## PREFACE

### Digests

The Summary Digest consists of a short summary of each law enacted, and of each concurrent or joint resolution adopted by the Legislature in 2006.

The text of the Summary Digest is arranged numerically by chapter number.

Superior numbers following the title refer to a Governor's Message affecting that law. These are printed after the digests in the "Digest Chapters Superior Numbers" section.

### Cross Reference Tables

Cross reference tables are arranged numerically by bill or resolution number and indicate the chapter number of each.

### New General Laws

Lists new general laws passed in the years 1999–2006 which do not specifically amend, add to, or repeal any existing code or general law.

### Index

A subject matter index to all measures, including constitutional amendments and resolutions, is included.

### Statutory Record

This edition of the Summary Digest includes a statutory record for 1999–2006. Superior numbers following the *Effect* refer to a special condition affecting that section.

Cumulative statutory records for 10-year periods, 1989–1998, 1979–1988, 1969–1978, 1959–1968 and 1949–1958, and for the 16-year period, 1933–1948, are published in separate volumes, which supplement the original statutory record, 1850–1932, published in 1933.

## EFFECTIVE DATES

### Regular Session

The 2005–06 Regular Session reconvened on January 4, 2006, and adjourned *sine die* on November 30, 2006. Statutes enacted in 2006, other than those taking immediate effect, will become effective January 1, 2007. In absence of other considerations, the provisions of a statute become operative on the date it takes effect. Digests indicate statutes taking immediate effect.

An urgency statute, and a statute calling an election, providing for a tax levy, or making an appropriation for the usual current expenses of the state may take effect immediately. Such a statute becomes *effective* on the date it is filed with the Secretary of State.

However, any statute may, by its own terms, delay the *operation* of its provisions until the happening of some contingency, until a specified time, or until a vote of the electors at a statewide election. Also, a later statute or a general provision in a particular code may delay the operation of a statute to a time after its effective date.

The effective date of a joint or concurrent resolution is the date it is filed with the Secretary of State.

A constitutional amendment proposed by the Legislature and adopted by the people takes effect the day after the election unless the measure provides otherwise.

### Extraordinary Sessions

An urgency statute enacted at a special session of the Legislature takes effect immediately, as outlined above, and the same rules apply with respect to a delayed *operative date*. A nonurgency statute takes effect on the 91st day after adjournment of the special session at which the bill was passed. The effective date of a concurrent resolution is the date it is filed with the Secretary of State.

The 2005–06 First Extraordinary Session reconvened in the Assembly on January 5, 2006, and in the Senate on January 4, 2006, and adjourned *sine die* on November 30, 2006. No statutes were enacted at the 2005–06 First Extraordinary Session.

The 2005–06 Second Extraordinary Session convened on June 27, 2006, and adjourned *sine die* on November 30, 2006. No statutes were enacted at the 2005–06 Second Extraordinary Session.

**DIGESTS OF STATUTES  
ENACTED IN 2006**

2005–06 REGULAR SESSION

---

---

**BILL CHAPTERS****Ch. 1 (SB 1026) Kuehl Highway construction contracts: design-build projects.**

Existing law makes the Department of Transportation responsible for improving and maintaining the state highway system. Under existing law, until January 1, 2010, the department is authorized to utilize design sequencing as an alternative contracting method for the design and construction of not more than 12 transportation projects.

This bill would authorize the Los Angeles County Metropolitan Transportation Authority, until January 1, 2010, in consultation with the department, to use a specified design-build procurement process for the construction of a high-occupancy vehicle lane in the County of Los Angeles designated in the National Corridor Infrastructure Improvement Program, the federal "Safe, Accountable, Flexible, Efficient Transportation Equity Act," if certain conditions are satisfied.

This bill would require design-build entity bidders to provide certain information in a questionnaire submitted to the authority that is verified under oath. Because a verification under oath is made under penalty of perjury, the bill would create a new crime and impose a state-mandated local program. After a contract is awarded, the bill would require the authority to report to a specified committee of the Legislature regarding implementation of the design-build process.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 2 (AB 132) Nunez Medi-Cal: prescription drug benefit.**

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits, including, for certain beneficiaries, prescription drug benefits. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

Existing law provides for the federal Medicare Program, which provides health care benefits, including prescription drug benefits, to persons 65 years of age and older and other specified persons. Under the Medicare Program, prescription drug benefits are obtained through enrollment in a prescription drug plan offered under the program. Existing law requires Medicare-eligible persons who are also eligible for Medi-Cal prescription drug benefits to obtain those benefits through a prescription drug plan under the Medicare Program, except as specified.

This bill would require the department, beginning on January 12, 2006, and concluding 15 calendar days later, to provide drug benefits, when any of specified conditions exists, to a Medicare-eligible person who is also eligible for Medi-Cal prescription drug benefits and who is not able to obtain drug benefits from his or her prescription drug plan under the Medicare Program. The bill would allow the Governor to extend coverage for these drug benefits from the close of the initial 15-day period for up to an additional 15-calendar-day period.

The bill would appropriate \$150,000,000 from the General Fund for the purposes of the bill.

This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 3 (SB 517) Romero High school exit examination: pupils with disabilities.**

Existing law requires the Superintendent of Public Instruction, with the approval of the State Board of Education, to develop a high school exit examination in English language arts and mathematics in accordance with state academic content standards. Existing law requires, commencing with the 2003–04 school year, each pupil completing grade 12 to successfully pass the high school exit examination as a condition of receiving a diploma of graduation or

a condition of graduation from high school. Existing law requires that the high school exit examination be offered to individuals with exceptional needs, and that individuals with exceptional needs be administered the examination with appropriate accommodations, where necessary.

Existing law requires a school principal, at the request of the parent or guardian, to submit a request for a waiver of the requirement to successfully pass the high school exit examination to the governing board of the school district for a pupil with a disability who has taken the examination with modifications that alter what the test measures and has received the equivalent of a passing score on one or both subject matter parts of the examination. Existing law authorizes the governing board of a school district to waive the requirement to successfully pass one or both parts of the high school exit examination for a pupil with a disability if specified requirements are met.

This bill would require a school district to report to the State Board of Education, in a manner and by a date determined by the Superintendent of Public Instruction, the number and characteristics of these waivers reviewed, granted, and denied and any additional information, as provided, thereby imposing a state-mandated local program.

This bill would require a school district or state special school, as specified, to grant a high school diploma to a pupil with a disability who is scheduled to graduate from high school in 2006, has not passed the high school exit examination, has not received a high school exit examination waiver, and meets other specified criteria. The bill would require a school district or state special school that fails to grant a high school diploma to such a pupil to submit certain documentation to the State Board of Education within 15 days of its determination that the pupil does not meet the specified criteria, and would require the board to review that failure to grant a high school diploma, as provided. The bill would authorize the board to direct the school district or state special school to grant a high school diploma to the pupil if the board finds that the pupil meets the specified criteria. The bill also would require the school district and state special school to report to the Superintendent of Public Instruction certain information, including the number of pupils granted diplomas in this manner. The bill would provide for the repeal of these provisions on December 31, 2006. By imposing additional duties on school districts, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 4 (SB 299) Chesbro Dentistry.

Existing law, the Dental Practice Act, provides for the licensure and regulation by the Dental Board of California of those engaged in the practice of dentistry. Existing law requires an applicant for licensure to take an examination before the board and meet certain other requirements.

Existing law requires an applicant to provide proof that he or she has either been in active clinical practice or a full-time faculty member in an accredited dental education program and in active clinical practice for at least 5,000 hours in 5 of the 7 years preceding his or her application. Existing law authorizes an applicant that proves at least 2 years of clinical practice or credit to complete the remainder of the requirement by filing a copy of a contract to practice dentistry full time in a clinic meeting specified requirements or in an accredited dental education program.

This bill would provide that the entire 5-year clinical practice requirement is met if an applicant agrees to practice dentistry full time for 2 years in a qualifying clinic or to teach or

practice dentistry full time for 2 years in an accredited dental education program. The bill would authorize the board to impose restrictions on a license issued under these provisions on or after January 1, 2006, limiting the holder's practice to designated settings until expiration of the 2-year term.

This bill would appropriate \$53,000 from the State Dentistry Fund to the Department of Consumer Affairs for these purposes.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 5 (SB 283) Maldonado Vehicles: combination length.

Existing law prohibits any combination of vehicles coupled together, including any attachments, from exceeding a total length of 65 feet, with certain, specified exceptions. Existing law, which became inoperative January 1, 2006, exempted a combination of vehicles from the specified length limitation, and authorized the combination to have a total length of not more than 75 feet, if the combination (1) consisted of a motortruck and 2 trailers; (2) no trailer in the combination exceeded 28 feet 6 inches in length; (3) the combination was used exclusively to transport agricultural products from the field to the first point of handling and return, and each direction of transport did not exceed 80 miles; and (4) the combination was not operated on a highway that is designated as a national network route.

This bill would make that exemption operative until January 1, 2007.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 6 (AB 1129) Mountjoy Judicial elections.

(1) The Elections Code authorizes each candidate for nonpartisan elective office in any local agency, including any city, county, city and county, or district to prepare a candidate's statement on an appropriate form provided by the elections official. That law also requires that the statement be filed in the office of the elections official when the candidate's nomination papers are returned for filing, if it is for a primary election or for an election for offices for which there is no primary election, and requires that the statement be filed no later than the 88th day before the election, if it is for an election for which nomination papers are not required to be filed.

This bill would, until January 1, 2007, instead require for a candidate for a judicial office that the candidate statement be filed on the 83rd day before the election.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 7 (SB 1233) Perata Medi-Cal: prescription drug benefit.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits, including, for certain beneficiaries, prescription drug benefits. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

Existing law provides for the federal Medicare Program, which provides health care benefits, including prescription drug benefits, to persons 65 years of age and older and other specified persons. Under the Medicare Program, prescription drug benefits are obtained through enrollment in a prescription drug plan offered under the program. Existing law requires Medicare-eligible persons who are also eligible for Medi-Cal prescription drug benefits to obtain those benefits through a prescription drug plan under the Medicare Program, except as specified.

Existing law requires the department, beginning on January 12, 2006, and concluding 15 calendar days later, to provide drug benefits, when any of specified conditions exists, to a Medicare-eligible person who is also eligible for Medi-Cal prescription drug benefits and who is not able to obtain drug benefits from his or her prescription drug plan under the Medicare Program. Existing law allows the Governor to extend coverage for these drug benefits from the close of the initial 15-day period for up to an additional 15-calendar-day period.

This bill would, instead, require the department to provide the above drug benefits through February 15, 2006. It would allow the Governor, after that date, and upon notice to the Joint Legislative Budget Committee, to extend coverage for those drug benefits for coverage periods of up to 30 days each, but in no event beyond May 16, 2006.

Existing law appropriates \$150,000,000 from the General Fund for the purposes of the extension authorization. By extending the period for which these appropriated funds may be used to include any period for which the drug benefits may be provided pursuant to this bill, this bill would result in an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 8 (SB 912) Ducheny Medi-Cal: provider reimbursement.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits.

Existing law requires the Director of Health Services, until January 1, 2007, to reduce by 5% Medi-Cal provider payments for Medi-Cal program services for dates of service on and after January 1, 2004. However, existing law makes this reduction inapplicable to Medi-Cal program services provided between January 1, 2004, and December 31, 2005. Existing law also requires the director to make reductions in other specified programs, including payments made to managed health care plans.

This bill would eliminate the above reductions with respect to Medi-Cal program services for dates of service commencing 14 days after the effective date of the bill and ending on January 1, 2007, to the extent that federal financial participation is available for the increase provided for in these provisions. The bill would exempt from elimination the reduction in payments to managed health care plans.

The bill would state the intent of the Legislature that the department take all administrative steps necessary to implement expeditiously these provisions.

The bill would appropriate \$22,500,000 from the General Fund and \$25,800,000 from the Federal Trust Fund to defray the cost of eliminating the Medi-Cal reductions described above.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 9 (AB 64) Cohn Recording crimes.

Existing law provides that a person is guilty of failure to disclose the origin of a recording or audiovisual work if, for commercial advantage or private financial gain, he or she advertises, sells, rents, manufactures, or possesses for those purposes, a recording or audiovisual work that does not disclose the name of the manufacturer, author, artist, performer, or producer, as specified. Failure to disclose the origin of a recording or audiovisual work is punishable by imprisonment in a county jail, imprisonment in the state prison, and fine, or by both imprisonment and fine, as specified, depending on the number of articles of audio recordings or audiovisual works involved, and whether the offense is a first offense, or 2nd subsequent offense.

This bill would reduce the required number of audio recordings involved necessary to prosecute this offense as a felony. Because this bill would increase the prosecutorial duties of local agencies, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 10 (AB 424) Calderon Identity theft.

Existing law provides that every person who willfully obtains personal identifying information about another person, as defined, and uses that information for any unlawful

purpose is guilty of a crime. Existing law provides a procedure for a person to initiate an investigation of potential identity theft. Existing law also provides that any person, upon discovering that in the person's name an unauthorized individual has made an application for certain services or has opened certain accounts, is entitled to receive the identifying information that was used by the unauthorized individual to apply for any service or open any account, upon the presentation of a copy of a police report and identifying information.

This bill would expand the definition of "personal identifying information" to include an equivalent form of identification. This bill would provide that "person" as used in these provisions includes a firm, association, organization, partnership, business trust, company, corporation, limited liability company, or public entity. By expanding the scope of an existing crime, this bill imposes a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 11 (AB 679) Calderon Air resources: diesel fuel.

Existing law imposes various limitations on emissions of air contaminants for the control of air pollution from vehicular and nonvehicular sources and generally designates the State Air Resources Board as the state agency with the primary responsibility for the control of vehicular air pollution. Existing law imposes emission standards on used motor vehicles, including heavy-duty diesel motor vehicles. Existing law authorizes the state board to adopt and implement motor vehicle emission standards, in-use performance standards, and motor vehicle fuel specifications that the state board has found to be necessary, cost effective, and technologically feasible. Existing law requires the state board to consult with significantly impacted entities and to make specified determinations before adopting or amending a standard or regulation relating to motor vehicle fuel specifications. Existing federal law requires the state to submit a state implementation plan for the control of air pollution that, among other things, lists reductions in emissions in the state. Existing law makes legislative findings and declarations relating to reductions in diesel emissions from motor vehicles. Existing law makes legislative findings and declarations relating to reductions in diesel fuel, as defined, by entities that do not have refineries in California. The bill would authorize the state board to designate a fuel as a compliant diesel fuel, as specified. The bill would also require the state board to convene a panel of interested parties to develop a test protocol for the evaluation of California Air Resources Board (CARB) diesel fuel, and to recommend to the executive officer of the state board a subsequent test program that measures the emissions benefits of CARB diesel fuel. The bill would also require the state board, no later than December 31, 2007, to complete the test program and to submit the results of the test program to specified committees of the Legislature.

#### Ch. 12 (SB 1202) Murray State claims.

Existing law requires the California Victim Compensation and Government Claims Board to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate \$1,085,100 from the General Fund to the Executive Officer of the California Victim Compensation and Government Claims Board to pay specified claims.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 13 (SB 288) Battin Gaming.

(1) Existing law requires each county that administers grants from the Indian Gaming Special Distribution Fund to provide an annual report to the Legislature by April 1 of each year, detailing the specific projects funded by all grants in that county's jurisdiction.

This bill would instead require that report to be provided by October 1 of each year to the Chairperson of the Joint Legislative Budget Committee, the chairpersons of the Senate and Assembly committees on governmental organization, and the California Gambling Control Commission. The bill would also make technical, nonsubstantive changes to that provision of law.

(2) Existing law authorizes funds within the Indian Gaming Special Distribution Fund to be used to provide grants to local government agencies impacted by tribal gaming, among other purposes.

This bill would appropriate \$20,000,000 from the Indian Gaming Special Distribution Fund for grants for local government agencies, as specified. The bill would also make a statement of intent that this appropriation be used for workload associated with specified Indian gaming compacts.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 14 (SB 169) Migden Certified phlebotomy technicians.

Existing law requires an unlicensed person employed by a licensed clinical laboratory who performs venipuncture or skin puncture to be certified as a certified phlebotomy technician. However, existing law requires an unlicensed person who performs venipuncture or skin puncture who was employed by a clinical laboratory for the purposes of withdrawing blood or for clinical laboratory tests on or before April 2003, to comply with the certification requirement by April 2006.

This bill would extend the date for compliance with that certification requirement to January 1, 2007, provided that the application is submitted to the department by July 1, 2006.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 15 (SB 262) Dunn State Bar of California: audit.

Existing law, the State Bar Act, provides for the licensing and regulation of attorneys by the State Bar of California. Existing law requires the Board of Governors of the State Bar to contract with a nationally recognized independent public accounting firm to conduct an audit of the State Bar's financial statement for each fiscal year.

This bill would instead require the Board of Governors to engage the services of an independent national or regional public accounting firm with at least 5 years of experience in governmental auditing to conduct the State Bar audit. The bill would also require the board, in selecting the accounting firm, to consider the value of continuity, along with the risk that continued long-term engagements of an accounting firm may affect the independence of that firm.

