would require that each local publicly owned electric utility serving end-use customers, at a minimum, meet the most recent minimum planning reserve and reliability criteria approved by the Board of Trustees of the Western Systems Coordinating Council or the Western Electricity Coordinating Council. The bill would require a local publicly owned electric utility serving end-use customers, upon request, to provide the Energy Commission with any information the Energy Commission determines is necessary to evaluate the progress made by the local publicly owned electric utility in meeting these requirements, and would require the Energy Commission to report the progress made by each utility to the Legislature, to be included in the integrated energy policy reports.

Because this bill would establish various requirements to be met by local publicly owned utilities, this bill would impose a state-mandated local program.

Under existing law, a violation of the Public Utilities Act or an order or direction of the commission is a crime.

Certain provisions of this bill would be part of the act and an order or other action of the commission would be required to implement certain of the provisions. Because a violation of those provisions or an order or other action of the commission implementing those provisions would be a crime, and because the bill would make certain violations by a load-serving entity a crime, this bill would thereby impose a state-mandated local program by creating new crimes and by expanding the definition of existing crimes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 368 (AB 515) Richman State Water Project: solar photovoltaic panels and systems.

Under existing law, the Department of Water Resources operates the State Water Project.

This bill would authorize the department to establish a program to authorize private entities to lease space above or adjacent to appropriate conveyance facilities of the State Water Project for the purposes of installing solar photovoltaic panels and related systems for the generation and transfer of electricity. The bill would require the department to evaluate proposals for installing solar photovoltaic panels and related systems. The bill would require a proposal submitted to the department for evaluation to include an engineering study of the proposed solar photovoltaic panels and related systems and an evaluation of the effect the solar photovoltaic panels and related systems may have on water supply, water quality, worker safety, and liability considerations. The bill would require the costs of the engineering study and the department's evaluation to be paid by the person or entity making the request. The bill would authorize the department to negotiate compensation for an agreement for the installation of solar photovoltaic panels and related systems for the transfer of electricity, that is equal to or exceeds the cost to the department of meeting its obligations under the agreement.

Ch. 369 (AB 728) Negrete McLeod Electricity: biogas digester customer-generators: net metering.

Under existing law, electric service providers, as defined, are required to provide eligible customer-generators with net energy metering, as defined. Under existing law, electrical corporations are required, only until January 1, 2006, to provide eligible biogas digester customer-generators with net energy metering, as defined, under a pilot program. Existing law defines an "eligible biogas digester customer-generator," in part, as a customer of an electrical corporation that uses a biogas digester electrical generating facility, as defined, with a capacity of not more than one megawatt, that is located on or adjacent to the customer's premises, is interconnected and operates in parallel with the electric grid, and is sized to offset part or all of the customer's own electrical requirements and that receives certain funding.

Existing law requires an electrical corporation to file a standard tariff providing for net energy metering for eligible biogas digester customer-generators and to make the tariff available upon request on a first-come-first-served basis, until the total cumulative rated generating capacity used by the eligible biogas digester customer-generators equals 5 megawatts within the service territory of the electrical corporation, with a combined statewide generating capacity not to exceed 15 megawatts.

This bill would extend the operation of the biogas customer-generator pilot program until December 31, 2009, and would authorize an eligible biogas digester customer-generator to continue to receive service pursuant to the net energy metering tariff for the life of the facility, after December 31, 2009. The bill would modify the definition of an "eligible biogas digester customer-generator," to authorize up to 3 large biogas digester electrical generating facilities with a capacity of more than one megawatt and not more than 10 megawatts. The bill would delete the above-described 5 megawatt per electrical corporation limitation on eligibility for the pilot program and would increase the current 15 megawatt statewide limitation to 50 megawatts. The bill would require a biogas digester electrical generating facility subject to the best available control technology (BACT) requirements to install the BACT at the time of installation in order to participate in the tariff. The bill would require the commission, in collaboration with the State Air Resources Board, to report certain information relative to the pilot program to the Legislature on or before December 31, 2008.

Under existing law, the failure to file a required tariff, or a violation of an order or direction of the commission, including a commission-approved tariff, is a crime.

Because the bill would require electrical corporations to file new tariffs and would continue tariffs in effect past their current repeal date, the bill would impose a state-mandated local program by creating new crimes.

Ch. 370 (AB 736) Jerome Horton Public utilities: regulation.

Under existing law, the Public Utilities Commission has regulatory authority over public utilities. Under existing law, a public utility has a duty to serve, including furnishing and maintaining adequate, efficient, just and reasonable service, instrumentalities, equipment, and facilities as are necessary to promote the safety, health, comfort, and convenience of its patrons and the public. Existing law prohibits, with certain exemptions, any public utility other than a common carrier by railroad, as defined, from selling, leasing, assigning, mortgaging, or otherwise disposing of or encumbering the whole or any part of specified property necessary or useful in the performance of the public utility's duties to the public without first having obtained an authorizing order from the commission. Existing law, with certain exemptions, makes void every sale, lease, assignment, mortgage, disposition, encumbrance, merger, or consolidation made other than in accordance with the order of the commission authorizing it.

This bill would prohibit, with certain exemptions, any public utility other than a common carrier by railroad, from selling, leasing, assigning, mortgaging, or otherwise disposing of or encumbering the whole or any part of specified property necessary or useful in the performance of the public utility's duties to the public, without first having either secured an order from the commission authorizing it to do so for qualified transactions valued above \$5,000,000, or for qualified transactions valued at \$5,000,000 or less, having filed an advice letter and obtained a resolution from the commission authorizing it to do so. The bill would require the commission to determine the types of transactions valued at \$5,000,000 or less that qualify for advice letter handling. The bill would authorize the commission to designate a procedure different than the advice letter procedure if it determines that a particular transaction of a value of \$5,000,000 or less warrants a more comprehensive review. For transactions subject to the advice letter approval procedure, the commission would be required to approve or deny the advice letter within 120 days of its filing absent a protest or incomplete documentation by the applicant public utility. The bill would require the commission to reject an advice letter that seeks to circumvent the \$5,000,000 threshold by dividing what is a single asset with a value of more than \$5,000,000, into component parts, each valued at less than \$5,000,000. The bill would state the intent of the Legislature that transactions with monetary values that materially impact a public utility's rate base, or transactions that would trigger the commission's review responsibilities under the California Environmental Quality Act, should not qualify for expedited advice letter review.

Ch. 371 (AB 1007) Pavley Air quality: alternative fuels.

Existing law imposes various limitations on emissions of air contaminants for the control of air pollution from vehicular and nonvehicular sources. Existing law generally designates the State Air Resources Board as the state agency with the primary responsibility for the control of vehicular air pollution.

This bill would require that, not later than June 30, 2007, the State Energy Resources Conservation and Development Commission, in partnership with the state board, and in consultation with specified state agencies, to develop and adopt a state plan to increase the use of alternative fuels, as defined.

Ch. 372 (AB 1182) Calderon Public Utilities Commission: work plan access guide.

Existing law requires the Public Utilities Commission to develop, publish, and annually update an annual work plan access guide describing the scheduled ratemaking proceedings and other decisions that may be considered by the commission during the calendar year, and containing specific information regarding the ratemaking process and access to that process. Existing law requires the commission to develop a program to disseminate the information in the guide utilizing computer mailing lists to provide regular updates on the information to those members of the public and organizations that request that information.

This bill would rename the annual work plan access guide the annual work plan and would require the commission to post the annual work plan on its Internet Web site. The bill would require the commission to determine the feasibility of submitting advice letters to the commission through electronic means, as described, and if determined to be feasible, to propose a plan for submitting advice letters by electronic means within 6 months of the date of that determination.

Ch. 373 (AB 1348) Sharon Runner Antelope Valley Fairgrounds EE and PV Synergy Demonstration Project.

Existing law requires the Public Utilities Commission, in consultation with the State Energy Resources Conservation and Development Commission (Energy Commission), to administer, until January 1, 2008, a self-generation incentive program for distributed generation resources in the same form that exists on January 1, 2004. Existing law establishes a net energy metering pilot program for eligible biogas digester customer-generators.

This bill would authorize the establishment of the Antelope Valley Fairgrounds EE and PV Synergy Demonstration Project, as specified, at the Antelope Valley Fairgrounds, a project that would include the installation of cost-effective energy efficient equipment and fixtures, and a photovoltaic solar energy system of up to 630 kilowatts. The bill would require an electrical corporation providing electrical service to the Antelope Valley Fairgrounds to file a tariff with the commission meeting certain criteria.

Under existing law, a violation of the Public Utilities Act or an order or direction of the commission is a crime.

Because the provisions of this bill would be a part of the act and because the failure to file a required tariff or the violation of a filed and approved tariff implementing its requirements would be a crime, the bill would impose a state-mandated local program by creating a new crime.

The provisions of this bill would be repealed on January 1, 2017.

Ch. 374 (AB 1576) Nunez Electrical corporations: rates: repowering projects.

Under existing law, the Public Utilities Commission (PUC) has regulatory authority over public utilities, including electrical corporations. Existing law authorizes the PUC to fix the rates and charges for every public utility, and requires that those rates and charges be just and reasonable. Under existing law, a public utility has a duty to serve, including furnishing and maintaining adequate, efficient, just and reasonable service, instrumentalities, equipment, and facilities as are necessary to promote the safety, health, comfort, and convenience of its patrons and the public. The Public Utilities Act requires the PUC to review and adopt a procurement plan for each electrical corporation in accordance with specified elements, incentive mechanisms, and objectives, including the requirement that the procurement plan enable the electrical corporation to fulfill its obligation to serve its customers at just and reasonable rates.

The existing Warren-Alquist State Energy Resources Conservation and Development Act establishes the State Energy Resources Conservation and Development Commission (Energy Commission) and requires it to certify sufficient sites and related facilities that are required to provide a supply of electricity sufficient to accommodate projected demand for electricity statewide. The act grants the Energy Commission the exclusive authority to certify any stationary or floating electrical generating facility using any source of thermal energy, with a generating capacity of 50 megawatts or more, and any facilities appurtenant thereto. Existing law, until January 1, 2007, requires the Energy Commission to establish a process for the expedited review of applications to construct and operate thermal powerplants and related facilities and for the expedited review of repowering projects, as defined.

This bill would require that the costs of a contract entered into pursuant to a procurement plan by an electrical corporation for the electricity generated by a replacement or repowering project concerning a thermal powerplant that meets specified criteria be recoverable in rates,

taking into account any collateral requirements and debt equivalence associated with the contract, in a manner determined by the PUC to provide the best value to ratepayers.

Existing law requires the Energy Commission to prepare an integrated energy policy report every 2 years. Existing law requires the report to contain an overview of major energy trends and issues facing the state, including, but not limited to, supply, demand, pricing, reliability, efficiency, and impacts on public health and safety, the economy, resources, and the environment.

This bill would require the Energy Commission, in consultation with the State Water Resources Control Board, to include in the integrated energy policy report to be adopted November 1, 2007, a review of the progress made toward implementing certain performance standards adopted pursuant to the federal Water Pollution Control Act for electrical generating facilities requiring certificates from the Energy Commission.

Ch. 375 (SB 66) Torlaxson Bay Area state-owned toll bridges: financing.

(1) Existing law specifies the powers and duties of the Department of Transportation, the Metropolitan Transportation Commission, and the Bay Area Toll Authority with respect to the collection and expenditure of toll revenue from the 7 state-owned toll bridges within the geographic jurisdiction of the commission. Existing law provides for a uniform \$3 auto toll on those toll bridges. Under existing law, this toll revenue, other than revenue from a \$1 seismic surcharge, is deposited into the Bay Area Toll Account and is controlled by the authority. Existing law requires the department and the authority to enter into a cooperative agreement that makes the department responsible for operating the bridges and for constructing improvements to the bridges financed by toll revenues. Existing law estimates the cost for seismic retrofit or replacement work on the Bay Area state-owned toll bridges at \$4,637,000,000 and identifies funding to be made available for this purpose from various sources, including imposition of a \$1 seismic surcharge. Under existing law, this surcharge revenue is deposited into the Toll Bridge Seismic Retrofit Account for expenditure by the department until completion of the seismic projects and payment of the bonds issued to finance those projects. Existing law specifies a particular single cable tower suspension replacement design for the eastern portion of the San Francisco-Oakland Bay Bridge. Existing law prescribes a specified formula for paying the maintenance costs of the Bay Area state-owned toll bridges from the State Highway Account and toll revenues.

This bill would state the Legislature's findings that the amount previously identified for seismic retrofit and replacement of the state-owned toll bridges is insufficient and would identify additional funding sources of \$3,600,000,000 for those projects, including revenues from an additional surcharge to be imposed by the authority, refinancing of existing bridge toll bonds, and various state funds, and would require a schedule to be adopted by the California Transportation Commission for allocation of those state funds. The bill would appropriate \$75 million of specified Motor Vehicle Account funds and \$125 million of other specified funds in that regard.

This bill would modify certain provisions to be enacted by AB 144 of the 2005-06 Regular Session relative to the financing of seismic repair and replacement work on Bay Area state-owned toll bridges. In the event both AB 144 and this bill are chaptered and become operative, the code sections to be added by AB 144 that are modified by this bill would become inoperative and only the modified versions of those code sections contained in this bill would become operative. Because this bill would impose certain duties on the Bay Area Toll Authority, it would thereby impose a state-mandated local program.

(2) Existing law creates the Traffic Congestion Relief Program, funded by certain sales taxes on motor vehicle fuel, and specifies the projects to be funded by that program. Existing law allows a regional or local entity that is the lead applicant for a project to apply to the California Transportation Commission for a letter of no prejudice for the project that allows the entity to spend its own funds on the project with provisions for reimbursement when state funds become available.

This bill would modify these provisions.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 376 (SB 287) Cox Design-build contracting.

Existing law requires public entities to comply with certain procedures in soliciting and evaluating bids and awarding contracts for the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement.

Existing law, until January 1, 2006, permits certain counties, with the approval of the board of supervisors, to enter into design-build contracts, as defined, in accordance with specified provisions. These provisions require that contracts with a cost ranging from \$10,000,000 to \$20,000,000 be awarded to the lowest responsible bidder, and authorizes contracts costing more than \$20,000,000 to be awarded to the lowest responsible bidder or by best value.

This bill would extend the authorization for these contracts until January 1, 2011, and would extend the authorization to contracts with costs over \$2,500,000. This bill would also add Butte, El Dorado, Fresno, Kings, Madera, Mariposa, Merced, Monterey, Orange, Placer, San Diego, San Joaquin, San Luis Obispo, Shasta, Siskiyou, Stanislaus, and Yuba Counties to those counties that may elect to use these provisions, would make legislative findings and declarations as to the necessity of a special statute for those counties, and would eliminate the dollar limitations in existing law, thereby authorizing those counties to elect to enter into design-build contracts for any project, as defined. This bill would also extend the date of certain reporting provisions that have expired by operation of law. This bill would require the Legislative Analyst, on or before January 1, 2010, to submit a report, as specified, to the Legislature on the use of design-build contracts.

This bill would incorporate additional changes in Section 20133 of the Public Contract Code, proposed by AB 1511, to be operative only if AB 1511 and this bill are both chaptered and become effective January 1, 2006, and this bill is chaptered last.

Ch. 377 (SB 477) Soto Emergency services: recovery process.

Existing law, the Disaster Assistance Act, requires that the Director of the Office of Emergency Services provide financial assistance to local agencies for public real property that is damaged or destroyed by a disaster.

This bill would authorize the office to establish a model process that would be made available to assist a community in recovering from an emergency proclaimed by the Governor and would provide that the process may consider, among other things, the role of the office as an advisor and facilitator for the community recovery process, procedures to provide that the office has representation onsite as soon as practicable after the Governor proclaims a state of emergency, the role of the office to facilitate the use of temporary services, the role of the office to facilitate the establishment of temporary structures, including local assistance centers, showers and bathroom facilities, and temporary administrative offices, and measures to encourage the participation of nongovernmental organizations in the community recovery process to supplement recovery activities undertaken by federal or local agencies.

Ch. 378 (SB 584) Soto Trespass.

Existing law makes it unlawful for persons to engage in certain acts of trespass and punishes most trespasses by a fine not exceeding \$1,000, imprisonment in a county jail for a period not exceeding 6 months, or by both that fine and imprisonment.

This bill would make it a trespass to enter or reenter a courthouse or a city, county, city and county, or state building after intentionally avoiding submission to the screening and

inspection of one's person and accessible property in accordance with the procedures being applied to control access if the building's entrances have been posted so as to give reasonable notice that prosecution may result from that act.

By creating a new crime, this bill would impose a state-mandated local program.

This bill would incorporate additional changes to Section 602 of the Penal Code proposed by SB 735 and AB 280, to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 2006, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 379 (SB 640) Escutia Child care resource and referral programs: funding.

Existing law, the Child Care and Development Services Act, provides for a system of child care and development services for children, including children with exceptional needs, by public and private child care providers. The act authorizes the establishment of child care resource and referral programs for the purpose of, among other things, providing information and referrals to child care services and assistance to child care providers.

This bill would appropriate \$5,000,000 from the funds identified in Provision 5(c) of Item 6110-196-0001 of Section 2.00 of the Budget Act of 2005 to the State Department of Education for the purpose of funding, beginning in the 2005-06 fiscal year, state-funded child care resource and referral programs and certain local planning councils for certain activities related to child care and development services with respect to serving children with disabilities. The bill would require the State Department of Education to develop an allocation plan to distribute these funds, as provided. The bill would require child care resource and referral programs or specified local planning councils interested in applying for these funds to submit a proposal to the State Department of Education for the use of the funds. This bill would require the State Department of Education, in coordination with the California Child Care Resource and Referral Network, to develop a uniform reporting process for a state-funded child care resource and referral program or local planning council to submit a one-time report on the use and effectiveness of those funds.

#### Ch. 380 (SB 706) Ortiz Insurance Commissioner: enforcement.

Existing law provides that it is unlawful to knowingly employ runners, cappers, steerers, or other persons to procure clients or patients to perform or obtain services or benefits pursuant to specified provisions of law, or to procure clients or patients to perform or obtain services or benefits under a contract of insurance or that will be the basis for a claim against an insured individual or his or her insurer. Existing law allows a district attorney, the Insurance Commissioner, or any interested person to bring a civil action for a violation of these provisions.

This bill would require, in an action brought by an interested person, that the parties serve the commissioner and the local district attorney, within a certain period, with complete copies of all settlement agreements for actions brought under these provisions. The bill would provide that, if the commissioner has brought or proceeded with an action on or after January 1, 2006, and prior to January 1, 2011, the commissioner shall be entitled to reasonable attorneys' fees and costs in addition to any judgment. The bill would require a court, if the commissioner has proceeded with an action, and if other specified conditions are met, to determine the allocation of any judgment or settlement according to a specified priority.

Existing law requires, if the district attorney or commissioner does not proceed with an action under the above provisions, that the person bringing the action or settling the claim receive an amount that the court decides is reasonable for collecting the civil penalty and damages.

This bill would require, in addition, that the person receive an amount for reasonable expenses that the court finds to have been necessarily incurred, plus reasonable attorney's fees and costs, and that these amounts be imposed against the defendant.

Existing law requires the commissioner to appoint full-time attorneys and supervisory and investigatory personnel within the fraud division of the Department of Insurance.

This bill would delete the reference to full time, and would require the commissioner, in addition, to assign staff counsel who are employed by the department and are under the supervision of the department's general counsel to advise the department's fraud division and for other specified purposes.

Existing law allows the commissioner to issue a cease and desist order, and to impose a fine in a specified amount, against any person acting as, or holding himself or herself out as, an insurance agent or broker without being so licensed, and against any person holding out that person as transacting, or transacting, the business of insurance without having been issued a certificate of authority.

This bill would revise the circumstances in which the commissioner may issue a cease and desist order for acts of this type, and would revise the amount of the fine that may be imposed, as specified. The bill would prohibit the commissioner from imposing a fine against a person who has, without a license, acted in a capacity for which a license or registration was required, or against a person who aided or abetted such a person, unless the conduct was in intentional or clearly negligent disregard of the requirement for a license or registration.

#### Ch. 381 (SB 828) Maldonado Public contracts.

Existing law imposes various requirements and prohibitions on parties that provide goods to the state under a contract. Among these requirements is a requirement that the contractor certify that it will provide a drug-free workplace, that it has not provided goods under the contract that were produced under specified prohibited labor conditions, and that, in the case of contracts for the sale or lease of covered electronic devices or cell phones, the contractor has complied with specified provisions of law. Existing law also requires, in the case of specified contracts, that the contractor provide a sworn declaration that it is not in violation of an order from the National Labor Relations Board. Existing law further requires each party, and its affiliates, that are offered a contract to do business with the state to provide a seller's permit or certificate of registration that was issued under the State Sales and Use Tax Law, as specified. Existing law also prohibits the state from contracting with an expatriate corporation, as defined. Existing law also requires every state contract and subcontract to contain a nondiscrimination clause, as provided, and further requires contractors and subcontractors to give written notice of their obligations under the clause to labor organizations, as specified.

This bill would specify that these requirements and prohibitions do not apply to a credit card purchase of goods of \$2,500 or less, as specified.

Existing law, until December 31, 2005, authorizes the Office of State Publishing to accept paid advertisements in materials printed or published by the state.

This bill would extend to an indefinite time period the authorization for the Office of State Publishing to accept paid advertisements. This bill would also require any state agency that was not authorized to accept paid advertising in its publications before the operative date of the bill to use the Office of State Publishing for all paid advertising in its publications.

#### Ch. 382 (SB 1007) Ducheny San Diego Unified Port District Act: retirement and disability benefits.

The existing San Diego Unified Port District Act establishes the San Diego Unified Port District, prescribes the powers and duties of the district, and provides for the transfer to the district of specified tidelands and lands lying under inland navigable waters in San Diego. The act requires that all employees of San Diego County or any city within the county who are performing duties in connection with the Port of San Diego or the respective harbor

departments, be considered as employees of the district, and authorizes the district to contract with the State Employees' Retirement System and provide retirement and disability benefits for employees under the State Employees' Retirement System, pursuant to its rules and regulations. The act further authorizes the district to continue, by contract, those employees of the district who are covered as members of the system of which they were members while they were employees of the respective cities.

This bill would revise those provisions governing employee retirement and disability benefits to also authorize the district to contract with any other employee retirement and disability system, or to establish an independent employee retirement and disability system pursuant to certain provisions authorizing the legislative body of a local agency to establish a pension trust funded by individual life insurance contracts, individual annuities, group policies of life insurance, or group annuities, or any combination of those.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 383 (SB 1110) Committee on Natural Resources and Water Public resources.

(1) Existing law requires an entity, as defined, proposing a project that would alter a streambed to submit prescribed plans and other information to the Department of Fish and Game and to follow prescribed procedures. Existing law provides that the Attorney General, a district attorney, or a city attorney may seek a civil penalty, within 3 years, against an entity for violating an agreement or a memorandum of understanding (MOU) allowing that entity to carry out the project that was executed before January 1, 2004.

This bill would provide that the Attorney General, a district attorney, or a city attorney has 3 years to commence an action to recover civil penalties against an entity for violating the agreement or MOU that was executed on or after January 1, 2004. The bill would also provide a 3-year statute of limitations for an action seeking a civil penalty against an entity that violates a requirement related to the alteration of a streambed.

(2) Existing law, contain specified provisions relating to the protection of Native American places, features, and objects.

This bill would make a technical nonsubstantive change in those provisions.

(3) Existing law appropriated from the Harbors and Watercraft Revolving Fund for the fiscal year 1970-71 a sum not to exceed \$150,000 to the Department of Boating and Waterways for expenditure for contract authority for the purposes of establishing economic justification, making financial and engineering feasibility determinations, and preparing those plans and cost estimates as may be necessary to justify budget proposals or appropriate expenditures, for specified boating and waterway projects.

This bill would repeal those obsolete provisions.

(4) Existing law governing public contracts requires a governmental agency or public utility that proposes a project that would divert, obstruct, or change the natural flow of, or result in the disposal of debris in, a river, stream, or lake designated by the Department of Fish and Game, to include, in any notice inviting bids on the project that specifies locations of possible materials, such as borrow pit or gravel bed, for use in the construction of that proposed project and that is subject to provisions of the Fish and Game Code regulating impacts on rivers, streams, and lakes, specified conditions or modifications, as determined by the department.

This bill would make technical and conforming changes to correct obsolete references to those provisions of the Fish and Game Code imposing limitations on projects by the use of alteration agreements executed between the department and the entity undertaking the project.

(5) Existing law relating to contracting by local agencies prohibits operators of surface mines in California, whose operations are not identified in specified lists, from selling mined material produced from a surface mining operation subject to the Surface Mining and Reclamation Act of 1975 to a local agency.

This bill would define “local agency” for those purposes. This bill would also provide that this prohibition applies to a sale of that mined material to a contractor when the contractor is acting on behalf of, or pursuant to, a contract with a local agency, or otherwise intends to use the mined material on a project of a local agency.

(6) Existing law, the Surface Mining and Reclamation Act of 1975, authorizes the State Mining and Geology Board to impose a fee of \$5 per ounce of gold and 10¢ per ounce of silver mined within the state for deposit into the Abandoned Mine Reclamation and Minerals Subaccount in the Mine Reclamation Account to be expended for specified purposes regarding abandoned mined lands. That act requires the Director of Conservation, not later than January 1 of each year, to report to the Legislature on any abandoned mine remediation projects that are proposed for the following fiscal year.

This bill would provide that fees collected pursuant to the act may also be used to remediate features of historic abandoned mines, as defined, and lands that they impact. The bill would also eliminate the reporting requirement for abandoned mine remediation projects.

(7) Existing law required that the terms of the members first appointed to the State Mining and Geology Board, the State Board of Forestry and Fire Protection and of the members of fire protection district technical committees expired on specified dates.

This bill would repeal those obsolete provisions.

(8) Existing law required the State Board of Forestry and Fire Protection, before January 1, 1975, after a public hearing, to adopt, and authorizes the board from time to time, after a public hearing, to amend permanent stocking standards applicable to commercial timberland where the growing timber does not meet certain acceptable stocking standards, as enumerated.

This bill would revise those provisions to delete the obsolete reference to the date before which the board, after a public hearing, was required to adopt those permanent stocking standards.

(9) Existing law required the State Board of Forestry and Fire Protection to adopt specified rules prior to January 1, 1976, to specify certain stocking standards to be maintained or established after timber operations on timberlands that have been substantially damaged by fire, insects, disease, wind, flood, or other substantial damage caused by an act of God, as provided.

This bill would repeal those provisions.

(10) Existing law authorizes the Director of Parks and Recreation to grant, in trust and subject to prescribed conditions, all of the rights, title, and interest of the state in specified lands to specified counties for beach, park, and recreational purposes.

This bill would authorize the director to grant, in trust and subject to specified agreement between the Department of Parks and Recreation and the County of Santa Cruz, an easement to a specified portion of Aptos Creek Road in the County of Santa Cruz.

(11) Existing law required the Director of Parks and Recreation to prepare and transmit to the Legislature, no later than January 1, 1997, a proposed plan for the development and operation of a statewide system of recreation trails.

This bill would repeal that obsolete provision.

(12) Existing law required certain local governments, districts, and the Solano County Local Formation Commission to prepare, before July 1, 1978, and to submit to the State Lands Commission, before January 1, 1979, a local protection program for the preservation of Suisun Marsh.

This bill would repeal those obsolete provisions.

(13) Existing law provides that the California Coastal Zone Conservation Commission shall give priority to local coastal programs meeting certain requirements that are within areas designated as pilot project areas by the commission between August 31, 1976, and October 31, 1976.

This bill would repeal that provision.

(14) Existing law authorizes the State Coastal Conservancy to undertake projects and award grants related to the protection and restoration of coastal watershed and coastal and marine habitat water quality that meet objectives, as specified.

This bill would authorize the conservancy to fund projects or activities if they are consistent with the California Ocean Protection Act. The bill would also authorize the conservancy to undertake projects and award grants for activities that are compatible with the preservation, restoration, or enhancement of ocean, coastal, or watershed resources, or that facilitate environmental education for the San Francisco Bay region, urban waterfronts, and other urban coastal watershed areas.

(15) Existing law required the Department of General Services and the Integrated Waste Management Board, in consultation with other affected state agencies, on or before January 1, 1991, to adopt specifications for the purchase of compost by the state, as prescribed.

This bill would delete that obsolete date on or before which the department and the board were required to adopt those specifications for the purpose of composting by the state, and would require the department and board to maintain those specifications.

(16) This bill would provide that if the City of Exeter or the City of Porterville contracts with an unincorporated disadvantaged community, as defined, for the provision of water services, the provision of water services to that community, by itself, shall not cause the city to lose any applicable exemptions to general law that the city may have before the provision of water services to that community for projects related to water services conducted within the city's boundaries.

This bill would declare that due to the special circumstances pertaining to the rural communities near the City of Exeter and the City of Porterville, a general statute within the meaning of a specific provision of the California Constitution cannot be made applicable and a special statute is necessary.

(17) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement. This bill would provide that no reimbursement is required by this act for a specified reason.

(18) This bill would also incorporate additional changes in Section 338 of the Code of Civil Procedure proposed by AB 378, to be operative only if AB 378 and this bill are both enacted and become effective on or before January 1, 2006, and this bill is enacted last.

(19) This bill would provide that the changes proposed to Sections 65352.3, 65560, and 65562.5 of the Government Code by this bill would not become operative if SB 922 is enacted and also amends those sections.

(20) The bill would provide that its provisions are severable.

#### Ch. 384 (AB 165) Dymally California State University: African American Political and Economic Institute.

Existing law establishes the California State University and its various campuses under the administration of the Trustees of the California State University. Until January 1, 2010, existing law authorizes the trustees to establish an African American Political and Economic Institute at California State University, Dominguez Hills.

Existing law expresses the intent of the Legislature that the institute be funded by grants and contributions from private sources. Existing law prohibits funds, or resources supported by funds, available to the California State University for support of its educational mission, from being redirected to support the institute. This prohibition includes General Fund moneys, funds from the California State Lottery Education Fund, student fee revenues, and reimbursements and other income that otherwise would be available for support of the educational mission of the California State University. Existing law requires that, if any of these funds, or resources supported by these funds, are utilized for the initial startup costs of the institute, those funds are to be fully reimbursed by the institute from funding subsequently received by the institute through grants and contributions from private sources.

Existing law authorizes the establishment of an advisory board to the institution only if private funds have been donated to the institute in an amount deemed by the trustees to be sufficient to defray the costs of that board.

This bill would delete the requirement that private funds in a sufficient amount to defray the costs of an advisory board to the institute be donated before that advisory board could be established. Instead, the bill would require that no fees or any other form of compensation be paid to members of the advisory board.

The bill would declare that its provisions and the provisions of existing law are not to be construed to prohibit California State University, Dominguez Hills, from seeking nonpublic funds to support the institute.

#### Ch. 385 (AB 316) Nakanishi Contractors.

(1) Under existing law, the disassociation of any qualifying partner, responsible managing officer, or responsible managing employee from a license that has been referred to arbitration does not relieve the qualifying partner, responsible managing officer, or responsible managing employee from responsibility for complying with an award rendered as a result of an arbitration referral.

This bill would instead require a disassociated qualifying partner, responsible managing officer, or responsible managing employee to comply with an arbitration award rendered as a result of acts or omissions committed while acting as the qualifying partner, responsible managing officer, or responsible managing employee.

(2) Existing law provides for the licensing and regulation of contractors by the Contractors' State License Board. Existing law, operative January 1, 2006, requires that a home improvement contract, as defined, and any changes to the contract be in writing, signed by the parties, legible, and readable. Existing law also requires a contractor to provide a buyer with a copy of a home improvement contract and it also specifies that a change-order form will be incorporated into the contract if certain requirements are satisfied.

This bill would require that a home improvement contract and any changes to the contract comply with additional specified requirements, including, but not limited to, the inclusion of a notice stating that the owner or tenant has the right to require the contractor to have a performance and payment bond. The bill would provide that a violation of these provisions subjects a licensee, his or her agent or salesperson, or a person subject to be licensed to discipline.

(3) Existing law, operative January 1, 2006, defines a "service and repair contract" as an agreement between a contractor or salesperson for a contractor and a homeowner or a tenant that meets specified requirements.

This bill would revise and recast these requirements and would also set forth information, notices, and disclosures required to be included as part of the contract. The bill would also make a "service and repair contract" that does not meet specified conforming requirements subject to the requirements applicable to a home improvement contract regardless of the aggregate contract price.

#### Ch. 386 (AB 322) Oropeza Athletes' Bill of Rights.

Existing law, the Sex Equity in Education Act, states the policy of the state that elementary and secondary school classes and courses, including nonacademic and elective classes and courses, be conducted without regard to the sex of the pupil enrolled in these classes or courses. Existing federal law, known as Title IX, prohibits a person, on the basis of sex, from being excluded from participation in, being denied the benefits of, or being subject to, discrimination under any education program or activity receiving federal financial assistance.

This bill would enact the Athletes' Bill of Rights and would enumerate the rights available to a pupil relating to gender equity in athletics. The bill would require the State Department of Education, by July 1, 2006, to post these rights on its Web site.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Ch. 387 (AB 382) Chan Industrial development authorities: bonds.

Existing law, the California Industrial Development Financing Act, provides for the creation of industrial development authorities in a city, county, city and county, or redevelopment agency. Under the act, an authority may issue revenue bonds, with their proceeds being used to finance the acquisition, construction, or rehabilitation of facilities providing specified benefits. The act terminates the authority's power to undertake projects through the issuance of bonds on or after January 1, 2006, absent a statute changing that date.

This bill would repeal this termination provision thereby indefinitely extending an authority's power to undertake projects through the issuance of bonds.

Ch. 388 (AB 403) La Malfa Hazardous materials unified program agency: minor violation business plans: propane.

(1) Existing law requires the Secretary for Environmental Protection to adopt regulations and implement a unified hazardous waste and hazardous materials management regulatory program. A city or local agency that meets specified requirements is authorized to apply to the secretary to implement the unified program, and every county is required to apply to the secretary to be certified to implement the unified program as a Certified Unified Program Agency (CUPA).

Existing law defines the term "minor violation," for purposes of the unified program and repeals this definition on January 1, 2006. Existing law requires an authorized representative of the unified program agency (UPA), who, in the course of conducting an inspection, detects a minor violation, to issue a notice to comply detailing the violation and provides that a false certification that a violation has been corrected is punishable as a misdemeanor. Existing law provides that a notice to comply is the only means by which a UPA may cite a minor violation and repeals the provision requiring the enforcement of minor violations in this manner on January 1, 2006.

This bill would delete the repeal of the definition of the term "minor violation" and the repeal of the provisions requiring the enforcement of minor violations, thereby continuing the effect of those provisions indefinitely and imposing a state-mandated local program by imposing new duties upon local agencies and creating a new crime.

(2) Under existing law, businesses are required to have response plans for releases of specified hazardous materials and provide an annual inventory of hazardous materials handled to the administering agency, as specified..

This bill would exempt, from those hazardous materials business plan requirements, is the onpremise use, storage, or both, of propane, in a specified amount and for a specified purpose, unless the administering agency makes a certain finding, thereby imposing a state-mandated local program by imposing a new duty upon administering agencies.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 389 (AB 404) Leno Bail licenses: continuing education.

Existing law provides the licensing and education requirements for obtaining and maintaining a bail license. Existing law directs that professional organizations must provide education for licensure under this provision, and that education providers must consult with the California District Attorneys Association, California State Sheriffs' Association, the California Advisory Board of Surety Agents, and the California Bail Agents Association prior to submitting course outlines for approval. Further, existing law specifies the punishment for noncompliance with these provisions.

This bill would delete the above references to the California Advisory Board of Surety Agents and the California Bail Agents Association and add the County Counsels Association

of California. The bill would require education providers to be approved by the Insurance Commissioner every 2 years.

This bill would also specify that completion of bail agent continuing education requirements through Internet or correspondence instruction is permitted, and would provide that successful completion of these requirements through instruction of this type requires obtaining a passing grade of at least 70% on a written final examination, as specified. The bill would prohibit an Internet or correspondence continuing education course from being offered prior to April 1, 2006.

Existing law requires the Insurance Commissioner to require the payment of various fees by preclicensing or continuing education providers in connection with specified courses.

This bill would allow the commissioner to adopt regulations that include a schedule establishing fees to be paid by an applicant seeking approval to act as a provider and to deliver courses under these provisions. It would require that those fees be no greater than fees paid by applicants providing similar courses to other insurance agents licensed by the Department of Insurance, as specified.

Ch. 390 (AB 420) Shirley Horton Teachers: alternative language assessments: Filipino language.

Existing law requires the adequacy of subject matter preparation and the basis for assignment of certified personnel in public schools to be determined by the successful passage of a subject matter examination, as specified.

Existing law authorizes the Commission on Teacher Credentialing to establish guidelines for accepting assessments performed by organizations, as specified, to determine the adequacy of that preparation in languages for which there is no adequate examination.

This bill, instead, would authorize the commission to establish guidelines for alternative assessments performed by organizations, as specified, to determine the adequacy of that preparation in languages for which there is no adequate examination, and would require the commission to submit an expenditure plan for the development of a subject matter examination in the Filipino language to the Department of Finance no later than January 8, 2006. The bill would require the commission, upon approval of that plan, as specified, and subject to an appropriation in the Budget Act of 2006 for this purpose, to contract with another entity for that entity to develop, for certification by the commission, a subject matter examination in the Filipino language, to be administered no later than September 1, 2008.

Ch. 391 (AB 451) Yee Local sales tax: jet fuel: place of sale.

The Bradley-Burns Uniform Local Sales and Use Tax Law authorizes counties and cities to impose sales and use taxes pursuant to the adoption of local ordinances. That law provides, for purposes of applying a local sales tax imposed under that law to sales of jet fuel, that the point of sale of that jet fuel is the point of delivery of the jet fuel to the aircraft if, both the principal negotiations for that sale are conducted in this state, and the retailer of that jet fuel has more than one place of business in this state.

This bill would provide that, effective January 1, 2008, the point of sale of jet fuel is the point of delivery of that jet fuel to the aircraft.

Ch. 392 (AB 459) Oropeza Transfer of real property: disclosure of supplemental property taxes.

Existing law requires certain disclosures to be made upon the transfer of residential property and prescribes the manner and form of the disclosures. Among others, the seller of residential property subject to a continuing lien securing the levy of special taxes pursuant to the Mello-Roos Community Facilities Act, or a fixed lien assessment collected in installments to secure bonds issued pursuant to the Improvement Bond Act of 1915, is required to make a good faith effort to obtain a disclosure notice concerning the tax assessment from each local agency that levies the tax or collects the assessment, on the

property being transferred, and to deliver it to the prospective purchaser, as long as the notices are made available by the local agency.

This bill would make it the sole responsibility of the seller of residential property, or his or her agent, in addition to any other disclosures required, to deliver to the prospective purchaser a disclosure notice containing specified information about supplemental property tax assessments. The bill would further require that notice be included in the notice of intention that is filed with the Department of Real Estate by a person who intends to offer subdivided lands for sale or lease.

The bill would incorporate additional changes in Section 11010 of the Business and Professions Code proposed by SB 655, to be operative only if SB 655 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

#### Ch. 393 (AB 488) Bermudez Optometry.

Existing law, the Optometry Practice Act, licenses and regulates the practice of optometry by the State Board of Optometry, and makes a violation of the act a crime. Existing law requires licensed optometrists who fit or supply a patient with lenses to provide the patient with a receipt.

This bill would instead require optometrists to provide a receipt to patients making a specified payment to the practice and it would also revise the information that is required on the receipt. The bill would authorize the board to issue a probationary license to an applicant, subject to specified terms and conditions.

Existing law sets forth acts that constitute unprofessional conduct and acts that are unlawful, and authorizes the board to take specified action against licensees.

This bill would revise and recast provisions relating to unprofessional conduct. The bill would authorize the Attorney General to prosecute a licensee for unprofessional conduct under the Administrative Procedure Act.

Existing law authorizes the board to establish various fees and penalties related to the practice of optometry. Existing law requires the board to submit a report to certain committees of the Legislature whenever the board increases a fee.

This bill would delete the reporting requirement. The bill would also make various changes to those fees.

The bill would make related changes.

#### Ch. 394 (AB 758) Calderon Construction contracts: indemnity.

Existing law provides that, except as specified, agreements affecting any construction contract that purport to indemnify the promisee against liability for damages for death or bodily injury to persons, injury to property, or any other loss, damage, or expense arising from the sole negligence or willful misconduct of the promisee or the promisee's agents, servants, or independent contractors who are directly responsible to the promisee, or for defects in design furnished by those persons, are against public policy and are void and unenforceable.

This bill would provide that, except as specified, all agreements affecting any residential construction contract and amendments thereto entered into after January 1, 2006, that purport to indemnify the builder by a subcontractor against liability for claims of construction defects or other injury to property arising from, pertaining to, or relating to the negligence of the builder or the builder's other agents, servants, or independent contractors who are directly responsible to the builder, or for defects in design furnished by those persons, or for claims that are unrelated to the scope of work in the agreement, are unenforceable, as specified.

#### Ch. 395 (AB 817) Matthews Insurance.

Existing law provides for the establishment of the California Insurance Guarantee Association, managed by a board of governors, in which each insurer admitted to transact

any specified class of insurance in this state is required to participate. Existing law provides that the purpose of the association is to provide each member insurer insolvency insurance. Existing law defines certain terms with respect to these provisions.

This bill would expand the definition of “covered claims” to include the obligations of an insolvent insurer to indemnify a permissibly self-insured employer for its liability to pay workers’ compensation benefits, as specified.

Existing law provides that in order to detect and prevent member insurer insolvencies, the board may make recommendations to the Insurance Commissioner and prepare and submit a report to the commissioner on the history and causes of any member insurer insolvency in which the association was obligated to pay covered claims, as specified.

This bill would provide that the board may request the Self-Insurers’ Security Fund to prepare, and that the fund may provide, a report identifying the aggregate amount of liability under all specific excess workers’ compensation policies as reported by the private self-insured employers, as specified.

#### Ch. 396 (AB 843) Nunez Tax preparers.

Existing law requires a tax preparer to maintain a bond in favor of, and payable to, the people of the State of California, for each individual preparing tax returns for another person. Existing law requires a tax preparer to provide a customer with certain information in writing prior to rendering any tax preparation services. A willful violation of the laws regulating tax preparers is a crime.

This bill would prohibit a tax preparer who advertises the availability of a refund anticipation loan from representing the loan as a client’s actual refund. The bill would require a tax preparer that offers to facilitate, or who facilitates, a refund anticipation loan to a client to display a specified fee schedule. The bill would require a tax preparer that offers to facilitate a refund anticipation loan to provide the client with a specified written disclosure prior to the client’s completion of the refund anticipation loan application. The bill would also require a tax preparer to provide the client with specified information, in either written or electronic form, prior to the client’s consummation of the refund anticipation loan transaction.

Because a violation of the bill’s requirements would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 397 (AB 873) Bogh Fire insurance: copies of policy.

Existing law generally regulates fire insurance.

This bill would require an insurer, after a covered loss under a fire insurance policy, to provide the insured with a free copy of his or her policy within 30 calendar days of receiving a request from the insured. It would allow the Insurance Commissioner to extend this period. The bill would provide that an insured who does not experience a covered loss shall, upon request, be entitled to one free copy of his or her policy annually.

#### Ch. 398 (AB 911) Chu Taxation: tax amnesty programs: administration.

Existing law authorizes the State Board of Control to discharge any state agency or employee from accountability for the collection of taxes, licenses, fees, or money if the debt is uncollectible or the amount of the debt does not justify the cost of its collection. Existing law authorizes a state agency not to collect these moneys if the amount involved is \$250 or less and the amount owed is uncollectible or does not justify the cost of collection.

This bill would allow the Franchise Tax Board, in addition to its existing authority to place certain taxpayer debts into inactive status, to extinguish an outstanding liability for the

payment of any tax, license, fee, or other money deemed uncollectible that is due and owing to the state, if certain conditions are met.

Under existing tax law, once a tax liability becomes due and payable, a statutory lien arises for that amount upon all real and personal property belonging to that taxpayer, but no statute of limitations exists on the collection of an income or franchise tax delinquency.

This bill, for tax liabilities that are due and payable, as defined, before, on, or after July 1, 2006, would establish a statute of limitations on collections of those liabilities to limit the collection period to 20 years beginning from the last statutory lien date for each taxable year, and would extinguish that liability for that taxable year by abating the underlying tax.

Existing law imposes specified taxes, including sales and use taxes that are administered by the State Board of Equalization, and personal income and corporate taxes collected and administered by the Franchise Tax Board and requires the State Board of Equalization and the Franchise Tax Board to administer tax amnesty programs during the period beginning February 1, 2005, and ending on March 31, 2005, inclusive, or during any other 2-month period ending before June 30, 2005, as provided. Existing tax laws allow a waiver of a taxpayer's unpaid penalties and fees if the taxpayer satisfies specific criteria, including a payment of all taxes due within a specified period, and provide for the imposition of a penalty and the revocation of that waiver if the taxpayer fails to pay any tax due for the 2005 and 2006 taxable years, as provided.

This bill would repeal the imposition of the penalty and the revocation of the waiver of penalties and fees under the Personal Income Tax and Corporation Tax Laws, as provided. This bill would also make various technical changes to the tax amnesty provisions under those laws.

Under existing tax laws, certain taxpayers are subject to a 50% amnesty penalty, which is an amount equal to 50% of the accrued underpayment interest payable for a specified period, if they have a balance due either on or after March 31, 2005, as provided. The Sales and Use Tax Law relieves a person of that 50% interest penalty if the failure to pay the tax under the amnesty program was due to reasonable cause or circumstances beyond the taxpayer's control, but it disallows any refund of that penalty.

This bill would delete the provisions that disallow a refund in those circumstances.

The Personal Income Tax and Corporation Tax Laws generally provide that an overpayment made by a taxpayer for any taxable year may be credited against the taxpayer's deficiency for any other taxable year, as specified, but do not allow a taxpayer to offset underpayments for taxable years eligible for amnesty with overpayments for other taxable years for purposes of reducing the amnesty penalty.

This bill, for purposes of computing amnesty penalties imposed on a taxpayer after March 31, 2005, would permit the taxpayer to offset an underpayment for taxable years eligible for amnesty with an overpayment for other taxable years, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 399 (AB 967) Canciamilla Concurrent enrollment of pupils in high school and community college.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state.

Existing law authorizes the governing board of a school district to authorize pupils, with parental permission, who would benefit from advanced scholastic or vocational work, to attend community college as special part-time students to undertake one or more courses of instruction at the community college level, in order to provide educational enrichment opportunities for a limited number of eligible pupils.

Existing law prohibits a principal from recommending, for any particular grade level, for community college summer session attendance, more than 5% of the total number of pupils who completed that grade immediately prior to the time of recommendation.

This bill would exempt from this 5% a pupil recommended by his or her principal for enrollment in a college-level advanced scholastic summer session course, or in a vocational community college summer session course, if specified criteria are met. The bill would require the Chancellor of the California Community Colleges, on or before January 1, 2007, and on or before January 1 of each year thereafter, to report to the Department of Finance the number of pupils recommended pursuant to that exemption who enroll in community college summer session courses. The bill would prohibit the Board of Governors of the California Community Colleges from including enrollment growth attributable to that exemption as part of its annual budget request for the California Community Colleges.

Existing law also authorizes a parent or guardian of a pupil to petition the governing board of the school district in which the pupil is enrolled to authorize the attendance of the pupil at a community college as a special full-time student on the ground that the pupil would benefit from advanced scholastic or vocational work that would be made available at a community college.

The bill would require the governing board of a community college district to assign a low enrollment priority to special part-time or full-time students in order to ensure that these students do not displace regularly admitted students.

#### Ch. 400 (AB 1031) Niello Vehicles: inspection of terminals.

Existing law requires the Department of the California Highway Patrol to inspect, at least every 25 months, every terminal of a motor carrier, as defined, that directs the operation of or maintains a commercial vehicle in this state, as specified. Existing law makes it unlawful for a motor carrier to operate specified vehicles without the required inspection of a terminal having been performed and the corresponding compliance report having been issued to the motor carrier.

This bill would make it unlawful for a motor carrier to contract or subcontract with, or otherwise engage the services of, another motor carrier, unless the contracted motor carrier provides certification of compliance with the requirement for inspection of a terminal.

To the extent that under existing law a violation of this provision is a crime, this bill would impose a state-mandated local program by expanding the scope of that crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 401 (AB 1081) Matthews Sherman Food, Drug, and Cosmetic Law: bottled or vended water.

Existing law, the Sherman Food, Drug, and Cosmetic Law, requires the State Department of Health Services to regulate the manufacture, sale, labeling, and advertising activities related to food, drugs, devices, and cosmetics in conformity with the federal Food, Drug, and Cosmetic Act. A violation of these provisions is a crime. Existing law requires each person upon first engaging in the food production business to register with the department and pay the required registration fee, and until January 1, 2006, a related surcharge.

This bill would increase the related inspection fees and would increase related criminal penalties for violations, including, but not limited to, penalties for intentional adulteration. The bill would extend the surcharge authority until January 1, 2011, and would make conforming changes. By changing the definition of a crime, this bill would impose a state-mandated local program.

Existing law prohibits operation of a water-bottling plant, source, or distributor without a license issued by the department and authorizes the department to charge related licensing fees.

This bill would provide that the fees are to be deposited in the Food Safety Fund to be used upon appropriation by the Legislature for the purposes of the program, and would make conforming changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 402 (AB 1136) Dymally Pupil retention block grants.

(1) Existing law authorizes the governing board of a school district and a charter school to offer programs of direct, systematic, and intensive supplemental instruction to pupils enrolled in grades 2 to 6, inclusive, who have been identified as having a deficiency in mathematics, reading, or written expression, as specified, or as being at risk of retention. Existing law authorizes the governing board of a school district and a charter school to offer supplemental instructional programs in mathematics, science, or other core academic areas, as designated, and provides that the maximum entitlement of a school district or charter school for reimbursement for pupil hours of attendance in the supplemental instructional programs shall be calculated pursuant to a formula that is based on 5% of the total enrollment of the school district or charter school for the prior fiscal year multiplied by a specified hourly rate. Existing law makes these authorizations inoperative on July 1, 2005, and repeals them on January 1, 2006.

Existing law establishes a pupil retention block grant, that, commencing with the 2005–06 fiscal year, requires the Superintendent to apportion funds to a school district in the same relative statewide proportion that the school district received in the 2003–04 fiscal year for those programs, among others.

This bill would require adjustment of apportionment for changes in program participation by school districts in the 2004–05 fiscal year. This bill would also delete the inoperative and repeal dates, extending the operation of provisions relating to those programs indefinitely.

(2) Existing law requires the State Department of Education to make an initial allocation of 75% of the allocation for a school district of block grant funds, and to make the remaining portion of the allocation only after supplemental instructional programs for pupils enrolled in grades 7 to 12, inclusive, who do not demonstrate sufficient progress toward passing the high school exit examination, and programs of direct, systematic, and intensive supplemental instruction to pupils enrolled in grades 2 to 9, inclusive, who have been recommended for retention or who have been retained, have been fully funded, as specified.

This bill would delete the requirement that the department retain the balance of block grant funds until supplemental instructional programs for pupils enrolled in grades 7 to 12, inclusive, who do not demonstrate sufficient progress toward passing the high school exit examination, and programs of direct, systematic, and intensive supplemental instruction to pupils enrolled in grades 2 to 9, inclusive, who have been recommended for retention or who have been retained, have been fully funded.

(3) Existing law requires a school district that received pupil retention block grant funds for dropout prevention and recovery programs in the 2003–04 fiscal year to maintain at least the same number of outreach consultants in the 2004–05 fiscal year. Existing law requires a school district to place consultants 1st in schools that have the highest percentages of pupils eligible for the federal free and reduced price lunch program.

This bill would require a school district that received funds for dropout prevention and recovery programs in the 2004–05 fiscal year to maintain at least the same number of outreach consultants in the 2004–05 fiscal year. The bill would require a school district to place consultants 1st in schools that have at least 50% of pupils eligible for the federal free

and reduced price lunch program and that are eligible for specified funding under the federal No Child Left Behind Act of 2001.

(4) Existing law requires a school district and school that submit a school-based motivation and maintenance program plan pursuant to specified provisions of law to include a description of the manner in which it will utilize outreach consultants, as specified. Existing law makes those provisions inoperative on July 1, 2005, and repeals them on January 1, 2006.

This bill would delete the inoperative and repeal dates, extending the operation of those provisions indefinitely.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 403 (AB 1142) Dymally HIV/AIDS: African-Americans: statewide initiative.

Existing law makes provision for programs relating to treatment of persons with the human immunodeficiency virus (HIV) and the acquired immunodeficiency syndrome (AIDS). Under existing law, the Office of AIDS in the State Department of Health Services is the lead agency within the state responsible for coordinating state programs, services, and activities relating to HIV and AIDS, and AIDS-related conditions (ARC).

This bill would establish a Statewide African-American Initiative to address the disproportionate impact of HIV/AIDS on the health of African-Americans by coordinating prevention and service networks around the state and increasing the capacity of core service providers. The initiative would be implemented in 5 designated regions. The bill would establish the responsibilities and duties of the initiative. The bill would establish requirements for the office with respect to the initiative. The bill would require, until January 1, 2008, the initiative to be housed at the Office of AIDS, and by January 1, 2008, the initiative to establish itself as an independent nonprofit organization. The bill would provide that its requirements shall only be implemented after the Department of Finance makes a determination that nonstate funds in an amount sufficient to fully support the activities of the initiative have been deposited with the state, and thereafter only to the extent that nonstate funds are received for the purposes of the bill.

Ch. 404 (AB 1249) Blakeslee Waste tire facility permit.

Under existing law, the California Integrated Waste Management Board, in consultation with the State Fire Marshal and the State Department of Health Services, is required to adopt emergency regulations setting forth procedures and requirements necessary to obtain a major waste tire facility permit. Existing law specifies the content of regulations for a major waste tire facility permit.

This bill would, instead, require the board, in consultation with the Office of Environmental Health Hazard Assessment, to adopt those regulations. The bill would require the State Fire Marshal, in consultation with the board, to adopt fire prevention regulations for a major waste tire facility. The bill would require the major waste tire facility permit regulations to include by reference the fire prevention regulations adopted by the State Fire Marshal. The bill would make related and technical, nonsubstantive changes.

Ch. 405 (AB 1311) Committee on Labor and Employment Labor standards: enforcement hearings.

Existing law authorizes the Labor Commissioner to investigate employee complaints and to provide for a hearing in any action to recover wages, penalties, and other demands for compensation and to determine all matters arising under his or her jurisdiction. Existing law requires that, when one of these hearings is set, a copy of the complaint, together with a notice of time and place of the hearing, shall be served on all parties, personally or by certified mail. Existing law provides that, following an order, decision, or award in one of these hearings, the commissioner shall serve a copy of the decision on the parties personally or by first-class

mail. Existing law provides a separate set of rules for valid service of a summons in a civil action, including a rule permitting service by leaving a copy of the summons and complaint at the home or office of the person being served, as specified, and thereafter mailing a copy of the summons and complaint to the person at the place where a copy of the summons and complaint were left.

This bill would additionally permit the service of the complaint, notice, or decision relating to one of these labor hearings to be served as provided in the rule permitting service of a summons in a civil action by leaving a copy at the home or office of the person being served, and thereafter mailing a copy to the person at the place where a copy was left.

This bill would incorporate additional changes in Section 98 of the Labor Code proposed by AB 879 that would become operative only if AB 879 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

#### Ch. 406 (AB 1317) Ruskin Environmental laboratories.

Existing law requires a laboratory that performs analysis for regulatory purposes of drinking water, wastewater, air, hazardous waste, and contaminated soils or sediments to obtain certification by the State Department of Health Services or, in the alternative, if appropriate, to obtain accreditation under the National Environmental Laboratory Accreditation Program (NELAP).

This bill would repeal, recast, and reenact certain of those provisions.

Among other things, the bill would authorize the department to offer both state accreditation and NELAP accreditation. The bill would set forth the duties and responsibilities of the department in accrediting and monitoring environmental laboratories, and would authorize the department to adopt regulations.

#### Ch. 407 (AB 1318) Evans County officers: public administrators.

(1) Existing law authorizes the boards of supervisors of specified counties to provide, by ordinance, that the public administrator be appointed by the board. Existing law also authorizes the boards of supervisors of specified counties, by ordinance, to appoint the same person to the offices of public administrator, veteran service officer, and public guardian.

This bill would include Sonoma County within those counties whose boards of supervisors are authorized to provide for the appointment of the public administrator by the board and within those counties whose boards of supervisors are authorized to appoint the same person to the offices of public administrator, veteran service officer, and public guardian.

(2) Existing law authorizes the board of supervisors, by ordinance, to consolidate the duties of certain county offices. Existing law requires the county surveyor to be elected unless the board of supervisors of the county provide for the surveyor's appointment by ordinance.

This bill would authorize the board of supervisors, by ordinance, to consolidate the duties of the county surveyor and the Director of Transportation. The bill would specify that for Solano County, the county surveyor is not an elected position and may be appointed by the Director of Transportation if the board of supervisors have so provided for that appointment by ordinance and the surveyor, if so appointed, would serve at the will of the director.

This bill would authorize the Sonoma County Board of Supervisors and the Tulare County Board of Supervisors, by ordinance, to consolidate the duties of the offices of Auditor-Controller and Treasurer-Tax Collector into the elected office of Auditor-Controller-Treasurer-Tax Collector.

(3) This bill would incorporate additional changes in Section 24011 of the Government Code, proposed by SB 282, to be operative only if SB 282 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

Ch. 408 (AB 1356) Berg Department of Forestry and Fire Protection: cooperative agreements: fire suppression.

(1) Existing law prohibits personnel or equipment from being assigned to any location or pursuant to a cooperative agreement if the assignment would not meet policy and standards established by the State Board of Forestry and Fire Protection, that are designed to meet specified objectives, including, among other things, that the striking force and efficiency of the Department of Forestry and Fire Protection in its primary mission of wild land fire protection will not be reduced or impaired.

This bill would revise that objective to specify that the striking force and efficiency of the department in its primary mission of wild land fire protection, as well as response to major fires or other natural disasters will not be reduced or impaired.

(2) Existing law requires the normal assignment of fire resources of the Department of Forestry and Fire Protection to southern California during periods of critical fire weather conditions or during major wild land fires to not be impaired and to receive priority over agreements with counties.

This bill would extend that requirement to the normal assignment of fire resources throughout California rather than just to southern California.

(3) Existing law authorizes the Director of Forestry and Fire Protection, with the approval of the Department of General Services, to enter into a cooperative agreement with a county or special district for the purpose of preventing and suppressing forest fires or other fires within any county or special district that so requests under those terms and conditions that the director deems wise.

This bill would also authorize the director to enter into those cooperative agreements with a person, firm, association, corporation, or other political subdivision of the state for the purpose of preventing and suppressing fires.

(4) Existing law prohibits the director from entering into or renewing a cooperative agreement pursuant to those provisions in specified circumstances.

This bill would revise the circumstances under which the director is prohibited from entering into or renewing a cooperative agreement, as provided.

(5) Existing law requires that a cooperative agreement provide, for a specified cost apportionment and for the efficient utilization of necessary fire prevention and suppression-related equipment, personnel, and buildings that are located in or immediately adjacent to the state responsibility area during that period of the year commonly designated as the "nonfire season."

This bill would revise those provisions and would require the cooperative agreement to include a provision relating to the staffing level on all fire prevention and suppression vehicles.

Ch. 409 (AB 1390) Jones Housing.

(1) Existing law requires a redevelopment agency to use at least 20% of its tax increment revenues for the purposes of increasing, improving, and preserving the community's supply of low- and moderate-income housing available at affordable cost to persons and families of low or moderate income and lower, very low, and extremely low income households that are occupied by these persons and families unless the agency makes certain findings.

Existing law makes a redevelopment agency liable for all court costs and plaintiff's attorney's fees, and requires the agency to allocate not less than 25% of its tax increment revenues to its Low and Moderate Income Housing Fund every year if a court determines that an agency knowingly misrepresented any material facts regarding the community's share of its regional housing need for low- and moderate-income housing or the community's production record in meeting its share of the regional housing need.

This bill would require an action to compel compliance with these provisions to be commenced within 10 years of the alleged violation and would provide that the cause of action for a violation accrues on the last day of the fiscal year in which the funds were required

to be deposited in the Low and Moderate Income Housing Fund or, in the case of a violation regarding the improper use of the funds, on the date of the actual expenditure of the fund. The bill would require an agency found to have deposited less into the Low and Moderate Income Housing Fund than mandated by law or to have spent moneys from the Low and Moderate Income Housing Fund for purposes other than increasing, improving, and preserving the community's supply of low- and moderate-income housing, as mandated by law, to repay the fund with interest in one lump sum with certain exceptions.

(2) Existing law requires dwelling units housing persons and families of low and moderate income that are destroyed or removed from the low- and moderate-income housing market as part of a redevelopment project to be rehabilitated, developed, or constructed. Existing law makes the required number of those new or rehabilitated dwelling units contingent on whether those units are developed by the agency or by public or private entities or persons other than the agency.

Existing law defines "substantially rehabilitated dwelling units" for purposes of this requirement as including all units substantially rehabilitated with agency assistance and before January 1, 2002, includes substantially rehabilitated multifamily rented dwelling units with one or 2 units that are substantially rehabilitated with agency assistance. Existing law also defines "substantial rehabilitation" as meaning rehabilitation that value of which constitutes 25% of the after rehabilitation value of the dwelling, inclusive of the land value. Existing law repeals these definitions on January 1, 2006.

This bill would delete the repeal of the definition of "substantially rehabilitated dwelling units" and "substantial rehabilitation."

#### Ch. 410 (AB 1435) Evans Court facilities.

(1) Existing law specifies the duties and salary and benefit requirements for official phonographic reporters and official reporters pro tempore of the Mendocino County Superior Court.

This bill would delete those provisions relating to salary and benefit requirements.

(2) Under existing law, if responsibility for court facilities is transferred from a county to the Judicial Council, the county is relieved from the responsibility of providing those facilities. Existing law also specifies that this provision does not relieve a county of its obligation to make certain county facilities payments.

This bill would revise an erroneous cross-reference contained in those provisions.

(3) Existing law establishes a State Court Facilities Construction Fund, and specifies that the authority for certain penalties and filing fees expires proportionally as of the date of the transfer of responsibility for facilities from the county to the Judicial Council, except as specified.

This bill would instead provide that the authority for those penalties and filing fees expires proportionally on the June 30th following the date of transfer of responsibility.

(4) Under existing law, the Judicial Council is responsible for disposing of surplus court facilities following the transfer of those facilities from the counties to the Judicial Council. The Judicial Council is required to consult with the transferring county concerning the disposition of a surplus facility.

This bill would require the Judicial Council, when requested by the transferring county, to offer a surplus facility to that county at fair market value prior to offering the facility to any other state agency or other local government agency.

(5) Existing law authorizes the board of supervisors of any county to establish in the county treasury a Courthouse Construction Fund into which penalties collected by the counties on fines for criminal offenses are deposited for the purpose of assisting the county in the acquisition, rehabilitation, construction, and financing of courtrooms or of a courtroom building or buildings containing facilities necessary or incidental to the operation of the justice system. Existing law requires counties to make reports to the Administrative Office of the Courts and to the Department of Finance accounting for the receipt and

expenditure of these funds, as specified, and provides that funds used for purposes other than ones specifically permitted must be repaid.

This bill would authorize moneys in the Courthouse Construction Fund to also be used for the purpose of assisting the county in the acquisition, rehabilitation, construction, and financing of court facilities. This bill would specify that certain of the changes it makes are declarative of existing law and would require that these provisions be used to make determinations regarding whether the funds described above were used for authorized purposes. The bill would require the Judicial Council to submit a report on county receipts and expenditures in connection with these funds to the Legislature on or before January 1 of each year.

Ch. 411 (AB 1460) Umberg Subdivisions: release of performance security.

(1) The Subdivision Map Act and local ordinances authorize or require, under specified circumstances, the furnishing of specified types of security with respect to the performance of various acts or agreements subject to the act. The act also requires that security given for faithful performance of any act or agreement be released upon the performance of the act or final completion and acceptance of the required work.

This bill would, until January 1, 2011, establish procedures for the release of performance security, as specified, that would provide that a public entity, upon written notice from the subdivider, would have 45 days to review and comment or approve the completion of the required work. If the public entity does not agree that all work has been completed, the public entity would be required to supply a list of all remaining work to be completed by the subdivider.

The bill would require the subdivider, within 45 days of receipt of the list, to provide cost estimates to the public entity for all remaining work and the public entity would have 45 days to review, comment and approve, modify, or disapprove those cost estimates. Upon approval of the list and the cost estimate, the public entity would be required to release all performance security except for 200% of the cost estimate of the remaining work. The bill would also establish procedures for a partial release of performance security.

The bill would provide that the subdivider is entitled to a written statement of completion upon completion and acceptance of all remaining items by the public entity within 45 days. Within 45 days of the issuance of the written statement of completion, the release of the remaining performance security shall be placed on the agenda of the next meeting of the legislative body of the public entity for approval, or within 60 days, if the public entity delegates the authority to release the performance security to a public official or other employee. By increasing the duties of local public officials, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 412 (AB 1661) Jerome Horton Financial guaranty insurance.

Existing law generally regulates financial guaranty insurance. Existing law defines financial guaranty insurance to mean specified kinds of bonds, insurance policies, or indemnity contracts, and any similar guaranty, under which loss is payable upon proof of financial loss as a result of certain events, including the failure of an obligor under a debt instrument or other monetary obligation to pay specified sums when due as a result of a financial default or insolvency.

This bill would provide, in addition, that financial guaranty insurance may guaranty any other failure of a payment source to make payment if the payment source is investment grade.

The bill would generally revise and recast the provisions of law regulating financial guaranty insurance, including provisions regulating the investments of financial guaranty insurers, the reserves required to be maintained by these insurers, the obligations they may guaranty, the losses to which they are exposed, mandatory policy provisions, and reinsurance.

Ch. 413 (AB 1663) Jones Capitol Area Plan: construction of facilities.

Existing law authorizes the Director of General Services to purchase, exchange, or otherwise acquire real property and construct facilities, including any improvements, betterments, and related facilities, within the jurisdiction of the Capitol Area Plan in the City of Sacramento, with the total authorized scope consisting of approximately 1,400,000 gross square feet of office space on specified parcels of state-owned land, subject to specified criteria.

This bill would additionally authorize the project to include residential development and additional commercial space, subject to specified conditions.

Ch. 414 (AB 1734) Koretz Private employment: meal periods.

Existing law requires employers to provide meal periods to employees during work periods of specified duration.

This bill would exempt from the meal period requirement certain employees in the motion picture and broadcasting industries who are covered by a valid collective bargaining agreement that contains specified terms.

Ch. 415 (AB 1760) Committee on Insurance Insurance.

(1) Existing law requires the Insurance Commissioner to ensure that the Bureau of Fraudulent Claims aggressively pursues all reported incidents of probable workers' compensation fraud and forwards to the appropriate disciplinary body the names of individuals, licensed as specified, who are suspected of engaging in fraudulent activity.

This bill would include persons who are licensed under the Chiropractic Initiative Act in these provisions.

Existing law requires an insurer or other specified person, upon written request of an authorized governmental agency, to release to the agency certain information in connection with motor vehicle theft, motor vehicle insurance fraud, or workers' compensation insurance fraud. Existing law defines "authorized governmental agency" for these purposes.

This bill would include any licensing agency governed by the Chiropractic Initiative Act in the definition of authorized governmental agency.

(2) Existing law requires the Insurance Commissioner to, by June 1 of each year, design the format and content of a consumer rate guide for long-term care insurance. Existing law requires the consumer rate guide to include a history of the rates for all policies issued in the United States on or after January 1, 1990.

This bill would instead require the consumer rate guide to include a history of the rates for all policies issued in California for the current year and the 4 preceding years. The bill would require the Department of Insurance to publish, on its Internet Web site, a premium history of each insurer that writes long-term care policies for all the types of long-term care insurance and coverages issued by the insurer in each state.

(3) Existing law provides for the regulation, by the commissioner, of insurers desiring to reinsure the injury, disablement, or death portions of policies of workers' compensation insurance under the class of disability insurance. Existing law requires these insurers to deposit cash instruments or certain interest-bearing securities or stocks with specified financial institutions. Existing law requires these deposits to be made or adjusted by April 1 of each year.

This bill would instead require the deposits to be adjusted by March 31 of each year. The bill would require the approval of the commissioner to withdraw any amount of these

deposits. The bill would revise the fees that are required to be paid to the commissioner for certain filings. The bill would require these insurers and reinsurers to file a report with the commissioner each year that valuates and details the deposits.

(4) Existing law requires the commissioner to conduct a study of the market for property and liability insurance for corporations that provide subsidized low- and moderate-income rental housing, as specified.

This bill would provide that information disclosed by insurers pursuant to that study shall be confidential and shall not be made public by the department, except as specified.

Ch. 416 (SB 565) Migden Property tax reappraisal exclusion: domestic partners.

The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975-76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. Existing law excludes from the definition of "change in ownership" specified transfers of real property between family members and transfers made for the purpose of perfecting title to property.

This bill would, commencing with the lien date for the 2006-07 fiscal year, exclude from the definition of "change in ownership" any transfer of property between registered domestic partners.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

This bill would take effect immediately as a tax levy.

Ch. 417 (SB 644) Ortiz Dispensing prescription drugs and devices.

(1) Existing law makes certain actions by a health care professional unprofessional conduct subject to disciplinary action by the licensing board regulating the health care professional. Under existing law, the California State Board of Pharmacy is authorized to issue a citation for the violation of the Pharmacy Law or regulations adopted pursuant to it, and the board's executive officer is authorized to issue a letter of admonishment for the violation of those provisions.

This bill would prohibit a health care licentiate from obstructing a patient in obtaining a prescription drug or device and would require the licentiate to dispense drugs and devices pursuant to a lawful prescription or order except in specified circumstances, including on ethical, moral, or religious grounds asserted by the licentiate. The bill would authorize the licentiate to decline to dispense the prescription or order on that basis only if the licentiate notified his or her employer of the objection and it can be reasonably accommodated. The bill would require the licentiate's employer in those circumstances to establish protocols to ensure a patient's timely access to the prescribed drug or device. The bill would authorize the California State Board of Pharmacy to issue a citation for a violation of these provisions and would authorize its executive officer to issue a letter of admonishment for their violation.

(2) The bill would incorporate additional changes to Section 4315 of the Business and Professions Code made by this bill and SB 1111 to take effect if both bills are enacted and this bill is enacted last.

Ch. 418 (SB 973) Kuehl Public employees' retirement: domestic partners.

(1) For purposes of retirement benefits, the Teachers' Retirement Law provides that the term "spouse" includes a person who is the registered domestic partner of a member.

This bill would revise and recast those provisions to provide that a person who is the registered domestic partner of a member shall be treated in the same manner as a "spouse," and would make other conforming changes in that regard.

(2) Under the Teachers' Retirement Law, any member retiring from service may elect to receive his or her retirement allowance pursuant to specified options. A member may make a preretirement election by filing a form with the system's office in Sacramento within 30 days of the date of signature.

This bill would revise and recast those provisions to require the form to include the signature of the member's spouse or domestic partner, as specified, and be received at the system's headquarters, as provided.

(3) The Public Employees' Retirement Law requires a court to address certain community property issues and rights under the system upon the legal separation or dissolution of marriage of a member.

This bill would provide that a spouse or registered domestic partner who fails to meet specified criteria is prohibited from receiving a distribution until the member separates from employment.

The Public Employees' Retirement Law defines the term surviving spouse for the purpose of providing postretirement death benefits. These benefits are funded by the Public Employees' Retirement Fund, a continuously appropriated fund. Existing law extends the rights and duties of marriage to persons registered as domestic partners on and after January 1, 2005.

This bill would provide, for purposes of the provision of certain postretirement death benefits, that a surviving domestic partner shall be treated in the same manner as a surviving spouse if the domestic partner is in a registered domestic partnership that meets specified criteria or if the retired member and his or her domestic partner, who are currently in a registered domestic partnership, sign an affidavit that makes specified statements. Because moneys in the Public Employees' Retirement Fund would be used for a new purpose, this bill would make an appropriation.

(4) The Public Employees' Medical and Hospital Care Act authorizes the Board of Administration of the Public Employees' Retirement System to contract with carriers for health benefit plans and major medical plans for employees and annuitants, as defined, and approve other plans. The act defines domestic partnership for these purposes and provides that a domestic partner is a family member for specified purposes. The act permits certain persons who are eligible to enroll their domestic partners as family members in health plans, subject to collective bargaining, as specified. The act allows an employer to require an employee or annuitant to be responsible for certain increased costs or costs associated with covering the domestic partner, as specified. The act permits a contracting agency to offer health benefits to domestic partners of employees and annuitants at its option. The benefits provided under the act are funded by the Public Employees' Health Care Fund, a continuously appropriated fund.

This bill would revise and recast the provisions described above in connection with the extension of the rights and duties of marriage to domestic partnerships that occurred on and after 2005. Because moneys in the Public Employees' Health Care Fund would be used for a new purpose, this bill would make an appropriation.

(5) Under the County Employees Retirement Law of 1937, any member retiring from service may elect to receive his or her retirement allowance pursuant to specified options.

This bill would entitle a retired member and his or her domestic partner to the same entitlements as described above, if specified criteria are satisfied, including providing an affidavit signed by the member and domestic partner under penalty of perjury relative to the member's service retirement effective date or disability retirement date.

By expanding the scope of an existing crime, perjury, this bill would impose a state-mandated local program.

(6) Existing law specifies the capacity of a conservatee and the powers of a conservator and, among other things, provides that a conservatee retains the capacity to marry.

This bill would expand those provisions to provide that a conservatee retains the capacity to enter into a domestic partnership, as specified.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 419 (AB 228) Koretz Transplantation services: human immunodeficiency virus.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care and makes a violation of the act a crime. Existing law also provides for the licensure and regulation of health insurers by the Department of Insurance.

This bill would prohibit a health care service plan and a health insurer from denying coverage for the costs of organ or tissue transplantation services on the basis that the enrollee, subscriber, insured, or policyholder is infected with the human immunodeficiency virus.

Because the violation of this requirement by a health care service plan would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 420 (AB 1400) Laird Civil Rights Act.

The Unruh Civil Rights Act generally prohibits business establishments from discriminating on the basis of sex, race, color, religion, ancestry, national origin, disability, or medical condition. The Unruh Civil Rights Act provides civil remedies for violations of its provisions.

This bill would further prohibit that discrimination on the basis of marital status or sexual orientation, and would define related terms. The bill would also integrate those definitions into other related provisions, and would make specified findings and declarations in that regard.

Ch. 421 (AB 1586) Koretz Insurers: health care service plans: discrimination.

Existing law provides for licensing and regulation of health care service plans by the Department of Managed Health Care. Existing law provides for licensing and regulation of insurers by the Department of Insurance.

Existing law prohibits certain discriminatory acts by health care service plans and insurers. With respect to health care service plans, certain discrimination based on the sex of an enrollee is prohibited. With respect to life and disability insurers, an insurer may not refuse to accept an insurance application, or issue or cancel insurance under conditions less favorable to the insured than in other comparable cases, except for reasons applicable alike to persons of every race, color, religion, national origin, ancestry, or sexual orientation. The Insurance Commissioner has authority to assess specified administrative penalties for a violation of these provisions.

This bill would add "sex" to the insurance provision governing life and disability insurers. The bill, for purposes of both of these provisions, would provide that "sex" shall have the same meaning as "gender," as defined. The bill would state the intent of the Legislature in that regard.

Ch. 422 (AB 12) DeVore Nonprobate transfers: property conveyances upon death.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes certain types of property to be transferred by a property holder to another person without that property being subject to probate proceedings upon the death of the property holder. Existing law permits, among other types of nonprobate transfers, transfers on death of an insurance policy, bond, pension plan, specified trust and other financial accounts, and property held in joint tenancy. Existing law also requires the California Law Revision Commission to study topics approved by the Legislature.

This bill would require the California Law Revision Commission to study the effect of California's nonprobate transfer provisions and to study statutes in other states that establish beneficiary deeds as a means of conveying real property through nonprobate transfers. The objective of the study would be to determine whether legislation establishing beneficiary deeds should be enacted in California. The bill would require the commission to report its findings to the Legislature on or before January 1, 2007. The bill would also require the commission, if it recommends that the Legislature adopt a statutory scheme establishing beneficiary deeds, to also recommend the content of the proposed statute.

Ch. 423 (AB 300) Walters Residential care facilities for the elderly adult residential facilities, and group home facilities: licensing.

Existing law, the California Community Care Facilities Act, requires the Director of Social Services, in consultation with prescribed agencies and officials, to develop and establish a certification program to ensure that administrators of group home facilities and adult residential facilities have appropriate training and to establish a training program to ensure that licensees, operators, and staffs have appropriate training.

The bill would require that vendors approved by the department who exclusively provide either initial or continuing education courses for certification of administrators of a group home facility, an adult residential facility, or a residential care facility for the elderly, be regulated solely by the department pursuant to the California Community Care Facilities Act.

Existing law requires the license of any facility licensed as a residential facility for the elderly under the California Community Care Facilities Act on January 1, 1986, to automatically be transferred for the unexpired term of the license to licensure as a residential care facility for the elderly under the California Residential Care Facilities for the Elderly Act.

This bill would require that vendors approved by the department who exclusively provide either initial or continuing education courses for certification of administrators of a residential care facility for the elderly, an adult residential care facility, or a group home facility, be regulated solely by the department pursuant to the California Care Facilities for the Elderly Act, and would make a clarifying change to existing law.

Ch. 424 (AB 381) Montanez Legal obligations: liability.

Existing law establishes liability for various types of physical and constructive invasions of privacy, including, among other things, when a defendant knowingly enters onto the land of another without permission or otherwise committed a trespass with the intent to capture any physical type of visual image, sound recording, or other physical impression of the plaintiff engaging in a personal or familial activity, and the invasion is offensive to a reasonable person, as specified. Existing law provides that a person who commits physical or constructive invasion of privacy is liable for up to 3 times the amount of general and special damages proximately caused by that violation and may also be liable for punitive damages and, if proven to be committed for a commercial purpose, subject to disgorgement to the plaintiff of any proceeds or consideration obtained as a result of that violation.

This bill would provide that an assault committed with the intent to capture any type of visual image, sound recording, or physical impression of the plaintiff subjects a person to provisions of law authorizing liability for up to 3 times the amount of general and special damages proximately caused by that violation, punitive damages, and disgorgement to the

plaintiff of any proceeds or other consideration as a result of the violation. The bill would also provide that a person who directs, solicits, actually induces, or actually causes another person to commit an assault of this nature is liable for other specified damages.

Ch. 425 (AB 502) Cogdill Finance lenders: criminal history record checks.

Existing law, the California Finance Lenders Law, provides for the licensure and regulation of finance lenders by the Commissioner of Corporations. Under that law, a licensure applicant is required to provide information specified by the commissioner and to pay a fee for the investigation of the application.

This bill would also require a licensure applicant who is not currently licensed under the California Finance Lenders Law to submit a full set of fingerprints and related information to the commissioner for a criminal history record check. The bill would require the applicant to pay an additional amount to cover the costs of a criminal history record check by the Department of Justice.

Ch. 426 (AB 746) Blakeslee Public utilities: payment of billings.

Existing law authorizes the Public Utilities Commission to supervise and regulate every public utility in the state, including electrical, gas, or water corporations. Existing law authorizes the commission to establish rules for all public utilities, subject to control by the Legislature. Existing law authorizes the commission to fix the rates and charges for every public utility, and requires that those rates and charges be just and reasonable.

Existing law prohibits any retailer in a sales, service, or lease transaction with a consumer, from imposing a surcharge on a cardholder who elects to use a credit card in lieu of payment by cash, check, or similar means.

This bill would require the commission to authorize an electrical, gas, or water corporation to offer credit card and debit card bill payment options. The bill would authorize an electrical, gas, or water corporation to recover reasonable transaction costs incurred by the electrical, gas, or water corporation from those customers that choose to pay by those payment options. The bill would require the commission to determine the reasonableness of transaction costs charged to customers that choose to pay by a credit card or debit card bill payment option. The bill would require the commission to determine how any associated costs or potential savings as a result of customers choosing to pay by a credit card or debit card bill payment option shall be passed on to electrical, gas, or water corporation customers.

The bill would exclude from the existing prohibition upon a retailer imposing a surcharge on a cardholder who elects to use a credit card in lieu of payment by cash, check, or similar means, a charge by an electrical, gas, or water corporation that is approved by the commission pursuant to the provisions that would be added by this bill.

Ch. 427 (AB 929) Oropeza Radiologic technology: radiation exposure.

Under existing law, the State Department of Health Services administers provisions that establish standards for, and regulates sources of, ionizing radiation. Violation of these standards and regulations is a crime.

This bill would require the Radiologic Health Branch of the department to adopt regulations that require personnel and facilities using radiation-producing equipment for medical and dental purposes to maintain and implement medical and dental quality assurance standards for the protection of the public health and safety. The bill would require the adoption of regulations and the submission of the regulations to the health committees of the Assembly and Senate on or before January 1, 2008. By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 428 (AB 1027) Jerome Horton Criminal investigation.

Existing law establishes a procedure for the Director of Industrial Relations to obtain information from insurance rating organizations in connection with identifying employers who fail to secure adequate specified insurance in violation of law.

This bill would establish a similar procedure for the Registrar of Contractors of the Contractors State License Board to obtain that information in connection with licensed contractors who fail to secure adequate specified insurance in violation of law.

The bill would also require the Franchise Tax Board to notify the Registrar of Contractors of the Contractors State License Board, the Director of Employment Development, the Economic and Employment Enforcement Coalition, and the Joint Enforcement Strike Force on the Underground Economy upon the filing of criminal charges against or arraignment of any individual for a specified violation if the individual engages in the business or acts in the capacity of a contractor within this state pursuant to a license issued by the Contractors State License Board or unlawfully engages in the business or acts in the capacity of a contractor within this state without having a license therefor.

Ch. 429 (AB 1104) Levine Video provider billing practices.

The existing Video Customer Service Act requires all video providers, as defined, to render bills that are accurate and understandable and to provide a minimum of 30 days' written notice before increasing rates or deleting channels.

This bill would require that a video provider cease charging a customer for services within 7 business days of receiving a request to terminate service. The bill would provide that if the customer requests that service be terminated and provides 7 or more business days notice before the date for termination of service, the video provider would be required to cease charging the customer for additional services as of midnight of the last day of service.

Ch. 430 (AB 1278) Emmerson Vital records.

Existing law requires the Director of Health Services, as the State Registrar of Vital Statistics, to administer the registration of births, deaths, fetal deaths, and marriages. Existing law requires the certificate of live birth to contain information necessary to establish the fact of live birth as well as medical and social information.

This bill would revise the medical and social information to be included on a certificate of live birth relating to prenatal activities and procedures and principal sources of payment for prenatal care and delivery.

Existing law requires the State Registrar to appoint a Vital Statistics Advisory Committee to, among other duties, review and make recommendations to the State Registrar as to proposals for addition or deletion of items on the certificate of live birth and advise the State Registrar on the content and format of the certificate.

This bill would require the advisory committee to conduct a review of the contents of the certificate of live birth to coincide with decennial revisions by the National Center for Health Statistics to the United States Standard Certificate of Live Birth, and to make recommendations to the State Registrar regarding the adoption of modifications to the state certificate of live birth that are similar to those made to the federal certificate.

Existing law requires the State Registrar to publish within 90 days of receipt of recommendations by the advisory committee a list of recommendations adopted and a list of the recommendations not adopted, with reasons for the action.

This bill would require the State Registrar, notwithstanding the above requirement, to review the advisory committee's recommendations and, at the State Registrar's discretion, to submit to the Legislature, for approval, additions or deletions to the certificate of live birth.

Existing law requires the State Registrar to instruct all local registrars that have automated birth registration to electronically capture the mother's marital status in an electronic file and would prohibit this information from being transcribed onto the actual hardcopy of the certificate of live birth.

This bill would require the State Registrar to instruct the local registrars to collect additional information relating to, among other things, the mother's mailing address, height, weight, and smoking habits. The imposition of this new requirement on local registrars would impose a state-mandated local program.

Existing law requires the certificate of fetal death to contain a 1st section containing those items necessary to establish the fact of fetal death, and a 2nd section containing those items relating to medical and health data.

This bill would require that the information contained in the 2nd section be kept confidential and be labeled accordingly.

Existing law provides that the medical and social information contained in a certificate of live birth shall be confidential and limits access to this confidential information to certain persons and entities.

This bill would provide that the 2nd section of the certificate of fetal death relating to medical and health data and the electronic file of certain birth information shall similarly be confidential, and would authorize access by the county coroner and certain other persons and entities to that confidential information as well as to the medical and social information contained in a certificate of live birth.

Existing law, commencing January 1, 2006, prohibits local registrars and county recorders from issuing informational certified copies of birth and death certificates from any source other than the statewide database prepared by the State Registrar.

This bill would change the operative date of this prohibition from January 1, 2006, to July 1, 2007.

Existing law requires all certified copies of birth and death records issued by the State Registrar, local registrar, or county recorder to be printed on chemically sensitized security paper. Existing law also requires these entities to issue an informational certified copy of these documents under certain circumstances. Existing law, commencing January 1, 2006, requires that the security paper used for informational certified copies of birth and death records also contain a statement in perforated type that states "INFORMATIONAL, NOT A VALID DOCUMENT TO ESTABLISH IDENTITY."

This bill would change the operative date for this requirement from January 1, 2006, to July 1, 2007.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 431 (AB 1507) Pavley Cardiac health: automatic external defibrillators: health studios.

Existing law establishes the State Department of Health Services and sets forth its powers and duties, including, but not limited to, conducting a program for the control of cardiovascular disease.

Existing law, the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act (EMS act), establishes the State Emergency Medical Services Authority to oversee the local implementation of the emergency medical services system. The EMS act permits each county to establish an EMS program and designate a local EMS service agency (EMS agency). Existing law authorizes the authority to establish minimum standards for the training and use of automatic external defibrillators and requires persons or entities that acquire the defibrillators to comply with maintenance, testing, and training requirements which are scheduled to change commencing January 1, 2008. Existing law, until January 1, 2008, provides immunity from civil damages for those persons or entities.

This bill, commencing July 1, 2007, and until July 1, 2012, would require every health studio, as defined, to acquire an automatic external defibrillator, would provide immunity for providing the devices, and would, notwithstanding existing law, establish standards for providing the devices, including, but not limited to, maintenance and staff training regarding proper use.

The bill would require each health studio that elects to continue the installation on or after July 1, 2012, to maintain and train personnel in the use of an automatic external defibrillator, and would provide for related immunity.

Ch. 432 (AB 1566) Calderon Identity theft.

Existing law provides that every person who, with the intent to defraud, acquires, transfers, or retains possession of the personal identifying information of another person is punishable by imprisonment in a county jail for a period not to exceed one year, or a fine not to exceed \$1,000, or by both that imprisonment and fine.

This bill would provide that a violation of these provisions with respect to the personal identifying information of a person who is either a member of the armed forces, or is a member of the armed forces reserve or the National Guard, who has been called to active duty or active service and is deployed to a location outside of the state, as specified, is punishable by imprisonment in a county jail for one year, a fine not to exceed \$1,500, or by both that imprisonment and fine.

Because this bill would create a new crime, it would impose a state-mandated local program.

This bill would incorporate additional changes in Section 530.5 of the Penal Code proposed by AB 424 that would become operative only if AB 424 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 433 (AB 1640) Saldana Insurance claims information.

Existing law generally regulates how insurers maintain information related to adverse underwriting decisions.

This bill, as of July 1, 2006, would require any insurer who issues a policy of insurance covering residential property, if it reports claims history or loss experience to an insurance-support organization, to provide the insured, within a certain period, with a specified disclosure regarding contacting the claims information database, and to include the disclosure in the California Residential Property Insurance Bill of Rights.

Ch. 434 (AB 1676) Richman Advance Directives and Terminal Illness Decisions Program.

Existing law authorizes an adult to give an individual health care instruction and to appoint a person to make health care decisions for that individual in the event of his or her incapacity pursuant to an advance health care directive.

Existing law requires the Secretary of State to establish a registry system through which a person who has executed a written advance health care directive may register in a central information center, information regarding the advance directive, making that information available upon request to any health care provider.

This bill would enact the Advance Directives and Terminal Illness Decisions Program, which would require the Secretary of State to work with the State Department of Health Services and the office of the Attorney General to develop information about end of life care, advance health care directives, and registering the advance health care directives at the registry. It would also require that links to this information and the registry be available on

the Internet Web sites of the Secretary of State, the State Department of Health Services, the office of the Attorney General, the Department of Managed Health Care, the Department of Insurance, the Board of Registered Nursing, and the Medical Board of California.

Ch. 435 (SB 20) Escutia Auto insurance: low-cost policies: evidence of financial responsibility.

Existing law establishes, until January 1, 2007, a low-cost automobile insurance pilot program in the County of Los Angeles and the City and County of San Francisco. Existing law provides for the issuance of automobile liability policies pursuant to this program under specified terms and conditions, and provides that a policy so issued satisfies specified requirements regarding financial responsibility.

This bill would extend until January 1, 2011 the expiration date for these provisions and would, as of April 1, 2006, extend the low-cost automobile program to the Counties of Alameda, Fresno, Orange, Riverside, San Bernardino, and San Diego and would make expansion to all other counties in California subject to a determination of need made by the Insurance Commissioner following a public meeting, as specified. It would require the commissioner to establish the annual rate offered initially under the program for these counties, and to adopt regulations to extend the program to other counties.

The bill would make certain other changes to the provisions governing the program, including raising the cap on the vehicle value that can be insured under this program from \$12,000 to \$20,000 and specifying only 2 policies per person may be purchased under this program.

Existing law requires the Department of Motor Vehicles to require each applicant for renewal of a motor vehicle registration to submit either a form approved by the department, but issued by the insurer, containing specified information, or any one of specified documents as evidence of coverage under an alternative form of financial responsibility that may be provided by the applicant in compliance with existing financial responsibility laws. Under existing law, on and after January 1, 2007, this requirement is made inapplicable to a vehicle owner with a residence address in the County of Los Angeles or in the City and County of San Francisco. Existing law also makes inapplicable on or after that date, with respect to persons in those 2 jurisdictions, a related evidence of financial responsibility requirement involving providing that information to a peace officer.

This bill would change the date, making the requirements regarding evidence of financial responsibility inapplicable on or after January 1, 2011, in the County of Los Angeles and in the City and County of San Francisco.

Ch. 436 (SB 150) Escutia Insurance: adverse underwriting decisions.

Existing law requires that, in the event of an adverse underwriting decision, as defined, the insurance institution or agent responsible for the decision comply with certain requirements, including a requirement to either provide the consumer with the specific reasons for the adverse underwriting decision in writing or advise the person that upon written request he or she may receive the specific reasons in writing.

This bill would provide that, as of July 1, 2006, with respect to a declination, cancellation, or nonrenewal of an individual homeowners', auto, life, health, or disability insurance policy, the insurance institution or agent responsible for the decision shall provide the specific reason or reasons in writing at the time of the decision, except as specified.

Ch. 437 (SB 355) Murray Internet regulation.

Existing law, the Consumer Protection Against Computer Spyware Act, provides specified protections for the computers of consumers in this state against certain types of computer software.

This bill would enact the Anti-Phishing Act of 2005. The bill would make it unlawful for any person, through the Internet or other electronic means, to solicit, request, or take any

action to induce another person to provide identifying information by representing itself to be a business without the approval or authority of the business. The bill would provide certain civil remedies and civil penalties for a violation in that regard.

Ch. 438 (SB 390) Bowen Probate assignments: cash advances.

Existing law provides for the regulation of the distribution of an estate.

This bill would regulate the assignment of a beneficiary's entire or partial interest in a decedent's estate in consideration for a cash advance or any other consideration, as specified. The bill would require the agreement to be filed with the court, would require specified disclosures with regard to costs and fees, and would prohibit an assignment agreement from containing certain provisions. The bill would further authorize the court to modify or refuse to order that assignment under specified circumstances, and would allow for specified damages upon a willful violation of the above-described provisions.

Ch. 439 (SB 581) Figueroa Health studio contracts: maximum fees: cancellation rights.

(1) Existing law prohibits a contract for health studio services from requiring payments or financing by the buyer to exceed the term of the contract, nor may the term of the contract exceed three years. Existing law provides a statement of legislative findings with regard to health studio contracts and business practices.

This bill would provide that the limits on the financing and terms of health studio contracts do not apply to the obligation to pay valid, outstanding moneys due under the contract. The bill would revise the statement of legislative findings described above.

(2) Existing law provides that a consumer may cancel a contract for health studio services within 3 business days after the contract is executed or if the agreed upon services are not provided within 6 months after the date of the contract.

This bill would authorize a consumer to cancel a contract for health studio services (a) within 5 business days after the contract is executed, or within 20, 30, or 45 days thereafter if the amount of the contract exceeds certain dollar amounts; (b) if the health studio fails to provide the specific facilities advertised or offered within 6 months, except as specified, or, if no time is indicated, the consumer may cancel the contract within six months; or (c) if the health studio eliminates or reduces the scope of the facilities, as specified. The bill would prescribe the method for calculating the consumer's refund following cancellation of the contract. The bill would provide that a health studio entering a contract for services for \$1,000 or less is not required to comply with certain of these provisions.

The bill would also require a seller of health studio services to hold in trust all money received from a consumer if the health studio facility has not yet opened for business, except in certain circumstances, and would prohibit the seller from drawing on, transferring or encumbering those funds, except as specified.

(3) Existing law prohibits any contract for health studio services from requiring a payment from the client in excess of \$1,000, exclusive of interest or finance charges.

This bill would increase that limit to \$3,000, including initiation or initial membership fees, until January 1, 2010, at which time that limit would be further increased to \$4,400, including those fees.

Ch. 440 (SB 608) Escutia Public Utilities Commission: Division of Ratepayer Advocates: office of the public advisor.

(1) Under existing law, the Public Utilities Commission has regulatory authority over public utilities and can establish its own procedures, subject to statutory limitations or directions and constitutional requirements of due process. Existing law establishes a division, known as the Office of Ratepayer Advocates, within the commission to represent the interests of public utility customers and subscribers within the jurisdiction of the commission. Under existing law, a director of the division is appointed by, and serves at the

pleasure of, the Governor, subject to confirmation by the Senate. Existing law requires the commission to provide personnel and resources to the division sufficient to ensure that customer and subscriber interests are fairly represented in all significant commission proceedings.

This bill would rename the Office of Ratepayer Advocates as the Division of Ratepayer Advocates and would provide that the purpose of the division is to represent and advocate on behalf of the interests of public utility customers and subscribers within the jurisdiction of the commission. The bill would require the commission to provide personnel and resources to the division, including attorneys and other legal support, sufficient to ensure that customer and subscriber interests are effectively represented in all significant proceedings. The bill would authorize the director of the division to appoint a lead attorney to represent the division.

(2) Existing law requires the commission to establish an office of the public advisor to assist members of the public and ratepayers who desire to testify before or present information to the commission in any hearing or proceeding of the commission open to the public. Existing law requires a separate office of the public advisor in the Los Angeles office of the commission, staffed by a minimum of 3 employees.

This bill would delete the requirement that the office of the public advisor in the Los Angeles office of the commission have a minimum of 3 employees. The bill would state that the purpose of the office of the public advisor is to assist members of the public and ratepayers who desire to testify before or present information to the commission in any hearing or proceeding of the commission. The bill would require the public advisor to publicize the commission's programs for encouraging and supporting participation in the commission's proceedings.

(3) Under existing law, a violation of the Public Utilities Act or an order or direction of the commission is a crime.

Because the bill would expand the entities from which the Division of Ratepayer Advocates can request information, including unregulated affiliates of public utilities and exempt wholesale generators, this bill would impose a state-mandated local program by expanding the definition of a crime.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 441 (SB 634) Speier Health insurance: claims practices.

Existing law provides for regulation of health insurers by the Insurance Commissioner. Existing law, known as the Health Care Providers Bill of Rights, imposes certain requirements and prohibitions on the relationship between providers of health care services and health insurers relative to alternative rates of payment made by insurers on behalf of covered insureds. Existing law also requires health insurance and self-insured employee welfare benefit plan disclosure forms to be provided to insureds and enrollees, and requires those disclosure forms to contain specified information.

This bill would impose additional requirements on health insurers that enter into contracts with health care providers relative to the processing and payment of claims including requiring the disclosure of specified information in electronic format to providers annually and, additionally, upon a contracted provider's request. The bill would also require a contracting agent to disclose such specified information in electronic format to providers annually and upon a contracted provider's written request. The bill would require the health insurance policy or self-insured employee welfare benefit plan disclosure forms to insureds and enrollees to contain the nature and extent of the financial liability that is or may be incurred by the insured, enrollee, or his or her family, where care is furnished by a provider

that does not have a contract with the insurer or plan to provide services at an alternative rate of payment.

Ch. 442 (SB 650) Ortiz Prostate cancer: Improving Access, Counseling, and Treatment for Californians with Prostate Cancer (IMPACT) Program.

Existing law requires the State Department of Health Services to develop, expand, and ensure a program to provide, through contracts, quality prostate cancer treatment services to low-income uninsured and underinsured men. Pursuant to this requirement, the department has established the Improving Access, Counseling, and Treatment for Californians with Prostate Cancer (IMPACT) Program.

This bill would, instead, require the department to develop and implement a program to provide quality prostate cancer treatment for low-income and uninsured men. It would also impose various requirements upon the program, including prescribed contract requirements.

This bill would require, contingent upon the timely receipt of program data from contractors, the department to report to specified legislative committees, by July 1, 2006, its evaluation of the IMPACT Program. The bill would appropriate \$2,404,000 from the General Fund to the department for purposes of prostate cancer treatment services under the program.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 443 (SB 666) Aanestad Congregate living health facilities.

Existing law provides for the licensure and regulation of health facilities, including congregare living health facilities, by the State Department of Health Services. A congregare living health facility is a residential home that provides inpatient care, which includes specific basic services, and that is limited, with certain exceptions, to a capacity of no more than 6 beds.

This bill would increase the capacity of a congregare living health facility to no more than 12 beds, with certain exceptions.

This bill would incorporate additional changes in Section 1250 of the Health and Safety Code, proposed by AB 1346, to be operative only if AB 1346 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

Ch. 444 (SB 798) Simitian Prescription drugs: collection and distribution program.

The Pharmacy Law provides for the licensure and regulation of pharmacists by the California State Board of Pharmacy and authorizes a pharmacist to dispense a medication on prescription in a container that meets the requirements of state and federal law and is correctly labeled.

This bill would authorize a county to establish, by ordinance, a repository and distribution program for purposes of distributing surplus unused medications, as defined, to persons in need of financial assistance to ensure access to necessary pharmaceutical therapies. The bill would limit the program to pharmacies owned by or contracting with the county. It would require a county that elects to establish a repository and distribution program to establish procedures for, at a minimum, (1) establishing eligibility for medically indigent patients who may participate in the program, (2) ensuring that eligible patients are not charged for any medications provided under the program, (3) developing a formulary of appropriate medications for the program, (4) ensuring proper safety and management of any medications collected by and maintained under the authority of a licensed pharmacy, and (5) ensuring the privacy of individuals for whom the medication was originally prescribed. The bill would authorize any drug manufacturer legally authorized under federal law to manufacture or sell pharmaceutical drugs, or a licensed health facility, pharmacy wholesaler, or pharmacy to donate medications pursuant to these provisions. Except in cases of noncompliance with the bill, bad faith, or gross negligence, the bill would prohibit certain people and entities from

being subject to criminal or civil liability for injury caused when donating, accepting, or dispensing prescription drugs in compliance with the bill's provisions.

Ch. 445 (SB 802) Simitian Debit cards.

Existing law prohibits a person or business that accepts credit cards for the transaction of business from printing more than the last 5 digits of the credit card account number or the expiration date upon any receipt provided to the cardholder, except as specified.

This bill would further prohibit that disclosure with regard to debit cards.

Ch. 446 (SB 1105) Speier Life insurance: travel.

Existing law generally regulates life insurance.

This bill would prohibit an insurer from taking specified actions relating to issuing, renewing, or rating a life insurance policy based solely upon the applicant's or insured's past or future lawful travel destinations. The bill would allow an insurer to exclude or limit coverage, or refuse to issue a policy, based upon lawful travel, or charge a different rate, when that action is based upon sound actuarial principles or is related to actual and reasonably expected experience.

Ch. 447 (SB 2) Speier Homeowners' insurance: valuation: continuing education.

Existing law requires an applicant for a fire and casualty broker-agent license to complete courses in a prelicensing curriculum, and to pass an examination. Existing law requires fire and casualty broker-agents to meet specified continuing education requirements.

This bill would require the curriculum committee of the Department of Insurance, in 2006, to make recommendations to the Insurance Commissioner to instruct fire and casualty broker-agents and personal lines broker-agents, and applicants for fire and casualty and personal lines broker-agent licenses, in proper methods of estimating the replacement value of structures, and of recommending appropriate levels of coverage under a homeowners' insurance policy.

Existing law provides that, under a specified type of homeowners' insurance policy, when a state of emergency has been declared, no time limit of less than 24 months from the date that the first payment toward the actual cash value is made shall be placed upon an insured in order to collect the full replacement cost of the loss, subject to the policy limit.

This bill would provide, in addition, as of January 1, 2007, that if a state of emergency has been declared, coverage for additional living expenses shall be for a period of 24 months, but shall be subject to other policy provisions, provided that any extension of time beyond the period provided in the policy shall not act to increase the additional living expense policy limit in force at the time of the loss.

The bill would require an insurer, in the event of a loss under a homeowners' insurance policy for which the insured has made a claim for additional living expenses, to provide the insured with a list of items that the insurer believes may be covered under the policy as additional living expenses.

Existing law establishes, until January 1, 2008, a mediation program for disputes arising out of certain auto insurance, earthquake insurance, and homeowners' insurance claims.

This bill would make this program permanent, and would make specified changes to the homeowners' and earthquake claims to which it applies. The bill would make certain other changes to the provisions governing the mediation program.

The bill would incorporate changes made by SB 518 that would become operative if both bills are enacted and this bill is enacted after SB 518.

Ch. 448 (SB 518) Kehoe Homeowners' insurance: insurance adjusters.

Existing law generally regulates insurance, including homeowners' and other insurance relating to real and personal property.

This bill would require an insurer, after a covered loss, to provide, free of charge, a complete copy of the insured's current insurance policy or certificate within 30 calendar days

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

of receipt of a request from the insured. It would provide that an insured who does not experience a covered loss shall, upon request, be entitled to one free copy of his or her current insurance policy or certificate annually.

Existing law prohibits an insurer, with respect to certain homeowners' insurance policies, from placing upon an insured a time limit of less than 12 months from the date that the first payment toward the actual cash value is made in order for the insured to collect the full replacement cost of the loss, subject to the policy limit.

This bill would provide that, as of January 1, 2007, in the event of a covered loss relating to a state of emergency, as defined, coverage for additional living expenses shall be for a period of 24 months, but shall be subject to other policy provisions, provided that any extension of time beyond the period provided in the policy shall not act to increase the additional living expense policy limit in force at the time of the loss.

Existing law requires an insurer under a homeowners' insurance policy to provide certain disclosures to an insured. Existing law allows the commissioner, with respect to one of these disclosures, to modify that disclosure only upon the request of an insurer.

This bill would apply this limitation on modification to other disclosures, as specified.

Existing law requires an applicant for a license to act as a public insurance adjuster to meet specified requirements, including passing a licensing examination and posting a surety bond or cash in the sum of \$5,000. Existing law provides that the examination requirement is waived for specified applicants.

This bill would raise the required amount of the bond or cash to \$20,000. It would delete the provision providing for waiver of the examination requirement for certain applicants.

Existing law sets forth the grounds for denying, suspending, or revoking a license to act as an insurance adjuster or public insurance adjuster.

This bill would make specified changes to the grounds for denying, suspending, or revoking those licenses.

Existing law requires that a contract between a public insurance adjuster and a client include specified provisions and information.

This bill would require that certain additional information relating to the insured, the insurer, and the adjuster be included in such a contract, and would prohibit a contract of this type from containing specified provisions. It would require that a public insurance adjuster provide the client with a written disclosure prior to the signing of the contract, as specified. The bill would make certain changes to the duties owed by the adjuster to the client.

Existing law prohibits a public adjuster from initiating any contract with a policyholder between 6 p.m. and 8 a.m.

This bill would instead prohibit a public adjuster from initiating any contact with a policyholder between those hours.

Existing law provides that, if a client cancels a contract with a public insurance adjuster, the adjuster is not entitled to receive compensation for services performed prior to the cancellation.

This bill would allow a public insurance adjuster to receive reimbursement for out-of-pocket emergency expenses paid for the client prior to cancellation if the adjuster provides the client with a specified statement.

The bill would impose additional regulatory requirements on public insurance adjusters relating to disclosures and receiving money on behalf of an insured.

Existing law allows an expired public adjuster's license or branch office certificate to be renewed within 5 years of its expiration if certain requirements are met.

This bill would instead provide that an expired license or certificate may be renewed within one year of its expiration if those conditions are met.

The bill would incorporate changes made by SB 2 that would become operative if both bills are enacted and this bill is enacted after SB 2.

Ch. 449 (AB 354) Cogdill Telemedicine.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law, the Medical Practice Act, regulates the practice of telemedicine, defined as the practice of health care delivery, diagnosis, consultation, treatment, transfer of medical data, and education using interactive audio, video, or data communications.

This bill would, commencing July 1, 2006, and until January 1, 2009, authorize under the Medi-Cal program, to the extent that federal financial participation is available, "teleophthalmology and teledermatology by store and forward," as defined. The bill would require the State Department of Health Services to, on or before January 1, 2008, report to the Legislature specified information regarding store and forward telemedicine provided under this provision as a Medi-Cal benefit.

Ch. 450 (SB 61) Battin Common interest developments: elections.

Existing law creates and regulates common interest developments and requires them to have a recorded declaration containing specified information and permits them to levy assessments. Existing law establishes, in certain situations, voting requirements for amendments of the declaration and the levy of assessments. Existing law establishes the Common Interest Development Open Meeting Act. Existing law requires that a common interest development be managed by an association. Existing law regulates a broad range of activities associated with statewide, local, and special elections.

This bill would require that an association adopt rules, pursuant to specified procedures, to provide equal access to various association media as part of election campaigns, as specified, and to establish qualifications for candidates and voting, as specified, among other things. The bill would also make a conforming change. The bill would require that elections within a common interest development regarding assessments, selection of members of the association board of directors, amendments to the governing documents, or the grant of exclusive use of common area property be held by secret ballot, as specified. The bill would require that a common interest development select an independent 3rd party, as specified, as an inspector of election, who would be granted specified powers, for these elections. The bill would require that ballots and two preaddressed envelopes with instructions on how to return ballots be mailed to each member at least 30 days prior to the deadline for voting, be handled in a specified manner, and that votes be counted and tabulated by the inspector in public at a noticed meeting. The bill would establish additional procedures for storage and review of election results. The bill would prohibit association funds from being spent for campaign purposes, as specified, in connection with an association board election or in connection with any other association election, except as specified. The bill would permit a member of an association to bring a civil action, as specified, for violations of these provisions, and other provisions regarding open meetings, by his or her association, and would impose a civil penalty of up to \$500 per violation.

The provisions of this bill would be operative July 1, 2006, and would become operative only if AB 1098 is enacted and becomes effective, as specified.

Ch. 451 (SB 115) Florez California Disabled Veteran Business Enterprise Program.

Under existing law, state agencies and all other state entities contracting for materials, supplies, equipment, alteration, repair, or improvement are required to have at least 3% participation goals for disabled veteran business enterprises. Existing law requires the Department of Veterans Affairs and the awarding departments to appoint a Disabled Veteran Business Enterprise Program Advocate to assist in meeting the participation goals.

This bill would specify that the Department of General Services is the administering agency of the California Disabled Veteran Business Enterprise Program, except in the case of contracts for professional bond services, would specify the duties of the Department of General Services in meeting that requirement, and would set standards for meeting the program's participation goals.

Existing law requires the Department of General Services' small business advocate to provide, at a minimum, specified services to small businesses.

This bill, instead, would require the department's small business advocate to provide these services to certified small businesses and certified disabled veteran business enterprises.

Ch. 452 (SB 137) Ducheny Common interest developments: assessments.

The Davis-Stirling Common Interest Development Act defines and regulates common interest developments and authorizes the association that manages the development to levy assessments to fulfill its obligations. The act provides that a regular or special assessment of the association, late charges, reasonable costs of collection, attorney's fees, and interest, as specified, are a debt of the owner of the separate interest at the time the assessment or other sums are levied, and are a lien on the owner's separate interest when the association records a notice of delinquent assessment and follows a specified process. The act permits the association to enforce the lien in any manner permitted by law including a sale by a trustee, also known as nonjudicial foreclosure.

The act authorizes an owner of a separate interest in a common interest development to pay assessments that are in dispute in full under protest. Existing law, the right of redemption, permits a judgment debtor, as defined, to redeem his or her real property, as specified, after judicial foreclosure only if the decree of foreclosure finds that a deficiency judgment may be ordered against the debtor.

This bill would revise and recast the procedures for collecting delinquent assessments for certain debts that arise on and after January 1, 2006. The bill would provide that when an association of a common interest development seeks to collect delinquent assessments of less than \$1,800, not including accelerated assessments and specified late charges and fees, the association must either file a civil action in small claims court or record a lien upon which it would be prohibited from foreclosing until the amount equals or exceeds \$1,800 or the assessments are more than 12 months delinquent. The bill would delete provisions authorizing the owner of a separate interest to pay assessments that are in dispute in full under protest and requiring the board of directors of an association to respond to an owner's written dispute of a debt within 15 days.

The bill would permit an association of a common interest development seeking to collect delinquent regular or special assessments of \$1,800 or more, not including accelerated assessments and specified late charges and fees, or any assessments that are more than 12 months delinquent, to use foreclosure subject to specified conditions. Among these conditions, the bill would require the board of directors of an association to make the decision to foreclose upon a lien at an executive meeting of the board, by a majority vote, as specified, at least 30 days prior to any public sale, and to record the results of the vote, as specified, and would require the board to provide notice of the decision to foreclose, as specified.

The bill would require, if the owner so requests, that the association permit the owner of the separate interest to elect dispute resolution or alternative dispute resolution procedures, under specified circumstances. The association would be prohibited from recording a lien or initiating a foreclosure action without participating in those procedures if so requested by the owner. If it is determined through dispute resolution or alternative dispute resolution that an association has filed a lien for a delinquent assessment in error, the association would be required to reverse specified charges and take other corrective actions.

The bill would require the association to file an itemized statement of the charges owed by the owner together with the notice of delinquent assessment. The bill would further provide that, notwithstanding any law to the contrary, a foreclosure by an association to collect upon a debt for a delinquent assessment, as specified, is subject to a right of redemption. The bill would provide a redemption period of 90 days. The bill would exempt from its provisions developers and separate interest owners in timeshare projects, as specified.

The bill would require the association to send any and all correspondence and specified legal notices to both a primary and secondary address, as specified, if the owner provides written notice of the secondary address to the association. The bill also would authorize an association created to manage a common interest development to appear and participate in

small claims court hearings through an agent, a management company representative, or bookkeeper who appears on behalf of the association.

This bill would, to the extent existing funds are available, require the Department of Consumer Affairs and the Department of Real Estate to develop an on-line education course for the board of directors of an association regarding the role, duties, laws, and responsibilities of board members and prospective board members and the nonjudicial foreclosure process.

The bill would make other related, conforming changes.

Ch. 453 (SB 210) Bowen Telecommunications: telephone corporations: surcharge.

The existing federal Telecommunications Act of 1996, establishes a program of cooperative federalism for the regulation of telecommunications to attain the goal of local competition, while implementing specific, predictable, and sufficient federal and state mechanisms to preserve and advance universal service, consistent with certain universal service principles. Existing federal law requires that a manufacturer of telecommunications equipment or customer premises equipment ensure that the equipment is designed, developed, and fabricated to be accessible to and usable by individuals with disabilities, as defined, if readily achievable. Existing federal law further requires that a provider of telecommunications services, as defined, ensure that the service is accessible to and usable by individuals with disabilities, if readily achievable.

Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including telephone corporations. Existing law requires the commission to design and implement programs under which telephone corporations provide access to the telecommunications system for subscribers who are deaf, hearing impaired, or disabled, including programs to provide specialized or supplemental telephone communications equipment. The commission is required, until January 1, 2006, to establish a rate recovery mechanism through a surcharge, not to exceed  $\frac{1}{2}\%$  on intrastate service, to allow providers of the equipment and services to recover their costs. Existing law authorizes the commission, until January 1, 2006, to adjust the surcharge upward or downward within the specified  $\frac{1}{2}\%$  cap, to ensure that the programs supported thereby are adequately funded and that the fund balances are not excessive.

This bill would extend, until January 1, 2010, the authority of the commission to establish a rate recovery mechanism through a surcharge and to adjust the surcharge upward or downward within the specified  $\frac{1}{2}\%$  cap, to ensure that the programs supported thereby are adequately funded and that the fund balances are not excessive.

Ch. 454 (SB 244) Romero Continuing care retirement communities.

Existing law provides for the regulation by the State Department of Social Services of activities relating to continuing care contracts that govern care provided to an elderly resident in a continuing care retirement community for the duration of the resident's life or a term in excess of one year. Existing law sets forth particular rights to which a resident of a continuing care retirement community is entitled, in addition to any otherwise applicable civil or legal rights, benefits, or privileges. These rights include, among others, the right to live in an attractive, safe, and well maintained physical environment, and the right to organize and participate freely in the operation of resident associations.

Existing law designates the contents of a continuing care contract, including the conditions under which a resident of a continuing care retirement community may be voluntarily or involuntarily transferred from his or her designated living unit.

This bill would revise and expand the rights of continuing care retirement community residents to include those rights afforded to residents of residential care facilities for the elderly, and to include the right to manage their own financial affairs and the right to be assured of the voluntary nature of any designated purchases or contributions solicited for the

benefit of the facility or sponsored by the provider. The bill would give residents the right to file complaints with the Continuing Care Contracts Branch of the department, and would require the facility to inform residents of, and to post information relating to, the exercise of that right.

This bill would also expand and revise the contents of continuing care contracts, relating to the criteria for resident transfers, to include notice provisions and the right of a resident to have a transfer process reviewed by the Continuing Care Contracts Branch, and to seek the assistance of the local long-term care ombudsperson. This bill would require the contract to include a statement of billing practices, procedures, and guidelines, and would require a minimum of 14 days between the billing date and the payment due date. The bill would also limit the circumstances under which a provider would be entitled to impose a late payment charge.

Under existing law, an entity that issues, delivers, or publishes, or as manager or officer or in any other administrative capacity, assists in the issuance, delivery, or publication of any printed matter, oral representation, or advertising material that does not comply with the requirements of the law relating to continuing care contracts is guilty of a misdemeanor.

By revising the required contents of continuing care contracts, this bill would change the definition of an existing crime, thus imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 455 (SB 310) Chesbro Veterans' homes: funding.

Existing law requires the administrator of a veterans' home to maintain a Morale, Welfare, and Recreation Fund to be used for the general welfare of the residents of veterans' homes.

This bill would require the fund established for the Yountville facility to maintain a reserve in the amount of \$2,000,000.

#### Ch. 456 (AB 179) Bermudez Residential care facilities for the elderly: elder abuse information.

Under existing law, the State Department of Social Services regulates the licensure and operation of residential care facilities for the elderly. Existing law requires information to be disseminated to facility residents and their responsible persons, including providing information regarding the facility's policies regarding family visits and other communications on the client information form or admissions agreement and on its patient's rights form. Existing law requires a copy of any applicable resident's rights specified by law or regulation to be attached to all admission agreements. Existing law also requires these facilities to post certain information including licensing reports, and the name, address, and telephone number of the Office of the State Long-Term Care Ombudsman and the nearest approved organization for long-term care ombudsperson activities. A violation of the provisions relating to residential care facilities for the elderly is a misdemeanor.

This bill would require the personal rights form made available by the department's Community Care Licensing Division to residential care facilities for the elderly to include a statement regarding procedures for reporting known or suspected elder and dependent adult abuse, including the toll-free telephone number of the State Long-Term Care Ombudsman's CRISISline and a blank space for the telephone number of the nearest approved organization for long-term care ombudsperson activities. The bill would require the residential care facility for the elderly to insert in the form's blank space the telephone number of the nearest approved organization for long-term care ombudsperson activities. It would require the statement of resident's rights attached to admissions agreements by a residential care facility for the elderly to include the information on the reporting of suspected or known elder and dependent adult abuse provided for in the bill. By imposing this

requirement on residential care facilities for the elderly, this bill would change the definition of an existing crime, thus imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 457 (AB 787) DeVore Crime: impersonating a veteran.

Under existing law, any person who represents himself or herself as a veteran or ex-servicemember of any war in which the United States was engaged in connection with the soliciting of aid or the sale or attempted sale of any property, is guilty of a misdemeanor.

This bill would also make it a misdemeanor for a person to falsely claim to be, or present himself or herself to be a veteran member of the Armed Forces of the United States, with the intent to defraud. The bill would not apply to face-to-face solicitations involving less than \$10.

Because this bill would create a new crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 458 (AB 1098) Jones Common interest developments.

The Davis-Stirling Common Interest Development Act creates and regulates common interest developments, requires them to have a recorded declaration containing specified information, and permits them to levy assessments. The act establishes, in certain situations, voting requirements for amendment of the declaration and the levy of assessments, and requires that a common interest development be managed by an association.

This bill would require an affirmative vote of the members owning at least 67% of the separate interests in the common interest development to grant exclusive use of any portion of a common area to any member, except as specified.

The act also requires the association of a common interest development to make the accounting books and records and the minutes of proceedings of the association available for inspection and copying by a member of the association, or the member's designated representative, as specified. The act authorizes a member to bring an action to enforce that right and also authorizes a court to assess a civil penalty of up to \$500 for each violation of that provision.

This bill would require the association, commencing July 1, 2006, to make association records, as defined, for the current fiscal year and the previous 2 fiscal years available for inspection and copying by a member of the association, or the member's designated representative subject to payment of certain costs by the member, as specified. The bill would require the association to make the records available within 10 business days of receipt of the request for current association records or 30 calendar days of receipt of the request for association records prepared during the previous 2 fiscal years. The bill would require that minutes of member and board meetings be made permanently available. The bill would provide that these provisions apply to any community service organization or similar entity that is related to the association. The bill would specifically authorize a member to bring an action to enforce his or her right to inspect and copy association records in small claims court if the amount demanded does not exceed the jurisdiction of that court. The bill would also authorize the court to assess a civil penalty of up to \$500 for the denial of each separate written request. The bill would make other related changes.

The bill would become operative only if SB 61 is enacted and becomes effective on or before January 1, 2006.

Ch. 459 (AB 1439) Committee on Veterans Affairs Veteran benefits.

The Veterans' Farm and Home Purchase Act of 1974 authorizes the Department of Veterans Affairs to assist veterans in acquiring homes and farms by generally providing that the department may purchase a farm or home which the department then sells to a purchaser, as defined. Existing law limits the amount that the department may expend for purchasing a home or constructing a dwelling house and other improvements to the then current maximum Fannie Mae loan limit that is annually set by Fannie Mae for a single-family home and limits the amount the department may expend for a farm to 150% of that amount.

This bill would raise these expenditure limits to 125% of the maximum Fannie Mae loan limit for a single-family home, as provided, and thereby increase the price that the department may pay for a farm to 150% of that amount.

Ch. 460 (AB 1725) La Malfa Veterans' homes.

Existing law authorizes the Department of General Services, on behalf of the Department of Veterans Affairs, to acquire, design, equip, construct, and establish additional veterans' homes to be located in Lancaster, Saticoy, West Los Angeles, Fresno County, and Shasta County.

Existing law permits the Department of General Services, when authorized by the Legislature to use the design-build procurement process for a specific project, to contract and procure state office facilities, other buildings, structures, and related facilities.

This bill would, with respect to Fresno and Shasta Counties, allow the use of the design-build construction procurement process, as specified. This bill would require the construction of the veterans' homes in Redding and Fresno to be treated as separate public works projects that are subject to separate bids.

Existing law requires the Department of Veterans Affairs to make a report to the Legislature and the Governor semiannually on the progress of the acquisition, design, equipping, construction, establishment, and expansion of specified veterans' homes.

This bill would require the report to include a synopsis on the efficacy of the design-build procurement process.

Ch. 461 (AB 33) Sharon Runner Contact with minor.

Existing law provides that it is a crime for an adult stranger to contact or communicate with a minor, 12 years of age or younger, who the adult knew or should have known was 12 years of age or younger, to lure him or her away, as specified, for any purpose. Existing law provides that this crime is punishable by a fine, by imprisonment in a county jail, or by both.

This bill would prohibit this conduct when engaged in with a person who is under 14 years of age. This bill would provide that this crime is punishable as an infraction or a misdemeanor, as specified.

Existing law provides that certain property, such as a computer, may be subject to forfeiture if used by a defendant to commit particular offenses, as specified. Existing law further provides the process by which property is forfeited and by which it may be recovered by the owner.

This bill would provide that if the defendant used his or her computer to communicate with the victim in the attempt to lure the victim then that computer is subject to forfeiture. Because this bill would change the definition of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 462 (AB 100) Cohn Battered women's shelters: grant program.

Existing law requires the Maternal and Child Health Branch of the State Department of Health Services to administer a comprehensive shelter-based services grant program to battered women's shelters, and requires the department to consult with an advisory council that remains in existence until January 1, 2006, in the administration of the grant program.

This bill would extend the period during which the advisory council would remain in existence to January 1, 2010.

Ch. 463 (AB 113) Cohn Parole placement.

Under existing law, an inmate who is released on parole for certain sex offenses involving child victims or dependent persons is prohibited from residing within one-quarter mile of any public or private school, for the duration of his or her parole.

This bill would prohibit, in addition, an inmate who is released on parole for those sex offenses whom the Department of Corrections and Rehabilitation determines to pose a high risk to the public from residing within one-half mile of a public or private school.

The bill would incorporate changes made by AB 240 that would become operative if both bills are enacted and this bill is enacted after AB 240.

Ch. 464 (AB 114) Cohn Child abuse.

Under existing law, evidence of a person's character, such as opinion or specific instances of conduct, is generally not admissible to prove a defendant's conduct on a particular occasion, with specified exceptions. Existing law provides, however, that when a defendant is accused of domestic violence in a criminal action, evidence of the defendant's prior acts of domestic violence may be admitted to prove the defendant's conduct, except as to the findings and declarations of a regulatory agency or when the acts occurred more than 10 years ago or the court exercises its discretion to exclude the evidence of prior acts, as specified.

This bill would provide that when a defendant is accused of child abuse in a criminal action, evidence of the defendant's prior acts of child abuse may be admitted to prove the defendant's conduct, except as specified and subject to an evidentiary hearing. The bill would also define "child abuse" for purposes of that provision and would make other nonsubstantive changes.

Ch. 465 (AB 118) Cohn Protective orders: minor children.

Existing law authorizes the court to grant reasonable visitation rights to a parent unless it is shown that the visitation would be detrimental to the best interest of the child.

Existing law also authorizes any court with jurisdiction over a criminal matter to issue protective orders.

This bill would require that if a criminal protective order has been issued, as specified, a visitation order or a specified custody and visitation order shall make reference to, and acknowledge the precedence of enforcement of, any appropriate criminal protective order. The bill would require the Judicial Council to modify criminal and civil court forms consistent with this provision, on or before July 1, 2006.

This bill would incorporate additional changes in Section 136.2 of the Penal Code proposed by AB 112, AB 1288, and SB 720, to become operative only if any or all of those bills and this bill are chaptered and become effective January 1, 2006, and this bill is chaptered last.

Ch. 466 (AB 217) Vargas Sex offenders: nursing facilities.

Existing law regulates the licensure and operation of health facilities, including long-term health care facilities, as defined. A violation of these provisions is a crime.

Existing law separately requires a person who has committed one or more designated sex crimes to register with the law enforcement agency of the city, county, city and county, or campus in which the person resides.

Existing law requires every person released on probation or parole who is required to register as a sex offender to provide proof of registration to his or her probation officer or parole agent within 6 working days of release on probation or parole, and requires the registering law enforcement agency to provide the registrant with a photocopy of the registration for this purpose, or for purposes of any other provision of law.

Before a person who is required to register as a sex offender is released into a long-term health care facility, this bill would require the Department of Corrections and Rehabilitation, the State Department of Mental Health, or any other official in charge of the place of confinement to notify the long-term health care facility in writing that the person is being released to reside at the facility.

By increasing the duties of local law enforcement, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 467 (AB 429) Chu Temporary restraining orders and protective orders.

(1) Existing law requires a court to order the plaintiff or his or her attorney to deliver a copy of each temporary restraining order or injunction with respect to workplace violence to the law enforcement agencies within the court's discretion as are requested by the plaintiff.

This bill would further provide that, at the request of the plaintiff, such an order shall be served on the defendant, regardless of whether the defendant has been taken into custody, by any law enforcement officer who is present at the scene of reported unlawful violence or a credible threat of violence involving the parties to the proceedings. The bill would also provide that the plaintiff shall provide the officer with an endorsed copy of the order and proof of service that the officer shall complete and send to the issuing court.

The bill would provide that upon receiving information at the scene of an incident of unlawful violence or a credible threat of violence that a protective order has been issued under this provision, or that a person who has been taken into custody is the subject of an order, if the plaintiff or the protected person cannot produce an endorsed copy of the order, a law enforcement officer shall immediately attempt to verify the existence of the order.

The bill would provide that if the law enforcement officer determines that a protective order has been issued, but not served, the officer shall immediately notify the defendant of the terms of the order, obtain the defendant's address, and enforce the order, as specified. The bill would also provide that the law enforcement officer's verbal notice of the terms of the order shall constitute service of the order and sufficient legal notice, as specified. The bill would also require the plaintiff to mail an endorsed copy of the order to the defendant's mailing address provided to the law enforcement officer within one business day of the reported incident of unlawful violence or a credible threat of violence at which a verbal notice of the terms of the order was provided by a law enforcement officer.

By requiring new duties of law enforcement, the bill would impose a state-mandated local program.

(2) Existing law provides for temporary restraining orders or emergency protective orders with respect to domestic violence and elder abuse, as specified. Existing law requires a law enforcement officer, if a protective order has been issued, but not served, to immediately notify the respondent of the terms of the order and, with respect to an order relating to elder abuse, to enforce the order at that time.

This bill would additionally require the officer to notify the respondent of where a written copy of the order can be obtained and, with respect to an order relating to domestic violence, to enforce the order at that time.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 468 (AB 465) Cogdill Controlled substances: iodine.

(1) Existing law generally provides that any manufacturer, wholesaler, retailer, or other person or entity in this state that sells, transfers, or otherwise furnishes to any person or entity in this or any other state any of a list of substances shall submit a report to the Department of Justice of all of those transactions, and shall submit an application to, and obtain a permit for the conduct of that business from, the Department of Justice, as specified. Any person who does not submit a report as required, who submits a false report, or who sells, transfers, or furnishes a substance without a permit is guilty of a crime, punishable as specified.

Existing law does not include iodine or phosphorous acid in the list of substances for which a report must be provided, or a permit to conduct business required, but existing law does make it a misdemeanor for any person to sell or purchase more than 8 ounces of iodine in any 30-day period, other than tincture of iodine, any topical solution containing iodine that is equal to or less than \$100, or iodine sold to specified licensed entities that sell, transfer, or furnish the iodine to a licensed pharmacy, physician, dentist, podiatrist, or veterinarian.

This bill would delete the provision prohibiting the sale or purchase of 8 ounces of iodine in any 30-day period. This bill would instead add iodine, tincture of iodine, and phosphorous acid and its salts to the list of substances with respect to which transactions must be reported and for which a permit to conduct business must be obtained, except in specified circumstances. By increasing the scope of persons to whom existing crimes are applicable, this bill would impose a state-mandated local program upon local government.

(2) Existing law provides that the reporting requirement is not applicable to any manufacturer or wholesaler licensed by the California State Board of Pharmacy, or any retail distributor, such as a grocery store or drug store, that sells, transfers, or otherwise furnishes a substance to specified entities, provided the manufacturer or wholesaler submits records of any suspicious sales or transfers as determined by the Department of Justice.

This bill would provide that the reporting requirement is also not applicable to a state-licensed health care facility that administers or furnishes a substance to its patients, or to the sale, transfer, furnishing, or receipt of any betadine or povidone solution with an iodine content not exceeding 1% in containers of 8 ounces or less, or any tincture of iodine not exceeding 2% in containers of one ounce or less, that is sold over the counter.

(3) Existing law provides that the permit requirement is not applicable to specified entities, including retailers and other persons, that are licensed by the California State Board of Pharmacy and also registered with the federal Drug Enforcement Agency.

This bill would remove retailers and other persons from, and add wholesale distributors to, this exemption. It would provide that the permit requirement is also not applicable to any pharmacist or other authorized person who sells or furnishes a substance upon the prescription of a physician, dentist, podiatrist, or veterinarian; or to any state-licensed health care facility, physician, dentist, podiatrist, veterinarian, or veterinary food-animal drug retailer that administers or furnishes a substance to a patient. The bill would add an exemption from the permit requirement for the sale, transfer, furnishing, or receipt of any betadine or povidone solution with an iodine content not exceeding 1% in containers of 8 ounces or less, or any tincture of iodine not exceeding 2% in containers of one ounce or less, that is sold over the counter.

(4) Existing law provides for criminal penalties to be imposed on any person or entity that engages in specified transactions relating to specified substances where the value of the goods in any transaction exceeds \$100.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would eliminate the element of the above offenses relating to the value of the goods involved. By eliminating an element of an existing crime, this bill would increase the number of cases that may be prosecuted, thereby increasing the local costs of prosecution and incarceration, and thus would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 469 (AB 522) Plescia Automated drug delivery system: Medi-Cal coverage: drugs or other therapies: registered sex offenders.

Existing law provides for skilled nursing and intermediate care facilities to use an automated drug delivery system to store and distribute drugs, and to track the movement of drugs into and out of the system. Existing law regulates the manner in which a pharmacist stocks and oversees the removal of drugs from an automated drug delivery system.

This bill would clarify existing law to define pharmacy services and to require a pharmacist reviewing an order for a drug to check for contraindications and adverse drug reactions. This bill would further clarify existing law to prevent licensed personnel from accessing a different drug or dose of a drug than that approved by a pharmacist.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care services, pursuant to a schedule of health care benefits. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

Existing law requires a person who has committed one or more designated sex crimes to register with the law enforcement agency of the city, county, city and county, or campus in which the person resides. Existing law provides that the Department of Justice shall make available information concerning specified registered sex offenders to the public via an Internet Web site.

This bill would provide that the State Department of Health Services shall not provide or pay for any prescription drug or therapy to treat erectile dysfunction for any Medi-Cal recipient required to register pursuant to these provisions, except to the extent it is required under federal law.

This bill would require the Department of Justice to identify the names of persons required to register under these provisions from a list of persons provided by the requesting agency, and provide those names and other information necessary to verify proper identification, to any state governmental entity responsible for authorizing or providing publicly funded prescription drugs or other therapies to treat erectile dysfunction of these persons.

This bill would authorize the Department of Justice to establish a fee for the above requests.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 470 (AB 857) Bass Vehicles: registration fees: crime prevention programs.

Existing law authorizes, until January 1, 2006, a county to impose a \$1 fee on certain vehicles, upon adoption of a resolution by the county board of supervisors, as specified, in addition to other specified vehicle registration fees. Existing law also imposes in addition to that fee, a \$2 service fee on all commercial vehicles, as specified, upon implementation of the permanent trailer identification plate program, as specified. Existing law continuously appropriates the money generated by these fees to the Controller for disbursement to each county that has adopted a resolution as described above, and limits the expenditure of the money so disbursed to certain purposes related to law enforcement. Existing law, additionally, requires the money, upon appropriation, to be expended to cover the Controller's administrative costs under these provisions.

This bill would extend that repeal date to January 1, 2012.

The bill would make an appropriation by extending to January 1, 2012, the specified provisions that authorize disbursements from continuously appropriated moneys.

The bill would also make an appropriation by requiring the money to be continuously appropriated for the Controller's administrative costs under these provisions.

Ch. 471 (AB 940) Chu Missing persons DNA database.

Existing law requires the Department of Justice to develop a DNA database for all cases involving the report of an unidentified deceased person or a high-risk missing person, as defined. Existing law requires that, until January 1, 2006, the database be funded by a \$2 increase on death certificates issued by a local government agency or by the State of California. Existing law specifies the manner in which these funds shall be used. Under existing law a bill that makes changes in state taxes for the purpose of increasing revenue requires approval by a 2/3 vote of each house of the Legislature.

This bill would delete the January 1, 2006, expiration date for these provisions, and would instead extend the collection of the \$2 increase on death certificates until January 1, 2010, thereby imposing a state tax for purposes of increasing revenue. By requiring the collection of the fee on death certificates issued by local officials, the bill would impose a state-mandated local program.

Existing law allows the Department of Justice to distribute funds to various counties for the purposes of pathology and exhumation as the department deems necessary.

This bill would instead allow the department to distribute funds to those counties for those purposes in a manner consistent with the provisions of law establishing and regulating the DNA database.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 472 (AB 978) Sharon Runner Restraining orders: stalking.

Existing law authorizes courts to issue protective orders and emergency protective orders under various circumstances, including cases of domestic violence, stalking, abuse against elder or dependent adults, victim or witness intimidation, and workplace violence. Existing law also authorizes a court to issue an ex parte order prohibiting disclosure of the address or other identifying information of a party, child, parent, guardian, or other caretaker of a child. The willful disobedience of the terms, as written, of a court order or the intentional and knowing violation of a protective order or stay away order issued as specified, is a misdemeanor.

This bill would require a court to order that any party who is enjoined pursuant to the orders described above be prohibited from taking any action to obtain the address or location of a protected party or his or her family members, caretakers, or guardian, unless there is good cause not to make that order. The bill would also require the Judicial Council to promulgate forms necessary to effectuate those provisions.

Because the willful disobedience of the terms as written of a court order, or the intentional and knowing violation of a protective order or a stay away order issued as specified, is a misdemeanor, the bill would create a new crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 473 (SB 255) Torlakson Vessel registration: fees.

Existing law imposes fees for initial registration and renewal of registration of vessels that includes a fee of \$10 for a 2-year registration.

This bill would increase that fee to \$20.

The bill would require the funds derived from increasing the fee to be allocated, upon appropriation, to the Department of Boating and Waterways for expenditure in support of programs under the department's jurisdiction.

Ch. 474 (AB 1150) La Suer Civil warrants.

(1) Existing law provides that a witness disobeying a subpoena forfeits to the party aggrieved the sum of \$500, and all damages that he or she may sustain by the failure of the witness to attend, which forfeiture and damages may be recovered in a civil action. Existing law also authorizes the court or issuing officer to issue an arrest warrant to bring the witness before the court or officer.

This bill would revise that forfeiture provision to apply to any person failing to appear pursuant to a subpoena or court order. The bill would also establish procedures, as specified, as an alternative to issuing a warrant for contempt, pursuant to which a court may issue an arrest warrant for a witness who failed to appear pursuant to a subpoena or a person who failed to appear pursuant to a court order. The bill would authorize the sheriff to release the person arrested upon his or her promise to appear, would set forth the conditions under which the person arrested may not be released, and would specify the civil assessment for failure to appear upon a promise to appear.

(2) Existing law specifies that every warrant to arrest or commit a witness who fails to appear must be directed to the sheriff of the county where the witness may be, and must be executed by him or her in the same manner as process issued by the superior court.

This bill would delete that provision.

(3) Existing law establishes fees for, among other things, subpoenaing a witness or serving or executing a bench warrant, as specified.

This bill would establish various fees to be collected regarding a warrant for failure to comply with a subpoena or court order, including fees to receive and process the warrant, to cancel the warrant, for an inability to find the person after due diligence, and for the arrest or arrest and release of the person. Specified in forma pauperis fee waiver provisions would apply to that collection.

By imposing new duties on local law enforcement, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 475 (AB 1325) Vargas Motor vehicle speed contest.

(1) Under existing law, it is a misdemeanor to engage in a motor vehicle speed contest, as described, punishable by, among other things, imprisonment in a county jail for not less than 24 hours nor more than 90 days.

This bill would make it a misdemeanor punishable by imprisonment in a county jail for not less than 30 days nor more than 6 months, or a specified fine, or by both that fine and imprisonment, if a person is convicted of engaging in a motor vehicle speed contest and that violation proximately causes bodily injury to a person other than the driver. Because this would create a new crime, the bill provision would impose a state-mandated local program.

(2) Under existing law, a person convicted of a violation of the offense described in (1) that occurred within 5 years of the date of a prior offense that resulted in a conviction is punishable by imprisonment in a county jail for not less than 4 days nor more than 6 months and by a specified fine.

This bill would make it a misdemeanor punishable by imprisonment in a county jail for not less than 30 days nor more than 6 months and the imposition of a fine if a person is convicted of engaging in the above-described offense within the 5-year period and the most recent offense proximately causes bodily injury to a person other than the driver.

The bill would make it a misdemeanor or felony and would require the imposition of a specified fine if a person is convicted of engaging in the above-described offense within the described 5-year period and the most recent violation proximately causes serious bodily injury, as defined, to a person other than the driver.

The bill would make conforming changes in related provisions of existing law.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 476 (AB 1495) Canciamilla Public records: infrastructure security.

The California Public Records Act provides that, except for exempt records, every state or local agency, upon request, shall make records available to any person upon payment of fees to cover costs. Among those records that are exempt from disclosure under the act is a document prepared by a state or local agency that assesses its vulnerability to terrorist attack or other criminal acts intended to disrupt the public agency's operation and that is for distribution or consideration in a closed session.

This bill would, instead, exempt from disclosure critical infrastructure information, as defined, that is voluntarily submitted to the California Office of Homeland Security for use by that office, including the identity of the person or entity submitting the information. The bill would also state findings and declarations of the Legislature for limiting the public's right of access to specified documents and records relating to economic infrastructure.

This bill would make other technical changes.

This bill would incorporate additional changes in Section 6254 of the Government Code, proposed by SB 922, to become operative only if SB 922 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 477 (SB 33) Battin Child sexual abuse.

Existing law provides that it is a felony for persons within the degrees of consanguinity within which marriages are declared by law to be incestuous and void to commit fornication or adultery with one another.

This bill would provide that it is a felony for persons within specified degrees of consanguinity who are 14 years of age or older to commit fornication or adultery with one another.

Existing law provides that any person convicted of committing any lewd or lascivious act upon a child under 14 years of age shall not have his or her sentence suspended until the court obtains a report as to the mental condition of that person from a reputable psychiatrist or psychologist, or from a recognized treatment program.

This bill would delete the option of receiving a report from a recognized treatment program.

Existing law provides that, in lieu of prosecuting a person suspected of committing an act of abuse or neglect involving a minor victim, the prosecuting attorney may refer that person for counseling and psychological treatment.

This bill would specify that these provisions only apply to a person suspected of committing physical abuse or neglect.

Existing law also provides that, in lieu of trial, the prosecuting attorney may make a motion to defer entry of judgment with respect to any crime charged in which a minor is a victim of an act of molestation or sexual abuse, upon written agreement between the prosecuting

attorney and the suspect, if he or she is a family member of the victim, the person has no prior violent or sexual felony convictions, and no adverse diversion or counseling history, as specified, provided that rehabilitation is feasible, there is no threat of harm to the minor, the charged offense is not a lewd or lascivious act or any other sexual offense committed by means of force, violence, duress, menace, or fear of immediate and unlawful bodily injury, the defendant pleads guilty and completes an approved treatment program, 5 years after which, the court shall dismiss the charges against the defendant.

This bill would repeal these provisions.

Existing law provides that a person who is convicted of committing lewd and lascivious acts upon a child or engaging in continuous sexual abuse of a child, if the violation involved more than one victim, substantial sexual conduct with a victim who was under 14 years of age, or the use of obscene matter depicting sexual conduct, as specified, shall be ineligible for probation, a suspended sentence, nor shall any of the charges against him or her be dismissed, as specified, unless the court makes several findings including that the defendant is the victim's parent or relative, grant of probation is in the best interest of the child, rehabilitation of the defendant is feasible, and there is no threat of physical harm to the child.

This bill would instead provide that probation shall not be granted to, nor shall the execution or imposition of sentence be suspended for any person convicted of committing these offenses if the existence of any fact required to prove the allegation is alleged in the accusatory pleading and either admitted by the defendant or found to be true by the trier of fact. Further, for the existence of any fact relating to lewd and lascivious acts against multiple victims, in order for these provisions to apply, the allegation must specifically reference these provisions. The bill would specify the conditions under which a person convicted of lewd and lascivious acts upon a child or continuous sexual abuse of a child may be granted probation.

This bill would make other conforming changes.

Because this bill would increase local incarceration costs and change the punishment for a crime, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 478 (SB 104) Ortiz Public health orders: enforcement.

Existing law authorizes the Director of Health Services and local health officers to issue orders to enforce various health and safety requirements.

This bill would authorize local peace officers to enforce the orders of the State Department of Health Services and of local health officers issued for the purpose of preventing the spread of any contagious, infectious, or communicable disease and would authorize the state director and the local health officer to consider whether a request for enforcement assistance would necessitate advising regarding measures to be taken to prevent infection of enforcement officers when requesting assistance in enforcement of their orders.

Existing law establishes procedures and requirements to govern the allocation to, and expenditure by, local health jurisdictions of federal funding received for the prevention of, and response to, bioterrorist attacks and other public health emergencies. Existing law provides that these procedures apply only when local health jurisdictions are designated by a federal or state agency to manage the funds for public health preparedness and response to bioterrorist attacks and other public health emergencies, pursuant to a federally approved plan.

Existing law also provides that federal funding received by the State Department of Health Services for bioterrorism preparedness and emergency response is subject to appropriation in the annual Budget Act commencing with the 2003-04 fiscal year.

This bill would deem moneys made available in the 2004-05 Budget Act for bioterrorism preparedness available for expenditure and encumbrance until August 30, 2006.

Ch. 479 (SB 111) Alquist Statute of limitations: sex crimes.

Existing law requires that prosecution for certain felony sex offenses commence within 10 years after commission of the offense.

This bill would instead state that prosecution for certain felony sex offenses that are alleged to have been committed when the victim was under the age of 18 years may be commenced any time prior to the victim's 28th birthday.

Existing law specifies that a criminal complaint may be filed within one year of the date of a report to a responsible adult or agency, as defined, by a child who is the victim of certain sex crimes, or within one year of the date of a report to a California law enforcement agency by a person under 21 years of age who is the victim of certain sex crimes.

This bill would repeal those provisions.

Ch. 480 (SB 138) Maldonado Criminal procedure: closed-circuit testimony.

Under existing law, in any criminal proceeding the court may order that the testimony of a child 13 years of age or younger be taken by contemporaneous examination and cross-examination in another place and out of the presence of the judge, jury, defendant or defendants, and attorneys, and communicated to the courtroom by means of 2-way or one-way closed-circuit television if the court makes certain findings. Those findings include that the minor's testimony will involve a recitation of the facts of either an alleged sexual offense committed on the minor or a violent felony of which the minor is a victim, and that the minor witness would be unavailable to testify due to the impact of specified threats, defense conduct, or circumstances of the crime but for the closed-circuit procedure. Existing law specifies the persons that may be physically present for the closed-circuit testimony.

This bill would expand these provisions to apply to cases involving specified child abuse and endangerment charges. It would also permit a court, when a defendant has been charged with a child abuse or sex offense specified in these provisions, to order that the testimony of a child victim 13 years of age or younger be taken by means of a closed-circuit television as specified in this law if the court determines that (1) testimony by the minor in the presence of the defendant would result in the child suffering serious emotional distress so that the child would be unavailable as a witness, or (2) the child would be unavailable as a witness for specified reasons. The bill would add any technicians necessary to operate the equipment to the persons who may be physically present for the closed-circuit testimony.

Ch. 481 (SB 159) Runner Inmates: health care services.

Existing law authorizes the Department of Corrections and Rehabilitation to contract with providers of emergency health care services. Existing law specifies that hospitals and ambulance or other nonemergency response services that do not contract with the department shall provide those services at the Medicare rate.

This bill would apply these provisions to county sheriffs, chiefs of police, and directors or administrators of local departments of correction, except that it would specify that hospitals that do not contract with those local law enforcement agencies shall provide their services at a rate equal to 110% of the hospital's actual costs, as specified.

This bill would prohibit a county sheriff or police chief from releasing inmates from custody for the purpose of seeking medical care, with the intent to rearrest, unless the hospital determines the action would enable it to collect from a third-party source. By imposing new duties on local law enforcement, the bill would impose a state-mandated local program. Further, this bill would direct specified stakeholders to convene a working group to assist in resolving issues affecting cost and emergency health care for inmates.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The provisions of the bill would be repealed as of January 1, 2009.

#### Ch. 482 (SB 444) Ackerman Crime.

Existing law, as amended by initiative, provides that any person who participates in any criminal street gang with knowledge that its members engage in a pattern of criminal gang activity and who promotes felonious criminal conduct shall be punished, as specified. Existing law defines a pattern of criminal gang activity as the commission, attempt to commit, conspiracy to commit, solicitation for, or conviction of two or more listed offenses, as specified. Existing law authorizes the Legislature to amend these provisions with a 2/3 vote of each house.

This bill would add various crimes relating to identity theft, and the manufacture and sale of false identification and access cards to those offenses which if committed by members of the criminal street gang establish a pattern of criminal gang activity for purposes of these provisions, however, such a pattern would not be established by commission of one or more of these offenses alone, in addition, an offense already listed in existing law would also have to have been committed.

Because this bill would change the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 483 (SB 594) Torlakson Custody and visitation: sex offenders.

Existing law prohibits a court from granting custody of, or unsupervised visitation with, a child to a registered sex offender if the victim was a minor, unless the court finds that there is no significant risk to the child and states its reasons in writing or on the record.

This bill would expand that provision to prohibit a court from granting custody of, or unsupervised visitation with, a child to a person if that person resides with a registered sex offender whose victim was a child. The bill would also provide that an existing custody or visitation order shall be modified or terminated consistent with that provision, as specified. The bill would also include related findings and declarations of the Legislature.

The bill would incorporate additional changes in Section 3030 of the Family Code proposed by AB 220, to be operative only if AB 220 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

#### Ch. 484 (SB 619) Speier Electronic monitoring of offenders.

Existing law authorizes probation as an alternative to incarceration for various offenses.

This bill would authorize county probation departments to use global positioning system technology to supervise persons on probation, as specified.

Existing law authorizes the release of prisoners to parole. Existing law also authorizes electronic monitoring of certain parolees.

This bill would add new provisions authorizing the Department of Corrections and Rehabilitation to use global positioning system technology to supervise persons on parole, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 485 (SB 719) Romero Police pursuits.

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

(1) Existing law provides for compensation to crime victims, as specified, from the Restitution Fund, a continuously appropriated fund.

This bill would include as qualifying as a crime victim for those purposes, injury or death caused by any party where a peace officer is operating a motor vehicle in an effort to apprehend a suspect, and the suspect is evading, fleeing, or otherwise attempting to elude the peace officer.

By expanding the uses of a continuously appropriated fund, this bill would make an appropriation.

(2) Existing law requires the Commission on Peace Officer Standards and Training to implement a course or courses of instruction for the training of law enforcement officers in the handling of high-speed vehicle pursuits and to develop uniform, minimum guidelines for adoption by California law enforcement agencies for response to high-speed vehicle pursuits, as specified. Existing law expresses the intent of the Legislature that all local law enforcement agencies adopt those guidelines as a minimum for the agency's pursuit policy.

This bill, instead, would express the intent of the Legislature that each law enforcement agency adopt, promulgate, and require regular and periodic training consistent with an agency's specific pursuit policy that, at a minimum, complies with the commission's guidelines.

(3) Existing law specifies certain content for the California Driver's Handbook and examinations for a driver's license.

This bill would require the Department of Motor Vehicles, upon updating the handbook, to include at least one question in any of the noncommercial driver's license examinations of an applicant's knowledge and understanding to verify that the applicant has an understanding of the risks and punishments associated with eluding a pursuing peace officer's motor vehicle.

(4) Existing law makes it a misdemeanor, punishable by imprisonment in a county jail not exceeding 6 months, for any person while operating a motor vehicle to intentionally evade and willfully flee or otherwise attempt to elude a pursuing peace officer's motor vehicle or bicycle under certain conditions.

This bill would make that offense a misdemeanor punishable by imprisonment in a county jail not exceeding one year. By increasing the punishment for a crime, this bill would impose a state-mandated local program.

(5) Existing law makes it a misdemeanor punishable by confinement in a county jail for not more than one year or a felony punishable by imprisonment in the state prison for 3, 4, or 5 years or a specified fine for any person who commits the offense described in (4) above and proximately causes serious bodily injury, as defined, or death to any person.

This bill would increase the term of imprisonment in the state prison as follows:

(a) A term of 3, 5, or 7 years or the specified fine, or both the fine and imprisonment where the offense involves serious bodily injury.

(b) A term of 4, 6, or 10 years in the state prison where the offense involves a death.

(6) Existing law establishes the California Traffic Safety Program, to include state and local programs, as specified.

This bill would require all traffic safety programs that receive state funds and that include public awareness campaigns involving emergency vehicle operations to include in the public awareness campaign, information on the risks to public safety of peace officer motor vehicle pursuits, and the penalties that may result from evading a peace officer.

(7) Existing law requires each state and local law enforcement agency to report to the Department of the California Highway Patrol, on a form approved by the department, certain specific vehicle pursuit data, including, but not limited to, certain required data.

This bill instead would require the department to develop and approve a paper or electronic form that includes additional data, and would require that the report be made to the department no later than 30 days following a police pursuit, thereby imposing a

state-mandated local program by increasing the level of services imposed on local law enforcement agencies.

The bill would additionally require the Department of the California Highway Patrol to submit annually to the Legislature a report regarding motor vehicle pursuits.

(8) Existing law provides that any public agency employing peace officers that adopts a written policy on vehicular pursuits that meets certain minimum standards, as specified, shall be immune from liability for civil damages for personal injury to or death of any person or damage to property resulting from the collision of a vehicle being operated by an actual or suspected violator of the law who is being has been, or believes he or she is being or has been pursued by a peace officer employed by the public entity in a motor vehicle. Existing law makes the adoption of a vehicle pursuit policy pursuant to these provisions discretionary.

This bill would revise the minimum standards required for a written policy for the safe conduct of motor vehicle pursuits. These provisions would become operative on July 1, 2007.

(9) This bill also would incorporate additional changes in Section 13955 of the Government Code, to become operative only if AB 22 and this bill are both enacted and become effective on or before January 1, 2006, and this bill is enacted last.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 486 (SB 723) Denham Sexually violent predators: conditional release program.

Existing law requires the Director of Corrections, prior to the release of a person from custody who has been convicted for certain crimes of a sexual nature against 2 or more victims, to refer the person to the State Department of Mental Health for evaluation. Existing law authorizes civil commitment, as a sexually violent predator, to the custody of the State Department of Mental Health for treatment of the person's diagnosed mental disorder if the person is adjudicated to be likely to engage in sexually violent criminal behavior if discharged.

Existing law permits conditional release for one year of community treatment if, after a hearing, the court determines that the committed person does not pose a danger. Existing law requires that a nonparolee who is conditionally released under these provisions be placed in the county of domicile, as defined, unless the court finds that extraordinary circumstances require otherwise.

Existing law establishes provisions regulating the conditions for community release of inmates on parole.

This bill would, notwithstanding any provision of law, prohibit sexually violent predators released under the conditional release program from being placed within  $\frac{1}{4}$  mile of any public or private school providing instruction in kindergarten or any of grades 1 to 12, inclusive, if the person has been convicted of certain offenses or the court finds that the person has a history of improper sexual conduct with children.

This bill would incorporate additional changes in Section 6608.5 of the Welfare and Institutions Code, to become operative only if AB 893 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

Ch. 487 (SB 734) Torlakson Controlled substances.

(1) Existing law provides that a prescription for a Schedule II controlled substance for use by a patient who has a terminal illness shall meet specified requirements.

This bill would provide that a prescription for a controlled substance for use by a patient who has a terminal illness may be written on a form that does not contain certain other features, as specified.

(2) Existing law provides that when a practitioner is charged with a felony violation of specified controlled substance offenses, the court, upon the motion of a law enforcement agency, shall issue an order requiring the practitioner to surrender any prescription forms in his or her possession at the time set in the order.

This bill would require the court, in its order, to also prohibit the practitioner from obtaining, ordering, or using any additional prescription forms. The bill would impose a state-mandated local program by requiring the law enforcement agency obtaining the order to notify the Department of Justice of the order. The bill would make clarifying and conforming changes to this and related provisions.

(3) Existing law provides that prescription forms for controlled substance prescriptions shall be obtained from security printers approved by the Board of Pharmacy; the board may approve security printer applications after the applicant has provided specified information and the applicant's fingerprints, in a manner specified by the board, for the purpose of completing state and federal criminal background checks.

This bill would revise the latter provision to provide instead that the prescription forms for controlled substance prescriptions shall be obtained from security printers approved by the Department of Justice and that the department shall provide the applicant with the means and direction to provide fingerprints and related information, in a manner specified by the department, for the purpose of completing state, federal, or foreign criminal background checks. The bill would provide that the applicant shall submit his or her fingerprint images and related information to the department for the purpose of the department obtaining information as to the existence and nature of a record of specified state, federal, or foreign level convictions and arrests. Requests for federal level criminal offender record information received by the department shall be forwarded to the Federal Bureau of Investigation by the department. The bill would provide that the department shall assess the applicant a fee sufficient to cover all processing or maintenance costs of the department associated with providing the background checks, as specified.

(4) Existing law provides that the Board of Pharmacy or the Department of Justice may deny a security printer application for specified reasons, including that the applicant has been convicted of a crime.

This bill would provide that the Department of Justice, but not the Board of Pharmacy, may deny the security printer application for the specified reasons, including if any individual owner, partner, corporate officer, manager, agent, representative, employee, or subcontractor for the applicant who has direct access, management, or control of controlled substance prescription forms has been convicted of a crime. The bill would also add as a condition for approval as a security printer that the applicant authorize the department to make any examination of books and records of the applicant, or to visit and inspect the applicant during business hours, to the extent deemed necessary by the board or department to properly enforce the provisions relating to security printers. An approved applicant would be required to submit an exemplar of a controlled substance prescription form, with all security features, to the department within 30 days of initial production.

(5) Existing law provides that prescription forms shall be printed with specified features.

This bill would provide that prescription forms shall also include the feature of an identifying number assigned to the approved security printer by the Department of Justice. The bill would also require the forms to set forth specified information, as appropriate, with respect to multiple prescribers.

(6) Existing law provides that controlled substances in Schedule III, IV, or V may be dispensed upon an oral or electronically transmitted prescription.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would require persons who transmit or receive any oral or electronically transmitted prescription to ensure its integrity and confidentiality.

(7) Existing law provides for the electronic monitoring of the prescribing and dispensing of Schedule II controlled substances pursuant to the Controlled Substance Utilization Review and Evaluation System (CURES) program.

This bill would provide that the Board of Pharmacy shall, contingent upon the availability of adequate funds, evaluate the viability of implementing real time reporting, as defined, and access to data on controlled substances in the operation of CURES. This bill would provide that these provisions shall be implemented to the extent that sufficient nonstate funds are received to cover the costs to the Board of Pharmacy of providing staff and for the preparation of the report; and that any nonstate funds donated for that purpose are appropriated to the board for that purpose.

(8) Existing law generally provides that a violation of the provisions relating to the prescription of controlled substances is a misdemeanor, punishable as specified. This bill, to the extent it revises existing crimes, would impose a state-mandated local program upon local governments.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 488 (SB 963) Ashburn Home detention: electronic monitoring.

Existing law permits counties to authorize a home detention program using electronic monitoring, as specified.

This bill would authorize the use of global positioning system devices and other supervising devices for those purposes.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 489 (SB 1088) Bowen Family law: motions and orders.

Existing law prohibits ex parte communications involving certain administrative proceedings.

This bill would prohibit, in the absence of a stipulation to the contrary, ex parte communications between court-appointed or court-connected mediators or evaluators and the court, and between court-appointed or court-connected mediators or evaluators and any party or any attorney for a party to an action, except as specified. The bill would provide specified exceptions from these provisions. The bill would require the Judicial Council to adopt a related rule of court by July 1, 2006.

#### Ch. 490 (AB 924) Canciamilla Ammonium nitrate.

Existing law generally regulates fertilizer materials and provides for the licensure of individuals who manufacture or distribute fertilizing materials.

This bill would define ammonium nitrate fertilizer, as specified. This bill would require persons who manufacture or distribute ammonium nitrate fertilizer, or who intend to do so, to inform the Secretary of Food and Agriculture and to obtain a license identifying him or her as a manufacturer or distributor of ammonium nitrate. This bill would require licensees that manufacture, distribute, or sell ammonium nitrate to maintain specified information with respect to sales of that material that shall be made available only to the secretary and public safety officials upon request. This bill would also require the secretary to notify each person so licensed of the duty to maintain these records.

Because a violation of provisions relating to fertilizing materials is a misdemeanor, by changing the definition of a crime this bill would impose a state-mandated local program.

This bill would make other conforming changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 491 (SB 65) Committee on Budget and Fiscal Review Education finance.

(1) Existing law requires a revenue limit to be calculated for each school district and for each county superintendent of schools, and requires the amount of the revenue limit to be adjusted for various factors. Existing law requires the Superintendent of Public Instruction to take into account the revenue limit of a school district and a county superintendent of schools when apportioning funding to school districts and to county superintendents of schools. Existing law reduces the revenue limit for the 2004-05 fiscal year by a deficit factor of 0.323% for both school districts and for county superintendents of schools, further reduces that revenue limit for those entities for the 2003-04 and 2004-05 fiscal years by a deficit factor of 1.826%, further reduces that revenue limit for the 2005-06 and 2006-07 fiscal years by a deficit factor of 0.909% for school districts and 0.901% for county superintendents of schools.

This bill would, instead, reduce the revenue limit for each school district for the 2005-06 and 2006-07 fiscal years by a 0.892% deficit factor, and for each county superintendent of schools for the 2005-06 and 2006-07 fiscal years by a 0.898% deficit factor.

(2) Existing law requires the Superintendent of Public Instruction to calculate for each special education local plan area an amount based on (a) the number of children and youth residing in foster family homes and foster family agencies, (b) the licensed capacity of group homes licensed by the State Department of Social Services, and (c) the number of children and youth ages 3 to 21, inclusive, referred by the State Department of Developmental Services who are residing in certain skilled nursing or intermediate care facilities and the number of youth ages 18 to 21, inclusive, referred by the State Department of Developmental Services who are residing in certain community care facilities.