#### Ch. 16 (AB 601) Berg Fisheries: salmon and Dungeness crab.

(1) Existing law establishes the Commercial Salmon Trollers Enhancement and Restoration Program, that, among other things, requires the Department of Fish and Game to issue a commercial fishing salmon stamp that is valid during the commercial salmon season of the year in which it was issued. Existing law prohibits specified persons from taking salmon for commercial purposes or being on board a vessel on which salmon are taken for commercial purposes while salmon are being taken or transported, unless that person has a commercial fishing salmon stamp affixed to his or her commercial fishing license. Existing law requires the department to deposit the fees received in the Commercial Salmon Stamp Account in the Fish and Game Preservation Fund, and specifies how the funds may be allocated and used. Existing law provides that the Commercial Salmon Trollers Enhancement and Restoration Program shall remain in effect only until January 1, 2007, and as of that date is repealed, unless as provided.

This bill would extend the operation of the Commercial Salmon Trollers Enhancement and Restoration Program until January 1, 2012.

(2) Existing law regulates the Dungeness crab fishery and, among other things, permits the Director of the Department of Fish and Game to delay the opening of the fishery in specified situations and regulates the taking of crab during those delays. Existing law sets forth the qualifications for a Dungeness crab vessel permit, and provides that no person shall use a vessel to take, possess, or land Dungeness crab for commercial purposes without a Dungeness crab vessel permit. Existing law sets forth requirements for the issuance, transfer, and revocation of a Dungeness crab vessel permit, and specifies that the department shall charge a fee for each Dungeness crab vessel permit. Existing law requires the director to convene a Dungeness crab review panel for the purpose of reviewing permits and application transfers. Existing law provides that those provisions shall become inoperative on April 1, 2006, and, as of January 1, 2007, are repealed.

This bill would extend the operation of those provisions until April 1, 2010, and would repeal those provisions on January 1, 2011.

(3) Existing law generally makes a violation of fish and game laws a crime.

Because this bill would extend operation of the salmon program and the Dungeness crab fishery regulations and thereby the crimes imposed for a violation of those provisions, the bill would create a state-mandated local program by creating new crimes.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 17 (SB 306) Ackerman Special statewide election expenses.

(1) The Budget Act of 2005 appropriated specified amounts from the General Fund for support of the Secretary of State, including election-related costs.

This bill would appropriate \$9,071,000 for expenditure in the 2005–06 fiscal year in augmentation of these Budget Act appropriations for the purpose of covering expenses incurred by the Secretary of State's office related to the special statewide election held November 8, 2005.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 18 (AB 245) Berg Trinity County Health Care District: election of board members.

Existing law provides for the formation and administration of hospital districts including provisions relating to financing through assessments and bond issuance, the appointment of the governing board, and setting forth the powers of the board, including, but not limited to, the power to enter into contract for equipping, staffing, and operating hospitals.

This bill would, notwithstanding those provisions, require election at large of the board of directors of a health care district formed in the County of Trinity, would set the terms of those members, and would provide for the filling of vacancies.

This bill would make certain findings and declarations regarding the inapplicability of a general statute within the meaning of Section 16 of Article IV of the California Constitution.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 19 (AB 1758) Umberg High Priority Schools Grant Program.

(1) Under the High Priority Schools Grant Program, the Superintendent of Public Instruction, with the approval of the state board, is required to identify schools ranked in deciles 1 to 5, inclusive, on the Academic Performance Index (API), and to invite those schools to participate in the program. Under the existing program, in order to be eligible for

funding from the program, a school is also required to participate in the Immediate Intervention/Underperforming Schools Grant Program.

Existing law requires an applicant under the grant program to submit an application and a school action plan, and requires the Superintendent to establish a procedure for the approval of applications and school action plans. Existing law provides that 36 months after receipt of funding to implement a school action plan, a school that has not met its growth targets each year, but demonstrates significant growth, as determined by the State Board of Education, will continue to participate in the program.

This bill would, instead, provide that 36 months after the receipt of funding to implement a school action plan, all schools that are not subject to state monitoring are eligible for a 4th year of funding, and would require a school that the most recent base API places in decile 6, 7, 8, 9, or 10 to exit the program.

The bill would also require a school that achieves positive growth in each year of the last 3 years of program implementation and achieves growth targets in 2 of those years to exit the program.

(2) Existing law, in certain circumstances, requires a school district to enter into a contract with a school assistance and intervention team to make recommendations for improvement of a school. If a school has not shown significant growth within 24 months of entering the program, existing law permits the Superintendent to assign the management of that school to a college, university, county office of education, or other appropriate educational institution.

This bill would provide specified state funding, subject to certain local funding requirements, to a school district that is required to enter into a contract with a school assistance and intervention team for purposes of implementing any recommendations made by the school assistance and intervention team in the report prepared by the team. The bill would also provide specified funding for support of each school assistance and intervention team that enters into a contract with a school district in accordance with the High Priority Schools Grant Program.

(3) Existing law establishes the “Early Warning Program” for local educational agencies in danger of identification as program improvement local educational agencies under the federal No Child Left Behind Act for purposes of implementing federal requirements under that act. The program subjects to specified sanctions local educational agencies that have been identified for corrective action under the act, in certain circumstances.

Existing law requires a local educational agency that has received a sanction and that has not exited program improvement under the act to appear before the state board within 3 years to review the progress of the local educational agency. Existing law requires a hearing before the state board, as specified, and requires the Superintendent to recommend, and authorizes the state board to approve, alternative sanctions, as specified, or to take appropriate action, as specified.

An existing specified item of the Budget Act of 2005 appropriates \$1,846,724,000 to the department, for local assistance, payable from the Federal Trust Fund.

This bill would provide that \$4,125,000 of the available Title I of the No Child Left Behind Act funds is appropriated from the Federal Trust Fund to the department, for expenditure during the 2005–06 fiscal year, to provide funding to local educational agencies for purposes of the above-described hearing process for, and subsequent sanctions imposed on or actions required of, local educational agencies, thereby making an appropriation.

(4) This bill would make various technical, nonsubstantive changes to existing law.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 20 (SB 699) Soto AIDS: HIV reporting.

(1) Existing law makes provisions for various programs relating to treatment of persons with human immunodeficiency virus (HIV) and the acquired immunodeficiency syndrome (AIDS). Existing law requires that public health records relating to AIDS, containing

personally identifying information, that were developed or acquired by state or local public health agencies be confidential, and prohibits the disclosure of those records, except as otherwise provided for by law for public health purposes or pursuant to a written authorization by the person who is the subject of the record or by his or her guardian or conservator.

This bill would, to ensure knowledge of current trends in the HIV epidemic and to assure that California remains competitive for federal HIV and AIDS funding, require health care providers and laboratories to report cases of HIV infection to the local health officer using patient names. It would require local health officers to report unduplicated HIV cases by name to the State Department of Health Services. The bill would require the department to promulgate specified emergency regulations, not later than one year from the effective date of those provisions, to conform existing administrative regulations to the provisions of the bill, and would make various other changes related to the disclosure of information on HIV cases to federal, state, and local health agencies, as provided.

Existing law requires each county, designated by the Director of Health Services, to make the HIV test available within its jurisdiction without charge, in an accessible manner and on a confidential basis, through the use of a coded system without linking the individual identity with the test request or results.

This bill would, instead, require that those tests be made available on an anonymous basis.

Existing law subjects any person who willfully or maliciously discloses the content of any confidential public health record, as described, to any 3rd party, except pursuant to a written authorization, or as otherwise authorized by law, to a civil penalty in an amount not less than \$1,000 and not more than \$5,000, plus court costs, as determined by the court, which penalty and costs shall be paid to the person whose record was disclosed.

This bill would define “confidential public health record” for purposes of those provisions, and would, instead, subject any person who negligently discloses the content of such a confidential public health record to a civil penalty in an amount not less than \$2,500. The bill would further subject any person who willfully or maliciously discloses the content of such a record to a civil penalty in an amount not less than \$5,000 and not more than \$10,000, plus court costs, as determined by the court, which penalty and costs shall be paid to the person whose confidential public health record was disclosed. This bill would make any person who willfully, maliciously, or negligently discloses the content of any confidential public health record to any 3rd party, except pursuant to a written authorization, as described, or as otherwise authorized by law, resulting in economic, bodily, or psychological harm to the person whose confidential public health record was disclosed, guilty of a misdemeanor.

Existing law permits state and local public health agencies to disclose personally identifying information in public health records, under certain circumstances, to other local, state, or federal public health agencies or to corroborating medical researchers, when the confidential information is necessary to carry out the duties of the agency or researcher in the investigation, control, or surveillance of disease, as determined by the local public health agency.

This bill would also permit the disclosure of that personally identifying information in public health records by the agent of such a local public health agency.

By creating new crimes involving the unlawful disclosure of confidential public health records, and by imposing new duties on local health officers with respect to the reporting of information on HIV cases, the bill would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 21 (SB 841) Hollingsworth Fire protection: firebreaks.

Existing law requires the State Board of Forestry and Fire Protection to adopt regulations implementing minimum fire safety standards related to defensible space, that are applicable to state responsibility area lands under the authority of the Department of Forestry and Fire Protection. Existing law requires a person that owns, leases, controls, operates, or maintains any building or structure in, upon, or adjoining any mountainous area or forest covered lands, brush lands, or grass-covered lands, or any land that is covered with flammable material, to maintain around and adjacent to the building or structure a firebreak of at least 30 feet, as specified.

This bill would, consistent with any other applicable provision of law, authorize a state or local fire official, at his or her discretion, to permit an owner of property, or his or her agent, to construct a firebreak or implement appropriate vegetation management techniques, to ensure that defensible space is adequate for the protection of a hospital, adult residential care facility, school, aboveground storage tank, hazardous materials facility, or similar facility on the property. The bill would authorize the firebreak to be for a radius of up to 300 feet from the facility, or to the property line, whichever distance is shorter.

Ch. 22 (SB 663) Migden Corporation taxes: water's-edge election: foreign affiliated corporations.

Existing law provides that, in the case of a business with income derived from or attributable to sources both within and without this state, the income is apportioned between this state and the other states and foreign countries for tax purposes in accordance with a specified formula based on the property, payroll, and sales within and without this state. Existing law permits a qualified taxpayer, as defined, to elect to determine its income under a water's-edge election. A water's-edge election provides that only the income and apportionment factors of certain described affiliated corporations may be included for purposes of determining the taxpayer's income apportioned to this state.

Existing law requires that income and apportionment factors of a foreign corporation be included in the combined report of a taxpayer making a water's-edge election, but only to the extent of the foreign corporation's United States-source income and apportionment factors. The income and apportionment factors of a controlled foreign corporation, as defined in the Internal Revenue Code, that is an affiliated corporation of a taxpayer are included in the combined report of the taxpayer making a water's-edge election to the extent of the "Subpart F" income ratio, as determined under existing law. Existing law, however, does not specify whether the United States-source income rules or the rules regarding "Subpart F" income, as defined in the Internal Revenue Code, apply to income of a controlled foreign corporation that has both United States-source income and "Subpart F" income.

This bill would clarify that existing law prohibits a controlled foreign corporation from excluding its "Subpart F" income from a water's-edge combined report, even if it is a California taxpayer or has income from a United States source. This bill would also clarify that existing law requires inclusion in a water's-edge combined report of both United States-source income and "Subpart F" income of a controlled foreign corporation, regardless of whether the corporation is a California taxpayer. This bill would declare the intent of the Legislature that this clarification be operative for taxable years beginning on or after January 1, 2006. This bill would also declare the intent of the Legislature that the manner in which a taxpayer reported specified income, as provided, on or before January 1, 2006, shall be deemed to be in compliance with existing law, as it read prior to the enactment

of this act, and that no inference shall be drawn from this act as to the manner in which a taxpayer reported specified income after January 1, 2006. This bill would require the Franchise Tax Board to promulgate regulations to prevent the potential double taxation of income when a controlled foreign corporation has both United States-source income and "Subpart F income."

This bill would take effect immediately as a tax levy.

Ch. 23 (SB 144) Runner Retail food.

The California Uniform Retail Food Facilities Law (CURFFL) provides for the regulation of health and sanitation standards for retail food facilities by the State Department of Health Services and is primarily enforced by local health agencies. CURFFL prohibits a food facility from opening for business without a valid permit issued by the local enforcement agency. A violation of any provision of CURFFL is a misdemeanor.

This bill, commencing July 1, 2007, would repeal CURFFL and would recast and revise its provisions by creating the California Retail Food Code. By creating new crimes and enforcement responsibilities, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 24 (AB 813) Nunez Medi-Cal: emergency drug benefits.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits, including, for certain beneficiaries, prescription drug benefits. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

Existing law provides for the federal Medicare Program, which provides health care benefits, including prescription drug benefits, to persons 65 years of age and older and other specified persons. Under the Medicare Program, prescription drug benefits are obtained through enrollment in a prescription drug plan offered under the program. Existing law requires Medicare-eligible persons who are also eligible for Medi-Cal prescription drug benefits to obtain those benefits through a prescription drug plan under the Medicare Program, except as specified.

Existing law requires the department, through February 15, 2006, and only to the extent that funds are appropriated for this purpose, to provide drug benefits, when any of specified conditions exists, to a Medicare-eligible person who is also eligible for Medi-Cal prescription drug benefits and who is not able to obtain drug benefits from his or her prescription drug plan under the Medicare Program. Existing law allows the Governor, after that date, and upon notice to the Joint Legislative Budget Committee, to extend coverage for those drug benefits for coverage periods of up to 30 days each, but in no event beyond May 16, 2006. Existing law appropriates \$127,500,000 to implement these provisions until June 30, 2007, upon which date any unexpended funds would revert to the General Fund.

This bill would require the department, beginning May 17, 2006, and ending January 31, 2007, and only to the extent that funds are appropriated for this purpose, to provide emergency drug benefits to a Medicare-eligible person who is also eligible for Medi-Cal prescription drug benefits but is unable to obtain drug benefits from his or her Medicare Drug Plan only when one or more of certain conditions are met. The bill would give pharmacies specified duties in this regard, including making a specified certification under penalty of perjury. By expanding the crime of perjury, the bill would impose a state-mandated local program.

The bill would reduce the above appropriation to \$120,000,000, would revise the appropriation to allow the appropriated funds to also be used for the implementation of the

bill, and would delete the June 30, 2007, reversion provision. By expanding the scope of an existing appropriation, this bill would create an appropriation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it would take effect immediately as an urgency statute.

**Ch. 25 (SB 1266) Perata Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006.**

Existing law provides various funding sources for transportation and related purposes.

This bill, subject to voter approval at the November 7, 2006, statewide general election, would enact the Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006 to authorize \$19.925 billion of state general obligation bonds for specified purposes, including high-priority transportation corridor improvements, State Route 99 corridor enhancements, trade infrastructure and port security projects, schoolbus retrofit and replacement purposes, state transportation improvement program augmentation, transit and passenger rail improvements, state-local partnership transportation projects, transit security projects, local bridge seismic retrofit projects, highway-railroad grade separation and crossing improvement projects, state highway safety and rehabilitation projects, and local street and road improvement, congestion relief, and traffic safety.

This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 26 (SB 409) Kehoe Emergency health care services: appropriations.**

Existing law establishes the State Department of Health Services for the administration and oversight of various health care programs.

Existing law establishes the Emergency Medical Services Authority for the coordination and integration of all state activities concerning emergency medical services.

This bill would appropriate from the General Fund \$5,451,000, for the 2005–06 fiscal year, to the department and \$1,622,000 to the authority, for specified public health purposes.

This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 27 (SB 1689) Perata Housing and Emergency Shelter Trust Fund Act of 2006.**

Under existing law, there are programs providing assistance for, among other things, multifamily housing, emergency housing, farmworker housing, home ownership for very low and low-income households, and downpayment assistance for first-time homebuyers.

This bill would enact the Housing and Emergency Shelter Trust Fund Act of 2006, which, if adopted, would authorize the issuance of bonds in the amount of \$2,850,000,000 pursuant to the State General Obligation Bond Law. Proceeds from the sale of these bonds would be used to finance various existing housing programs, capital outlay related to infill development, brownfield cleanup that promotes infill development, and housing-related parks.

The bill would also establish the Transit-Oriented Development Implementation Program, to be administered by the Department of Community Housing and Development. The program would receive funding from the proceeds of the bond act enacted by this bill.

The bill would provide for submission of the bond act to the voters at the November 7, 2006, statewide general election in accordance with specified law.

This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 28 (AB 146) Nunez State employees: memorandum of understanding: State Bargaining Unit 2.**

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the

memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of a memorandum of understanding entered into between the state employer and State Bargaining Unit 2, the California Attorneys, Administrative Law Judges and Hearing Officers in State Employment, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

The bill would provide that provisions of the memorandum of understanding approved by this bill that require the expenditure of funds will not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would authorize the state employer and the affected employee organization to reopen negotiations on all or part of the memorandum of understanding if the Legislature does not approve or fully fund any provision of the memorandum of understanding that requires the expenditure of funds.

(2) Existing law provides that state employees, as defined, who become new members of the Public Employees' Retirement System, during their first 24 months of employment, do not make contributions to the system or receive service credit for their service, and the state employer shall not make contributions on their behalf. These members are instead required to contribute 5% of their monthly compensation, as specified, to an alternate retirement program, administered by the Department of Personnel Administration, and these contributions cease when these state employees begin making their own contributions to the system.

This bill would require that state employees who are hired on or after July 1, 2006, who are members of State Bargaining Unit 2, shall contribute 6% of their monthly compensation, as specified, to the alternative retirement program, as described above.

(3) The Public Employees' Retirement Law provides a comprehensive set of rights and benefits based upon age, service credit, and final compensation. Existing law defines final compensation variously for different member classifications and bargaining units and, in this regard, defines final compensation for a state member for the purpose calculating retirement benefits as the highest annual average compensation earnable by the member during a designated 12-month period.