This bill would also include in the above calculation those children and youth, ages 3 to 21 years, inclusive, residing in small family homes. The bill would also require the above calculation for children and youth, ages 3 to 21 years, inclusive, rather than for youth ages 18 to 21 years, inclusive, referred by the State Department of Developmental Services who are residing in certain community care facilities.

(3) Existing law, for the purpose of computing an equalization adjustment for special education local plan areas, requires the Superintendent of Public Instruction to make certain computations to determine the statewide target amount per unit of average daily attendance for each special education local plan area.

This bill would revise these computations, as specified, for purposes of computing this adjustment for the 2005-06 fiscal year and each fiscal year thereafter.

(4) Existing law provides that a school district may not be required to implement or give effect to certain statutes, or portions thereof, during any fiscal year and for the period immediately following that fiscal year for which the Budget Act has not been enacted for the subsequent fiscal year if the statute, or portion thereof, has been specifically identified by the Legislature in the Budget Act for the fiscal year as being one for which reimbursement is not provided for that fiscal year.

This bill would, in addition, provide that a school district may not be required to implement or give effect to matters identified by the test claim number utilized by the Commission on State Mandates.

(5) Existing law, Chapter 38 of the Statutes of 2005, the Budget Act of 2005, make appropriations for the support of state government during the 2005-06 fiscal year.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would amend the Budget Act of 2005 by revising items of appropriation for support of the State Department of Education and the Department of Finance relating to the Comprehensive School Reform Program, adult education, special education instruction, the Early Education Program for Individuals with Exceptional Needs, School Safety Block Grants, and other various purposes relating to public education.

(6) Existing law appropriates \$605,094,000 from the General Fund to the State Department of Education for expenditure during the 2006-07 fiscal year, in specified amounts, for apprentice programs, supplemental instruction, regional occupational centers and programs, home-to-school transportation, the Gifted and Talented Pupil Program, the Targeted Instructional Improvement Block Grant, adult education, community day schools, categorical programs for charter schools, the School Safety Program, and the Pupil Retention Block Grant, appropriates \$200,000,000 for the 2006-07 fiscal year to the Board of Governors of the California Community Colleges for general apportionments, as specified in the Budget Act of 2005. Existing law appropriates \$16,811,000 for the 1995-96, 1996-97, and 2002-03 fiscal years to the Controller to pay for prior year state obligations for K-12 and community college mandate claims and interest, as provided. Existing law provides that these funds are deemed to be in partial satisfaction of certain outstanding balances for the 1995-96, 1996-97, and 2002-03 fiscal years, and in lieu of certain amounts, including \$101,811,000 that would otherwise be appropriated, as specified.

This bill would, instead, provide that these funds are deemed to be in partial satisfaction of certain outstanding balances and in lieu of \$16,811,000 that would otherwise be appropriated, as specified.

Existing law provides that for the purposes of satisfying the minimum annual funding obligation for school districts and community college districts required under the California Constitution, \$6,811,000 of these amounts are General Fund revenues appropriated for school districts for the 1995-96 fiscal year, as specified.

Existing law provides that for the purposes of satisfying the minimum annual funding obligation for school districts and community college districts required under the California Constitution, \$9,029,000 of these amounts are General Fund revenues appropriated for school districts for the 1996-97 fiscal year, as specified, and \$971,000 of these amounts are General Fund revenues appropriated for school districts for the 1996-97 fiscal year, as specified.

This bill would, instead, provide that, for the purposes of satisfying the minimum annual funding obligation for school districts and community college districts required under the California Constitution, \$10,000,000 of these amounts are General Fund revenues appropriated for community college districts, as defined, for the 1995-96 fiscal year.

(7) Existing law, the Budget Acts of 2000, 2001, 2002, 2003, and 2004, appropriates certain funds for purposes of Internet connectivity and network infrastructure for schools offering kindergarten and grades 1 to 12, inclusive, and county offices of education.

This bill would reappropriate these funds, thereby creating an appropriation, and make those funds available for expenditure by the Imperial County Office of Education consortium to continue management and operation of the high-speed network during the 2005-06 fiscal year, with certain requirements. The bill would also require the Joint Legislative Audit Committee to conduct an audit of the K-12 High Speed Network, as specified.

(8) This bill would also make various technical, nonsubstantive changes to existing law.

(9) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 492 (SB 112) Ortiz Refugee social services.

Under existing law, the State Department of Social Services must require that a county's costs in administering employment-related and English language training programs funded by certain program funds derived from the federal Refugee Act of 1980 not exceed the percentage for county administrative costs permitted by the department in administering the

Refugee Targeted Assistance Program. Existing law requires the department to allocate all social services funds derived from the act, after setting aside state administrative funds, and all federal targeted assistance funds received by the department, to each eligible county in the same proportion that the number of refugees on aid in each eligible county bears to the total number of refugees on aid in all eligible counties. Existing law defines “aid” and “eligible county” for these purposes.

This bill would revise these provisions to require the department, in allocating these funds, to assign differential weights for refugees, based on the length of time they have resided in the United States. The bill would make conforming changes in the applicable definitions.

The bill would instead require the department, after setting aside the necessary state administrative funds, to allocate all federal targeted assistance funds received by the department to the counties designated by the federal government as eligible, in the same way funds are allocated under a federal formula.

#### Ch. 493 (SB 190) Cedillo Community clinics.

Existing law, the Cedillo-Alarcon Community Clinic Investment Act of 2000 (the Cedillo-Alarcon Act), authorizes the California Facilities Financing Authority to award grants to eligible clinics for financing capital outlay projects. Existing law establishes the California Health Facilities Fund and continuously appropriates the fund to the authority for health facility financing purposes.

The Cedillo-Alarcon Act is to be implemented only to the extent that funds are appropriated for those purposes in the Budget Act of 2000.

This bill would remove that restriction, thereby making an appropriation, and would make conforming changes.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 494 (SB 224) Chesbro Health facilities: construction plans.

The existing Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983 requires design and construction standards for hospital buildings that house patients who have less than the capacity of normally healthy persons to protect themselves, and that must be reasonably capable of providing services to the public after a disaster. The act requires the Office of Statewide Health Planning and Development (OSHDP) to approve or reject all plans for the construction or alteration of a hospital building, but authorizes OSHPD to exempt from that review or expedite the review for certain projects. Existing law requires projects for the construction or alteration of hospital buildings and skilled nursing and intermediate care facilities that are single-story, wood-frame or light steel frame construction to be exempt from plan review and inspection by OSHPD prior to construction if the facility demonstrates to OSHPD by written description of the project that specified conditions are met.

Until January 1, 2009, this bill would require OSHPD to establish a plan review project that would exempt multistory hospital buildings from plan review and inspection by OSHPD if the facility demonstrates to OSHPD by written description of the project that those same specified conditions are met. The bill would require OSHPD to prepare and submit to the health policy committees of the Senate and Assembly a comprehensive report of the plan review project by March 1, 2008.

Existing law authorizes the governing authority of a hospital to request OSHPD to perform plan review and building inspection services for any building where outpatient clinical services of a licensed health facility are provided that is separated from a building in which hospital services are provided. If OSHPD agrees to perform those services, existing law requires OSHPD to charge an amount equal to its standard fee for the construction and alteration of hospital buildings.

This bill would instead require OSHPD to perform those services upon that request.

Ch. 495 (SB 402) Campbell Telecommunications.

Under existing law, the Federal Communications Commission licenses and partially regulates providers of commercial mobile radio service, including providers of cellular radiotelephone service, broadband Personal Communications Services (PCS), and digital Specialized Mobile Radio (SMR) services (collectively, mobile telephony service providers). Under existing law, no state or local government may regulate the entry of, or the rates charged by, any commercial mobile radio service, but is generally not prohibited from regulating the other terms and conditions of commercial mobile radio service.

Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including telephone corporations. Existing law authorizes the commission to regulate telecommunications services and rates of telephone corporations, except to the extent regulation of commercial mobile radio service is preempted by federal regulation.

Existing law prohibits a telephone corporation selling or licensing lists of residential subscribers, from including the telephone number of any subscriber assigned an unpublished or unlisted access number, as defined, without his or her written waiver of this protection. Existing law prohibits a provider of mobile telephony services, as defined, or any affiliate or agent of the provider, providing the name and dialing number of a subscriber for inclusion in a directory or directory database, from including the dialing number of any subscriber without first obtaining the express consent of that subscriber. Existing law establishes certain requirements for the provider's form for obtaining the subscriber's express consent, including that the form be a separate document that is not attached to any other document, that the form be signed by the subscriber, and if the subscriber may be billed for unsolicited calls or text messages from a telemarketer, a requirement that the form unambiguously disclose that by consenting to having his or her dialing number included in a publicly available directory, the subscriber may incur additional charges for receiving unsolicited calls or text messages.

This bill would revise the existing requirements for a provider of mobile telephony services to obtain the subscriber's express consent for inclusion of the dialing number of the subscriber in a directory, by additionally allowing the express consent to be an affirmative response made on a separate field on an Internet Web site where there is no default. The bill would provide that, if express consent is given in this manner, the provider of mobile telephony services would be required to send a confirmation notice to the subscriber's electronic mail address, or to a subscriber's postal mail address should the subscriber not have an electronic mail account.

Existing law prohibits a subscriber from being charged for making the choice to not be listed in a directory.

This bill would instead prohibit a subscriber from being charged for making the choice to not be listed in a publicly available directory assistance database.

Ch. 496 (SB 435) Hollingsworth Housing: density bonuses.

The Planning and Zoning Law requires, when a developer of housing proposes a housing development within the jurisdiction of the local government, that the city, county, or city and county provide the developer with a density bonus and other incentives or concessions for the production of lower income housing units or the donation of land within the development if the developer meets certain requirements, including a requirement that the developer agrees to construct a specified percentage of the total units for specified income households or qualifying residents.

This bill would include within those eligibility requirements the construction of a mobilehome park that limits residency based on age requirements for housing for older persons and the construction, for persons and families of moderate income, of a community apartment project and a stock cooperative.

The local administrative requirements imposed by the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 497 (SB 453) Poochigian Local law enforcement.

(1) Existing law establishes the Supplemental Law Enforcement Services Fund, specifies the purposes for which money in the fund may be expended, and requires by March 1 of each year, that the Legislative Analyst's Office report to the Legislature on the type of expenditures made by local law enforcement agencies in the previous fiscal year, and the effects of those expenditures on law enforcement and public safety, as specified.

This bill would eliminate the reporting requirement.

(2) Existing law establishes the Central Valley Rural Crime Prevention Program, a program addressing agricultural and rural based crime in specified counties. Existing law provides those provisions will become inoperative as of July 1, 2005, and be repealed as of January 1, 2006.

This bill would extend the operative date of those provisions to July 1, 2009, and the repeal date to January 1, 2010.

Existing law requires a cost-benefit analysis be prepared by each county participating in the program, as specified, and submitted to the Legislative Analyst by June 30, 2001. Existing law also requires the Legislative Analyst to conduct a cost-benefit analysis of the program, to analyze information submitted by each county, and to report to the Legislature by December 31, 2001.

This bill would repeal those provisions.

Existing law provides an appropriation of \$3,541,000 in the Budget Act of 1999 to the specified counties to fund the program.

This bill would express the intent of the Legislature regarding apportionment of any funds appropriated for the program to the specified counties.

Existing law provides an appropriation of \$100,000 in the Budget Act of 1999 for the Legislative Analyst for costs of preparing an evaluation of the Central Valley Rural Crime Prevention Program for purposes of the cost-benefit analysis of the report due to the Legislature by December 31, 2001, as specified.

This bill would repeal those provisions.

Existing law conditions appropriation of funds to the specified counties upon compliance with certain uniform procedures for participating in the program.

This bill would renumber the code section containing these provisions.

This bill would make other technical changes.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 498 (SB 569) Torlakson Public postsecondary education: California State University and University of California: disclosure of alumni names, addresses, and electronic mail addresses.

Existing law establishes the California State University, administered by the Trustees of the California State University, and the University of California, administered by the Regents of the University of California, as 2 of the segments of public postsecondary education in this state. Existing law establishes the Hastings College of the Law, under the governance of the Board of Directors of the Hastings College of the Law, within the University of California.

This bill would prescribe criteria for the disclosure of the names and addresses of alumni of the California State University, the University of California, and the Hastings College of the Law. The bill would require that the names, addresses, and electronic mail addresses of alumni be disclosed only to provide those persons with informational materials relating to the university and its programs and activities; to provide those persons, or the trustees, auxiliary organizations of the California State University, as defined, the regents, the board

of directors, or the alumni associations with beneficial commercial opportunities; or to promote and support the educational mission of the university, the trustees, the regents, the board of directors, or the alumni associations.

The bill would authorize this disclosure only if the trustees, auxiliary organizations, regents, board of directors, or the alumni associations, have a written agreement with a business, as defined, that maintains control over this data that requires the business to maintain the confidentiality of the names, addresses, and electronic mail addresses of the alumni, that requires that the respective universities retain the right to approve or reject any purpose for which the private information is to be used by the business and to review and approve the text of mailings sent to alumni pursuant to the bill, and that prohibits the business from using the information for any purposes other than those described, and the disclosure of alumni names, addresses, and electronic mail addresses does not include the names and addresses of alumni who have directed the trustees, regents, or board of directors, or an alumni association or auxiliary organization, not to disclose their names, addresses, or electronic mail addresses.

The bill would require the respective universities to make available to their alumni a specified form or an alternative notice, including specified information, in a mailing or in an Internet posting, as prescribed, before alumni names, addresses, and electronic mail addresses could be disclosed.

The bill would apply to the University of California only to the extent that the regents act, by resolution, to make it applicable. The bill would apply to the Hastings College of the Law only to the extent that the board of directors acts, by resolution, to make it applicable.

The bill would specify that its provisions would be repealed as of January 1, 2011.

Ch. 499 (SB 621) Speier Memoranda of understanding: addenda and posting.

(1) Under the Ralph C. Dills Act, a provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees that requires the expenditure of funds does not become effective unless approved by the Legislature in the annual Budget Act.

This bill would require the Department of Personnel Administration to provide any side letter, appendix, or other addendum to a properly ratified memorandum of understanding that requires the expenditure of \$250,000 or more related to salary and benefits and that is not already contained in the original memorandum of understanding or the Budget Act to the Joint Legislative Budget Committee. This bill would require the Joint Legislative Budget Committee within 30 days after receiving the side letter, appendix, or other addendum to determine if it presents substantial additions that are not reasonably within the parameters of the original memorandum of understanding and thereby requires legislative action to ratify it.

This bill would require the Department of Personnel Administration to expressly identify the side letter, appendix, or other addendum to a properly ratified memorandum of understanding that does not require the expenditure of funds if that side letter, appendix, or other addendum is to be incorporated in a subsequent memorandum of understanding submitted to the Legislature for approval.

(2) Existing law requires the Department of Personnel Administration to establish and adjust salary ranges for each class of position in the state civil service subject to any merit limits contained in Article VII of the California Constitution. The department also represents the Governor and presents the state's management position in negotiations with recognized employee organizations representing state employees.

This bill would require the department to post, in a clear and conspicuous manner on the department's Web site, each memorandum of understanding that has been submitted to the Legislature for determination pursuant to the Ralph C. Dills Act and has been ratified by the affected union membership, in its entirety. The bill would require the Web site posting to include a declaration that the memorandum has been submitted to the office of the Legislative

Analyst and the Legislature, including the date of that submission and a summary of the memorandum of understanding that is the same summary provided to the Legislature by the department.

The Legislative Analyst would have 10 calendar days from the date the tentative agreement is received to issue a fiscal analysis to the Legislature. The bill would provide that the memorandum of understanding would not be subject to legislative determination until either the Legislative Analyst has presented a fiscal analysis of the memorandum to the Legislature or until 10 calendar days have elapsed since the memorandum was received by the Legislative Analyst. The bill would require each memorandum of understanding submitted by the department to the Legislative Analyst to include the department's analysis of costs and savings.

**Ch. 500 (SB 759) Maldonado Public works: payroll records.**

Existing law generally requires the payment of the general prevailing rate of per diem wages for workers employed on public works, as defined, costing over \$1,000. Existing law requires each contractor and subcontractor performing work on a public work to keep payroll records regarding his or her employees. Existing law requires that these records contain the information specified by the Division of Labor Standards Enforcement.

This bill would, for the purposes of these payroll recordkeeping requirements, authorize the use of printouts of payroll data that are maintained as computer records, if certain conditions are met.

**Ch. 501 (SB 950) Torlakson Housing.**

(1) Existing law authorizes a redevelopment agency to issue negotiable revenue bonds for the purpose of making or purchasing mortgage or construction loans or making loans to a qualified mortgage lender, to finance residential construction.

This bill would require that units reserved for occupancy by low- or very low income households and financed with proceeds of bonds issued on or after January 1, 2006, remain available following the expiration or termination of the qualified residential project period, except as specified, to an eligible household occupying a reserved unit, at a rent not greater than the amount set forth by the regulatory agreement entered into by the redevelopment agency before the date of expiration or termination, until the earliest of certain events.

(2) Existing law provides for the creation of housing authorities of counties and cities and authorizes a housing authority to issue bonds for any of its corporate purposes, which include providing financing for the acquisition, construction, rehabilitation, refinancing, or development of dwelling accommodations for persons of low income.

This bill would require that units reserved for occupancy by low- or very low income households and financed with proceeds of bonds issued on or after January 1, 2006, remain available following the expiration or termination of the qualified residential project period, except as specified, to an eligible household occupying a reserved unit, at a rent not greater than the amount set forth by the regulatory agreement entered into by the housing authority before the date of expiration or termination, until the earliest of certain events.

(3) Existing insurance tax law, the Personal Income Tax Law, and the Corporation Tax Law, in modified conformity to federal income tax laws, allow taxpayers a credit against the taxes imposed by those laws for providing low-income housing, and require the California Tax Credit Allocation Committee to allocate the credit in accordance with specified criteria.

This bill would expand the categories of housing projects with respect to which a credit is allowed by broadening the category of at-risk of conversion housing and extending the eligible time period in which expirations of specified subsidies may occur.

(4) Existing law, until January 1, 2011, requires, prior to the anticipated date of the termination of a subsidy contract, expiration of rental restrictions, or prepayment on an assisted housing development, as defined, that the owner provide a notice of the proposed change to each affected tenant household residing in the assisted housing development and

to the affected public entities. An owner is not required to provide the notice if specified conditions contained in a regulatory agreement has been recorded against the property.

This bill would modify those conditions with respect to rent increases on assisted and unassisted units, as provided.

Ch. 502 (AB 23) Liu Adult education finance.

(1) Existing law requires, to the extent funds available for specified adult education programs are in excess of the amount needed to fund the programs, the Superintendent of Public Instruction to use the excess funds for the development of criteria for identifying programmatic areas of adult education needing expansion.

This bill would delete that requirement.

(2) Existing law requires the Superintendent of Public Instruction to develop criteria to identify programmatic areas of adult education that are in need of expansion and affords a school district an opportunity to apply for additional units of adult education average daily attendance to meet needs in programmatic areas identified by the Superintendent. This bill would repeal those provisions.

(3) Existing law requires the Superintendent of Public Instruction to determine an authorized limit of adult education average daily attendance for all high school districts and unified school districts that operated and claimed adult education state apportionments for the 1992–93 fiscal year. Existing law provides that for the 1996–97 fiscal year, and each fiscal year thereafter, a school district's adult education average daily attendance for apportionment purposes is its authorized adult education average daily attendance for the prior fiscal year multiplied by 1.025.

This bill would provide that, commencing in the 2006–07 fiscal year, and in each fiscal year thereafter, the allocation of statewide authorized adult education average daily attendance shall be modified pursuant to a specified formula.

The bill would also make specified school districts ineligible for an authorized limit of adult education average daily attendance for apportionment purposes for the 2005–06 and 2006–07 fiscal years. The bill would declare that due to the unique situation of those school districts, a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution, and a general statute is therefore necessary.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 503 (AB 77) Frommer Medi-Cal: clinics: reimbursement.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits, including drugs, prosthetic and orthotic devices, durable medical equipment, medical supplies, and enteral formulae.

Pursuant to a federal waiver, the Medi-Cal program administers a program known as the Family Planning, Access, Care, and Treatment (Family PACT) Waiver Program, under which comprehensive clinical family planning services are provided to any person who has a family income at or below 200% of the federal poverty level and who is eligible to receive those services pursuant to the terms of the waiver.

Under this program, reimbursement for take-home drugs and supplies provided by a licensed community clinic or free clinic, or an intermittent clinic, is required to be the lesser of the amount billed or the Medi-Cal reimbursement rate and shall not exceed the net cost of the drugs or products as provided to retail pharmacies under the Medi-Cal program.

This bill would revise this reimbursement formula and would provide that reimbursement to these clinics for take-home drugs and supplies covered under these provisions shall be reimbursed as described in the bill.

Existing law exempts from the reimbursement formula federally qualified health centers and rural health clinics that have elected to be reimbursed for pharmacy costs based on certain other provisions.

This bill would authorize federally qualified health centers and rural health clinics electing under this provision to bill and be reimbursed pursuant to the bill.

Existing law also requires these clinics to comply with billing amount standards for take-home drugs and supplies covered under the Medi-Cal program and Family PACT Waiver Program.

This bill would revise the billing amount standards. The bill would require these clinics to bill the Medi-Cal program and Family PACT Waiver Program for drugs and supplies covered under these programs at the lesser of cost or the clinic's usual charge made to the general public. The bill would define "cost" for purposes of this provision.

Ch. 504 (AB 133) Committee on Budget In-home supportive services.

Existing law provides for the county-administered In-home Supportive Services (IHSS) program, under which qualified aged, blind, and disabled persons are provided with services in order to permit them to remain in their own homes and avoid institutionalization.

Existing law establishes the federal Medicaid program, which is administered by each state. California's version of this program is the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits.

Existing law provides for the payment of a supplementary benefit under the IHSS program to any eligible aged, blind, or disabled person who is receiving Medi-Cal personal care services and who would otherwise be deemed a categorically needy recipient under the IHSS program. Under existing law, this provision ceases to be operative upon a determination by the Department of Finance that the costs of supplemental payments under this provision exceed the savings resulting from federal financial participation in providing Medi-Cal personal care services, and upon notification of this determination to designated legislative committee chairs.

This bill would delete the provision that would require the IHSS supplementary benefit provision to become inoperative upon determination and notification by the Department of Finance.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 505 (AB 203) Harman Horse racing.

Existing law provides that the California Horse Racing Board shall have all powers necessary to carry out the purposes of the Horse Racing Law, such as adopting rules and regulations to protect the public, allocating dates for, and controlling horse racing and parimutuel wagering, and enforcing all rules and regulations.

This bill would make technical changes to the Horse Racing Law and would define the term "handle" to mean aggregate contributions to parimutuel pools.

Existing law prescribes the procedure by which the annual audit of the horsemen's organization is to be conducted, as specified.

This bill would require a copy of the audit be provided to the Senate and Assembly Committees on Governmental Organization.

Existing law prohibits specified persons from the unauthorized payment, distribution, receipt, or solicitation of purses or other consideration to or for the benefit of horsemen, except as expressly provided.

This bill would exempt payment by a licensed quarter horse racing association in the southern zone, to horsemen participating in its race meeting, from this prohibition.

Ch. 506 (AB 302) Committee on Business and Professions Professions and vocations.

(1) Existing law, the Naturopathic Doctors Act, provides for the licensure and regulation of naturopathic doctors by the Bureau of Naturopathic Medicine in the Department of Consumer Affairs. Existing law authorizes the bureau to license an applicant who graduated

prior to 1986 if the applicant passed a state naturopathic licensing examination and certain requirements are satisfied.

This bill would also authorize the bureau to license an applicant who graduated prior to 1986 if the applicant passed a Canadian Province naturopathic licensing examination.

(2) Existing law, the Pharmacy Law, provides for the regulation of the practice of pharmacy by the California State Board of Pharmacy and makes a violation of its provisions a crime. Existing law prohibits a person from furnishing any dangerous drug except upon the prescription of a physician, dentist, podiatrist, optometrist, or veterinarian. Existing law, the Uniform Controlled Substances Act, authorizes a pharmacist, in specified circumstances, to write or issue a prescription. Existing law, the Naturopathic Doctors Act, authorizes naturopathic doctors to prescribe or order drugs in specified circumstances.

This bill would add naturopathic doctors who prescribe or order drugs in those specified circumstances to the list of persons authorized to furnish dangerous drugs and write or issue prescriptions under the Pharmacy Law and the Uniform Controlled Substances Act. The bill would charge the Bureau of Naturopathic Medicine with certain responsibilities with respect to compliance with and enforcement of the Pharmacy Law with respect to its licensees. The bill would also make related changes.

(3) Existing law provides for the licensing and regulation of architects by the California Architects Board. Existing law requires that a settlement or arbitration award in excess of \$5,000 of a claim or action for damages caused by a licensee's fraud, deceit, negligence, incompetence, or recklessness in practice be reported to the board by insurers and licensees.

This bill would delete these requirements and would instead require a licensee, a liability insurer, or a governmental agency that self insures a licensee to submit a report to the board meeting certain requirements where there is a civil action judgment, settlement, arbitration award, or administrative action resulting in a judgment, settlement, or arbitration award against the licensee in an action alleging fraud, deceit, misrepresentation, breach or violation of contract, negligence, incompetence, or recklessness by the licensee in the practice of architecture if the amount or value of the judgment, settlement, or award is \$5,000 or more. The bill would authorize the board to adopt regulations defining the reporting requirements.

(4) Existing law provides for the licensing and regulation of architects by the California Architects Board. Existing law requires that a settlement or arbitration award in excess of \$5,000 of a claim or action for damages caused by a licensee's fraud, deceit, negligence, incompetence, or recklessness in practice be reported to the board by insurers and licensees.

This bill would delete these requirements and would instead require a licensee, a liability insurer, or a governmental agency that self insures a licensee to submit a report to the board meeting certain requirements where there is a civil action judgment, settlement, arbitration award, or administrative action resulting in a judgment, settlement, or arbitration award against the licensee in an action alleging fraud, deceit, misrepresentation, breach or violation of contract, negligence, incompetence, or recklessness by the licensee in the practice of architecture if the amount or value of the judgment, settlement, or award is \$5,000 or more. The bill would authorize the board to adopt regulations defining the reporting requirements.

(5) Because a violation of the provisions relating to pharmacy would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 507 (AB 330) Gordon General acute care, acute psychiatric, and special hospitals: management requirements.

Existing law provides for the licensure and regulation of health facilities administered by the State Department of Health Services. A violation of these provisions is a crime.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law requires that any person, political subdivision of the state, or governmental agency desiring approval to manage a health facility currently licensed as a skilled nursing facility or intermediate care facility that has not filed an application for a license to operate that facility to file with the department a verified application containing specific information, including information regarding the applicant's character and ability to comply with applicable licensing and regulatory provisions.

This bill would expand this application requirement to apply to those seeking approval to operate, or manage, as defined, a health facility currently licensed as a general acute care hospital, acute psychiatric hospital, or special hospital that has not filed an application for a license to operate that facility. With respect to these health facilities, the bill would require the department to consider specific evidence in making determinations regarding character and ability to comply with applicable licensing and regulatory provisions and to make one additional determination with respect to a demonstration of sufficiency of financial resources.

Ch. 508 (AB 360) Frommer Skilled nursing facilities.

Existing law provides for the licensure and regulation of health facilities by the State Department of Health Services. Existing law provides for the imposition each state fiscal year upon the entire gross receipts of certain intermediate care facilities a quality assurance fee, as a condition of participation in the Medi-Cal program.

Existing law, as long as prescribed conditions are met, provides for the imposition of a quality assurance fee on each skilled nursing facility, with some exemptions, to be administered by the Director of Health Services and deposited in the State Treasury to be available to enhance federal financial participation in the Medi-Cal program or to provide additional reimbursement to, and support facility quality improvement efforts in, licensed skilled nursing facilities.

Existing law requires the department to request federal approval for implementation of these quality assurance fee provisions and authorizes imposition of a nonuniform fee in order to meet federal requirements.

This bill would exclude a unit that provides pediatric subacute services in a skilled nursing facility and a skilled nursing facility that is certified by the State Department of Mental Health for a special treatment program and is an institution for mental disease as defined under federal law from the fee requirements, and would make a conforming change to provisions setting forth the department's Medi-Cal ratesetting authority. The bill would revise erroneous cross-references contained in related provisions.

This bill would require reimbursement rates for services in institutions for mental disease that are required to be licensed and certified as skilled nursing facilities to be the same as the rates in effect on July 31, 2004. The bill would require these reimbursement rates to be increased by 6.5% annually from July 1, 2005, to June 30, 2008, and by 4.7% annually, commencing July 1, 2008.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 509 (AB 532) Levine Public contracts: schools: procurement.

Existing law sets forth the requirements for competitive bidding on various types of contracts awarded by state and local agencies. Existing law authorizes a school district to contract with suppliers to obtain materials, supplies, equipment, and services, including technological supplies and equipment.

This bill would authorize a school district to utilize alternative competitive negotiation methods for procuring bids for the acquisition of specified technological supplies and equipment.

Ch. 510 (AB 554) Nava Ventura County Watershed Protection District.

Existing law, the Ventura County Watershed Protection Act, authorizes the Ventura County Watershed Protection District to levy an assessment upon all taxable real property in the district to pay the costs and expenses of the district and to carry out any of the objects or purposes of the act. The act also authorizes the district to levy an assessment upon all taxable real property in any of the zones according to the benefits derived, or to be derived, in the respective zones, to pay the costs and expenses of carrying out any of the objects or purposes of the act in the respective zones. The California Constitution, with certain exceptions, conditions the imposition or increase of a property-related fee or charge by a special district upon compliance with requirements for providing written notice to property owners, conducting a public hearing, providing an opportunity for majority protest, and obtaining the approval by a majority vote of the property owners of the property subject to the fee or charge, or at the option of the special district imposing the fee or charge, by a  $\frac{2}{3}$  vote of the electorate residing in the area affected by the fee or charge.

This bill would authorize the district to impose a fee pursuant to those described requirements of the California Constitution on a districtwide or per zone basis for those same purposes.

Ch. 511 (AB 610) Calderon Telecommunications: mobile telephony services.

Existing law requires a provider of mobile telephony services, as defined, no later than January 1, 2004, to provide subscribers with a means by which a subscriber can obtain reasonably current and available information on the subscriber's calling plan or plans and service usage, including roaming usage and charges.

This bill would additionally require that, on or before January 1, 2007, a provider of mobile telephony services provide subscribers with a means by which a subscriber can obtain reasonably current and available information, as determined by the provider, on the subscriber's text messaging and Internet usage and charges.

Ch. 512 (AB 892) Cogdill Cigarettes and tobacco products.

(1) The California Cigarette and Tobacco Products Licensing Act of 2003 provides for the licensure, by the State Board of Equalization, of manufacturers, distributors, wholesalers, importers, and retailers of cigarette or tobacco products that are engaged in business in California and prohibits retailers, manufacturers, distributors, and wholesalers from distributing or selling those cigarette and tobacco products unless they are in compliance with those licensure requirements.

The act requires each distributor and each wholesaler to include certain information on each invoice for the sale of cigarettes or tobacco products, including a statement that all California cigarette and tobacco product taxes are included in the total amount of the invoice. The act provides that failure to comply with that requirement constitutes a misdemeanor.

This bill would provide that a distributor that is also a retailer shall include either the above tax statement on each invoice for the sale of cigarettes or tobacco products or the amount of excise taxes due to the board by the distributor on the sale of cigarettes and tobacco products. In the case of other distributors and wholesalers, this bill would require these parties to include the amount of excise taxes due to the board on these invoices. Additionally, this bill would require a distributor or wholesaler to include the date the cigarettes or tobacco products are sold on each invoice. By changing the definition of a crime, this bill would impose a state-mandated local program.

(2) The act authorizes the board or a law enforcement agency to seize any cigarettes or tobacco products that do not meet the act's requirements. Upon a finding that any distributor, wholesaler, manufacturer, or importer has violated any provision of the act, the act authorizes the board, upon a 1st offense, to revoke or suspend the license or licenses of the distributor, wholesaler, manufacturer, or importer, and, upon a 2nd or any subsequent offense, impose a civil penalty in an amount not to exceed the greater of 5 times the retail value of the cigarettes or tobacco products or \$5,000.

This bill would clarify that, upon a 2nd or subsequent offense, the board is authorized to impose a civil penalty in an amount not to exceed the greater of 5 times the retail value of the seized cigarettes or tobacco products or \$5,000.

(3) The act requires all manufacturers and all importers that begin operations in the state after January 1, 2004, to be charged an administration fee commensurate with their respective market share of cigarettes manufactured or imported by the manufacturer, and sold in this state during the next calendar year as estimated by the board.

This bill would clarify that all manufacturers and all importers that begin operations in the state after January 1, 2004, shall be charged a fee commensurate with their respective market share of cigarettes manufactured or imported by the manufacturer or importer, and sold in this state during the next calendar year as estimated by the board.

(4) Existing provisions within the act establish procedures for the seizure of cigarettes and tobacco products from a seller after a notification of suspension or revocation of their license.

This bill would specify that the State Board of Equalization or a law enforcement agency is empowered to seize cigarettes and tobacco products from unlicensed persons for the continued sales of cigarettes and tobacco products without a license.

(5) The State Board of Equalization administers various tax and fee programs, including the Sales and Use Tax Law and the Cigarette and Tobacco Products Tax Law. The tax and fee programs administered by the board generally require any person who collects tax or fee reimbursement in excess of the amount due to either refund the excess to their customer or remit the excess to the state.

This bill would apply these reimbursement provisions to the taxes imposed under the Cigarette and Tobacco Products Tax Law.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 513 (AB 953) Coto Local educational agency intervention.

Existing law authorizes invited schools that score below the 50th percentile on specified achievement tests to receive funding under the Immediate Intervention/Underperforming Schools Program. Existing law allows the Superintendent of Public Instruction to require a school district to enter into a contract with a management team, trustee, or a school assistance and intervention team to a schoolsite in order to help the school achieve significant improvement on the Academic Performance Index. Existing law requires the Superintendent to remove the management team, trustee, or school assistance and intervention team from providing services at the schoolsite or any other schoolsite if it fails to assist the school in making significant growth on the Academic Performance Index 36 months after it is assigned to the schoolsite.

This bill would require the Superintendent to provide a list of approved school assistance and intervention teams with which a school district may contract. The bill would require that the list be based on criteria recommended by the Superintendent and adopted by the State Board of Education. The bill would require the Superintendent to remove the management team, trustee, or school assistance and intervention team from providing services at a school if, 36 months after the Superintendent assigns the management team, trustee, or school assistance and intervention team, the management team, trustee, or school assistance and intervention team fails to fulfill all responsibilities pursuant to the terms of the contract.

Existing law, the Early Warning Program and the Prevention of Local Educational Agency Intervention Program, provides for a voluntary self-assessment process for local educational agencies that are in danger of being identified as program improvement local educational agencies under the federal No Child Left Behind Act of 2001 and allows those local educational agencies to participate in a prevention program that provides support and

funding in order to improve pupil academic achievement. Existing law provides that a local educational agency may receive that funding for no more than 2 years.

This bill would establish a priority system for the provision of that funding, as specified, to commence with the 2005–06 fiscal year. The bill would also delete the 2-year restriction on the receipt of funding under the program.

Existing law requires the State Department of Education to establish a Statewide System of School Support to provide a statewide system of intensive and sustained support and technical assistance for school districts and county offices of education with schools in need of improvement. Existing law requires that funds for that system be distributed based on the number of schools and the enrollment of those schools in each region that have been identified as being in need of program improvement under federal law.

This bill would require that funding for that system also be based on the number of school districts in each region that have been identified as being in need of program improvement.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 514 (AB 1195) Coto Continuing education: cultural and linguistic competency.

Existing law, the Medical Practice Act, provides for the licensure and regulation of physicians and surgeons by the Medical Board of California. Under the act, a physician and surgeon is required to demonstrate satisfaction of continuing education requirements. The act also creates a voluntary program for interested physicians and surgeons to learn a foreign language and cultural beliefs and practices that may impact patient health care practices.

This bill would require on and after July 1, 2006, that continuing medical education courses, except as specified, include curriculum in the subjects of cultural and linguistic competency in the practice of medicine, as defined. The bill would require accreditation associations to develop standards for this curriculum before July 1, 2006.

Ch. 515 (AB 1280) Maze Public postsecondary education: California Community College Baccalaureate Partnership Program.

Existing law establishes the California Community Colleges, under the administration of the Board of Governors of the California Community Colleges, as one of the segments of public postsecondary education in this state.

This bill would enact the California Community College Baccalaureate Partnership Act, and establish the California Community College Baccalaureate Partnership Program. Under the program, the Office of the Chancellor of the California Community Colleges would be authorized to annually award 2 grants, not to exceed \$50,000 each, to a collaborative, composed of at least one community college and at least one baccalaureate degree-granting institution, formed for the purpose of offering baccalaureate degree programs on the participating community college campus or campuses.

The bill would provide that these 2 grants may be awarded under its provisions in any fiscal year only to the extent that funding for this program is appropriated in the annual Budget Act.

The bill would require that, as a condition of an agreement for the receipt of a grant under this provision, a collaborative shall ensure that every student who enrolls in the baccalaureate degree program offered by the collaborative prior to an announcement of the termination of the collaborative has an opportunity to complete the coursework necessary to obtain a baccalaureate degree.

The bill would require that, on or before April 1, 2012, the Office of the Chancellor of the California Community Colleges submit a report to the Legislature and the Department of Finance on the efficacy of the program established by this bill. The bill would provide that its provisions would become inoperative on July 1, 2014, and that its provisions would be repealed on January 1, 2015.

Ch. 516 (AB 1309) Yee Local health authorities and commissions: joint powers agreements.

Existing law provides for the establishment in a county of a health authority or commission to provide or contract for the provision of health care benefits to eligible persons. Existing law sets forth rules of governance for each health authority or commission so established and makes it a public entity for certain purposes.

Existing law authorizes 2 or more public agencies, by agreement, to jointly exercise any power common to the contracting parties.

This bill would require that any entity that is established pursuant to a joint powers agreement that is licensed under provisions of law regulating the licensing of health care service plans, where one party to the agreement is an entity established in a county to provide or contract for the provision of health care benefits to eligible persons, shall be subject to all of the same provisions, including, but not limited to, governance, public records requirements, open meeting requirements, and conflicts of interest as is the entity that is a party to the joint powers agreement.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 517 (AB 1496) Goldberg High school attrition rates.

Existing law vests specified powers and duties in the State Department of Education for purposes of the public education system.

This bill would require the department to compile an attrition rate, in addition to the dropout rate the department compiles pursuant to the federal No Child Left Behind Act of 2001, for high school pupils according to a specified formula.

Ch. 518 (AB 1563) Committee on Jobs, Economic Development, and the Economy Enterprise zones: reports to Legislature.

The Enterprise Zone Act generally provides for the designation by the Department of Housing and Community Development of enterprise zones in the state pursuant to which certain entities within the zone may receive regulatory, tax, and other incentives for private investment and employment. The department is required to submit a report to the Legislature every 5 years that reviews the progress and effectiveness of each enterprise zone, with respect to specified components.

The act requires the Employment Development Department and the State Department of Education to give high priority to the training of unemployed individuals who reside in a targeted employment area or a designated enterprise zone.

This bill would require the report submitted by the Department of Housing and Community Development to include a review of any efforts made regarding training of unemployed individuals pursuant to these provisions, and would require the Employment Development Department to provide information to the department in this regard.

Ch. 519 (AB 1765) Committee on Revenue and Taxation State Board of Equalization: tax administration.

(1) Existing law requires the State Board of Equalization to administer various tax and fee programs, including taxes and fees imposed upon the sale of fuel, including diesel fuel. Existing law authorizes the board, as a party to the International Fuel Tax Agreement (IFTA), to enter into reciprocal agreements with other states for the administration, collection, and enforcement of taxes imposed upon motor fuels that are due and payable to this state.

This bill would make technical changes to some of the IFTA-related provisions, including clarifying the documents that constitute the International Fuel Tax Agreement.

(2) Existing law requires the board to administer taxes and fees imposed upon cigarettes and tobacco products. Existing law generally requires licensed cigarette distributors to purchase and affix an appropriate stamp to, or make an appropriate meter impression upon, each package of cigarettes prior to distribution, and provides specified penalties for failure

to comply with these requirements. Existing law provides that these penalties do not apply if the failure to comply is part of the taxpayer's overall failure to pay and report taxes that is subject to a separate, but related collection action by the board.

This bill would amend these provisions by making technical changes to delete obsolete references and to conform to provisions of existing law.

(3) The Diesel Fuel Tax Law requires all government entities that operate diesel-powered highway vehicles in this state to obtain a diesel fuel tax license and to file monthly diesel fuel tax returns for purchases of diesel fuel for which the diesel tax was not paid or collected at the time of purchase.

This bill would exempt from these requirements government entities that only purchase diesel fuel from vendors that have paid or collected the diesel tax at the time of, or prior to, the sale of the diesel fuel to that government entity. This bill would also make a technical clarifying change to the Diesel Fuel Tax Law.

(4) The Sales and Use Tax Law, the Vehicle Fuel License Tax Law, the Use Fuel Tax Law, the Cigarette and Tobacco Products Tax Law, the Alcoholic Beverage Tax Law, the Energy Resources Surcharge Law, the Emergency Telephone Users Surcharge Act, the Hazardous Substances Tax Law, the Integrated Waste Management Fee Law, the Oil Spill Response, Prevention, and Administration Fees Law, the Underground Storage Tank Maintenance Fee Law, the Fee Collection Procedures Law, and the Diesel Fuel Tax Law provide that any person whose estimated tax or fee liability under those laws averages less than \$20,000 per month may elect to remit amounts due by electronic funds transfer. The election is required to be operative for a minimum of one year.

This bill would delete the requirement that the election be operative for a minimum of one year.

(5) The Timber Yield Tax Law, for the 1977–78 fiscal year and each fiscal year thereafter, imposes a tax on every timber owner with respect to the harvesting of timber or felled or downed timber at specified rates. The Timber Yield Tax Law disallows, subject to certain exceptions, any adjustment of yield tax rates for 1979, 1980, or 1981 to reflect any portion of the property tax rate levied on the unsecured roll for the 1978–79 tax year, as provided, and requires that the Controller certify for a specified period the amount necessary to restore the deficient allocations, plus the amount necessary to bring the Timber Tax Reserve Fund to \$5,000,000. The specific provisions of that law providing for the restoration of any deficient allocations for the Timber Tax Reserve Fund however, were previously repealed.

This bill would delete these obsolete provisions relating to the adjustment of yield tax rates for 1979, 1980, and 1981, and the certification by the Controller of the amount necessary to restore certain deficient allocations.

This bill would declare that it is to take effect immediately as an urgency statute, as specified.

Ch. 520 (AB 1738) Committee on Local Government Electronic recordings: computer security auditors.

The Electronic Recording Delivery Act of 2004 authorizes, among other things, a county recorder, upon approval by a resolution of the board of supervisors and system certification by the Attorney General, to establish an electronic recording delivery system for the delivery and recording of specified digitized and digital electronic records, subject to specified conditions, including system certification, regulation, and oversight by the Attorney General.

The act also requires that a computer security auditor who is hired to perform an independent audit of the electronic recording delivery system shall have access to any aspect of the system. The act also requires that no person may be a computer security auditor or be granted secure access to an electronic recording delivery system if he or she has been convicted of a felony, has been convicted of a misdemeanor related to theft, fraud, or a crime of moral turpitude, or if he or she has pending criminal charges for any of these crimes and

requires all persons entrusted with secure access to the system to submit their fingerprints to the Attorney General for a criminal records check pursuant to specified procedures to determine whether they are eligible to have access to an electronic recording delivery system.

This bill would specify that for these purposes a person's criminal history information also includes federal convictions and arrests and would require the Department of Justice to forward requests from the Attorney General to the Federal Bureau of Investigation for this information. The bill would also require the Attorney General to review and compile this information to determine the person's eligibility to have access to an electronic recording delivery system and would authorize the Department of Justice to charge a fee to cover the cost of processing federal criminal offender record information.

Ch. 521 (AB 137) Committee on Budget Public resources.

Existing law establishes the Oil Trust Fund (fund) in the State Treasury and appropriates money in the fund to the State Lands Commission for specified costs associated with removal of oil and gas facilities commencing when the City of Long Beach adopts and transmits to the commission an ordinance declaring that certain tidelands oil fields have been abandoned and mitigation for environmental damage can begin. Existing law provides that the total amount deposited in the fund shall not exceed \$300,000,000.

This bill, instead, would require the City of Long Beach to adopt and transmit to the commission a resolution declaring that specified oil revenue is insufficient to fund those specified costs. The bill would provide that, from the date the balance in the fund totals \$300,000,000, all interest earned thereafter shall be transferred to the General Fund. In addition, all money remaining in the fund after completion of specified remediation activities shall be transferred to the General Fund.

This bill would require the commission to notify the Controller within 60 calendar days of receiving specified documentation from the city that expenditures from the fund may be made. The bill would also require the commission to submit to the Department of Finance and to the fiscal and appropriate policy committees of the Legislature a copy of the schedule for expenditures for disbursement of moneys from the fund.

Ch. 522 (AB 216) Oropeza Administration of transportation funds.

(1) The Traffic Congestion Relief Act provides for the Department of Transportation to allocate certain funds in the Traffic Congestion Relief Fund, as directed by the California Transportation Commission, to transportation agencies for certain transportation projects specified by statute. Existing law provides that funds allocated from the fund shall be available for encumbrance for 3 years after the date of allocation, with encumbered funds to be available for liquidation for 2 additional years, and further provides that funds not expended within that time limit shall revert to the Traffic Congestion Relief Fund, a continuously appropriated fund.

This bill would authorize the commission, with respect to any reverted funds in the Traffic Congestion Relief Fund, to direct the department to reallocate those funds to the same project if the commission makes certain findings.

(2) Existing law authorizes the expenditure of toll bridge revenues from the state-owned toll bridges within the jurisdiction of the Metropolitan Transportation Commission (MTC) for specified purposes, including a marketing program to promote tax-saving opportunities for employers and employees under federal law. Existing law also requires the MTC to adopt a regional transit connectivity plan by December 1, 2005 and a Bay Area Regional Rail Plan by July 1, 2006.

This bill would include as part of the marketing program tax deductions that are available under federal law for travel expenses. The bill would also delay the date for MTC to adopt a regional transit connectivity plan to May 1, 2006, and would delay the date for it to adopt the Bay Area Regional Rail Plan to July 1, 2007.

Ch. 523 (AB 258) Matthews Medi-Cal: durable medical equipment.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Under existing law, durable medical equipment is a covered benefit under the Medi-Cal program, subject to utilization controls.

This bill, commencing July 1, 2006, would require any provider of custom rehabilitation equipment and custom rehabilitation technology services, as defined, to a Medi-Cal beneficiary to have on staff, either as an employee or independent contractor, or have a contractual relationship with, a qualified rehabilitation professional, as defined, who was directly involved in determining the specific custom rehabilitation equipment needs of the patient and was directly involved with, or closely supervised, the final fitting and delivery of the custom rehabilitation equipment.

This bill would require, commencing January 1, 2006, that a physical examination be conducted before a motorized wheelchair or scooter is prescribed, and would additionally require the prescribing medical provider to complete a certificate of medical necessity, developed by the department, for the motorized wheelchair or scooter.

Ch. 524 (AB 296) Negrete McLeod Hepatitis C.

The existing Hepatitis C Education, Screening, and Treatment Act requires the Director of Corrections to perform various functions and duties with respect to testing and treatment of individuals in the correctional system for hepatitis C. Existing law requires the director to provide the budget subcommittees of the Legislature, on or before March 1, 2002, with an annual statistical report on the prevalence of the hepatitis C virus in correctional facilities and trends in the incidence and prevalence of the hepatitis C virus in the correctional system. Existing law implements these provisions only to the extent funds for this purpose have been appropriated in the annual Budget Act.

This bill would require the Department of Corrections and Rehabilitation to make hepatitis C screening available without copayment to an inmate, make testing confidential, and make available hepatitis C information for all inmates upon intake examination or while providing general information.

Ch. 525 (AB 304) Hancock Building standards: reconstruction.

Existing law authorizes a city, city and county, or county to establish, by ordinance, building reconstruction standards applicable to the reconstruction of buildings identified, as specified, by the city, city and county, or county as being hazardous to life if an earthquake occurs.

This bill would include within those buildings that are potentially hazardous if an earthquake occurs, woodframe, multiunit residential buildings constructed before January 1, 1978, where the ground floor portion of the structure contains parking or other similar open floor space that causes soft, weak, or open-front wall lines, as specified, and would require the seismic retrofit of these buildings to comply with a nationally recognized model code relating to the retrofit of existing buildings or substantially equivalent standards. The bill would replace the word "reconstruction" with "seismic retrofit" in provisions governing earthquake hazardous building reconstruction and would define seismic retrofit for purposes of provisions governing earthquake protection.

Ch. 526 (AB 356) Chan Health care coverage: rating and underwriting criteria.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care, and makes a violation of the act's provisions a crime. Existing law also provides for the licensure and regulation of health insurers by the Department of Insurance.

This bill would, except as specified, require a health care service plan that offers health care coverage in the individual market to provide an individual to whom it denies coverage or enrollment or to whom it offers coverage at a higher than standard rate, with the specific reason or reasons for that decision in writing. The bill would also require such a plan or a health insurer to notify the contractholder or policyholder of a change in premium rate or coverage, including the reasons for a rate increase. The bill would, except as specified, require a health care service plan and a health insurer to inform an applicant of the California Major Risk Medical Insurance Program if it rejects an applicant or his or her dependents for coverage or offers individual coverage at a rate that is higher than the standard rate. The bill would also require a health care service plan and a health insurer to have written policies, procedures, or underwriting guidelines establishing the criteria and process for denial of coverage decisions with regard to individuals and ratesetting for that coverage. The bill would require a health care service plan or health insurer to submit these policies, procedures, or guidelines and certain additional information annually to the Director of the Department of Managed Health Care or the Commissioner of the Department of Insurance, respectively. The bill would, commencing September 1, 2006, require the director and the commissioner to make specified information related to rating and underwriting criteria and practices available via their Web sites. The bill would also require certain disclosure forms issued, amended, or renewed on and after September 1, 2006, for specified group benefit plans to include a notice advising consumers to examine their options before declining continuation coverage.

Because a violation of the bill's provisions with respect to health care service plans would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 527 (AB 587) Negrete McLeod Public employees: health benefits.

The Public Employees' Medical and Hospital Care Act requires the Board of Administration of the Public Employees' Retirement System to approve health benefit plans for certain public employees and annuitants, and authorizes the board to contract with carriers offering health benefit plans. The act prohibits employees, annuitants, and family members who become eligible on or after January 1, 1985, for Part A and Part B of Medicare from enrolling in a basic health benefit plan.

This bill would further prohibit employees, annuitants, and family members enrolled in a prescription drug plan under Part D of Medicare from enrolling in a board-approved health benefit plan, unless enrolled in an approved Medicare Advantage plan.

Ch. 528 (AB 747) Blakeslee State excluded employees: catastrophic leave.

Existing law authorizes the Director of the Department of Personnel Administration to formulate and adopt rules and regulations affecting the purposes, responsibilities, and jurisdiction of the department and that are consistent with the law and necessary for personnel administration. Pursuant to these regulations, excluded employees are permitted to transfer annual leave, vacation, compensating time off, and holiday leave credits to an excluded employee or represented employee who has exhausted all of his or her paid time off when a catastrophic illness or injury occurs to the recipient employee or a member of his or her family.

This bill would codify this regulation and in addition, would permit an excluded employee, for catastrophic leave purposes, to be the recipient of annual leave, vacation, compensating time off, and holiday leave credits donated by a represented employee.

Ch. 529 (AB 889) Ruskin Weights and measures.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law, until January 1, 2006, provides that the State Sealer, county sealers, and their deputies and inspectors may level a civil penalty against a person for violating provisions of law relating to weights and measures, as specified. Existing law also provides that any person convicted or determined to be civilly liable for violating these provisions shall be liable for costs incurred in investigating the action, as specified.

This bill would provide that provisions that allow sealers to impose civil penalties would remain in effect. This bill would also specify that no investigative costs shall be imposed for violations of these provisions for which civil penalties are imposed.

Existing law permits the board of supervisors of a county to charge an annual device registration fee to recover the costs of inspecting or testing weighing and measuring devices by the county sealer not to exceed those fees specified in a table of maximum annual charges. Existing law provides that these provisions shall remain in effect only until January 1, 2006.

This bill would provide that these provisions would remain in effect until January 1, 2011, however, it would also revise and recast the annual registration fees that may be charged. This bill would provide that the annual registration fee would consist of a business location fee and a device fee, as defined. This bill would set forth various device fees, a maximum fee, and would also provide that fees shall graduate from \$60 for the location fee and 60% of the maximum applicable device fee specified, until January 1, 2008, at which time the location fee shall be \$100, and the device fee shall be 100% of the fees specified in these provisions.

This bill would provide the criteria and methodology, as specified, by which local officials are to measure and verify the accuracy of a point-of-sale system. This requirement would remain in effect only until January 1, 2009.

By directing local officials to follow a specified standard of inspection this bill would impose a state-mandated local program.

Existing law directs the Secretary of the Department of Food and Agriculture to adopt regulations that specify the type of violations for which civil penalties may be imposed, as specified, for persons who violate laws governing weights and measures.

This bill would repeal that provision.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 530 (AB 897) Coto Braille standards.

Existing law requires school districts, special education local plan areas, or county offices of education to provide opportunities for braille instruction for pupils who, due to a prognosis of visual deterioration, may be expected to have a need for braille as a reading medium.

Existing law requires the Superintendent of Public Instruction to form an advisory task force, with prescribed membership approved by the State Board of Education, to develop standards for mastery of the braille code by pupils, and to report to the Governor and the Legislature by June 30, 2004.

This bill would require the Superintendent to utilize that task force to develop standards for pupils to learn, and to achieve mastery of, the braille mathematics code as they progress from kindergarten and grades 1 to 12, inclusive. The bill would require that these standards be developed for pupils who, due to a visual impairment, are functionally blind or may be expected to have a need to learn the braille code as their primary literacy mode for learning. The bill would require the task force to report to the state board by March 1, 2006, regarding those standards.

The bill would also require the state board to adopt, by June 1, 2006, braille reading and mathematics standards for pupils who, due to a visual impairment, are functionally blind or may be expected to have a need to learn the braille code as their primary literacy mode for learning.

The bill would also require county offices of education, school districts, and special education local plan areas to provide opportunities for instruction for these pupils to master the braille reading and mathematics standards.

Ch. 531 (AB 901) Ridley-Thomas Covered loans.

Existing law imposes various restrictions on certain consumer loans defined as “covered loans,” including prohibiting a covered loan from including a prepayment fee or penalty after the first 36 months after the date of the loan and requiring a specified disclosure notice to a consumer before a covered loan is made. Existing law defines the term “covered loan” to mean a consumer loan in which the original principal balance of the loan does not exceed \$250,000 in the case of a mortgage or deed of trust where certain conditions are met.

This bill would instead provide that the term “covered loan” means a consumer loan in which the original principal balance of the loan does not exceed the most current conforming loan limit for a single-family first mortgage loan established by the Federal National Mortgage Association.

Existing law requires a county board of supervisors to review annually the effectiveness of the district attorney in deterring, investigating, and prosecuting real estate fraud crimes based upon information provided by the district attorney in an annual report submitted to the board.

This bill would also provide that the report be submitted to the Legislative Analyst’s Office, which would be required to compile the results and report to the Legislature.

Ch. 532 (AB 1045) Frommer Payers’ Bill of Rights: procedure charges.

Existing law provides for the licensure and regulation of health facilities by the State Department of Health Services. A violation of those provisions is a misdemeanor.

The existing Payers’ Bill of Rights requires each hospital to compile a list of the charges for 25 services or procedures commonly charged to patients. Beginning July 1, 2004, existing law requires each hospital to make that list available to any person upon request and to file the list annually with the Office of Statewide Health Planning and Development.

This bill would recast those provisions to require each hospital to compile a list of the average charges for 25 common outpatient procedures and the 25 most common inpatient procedures, as grouped by Medicare diagnostic-related group (DRG), and to submit these lists to the office. The bill would require each hospital to provide a list of average charges for outpatient procedures to the office and would require the office to publish this information on its Internet Web site. The bill would require certain information to be updated by the office at least annually.

Existing law authorizes the Office of Statewide Health Planning and Development to compile a list of the 10 most common Medicare DRGs and the average charge for each of these DRGs per hospital and to publish that information on its Internet Web site.

This bill would repeal those provisions.

Except for the provision of emergency services, this bill would require a hospital, upon the request of a person with no health coverage, to provide the person with a written estimate of the amount the hospital will require the person to pay for the health care services, procedures, and supplies that are reasonably expected to be provided to the person by the hospital and an application for financial assistance or charity care.

This bill would provide that any hospital that does not file the information required by the Payers’ Bill of Rights may be liable for civil penalties.

By changing existing duties of a hospital, the bill would change the definition of a crime, and would thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 533 (AB 1065) Matthews Kitchen grease: transporters.

Existing law requires any person who engages in the transportation of inedible kitchen grease, as defined, to be registered with the Department of Food and Agriculture. Existing law authorizes registered transporters or licensed renderers to transport inedible kitchen grease, as specified.

This bill would define “interceptor grease” for purposes of regulation, including setting fees for transporters of interceptor grease. The bill would require licensed renderers to be registered as transporters in order to transport inedible kitchen grease. The bill would require, as a condition of registration as a transporter of inedible kitchen grease, that the applicant demonstrate the ability to respond to specified damages by means of a policy of insurance or surety bond of not less than \$2,000,000, as specified, and subject to exception. The bill would authorize the department to refuse to register an applicant if certain conditions are found. The bill would authorize the applicant to appeal that denial and would require the department to establish an appeals process for that purpose.

Existing law authorizes the department after a noticed hearing, to suspend or revoke a transporter’s registration if it finds certain acts were committed.

This bill would authorize the department to suspend or revoke a transporter’s registration for those findings, and would expand the circumstances requiring suspension or revocation to include violations of specified provisions relating to the transportation of inedible kitchen grease. The bill would authorize an appeal of the suspension or revocation and require the department to establish an appeals process including a noticed hearing. The bill would establish similar provisions for the revocation or suspension of a renderer’s license and similarly provide for an appeals process.

Existing law provides that it is the purpose of the provisions regulating transporters of inedible kitchen grease to prevent the sale and transfer of illegally obtained inedible kitchen grease.

This bill would expand the purposes of these provisions to include protecting the environment, reducing blockages of public sewer systems, and preventing the improper and illegal transportation and disposal of interceptor grease.

The bill would make other conforming changes.

Existing law requires licensed renderers to record and keep certain records relating to receipt of inedible kitchen grease. Registered transporters and licensed renderers are required to exhibit those records on demand to any peace officer, among others.

This bill would require the records be kept for an additional year. Pursuant to other provisions of law, violation of this provision is a misdemeanor. By expanding the scope of an existing crime, this bill would impose a state-mandated local program. This bill would authorize the department to establish a system for documenting and tracking the transportation of inedible kitchen grease in order to ensure the proper disposal or recycling of that material.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 534 (AB 1143) Emmerson Dentistry.

Existing law provides for the licensing and regulation of dentists by the Dental Board of California. Existing law authorizes a person who furnishes satisfactory evidence of having a pending contract with a California dental college approved by the board as a full-time professor, an associate professor, or an assistant professor, who meets specified education and certification requirements, and who pays a fee, to apply to take an examination for a special permit to practice dentistry.

This bill would delete the requirement that an applicant apply to take the examination, and would instead authorize him or her to apply for a special permit. The bill would authorize

a special permit to be granted where the employment is full time or part time, as defined, and would limit the application fee for a special permit to \$300 and the renewal fee to \$100. The bill would exempt from the education and certification requirements a dentist whose expertise or skill is in a specialty area of dental practice approved by the American Dental Association and recognized by the board or a general dentist, if the dentist has written verification from the dean of a dental school where an employment contract as a professor is pending that the addition of the dentist to the faculty will benefit the students and the dental school program. The bill would limit the special permits issued under these exemptions to not more than 5 of each type per dental school. The bill would authorize a person who has held a special permit for the 7 preceding years to enter into a part-time contract with a California dental college approved by the board if specified conditions are met, and would prohibit the holder of a special permit from practicing more than one day a week in the school's dental practice facility. The bill would also require that an applicant for a special permit furnish satisfactory evidence of successfully completing an examination in California law and ethics developed and administered by the board.

Ch. 535 (AB 1158) Lieber Civil procedure.

(1) Existing law, the California Anti-SLAPP Law, provides that a cause of action against a person arising from any act of that person in furtherance of the person's right of petition or free speech under the United States or California Constitution in connection with a public issue, as specified, shall be subject to a special motion to strike, unless the court, after considering the pleadings and supporting and opposing affidavits, determines that there is a probability that the plaintiff will prevail on the claim. If the court determines that the plaintiff has established that probability, neither that determination nor the fact of that determination is admissible in evidence at any later stage of the case, and no burden of proof or degree of proof otherwise applicable is affected by that determination.

This bill would provide, when the court determines that the plaintiff has established a probability that he or she will prevail on the claim, that neither that determination nor the fact of that determination shall be admissible in evidence at any later stage of the case, or in any subsequent action, and no burden of proof or degree of proof otherwise applicable shall be affected by that determination in any later stage of the case or in any subsequent proceeding.

(2) Existing law provides that a special motion pursuant to the above provisions may be filed within 60 days of service of the complaint or, in the court's discretion, at any later time upon terms it deems proper. Existing law also specifies that the motion shall be noticed for hearing not more than 30 days after service unless the docket conditions of the court require a later hearing.

This bill would require that the motion be scheduled by the clerk of the court for a hearing no more than 30 days after the service of the motion unless the docket conditions of the court require a later date.

(3) This bill would exempt a SLAPPback, as defined, from specified provisions of the California Anti-SLAPP Law, and would establish separate procedures for these actions. Among other things, the bill would require a special motion to strike a SLAPPback to be filed within 120 days of the service of the complaint or, at the court's discretion, within 6 months of the service of the complaint or at any later time in extraordinary cases, as specified. Additionally, the bill would authorize a party opposing a special motion to strike a SLAPPback to file an ex parte application for a continuance to obtain necessary discovery. The bill would require the court to award costs and reasonable attorney's fees to a plaintiff prevailing on a special motion to strike a SLAPPback if the court finds that the motion is frivolous or solely intended to cause unnecessary delay. These provisions would not apply to a SLAPPback filed by a public entity.

(4) The bill would declare the Legislature's intent with respect to certain provisions of the bill.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 536 (AB 1170) Canciamilla San Francisco Bay Area Rapid Transit District: seismic retrofit work: joint use agreements.

Existing law creates the San Francisco Bay Area Rapid Transit District to construct and operate a rail transit system in the Bay Area. The existing California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect. The act exempts from the requirement specified discretionary projects, including specific actions necessary to prevent or mitigate an emergency. Existing law includes in those exempt actions, until June 30, 2005, the San Francisco Bay Area Rapid Transit District's seismic retrofit work on any existing structures or facilities, as specified, necessary for rapid transit service if the district conducts 3 workshops and other outreach efforts to ensure public awareness of the proposed seismic retrofit work prior to commencement of construction.

This bill would revise the exemption applicable to the district's seismic retrofit work on existing structures or facilities and impose certain conditions relative to the exemption. The bill would make these provisions operative until June 1, 2010.

Existing law authorizes the district to enter into agreements for the joint use of any property and rights by the district and any city, public agency, or public utility operating transit facilities for various cooperative ventures relative to transit service.

This bill would revise and recast these provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 537 (AB 1194) Oropeza Entertainment: emergency exits.

(1) Existing law requires the State Fire Marshal to prepare and adopt regulations establishing minimum requirements for the prevention of fire and for the protection of life and property against fire and panic in, among other things, any assembly occupancy where 50 or more persons may gather together in a building, room, or structure for the purpose of amusement, entertainment, instruction, deliberation, worship, drinking or dining, awaiting transportation, or education.

This bill would require that any person, as specified, that owns, rents, leases, or manages a facility, as defined, that hosts a ticketed event for live entertainment make an announcement of the availability of emergency exits prior to the beginning of the live entertainment. Because a violation of this provision would be a misdemeanor, the bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 538 (AB 1378) Lieber Developmental services facilities.

(1) Existing law, the Lanterman Developmental Disabilities Services Act, requires the State Department of Developmental Services to allocate funds to private nonprofit regional centers for the provision of community services and support for persons with developmental disabilities and their families, and sets forth the duties of the regional centers, including, but not limited to, development of individual program plans and the monitoring of services. Existing law requires the department to develop a plan for the proposed closure of any developmental center.

This bill would authorize the department to operate any facility, provide employees to assist in the operation of any facility, provide other necessary services and supports, or contract with any entity for the use of the department's employees to provide services in furtherance of an orderly closure of Agnews Developmental Center.

(2) Existing law sets forth the rules relating to the liability of governmental agencies for tort injury caused by the action or omission of its officers or employees, including, but not limited to, the operation of mental institutions or medical facilities.

This bill would define “mental institution” or “medical facility” for this purpose to also include a developmental services facility, as defined.

(3) Existing law prohibits a retired, dismissed, separated, or formerly employed person of any state agency or department employed under the state civil service or otherwise appointed to serve in state government, within 2 years of the date the person left state employment, from entering into a contract in which he or she engaged in any of the negotiations, transactions, planning, arrangements, or any part of the decisionmaking process relevant to the contract while employed in any capacity by any state agency or department. For a period of 12 months following the date of his or her retirement, dismissal, or separation from state service, existing law prohibits a person employed under state civil service or otherwise appointed to serve in state government from entering into a contract with any state agency if he or she was employed by that state agency in a policymaking position in the same general subject area as the proposed contract within the 12-month period prior to his or her retirement, dismissal, or separation.

This bill would make these provisions inapplicable to any person who, in connection with the closure of Agnews Developmental Center, provides developmental services.

#### Ch. 539 (AB 1386) Laird Dentistry: oral conscious sedation.

Existing law provides for the licensing and regulation of dentists by the Dental Board of California. Existing law prohibits a dentist from administering or supervising the administration of general anesthesia, as defined, on an outpatient basis for dental patients unless the dentist has a general anesthesia permit from the Board of Dental Examiners. Existing law requires a permittee to meet specified requirements, including permitting onsite inspection and evaluation at least once every 6 years and completing 15 hours of approved courses of study related to general anesthesia as a condition of renewal.

This bill would instead require an onsite inspection and evaluation at least once every 5 years, and would require a permittee to complete 24 hours of approved courses of study related to general anesthesia as a condition of renewal.

Existing law generally prohibits a dentist from administering or ordering the administration of conscious sedation, as defined, on an outpatient basis unless the dentist has a general anesthesia permit or has a conscious sedation permit from the board. Existing law sets forth specified requirements that must be met in order to receive a conscious sedation permit, including educational requirements, and sets forth certain activities that constitute unprofessional conduct with respect to conscious sedation.

This bill would revise the definition of conscious sedation and oral conscious sedation, and would specify that a patient whose only response is reflex withdrawal from painful stimuli is not in a state of conscious sedation or oral conscious sedation.

Existing law authorizes a dentist without a permit to administer, or order the administration of, oral conscious sedation for minor patients if he or she registers his or her name with the board and meets specified requirements, including certain advanced education or residency requirements. Existing law sets forth precautions for dentists to take applicable to the oral conscious sedation of minors. A violation of the provisions governing the oral conscious sedation of minors constitutes unprofessional conduct.

This bill would revise the advanced education and residency requirements. The bill would also authorize a dentist without a permit to administer, or order the administration of, oral conscious sedation for adult patients if he or she registers his or her name with the board, pays an application fee, and meets specified requirements. The bill would set forth precautions for dentists to take applicable to the oral conscious sedation of adults. The bill would make a violation of the provisions governing the oral conscious sedation of adults unprofessional conduct, subject to revocation or suspension of the dentist’s permit, certificate, or license, or

all 3, or reprimand or probation. The bill would also require, in all cases of oral conscious sedation, that the drugs or techniques used have a margin of safety wide enough to render unintended loss of consciousness unlikely, and would require for very young or handicapped individuals incapable of the usually expected verbal response a minimally depressed level of consciousness to be maintained.

The bill would appropriate \$47,000 to the Department of Consumer Affairs from the State Dentistry Fund for processing applications for adult conscious sedation certificates.

This bill would delete obsolete related provisions.

Ch. 540 (AB 1438) Salinas Local agencies: open meetings.

(1) The Ralph M. Brown Act requires, with specified exceptions, that all meetings of a legislative body of a local agency be open and public and all persons be permitted to attend. The act authorizes a legislative body to use teleconferencing, subject to specified requirements, including that each teleconference location be accessible to the public and that at least a quorum of the members of the body participate from locations within the boundaries of the territory over which the local agency exercises jurisdiction.

Existing law provides that in counties selected by the Director of Health Services with the concurrence of the county, a special county health authority may be established in order to meet the problems of delivery of publicly assisted medical care in each county, and to demonstrate ways of promoting quality care and cost efficiency.

This bill would provide that, notwithstanding the provisions of the act on teleconferencing, until January 1, 2009, with respect to a teleconference meeting of a county health authority established in a county under specified provisions, members of a health authority who are outside the jurisdiction may be counted toward the establishment of a quorum when participating in the teleconference if at least 50% of the number of members that would establish a quorum are present within the jurisdiction and the health authority provides a teleconference number and associated access codes, if any, that allows any person to call in to participate in the meeting and that number and access codes are identified in the notice and agenda of the meeting.

(2) Existing constitutional provisions require that a statute that limits the right of access to the meetings of public bodies or the writings of public officials and agencies be adopted with findings demonstrating the interest protected by the limitation and the need for protecting that interest.

This bill would make legislative findings to that effect.

Ch. 541 (AB 1497) Baca Government real property.

(1) In 1984, the State of California, through the Director of General Services, conveyed certain real property to the Redevelopment Agency of the City of San Bernardino on the condition that it only be used for park and recreation purposes. The deed was recorded in San Bernardino County on November 13, 1984, and transferred to the city a specified parcel within the County of San Bernardino.

This bill would state that under a particular quitclaim deed, real property was transferred to the Redevelopment Agency of the City of San Bernardino with a specified use restriction and the state has the right to reenter and take possession of the real property and to cause the title to the property to revert to the state if the use restriction is violated. The bill would state that the Legislature recognizes that the property was transferred to the San Bernardino City School District for use as recreational fields that will be accessible to the public. The bill would state that the Legislature acknowledges that this use is in compliance with the purposes and intent of the use restriction.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 542 (AB 1533) Bass Health care coverage.

Existing law governs the licensure and regulation of health care service plans and insurers, and makes a willful violation of the provisions governing health care service plans a crime. Existing law defines a "late enrollee" as an eligible employee or dependent who has declined health coverage under the health benefit plan offered through employment or sponsored by an employer at the time of the initial enrollment period provided under the terms of the health benefit plan and who subsequently requests enrollment in that plan. Existing law provides exceptions under which an eligible employee or dependent is not considered a late enrollee.

This bill would add to those exceptions an individual, or his or her dependent, who has lost or will lose Healthy Families Program coverage as a result of exceeding the program's income or age limits and who requests enrollment within 30 days after termination of coverage.

Because the bill would change the definition of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 543 (AB 1610) Wolk Charter schools.

(1) Existing law, the Charter Schools Act of 1992, requires a charter school to comply with the provisions of its charter and the laws pertaining to charter schools and exempts charter schools from the laws governing school districts, with specified exceptions. Existing law authorizes the governing board of a charter school to request, and the State Board of Education to approve, a waiver of any otherwise applicable provision of law until July 1, 2005, with certain requirements.

This bill, instead, would make these provisions operative until January 1, 2007.

(2) Existing law, the Charter Schools Act of 1992, permits teachers, parents, pupils, and community members to petition the governing board of a school district to approve a charter school to operate independently from the existing school district structure as a method of accomplishing, among other things, improved pupil learning.

Existing law requires that charter schools meet specified statewide standards and conduct the specified pupil assessments.

This bill would require that these standards and pupil assessments include the high school exit examination, and would require a pupil completing grade 12 to successfully pass the exit examination as a condition of receiving a diploma of graduation.

This bill would also require a charter school, if a pupil is expelled or leaves the charter school without graduating or completing the school year for any reason, to notify the superintendent of the school district of the pupil's last known address within 30 days, and, upon request, to provide that school district with a copy of the cumulative record of the pupil, including a transcript of grades or report card, and health information, thereby imposing a state-mandated local program.

(3) Existing law authorizes a county board of education to approve a petition for the operation of a charter school that operates at one or more sites within the geographic boundaries of the county, and that provides instructional services that are generally not provided by a county office of education, if the county board of education finds, among other things, that the educational services to be provided by the charter school will offer services to a pupil population that will benefit from those services and that cannot be served as well by a charter school that operates in only one school district in the county. Existing law establishes petition and public hearing procedures prior to the approval of a petition for the establishment of such a charter school. Existing law requires the county board of education to deny a petition for the establishment of such a charter school if the board finds, among other things, that the petition does not contain reasonably comprehensive descriptions, as specified, with respect to the educational program of the school.

This bill would, if the proposed charter school serves high school pupils, expand the requirements of the petition to include a reasonably comprehensive description as to how the charter school will inform parents regarding transferability of courses to other public high schools and as to whether each individual course offered by the charter school meets college entrance requirements, as specified, admission requirements of the charter school, the public school attendance alternatives for pupils residing within the county, certain employee rights, and procedures to be used if the charter school closes.

Under existing law, a charter may be granted, as specified, for a period not to exceed 5 years, and renewed, as specified. Existing law authorizes a material revision of the provisions of a charter petition to be made only with the approval of the authority that granted the charter, and specifies the standards and criteria that govern renewals and material revisions.

This bill would require that renewals and material revisions include, but not be limited to, a reasonably comprehensive description of any new requirement of charter schools enacted into law after the charter was originally granted or last renewed.

(4) Existing law requires that charter schools meet specified statewide standards and conduct the specified pupils assessments.

This bill would require that these standards and pupil assessments include the high school exit examination, and would require a pupil completing grade 12 to successfully pass the exit examination as a condition of receiving a diploma of graduation.

(5) Existing law requires a charter school to offer, at a minimum, a specified number of minutes of instruction for the appropriate age levels, to maintain written, contemporaneous records that document all pupil attendance, and to make these records available for audit and inspection.

This bill would prohibit the State Board of Education or the Superintendent of Public Instruction from waiving these requirements, but would permit the waiver of fiscal penalties incurred due to such a violation, with certain requirements.

(6) Existing law requires that the ratio of average daily attendance for independent study pupils 18 years of age or less to school district or county office of education full-time equivalent certificated employees responsible for independent study not exceed specified ratios.

This bill would authorize a charter school to calculate the above pupil-certificated employee ratio by using a fixed pupil-teacher ratio of 25 to 1, or less than 25 pupils per certificated employee.

(7) This bill would also make various technical, nonsubstantive changes to existing law.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 544 (AB 1655) Jerome Horton Public postsecondary education: fees and tuition: waiver: survivors of deceased law enforcement and firefighting personnel.

Existing law requires the Regents of the University of California, the Board of Directors of the Hastings College of the Law, and the Trustees of the California State University to excuse the mandatory systemwide tuition and fees of any surviving spouse or surviving child, natural or adopted, of a deceased person who was a resident of the state, who was employed by a public agency, or who was a contractor, or who was an employee of a contractor, as defined, whose principal duties consisted of active law enforcement service or active fire suppression and prevention, and who was killed in the performance of those duties. This provision is applicable to the Regents of the University of California only if the regents, by resolution, make it applicable.

This bill would add a surviving stepchild who, at the time of the death of that deceased person or at any time while that stepchild was a minor, was living or domiciled with the deceased person and claimed on a tax form filed by or on behalf of that deceased person, to the categories of survivors for whom the waiver of mandatory systemwide fees or tuition is authorized by this provision.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 545 (AB 1712) Hancock Domestic violence.

Existing law authorizes the Alameda County Board of Supervisors, upon making findings and declarations supporting the need for governmental oversight and coordination of the multiple agencies dealing with domestic violence, to authorize an increase in the fees for certified copies of marriage certificates, birth certificates, fetal death records, and death records, up to a maximum increase of \$2. Existing law authorizes the Alameda County Board of Supervisors to authorize an increase in those fees each year. In addition to those fees, existing law requires any applicant for a certified copy of a birth certificate, a fetal death record, or death record in Alameda County to pay an additional fee to the local registrar, county recorder, or county clerk as established by the Alameda County Board of Supervisors.

Existing law requires the Alameda County Board of Supervisors to direct the local registrar, county recorder, and county clerk to deposit the above fees into a special fund. Existing law authorizes the county to retain up to 4% of the fund for administrative costs and requires proceeds from the fund to be used for governmental oversight and coordination of domestic violence and family violence prevention, intervention, and prosecution efforts.

The above provisions of existing law remain in effect only until January 1, 2010.

This bill would additionally authorize the City Council of the City of Berkeley to authorize an increase in the fees within its local health jurisdiction for certified copies of birth certificates, fetal death records, and death records, up to a maximum increase of \$2. The bill would also authorize the city to authorize an increase in those fees each year and to establish an additional fee that any applicant for a certified copy of a birth certificate, a fetal death record, or death record in the city must pay to the local registrar. The bill would require the city to direct the local registrar to deposit the above fees into a special fund, separate from the county's special fund, and would authorize the city to retain up to 4% of the fund for administrative costs.

This bill would require the City Council of the City of Berkeley to submit a report to the Assembly Committee on Judiciary and the Senate Committee on Judiciary, by no later than July 1, 2009, containing designated information relating to the receipt and expenditure of the authorized fees and domestic violence prevention, intervention, and prosecution efforts in the city.

This bill would state the finding and declaration of the Legislature that, due to unique circumstances applicable to the City of Berkeley, a statute of general applicability cannot be made applicable.

Ch. 546 (AB 1753) Committee on Governmental Organization Gambling.

(1) The Gambling Control Act regulates the business of gambling within California and specifically requires every key employee, as defined, to apply for and obtain a key employee license. Pursuant to that act, a person is prohibited from being issued a key employee license unless that person is a California resident.

This bill would delete that restriction on obtaining a license.

(2) Existing law defines and regulates gaming, and further prohibits the transport and possession of slot machines, unless for purposes of display at trade shows and if the machine is inoperable.

This bill would add use as a prop for movies or television as an exemption, permitting the transport and possession of slot machines, and would provide that the exemption applies if the machine is inoperable or is set on "demonstration mode," as defined.

(3) Existing law prohibits persons from engaging in specified unlawful gambling activities, including fraudulently obtaining money or property from another person by the game of 3 card monte or other games, pool selling or bookmaking, or attempting to influence the outcome of sporting events or contests, among other offenses. Existing law specifies the penalties for each of those offenses and makes them punishable by imprisonment or by fine, or both.

This bill would revise the penalties for each of those offenses, and would set maximum and minimum fine amounts for each violation. The bill would also make technical, nonsubstantive changes to those provisions.

By changing the penalties of various gambling crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 547 (AB 1772) Committee on Public Employees, Retirement and Social Security Classified school employees.

(1) Existing law requires a personnel commission to prescribe, amend, and interpret rules regarding the merit system. Existing law requires that those rules be printed and made available to a school, among others.

This bill would provide that those rules may be electronically transmitted.

(2) Existing law, until January 1, 2006, in a school district with a pupil population over 400,000, authorizes an appointment for a school-based position to be made from any rank on an eligibility list, but requires consideration of certain factors.