This bill would provide that final compensation for a person who becomes a state member, as specified, on or after July 1, 2006, and who is represented by State Bargaining Unit 2, means the highest annual average compensation earnable by the member during a designated 36-month period.

(4) The Public Employees' Retirement Law provides that the contribution rate for a state miscellaneous or state industrial member whose service is not included in the federal system is 6% of the compensation in excess of \$317 per month for service rendered on or after July 1, 1976. Existing law provides that the contribution rate for a state miscellaneous or state industrial member whose service has been included in the federal system is 5% of compensation in excess of \$513 per month for service rendered on or after July 1, 1976. Existing law provides that the contribution rate for specified state safety members whose service is not included in the federal system is 6% of the compensation in excess of \$317 per month.

This bill would increase the contribution rates by 1% for the membership classifications described above that are represented by State Bargaining Unit 2, beginning with the July 2006 pay period.

(5) The annual Budget Act appropriates specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds, for state employee compensation.

This bill would appropriate \$13,048,000 from those funds for state employee compensation, in augmentation of the Budget Act of 2005.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 29 (AB 273) Baca Sale of alcoholic beverages: alcohol vaporized device.

The Alcoholic Beverage Control Act contains various provisions regulating the application for, the issuance of, the suspension of, and the conditions imposed upon, alcoholic beverage licenses by the Department of Alcoholic Beverage Control.

This bill would prohibit the sale, purchase, and use of any vaporized form of alcohol produced by an alcohol vaporizing device, as defined. This bill would also provide that a person who purchases or uses any vaporized form of alcohol produced by an alcohol vaporizing device is subject to a fine of \$250.

This bill would also provide that a person who sells or offers for sale any vaporized form of alcohol, or who possesses, sells, or offers for sale any alcohol vaporizing device, is guilty of a misdemeanor and is subject to imprisonment in a county jail, or a fine of not more than \$1,000, or both.

By imposing mandatory jail time in a county jail, this bill would impose a state-mandated local program upon local government.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 30 (AB 1540) Nunez Elections: ballot label and title: SCA 7.

Existing law imposes certain requirements with respect to ballot labels and ballot titles for measures to be submitted to the voters for approval, including constitutional amendments.

This bill would specify the language for the ballot label and title for Senate Constitutional Amendment 7 of the 2005–06 Regular Session for purposes of the November 7, 2006, statewide general election.

The bill would provide that it is to take effect immediately as an urgency statute.

Ch. 31 (AB 1039) Nunez Government: environment: bonds: transportation.

(1) Existing law, the California Environmental Quality Act (CEQA), requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if it finds that the project will not have that effect, unless the project is exempt from the act.

CEQA provides for various exemptions from the requirements of the act.

This bill would exempt specified levee, and highway and bridge seismic retrofit projects, from CEQA. To the extent that the bill would require a local agency to determine whether the exemption applies to a project, the bill would impose a state-mandated local program.

The bill would provide for a master environmental impact report, as specified, for a plan adopted by the Department of Transportation for improvements to regional segments of Highway 99 funded by specified bond funds.

(2) Existing law gives the Department of Transportation full possession and control of state highways and associated property. Existing federal law requires the United States Secretary of Transportation to carry out a surface transportation project delivery pilot program, as specified. The secretary is authorized to permit up to 5 states, including California, to participate in the program and California has agreed to that participation.

This bill would, until January 1, 2009, provide that the State of California consents to the jurisdiction of the federal courts with regard to the compliance, discharge, or enforcement of the responsibilities assumed pursuant to the surface transportation project delivery pilot program, and would make related provisions. The bill would require the department to submit a specified report to the Legislature by January 1, 2008, relating to the surface transportation project delivery pilot program.

(3) Existing law requires permits or approval from various agencies for repairing or constructing levees.

This bill would provide for a consolidated permit or approval for urgent levee repairs funded by specified bond funds.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) Specified provisions of the bill would become operative only if the Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006 or the Disaster Preparedness and Flood Prevention Bond Act of 2006, respectively, is approved by the voters at the November 7, 2006, statewide general election.

Ch. 32 (AB 1467) Nunez Transportation projects: facilities: public-private partnerships.

Existing law, until January 1, 2003, authorized the Department of Transportation to solicit proposals and enter into agreements with private entities or consortia for the construction and lease of no more than 2 toll road projects, and specified the terms and requirements applicable to those projects. Existing law authorizes the department to construct high-occupancy vehicle and other preferential lanes.

This bill, until January 1, 2012, would instead authorize the department and regional transportation agencies, as defined, to enter into comprehensive development lease agreements with public and private entities, or consortia of those entities, for certain transportation projects that may charge certain users of those projects tolls and user fees, subject to various terms and requirements.

The number of projects authorized by these provisions would be limited to 4, with 2 in northern California and 2 in southern California, as selected by the California Transportation Commission. The projects would be primarily for improvement of goods movement.

The bill would also authorize regional transportation agencies, in cooperation with the department, to apply to the commission to develop and operate high-occupancy toll lanes, including the administration and operation of a value pricing program and exclusive or preferential lane facilities for public transit, as specified. The bill would, until January 1, 2012, prescribe the procedures for approval of the applications and limit the number of approved projects to 4, 2 in northern California and 2 in southern California, and would enact other related provisions.

Ch. 33 (AB 140) Nunez Disaster Preparedness and Flood Prevention Bond Act of 2006.

Under existing law, various measures have been approved by the voters to provide funds for water projects, facilities, and programs.

This bill would enact the Disaster Preparedness and Flood Prevention Bond Act of 2006, which would, if approved by the voters, authorize the issuance and sale of bonds in the amount of \$4,090,000,000 for the purposes of financing disaster preparedness and flood prevention projects.

This bill would require the Secretary of State to submit this bond act to the voters at the November 7, 2006, statewide general election.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 34 (AB 142) Nunez Flood control: levee repair and flood control systems.

Existing law establishes the Department of Water Resources, which is given various duties with respect to flood control.

This bill would appropriate \$500,000,000 from the General Fund to the department for levee evaluation and repair, and related work, and flood control system improvements. The

bill would require that levee repairs for those critical levee erosion sites identified under a specified Governor's executive order be made with funds appropriated pursuant to the bill's provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 35 (AB 127) Nunez Education facilities: Kindergarten-University Public Education Facilities Bond Act of 2006.

(1) Existing law, the California Constitution, prohibits the Legislature from creating a debt or liability that singly or in the aggregate with any previous debts or liabilities exceeds the sum of \$300,000, except by an act that (a) authorizes the debt for a single object or work specified in the act, (b) has been passed by a  $\frac{2}{3}$  vote of all the members elected to each house of the Legislature, (c) has been submitted to the people at a statewide general or primary election, and (d) has received a majority of all the votes cast for and against it at that election.

Existing law, the Leroy F. Greene School Facilities Act of 1998, requires the State Allocation Board to allocate to applicant school districts, prescribed per-unhoused-pupil state funding for construction and modernization of school facilities, including hardship funding, and supplemental funding for site development and acquisition.

This bill would enact the Kindergarten-University Public Education Facilities Bond Act of 2006 to authorize \$10,416,000,000 of state general obligation bonds to provide aid to school districts, county superintendents of schools, county boards of education, the California Community Colleges, the University of California, the Hastings College of the Law, and the California State University to construct and modernize education facilities.

The bond act would become operative only if approved by the voters at the November 7, 2006, statewide general election, and would provide for its submission to the voters at that election.

The bill would also submit to the voters for approval an authorization to use the proceeds of any bond act, approved on or before January 1, 2006, that are designated for joint-use facilities to be used for other related school facilities projects.

(2) This bill would specify that certain provisions of the bill shall become operative only if the Kindergarten-University Public Education Facilities Bond Act of 2006 is approved by the voters at the November 7, 2006, statewide general election.

(3) The bill would make conforming, technical changes in related provisions of existing law.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 36 (SB 201) Simitian Marine finfish aquaculture: leases.

(1) Existing law authorizes the Fish and Game Commission to lease state water bottoms to any person for aquaculture, and authorizes the commission to adopt regulations governing the terms of the leases. Existing law prohibits state water bottoms from being leased, unless the commission determines that the lease is in the public interest.

This bill would prohibit a person from engaging in marine finfish aquaculture, as defined, in state waters without a lease from the commission. The bill would require leases and regulations adopted by the commission for marine finfish aquaculture to meet certain standards. The bill would establish maximum initial and renewal terms for those leases.

(2) Existing law requires the restoration of an aquaculture lease site upon the termination of the lease.

The bill would require the commission to require financial assurances of each lessee to ensure that restoration is performed, and would make marine finfish aquaculture lessees responsible for damage caused by their operations, as determined by the commission.

(3) The California Coastal Act requires the Department of Fish and Game, in consultation with the Aquaculture Development Committee, to prepare programmatic environmental impact reports for existing and potential commercial aquaculture operations in both coastal and inland areas of the state if certain conditions are met.

This bill would delete that requirement from the act, and, instead, modify provisions relating to aquaculture to include that requirement. The bill would further require that if a final programmatic environmental impact report is prepared pursuant to that requirement for coastal marine finfish aquaculture projects approved by the commission, the report provide a framework for managing marine finfish aquaculture in a sustainable manner that adequately considers specified environmental factors.

(4) The provisions of the bill would be known as the Sustainable Oceans Act.

(5) Because this bill creates a new crime, it would impose a state-mandated local program.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 37 (SB 1121) Committee on Local Government Validations.

This bill would enact the First Validating Act of 2006, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 38 (AB 881) Emmerson Workers' compensation: roofers.

Existing law requires the Contractors State License Board to require that a license applicant or current licensee have on file at all times a current and valid Certificate of Workers' Compensation Insurance or Certification of Self-Insurance, unless the applicant or licensee meets specified conditions for exemption. Existing law provides that a failure to comply with this requirement shall result in the automatic suspension of the license, as specified.

This bill would require, until January 1, 2011, that, as of January 1, 2007, the registrar of contractors remove the C-39 roofing classification from a license if the contractor fails to comply with the above requirement.

Existing law generally regulates workers' compensation insurance.

This bill would, until January 1, 2011, require insurers who issue workers' compensation policies to contractors holding C-39 licenses to perform annual audits of these policyholders, as specified, and would allow them to recoup the cost of these audits through a policy surcharge.

The bill would require the Insurance Commissioner to direct the rating organization designated as his or her statistical agent to prepare an annual report on the roofing industry, as specified.

#### Ch. 39 (SB 75) Dunn Budget Act of 2005: contingencies and emergencies.

The Budget Act of 2005 appropriated specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies and emergencies.

This bill would make an appropriation of \$2,610,000 in augmentation of the Budget Act of 2005 for the Department of Justice and the California Department of Veterans Affairs.

This bill would declare that it is to take effect immediately as a statute providing for the usual current expenses of the state.

#### Ch. 40 (SB 1154) Committee on Budget and Fiscal Review Budget Act of 2005: augmentation.

The Budget Act of 2005 appropriated specified amounts from the General Fund for specified programs.

This bill would appropriate \$202,496,000, from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds, as scheduled, in augmentation of

appropriations in this Budget Act. The bill would declare that it is to take effect immediately as an urgency statute providing for the usual current expenses of the state.

Ch. 41 (AB 385) Lieber School districts: parcel taxes: exemptions.

Existing law allows any school district to impose qualified special taxes within the district pursuant to specified procedures. Existing law defines qualified special taxes as special taxes which apply uniformly to all taxpayers or all real property within the school district and may include taxes that exempt persons 65 years of age and older.

This bill would also provide that qualified special taxes may include taxes that exempt persons receiving Supplemental Security Income for a disability, regardless of age.

Ch. 42 (SB 230) Figueroa Structural Fumigation Enforcement Program.

Existing law provides that the Los Angeles County Agricultural Commissioner or the Orange County Agricultural Commissioner may contract with the Director of the Department of Pesticide Regulation to perform increased structural fumigation, inspection, and enforcement activities. Existing law authorizes the director to adopt regulations to carry out these provisions and to levy a civil penalty against a person violating these provisions. Under existing law, these provisions would be repealed on July 1, 2006.

This bill would extend these provisions indefinitely.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 43 (AB 840) Arambula Student financial aid: California Community College Transfer Cal Grant Entitlement Program.

(1) Existing law, known as the Ortiz-Pacheco-Poochigian-Vasconcellos Cal Grant Act, establishes, among other programs, the California Community College Transfer Cal Grant Entitlement Program and the Competitive Cal Grant A and B award program, under the administration of the Student Aid Commission, and establishes eligibility requirements for awards under these programs. Existing law requires that a participant in the California Community College Transfer Cal Grant Entitlement Program, among other things, graduate from a California high school or its equivalent during or after the 2000–01 academic year.

This bill would, commencing with the 2006–07 award year, exempt from this requirement a student who graduated from a high school outside of California due solely to orders received from a branch of the United States Armed Forces by that student or by that student's parent or guardian that required that student to be outside of California at the time of high school graduation. The bill would also exempt from this requirement students for whom claims under this program were paid prior to December 1, 2005, and students for whom a valid claim under this program for the 2004–05 award year or the 2005–06 award year was or is paid on or after December 1, 2005, but no later than October 15, 2006.

The bill would require the commission, commencing with the 2006–07 award year, to make preliminary awards to all applicants currently eligible for an award under the California Community College Transfer Cal Grant Entitlement Program and to require each person who receives a preliminary award to affirm, in writing, under penalty of perjury, that he or she meets specified requirements for eligibility in the program. By requiring that affirmation under penalty of perjury, the bill would expand the scope of an existing crime, thereby imposing a state-mandated local program. The bill would require the commission to notify each person who receives a preliminary award under this provision that his or her award is subject to an audit pursuant to the bill.

The bill would require the commission to select, at random, a minimum of 10% of the new and renewal awards made under the California Community College Transfer Cal Grant Entitlement Program, and to require, prior to the disbursement of funds to an affected postsecondary institution under the program, that the institution verify that the student meets specified requirements for eligibility in the program. The bill would provide that an award that is audited under this provision and found to be valid is not subject to a subsequent audit.

The bill would require the commission to seek repayment of any and all funds found to be improperly disbursed under the program.

The bill would require the commission, on or before November 1 of each year, to submit a report to the Legislature and the Governor including, but not necessarily limited to, the number of awards made under this program in the preceding 12 months and the number of new and renewal California Community College Transfer Cal Grant Entitlement awards selected, in the preceding 12 months, for verification under the bill, as categorized by type of postsecondary institution, as specified.

(2) Existing law establishes the Student Aid Commission as the primary state agency for the administration of state-authorized student financial aid programs available to students attending all segments of postsecondary education. Existing law requires the commission, with the assistance of the Attorney General's office, to seek refunds on any awards to students made under specified programs that resulted from the student or his or her parents, or both, reporting information concerning their status incorrectly, with the incorrect information leading to the establishment of the student's financial eligibility to receive an award.

This bill would extend the application of this provision to awards made to students under the Ortiz-Pacheco-Poochigian-Vasconcellos Cal Grant Act.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 44 (AB 713) Torrico Safe, Reliable High-Speed Passenger Train Bond Act for the 21st Century.

Existing law provides for submission of the Safe, Reliable High-Speed Passenger Train Bond Act for the 21st Century to the voters for approval at the November 7, 2006, general election. Subject to voter approval, the act would provide for the issuance of \$9.95 billion of general obligation bonds, \$9 billion of which would be available in conjunction with any available federal funds for planning and construction of a high-speed train system pursuant to the business plan of the High-Speed Rail Authority, and \$950 million of which would be available for capital projects on other passenger rail lines to provide connectivity to the high-speed train system and for capacity enhancements and safety improvements to those lines.

This bill would instead provide for submission of the Safe, Reliable High-Speed Passenger Train Bond Act for the 21st Century to the voters for approval at the November 4, 2008, general election. The bill would make other related changes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 45 (SB 1402) Kuehl Spousal rape.

Existing law defines spousal rape as an act of sexual intercourse accomplished by means of force or violence, when the victim is at the time unconscious, or by threats of retaliation or use of public authority against the victim. Existing law provides, however, that no prosecution will be commenced under these provisions unless the violation was reported to other specified persons within one year of the violation, unless the allegation is corroborated by independent evidence, as specified.

This bill would remove provisions requiring that an allegation of spousal rape has been reported previously or corroborated by independent evidence in order to be prosecuted.

Ch. 46 (AB 1921) Chu State claims.

(1) Existing law requires the California Victim Compensation and Government Claims Board to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate \$5,172,769.66 from various funds to the Executive Officer of the California Victim Compensation and Government Claims Board to pay claims accepted by the board. The bill would require the Controller, upon request of the board, in a form prescribed by the Controller, to transfer surcharges and fees from the Budget Act items of appropriation identified in this bill to Item 1870-001-0001 of Section 2.00 of the Budget Act of 2006. This bill also would appropriate \$704,700 from the General Fund to the board for payment of a specified claim.

(2) Existing law provides that expenses incurred on or after January 1, 2005, and before January 1, 2006, for elections proclaimed by the Governor to fill a vacancy in the office of Senator or Member of the Assembly, or to fill a vacancy in the office of United States Senator or Representative in the Congress of the United States, are to be paid by the state.

This bill would appropriate \$1,841,000 from the General Fund to the Executive Officer of the California Victim Compensation and Government Claims Board to pay claims resulting from county special elections costs as specified.