The bill would, until January 1, 2007, in a school district with a pupil population over 400,000, authorize an appointment for an open, entry-level, school-based position to be made from any rank on an eligibility list, with consideration of certain factors.

(3) Existing law, until January 1, 2006, in a school district with a pupil population over 400,000, authorizes an appointment to be made from other than the first 3 ranks of eligible applicants on an eligibility list if one of several specified conditions is satisfied.

The bill would change the date on which that authorization is to be repealed to January 1, 2007.

(4) Existing law provides that certain requirements regarding giving written notice of tests, vacancies, and transfer opportunities do not apply to a school district that publishes and distributes examination bulletins to all work locations at least once each month, as specified.

This bill would authorize a school district to publish and distribute examination bulletins by electronic means.

(5) Existing law authorizes the governing board of a school district to grant reimbursement of the costs, including tuition fees, to a permanent classified employee who satisfactorily completes approved training to improve his job knowledge, ability, or skill.

This bill would authorize the governing board of a school district to permit a permanent classified employee to attend a minimum of one schoolday each year, during working hours, for job-related in-service training, with pay.

Ch. 548 (SB 131) Chesbro Medi-Cal: federally qualified health centers and rural health clinics: reimbursement rates.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which health care services are provided to qualified low-income persons. Federally qualified health center (FQHC) services and rural health

clinic (RHC) services described under federal law are covered Medi-Cal benefits. Existing law requires that FQHCs and RHCs be reimbursed on a per-visit basis and defines "visit" for this purpose as a face-to-face encounter between the FQHC or RHC patient and designated health care providers under prescribed conditions.

Existing law authorizes an FQHC to elect to be reimbursed on a fee-for-service basis for pharmacy and dental services.

Existing law establishes procedures for a federally qualified health center or rural health clinic to submit scope-of-service rate change requests to qualify for an adjustment to its per-visit rate.

This bill, notwithstanding existing law, would deem a scope-of-service change request to be timely when filed within 150 days following the beginning of the FQHC's or RHC's fiscal year following the year in which the change occurred.

Existing law provides for the establishment of a commission to operate a local initiative that provides or arranges for the delivery of health care services in all or part of the geographic area of Los Angeles County. Existing law authorizes the department to obtain approval for a demonstration or pilot project under applicable federal laws in connection with the local initiative in Los Angeles County.

This bill, with certain exceptions, would require FQHCs that are receiving cost-based reimbursement under the terms of the Los Angeles County Section 1115 Waiver Demonstration Project on June 30, 2005, referred to as "Los Angeles cost-based FQHCs," to transition to a prospective payment system rate upon expiration of that waiver.

#### Ch. 549 (SB 418) Escutia Rehabilitation loans.

Existing law creates the Rehabilitation Revolving Loan Guarantee Fund, administered by the Department of Rehabilitation, which is appropriated without regard to fiscal years for the purpose of guaranteeing loans to persons for the purchase of vans, automobiles, and other special equipment to facilitate transportation of the physically handicapped and to assist private employers and employees and other persons with disabilities to purchase adaptive aids and assistive devices.

Under existing law, one of the categories of persons eligible to receive loans under this fund is persons with disabilities who require a modified vehicle for mobility and who are ineligible for vocational rehabilitation services or who are eligible for vocational rehabilitation services but have been placed on the department's order of selection waiting list, subject to the requirement that the person be employed and require a vehicle to maintain that employment.

This bill would delete these vocational rehabilitation and employment requirements for eligibility under the fund. By eliminating these conditions of eligibility, and thus expanding the eligibility for persons who may receive loans under this continuously appropriated fund, the bill would make an appropriation.

Existing law establishes a supported employment loan guarantee program to assist employers and employees with disabilities to purchase durable equipment, adaptive aids, and assistive devices in order to engage in supported employment. Existing law also creates within the Rehabilitation Revolving Loan Guarantee Fund a Supported Employment Revolving Loan Guarantee Account from which the department makes these loan guarantees.

This bill would eliminate this account and instead would make loans available directly from the fund to parents of a child with, or persons with, a disability who require assistive technology, as defined, that is necessary for independent living. The bill would require that loans made pursuant to these provisions provide for a security interest to the lending institution in the equipment, aids, and devices for which the loan is made, to the extent possible. It would also make various technical and conforming changes.

Existing law prohibits any loan exceeding \$35,000 from being made to any eligible persons under the above provisions.

This bill would instead require that loans made to any eligible person not exceed \$50,000.

Existing law requires the department to adopt regulations not inconsistent with these provisions, that, among other things, establish criteria for determining eligibility for loans in the guarantee program that ensure that applicants have the ability to repay loans. Existing law, in the event that the amount of loans applied for under these provisions exceeds the amount of the loans that may be guaranteed, authorizes the department to establish a system of priorities for the approval of loans.

This bill would require the department to adopt regulations that give preference to those applicants not receiving other supports and services from the department.

Existing federal law provides for the award of grants to states to pay for the federal share of the cost of the establishment and administration of, or the expansion and administration of, an alternative financing program featuring one or more alternative financing mechanisms to allow individuals with disabilities and their family members, guardians, advocates, and authorized representatives to purchase assistive technology devices and assistive technology services. State eligibility for participation in this program is based on the state's previous award of continuity grants for technology-related assistance and other requirements including that the state enter into a contract with a community-based organization that has individuals with disabilities involved in organizational decision making at all organizational levels for purposes of administering the federal alternative financing program.

This bill would authorize the department to apply for the federal grant funding and to enter into a contract with a community-based organization for purposes of receiving a federal grant award under this program. The bill would permit moneys in the fund to be used for purposes of matching these federal grant funds, thereby making an appropriation.

This bill would also require that any federal funds received be deposited in the Rehabilitation Revolving Loan Guarantee Fund, thereby making an appropriation.

#### Ch. 550 (SB 615) Figueroa Cervical cancer.

Existing law requires the State Department of Health Services to conduct the Cervical Cancer Community Awareness Campaign. Existing law requires the campaign to provide awareness, assistance, and information regarding cervical cancer.

This bill would extend the scope of the campaign to include the human papillomavirus (HPV), including provider education aimed at promoting the awareness of HPV and its link to cervical cancer.

Existing law establishes the Cervical Cancer Fund in the State Treasury to be expended by the department, upon appropriation by the Legislature, for the campaign. Existing law provides that the campaign shall not be implemented unless and until funds are appropriated for that purpose in the annual Budget Act.

This bill would provide, instead, that the department shall conduct the Cervical Cancer Community Awareness Campaign only if voluntary contributions are received to support its activities in conducting the campaign, and would make the continued implementation of the campaign contingent upon the receipt of voluntary contributions for that purpose. The bill would further provide that if the Department of Finance determines that insufficient voluntary contributions for purposes of implementing these provisions have been deposited with the state by January 1, 2007, the Department of Finance shall notify either the Chief Clerk of the Assembly or the Secretary of the Senate of this fact, and these provisions would be repealed on January 1, 2007.

This bill would require the department to report to the chairs and vice chairs of the health committees of both houses of the Legislature, on or before January 1, 2007, on the progress of the campaign.

#### Ch. 551 (SB 643) Chesbro Nursing facilities.

(1) Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, and which provides health care services to qualified

low-income recipients. The Medi-Cal program is partially governed and funded by federal Medicaid provisions.

Under existing law, the State Department of Health Services has obtained various waivers of Medicaid provisions generally aimed at enabling more Medi-Cal recipients to obtain the necessary services to reside in community settings.

This bill would authorize the department to seek an increase in the scope of these waivers, in order to enable additional nursing facility residents to transition into the community, but would condition implementation of these amended waivers upon obtaining federal financial participation, and only to the extent it can demonstrate fiscal neutrality within the overall department budget.

Existing law provides for the payment of claims for providers of services under the Medi-Cal system.

This bill would require the department, upon receipt of a complete and accurate claim for an individual nurse provider, as defined, to adjudicate the claim within an average of 30 days.

Existing law contains application procedures for the approval and enrollment of Medi-Cal providers.

This bill would require the department, during the budget proceedings of the 2006-07 fiscal year, and each fiscal year thereafter, to provide data to the Legislature specifying the timeframe under which it has processed and approved the provider applications submitted by individual nurse providers, as defined.

(2) Existing law authorizes the State Department of Developmental Services to approve a regional center proposal to provide for housing for persons eligible for regional center services.

This bill would clarify that the proposal would ensure full payment of leases, and would be based on the availability for occupancy.

Ch. 552 (SB 661) Migden Public postsecondary education: California State University: California Student Athlete Fair Opportunity Act of 2005.

Existing law establishes the public postsecondary education system in California. Among the segments of public postsecondary education in the state is the California State University, which is administered by the Trustees of the California State University.

This bill would require the trustees to ensure that all California State University campuses that provide athletic scholarships for student athletes also provide summer athletic scholarships commencing during the 2006 summer term.

The bill would require that the summer athletic scholarships provided under the bill be sufficient to cover the cost of tuition, fees, books, and supplies as calculated for purposes of the summer cost of attendance.

The bill would require the trustees to ensure that all California State University campuses that are members of the National Collegiate Athletic Association have a comprehensive plan for the academic support of student athletes. The bill would require that a student athlete may only receive summer financial aid assistance under the bill if that student athlete otherwise qualifies for that assistance irrespective of his or her status as a student athlete.

The bill would require the trustees to report to the Legislature and the Governor on or before November 1, 2006, and subsequently on or before November 1 of each odd-numbered year, commencing on November 1, 2007, with prescribed data regarding the status of athletic academic progress and athletic academic support in the California State University system for all campuses that are members of the National Collegiate Athletic Association.

The bill would prohibit the university from encumbering, for the purposes of the bill, any moneys from the state General Fund or any state university fee revenue.

Ch. 553 (SB 707) Kehoe Before and after school programs.

Existing law, the After School Education and Safety Program, creates incentives for establishing local before and after school enrichment programs and establishes maximum grants for before and after school programs. Existing law allows an applicant for one of those grants to request approval from the Superintendent of Public Instruction, prior to or during the grant application process, to provide services at another schoolsite for either the before or after school component if there is a significant barrier to pupil participation in a before and after school enrichment program at the school of attendance.

This bill would allow a program grantee that is temporarily prevented from operating a program at a given site due to natural disaster, civil unrest, or imminent danger to pupils or staff in addition to other sources of authority to transfer funds, as specified, to transfer funding to other program sites to meet attendance targets during that time period. The bill would allow the State Department of Education to recommend, and the State Board of Education to approve, a request by a program grantee for payment of funds, as specified, in the event that the grantee is temporarily prevented from operating its entire program due to natural disaster, civil unrest, or imminent danger to pupils or staff. The bill would allow the State Board of Education, upon the request of a program grantee, to approve other unforeseen events as qualifying a program grantee to shift funding to other program sites, as specified.

Existing law requires every after school component of a program to operate a minimum of 3 hours a day and at least until 6 p.m. on every regular schoolday.

This bill would authorize the State Department of Education to reimburse a program grantee for up to 125% of the maximum total grant amount for an individual school, upon specified conditions. The bill would require every after school component of a program to commence immediately upon the conclusion of the regular schoolday, and operate a minimum of 15 hours per week, and at least until 6 p.m. on every regular schoolday.

Existing law provides that in no event shall a pupil participate in a before school program less than 1½ hours per day to be eligible for funding.

This bill would make a school ineligible for funding for a pupil who attends less than one-half of the daily program hours.

Existing law provides that a program participant receiving state funding may expend no more than 15% of that funding on administrative costs.

This bill would provide that those funds need not be earned through pupil attendance.

Ch. 554 (SB 776) Runner Health care districts: mortgage insurance, loans, credit.

Existing law provides for the formation and establishes the powers of a health care district. Existing law places limits on the extent to which a health care district may borrow money and incur indebtedness.

Existing law authorizes the board of directors of any district to borrow money or issue bonds and to execute first mortgages, first deeds of trust, or other necessary security interests exclusively for the purpose of securing federal mortgage insurance or federal loans for financing or refinancing the construction of new health facilities, the expansion, modernization, renovation, remodeling, or alteration of existing health facilities, and the initial equipping of those health facilities under the federal mortgage insurance programs available to a local hospital district.

This bill would add to the purposes for which the board of directors of a district may borrow money, issue bonds, or execute first mortgages, first deeds of trust, or other security interests, the purpose of securing federally insured loans issued under the National Housing Act.

Existing law requires that any first mortgage, first deed of trust, or other necessary security interest be executed in favor of the United States or appropriate federal agency.

The bill would additionally authorize the board of directors to execute first mortgages, first deeds of trust, or other security interests in favor of a federally designated mortgagor.

Existing law states the Legislature's determination that the United States or appropriate federal agency named as beneficiary of any first mortgage or other security interest delivered as authorized by this section is not a private person or body for purposes of the California Constitution's prohibition on the Legislature delegating to a private person or body the power to make, control, appropriate, supervise, or interfere with county or municipal corporation improvements, money, or property, or to levy taxes or assessments, or perform municipal functions.

For purposes of the constitutional provision above, the bill would add that the Legislature determines that a federally designated mortgagor named as beneficiary of any first mortgage or other security interest is not a private person or body.

The bill would authorize a district, by resolution adopted by a majority of the district board, to (1) enter into a line of credit with a commercial lender that is secured by the accounts receivable or other intangible assets of the district, and thereafter borrow funds against the line of credit to be used for any district purpose, (2) enter into capital leases for the purchase by the district of equipment to be used for any district purpose, and (3) enter into lease-purchase agreements for the purchase by the district of real property, buildings, and facilities to be used for any district purpose.

#### Ch. 555 (SB 854) Ashburn Community learning centers.

Existing law establishes the After School Education and Safety Program to create incentives to establish locally driven before and after school enrichment programs for pupils in kindergarten and grades 1 to 9, inclusive.

Existing law states the intent of the Legislature that federally funded 21st Century Community Learning Centers complement the After School Education and Safety Program to provide the local flexibility needed to implement the federal 21st Century Community Learning Centers program through direct grants. Existing law, in accordance with the 21st Century Community Learning Centers program contained in the federal No Child Left Behind Act of 2001, allocates funds appropriated by the Budget Act of 2002 and prescribes requirements related to the allocation of funds.

The bill would allocate funds appropriated in the annual Budget Act for purposes of those learning center programs. The bill would set maximum per pupil rates, and maximum total grant amounts for before and after school learning center programs, as specified.

The bill would establish the Advisory Committee on Before and After School Programs for the purpose of providing information and advice to the Superintendent of Public Instruction, the Secretary for Education, and the State Board of Education regarding state and federal policy and funding issues affecting before and after school programs.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 556 (SB 954) Figueroa Information technology goods and services: procurement.

Existing law sets forth the requirements for the acquisition of information technology goods and services by the state, and requires all contracts for the acquisition of those goods and services to be made by or under the supervision of the Department of General Services, with expenditures in this regard subject to the review and approval of the Department of Finance.

This bill makes certain findings regarding the manner in which state agencies procure information technology goods and services. This bill would require the Department of General Services, on or before January 1, 2007, to develop policies and guidelines for the procurement of information technology goods and services, including identifying and documenting information for requests for proposals, publishing policies regarding obtaining bids for and acquiring information technology, establishing a centralized entity responsible for information technology procurement methods within the Department of General Services, developing uniform standards, with at least 2 public hearings, for information

technology procurement, and communicating rules and requirements to vendors and the general public.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 557 (SB 959) Kehoe San Diego Metropolitan Transit Development Board.

Existing law, the Mills-Deddeh Transit Development Act, creates the San Diego Metropolitan Transit Development Board, which is authorized to perform certain transportation functions in a portion of the County of San Diego, including planning and constructing exclusive public mass transit guideways. Under existing law, the board is authorized to enter into contracts for the acquisition of goods and services and is required to comply with specified requirements in that contracting process. Existing law authorizes the board to issue revenue bonds and to borrow money in accordance with certain procedures.

This bill would extend various types of benefits to the board that are accorded under existing law to other public agencies. The bill would revise the board's contracting requirements and its responsibilities for planning and constructing exclusive public mass transit guideways, specifying that the board provide input on those matters to the San Diego Association of Governments (SDAG). The bill would name SDAG the designated recipient of federal transit funds and would require the board to administer its transportation funding and its public transit system in conformity with the San Diego Regional Transportation Consolidation Act.

Because the bill would require the board to assume additional responsibilities, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 558 (SB 962) Chesbro Adult Residential Facility for Persons with Special Health Care Needs: pilot project.

Existing law, the California Community Care Facilities Act, provides for the licensure and regulation of community care and residential facilities by the State Department of Social Services. Under existing law, a violation of any of these provisions is punishable as a misdemeanor.

Existing law establishes the State Department of Developmental Services and sets forth its duties and responsibilities, including, but not limited to, administration and oversight of the state developmental centers and programs relating to persons with developmental disabilities. Existing law, the Lanterman Developmental Disabilities Services Act, requires the department to allocate funds to private nonprofit regional centers for the provision of community services and support for persons with developmental disabilities and their families. Violation of community care licensing provisions is a crime.

This bill would, until January 1, 2010, authorize the State Department of Social Services and the State Department of Developmental Services, to jointly establish and administer a pilot project for licensing and regulating Adult Residential Facilities for Persons with Special Health Care Needs, to the extent that funds are appropriated for this purpose in the annual Budget Act, and would make conforming changes. The bill would authorize entering into a contract for independent evaluation of the program, and would require a report to the Legislature by January 1, 2009. By changing the definition of crimes provided for under the California Community Care Facilities Act, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 559 (SB 967) Florez Local agency formation.

Existing law sets forth the composition of and procedures for the selection of members of local agency formation commissions within each county. Under existing law, these commissions are composed of 5 members, 2 representing the county, 2 representing the city or cities within the county, and one representing the general public. These commissions are augmented by 2 members where the county orders representation of special districts upon the commission.

This bill would augment the commission in Kern County, which consists of 7 members, by the appointment of an 8th member, who shall be a member of the legislative body of the city in the county having the largest population and shall be appointed by the legislative body of that city and the appointment of a 9th member, who shall represent the general public and shall be appointed by the commission members appointed by the county board of supervisors and the independent special district selection committee. By requiring an increase in the number of commission members in Kern County, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 560 (SB 1100) Perata Hospital funding.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits, including hospital services. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions. Existing law authorizes the California Medical Assistance Commission to negotiate selective provider contracts with eligible hospitals to provide inpatient hospital services to Medi-Cal beneficiaries.

Existing law generally defines a disproportionate hospital as a hospital that has disproportionately higher costs, volume, or services related to the provision of services to Medi-Cal or other low-income patients than the statewide average. Under existing law, an eligible disproportionate share hospital may receive supplemental Medi-Cal reimbursement.

This bill would establish the Medi-Cal Hospital/Uninsured Care Demonstration Project Act that would revise hospital reimbursement methodologies in order to maximize the use of federal funds consistent with federal Medicaid law and stabilize the distribution of funding for hospitals that provide care to Medi-Cal beneficiaries and uninsured patients. These provisions would have retroactive application to services rendered on and after July 1, 2005.

This bill would authorize the director, if certain conditions exist, to modify the processes and methodologies established under the demonstration project to achieve equitable distribution of demonstration project funding, and if equitable distribution cannot be achieved, as determined by the director after consulting with affected hospitals, to execute a declaration to that effect. The bill would provide that the demonstration project shall become inoperative on the date that the director executes the declaration and shall be repealed as of January 1 of the following year. Unless repealed as provided in that provision, the bill would provide that the demonstration project shall become inoperative on the date that the director executes a declaration, which shall be retained by the director and provided to the fiscal and appropriate policy committees of the Legislature, stating that the federal demonstration project provided for in this bill has been terminated by the federal Centers for Medicare and Medicaid Services, in which case the provisions of the bill would be repealed 6 months after the date the declaration is executed.

This bill would appropriate to the department \$1,700,000 from the General Fund and \$1,700,000 from the Federal Trust Fund to fund staff positions to support the implementation of the demonstration project.

The bill would establish the following continuously appropriated funds to be expended by the department:

(1) The Demonstration Disproportionate Share Hospital Fund, that would consist of federal funds claimed and received by the department as federal financial participation with respect to certified public expenditures.

(2) The Health Care Support Fund, consisting of safety net care pool funds, as defined, claimed and received by the department.

(3) The Private Hospital Supplemental Fund, the Nondesignated Public Hospital Supplemental Fund, and the Distressed Hospital Fund, which would consist of moneys from various sources, to be used as the source of the nonfederal share of payments to private hospitals, as defined, nondesignated public hospitals, as defined, and distressed hospitals, as defined, respectively.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 561 (SB 1102) Hollingsworth Disaster response.

Existing law establishes the Disaster Response-Emergency Operations Account in the Special Fund for Economic Uncertainties. Moneys in the account are continuously appropriated subject to specified limitations for allocation by the Director of Finance to state agencies for disaster response operation costs incurred by state agencies as a result of a proclamation by the Governor of a state of emergency. Existing law repeals these provisions on January 1, 2006.

This bill would extend the repeal of these provisions to July 1, 2007. By extending the term of the continuously appropriated account, the bill would make an appropriation.

#### Ch. 562 (AB 67) Levine Energy: rates: report to the Legislature: fuel cell customer-generators.

(1) Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations and gas corporations, as defined. Under existing law, a public utility has a duty to serve, including furnishing and maintaining adequate, efficient, just and reasonable service, instrumentalities, equipment, and facilities as are necessary to promote the safety, health, comfort, and convenience of its patrons and the public. Existing law authorizes the commission to fix the rates and charges for every public utility, and requires that those rates and charges be just and reasonable.

This bill would require the president of the commission to annually report to the appropriate policy committees of the Legislature on the costs of programs and activities conducted by an electrical corporation or gas corporation that have more than a specified number of customers in California, including activities conducted to comply with their duty to serve.

(2) Existing law, until January 1, 2006, requires every electrical corporation, as defined, to file with the Public Utilities Commission a standard tariff to provide for net energy metering, as defined, for eligible fuel cell customer-generators, as defined, until the total cumulative rated generating capacity used by the eligible fuel cell customer-generators equals 45 megawatts within the service territory of the electrical corporation for an electrical corporation with a peak demand above 10,000 megawatts, or equals 22.5 megawatts within the service territory of the electrical corporation for an electrical corporation with a peak demand of 10,000 megawatts or below. Existing law prohibits the combined statewide cumulative rated generating capacity used by the eligible fuel cell customer-generators in the service territories of all electrical corporations from exceeding 112.5 megawatts.

This bill would remove the January 1, 2006, repeal date, thereby making that tariff requirement operative indefinitely. Under the bill, a fuel cell electrical generating facility, as

defined, would not be eligible for participation in the tariff unless it commenced operation before January 1, 2010, and a fuel cell customer-generator would be eligible for the tariff only for the operating life of the eligible fuel cell electrical generating facility. Because a violation of these provisions is a crime under existing law, this bill, by changing the definition of a crime, would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 563 (AB 193) Maze Fish and game: Mount Whitney Fish Hatchery.

Existing law requires the Fish and Game Commission to establish fish hatcheries for the purposes of stocking the waters of California with fish, and requires the Department of Fish and Game to maintain and operate those hatcheries.

This bill would authorize the Director of General Services, with the consent of the Department of Fish and Game, to lease the Mount Whitney Fish Hatchery facilities, or any portion thereof, to the Friends of the Mount Whitney Hatchery for a term not to exceed 25 years, and with the possibility of renewal. The bill would require the leased portion of the building to be utilized for specified purposes. This bill would also require the lease to contain provisions that do all of the following: (1) require that any work done on the facility be performed in consultation with the State Office of Historic Preservation; (2) require the Friends of the Mount Whitney Fish Hatchery to permit reasonable public access to the facilities, to obtain and maintain liability insurance for the leased portion of the facilities, and to maintain the leased portion of the facilities at all times; and (3) require that the state, agents of the state, the department, and agents of the department be held harmless from, and indemnified against, any liability resulting from the acts or omissions of the lessee performed in the course of the lease agreement.

This bill would also make a legislative finding and declaration relating to the Mount Whitney Fish Hatchery.

Ch. 564 (AB 259) Hancock Solid waste: handling services: delinquent charges: liens.

(1) Existing law authorizes the board of supervisors of a county to collect or contract for the collection, or both, of garbage, waste, refuse, rubbish, offal, trimmings, or other refuse matter under those terms and conditions that the board of supervisors may prescribe by resolution or ordinance. The board of supervisors may either levy a yearly tax on property within the unincorporated area of the county or impose a reasonable charge against the real property benefitted for the services provided. If these services are provided by a county, and the service is compulsory or provided at the request of the property owner, the cost of service that remains unpaid for a period of 60 or more days after the close of the period for which it was billed may be collected by the county pursuant to a specified procedure, including imposition of a lien on the property for the amount of the delinquent charges.

Existing law authorizes a county board of supervisors to establish a schedule of fees to be imposed on land within the unincorporated area of the county and incorporated areas of the county where cities do not provide their own waste disposal sites, with revenue from the fees to be used for the acquisition, operation, and maintenance of county waste disposal sites and for financing waste collection, processing, reclamation, and disposal services, where those services are provided. Fees that remain unpaid for a period of 60 or more days after the date upon which they were billed may be collected by the county pursuant to a specified procedure, including imposition of a lien on the property for the amount of the delinquent charges.

Existing law authorizes a county to determine, among other things, whether solid waste handling services are to be provided by nonexclusive, partially exclusive, or wholly exclusive franchise, contract, license, permit, or otherwise.

This bill would extend the delinquent charge and fee collection procedures in existing law to solid waste handling services provided under a franchise, contract, license, permit, or otherwise.

(2) Existing law regulates the acquisition, operation, sale, and disposal of, and other matters relating to, public utilities, as defined, owned by municipal corporations.

This bill would exempt from the definition of “public utility” for these purposes solid waste handling service provided by, or arranged for provision by, a county, including the franchised, contracted, permitted, licensed, or otherwise granted solid waste handling services described in (1) above.

Ch. 565 (AB 383) Montanez Air pollution: motor vehicle inspection program: repair assistance.

Existing law establishes a motor vehicle inspection and maintenance program (smog check), administered by the Department of Consumer Affairs and the State Air Resources Board, that provides for the inspection of all motor vehicles, except those specifically exempted from the program, upon registration, biennially upon renewal of registration, upon transfer of ownership, and in certain other circumstances. Existing law provides for a repair assistance program available to (1) an individual whose maximum income level is 185% of the federal poverty level and whose vehicle has failed a smog check inspection or who was issued a notice to correct for an alleged violation of unlawful motor vehicle exhaust discharge, if the vehicle subject to that notice has failed a smog check inspection subsequent to receiving that notice, or both, and (2) an owner of a motor vehicle that has failed a smog check inspection and that is directed to a test-only facility.

This bill would make the repair assistance program available to an individual who meets the criteria in (1) above whose maximum income level is 200% of the federal poverty level, and to an individual who meets the criteria in (2) above. The bill would require the department to give priority to applications submitted pursuant to the criteria in (2) above, as specified. The bill would, on January 1, 2009, set the maximum income level relative to the criteria in (1) above at 185% of the federal poverty level. The bill would authorize the department to increase the maximum income level of low-income motor vehicle owners to a maximum of 225% of the federal poverty level if the department determines that existing budget allocations would support the increase. This bill would also make a conforming change in the definition of “low-income motor vehicle owner” regarding the owner’s income level as a percentage of the federal poverty level.

Ch. 566 (AB 405) Montanez Schools: pesticide use.

Existing law, the Healthy Schools Act of 2000, provides that effective least toxic pest management practices should be the preferred method of managing pests at schoolsites and requires that the state take the necessary steps, pursuant to specified provisions, to facilitate the adoption of effective pest management practices at schoolsites. The existing act requires each schoolsite to maintain records of all pesticide use at the schoolsite for a period of 4 years and to make the records available to the public upon request. The existing act requires, on an annual basis, the school district designee to provide to all staff and parents or guardians of pupils enrolled at a school written notification addressing, among other things, expected pesticide use. The existing act requires that the recipients be afforded the opportunity to register with the school district to receive information regarding individual pesticide applications. The existing act requires the school district designee to post warning signs prior to application of pesticides at a schoolsite.

This bill would prohibit, in specified circumstances, the use on a schoolsite of specified pesticides that have been granted a conditional registration, an interim registration, or an

experimental use permit by the Department of Pesticide Regulation, or a pesticide that is subject to an experimental registration issued by the United States Environmental Protection Agency. The bill would prohibit the use on a schoolsite of a pesticide if the Department of Pesticide Regulation cancels or suspends registration, or requires phaseout of use, of the pesticide. The bill would also prohibit a vendor or manufacturer from making those pesticides available to a school district either by sale or by gift.

Ch. 567 (AB 466) Matthews Natural resources: Department of Fish and Game: California Bay-Delta Authority.

Existing law requires the Alluvial Fan Task Force to develop a model ordinance on alluvial fan flooding to be made available to communities subject to alluvial fan flooding, and to prepare and submit a related report to the Legislature not later than June 30, 2006. Existing law prohibits the expenditure of state funds to carry out this program.

This bill would authorize the state to expend funds to carry out this program if state funds are used to provide a matching cost share, as required by the federal government for the use of federal funds.

Existing law, the California Bay-Delta Authority Act, establishes in the Resources Agency the California Bay-Delta Authority, with membership as prescribed. Among the prescribed members of the authority is the Director of Fish and Game. Existing provisions of the act require the authority to appoint a lead scientist, and require the lead scientist to ensure that peer review is employed extensively and prudently to ensure the quality of program planning, implementation, and evaluation.

This bill would authorize the lead scientist of the California Bay-Delta Authority, in collaboration with the Director of Fish and Game, to directly or indirectly contract for scientific experts for the purpose of conducting studies of delta fisheries. The bill would exempt a contract entered into pursuant to the bill from the State Contract Act, the provisions of the State Civil Service Act that relate to personal services contracts, and any rules or regulations adopted pursuant to any of those provisions.

This bill would appropriate \$2,637,000 from the General Fund to the Department of Fish and Game for the Biodiversity Conservation Program to continue the development of a comprehensive conservation plan for the development of the University of California, Merced project in eastern Merced County.

The bill would appropriate \$150,000 from moneys reimbursed to the Department of Fish and Game in an item of the 2005 Budget Act to the Department of Fish and Game for use during the 2005-06 fiscal year for associated wages, benefits, operating expenses, equipment, and department overhead associated with a full-time person-year, or equivalent, of an environmental scientist, dedicated to the planning, review, and permitting of projects related to the San Francisco Public Utilities Commission Water System Improvement Program, contingent upon the department's receipt of that same sum from the San Francisco Public Utilities Commission.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 568 (AB 694) Chan Motor vehicle air pollution control: district fees: Bay Area Air Quality Management District.

(1) Existing law requires specified motor vehicle fee revenues generated in the Bay Area Air Quality Management District to be subvended to the bay district and used for specified projects or programs, including the implementation of low-emission and zero-emission vehicle programs. Existing law requires the bay district to allocate those fee revenues to cities, counties, the Metropolitan Transportation Commission, transit districts, or any other public agency responsible for implementing one or more of the specified projects or programs. Existing law requires any county or designated entity that receives funds, at least once a year, to hold one or more public meetings for the purpose of adopting criteria for

expenditure of the funds and to review the expenditure of revenues received by any designated entity.

This bill would delete from those specified projects and programs the implementation of low-emission and zero-emission vehicle programs, and would, instead, add the implementation of vehicle-based projects to reduce mobile source emissions, including, but not limited to, engine repowers, engine retrofits, fleet modernization, alternative fuels, and advanced technology demonstrations, thereby creating a state-mandated local program by imposing new duties on the bay district. The bill would authorize the bay district to allocate fee revenues for those mobile source emissions projects to entities that include, but are not limited to, public agencies, consistent with applicable policies adopted by the governing board of the bay district. The bill would require the bay district to adopt cost-effectiveness criteria for fee revenue that projects and programs are required to meet. The bill would require the bay district, if any county or designated entity that receives funds has not allocated all of those funds within six months of the date of the formal approval of its expenditure plan by the bay district, to allocate the unallocated funds, as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 569 (AB 841) Arambula Air quality: San Joaquin Valley Unified Air Pollution Control District: particulate monitoring.

(1) Existing law requires the State Air Resources Board to develop and conduct an expanded and revised program of particulate monitoring. Existing law requires that the program be designed to accomplish specified conditions, including, among others, that the monitoring network used in the program site monitors so as to characterize population exposure, background conditions, and transport influence, and attain any other objective identified by the state board as necessary to understand conditions and provide information for the development of control strategies. Existing law establishes the San Joaquin Valley Unified Air Pollution Control District, formed by the Counties of Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus, and Tulare, and consisting of the Counties of Fresno, Kings, Madera, Merced, San Joaquin, Stanislaus, and Tulare, and that portion of the County of Kern that is within the San Joaquin Valley Air Basin.

This bill would require the district to install one or more monitors for monitoring airborne fine particles smaller than 2.5 microns in diameter in the western region of the County of Fresno in areas that are primarily low-income and underserved. Because this bill would require the San Joaquin Valley Unified Air Pollution Control District to perform a specified function, this bill would impose a state-mandated local program. This bill would also make legislative findings and declarations as to the necessity of a special statute.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 570 (AB 1078) Keene Contaminated property: methamphetamine.

(1) Existing law requires the Department of Toxic Substances Control to take removal actions with respect to a hazardous substance that is an illegal controlled substance, a precursor of a controlled substance, or a material intended to be used in the unlawful manufacture of controlled substances, and the department is authorized to expend funds appropriated from the Illegal Drug Lab Cleanup Account in the General Fund for this purpose. Existing law defines the term "county" as including a city and county.

This bill would enact the "Methamphetamine Contaminated Property Cleanup Act of 2005" and define terms. The bill would specify the human occupancy standards for property

that is subject to the act, which would become inoperative on the effective date when the Department of Toxic Substances Control, in consultation with the Office of Environmental Health Hazard Assessment, adopts a health-based target remediation standard for methamphetamine to determine when a property contaminated by methamphetamine laboratory activity is safe for human occupancy.

The bill would require a local health officer to take specified actions after receiving notification from a law enforcement agency of potential contamination or of known or suspected contamination of property by a methamphetamine laboratory activity, thereby imposing a state-mandated local program by imposing new duties upon local agencies. The bill would authorize a local health officer to delegate all or part of the duties specified in the act to a designated local agency, as defined.

The bill would require a local health officer who determines, after conducting an inspection, that property is contaminated, to issue a specified order prohibiting use or occupancy and to post the order on the property, as specified. The bill would require the local health officer to record with the county recorder a lien of \$200 or the cost incurred by the local health officer, whichever is greater, on the property.

The bill would require a property owner who receives an order that property owned by that person is contaminated by a methamphetamine laboratory activity, a property owner who owns property that is the subject of an order, and a person occupying the property to immediately vacate the affected unit. The bill would require the property owner to retain a methamphetamine laboratory site remediation firm that is an authorized contractor meeting certain requirements, as defined, to remediate the contamination caused by methamphetamine laboratory activity.

The bill would also require the property owner or the property owner's authorized contractor to submit a preliminary site assessment (PSA) work plan to the local health officer for review within 30 days after retaining an authorized contractor. The bill would require the local health officer to inform the property owner and contractor in writing of any deficiencies in the PSA work plan. The bill would require a property owner and authorized contractor to prepare and submit a PSA report to the local health officer after the completion of the preliminary site assessment and would require the property owner to complete remediation no later than 90 days after the date that the PSA work plan is approved, except as extended by the local health officer.

The bill would require a local health officer to issue a no further action determination if the local health officer determines that remediation is not required at a property, based on the PSA report or, if the site has been remediated, as specified. The bill would require the local health officer to release the lien recorded pursuant to the bill and send a copy of the release to the property owner stating that the property was remediated, as required, and is habitable, if he or she determines that remediation is not required at the property or the property has been remediated, as specified. The bill would require a property owner who has not received a "no further action determination" to notify prospective buyers and tenants, as specified.

The bill would allow a city or county to either remediate property that is not remediated in compliance with an order issued pursuant to the act, or seek a court order to require the property owner to remediate the property. The bill would also allow a city or county to remediate property for which the local health officer is unable to locate the property owner. The bill would require a property owner to be liable for, and pay the city or county for, all costs related to the remediation, if a city or county elects to remediate the contaminated property. The bill would authorize the city or county to record a nuisance abatement lien if the property owner fails to pay for the costs of remediation.

The bill would require a local health officer to establish a written plan outlining the procedures to be followed for conducting remediation to property for purposes of the act, including the preparation of a PSA work plan, the conduct of a preliminary site assessment to determine the extent and level of contamination in accordance with that PSA work plan,

and the preparation of a PSA report containing the results of the preliminary site assessment and recommended remedial actions.

The bill would provide for the imposition of a civil penalty upon a property owner who does not provide a notice or disclosure required by the act, or upon a person who violates an order issued by the local health officer prohibiting the use or occupancy of a property contaminated by a methamphetamine laboratory activity.

The bill would also impose liability for specified costs regarding testing, remediation, and administrative enforcement and oversight upon a property owner who receives an order.

The bill would require the department to conduct 2 public workshops, one in northern California and one in southern California, to discuss the actions needed to further implement the act.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) The bill would become operative only if SB 536 is enacted and becomes effective on or before January 1, 2006.

Ch. 571 (AB 1086) Lieber Vehicles: operation: state wilderness areas.

(1) Existing law prohibits the use of a motor vehicle in an area designated as a state wilderness area, and makes a violation of a rule or regulation established by the Department of Parks and Recreation pursuant to this prohibition a misdemeanor, punishable by imprisonment in the county jail for not more than 90 days, or by a fine of not more than \$1,000, or by both the fine and imprisonment. The court, upon considering the recommendation of the prosecuting attorney, may reduce the charged offense from a misdemeanor to an infraction, which is punishable by a fine of not less than \$10 nor more than \$1,000.

Existing law requires that a person convicted of violating a local ordinance that prohibits entry into all or portions of an area designated by ordinance as a mountain fire district be punished by certain fines for 1st and 2nd offenses, and by certain fines or terms of imprisonment, or both, for 3rd or subsequent offenses. Additionally, the court may order impoundment of the vehicle used in a 3rd or subsequent offense for not more than 30 days at the owner's expense, if the person convicted owns the vehicle and the vehicle is subject to identification as an off-road vehicle.

This bill would require, notwithstanding the provisions of existing law described above that impose different penalties, and to the extent authorized under federal law, that a person who violates a state or federal regulation that prohibits entry of a motor vehicle into all or portions of an area designated as a federal or state wilderness area is guilty of a public offense and shall be punished by certain fines for 1st and 2nd offenses, and by certain fines or terms of imprisonment, or both, for 3rd or subsequent offenses. Additionally, the court would be authorized to order impoundment of the vehicle used in a 3rd or subsequent offense for not more than 30 days at the owner's expense, if the person convicted owns the vehicle and the vehicle is subject to registration or subject to identification as an off-road vehicle. To the extent that the bill would make violation of a state or federal regulation a crime, it would impose a state-mandated local program by creating new crimes.

(2) Existing law requires the clerk of a court in which a person was convicted of any violation of the Vehicle Code to prepare within 10 days after conviction and immediately forward to the Department of Motor Vehicles at its office in Sacramento an abstract of the record of the court covering the case in which the person was so convicted. The department is required to maintain records of convictions for as long as they may form the basis of license suspensions or revocations as prior convictions or with other records of conviction constitute

a person a “negligent driver.” Existing law exempts from this reporting requirement a conviction of a violation of certain provisions relating to off-highway vehicles.

This bill would delete from the exemption specified above a conviction of the public offense described above prohibiting entry of a motor vehicle into all or portions of an area designated as a federal or state wilderness area, thus making that conviction subject to the specified reporting requirement. The bill would require the department to maintain records of convictions of the specified public offense for 7 years.

(3) Existing law assigns traffic violation point counts to convictions of certain traffic violations, for the purposes of determining whether a person is a negligent operator of a motor vehicle subject to certain driver’s license suspension or revocation provisions.

This bill would prohibit assignment of a traffic violation point count to a conviction of the public offense described above prohibiting entry of a motor vehicle into all or portions of an area designated as a federal or state wilderness area.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 572 (AB 1125) Pavley Rechargeable Battery Recycling Act.

Existing law requires rechargeable batteries to be appropriately labeled and requires the instruction manual for a rechargeable consumer product to include information regarding the proper recycling and disposal of the rechargeable battery. Existing law also regulates the management of federally regulated batteries, as defined.

This bill would enact the Rechargeable Battery Recycling Act of 2006 and would define terms for purposes of the act, including “rechargeable battery.”

The act would require, on and after July 1, 2006, a retailer, defined as a person who makes a retail sale of a rechargeable battery to a consumer in this state, to have in place a system for the acceptance and collection of used rechargeable batteries for reuse, recycling, or proper disposal with specified elements, including the take-back at no cost to the consumer of a used rechargeable battery, the type or brand of which the retailer sold or previously sold.

The bill would allow a retailer who is participating in an existing battery recycling system that includes rechargeable batteries, in addition to any other type of batteries, to continue to participate in that existing system, if the system otherwise complies with the act.

The bill would prohibit the sale by a retailer of a rechargeable battery to a consumer after July 1, 2006, unless the retailer complies with the act.

The bill would require the Department of Toxic Substances Control, by July 1, 2007, and each July 1 thereafter, to survey, as specified, battery handling or battery recycling facilities, and to post on its Internet Web site the estimated amount, by weight, of each type of rechargeable batteries returned for recycling.

#### Ch. 573 (AB 1200) Laird Sacramento-San Joaquin Delta.

Existing law, the California Bay-Delta Authority Act, requires the California Bay-Delta Authority and certain implementing agencies to carry out programs that address the goals and objectives of the CALFED Bay-Delta Program Record of Decision, dated August 28, 2000, on behalf of the San Francisco Bay/Sacramento-San Joaquin Delta Estuary.

This bill would require the Department of Water Resources to evaluate the potential impacts on water supplies derived from the Sacramento-San Joaquin Delta resulting from subsidence, earthquakes, floods, changes in precipitation, temperature, and ocean levels, and a combination of those impacts. The bill would require the Department of Water Resources and the Department of Fish and Game to identify, evaluate, and comparatively rate the principal options available to implement certain objectives that relate to the delta or the Sacramento and San Joaquin river systems. The bill would require the departments to jointly

report to the Legislature and the Governor the results of their evaluations and comparative ratings, as specified, no later than January 1, 2008.

Ch. 574 (AB 1222) Jones Air pollution: locomotive air pollution control: Remote Sensing Pilot Program.

Existing law designates the State Air Resources Board as the state agency charged with coordinating efforts to attain and maintain ambient air quality standards. Existing law generally designates the state board as the state agency with the primary responsibility for the control of vehicular air pollution, and air pollution control districts and air quality management districts with the primary responsibility for the control of air pollution from all sources other than vehicular sources.

This bill would establish the Remote Sensing Pilot Program, and would require the state board to implement a pilot program to determine emissions from locomotives using wayside remote sensing devices. The bill would require the state board to design and implement the pilot program in consultation with an advisory group established by the state board and consisting of specified members. The bill would permit the state board to contract with an independent entity to conduct the pilot program. The bill would require the state board to submit a report to the Legislature, on or before December 31, 2006, that contains a summary of the data acquired through the pilot program and the state board's determination as to whether the remote sensing devices can meet specified objectives of the pilot program, as provided. The bill would require the South Coast Air Quality Management District, the Union Pacific Railroad, and the Burlington Northern Santa Fe Railway to reimburse the state board for its costs of implementing the pilot program established pursuant to this chapter, as specified.

Because this bill would require the South Coast Air Quality District and the Sacramento Metropolitan Air Quality Management District to perform specified functions, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement shall be made pursuant to these statutory provisions for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 575 (AB 1229) Nation Air pollution: new motor vehicles: air pollution label.

Existing law permits the State Air Resources Board to adopt a regulation to prohibit the sale and registration of any new motor vehicle certified by the state board to which there has not been affixed by the manufacturer on a side window to the rear of the driver or, if it cannot be so placed, to the windshield, a decal disclosing specified emissions information, including, for 1976 and subsequent model year motor vehicles, exhaust emissions data, determined as provided. Existing law requires the state board to develop and adopt regulations that achieve the maximum feasible and cost-effective reduction of greenhouse gas emissions from motor vehicles. Existing law also prohibits the sale and registration of a new motor vehicle unless a decal that discloses a smog index for the vehicle is affixed, as specified above.

This bill would require the state board, not later than July 1, 2007, to revise regulations relating to the decal, to rename the existing decal, and to require the renamed label to provide specified emissions information. The bill would expand the requirement to place exhaust emissions information for 1976 and subsequent model year motor vehicles on the emissions index label to include the affixation of additional emissions data, as provided, on any new motor vehicle. The bill would require the label to be affixed to the driver's side window or, if it cannot be so placed, to the windshield. The bill would require a specified smog index

and a global warming index to be included on the emissions information label, as specified, that the state board is authorized, by regulation, to require. The bill would subject to the above provisions, at a minimum, all passenger cars and light-duty trucks with a gross vehicle weight of 8,500 pounds or less, and all vehicles that are subject to those regulations adopted by the state board pertaining to achieving reductions in global warming gases.

This bill would also require the state board to seek specified input in designing the label, to update the indices included in the air pollution label as necessary, to consider other relevant label formats, as specified, and to incorporate information from the label into existing programs designed to educate motor vehicle consumers about emissions of global warming gases and other air pollutants. This bill would permit the state board to recommend to the Legislature additional sources of air pollution that emit significant amounts of global warming gases for which the disclosure of information regarding those emissions would be an effective means of educating the public about the sources of global warming and its impacts. The bill would permit the state board to accept donations or grants of funds from any person for the purposes of the program, and would require amounts received to be deposited into the Air Pollution Control Fund. The bill would require the source of any funds received to be disclosed at specified public hearings and workshops. The bill would also permit donations, grants, or other commitments of money to be dedicated for specific purposes.

This bill would make legislative findings and declarations relating to global warming gases and motor vehicle emissions.

#### Ch. 576 (AB 1328) Wolk Wild and scenic rivers: Cache Creek.

The federal Wild and Scenic Rivers Act includes specified rivers and segments thereof within the California Wild and Scenic River system, which are subject to various protections under the act.

This bill would include within the system Cache Creek from  $\frac{1}{4}$  mile below Cache Creek Dam to Camp Haswell and North Fork Cache Creek from the Highway 20 bridge to the confluence with the mainstem, and would designate various segments as wild, scenic, or recreational.

The bill would prohibit the Governor or an employee of a state agency or department from applying for or expending funds preparing an application for the designation of any portion of Cache Creek as a component of the national wild and scenic rivers system under the federal Wild and Scenic Rivers Act.

#### Ch. 577 (AB 1342) Committee on Environmental Safety and Toxic Materials Hazardous material.

(1) Existing law authorizes the owner or operator of a facility issued a hazardous waste facilities permit to make certain changes in facility structures or equipment without modifying the facility's hazardous waste permit. Existing law provides for the issuance of standardized hazardous waste facilities permits in lieu of other specified permit procedures under prescribed circumstances. A violation of the hazardous waste control laws, including a regulation adopted or requirement issued by the department is a crime.

This bill would allow the owner or operator of a facility that has a standardized hazardous waste facilities permit to make those structure or equipment changes. Because a violation of these conditions would be a crime, the bill would impose a state-mandated local program.

(2) Existing law requires the owner and operator of a facility that has a hazardous waste facilities permit or standardized hazardous waste facilities permit to obtain prior written approval from the department before making certain Class 1 permit modifications for equipment repair or upgrade.

This bill would allow the owner or operator to make these modifications without prior notification, upon complying with specified conditions. This provision would remain in effect until the department amends its regulations to provide for replacement or upgrade of

equipment without prior notification subject to conditions and limitations deemed necessary by the department. Because a violation of these conditions would be a crime, the bill would impose a state-mandated local program.

(3) Existing law, the federal Resource Conservation Recovery Act (RCRA), requires a transfer facility that stores a hazardous waste regulated under RCRA (RCRA hazardous waste) in excess of 10 days to obtain a permit. RCRA exempts transfer facilities that store a RCRA hazardous waste for 10 days or less from the permitting requirement. Existing law, the Hazardous Waste Control Law, defines a “storage facility” to include a transfer facility.

This bill would authorize the Department of Toxic Substances Control to seek a determination from the United States Environmental Protection Agency (EPA) as to conditions under which the department may authorize a storage facility that is authorized to handle non-RCRA hazardous waste to store railcars holding a residual heel from prior loads of RCRA hazardous waste without obtaining a RCRA-equivalent hazardous waste facility permit. The bill would require the department, upon receiving a written determination from the EPA, to take necessary administrative actions to authorize this activity.

(4) Existing law requires the owner or operator of a hazardous waste facility to submit a hazardous waste facility closure and postclosure plan to the department and to the California regional water quality control board for the region in which the facility is located. The department is required to impose the requirements of a hazardous waste facility postclosure plan by issuing a postclosure permit, issuing an enforceable order, or entering into an enforceable agreement. The department is authorized to impose postclosure plan requirements through an enforcement order or an enforceable agreement only until January 1, 2007, except as specified.

This bill would extend until January 1, 2009, the authorization for the department to impose postclosure plan requirements through an enforcement order or an enforceable agreement and would make conforming changes. Because a violation of these requirements would be a crime, the bill would impose a state-mandated local program.

(5) Existing law provides a rebuttable presumption that an owner of property, as defined, that is the site of a hazardous substance release has no liability under the Carpenter-Presley-Tanner Hazardous Substance Account Act for either a hazardous substance release that has occurred on the property or a release of a hazardous substance to groundwater underlying the property, if the release occurred at a site other than the property. Existing law defines “owner” to be the owner of property, as defined, who occupies a single-family residence constructed on the property or the owner of common areas within a residential common interest development who owns those common areas for the benefit of the residential homeowners.

This bill would additionally include within the definition of “owner,” the owner of property, as defined, who occupies  $1/2$  of a duplex constructed on the property.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 578 (AB 1415) Pavley Hazardous waste: mercury relays and switches.

(1) Existing law prohibits, on and after January 1, 2006, a person from selling, offering to sell, or distributing for promotional purposes, in this state, a mercury-added thermostat, as defined, unless the mercury-added thermostat meets specified criteria. A violation of the hazardous waste control laws is a crime.

This bill would prohibit a person from selling, offering to sell, or distributing for promotional purposes in this state, on or after July 1, 2006, certain new or refurbished mercury-added products, unless the use of the product is required under a federal law or federal contract specification or if the only mercury-added component in the product is a button cell battery.

The bill would also prohibit a person from selling, offering to sell, or distributing for promotional purposes in this state, on or after July 1, 2006, a mercury switch or mercury relay, as defined. The bill would exclude from this prohibition a switch or relay, as specified, that was in use prior to July 1, 2006, and a mercury switch or mercury relay if use of the switch or relay is required under federal law or federal contract specification, or a mercury switch or mercury relay meeting specified conditions.

This bill would require the Department of Toxic Substances Control to grant an exemption from the prohibition for a product that contains a mercury switch or a mercury relay if specified conditions are met.

The bill would also prohibit a person from selling, offering to sell, distributing for promotional purposes in this state, on or after January 1, 2008, a mercury diostat, as defined, or a new or refurbished oven or gas range containing a mercury diostat.

(2) Since a violation of the requirements imposed by the bill would be a crime, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 579 (AB 1585) Blakeslee Renewable energy resources: State Energy Resources Conservation and Development Commission: reporting.

Existing law expresses the intent of the Legislature, in establishing the Renewable Energy Resources Program, to increase the amount of renewable electricity generated per year, so that it equals at least 17% of the total electricity generated for consumption in California per year by 2006.

Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission) to certify eligible renewable energy resources, to design and implement an accounting system to verify compliance with the renewables portfolio standard by retail sellers, and to allocate and award supplemental energy payments to cover above-market costs of renewable energy.

Existing law requires the Energy Commission to prepare an integrated energy policy report every 2 years. Existing law requires the report to contain an overview of major energy trends and issues facing the state, including, but not limited to, supply, demand, pricing, reliability, efficiency, and impacts on public health and safety, the economy, resources, and the environment.

This bill would require the Energy Commission to include in the integrated energy policy report to be adopted November 1, 2007, a review of the feasibility of increasing the target for the amount of electricity to be procured from eligible renewable energy resources to 33% by the year 2020, with the review including specified information.

The bill would provide that it shall only become operative if SB 107 of the 2005–06 Regular Session is also enacted and becomes operative on or before January 1, 2006.

Ch. 580 (AB 1660) Pavley Vehicular air pollution: energy-efficient vehicles.

Existing law provides for the High Polluter Repair or Removal Program, a voluntary vehicle retirement program that requires the Department of Consumer Affairs to establish and implement a program for the repair or replacement of high polluters. Existing law requires the program to provide for the payment to the owner of a high polluter of up to 80% of the total costs of repair, not to exceed \$450, or the market value of a high polluter being removed.

This bill would create the California Energy-Efficient Vehicle Group Purchase Program in the Department of General Services to encourage the purchase of energy-efficient vehicles, as defined, by local and state agencies through a group-purchasing program.

The bill would require the director of the department to establish an advisory committee by April 1, 2006, and thereafter meet with the advisory committee, notify all affected entities about the purchasing program, and negotiate contracts, through competitive means and other appropriate strategies, for the purchase of energy-efficient vehicles at the lowest possible price from one or more reliable vendors. This bill would require the department to administer the program in accordance with regulations adopted by the department, and would permit the department to recover its administrative costs from program participants.

Existing law requires the department, in consultation with the Energy Commission and the State Air Resources Board, to develop and adopt specifications and standards for all passenger cars and light-duty trucks that are purchased or leased on behalf of, or by, state offices, agencies, and departments. The specifications and standards must include a requirement that fuel economy be evaluated and scored in order to enable the department to choose the vehicle with the lowest life cycle cost when awarding a state vehicle procurement contract. Authorized emergency vehicles, as defined, are exempt from the requirements.

This bill would provide that, on and after January 1, 2006, when awarding a vehicle procurement contract, every city, county, city and county, and special district, including a school district and a community college district, may evaluate and score fuel economy, in addition to other life cycle factors, in choosing passenger cars or light-duty trucks, or both, with the lowest life cycle cost.

This bill would provide that, on and after January 1, 2006, when awarding a vehicle procurement contract, every city, county, city and county, and special district, including a school district and a community college district, may require that 75% of the passenger cars or light-duty trucks, or both, to be acquired be energy-efficient vehicles, as defined.

#### Ch. 581 (AB 1721) Pavley Environmental education.

(1) Existing law establishes the Office of Education and the Environment within the California Integrated Waste Management Board, and requires the office to develop and implement a unified education strategy on the environment for elementary and secondary schools. Existing law requires school district governing boards, when adopting instructional materials for use in schools, to include only materials that accurately portray the educational principles for the environment.

This bill would repeal that instructional materials requirement.

(2) Existing law requires the Instructional Materials Advisory Panel, before adopting criteria for textbook adoption, to consult with the office to incorporate, where feasible, education principles for the environment. Existing law requires the education principles for the environment to be incorporated in criteria developed for textbook adoption.

This bill would repeal that consultation requirement and would instead provide that if the State Board of Education determines that the education principles for the environment are not appropriate for inclusion in the textbook adoption criteria, the board would be required to collaborate with the office to make the changes necessary to ensure that the principles are included in the textbook adoption criteria.

(3) Existing law requires the State Department of Education to incorporate materials developed by the office that provide information on the education principles for the environment into publications that provide examples of curriculum resources for teacher use.

This bill would provide that if the Superintendent of Public Instruction determines that materials developed by the office that provide this information are not appropriate for inclusion in publications that provide examples of curriculum resources for teacher use, the Superintendent of Public Instruction would be required to collaborate with the office as specified.

(4) Existing law requires that materials produced and distributed in the public schools be aligned to the educational principles for the environment that are incorporated into the content standards.

This bill would repeal that requirement.

(5) Existing law establishes the Environmental Education Account and authorizes the deposit of funds from prescribed sources for expenditure for purposes of developing and implementing the unified education strategy, upon appropriation by the Legislature.

This bill would allow a state agency that requires the development of, or encourages the promotion of, environmental education for elementary and secondary school pupils, to contribute to the account.

This bill would provide that, on and after January 1, 2007, if a California regional water quality control board or the State Water Resources Control Board issues a specified permit that requires elementary and secondary public schools to be provided with educational materials on stormwater pollution, the permittee would be allowed to contribute an equivalent amount of funds to the account.

Ch. 582 (AB 1764) Committee on Natural Resources Beverage containers: handling fees.

The existing California Beverage Container Recycling and Litter Reduction Act requires a distributor of specified beverage containers to pay a redemption payment to the Department of Conservation, for each beverage container, as defined, sold or transferred, for deposit in the California Beverage Container Recycling Fund. The money in the fund is continuously appropriated to the department to pay refund values, processing payments, and for other purposes, including requiring the payment of a total of \$26,500,000 annually in handling fees to supermarket sites and certain recyclers to provide an incentive to redeem beverage containers.

This bill would authorize the department to pay up to \$30,000,000 from July 1, 2004, to June 30, 2005, in handling fees, thereby making an appropriation. The bill would also delete obsolete provisions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 583 (SB 264) Machado Delta Flood Protection Fund.

Existing law establishes the Delta Flood Protection Fund. Under existing law, the fund is abolished on July 1, 2006, and all unencumbered moneys in the fund are transferred to the General Fund.

This bill would extend the existence of the fund until July 1, 2008.

Ch. 584 (SB 347) Ortiz Flood control: American River flood damage reduction project.

(1) Existing law adopts and authorizes the project for flood damage reduction and environmental restoration in the American River watershed in Sacramento County at an estimated cost to the state of the sum that may be appropriated for state cooperation by statute, upon the recommendation and advice of the Department of Water Resources or the Reclamation Board.

This bill would provide that the project includes the construction of a new bridge with an estimated cost of \$66,000,000, of which \$36,000,000 is allocated to flood damage reduction and dam safety. The bill would provide that the state's share of the project cost shall be at least \$5,200,000, but not more than \$9,000,000, of the project amount that is allocated to flood damage reduction, as specified. The bill would require the City of Folsom to serve as the nonfederal sponsor of the bridge and to enter into a specified agreement with the department. By imposing requirements on the City of Folsom, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 585 (SB 365) Ducheny Tidelands and submerged lands.

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

(1) Existing law authorizes the State Lands Commission, whenever it appears to the commission to be in the best interests of the state, for the improvement of navigation, to aid in reclamation, for flood control protection, or to enhance the configuration of the shoreline, and that it will not substantially interfere with the right of navigation and fishing in the waters involved, to exchange filled or unfilled lands of equal value, as specified. Existing law provides that the lands exchanged may be released from the public trust for navigation and fishing, as specified.

This bill, instead, would allow the commission to enter into an exchange, with any person or any private or public entity, of filled or reclaimed tidelands and submerged lands or beds of navigable waterways, or interests in those lands, if the commission finds that specified conditions are met.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 586 (SB 471) Escutia Hazardous materials release: remediation.

Existing law, the California Land Environmental Restoration and Reuse Act (CLERRA), specifies a procedure for the selection of an oversight agency for a property subject to a phase I environmental assessment by representatives of the Department of Toxic Substances Control and the State Water Resources Control Board. The act authorizes a local agency to issue a notice requiring the owner or operator to conduct a phase I environmental assessment of certain property, in response to the release or the threat of a release of a hazardous material and to protect human health and the environment, as specified. The act also authorizes the local agency to require the owner or operator to prepare a preliminary endangerment assessment under specified conditions and require or initiate an investigation and remedial action. The act defines the term "property" as meaning real property, but excludes, from that definition, among other things, a site that has one or more full-time equivalent employees on an annualized basis.

This bill would delete that exclusion from CLERRA, and would thus include in the act, as "property," a site that has one or more full-time equivalent employees on an annualized basis.

Ch. 587 (SB 536) Bowen Illegal Drug Lab Cleanup Account: methamphetamine.

Existing law requires the Department of Toxic Substances Control to take removal actions with respect to a hazardous substance that is an illegal controlled substance, a precursor of a controlled substance, or a material intended to be used in the unlawful manufacture of a controlled substance.

Existing law provides that for purposes of the hazardous waste control laws and the Carpenter-Presley-Tanner Hazardous Substance Account Act, a person who is found to have operated a site for the purposes of manufacturing an illegal controlled substance, as specified, is the generator of any hazardous substance at, or released from, the site. The department is authorized to adopt regulations to implement these provisions in consultation with local law enforcement and local environmental agencies. The department is authorized to expend funds appropriated from the Illegal Drug Lab Cleanup Account in the General Fund for this purpose. Existing law, the Budget Act of 2005, appropriates \$2,073,000 from the Illegal Drug Lab Cleanup Account to the Department of Toxic Substances Control.

Existing law prohibits a state agency from issuing, utilizing, or enforcing any guideline, criterion, bulletin, manual, instruction, order, standard of general application, or other rule, that is a regulation, unless the guideline, criterion, bulletin, manual, instruction, order, standard of general application, or other rule is adopted as a regulation pursuant to the Administrative Procedure Act.

This bill would require the department to develop sampling and analytical methods for the collection of methamphetamine residue, and by October 1, 2007, to adopt a health-based target remediation standard for methamphetamine. The bill would require the department, by October 1, 2008, to the extent that funding is available, to adopt health-based target

remediation standards for iodine, methyl iodide, and phosphine, and would authorize the department to develop additional health-based target remediation standards. The bill would require the department to adopt, by October 1, 2009, investigation and cleanup procedures for use in the remediation of sites contaminated by the illegal manufacturing of methamphetamine. The bill would require the department to develop those methods, standards, and procedures in a prescribed manner.

The bill would authorize the department to expend the funds in the Illegal Drug Lab Cleanup Account to develop those standards and procedures, including funding the interagency agreement, thereby making an appropriation by changing the purpose for which funds are appropriated from that account.

This bill would additionally provide that for purposes of the Methamphetamine Contaminated Property Cleanup Act of 2005, that is proposed to be added by Assembly Bill 1078, a person who is found to have operated a site for the purposes of manufacturing an illegal controlled substance, as specified, is the generator of any hazardous substance at, or released from, the site.

The bill would become operative only if AB 1078 is enacted and becomes effective on or before January 1, 2006.

#### Ch. 588 (SB 771) Simitian Oceangoing ships.

(1) Existing law prohibits a cruise ship, as defined, from conducting onboard incineration while operating within 3 miles of the California coast.

This bill would also prohibit an oceangoing ship, as defined, from conducting onboard incineration while operating within 3 miles of the California coast.

(2) Existing law regulates the release of graywater, sewage sludge, oily bilgewater, hazardous waste, or other waste by large passenger vessels into the marine waters of the state and marine sanctuaries. Existing law also regulates, until January 1, 2010, the release of sewage by large passenger vessels into the marine waters of the state.

This bill would also regulate the release of graywater, sewage, sewage sludge, oily bilgewater, hazardous waste, or other waste by oceangoing ships, as defined, into the marine waters of the state and marine sanctuaries.

The bill would require the master, owner, operator, agent, or person in charge of an oceangoing ship who has operated, or has caused to be operated, the oceangoing ship in the marine waters of the state during 2006, to provide certain information relating to ports of call and sewage, graywater, and blackwater discharge, in electronic or written form to the State Lands Commission upon the vessel's departure from its first port or place of call in California beginning in 2006. The bill would require the commission to submit the reported information to the State Water Resources Control Board on or before February 1, 2007. The bill would require the board to submit the reported information to the Legislature on or before October 1, 2007.

This bill would also consolidate the provisions regulating the release of these substances from large passenger vessels and oceangoing ships.

#### Ch. 589 (SB 857) Kuehl Fish passages.

Existing law provides that the Department of Transportation has full possession and control of all state highways.

This bill would require the department to prepare an annual report to the Legislature describing the status of the department's progress in locating, assessing, and remediating barriers to fish passage, as defined. The bill would require the department also to complete assessments of potential barriers to anadromous fish prior to commencing any project using state or federal transportation funds. The bill would require the department to submit these assessments to the Department of Fish and Game to be added to the CALFISH database. The bill would also require projects to be constructed without presenting barriers to fish passage.

Existing law prohibits the construction or maintenance, in certain fish and game districts, of any device or contrivance that prevents, impedes, or tends to prevent or impede, the passing of fish up and down stream.

This bill would revise the fish and game districts in which this prohibition applies.

Ch. 590 (SB 1106) Committee on Environmental Quality Public contracts: procurement: recycled goods: solid waste.

(1) Existing law provides various procedures for the acquisition of goods and services by the state. Existing law also provides various procedures and requirements pertaining to the purchase of recycled items by the state.

This bill would consolidate, update, and clarify existing recycling laws, eliminate duplicative provisions, and establish or restate recycling goals and reporting requirements of state agencies in accordance with specified timeframes, as provided. The bill would also require local public entities to purchase recycled products instead of nonrecycled products, as specified.

(2) Existing law defines a "rural city" for purposes of certain provisions relating to waste management as an "incorporated city" that meets certain conditions. Existing law authorizes the formation of garbage and refuse disposal districts under certain conditions, including that the governing board of a district that includes only one "incorporated city" have 2 members selected by the board of supervisors and one member selected by the city council. Existing law also authorizes the legislative body of an "incorporated city" to contract for garbage collection and disposal, as specified.

This bill would remove the reference to cities described in these provisions as being incorporated.

Ch. 591 (SB 15) Escutia Public Utilities Commission.

Under existing law, the Public Utilities Commission has regulatory authority over public utilities and can establish its own procedures, subject to statutory restrictions and constitutional requirements of due process. Existing law requires that certain alternate decisions, as defined, as to any item appearing on the commission's public agenda, be served upon all parties to the proceeding without undue delay and be subject to public review and comment before it may be voted upon. Existing law authorizes the commission to adopt rules that provide for the time and manner of review and comment and the rescheduling of the item on a subsequent public agenda, except that the item may not be rescheduled for consideration sooner than 10 days following service of the alternate decision upon the parties. Existing law authorizes the commission to reduce or waive certain time period requirements for review and comment in an unforeseen emergency situation.

This bill would require that the item may not be rescheduled for consideration sooner than 30 days following service of the alternate decision upon the parties. The bill would require that the alternate item be accompanied by a digest that clearly explains the substantive revisions to the proposed decision. The bill would require that the commission immediately notify the Legislature when the commission reduces or waives the time periods for public review and comment due to an unforeseen emergency situation.

Existing law requires the commission to publish and maintain certain documents and information on the Internet unless otherwise authorized by the Department of Information Technology pursuant to a specified executive order.

This bill would require the commission to publish and maintain certain documents and information on the Internet, including certain documents and information currently published and maintained by the commission on the Internet.

Ch. 592 (SB 73) Committee on Budget and Fiscal Review Public postsecondary education: master's degree nursing programs.

This bill would appropriate \$3,440,000, as scheduled, from the General Fund to the Regents of the University of California and the Trustees of the California State University for the 2005-06 fiscal year for one-time expenditures for instructional equipment, classroom and laboratory renovations, curriculum development, and faculty recruitment.

The bill would require that, pursuant to funding to be appropriated in the Budget Act of 2006, the regents and the trustees increase, by at least 130, the number of full-time equivalent students in entry-level master's degree nursing programs in their respective segments, beginning in the 2006-07 fiscal year.

The bill would require the regents and the trustees to each provide a report to the Governor and the Legislature on or before February 1, 2006, on the proposed expenditure of the funds appropriated in this bill by the respective segments in the 2005-06 fiscal year.

The bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 593 (SB 102) Ducheny Nurse training funding.**

Existing law establishes the Employment Training Panel and authorizes the panel to utilize funds in the Employment Training Fund for, among other expenditures, the purpose of funding special employment training projects that improve the skills and employment security of frontline workers, as defined, and training individuals who are currently working and receiving certain state benefits.

This bill would additionally authorize the panel to fund up to 5 licensed nurse training programs to train individuals who are currently working as nurse assistants or caregivers in a health facility, as defined.

**Ch. 594 (SB 186) Battin State highways: relinquishment.**

Existing law gives the Department of Transportation full possession and control of all state highways. Existing law describes the authorized routes in the state highway system and establishes a process for adoption of a highway on an authorized route by the California Transportation Commission. Existing law authorizes the commission to relinquish certain state highway segments to local agencies.

This bill would authorize the commission to relinquish portions of State Highway Routes 74 and 111 in Riverside County to specified local agencies under certain conditions.

**Ch. 595 (SB 253) Torlakson Housing.**

(1) In an unlawful detainer action to recover possession of a dwelling from a tenant, existing law provides that when certain conditions exist, there is a rebuttable presumption that a landlord has breached habitability requirements.

This bill would include in the conditions described above instances when the dwelling is deemed substandard, as specified, and when the dwelling violates specified limits relating to lead hazards.

(2) Existing law defines "mobilehome" for purposes of the Mobilehome Residency Law.

This bill would make a technical change in that definition.

(3) Existing law provides that a court may appoint a receiver to take possession of property under a variety of circumstances. Existing law requires that a receiver of real property containing rental housing notify the court of an order or notice to correct substandard conditions, as specified. Existing law also permits a tenant of real property that is subject to receivership, a tenant association, or specified government agencies to file a motion in a receivership action for instructions from a court in regard to substandard conditions, as specified.

This bill would include in the provisions regarding substandard conditions, described above, violations of limits relating to lead hazards.

(4) The Planning and Zoning Law requires each city, county, or city and county to prepare and adopt a general plan for its jurisdiction that contains certain mandatory elements, including a housing element. One part of the housing element is an assessment of housing

needs and an inventory of resources and constraints relevant to meeting those needs. The assessment includes the locality's share of regional housing needs. That share is determined by the appropriate council of governments or by the Department of Housing and Community Development, subject to revision by the department.

The Planning and Zoning Law also authorizes a council of governments to charge a fee to local governments to cover the projected reasonable, actual costs of the council in distributing the regional housing needs pursuant to a city or county's housing element.

This bill would also authorize a council of governments to charge a fee for determining shares of the existing and projected regional housing need for cities, counties, and subregions at all income levels and for subsequent revisions of specified housing elements. The bill would also repeal obsolete provisions pertaining to housing elements.

(5) After the legislative body of a city, county, or city and county adopts all or part of a general plan, the Planning and Zoning Law requires the agency to provide an annual report to the legislative body, the Office of Planning and Research, and the Department of Housing and Community Development that includes specified information regarding the status of the plan and progress in its implementation. This report is due by October 1 of each year.

This bill would instead require the report by April 1 of each year, but would provide that for 2006, the report may be provided by October 1, 2006.

(6) Existing law establishes the Manufactured Home Recovery Fund which is continuously appropriated to make payments and distributions for actual and direct losses, as defined, arising out of specified transactions regarding the purchase or sale of a manufactured home if certain conditions are met.

This bill would make technical changes in those provisions.

(7) The Mobilehome Park Act requires the Department of Housing and Community Development to convene a specified task force at least once a year to provide input to the department on the conduct and operation of the mobilehome park maintenance inspection program. The act also requires the department to reorganize violations under the act and regulations adopted pursuant to the act into 2 specified categories by January 1, 2000, and to correct those constituting unreasonable risk to life, health, or safety within 90 days following January 1, 2000. Any matter that would have constituted a violation prior to January 1, 2000, that was not categorized pursuant to these provisions was deemed to be of a minor or technical nature and not subject to citation or notation on the record of an inspection conducted on or after January 1, 2000.

This bill would revise these provisions to clarify that the authorization for the task force to meet at least once a year and to provide input to the department requires that the department annually reorganize violations and regulations under the act and would reduce the time period for violations constituting unreasonable risk to life, health, or safety to 60 days following January 1 of each year.

(8) The Special Occupancy Parks Act authorizes the Department of Housing and Community Development or a city, county, or city and county that assumes responsibility for the enforcement of the act to enter and inspect special occupancy parks, defined as recreational vehicle parks, temporary recreational vehicle parks, incidental camping areas, and tent camps to secure enforcement of the act and implementing regulations. Existing law requires an enforcement agency to issue notice to correct a violation within 10 days of determining that a special park is in violation of the act or implementing regulations. Existing law requires the notice to allow 90 days from the postmarked date of the notice or date of personal delivery for elimination of the condition constituting the alleged violation if the violation is not an imminent threat to health and safety. Existing law authorizes an additional 90-day extension after the reinspection of the violation if the enforcement agency determines there is a valid reason why the violation was not corrected.

This bill would shorten the 90-day correction period to 30 days and the 90-day discretionary extension to 30 days.

(9) Existing law authorizes the redevelopment agency of a city that meets specified population size requirements and whose legislative body finds that property damage in the city during the civil unrest that occurred between April 29, 1992, and May 3, 1992, exceeded \$50,000,000 to set aside into the Low and Moderate Income Housing Fund an amount that is less than it is otherwise required to set aside if the amount deposited, when added to other public funds expended or appropriated in that fiscal year for the purposes of constructing, rehabilitating, or preserving affordable housing for extremely low, very low, low- and moderate-income persons or families is equal to or greater than the amount it is otherwise required to set aside into its Low and Moderate Income Housing Fund. Existing law requires the redevelopment agency to adopt a plan to eliminate the deficit in subsequent years and complete payment by the 2003-04 fiscal year.

This bill would repeal these provisions and would provide that the repeal does not release an agency that reduced the set-aside pursuant to those provisions from eliminating the deficit in accordance with that section as it existed on December 31, 2005.

(10) Existing property tax law authorizes a city, county, city and county, or nonprofit organization to request the tax collector to bring any residential real property that is not occupied by the owner as his or her principal place of residence to the next scheduled public auction if the taxes on the real property have been delinquent for at least 3 years and the real property will be used to provide housing or services directly related to low-income persons. Existing law requires a 30-year deed restriction to be placed on real property acquired by a nonprofit organization, as specified.

This bill would allow a deed, instead of the 30-year deed restriction, to provide for equity sharing between a nonprofit organization and a low-income owner-occupant upon resale by the low-income owner-occupant of his or her single-family home that was initially purchased by the owner from the nonprofit organization.

Ch. 596 (SB 279) Cedillo Physicians and surgeons: locum tenens services.

Existing law, the Medical Practice Act, provides for the licensing and regulation of physicians and surgeons by the Medical Board of California.

This bill would prohibit a locum tenens agency, defined as an agency that arranges for licensees to perform locum tenens services and meets other requirements, from employing a licensee to perform temporary professional medical services or from interfering with, or attempting to influence the clinical judgment of, such a licensee. The bill would provide a rebuttable presumption that the relationship between a licensee providing locum tenens services and a client or customer of the locum tenens agency shall be one of an independent contractor.

Ch. 597 (SB 303) Chesbro The Mendocino Winegrape and Wine Commission.

Existing law provides for various commissions to promote the production and marketing of agricultural commodities.

This bill would create the Mendocino County Winegrape and Wine Commission in state government to be composed of 6 producers who are not vintners, 4 vintners, and one public member, elected or appointed to 2-year terms, as specified. This bill would provide that the Secretary of Food and Agriculture may require the commission to correct or cease any function or activity he or she determines is not in the public interest or that is in violation of these provisions upon service of a written notice.

This bill would provide for approval of these provisions in a referendum conducted as specified. This bill would provide that, prior to the beginning of each marketing season, the commission shall establish assessment rates for producers based upon the number of tons of winegrapes delivered to vintners, and on vintners based upon the number of tons of winegrapes processed and marketed, as applicable, and authorize the expenditure of those funds for the purposes of carrying out these provisions, thereby making an appropriation.

This bill would provide that a penalty and interest shall be paid by any person who fails to remit this assessment within the time required by the commission. This bill would require producers and vintners to keep complete and accurate records, as specified. This bill would provide that the commission may commence civil actions to enforce these provisions.

Lastly, this bill would provide that every 5 years, commencing with the 2011-2012 marketing season, upon recommendation by the commission, or upon petition, the secretary may hold a hearing, and subsequently a referendum, to determine whether the operation of these provisions should be continued, as specified.

Because this bill would create new crimes, the violation of which would be misdemeanors, this bill would impose a state-mandated, local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 598 (SB 326) Dunn Land use: multifamily residential housing.**

Existing law requires a multifamily residential housing project to be a permitted use, not subject to a conditional use permit, on any parcel zoned for multifamily housing if at least certain percentages of the units are available at affordable housing costs to very low income, lower income, and moderate-income households for at least 30 years and if the project meets specified conditions. Among those conditions are that the project is subject to a discretionary decision, other than a conditional use permit, and a negative or mitigated negative declaration has been adopted for the project under the California Environmental Quality Act (CEQA). Existing law permits the negative or mitigated negative declaration to be adopted only after a public hearing to receive comments on that declaration if a public hearing is not held with respect to the discretionary decision.

This bill would revise these conditions and apply them only to an attached housing development, as defined, on any parcel zoned for an attached housing development. The bill would make these provisions applicable to all cities and counties, including charter cities.

**Ch. 599 (SB 373) Kehoe County water authority: encroachments.**

Existing law, the County Water Authority Act, authorizes the board of directors of a county water authority to establish procedures for the abatement of an encroachment that violates a regulation adopted by the authority regarding its facilities, property, and rights-of-way and to recover the costs of an abatement by means of a lien.

This bill would provide that an encroachment maintained in violation of a regulation is a public nuisance that is subject to abatement by bringing a civil proceeding.

**Ch. 600 (SB 422) Simitian Small claims court: jurisdiction.**

(1) Existing law specifies that the jurisdiction of the small claims court includes various actions in which the demand does not exceed \$5,000, with certain exceptions.

This bill would increase the small claims court jurisdiction over actions brought by a natural person, if the amount does not exceed \$7,500, with specified exceptions. The bill would also require, in small claims court actions to enforce the payment of a debt, that the statement of calculation of liability separately state the original debt, and other payments to the debt, as specified.

(2) Existing law authorizes small claims court cases to be heard by temporary judges who are members of the State Bar, and who are sworn and empowered to act in this capacity.

On and after July 1, 2006, this bill would require temporary judges, prior to serving in small claims court, and every 3 years thereafter, to take a course of study, offered by the courts on ethics and substantive law under rules adopted by the Judicial Council, covering specified state, federal, and local laws, with assistance from the Department of Consumer Affairs, if fiscally able to provide that assistance.

(3) Existing law prescribes the jurisdiction and procedures for small claims court, including, but not limited to, the setting of filing fees. Existing law also entitles a prevailing party to the costs of a small claims action.

This bill would provide that a portion of certain filing fees are not recoverable as costs.

(4) Existing law requires each small claims court advisory service, offered without charge to litigants and potential litigants, to provide individual personal advisory services, in person or by telephone, and by any other means reasonably calculated to provide timely and appropriate assistance.

This bill would require the topics covered by individual personal advisory services to include preparation of small claims court filings, procedures, including procedures related to the conduct of the hearing, and information on the collection of small claims court judgments.

(5) The bill would include other conforming changes and related findings and declarations of the Legislature.

#### Ch. 601 (SB 575) Torlakson Housing development projects.

The Planning and Zoning Law requires that a local agency not disapprove a housing development project, including farmworker housing, for very low, low-, or moderate-income households or condition its approval, including through the use of design review standards, in a manner that renders the project infeasible for development for those households unless it makes written findings, based upon substantial evidence in the record, as to one of a number of specified conditions.

The Planning and Zoning Law also requires that in any action to enforce these provisions, if a court finds that the local agency disapproved the project or conditioned its approval without making the required findings or without making sufficient findings supported by substantial evidence, the court shall issue an order or judgment to compel compliance with these provisions within 60 days, including an award of reasonable attorney's fees and costs of suit to the plaintiff or petitioner who proposed the housing development, and may issue further orders to ensure that the purposes and policies of these provisions are fulfilled if its order or judgment has not been carried out within the 60-day period.

This bill would revise the conditions upon which a disapproval or a conditional approval of the housing development project is based.

The bill would expressly authorize the applicant for the housing development project or any person who would be eligible to apply for residency in that project to bring an action in court pursuant to specified provisions and would also authorize the court to vacate the decision of the local agency, as specified, deem the application complete, and impose fines pursuant to specified procedures if the court finds that the local agency acted in bad faith and failed to carry out the court's order or judgment within the 60-day period.

The bill would also specify procedures for appeal of the court's order.

#### Ch. 602 (SB 568) Kehoe Property tax revenue allocations.

Existing property tax law requires the county auditor, in each fiscal year, to allocate property tax revenue to local jurisdictions in accordance with specified formulas and procedures, and generally requires that each jurisdiction be allocated an amount equal to the total of the amount of revenue allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, and that jurisdiction's portion of the annual tax increment, as defined. Existing law requires the auditor to reduce, for the 2004-05 and 2005-06 fiscal years, the total amount of property tax revenue that is otherwise required to be allocated to an enterprise and a nonenterprise special district, as defined, by an amount calculated by the Controller pursuant to a specified formula. Existing law requires that the total statewide amount of these reductions for each of those fiscal years equal \$350 million.

The California Constitution prohibits the Legislature from enacting a statute that changes the manner in which property tax revenues are allocated so as to reduce the percentage of

property tax revenues that are allocated in a county among all local agencies, as defined, below the percentage of those revenues that were so allocated under the law in effect on November 3, 2004, as specified.

This bill would specify that, for the 2005-06 fiscal year, a nonenterprise special district does not include a local health care district, as specified. This bill would also require the Controller to implement this exemption in a manner that ensures that this bill does not result in a net increase in the total amount of the reduction for any special district for the 2005-06 fiscal year from the total amount of the reduction determined for that special district for the 2004-05 fiscal year.

Ch. 603 (SB 618) Speier Sentencing: programs.

Under existing law, the Legislature finds and declares that programs should be available for inmates, including educational programs that are designed to prepare nonviolent felony offenders for successful reintegration into the community. Under existing law, the Legislature encourages the development of policies and programs designed to educate and rehabilitate nonviolent felony offenders.

This bill would authorize a county to develop a multiagency plan to prepare and enhance nonviolent felony offenders' successful reentry into the community, and would require that plan be developed by, and have the concurrence of, the presiding judge, the chief probation officer, the district attorney, the local custodial agency, and the public defender, or their designees, for submission to the board of supervisors for its approval. The bill would further authorize the Department of Corrections and Rehabilitation to enter into an agreement with up to 3 counties to implement the above provisions and to provide funding for the purpose of the probation department carrying out its assessments, and would make specified findings and declarations in that regard.

Ch. 604 (SB 897) Scott International trade and investment office: Yerevan.

Existing law requires the Governor to instruct the Secretary of Business, Transportation and Housing to establish, on a contract basis, an international trade and investment office in Yerevan, in the Republic of Armenia, subject to the availability of funds for that purpose. The secretary is required to report to the Legislature on the success of the international trade and investment office no later than March 1, 2005. These provisions are repealed as of January 1, 2006.

This bill would extend the reporting date to June 1, 2007, and the repeal date to January 1, 2008.

Ch. 605 (AB 365) Salinas Local agencies: agricultural lands.

Existing law defines plants that are being produced by nurseries as "growing agricultural crops" for the purposes of any laws that pertain to the agricultural industry of the state.

This bill would state that plants and floricultural crops that are being produced by nurseries, whether in open fields or in greenhouses, shall be considered "growing agricultural crops" for the purposes of those laws and that those laws shall apply equally to greenhouses and open field nursery operations. This bill would make other related changes.

Existing law, the Williamson Act, provides that a landowner and a city or county may enter into a mutually beneficial contract to restrict the use of agricultural land by creating an "agricultural preserve," as defined, in order to preserve the limited supply of agricultural land necessary to the conservation of the state's economic resources. The act also defines other terms for purposes of its provisions, including "agricultural use."

This bill would revise the definition of "agricultural use" to include greenhouses and would define "greenhouse."

Ch. 606 (AB 414) Klehs Labor compliance programs: third-party providers.

Existing law requires an awarding body, as defined, that chooses to use funds from either the Kindergarten-University Public Education Facilities Bond Act of 2002 or the

Kindergarten-University Public Education Facilities Bond Act of 2004 for a public works project to initiate and enforce, or contract with a 3rd party to initiate and enforce, a labor compliance program, as defined, for that public works project.

This bill would specify that a 3rd party that contracts with an awarding body to initiate and enforce a labor compliance program, for purposes of these provisions, may not review the payroll records of its own employees or the employees of its subcontractors, and the awarding body or an independent third party must review these payroll records for purposes of the labor compliance program.

Ch. 607 (AB 415) Harman Arbitration: legal representation.

Existing law, effective until January 1, 2006, permits persons admitted to the bar of any other state to represent a party in an arbitration proceeding in this state, or to render legal services in this state in connection with an arbitration proceeding in another state. Existing law requires out-of-state attorneys representing a party in a California arbitration proceeding to serve upon the arbitrator, the State Bar of California, the parties, and counsel, a certificate containing specified information prior to the first scheduled hearing in the arbitration. Existing law also permits any party to an arbitration arising under certain collective bargaining agreements to be represented by any person.

This bill would extend the operation of those provisions until January 1, 2007.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 608 (AB 478) Lieber Female inmates and wards.

(1) Existing law provides that an inmate who gives birth after her receipt by the Department of Corrections and Rehabilitation may be declared eligible to participate in a community treatment program that provides for the release of the mother and child to a public or private facility in the community suitable to their needs.

This bill would require any community treatment program in which such an inmate participates to include prenatal care, access to prenatal vitamins, childbirth education, and infant care. This bill would also require the department to establish minimum standards for pregnant inmates who are not eligible for the program including necessary nutrition and vitamins, information and education, and a dental cleaning.

(2) Existing law provides that any inmate who gives birth to a child during her term of imprisonment may be temporarily taken to a hospital outside the prison for childbirth.

This bill would provide that pregnant inmates taken to a hospital outside the prison shall be transported in the least restrictive way possible. This bill would also provide that the inmate shall not be shackled by the wrists, ankles, or both during labor, including during transport to the hospital, during delivery, and while in recovery after giving birth, except as specified.

(3) Existing law requires the Corrections Standards Authority to establish minimum standards for state and local correctional facilities, as specified.

This bill would provide that those standards shall require that inmates who are received by the facility while they are pregnant are provided, at a minimum, necessary nutrition and vitamins, information and education, and a dental cleaning. This bill would also require that these standards provide that at no time shall a woman who is in labor be shackled by the wrists, ankles, or both, including during transport to the hospital, during delivery, and while in recovery after giving birth, except as specified.

(4) Existing law entitles any female in the custody of a local juvenile facility or the Department of Corrections and Rehabilitation, Division of Juvenile Facilities, the right to summon and receive the services of any physician and surgeon of her choice to determine if she is pregnant, and to a determination of the medical services needed with regard to the pregnancy.

This bill would provide that a ward who gives birth while under the jurisdiction of the Department of Corrections and Rehabilitation, Division of Juvenile Facilities, or a

community treatment program, has the right to prenatal care, prenatal vitamins, and childbirth education. The bill would apply the requirements outlined in (2) above to pregnant wards under the jurisdiction of local or state correctional facilities.

(5) Because this bill would require local officials to provide additional services, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 609 (AB 460) Parra Contagious diseases.

Existing law authorizes the Department of Agriculture, with approval of the Governor, to cooperate with the United States Department of Agriculture in order to protect the agricultural industry from pest or disease.

This bill would authorize the department to enter into agreements with the United States Department of Agriculture to carry out a program of prevention and control of avian influenza, and to adopt any regulations as necessary to implement the program.

#### Ch. 610 (AB 664) Jones Administration of the State Bar.

(1) Existing law requires that an applicant for the issuance or renewal of a license to practice law, supply his or her social security number or, if a partnership, its federal employer identification number.

This bill would authorize, in specified circumstances, submission of a federal tax identification number or another identification number, as determined by the State Bar of California, in place of the applicant's social security number.

(2) In a summary proceeding for the possession of real property, existing law requires the court clerk to mail a specified notice to each defendant named in the eviction action. This notice is required to include, among other things, the name and telephone number of the county bar association and the name and telephone number of an office funded by the federal Legal Services Corporation that provides legal services to low-income persons in the county in which the action is filed.

This bill would permit that notice to include the name and telephone number of qualified legal services projects that receive specified funds distributed by the State Bar of California, in lieu of a legal services office funded by the federal Legal Services Corporation.

#### Ch. 611 (AB 702) Koretz Nursing education.

Existing law requires the Office of Statewide Health Planning and Development to establish the Health Professions Education Foundation, a public benefit corporation, for the purpose of providing financial assistance in the form of scholarships or loans for educational costs of registered nurses or graduates of associate degree nursing programs who agree to serve in underrepresented areas.

This bill would, in addition, allow the office to provide financial assistance to students who are seeking a master's or doctoral degree in nursing. The bill would require that a registered nurse and student must commit to teaching nursing in a California nursing school for 5 years in order to receive a scholarship or loan repayment for a master's or doctoral degree program.

#### Ch. 612 (AB 1011) Matthews Pesticide brokers.

Existing law generally regulates pesticides and provides that it is unlawful for any person, other than the registrant of a pesticide or a licensed pest control dealer to sell or distribute registered pesticide products that are labeled for agricultural use, unless he or she is a licensed pesticide broker. However this does not apply to sellers or distributors of pesticides that are labeled only for nonagricultural uses.

This bill would remove provisions specifying that these provisions do not apply to persons who operate as sellers or distributors of pesticides that are labeled only for nonagricultural uses. Because this bill would require additional persons to be licensed, it would expand the definition of a crime and impose a state-mandated local program.

This bill would also require pesticide retailers to maintain records that show the names and contact information of their suppliers, as specified.

Existing law requires that an application for a pesticide broker license be accompanied by a fee and provides a penalty for delayed payment.

This bill would remove those provisions calling for payment of a fee.

Existing law requires licensed pesticide brokers to maintain business records, as specified, that must be available for audit by the Director of Pesticide Regulation or county agricultural commissioner.

This bill would remove provisions requiring these records to be available to the county agricultural commissioner.

Existing law requires every manufacturer of, importer of, or dealer in any pesticide to obtain a certificate of registration from the Department of Pesticide Regulation before the pesticide is offered for sale. Existing law provides that data previously submitted to the Director of Pesticide Regulation or to the Administrator of the United States Environmental Protection Agency to support an application for the registration of a pesticide shall not be used without permission to support an application by another person.

This bill would repeal these provisions and instead provide that the director may rely upon any evaluations of previously submitted data with respect to an application for registration, an amendment to a registration, or to maintain a registration if certain criteria are met including that the applicant either obtain written permission from the owner to rely on the data or irrevocably offer to pay the owner a share of the cost of producing the data, as specified. This bill would provide that the specific terms and amount of payment shall be fixed by agreement between the applicant and the owner but shall not delay approval of the applicant's application. This bill would provide that if agreement cannot be reached by the parties, either party may initiate a proceeding to determine the amount due, as specified. The bill would require the department to make available to the public domain its index of data submitted in support of registration applications, the ownership of that data, and the date it was submitted to California. The bill would require the director, with the assistance of the Legislative Analyst, to conduct a study to consider the consequences of data-sharing agreements required by the bill, with a report to the Legislature by December 31, 2008. This bill would provide that if the owner cannot be identified, the applicant will be absolved of his or her obligation to pay if the owner does not identify himself or herself within 12 months after registration of the pesticide product.

This bill would also state legislative intent that the department shall not be involved in resolving issues between applicants and owners over financial obligations arising from data ownership. The bill would require the director to promulgate emergency regulations to govern those proceedings.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 613 (AB 1061) Committee on Agriculture Agriculture omnibus changes.

Under existing law, all fees and assessments that are required to be paid to support certain agricultural programs are deposited into the Department of Food and Agriculture Fund.

This bill would create the Analytical Laboratory Account in the Department of Food and Agriculture Fund, into which the residual balance of all reimbursements collected by the Secretary of Food and Agriculture for services rendered by the Center for Analytical Chemistry would be deposited at the end of each fiscal year. Upon appropriation by the

Legislature, money in the account would be used to fund services rendered, laboratory equipment repair or replacement, make modifications or upgrades to existing facilities, or for other uses that maintain the laboratory infrastructure.

Existing law provides for the establishment and responsibilities of an advisory committee to aid in the preparation of a report required pursuant to the Cooperative Bargaining Association Chapter. These provisions will be repealed on January 1, 2006.

This bill would reenact those provisions, with specified revisions.

Existing law provides the Agricultural Cooperative Bargaining Advisory Committee shall meet not less than twice a year.

This bill would reduce the number of mandatory meetings to one per year.

Existing law provides a procedure for addressing complaints by growers or licensed produce dealers.

This bill would establish a similar procedure for complaints where the claimed damages do not exceed \$30,000, as specified.

Ch. 614 (AB 1233) Jones Housing element: regional housing need.

The Planning and Zoning Law requires each city, county, or city and county to prepare and adopt a general plan for its jurisdiction that contains certain mandatory elements, including a housing element. One part of the housing element is an assessment of housing needs and an inventory of land suitable for residential development in meeting the jurisdiction's share of the regional housing need, including vacant sites and sites having potential for redevelopment, and an analysis of the relationship of zoning facilities and services to these sites.

The Planning and Zoning Law also requires the local government to identify specified actions that will be taken to make sites available during the planning period of the general plan to accommodate that portion of the city's or county's share of the regional housing need for each income level that could not be accommodated on sites identified above.

This bill would require for housing elements due on or after January 1, 2006, that, for purposes of making the assessment and inventory for meeting the locality's share of the regional housing need for the new housing element, if the city or county failed to identify or make available adequate sites to accommodate that portion of the regional housing need allocated pursuant to Section 65584, then the city or county shall, within the first year of the planning period of the new housing element, zone or rezone adequate sites to accommodate the unaccommodated portion of the regional housing need allocation from the prior planning period.

Ch. 615 (AB 1235) Emmerson In-service training.

Existing law sets forth the qualifications for becoming a certified nurse assistant for a skilled nursing facility or intermediate care facility. Existing law requires a certified nurse assistant to renew the certification every 2 years. Existing law requires a person applying for certification renewal to have completed 48 hours of in-service training in the previous 2 years.

This bill would allow an applicant for certification renewal to complete 24 of the requisite 48 hours of training using an online computer training program, approved by the Licensing and Certification Division of the State Department of Health Services, which meets prescribed requirements, including, but not limited to, that the person certify completion of the course.

Ch. 616 (AB 1349) Goldberg Narcotic treatment programs.

Existing law authorizes the State Department of Alcohol and Drug Programs to enter into a Medi-Cal Drug Treatment Program contract with each county for the provision of services within the county service area. Existing law requires the department to establish fees for controlled substances dispensed to Medi-Cal beneficiaries under this program based on a per

capita uniform statewide monthly reimbursement rate. Existing law requires that reimbursement under the program be limited to the lower of that uniform statewide monthly reimbursement rate or the provider's usual and customary charge to the public for the same or similar services.

This bill would provide that if a narcotic treatment program provider establishes a sliding indigency scale for low-income persons who are not eligible to participate in the Medi-Cal Drug Treatment Program in accordance with requirements established by the bill, the provider shall be deemed in compliance with federal and state law for purposes of the application of an exception to reimbursement requirements that would prohibit those reduced charges under the sliding indigency scale from lowering the provider's usual and customary charge determination for Medi-Cal reimbursement. The bill would also authorize a narcotic treatment program provider to use an instruction and financial evaluation form that the bill would create to aid in implementing a sliding indigency scale.

Existing law establishes that the Legislature's intent in licensing narcotic treatment programs is to provide a means whereby the patient may be rehabilitated and will no longer need to support a dependency on narcotics. Existing law declares that the ultimate goal of all narcotic treatment programs shall be to aid the patient in altering his or her lifestyle and eventually to eliminate all dependency on drugs.

This bill would revise the Legislature's intent and declarations so that the Legislature's intent in licensing narcotic treatment programs would be to provide a means whereby the patient may be rehabilitated and will no longer need to support a dependency on opiates, and the ultimate goal of narcotic treatment programs would be to aid the patient in altering his or her lifestyle and eventually to eliminate the improper use of legal drugs and the use of illicit drugs.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 617 (AB 1442) Jerome Horton Alcoholic beverages: advertising.

Existing law generally prohibits a manufacturer of alcoholic beverages and a winegrower from paying, crediting, or compensating a retailer for advertising or paying or giving anything of value for the privilege of placing a sign or advertisement with a retail licensee. It authorizes, as an exception, the holder of a winegrower's license, a California winegrower's agent, a beer manufacturer, a distilled spirits rectifier, a distilled spirits manufacturer, or a distilled spirits manufacturer's agent, to purchase advertising space and time from, or on behalf of, an on-sale retail licensee, under certain conditions, if the on-sale retail licensee is the owner, manager, agent of the owner, assignee of the owner's advertising rights, or major tenant of specified facilities, including specified facilities located in the Counties of Los Angeles and Orange.

This bill would expand the exceptions to existing law to include additional facilities in Los Angeles County and would authorize additional advertising purchases by a distilled spirits rectifier, as specified.

This bill would make findings regarding the need for special legislation.

Ch. 618 (AB 1459) Canciamilla Small claims court: jurisdiction.

(1) Existing law specifies that the jurisdiction of the small claims court includes various actions in which the demand does not exceed \$5,000, with certain exceptions.

This bill would increase the small claims court jurisdiction over actions brought by a natural person, if the amount does not exceed \$7,500, with specified exceptions. The bill would also require, in small claims court actions to enforce the payment of a debt, that the statement of calculation of liability separately state the original debt, and other payments to the debt, as specified.

(2) Existing law authorizes small claims court cases to be heard by temporary judges who are members of the State Bar, and who are sworn and empowered to act in this capacity.

On and after July 1, 2006, this bill would require temporary judges, prior to serving in small claims court, and every 3 years thereafter, to take a course of study, offered by the courts on ethics and substantive law under rules adopted by the Judicial Council, covering specified state, federal, and local laws, with assistance from the Department of Consumer Affairs, if fiscally able to provide that assistance.

(3) Existing law prescribes the jurisdiction and procedures for small claims court, including, but not limited to, the setting of filing fees. Existing law also entitles a prevailing party to the costs of a small claims action.

This bill would provide that a portion of certain filing fees are not recoverable costs.

(4) Existing law requires each small claims court advisory service, offered without charge to litigants and potential litigants, to provide individual personal advisory services, in person or by telephone, and by any other means reasonably calculated to provide timely and appropriate assistance.

This bill would require the topics covered by individual personal advisory services to include preparation of small claims court filings, procedures, including procedures related to the conduct of the hearing, and information on the collection of small claims court judgments.

(5) The bill would include other conforming changes and related findings and declarations of the Legislature.

#### Ch. 619 (AB 1462) Torrico State Highway Route 84.

Existing law authorizes a city or county in which a planned transportation facility was to be located on State Highway Route 238 in Alameda County to develop and file with the California Transportation Commission a local alternative transportation program that addresses transportation problems and opportunities, and provides for the use of revenues from the sales of excess properties acquired for the planned state facility in order to fund the local alternative program, but limits the use of revenues from excess property sales to highway purposes. Existing law provides that the commission may not approve a local alternative program under these provisions after July 1, 2010.

This bill would extend the applicability of these provisions to a specified portion of State Highway Route 84 in Alameda County. The bill would limit the use of revenues from excess property sales to state highway purposes.

#### Ch. 620 (AB 1756) Committee on Elections and Redistricting City councils: selection of mayor.

Existing law requires that the city council, at the meeting at which the declaration of the election results is made and following that declaration and the installation of elected officials, choose one of its number as mayor and one of its number as mayor pro tempore.

This bill would specify that this meeting is the meeting at which the declaration of the election results for a general municipal election is made.

#### Ch. 621 (SB 1111) Committee on Business, Professions and Economic Development Professions and vocations.

Existing law provides for the regulation of various professions, including physicians and surgeons, podiatrists, physician assistants, dentists, dental auxiliaries, nurses, respiratory care practitioners, and pharmacists.

This bill would revise and recast certain provisions regulating these professions.

This bill would specify that the fee for examination for licensure as a registered dental assistant shall not exceed \$50 for the written examination and shall not exceed \$60 for the practical examination and, on and after January 1, 2008, the application fee and fee for issuance of a license for registered orthodontic assistants, registered surgery assistants, registered restorative assistants, and registered dental assistants shall not exceed \$50. The bill would require the Dental Board of California to license a person who meets specified

requirements as a registered dental assistant and it would also expand those requirements. The bill would specify that, on and after January 1, 2008, a registered dental assistant may perform specified duties and procedures similar to other dental auxiliaries. The bill would authorize, on and after January 1, 2008, a registered dental assistant in extended functions to perform all duties and procedures that a registered dental assistant is authorized to perform. The bill would also extend various inoperative and repeal dates relating to dentists and dental auxiliaries.

This bill would require the Division of Medical Quality of the Medical Board of California to organize itself as 2 panels of 7 members. The bill would provide that a podiatric medicine licensee whose renewal fee has been waived cannot practice podiatric medicine unless specified requirements have been satisfied. The bill would require an applicant for a license to practice respiratory care to successfully pass the national respiratory therapist examination. The bill would require a pharmacy to have written policies and procedures for detecting chemical, mental, or physical impairment among licensed individuals employed by or with the pharmacy. The bill would require a pharmacy to report certain information to the California State Board of Pharmacy for the protection of the public. The bill would require the board to operate a pharmacists recovery program to rehabilitate pharmacists and intern pharmacists whose competence may be impaired due to abuse of alcohol, drug use, or mental illness. The bill would establish requirements for this program and require the board to contract with one or more qualified contractors to administer the program. Because the bill would increase fees under the Pharmacy Law that would be deposited into the Pharmacy Board Contingent Fund which is continuously appropriated, the bill would make an appropriation.

The bill would incorporate additional changes to Section 2234.1 of the Business and Professions Code made by this bill and AB 592 to take effect if both bills are enacted and this bill is enacted last.

The bill would incorporate additional changes to Section 4315 of the Business and Professions Code made by this bill and SB 644 to take effect if both bills are enacted and this bill is enacted last.

The bill would incorporate additional changes to Section 4400 of the Business and Professions Code made by this bill and AB 497 to take effect if both bills are enacted and this bill is enacted last.

Because a violation of the bill with respect to podiatrists and pharmacists would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 622 (SB 457) Kehoe Disaster relief.

(1) Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the board's approval. With respect to certain counties that have adopted reassessment ordinances and have been declared by the Governor to be in a state of emergency as a result of certain events, existing law provides for state allocations of the estimated amounts of the reductions in property tax revenues resulting in certain fiscal years from reassessments under those ordinances. Existing law also continuously appropriates, without regard to fiscal years, moneys in the Special Fund for Economic Uncertainties for purposes of funding these state allocations.

This bill would provide for similar state allocations with respect to property tax revenue reductions, resulting from a reassessment ordinance, incurred by the Counties of Orange, Riverside, San Bernardino, and San Diego which were declared by the Governor to be in a

state of emergency as a result of a series of severe rainstorms that occurred in those counties during December 2004, January 2005, February 2005, March 2005, and June 2005. By requiring moneys continuously appropriated from the Special Fund for Economic Uncertainties to be allocated for the new purpose of reimbursing these counties for these property tax revenue reductions, this bill would make an appropriation.

(2) The Natural Disaster Assistance Act provides for, among other things, specified allocations to local agencies with respect to natural disasters.

This bill would include within those provisions the disaster that occurred in the Counties of Orange, Riverside, San Bernardino, and San Diego as a result of the severe rainstorms during December 2004, January 2005, and February 2005, as provided.

(3) The Personal Income Tax Law and the Corporation Tax Law provide for the carryover to specified taxable years of specified losses sustained as a result of certain disasters occurring in California in an area determined by the President of the United States to warrant specified federal assistance, or proclaimed by the Governor to be in a state of emergency.

This bill would extend these provisions to losses sustained as a result of the series of severe rainstorms and related events that occurred in the Counties of Orange, Riverside, San Bernardino, and San Diego in December 2004, January 2005, February 2005, March 2005, or June 2005. This bill would also authorize a taxpayer to make an election to claim a deduction for those losses on the tax return for the preceding year.

(4) Existing property tax law provides, pursuant to a specified provision of the California Constitution, for a homeowners' property tax exemption in the amount of \$7,000 of the full value of a "dwelling," as defined. The California Constitution requires the Legislature, in each fiscal year, to reimburse local governments for the revenue losses incurred by those governments in that fiscal year as a result of the homeowners' property tax exemption.

This bill would provide that any dwelling that qualified for the exemption prior to December 28, 2004, that was damaged or destroyed by severe rainstorms, floods, mudslides, or the accumulation of debris in a disaster may not be denied the exemption solely on the basis that the dwelling was temporarily damaged or destroyed or was being reconstructed by the owner, as provided. This bill would also state the intent of the Legislature to make the required reimbursement to local governments for revenue losses incurred as a result of the homeowners' exemption in the annual Budget Act.

By requiring local tax officials to implement new exemption criteria, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) This bill would incorporate additional changes to Sections 218, 17207, and 24347.5 of the Revenue and Taxation Code, proposed by AB 18 and AB 164, to be operative only if AB 18, AB 164, and this bill are all enacted, all 3 bills amend the respective sections, and this bill is enacted after AB 18 or AB 164. Additionally, this bill would provide that it will not become operative unless AB 164 and this bill are both chaptered and become effective on or before January 1, 2006.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 623 (AB 164) Nava Disaster relief.

(1) Under the Natural Disaster Assistance Act, the state share for eligible project costs is generally 75% of total eligible costs, and for specific incidents, the state share is set at 100% of total eligible state costs.

This bill would include as eligible for allocations under those provisions the severe storms, flooding, debris flows, and mudslides that occurred during December 27, 2004, to January

11, 2005, inclusive, and during the period from February 16, 2005, to February 23, 2005, in southern California.

(2) Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the board's approval. With respect to certain counties that have adopted reassessment ordinances and have been declared by the Governor to be in a state of emergency as a result of certain events, existing law provides for state allocations of the estimated amounts of the reductions in property tax revenues resulting in certain fiscal years from reassessments under those ordinances. Existing law also continuously appropriates, without regard to fiscal years, moneys in the Special Fund for Economic Uncertainties for purposes of funding these state allocations.

This bill would provide for similar state allocations with respect to property tax revenue reductions, resulting from a reassessment ordinance, incurred by the Counties of Kern, Los Angeles, Santa Barbara, and Ventura, which were declared by the Governor to be in a state of emergency as a result of a series of severe rainstorms that occurred in those counties during December 2004, January 2005, February 2005, or March 2005. By requiring moneys continuously appropriated from the Special Fund for Economic Uncertainties to be allocated for the new purpose of reimbursing these counties for these property tax revenue reductions, this bill would make an appropriation.

(3) Existing property tax law provides, pursuant to a specified provision of the California Constitution, for a homeowners' property tax exemption in the amount of \$7,000 of the full value of a "dwelling," as defined.

This bill would provide that any dwelling that qualified for the exemption prior to December 28, 2004, that was damaged or destroyed by severe rainstorms, floods, mudslides, or the accumulation of debris in a disaster, as declared by the Governor, during December 2004, or January 2005, February 2005, March 2005, and June 2005, and that has not changed ownership since December 28, 2004, may not be denied the exemption solely on the basis that the dwelling was temporarily damaged or destroyed or was being reconstructed by the owner, or was temporarily uninhabited as a result of restricted access to the property due to floods, mudslides, the accumulation of debris, or washed-out and damaged roads.

The California Constitution requires the Legislature, in each fiscal year, to reimburse local governments for the revenue losses incurred by those governments in that fiscal year as a result of the homeowners' property tax exemption.

This bill would state the intent of the Legislature to make this required reimbursement in the annual Budget Act.

By requiring local tax officials to implement new exemption criteria, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(4) The Personal Income Tax Law and the Corporation Tax Law provide for the carryover to specified taxable years of specified losses sustained as a result of certain disasters occurring in California in an area determined by the President of the United States to warrant specified federal assistance, or proclaimed by the Governor to be in a state of emergency.

This bill would extend these provisions to losses sustained in the Counties of Kern, Los Angeles, Santa Barbara, and Ventura as a result of the severe rainstorms, related flooding and slides, and any other related casualties, that occurred in December 2004, January 2005, February 2005, or March 2005. This bill would also authorize a taxpayer to make an election to claim a deduction for those losses on the tax return for the preceding year.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

(5) The Mills-Alquist-Deddeh Act requires an operator of a public transportation system to comply with certain requirements in order to be eligible for funding under that act.

This bill would authorize the Ventura County Transportation Commission to reduce, by up to 30 days, certain requirements, as specified.

(6) This bill would incorporate additional changes to Sections 218, 17207, and 24347.5 of the Revenue and Taxation Code, proposed by AB 18 and SB 457, to be operative only if AB 18, SB 457, and this bill are all enacted, all 3 bills amend the respective sections, and this bill is enacted after AB 18 or SB 457. Additionally, this bill would provide that it will not become operative unless SB 457 and this bill are both chaptered and become effective on or before January 1, 2006.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 624 (AB 18) La Malfa Disaster relief.

(1) Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the board's approval. With respect to certain counties that have adopted reassessment ordinances and have been declared by the Governor to be in a state of disaster as a result of certain events, existing law provides for state allocations of the estimated amounts of the reductions in property tax revenues resulting in certain fiscal years from reassessments under those ordinances. Existing law also continuously appropriates, without regard to fiscal years, moneys in the Special Fund for Economic Uncertainties for purposes of funding these state allocations.

This bill would provide for similar state allocations with respect to property tax revenue reductions, resulting from a reassessment ordinance, incurred by Shasta County, which was declared by the Governor to be in a state of emergency as a result of the wildfires that occurred in 2004. By requiring moneys continuously appropriated from the Special Fund for Economic Uncertainties to be allocated for the new purpose of reimbursing these counties for these property tax revenue reductions, this bill would make an appropriation.

(2) Existing property tax law provides, pursuant to a specified provision of the California Constitution, for a homeowners' property tax exemption in the amount of \$7,000 of the full value of a "dwelling," as defined.

This bill would provide that any dwelling that qualified for the exemption prior to August 11, 2004, that was damaged or destroyed by the wildfires and any other related casualty that occurred in Shasta County and that has not changed ownership since August 11, 2004, may not be denied the exemption solely on the basis that the dwelling was temporarily damaged or destroyed or was being reconstructed by the owner.

The California Constitution requires the Legislature, in each fiscal year, to reimburse local governments for the revenue losses incurred by those governments in that fiscal year as a result of the homeowners' property tax exemption.

This bill would state the intent of the Legislature to make this required reimbursement in the annual Budget Act.

By requiring local tax officials to implement new exemption criteria, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions. by the state, reimbursement for those costs shall be made pursuant to these statutory provisions. tains costs mandatedl of specified losses sustained as a result of certain disasters occurring in California in an area determined by the President of

the United States to warrant specified federal assistance, or proclaimed by the Governor to be in a state of emergency.

This bill would extend these provisions to losses sustained as a result of the Shasta County wildfires in 2004. This bill would also authorize a taxpayer to make an election to claim a deduction for those losses on the tax return for the preceding year.

(4) This bill would incorporate additional changes to Sections 218, 17207, and 24347.5 of the Revenue and Taxation Code, proposed by AB 164 and SB 457, to be operative only if AB 164, SB 457, and this bill are all enacted, all 3 bills amend the respective sections, and this bill is enacted after AB 164 or SB 457.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 625 (SB 116) Dutton Child abandonment: newborns.

Existing law makes it a crime for a parent of a minor child, without lawful excuse, to not furnish necessary clothing, food, shelter, or medical or remedial care for the child, or to refuse, without lawful excuse, to accept the child in his or her home or provide alternate shelter. Existing law also makes it a crime for a parent of a child under the age of 14 years to desert the child with intent to abandon, or for any person to knowingly or willfully abandon or, having the ability to refuse to do so, fail to maintain his or her child under the age of 14 years.

Existing law, until 2006, provides that no parent or other person having lawful custody of a minor child 72 hours old or younger may be prosecuted for a violation of the above crimes if he or she voluntarily surrenders physical custody of the child to an employee on duty at a public or private hospital emergency room, or any additional location designated by the board of supervisors. Existing law provides that within 48 hours of accepting the physical custody of a child who is surrendered pursuant to these provisions, the personnel that have custody of the child must notify child protective services or a county agency providing child welfare services. Existing law requires that agency to immediately notify the State Department of Social Services of each child to whom this provision applies upon taking temporary custody of the child.

This bill would delete that date thereby extending those provisions indefinitely. By expanding the duties of local public entities and employees, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 626 (SB 218) Scott Termination of parental rights: prospective adoptive parents.

Existing law provides that if the court, by order or judgment, declares a child free from the custody and control of both parents, or one parent if the other does not have custody and control, the court shall at the same time order the child referred to the State Department of Social Services or a licensed adoption agency for adoptive placement by the agency. Existing law provides that the State Department of Social Services or licensed adoption agency shall be responsible for the custody and supervision of the child and shall be entitled to the exclusive care and control of the child at all times until a petition for adoption is granted.

This bill would create an exception to that provision if the child is living with a caretaker who has been designated by the court as a prospective adoptive parent. The bill would authorize a court to designate a current caretaker as a prospective adoptive parent if the child has lived with the caretaker for at least 6 months, the caretaker has expressed a commitment to adopt the child, and the caretaker has taken at least one step to facilitate the adoption, as

specified. The bill would further provide that a child living in the home of a designated prospective adoptive parent may only be removed from that home after a noticed hearing in which the court finds that removal from the home is in the child's best interest, except as specified. The bill would require the Judicial Council to prepare forms to facilitate the filing of petitions under these provisions.

The bill would incorporate additional changes in Section 366.26 of the Welfare and Institutions Code, proposed by AB 519, AB 1338, and AB 1412, to be operative only if one or more of those bills and this bill are chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

#### Ch. 627 (SB 302) Scott Adoption.

Existing law provides that a man is presumed to be the natural father of a child if certain conditions are met. This presumption may be rebutted by a judgment establishing paternity of the child by another man. Existing law also authorizes a child, the child's natural mother, or, with certain exceptions, a presumed father of the child to bring an action to determine paternity, as specified. Existing law provides that an action to determine a parent and child relationship may be brought in the county in which a child resides or is found, or, if the father is deceased, in the county in which probate proceedings for probate of his estate have been or could be commenced.

Existing law provides that if a mother relinquishes for or consents to, or proposes to relinquish for or consent to, the adoption of a child who has a presumed father, the father must be given notice of the adoption proceeding and a child may not be adopted without his consent, except under specified circumstances.

Existing law also provides that, in a stepparent adoption, the consent of either or both birth parents must be signed in the presence of a county clerk, probation officer, qualified court investigator, or county welfare department staff member of any county of this state.

Existing law requires the social worker or probation officer to give notice to specified persons of a hearing to terminate parental rights or establish the legal guardianship of a dependent child.

This bill would authorize, in a stepparent adoption, the consent of either or both birth parents to be signed in the presence of a notary public.

The bill would additionally authorize an adoption agency to whom the child has been relinquished to or a prospective adoptive parent of the child to bring an action to determine paternity.

The bill would expand the provision governing venue for an action to determine a parent and child relationship by additionally authorizing that action to be brought in the county in which a licensed California adoption agency maintains an office if the agency brings the action.

The bill would provide that the consent of a presumed father is not required for the child's adoption unless he became a presumed father before the mother's relinquishment or consent becomes irrevocable or before the mother's parental rights have been terminated.

The bill would also expand the list of specified persons whom the social worker or probation officer must notify regarding a hearing to terminate parental rights or establish a legal guardianship by requiring that notice be given to unknown parents by publication, if ordered by the court, as specified. By expanding the duties of social workers and probation officers, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

## Ch. 628 (SB 358) Scott Child care.

(1) Existing law requires, as a condition of the State Department of Social Services or other licensing agency issuing a license, permit, or certificate of approval, as appropriate, for a person to operate or to provide direct care services in a community care facility, residential care facility for persons with a chronic life-threatening illness, residential care facility for the elderly, or child day care facility, the fingerprinting of, and criminal record clearance for, applicants and persons to be employed by, reside at, or be present in any of these facilities, except as specified.

This bill would exempt from those requirements individuals engaged by a licensed or certified foster parent to provide short-term care to a foster child for periods not exceeding 24 hours. The bill would also hold caregivers to a reasonable and prudent parent standard in the selection of babysitters, as specified.

(2) Existing law provides that every dependent child shall be entitled to participate in age-appropriate extracurricular, enrichment, and social activities, and that state and local regulations and policies may not prevent or create barriers to participation in those activities. Existing law also requires state and local entities to ensure that private agencies that provide foster care services to dependent children, promote and protect the ability of dependent children to participate in those activities.

This bill would authorize any licensed or certified foster parent, relative caregiver, or nonrelative extended family member to arrange occasional short-term, as defined, babysitting for a foster child. The bill would require those caretakers to use a reasonable and prudent parent standard in determining and selecting that babysitter.

## Ch. 629 (SB 436) Migden Foster care: transitional housing.

Existing law provides that a person less than 21 years of age who has emancipated from a county that has elected to participate in a transitional housing placement program for youths between 18 and 21 years of age who meet certain conditions, shall also be eligible for a county transitional housing placement program that provides supervised housing services.

Existing law establishes the Transitional Housing for Foster Youth Fund, which is continuously appropriated for purposes of paying the state share of the cost relating to transitional housing services for eligible emancipated foster youth.

Existing law requires the department to develop statewide standards for the Independent Living Program for emancipated foster youth established pursuant to federal law. Under existing law, a county department of social services is required to prepare an annual Independent Living Program report on the county's implementation of the program.

This bill would require the county department of social services in a county that provides transitional housing placement services to include in its annual Independent Living Program report a description of currently available transitional housing resources in relation to the number of emancipating pregnant or parenting foster youth in the county, and a plan for meeting any unmet transitional housing needs of the emancipating pregnant or parenting foster youth.

## Ch. 630 (SB 500) Kuehl AFDC-FC: pregnant and parenting foster youth.

Under existing law, a child may come within the jurisdiction of the juvenile court and become a dependent child of the court, in, among others, cases of abuse or neglect, or failure of a parent or guardian to adequately supervise or protect the child. Existing law declares that a parent's or guardian's physical disability is only relevant to a court's determination to the extent that the parent's disability prevents him or her from exercising care or control.

This bill would additionally declare that a child whose parent has been adjudged a dependent child of the court shall not be considered to be at risk of abuse or neglect solely because of the age, dependent status, or foster care status of the parent.

Existing law provides that any order placing a child in foster care, and ordering reunification services, shall provide for visitation between the parent or guardian and any siblings and child, with certain exceptions.

This bill would provide, if the child is a teen parent who has custody of his or her child and that child is not a dependent of the court, for visitation among the teen parent, the child's noncustodial parent, and appropriate family members unless the court finds by clear and convincing evidence that visitation would be detrimental to the teen parent.

This bill would require a shared responsibility plan to be developed between the teen parent, caregiver, and other county or state representatives, as appropriate, for the care of the child of a teen parent when the child of a teen parent is not under the jurisdiction of the dependency court but is in the full or partial physical custody of the teen parent who is living in an out-of-home placement in a whole family foster home, as defined. The bill would set forth the areas to be covered by the plan, including feeding, clothing, transportation, and child care responsibilities. To the extent this requirement would impose additional duties on counties, this bill would impose a state-mandated local program.

Existing law establishes the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which counties provide payments to foster care providers on behalf of qualified children in foster care. The program is funded by a combination of federal, state, and county funds, with moneys from the General Fund being continuously appropriated to pay for the state's share of AFDC-FC costs.

Under existing law, federal financial participation is available for certain children who have been adjudged dependent children or wards of the court, or who have been detained under a court order.

This bill would additionally authorize federal financial participation for a dependent child of the court whose parent is also a dependent child or ward of the court who is receiving AFDC-FC benefits, if the parent and child are placed in the same foster care facility and are receiving reunification services. By creating a new category for AFDC-FC eligibility, and thereby increasing county administration duties for the AFDC-FC program by expanding AFDC-FC eligibility, the bill would impose a state-mandated local program.

Because General Fund moneys are continuously appropriated for purposes of the AFDC-FC program, by expanding AFDC-FC eligibility, the bill would constitute an appropriation.

This bill would incorporate additional changes in Section 300 of the Welfare and Institutions Code, proposed by SB 116, to be operative only if SB 116 and this bill are both chaptered and become effective January 1, 2006, and this bill is chaptered last.

This bill would incorporate additional changes in Section 11400 of the Welfare and Institutions Code, proposed by SB 679, to be operative only if SB 679 and this bill are both chaptered and become effective January 1, 2006, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 631 (SB 720) Kuehl Court orders.

(1) Existing law provides specified procedures to initiate and pursue contempt orders.

This bill would authorize a district attorney or city attorney to initiate and pursue a court action for contempt against a party for failing to comply with a court order entered pursuant to the Domestic Violence Protection Act. The bill would require any attorney's fees and costs ordered against a party in contempt of the above provision to be paid to the Office of Emergency Services for the purpose of funding domestic violence shelter service providers.

(2) Existing law requires the court to transmit data to law enforcement personnel related to certain protective orders.

This bill would further require the court to similarly transmit data related to any protective order issued, modified, extended, or terminated pursuant to specified provisions of the Family Code.

(3) Existing law provides a mechanism whereby the court may issue a protective order.

This bill would make clarifying changes with regard to that authority, specifically with respect to orders protecting victims of violent crime from all contact by a defendant.

(4) This bill would incorporate additional changes in Section 136.2 of the Penal Code proposed by AB 112, AB 118, and AB 1288 that would become operative only if any or all of those bills are chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

#### Ch. 632 (SB 726) Florez Dependent children.

Existing law requires a court, when ordering the removal of a child from a home, to determine if there is a parent of the child with whom the child was not living who desires to assume custody of the child, and to place the child with that parent unless the court finds that the placement would be detrimental to the safety, protection, or physical or emotional well-being of the child.

This bill would enact "Adam's Law," which would authorize a court to order that a social worker conduct a home visit within 3 months of placing a child with a noncustodial parent and to file a report with the court after conducting that home visit, as specified. The bill would also require a social worker to provide a "Caregiver Information Form" to a caregiver of a child for purposes of providing information regarding a noncustodial parent who is seeking placement or custody of the child and to ensure that, if the foster parent completes the form, the completed form is returned to the court for review and consideration before the child is placed with the noncustodial parent. By imposing new duties on county employees, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 633 (AB 178) Koretz California Cigarette Fire Safety and Firefighter Protection Act.

Existing law requires the State Fire Marshal to adopt regulations that specify standards for the special design of cigarette lighters with respect to safety features that prevent operation of the lighters by children 5 years of age or younger.

This bill would prohibit the sale of cigarettes unless the manufacturer of those cigarettes certifies to the State Fire Marshal that the cigarettes have been tested by the manufacturer in accordance with standards established by the American Society of Testing and Materials and no more than 25% of the cigarettes it manufactures exhibit full-length burns when tested. The bill would require cigarette manufacturers to mark packages of cigarettes to be sold in California to show compliance with these provisions and would require manufacturers, distributors, wholesalers, and retailers to permit an employee of the State Board of Equalization to inspect these markings. Failure or refusal to allow an inspection would subject a person to a civil penalty not to exceed \$1,000.

The bill would impose specified civil penalties on manufacturers, distributors, wholesalers, retailers, and others who knowingly sell or offer to sell cigarettes in violation of these provisions and on manufacturers that knowingly make false certifications in violation of these provisions. The bill would require these civil penalties to be deposited in

the Cigarette Fire Safety and Firefighter Protection Fund, which the bill would create in the State Treasury, and would make moneys in the fund, upon appropriation by the Legislature, available to the State Board of Equalization to offset costs for inspecting, seizing, and disposing of cigarettes and to the State Fire Marshal to offset costs for implementation and reporting.

The bill would become inapplicable if federal fire safety standards that preempt these provisions are enacted and the State Fire Marshal so notifies the Secretary of State.

The bill would become operative on January 1, 2007.

#### Ch. 634 (AB 519) Leno Parental rights.

Existing law provides that children may become dependent children of the juvenile court on the basis of abuse or neglect. Existing law specifies that any order of the court permanently terminating parental rights is conclusive and binding on the child, subject to specified notice provisions, and gives the juvenile court no power to set aside, change, or modify that order, except that the order may be appealed.

This bill would create an exception to this provision to permit a child who has not been adopted after the passage of at least 3 years from termination of parental rights and for whom the court has determined that adoption is no longer the permanent plan, or is no longer likely to be adopted, as specified, to petition the juvenile court for reinstatement of parental rights, pursuant to specified procedures.

Existing law permits the juvenile court to issue specified ex parte orders to protect a dependent child and also permits the court to issue specified ex parte orders to protect the parent, legal guardian, or current caretaker of a dependent child.

This bill would make technical changes to that latter provision.

This bill would incorporate additional changes in Section 366.26 of the Welfare and Institutions Code, proposed by AB 1338, AB 1412, and SB 218, to be operative only if one or more of those bills and this bill are chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

#### Ch. 635 (AB 760) Nava Criminal procedure.

Existing law provides an arrested person with certain rights regarding the opportunity to make telephone calls incident to the person being booked or detained, as specified. The willful deprivation of these rights by a public officer or employee is a misdemeanor.

This bill would, in addition, provide that when, during booking, an arrested person is determined to be a custodial parent of a minor child or children, the person would be entitled to make 2 telephone calls at no expense, as specified, for the purpose of arranging for the care of the minor child or children.

By imposing additional duties on local government entities, this bill would impose a state-mandated local program. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 636 (AB 824) Chu AFDC-FC benefits: transitional housing.

Existing law establishes the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which counties provide payments to foster care providers on behalf of qualified children in foster care. The program is funded by a combination of federal,

state, and county funds, with moneys from the General Fund being continuously appropriated to pay for the state's share of AFDC-FC costs.

Existing law extends eligibility for certain transitional housing placement program services that are available to foster youth to a person less than 21 years of age who has emancipated from the foster care system in a county that has elected to participate in a transitional housing placement program for youths between 18 and 21 years of age, provided that the person has not received these services for more than a total of 24 months.

This bill would raise the age limit for receipt of transitional housing placement program services by an emancipated foster youth to 24 years.

Ch. 637 (AB 1116) Yee Community care facilities: foster children: injections.

Existing law regulates the licensure of community care facilities by the State Department of Social Services and authorizes a community care facility to provide certain incidental medical services.

Existing law authorizes facility staff who are not licensed health care professionals to provide incidental medical services in a community care facility for adults if, among other things, they are trained by a licensed health care professional and supervised according to an individualized health care plan for clients that is prepared by a health care team and reassessed at least every 12 months or more frequently as determined by the client's physician or nurse practitioner.

Existing law separately provides for the provision of specialized in-home health care services for foster children with designated medical conditions.

This bill would authorize designated foster care providers and other persons to administer emergency medical assistance and injections for severe diabetic hypoglycemia and anaphylactic shock, and subcutaneous injections of other prescribed medication, to a foster child, if the provider is trained to administer injections by a licensed health care professional. The bill would not supersede existing law requirements applicable to the administration of psychotropic medication to a dependent child of the court. The bill would require the licensed health care professional to periodically review, correct, or update this training as the health care professional deems necessary and appropriate.

This bill would prohibit a child's need to receive injections pursuant to the bill from being the sole basis for determining that the child has a medical condition requiring specialized in-home health care, notwithstanding existing law.

Ch. 638 (AB 1179) Yee Violent video games: sales to minors.

Existing law regulates the sale of certain merchandise, such as political items and sports memorabilia.

This bill would require violent video games to be labeled as specified and would prohibit the sale or rental of those violent video games, as defined, to minors. The bill would provide that a person who violates the act shall be liable in an amount of up to \$1,000 for each violation.

Ch. 639 (AB 1261) Leno Foster children: education.

Existing law requires a pupil placed in a licensed children's institution or foster family home to attend programs operated by the local educational agency, unless one of certain specified circumstances applies.

This bill would revise the applicable circumstances.

The bill would also define "local educational agency" for these purposes.

Existing law provides that, if a school placement dispute arises, a foster child has the right to remain in his or her school of origin pending resolution of the dispute.

This bill would provide that the dispute shall be resolved in accordance with the existing dispute resolution process available to any pupil served by the local educational agency.

Existing law provides that “school of origin” means the school that the foster child attended when permanently housed or the school in which the foster child was last enrolled. Existing law requires the educational liaison for foster children to determine, as provided, the school that shall be deemed the school of origin for a foster child if, among other things, there is some other school that the foster child attended with which the foster child is connected.

This bill would additionally require that the foster child have attended that connected school in the past 15 months.

Existing law provides that the proper and timely transfer between schools of pupils in foster care is the responsibility of both the local educational agency and the county placing agency and imposes various requirements relating to the transfer of those pupils between schools.

This bill would define “pupil in foster care” for these purposes.

Existing law establishes the Public Schools Accountability Act of 1999 and requires the Superintendent of Public Instruction to develop an Academic Performance Index (API), which consists, in part, of the results of the tests administered pursuant to the Standardized Testing and Reporting (STAR) Program, to measure the performance of schools, to demonstrate comparable improvement in academic achievement by all numerically significant ethnic and socioeconomically disadvantaged subgroups within schools, and to rank schools based on the value of the API. Existing law requires the Superintendent to develop an alternative accountability system for specified schools.

This bill would add nonpublic, nonsectarian schools, as specified, to the list of schools for which development of an alternative accountability system is required. This bill would also delete obsolete provisions.

Existing law defines the term “nonpublic, nonsectarian school” for purposes of special education programs.

This bill would revise that definition.

Existing law requires a nonpublic, nonsectarian school or agency that seeks certification to provide special education and related services to file an application with the Superintendent, as specified. Existing law requires an applicant for certification to provide the special education local plan area in which the applicant is located with written notification of its intent to seek certification or renewal of its certification. Existing law provides that if the applicant has not received a response from the local educational agency 30 days from the date of the return receipt for the notification, the applicant may file the application with the Superintendent. Existing law requires the Superintendent, prior to certification, to conduct an onsite review of the facility and program for which the applicant seeks certification. Existing law requires the Superintendent to conduct an additional onsite review of the facility and program within 4 years of the effective date of the certification, unless a specified exception applies.

This bill would provide that if the applicant has not received a response from the local educational agency 60 calendar days from the date of the return receipt for initial applications or 30 calendar days from the date of the return receipt for renewal applications, the applicant may file the application with the Superintendent. The bill would instead require an additional onsite review within 3 years of the effective date of certification.

Existing law sets forth the circumstances under which a minor may be adjudged a dependent child of the juvenile court, and establishes procedures to determine temporary placement of a dependent child.

This bill would authorize the court, at the initial hearing or anytime thereafter up until the time that the minor is adjudged a dependent child of the court or a finding is made dismissing the petition, to temporarily limit the right of the parent or guardian to make educational decisions for the child and to temporarily appoint a responsible adult to make educational decisions for the child if all of the specified conditions are found. The bill would also

authorize the court to make educational decisions for the child under specified circumstances.

Existing law authorizes a juvenile court to limit the right of a parent or guardian to make educational decisions for his or her child that is adjudged a dependent child of the court and requires the court at the same time to appoint a responsible adult to make educational decisions for the child until one of specified circumstances occurs.

This bill would authorize the court to make educational decisions for the child if the court cannot identify a responsible adult to make educational decisions for the child, the appointment of a surrogate parent is not warranted, and there is no foster parent to exercise the appropriate authority. The bill would require the court, if it makes educational decisions for the child, to issue appropriate orders to ensure that every effort is made to identify a responsible adult to make future educational decisions for the child.

Existing law requires the county welfare department, at any hearing to terminate jurisdiction over a dependent child who has reached the age of majority, to, among other things, submit a report verifying that specified documents, where applicable, have been provided to the child.

This bill would impose a state-mandated local program by requiring a county welfare department to verify that a health and education summary has been provided to the child.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 640 (AB 1412) Leno Dependent children: out-of-home placements.

(1) Existing law requires the juvenile court to conduct periodic status review hearings, and, in certain cases, to terminate the parental rights to, and to order a permanent plan of adoption or legal guardianship for, a dependent child of the juvenile court. Existing law also requires social workers to prepare various reports, including a case plan, regarding the child in connection with these hearings, and to make efforts to maintain relationships between the child and specified individuals who are important to the child. Several of these provisions apply specifically to a child who is 10 years of age or older who is placed in a group home for 6 months or longer from the date the child entered foster care.

This bill would revise those provisions to apply to a child who is 10 years of age or older and who has been in an out-of-home placement, subject to appropriation through the budget process and by phase, as specified. The bill would also require that a child be involved in developing his or her case plan as age and developmentally appropriate. By expanding the class of children to whom these provisions would apply, the bill would impose additional duties on social workers, thereby imposing a state-mandated local program.

(2) Existing law establishes the rights of children in foster care. Existing law establishes a statewide system of child welfare services and states the intent of the Legislature in this regard.

This bill would state the right of a child in foster care to be involved in the development of his or her own case plan and plan for permanent placement. The bill would revise the age a child in foster care has a right to review his or her case plan and plan for permanent placement to 12 years of age or older. The bill would make further statements of legislative intent in connection with the statewide system of child welfare services. The bill would provide that a child be given an opportunity to participate in the development of a case plan and state his or her preference for foster care placement, and that a child 12 years of age or older in a permanent placement shall be able to review the case plan, sign it, and receive a copy of it. The bill would also make a statement of legislative findings regarding a child's input in his or her case plan.

(3) This bill would incorporate additional changes in Section 366.26 of the Welfare and Institutions Code, proposed by AB 519, AB 1338, and SB 218, to be operative only if one or more of those bills and this bill are chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

(4) This bill would incorporate additional changes to Section 16500.1 of the Welfare and Institution Code proposed by AB 880 to be operative only if this bill and AB 880 are both chaptered and this bill is chaptered last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 641 (AB 1633) Evans Foster children: high school: social security assistance.

(1) Existing law permits a child who is in foster care and receiving aid pursuant to the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, who is attending high school or the equivalent level of vocational or technical training on a full-time basis prior to his or her 18th birthday, to continue to receive aid following his or her 18th birthday, if the child continues to reside in foster care placement, remains otherwise eligible for AFDC-FC payments, and continues to attend high school or the equivalent level of vocational or technical training on a full-time basis and if the child may reasonably be expected to complete the educational or training program before his or her 19th birthday.

Existing law continuously appropriates moneys from the General Fund to defray a portion of county costs under the CalWORKs program, which includes the AFDC-FC program.

This bill would extend the opportunity to remain in foster care placement beyond the age of 18 years to a foster child who is pursuing a high school equivalency certificate. By extending AFDC-FC benefits to additional recipients, this bill would increase the duties of counties administering the program, thus imposing a state-mandated local program. The bill would declare that no appropriation would be made pursuant to the existing continuous appropriation for purposes of implementing these provisions.

This bill would also declare the intent of the Legislature to enact legislation relating to educational opportunities and resources for foster youth, including to provide for designated education and information for judges, lawyers, and the Legislature, and to require foster youth to be informed of their education rights.

(2) Existing law provides for the placement of certain children in foster care under the custody of the State Department of Social Services. Existing law, the federal Social Security Act, provides for benefits for eligible beneficiaries, including survivorship and disability benefits and supplemental security income (SSI) benefits for, among others, blind and disabled children. The act authorizes a person or entity to be appointed as a representative payee for a beneficiary who cannot manage or direct the management of his or her money. Existing law also provides for state supplemental payments (SSP) in supplementation of SSI benefits.

This bill would require the department to convene a workgroup to develop best practice guidelines for county welfare departments to assist eligible children who are in the state's or a county's custody and are qualified under the bill in obtaining federal social security and supplemental security income benefits. The bill would require these guidelines to be established by December 31, 2006, and would establish the required contents of the guidelines. The bill would require the department to require each county to, among other duties, assist in the application process for an eligible foster child, and would require the county to apply to be appointed the child's representative payee when no other appropriate party is available to serve. It would further require the county to establish a maintenance account and a dedicated account for each child, to contain proceeds from social security and

supplemental security income benefits, each of which would only be used for the purposes set forth in the bill. The bill would require the workgroup to make recommendations to the department, by December 31, 2006, regarding the feasibility and cost-effectiveness of reserving a designated amount of foster children's social security and SSI/SSP benefits in lieu of reimbursing the county and the state for care and maintenance, and, in making those recommendations, to consider that the reserved benefits would be for the purpose of assisting the foster child in the transfer to self-sufficient living in a manner consistent with federal law.

This bill would require the county to inform the Social Security Administration of the foster care status of a child who is receiving designated federal benefits, and to apply to become the child's representative payee during the time the child is placed in foster care. It would also require a county to provide information regarding certain federal requirements when a foster youth who is receiving SSI payments is approaching his or her 18th birthday.

By increasing county duties, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 642 (AB 1669) Chu Employment: discrimination.

Under existing provisions of the California Fair Employment and Housing Act, a person filing a complaint for an unlawful practice with the Department of Fair Employment and Housing is required to file the complaint within one year, except that the period for filing may be extended in specified circumstances.

This bill would additionally provide that the period for filing a complaint for an unlawful practice may be extended for a period of time not to exceed one year from the date a person allegedly aggrieved by an unlawful practice attains the age of majority.

#### Ch. 643 (SB 377) Ortiz Medi-Cal: dental services.

Existing law establishes the Medi-Cal program, administered by the State Department of Health Services, that provides certain benefits to qualified recipients. Certain dental services are covered Medi-Cal benefits.

This bill would declare that the Legislature has appropriated money in the Budget Act of 2001 and each subsequent Budget Act thereafter, for the provision under the Medi-Cal program of nonemergency benefits for the prevention and treatment of dental and periodontal disease for beneficiaries during pregnancy to prevent premature deliveries and low-birth weights. The bill would require the department to immediately implement the provision of these services by informing Denti-Cal and other Medi-Cal providers through provider bulletins that these benefits are included for pregnant beneficiaries. The bill would require the department to adopt regulations to implement the provision of these services on or before January 1, 2008, and would provide that implementation by provider bulletin of this provision shall not be delayed pending the adoption of these regulations.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 644 (AB 124) Dymally Civil service: equal opportunity programs.

The State Civil Service Act requires each state agency and department to establish an effective affirmative action program with specified components, and to establish goals and timetables designed to overcome any identified underutilization of minorities and women in their respective organizations. Existing law requires the State Personnel Board to conduct specified activities in this regard.

Portions of these provisions have been held to be in violation of the California Constitution and the United States Constitution.

This bill would revise and recast these provisions to instead require each state agency to establish an equal opportunity program to ensure that the state policy of providing equal access to state jobs, work assignments, training, and other employment-related opportunities for all qualified job applicants and employees, based on merit and nondiscrimination in every aspect of personnel policies and employment practices, is fully implemented. It would require the State Personnel Board to conduct specified activities, including the collection of specific employment data based on race, ethnicity, gender, and disability in this regard.

Ch. 645 (AB 689) Nava Nutrition and physical activity curriculum.

Existing law requires the State Board of Education to adopt instructional materials in designated subject areas for use in kindergarten and grades 1 to 8, inclusive, and to ensure that curriculum frameworks are reviewed and adopted in each subject area consistent with the cycles for the submission of instructional materials. Existing law requires the State Department of Education to incorporate nutrition education curriculum content into the health curriculum framework at its next revision, with a focus on pupils' eating behaviors.

This bill would require the state board to adopt, on or before March 1, 2008, content standards in the curriculum area of health education. The bill would make that duty contingent upon the availability of funding. area of health education. Th

Ch. 646 (AB 979) Sharon Runner Driving under the influence: restricted driver's license.

(1) Existing law requires the Department of Motor Vehicles to immediately suspend or revoke the privilege of a person to operate a motor vehicle upon receipt of an abstract of the record of a court showing that the person has been convicted of specified provisions prohibiting driving under the influence (DUI). Existing law prohibits the reinstatement of that privilege until the person has complied with certain conditions and requires a person convicted of repeated DUI offenses to have his or her privilege suspended for a period ranging from 2 to 5 years. After completion of 12 to 30 months of the suspension or revocation period, depending upon the particular offense and punishment, the department is required to advise the person that the person may apply to, and be granted, a restricted driver's license that is subject to specified conditions, including installing and maintaining an ignition interlock device.

This bill would apply the above provisions governing the issuance of restricted drivers' licenses to the above persons after completion of 12 months of the suspension or revocation period in all cases, rather than the current 12 to 30 month range.

(2) Existing law authorizes a peace officer to either immediately arrest a person and cause the removal and seizure of the vehicle he or she was operating or, if the vehicle is involved in a traffic collision, cause the removal and seizure of the vehicle, without the necessity of arresting the person, if the peace officer determines that the person was driving the vehicle while his or her driving privilege was suspended or revoked or without having been issued a license. Existing law requires the vehicle to be impounded for 30 days, but allows for the vehicle to be released prior to the end of that 30 days under specified circumstances.

This bill would, additionally, apply the above impoundment procedure to a person who is driving in violation of a driver's license restriction requiring that person to operate a vehicle that is equipped with a functioning, certified ignition interlock device.

(3) This bill would incorporate additional changes in Section 14602.6 of the Vehicle Code, to become operative only if AB 1132 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

Ch. 647 (AB 1088) Oropeza Public postsecondary education: mandatory orientation for students.

(1) Existing law, the Donahoe Higher Education Act, sets forth, among other things, the missions and functions of California's public and independent segments of higher education,

and their respective institutions of higher education. Among other things, the act requires the governing board of each community college district, the Trustees of the California State University, the Regents of the University of California, to the extent the regents make the act applicable, and the governing board of independent postsecondary institutions, as defined, to adopt rules requiring each of their respective campuses to enter into written agreements with local law enforcement agencies that clarify operational responsibilities for investigations of Part I violent crimes, as defined, occurring on each campus.

The act also requires the governing board of each community college district, the Trustees of the California State University, the Board of Directors of the Hastings College of the Law, and the Regents of the University of California, to the extent the regents make the act applicable, to each adopt, and implement at each of their campuses or other facilities, a written procedure or protocols to ensure, to the fullest extent possible, that students, faculty, and staff who are victims of sexual assault, as defined, committed at or upon the grounds of, or upon off-campus grounds or facilities maintained by the institution, or upon grounds or facilities maintained by affiliated student organizations, receive treatment and information.

This bill would express findings and declarations of the Legislature with respect to the incidence of sexual assault on college and university campuses.

The bill would require the governing board of each community college district and the Trustees of the California State University, and request the Regents of the University of California, in collaboration with campus-based and community-based victim advocacy organizations, to provide, as part of established on-campus orientations, educational and preventive information about sexual violence to students at all campuses of their respective segments. The bill would require each campus of the California Community Colleges and the California State University, and would request each campus of the University of California, to post sexual violence prevention and education information on the campus Internet Web site. To the extent that these requirements would impose new duties on community college districts, the bill would constitute a state-mandated local program.

The bill would require the Board of Governors of the California Community Colleges and the Trustees of the California State University, and would request the Regents of the University of California, to develop and adopt regulations setting forth procedures for the implementation of the bill by campuses in their respective segments.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 648 (AB 1114) Yee Acupuncture: continuing education.

Existing law, the Acupuncture Licensure Act, provides for the licensure and regulation of acupuncturists by the Acupuncture Board. Existing law requires a licensed acupuncturist to complete 30 hours of continuing education every 2 years as a condition for renewal of his or her license.

This bill would instead require a licensed acupuncturist to complete 50 hours of continuing education every 2 years. The bill would require that no more than 5 of the hours of continuing education be spent on issues unrelated to clinical matters or the actual provision of health care to patients.

#### Ch. 649 (AB 1117) Yee Asian medicine.

(1) Existing law provides for the licensing and regulation of the practice of oriental medicine and acupuncture. An acupuncturist's license authorizes the holder to perform or prescribe, among other things, oriental massage.

This bill would change the term “oriental medicine” to “Asian medicine” and would change the term “oriental massage” to “Asian massage.” The bill would state the intent of the Legislature that this change not affect any previous interpretations or judicial decisions.

(2) This bill would incorporate additional changes in Section 4935 of the Business and Professions Code, to become operative only if AB 1116 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

(3) This bill would also incorporate additional changes in Section 4937 of the Business and Professions Code, to become operative only if AB 1113 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

#### Ch. 650 (AB 1285) Montanez Child care services.

Existing law requires that moneys in a specified item of the Budget Act of 2000 be allocated to local child care and development planning councils based on the percentage of state-subsidized, center-based child care funds received in the county in which the council is located, and requires that these funds be used to address the retention of qualified child care employees in state-subsidized child care centers. Existing law authorizes the allocation of these funds annually thereafter for these purposes.

This bill would delete the authorization for the allocation of these funds annually thereafter for these purposes, and make an appropriation by authorizing these funds, and other specified funds appropriated for these purposes, to be used in the County of Los Angeles if specified requirements are met, to address the retention of qualified persons working in licensed child care programs that serve a majority of children who receive subsidized child care services, including, but not limited to, family day care homes, as defined.

This bill would make legislative findings and declarations regarding the need for special legislation.

#### Ch. 651 (AB 1392) Umberg Free or reduced-price meals.

(1) Existing law requires a school district and a county superintendent of schools maintaining a kindergarten or any of grades 1 to 12, inclusive, to provide for each needy pupil one nutritionally adequate free or reduced-price meal during each schoolday, except as specified.

Existing law requires the State Board of Education to grant a one-year waiver from that requirement during a summer school session if 2 of 4 enumerated conditions exist, including that the summer school session is less than 4 hours in duration and is completed by noon, that less than 10% of the needy pupils attending the summer school session are at the schoolsite for more than 3 hours per day, that a Summer Food Service Program for Children site is available within the attendance area of the school, and that compliance with the requirement would result in a financial loss in a specified amount relative to food service net cash resources, except as specified.

This bill would require a waiver to be granted if a Summer Food Service Program for Children site is available within a specified proximity to the schoolsite and as to specified hours of operation, or if compliance with the requirement would result in a financial loss, as specified. To the extent that these restrictions on granting a waiver from this requirement would impose additional duties on a school district, the bill would create a state-mandated local program. The bill would, for purposes of providing nutritionally adequate free or reduced-price meals, authorize a school district or county superintendent of schools to use funds provided by specified programs.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 652 (AB 1426) Liu Animal euthanasia.

Existing law makes it a crime to engage in acts of animal abuse, as specified. Existing law makes it a misdemeanor to kill any animal by the use of carbon monoxide gas.

This bill would provide that it is also a misdemeanor to kill any animal by means of an intracardiac injection of a euthanasia agent on a conscious animal, unless the animal is heavily sedated or anesthetized in a humane manner, or comatose, or unless, in light of all the relevant circumstances, the procedure is justifiable. By creating a new crime, this bill would impose a state-mandated program upon local governments.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 653 (AB 1662) Lieber Special education: conformance to federal law.

(1) Existing law establishes a right of individuals with exceptional needs to receive free appropriate public education and ensures the right to special instruction and related services needed to meet their unique needs, in conformity with federal law.

This bill would make various revisions generally conforming state law to federal requirements relating to, among others, pupil identification, assessment, and eligibility; individualized education program development, including notice, representation, and hearing procedures and requirements; and pupil data confidentiality, and would make other technical, nonsubstantive changes. To the extent that these revisions would impose new duties on local educational agencies, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 654 (AB 1646) Committee on Higher Education Public postsecondary education: community colleges: technical revisions.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state.

This bill would recast and revise numerous statutes relating to the operation and organization of the California Community Colleges system and its component districts and campuses. The bill would make various nonsubstantive technical and conforming changes in these statutes. Among other technical and conforming revisions, the bill would change existing statutory references to “average daily attendance” to “full-time equivalent students (FTES),” references to “school” authorities and programs to “college” authorities and programs, and references to “certificated” personnel to “academic” personnel.

This bill would authorize a community college district to exempt a student who, as of August 29, 2005, was enrolled, or admitted with an intention to enroll, in the fall term of the 2005–06 academic year in a regionally accredited institution of higher education in Alabama, Louisiana, or Mississippi, and who could not continue his or her attendance at that institution as a direct consequence of damage sustained by that institution as a result of Hurricane Katrina, from paying a nonresident tuition fee in the 2005–06 academic year. The bill would also exempt these students from the enrollment fee if they would otherwise qualify for a waiver under the standards in existing law.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 655 (SB 194) Maldonado Proprietary private security officers.

The Private Security Services Act provides for the licensure and regulation of private patrol operators by the Bureau of Security and Investigative Services in the Department of Consumer Affairs. Existing law exempts specified persons from the act.

This bill would enact the Proprietary Security Services Act. The bill would define proprietary private security officers and it would require these persons to register with the Department of Consumer Affairs, as specified.

Ch. 656 (SB 207) Scott Vehicles: driving-under-the-influence: impoundment.

(1) Existing law provides that a peace officer or, in certain other cases, a magistrate, may cause the removal and seizure of a vehicle, under certain circumstances, as specified. Existing law provides that a vehicle so seized may be impounded for 30 days.

This bill would authorize a peace officer to immediately cause the removal and seizure of a vehicle from a person who meets certain circumstances relating to driving a motor vehicle while under the influence of alcohol or drugs, or both (DUI), and who has been previously convicted of DUI within the preceding 10 years. The bill would provide for a 5-day impoundment of that vehicle if the person has been convicted of DUI once within the preceding 10 years, and a 15-day impoundment if the person has been convicted of DUI 2 or more times within the preceding 10 years, subject to a hearing and certain exceptions.

The bill would prescribe procedures to be followed for the release of the vehicle prior to the end of the impoundment period, including a requirement that a legal owner who has obtained possession of the impounded vehicle not relinquish the vehicle to the registered owner until after the termination of the impoundment period and until after the registered owner has presented a valid driver's license or valid temporary driver's license to the legal owner. Because a violation of that requirement and certain other requirements and restrictions imposed by the bill would be an infraction, the bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 657 (SB 228) Figueroa Geologists and geophysicists: professional engineers and land surveyors.

(1) Existing law establishes the Board for Professional Engineers and Land Surveyors in the Department of Consumer Affairs. Existing law requires the board to appoint an executive officer. Existing law authorizes the board to make and enforce rules and regulations that are reasonably necessary to carry out the provisions of law regulating land surveyors. Existing law provides that these provisions are to become inoperative and are repealed on July 1, 2006, and January 1, 2007, respectively.

This bill would instead make these provisions inoperative and repealed on July 1, 2008, and January 1, 2009, respectively.

Existing law makes various violations of the Professional Engineers Act a crime, including the practice or offer to practice by a person of civil, electrical, or mechanical engineering without authorization as provided by the act.

Because a violation of the provisions of the bill would be a crime, these provisions of the bill would impose a state-mandated local program.

(2) Existing law, the Geologist and Geophysicist Act, provides for the regulation of geologists and geophysicists by the Board for Geologists and Geophysicists, in the Department of Consumer Affairs. Under existing law, the provisions creating the board and authorizing the board to appoint an executive officer will become inoperative on July 1, 2006, and will be repealed as of January 1, 2007.

This bill would instead make these provisions inoperative and repealed on July 1, 2008, and January 1, 2009, respectively.

The bill would also change references to “registered geophysicist” and “registered geologist” to “professional geophysicist” and “professional geologist,” respectively, in specified provisions.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 658 (SB 229) Figueroa Professions and vocations.

(1) Existing law provides for the Board of Psychology to license and regulate psychologists. Under existing law, certain provisions relating to the board become inoperative on July 1, 2006, and are to be repealed on January 1, 2007.

This bill would extend those dates to July 1, 2008, and January 1, 2009, respectively.

(2) Existing law specifies the requirements for licensing as a psychologist, including educational and training requirements. Existing law exempts from licensing persons who meet certain criteria and who register with the board for up to 2 years from the date of registration. Existing law provides for the Board of Psychology to examine applicants by written or oral examination.

This bill would provide that those exempt persons shall be identified as “registered psychologists” and would extend the period of the exemption to up to 30 months. The bill would also delete the authorization for an oral examination, and would instead provide for a computer-assisted examination. The bill would make various other revisions to these and other related provisions.

(3) Existing law imposes various fees on applicants for licensure by the Board of Psychology and on licensees. Existing law provides that a licensee in ill health or absent from the state may apply for inactive status at a reduced rate.

This bill would also authorize a licensee in retirement to be placed on inactive status.

(4) Existing law authorizes a psychologist licensed by another state or foreign country to practice in this state for up to 30 days in a calendar year.

This bill would limit that authorization to a psychologist at the doctoral level licensed by another state or Canada.

(5) Existing law provides for the licensing and regulation of respiratory care practitioners by the Respiratory Care Board of California. Existing law establishes a process by which a licensee whose license has been revoked or suspended or who is on probation may petition the board for reinstatement.

This bill would apply the same process in the case of a licensee who has surrendered his or her license. The bill would require certain processing fees to be paid with regard to a petition for reinstatement. The bill would also make other related changes.

(6) Existing law provides for licensing and regulation of marriage and family therapists by the Board of Behavioral Scientists. Existing law requires an applicant for the marriage and family therapist examination to complete 3000 hours of supervised experience, with limits on the amount of experience that may be earned in certain areas of emphasis, and subject to a 1500-hour limitation imposed on experience hours earned prior to award of a degree.

This bill would impose a 1300-hour limitation on experience hours earned prior to award of a degree and would make various revisions to the requirements for supervised experience. The bill would also make other related changes.

(7) Existing law provides for licensing and regulation of accountants by the California Board of Accountancy.

This bill would authorize a licensed accountant from another state to prepare individual or estate tax returns for persons who are or were California residents under limited circumstances.

(8) Existing law provides that public accountancy firms may have owners who are not licensed as accountants under certain conditions. Existing law generally prohibits a person from becoming or remaining a nonlicensee owner if the person has been convicted of certain crimes involving dishonesty or fraud or in the event of certain disciplinary action, and requires reporting by a nonlicensee owner to the board in that regard.

This bill would require a California nonlicensee owner of a public accounting firm to report to the board within 30 days of the opening or initiation of a formal investigation of the nonlicensee by the Securities and Exchange Commission, the Public Company Accounting Oversight Board, or another professional licensing agency. The bill would generally exempt these reports from disclosure pursuant to the California Public Records Act.

(9) Existing law provides for the Board of Behavioral Sciences to license and regulate clinical social workers. Under existing law, certain provisions relating to the board become inoperative on July 1, 2006, and are to be repealed on January 1, 2007.

This bill would extend those dates to July 1, 2008, and January 1, 2009, respectively.

(10) Existing law provides for the Court Reporters Board of California to license and regulate certified shorthand reporters. Under existing law, certain provisions relating to the board become inoperative on July 1, 2006, and are to be repealed on January 1, 2007.

This bill would extend those dates to July 1, 2008, and January 1, 2009, respectively.

(11) Existing law prohibits the disclosure of certain information regarding complaints relative to a licensee of the Court Reporters Board of California unless an accusation has been filed. These provisions do not apply to citations, fines, or orders of abatement, which may be disclosed to the public.

This bill would also allow letters of reprimand relative to a licensee to be disclosed to the public.

(12) Existing law provides for licensing and regulation of structural pest control operators by the Structural Pest Control Board. Under existing law, certain provisions relating to the board become inoperative on July 1, 2006, and are to be repealed on January 1, 2007.

This bill would extend those dates to July 1, 2011, and January 1, 2012, respectively.

(13) Existing law requires a tax preparer, as defined, to register with the California Tax Education Council. Existing law requires the Franchise Tax Board to notify the council when the board identifies a tax preparer that has not registered as required, and authorizes the board to cite individuals for these violations, levy a fine of up to \$5,000 against the individual, or issue a cease and desist order against the individual until he or she has registered as required. Existing law authorizes the imposition of penalties against tax preparers who fail to furnish copies of taxpayer returns, who fail to furnish an identifying number, or who fail to retain specified documents.

This bill would recast these provisions to instead require the council, after receiving notification from the board regarding a violation of the registration requirements, to notify the Attorney General, a district attorney, or a city attorney, who would be authorized to cite individuals for these violations, levy a fine of up to \$5,000 against the violator, or issue a cease and desist order against the violator until he or she has registered as required. This bill would also authorize the board to impose penalties against a tax preparer that fails to register with the council, but only after the board receives moneys for any costs incurred in the imposition of these penalties.

Ch. 659 (SB 248) Figueroa Professions and vocations.

(1) The Osteopathic Initiative Act provides for the creation of the Osteopathic Medical Board of California to license and regulate osteopathic physicians. Existing law requires the board to prepare an analysis and submit a report, containing specified information, to the Joint Committee on Boards, Commissions, and Consumer Protection on or before September 1, 2004.

This bill would require the board to prepare the analysis and submit the report to the Joint Committee on Boards, Commissions, and Consumer Protection on or before September 1, 2010.

(2) Existing law provides for the licensure and regulation of the practice of dentistry by the Dental Board of California, and authorizes the board to appoint an executive officer. Existing law also establishes the Committee on Dental Auxiliaries within the jurisdiction of the board. The provisions establishing the board, authorizing the board to appoint an executive officer, and establishing the committee are inoperative as of July 1, 2006, and are repealed as of January 1, 2007.

This bill would instead make these provisions inoperative and repealed on July 1, 2008, and January 1, 2009, respectively.

(3) The Acupuncture License Act provides for licensing and regulation of acupuncturists by the Acupuncture Board, which consists of 9 members. Under existing law, the provisions governing the board and its executive director become inoperative on July 1, 2006, and are repealed on January 1, 2007.

This bill would provide for repeal of the board on January 1, 2006. The bill would create a new board of 7 members with a revised membership. The bill would authorize an appointing power to appoint a member to the new board who was a member of the prior board. The provisions governing the new board and its executive director would become inoperative on July 1, 2008, and would be repealed on January 1, 2009.

Ch. 660 (SB 316) Margett State agencies: voter registration information.

Existing federal law, the National Voter Registration Act of 1993, provides for state departments of motor vehicles to make available voter registration information and materials to applicants for driver's licenses and other vehicular documents.

This bill would require the Department of Motor Vehicles, on and after July 1, 2006, to include in any document mailed by the department offering a person the opportunity to register to vote pursuant to the National Voter Registration Act of 1993 a notice informing prospective voters that if they have not received voter registration information within 30 days of requesting it, they should contact their local elections office or the office of the Secretary of State.

This bill would also, on and after July 1, 2007, require other state agencies to include a similar notice in any document mailed by a state agency offering a person the opportunity to register to vote pursuant to that act.

Ch. 661 (SB 525) Torlakson State teachers' retirement: benefits.

(1) The State Teachers' Retirement Law establishes procedures for the refund of certain contributions and credits, and for the payment of a retirement allowance, and requires that these refunds begin not later than April 1 of the calendar year following the later of the calendar year that the member becomes 70 1/2 years of age or the calendar year that the member terminates employment, as specified.

This bill would instead require a refund begin not later than April 1 of the calendar year in which the member attains the age at which the Internal Revenue Code requires a distribution of benefits for the calendar year the member becomes 70 1/2 years of age, or the calendar year that the member terminates employment.

(2) The State Teachers' Retirement Law establishes the Defined Benefit Supplement Program to provide additional benefits to members of the State Teachers' Retirement System. A member is entitled to a termination benefit under the Defined Benefit Supplement Program upon ending all employment to perform creditable service for a reason other than retirement, disability, or death. The termination benefit is payable after one calendar year has elapsed from the time the member terminated employment, except if the member performs creditable service within one year of the prior termination, then the benefit is not payable.

This bill would reduce the time period within which the termination benefit is payable, and the time period within which it may not be paid if creditable service is performed, from one year to 6 months. The bill would also specify that a member who is reemployed and again performs creditable service may not receive a subsequent termination benefit, as described above, if less than 5 years have passed since the last termination benefit was distributed. The bill would provide that the application for the termination benefit is canceled if the member performs creditable service within 6 months following the date of termination of employment. The bill would provide exceptions to the provisions described above for members who have reached the age at which the Internal Revenue Code requires a distribution of benefits.