(3) Existing law provides that a person who has been overpaid on a claim is liable for the amount overpaid unless the overpayment was not due to fraud, misrepresentation, or willful nondisclosure on the part of the recipient and the overpayment was received without fault on the part of the recipient, and its recovery would be against equity and good conscience. All overpayments exceeding \$2,000 must be reported to the Legislature, and the relief from liability is subject to legislative approval.

This bill would express the approval by the Legislature of the report submitted by the California Victim Compensation and Government Claims Board on specified victim compensation claims.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 47 (AB 1801) Laird Budget Act of 2006. <sup>1</sup>

This bill would make appropriations for support of state government for the 2006–07 fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 48 (AB 1811) Laird Budget Act of 2006. <sup>2</sup>

AB 1801, as proposed by Conference Report No. 1 on June 12, 2006, would make appropriations for the support of state government for the 2006–07 fiscal year.

This bill would amend and supplement the Budget Act of 2006 by revising items of appropriation for the judicial branch; the Secretary for Business, Transportation and Housing; the Office of Emergency Services; the Department of Transportation; the Department of Fish and Game; the San Francisco Bay Conservation and Development Commission; the Department of Water Resources; the State Water Resources Control Board; the State Department of Health Services; the Managed Risk Medical Insurance Board; the Department of Parks and Recreation; the State Air Resources Board; the Department of Toxic Substances Control; the Department of Corrections and Rehabilitation; the State Department of Education; the University of California; the California State University; the Department of Veterans Affairs; local government financing; the repayment of state-mandated local costs; and the Deficit Reduction Reserve Account.

This bill would become operative only if AB 1801, as proposed by Conference Report No. 1 on June 12, 2006, is enacted on or before January 1, 2007.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 49 (AB 1809) Committee on Budget Budget Act of 2006: implementation: taxes.

(1) Existing law requires the Department of Finance to provide an annual report to the Legislature on tax expenditures, containing specified information.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would, commencing January 1, 2007, require the department to provide the report to the Legislature by no later than September 15 of each year and would specify the additional information that the report must contain, including, but not limited to, the statutory authority for each credit, deduction, exclusion, exemption, or any other tax benefit as provided for by state law and specific information on tax expenditures regarding sales and use tax, personal income tax, and corporation tax.

(2) Existing law creates a Seismic Safety Account within the Insurance Fund, which may be appropriated by the Legislature to fund the Department of Insurance and the Seismic Safety Commission, as specified. Existing law imposes an assessment upon certain insurers to fund the account. This provision will remain in effect until July 1, 2007.

This bill would extend the operation of the Seismic Safety Account until July 1, 2009.

(3) The Sales and Use Tax Law imposes a tax on the gross receipts from the storage, use, or other consumption in this state of tangible personal property. Under existing law, there is a presumption that a vehicle, vessel, or aircraft shipped or brought into this state within 12 months from the date of its purchase was purchased from a retailer for storage, use, or other consumption in this state, under specified circumstances, until July 1, 2006. On and after July 1, 2006, the rebuttable presumption applies within 90 days from the date of the vehicle, vessel, or aircraft purchase, under specified circumstances.

This bill would continue, through June 30, 2007, the 12-month presumption and would make the 90-day presumption provisions operative on and after July 1, 2007.

(4) The Bradley-Burns Uniform Local Sales and Use Tax Law and the Transactions and Use Tax Law require the State Board of Equalization to impose a charge, determined in a specified manner, for administering a local special taxing jurisdiction's sales and use taxes and transactions and use taxes.

This bill would, for the 2006–07 fiscal year and each fiscal year thereafter, require the charge to be based on the methodology described in a specified report by the board, as provided.

(5) The Personal Income Tax Law authorizes various credits against the taxes imposed by that law, including a credit for taxable years beginning on or after January 1, 2006, to credentialed teachers in an amount equal to specified amounts, depending upon years of service as a teacher.

This bill would, instead, authorize that credit for taxable years beginning on or after January 1, 2007.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 50 (AB 318) Dymally Community colleges: Compton Community College District.

(1) Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law requires the board of governors to appoint a chief executive officer, known as the Chancellor of the California Community Colleges. Existing law provides for the establishment of community college districts throughout the state, including the Compton Community College District. Existing law authorizes these districts to provide instruction to students at the campuses operated by these districts.

This bill would express various findings and declarations of the Legislature with respect to the withdrawal of accreditation from the Compton Community College District and the impact the withdrawal would have on the students and residents of the Compton Community College District.

(2) Existing law authorizes emergency advance apportionments to be provided to a school district that complies with prescribed requirements, including the submission of a report issued by an independent auditor with respect to the financial conditions and budgetary controls of the district, a written management review conducted by a qualified

management consultant approved by the county superintendent of schools, and a fiscal plan adopted by the governing board to resolve the financial problems of the district.

This bill would authorize a community college district that has had a trustee appointed pursuant to specified provisions to request, and receive an emergency apportionment. The bill would appropriate \$30,000,000 from the General Fund to the Board of Governors of the California Community Colleges for apportionment to the Compton Community College District as an emergency apportionment, as specified.

To the extent the funds appropriated by this bill are allocated to a community college district, as defined by existing law for purposes of Section 8 of Article XVI of the California Constitution, those funds may be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(3) Existing law establishes the County Office Fiscal Crisis and Management Assistance Team (FCMAT), which consists of persons having extensive experience in school district budgeting, accounting, data processing, telecommunications, risk management, food services, pupil transportation, purchasing and warehousing, facilities maintenance and operation, and personnel administration, organization, and staffing. Existing law authorizes community college districts to request the FCMAT to provide specified services, at that district's expense, as specified.

This bill would require the FCMAT to conduct an extraordinary audit of the Compton Community College District on or before October 30, 2006. The bill would require the FCMAT to conduct a comprehensive assessment and prepare a recovery plan, to be delivered to the Chancellor's Office of the California Community Colleges and the Department of Finance, for the Compton Community College District addressing 5 specified operational areas, on or before January 31, 2007. The bill would require the FCMAT to file a written status report at regular intervals with the appropriate fiscal and policy committees of the Legislature, the advisory committee to the special trustee, the Chancellor of the California Community Colleges, the Director of Finance, and the Secretary for Education. The bill would require these status reports to include the progress that the Compton Community College District is making in meeting the recommendations of the FCMAT comprehensive assessment and addressing the deficiencies identified by the Accrediting Commission for Community and Junior Colleges. The bill would require that up to \$500,000 be provided to the Compton Community College District from a specified item of the annual Budget Act to fund this audit.

(4) Existing law, until January 1, 2008, authorizes the board of governors to authorize the chancellor to suspend, for a period of up to one year, in accordance with a prescribed procedure, the authority of the Board of Trustees of the Compton Community College District, or of any of the members of the board, to exercise any powers or responsibilities or to take any official actions with respect to the management of the district. Existing law authorizes the chancellor to renew a suspension under this provision as many times, and as often, as he or she finds it necessary during the period of the operation of the provision. Existing law authorizes the chancellor to appoint a special trustee, at district expense, to manage the district, in accordance with a prescribed procedure.

This bill would instead authorize the board of governors to suspend the authority of the Board of Trustees of the Compton Community College District under this provision for a period of up to 5 years from the effective date of this bill, plus a period lasting until the chancellor, the FCMAT, the Director of Finance, and the Secretary for Education concur with the special trustee that the district has, for 2 consecutive academic years, met the requirements of the comprehensive assessment conducted, and the recovery plan prepared, pursuant to the bill. The bill would delete the authority of the chancellor to renew a suspension under this provision as many times, and as often, as he or she finds it necessary during the period of the operation of the provision. The bill would exempt the chancellor from complying with specified requirements relating to preferences for disabled veterans, and from complying

with the State Contract Act, in appointing the special trustee. The bill would authorize the chancellor to assume, and delegate to the special trustee, powers and duties of the Compton Community College District Personnel Commission that the chancellor determines are necessary for the management of the personnel functions of the district. The bill would authorize the special trustee to be a member of the State Teachers' Retirement System or the Public Employees' Retirement System for the period of service as a special trustee, if that person has been a member of either of those systems, unless the special trustee elects, in writing, not to be a member.

The bill would authorize the special trustee to do all of the following: implement substantial changes in the fiscal policies and practices of the Compton Community College District; revise the academic program of the Compton Community College District to reflect realistic income projections in response to the dramatic effect of the changes in fiscal policies and practices upon program quality; encourage all members of the college community to accept a fair share of the burden of the full recovery of the Compton Community College District in 5 specified operational areas; enter into agreements on behalf of the Compton Community College District and, subject to any contractual and statutory obligation of the Compton Community College District, change any existing district rules, regulations, policies, or practices as necessary for the effective implementation of the recovery plan, as specified; and appoint an advisory committee, as specified.

The bill would extend the operation of this provision indefinitely.

(5) Existing law sets forth procedures to be followed in the event of the formation of a new community college district or the reorganization of an existing community college district.

This bill would set forth procedures to be followed in the event that the Compton Community College's accreditation is terminated by the regional accrediting body recognized by the board of governors.

The bill would authorize the chancellor to oversee all actions at the Compton Community College District related to the loss of the college's accreditation. The bill would require the district to complete the provision of instruction in all classes for which it intends to claim apportionment prior to the date of the loss of accreditation. The bill would provide that, notwithstanding any other provision of law, the Compton Community College District would continue to be eligible to receive state funding as provided under the bill even if the accreditation is terminated.

The bill would require the Compton Community College District to identify a partner district that would agree to provide accredited instructional programs to students residing in the Compton Community College District. The bill would authorize the special trustee and the partner district to enter into one or more agreements for the provision of instructional services or other services. The bill would specify the educational services that the partner district would agree to provide to Compton Community College District students.

The bill would require that the Compton Community College District receive an apportionment, as specified, for courses provided at the Compton Community Educational Center by the partner district. The bill would provide that a statute requiring that 50% of the current expense of education, as defined, be expended on the salaries of classroom instructors would not apply to the Compton Community College District from the 2003-04 fiscal year to the 2008-09 fiscal year, inclusive.

Because the bill would impose new duties on the Compton Community College District, it would constitute a state-mandated local program.

(6) A provision of the California Constitution requires that a local or a special statute is invalid in any case if a general statute can be made applicable.

This bill would express the finding and declaration of the Legislature that, due to the unique circumstances relating to the accreditation status of Compton Community College, a general statute cannot be made applicable, and the enactment of specified provisions of the bill as a special statute is therefore necessary.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(8) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 51 (SB 504) Torlakson Real property sales contracts.

Existing law defines “real property sales contract” for purposes of provisions regulating, among other things, the transfer of real property sales contracts and the encumbering of real property sold under unrecorded real property sales contracts, and provisions specifying the required contents of real property sales contracts. The violation of these provisions is a crime.

This bill would provide, for purposes of these provisions, that a real property sales contract does not include a contract for purchase of an attached residential condominium unit entered into pursuant to a conditional public report issued by the Department of Real Estate, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 52 (SB 1239) Hollingsworth Firearms: transactions.

Existing law generally regulates the transfer of firearms, including various documents to be completed in connection therewith. Existing law provides for a register that contains personal identifying information regarding the seller and purchaser of the firearm. A copy of that document is available to the seller upon request from the firearms dealer.

This bill would authorize copies of the document for the seller or purchaser, and would require firearms dealers to redact personal information regarding the firearm seller from the copy of the document provided to the purchaser, and to redact personal information regarding the purchaser from the copy of the document provided to the seller.

Ch. 53 (SB 1241) Cox Deputy sheriffs: state citizenship.

Existing law establishes various requirements for eligibility to be a deputy sheriff or deputy marshal. One requirement is that a person shall not be appointed deputy sheriff or deputy marshal unless he or she is a citizen of this state.

This bill would repeal that requirement.

Ch. 54 (SB 1491) Kuehl Domestic violence: personal information.

Existing law regulates the collection and disclosure of personal information by government agencies and businesses related to, among others, social security numbers, business records, drivers license numbers, medical information, and credit reporting information.

This bill would prohibit any person or entity that awards grants to victim service providers, as defined, from requesting or requiring, as a condition of an award, the personally identifying information of victims of domestic violence, dating violence, sexual assault, or stalking, or their children, as specified, or the use of specified computer programs or systems that require the disclosure of that personally identifying information. The bill would also make available to any victim service provider aggrieved by a violation of those provisions, injunctive relief and court costs and attorney’s fees in certain cases.

Ch. 55 (AB 1810) Committee on Budget Augmentations for contingencies or emergencies.

The Budget Act of 2005 appropriated specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for augmentation of various items of appropriation for contingencies and emergencies upon written notification from the Director of Finance.

This bill would appropriate \$127,906,000 from the General Fund and unallocated nongovernmental cost funds, as scheduled, in augmentation of appropriations in this Budget Bill.

This bill would provide that certain of these funds will revert to the General Fund if unencumbered as of June 30, 2006.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 56 (SB 1132) Committee on Budget and Fiscal Review Transportation.

(1) The Public Safety Communication Act of 2002 provides that the Public Safety Radio Strategic Planning Committee has primary responsibility in state government for developing and implementing a statewide integrated public safety communication system for state agencies, subject to specified criteria, including the annual submission of specified information to the Legislature.

This bill would require a proposal by a state agency for funding to support a new or modified radio system to be accompanied by a technical project plan, to include specified components, and to be reviewed by the committee for consistency with the statewide integrated public safety communication strategic plan included in the annual report, and by the Telecommunications Division within the Department of General Services for consistency with the technical requirements of the plan.

(2) Existing law, pursuant to Proposition 116 of 1990, an initiative act, creates the Public Transportation Account as a trust fund in the State Transportation Fund, and provides that funds are to be deposited in the account from a specified portion of the sales taxes on gasoline and diesel fuel, and are available for expenditure only for transportation planning and mass transportation purposes. These provisions may be amended by the Legislature only by a  $\frac{2}{3}$  vote of both houses and only if the amending statute is consistent with, and furthers the purposes of, the initiative act.

This bill, for the 2006–07 fiscal year, would transfer \$200 million from the sales tax on gasoline to the Transportation Deferred Investment Fund that would otherwise be deposited in the Public Transportation Account. These revenues would be used as partial payment of amounts due to be paid to the Transportation Deferred Investment Fund no later than June 30, 2008. The bill would also specify the allocation of certain gasoline sales revenues that would be transferred to the Public Transportation Account in the 2006–07 fiscal year. The bill would make other conforming changes reflecting allocation of certain gasoline sales tax revenues in the 2006–07 fiscal year to the Bay Area Toll Account pursuant to Chapter 375 of the Statutes of 2005.

(3) Article XIX B of the California Constitution requires, commencing with the 2003–04 fiscal year, sales taxes on motor vehicle fuel that are deposited in the General Fund to be transferred to the Transportation Investment Fund for allocation to various transportation purposes. Article XIX B authorizes the transfer of these revenues to the Transportation Investment Fund to be suspended in whole or in part for a fiscal year during a fiscal emergency pursuant to a proclamation issued by the Governor and the enactment of a statute by a  $\frac{2}{3}$  vote in each house of the Legislature if the statute does not contain any unrelated provision. Existing law requires an amount equivalent to the amount that would have been transferred in the absence of a suspension enacted in 2 specified fiscal years to be transferred by the Controller to the Transportation Deferred Investment Fund not later than June 30, 2008, or June 30, 2009, as applicable, for allocation to transportation purposes that would have been funded in the absence of a suspension, plus interest in certain cases.

This bill would appropriate \$495 million from the General Fund to the Transportation Deferred Investment Fund as partial payment of the amounts due to that fund no later than June 30, 2009. The bill would also appropriate \$720 million from the General Fund to the Transportation Deferred Investment Fund as partial payment of the amounts due to that fund no later than June 30, 2008. The bill would specify the allocation of those funds along with

the \$200 million transferred to the Transportation Deferred Investment Fund pursuant to paragraph (2) above, to various transportation programs that are funded by the Transportation Investment Fund.

The bill would also authorize the Department of Finance to adjust the budgeting, accounting, and reporting systems for the Transportation Investment Fund and the Transportation Deferred Investment Fund so that unliquidated encumbrances are not reflected in the fund balance or financial statement for each fund.

(4) Existing law provides for transfer of certain gasoline sales taxes to the Transportation Investment Fund, with a portion of those revenues to be available for transfer to the Transportation Congestion Relief Fund (TCRF) for allocation to specified transportation capital projects. Existing law authorized loans of up to \$654 million from the State Highway Account and \$280 million from the Public Transportation Account to the TCRF, which loans are to be repaid no later than June 30, 2007, and June 30, 2008, respectively. Existing law also requires interest to be paid relative to loans of State Highway Account funds in excess of \$180 million. Existing law authorizes a loan of funds in the TCRF to the General Fund to be repaid as soon as needed to support expected cash expenditures for projects to be funded from the TCRF, or from securitization of tribal gaming revenues or other resources, as specified.

This bill would delete the specific dates for repayment of loans made from the Public Transportation Account and the State Highway Account to the Transportation Congestion Relief Fund. The bill would instead require those accounts to be repaid at the time the Transportation Congestion Relief Fund is repaid by the General Fund under the above-referenced provisions.

(5) Existing law authorizes the California Infrastructure and Economic Development Bank to sell specified portions of compact assets, defined as moneys required to be paid to the state under specified provisions of designated tribal compacts and the state's rights to receive those payments, to a special purpose trust, which may issue bonds against those assets. The net proceeds of the sale of the compact assets are required to be deposited into certain transportation funds in a specified order.

Existing law authorizes the loan of funds in the State Highway Account to the TCRF through the annual Budget Act, with interest to be calculated annually pursuant to a specified formula.