(3) Existing law creates the State Teachers' Retirement Cash Balance Benefit Program to provide a retirement program for people providing less than 50% creditable service. The program provides for a termination benefit, which is payable after one year has elapsed from the time the participant terminated employment, except if the participant performs creditable service within one year of the prior termination, then the benefit is not payable. Existing law requires this benefit, and others provided under the program, to be distributed within certain periods of time.

This bill would reduce the time period within which the termination benefit is payable, and the time period within which it may not be paid if creditable service is performed, from one year to 6 months. The bill would provide exceptions to the provisions described above for members who have reached the age at which the Internal Revenue Code requires a distribution of benefits.

Ch. 662 (SB 580) Escutia Public Utilities Commission: Low-Income Oversight Board and California Alternate Rates for Energy program.

Under existing law, the Public Utilities Commission has regulatory authority over public utilities and can establish its own procedures, subject to statutory limitations or directions and constitutional requirements of due process. Existing law establishes a Low-Income Oversight Board to advise the commission on low-income electric and gas customer issues and to serve as a liaison for the commission to low-income ratepayers and representatives. Existing law specifies the membership of the board.

This bill would expand the duties of the board to include advising the commission on low-income water customer issues and to serve as a liaison for the commission to those low-income ratepayers and representatives. The bill would increase the membership of the board by 2 persons selected by the commission, the first with expertise in the low-income community and who is not affiliated with any state agency or utility group, and the second who is a representative of a water corporation.

Existing law requires the commission to establish a program of assistance to low-income electric and gas customers, referred to as the California Alternate Rates for Energy (CARE) program. Existing law requires that each local publicly owned electric utility, as defined, ensure that low-income families within the utility's service territory have access to affordable electricity, that the current level of assistance reflects the level of need, that the utility consider increasing the level of discount or raising the eligibility level for any existing rate assistance program to be reflective of customer need, and that the utility streamline enrollment for low-income programs by collaborating with other electric or gas providers within the same service territory.

This bill would expand the duties of the Low-Income Oversight Board to include assisting the commission in complying with certain requirements of the CARE program. The bill would require the Secretary of the California Health and Human Services Agency to evaluate, on or before April 1, 2006, how the use of programs and databases, as specified, may be optimized to facilitate the automatic enrollment of eligible customers into the CARE program.

Ch. 663 (SB 670) Dunn Mexican repatriation program of the 1930s.

This bill would enact the “Apology Act for the 1930s Mexican Repatriation Program” and make findings and declarations regarding the unconstitutional removal and coerced emigration of United States citizens and legal residents of Mexican descent, between the years 1929 and 1944, to Mexico from the United States during the 1930s “Mexican Repatriation” Program.

The bill would express the apology of the State of California to those individuals who were illegally deported and coerced into emigrating to Mexico and would require that a plaque to commemorate those individuals be installed and maintained by the Department of Parks and Recreation in an appropriate public place in Los Angeles.

Ch. 664 (SB 674) Perata Oakland Army Base Public Trust Exchange Act.

Through an economic development conveyance, the Oakland Base Reuse Authority acquired a portion of the former Oakland Army Base. The former Oakland Army Base includes lands that, prior to federal ownership, had been granted to the City of Oakland, as public trust lands. Existing law authorizes the City of Oakland to use and operate the granted lands in conformance with those grants and the public trust.

This bill would grant the state’s sovereign interest in certain trust lands within the former Oakland Army Base, and in other lands comprising the Oakland Army Base redevelopment property, to the Oakland Base Reuse Authority. This bill would also approve an exchange of public trust lands within the Oakland Army Base redevelopment property, whereby certain trust lands that meet specified criteria and are not now useful for public trust purposes will be freed from the public trust and may be conveyed into private ownership, and certain other lands that are not now public trust lands and that are useful for public trust purposes will be made subject to the public trust.

The bill would declare that, due to the unique circumstances pertaining to the trust lands described in the bill and relating to the transfer of the Oakland Army Base out of federal ownership, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 665 (SB 689) Speier Vehicles: organ and tissue donors: registry.

Existing law authorizes the creation of a nonprofit entity designated as the California Organ and Tissue Donor Registrar, which is required to establish and maintain the California Organ and Tissue Donor Registry.

Existing law requires the Department of Motor Vehicles, upon issuance of a new driver’s license or a renewal of a driver’s license or the issuance of an identification card, to provide information on organ and tissue donation, including a standardized form to be filled out by an individual who desires to enroll in the California Organ and Tissue Donor Registry with instructions for mailing the completed form to the California Organ and Tissue Donor Registrar, and including a donor dot that may be affixed to the new driver’s license or identification card.

This bill, instead, would require the department to collect donor designation information on all applications for an original or renewal driver’s license or identification card.

The bill would require the department to electronically transmit donor designation information on a weekly basis to Donate Life California, a nonprofit organization, that is designated as the California Organ and Tissue Donor Registrar.

The bill would require the department to print the word “DONOR” or another appropriate designation on the face of a driver’s license or identification card issued to certain persons registered as donors.

The bill would authorize a person who applies for an original or renewal driver’s license, or identification card to designate a voluntary contribution of \$2 for the purpose of promoting and supporting organ and tissue donation. The bill would require this

contribution to be collected by the department, and treated as a voluntary contribution to Donate Life California and not as a fee for issuance of a driver's license or identification card.

The bill would create the Donate Life California Trust Subaccount in the Motor Vehicle Account in the State Transportation Fund. The bill would require the department to deposit the remaining moneys contributed, after deduction of specified administrative costs, in the Donate Life California Trust Subaccount, which would be continuously appropriated to the Controller for allocation to Donate Life California for the purpose of increasing participation in organ donation programs.

The bill would authorize a person between the age of 16 and 18 to designate himself or herself as an organ and tissue donor, subject to that person's legal guardian making the final decision regarding the donation.

The bill would become operative on July 1, 2006.

Ch. 666 (SB 743) Chesbro Solid waste rigid plastic packaging containers: recycling rates: households.

(1) Existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, requires every rigid plastic packaging container, as defined, sold or offered for sale in this state, to generally meet one of specified criteria, including having a specified recycling rate of 45%, if it is a product-associated rigid plastic packaging container, as demonstrated to the board by the product maker, manufacturer, or other entity. Existing law defines the term "recycling rate" for this purpose as including one of 2 specified rates. Existing law defines "manufacturer" to mean the producer or generator of a product that is sold or offered for sale in the state and is stored inside of a rigid plastic container. The term "curbside collection program" is also defined for purposes of those provisions and the board is required to grant a waiver from those requirements if it finds that less than 60% of single-family homes in the state have curbside collection programs that include beverage container recycling.

This bill would make a conforming change in the definition of the term "curbside collection program" for purposes of these provisions.

This bill would revise the definition of "recycling rate" to additionally include the proportion of a single resin type, as specified, of a rigid plastic packaging container that is recycled in a single calendar year, notwithstanding the exemption of certain of those containers from the requirement to meet specified criteria.

This bill would modify the criteria for rigid plastic packaging containers to also include a recycling rate of 45% for a single resin type of rigid plastic packaging container, as demonstrated to the board by the product maker, manufacturer, or other entity.

(2) Existing law requires the board to implement procedures for certifying compliance with the plastic packaging container requirements and requires the board, if an entity provides a false or misleading certificate, to refer the provider to the Attorney General for prosecution of fraud.

This bill would provide that a manufacturer is in compliance with those criteria if the manufacturer makes a specified demonstration with regard to the use of postconsumer material by that manufacturer.

The bill would prohibit a container manufacturer, as defined, that sells a rigid plastic packaging container to a manufacturer and who submits a certification to the manufacturer, from providing any false or misleading information. The bill would provide that a container manufacturer, who submits to a manufacturer a certification with false or misleading information, is subject to the same penalties and fines that are imposed upon a manufacturer, thereby imposing a state-mandated local program by creating new crimes.

The bill would provide that a manufacturer is not subject to those penalties and fines as a result of the submittal of false or misleading information by a container manufacturer to the manufacturer with regard to a container sold to that manufacturer.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 667 (SB 833) Bowen Unsolicited advertising faxes.

Existing state law imposes various requirements and prohibitions on different forms of advertising. A violation of the provisions governing advertising is a crime.

This bill would make it unlawful for a person or entity, if located in California or if the recipient is located in California, to use any device to send, or cause any other person or entity to use a device to send, an unsolicited advertisement to a telephone facsimile machine, except as specified. The bill would authorize the recipient of an unsolicited advertising fax to bring an action for a violation of these provisions for injunctive relief, actual damages or statutory damages of \$500 per violation, whichever is greater, or both injunctive relief and damages, and, if the violation was willful, would authorize a court to award treble damages. The bill would also make it unlawful for a person or entity, if located in California or the recipient is located in California, to initiate a facsimile communication using a machine that does not provide specified identification, or to use a device to send a message via a telephone facsimile machine unless the message is clearly marked with certain identifying information.

Because a violation of the bill would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 668 (SB 861) Speier Animals: dogs: spay, neuter, and breeding programs.

Existing law sets forth provisions relating to veterinary public health and safety, as specified. Existing law also provides for or regulates spay, neuter, and breeding programs for animals, as specified.

This bill would authorize local governments to enact dog breed-specific ordinances pertaining only to mandatory spay or neuter programs and breeding requirements, provided that no specific dog breed, or mixed dog breed, shall be declared potentially dangerous or vicious under those ordinances. This bill would require those jurisdictions that do implement such programs to provide quarterly statistical reports relating to dog bites to the State Public Health Veterinarian, as specified. The bill would make conforming changes to related provisions.

Ch. 669 (SB 914) Kehoe Animal cruelty.

Existing law makes it a crime to engage in animal cruelty, as specified.

This bill would provide that, except as otherwise authorized under any other provision of law, it shall be an infraction, punishable by a fine not to exceed \$250, or a misdemeanor, for any person, other than an organization that provides services as a public animal sheltering agency or specified pet dealers or rescue groups, to sell one or more dogs under 8 weeks of age, unless, prior to any physical transfer of the dog or dogs from the seller to the purchaser, the dog or dogs are approved for sale, as evidenced by written documentation from a licensed veterinarian. The bill would provide that the sale of a dog or dogs shall not be considered complete, and thereby subject to the requirements and penalties of the bill, unless and until the seller physically transfers the dog or dogs to the purchaser; and that, with respect to the sale of 2 or more dogs in violation of this provision, each dog unlawfully sold shall represent a separate offense. By creating a new crime, this bill would impose a state-mandated local program upon local governments.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 670 (SB 922) Ducheny Public records: California Native American places: archaeological information.

(1) The California Public Records Act requires state and local agencies to make public records available upon receipt of a request that reasonably describes an identifiable record not otherwise exempt from disclosure by express provisions of law, and upon the payment of fees to cover the associated costs. The act expressly exempts records of specified Native American graves, cemeteries, and sacred places from that disclosure requirement.

This bill would additionally include, in that express exemption from disclosure under those provisions, records maintained by, or in the possession of, another state agency or a local agency.

(2) Existing law exempts, under the act, records that relate to archaeological site information maintained by the Department of Parks and Recreation, the State Historical Resources Commission, and the State Lands Commission.

This bill would include reports maintained by those entities in that exemption, and would include the Native American Heritage Commission and other state and local agencies within the listing of public agencies that are included in that exemption.

(3) The bill would also make related cross-reference change.

(4) Existing constitutional provisions require that a statute that limits the right of access to the meetings of public bodies or the writings of public officials and agencies be adopted with findings demonstrating the interest protected by the limitation and the need for protecting that interest.

This bill would make legislative findings to that effect.

(5) This bill would incorporate additional changes in Section 6254 of the Government Code, proposed by AB 1495, to become operative only if AB 1495 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 671 (SB 941) Alquist Emergency medical services fund.

Existing law, the Emergency Medical Services System and Prehospital Emergency Medical Care Personnel Act (EMS Act), establishes the Emergency Medical Services Authority within the California Health and Human Services Agency to provide statewide coordination of local county EMS programs.

Existing law authorizes a county to establish an emergency medical services fund for reimbursement of EMS related costs, and provides that the costs of administering the fund shall be reimbursed up to 10% of the amount of the fund.

This bill would provide, instead, that the costs of administering the fund shall be based on the actual administrative costs, not to exceed 10% of the amount of the fund.

Existing law requires each county to establish within its emergency medical services fund a Physician Services Account, into which each county is required to deposit funds appropriated by the Legislature for purposes of the account. Existing law provides that the costs of administering the account shall be reimbursed by the account, up to 10% of the amount of the account.

This bill would provide instead, that the costs of administering the account, either by the county or the department through the emergency services contract-back program be reimbursed by the account based on actual administrative costs not to exceed 10% of the amount of the account.

Existing law provides that the County Emergency Medical Services Fund and Physician Services Account shall be used to reimburse physicians and surgeons for losses incurred for services provided to patients that meet 2 criteria.

This bill would add to that criteria that the patient does not have health insurance coverage for emergency services and care. The bill would also allow physicians to be eligible to receive payments from the fund for patient care services provided by, or in conjunction with, a properly credentialed nurse practitioner or physician's assistant for care rendered as provided under the bill.

Existing law authorizes the reimbursement of physicians and surgeons from the County Emergency Medical Services Fund for up to 50% of the amount claimed and requires proportional reimbursement to physicians and surgeons of all funds remaining at the end of the fiscal year in excess of certain reserves. Existing law prohibits a physician from being reimbursed from the Physician Services Account for more than 50% of the losses submitted to the administering agency.

This bill would revise reimbursement from the Physician Services Account to delete the 50% maximum, and to require proportional distribution to physicians and surgeons, as to all funds remaining at the end of the fiscal year, not to exceed the total claimed.

This bill would require each county establishing a Physicians Services Account in the county emergency medical services fund to annually report on April 15 to the Legislature on the implementation and status of the account.

Existing law authorizes a county to adopt a fee schedule to establish a uniform, reasonable, level of reimbursement from the physician services account for reimbursable services.

This bill, instead, would require the county to adopt the fee schedule.

Existing law requires the administering agency to establish procedures and time schedules for submission and processing of reimbursement claims from the Physicians Services Account submitted by physicians in accordance with these provisions and requires that schedules for payment provide for periodic disbursement of the funds to physicians, at least annually.

This bill would require periodic disbursement of the fund at least quarterly.

Existing law authorizes payments from the emergency medical services fund for unreimbursed emergency medical services performed on the calendar day on which the services are first performed and the immediately following 2 calendar days.

Under existing law, changes would become operative January 1, 2007, including, but not limited to, a prohibition against payments for services provided beyond a 48-hour period of continuous service to the patient.

This bill will repeal the January 1, 2007, changes.

This bill would also provide for an exception from the requirement that payments be limited to emergency medical services provided on the calendar day on which emergency medical services are first provided and on the immediately following 2 calendar days, for services provided to a patient transferred to a second facility providing a higher level of care for the treatment of the emergency condition.

This bill would authorize an administering agency to establish an EMS Fund advisory committee and would, if a specified condition is met, authorize the agency to adopt a special fee schedule to reimburse for services rendered to uninsured trauma patients, from an account containing only up to 15% of the county's EMS Fund share of tobacco tax revenues. The bill would also authorize reimbursement beyond the 2 calendar days after initial treatment.

This bill would incorporate additional changes in Section 1797.98a of the Health and Safety Code, proposed by SB 57, to be operative only if SB 57 and this bill are both chaptered and become operative effective January 1, 2006, and this bill is chaptered last.

Ch. 672 (SB 1028) Bowen Hunting: Internet hunting.

(1) Existing law sets forth the methods and conditions of taking any bird or mammal and specifies that it is unlawful to take birds or mammals with firearms or with bow and arrow

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

when intoxicated. Existing law also requires each person that takes birds or mammals in California to apply for, and be granted, a hunting license.

This bill would make it unlawful to shoot, shoot at, or kill any bird or mammal with any gun or other device accessed via an Internet connection in this state. The bill would make it further unlawful for any person, firm, corporation, partnership, limited liability company, association, or other business entity to own or operate a shooting range, site, or gallery located in the state for purposes of the online shooting or spearing of any bird or mammal and for any person, firm, corporation, partnership, limited liability company, association, or other business entity to create, maintain, or utilize an Internet Web site, or a service or business via any other means, from any location within the state for purposes of the online shooting or spearing of any bird or mammal. This bill would make it unlawful to possess or confine any bird or mammal in furtherance of any activity prohibited by the bill, and would also make it unlawful to import or export any bird or mammal, or any part thereof, that is killed by any device accessed via an Internet connection, as provided.

This bill would specify that any bird or mammal possessed in violation of this bill would be subject to seizure by the Department of Fish and Game.

This bill would make legislative findings and declarations relating to computer-assisted remote hunting.

(2) Existing law generally provides that a violation of the fish and game laws is a crime.

This bill would impose a state-mandated local program by creating new crimes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 673 (SB 37) Speier Prohibited substances.

Existing law sets forth the rights and responsibilities of pupils in public schools. Existing law further requires certain school employees to comply with various educational requirements.

Existing law expresses legislative findings and declarations regarding the need for education and training for interscholastic athletic coaches. Existing law expresses the intent of the Legislature to establish a California High School Coaching Education and Training Program, that would emphasize specified components, including sport physiology, which is described as principles of training, fitness for sport, development of a training program, and nutrition for athletes, to be administered by local school districts.

This bill would, in addition, describe the component of sport physiology as instruction on the harmful effects associated with the use of steroids and performance-enhancing dietary supplements by adolescents. The bill would require each high school sports coach, as defined, to complete a coaching education program developed by his or her school district or by the California Interscholastic Federation that meets those training requirements. The bill would make that requirement operative on December 31, 2008.

The bill would prohibit specified dietary supplements from being used by a pupil participating in interscholastic high school sports 60 days after specified information is posted on the State Department of Education's Internet Web site, with certain requirements. The bill would require the California Interscholastic Federation to amend its constitution and bylaws to require that school districts prohibit a pupil from participating in high school sports on and after July 1, 2006, unless that pupil signs a pledge not to use anabolic steroids without a prescription from a licensed health care practitioner or a prohibited dietary supplement and the parent or guardian of that pupil signs a notification form regarding those restrictions.

The bill would prohibit the marketing, sale, or distribution, as specified, of prohibited dietary substances on a schoolsite or at a school-related event.

The bill would establish the California Coaching Education Fund and permit the State Treasurer to accept private donations that may be expended, upon appropriation by the Legislature, for purposes of training coaches, as specified in the bill.

Ch. 674 (SB 231) Figueroa Healing arts: Medical Board of California.

(1) Existing law provides for the licensure and regulation of various healing arts practitioners by professional boards within the Department of Consumer Affairs. Existing law requires that specified settlements and any arbitration awards of malpractice claims or in malpractice actions against a licensee be reported to the appropriate licensing board by the licensee or claimant, or their counsel. Under existing law, a failure to comply with this requirement is a crime punishable by specified fines.

This bill would also require any judgment in a malpractice action against a licensee to be reported to the appropriate licensing board by the licensee or the claimant, or their counsel, and would make a failure to comply with this requirement a crime. Because the bill would create a new crime, it would impose a state-mandated local program. The bill would require, to the extent funding is available, the Little Hoover Commission to study the laws requiring public disclosure with regard to the public protection mandate of the Medical Board of California, and complete the study by July 1, 2008.

(2) Existing law authorizes an administrative law judge to order a licentiate in a disciplinary proceeding to pay, upon request of the licensing authority, the reasonable costs of investigating and prosecuting the case.

This bill would prohibit the Medical Board of California from requesting and obtaining reimbursement for these costs.

(3) The Medical Practice Act provides for the licensure and regulation of physicians and surgeons by the Medical Board of California. Under existing law, the provisions creating the board and providing for the appointment of an executive director become inoperative on July 1, 2006, and are repealed on January 1, 2007.

This bill would extend these provisions to July 1, 2010, and January 1, 2011, respectively. The bill would require the Joint Committee on Boards, Commissions, and Consumer Protection to examine the medical board's composition and its licensure fees and report its findings to the Governor and the Legislature no later than July 1, 2008.

(4) Existing law requires a physician and surgeon to report certain matters to the medical board in writing within 30 days, including the conviction of any felony, and including any verdict of guilty, or plea of guilty or no contest. A failure to make a report is a crime.

This bill would also require a physician and surgeon to report his or her conviction of a misdemeanor that is substantially related to the qualifications, functions, or duties of a physician and surgeon. Because the bill would expand the scope of an existing crime, the bill would impose a state-mandated local program.

(5) Existing law requires the medical board to post certain information regarding its licensees on the Internet, including whether a licensee has been subject to discipline by the board of another state or jurisdiction.

This bill would also require the posting of prior disciplinary action taken by the board. The bill would additionally require the posting of any misdemeanor conviction that is substantially related to the qualifications, functions, or duties of a physician and surgeon upon the enactment of legislation defining those convictions and would direct the medical board, in consultation with specified entities, to develop a proposal for the legislation and submit it to the Legislature.

(6) Existing law requires the medical board to contract with the Institute for Medical Quality for a comprehensive study of the existing peer review process for discipline of physicians and surgeons. Under these provisions, a written report was to be submitted to the medical board and the Legislature by November 1, 2003.

This bill instead would require the medical board to contract with an independent entity for this comprehensive study, to be completed by July 31, 2007, and would state that the completion of the study is to be among the highest priorities of the medical board.

(7) Existing law generally requires complaints received by the medical board that involve quality of care to be reviewed by one or more medical experts and to meet other criteria before they are referred to a field office of the board for investigation.

This bill would exempt new complaints relating to a physician and surgeon who is the subject of a pending accusation or investigation, or who is on probation, from these referral requirements.

(8) Existing law requires a licensee of the medical board to produce documents requested by the Attorney General or investigators of the board within 15 days.

This bill would authorize the board to impose fines for noncompliance with these requirements.

(9) Existing law provides for the medical board to oversee diversion programs for physicians and surgeons with alcohol and drug abuse problems.

This bill would require the program's manager to report specified financial information to the medical board quarterly and would make the diversion program provisions inoperative on July 1, 2008, and repeal them on January 1, 2009, unless the Legislature deletes or extends those dates. The bill would state the Legislature's intent that the Bureau of State Audits complete an audit of the diversion program by June 30, 2007.

(10) Existing law provides for the medical board to fix, pursuant to a specified formula, the amount of the initial and biennial licensure fees for physicians and surgeons at a sum not to exceed \$610. Fees are deposited into the Contingent Fund of the Medical Board, which is continuously appropriated to the board. Under existing law, the medical board is required to report to the Legislature when it proposes or approves a fee increase.

This bill would delete those reporting provisions and would require the Joint Legislative Audit Committee to select an independent entity by January 1, 2007, to study and report to the Legislature before January 1, 2008, on specified financial matters regarding the medical board. The bill would delete the formula provisions that the medical board is required to apply in fixing licensure fees and would increase the initial licensure fee and the biennial renewal fee to \$790, and would direct the adjustment of those fees for discontinuance of the diversion program, the loss of enforcement and prosecution cost reimbursements, and changes to the disciplinary proceedings. The bill would also delete certain provisions requiring the board to charge various examination fees. By providing for an increase in licensure fees deposited into a continuously appropriated fund, the bill would make an appropriation.

(11) Existing law provides that an action based upon the professional negligence of a physician and surgeon or doctor of podiatric medicine may not be commenced unless a specified 90-day notice is also sent to the medical board or the Board of Podiatric Medicine at the same time it is sent to the defendant. Existing law requires each board, as applicable, to maintain the notice as a confidential part of a potential investigation file.

This bill would repeal this provision.

(12) Existing law creates within the Office of Administrative Hearings a Medical Quality Hearing Panel consisting of administrative law judges with medical training, to hear administrative law matters involving physicians and surgeons. Existing law requires decisions of this panel and associated court decisions to be published in a quarterly "Medical Discipline Report," subject to funding being appropriated by the Legislature.

This bill would delete the requirement for publishing this report. The bill would also require in matters brought by the medical board, that the parties exchange written information concerning expert witness testimony before introducing that evidence and would authorize the Office of Administrative Hearings to adopt regulations governing the exchange of this information.

(13) Existing law, under the Administrative Procedure Act, provides for administrative hearings involving certain state agencies including the medical board to be held in certain locations throughout the state based upon where a transaction occurred or whether the respondent resides with a certain district of the Court of Appeal. Under that act, an administrative hearing decision is subject to judicial review by a writ of mandate, and specified costs are assessed for preparation of the record.

This bill would require, subject to specified exceptions, that the hearing be held at the hearing facility maintained by the Office of Administrative Hearings that is closest to the location where the transaction occurred or the respondent resides. The bill would revise the process for assessing the cost to prepare the record of the administrative hearing for judicial review.

(14) Existing law creates the Health Quality Enforcement Section within the Department of Justice with the primary responsibility of prosecuting proceedings against licensees and applicants within the jurisdiction of the medical board and various other boards.

This bill would also make investigation of licensees and applicants a primary responsibility of the Health Quality Enforcement Section. The bill would require that attorneys staff the intake unit of specified regulatory boards to evaluate and screen complaints and develop uniform standards for their processing. The bill would make these provisions inoperative on July 1, 2008, and would repeal them on January 1, 2009, unless a later enacted statute deletes or extends those dates. The bill would also, effective January 1, 2006, simultaneously assign a complaint received by the medical board, to an investigator and a deputy attorney general in the Health Quality Enforcement Section. The bill would make this provision inoperative on July 1, 2008, and would repeal it on January 1, 2009, unless a later enacted statute deletes or extends those dates. The bill would require the medical board, in consultation with specified agencies, to report, by July 1, 2007, to the Governor and the Legislature on this prosecution model.

(15) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 675 (SB 232) Figueroa Boards and commissions.

Existing law provides for the licensure and regulation of various professions, as applicable, by the Board of Podiatric Medicine, the Speech-Language Pathology and Audiology Board, the Respiratory Care Board of California, and the Physician Assistant Committee of the Medical Board of California, and authorizes these entities, other than the Board of Podiatric Medicine, to employ personnel, including an executive officer. Under existing law, the provisions creating these entities and authorizing the Respiratory Care Board of California to employ these personnel become inoperative on July 1, 2007, and are repealed on January 1, 2008.

This bill would extend these provisions by one year to July 1, 2008, and January 1, 2009, respectively, and would make the provisions that authorize employment of personnel by the Speech-Language Pathology and Audiology Board and the Physician Assistant Committee inoperative on July 1, 2008, and would repeal them on January 1, 2009.

Existing law, until January 1, 2007, recognizes certain activities of a specified interior design certification organization relative to interior designers. Existing law creates the Contractors' State License Board, the California Heritage Preservation Commission, the Commission for Economic Development, the Boating and Waterways Commission, and the Off-Highway Motor Vehicle Recreation Commission and authorizes the Contractors' State License Board to appoint a registrar of contractors. Under existing law, the provisions creating these commissions become inoperative on July 1, 2006, and are repealed on January 1, 2007, and the provisions creating the board and authorizing the appointment of a registrar of contractors become inoperative on July 1, 2007, and are repealed on January 1, 2008.

This bill would extend the interior design provisions until January 1, 2008. The bill would delete the inoperative and repeal provisions relating to the commissions, other than the Off-Highway Motor Vehicle Recreation Commission, and would extend by one year the inoperative and repeal dates of the provisions creating that commission and the provisions creating the Contractors' State License Board and authorizing its appointment of a registrar of contractors.

Ch. 676 (SB 755) Poochigian Pupils: educational enrichment: California State Summer School for Mathematics and Science: pupil assessment.

(1) Existing law establishes the California State Summer School for Mathematics and Science to provide academic development to enable pupils with demonstrated academic excellence in mathematics and science to receive intensive educational enrichment in these subjects and an opportunity for pupils who wish to study mathematics or science or to pursue careers that require a high degree of skills in and knowledge of mathematics and science. Existing law requests the Regents of the University of California to operate the summer school.

Existing law authorizes the regents to set a tuition fee within a range that corresponds to actual program costs, up to but not exceeding \$1,000 in the year 2000, and to increase this fee by an amount of up to 5% each year thereafter.

This bill would instead authorize the regents to set a tuition fee for the summer school that does not exceed \$2,200 in the year 2006, and to increase this fee by an amount of up to 5% in 2007. As of January 1, 2008, the bill would return these provisions to existing law.

(2) Existing law, the Standardized Testing and Reporting (STAR) Program, requires each school district, charter school, and county office of education to administer a designated achievement test to each of its pupils in grades 3 and 7 and a standards-based achievement test to each of its pupils in grades 2 to 11, inclusive, until July 1, 2007, and to each of its pupils in grades 3 to 11, inclusive, after July 1, 2007.

Existing law requires, until July 1, 2007, a pupil of limited English proficiency who is enrolled in any of grades 2 to 11, inclusive, to take a test in his or her primary language if a test is available and if fewer than 12 months have elapsed after his or her initial enrollment in any public or nonpublic school.

This bill would instead require a pupil identified as limited English proficient pursuant to a specified test who is enrolled in any of grades 2 to 11, inclusive, and who either receives instruction in his or her primary language or has been enrolled in a school in the United States for less than 12 months, to take a test in his or her primary language if a test is available. To the extent this bill would impose additional duties on school districts, this bill would create a state-mandated local program.

This bill would require the Superintendent of Public Instruction, with the approval of the State Board of Education, to annually release to the public at least 25% of test items from the standards-based achievement test from the test administered in the previous year.

(3) This bill would make other technical, nonsubstantive changes to existing law, and would conform certain provisions of existing law that are effective July 1, 2007, to those that are operative until that date.

(4) This bill would reappropriate the sum of \$2,285,000 from the Proposition 98 Reversion Account to the State Department of Education to cover costs incurred during the 2004-05 fiscal year to maintain and score the direct writing assessment for grades 4 and 7 under the STAR Program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

- (6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 677 (SB 512) Committee on Education Education omnibus.

(1) Existing law requires, by September 15 of each year, a county superintendent of schools to prepare and file with the Superintendent of Public Instruction a statement of all receipts and expenditures of the county office of education for the preceding fiscal year.

This bill would instead require a county superintendent of schools to prepare and file that statement by October 15 of each year.

(2) Existing law requires, by September 30 of each year, a county board of education to adopt a resolution to identify the estimated appropriations limit for the county office of education for the current fiscal year and the actual appropriations limit for the county office of education for the preceding fiscal year.

This bill would instead require a county board of education to adopt that resolution by October 15 of each year.

(3) Existing law establishes the 21st Century High School After School Safety and Enrichment for Teens program to create incentives for establishing locally driven after school enrichment programs for high school pupils in the hours after the regular schoolday. Existing law requires a high school after school program established under the program to comply with locally determined requirements related to hours and days of program operation through the 2004-05 fiscal year and, commencing with the 2005-06 fiscal year and thereafter, to comply with the requirements of the State Department of Education related to the hours and days of program operation.

This bill would instead require a high school after school program to comply with those locally determined requirements through the 2005-06 fiscal year and with those requirements of the department commencing with the 2006-07 fiscal year and thereafter.

(4) Existing law establishes the School Facilities Needs Assessment Grant Program, administered by the State Allocation Board, for the purpose of awarding grants to school districts on behalf of schoolsites ranked in deciles 1 to 3, inclusive, on the Academic Performance Index (API), as specified, to conduct a one-time comprehensive assessment of school facilities needs. Under the program, the State Department of Education is required to estimate an API score for any school meeting certain criteria.

This bill would revise the type of schools for which the department is required to estimate an API score. The bill would also exclude certain schools from those schools ranked in deciles 1 to 3, inclusive, on the 2003 base API.

(5) Existing law requires the Superintendent of Public Instruction and the Director of Finance to jointly establish a plan for repayment of school funds that a local educational agency received on the basis of average daily attendance that did not comply with statutory or regulatory requirements that were conditions of apportionments, as determined by an audit or review. Existing law establishes the Education Audit Appeals Panel and requires the panel to hear an appeal of a finding of a final audit report resulting from an audit or review. Existing law authorizes the executive officer of the panel to order or propose a reduction of repayment, under specified circumstances.

This bill would, in addition, require the Superintendent and the Director of Finance to jointly establish a plan for repayment of a penalty arising from an audit exception. The bill would also authorize the executive officer of the panel to waive repayment, or payment of a penalty, under specified circumstances.

(6) Existing law establishes maximum ratios of administrative employees to teachers, but exempts from those ratios a school district that has only one school and one administrator.

This bill would instead exempt from those ratios a school district that has one or fewer administrators.

(7) Existing law establishes the school safety consolidated competitive grant, from which grant funds are distributed to school districts in order to carry out one or more purposes for which various specified programs were established, including the development of safety

plans for new schools. Existing law also makes a school district and a county office of education responsible for the overall development of comprehensive school safety plans.

This bill would declare that funds distributed from the school safety consolidated competitive grant to a school district in order to develop safety plans for new schools are revenues that offset any reimbursable mandate claim for the development of comprehensive school safety plans.

(8) Existing law establishes the professional development block grant, which is composed of funding from, and for, specified existing categorical education programs. Existing law authorizes a school district to expend block grant funds if the school district provides each teacher of kindergarten or any of grades 1 to 6, inclusive, with opportunities to participate in professional development activities, as specified.

This bill would delete that condition.

(9) Existing law requires the governing board of a school district to adopt an annual budget, and requires the county superintendent of schools who has jurisdiction over that school district to approve, conditionally approve, or disapprove the adopted budget.

This bill would require the governing board of a school district whose adopted budget was disapproved, and the county superintendent of schools who has jurisdiction over that school district, to review the disapproval and the recommendations of the county superintendent of schools regarding revision of the budget at a public hearing, as specified. To the extent that this bill would impose additional duties on a school district, the bill would create a state-mandated local program.

(10) Existing law requires, by September 30 of each year, the governing board of a school district to adopt a resolution to identify the estimated appropriations limit for the school district for the current fiscal year and the actual appropriations limit for the school district for the preceding fiscal year.

This bill would instead require the governing board of a school district to adopt that resolution by September 15 of each year.

(11) Existing law requires a county superintendent of schools to make a funding computation for a school district with a necessary small school, and requires that computation be adjusted for excused absences by reducing average daily attendance by the statewide average rate of excused absence reported for high school districts for the 1996-97 fiscal year, as specified.

This bill would instead require that computation be adjusted for excused absences by reducing average daily attendance by the statewide average rate of excused absence reported for elementary school districts for the 1996-97 fiscal year, as specified.

(11.5) Existing law provides that the Coachella Valley Unified School District is eligible to receive apportionments for 2 specified schools within that district, pursuant to the schedule for necessary small high schools, as specified, and provides that if the amount of average daily attendance of either of those schools exceeds 286, that school is no longer entitled to receive apportionments under these provisions. Under existing law, the Department of Transportation is required to notify the Legislature and the Secretary of State upon the completion of a specified project of the Department of Transportation, and provides that after notification has occurred, the provisions described herein remain in effect only until July 1 after the then current fiscal year has elapsed, or until June 30, 2005, whichever is later, and as of the occurrence of the later of these provisions would be repealed.

This bill would, instead, provide that the Coachella Valley Unified School District is eligible to receive apportionments for those 2 schools until June 30, 2006, at the end of which time, the bill would require the department to review the average daily attendance numbers of each school to determine if the Coachella Valley Unified School District remains qualified for necessary small school funding and, if qualified, the Coachella Valley Unified School District would remain eligible to receive apportionments, as specified, on behalf of those schools, in 2-year increments.

(12) Existing law requires the Commission on Teacher Credentialing to adopt regulations to provide a grace period for candidates enrolled in specified credential programs to complete the requirements of the program, without being required to meet new requirements. Under existing law, these provisions will be repealed by their own terms on January 1, 2006.

This bill would delete the repeal provision in existing law.

(13) Existing law requires the Commission on Teacher Credentialing to issue a 2-year nonrenewable preliminary specialist instruction credential, and a 2-year services credential with a specialization in pupil personnel services, solely for the purpose of providing specified instruction and services to deaf or hearing-impaired pupils, to a prelingual deaf candidate, upon the satisfaction of specified conditions and requirements, including medical or other appropriate professional verifications.

This bill would, upon the request of a school district, county office of education, or state special school, require the Commission on Teacher Credentialing to determine specific requirements for, and issue, a one-year specialist instruction emergency permit, solely for the purpose of instructing deaf or hearing-impaired pupils, to a prelingual deaf candidate, upon medical or other appropriate professional verifications.

(14) Existing law requires a school district to evaluate and assess the performance of a certificated employee with permanent status who has been employed at least 10 years with the school district, is highly qualified, as defined, and whose previous evaluation rated the employee as meeting or exceeding standards.

This bill would require a school district to evaluate and assess that certificated employee only if he or she occupies a position that is required to be filled by a highly qualified professional.

(15) Existing law requires the Superintendent to adopt a curriculum framework, as specified, that offers a blueprint for implementation of career and technical education, no later than June 1, 2006.

This bill would postpone the fulfillment of that requirement until April 1, 2007.

(16) Existing law establishes the Advanced Placement Challenge Grant Program under which a high school designs and implements a plan that is intended to result in its pupils having access to at least 4 advanced placement courses in core curriculum areas. Existing law also requires the Superintendent of Public Instruction to administer a grant program for advanced placement professional development under which nonrenewable 4-year grants are awarded on a competitive basis to no more than 550 high schools to establish, train, and support teams of teachers or purchase instructional materials and equipment for those courses.

This bill would delete those provisions.

(17) Existing law authorizes a pupil suspected of needing mental health services to be referred to a community mental health service. Existing law also requires the Superintendent to make specified computations to determine funding for a special education local plan area.

This bill would require the Superintendent to allocate funds appropriated in the annual Budget Act to a special education local plan area, and a proportionate share, as specified, to the Los Angeles County Juvenile Court and Community School/Division of Alternative Education Special Education Local Plan Area, for purposes of those referred pupils. The bill would declare that, due to the unique situation of that special education local plan area, a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution, and the enactment of a special statute is therefore necessary.

(18) Existing law requires, by June 30, 1995, the State Department of Education, in consultation with the Department of Justice and a representative selection of school districts and county offices of education, to currently compile school crime statistics and to develop a standard school crime reporting form for use by all school districts and county offices of education throughout the state. Existing law requires each principal of a school in a school district and each principal or director of a school, program, or camp under the jurisdiction of the county superintendent of schools to report crimes, and requires the superintendent of

any school district to submit various reports, as specified. Existing law requires the State Department of Education to publish and distribute to all school districts and county offices of education an annual school crime reporting update that describes typical errors in school crime reporting procedures, describes effective and efficient methods of monitoring and recording school crime data, and identifies trends in school crime drawn from the annual school crime report submitted to the Legislature.

This bill would repeal those provisions.

(19) Existing law, notwithstanding any provision of law to the contrary and from June 1, 2003, to June 30, 2005, inclusive, permits the Oakland Unified School District to sell property owned by the district and to use the proceeds from the sale to reduce or retire the emergency loan provided to that school district pursuant to existing law. Existing law also provides that, for that period of time, the Oakland Unified School District is ineligible for hardship assistance under the Leroy F. Greene School Facilities Act of 1998.

This bill would extend the time period during which the Oakland Unified School District may sell property as described above, and the period during which the district is ineligible for hardship assistance, to June 30, 2007.

(20) Existing law requires the governing board of a school district maintaining an elementary or secondary school to develop and cause to be implemented for each school in the school district a School Accountability Report Card that includes specified information regarding the academic achievement of the school.

Existing law requires the Commission on State Mandates, on or before December 31, 2005, to reconsider a certain decision it issued relating to state reimbursement for the School Accountability Report Card, and to reconsider its parameters and guidelines for calculating the state reimbursement for certain mandates in light of federal statutes enacted and state court decisions rendered since those mandates were enacted.

This bill would, in addition, require the commission to reconsider a certain other mandate on or before January 31, 2006. The bill would require the commission's decision on its reconsiderations to apply retroactively to January 1, 2005, would require the parameters and guidelines to conform to the decision of the commission on its reconsiderations, and would declare certain related legislative findings.

(21) Existing law establishes the Golden State Scholarshare Trust Act, pursuant to which participants invest money in the Golden State Scholarshare Trust for the benefit of a specific beneficiary for the purposes of the beneficiary's higher education expenses. The act also establishes the Scholarshare Investment Board as the trustee of the Golden State Scholarshare Trust, and vests in the board the purposes, powers, and duties of the trust.

Existing law also establishes the California Memorial Scholarship Program, and provides for its administration by the Scholarshare Investment Board. Under the program, which is funded by the California Memorial Scholarship Fund, scholarships are provided for surviving dependents of California residents killed as a result of injuries sustained during the terrorist attacks of September 11, 2001.

This bill would appropriate \$130,000, as provided, from the California Memorial Scholarship Fund to the Scholarshare Investment Board for the purposes of establishing individual scholarship accounts for eligible participants in the program and for the administrative costs of the board.

(22) This bill would also delete and replace obsolete and incorrect references in existing law, and would clarify various provisions and make various corrections in existing law.

(22.5) This bill would make legislative findings and declarations regarding the need for special legislation.

(23) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(24) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 678 (AB 682) Karnette Professional development block grant: funding.

Existing law establishes the professional development block grant, which is composed of funding from, and for, specified existing categorical education programs. Existing law requires the Superintendent of Public Instruction to apportion block grant funds to a school district based on the number of certificated teachers employed by the school district in the immediately prior fiscal year.

This bill would instead require the Superintendent to apportion block grant funds to a school district in the same relative statewide proportion that the district received for the component programs in the 2003–04 fiscal year.

Under existing law, a school district is authorized to expend funds pursuant to the professional development block grant, as specified, if the school district provides each teacher of kindergarten or any of grades 1 to 6, inclusive, with opportunities to participate in professional development activities in reading language arts/English language development, if the expenditure meets certain specifications and if the professional development is of a specified level of rigor.

This bill would delete these conditions on the expenditure of those funds.

Ch. 679 (SB 143) Runner Statistical districts: Antelope Valley.

Existing law requires any state agency or department that develops and maintains data and statistics on the municipal level to make a separate breakdown of the San Fernando Valley, as described, in the preparation and maintenance of any statistical analyses by city, and authorizes state agencies to require the City of Los Angeles to provide all necessary data.

This bill would similarly require the Employment Development Department and the Department of Finance to make a separate breakdown on the Antelope Valley, as described, in the preparation and maintenance of any statistical analyses and data by county and would encourage the Counties of Kern and Los Angeles to voluntarily provide data to those state agencies.

Ch. 680 (SB 8) Soto Political Reform Act of 1974: local officials: conflicts of interest.

(1) Existing law, the Political Reform Act of 1974, prohibits former members of a state administrative agency and former members of a district board, as defined, from representing any persons before the state administrative agency, or the district board, under specified conditions.

This bill would, commencing July 1, 2006, also prohibit certain local officials who held positions with a local government agency, as defined, for a period of one year after leaving those positions, from acting as agents or attorneys for, or otherwise representing, for compensation, any other person, by appearing before, or communicating with, that local government agency, or any committee, subcommittee, or present member of that local government agency, or any officer or employee of the local government agency, if the appearance or communication is made for the purpose of influencing administrative or legislative action, as specified, or influencing any action or proceeding involving the issuance, amendment, awarding, or revocation of a permit, license, grant, or contract, or the sale or purchase of goods or property. The bill would provide that it does not preclude a local government agency from adopting an ordinance or policy that restricts the appearance of a former local official before that local government agency if that ordinance or policy is more restrictive than the bill provides.

Existing law makes violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of the bill.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The act provides that the Legislature may amend the act to further the act's purposes by a  $2/3$  vote of each house and compliance with specified procedural requirements. This bill would declare that it furthers the purposes of the act.

#### Ch. 681 (SB 48) Scott Ammunition.

Existing law makes it an offense for any person, corporation, or dealer to sell ammunition or reloaded ammunition to a person, knowing that person to be under 18 years of age, or to sell ammunition or reloaded ammunition designed and intended for use in a handgun to a person, knowing that person to be under 21 years of age. Existing law also establishes an affirmative defense to the offense if, among other things, the seller relied upon bona fide evidence of majority and identity, as defined.

This bill would remove the element of "knowing the person to be under the age" of 18 or 21 years of age, as applicable, from the definition of the offense. The bill would require reasonable reliance upon bona fide evidence of majority and identity, as defined, in order for the affirmative defense to apply. The bill would allow ammunition vendors to sell ammunition or reloaded ammunition that can be used in both a rifle and a handgun to persons at least 18 years of age, but less than 21 years of age, if the vendor reasonably believes the ammunition is being acquired for use in a rifle and not a handgun.

By expanding the scope of an existing crime, and narrowing the scope of an affirmative defense to that crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 682 (SB 203) Simitian Transactions and use taxes: County of San Mateo: parks and recreation.

The Transactions and Use Tax Law authorizes counties to levy transactions and use taxes as special taxes in accordance with the procedures and requirements set forth in that law.

This bill would authorize the County of San Mateo to impose a transactions and use tax for specified park and recreation purposes if certain conditions, including  $2/3$  voter approval, are met. This bill would also specify that, if the special tax authorized by the bill is imposed, the imposition would be in lieu of a specified transactions and use tax that the county would otherwise be authorized to impose as a special tax.

This bill makes legislative findings and declarations as to the necessity of a special statute.

#### Ch. 683 (SB 269) Dutton Unsafe handguns.

Existing law exempts certain specified handguns from satisfying the requirements necessary for a handgun not to be classified as unsafe.

This bill would also exempt single-shot pistols with a barrel length of not less than 6 inches and which has an overall length of at least  $10\frac{1}{2}$  inches when the handle, frame or receiver, and barrel are assembled.

#### Ch. 684 (SB 578) Escutia Railroads: safety.

Existing law establishes the safety division of the Public Utilities Commission. The safety division is responsible for inspection, surveillance, and investigation of the rights-of-way,

facilities, equipment, and operations of railroads and public mass transit guideways, and for enforcing state and federal laws, regulations, orders, and directives relating to transportation of persons or commodities, or both, of any nature or description, by rail.

This bill would replace references to the safety division with references to the consumer protection and safety division.

Existing law requires every railroad corporation that transports hazardous materials, as defined, in the state to provide a system map of the state to the Office of Emergency Services and to the commission, showing certain information, to annually submit a copy of its emergency handling guidelines to the office, and to provide specified information in the event of an incident where there is a release or threatened release of a hazardous material. Existing law requires the commission to require every railroad corporation operating in this state to develop, in consultation with, and with the approval of, the Office of Emergency Services, a protocol for rapid communications with that office, the Department of the California Highway Patrol, and designated county public safety agencies in an endangered area if there is a runaway train or any other uncontrolled train movement that threatens public health and safety. Pursuant to existing law, the commission has adopted General Order 161 adopting rules and regulations governing the transportation of hazardous materials by rail. Existing law requires a railroad corporation to promptly notify the office, the department, and the public safety agencies, through a communication to the Warning Center of the office, if there is a runaway train or other uncontrolled train movement threatening public safety, in accordance with the developed communications protocol.

This bill would require a railroad corporation to promptly notify the Office of Emergency Services, the Department of the California Highway Patrol, and designated county public safety agencies in an endangered area, of certain information relative to hazardous materials, and in certain events, of train and track locations, whether or not an accident or spill occurs. The bill would require the consumer protection and safety division of the commission to investigate any incident that results in a notification pursuant to this requirement, and to report its findings concerning the cause or causes to the commission and would require the commission to include the division's report in its annual railroad safety report to the Legislature.

Ch. 685 (SB 730) Speier Organic products: aquaculture products.

The California Organic Products Act of 2003 regulates the production of products sold, labeled, or represented as organic. The act requires producers, handlers, and processors of organic products to pay a registration fee to the State Department of Health Services based on gross sales of products sold as organic in the calendar year that precedes the date of registration. The act makes it a crime for any person to sell, offer for sale, advertise, or label any product in violation of the act.

This bill would prohibit any aquaculture, fish, or seafood product from being labeled or represented as "organic" until formal organic certification standards have been developed and implemented by the United States Department of Agriculture's National Organic Program or by the California Department of Food and Agriculture. Because a violation of this prohibition would be a crime under existing provisions of law, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 686 (SB 796) Figueroa State government operations: accountability.

Existing law generally sets forth the duties and responsibilities of the head of any state agency, department, board, commission, bureau, or program.

This bill would enact the Government Modernization, Efficiency, Accountability, and Transparency Act of 2005, which, among other things, would require, until January 1, 2012, every state agency that issues permits or licenses or accepts applications, proposals, bids, or similar requests, to post on a Web site, no later than January 1, 2007, "customer service" links that contain, among other things, specified information for frequently asked questions, forms and applications, and instructions for filing complaints in electronic format via the Internet.

This bill would require, until January 1, 2012, among other things, that applicable bulletins and notices required pursuant to the Administrative Procedure Act and the Bagley-Keene Open Meeting Act and notices of all public meetings and agendas be posted on the respective government Web sites of these state agencies no later than January 1, 2007. The bill would require, to the extent practicable, that hearings on proposed regulations be televised over the Internet via a Web cast or other technology.

Ch. 687 (SB 826) Maldonado State maintenance areas.

Existing law authorizes, on a project-by-project basis, and in accordance with designated plans, state participation in federal flood control projects and specifies the degree of cooperation to be assumed by the state and local agencies in connection with those projects. Existing law establishes procedures for the assumption of flood control maintenance and operation duties by the Department of Water Resources in connection with the formation of a maintenance area on behalf of a federal flood control project unit. Existing law authorizes, but does not require, the Board of Reclamation or the department, as applicable, to proceed with the formation of a maintenance area if neither the board nor the department has given the nonfederal assurances to the United States that are required for the project.

This bill would require the board or the department, as applicable, to proceed with the formation of a maintenance area, in accordance with specified procedures, with regard to a project for which an application for the formation of a maintenance area has been submitted to the department by a local agency on or before July 1, 2003. The bill would require the local agency, before the department or the board forms a maintenance area, to enter into an indemnification agreement with the department.

Ch. 688 (SB 1081) Ducheny Maywood Riverfront Park grant.

Existing law establishes the River Protection Subaccount in the Watershed Protection Account for the acquisition and restoration of riparian habitat, riverine aquatic habitat, and other lands in close proximity to rivers and streams and for river and stream trail projects.

This bill would appropriate \$2,016,000 from the River Protection Subaccount to the Secretary of the Resources Agency for the Maywood Riverfront Park grant.

Ch. 689 (AB 7) Cogdill Sport fishing: license revenues: fish hatcheries and inland fisheries.

Under existing law, all moneys collected under the provisions of the Fish and Game Code are deposited into the Fish and Game Preservation Fund, unless otherwise provided.

Existing law provides that, of the moneys collected from fees for lifetime sportsman's licenses, lifetime hunting licenses, and lifetime sport fishing licenses, \$20 from the initial issuance of each lifetime license is deposited into the Fish and Game Preservation Fund for the costs of hunting and sport fishing programs, and the rest is deposited in the Lifetime License Trust Account within that fund, the principal of which is to be used for investment, except as specified.

This bill instead would provide that, commencing July 1, 2006, 33 1/3% of the fees derived from the issuance of all sport fishing licenses, with the exception of revenue currently designated for deposit into the Abalone Restoration and Preservation Account be deposited into the Hatchery and Inland Fisheries Fund, which the bill would establish in the State Treasury. The bill would provide that moneys in the fund may be used, upon appropriation by the Legislature, to support programs of the Department of Fish and Game related to the

management, maintenance, and capital improvement of California's fish hatcheries, the Heritage and Wild Trout Program, and enforcement activities related thereto, and to support other activities eligible to be funded from revenue generated by sport fishing license fees.

The bill would require the sport fishing license fees collected and subject to appropriation to be used to attain state fish hatchery production goals relating to the release of trout, as specified, to fund regional permanent positions, seasonal aides, and other activities in the Heritage and Wild Trout Program, and to the department to initiate and manage the restoration of naturally indigenous genetic stocks of trout to their original California source watersheds. The bill would authorize the use of funds in the Hatchery and Inland Fisheries Fund to be used for the purpose of obtaining scientifically valid genetic determinations of California native trout stocks.

The bill would also require the department, by July 1, 2008, and biennially thereafter, to report to the Legislature on the implementation of provisions of the bill, as specified.

#### Ch. 690 (AB 88) Koretz Assault Weapons.

Existing law provides penalties for violations of specified provisions involving assault weapons and .50 BMG rifles, as specified.

This bill would provide that, subject to exceptions, with regard to specified prohibited conduct, there would be a separate and distinct offense for each assault weapon or .50 BMG rifle, as specified.

By changing the definition of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 691 (AB 115) Klehs Taxation: federal conformity.

Under the Personal Income Tax Law and the Corporation Tax Law, various provisions of the federal Internal Revenue Code, as enacted as of a specified date, are referenced in various sections of the Revenue and Taxation Code. Those laws provide that for taxable years beginning on or after January 1, 2002, the specified date of those referenced Internal Revenue Code sections is January 1, 2001, unless otherwise specifically provided.

Existing law requires, for any introduced bill that proposes changes in any of those dates, that the Franchise Tax Board prepare a complete analysis of the bill that describes all changes to state law that will automatically occur by reference to federal law as of the changed date. It further requires the Franchise Tax Board to immediately update and supplement that analysis upon any amendment to the bill, and requires that analysis to be made available to the public and to be submitted to the Legislature for publication in the daily journal of each house of the Legislature.

This bill would change the specified date of those referenced Internal Revenue Code sections to January 1, 2005, for taxable years beginning on or after January 1, 2005, and thereby would make numerous substantive changes to both the Personal Income Tax Law and the Corporation Tax Law with respect to those areas of preexisting conformity that are subject to changes under federal laws enacted after January 1, 2002, and that have not been, or are not being, exempted or modified.

This bill would make certain other changes in federal income tax laws applicable, with specified exceptions and modifications, and make specified supplemental, technical, or clarifying changes for purposes of the Personal Income Tax Law or the Corporation Tax Law, or both, with respect to, among other things, the exclusion from income of qualified foster care payments, health savings accounts, certain definitions, expensing for small businesses, low-income community tax credits, shareholder treatment, eligible shareholders, transfers of suspended losses incident to divorce, repayment of loans for qualifying employer securities,

phaseouts of certain motor fuel excise taxes, suspension of occupational taxes relating to certain alcoholic beverages, information reporting for certain individuals, capital gain treatment applying to outright sales for landowners, expenses of rural letter carriers, expensing of certain reforestation expenditures, depreciation of certain Alaskan pipeline property, interest expense allocation rules, translation of foreign taxes, certain passive foreign investment companies, deductions for certain expenses incurred by corporate taxpayers, Alaska Native Settlement trusts, civil rights tax relief, tax shelter provisions, underpayment penalty, and specified federal acts. This bill would specify various dates on which specified provisions apply, make findings and declarations that certain provisions are declaratory of existing law, specify the intent and operation in the application of provisions conforming to various federal acts, and repeal obsolete provisions.

The Personal Income Tax Law and the Corporation Tax Law authorize various deductions and credits in computing the taxes imposed by those laws.

This bill would, under both laws, for taxable years beginning on or after July 1, 2005, and before January 1, 2018, allow an environmental tax credit in an amount equal to 5¢ for each gallon of ultra low sulfur diesel fuel produced by a small refiner, as defined, at any facility located in this state.

This bill would also, under both laws, for a period beginning on January 1, 2005, and ending on January 1, 2009, authorize a small refiner to elect to treat 75% of qualified capital costs, as defined, as expenses not chargeable to a capital account and expenses that may be deducted, as provided.

This bill would take effect immediately as a tax levy.

#### Ch. 692 (AB 547) Berg Clean needle and syringe exchange projects.

Existing law authorizes pharmacists and physicians to furnish hypodermic needles and syringes without a prescription or permit for human use in the administration of insulin or adrenaline.

Existing law prohibits any public entity, its agents, or employees from being subject to criminal prosecution for distribution of hypodermic needles or syringes to participants in clean needle and syringe exchange projects authorized by the public entity pursuant to a declaration of a local emergency due to the existence of a critical local public health crisis.

This bill would instead authorize cities, counties, or cities and counties to have a clean needle and syringe exchange project that, in consultation with the State Department of Health Services, authorizes this exchange, as recommended by the United States Secretary of Health and Human Services and as part of a network of comprehensive services.

#### Ch. 693 (AB 574) Wolk Recycled concrete.

(1) Under existing law, it is the policy of the state to conserve and protect resources by encouraging the recycling of solid waste and the purchase of those recycled materials, including recycled concrete and rubberized asphalt concrete. Existing law also regulates the recycling and reuse of, among other things, beverage containers, plastic waste, and tires, and the manufacture of fiberglass recycled content.

This bill would authorize the use of recycled concrete materials, as defined, if the user has been fully informed, as defined, that the concrete may contain recycled concrete materials.

(2) Under existing law, in purchasing any materials to be used in paving or paving subbase for use by the Department of Transportation or any other state agency that provides road construction and repair services, the State Procurement Officer is required to make contracts available for those items that use recycled materials, as specified.

This bill would prohibit recycled concrete from being offered, provided, or sold to the Department of Transportation or the Department of General Services for any use unless specifically requested and approved by the department.

(3) This bill would provide that its provisions do not supersede the requirements of the Uniform Building Code or other provisions of law.

Ch. 694 (AB 635) Bermudez Local gambling.

(1) Existing law permits a city, county, or city and county to permit controlled gambling, consistent with state law, if a majority of voters affirmatively approve an ordinance so permitting, as specified. Existing law provides that an amendment of an ordinance permitting an expansion of gambling, within a specified threshold, may occur without voter approval. Any amendment to a city or county ordinance relating to gambling establishments or the Gambling Control Act is required to be submitted to the Division of Gambling Control for review and comment before the ordinance is adopted by the city or county.

This bill would provide that an amendment of an ordinance permitting an increase of 24.99% in the number of gambling tables that may be operated in a gambling establishment in a city, county, or city and county, or 2 tables, whichever is greater, compared to the ordinance in effect on January 1, 1996, may occur without voter approval.

(2) "Expansion of gambling" is defined for the general purpose of those provisions to be an increase of 25% or more in the number of gambling tables that may be operated in a gambling establishment or an increase of 2 tables, whichever is greater.

This bill would change that definition to exclude an increase of 2 tables.

Ch. 695 (AB 721) Nunez Metal plating facilities: pollution prevention fund.

(1) The California Integrated Waste Management Act of 1989 establishes a comprehensive program implemented by the California Integrated Waste Management Board and local agencies to reduce, recycle, and reuse solid waste in an efficient and cost-effective manner.

Existing law creates the Chrome Plating Pollution Prevention Fund in the State Treasury for the purpose of receiving deposits of moneys for expenditure, upon appropriation by the Legislature, by the Business, Transportation and Housing Agency.

This bill would require the Business, Transportation and Housing Agency, in collaboration with the Department of Toxic Substances Control, the State Air Resources Board, the State Water Resources Control Board, and the Financial Development Corporations, as defined, to develop a loan guarantee program for chrome plating facilities to assist those facilities to purchase high performance environmental control equipment or technologies. The bill would require the department to establish the Model Shop Program in northern California by replicating the existing Chrome Plating Model Shop Pilot Program, which is currently available only to southern California chrome plating facilities. The bill would require the money in the Chrome Plating Pollution Prevention Fund to be expended by the agency, upon appropriation by the Legislature, to make specified loan guarantees, to support the Model Shop Program, and for administrative costs. The bill would require the agency to make loan guarantees available only to a generator that is a small business and meets other requirements.

The bill would authorize the agency, in collaboration with the Department of Toxic Substances Control, the State Air Resources Board, and the State Water Resources Control Board, to adopt regulations to implement the bill's requirements and to adopt emergency regulations to implement the loan guarantee program. The bill would require the agency, by January 1, 2007, and every odd-numbered year thereafter, to post a report on its Internet Web site and to provide notification to the Legislature concerning the performance of the loan guarantee program. The bill would also require the department to provide an evaluation of the Model Shop Program as a supplement to the report.

This bill would be repealed, by its own provision, on January 1, 2012, unless extended. This repeal would not terminate the obligation to repay loans, outstanding as of January 1, 2012, that are due payable to the relevant financial companies, or impair the authority to initiate and resolve any cost recovery action.

(2) Existing law transfers the amount remaining in the Hazardous Waste Reduction Loan Account on January 1, 2006, to the Chrome Plating Pollution Prevention Fund. Existing law provides that the transfer of money and creation of the fund would become operative only

if legislation is enacted and becomes operative on or after June 1, 2005, but before July 1, 2006, that requires the funds so transferred to be expended for environmental control technologies for chrome and metal plating and related activities.

This bill would repeal and reenact, without that condition, those transfer provisions, and would appropriate the money to the agency for expenditure pursuant to this bill.

Ch. 696 (AB 765) Salinas Rail feeder bus service.

Existing law authorizes the Department of Transportation to provide funding to Amtrak for the purpose of entering into a contract with a motor carrier of passengers for the intercity transportation of passengers over regular routes for the purpose of providing feeder bus service to rail stations if, among other things, the motor carrier is not a public recipient of specified governmental assistance, except a local public motor carrier that proposes to serve passengers only within its service area is excluded from this restriction.

This bill would authorize the department to enter into an agreement with a public motor carrier in the County of Monterey to provide mixed-mode feeder bus service between San Jose and Monterey via Gilroy if there is no private motor carrier providing scheduled bus service, subject to termination if a private motor carrier operates a scheduled service on the San Jose-Gilroy-Monterey route.

Ch. 697 (AB 819) Ridley-Thomas Taxpayer contributions: California Colorectal Cancer Prevention Fund.

Provisions relating to the administration of personal income taxes allow individual taxpayers to contribute amounts in excess of their tax liability for the support of specified funds.

This bill would allow taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the California Colorectal Cancer Prevention Fund, which would be created by this bill. However, the bill would provide that a voluntary contribution designation for this fund may not be added on the tax return until another voluntary contribution designation is removed from that return.

This bill would require that all moneys contributed to the fund pursuant to these provisions, upon appropriation by the Legislature, be allocated to the Franchise Tax Board, the Controller, and the State Department of Health Services for making grants, as provided.

This bill would provide that these voluntary contribution provisions are repealed on January 1 of the 5th taxable year following the taxable year the fund first appears on the tax return. The bill would further provide that these provisions are repealed for taxable years beginning on or after January 1 of the calendar year in which the Franchise Tax Board estimates by September 1 that the contributions made on returns filed in that calendar year will be less than \$250,000, or an adjusted amount for subsequent taxable years.

Ch. 698 (AB 820) Strickland Wild animals.

(1) Existing law prohibits the importation into this state of wild animals specified on a list published by the State Department of Health Services without a permit issued by that department, except that existing law does not authorize the importation, transportation, or possession of live animals enumerated in specified provisions of the Fish and Game Code or regulations of the Fish and Game Commission adopted pursuant thereto. Those Fish and Game Code provisions prohibit the importation, transportation, possession, or release into this state of certain wild animals without a permit issued by the Department of Fish and Game (hereafter department). Existing law requires the commission, in cooperation with the State Department of Food and Agriculture, to promulgate regulations relative to wild animals, as specified. Existing law requires the regulations to be designed to prevent damage to the native wildlife or agricultural interests of the state, as specified. Existing law defines "enforcing officers" for the purposes of provisions regulating the importation, transportation, and sheltering of restricted live animals. Existing law establishes civil

penalties for a violation of specified provisions and requires fees collected pursuant to the provisions relating to wild animals to be deposited in the Fish and Game Preservation Fund. Existing law authorizes the department to reimburse eligible local entities, as defined, pursuant to a memorandum of understanding, for certain costs in connection with the administration and enforcement of provisions governing the possession, handling, or care of wild animals, and authorizes the director to enter into memorandums of understanding with eligible local entities, as defined, for the purpose of paying those costs. Existing law permits the department or an eligible local entity to issue a written permit to import into this state, possess, or transport within this state any specified wild animal, upon a determination that the animal is not detrimental or that no damage or detriment can be caused to agriculture, native wildlife, the public health or safety, or the welfare of the animal and requires the department or an eligible local entity to inspect the wild animal facilities. Existing law requires the department, on or before May 1, 1991, to establish and keep current written policies relating to the housing, possession, importation, and transportation of wild animals. Existing law also requires the commission to revoke or deny a permit under certain circumstances.

This bill would enumerate specific criteria for the adoption of regulations required to be promulgated with respect to wild animals, and would require the commission to develop and adopt these regulations, on or before January 1, 2007. This bill would modify the definition of “enforcing officers” and would specify that enforcing officers are authorized and empowered to enforce provisions and regulations relating to the importation, transportation, and sheltering of restricted live animals. The bill would allow the department to revoke or deny a permit under specified circumstances. The bill would revise existing law relating to the reimbursement of eligible local entities, as defined, pursuant to a memorandum of understanding, for certain costs, in connection with the administration and enforcement of provisions governing the possession, handling, or care of wild animals, and the authority of the director to enter into memorandums of understanding with eligible local entities, as defined, for the purpose of paying those costs. The bill would require the department, no later than January 1, 2007, to develop, implement, and enter into memorandums of understanding with eligible local entities if the department elects not to inspect every wild animal facility and to adopt and implement a policy describing the department’s issuance of breeding permits, including specific criteria, developed in cooperation with a specified committee, concerning the method by which the department determines that the breeding of a species listed on the permittee’s inventory will not result in unneeded or uncared for animals, and the means by which those specific criteria will be implemented and enforced.

The bill would require every person holding a wild animal permit to uniquely identify each wild animal that poses a risk to the health and safety of the public, and to report the identification to the department for maintenance in a registry. The bill would require the department to develop and adopt regulations for this purpose on or before January 1, 2007. The bill would require any person who possesses a permit for the importation or transportation of a wild animal, and every zoo, to immediately report the escape or release of the animal, and would make the possessor liable for all expenses associated with efforts to recapture the animal. The bill would specify that the exhibition of a wild animal on a movie set, film set, television set, still photography set, or any other professional activity allowable under permit, does not constitute an intentional or unintentional escape or release of the wild animal unless the person exhibiting the wild animal has lost control of the wild animal. The bill would require any person who possesses a permit for the importation or transportation of a wild animal to provide prior notice to the department relating to certain action taken in connection with, or related to, the animal, except under specified circumstances. The bill would require a person claiming a confiscated wild animal to pay to the department or the new custodian of the animal an amount sufficient to cover all reasonable expenses expected to be incurred in caring for and providing for the animal, as provided. The bill would permit the department to euthanize the animal or place the wild animal with an appropriate wild

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

animal facility upon the expiration of a 2nd 30-day period, as specified. The bill would permit the new custodian of a specified wild animal to bring a civil action against the previous possessor for all reasonable costs incurred by the new owner for the relocation of the animal, to construct new caging to house the animal, and to return the animal to a healthy state, as provided. The bill would expand the civil penalty for any person who violates certain wild animal provisions, and would specify that, except as otherwise provided, any violation of those provisions is a misdemeanor punishable by imprisonment in the county jail for not more than 6 months, or by a fine of not more than \$1,000.

(2) Existing law generally provides that a violation of the fish and game laws is a crime.

Because this bill would impose additional requirements on every person holding a specified wild animal permit for which a violation thereof would be a crime, this bill would impose a state-mandated local program by creating a new crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 699 (AB 964) Jerome Horton Property taxation: certificated aircraft assessment.

(1) Existing property tax law requires that the personal property of an air carrier be taxed at its fair market value. The California Constitution requires that property that is subject to ad valorem property taxation be assessed in the county in which it is situated.

This bill would, for the 2005–06 fiscal year to the 2010–11 fiscal year, specify a formula to determine the fair market value of certificated aircraft, as specified, of a commercial air carrier.

This bill would also require the Aircraft Advisory Subcommittee of the California Assessors' Association to designate, after soliciting input from commercial air carriers operating in the state, a lead county assessor's office for each commercial air carrier operating certificated aircraft in this state in an assessment year. This bill would require this lead county assessor to calculate the value of the air carrier's personal property and to transmit these calculations to other county assessors, but would specify that each county assessor is responsible for assessing and enrolling the taxable value of the property in his or her county, as provided. This bill would also require the lead county assessor's office to lead a team to audit the books and records of a commercial air carrier and would authorize these air carriers to file a property statement solely with the lead county assessor's office, as provided.

By imposing a new valuation process for certificated aircraft and by imposing these new duties upon a lead county assessor's office, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 700 (AB 1234) Salinas Local agencies: compensation and ethics.

Existing law provides for the establishment and operations of cities, counties, cities and counties, districts, and other local government agencies, the composition of their governing bodies, and the payment of governing body members for attending meetings and performing other duties, and prescribes conflicts of interest.

This bill would require a local agency that provides reimbursement for expenses to members of its legislative body to adopt a written policy on the duties for which legislative

body members may receive compensation, other than meetings of the legislative body or an advisory body or attendance at a conference or organized educational activity. The bill would require such a governing body to adopt a written policy concerning what occurrences qualify a member to receive reimbursement of expenses for travel, meals, and lodging and would impose related requirements, including the filing of expense reports, which would be public records.

This bill would also require that if a local agency provides any type of compensation, salary, or stipend to, or reimburses the expenses of, a member of the legislative body, all local agency officials, except a member whose term of office ends before January 1, 2007, in local agency service as of January 1, 2006, or thereafter receive training in ethics, as specified. This bill would provide that if any entity develops criteria for the ethics training, then the Fair Political Practices Commission and the Attorney General shall be consulted regarding any proposed course content. This bill would specify, with respect to certain special districts, how a director's activities on a specific day are determined to be compensable and would make related changes.

#### Ch. 701 (AB 1272) Harman State Lands Commission.

(1) Existing law requires the State Lands Commission to prepare every 10 years a summary report on the ownership of public land in this state by the United States, the state, counties, cities, and districts and any other public agency or body within the state, and authorizes the commission to sell copies of the report at a reasonable charge that will provide for reimbursement of its costs of reproducing the report.

This bill would repeal these provisions.

(2) Existing law authorizes the commission to cooperate with the Beach Erosion Board of the United States Government, and to expend those moneys as are necessary for cooperative work with that board out of any appropriations made for those purposes.

This bill would, instead, authorize the commission to cooperate with the Coastal Engineering Research Board of the United States Army Corps of Engineers.

(3) Existing law grants title to the state in all mineral deposits in public lands, and prohibits a purchaser of public land from acquiring any right, title, or interest in those deposits.

This bill would authorize the commission to sell to a surface property owner, as defined, for not less than fair market value, the state's reserved mineral interest in specified lands located in Riverside County, upon those terms and conditions, and subject to any reservations or exceptions as the commission determines are in the best interests of the state, and would require that the proceeds of such a sale be deposited in the State Treasury to the credit of the School Land Bank Fund.

(4) The bill would declare that, due to the unique circumstances pertaining to the County of Riverside, with respect to the ownership of mineral deposits in the county, that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

#### Ch. 702 (AB 1288) Chu Court orders.

(1) Existing law provides a mechanism whereby the court may issue a protective order.

This bill would require a court, under specified circumstances, to issue, or consider issuing, a protective order to a defendant charged with domestic violence that would require, among other things, the relinquishment of his or her firearms. A failure to comply with the provisions of that protective order would result in a misdemeanor.

By adding to the duties of local employees, this bill would impose a state-mandated local program. By imposing a crime for a violation of the above-described protective order, the bill would create a state-mandated local program.

(2) Existing law requires the Attorney General to maintain a registry of information reported to the Department of Justice regarding firearms, including, among other things, copies of licenses to carry firearms and applications for licenses to carry firearms. Existing

law provides generally that information contained in the registry shall, upon proper application, be furnished to specified peace officers. However, information relating to firearms that are not handguns shall not generally be retained but shall instead be destroyed, as specified; a violation of this provision is a misdemeanor.

This bill would, as an exception to the above provisions, authorize specified peace officers to disseminate the name of the subject of the record, the number of firearms listed in the record, and the description of any firearm, including the make, model, and caliber from the record, relating to any firearm's sale, transfer, registration, or license record, or any information reported to the Department of Justice pursuant to specified provisions, if the subject of the record has been arraigned for domestic violence and is being prosecuted or is serving a sentence for the crime, or the subject of the record is the subject of an emergency protective order, a temporary restraining order, or an order after hearing, which is in effect and has been issued by a family court under the Domestic Violence Protection Act, and the record or information is disseminated only to the victim of the crime or to the person who has obtained the emergency protective order, the temporary restraining order, or the order after hearing issued by the family court. The bill would further provide that law enforcement shall provide the victim with a "Victims of Domestic Violence" card, as specified, and that the victim or person to whom the information is disseminated may disclose that information as he or she deems necessary to protect himself, herself, or another person from bodily harm by the person who is the subject of the record. By imposing new duties on local law enforcement officers, this bill would impose a state-mandated local program.

(3) This bill would incorporate additional changes in Section 136.2 of the Penal Code proposed by AB 112, AB 118, and SB 720, to become operative only if any or all of those bills and this bill are chaptered and become effective January 1, 2006, and this bill is chaptered last.

This bill would also incorporate additional changes in Section 11106 of the Penal Code proposed by AB 1060, to become operative only if AB 1060 and this bill are chaptered and become effective January 1, 2006, and this bill is chaptered last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 703 (AB 1723) La Malfa Integrated energy policy report: load loss or addition.

Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission) to prepare an integrated energy policy report every 2 years. Existing law requires the report to contain an overview of major energy trends and issues facing the state, including, but not limited to, supply, demand, pricing, reliability, efficiency, and impacts on public health and safety, the economy, resources, and the environment.

Under existing law, the Public Utilities Commission (CPUC) has regulatory authority over public utilities, including electrical corporations. The Public Utilities Act requires the CPUC to review and adopt a procurement plan for each electrical corporation in accordance with specified elements, incentive mechanisms, and objectives.

This bill would require each entity that serves or plans to serve electricity to retail customers to provide the Energy Commission with its forecast, as part of each integrated energy policy report, of (1) the amount of its forecasted load that may be lost or added by a community choice aggregator, an existing local publicly owned electric utility, or a newly

formed local publicly owned electric utility, and (2) the load that will be served by an electric service provider. The bill would require the Energy Commission to perform an assessment in the service territory of each electrical corporation of the loss or addition of load specified in (1) and submit the results of that assessment to the CPUC. The bill would authorize the Energy Commission to exempt from these forecasting requirements a local publicly owned electric utility that is not planning to acquire additional load beyond its existing exclusive service territory.

Ch. 704 (AB 439) Parra Registered sex offenders: dismissals of convictions: residence changes.

Existing law requires persons convicted of certain sex offenses to register as sex offenders, as specified. Existing law provides that certain persons required to register as sex offenders shall be relieved of the duty to register upon obtaining a certificate of rehabilitation, and that certain other persons required to register as sex offenders shall be relieved of the duty to register upon receiving a full pardon. Existing law allows a court to dismiss the accusation or information against certain persons after conviction for a crime, and provides that such a dismissal alone shall not relieve a person from the duty to register as a sex offender.

This bill would reorganize and recast these provisions relating to the duty of persons to register as sex offenders after the dismissal of an accusation or information.

Existing law requires a person who is required to register pursuant to these provisions and who changes his or her residence address to inform the law enforcement agency with which he or she last registered of the new address or transient location and any plans he or she has to return to California, if known. Existing law requires that this notice be provided in writing.

This bill would apply this requirement only to a person who was last registered at a residence address, and would require that the notice be provided in person. By imposing new duties on local officials regarding the receipt of notice, the bill would impose a state-mandated local program.

Existing law requires a person who is required to register pursuant to these provisions and who does not know his or her new residence address or location at the time of the move to later notify the last registering agency of the new address or location.

This bill would require that this notice be provided in writing, sent by certified or registered mail.

The bill would make other specified changes to the provisions regarding notice to law enforcement agencies and other provisions governing registration.

The bill would incorporate changes made by AB 1323 that would become operative if both bills are enacted and this bill is enacted after AB 1323.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 705 (SB 67) Committee on Budget and Fiscal Review Budget Act of 2005: Court fees.

(1) Existing law establishes the Trial Court Trust Fund, the proceeds of which are apportioned for the purposes of funding trial court operations. Existing law specifies certain fees that are to be collected in a special account in the county treasury and transmitted monthly to the Controller for deposit in the Trial Court Trust Fund.

This bill would require, until January 1, 2006, and upon direction of the Administrative Office of the Courts, the court and the county to deposit certain of those fees as soon as practicable into a bank account specified by the Administrative Office of the Courts, for

transmission to the Controller for deposit in the Trial Court Trust Fund in accordance with specified procedures.

This bill would make other technical changes to these provisions.

(2) Under existing law, certain court fees and fines other than those described in (1), that are not subject to a local revenue sharing agreement or practice, are required to be deposited in a special account in the county treasury, except as to costs incurred by and services provided by the superior court that are transmitted monthly to the Controller for deposit in the Trial Court Trust Fund.

This bill would require, until January 1, 2006, the distribution of those other court fees and fines to the court or the county, whichever provided the services or incurred the costs. The bill would expand the fees to which that provision applies, to include fees for providing private conservators with written information concerning a conservator's rights, duties, limitations, and responsibilities. The bill would provide for the distribution of these fees and fines, and certain of the fees described in (1), commencing January 1, 2006.

This bill would authorize the court or an officer of the court, with the consent of the county and the Administrative Director of the Courts, to deposit all money required to be deposited into the county treasury or with the county treasurer into a bank account established by the Administrative Office of the Courts separate from the county treasury. The bill also would authorize the Judicial Council, with the consent of the county, to require the court and officer to deposit money into such a bank account.

(3) Existing law requires a person who petitions for a change of plea, setting aside of a verdict, or an order sealing a record in specified cases to reimburse the county and any city for the actual cost of services rendered, whether or not the petition is granted and the records are sealed or expunged, at a rate to be determined by the county board of supervisors and the city council not to exceed \$120 each.

This bill would require the person to also reimburse the court for the actual cost of services rendered, whether or not the petition is granted and the records are sealed or expunged, at a rate to be determined by the court not to exceed \$120.

(4) Under existing law, a court may impose a civil assessment of up to \$300 against a criminal defendant who fails to appear in court, as specified. Existing law also requires each court and county to maintain the collection program for these civil assessments that was in effect on July 1, 2005, unless otherwise agreed to by those entities, and provides for third-party arbitration in the event the court and county do not agree on a plan for the collection of those civil assessments. Existing law further requires the court to deposit the money collected under that provision as soon as practicable into a bank account specified by the Administrative Office of the Courts, for transmission to the Controller for deposit in the Trial Court Trust Fund, in accordance with specified procedures.

This bill would authorize a court or county to request third-party arbitration in the event the court and county do not agree on a plan for the collection of these civil assessments or any other moneys owed for fees, fines, forfeitures, penalties, and assessments imposed by the court, as specified. The bill would delete the deposit requirements and procedures from this provision.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 706 (AB 1742) Committee on Judiciary Courts.

(1) Under existing law, no liability or cause of action arises against a peace officer making an arrest pursuant to a warrant of arrest regular upon its face, if the peace officer acts without malice and in reasonable belief that the person arrested is the one referred to in the warrant.

This bill would provide that the term "warrant of arrest regular upon its face" includes both a paper arrest warrant issued pursuant to a judicial order and a judicial order entered into an automated warrant system by authorized law enforcement or court personnel, as specified.

(2) Existing law governs procedures in the small claims court. These provisions set forth various time periods for scheduling cases for hearing and specified methods for service of

the claim and order on a defendant. These provisions state that they may not be construed to prevent a court from correcting a clerical error in a judgment or setting aside and vacating a judgment on the ground of an incorrect or erroneous legal basis for the decision.

This bill would provide that, when a claim is filed, the case shall be scheduled for hearing no earlier than 20 days and not more than 70 days from the date of the order, thereby eliminating the various time periods. The bill would require that proof of service of the claim and order be filed at least 5 days before the hearing. The bill would authorize a party to make only one motion to correct a clerical error or set aside and vacate a judgment and provide that a party may have 30 days after the clerk mails notice of entry of judgment to the parties to make that motion.