This bill would revise the amounts from the net proceeds of the sale of compact assets to be deposited into the TCRF and transferred into the State Highway Account and the Public Transportation Account pursuant to these provisions to reflect repayments of amounts owed to those accounts in the 2006–07 fiscal year, as described in paragraph (3) above. The bill would make other related changes. By revising the amount of funds to be deposited into a continuously appropriated fund, including the interest due, this bill would make an appropriation.

(6) Existing law provides that the Department of Transportation has full possession and control of the State Highway System and associated property. Existing law establishes a mechanism for the department to recover costs for the department's mobile equipment services through assessments on the department's divisions and programs, or local transportation authorities, as applicable, with proceeds to be deposited in the Equipment Service Fund.

This bill would repeal these provisions. The bill would transfer the assets, obligations, and encumbrances of the Equipment Service Fund to the State Highway Account.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 57 (SB 1183) Ackerman Foreign corporations: supermajority vote.

(1) Existing law imposes various requirements on foreign corporations, as defined, that transact intrastate business, as defined. Existing law provides that a foreign corporation is not

considered to be transacting intrastate business merely because its subsidiary transacts intrastate business.

This bill would additionally provide that a foreign corporation is not transacting intrastate business merely because of its status as a shareholder, limited partner, or member or manager of a domestic corporation, limited partnership, or limited liability company or a foreign corporation, limited partnership, or limited liability company transacting intrastate business.

(2) Existing law requires, with respect to certain corporations with outstanding shares of record held by at least 100 persons, that an amendment to the articles of incorporation or a certificate of determination that includes a supermajority vote requirement, as defined, shall be approved by a specified proportion of shares. Existing law provides that the supermajority vote requirement is ineffective 2 years after the most recent filing of the amendment or certificate of determination to adopt or readopt the supermajority vote requirement, unless it is renewed, as specified.

This bill would eliminate that provision that the supermajority vote requirement is ineffective 2 years after that specified filing. The bill would make other technical, nonsubstantive, and conforming changes.

Ch. 58 (SB 1214) Committee on Human Services Community services programs.

Existing law requires the Department of Community Services and Development to prepare an annual state plan for the California Community Services Block Grant Program. Upon receiving legislative certification that the plan conforms to statutory requirements, the department is required to submit the final state plan to the Secretary of the United States Department of Health and Human Services by September 15 of each year.

This bill would require that the final state plan be submitted to the secretary as required by a specified federal law.

Ch. 59 (SB 1327) Soto Compulsory education law: individuals with exceptional needs: discipline.

Existing law provides that each person between the ages of 6 and 18 years not exempted, as specified, is subject to compulsory full-time education. Existing law requires the administration of each private school and public school district of any county, upon the severance of attendance or the denial of admission of any child who is physically handicapped, mentally retarded, or multiple handicapped, but is otherwise subject to compulsory education, to report the severance, expulsion, exclusion, exemption, transfer, or suspension beyond 10 schooldays to the county superintendent of schools in the jurisdiction.

Existing federal law, the federal Individuals with Disabilities Education Act (IDEA), requires that each state provide a free appropriate public education to all children with disabilities ages 3 to 21, inclusive, who reside in the state, including children with disabilities who have been suspended or expelled from school. Existing law defines the term individual with exceptional needs as a person who, among other things, is a child with a disability, as that term is defined in IDEA.

Existing law, the federal Rehabilitation Act of 1973 and regulations promulgated by the United States Department of Education pursuant to that act, requires that each state provide a free appropriate public education to all qualified handicapped persons who reside in the state.

This bill would instead make the reporting requirement regarding a severance of attendance or denial of admission applicable to any child who is an individual with exceptional needs or a qualified handicapped person, as defined.

Ch. 60 (SB 1364) Battin Marriage licenses: address information.

Existing law provides for the issuance of certificates of registry of marriage and marriage licenses. Existing law requires that a certificate of registry and a marriage license show the

identity of the parties to the marriage, the parties' real and full names, places of residence, and ages, and one or more witness attestations and the witnesses' name and place of residence.

This bill would except from the requirement that a certificate of registry and a marriage license show the parties' or witnesses' places of residence, upon request by an applicant or witness, and would instead require the certificate of registry show the business address or post office box of that person.

Ch. 61 (SB 1403) Scott Medi-Cal: dental restoration documentation requirements.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons and other eligible persons are provided health care services.

Under existing law, specified dental services are included as covered benefits under the Medi-Cal program, subject to utilization controls.

Existing law requires the department to require, under specified circumstances, pretreatment radiograph documentation on posttreatment claims for dental restorations.

This bill would specify that, for any beneficiary who is under 4 years of age, or who, regardless of age, has a developmental disability, as defined, radiographs or photographs that indicate decay on any tooth surface shall be considered sufficient documentation to establish the medical necessity for treatment provided.

Existing law authorizes the department to implement the requirements for that documentation by means of a provider bulletin or similar instruction, without taking regulatory action.

This bill would, instead, require the department to implement those requirements by that means.

Ch. 62 (SB 1636) Ackerman Trade secrets.

Existing law, the Uniform Trade Secrets Act, provides that actual or threatened misappropriation of a trade secret, as defined, may be enjoined. The act authorizes the court to award reasonable attorney's fees to the prevailing party if a claim of misappropriation is made in bad faith, a motion to terminate an injunction is made or resisted in bad faith, or willful and malicious misappropriation exists.

This bill would authorize the court to also award costs to the prevailing party, including a reasonable sum to cover the services of expert witnesses, as specified.

Ch. 63 (SB 1137) Ducheny Drug treatment.

Existing law, the Substance Abuse and Crime Prevention Act of 2000, was enacted by the voters at the November 2000 general election. Amendment of the act by the Legislature requires a  $2/3$  vote of both houses of the Legislature. The act requires all amendments to it to further the act and be consistent with its purposes. The act defines "drug treatment program" for purposes of the act, and specifically excludes in-custody drug treatment from that definition.

The act creates a Substance Abuse Treatment Trust Fund to provide moneys to cover county costs associated with drug treatment programs, as specified. The act also requires annual and long-term effectiveness and financial impact studies on the programs funded by the act as well as periodic audits of the expenditures.

This bill would specify, in addition, that the moneys provided by the act cannot be used to fund in any way drug treatment courts or supervision associated with the drug treatment courts. This bill would also provide for 3-, 2-year followup effectiveness and fiscal impact studies, instead of the annual studies and require the department to submit annual reports on the people served as a result of this act. It would also revise the items to be included in the study. This bill would permit the department to require a county to undertake a corrective

action if a periodic audit determines the county has spent money provided by the act not in accordance with the act.

The act defines “drug treatment program” as state licensed or community facilities providing a specified list of services including halfway house treatments, drug prevention courses, and relapse and severe dependence issues.

This bill would remove those elements of the definition of “drug treatment program” and add aftercare services.

The act defines “successful completion of treatment” as a defendant who has completed the prescribed course of treatment and, as a result, there is reasonable cause to believe that the defendant will not abuse controlled substances in the future.

This bill would instead define “successful completion of treatment” as a defendant who has completed the prescribed course of treatment. Completion of treatment would not mean cessation of narcotic replacement therapy.

The act requires any person convicted of a nonviolent drug possession offense to receive probation. As a condition of probation, the court is required to require a defendant to participate in, and complete, an appropriate drug treatment program. The act prohibits the imposition of incarceration as a condition of probation.

This bill would require drug testing as a condition of probation. The bill would require a person subject to the act to be monitored by the court, as specified.

The act does not apply to a defendant who has been convicted of one or more violent or serious felonies, unless the nonviolent drug possession offense occurred more than 5 years after the defendant was free from custody for the prior offense and from the commission of other types of crimes against a person.

This bill would, provide that a person who has previously served 3 separate prison terms for non-drug-related felonies, or a person who has been convicted of a misdemeanor or a felony at least 5 times within the prior 30 months, may be excluded from treatment if the court makes certain findings. The bill would provide that the court shall state its findings, and the reasons for those findings, on the record.

The act does not apply to any defendant who, while using a firearm unlawfully possesses or is unlawfully under the influence of certain controlled substances.

This bill would instead make its provisions inapplicable to any defendant who, while armed with a deadly weapon unlawfully possesses or is under the influence of certain controlled substances.

Under the act, a defendant may petition the sentencing court for dismissal of the charges at any time after completion of drug treatment.

This bill would require the treatment provider to submit the treatment plan and regular reports to the probation department. Additionally, this bill would authorize the court, after a hearing to determine whether the defendant has successfully completed treatment and probation, including refraining from the use of drugs after completion of treatment, to set the conviction aside, as specified.

Under the act, once the indictment, complaint, or information is dismissed, a record pertaining to the arrest and conviction for that offense may not be used to deny the defendant employment.

Under the act, if a defendant violates probation, as specified, the court may revoke probation or it may intensify or alter the drug treatment plan.

This bill would authorize a court to also order incarceration for a specified period, in order to enhance treatment compliance, and in some circumstances, to order the defendant to enter a residential drug treatment program, if available, or be placed in a county jail for not more than 10 days for detoxification purposes only. This bill would however, provide that no incarceration costs will be reimbursed from the fund.

Existing law, with some exceptions, prohibits the suspension or revocation of parole for commission of a nonviolent drug possession offense or violating any drug-related condition of parole. Further, existing law prescribes the steps the Parole Authority is to take upon this

type of violation, and the actions that any drug treatment provider must thereafter take, as specified. Drug treatment services are not to be required as a condition of parole for longer than 12 months.

This bill would authorize the Department of Corrections and Rehabilitation, Division of Adult Parole Operations to make a finding that treatment beyond 12 months is necessary, and under those conditions, treatment may be extended to 24 months. The bill would make clarifying changes to related provisions.

Because the bill would increase punishment for crimes, including authorizing jail time, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Further, this bill would provide that if any provision is found to be invalid its provisions shall be submitted to the voters at the next statewide election.

#### Ch. 64 (SB 1305) Figueroa The Medical Waste Management Act.

The existing Medical Waste Management Act, administered by the State Department of Health Services, regulates the management and handling of medical waste, as defined. Under existing law, certain items, such as household waste, are specifically excluded from the definition of medical waste.

This bill would also exclude home-generated sharps waste, as defined, from the definition of medical waste.

Existing law permits a registered medical waste generator, if specified conditions are met, to accept home-generated sharps waste to be consolidated with the facility's medical waste stream.

Existing law also permits a household hazardous waste collection facility, if specified conditions are met, to operate a home-generated sharps consolidation point, and permits the department to approve other home-generated sharps consolidation points.

This bill would specifically define home-generated sharps waste.

This bill would, on or after September 1, 2008, prohibit a person from knowingly placing home-generated sharps waste in certain types of containers, provide that home-generated sharps waste shall be transported only in a sharps container, as defined in the act, or other container approved by the department or local enforcement agency, and provide that this waste shall only be managed at specified locations consistent with existing law.

#### Ch. 65 (SB 1385) Vincent School employees: termination.

Existing law permits a school district or county superintendent of schools to reduce its number of employees, subject to certain requirements, if its pupil enrollment drops below certain levels, and requires a school district or county superintendent of schools to give notice to the employee before the 15th of May that his or her services will be terminated at the close of the current school year.

Existing law authorizes a county superintendent of schools in a county that meets certain population requirements, for the purpose of making reductions initiated during the 2004–05 and 2005–06 school years in the number of county employees because of a reduction in services or elimination of a juvenile camp program, to retain the county employees until the effective date of the closure or reduction in services of that juvenile camp program.

This bill would extend that authority to the 2006–07 and 2007–08 school years.

#### Ch. 66 (SB 1559) Lowenthal Vehicles: low-speed vehicles.

Existing law defines "low-speed vehicle" for purposes of the Vehicle Code as a motor vehicle other than a motor truck, having four wheels on the ground and an unladen weight

of 1,800 pounds or less, that is capable of propelling itself at a minimum speed of 20 miles per hour and a maximum speed of 25 miles per hour, on a paved level surface. Existing law imposes certain restrictions on the use of low-speed vehicles on public streets and highways, and generally requires the operator of a low-speed vehicle to have a driver's license.

This bill would change the definition of a "low-speed vehicle" to a motor vehicle that has 4 wheels, can attain a speed, in one mile, of more than 20 miles per hour and not more than 25 miles per hour, on a paved level surface, and has a gross vehicle weight rating of less than 3,000 pounds.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 67 (SB 1618) McClintock Local agency contracts.

Existing law prescribes procedures for contracting for cities, counties, special districts, and any other agency of the state for the local performance of governmental or proprietary functions within limited boundaries. Existing law establishes procedures by which these entities may take immediate action in the event of an emergency, to obtain equipment, services, and supplies for emergency purposes, without giving notice for bids to let contracts.

Existing law authorizes the Ventura County Flood Control District to perform emergency work by negotiated contract without advertising for bids, if specified procedures are followed.

This bill would change the name of the Ventura County Flood Control District to the Ventura County Watershed Protection District and would authorize that district to perform emergency work by negotiated contract without requiring bonds. This bill would also make technical conforming amendments.

Ch. 68 (SB 1844) Committee on Natural Resources and Water Public resources.

(1) The California Wilderness Act requires that a certain government official and a certain state agency review, on or before January 1, 1976, and January 1, 1978, state-owned roadless areas under their jurisdiction, and report to the Legislature their recommendations as to the suitability or nonsuitability of those areas for preservation as state wilderness.

This bill would delete the dates by which the reviews are to be completed and the reports to the Legislature are to be made as obsolete provisions.

(2) Existing law requires the Director of the Department of Parks and Recreation to propose criteria for determining priority of need, for annual grants to certain local agencies, for open space and recreation purposes, hold public hearings, and submit the proposed criteria to the Legislature on or before November 30, 1976.

This bill would delete the date by which the director is to submit the proposed criteria to the Legislature because it is an obsolete provision.

(3) Existing law requires the State Lands Commission to survey all ungranted tidelands, to evaluate each survey, and adopt boundary descriptions already in common use, as specified. Existing law requires the inventory and evaluation to commence on January 1, 1976, and be completed on or before December 31, 1981.

This bill would delete the dates as to when the inventory and evaluation is to commence and be completed.

(4) Existing law requires the initial members of the Tahoe Resource Conservation District meet specified criteria, including that their terms expire in November 1976 and 1978.

This bill would delete those obsolete provisions.

(5) Existing law authorizes an action to determine the validity of Resort Improvement District bonds, pursuant to specified law. Existing law became operative only if a certain bill was enacted by the Legislature, as required.

This bill would delete the provisions making the operation of existing law contingent upon the enactment of a bill at the 1961 Regular Session of the Legislature because it is obsolete.

(6) This bill would make conforming changes.

Ch. 69 (AB 1806) Committee on Budget State government.

(1) The Enterprise Zone Act prescribes the duties and responsibilities of the Department of Housing and Community Development in connection with the establishment of enterprise zones and manufacturing enhancement areas and, until January 1, 2007, authorizes the department and local governments to charge and collect fees in connection with the act and to assess each enterprise zone a fee of not more than \$10 for each application it accepts for the issuance of a specified tax certificate issued by a local government.

This bill would delete the January 1, 2007, inoperative date of the authority to establish, charge, and collect, and the requirement to assess, a fee pursuant to these provisions, thus making the authority and requirement permanent.

(2) Existing law authorizes the Director of General Services to enter into lease purchase agreements with state agencies with respect to various state properties.

Existing law authorizes the State Public Works Board to acquire public buildings for use by state agencies, subject to specified conditions.

Existing law establishes the Service Revolving Fund under the control of the Department of General Services, to be available for expenditure for purposes related to the rental, maintenance, and operating of building space, among other things.

This bill would authorize the Director of General Services to exercise the option to accelerate the vesting of title in the state as set forth in a lease purchase agreement relating to specified state property in Sacramento. It would authorize the board to issue revenue bonds, negotiable notes, or negotiable bond anticipation notes to finance the acquisition of the property, and would authorize the department and the board to borrow funds for this purpose from the Pooled Money Investment Account. It would also continuously appropriate funds derived from the interim and permanent financing or refinancing of the property pursuant to these provisions, and require the department to adjust the Service Revolving Fund in an amount sufficient to repay any loans made by the Pooled Money Investment Account if the bonds are not sold.

(3) Existing law generally authorizes the matters that the Attorney General may prosecute or defend, and authorizes enforcement of those judgments arising out of those matters.

This bill would provide that any person who fails to pay on a timely basis any liability or penalty imposed by or on behalf of any state agency or official, the People of the State of California, the State of California, or any liability or penalty otherwise imposed in any matter prosecuted by the Attorney General, would be required to pay, in addition to that liability or penalty, interest, reasonable attorneys' fees, and costs for any collection proceedings to enforce payment.

(4) Existing law establishes the Registry of Charitable Trusts Fund, administered by the Department of Justice. Existing law also provides that the moneys in the fund shall be used, upon appropriation by the Legislature, by the Attorney General to operate and maintain the Attorney General's Registry of Charitable Trusts and to provide public access via the Internet to reports filed with the Attorney General.

This bill would additionally authorize the use of those funds to operate and maintain the Registry of Conservators, Guardians, and Trustees.

(5) Existing law requires the Department of Fair Employment and Housing to provide to employers a poster on discrimination in employment and an information sheet on sexual harassment and to obtain multiple copies of this poster and information sheet for distribution from the Office of Documents and Publications of the Department of General Services.

This bill would require the Department of Fair Employment and Housing to make copies of this poster and information sheet available online.