(3) Existing law requires, until January 1, 2006, that all pleadings filed with a court be signed, except as specified, and that the filing of any paper with a court certifies that specified conditions have been satisfied. Existing law also specifies sanctions for violation of these requirements.

This bill would delete the repeal date of January 1, 2006, contained in these provisions and thereby extend indefinitely the operation of these provisions.

(4) Existing law authorizes a court in a proceeding for dissolution of marriage or legal separation and prior to the determination of a motion for a change of venue, to consider and make all necessary and proper orders in connection with motions for allowance of temporary spousal support, support of children, and counsel fees and costs.

This bill would revise that provision to additionally apply to proceedings under the Uniform Parentage Act and to authorize the court to consider and determine motions to determine custody of and visitation with children in any of the proceedings to which the provision applies prior to determining the motion for a change of venue.

(5) Existing law requires a person to be granted access to a staffed gated community for a reasonable time period for the purpose of performing lawful service of process, as specified.

This bill would also authorize access to a staffed gated community for the purpose of serving a subpoena.

(6) Existing law also governs offers by a party to compromise a dispute that is to be resolved by trial or arbitration.

This bill would require a written offer to compromise to include a statement of the offer and a provision that allows the accepting party to indicate acceptance of the offer by signing a statement that the offer is accepted, as specified. The bill would also require that any acceptance of the offer, whether made on the document containing the offer or on a separate document of acceptance, to be in writing and signed by the accepting party or his or her counsel, as specified.

(7) Existing law, the Unclaimed Property Law, governs the disposition of unclaimed property, including the escheat of certain property to the state. Those provisions set forth procedures whereby a person may file a claim to the property or to the net proceeds from its sale. Those provisions also specify the procedures for transferring the property from the holder of the property to the state and for administering the property. The Controller administers property that has escheated to the state, and is required to adopt guidelines and forms to provide specific instructions to assist owners, as defined, in filing claims with the state.

This bill would further define "owner" for purposes of those provisions to include a public administrator, as specified.

(8) Existing law sets forth the procedure for filing a claim against a statewide public entity, as specified.

This bill would specify that these procedures also apply to claims against a judicial branch entity, and would make a statement of legislative intent in that regard.

(9) Existing law provides that no person in the state shall, on the basis of race, national origin, ethnic group identification, religion, age, sex, color, or disability, be unlawfully denied full and equal access to the benefits of, or be unlawfully subjected to, discrimination

under, any program or activity that is conducted, operated, or administered by the state or by any state agency, is funded directly by the state, or receives any financial assistance from the state.

This bill would clarify that those provisions apply to the California State University, and would make a statement of legislative intent in that regard.

(10) The Uniform Civil Fees and Standard Fee Schedule Act of 2005, as of January 1, 2006, establishes a uniform schedule of filing fees and other civil fees for the superior courts. Among other things, the act generally increases the filing fees for civil actions and proceedings, including, but not limited to, those fees related to small claims court, motions, appeals, judgments, the filing of the first paper in a civil action or proceeding in the superior court, in a limited civil case, and in complex cases, and in family law and probate matters, and fees for various certifications, recordings, filings, and the authentication of documents. The act also authorizes the court to charge a reasonable fee for videoconferencing, providing services or products, if approved by the Judicial Council, and handling funds held in trust for noncourt parties or entities. The act provides that none of these civil fees may be changed before January 1, 2008, except as specified.

This bill would make nonsubstantive technical changes to that act, and would make conforming changes to related provisions. The bill would also make related changes with regard to law library fees in Los Angeles County, law library funds, the Administrative Office of the Courts, court reporters, and the definition of “automated administrative systems” in the context of the act.

(11) Certain changes made by this bill to Section 116.230 of the Code of Civil Procedure and Section 68085.1 of the Government Code would only become operative if AB 1459 or SB 422 is enacted and becomes effective on or before January 1, 2006, and increases the jurisdictional limit of the small claims court.

Ch. 707 (AB 121) Vargas Adulterated candy: maximum allowable lead levels.

Existing law, the Sherman Food, Drug, and Cosmetic Law, requires the State Department of Health Services to regulate manufacture, sale, labeling, and advertising activities related to food, drugs, devices, and cosmetics in conformity with the federal Food, Drug, and Cosmetic Act. The law makes it unlawful for any person to adulterate food and defines adulterated food to include a confectionary containing a nonnutritious substance. Violation of these provisions is a crime.

This bill would require the department to regulate lead in chili, tamarind, and other candy, as defined. The bill would prohibit the sale of adulterated candy and would require the department to test and retest the candy to determine the presence of lead at levels above naturally occurring levels, as determined by the Office of Environmental Health Hazard Assessment. The bill would require the department to adopt related regulations and would require the department to convene an interagency collaborative. By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 708 (AB 256) De La Torre Public employees' benefits.

(1) The Public Employees' Retirement Law defines “local sheriff” for purposes of prescribing benefits and contribution rates, to include any officer or employee of a sheriff's office of a contracting agency, except specified persons whose functions do not fall within the scope of active law enforcement service.

This bill would expand the definition of “local sheriff” to include district attorney investigators of Solano County, subject to specified conditions.

(2) The Public Employees' Medical and Hospital Care Act provides health benefit coverage to state employees and public employees of contracting agencies, as specified, and is administered by the Board of Administration of the Public Employees' Retirement System.

This bill would require the Board of Administration of the Public Employees' Retirement System to conduct a study to examine the feasibility and cost-effectiveness of creating a single statewide health care pool that would cover all public school employees working in school districts, county offices of education, community colleges, and entities established by those school employers, as specified, or of including all school employees under the Public Employees' Medical and Hospital Care Act, and to report that study to the Legislature, as specified. The bill would also provide that completion of the health care study would be contingent upon the ability to secure or budget for funding to cover the costs. The bill would make specified findings and declarations.

(3) The County Employees Retirement Law of 1937 prohibits any resolution, ordinance, contract, or contract amendment adopted after January 1, 2004, from providing any retirement benefits for some, but not all, general members of a county or district, except as specified. In San Mateo County, and in Alameda and Merced Counties until January 1, 2010, however, the board of supervisors may provide different retirement benefits for some, but not all, safety members of the county's retirement system, as specified.

This bill would authorize, until January 1, 2011, the board of supervisors in Santa Barbara and Solano Counties to provide different retirement benefits for some safety member bargaining units of the county retirement system, as specified. Pursuant to these provisions, the bill would permit agreements and memoranda of understanding to be made applicable to certain unrepresented groups, as specified.

#### Ch. 709 (AB 338) Levine Recycling: crumb rubber.

Existing law requires the State Procurement Officer, in purchasing any materials to be used in paving or paving subbase for use by the Department of Transportation and any other state agency that provides road construction and repair services, to make contracts available that utilize recycled materials, including crumb rubber, unless the Director of Transportation determines that the use of the materials is not cost effective based on specified factors.

This bill would define the terms "asphalt containing crumb rubber" and "rubberized asphalt concrete" and would require the department to require the use of crumb rubber (CRM) at a specified percentage, per metric ton, of the total amount of asphalt paving materials used for state highway construction or repair projects that use asphalt as a construction material. The bill would require the amount of asphalt paving materials containing crumb rubber, on and after January 1, 2007, to be not less than 6.62 pounds of CRM per metric ton of the total amount of asphalt paving materials used. The bill would require the Secretary of Business, Transportation and Housing, on or before January 1, 2009, and on or before January 1 annually thereafter, to prepare a specified analysis comparing the cost differential between asphalt containing crumb rubber and conventional asphalt, including specified information.

The bill would require the department, on and after January 1, 2010, to use not less than 8.27 pounds of CRM per metric ton of the total asphalt paving materials used, and on and after January 1, 2013, not less than 11.58 pounds of CRM per metric ton, unless the department delays the implementation of these requirements, pursuant to a specified procedure.

The bill would specify that, for purposes of complying with those requirements regarding the use of specified percentages of asphalt containing crumb rubber, only crumb rubber manufactured in the United States that is derived from waste tires taken from vehicles owned and operated in the United States may be used.

The bill would require the department and the California Integrated Waste Management Board to develop procedures for using crumb rubber and other tire-derived products in other

projects and would require the department to notify and confer with the East Bay Municipal Utility District before using asphalt containing crumb rubber on a state highway construction or repair project that overlays district infrastructure.

Ch. 710 (AB 491) Goldberg Public schools.

(1) Existing law, the Leroy F. Greene School Facilities Act of 1998, requires the State Allocation Board to allocate to applicant school districts, prescribed per-unhoused-pupil state funding for construction and modernization of school facilities, including hardship funding, and supplemental funding for site development and acquisition.

Existing law provides that the ongoing eligibility of a school district for new construction funding is to be determined by making specified calculations, including a calculation using enrollment projections, as provided.

This bill would, in addition, authorize additional eligibility for a school district that has 2 or more schoolsites with a pupil population density that is greater than 115 pupils per acre in kindergarten and grades 1 to 6, inclusive, or a schoolsite pupil population density greater than 90 pupils per acre in grades 7 to 12, inclusive, as determined by the Superintendent of Public Instruction using enrollment data from the California Basic Educational Data System for the 2004-05 school year, for funding for projects that will relieve overcrowded conditions, as specified.

The existing act also establishes the Critically Overcrowded School Facilities Program to make apportionments to eligible applicants with critically overcrowded schools in advance of full compliance with all the application requirements otherwise required for apportionment.

Existing law provides alternative methods for an applicant in the program to calculate enrollment for purposes of determining eligibility for a final apportionment for a project funded from the Kindergarten-University Public Education Facilities Bond Act of 2002.

This bill would also provide alternative methods for an applicant in the program to calculate enrollment for purposes of determining eligibility for a final apportionment for a project funded from the Kindergarten-University Public Education Facilities Bond Act of 2004.

(2) Existing law requires the California Infrastructure and Economic Development Bank to give notice to the Controller and a school district of certain lease financing provided to the school district from the proceeds of bonds, including a rent schedule, and requires the Controller to make apportionments to the bond trustee on the dates shown on the schedule.

This bill would require the California Infrastructure and Economic Development Bank to amend or supplement that schedule in specified circumstances.

(3) Existing law requires a county superintendent of schools to annually visit and examine each school in his or her county. Existing law specifies that the objective of these visits is to determine the status of certain circumstances, including, but not limited to, the condition of a school facility that poses an emergency or urgent threat to the health and safety of pupils or staff, and provides specified funds for this purpose.

This bill would make an appropriation by reallocating savings realized from amounts appropriated for these visits, as specified, upon a determination by the State Department of Education, the Secretary for Education, and the Department of Finance that a county office of education has incurred extraordinary costs, with certain requirements.

Ch. 711 (AB 582) Matthews Political advertisements: text messages.

Existing law regulates political advertising by, among other things, requiring paid political advertisements contained in a newspaper to bear a specified disclaimer, prohibiting certain pictures or photographs of candidates in campaign materials, and requiring simulated ballots to contain a specified notice.

Existing law, subject to certain exceptions, generally prohibits a person or entity conducting business in this state from transmitting or causing to be transmitted a text message

advertisement to a cellular telephone or pager equipped with short message or a similar capability. Existing law provides that a violation of the provisions regulating advertising is a misdemeanor, and also provides for the imposition of civil penalties and injunctive relief.

This bill would, subject to certain exceptions, generally prohibit a person, entity conducting business, candidate, or political committee in this state from transmitting, or causing to be transmitted, a text message advertisement, including a political advertisement, to a mobile telephony services handset, a pager, or a 2-way messaging device that is equipped with short message or similar capability. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 712 (AB 585) Negrete McLeod Equipment dealers.

(1) Existing law provides for the regulation of equipment dealers and defines equipment for those purposes as machines designed for agriculture, livestock, grazing, light industrial, and utility purposes. Under existing law, this definition excludes all-terrain vehicles, earthmoving and heavy construction equipment, and mining and forestry equipment. Existing law authorizes an equipment dealer to establish a lien for unpaid charges and requires the dealer to file the lien with the Secretary of State.

This bill would expand the definition of equipment to include all-terrain vehicles and other machinery, equipment, implements, or attachments used for specified purposes and would designate a person or entity primarily engaged in the retail sale of equipment as a dealer or dealership. The bill would also define various additional terms for the purpose of its provisions including "good cause," "single-line dealers," and "single-line suppliers."

(2) Existing law makes unlawful various acts and practices by a supplier with respect to an equipment dealer. Specifically, existing law, among other things, prohibits discriminatory pricing and unreasonably withholding consent to a transfer of a dealership on a dealer's death. Existing law also prohibits a supplier from requiring a dealer to complete a substantial renovation or property acquisition without one year's notice as a condition to renewal or extension of the dealership contract, and requires the supplier to give the dealer a reasonable time to complete the renovation or acquisition.

This bill would revise and recast these provisions dealing with discriminatory pricing and establish procedures for approving or denying a transfer of a dealership upon a dealer's death. The bill would require a supplier to give a dealer 2 years to complete a renovation or acquisition. The bill would additionally prohibit a supplier from engaging in other specified coercive discriminatory acts with respect to a dealer.

(3) Existing law provides that a supplier shall not terminate, cancel, fail to renew, or substantially change the competitive circumstances of the dealer agreement, without cause, as defined.

This bill would make these provisions only applicable to a dealer contract between a dealer who is not a single-line dealer and a supplier who is not a single-line supplier. The bill would expand the definition of good cause for the purpose of this provision. The bill would also create a procedure for approving or denying a request for a sale or transfer of a dealer's business or an equity ownership interest where the supplier has contractual authority. The bill would provide that a single-line supplier may not terminate a dealer contract without good cause.

The bill would also require a supplier to approve or reject a warranty claim by written notice, as specified, to the dealer within 45 days after the supplier received the warranty claim and would prescribe procedures for resolving those claims.

(4) Existing law requires suppliers to provide an opportunity annually for dealers to return a portion of their surplus inventory parts for credit. Existing law provides that the minimum

lawful credit for returned parts is 95% of the net price, as listed in the supplier's current returnable parts list, as specified.

This bill would provide that where an outstanding balance is owed to the supplier, the supplier may credit the dealer's account within 30 days after the supplier's receipt of the dealer's returned parts. If no balance exists, the supplier shall pay the dealer within 30 days after the supplier's receipt of the dealer's returned parts. The bill would make a supplier liable for 110% of the total current net parts cost, plus interest at the statutory rate from the payment due date until the date of payment and actual costs for any court or arbitration proceedings, including costs for attorney's fees and arbitrators if a supplier refuses to credit the dealer's account or pay the dealer for returned parts.

(5) Existing law requires the supplier to repurchase inventory upon termination of a dealer agreement at specified prices based on fair market value or specified percentages of net cost.

This bill would define fair market value for these purposes and modify the percentages of the net equipment cost to be paid for specified types of inventory. The bill would also prescribe the parties' rights and responsibilities with respect to handling, packing, and loading parts for return to the supplier. The bill would entitle the dealer to interest and costs if the payments for inventory are not timely made. The bill would also specify parts that are excluded from these repurchase requirements.

The bill would make numerous technical, conforming, and nonsubstantive changes.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 713 (AB 776) Chu Child abuse reporting.

Existing law requires certain persons to report incidents of suspected child abuse to specified agencies by telephone and also by written report thereof within 36 hours.

This bill would require those agencies to keep a record of all reports received. This bill would permit those written reports to be made via fax or electronic transmission. This bill would also specify that if after reasonable efforts, a mandated reporter is unable to submit a report by telephone, he or she shall immediately or as soon as is practicably possible make a one-time automated written report and be available to respond to telephone followup by the agency with which he or she filed the report, as specified. This bill would provide that these reports would be captured in the Child Welfare Services/Case Management System and would provide that these provisions would not become operative until that system is updated as necessary and would become inoperative 3 years thereafter or on January 1, 2009, whichever occurs first. This bill would also require the Department of Social Services to submit a report reflecting the reasons stated by mandated reporters for filing a one-time automated written report in lieu of the initial telephone report, as specified.

Because this bill would require local officials to perform additional duties and because failure of a mandated reporter to make a report as specified is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, with regard to certain mandates, no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 714 (AB 783) Jones Elections: payment of expenses.

Existing law provides that all expenses authorized and necessarily incurred in the preparation for and conduct of elections are to be paid from the county treasuries.

This bill would provide that expenses incurred on or after January 1, 2005, and before January 1, 2006, for elections proclaimed by the Governor to fill a vacancy in the office of

Senator or Member of the Assembly, or to fill a vacancy in the office of United States Senator or Representative in the Congress of the United States, are to be paid by the state. Where an election proclaimed by the Governor is consolidated with a local election, the state would pay only those additional expenses directly related to the election proclaimed by the Governor. The bill would further provide that it does not preclude the use of otherwise authorized federal funds in elections in which at least one candidate for federal office appears on the ballot.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 715 (AB 1060) Liu Firearms.

Existing law authorizes law enforcement agencies to report certain information to the Department of Justice pertaining to a firearm when the firearm is taken into custody for safekeeping by the agency.

This bill would require the law enforcement agency to report the information to the department.

By imposing additional duties in connection with the custody of firearms upon local law enforcement entities, this bill would impose a state-mandated local program.

Existing law provides that where neither party to a firearm transaction is a licensed firearms dealer, the parties may complete the transaction through a sheriff's department, as specified.

This bill would repeal those provisions and make additional conforming technical changes consistent with the repeal. The bill would make other technical changes.

Existing law generally regulates the licensing and conduct of firearms dealers.

The bill would require dealers to store all inventory firearms in secure storage, as specified.

The bill would make additional technical and conforming changes.

This bill would incorporate additional changes to Section 11106 of the Penal Code proposed by AB 1288, to Section 11108 of the Penal Code proposed by AB 86, to Section 12001 of the Penal Code proposed by SB 59, and to Sections 12071, 12072, 12076 and 12078 of the Penal Code, proposed by AB 754, to become operative if this bill and those bills, respectively, are enacted and become effective on or before January 1, 2006, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 716 (AB 1067) Frommer Railroads.

(1) Existing law provides that it is unlawful for a person to take various actions with the intent to derail or wreck a train. A violation is punishable as a felony by life imprisonment without possibility of parole.

This bill would provide that a person who unlawfully and with gross negligence places or causes to be placed any obstruction on a railroad track that proximately results in the damaging or derailling of a train, or injury to passengers or employees, is guilty of a crime. By creating a new crime, the bill would impose a state-mandated local program.

(2) Existing law authorizes a court in a county with a population greater than 500,000 persons to order a person convicted of certain traffic violations relating to rail transit to attend a traffic school that offers, as a part of its curriculum, a film on rail transit safety, and to pay certain fines in addition to the fines regularly imposed for a violation.

This bill would permit a court described above to order attendance, instead, at a traffic safety school that includes a rail safety presentation or Internet rail safety test. The bill would add additional rail transit-related violations to the existing list of rail transit-related violations that are subject to the above-described law.

(3) Existing law prohibits certain actions by the drivers of a motor vehicle if those actions would create certain obstructions with respect to intersections or railroad crossings, and provides that violations of these provisions are parking violations, or stopping violations dependent upon the authority of the peace officer who issued the notice to appear.

This bill would provide that violations of these provisions issued by certain transit, railroad, or various police officers are stopping violations.

(4) Existing law imposes a fine of \$100 for a first offense, \$200 for a second offense occurring within one year of a prior offense, and \$250 for a third or subsequent offense occurring within one year of 2 or more prior offenses, for a violation of certain provisions relating to failure to stop a vehicle at a railroad grade crossing.

This bill would add certain railroad grade crossing violations to the list of provisions that are subject to the fines specified above.

(5) Existing law requires the Public Utilities Commission to adopt a priority list for railroad-highway grade separation projects and requires the California Transportation Commission to allocate available funding to projects pursuant to the priority list. Existing law requires a 20% match from other funds for projects eliminating an existing crossing or altering or reconstructing an existing grade separation, including a 10% match from the affected railroad. Existing law generally limits to \$5,000,000 an allocation to a single project.

This bill would authorize the commission to allocate up to \$15,000,000 to the highest priority project on the priority list.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 717 (AB 1183) Vargas Insurance.

Under existing law, there is within the Department of Insurance a division empowered to enforce laws and regulations related to workers' compensation fraud. The name of that division has changed from the Bureau of Fraudulent Claims to the Fraud Division.

This bill would make the relevant changes to update the name of the division in statute.

Existing law requires each insurer doing business in the state to pay an annual fee, in addition to other fees, of 30 ¢ for each vehicle it insures to fund certain consumer operations of the Department of Insurance related to automobile insurance, and an annual fee of 50¢ for each vehicle it insures, to fund the Fraud Division and an Organized Automobile Fraud Activity Interdiction Program. With respect to the 30¢ fee, existing law requires that 20¢ be used for consumer service functions of the department related to auto insurance, and that 10¢ be used for improving consumer functions of the department. The provisions authorizing the 50 ¢ and 30¢ fees are repealed as of January 1, 2007.

This bill would extend the operation of these provisions until January 1, 2010. The bill would allow the Department of Insurance and the Department of Motor Vehicles to propose to the budget committees of the Legislature that the allocation of the 10¢ portion of the above 30¢ fee be changed, as specified. The bill would require that part of the 10¢ portion of the 30¢ fee described above be used for consumer service functions of the department, as specified.

Existing law establishes a low-cost automobile insurance pilot program, as specified. Existing law requires the Insurance Commissioner, by February 1 of each year, to propose a plan to the Senate and Assembly Committees on Insurance setting forth the methods the commissioner intends to implement to inform households eligible for the pilot program about the availability of low-cost automobile insurance. Existing law specifies various elements that must be included in the plan.

This bill would change the deadline for submitting this plan to March 1 of each year, and would make specified changes to the elements that must be included in the plan.

Ch. 718 (AB 1636) Umberg Voting systems.

(1) Existing law requires the Secretary of State to study and adopt regulations governing the use of voting machines, voting devices, and vote tabulating devices.

Existing law requires that an elections official keep, unopened and unaltered, certain voting documents for 22 months from the date of the election.

This bill would additionally require an elections official to keep paper record copies, if any, of voted polling place ballots.

(2) Existing law authorizes the Secretary of State to approve only those voting systems that meet specified requirements. Existing law requires elections officials using voting or vote tabulating equipment to inspect the machine or devices at least once every 2 years to determine their accuracy.

This bill would prohibit the Secretary of State from approving any voting system that permits a voter to exit a polling place with a facsimile of the ballot cast by that voter at that polling place. This bill would require the Secretary of State to conduct random audits of the software installed on direct recording electronic voting systems to ensure that the installed software is identical to the software that has been approved for use on that voting system. This bill would require the Secretary of State to take steps to ensure that the process for conducting these random audits does not intentionally cause the voting system to become more vulnerable, as specified.

(3) Existing law prohibits the Secretary of State from approving a direct recording electronic voting system unless the system has received federal qualification and includes a voter verified paper audit trail.

This bill would require all direct recording electronic voting systems to include a method by which a voter may electronically verify, through a nonvisual method, the information that is contained on the paper record copy of that voter's ballot. The bill would require that a paper record copy that is printed by a voter verified paper audit trail component be printed in the same language that the voter used when casting his or her ballot, except that if that language lacks a written form, the paper record copy shall be printed in English. The bill would prohibit a direct recording electronic voting system from being connected to the Internet at any time, receiving or transmitting official election results through an exterior communication network, or receiving or transmitting wireless communications or wireless data transfers.

By imposing additional duties on local elections officials this bill imposes a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 719 (AB 1735) De La Torre Medi-Cal: provider reimbursement: reductions.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits.

Existing law provides that, due to the significant state budget deficit projected for the 2003-04 fiscal year, and in order to implement changes in the level of funding for health care services, the Director of Health Services, until January 1, 2007, shall reduce Medi-Cal provider payments for Medi-Cal program services for dates of service on and after January 1, 2004, by 5%, with certain exceptions.

This bill would provide on the effective date of the bill, that the requirement that the director reduce Medi-Cal provider payments for Medi-Cal program services not apply with respect to Medi-Cal program services for dates of service from January 1, 2004, to December 31, 2005, inclusive.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 720 (AB 1750) Committee on Governmental Organization Indian gaming.

(1) Existing law creates in the State Treasury the Indian Gaming Special Distribution Fund for the receipt and deposit of moneys received by the state from Indian tribes pursuant to the terms of tribal-state gaming compacts. Existing law authorizes moneys in that fund to be used by the Legislature for certain purposes, including for shortfalls in payments that occur in the Indian Gaming Revenue Sharing Trust Fund.

Money in that fund is available to the California Gambling Control Commission, upon appropriation by the Legislature, for distribution to noncompact tribes.

This bill would require the California Gambling Control Commission, commencing with the 2005-06 fiscal year, to determine the amount of money needed to be transferred from the Indian Gaming Special Distribution Fund to the Indian Gaming Revenue Sharing Trust Fund to ensure that each eligible recipient Indian tribe receives up to \$275,000 per quarter of the fiscal year. The bill would require the California Gambling Control Commission to make those payments to each eligible recipient Indian tribe within 45 days of the end of each quarter of the fiscal year. The bill would provide that if the transfer of funds results in a surplus, the funds shall remain in the Indian Gaming Revenue Sharing Trust Fund for disbursement in future years. The bill would provide that if the amount appropriated for the fiscal year is insufficient to provide eligible tribes \$275,000 for each fiscal quarter, the Department of Finance shall request an augmentation from the Legislature, as specified.

(2) The bill would appropriate \$50,000,000 from the Indian Gaming Special Distribution Fund to the California Gambling Control Commission for distribution to eligible recipient tribes.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 721 (AB 437) Parra Sex offenders: Megan's Law: convictions.

Existing law requires the Department of Justice to make available information concerning certain persons who are required to register as sex offenders pursuant to specified provisions of law to the public via an Internet Web site. Existing law requires the publication of the specific crimes for which the person is required to register among the information contained on this Web site.

This bill would require, in addition, that the dates of conviction of the crimes for which the person is required to register and the dates of release from incarceration for those crimes be included on the Web site, unless specified conditions regarding funding and access to that information are not met.

Ch. 722 (AB 1323) Vargas Registered sex offenders.

Pursuant to existing law, information about registered sex offenders is made available by the Department of Justice via an Internet Web site.

This bill would make conforming changes in provisions of law regarding notices to be included in lease or rental agreements, or contracts for sale of residential real property, and required disclosures of an operator of a community care facility that accepts a registered sex offender as a client, as specified.

Existing law provides that certain information regarding a registered sex offender on a university, college, or community college campus may be released to members of the campus community.

This bill would clarify that this information will be made available regarding registered sex offenders as to whom information is not available to the public via the Department of Justice Internet Web site.

Existing law, operative until July 1, 2007, requires the Department of Justice to continually compile information about certain registered sex offenders categorized by community of residence and ZIP Code, as specified, and to make that information available to the public via a CD-ROM that can be reviewed at local law enforcement agencies. Existing law also requires the department to operate a "900" telephone number that members of the public may call to inquire whether a named individual is among those registered sex offenders about whom information is made available.

This bill would delete these provisions. This bill would instead require the department to operate a service through which members of the public may make an inquiry, regarding at least 6 individuals, as to whether a particular individual is required to register as a sex offender and is subject to public notification, as specified. This bill would provide that the department may establish a fee for these requests which shall be deposited into the Sexual Predator Public Information Account within the Department of Justice. This bill would also provide that misuse of the information provided by the service is a crime punishable as specified.

Because this bill would change the definition of a crime, this bill would impose a state-mandated local program.

Existing law provides that whenever a peace officer reasonably suspects that a child or other person is at risk from a sex offender, a law enforcement agency may provide information about that registered sex offender to persons, agencies, or organizations that the offender is likely to encounter, as specified. Existing law also provides that a designated law enforcement agency may advise the public of the presence of high-risk sex offenders in its community, as specified.

This bill would instead provide that any designated law enforcement entity may provide information to the public about a registered sex offender by whatever means the entity deems appropriate when necessary to ensure the public safety; however, it may not authorize disclosure of this information by another on an Internet Web site.

Existing law requires the Department of Justice to make available information concerning persons who are required to register as sex offenders available to the public via an Internet Web site that includes either the address at which the offender resides or the community of residence and ZIP Code in which he or she resides. Existing law provides that it is a crime, punishable as specified, for a person who is required to register pursuant to this section to enter the department's Internet Web site.

This bill would provide that if the offender is registered as a transient, the county in which a person registered will be provided on the Internet Web site. This bill would make other conforming changes to these provisions. This bill would provide that a designated law enforcement entity may make information concerning registered sex offenders available via an Internet Web site. This bill would provide that it is a crime for a person who is required to register as a sex offender to enter any Internet Web site established pursuant to these provisions.

Existing law provides that if a person has been convicted of the commission or attempted commission of felony sexual battery, misdemeanor child molestation, or specified sexual offenses for which the offender is eligible for, granted, and successfully completes probation, that person may file an application with the Department of Justice for an exclusion from the Internet Web site, as specified.

This bill would revise this provision to no longer authorize a person who has been convicted of the commission or attempted commission of specified sexual offenses for which the offender is eligible for, granted, and successfully completes probation to file for an exclusion from the Internet Web site. The bill would, however, authorize the application for exclusion from the Internet Web site by a person who has been convicted of the commission

or attempted commission of an offense for which the offender is on probation at the time of his or her application or has successfully completed probation, as defined, provided the offender submits to the Department of Justice a certified copy of an official court document, as specified, that clearly demonstrates that the offender was the victim's parent, stepparent, sibling, or grandparent, and the crime did not involve specified sexual offenses.

Existing law provides that when any person is convicted of 2 or more felonies and a consecutive term of imprisonment is imposed, the aggregate term of imprisonment for all these convictions shall be the sum of the principal term, the subordinate term, and any additional term imposed for applicable enhancements. The principal term and the subordinate term consist in part of the term imposed for specified enhancements, as listed.

This bill would, with respect to the list of specified enhancements upon which the calculation of the term of imprisonment is in part based, add to that list (1) enhancements imposed for a violation of the provisions relating to the dissemination of specified information regarding sex offenders to the public via the Internet Web site; and (2) enhancements imposed for a felony violation of provisions relating to unlawful sexual intercourse, sodomy, and lewd and lascivious acts committed with a minor for money or other consideration.

Because this bill would expand the definition of a crime, it would impose a state-mandated local program.

This bill would make other conforming changes.

The bill would incorporate changes made by AB 439 that would become operative if both bills are enacted and this bill is enacted after AB 439.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 723 (SB 367) Speier Health care complaint system.

Existing law provides for the licensure and regulation of health insurers by the Department of Insurance and requires the Insurance Commissioner to establish a program to investigate and respond to complaints concerning insurers. Under existing law, a health insurer is required to reimburse a provider's complete claim within a specified timeframe or to provide a notice to the provider explaining its reasons for denying or contesting the claim.

This bill would require the commissioner on or before July 1, 2006, to establish an Internet Web page dedicated exclusively to processing complaints and inquiries from insureds and their health care providers relating to health insurance issues and providing information concerning the process for filing complaints and making inquiries concerning health insurers. The bill would also require the commissioner by that date to provide announcements regarding the complaint system and to process those complaints as specified. The bill would also require a health insurer to provide a copy of its notice denying or contesting a provider's claim to each insured who received services and to each provider who provided services pursuant to that particular claim and to include a statement within that notice of the basis for contesting or denying the claim and that the provider or insured may request review by the department of the insurer's action. The bill would also require each contract between a health insurer and a provider to provide for a dispute resolution mechanism, and would require the mechanism to also be available to noncontracting providers. The bill would require annual reports by health insurers to the department in that regard beginning on July 1, 2007.

The bill would incorporate changes made by AB 729 that would become operative if both bills are enacted and this bill is enacted after AB 729.

#### Ch. 724 (SB 370) Bowen Elections.

Existing law requires the Secretary of State to establish the specifications and the regulations governing voting machines, voting devices, and any software used, including the programs and procedures for vote tabulating and testing. The Secretary of State may not approve any voting system that does not fulfill statutory and regulatory requirements. Existing law also prohibits the Secretary of State from approving a direct recording electronic voting system that does not include an accessible voter verified paper audit trail, and will prohibit, on and after January 1, 2006, a city or county from contracting for or purchasing a direct recording electronic voting system that does not include an accessible voter verified paper audit trail. In addition, existing law requires that, as of January 1, 2006, all direct recording electronic voting machines in use on that date, regardless of when contracted for or purchased, shall have received federal qualification, as defined, and shall include an accessible voter verified paper audit trail.

This bill would provide that on a direct recording electronic voting system, the electronic record of each vote shall be considered the official record of the vote, except that the voter verified paper audit trail shall be the official paper audit record and shall be used in the manual tally and any recount.

Existing law provides that, if in the event of a recount of an election in which the votes were recorded by a punchcard, electronic, or electromechanical system, the voter demanding the recount may select whether the recount is conducted manually, by means of the voting system used originally, or both.

This bill would provide that for purposes of direct recording electronic voting systems, "conducted manually" means either that the paper record copies or the voter verified paper audit trail of the electronically recorded vote are counted manually, as selected by the voter who requests the recount. By increasing the duties of local elections officials, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 725 (SB 701) Migden Child care subsidies: City and County of San Francisco: pilot project.

Existing law requires the Superintendent of Public Instruction to adopt rules and regulations with respect to eligibility, enrollment, and priority of services for federal and state subsidized child care programs.

Existing law authorizes the County of San Mateo, as a pilot project, to develop and implement an individualized county child care subsidy plan.

This bill would, in addition, authorize the City and County of San Francisco, as a pilot project, to develop and implement an individualized county child care subsidy plan.

The bill would require the plan to ensure that child care subsidies received by the City and County of San Francisco are used to address local needs, conditions, and priorities of working families in the community. The bill would require the city and county, prior to implementing the plan, to develop a plan with specified elements, including development of local policies that may, except as specified, supersede existing law with regard to eligibility requirements, fees, reimbursement rates, and methods of maximizing use of funds. The bill would require the plan to be approved by the local child care planning council and the Child Development Division of the State Department of Education, as provided. The bill would require the Legislative Analyst and the Senate Office of Research to review the data contained in the child care subsidy plan before the plan is submitted to the local child care planning council for approval. The bill would require the city and county to submit annual reports to the Legislature, the State Department of Social Services, and the State Department

of Education that summarize the success of the plan and to submit a final report to those entities on or before December 31, 2010.

This bill would authorize the City and County of San Francisco to implement the plan until January 1, 2011, as specified. The bill would provide for the repeal of its provisions on January 1, 2013. The bill would provide that a child who enrolls in subsidized child care in the City and County of San Francisco after January 1, 2011, may not be enrolled in the pilot program and is subject to existing state laws and regulations regarding child care subsidies.

This bill would make legislative findings and declarations regarding the need for special legislation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 726 (SB 1016) Bowen Voter information: privacy.

(1) Existing law sets forth the requirements for the information to be provided on the affidavit of registration, including that the affidavit of registration include the affiant's California driver's license number, California identification card number, or any other identification number specified by the Secretary of State.

This bill would require that in the case of an applicant who has been issued a current and valid driver's license, the applicant's driver's license number be provided on the affidavit of registration, or, in the case of any other applicant, the last 4 digits of the applicant's social security number be provided on the affidavit of registration. The bill would require that, if an applicant for voter registration has not been issued a current and valid driver's license or a social security number, the state assign the applicant a number which will serve to identify the applicant for voter registration purposes. The bill would require the affidavit of registration to contain a specified statement about confidentiality of the personal information of certain voters, a statement that commercial use of voter registration information is a misdemeanor, and a toll-free hotline telephone number that the public may use to report suspected fraudulent activity concerning the misuse of voter registration information.

(2) Existing law requires any person who registers to vote to complete an affidavit of registration. The information contained in this affidavit of registration is generally confidential, except that it may be provided to any candidate for federal, state, or local office, to any committee for or against any initiative or referendum measure, or to any person for election, scholarly, journalistic, or governmental purposes. Use of this information for purposes other than those permitted by law is a misdemeanor.

This bill would inform voters about the permissible uses of the personal information supplied by them for the purpose of completing a voter registration affidavit, by requiring local elections officials to post on any local elections official Web site relating to voter information, and requiring the Secretary of State to print in the state ballot pamphlet and post on his or her Web site, information on possible uses of voter information, as specified. By requiring a local elections official to post the uses of voter information on any local elections official Web site, this bill imposes a state-mandated local program.

This bill would additionally make it a misdemeanor to knowingly use or permit the use of voter registration information for any personal, private, or commercial purpose. By creating a new crime, this bill would impose a state-mandated local program.

(3) Existing law sets forth the requirements and procedures for handling the voter registration card.

This bill would additionally require the voter registration card to contain a specified statement about confidentiality of the personal information of certain voters. The bill would additionally authorize the Secretary of State to exhaust the existing supply of voter registration cards prior to printing new or revised forms that contain the confidentiality statement. The bill would require the voter registration card to be confidential and not used for any personal, private, or commercial purpose, as specified.

This bill would provide that the signature of the voter shown on the voter registration card is confidential and would prohibit the disclosure of the signature to any person, except as specified.

(4) Existing law sets forth the requirements for an application for voter registration information, including a statement of the intended use of the information requested.

This bill would require the Secretary of State to study the feasibility of inserting fictitious names of voters into the voter registration information database as a possible investigative and enforcement tool for determining inappropriate or unauthorized use of voter registration information.

(5) Existing law establishes the procedures for preserving the uncanceled affidavits of registration, including the use of electronic media.

This bill would require that uncanceled affidavits of registration be preserved in a secure manner that will protect the confidentiality of the voter information.

(6) Existing law imposes various requirements concerning the circulation of initiative petitions, and prohibits, subject to misdemeanor penalties, the use of signatures on an initiative petition for a purpose other than qualification of the proposed measure for the ballot.

This bill would require the proponents of an initiative measure to ensure that any person, company, or other organization that is paid, or who volunteers, to solicit signatures to qualify the proposed measure for the ballot receive instruction on the requirements and prohibitions imposed by state law with respect to circulation of the petition and signature gathering thereon, with an emphasis on the prohibition on the use of signatures on an initiative petition for a purpose other than qualification of the proposed measure for the ballot.

This bill would require each proponent of an initiative measure to execute and submit, along with the request for a title and summary for the proposed measure, a signed statement, as specified, acknowledging that it is a misdemeanor under state law to knowingly or willfully allow the signatures on an initiative petition to be used for any purpose other than qualification of the proposed measure for the ballot, and certifying that he or she will not knowingly or willfully allow the signatures for the initiative to be used for any purpose other than qualification of the measure for the ballot.

This bill would require the person, company official, or other organizational officer who is in charge of signature gathering, prior to allowing any person to circulate an initiative petition for signatures, to execute and file a similar statement with the proponents. It would also require each circulator, prior to soliciting signatures on an initiative petition, to execute and submit to the person, company official, or other organizational officer who is in charge of signature gathering, a similar statement.

This bill, by requiring the proponents' certified statement required by this bill to be kept on file by the agency authorized to prepare the title and summary for the proposed initiative measure, would impose a state-mandated local program.

(7) This bill would incorporate additional changes to Section 2194 of the Elections Code, proposed by SB 506, to become operative only if SB 506 and this bill are both chaptered and become effective on or before January 1, 2006, and this bill is chaptered last.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 727 (SB 1087) Florez Housing elements: services.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

(1) The Planning and Zoning Law requires each city, county, or city and county to prepare and adopt a general plan for its jurisdiction that contains certain mandatory elements, including a housing element. One part of the housing element is an assessment of housing needs and an inventory of resources and constraints relevant to meeting those needs. That law also requires that the housing element adopted by the legislative body of the city, county, or city and county and any amendments made to that element be delivered to all public agencies or private entities that provide water services at retail or sewer services within the territory of the legislative body.

The Planning and Zoning Law also requires each public agency or private entity providing these services to grant a priority for the provision of available and future resources or services to proposed housing developments that help meet the legislative body's share of the regional housing need for lower income households as identified in the housing element and any amendments to the housing element.

This bill would require that the adopted housing element and any amendments be delivered immediately to all public agencies or private entities that provide water or sewer services, as specified, would apply these provisions to proposed developments that include housing units affordable to lower income households, and would require, on or before July 1, 2006, that these public agencies or private entities adopt written policies and procedures, and at least once every 5 years thereafter, with specific objective standards for provision of these services in conformance with these provisions. The bill would also require the Public Utilities Commission to adopt written policies and procedures for use by private water and sewer companies regulated by the commission in a manner consistent with these provisions. By increasing the duties of local public officials, the bill would impose a state-mandated local program.

This bill would also provide that a provider of water or sewer services may not deny or condition the approval of an application for services, or reduce the amount of the services applied for, if the proposed development includes housing affordable to lower income households, except upon making specified findings.

The bill would make these provisions applicable to charter cities.

(2) The Urban Water Management Planning Act requires urban water suppliers to prepare and adopt urban water management plans for submission to the Department of Water Resources, which identify and quantify the existing and planned sources of water available to the water supplier's service area based on specified factors.

This bill would also require that the water use projections required by these provisions include the projected water use for single-family and multifamily residential housing for lower income households as identified in the housing element of any city, county, or city and county in the service area of the supplier.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 728 (SB 1096) Dutton Satellite wagering: fairs.

Existing law permits fairs in specified counties to operate satellite wagering facilities, under certain circumstances, within their boundaries.

This bill would add San Bernardino to those counties that may operate satellite wagering facilities.

Under existing law, revenues distributed to the state from horseracing are deposited in the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes.

This bill would authorize additional satellite wagering, and would thereby increase the amount of money deposited into a continuously appropriated fund, thereby making an appropriation.

Ch. 729 (SB 484) Migden Cosmetics: chronic health effects.

The existing Sherman Food, Drug, and Cosmetic Law requires the State Department of Health Services to regulate the packaging, labeling, and advertising of food, drugs, and cosmetics. The law prohibits a person from manufacturing, selling, delivering, holding, offering for sale, or receiving in commerce any cosmetic that is adulterated, and prohibits a person from adulterating any cosmetic. The law also prohibits a person from manufacturing or selling any cosmetic that is misbranded. A violation of these provisions is a crime.

This bill would establish the California Safe Cosmetics Act of 2005. The bill, commencing January 1, 2007, would require the manufacturer of any cosmetic product subject to regulation by the federal Food and Drug Administration that is sold in the state, with certain exceptions, on a schedule and in electronic or other format, as determined by the Division of Environmental and Occupational Disease Control within the department, to provide the division with a list of its cosmetic products that, as of the date of submission, are sold in the state and contain any ingredient that is a chemical identified as causing cancer or reproductive toxicity. Since a violation of the provisions applicable to the packaging, labeling, and advertising of food, drugs, and cosmetics is a crime, this bill would impose a state-mandated local program.

The bill would authorize the division to conduct an investigation of cosmetic products that contain chemicals identified as causing cancer or reproductive toxicity or other ingredients of concern to the division. The bill would authorize the division to require manufacturers of products subject to investigation to submit relevant health effects data and studies and other information as requested by the division. The bill would require the division to establish reasonable deadlines for the submittal of that information and would make failure by a manufacturer to submit the information a crime, thereby imposing a state-mandated local program. If the division determines that an ingredient in a cosmetic product is potentially toxic, the bill would require the division to immediately refer the results of its investigation to the Division of Occupational Safety and Health in the Department of Industrial Relations and would require the Division of Occupational Safety and Health, within 180 days after it receives the results, to develop and present one or more proposed occupational health standards to the Occupational Safety and Health Standards Board in the Department of Industrial Relations, unless the Division of Occupational Safety and Health affirmatively determines, in a written finding within 90 days, that a standard is not necessary to protect the health of an employee who has regular exposure to the hazard for the period of his or her working life.

The bill would authorize the division, as early as feasible within existing resources, to determine whether certain cosmetics have been adequately substantiated for safety, and if the cosmetic has, to determine if the cosmetic contains any ingredient that is not safe for the specific use indicated on the product's label. If the division finds that a product has been adequately substantiated for safety despite containing an unsafe ingredient, the bill would require the division to refer its findings to the Attorney General and the federal Food and Drug Administration for possible enforcement action.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**RESOLUTION CHAPTERS**

Res. Ch. 1 (SCR 3) Murray. Dr. Martin Luther King, Jr. Day.

This measure would honor the late Dr. Martin Luther King, Jr. and commemorate the observance of his birthday, January 17, 2005, as Dr. Martin Luther King, Jr. Day. Fiscal committee: no.

Res. Ch. 2 (SCR 9) Kehoe. American Heart Month.

This measure would recognize the month of February 2005, as American Heart Month in California in order to raise awareness of the effect of heart disease on women. The measure would also recognize February 4, 2005, as Wear Red for Women Day in California and urge all citizens to become aware of the vital issues of women's heart health by wearing and displaying the color red on that day. This measure would also urge public support for Go Red for Women events planned in their community during American Heart Month. Fiscal committee: no.

Res. Ch. 3 (SCR 6) Morrow. Military and veterans: World War II invasion of Iwo Jima.

This measure would commemorate the 60th anniversary of the World War II invasion of the Island of Iwo Jima, the day the United States Marine Corps and Navy landed on the fortified beaches of Iwo Jima in opposition to the Japanese Empire, and would urge the people of California to honor the men of the United States who fought and died in the bloodiest battle ever fought by the U.S. Marine Corps in the pursuit of freedom and a just peace. Fiscal committee: no.

Res. Ch. 4 (ACR 13) Wolk. Spay Day USA 2005.

This measure would declare February 22, 2005, to be Spay Day USA 2005, and would request that Californians observe that day by having their dogs or cats spayed or neutered and by contributing to organizations that provide spay and neuter services. Fiscal committee: no.

Res. Ch. 5 (SCR 2) Scott. Arts Education Month.

This measure would proclaim March 2005 to be "Arts Education Month."

Res. Ch. 6 (ACR 6) Koretz. Financial literacy education.

This measure would declare the month of April 2005 as Financial Literacy Month, in order to raise public awareness about the need for increased financial literacy.

Res. Ch. 7 (ACR 9) Oropeza. California Girls and Women in Sports Day.

This measure would commemorate the accomplishments of female athletes, coaches, officials, and sports administrators for their important contribution in promoting the value of sports participation in the achievement of full human potential and would proclaim February 9, 2005, as California Girls and Women in Sports Day.

Res. Ch. 8 (ACR 10) Chu. Day of Remembrance.

This measure would declare February 19, 2005, as a Day of Remembrance in order to increase public awareness of the events surrounding the internment of Americans of Japanese ancestry during World War II.

Res. Ch. 9 (ACR 14) DeVore. Ukrainian election.

This measure would congratulate the people of Ukraine for persevering in the face of government opposition to conduct a democratic and fair runoff presidential election on December 26, 2004, congratulate Viktor Yushchenko on his election as President of Ukraine and his commitment to democracy and governmental reform, congratulate Yulia Tymoshenko on her selection as Prime Minister of the Government of Ukraine, and

congratulate the Ukrainian armed forces for their professionalism in the defense of democracy, rule of law, and national defense.

Res. Ch. 10 (SCR 26) Committee on Agriculture. National Agriculture Week and National Agriculture Day.

This measure would proclaim the week of March 20 to March 26, 2005, as National Agriculture Week and Sunday, March 20, 2005, as National Agriculture Day.

Res. Ch. 11 (SCR 27) Dunn. Drowsy Driver Awareness Day.

This measure would proclaim April 6, 2005, as Drowsy Driver Awareness Day, request the Governor to make a similar proclamation, and designate the state's observance of April 6 every year thereafter as a memorial day for those people who have died as a result of a collision involving a drowsy driver.

Res. Ch. 12 (ACR 19) Mullin. Irish-American Heritage Month.

This measure would designate March 2005 and March 2006 as Irish-American Heritage Month in honor of the multitude of contributions that Irish-Americans have made to the country and state.

Res. Ch. 13 (ACR 25) Benoit. Rotary International Day.

This measure would proclaim February 23, 2005, as Rotary International Day in California.

Res. Ch. 14 (ACR 31) Coto. Financial Empowerment Month.

This measure would proclaim April 2005 as Financial Empowerment Month.

Res. Ch. 15 (SCR 5) Battin. Deputy Bruce Lee Memorial Highway.

This measure would designate a specified portion of State Highway Route 111 in Riverside County as the Deputy Bruce Lee Memorial Highway.

The measure would request the Department of Transportation to determine the cost of appropriate signs showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 16 (SCR 13) Battin. Child Abuse Prevention Month.

This measure would acknowledge the month of April 2005 as Child Abuse Prevention Month, and encourage the people of the State of California to work together to support youth-serving child abuse prevention activities in their communities and schools.

Res. Ch. 17 (SCR 14) Runner. Satellite industry.

This measure would acknowledge the growth and contributions of the satellite industry to California, urge the public to recognize the growth of this sector as an important economic and job creation engine that deserves to be nurtured and encouraged to remain and expand in California, and recognize April 12, 2005, as California Space Day, in special recognition of how the satellite industry has found a consumer market and is improving the lives of our citizens.

Res. Ch. 18 (SCR 16) Battin. Motorcycle Awareness Month.

This measure would proclaim the month of May 2005 as Motorcycle Awareness Month.

Res. Ch. 19 (SCR 21) Ducheny. Nonprofit organizations.

This measure would designate the week of March 6 to 12, 2005, as California Nonprofit Organizations and Philanthropy Week.

Res. Ch. 20 (SCR 23) Scott. Lyme Disease Awareness Week.

This measure would proclaim May 4 through May 10, 2005, as Lyme Disease Awareness Week.

Res. Ch. 21 (SCR 35) Battin. Polio Awareness Day.

This measure would declare April 12, 2005, to be Polio Awareness Day, a day to commemorate the development of the polio vaccine and to acknowledge polio survivors.

Res. Ch. 22 (SJR 2) Speier. Armenian Genocide: Day of Remembrance.

This measure would designate April 24, 2005, as the "California Day of Remembrance for the Armenian Genocide of 1915-1923." It would memorialize the Congress of the United States to act likewise to commemorate the Armenian Genocide.

Res. Ch. 23 (ACR 4) Chu. Korean-American Day.

This measure would proclaim January 13, 2005, as Korean-American Day.

Res. Ch. 24 (ACR 32) Arambula. West Nile Virus and Mosquito and Vector Control Awareness Week.

This measure would declare April 25 through May 1, 2005, West Nile Virus and Mosquito and Vector Control Awareness Week.

Res. Ch. 25 (ACR 35) Hancock. California Police Activities League Day.

This measure would recognize April 11, 2005, as California Police Activities League Day in the State of California.

Res. Ch. 26 (ACR 17) Karnette. Language education.

This measure would recognize 2005 as the Year of Languages, and would encourage all educational communities to celebrate languages and cultures, and urge all citizens to become interested in, and to give full support to, quality language and cultural programs for all pupils in California schools.

Res. Ch. 27 (ACR 27) La Malfa. National engineers week.

This measure would recognize the week of February 20 to 26, 2005, as National Engineers Week.

Res. Ch. 28 (ACR 8) Dymally. Elder and dependent adult abuse.

This measure would proclaim the month of May this year and every year thereafter as Elder and Dependent Adult Abuse Awareness Month.

Res. Ch. 29 (ACR 12) Chavez. California Museum Month.

This measure would proclaim May 2005, as California Museum Month.

Res. Ch. 30 (ACR 21) Wolk. Watershed Awareness Month.

This measure would proclaim the month of May 2005, as Watershed Awareness Month.

Res. Ch. 31 (ACR 49) Frommer. Caltrans Workers Memorial Day

This measure would designate April 14, 2005, as Caltrans Workers Memorial Day. The measure would also direct the Department of General Services to place a plaque on the Capitol grounds commemorating the sacrifice of Caltrans workers.

Res. Ch. 32 (SCR 4) Torlakson. Public health awareness.

This measure would encourage various government, community, school, and workplace activities in support of public health awareness and prevention of obesity and diabetes.

Res. Ch. 33 (SCR 38) Alquist. Crime victims.

This measure would recognize the week of April 10 through April 16, 2005, as Crime Victims' Rights Week.

Res. Ch. 34 (SJR 1) Ashburn. Lemoore Military Operations Area (MOA) Initiative.

This measure would urge the President and the Congress of the United States to support the establishment of the Lemoore Military Operations Area (MOA) for joint use by military aircraft from both the Naval Air Station Lemoore and the California Air National Guard, Fresno, and would request the Federal Aviation Administration to approve the creation of the Lemoore MOA as quickly as possible.

Res. Ch. 35 (SJR 7) Bowen. Equal Pay Day.

This bill would proclaim April 19, 2005, as Equal Pay Day in California and would urge Congress to protect the right of all American women to receive equal pay for equal work, and to continue to provide effective remedies to victims of discrimination in the payment of wages on the basis of sex.

Res. Ch. 36 (SCR 33) Torlakson. California Fitness Month.

This measure would proclaim May 2005, as California Fitness Month, and encourage all Californians to enrich their lives through proper diet and exercise.

Res. Ch. 37 (ACR 7) Sharon Runner. State space tourism industry.

This measure would congratulate and express the Legislature's appreciation for the achievements of SpaceShipOne and the efforts of the team of Paul Allen, Burt Rutan, and pilots Mike Melvill and Brian Binnie in making privately funded manned space flight a commercial reality.

Res. Ch. 38 (ACR 41) Negrete McLeod. California Peace Officers' Memorial Day.

This measure would honor California peace officers and commemorate Friday, May 6, 2005, as California Peace Officers' Memorial Day.

Res. Ch. 39 (ACR 53) Lieber. Organ and tissue donation.

This measure would proclaim the support and observation of the Legislature of National Organ and Tissue Donor Awareness Week, April 20 through 26, 2005. The measure would also urge every Californian to consider becoming an organ donor and encourage organ and tissue recipients to tell others how their lives and health have changed because of the generosity of an organ donor.

Res. Ch. 40 (ACR 55) Jerome Horton. Day of the Teacher.

This measure would proclaim May 11, 2005, as the Day of the Teacher and urge all Californians to observe it.

Res. Ch. 41 (SCR 39) Alquist. Sexual Assault Awareness Month.

This measure would resolve that the month of April be designated henceforth as Sexual Assault Awareness Month.

Res. Ch. 42 (ACR 3) Cohn. Holocaust Memorial Week.

This measure would proclaim the time period of May 2, 2005, through May 8, 2005, as California Holocaust Memorial Week and would urge Californians to observe these days of remembrance for the victims of the Holocaust in an appropriate manner.

Res. Ch. 43 (ACR 18) Gordon. American Stroke Month 2005.

This measure would recognize May 2005 as American Stroke Month in California, and would urge all California citizens to familiarize themselves with the warning signs, symptoms, and risk factors associated with stroke, so that we might begin to reduce the devastating effects strokes have on our population.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Res. Ch. 44 (ACR 54) Yee. Mental Health Occupations Week.

This measure would recognize the week of May 15 through May 21, 2005, and every 3rd week of May of every year thereafter, as Mental Health Occupations Week.

Res. Ch. 45 (ACR 60) Mountjoy. National Day of Prayer.

This measure would recognize May 5, 2005, as a National Day of Prayer, and would encourage all the people of California to gather together in homes and places of worship to pray for their God's blessings upon our state and our nation.

Res. Ch. 46 (ACR 61) Benoit. The National Law Enforcement Museum.

This measure would endorse the effort to build the National Law Enforcement Museum and would encourage individuals and organizations throughout the State of California to support this worthy cause.

Res. Ch. 47 (ACR 62) Nakanishi. Asian and Pacific Islander American Heritage Month.

This measure would commend Asian and Pacific Islander Americans for their notable accomplishments and outstanding service to the state and recognize May 2005 as Asian and Pacific Islander American Heritage Month.

Res. Ch. 48 (ACR 44) Baca. Minority Health Awareness Month.

This measure would proclaim August of each year as Minority Health Awareness Month.

Res. Ch. 49 (ACR 66) Saldana. California Wetlands Month.

This measure would declare May of 2005 as California Wetlands Month.

Res. Ch. 50 (ACR 71) Saldana.

This measure would proclaim May 31, 2005, as Yellow Ribbon Day, a special day for Californians to extend their sincerest appreciation for the sacrifices military families and our troops are making and to commemorate our troops and their families with ceremonial activities.

Res. Ch. 51 (SCR 36) Alquist. Alzheimer's Association anniversary.

This measure would commend the Alzheimer's Association for its many accomplishments and service to families living with Alzheimer's disease and other dementia disorders on the occasion of the association's 25th anniversary.

Res. Ch. 52 (SCR 43) Figueroa. Autism Awareness Month.

This measure would proclaim April 2005 as Autism Awareness Month and would acknowledge the contributions made in the area of early autism intervention treatment by experts in the field and the sacrifice and dedication of families of autistic people. The measure would also declare the Legislature's support for increasing federal funding for autism research and the Legislature's continuing support of research into the causes and treatment of autism by the University of California, Davis M.I.N.D. Institute, and the work of the California Center for Autism and Developmental Disabilities Research and Epidemiology, and others. The measure would commend the United States Department of Health and Human Services for the swift implementation of the Children's Health Act of 2000. The measure would stress the need to begin early intervention services soon after a child has been diagnosed with autism.

Res. Ch. 53 (SCR 45) Denham. International Building Safety Week.

This measure would proclaim the week of May 8 to 14, 2005, as International Building Safety Week and urge all residents to participate in International Building Safety Week activities to help promote building safety, to create awareness as to the importance of

construction and building codes, and to spotlight the role of the dedicated code officials in administering those codes.

Res. Ch. 54 (ACR 30) McCarthy. Civic mission of schools.

This measure would urge the State Board of Education and all local school governing bodies to examine current practice and develop plans to increase and broaden emphasis on principles of democracy in the schools of this state.

Res. Ch. 55 (ACR 40) Lieber. League of Women Voters' 85th Anniversary.

This measure would recognize the origins and accomplishments of the League of Women Voters, and would memorialize the 85th anniversary of that organization.

Res. Ch. 56 (ACR 48) Goldberg. Girl Scouts.

This measure would commend the Girl Scouts for 93 years of service and for inspiring millions of girls with the highest ideals of character, conduct, and patriotism.

Res. Ch. 57 (AJR 6) Koretz. Darfur genocide.

This measure would express the sense of the Legislature with respect to matters surrounding the Darfur genocide and would request that the President and Congress of the United States continue to take all prudent and necessary steps to ensure that these matters are addressed at the highest levels of the federal government.

Res. Ch. 58 (AJR 7) Huff. ZIP Codes.

This measure would urge the United States Postmaster to create ZIP Codes that do not encompass more than one municipality.

Res. Ch. 59 (AJR 16) Baca. Fair and equitable treatment for truck and bus drivers.

This measure would memorialize the Congress and the President of the United States to take necessary action to amend the federal statutes in an expeditious manner to allow for the equal treatment of commercial drivers who are off duty and using a private vehicle when they incur minor traffic infractions.

Res. Ch. 60 (AJR 19) Dymally. Voting Rights Act of 1965.

This measure would memorialize the President and Congress of the United States to declare their public support for reauthorizing the federal Voting Rights Act of 1965, certain provisions of which are scheduled to expire in 2007 unless extended by Congress.

Res. Ch. 61 (SCR 24) Kuehl. Wildfire protection.

This measure would, in light of the annual losses in the state of life, property, and natural resources resulting from wildland fire, urge the federal government to provide federal financial assistance to be used to predict wildfire behavior. The measure would also request that the National Oceanic and Atmospheric Administration (NOAA) undertake the development of a National Fire Weather Center, which would allocate resources to provide rapid and accurate meteorological information that is useful for predicting the movement of wildfire perimeters, guiding evacuations, and enabling government officials to make informed decisions about how to most effectively attack a wildfire and deploy resources.

Res. Ch. 62 (SJR 14) Battin. The Ben Clark Public Safety Training Center.

This measure would urge the President and the Congress of the United States to recognize the Ben Clark Public Safety Training Center, located at March Air Reserve Base in Riverside County, as a leader in homeland security training.

Res. Ch. 63 (AJR 21) Karnette. Port customs revenues.

This measure would memorialize the Congress and the President of the United States to increase funding for California's ports and to enact legislation that, in recognition of the

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

unique role served by ports in California, would ensure a return of an equitable share of the customs revenue generated by, and collected from, this state.

Res. Ch. 64 (ACR 5) Mountjoy. Highways.

This measure would designate a portion of State Highway Route 138 as the Abiel Barron Memorial Highway. The measure also would request the Department of Transportation to determine the cost of appropriate signs showing that special designation, and, upon receiving donations from nonstate sources sufficient to cover the cost, to erect those signs.

Res. Ch. 65 (ACR 20) Oropeza. CHP Officer Merle L. Andrews Memorial Interchange.

This measure would designate the interchange of Interstate 405 and Interstate 110 in the City of Carson in the County of Los Angeles as the CHP Officer Merle L. Andrews Memorial Interchange. The measure would request the Department of Transportation to determine the cost for appropriate signs showing this designation and, upon receiving donations from nonstate sources covering those costs, to erect those signs.

Res. Ch. 66 (ACR 46) Strickland. California Highway Patrol Officer David W. Copleman Memorial Highway.

This measure would designate a portion of State Highway Route 126 from Hallock Drive to the city limit of the City of Fillmore in the County of Ventura as the California Highway Patrol Officer David W. Copleman Memorial Highway. The measure would request the Department of Transportation to determine the cost for appropriate signs showing this designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 67 (AJR 1) Bermudez. Dr. Dalip S. Saund.

This measure would memorialize the President and Congress of the United States to urge the Citizens' Stamp Advisory Committee and the United States Postal Service to issue a commemorative stamp to honor Dr. Dalip S. Saund, and would urge all Californians to celebrate his birthday each year in recognition of Dr. Saund's outstanding achievements.

Res. Ch. 68 (AJR 10) Chu. Foster care services: funding: Title IV-E Waiver.

This measure would declare legislative support for, and urge federal approval of, the California Title IV-E Waiver Demonstration Project Application (the Title IV-E Waiver), submitted to the United States Department of Health and Human Services. This measure would memorialize the Congress of the United States, and would urge states and counties, to enact laws and policies to allow for more flexible use of federal child welfare funding to support the needs of children and families at risk, even if the child is not removed from the home or formally made part of the child welfare system. The measure would urge designated federal, state, and local agencies to take related actions in furtherance of the Title IV-E Waiver.

Res. Ch. 69 (SCR 41) Machado. School crossing guards.

This measure would recognize the significant task of men and women who serve as school crossing guards of ensuring the safety of schoolchildren.

Res. Ch. 70 (ACR 16) Walk. Sergeant Gary R. Wagers Memorial Interchange.

This measure would designate the interchange of State Highway Route 5 and State Highway Route 113 the "CHP Sergeant Gary R. Wagers Memorial Interchange."

The measure also would request the Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation, and, upon receiving donations from nonstate sources sufficient to cover that cost, to erect those plaques and markers.

Res. Ch. 71 (ACR 68) Saldana Tall Ships Challenge 2005.

This measure would commend the California host ports and related nonprofit organizations for their efforts relative to hosting the Tall Ships Challenge 2005 and would commend the nations of the world that send their tall ships to participate in this event. The measure would invite all tall ships to continue to visit California.

Res. Ch. 72 (SCR 8) Battin Pearl Harbor Memorial Highway.

This measure would designate the portion of Interstate Highway 10 located in California as the Pearl Harbor Memorial Highway. The measure would also request the Department of Transportation to determine the cost of appropriate signs showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 73 (SCR 12) Machado CHP Officer Artie J. Hubbard Memorial Freeway.

This measure would designate a portion of State Highway Route 5 in the County of Sacramento as the CHP Officer Artie J. Hubbard Memorial Freeway. The measure would request the Department of Transportation to determine the cost for appropriate signs showing this designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 74 (SCR 18) Battin Native Americans: California Indian Heritage Month.

This measure would proclaim November 2005 as California Indian Heritage Month, encourage its observance with activities that celebrate our uniqueness as Americans, and commend California Indian nations for their outstanding contributions to this state.

Res. Ch. 75 (SCR 22) Battin California Hispanic Heritage Month.

This measure would proclaim September 15 to October 15, 2005, inclusive, as California Hispanic Heritage Month, and would encourage all Californians to observe this event in communities throughout the state.

Res. Ch. 76 (SCR 40) Lowenthal Liquefied natural gas facilities.

This measure would memorialize the President and Congress to take necessary action to preserve state and local authority over the siting of liquefied natural gas facilities.

Res. Ch. 77 (SJR 12) Chesbro Wine: user fees.

This measure would memorialize Congress to oppose and defeat a 2006 budget proposal for \$29 million in user fees to be collected by the Department of Treasury's Tax and Trade Bureau for wine label, formula, and permit applications and administrative costs.

Res. Ch. 78 (SCR 46) Romero Ruben Salazar Memorial Highway.

This measure would designate a portion of State Highway Route 710 in the County of Los Angeles as the Ruben Salazar Memorial Highway. The measure would request the Department of Transportation to determine the cost for appropriate signs showing this designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 79 (ACR 22) Dymally Charles R. Drew University of Medicine and Science: Martin Luther King General Hospital.

This measure would urge the Board of Supervisors of the County of Los Angeles and the Board of Trustees of the Charles R. Drew University of Medicine and Science to enter into a joint agreement to name a Chief Executive Officer to administer the university and the Martin Luther King General Hospital. The measure would also urge that the Chief Executive Officer be granted full authority over the joint operations of the university and the hospital.

Res. Ch. 80 (ACR 42) Chu Province of Jeju, Republic of Korea: sister-state relationship.

This measure would extend an invitation to the people of the Province of Jeju, Republic of Korea, to join California as a sister state.

Res. Ch. 81 (ACR 43) Jerome Horton Labor.

This measure would declare that the Division of Labor Standards Enforcement does not have the authority to promulgate a specified regulation relating to meal and rest periods, that this authority rests with the Legislature or the Industrial Welfare Commission, and that the specified regulation is inconsistent with existing law.

Res. Ch. 82 (ACR 69) Goldberg Boy Scouts of America.

This measure would recognize the efforts of Boy Scouts who earn the rank of Eagle Scout and encourage the Boy Scouts of America to accept for membership and leadership positions all qualified boys and men, without discriminating on the basis of sexual orientation or religious belief.

Res. Ch. 83 (AJR 3) Cohn Reproductive rights: Roe v. Wade.

This measure would memorialize the Congress and the President of the United States to protect and uphold the intent and substance of the United States Supreme Court decision in Roe v. Wade, relating to reproductive rights.

Res. Ch. 84 (AJR 5) Oropeza Corporate average fuel economy standards.

This measure would memorialize the Congress and the President of the United States to take necessary action to increase corporate average fuel economy standards by at least 1.5 miles per gallon per annum until total average fuel economy for the new light-duty motor vehicle fleet sold in California is double today's average.

Res. Ch. 85 (AJR 13) Torrico Social Security.

This measure would, among other things, memorialize the Congress of the United States to carefully study a variety of potential changes that will address Social Security's problems, while ensuring that the program will continue to meet its purpose of providing income protection and economic security for America's families, as specified.

Res. Ch. 86 (AJR 15) Baca Mag Instrument flashlight patent.

This measure would memorialize the Congress and the President of the United States to take necessary action to extend by 2 years the Mag Instrument flashlight patent by approving HR 607 and thereby protecting this highly valued manufacturing company and prized employment for the citizens of the Inland Empire.

Res. Ch. 87 (SCR 50) Dunn Fiftieth anniversary of Disneyland.

This measure would congratulate Disneyland and the Walt Disney Company on the 50th anniversary of Disneyland, and declare July 17, 2005, as Disneyland Day in California.

Res. Ch. 88 (SCR 54) Ashburn Valley Fever Awareness Month.

This measure would proclaim August 2005, as Valley Fever Awareness Month.

Res. Ch. 89 (SJR 9) Morrow Retired military personnel: Medicare.

This measure would request that the Congress and the President of the United States support and enact legislation that would provide Medicare payments to military treatment facilities for retired military personnel and their dependents who meet Medicare age standards.

Res. Ch. 90 (ACR 23) Garcia Intrastate trucking: traffic congestion.

This measure would urge regional transportation planning agencies, in consultation with the cities and counties of the state as well as the Department of Transportation, to examine the flow of traffic to develop commercial trucking routes that would provide for the most direct movement through a city and a county in order to reduce the time that trucks are in city limits and county areas and the level of pollution that is created, and would urge cities and counties to incorporate this process as part of the revisions to their general and specific plans.

Res. Ch. 91 (ACR 33) Lieber Joint Committee on Human Trafficking in California.

This measure would establish the Joint Committee on Human Trafficking in California, to study and investigate issues relating to human trafficking, which would consist of 5 Assembly Members appointed by the Speaker of the Assembly and 5 Senators appointed by the Senate Committee on Rules. The measure would prescribe the duties and powers of the committee, and would authorize the committee to act until November 30, 2006.

Res. Ch. 92 (ACR 50) Tran Pope John Paul II.

This measure would note with deep sorrow and solemn mourning the death of His Holiness Pope John Paul II, would extend heartfelt sympathy to all people who have been touched by the passing of Pope John Paul II, would commend Pope John Paul II for his ability to transcend the bounds of religion, race, and political thought, becoming a formidable champion, uniter, and defender in humanity's struggle for peace and basic human rights, and would call on all the people of California to reflect on the life and legacy of Pope John Paul II during this international period of remembrance.

Res. Ch. 93 (AJR 8) Canciamilla Marine pollution.

This measure would urge the Congress of the United States to ratify treaty provisions known as Annex VI of MARPOL 73/78, and the United States Environmental Protection Agency to pursue the creation of a North America Sulfur Emission Control Area.

Res. Ch. 94 (AJR 14) Yee Oil and gas: offshore drilling: leases: moratorium.

This measure would request that Congress continue the federal offshore oil and gas leasing moratorium for fiscal year 2006 and beyond, and would express opposition to certain provisions of proposed federal energy policies and legislation.

Res. Ch. 95 (SJR 8) Soto Federal Enhancing Education Through Technology Act.

This measure would request Congress and the President to fully restore federal Enhancing Education Through Technology Act funding to the amount originally authorized under the federal No Child Left Behind Act of 2001.

Res. Ch. 96 (AJR 12) Gordon Military base realignment and closure.

This measure would memorialize the President and the Congress of the United States to recognize that California's military installations possess critical military value in a manner consistent with the congressionally approved 2005 BRAC Closure and Realignment Selection Criteria and to also examine additional specified criteria for military base retention which recognizes the unique military value of California's military installations.

Res. Ch. 97 (SCR 47) Alquist Health Care Decisions Week.

This measure would recognize the week of October 24 through 30, 2005, as Health Care Decisions Week in California, and would encourage all citizens to think and talk with loved ones about their wishes for medical care.

Res. Ch. 98 (ACR 11) Dymally Public Employees' Retirement System: Sudan.

This measure would encourage the Public Employees' Retirement System and the California State Teachers' Retirement System, whenever feasible and consistent with their fiduciary responsibilities, to encourage companies in which employee retirement funds are

invested and that are doing business in Sudan, as identified by the Department of Treasury's Office of Foreign Assets Control, to act responsibly and not take actions that promote or otherwise enable human rights violations in the Sudan.

Res. Ch. 99 (ACR 29) Leslie Access Awareness Month.

This measure would recognize July 2005, as Access Awareness Month, and urge all citizens to join the Legislature in recognizing the 15th anniversary of the Americans with Disabilities Act (ADA). This measure would also encourage businesses and people with disabilities to work together to achieve a greater cooperation towards compliance with the ADA.

Res. Ch. 100 (ACR 67) Plescia Wadie P. Deddeh State Office Building.

This measure would designate the Department of Transportation District 11 office building in San Diego as the Wadie P. Deddeh State Office Building.

Res. Ch. 101 (AJR 22) Bass School records.

This measure would memorialize the Congress and the President to enact an exception to the federal Family Educational Rights and Privacy Act to allow schools to share relevant pupil records with interagency child death teams.

Res. Ch. 102 (AJR 23) Klehs Japanese internment camps.

This measure would urge the United States Congress, including all members of the California delegation, to vote for passage of, and urge President Bush to sign into law legislation that would authorize \$38 million in federal funds to preserve camps where Japanese-Americans were interned during World War II.

Res. Ch. 103 (AJR 27) Jones Organized labor.

This measure would memorialize the Congress of the United States to enact pending federal legislation that would protect and preserve the right of American workers to organize.

Res. Ch. 104 (SCR 10) Aanestad Hansen Way.

This measure would designate the State Highway Route 20/49 northeast bound frontage road in Grass Valley from its intersection with South Auburn Street to its intersection with Bennett Street as "Hansen Way." The measure would request the Department of Transportation to determine the cost for appropriate signs showing this designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 105 (SCR 25) Speier Employer safety practices.

This measure would urge employers to ensure that their injury prevention programs and other systems for identifying and correcting workplace hazards consider the effects of ultraviolet radiation and ensure that skin cancer prevention policies for outdoor workers are put into operation.

The measure would also urge the appropriate state agencies to utilize existing means of communication with employers to advise employers of the importance of sun safety and skin cancer protections in the workplace.

Res. Ch. 106 (SCR 29) Kehoe Emergency services and homeland security.

Under existing law, the Blue Ribbon Fire Commission is established in state government by action of the Governor to investigate the circumstances surrounding the October 2003 fires in southern California and that commission recommended the establishment of a permanent Joint Legislative Committee on Emergency Services and Homeland Security.

This measure would create the Joint Legislative Committee on Emergency Services and Homeland Security, with specified membership of each house of the Legislature. The joint committee would be constituted as an investigating committee of the houses, and its powers

would include making recommendations as to legislation and forming technical advisory committees to assist it in carrying out its duties. The joint committee would continue in existence until November 30, 2006.

Res. Ch. 107 (SCR 58) Alquist Assisted Living Week.

This measure would proclaim the week of September 11 to 17, 2005, as Assisted Living Week, and encourage all residents to visit friends and loved ones who reside in assisted living communities and to learn more about this valuable service.

Res. Ch. 108 (SJR 11) Kehoe Military: "Don't Ask, Don't Tell" policy.

This measure would urge the Congress and the President of the United States to adopt the Military Readiness Enhancement Act of 2005 (H.R. 1059), that institutes a policy of nondiscrimination based on sexual orientation, and to repeal the "Don't Ask, Don't Tell" policy.

Res. Ch. 109 (SJR 17) Ortiz Stem cell research.

This measure would memorialize Congress and the President of the United States to take specified actions regarding stem cell research and to prohibit human cloning.

Res. Ch. 110 (ACR 2) Cohn Domestic Violence Awareness Month.

This measure would proclaim the month of October 2005 as Domestic Violence Awareness Month.

Res. Ch. 111 (ACR 24) Mullin California Council on Science and Technology.

This measure would request the California Council on Science and Technology to expand the scope of its study group on how the State of California should treat intellectual property created under state contracts to include contracts, grants, and agreements developed under Proposition 71 of the November 2, 2004, general election and to study and report to the Legislature on how the commercialization of technology developed with the investment of taxpayer dollars could generate a public financial benefit. It would also request the council to establish a review group to review and comment on the study.

Res. Ch. 112 (ACR 36) Berg Breast Cancer Awareness and Prevention Month.

This measure would proclaim the month of October 2005 as "Breast Cancer Awareness and Prevention Month."

Res. Ch. 113 (ACR 57) Salinas Automated external defibrillator programs.

This measure would urge all California public schools maintaining kindergarten or any of grades 1 to 12, inclusive, to implement an automated external defibrillator program.

Res. Ch. 114 (ACR 59) Baca California Native American History Month.

This measure would recognize the month of November 2005 as California Native American Indian History Month.

Res. Ch. 115 (ACR 63) Negrete McLeod CYA Counselor Ineasie M. Baker Memorial Freeway.

This measure would designate State Highway Route 60 from Milliken Avenue to Euclid Avenue the CYA Counselor Ineasie M. Baker Memorial Freeway.

This measure would also request the Department of Transportation to determine the cost of appropriate signs showing this special designation, and, upon receiving donations from nonstate sources sufficient to cover that cost, to erect those signs.

Res. Ch. 116 (ACR 75) Oropeza Chronic kidney disease.

This measure would designate August 8 through 12, 2005, as California Chronic Kidney Disease Education Week and would urge all Californians to familiarize themselves with the

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

causes of chronic kidney disease and the importance of intervention to promote sustained health and a better quality of life.

Res. Ch. 117 (AJR 2) Evans Full benefits for Filipino veterans of the United States Armed Forces.

This measure would memorialize the President and the Congress of the United States to honor the contributions of Filipino-American war veterans and direct the federal government to immediately pay promised veterans' benefits as the first order of business of the 109th Congress.

Res. Ch. 118 (AJR 17) Jones Child support penalties.

This measure would request the Congress of the United States to enact the Child Support Reinvestment Act of 2005 which would revise the method used to assess federal penalties imposed for the failure of a state to fully implement a certified statewide child support automation system, as specified.

Res. Ch. 119 (AJR 18) Jones Amtrak.

This measure would memorialize the Congress of the United States to provide adequate operating and capital funding for Amtrak at specified levels, to preserve and improve the 4 national network Amtrak trains currently serving California, and to establish a multiyear capital funding program available to the states on a matching basis to initiate, improve, or expand passenger rail services and provide an adequate level of capital funding for Amtrak to sustain the mandated rail passenger services.

Res. Ch. 120 (AJR 24) Calderon Ryan White CARE Act reauthorization.

This measure would urge the Congress and the President of the United States to expeditiously reauthorize the Ryan White Comprehensive AIDS Resources Emergency (CARE) Act.

Res. Ch. 121 (SCR 11) Aanestad Tinloy Street.

This measure would designate the State Highway Route 20/49 southwest bound frontage road in Grass Valley from the intersection of East Main Street and Idaho Maryland Road to its intersection with South Auburn Street as "Tinloy Street." The measure would request the Department of Transportation to determine the cost for appropriate signs showing this designation and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 122 (SCR 42) Campbell California Law Revision Commission: studies.

Under existing law, the California Law Revision Commission is required to study, and is limited to studying, those topics approved for its study by concurrent resolution of the Legislature.

This measure would require the commission, in consultation with the Senate and Assembly Judiciary Committees, to conduct a comprehensive study and prepare a report concerning the advantages and disadvantages of the provisions of the Probate Code relating to no contest clauses. The bill would also require the commission to review the various approaches in this area of law taken by other states and proposed in the Uniform Probate Code and present an evaluation to the Legislature.

Res. Ch. 123 (SCR 49) Speier Medication errors panel.

This measure would create a panel to study the causes of medication errors and recommend changes in the health care system that would reduce errors associated with the delivery of prescription and over-the-counter medication to consumers. The measure would require the panel to convene by October 1, 2005, and to submit to the Assembly Committee on Health

and the Senate Committee on Health a preliminary report by March 1, 2006, and a final report by June 1, 2006.

Res. Ch. 124 (SCR 51) Perata Legislative Blue Ribbon Commission on Autism.

This measure would establish, until November 30, 2007, the Legislative Blue Ribbon Commission on Autism. The measure would require the commission to report related findings and recommendations to the Governor and to the Legislature no later than September 30, 2007.

Res. Ch. 125 (SCR 56) Alarcon Latino AIDS Awareness Day.

This measure would proclaim October 15 as Latino AIDS Awareness Day, and would urge all community-based organizations, religious communities, civic groups, health care providers, elected officials, and government agencies to utilize this day to raise awareness of the impact of HIV and AIDS in the Latino community.

Res. Ch. 126 (SCR 59) Figueroa Pain Awareness Month.

This measure would proclaim the month of September 2005 as Pain Awareness Month.

Res. Ch. 127 (SCR 61) Ortiz Ovarian Cancer Awareness Month.

This measure would provide that the California Legislature recognizes September 2005 as Ovarian Cancer Awareness Month throughout California, and would encourage and promote the efforts of the people and the health care practitioners of the state to increase their awareness of this disease and to educate themselves about its early detection and prevention, the risk factors involved in its development, and the early warning symptoms and signs.

Res. Ch. 128 (ACR 1) Negrete McLeod Proposition 71: stem cell research.

This measure would urge the Independent Citizen's Oversight Committee established pursuant to Proposition 71 approved by the voters at the November 2, 2004, general election, to adopt robust conflict-of-interest standards for itself and for the members of its working groups, to comply with standards set forth in provisions of law relating to open meetings of public agencies and public records, to commit itself to seek to ensure therapies are available to low-income residents, and to report to the Legislature by January 1, 2006.

Res. Ch. 129 (ACR 15) Evans In-Home Supportive Services Home Care Worker Recognition Week.

This bill would proclaim the second week of November to be In-Home Supportive Services (IHSS) Home Care Worker Recognition Week, and would recognize, and commend the contributions of IHSS caregivers who give their time, patience, care, and support to their families and the entire community.

Res. Ch. 130 (ACR 37) Berg Public broadcasting.

This measure would recognize the considerable contribution that the public broadcasting stations of this state make in educating and informing the residents of our state and would urge all state agencies to consider and explore partnerships with these stations that might assist in effectively and efficiently carrying out the responsibilities and mandates of those state agencies without increasing existing state expenditures.

Res. Ch. 131 (ACR 51) Jerome Horton State Employee Appreciation Month.

This measure would declare and recognize October 2005, as State Employee Appreciation Month.

Res. Ch. 132 (ACR 70) Umberg Westminster Police Officer Steven L. Phillips Memorial Highway.

This measure would designate the portion of State Highway Route 39 within the boundaries of the City of Westminster as the Westminster Police Officer Steven L. Phillips Memorial Highway.

The measure would also request the Department of Transportation to determine the cost of appropriate signs showing that special designation, and, upon receiving donations from nonstate sources sufficient to cover that cost, to erect those signs.

Res. Ch. 133 (ACR 74) Saldana Title IX: 33rd anniversary of its enactment and California schools' athletics policies.

This measure would commemorate the 33rd anniversary of the enactment of Title IX of the federal Education Amendments of 1972 to the Civil Rights Act of 1964, and would urge California educational institutions, as specified, to continue to comply with Title IX requirements relating to athletics by relying on various sources of information rather than a single survey to determine whether the institution is fully and effectively accommodating the athletic interests and abilities of both sexes.

Res. Ch. 134 (ACR 76) Yee Microenterprise Development Month.

This measure would recognize the month of October 2005 as Microenterprise Development Month.

Res. Ch. 135 (ACR 83) Frommer White Cane Safety Day.

This measure would proclaim October 15, 2005, as White Cane Safety Day and call upon schools to offer opportunities for training to blind persons, public and private employers to utilize the skills of blind persons and open new opportunities for the blind, and all citizens to recognize the white cane and guide dog as instruments of safety and self-help for blind pedestrians.

Res. Ch. 136 (ACR 85) Leno Court Adoption and Permanency Month.

This measure would proclaim November 2005, as Court Adoption and Permanency Month.

Res. Ch. 137 (ACR 86) Parra Emergency assistance.

This measure would urge all Californians to participate in the ICE (In Case of Emergency) campaign by entering ICE information into their cell phone memory, thereby assisting medical and other personnel in an emergency to contact designated persons and access medical data.

Res. Ch. 138 (ACR 87) Niello Blood cancers.

This measure would designate September 2005, as "Leukemia, Lymphoma, and Myeloma Awareness Month," in order to enhance the understanding of blood cancers and to encourage participation in voluntary activities to support education programs and funding of research programs to find a cure for them.

Res. Ch. 139 (ACR 88) Parra Firefighters Memorial Day.

This measure would designate October 15, 2005, as California Firefighters Memorial Day and urge all Californians to remember firefighters who have given their lives in the line of duty and express appreciation to those who continue to protect the state against fires.

Res. Ch. 140 (ACR 89) Mountjoy Constitution Week and Constitution Day.

This measure would declare the 3rd week in September as Constitution Week and September 17 as Constitution Day.

Res. Ch. 141 (ACR 90) Arambula Red Ribbon Week.

This measure would proclaim October 23 through October 29, 2005, as Red Ribbon Week, and would encourage all Californians to help build drug-free communities and participate in drug prevention activities.

Res. Ch. 142 (ACR 92) La Malfa California Rice Month.

This measure would recognize the significance and contribution of the rice industry to California's economy, cuisine, and environment and would designate the month of September as California Rice Month.

Res. Ch. 143 (ACR 93) Bogh California Economic Literacy Week.

This measure would designate the week of October 24, 2005, through October 28, 2005, as California Economic Literacy Week, and would urge Californians to observe these days by working for a better understanding of our economic system.

Res. Ch. 144 (AJR 26) Chu Federal TRIO programs: Upward Bound and Talent Search.

This measure would memorialize the President and the Congress to remove from the President's 2006 budget proposal the recommendation that would eliminate the federal TRIO programs, Upward Bound and Talent Search. The measure would also request that the federal TRIO programs, Upward Bound and Talent Search, continue to be funded.

Res. Ch. 145 (AJR 30) Liu Women's Equality Day.

This measure would memorialize the Congress and the President of the United States to uphold protections of women's equality and to encourage all Americans to participate in the celebration of Women's Equality Day on August 26, 2005, the 85th anniversary of the passage of the Nineteenth Amendment to the United States Constitution, which gave women the right to vote.

**RESOLUTION CHAPTERS**

None.

## 2005 DIGEST CHAPTERS SUPERIOR NUMBERS

1 [Ch. 38] I object to the following appropriations contained in Senate Bill 77.

Item 0250-111-0001—For transfer by the Controller to the Trial Court Trust Fund. I reduce this item from \$1,453,866,000 to \$1,386,566,000.

I am reducing this item by \$57,500,000 as a one-time base veto of a portion of the General Fund transfer to the Trial Court Trust Fund. This veto decreases the reserve in the Trial Court Trust Fund from \$67,500,000 to \$10,000,000, leaving a sufficient reserve in case revenues fall short of expected levels. The Trial Court Trust Fund does not need a large reserve since, pursuant to recent legislation, its primary fund sources now receive a statutory annual adjustment based on the increase in the State Appropriations Limit.

I am also reducing this item by \$9,800,000. The Legislature adopted Uniform Civil Filing Fees trailer bill language that would bring in increased revenue of \$14,750,000 in 2005–06 to the Trial Court Trust Fund. Of this amount, \$4,950,000 will be available as additional expenditure authority to the Trial Court Trust Fund for the facilities program and the remaining \$9,800,000 will offset the General Fund transfer. Since the Uniform Civil Filing Fee will not be implemented until January 1, 2006, the above amounts are for a half-year only and will be annualized in 2006–07. As such, the ongoing offset to the General Fund transfer will be \$19,600,000.

Item 0520-001-9329—For support of Secretary for Business, Transportation and Housing. I delete this item.

I am deleting the \$2,000,000 legislative augmentation that would provide loans to chrome plating businesses. This augmentation is associated with pending legislation and I am opposed to the appropriation of funds for legislation that has not yet been approved by the Legislature and the Administration.

Item 0540-001-0140—For support of Secretary for Resources. I revise this item by reducing:

(1) 10-Administration of Resources Agency from \$8,378,000 to \$8,362,000, and by deleting:

(5.5) Amount payable from the River Protection Subaccount (Item 0540-001-6015) (–\$16,000).

I am revising this item to conform to the action I have taken in Items 0540-490 and 0540-001-6015.

Item 0540-001-6015—For support of Secretary for Resources. I delete this item.

I am deleting this item to conform to the action I have taken in Items 0540-490 and 0540-001-0140.

Item 0540-490—Reappropriation, Secretary for Resources. I revise this item as follows:

“Notwithstanding any other provision of law, the period to liquidate encumbrances of the following citations are extended to June 30, 2006:

0001—General Fund

(1) Item 0540-101-0001, Budget Act of 1999 (Ch. 50, Stats. 1999)

(2) Item 0540-101-0001, Budget Act of 2000 (Ch. 52, Stats. 2000)

(3) Item 0540-101-0001, Budget Act of 2001 (Ch. 106, Stats. 2001)

0890—Federal Trust Fund

(1) Item 0540-001-0890, Budget Act of 2002 (Ch. 379, Stats. 2002)

6015—River Protection Subaccount

(+) ~~Item 0540-101-6015, Budget Act of 2000 (Ch. 52; Stats. 2000)~~

(a) ~~Los Angeles River Parkways<sup>22</sup>~~

I am eliminating the availability of funding provided to the City of Maywood for the Maywood Riverfront Park. Funds for this project have been available since 2000 and

the City has not yet purchased the land as required by the grant agreement. Several obstacles remain, making this purchase unlikely in the near future. Consequently, it would not be prudent to continue earmarking these funds for the Maywood project.

I am revising this item to conform to the action I have taken in Items 0540-001-0140 and 0540-001-6015.

Item 0555-001-0044—For support of Secretary for Environmental Protection. I revise this item by reducing:

- (1) 30-Support from \$9,703,000 to \$9,203,000, and
- (11.5) Amount payable from the Public Interest Research, Development and Demonstration Fund (Item 0555-001-0381) (–\$500,000).

I am revising this item to conform to the action I have taken in Item 0555-001-0381.

Item 0555-001-0381—For support of Secretary for Environmental Protection. I delete this item and Provision 1.

I am deleting the \$500,000 legislative augmentation to support the California Climate Action Registry. The work of the Registry is important to accomplishing the goals of the state's greenhouse gas reduction targets, but the Energy Commission already provided \$200,000 in 2004–05 for this purpose. Furthermore, I believe that awards under the Public Interest Energy Research Program should be funded through the existing competitive grant process.

I am deleting Provision 1 to conform to this action.

Item 0855-101-0367—For local assistance, California Gambling Control Commission. I reduce this item from \$50,000,000 to \$30,000,000.

I am deleting the \$20,000,000 legislative augmentation to provide additional grant funds to mitigate the impacts of tribal gaming on local government agencies. I am supportive of these mitigation efforts and understand their importance, especially to areas with significant concentrations of tribal casinos. Because local government agencies have not provided required annual reports that detail the specific projects funded in their jurisdictions in the past two years, I do not have sufficient information to justify this augmentation.

Item 0860-001-0001—For support of the State Board of Equalization. I reduce this item from \$211,158,000 to \$210,843,000 by reducing:

- (1) 100000-Personal Services from \$275,822,880 to \$275,506,880;
- (2) 300000-Operating Expenses and Equipment from \$89,199,120 to \$89,030,120; and
- (3) Reimbursements from –\$104,504,000 to –\$104,334,000.

I am deleting the \$485,000 legislative augmentation for eight Consumer Use Tax collection positions. My Budget proposed, and the Legislature approved, seven new positions for this purpose. These positions are adequate to address workload needs.

Item 1111-002-0239—For support of the Bureau of Security and Investigative Services. I reduce this item from \$7,241,000 to \$6,958,000 by reducing:

- (1) 25.10.010-Bureau of Security and Investigative Services, Private Security Services Program from \$9,695,000 to \$9,412,000. I am vetoing this legislative augmentation of \$283,000 and 3.0 positions for the Bureau of Security and Investigative Services. This augmentation is not based on a justified programmatic need, but rather was made because there is a growing fund reserve in the Private Security Services Fund. The growing fund balance reflects a need for the Bureau to reduce fees paid by registrants and is not a reason to increase staffing.

Item 1730-001-0001—For support of Franchise Tax Board. I reduce this item from \$508,091,000 to \$506,865,000, by reducing:

- (1) 10-Tax Programs from \$432,283,000 to \$431,057,000, and by deleting Provision 8.

I am deleting the \$1,226,000 legislative augmentation that provides 14 additional positions to establish a Misdemeanor Program within the Franchise Tax Board. I am concerned that this program might result in charges against persons who innocently failed to recognize that they had taxable income. There is no indication that local prosecutors would be willing to pursue these cases. Consequently, the revenue projections associated with this augmentation are questionable.

I am deleting Provision 8 of this item. The provisional language would allow the Board to divert up to \$200,000 that is appropriated for activities designed to narrow the tax gap. Specifically, the language would allow the Board to hire outside consultants to study independent contractor withholding and tax compliance issues. I do not believe that funds appropriated for the tax gap proposals should be redirected for other purposes. Furthermore, the Board has studied this issue in the past, and it concluded that California should not take action on this issue unless the federal government takes similar action.

Item 1760-001-0666—For support of Department of General Services. I reduce this item from \$590,238,000 to \$584,086,000 by reducing:

(1) Program support from \$802,572,000 to \$796,420,000, and by deleting Provision 12.

I am reducing \$6,152,000 and 114.0 personnel years from the Office of State Publishing (OSP) to realign expenditures and revenues. For the last several years, the OSP has not generated sufficient revenues to support its current operations.

I am deleting Provision 12, which would require the Department to provide a report that could lead to disclosure of confidential or proprietary information related to negotiated pharmaceutical contracts. Since trailer bill language also requires the Department to report on these contracts, and does so in a way that would not jeopardize the confidentiality of the negotiated pricing, this Provision is unnecessary.

Item 2150-001-0298—For support of Department of Financial Institutions. I reduce this item from \$18,882,000 to \$18,881,000, by reducing:

(5) 60-Credit Unions from \$3,827,000 to \$3,826,000.

I am reducing this item by \$1,000 to reflect the elimination of the Credit Union Advisory Committee. This is consistent with my commitment to eliminate unnecessary boards and commissions.

Item 2240-105-0001—For transfer to the Emergency Housing and Assistance Fund.

I am sustaining \$864,000 General Fund for the Emergency Housing Assistance Program in this item, on a one-time basis, to continue shelter beds during a transition period while new beds are developed under my proposal to create permanent housing with supportive services for the chronically homeless.

Item 2660-022-0042—For transfer by the Controller from the State Highway Account, State Transportation Fund, to the Environmental Enhancement and Mitigation Program Fund. I delete this item.

I am deleting the \$10,000,000 legislative augmentation for the discretionary Environmental Enhancement and Mitigation Demonstration Program that provides grants to local entities for highway landscaping, urban forestry, the purchase of resource lands, and roadside recreation such as the construction of hiking and biking trails. While preserving open space is an extremely important function in maintaining our environment, improving mobility and increasing maintenance for our state highways is critical. This augmentation is not the best use of scarce transportation funds.

Item 2660-101-0183—For local assistance, Department of Transportation. I delete this item.

I am deleting this item to conform to the action I have taken in Item 2660-022-0042.

Item 2660-102-0890—For local assistance, Department of Transportation. I revise this item by revising Provision 4 as follows:

- “4. Of the amount appropriated in this item, \$5,000,000 is for regional blueprint planning grants. ~~Of the \$5,000,000, at least 20 percent of the funds shall be allocated by the Department of Transportation; in consultation with the Department of Housing and Community Development; for grants to those regional councils of governments that have Regional Housing Needs Assessment tasks scheduled for the 2005–06 fiscal year to assist with preparation of their Regional Housing Needs Assessment in order to coordinate and integrate housing and transportation planning to the extent allowable under federal law. If the Regional Housing Needs Assessment is determined to be a reimbursable state mandate pursuant to Section 6 of Article XXIB of the California Constitution; then any grants received by councils of governments to prepare the assessment under this item shall be considered an offsetting revenue for the purposes of claiming state reimbursement.~~”

I am revising Provision 4, because it would require the use of transportation funds for non-transportation purposes, which is not consistent with the intent of the regional blueprint planning program and may not be consistent with federal law.

Item 2665-001-0046—For support of the High-Speed Rail Authority. I reduce this item from \$4,251,000 to \$3,926,000 by reducing:

- (1) 10-High-Speed Rail Authority from \$4,576,000 to \$3,926,000; and by deleting:
  - (2) Reimbursements (–\$325,000);
- and by deleting Provision 2.

I am deleting the legislative augmentation of \$650,000 and 0.5 positions to conduct a study of route alternatives and potential station locations along the Fresno-to-Bakersfield corridor. The High-Speed Rail Authority has already completed a study of this corridor and has not designated any station locations other than Fresno and Bakersfield.

I am deleting Provision 2 to conform to this action.

Item 3360-011-0381—For transfer by the Controller from the Public Interest Research, Development, and Demonstration Fund to the General Fund. I delete this item.

I am deleting the transfer of \$4,000,000 in interest earnings from the Public Interest Research, Development, and Demonstration Fund (PIER Fund) to the General Fund. The PIER Fund is a trust fund to be used for projects that benefit the ratepayers paying the surcharge. Consequently, interest earnings should remain in the fund to be used for projects that promote electricity efficiency and environmentally sustainable energy development.

Item 3480-001-0001—For support of Department of Conservation. I revise this item by reducing:

- (3) 30-Land Resource Protection from \$4,256,000 to \$3,911,000, and
- (13) Amount payable from the Soil Conservation Fund (Item 3480-001-0141) from –\$2,599,000 to –\$2,254,000.

I am revising this item to conform to the action I have taken in Item 3480-001-0141.

Item 3480-001-0141—For support of Department of Conservation. I reduce this item from \$2,599,000 to \$2,254,000.

I am deleting the \$345,000 legislative augmentation to increase staffing for Williamson Act enforcement activities. The need for additional staff for enforcement of the Williamson Act has not been clearly demonstrated. Consequently, I am unable to support this augmentation from the limited resources in the Soil Conservation Fund.

Item 3600-001-0384—For support of Department of Fish and Game. I reduce this item from \$8,000,000 to \$4,000,000.

I am revising this item to conform to the action taken in Item 3640-401.

Item 3640-401—Wildlife Conservation Board. I revise this item as follows: “Notwithstanding any other provision of law, the balance of revenues that would have been deposited in the California Housing Trust Fund and the Resources Trust Fund, pursuant to Section 6217 of the Public Resources Code, shall be allocated in the following order:

Provisions:

1. ~~\$8,000,000~~ *\$2,000,000* shall be deposited into the State Parks and Recreation Fund for the Department of Parks and Recreation Maintenance and Park Ranger staff and deferred maintenance. It is the intent of the Legislature that this augmentation be used to establish up to 40 new parks positions. These funds are intended to be ongoing.
2. ~~\$8,000,000~~ *\$4,000,000* shall be deposited into the Salmon and Steelhead Trout Restoration Account for salmon and steelhead trout restoration projects authorized by Section 62171 of the Public Resources Code, including, but not limited to, projects that implement the Coho Salmon Recovery Plan.
3. \$48,000,000 shall be deposited in the General Fund.
4. ~~\$3,000,000 shall be deposited into the Fish and Game Preservation Fund to continue operation of state fish hatcheries located in various regions of the state.~~
5. ~~\$3,000,000 shall be deposited into the State Parks and Recreation Fund for deferred maintenance.~~
6. Any revenues remaining after expenditure for the purposes specified in Provisions 1, 2, 3, 4, ~~and 5~~; shall be deposited in the General Fund.”

I am reducing Provisions 1 and 2, which would transfer Tidelands Oil Revenue to specified funds within the Department of Parks and Recreation for staffing and deferred maintenance projects, and the Department of Fish and Game for salmon and steelhead restoration and fish hatcheries. I am also deleting Provisions 4 and 5. Although the augmentations contained in these provisions may have merit, these reductions and deletions are necessary in light of our current fiscal situation and to ensure a prudent General Fund reserve.

I am revising this item to conform to the action I have taken in Items 3600-001-0200, 3600-001-0384, 3790-001-0001, and 3790-001-0392.

Item 3720-001-0001—For support of California Coastal Commission. I reduce this item from \$10,751,000 to \$9,801,000 by reducing:

- (1) 10-Coastal Management Program from \$14,573,000 to \$13,973,000, and
- (2) 20-Coastal Energy Program from \$1,147,000 to \$797,000.

I am reducing this item by \$950,000 and eight positions for administration of Offers-to-Dedicate and review of Liquefied Natural Gas (LNG) applications and federal offshore oil leases. This augmentation may have merit; however, as presently proposed it would result in a General Fund cost. The Coastal Commission has sufficient resources to perform critical, high priority work such as the review of LNG applications. The Commission also has the authority to adjust its fees in order to fund its activities, and can address this issue and meet its workload obligations without impacting the General Fund.

Item 3760-301-0593—For capital outlay, State Coastal Conservancy. I reduce this item from \$950,000 to \$450,000 to make a technical correction to the Budget Bill by reducing:

- (1) 80.00.020-Public Access from \$950,000 to \$450,000.

I am deleting the \$500,000 legislative augmentation because there are insufficient funds in the Coastal Access Account to support this augmentation. With this technical

correction, \$450,000 remains to support the Conservancy's efforts to accept and open Offers-to-Dedicate easements.

Item 3790-001-0001—For support of Department of Parks and Recreation. I revise this item by reducing:

- (1) For support of the Department of Parks and Recreation from \$353,003,000 to \$344,003,000, and
- (9) Amount payable from the State Parks and Recreation Fund (Item 3790-001-0392) from -\$134,779,000 to -\$125,779,000.

I am revising this item to conform to the actions taken in Items 3640-401 and 3790-001-0392.

Item 3790-001-0392—For support of Department of Parks and Recreation. I reduce this item from \$134,779,000 to \$125,779,000.

I am revising this item to conform to the actions taken in Items 3640-401 and 3790-001-0001.

Item 3900-001-0044—For support of Air Resources Board.

I am sustaining this legislative augmentation of \$12,500,000 to replace pre-1977 school buses. To ensure that this augmentation is spent most appropriately, I am directing the Air Resources Board to develop a plan by September 15, 2005, for allocation of these resources, and to submit this plan to the California Environmental Protection Agency for review and approval. The allocation plan must consider the overall financial capacity of the applicant to reasonably replace these buses without state assistance, the exposure to children, and the age of the buses slated for replacement.

Item 3900-001-0115—For support of Air Resources Board.

I am sustaining the redirection of \$10,000,000 from the Carl Moyer Program to fund the retrofitting of diesel school buses. The allocation criteria for Carl Moyer Program make it difficult for school bus projects to qualify for award and thus our children continue to be at risk. To ensure that these redirected funds are spent most appropriately, I am directing the Air Resources Board to develop a plan by September 15, 2005, for allocation of these resources, and to submit this plan to the California Environmental Protection Agency for review and approval. The allocation plan must consider the overall financial capacity of the applicant to reasonably replace these buses without state assistance, the exposure to children, and the age of the buses slated for replacement.

This redirection, along with the augmentation of Item 3900-001-0044 and the \$4,500,000 of Proposition 98 funding is a significant and important advancement in our protection of our children.

Item 3980-001-0001—For support of Office of Environmental Health Hazard Assessment. I reduce this item from \$8,852,000 to \$8,352,000 by reducing:

- (1) 10-Health Risk Assessment from \$16,924,000 to \$15,924,000;
- (6) Amount payable from the Department of Pesticide Regulation Fund (Item 3980-001-0106) from -\$1,120,000 to -\$870,000;

and by deleting:

- (7.5) Amount payable from the Waste Discharge Permit Fund (Item 3980-001-0193) (-\$250,000)

The Legislature augmented the Office of Environmental Health Hazard Assessment's (OEHHA's) budget by \$1,500,000. I am sustaining a \$500,000 General Fund augmentation to support OEHHA's scientific efforts to evaluate environmental risks. However, I am vetoing \$1,000,000 of the augmentation to support a prudent General Fund reserve and because there are insufficient funds available in the Department of Pesticide Regulation Fund.

Item 3980-001-0106—For support of Office of Environmental Health Hazard Assessment. I reduce this item from \$1,120,000 to \$870,000.

I am reducing this item by \$250,000 to conform to the actions I have taken in Item 3980-001-0001.

Item 3980-001-0193—For support of Office of Environmental Health Hazard Assessment. I delete this item.

I am deleting this item to conform to the actions I have taken in Item 3980-001-0001.

Item 4120-115-0001—For transfer by the Controller to the Trauma Care Fund. I am sustaining this item.

I am sustaining the \$10,000,000 legislative augmentation for trauma care services on a one-time basis because I am concerned about the financial stress experienced by many of our state's trauma centers. I recognize the critical role these health care facilities play in providing access to essential medical services and the importance of addressing priority concerns such as securing on-call physicians and promoting hospital surge capacity for times of emergency. I am therefore sustaining this funding and directing the Emergency Medical Services Authority to work closely with local Emergency Medical Services Authorities to ensure these funds target priority needs and do not supplant existing funding.

Item 4260-001-0001—For support of Department of Health Services. I reduce this item from \$244,093,000 to \$241,093,000 by reducing:

(1) 10-Public and Environmental Health from \$313,379,000 to \$310,379,000, and by deleting Provision 11.

I am deleting the \$3,000,000 legislative augmentation to continue the Improved Access, Counseling and Treatment for Californians with Prostate Cancer (IMPACT) program, as it is not prudent to expand programs in light of the projected structural deficit in 2006–07, and because of the absence of an evaluation of the effectiveness of the IMPACT program, especially given the 45 percent non-clinical overhead costs of the program. Without restructuring program operations, it is not clear that the benefits of this program for the small number of beneficiaries (341 in 2004–05) outweigh the costs. My Budget places a high priority on protecting health care services and maintains eligibility for health insurance for millions of low-income Californians. It increases funding for indigent health care services providing \$73,500,000 to support indigent healthcare in the California Healthcare for Indigents and Rural Health Services programs.

The IMPACT program was established as a pilot program in 2000–01 using one-time Tobacco Settlement Funds. It last received new funding by the Legislature in 2002–03. Since then, the program has used previously unspent funds to continue program services. These funds are exhausted. Given concerns that less than 60 percent of the appropriated funds are spent on direct patient care and the lack of an evaluation of the program's effectiveness, I am directing the department to evaluate the IMPACT program for programmatic and cost effectiveness. Any contractual funding for a prostate cancer treatment program must go to maximize services to the patients and minimize contractual costs and overhead. Continuing this program prior to the evaluation is imprudent.

I am deleting Provision 11 to conform to this action.

Item 4260-001-0626—For support of Department of Health Services. I delete Provision 1.

I am deleting Provision 1, which would require the Department of Health Services to use the interagency agreement process to conduct work related to small water systems. This Budget Bill language would limit the Department's flexibility to seek an external contract for these services if an interagency agreement is not a viable option

if geographic restrictions preclude use of state staff or if there are other operational alternatives that would be beneficial to and less costly for the state.

Item 4260-101-0001—For local assistance, Department of Health Services. I reduce this item from \$12,670,181,000 to \$12,665,819,000 by reducing:

- (3) 20.10.030-Benefits (Medical Care and Services) from \$29,401,653,000 to \$29,392,929,000;
- (9) Amount payable from the Federal Trust Fund (4260-101-0890) from -\$19,282,571,000 to -\$19,278,209,000;

and by deleting Provision 14.

I am deleting the legislative augmentation of \$3,362,000 for the Alameda Alliance for Health and Partnership HealthPlan of California. I believe California must expand its use of managed care for Medi-Cal beneficiaries in order to improve outcomes for this critical population and control growth of the program's costs. But before the state considers funding a rate increase to providers, which this augmentation would do, a thorough review of these managed care providers' financial records is necessary to determine the underlying causes of the financial status of the providers. The Department of Health Services will change the Partnership's contract date to allow time for a thorough review of the Partnership's reimbursement rate during the next budget cycle. There is an indication that past discretionary actions of the Alameda Alliance for Health are largely responsible for their current fiscal stress. It would be unwise for the state to provide fiscal relief to Alameda Alliance for Health until the Alameda Alliance for Health implements cost-saving strategies.

However, in the case of the San Diego Community Health Group, I have determined that vetoing \$2,000,000 million (\$1,000,000 General Fund) and sustaining \$3,000,000 (\$1,500,000 General Fund) is appropriate. Community Health Group has worked closely with the Department of Managed Health Care to restructure their finances and implement program efficiencies. In addition, this increase will partially compensate the Group for a Medi-Cal rate increase in 2000 that is not reflected in the Group's current rate. This action, combined with the significant rate reductions the Group has already negotiated with its key providers, will allow the Group to implement a sound fiscal plan to assure that the Group will be able to continue to provide services to a vulnerable population without additional rate increases next year.

I am also deleting the legislative augmentation of \$4,362,000 in Item 4260-101-0890 to conform to this action.

I am deleting Provision 14 because requiring the Administration to notify the Legislature whenever actual expenditures for a specific part of the Medi-Cal program are not consistent with the Medi-Cal Estimate would be unnecessarily burdensome. The Department of Health Services already provides the Legislature with a monthly report which compares components of the Medi-Cal Estimate to actual expenditures. Any information beyond this report would require an unreasonable expenditure of staff resources given that it would result in duplicative information, and the additive value of the information that it would provide is uncertain.

Item 4260-101-0890—For local assistance, Department of Health Services. I reduce this item from \$19,282,571,000 to \$19,278,209,000.

I am reducing this item by \$4,362,000 to conform to my action in Item 4260-101-0001.

Item 4260-111-0001—For local assistance, Department of Health Services.

I am sustaining, on a one-time basis, the \$5,639,000 legislative augmentation which would restore Human Immunodeficiency Virus (HIV) Prevention and Education funding for various local health jurisdictions to 2001-02 funding levels. This Budget includes base General Fund support of approximately \$24.9 million, which is currently allocated to local health jurisdictions based on the California HIV Planning Group's

formula to direct funds to those jurisdictions that have the highest prevalence of the disease. Supplemental program funding in 2006–07 beyond the base funding of \$24.9 million should be reviewed in the context of competing priorities for limited General Fund resources.

Item 4270-001-0001—For support of California Medical Assistance Commission. I reduce this item from \$1,207,000 to \$1,126,000 by reducing:

- (1) 10-California Medical Assistance Commission from \$2,622,000 to \$2,460,000, and
- (2) Reimbursements from –\$1,307,000 to –\$1,226,000.

I am reducing this item by \$162,000 to disassociate commissioner salaries from the salaries provided to legislators. Instead, commissioner annual compensation will be \$50,000. This action more properly aligns commissioner salaries with the amount of work required to faithfully perform the duties required of commissioners.

Item 4280-104-0236—For local assistance, Managed Risk Medical Insurance Board, for the Healthy Families Program Rural Health Demonstration Project.

I am sustaining the \$1,000,000 legislative augmentation for the Rural Health Demonstration Project (RHDP) on a one-time basis. The RHDP provides a valuable service to explore how to improve access to health care services for the medically underserved and uninsured populations in rural areas, as well as for special populations.

Item 4440-295-0001—For local assistance, Department of Mental Health.

I am sustaining on a one-time basis the legislative augmentation of \$120,000,000 to fund counties for providing special education mental health services under the AB 3632 state mandate. These funds will ensure continued services while the state pursues transitioning from a state-mandated program to a categorical program.

To this end, I am directing the Department of Mental Health, in collaboration with the State Department of Education, to develop a plan to shift the program from a state-mandated program to a categorical program effective fiscal year 2006–07. This plan is to be developed in consultation with counties, school authorities, community mental health providers, and other private and public groups with an interest in mental health and special education issues. The plan will address the roles and responsibilities of local education agencies and counties in the provision of federally required mental health services, the type and scope of services to be provided, recommended changes in statute, regulations and practices necessary to implement the program, appropriate mechanisms to encourage and improve collaboration among education and mental health systems, and appropriate funding levels, fiscal controls, and auditing efforts. I am also directing the Department of Finance to provide consultation and assistance to ensure that the plan is fiscally sound.

A more effective system of delivery of this service must be found; sustaining this augmentation on a one-time basis only is to allow for a transition to such an alternative by 2006–07.

Item 4700-001-0001—For support of Department of Community Services and Development. I reduce this item from \$125,000 to \$75,000 by reducing:

- (1) 47-Naturalization Services from \$125,000 to \$75,000.

I am reducing the \$2,500,000 legislative augmentation for the Naturalization Services Program to the \$1,500,000 included in the 2004 Budget Act. This is a valuable program and I am therefore sustaining funding at last year's level to support services that assist immigrants in completing their citizenship application, citizenship testing, and in preparing for the interview. The Naturalization Services Program funds faith-based institutions, community-based organizations, and non-profit entities to provide these and many other important activities for immigrants.

I am also taking conforming action to reduce Item 4700-101-0001.

Item 4700-101-0001—For local assistance, Department of Community Services and Development. I reduce this item from \$2,375,000 to \$1,425,000 by reducing:

- (1) 47-Naturalization Services from \$2,375,000 to \$1,425,000.

I am reducing this item by \$950,000 to conform to the action taken in Item 4700-001-0001.

Item 5175-101-0890—For local assistance, Department of Child Support Services. I delete Provision 4.

I am deleting Provision 4, which would limit local child support agencies (LCSAs) to a 10 percent share of any federal penalty increases that may result from the expenditure of an additional \$20,000,000 federal funds to match voluntary county contributions to the Child Support Program. In 2004–05, the LCSAs agreed to provide for the full cost of any penalty increases that would result from these types of expenditures. Therefore, I am vetoing this provision because it contradicts the existing agreement that the state has with the LCSAs, and because it could result in General Fund expenditure increases without any regard to the availability of revenues. Should the state obtain relief from federal penalties, I am committed to proportionally sharing any penalty relief with LCSAs that choose to draw down additional federal funds.

Item 5180-001-0001—For support of Department of Social Services. I reduce this item from \$78,630,000 to \$77,155,000 by reducing:

- (2) 25-Social Services and Licensing from \$139,798,000 to \$138,248,000, and
- (11) Amount payable from the Federal Trust Fund (Item 5180-001-0890) from –\$337,180,000 to –\$337,105,000.

I am deleting the \$1,400,000 legislative augmentation that would restore a portion of the Department of Social Services' (DSS) General Fund unallocated reduction. The Legislature calculated that this amount of funding is equal to the Community Care Licensing Division's share of the Department's unallocated reduction. I share the Legislature's concerns with protecting the health and safety of vulnerable clients cared for in community care facilities as evidenced by my recent increase of \$1,140,000 General Fund to address additional workload resulting from caseload growth in the Community Care Licensing Division.

The DSS is currently making a substantial effort to identify and implement efficiencies within the Community Care Licensing Division, thereby prioritizing existing resources on monitoring and oversight responsibilities. In addition, the DSS has recently undertaken an aggressive hiring campaign to fill longstanding vacancies within this division that resulted from hiring freezes during the previous Administration and prior unallocated reductions passed by the Legislature.

However, such a significant hiring process takes time and the Department will still realize savings from positions not filled for the entire fiscal year. These savings will help the Department achieve its full unallocated reduction without adversely impacting the critical services the department provides to our children and families.

To maximize protection of our state's most vulnerable populations, I am directing the Health and Human Services Agency to conduct a thorough review of licensing activities in all Agency Departments. This review will identify needed programmatic and fiscal changes in the licensing programs.

I also am deleting \$150,000 (\$75,000 General Fund) and one position added by the Legislature to assist counties in complying with the federal Indian Child Welfare Act (ICWA). The DSS has a number of positions involved in oversight and management functions to support tribal issues and ICWA compliance, including one ICWA specialist position dedicated to advocate and facilitate compliance with ICWA laws, regulations, and policies in California. Given the ongoing structural deficit and the existing resources devoted to ICWA compliance, I cannot support this augmentation. However, recognizing the Legislature's desire to have an ICWA coordinator in the DSS Execu-

tive Office, I am directing the DSS to redirect the existing ICWA specialist position to the Office of the Director.

Item 5180-001-0890—For support of Department of Social Services. I reduce this item from \$337,180,000 to \$337,105,000.

I am revising this item to conform to the action I have taken in Item 5180-001-0001.

Item 5180-101-0001—For local assistance, Department of Social Services. I revise this item by reducing:

- (1) 16.30-CalWORKs from \$4,979,156,000 to \$4,954,156,000, and
- (6) Amount payable from the Federal Trust Fund (Item 5180-101-0890) from -\$3,846,720,000 to -\$3,821,720,000.

I am revising this item to conform to the action I have taken in Item 5180-101-0890.

Item 5180-101-0890—For local assistance, Department of Social Services. I reduce this item from \$3,846,720,000 to \$3,821,720,000.

I am reducing \$25,000,000 in federal Temporary Assistance for Needy Families (TANF) Block Grant funds for CalWORKs administration to modify the effect of language included in the trailer bill to provide up to \$50,000,000 in unspent 2004–05 CalWORKs single allocation funds to counties in 2005–06. The Legislature increased funding for the administration of this program based on an alternate projection of savings associated with shifting from retrospective budgeting/monthly reporting for eligibility determination to prospective budgeting/quarterly reporting. I am sustaining \$25,000,000 of the allocation on a one-time basis to ensure the counties have adequate resources to support work participation activities. I am also directing the Department of Social Services to work with the counties to determine the true impact of quarterly reporting requirements for CalWORKs recipients, to reflect the appropriate level of savings in my January Budget.

Item 5180-141-0001—For local assistance, Department of Social Services. I reduce this item from \$424,392,000 to \$413,401,000 by reducing:

- (1) 16.75-County Administration and Automation Projects from \$1,050,018,000 to \$1,023,732,000, and
- (3) Amount payable from the Federal Trust Fund (Item 5180-141-0890) from -\$569,817,000 to -\$554,522,000.

I am deleting the legislative augmentation of \$2,545,000 (\$991,000 General Fund and \$1,554,000 Federal Trust Fund) for Foster Care Administration. The Legislature reinvested Foster Care Administration caseload savings back into Foster Care Administration. This veto would re-establish funding for this program at the level I proposed in the May Revision, which accurately reflects Foster Care Administration funding needs based on the projected foster care caseload in 2005–06.

I am deleting the legislative augmentation of \$23,741,000 (\$10,000,000 General Fund and \$13,741,000 Federal Trust Fund) for Food Stamp and California Food Assistance Program (CFAP) administration. The Legislature increased funding for the administration of these programs based on an alternate projection of savings associated with shifting from retrospective budgeting/monthly reporting for eligibility determination to prospective budgeting/quarterly reporting. This veto would re-establish funding for Food Stamp and CFAP administration at the level I included in the May Revision. I am directing the Department of Social Services to work with the counties to determine the true impact of quarterly reporting requirements for food stamps recipients to reflect the appropriate level of savings in my January Budget.

Item 5180-141-0890—For local assistance, Department of Social Services. I reduce this item from \$569,817,000 to \$554,522,000.

I am reducing this item to conform to the action I have taken in Item 5180-141-0001.

Item 5180-151-0001—For local assistance, Department of Social Services. I reduce this item from \$764,894,000 to \$761,294,000 by reducing:

- (1) 25.30-Children and Adult Services and Licensing from \$2,221,743,000 to \$2,215,914,000, and
- (6) Amount payable from the Federal Trust Fund (Item 5180-151-0890) from -\$1,382,198,000 to -\$1,379,969,000.

I am deleting the legislative augmentations of \$5,600,000 (\$3,500,000 General Fund) for the Child Welfare Services (CWS) Outcome Improvement Project and \$229,000 (\$100,000 General Fund) for Adoption Assistance Program (AAP) training. These reductions are necessary to limit program expansions and to help bring ongoing expenditures in line with existing resources due to the projected structural deficit in 2006–07.

The May Revision included a comprehensive funding package that provides sufficient resources to support ongoing CWS Program Improvement Plan initiatives, fund implementation of county System Improvement Plans, and improve outcomes for children in 2005–06. The legislative augmentation exceeds the level of funding that is necessary to implement approved CWS program improvement initiatives and strategies, achieve compliance with federal performance requirements, and avoid federal penalties.

With this reduction, \$26.6 million in total funds still remains to support ongoing Program Improvement Plan activities and the CWS Outcome Improvement Project in 2005–06. Of this amount, a new investment of \$12.8 million will be available for all counties to implement their System Improvement Plans. The Department of Social Services (DSS) will work with the County Welfare Directors Association to develop an application and approval process to allocate these funds.

Similarly, the legislative augmentation for AAP training is unnecessary as the DSS intends to increase efforts in 2005–06 to provide training and technical assistance to county social workers regarding the eligibility determination process for the AAP within existing resources.

Item 5180-151-0890—For local assistance, Department of Social Services. I reduce this item from \$1,382,198,000 to \$1,379,969,000.

I am reducing this item to conform to the action I have taken in Item 5180-151-0001.

Item 5225-001-0001—For support of the Department of Corrections and Rehabilitation. I revise this item from \$6,623,170,000 to \$6,623,060,000 by reducing:

- (9) 35-Board of Parole Hearings from \$78,707,000 to \$78,597,000, and by deleting Provision 25.

I am deleting the legislative augmentation of \$110,000, which would provide additional staff for the Foreign Prisoner Transfer Program to increase outreach and marketing efforts to encourage more foreign prisoners to volunteer to be transferred back to their country of origin. The Board of Parole Hearings has staff to operate this program and is already taking steps to increase inmate awareness of the program. Transfers are not due to a lack of staff but other factors, such as the willingness of prisoners to volunteer to transfer, the willingness of the other countries to accept the prisoner and agree to California sentencing requirements, and treaties with other nations. Therefore, this augmentation is not necessary.

I am deleting Provision 25 to make a technical correction to the Budget Bill. Provision 29 of this item includes similar language that correctly reflects the Legislature's action on this issue.

Item 6110-001-0001—For support of Department of Education. I reduce this item from \$42,674,000 to \$42,206,000 by reducing:

- (3) 30-Special Programs from \$50,109,000 to \$49,141,000;

(9) Amount payable from Federal Trust Fund (Item 6110-001-0890) from -\$149,985,000 to -\$149,485,000; and by deleting Provision 3.

I am reducing this item by \$468,000 and 4.6 positions to eliminate support for the Healthy Start program which conforms to my action taken in Item 6110-200-0001.

Item 6110-001-0890—For support of Department of Education. I reduce this item from \$149,985,000 to \$149,485,000.

I am deleting the \$500,000 augmentation to the Legislative Analyst's Office to study the distribution of federal and state supplementary funding targeted at the State's economically disadvantaged and English language learner students. The use of federal funds to study funding formulas for state programs is inappropriate and may constitute an audit exception. Further, this augmentation is unnecessary. The work group I have already directed, consisting of the Office of the Secretary for Education, the Legislative Analyst's Office, and the State Department of Education, could address this issue at an absorbable cost.

I am deleting Provision 18.5 to conform to this action.

Item 6110-123-0890—For local assistance, Department of Education (Proposition 98). I reduce this item from \$65,141,000 to \$51,329,000 by reducing:

(2) 20.60.030.038-Comprehensive School Reform Program from \$43,839,000 to \$30,027,000.

I am deleting the \$13,812,000 legislative augmentation in carryover for this program. These funds were originally included in the No Child Left Behind Act flexibility proposal for carryover funds. Because the number of schools and districts identified as "program improvement" under the federal school accountability system has significantly increased, I believe it is a higher priority to target these carryover funds directly to low-achieving schools and districts to improve the academic performance of their pupils. Consequently, I will pursue future legislation appropriating these funds for that purpose and continue to work with the federal government through the State Board of Education to obtain approval of a No Child Left Behind Act flexibility proposal.

Item 6110-125-0890—For local assistance, Department of Education. I reduce this item from \$294,959,000 to \$275,759,000 by reducing:

(2) 10.30.010-Title I, Migrant Education from \$144,461,000 to \$125,261,000.

I am deleting the \$19,200,000 legislative augmentation in carryover for this program. These funds were originally included in the No Child Left Behind Act flexibility proposal for carryover funds. Because the number of schools and districts identified as "program improvement" under the federal school accountability system has significantly increased, I believe it is a higher priority to target these carryover funds directly to the low-achieving schools and districts that have large populations of migrant students to improve the academic performance of these pupils. Consequently, I will pursue future legislation appropriating these funds, and I will continue to work with the federal government through the State Board of Education to obtain approval of a No Child Left Behind Act flexibility proposal.

Item 6110-136-0890—For local assistance, Department of Education. I reduce this item from \$1,846,724,000 to \$1,805,187,000 by reducing:

(1) 10.30.060-Title I-ESEA from \$1,751,527,000 to \$1,727,227,000;

(3) 10.30.080-Title I-School Improvement from \$86,477,000 to \$69,240,000; and by revising Provision 5.

I am deleting the \$41,537,000 legislative augmentation in carryover for these programs. These funds were originally included in the No Child Left Behind Act flexibility proposal for carryover funds. Because the number of schools and districts identified as "program improvement" under the federal school accountability system has significantly increased, I believe it is a higher priority to target these carryover funds

directly to low-achieving schools and districts to improve the academic performance of their pupils. Consequently, I will pursue future legislation appropriating these funds and continue to work with the federal government through the State Board of Education to obtain approval of a No Child Left Behind Act flexibility proposal.

I am revising Provision 5 to conform to this action.

“5. Of the funds appropriated in Schedule (3), ~~\$46,477,000~~ \$29,240,000 shall be available pursuant to Article 3.1 (commencing with Section 52055.57) of Chapter 6.1 of Part 28 of the Education Code, for Title I district accountability.”

Item 6110-161-0001—For local assistance, Department of Education, (Proposition 98) Special Education. I reduce this item from \$2,894,790,000 to \$2,890,022,000 by reducing:

(1) 10.60.050.003-Special education instruction from \$2,831,196,000 to \$2,826,428,000,

and by revising Provision 24.

I am deleting \$4,768,000 from Provision 24 of this item to correct a technical over-appropriation which should have been offset by a corresponding increase in property tax estimates assumed as part of the final budget agreement. I am setting these funds aside for appropriation in subsequent legislation for other Proposition 98 priorities.

I am revising Provision 24 to conform to this action:

“24. Of the amount appropriated in Schedule (1), ~~\$52,620,000~~ \$47,852,000 is available for the 2005–06 fiscal year on a one-time basis. Local educational agencies shall use these funds for one-time purposes, including, but not limited to, the following: to assist students with disabilities pass the California High School Exit Examination, instructional materials, or other one-time expenditures for students with disabilities.”

I am sustaining the remainder of this appropriation with the understanding that subsequent clean-up legislation will correct various technical issues in both this item and in Item 6110-161-0890 that concern funding for students with disabilities, including a correction that will identify the amount passed through to Special Education Local Plan Areas (SELPAs) in Provision 21 as \$58.4 million rather than the lesser amount currently specified. I further expect that subsequent legislation will specify that the first priority for the use of the amount of funding remaining in Provision 24 for allocation to SELPAs will be to help students with disabilities pass the state’s High School Exit Exam.

Item 6110-191-0001—For local assistance, Department of Education (Proposition 98). I delete this item.

I am deleting the \$20,000,000 for purchase of supplemental materials for English language learners that was shifted by the Legislature from Instructional Materials in Item 6110-189-0001. The action by the Legislature to link this funding to the funding appropriated for Career-Technical Education through Control Section 24.50 is unconstitutional and attempts to usurp the authority of the Governor to veto items of appropriation. Furthermore, the Budget Act of 2004 contained \$30,000,000 for supplemental materials for English language learners that has yet to be allocated. Therefore, this additional appropriation is premature. I am setting these funds aside for appropriation in subsequent legislation for other Proposition 98 priorities.

Item 6110-200-0001—For local assistance, Department of Education. I delete this item.

I am deleting this \$2,000,000 legislative augmentation because the one-time funding included in the 2004 Budget Act for this program was intended to fully fund both the planning and operational grants for each grantee, thus not resulting in any future-year obligations for the State. I am therefore setting these funds aside for appropriation in subsequent legislation that ensures that any grants provided this year will eliminate any

subsequent funding pressures or obligations on the state in the future. This action will have no effect on schools currently operating these programs, as full funding for their multi-year grant periods has been provided in past budgets.

Item 6110-243-0001—For local assistance, Department of Education. I am sustaining this item.

I am sustaining the \$20,000,000 legislative augmentation because it is a high priority of my Administration to provide the services necessary to help eligible pupils pass the California High School Exit Exam. It is my understanding that further legislation will be enacted to address some concerns I have with the language contained in this item. For instance, the language would allow the services to be provided during the regular school day, which would likely remove these pupils from other important instructional opportunities. In addition, this item only contains funding for two of the four currently funded supplemental instruction programs, which delays allocation of funds and inhibits flexibility. Therefore, it is my expectation that legislation will also restore the supplemental programs contained in this item back to the original supplemental instruction funding item to resolve these issues and maximize the level of funding available to serve students who have failed or are likely to fail the exit exam.

Item 6440-006-0001—For support of University of California. I delete this item and Provision 1.

I am deleting this item which reflects a legislative augmentation of \$108,000 to support California's membership in the Western Interstate Commission for Higher Education (WICHE). When acting on the 2004 Budget last year, the Legislature deleted funding for membership dues for WICHE, as well as other state membership dues because of the fiscal condition of the state. It is my understanding that the higher education segments have agreed to fund their share of the membership dues in this budget year as well.

Item 6610-002-0001—For support of California State University. I reduce this item from \$3,034,000 to \$2,807,000 by reducing:

- (1) Center for California Studies-Fellows Program from \$610,000 to \$602,653;
- (3) Assembly Fellows from \$597,851 to \$537,354;
- (4) Senate Fellows from \$597,851 to \$537,354;
- (5) Executive Fellows from \$597,351 to \$536,854;
- (6) Judicial Fellows from \$421,659 to \$386,647; and
- (7) LegiSchool Project from \$116,788 to \$113,638.

I am reducing the legislative augmentation for the Capital Fellows Programs from \$309,000 to \$82,000, reflecting an overall increase of three percent in base funding for these programs, consistent with the Compact for Higher Education.

Item 6870-101-0001—For local assistance, Board of Governors of the California Community Colleges (Proposition 98). I revise this item by deleting Provision 6.6 to conform to the action I have taken in Control Section 24.50.

Consistent with my action in Control Section 24.50, I am deleting Provision 6.6 which states legislative intent to fund Career Technical Education pursuant to the Legislature's addition of Control Section 24.50. Control Section 24.50 would require that \$20,000,000 for Career Technical Education be linked to providing an identical amount of funding for supplemental instructional materials for English learners. These two programs do not share any legal or programmatic relationship, thus the Control Section creates an inappropriate funding link between these distinct programs. Further, this action is unconstitutional and attempts to usurp the Governor's veto authority.

I have a strong commitment to career technical education reform in order to ensure that all students have the opportunity to prepare for high paying careers in the high demand job sectors of our economy. Therefore, I am setting aside \$20,000,000 from

my veto of Control Section 24.50 to provide support for Career Technical Education in separate legislation.

I am deleting Provision 6.6 to conform.

Item 6870-486—Reappropriation (Proposition 98), Board of Governors of the California Community Colleges. I revise this item from \$33,000,000 to \$15,600,000 as follows:

“6870-486—Reappropriation (Proposition 98), Board of Governors of the California Community Colleges. The sum of ~~\$33,000,000~~ *\$15,600,000* is reappropriated from the Proposition 98 Reversion Account, for the purpose of backfilling a projected shortfall in 2004–05 local property tax revenues for community colleges. ~~To the extent that the funding provided for this purpose exceeds the amount necessary to compensate community colleges for the shortfall in local property tax revenues, the remaining funding shall be reappropriated to community colleges to further support equalizing community college apportionment rates.~~”

I am reducing the Legislature’s augmentation to community colleges to backfill a projected shortfall in 2004–05 local property tax revenues from \$33,000,000 to \$15,600,000. I am advised that the community colleges will experience a shortfall not greater than \$21,000,000 in the current year. Furthermore, the community colleges are not likely to earn all growth funding for 2004–05, and as such the system would not incur the costs of instruction anticipated for the current year. Given the continuing structural deficit facing the state, a portion of these resources should therefore be utilized for higher priorities. Consistent with that approach, I am setting aside this \$17,400,000, in combination with the set aside of \$20,000,000 from my action on Control Section 24.50, to provide support for Career Technical Education pursuant to separate legislation.

Item 7980-001-0784—For support of Student Aid Commission. I delete Provision 4.

I am deleting Provision 4 because it would limit the Commission’s authority to carry out its statutory authority by requiring advance notification of specified actions related to the governance structure and roles and responsibilities of the EdFUND Board of Directors. Additionally, this provision’s expressed intent regarding the sale or transfer of the federal loan guarantee to another entity is a policy matter that should be addressed only after thoughtful deliberation by the Legislature and the Administration.

Chapter 961, Statutes of 1996, authorizes the Student Aid Commission to establish an auxiliary organization for the purpose of providing operational and administrative services for the Commission’s participation in the Federal Family Education Loan Program. Among other duties and responsibilities, the Commission is empowered to nominate and appoint a board of directors for the auxiliary organization. As such, Provision 4 infringes on the Executive Branch’s ability to operate programs and establishes a substantive change in law.

Item 7980-101-0001—For local assistance, Student Aid Commission. I am sustaining this item.

I am sustaining the legislative authorization contained in subdivision (e) of Provision 1 for an augmentation of 300 additional APLE loan assumption warrants because loan assumptions are a critical incentive to encourage science and math majors to become teachers. However, given the budget agreement to fund the Science and Math Teacher Initiative in the University of California and California State University segments, it is necessary that this provision be modified in subsequent legislation to make these additional warrants available exclusively to candidates participating in the initiative, as determined by the segments. In this way, we can assure the success of the initiative to provide our students with the most proficient science and math teachers possible, which is critical to California’s future economic well-being.

Item 7100-001-0001—For support of Employment Development Department. I reduce this item from \$22,679,000 to \$22,186,000.

I am reducing the legislative augmentation by \$493,000, which would provide funding for increasing the department's efforts to collect employment taxes owed to the state. In recognition of the potential merits associated with this effort, I am sustaining \$2,194,000 of the augmentation. This reduction is necessary to reflect a more realistic timeframe for the implementation of this effort.

Item 7100-001-0514—For support of Employment Development Department. I delete Provision 3.

Provision 3 sets aside \$2,500,000 from this item to fund a health care training program to be adopted in legislation during the 2005–06 session. I am concerned about restricting the use of this funding for legislation that has not yet been passed by the Legislature.

California has a real and growing nursing shortage. California will have a shortage of 47,600 nurses by 2010. This means that California will need an additional 9,500 nurses every year for the next five years just to meet demand. California is currently ill-equipped to meet that demand. That is why my Administration has recently developed a multifaceted, comprehensive program of more than \$100,000,000 to build California's capacity to train nurses. Provision 3 would unnecessarily hamper the efforts my Administration has embarked upon in this regard.

Item 7100-001-0588—For support of Employment Development Department. I reduce this item from \$214,699,000 to \$214,488,000.

I am reducing the legislative augmentation by \$211,000 which would provide funding for increasing the department's efforts to collect employment taxes owed to the state. In recognition of the potential merits associated with this effort, I am sustaining \$940,000 of the augmentation. This reduction reflects the anticipated timeframe for the implementation of this effort.

Item 7100-001-0870—For support of Employment Development Department. I revise this item by reducing:

- (2) 21-Tax Collections and Benefit Payments from \$647,908,000 to \$647,204,000;
- (9) Amount payable from the General Fund (Item 7100-001-0001) from -\$22,679,000 to -\$22,186,000; and
- (13) Amount payable from the Unemployment Compensation Disability Fund (Item 7100-001-0588) from -\$214,699,000 to -\$214,488,000.

In recognition of the potential merits associated with increasing the efforts to collect employment taxes owed to the state, I am sustaining \$3,134,000 of the \$3,838,000 augmentation to provide funding for 50 auditors and collectors in the Tax Collections and Benefits Payments Program. I am reducing the legislative augmentation by \$704,000 to reflect the anticipated timeframe within which these new personnel will be hired by the Department.

This action conforms to the reductions of Items 7100-001-0001 and 7100-001-0588.

Item 7350-001-0001—For support of Department of Industrial Relations. I reduce this item from \$64,249,000 to \$61,249,000 by reducing:

- (6) 50-Division of Labor Standards Enforcement from \$49,983,000 to \$46,983,000, and by deleting Provision 2.

I am deleting the legislative augmentation that provided \$3,000,000 and 30.4 personnel years to expand enforcement efforts by the Labor Commissioner and the Bureau of Field Enforcement. In the years prior to my arrival in Sacramento, literally dozens of new laws were added to the California Labor Code. Unfortunately, while all these new laws were being added to the Labor Code, the number of labor law officials actually enforcing the laws was slashed dramatically. In fact, when my Administration began in November 2003, not a single enforcement official was based in the Central

Valley. This disregard for the importance of vigorous labor law enforcement allowed the underground economy to flourish.

In January, I proposed, and this Budget creates, the Economic and Employment Enforcement Coalition (EEEC). The EEEEC will coordinate underground economy enforcement activities by the Department of Industrial Relations (DIR), the Employment Development Department, the Contractors State License Board, and others. The Budget provides the EEEEC with 63 positions, including \$3,026,000 and 27.5 personnel years for DIR. Also, a concerted effort was made to create these positions without using General Fund dollars, allowing those dollars to be used for other high-priority needs.

I am deleting Provision 2 to conform to this action.

Item 8660-001-0461—For support of Public Utilities Commission. I reduce this item from \$8,785,000 to \$8,502,000.

The Legislature augmented the Public Utilities Commission's (PUC's) rail safety program by \$1,242,000. Because rail safety is of paramount importance, I am sustaining \$959,000 of this augmentation on a one-time basis. I am reducing this augmentation by \$283,000 that was intended for additional legal staff and governmental liaisons because they are unnecessary to increase railroad safety inspections and investigations. In addition, the State Auditor recently issued a report identifying deficiencies in the PUC's accounting practices in this program. Consequently, continuation of this augmentation will be dependent upon the PUC rectifying these deficiencies and ensuring that the fees which support this program are fully allocated to these activities.

Item 8660-001-0462—For support of Public Utilities Commission. I revise this item by reducing:

- (1) 10-Regulation of Utilities from \$88,887,000 to \$87,887,000;
- (3) 20-Regulation of Transportation from \$16,043,000 to \$15,760,000;
- (10) Amount payable from the Public Utilities Commission Transportation Reimbursement Account (Item 8660-001-0461) from -\$8,785,000 to -\$8,502,000;
- (18) Amount payable from the Public Utilities Commission Ratepayer Advocate Account (Item 8660-001-3089) from -\$19,379,000 to -\$18,379,000.

I am revising this item to conform to the actions I have taken in Items 8660-001-0461, 8660-001-3089, and 8660-011-0462.

Item 8660-001-3089—For support of the Public Utilities Commission. I reduce this item from \$19,379,000 to \$18,379,000.

I am deleting the \$1,000,000 legislative augmentation to fund an additional 10.0 positions in the Office of Ratepayer Advocates' (ORA) telecommunications division. The ORA already has 122 positions and did not provide sufficient workload detail to justify additional positions. If the ORA can identify critical work that is not being performed by the existing staff, it can be considered in next year's budget.

Item 8660-011-0462—For transfer by the Controller from the Public Utilities Commission Utilities Reimbursement Account to the Public Utilities Commission Ratepayer Advocate Account. I reduce this item from (\$19,379,000) to (\$18,379,000).

I am reducing this item by \$1,000,000 to conform to the actions I have taken in Items 8660-001-0462 and 8660-001-3089.

Item 8855-001-0001—For support of Bureau of State Audits. I reduce this item from \$14,232,000 to \$13,082,000 by reducing:

- (1) 10-State Auditor from \$14,232,000 to \$13,082,000.

I am deleting the \$1,150,000 legislative augmentation to the Bureau of State Audits. Augmenting this item is inconsistent with the creation of the Office of Inspector General since the Administration does not oversee or direct the activities of the Bureau of State Audits.

Item 8860-001-0001—For support of Department of Finance. I reduce this item from \$34,542,000 to \$33,392,000 by reducing:

- (2) 20-Program and Information System Assessments from \$15,361,000 to \$14,211,000.

I proposed a new Office of the State Inspector General, but the Legislature rejected my proposal and augmented this item by \$1,150,000 to provide funding for staffing and associated resources for additional audits by the Office of State Audits and Evaluations in the Department of Finance. These audits would assess and strengthen the internal accounting and administrative control systems to minimize fraud, errors, abuse, and waste of government funds within any department or agency reorganized in the 2005–06 Legislative Session.

I am deleting the legislative augmentation because it does not address the identified need. The Office of the State Inspector General would have a much broader purview than the Department of Finance, which conducts fiscal audits and provides accounting advice to departments. My proposal would require criminal investigations that the Department of Finance does not have the authority to conduct. Additionally, Department of Finance staff does not have the experience or training to work in an arena controlled by the rules of evidence for criminal proceedings. I will bring my proposal for a meaningful and effective Office of Inspector General back next year.

Item 8940-001-0604—For support of Military Department. I reduce this item from \$5,200,000 to \$2,200,000 by reducing:

- (1) 10-Army National Guard from \$5,200,000 to \$2,200,000.

I am reducing the legislative augmentation to make additional repairs to existing armories throughout the state from \$3,700,000 to \$700,000. With this action, the Military Department will have \$2,200,000 to begin addressing maintenance and repair needs at armories.

I am directing the Office of the Adjutant General to complete a comprehensive review of its facility needs, including an assessment of deferred maintenance needs for the armories.

Further, there is a substantial backlog of deferred maintenance at other buildings under the state's management, and this augmentation would have privileged armories over other needs for maintenance of higher priority.

I am also deleting Item 8940-002-0001 to conform to this action.

Item 8940-002-0001—For transfer by the Controller to the Armory Fund. I delete this item.

I am deleting \$3,000,000 in this item to conform to the action I have taken in Item 8940-001-0604.

Item SEC. 4.10—Reporting Requirements for Unallocated Reductions. I delete this Control Section.

I am deleting this control section that requires the Director of Finance to report to the Legislature by December 10, 2005, on the impact of the unallocated reductions included in the 2005 Budget Act. This language is an infringement on the Executive Branch's budget development process as the information necessary to produce this report may include budgetary decisions that would not be reached until the preparation of the 2006–07 Governor's Budget was complete.

SEC. 12.75—Basic Aid District Reduction. I revise this Control Section to delete the \$280,000 legislative augmentation to basic aid district categorical funding. The Budget still provides \$1,260,000 to reduce cuts made to basic aid district categorical funding in the 2003–04 Budget. However, I am setting aside these additional funds for appropriation in subsequent legislation for other Proposition 98 priorities. The total reduction to basic aid district categorical funding in the 2005–06 fiscal year is \$1,406,000.

I am revising Control Section 12.75 as follows:

“SEC. 12.75. The Superintendent of Public Instruction shall reduce by \$1,126,000 1,406,000 funding for basic aid school districts from the Proposition 98 categorical funds appropriated in this act that would otherwise be allocated to basic aid school districts, in accordance with legislation that goes into effect on or before January 1, 2006.”

Item SEC. 24.50—Career Technical Education. I delete this Control Section.

I am deleting the Legislature’s addition of this Control Section to require that \$20,000,000 for Career Technical Education be linked to providing an identical amount of funding for supplemental instructional materials for English learners. These two programs do not share any legal or programmatic relationship, thus the Control Section creates an inappropriate funding link between these distinct programs. Further, this action is unconstitutional and attempts to usurp the Governor’s veto authority.

I have a strong commitment to career technical education reform in order to ensure that all students have the opportunity to prepare for high paying careers in the high demand job sectors of our economy. Therefore, I am setting aside \$20,000,000 from this veto to provide support for the Career Technical Education proposal in separate legislation.

I am also deleting Provision 6.6 of Item 6870-101-0001 to conform to this action. With the above deletions, revisions, and reductions, I hereby approve Senate Bill 77.

ARNOLD SCHWARZENEGGER, Governor

2 [Ch. 39] I object to the following appropriations contained in Senate Bill 80.

Item 0250-101-0932—For local assistance, Judicial Branch. I revise this item from \$2,513,466,000 to \$2,488,916,000 by reducing:

(1) 45.10—Support for operation of the Trial Courts from \$2,183,763,000 to \$2,159,213,000, and deleting Provision 8.

I am reducing this item by \$24,550,000. The Legislature adopted Uniform Civil Filing Fees trailer bill language that would result in increased revenue of \$14,750,000 in 2005–06 and \$29,500,000 beginning in 2006–07 to the Trial Court Trust Fund. The Legislature also increased appropriation authority in this item by \$29,500,000 beginning in 2005–06. I am vetoing \$14,750,000 to reduce the appropriation authority consistent with the increased level of revenue in 2005–06. In addition, a related veto in Item 0250-111-0001 is reducing the General Fund transfer to the Trial Court Trust Fund by \$9,800,000. Therefore, I am also vetoing \$9,800,000 in this item to conform to that action. The remaining \$4,950,000 will be available as additional expenditure authority to the Trial Court Trust Fund for the facilities program.

I am deleting Provision 8 which would specify the method of allocating additional funds received through a statutorily required adjustment based on the percentage change in the State Appropriations Limit. As a separate and co-equal branch of state government, the Judicial Branch should have the flexibility to allocate these funds based on the operational needs of the trial courts and not according to a methodology imposed by the Legislature.

Item 0520-001-0001—For support of Secretary for Business, Transportation and Housing. I reduce this item from \$8,828,000 to \$8,678,000.

I am deleting the \$150,000 legislative augmentation which provides funding for the Small Business Advocate within the Business, Transportation and Housing Agency. I am a strong proponent of keeping California’s business climate positive and helping business development, and believe that small businesses would be best served with this interagency 95 coordinating function remaining at the Governor’s Office of Planning and Research. The Office of Planning and Research should perform this function within existing resources.

Item 0520-001-0044—For support of Secretary for Business, Transportation and Housing. I revise this item by reducing:

(2) 25-Infrastructure Finance and Economic Development Program from \$15,700,000 to \$13,550,000;

(5) Amount payable from the General Fund (Item 0520-001-0001) from -\$8,828,000 to -\$8,678,000; and by deleting:

(9) Amount payable from the Chrome Plating Pollution Prevention Account (Item 0520-001-9329) (-\$2,000,000).

I am reducing this item to conform to the actions I have taken in Items 0520-001-0001 of this bill and 0520-001-9329 of the Budget Act.

Item 3600-001-0001—For support of Department of Fish and Game. I reduce this item from \$44,431,000 to \$38,431,000 by reducing:

(1) 20-Biodiversity Conservation Program from \$132,172,000 to \$128,172,000;

(2) 25-Hunting, Fishing and Public Use from \$48,920,000 to \$44,920,000;

(4) 40-Conservation Education and Enforcement from \$55,643,000 to \$50,643,000;

(12) Amount payable from the Fish and Game Preservation Fund (Item 3600-001-0200) from-\$98,919,000 to -\$95,919,000;

(18.5) Amount payable from the Salmon and Steelhead Trout Restoration Account (Item 3600-001-0384) from -\$8,000,000 to -\$4,000,000; and by deleting Provisions 3 and 4 to conform to this action.

I am deleting the \$5,000,000 legislative augmentation to create 40 new game warden positions. The Department has 352 warden positions available to enforce California's Fish and Game laws. While I am supportive of enforcing California's Fish and Game Code, I am unable to concur in this specific augmentation because of the need to ensure a prudent reserve for economic uncertainties. I am deleting Provision 3 to conform to this action.

I am deleting the \$1,000,000 legislative augmentation to create 7.0 positions for the Wild and Heritage Trout Program. I am deleting Provision 4 to conform to this action.

I am also revising this item to conform to the action I have taken in Item 3600-001-0200 and Item 3600-001-0384.

These reductions are necessary to provide for a prudent General Fund reserve in light of the states current fiscal condition. With these reductions, \$272,209,000 still remains to support these programs.

Item 3600-001-0200—For support of Department of Fish and Game. I reduce this item from \$98,919,000 to \$95,919,000.

I am deleting the \$3,000,000 legislative augmentation which would increase funding for fish hatchery operations to conform to the action I have taken in Items 3640-401 and 3600-001-0001.

Item 6440-001-0001—For support of University of California. I reduce this item from \$2,618,386,000 to \$2,614,585,000 by reducing:

(1) Support from \$2,534,890,000 to \$2,531,089,000, and by revising Provisions 12 and 13 and by deleting Provision 25.

I am deleting the \$3,800,000 legislative augmentation for the Labor Institute.

The Legislature's action restores funding that was provided on a one-time basis in the 2004 Budget Act and these reductions are needed to help bring ongoing expenditures in line with existing resources.

I am deleting Provision 25 to conform to this action.

I am also reducing this item by \$1,000 and revising Provision 12 to eliminate the Legislature's requirement that the California State Summer School for Math and Science (COSMOS) be evaluated consistent with the accountability framework for outreach programs that was developed by the University in April 2005. This program is not an outreach program focused on increasing the academic performance of disad-

vantaged students; therefore, an evaluation on that basis would not be productive. The \$1,000 reduction reflects savings by revising Provision 12, as follows, to eliminate the unproductive effort required by the Provision:

“12. It is the intent of the Legislature that the University of California report by April 1, 2006, on the outcomes and effectiveness of COSMOS ; ~~consistent with the accountability framework developed by the University of California for student academic preparation and education programs in April 2005 .~~”

I am revising Provision 13 to eliminate the Legislature’s requirement that the Welfare Policy Research Project be located at the University of California at Berkeley campus. This is an internal issue to the University, and as such, both usurps the autonomy of the University and the authority of the Executive Branch to operate programs. I am revising Provision 13 to conform to this action as follows:

“13. The amount appropriated in Schedule (1) includes funding for the University of California ~~at Berkeley; Institute for Governmental Studies;~~ to support the Welfare Policy Research Project, per Article 9.7 (commencing with Section 11526) of Chapter 2 of Part 3 of the Welfare and Institutions Code.”

Finally, I am sustaining the \$17.3 million legislative augmentation for Student Academic Preparation and Education Programs on a one-time basis, with the understanding that the University will work with the Administration to fully evaluate the cost-effectiveness of each program and eliminate those that cannot demonstrate an adequate return on investment.

Item 6610-001-0001—For support of the California State University. I reduce this item from \$2,554,085,250 to \$2,550,645,250 by reducing:

(1) Support from \$3,978,663,250 to \$3,975,223,250, and by revising Provision 11.

I am reducing the legislative augmentation for a specific entry-level master’s degree program in nursing from \$4,000,000 to \$560,000 because the level of funding provided exceeds the programmatic need in the budget year. However, I believe very strongly in increasing the number of nurses in California. Therefore, in order to ensure that all these dollars are not left unspent, and actually are used to address our nursing shortage, I am setting aside the vetoed amount, to address this critical need through different approaches, pursuant to subsequent legislation. For instance, I would consider signing legislation that would appropriate the remainder of the \$4,000,000 to the California State University, the University of California, or both, to work with some of California’s independent colleges and universities to increase capacity for nursing programs with the objective to further increase the number of nursing faculty available in our state. The availability of increased nursing faculty will allow schools to offer more nursing classes and increase the State’s capacity to train an even greater number of nurses.

I am revising Provision 11 to conform to this action as follows:

“11. Of the amount appropriated in Schedule (1), \$4,000,000 ~~\$560,000~~ is to support the development of entry-level master’s degree programs in nursing, pursuant to Article 8 (commencing with Section 89270) of Chapter 2 of Part 55 of Title 3 of the Education Code.”

Finally, I am sustaining the \$7 million legislative augmentation for student academic preparation and student support services programs on a one-time basis, with the understanding that the University will work with the Administration to fully evaluate the cost-effectiveness of each program and eliminate those that cannot demonstrate an adequate return on investment.

Item 6870-101-0001—For local assistance, Board of Governors of the California Community Colleges. I am deleting Provision 6.6 of this item to conform to my action on that same Provision and Control Section 24.50 in the main budget bill, SB 77:

As stated in the veto message for SB 77, I am deleting Provision 6.6 which states legislative intent to fund Career Technical Education pursuant to the Legislature’s new

added Control Section 24.50. Control Section 24.50 would require that \$20,000,000 for Career Technical Education be linked to providing an identical amount of funding for supplemental instructional materials for English learners. These two programs do not share any legal or programmatic relationship; thus, the Control Section creates an inappropriate funding link between these distinct programs. Further, this action is unconstitutional and attempts to usurp the Governor's veto authority.

I have a strong commitment to career technical education reform in order to ensure that all students have the opportunity to prepare for high paying careers in the high-demand job sectors of our economy. Therefore, I am setting aside \$20,000,000 from my veto of Control Section 24.50 to provide support for Career Technical Education in separate legislation.

Item SEC. 29.50—Employee Compensation Savings. I delete this control section.

I am deleting Control Section 29.50 because this language is unnecessary and infringes on the Administration's prerogatives regarding collective bargaining. This section requires the Administration to notify the Legislature 10 days prior to any reductions in appropriations based on the results of collective bargaining. Control Section 4.01 provides the same authority to reduce appropriations but provides for legislative notification within 30 days of the reductions. Notification prior to reductions would place the Legislature in the position of approving or disapproving specific employee compensation reforms that arise from collective bargaining negotiations, rather than ratifying memoranda of understanding that require expenditures of funding as provided for in Government Code Sections 3517.6 and 3517.61. This constitutes an infringement on the Governor's responsibilities under the Dills Act.

With the above deletions, revisions, and reductions, I hereby approve Senate Bill 80.

ARNOLD SCHWARZENEGGER, Governor

3 [Ch. 81] To the members of the California State Senate:

I am signing Senate Bill No. 71 with the following line item veto in Section 1 to more closely align the bill with my expenditure plan.

SECTION 1. Section 2932.2 is added to the Fish and Game Code, to read:

2932.2. Of the funds appropriated pursuant to Section 79565 of the Water Code, not less than ~~twelve million dollars~~ *eight million five hundred thousand dollars* ( ~~\$12,000,000~~ *\$8,500,000* ) shall be made available for transfer or direct expenditure for acquisition, grants, or other activities that directly restore the Salton Sea and its transboundary watersheds, consistent with Section 2932.

I am reducing this allocation in recognition of the fact that only \$8,800,000 in funds appropriated pursuant to Section 79565 of the Water Code will be available for allocation during 2005–06. By reducing this allocation to \$8,500,000, the available funding will not be exceeded, and a small reserve will remain for contingencies in all activities and projects funded by this section of the Water Code.

With the above line item veto, I hereby approve SB 71.

ARNOLD SCHWARZENEGGER, Governor

comfort stations, county levies for public, 158

mosquito abatement districts, vector control districts, and recreation and park districts, 158

transactions and use taxes. See TRANSACTIONS AND USE TAXES.

## TEACHER CREDENTIALING, COMMISSION ON

meetings, 73

reporting requirements, 69

## TEACHER, DAY OF THE

proclamation, 40

TEACHERS. See SCHOOLS—*teachers*.

## TEACHERS' RETIREMENT SYSTEM, STATE

appropriations, 39

## benefits—

preretirement election, 418

purchasing power of benefits, effect of inflation on, 351

retirement allowances: payment, termination, etc., 351, 661

termination benefits, 661

cash balance benefit program, 351

## compensation—

final compensation, determination of, 351

fixed compensation, 351

investment policies re companies in sudan, 98

medicare coverage, 328, 351

## members—

domestic partners, registered, 418

federal social security coverage, 328, 351

refunds of contributions, 661

service credit: computation, 351

## TECHNOLOGY SERVICES, DEPARTMENT OF

funding, etc., 74

## TELECOMMUNICATIONS. See also INTERNET; TELEPHONE CORPORATIONS AND TELEPHONES.

local agencies: community telecommunications plans, 531

reading systems for individuals with print disabilities, telephonic, 73

wireless telecommunications. See TELEPHONE CORPORATIONS AND TELEPHONES—*cellular phones, services, etc.*

## TELEPHONE CORPORATIONS AND TELEPHONES. See also PUBLIC UTILITIES; TELECOMMUNICATIONS.

## cellular phones, services, etc.—

calling plans, service usage, etc., 511

directory, inclusion of dialing number in: consent, 495

facilities, transmission: location, construction, etc., 263

ice (in case of emergency) cell phone campaign, 137

911 calls: alternate routing, 21

political advertisements, text message, 711

providers, wireless services: real property leases, 263

## customers and subscribers—

calling plans, service usage, etc., 511

deaf and hearing-impaired persons, 453

low-income households, 662

NOTE: Citations are to chapter numbers; resolution chapters are indicated in *italics*. First Extraordinary Session chapter or resolution numbers are followed by (IX).

## TELEPHONE CORPORATIONS AND TELEPHONES—Continued

- 911 emergency response system—
  - cellular phones, calls from: alternate routing, 21
  - surcharge, emergency telephone users, 519
- rates and charges—
  - cost recovery surcharges, 453
  - emergency telephone users surcharge, 519
  - toll call pricing, 115
- reading systems for individuals with print disabilities, telephonic, 73
- service routes, extended area, 115
- taxation: emergency telephone users surcharge, 519

## TELEVISION

- closed-circuit television testimony, 480
- employees, broadcast industry: meal breaks, 414
- motion picture production. See MOTION PICTURES.
- public broadcasting stations: recognition, etc., 130

## TERRORISM

- bioterrorism—
  - border health activities, coordination of, 80
  - response, preparation, etc., 478
- funding, antiterrorism, 74
- homeland security—
  - infrastructure security: building blueprints, documents, etc.: exemption from disclosure requirements, 476
  - legislative committee on emergencies and homeland security, joint, 106
  - training center, ben clark public safety, 62

chula vista, 143

construction: design-build procurement process, 460

fresno county, 460

funding, 143, 455

redding, 460

shasta county, 460

yountville, 455

## VIDEOS, VIDEO TECHNOLOGY, ETC.

games, violent video: sales, etc., to minors, 638

providers, video: billing practices, 429

## VOCATIONAL EDUCATION

career technical education—

before- and after-school programs, 353

course of study, prescribed, 352, 677

school accountability report cards, 354

regional occupational centers and programs—

apprenticeship programs, 73, 491

employees, 328, 351

funding, 73, 491

## VOLUNTEERS

golden state museum public benefit corporation, 6

VOTERS AND VOTING. See ELECTIONS.

## W

## WAGERS, GARY R.

state highway routes 5 and 113: designation of interchange as chp sergeant gary r.  
wagers memorial interchange, 70

WAGES. See SALARIES, WAGES ETC.

WAR. See name of particular war.

## WARRANTS

bench warrants, noncriminal: fees, 474

## WASTE CONTROL AND DISPOSAL

hazardous materials, substances, etc.—

facilities, hazardous waste—

equipment and structural modifications, 577

fees, disposal, 519

postclosure plans, 577

storage facilities, 577

fees, disposal: payments: electronic funds transfers, 519

generators of hazardous waste: fees, 519

management, waste—

unified regulatory program—

funding, 81

minor violations, 388

reduction, hazardous waste: funding, 74

recycling. See RECYCLING.

sewers and sewage—

development projects: priority for sewer services, 727

streams and channels: use or enlargement for sewage treatment purposes, 112

ships, oceangoing, 588

solid waste—

batteries, 572

bkk landfill, west covina, 81

collection liens, solid waste, 564

collection services, refuse: costs, charges, etc., 564

collection vehicles—

biodiesel fuel, 365

safety equipment, 166

compost, 383

contracts, waste disposal, 564, 590

county services, 564

fees, disposal, 564

grease: collection, transportation, etc., 533

licenses, permits, franchises, etc., waste disposal, 564

management fees, integrated waste: payments: electronic funds transfers, 519

recycling. See RECYCLING.

rural cities: waste management, 590

tires, waste. See TIRES.

water discharges. See WATER.

## WATER

- agencies, water. See WATER AGENCIES.
  - authorities, water. See WATER AUTHORITIES.
  - bottled water. See subheading, *drinking water*.
  - contamination. See subheading, *pollution*.
  - development projects: priority for water services, 727
  - discharges—
    - waste discharges—
      - effluent limitation, 145
      - requirements: prescribing, waiving, etc., 145
      - sewage. See WASTE CONTROL AND DISPOSAL—*sewers and sewage*.
      - ships, oceangoing, 588
      - violations, 145
  - districts. See DISTRICTS; and name of particular district.
  - drinking water—
    - bottling plant licensing fees, 401
    - reservoirs: recreational use, 139, 252
    - systems, public. See subheading, *systems, public*.
  - floods and flood control. See FLOODS AND FLOOD CONTROL.