(6) Existing law generally sets forth the duties of the Controller in abolishing and reporting to the Joint Legislative Budget Committee on certain state positions that have been vacant for a specified period of time, and of the Controller and the Director of Finance in the reestablishment of certain abolished positions.

This bill would require the director to reconcile with the Controller, and report to the committee by October 1 of each year, the number of permanent employees by department appointed as full-time or part-time tenure in blanket positions, as defined, for more than 6 consecutive months in the immediately preceding fiscal year.

(7) Existing law requires state agencies to prepare and submit a report on the adequacy of the agency's systems of internal accounting and administrative control by December 31 of each odd-numbered fiscal year and to identify any material inadequacy or material weakness in these systems and a plan and schedule for corrections.

This bill instead would require state agencies to conduct an internal review and prepare a report on the adequacy of the agency's systems of internal accounting and administrative control, to be submitted on a biennial basis but no later than December 31 of each odd-numbered year. It would require the agency, no later than 30 days after the report is submitted, to provide to the Director of Finance a detailed description of inadequacies and weaknesses identified in the report and a plan and schedule for correcting them. It would further require that this plan and schedule be updated every 6 months until all corrections are completed, and would make additional conforming changes.

(8) Existing law provides that no state agency is required to use the Office of State Publishing for its printing needs until the effective date of the Budget Act of 2006 or July 1, 2006, whichever is later. This provision is repealed as of January 1, 2007.

This bill would extend the application of these provisions until the effective date of the Budget Act of 2007 or July 1, 2007, whichever is later, and would extend the repeal date to January 1, 2008.

(9) Existing law continuously appropriates from the General Fund the lesser of either the unencumbered balance in the General Fund or the difference between the state's appropriation subject to limitation for the fiscal year then ended and its constitutional appropriation limit as jointly estimated by the Legislative Analyst's Office and the Department of Finance, to the Special Fund for Economic Uncertainties.

This bill would instead provide that the funds shall be continuously appropriated from the unencumbered balance in the General Fund to the Special Fund for Economic Uncertainties, and if at the end of the fiscal year it is determined that there are revenues in excess of the amount that may be appropriated to this fund pursuant to Article XIII B of the California Constitution, as determined jointly by the Department of Finance and the Legislative Analyst's Office, the appropriation from the General Fund shall be reduced by the amount of the excess revenues.

(10) Under existing law, policy, and bargaining agreements, the state reimburses employees for all necessary and actual expenses they incur when they travel on official state business. The Controller's office has established the California Automated Travel Expense Reimbursement System (CalATERS) for processing travel claims for participating state agencies.

This bill would require all state agencies to implement and use that system to automate processing of employee travel claims by July 1, 2009, unless the Controller recommends and the Department of Finance approves an exemption request, as specified. The bill would also require the Controller and the Department of Finance to jointly report to the Joint Legislative Budget Committee not later than February 1, 2008, on the approved exemptions.

(11) Existing law requires the Legislature to make an annual appropriation to the Judicial Council for the general operations of the trial courts based upon the request of the Judicial Council. Existing law requires the annual budget request to include a base funding adjustment for operating costs based on the year-to-year change in the state appropriations limit and a separate request for certain nondiscretionary costs necessitated by law or county government that exceed the annual appropriations limit.

This bill would revise and recast these budget request elements by identifying various specific elements of General Fund appropriations to support the trial courts, including a cost-of-living and growth adjustment.

(12) Existing law sets the salaries of the Chief Justice of California, the Associate Justices of the Supreme Court, the presiding and associate justices of the Courts of Appeal, and judges of the superior court, and provides for an annual increase in the salary of each justice and judge based on salary increases for state employees as reported by the Department of Personnel Administration, as specified. Existing law also required, on January 1, 2001, the salary of each justice and judge to be increased by the amount that is produced by multiplying the salary of each justice and judge as of December 31, 2000, by 8 $\frac{1}{2}$ %. Existing law provides for various other percentage increases in the salaries of the Chair of the Judicial Council, the presiding judges of the superior courts, and the administrative presiding justices of the Courts of Appeal. Under the California Rules of Court, the Chief Justice is the Chair of the Judicial Council.

This bill would clarify that the annual salary increase for each justice and judge applies to the Chair of the Judicial Council, the presiding judges of the superior courts, and the administrative presiding justices of the Courts of Appeal. The bill also would require, on January 1, 2007, the salary of each justice and judge, including the Chair of the Judicial Council, the presiding judges of the superior courts, and the administrative presiding justices of the Courts of Appeal, to be increased by the amount that is produced by multiplying the then-current salary of each justice and judge by 8.5%.

Under the California Constitution, laws that set the salaries of elected state officers are appropriations.

The bill would make an appropriation by increasing the salaries of justices and judges.

(13) Existing law establishes in the judicial branch of state government the California Habeas Corpus Resource Center and specifies the powers and duties of the center, including the authority to employ up to 30 attorneys who may be appointed by the Supreme Court to represent any person convicted and sentenced to death in this state who is without counsel and determined to be indigent, for the purpose of instituting and prosecuting postconviction actions, challenging the legality of the judgment or sentence, and preparing petitions for executive clemency.

This bill would increase to 34 the number of attorneys who may be employed for these purposes, and would make other technical, conforming, nonsubstantive changes to those provisions.

(14) Existing law establishes the Trial Court Trust Fund, and requires the Controller to apportion the proceeds of the fund for the purpose of funding trial court operations. Existing law creates the Trial Court Improvement Fund in the State Treasury, and requires the Judicial Council to reserve funds for court projects by transferring 1% of the amount appropriated for operation of the trial courts to the fund.

Existing law authorizes the Judicial Council to authorize the direct payment or reimbursement or both from either fund to fund administrative infrastructure within the Administrative Office of the Courts for one or more participating courts pursuant to the Budget Act, with the amount of the payment deducted from a participating court's allocation from the Trial Court Trust Fund. Increases in any reimbursements or direct payments in excess of the amount appropriated in the Budget Act require prior written approval of the Department of Finance, and in certain cases, notification of specified legislative committees.

This bill would delete these restrictions and authorize the Judicial Council to authorize the direct payment or reimbursement from either fund to fund the costs of operating one or more trial courts upon the consent of the participating courts. The bill would define the term "costs of operating one or more trial courts" for these purposes. The bill would permit moneys in the Trial Court Trust Fund to be used for, among other things, statewide administrative and information technology infrastructure supporting the courts. This bill would also require the Controller to transfer \$31,563,000 each fiscal year from the Trial Court Improvement Fund to the Trial Court Trust Fund for allocation to the trial courts for court operations, and would enact other related provisions.

(15) Under existing law, an additional penalty of \$1 is levied for each \$10 or fraction thereof, upon every fine, penalty, or forfeiture collected by the courts for criminal offenses, for the purpose of implementing the DNA Fingerprint, Unsolved Crime and Innocence Protection Act. A percentage of those funds remains with each county, and the rest is deposited into the state's DNA Identification Fund.

This bill would levy an additional \$1 for each \$10 or fraction thereof, upon every fine, penalty, or forfeiture collected by the courts for criminal offenses, and would require all of those funds to be deposited into the state's DNA Identification Fund. The bill would authorize the money to be used to implement that act and to facilitate compliance with the requirement that DNA samples shall be included in the state summary criminal history information.

(16) Existing provisions of the Political Reform Act of 1974 require specified candidates for public office and committees supporting or opposing candidates or ballot measures to periodically file reports with the Secretary of State and certain local officials setting forth information concerning contributions they received and expenditures they made during the specified reporting period. Existing provisions of the act also require lobbyists, lobbying firms, and lobbyist employers to periodically file specified reports and statements with the Secretary of State.

Existing law, the Online Disclosure Act, requires the Secretary of State to develop a process whereby reports and statements that are required under the act to be filed with the Secretary of State are filed online or electronically and viewed by the public at no cost on an online disclosure system. Existing law establishes timeframes under which the Secretary of State is to implement this process.

This bill would require the Secretary of State to implement, no later than June 30, 2007, the Online Disclosure Act, including completing online lobbying registration forms so that the forms can be filed online. The bill would also require the secretary to report, on or before February 1, 2007, to the Legislature on 3 issues with respect to the implementation and development of the online and electronic filing and disclosure requirements and the status of the development of a means or method whereby filers subject to the act may submit required filings free of charge. The bill would require the secretary to make additional reports every 6 months after the first report is due until all filers who are required to file reports online or electronically are able to do so free of charge.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a  $\frac{2}{3}$  vote of each house and compliance with specified procedural requirements.

This bill, which would declare that these provisions further the purposes of the act, would therefore require a  $\frac{2}{3}$  vote.

(17) Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care. The act establishes the Consumer Participation Program that, until January 1, 2007, authorizes the director of the department to award reasonable fees to a person or organization for making a substantial contribution on behalf of consumers to the adoption of a regulation or an order or decision having the potential to impact a significant number of plan enrollees.

This bill would extend the duration of the Consumer Participation Program to January 1, 2012.

(18) Existing law states certain findings and declarations of the Legislature concerning the development of housing in downtown areas and in close proximity to mass transit systems. Existing law also establishes a schedule for the allocation of certain revenue that is derived from the sale of bonds pursuant to the Housing and Emergency Shelter Trust Fund Act of 2002 and deposited in the Housing Rehabilitation Loan Fund, which is continuously appropriated, to various funds, programs, and projects.

This bill would state the determination of the Legislature that a more efficient and effective use of unused student housing funds provided by the Housing and Emergency Shelter Trust Fund Act of 2002, through the Multifamily Housing Program, would be to make those funds available to transit-oriented Downtown Rebound Program rental housing projects. The bill would also revise the allocation of those funds to make them available to transit-oriented Downtown Rebound Program rental housing projects, thereby making an appropriation.

(19) Existing law requires a farm labor contractor to be licensed. A contractor must pay specific license fees to the Labor Commissioner for the issuance or renewal of his or her contractor's license. The commissioner, in turn, is required to deposit a portion of those fees into the Farmworker Remedial Account, which is a continuously appropriated special fund, to pay claims from persons damaged by unlicensed contractors or where the claim exceeds the amount of the contractor's bond.

This bill would raise the amount from each license fee received that the commissioner is required to deposit into the Farmworker Remedial Account from \$50 to \$150, thereby making an appropriation.

(20) Existing workers' compensation law requires employers to secure the payment of workers' compensation, including medical treatment, for injuries incurred by their employees that arise out of, or in the course of, employment. Existing law generally requires an employer to pay for medical treatment provided or authorized by the treating physician selected by the employee, or designated by the employer. Existing law requires an application for adjudication and a declaration of readiness to proceed to be filed with the Workers' Compensation Appeals Board with respect to a disputed claim. Existing law authorizes a medical provider to file a lien claim with the appeals board for certain expenses incurred by the provider. In the event of a contested claim, existing law requires payment of a filing fee of \$100 for each initial lien filed by or on behalf of a provider, except as specified, for reasonable expenses incurred by or on behalf of the injured employee and, to the extent that the employee is entitled to reimbursement, as specified, for medical-legal expenses. This fee is required to be deposited in the Workers' Compensation Administration Revolving Fund. Existing law also requires that the provider be reimbursed for this filing fee in the event that a contested amount is determined payable by the appeals board.

This bill would specify the time limits and procedures applicable to filing provider liens and applications for adjudication, and would eliminate the filing fee requirement. The bill would provide that these limitations do not apply to filings on behalf of the employee or employer, as specified. The bill would require the appeals board to adopt reasonable regulations to ensure compliance with these provisions, and to take any other necessary enforcement steps, including the imposition of sanctions.

(21) Existing law provides that certain fines for persons convicted of sex offenses are deposited in the General Fund for allocation by the Controller to, among others, the Department of Justice DNA Testing Fund, and to counties that maintain local DNA testing laboratories, as specified.

This bill would, instead of allocating moneys to the Department of Justice DNA Testing Fund and the counties, as specified, allocate those moneys to the DNA Identification Fund, as specified, and would make other conforming changes.

(22) Existing law requires the Business, Transportation and Housing Agency, in collaboration with the Department of Toxic Substances Control, the State Air Resources Board, the State Water Resources Control Board, and the Financial Development Corporations, as defined, to develop a loan guarantee program for chrome plating facilities to assist those facilities to purchase high performance environmental control equipment or technologies. Existing law requires the department to establish the Model Shop Program in northern California by replicating an existing Chrome Plating Model Shop Pilot Program in southern California. Existing law requires the money in the Chrome Plating Pollution Prevention Fund to be expended by the agency, upon appropriation by the Legislature, to make specified loan guarantees, and for administrative costs, and requires the agency to make

loan guarantees available only to a generator that is a small business and meets other requirements.

This bill would override that the businesses eligible for the guaranteed loans and Model Shop Program, as specified, are metal plating facilities. This bill would expand the definition of chrome plating to include chromic acid anodizing, and would revise the definition of metal plating facilities to include chrome plating facilities.

(23) Existing law authorizes the Employment Development Department to perform various functions and duties with respect to job creation and retention activities.

This bill would state the intent of the Legislature that state supported Veterans Employment Training services meet the same performance standards as those required by the federal Workforce Investment Act for services provided to veterans. This bill would also require the Employment Development Department to submit an annual report to the Legislature, as provided, following any fiscal year in which state funds support the Veterans Employment Training services program.

(24) Existing law requires the Department of Motor Vehicles to transfer specified revenue derived from California memorial license plates to the Antiterrorism Fund. Existing law requires, upon appropriation, one-half of the money in the fund to be allocated by the Controller to the Office of Criminal Justice Planning to be used for antiterrorism activities, as defined. Existing law abolishes the Office of Criminal Justice Planning, and requires the Director of Finance to designate an agency or agencies to carry out the functions of the office, as specified.

This bill, instead, would require the Controller to allocate that money, upon appropriation, to the Office of Emergency Services to be used for antiterrorism activities.

(25) The Division of Juvenile Parole Operations, which is part of the Division of Juvenile Justice in the Department of Corrections and Rehabilitation, is charged with the responsibility to monitor and supervise the reentry into society of youthful offenders under the jurisdiction of the department, and to promote the successful reintegration of youthful offenders into society.

This bill would establish the Juvenile Justice Community Reentry Challenge Grant Program to be administered by the Division of Juvenile Justice, in consultation with the Corrections Standards Authority, to award grants on a competitive basis to counties and nonprofit organizations to provide specified wrap-around services to juvenile parolees. The bill would require the division to implement, in consultation with the Corrections Standards Authority, the Chief Probation Officers of California, and experts in the field of California juvenile justice programs, minimum standards, funding schedules, and procedures for awarding the grant moneys. The bill would require grant recipients to establish and track outcomes of the program, as specified, and would further require the division to submit an interim report to the Legislature by March 1, 2009, and a final analysis of the program by March 1, 2011.

(26) Under existing law, the Department of Veterans Affairs has specified powers and duties relating to military veterans.

This bill would require the department, by February 1, 2007, to submit a report to the fiscal committees of both houses of the Legislature regarding possible strategies for increasing the number of California veterans receiving federal benefits. The bill would specify the required contents of the report, and would require the department to consult with certain persons and entities in its preparation.

(27) The Teachers' Retirement Law establishes the Defined Benefit Program in the Teachers' Retirement Plan that provides retirement and disability benefits to members of the program. That law requires, if funds are available, quarterly supplemental payments to retired members, disabled members, and beneficiaries from the Supplemental Benefit Maintenance Account to restore up to 80% of the purchasing power of the initial monthly allowances provided under the Defined Benefit Program. That law requires a continuous appropriation made annually from the General Fund for transfer to the Teachers' Retirement

Fund and the Supplemental Benefit Maintenance Account in the Teachers' Retirement Fund, as specified.

This bill would make an appropriation of \$613,753 from the General Fund for transfer to the Supplemental Benefit Maintenance Account to correct errors made in calculating contributions payable by the state to that account. This bill would require the appropriation from the General Fund for transfer to the Teachers' Retirement Fund for the 2006–07 fiscal year to be reduced by \$122,104,066, to correct errors made in calculating contributions payable by the state to the Teachers' Retirement Fund.

(28) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 70 (AB 2001) Cogdill Cigarettes and tobacco products.

The Cigarette and Tobacco Products Tax Law requires distributors and wholesalers of cigarette and tobacco products to be licensed by the State Board of Equalization. The Cigarette and Tobacco Products Tax Law also requires a tax imposed by that law with respect to distributions of cigarettes to be paid by distributors through the use of stamps or meter register settings, and requires that these stamps or meter register settings be affixed to each package of cigarettes sold.

Existing law requires all distributors of cigarette and tobacco products that are required to be licensed by the State Board of Equalization to furnish a \$1,000 security deposit. Existing law, until January 1, 2007, requires a distributor, that defers payments for stamps or meter register settings and elects to make those payments on a twice-monthly basis, to furnish a security deposit of at least 50% of, but not more than twice the amount of, stamps and meter register settings, for which payment is deferred. For calendar years beginning on and after January 1, 2007, the amount of the security deposit is increased to 70% of, but not more than twice the amount of, stamps and meter register settings for which payment is deferred. Existing law allows a distributor, who defers payment, to post a security deposit in cash, or a cash equivalent, or surety bond.

Existing law, until January 1, 2007, requires distributors that defer payments for stamps and meter register settings to elect to remit those payments either on a monthly or on a twice-monthly basis. For calendar years beginning on and after January 1, 2007, the payments are required to be made on or before the 25th day of the month following the month in which the payments are deferred.

Existing law, until January 1, 2007, requires distributors of cigarettes and tobacco products that elect to defer payments on a twice-monthly basis to file the report on or before the 5th day of the month following the month during which the cigarettes or tobacco products were distributed. For calendar years beginning on and after January 1, 2007, those reports are required to be filed on or before the 25th day of the month following the month during which the cigarettes or tobacco products were distributed.

This bill would delete the repeal dates specified in existing law, extending the operation of the deferred-payment option.

#### Ch. 71 (AB 2111) Haynes Firearms: unsafe handgun registry.

Existing law provides that the Department of Justice may charge licensed firearms manufacturers, as specified, and persons who import into the state for sale, keep for sale, or offer or expose for sale any pistol, revolver, or other firearm capable of being concealed upon the person in this state, an annual fee not exceeding the costs of preparing, publishing, and maintaining the roster listing handguns that are not unsafe, and the costs of research and development, report analysis, firearms storage, and other program infrastructure costs necessary to implement those provisions related to determining unsafe handguns, as specified.

This bill would provide that if a purchaser has initiated a transfer of a handgun that is listed on the roster as not unsafe, and prior to the completion of the transfer, the handgun is removed from the roster of not unsafe handguns because of nonpayment of the fee required to list the

handgun on the register, the handgun would be deliverable to the purchaser if the purchaser is not otherwise prohibited from purchasing or possessing the handgun. The bill would also provide that if a purchaser has initiated a transfer of a handgun that is listed on the roster as not unsafe, and prior to the completion of the transfer, the handgun is removed from the roster because of a failure during retesting, as specified, the handgun would not be deliverable to the purchaser.

Ch. 72 (SB 1486) Hollingsworth Alcoholic beverages: places of consumption.

Existing law generally prohibits the sale or consumption of alcoholic beverages at a public schoolhouse or any grounds thereof. Existing law provides that this prohibition does not apply if the alcoholic beverage is acquired, possessed, or used at a professional minor league baseball game conducted at the stadium of a community college located in a county with a population of less than 250,000 inhabitants, as specified.

This bill would provide that the prohibition against the sale or consumption of alcoholic beverages on the grounds of a public schoolhouse does not apply if the grounds on which the alcoholic beverage is acquired, possessed, used, or consumed is property of a community college that is leased, licensed, or otherwise provided for use as a water conservation demonstration garden and community passive recreation resource by a joint powers agency, as provided, the event at which the alcoholic beverage is acquired, possessed, used, or consumed is conducted pursuant to a written policy adopted by the governing body of the joint powers board, and no public funds are used for the purchase or provision of the alcoholic beverages, as specified.

This bill makes findings regarding the importance of water conservation and the necessity for special legislation.

Ch. 73 (SB 1597) Denham Taxation: Emergency Telephone Users Surcharge Act.

The Emergency Telephone Users Surcharge Act requires any person supplying intrastate telephone communication services, as specified, in the state to collect a surcharge imposed on amounts paid by every person in the state for intrastate telephone communication service. It requires the Department of General Services to annually determine a surcharge rate that it estimates will produce sufficient revenue to fund the current fiscal year's costs, but prohibits the surcharge rate in any year to be greater than  $\frac{3}{4}$  of 1% nor less than  $\frac{1}{2}$  of 1%. It establishes the State Emergency Telephone Number Account into which the payments made pursuant to the act are deposited. It requires, upon appropriation, funds in the account to pay, among other things, bills submitted to the department by service providers or communications equipment companies for the installation of, and ongoing expenses for, specified communication services.

This bill would provide that, for each fiscal year, the department will hold in trust money in the State Emergency Telephone Number Account, not appropriated for an authorized purpose, for future appropriation for upcoming, planned "911" emergency number system projects that have been approved by the department, even if the projects have not yet commenced.

Ch. 74 (AB 1807) Committee on Budget Health.

Existing law provides for the licensure and certification by the State Department of Health Services of persons providing various health services, including hemodialysis technicians. Existing law provides that the certification and renewal fees for hemodialysis technicians shall be \$50.

This bill would delete the provision setting the certification and renewal fees for hemodialysis technicians.

Existing law establishes provisions specifying the responsibilities of the State Department of Health Services in the implementation of various programs in the administration of public

health. Existing law provides for the licensure and regulation of clinics and health facilities, as defined, and certain health care providers.

This bill would provide that, unless otherwise specified in statute, or unless funds are specifically appropriated from the General Fund in the annual Budget Act or other enacted legislation, the Licensing and Certification Division of the department shall, no later than the beginning of the 2009–10 fiscal year, be supported entirely by federal funds and special funds.

Existing law establishes specified licensing fees for various clinics, health facilities, including hospitals, skilled nursing facilities, congregate living facilities, intermediate care facilities, and correctional treatment centers, and health care providers, including referral agencies, adult day health care agencies, home health agencies, private duty nursing agencies, hospices, pediatric day health and respite care facilities, and home dialysis agencies, and freestanding cardiac catheterization laboratories.

Existing law requires each new and renewal application for a license for specified health facilities to be accompanied by an annual fee, as specified.

This bill would specify the licensing and certification program fees applicable to various clinics, health care providers, and health facilities, including the above clinics, health care providers, and health facilities, for the 2006–07 fiscal year. The bill would require the department, commencing February 1, 2007, and every February 1 thereafter, to publish a list of estimated fees applicable to those providers and facilities, and to adjust those fees as specified. It would require the department to prepare and publish specified reports relating to the licensing and certification of those providers and facilities. The bill would provide for certain late payment penalties when any of those entities continues to operate beyond its license expiration date.

This bill would establish, within the Special Deposit Fund, the State Department of Health Services Licensing and Certification Program Account, and would specify that revenues collected for the licensing of specified health care providers shall be deposited in the account, for allocation, upon appropriation by the Legislature, to support the department's licensing and certification program. It would appropriate \$3,204,370 from the General Fund to the department for a loan for use in the support of the department's licensing and certification program to be repaid from the proceeds of fees collected for the licensing and certification of the above health providers and facilities.

This bill would require the department, commencing January 1, 2007, to give priority in conducting initial licensing surveys to each intermediate care facility/developmentally disabled, intermediate care facility/developmentally disabled habilitative, and intermediate care facility/developmentally disabled nursing.

Existing law establishes requirements, administered by the department, for certification as a certified nurse assistant, and imposes specified fees in connection with that certification.

This bill would repeal those fee provisions.

Existing law requires that a criminal record clearance shall be conducted for all nurse assistants by the submission of fingerprint cards to the department for processing at the Department of Justice, and requires completion of the criminal record clearance prior to issuance or renewal of a certificate. Existing law provides that the fee to cover the processing costs of the Department of Justice shall not exceed a specified amount.

This bill would require each health facility that operates and is used as a clinical skills site for certification training, and each health facility, prior to hiring a nurse assistant applicant certified in another state or country, to arrange for and pay the cost of the fingerprint live-scan service and the Department of Justice processing costs for each applicant. The bill would prohibit health facilities from passing these costs through to nurse assistant applicants unless allowed by federal law.

Existing law regulates the licensing of home health agencies and private duty nursing agencies, and certification of certified home health aides. Existing law requires an

application for renewal of a home health agency license or a private duty nursing agency license to be filed not less than 10 days prior to its expiration date.

This bill would require, instead, that the application for renewal be filed not less than 30 days prior to its expiration date.

Existing law imposes various fees in connection with home health aide certification.

This bill would repeal those fee provisions.

The bill would provide that, of certain funds appropriated in the Budget Act of 2006 for local jurisdictions to prepare for public health emergencies, a specified amount shall be provided to each local jurisdiction first, with the remaining amount allocated based on population.

Existing law, commencing July 1, 2007, prohibits local registrars and county recorders from issuing an informational certified copy of a birth or death certificate unless the source of the issuance is the statewide database prepared by the State Registrar and specifies that the security paper used for an informational certified copy of those records shall also contain a statement in perforated type that states it is informational and not a valid document to establish identity.

This bill would apply the limitation to the issuance of those records on July 1, 2007, but only after the statewide database becomes operational and the information is entered into the database. This bill would also extend the date on which the requirement for the statement would be applied to January 1, 2009.

Existing law prohibits any person from manufacturing any drug or device in the state unless he or she has a valid license from the state and provides that the license is valid for one year from the date of issue, unless it is revoked.

This bill would extend the period of the license to 2 years, unless it is revoked.

Existing law provides for the regulation and licensing of persons possessing radioactive materials and persons generally licensed for the use of devices and equipment utilizing radioactive materials.

This bill would require the State Department of Health Services to establish fees for followup inspections related to the failure to correct violations of those regulations.

Existing law provides for the regulation of large quantity medical waste generators and medical waste treatment facilities, including the registration of, and the issuance of permits to, those medical waste generators and treatment facilities. Existing law specifies the annual fees that the department is required to collect for this permit registration process.

This bill would require the department, in addition, to recover its actual costs for services related to large quantity medical waste generator followup inspections and enforcement activities necessary to ensure compliance with these provisions.

The bill would authorize permits for medical waste treatment facilities and large quantity medical waste generators to be issued biennially.

Existing law specifies the annual fee for an offsite medical waste treatment facility.

This bill would increase the amount of that fee, as specified.

Existing law requires the State Department of Health Services to charge a fee for newborn screening and followup services, to be paid to the Genetic Disease Testing Fund.

This bill would provide that the expenditure of funds from the Genetic Disease Testing Fund for the expansion of the Genetic Disease Branch Screening Information System to include cystic fibrosis and biotinidase may be implemented through the amendment of the Genetic Disease Branch Screening Information System contracts, and shall not be subject to specified provisions of law governing public contracts and information systems technology. It would provide that this exemption shall also apply to the maintenance and operation of the Genetic Disease Branch Screening Information System once the expansion is implemented.

Existing law provides for various health programs under which qualified low-income persons are provided health care services, including the Healthy Families Program, which is administered by the Managed Risk Medical Insurance Board. Existing law continuously appropriates funds to the board from the Healthy Families Fund for the program.

Under existing law, the Healthy Families Program includes a purchasing pool providing health coverage for children in families without affordable employer based dependent coverage. Existing law provides that if an applicant for the purchasing pool does not have a family contribution sponsor, the applicant shall pay the first month's family contribution and shall agree to remain in the program for 6 months.

This bill would make ineligible for the program, commencing July 1, 2007, an infant who is enrolled in employer-sponsored health insurance or who is eligible for the full scope of Medi-Cal benefits at no share of cost. This bill would also eliminate the first month contribution requirement and apply the requirement to agree to stay in the program for 6 months to any program applicant. By increasing eligibility of a subscriber under the Healthy Families Program, this bill would increase subscriber contributions and would result in an appropriation.

Existing law, the Access to Infants and Mothers Program, is administered by the Managed Risk Medical Insurance Board. Existing law sets forth eligibility requirements for the program and permits the board to determine subscriber amount schedules.

Existing law established the Perinatal Insurance Fund in the State Treasury as a continuously appropriated fund to be used for the purposes of the Access for Infants and Mothers Program and the Healthy Families Fund, which is continuously appropriated to the board for the purposes of funding the Healthy Families Program.

This bill would authorize the board to assess an additional subscriber contribution, for 2 months, for subscribers enrolled on or after July 1, 2007, with respect to an AIM-linked infant in the Healthy Families Program, and would specify that the board shall determine the portion of the subscriber contribution that shall be transferred from the Perinatal Insurance Fund to the Healthy Families Fund for payment of the Healthy Families Program premium for an AIM-linked infant, as defined. By transferring funds to a continuously appropriated fund, the bill would result in an appropriation.

Existing law provides that certain specified persons are peace officers, and includes all investigators of the State Department of Developmental Services.

This bill would instead provide that the Chief, Deputy Chief, supervising investigators, and investigators of the State Office of Protective Services of the State Department of Developmental Services are within the scope of that definition, provided that the primary duty of each of those peace officers shall be the enforcement of the law relating to the duties of his or her department or office.

Existing law provides that the State Department of Mental Health shall house no more than 1,336 patients at Patton State Hospital, with the exception that until one year after the activation of the Coalinga Secure Treatment Facility, up to 1,670 patients may be housed at the hospital.

This bill would instead, authorize the housing of up to 1,530 patients at the hospital in those circumstances until September 2009.

Existing law requires each regional center for persons with developmental disabilities to provide service coordinator caseload data to the State Department of Mental Health, as specified.

This bill would provide that, for purposes of calculating caseload ratios for consumers enrolled in the Home- and Community-based Services Waiver program, vacancies shall not be included in the calculations.

Existing law provides for the assessment of certain individuals for whom benefits are provided by regional centers for persons with developmental disabilities. Existing law specifies that if assessment is needed, prior to July 1, 2006, the assessment shall be performed within 120 days following initial intake, and requires that assessments after that date shall be performed within 60 days following intake.

This bill would extend the 120-day assessment requirement until July 1, 2007.

Under existing law, the State Department of Developmental Services provides funding for regional centers for the provision of services and supports to persons with developmental

disabilities. Existing law limits the rate of payment a regional center may pay a provider for specified services to a rate that is in effect on or after June 30, 2004, with certain exceptions.

This bill would require that, as of July 1, 2006, rates for specified services shall be increased by 3%, subject to funds appropriated for this purpose in the Budget Act. The bill would, for the 2006–07 fiscal year, except with respect to those services, limit the rate of payment a regional center may pay a provider to a rate that is in effect on or after July 1, 2006, except as provided.

The bill would increase the rate schedule in effect on June 30, 2006, for community care facilities serving persons with developmental disabilities by 3% on July 1, 2006, subject to funds specifically appropriated for this increase in the Budget Act of 2006.

Existing law provides that, during the 2005–06 fiscal year, no regional center may approve any service level for a residential service provider if the approval would result in an increase to be paid to the provider that is greater than the rate in effect on or after June 30, 2005.

This bill would make that limitation applicable with respect to the 2006–07 fiscal year, and would base the limitation on the rate in effect on or after July 1, 2006.

Existing law prohibits during the 2005–06 fiscal year, the State Department of Developmental Services from establishing any permanent payment rate for a community-based day program or in-home respite care agency that has a temporary payment rate in effect on June 30, 2005.

This bill would apply that prohibition to the 2006–07 fiscal year. The bill would provide that, commencing July 1, 2006, the community-based day program, work activity program, and in-home respite service agency rate schedules authorized by the department and in operation June 30, 2006, shall be increased by 3%, subject to funds specifically appropriated for this increase in the Budget Act of 2006.

The bill would, commencing July 1, 2006, increase the rate for family member-provided respite services authorized by the department and in operation June 30, 2006, by 3%, subject to funds specifically appropriated for this increase in the Budget Act of 2006.

The bill would permit the department, to the extent funds are appropriated in the annual Budget Act for this purpose, to provide a rate increase for the purpose of enhancing wages for direct care staff in day programs and in work activity programs, and in similar programs, for individuals who are developmentally disabled that meet any of specified criteria.

This bill would, commencing July 1, 2006, require certain regional center vendors who are serving individuals enrolled under a specified Home- and Community-based Services Waiver program for persons with developmental disabilities to ensure that billing information provided to regional centers identifies prescribed information necessary to support billing under the waiver. It would require regional centers to ensure that their contractual and other billing and payment arrangements with providers require the provision of any information necessary to support billing under the waiver.

Under existing law, the State Department of Developmental Services provides funding for regional centers for the provision of services and supports to persons with developmental disabilities. Existing law provides that, for the 2005–06 fiscal year, a regional center may not expend any purchase of service funds for the startup of any new program unless certain criteria are met, except as specified.

This bill would apply these provisions to the 2006–07 fiscal year. The bill would revise the criteria for expending purchase of service funds for the startup of a new program, and would add additional criteria. The bill would create an exception from these provisions for grants to current providers to engage in new or expanded employment activities that result in greater integration, conversion from sheltered to supported work environments, self-employment, and increased consumer participation in the federal Ticket to Work program.

This bill would increase the hourly rate, as prescribed, for supported employment services provided to persons with developmental disabilities receiving individualized and group services.

Existing law provides that any new or renewal licensure application fees for psychiatric health facilities shall be collected by the State Department of Mental Health.

This bill would create in the State Treasury the Licensing and Certification Fund, Mental Health, from which moneys, upon appropriation by the Legislature, shall be expended by the State Department of Mental Health to fund administrative and other activities in support of the Licensing and Certification Program administered by the department.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

Existing state and federal law requires every applicant or beneficiary under the Medi-Cal program or, in the case of a child, the child's caretaker relative or legal guardian on his or her behalf, to declare, under penalty of perjury, that he or she is, or is not, a citizen or national of the United States. Existing federal law requires, as of July 1, 2006, that every person who declares to be a citizen or national of the United States present satisfactory documentary evidence of citizenship or nationality, as specified.

This bill would require an individual who declares to be a citizen or national of the United States to present satisfactory documentary evidence of citizenship or nationality in compliance with the above provisions of federal law. The bill would provide that no services shall be available under the Medi-Cal program for an individual who fails to comply with these requirements, except as specified. The bill would provide that, to the extent federal financial participation is available, if an individual cooperates in the effort to obtain and present the documentation required by these provisions, the individual shall be given as much time as is allowed by federal law and policy to present that documentation. The bill would require counties to assist individuals to obtain the required documentation, and would impose certain other duties on counties with respect to these documentation requirements. By expanding the duties of county agencies in administering eligibility requirements under the Medi-Cal program, the bill would impose a state-mandated local program.

Existing law provides that an immigrant who does not meet specified requirements regarding his or her immigration status, and who is otherwise eligible for Medi-Cal services, shall only be eligible for certain emergency medical services, long-term care services, and pregnancy-related services, except as specified.

This bill would provide that any individual who is otherwise eligible for Medi-Cal services, but who does not meet the documentation requirements described above, shall be eligible only for the scope of services made available to immigrants under the above provisions.

Existing law, the Adult Day Health Care Act, provides for the licensure and regulation of adult day health care centers.

Existing law provides for the certification and enrollment of adult day health care centers as Medi-Cal providers. Existing law allows the State Department of Health Services to implement a one-year moratorium on the certification and enrollment into the Medi-Cal program of new adult day health care centers on a statewide basis or within a geographic area, and allows the Director of Health Services to extend this moratorium to coincide with a specified waiver. Existing law creates certain exemptions from this moratorium, including an exemption for an applicant for licensure and certification that has been designated by a city and county which, pursuant to a court order, is discharging certain persons from a nursing facility to community housing.

This bill, commencing May 1, 2006, would revise this exemption and would include additional conditions, as specified.

Existing law allows the State Department of Health Services to enter into contracts with drug manufacturers for drugs from each major therapeutic category, and requires it to maintain a list of those drugs for which contracts have been executed. Existing law requires these contracts to provide for an equalization payment amount, as defined.

This bill would require that utilization data used to determine an equalization payment amount include data from all programs that qualify for federal drug rebates pursuant to specified provisions of the federal Social Security Act, or that otherwise qualify for federal funds under that act pursuant to the Medicaid state plan or waivers.

Existing law requires the department to establish a list of covered services and maximum allowable reimbursement rates for durable medical equipment, as defined. Existing law requires that reimbursement for all durable medical equipment billed to the Medi-Cal program using codes with no specified maximum allowable rate be the lesser of certain amounts, including the manufacturer's suggested retail price, reduced by a percentage discount not to exceed 20%.

This bill would base this amount, instead, on the manufacturer's suggested retail purchase price on June 1, 2006, and documented by a printed catalog or a hard copy of an electronic catalog page showing the price on that date, reduced by a percentage discount not to exceed 20%, or not to exceed 15% for wheelchairs and wheelchair accessories if the provider employs or contracts with a qualified rehabilitation professional, as defined. The bill would require, commencing January 1, 2007, that reimbursement for oxygen delivery systems and oxygen contents utilize certain national codes, and be the lesser of specified amounts. The bill would require the department, within a specified period, to review the utilization of those services and equipment resulting from these changes, and to notify the Joint Legislative Budget Committee if it finds an increase in inappropriate use of those services or equipment.

Existing law requires the department to establish a list of hearing aids and hearing aid accessories and determine the maximum allowable product cost for each hearing aid product provided under the Medi-Cal program, and requires that the list be published in provider bulletins.

This bill would revise provisions governing maximum reimbursement rates for hearing aids and hearing aid accessories, and would authorize the department to implement those provisions by provider manual or bulletin.

Existing law allows specified utilization controls, including prior authorization, to be applied to covered Medi-Cal services that are subject to utilization controls. Under existing law, outpatient podiatric services are a covered benefit, subject to utilization controls.

This bill would provide, commencing October 1, 2006, that prior authorization for podiatric services provided on an outpatient or inpatient basis shall not be required when specified conditions are met.

Existing law requires the State Department of Health Services to establish and maintain a plan whereby costs for county administration of the determination of eligibility for benefits under the Medi-Cal program will be effectively controlled within the amounts annually appropriated for that administration. Existing law requires the plan to establish standards and performance criteria.

This bill would state the intent of the Legislature to provide appropriate funding to the counties for the effective administration of the Medi-Cal program at the local level to ensure that counties can reasonably meet the purposes of the performance measures as contained in these provisions.

Existing law requires the State Department of Health Services, in conjunction with the Managed Risk Medical Insurance Board, to develop and conduct a community outreach and education campaign to help families learn about, and apply for, the Medi-Cal program and the Healthy Families Program.

This bill would allow the State Department of Health Services to maintain an allocation program for the management and funding of county outreach and enrollment plans to enroll and retain eligible children in the Medi-Cal program and the Healthy Families Program. The

bill would require that a specified amount of the funds appropriated for these purposes be set aside for counties meeting certain criteria. It would require a county to submit an allocation plan to obtain these funds.

Existing law allows the Director of Health Services to contract with any qualified individual, organization, or entity to provide Medi-Cal managed care services.

This bill would require that, in conducting outreach activities for the enrollment of special needs populations into the Medi-Cal managed care program, the State Department of Health Services and its contractors, as deemed applicable by the department, work with state, local, and regional organizations with the ability to target low-income seniors and individuals with disabilities in the communities where they live.

Existing law establishes the California Program of All-Inclusive Care for the Elderly (PACE), to promote the development of community-based, risk-based capitated long-term care programs. Existing law allows the Director of Health Services to contract with up to 10 demonstration projects to develop risk-based long-term care pilot programs.

This bill would require the State Department of Health Services to establish the monthly capitation fee paid to each PACE organization at no less than a specified amount, subject to federal financial participation.

Existing law prohibits Medi-Cal reimbursement from being made for a service rendered by an adult day health care provider that does not have a license as an adult day health care center or that does not have currently effective Medi-Cal certification.

This bill would require that, notwithstanding this prohibition, Medi-Cal certification be granted as of the date of licensure with respect to, and reimbursement be made for, a service rendered on or after that date if the provider meets specified requirements.

Existing law provides that the board of supervisors of a county that contracted with the State Department of Health Services pursuant to a specified provision of law during the 1990–91 fiscal year and any county with a population under 300,000, as determined in accordance with the 1990 decennial census, may, by adopting a resolution to that effect, elect to participate in the County Medical Services Program for state administration of health care services to eligible persons in the county. Existing law revises, for the 2005–06 fiscal year, state and county financial responsibilities for certain increases in the County Medical Services Program.

This bill would further extend that revision to include the 2006–07 fiscal year.

Existing law requires the State Department of Mental Health to provide specified information to the appropriate fiscal and policy committees of the Legislature regarding the operation of the Metropolitan State Hospital.

This bill would require, in addition, commencing in September 2006 and every 3 months thereafter, that the department provide, pursuant to a consent decree, specified information produced within the previous 6 months by a court monitor, and certain other documents, to those legislative committees, until the state is in compliance with the consent decree.

This bill would refer an audit request to the Bureau of State Audits to conduct an audit during the 2007–08 fiscal year of the clinical laboratory oversight programs of the State Department of Health Services to assess the department's practices and procedures for enforcing state laws and regulations regarding the licensing, certification, and registration of clinical laboratories. It would provide that this audit request shall be considered by the Bureau of State Audits within its overall audit requests, and would require that the results of any audit conducted pursuant to these provisions be reported to the chairs of specified committees of the Legislature.

This bill would allocate the amount of \$24,803,000 in funds appropriated in the Budget Act of 2006 from the Cigarette and Tobacco Products Surtax Fund, and would specify the amount from which of each account in the fund the appropriated funds shall be allocated. The bill would specify the proportional allocation of those funds for distribution by the California Healthcare for Indigents Program, the rural health services program, and would limit the uses for which those funds may be applied.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing federal law provides for the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) program, under which children covered by Medicaid receive specified health and mental health services.

This bill would require the State Department of Mental Health to revise its method for auditing entities that provide specialty mental health services under the EPSDT program, and its method for extrapolating data obtained from those audits, as specified.

Existing law requires that specified educational and related services be provided to a child with a disability pursuant to an individualized education plan. Existing law provides that the State Department of Mental Health, or any community mental health service designated by that department, is responsible for the provision of mental health services to such a child, if required in the individualized education program for the child.

This bill would require, commencing with the Budget Act of 2006, that funds provided to county mental health department pursuant to specified appropriations in the annual Budget Act be timely, and that the funds be used exclusively to provide state-mandated services pursuant to the above provisions. The bill would provide that the State Department of Education shall be responsible for the timely distribution to county offices of education of specified funds appropriated in the Budget Act of 2006 for mental health services for students with individualized education plans pursuant to the above provisions, and would require that the timing of distributions meet certain requirements. The bill would require that, commencing in the 2007–08 fiscal year, as a condition of receiving specified funds appropriated in the Budget Act of 2006, a county mental health department and the appropriate county office of education, or a single entity designated by the county office of education, enter into a memorandum of understanding. The bill would require the State Department of Mental Health to develop a template of the memorandum of understanding, containing specified elements, by October 1, 2006, for use by county mental health departments and county offices of education, and would require the memoranda of understanding to be adopted by county mental health departments and county offices of education by May 1, 2007. The bill would require the State Department of Mental Health and the State Department of Education, by May 1, 2007, to collaboratively develop claiming instructions for the appropriations for county mental health programs under these provisions.

The bill would require the State Department of Health Services to provide to the fiscal committees of the Legislature, by no later than March 15, 2007, specified information regarding the reimbursement rates paid under the Medi-Cal program, and would allow the department to utilize up to a total of \$600,000 of certain funds appropriated in the Budget Act of 2006 for these purposes.

The bill would authorize the California Health and Human Services Agency to implement a plan to improve the state's ability to respond to a public health emergency, and would require the agency, in consultation with the Office of Emergency Services, to report, on a quarterly basis commencing October 1, 2006, to the appropriate fiscal and policy committees of the Legislature, on the state's progress. It would require the agency, by November 15, 2006, to provide to those committees of the Legislature the state's plan for the new health care delivery response system.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 75 (AB 1808) Committee on Budget Human services.

Existing law, the Child Care and Development Services Act, authorizes alternative payment programs to provide payment to child care facilities with at least 75% subsidized children in prescribed circumstances, and authorizes the Superintendent of Public Instruction to adopt related regulations.

This bill would delete the above 75% limitation, and would revise the methodology by which alternative payment programs reimburse licensed child care providers, in accordance with an annual market rate survey, as specified, and based on the rates charged by the provider to nonsubsidized families. The bill would make related technical changes. The bill would give alternative payment programs and licensed child care providers various responsibilities in connection with providing child care for subsidized families. The bill would require an alternative payment program to verify provider rates, using a random verification process, as prescribed.

Existing law requires the Department of Finance and the Department of General Services to approve or disapprove annual contract funding terms and conditions for state-subsidized child care and development programs, including family copayment schedules and regional market rate schedules that are required to be adhered to by contract, and contract face sheets submitted by the State Department of Education. Following the resolution of conflicts between the departments, if any, existing law requires the State Department of Education to issue contracts and funding terms and conditions to child care contractors, as specified.

This bill, notwithstanding these provisions, would require the State Department of Education to implement, for the 2006–07 fiscal year, regional market rate schedules as determined by the Regional Market survey conducted in 2005, as specified, and to update the family fee schedules by family size, based on the 2005 state median income survey data for a family of 4. The bill would make related technical changes, and would declare the intent of the Legislature to fully fund the 3rd stage of child care for CalWORKs recipients.

Existing law requires funds appropriated in specified annual Budget Acts to be allocated to local child care and development planning councils, to be used to address the retention of qualified child care employees in state-subsidized child care centers. A portion of these funds may also be allocated for use in the County of Los Angeles to subsidize child care services in other settings, including family day care homes, as defined.

This bill would revise the provisions related to the County of Los Angeles, to also include specified funds appropriated in the Budget Act of 2006, and, if funding is provided, in the Budget Acts of 2007 and 2008.

Under existing law, 6 unified school districts and consortia operating children services program sites that provide instruction, counseling, tutoring, and related services for foster children receive an allowance from the State School Fund. Existing law also authorizes other school districts to provide educational services for foster children who reside in a regularly established licensed or approved foster home, located within the boundaries of a program site, pursuant to a commitment by a juvenile court. Existing law provides for funding for those other school districts for the provision of those services in any fiscal year, upon appropriation from the General Fund, or, if sufficient funds are available, from the Foster Children and Parent Training Fund.

This bill would provide, with respect to educational and support services for foster youth, that in addition to the 6 specified program sites, any county office of education, or consortium of county offices of education, may elect to apply to the Superintendent of Public Instruction for grant funding, to the extent funds are available, to operate an education-based foster youth services program to provide educational and support services for foster children.

The bill would require, if sufficient funds are available, these programs to have at least one educational services coordinator. The bill would specify the duties to be performed by these advocates. It would set priorities for the services to be delivered by these programs.

Existing law requires school districts and county superintendents of schools to provide free or reduced-price meals to needy pupils as part of the National School Lunch and School Breakfast Programs. Existing law requires the State Department of Education to create a

computerized data-matching system, as specified, using existing databases from the State Department of Education and the State Department of Health Services to directly certify recipients of public assistance programs for enrollment in the National School Lunch and School Breakfast Programs, as specified. These provisions are operative upon receipt of federal funds to assist the state in implementing new direct certification requirements mandated by federal law.

Existing law separately provides that, except under specified circumstances, applications and records concerning any individual made or kept by a public officer or agency in connection with the administration of existing law relating to federally subsidized public social services are confidential.

This bill, notwithstanding the above confidentiality provisions, would authorize the transfer of data that identify applicants for, or recipients of, public social services from existing databases maintained by the State Department of Health Services, in order to directly certify recipients of the Food Stamps Program, CalWORKS, or other programs authorized for direct certification under federal law for National School Lunch and School Breakfast Programs eligibility. The bill would declare these provisions to be declaratory of existing law.

Under existing law, the Student Aid Commission has various duties with respect to the administration of publicly funded postsecondary educational financial assistance programs.

This bill would set forth the duties of the commission with respect to its operation of a federally funded scholarship program to assist current and former foster youth in financing their postsecondary education. The bill would require the commission, in conjunction with the State Department of Social Services, to determine individual award amounts and the total number of students awarded on an annual basis, as prescribed.

Existing law requires the state to operate a State Disbursement Unit, as required by federal law, for the collection and disbursement of payments under support orders.

This bill would declare that the Department of Child Support Services has the authority and discretion to prevent, correct, or remedy the effects of changes in the timing of the receipt of child support payments resulting from the initial implementation of the State Disbursement Unit. The bill would declare this provision to be declaratory of existing law.

Existing law requires the department to administer laws and regulations pertaining to the administration of child support enforcement obligations, and requires each county to maintain a local child support agency, which is responsible for establishing, modifying, and enforcing support obligations, including bringing legal action, as specified.

This bill would prohibit interest from accruing in an action for payment of current child, spousal, family, or medical support that becomes due in a given month, until the 1st day of the following month.

Existing federal law provides for allocation of federal funds through the federal Temporary Assistance for Needy Families (TANF) block grant program to eligible states. Existing law provides for the California Work Opportunity and Responsibility to Kids (CalWORKS) program under which, through a combination of state and county funds and federal funds received through the TANF program, each county provides cash assistance and other benefits to qualified low-income families.

Existing law requires the Department of Child Support Services, until January 1, 2007, to create a program establishing an arrears collection enhancement process, pursuant to which the department is authorized to accept offers in compromise of child support arrears and accrued interest owed to the state for reimbursement of aid paid pursuant to the CalWORKS program. Under existing law, the department is required to report to the Legislature on the results of the program no later than January 1, 2007.

This bill would continue that program through June 30, 2008, and would require the department to report to the Legislature by that date. The bill would require a local child support agency to honor repayment schedules for the compromise program beyond June 30, 2008, to allow for the completion of compromise agreements already in progress.

Existing law, effective July 1, 2000, provides that the 10 counties with the best child support program performance standards shall receive an additional 5% of the state's share of the counties' collections that are used to reduce or repay aid that is paid under the CalWORKs program. Existing law requires the counties to use the additional funds for specified child support-related activities. Existing law suspends the payment of this additional 5% for fiscal years 2002–03 to 2005–06, inclusive.

This bill would extend the suspension of the 5% payment through the 2006–07 fiscal year.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, and under which qualified low-income persons receive health care services. Under existing law, the Department of Child Support Services is required to provide payments of \$50 per case to the local child support agency for obtaining 3rd-party health coverage or insurance of beneficiaries, to the extent that funds are appropriated in the Budget Act. Existing law suspends these payments for fiscal years 2003–04 to 2005–06, inclusive.

This bill would extend the suspension of the above payments to local child support agencies through the 2006–07 fiscal year.

Under existing law, the State Department of Social Services regulates the licensure and operation of community care facilities, residential care facilities for the elderly, and child day care facilities.

This bill, in order to protect the health and safety of persons receiving care or services from individuals or facilities licensed and certified by the state, would authorize departments under the jurisdiction of the California Health and Human Services Agency to share information with respect to applicants, licensees, certificants, and individuals who have been the subject of disciplinary action. The bill would require the State Department of Social Services to maintain a centralized system for monitoring and tracking of administrative disciplinary actions, to be used by departments under the jurisdiction of the California Health and Human Services Agency as a part of the background check process. This bill would authorize the department to adopt regulations to implement these provisions, and to charge a fee to other departments under the agency's jurisdictions to cover the cost of providing the specified disciplinary information.

Existing law requires the State Department of Social Services to conduct announced visits to no less than 10% of certain licensed community care facilities, residential care facilities for the elderly, family day care homes, and child day care centers, in order to ensure the quality of care, as specified.

This bill would increase the percentage of facilities subject to announced visits by the department, to 20%.

Under existing law, licensees and other individuals who are present and provide care in specified community care, foster care, and child day care facilities are required to provide fingerprints, and the department is required to secure the individual's criminal history, to determine whether he or she has been convicted of a crime other than a minor traffic violation, or convicted of specified sex-related offenses.

Existing law prohibits the Department of Justice and the State Department of Social Services from charging a fee for fingerprinting, or obtaining the criminal record of, an applicant for a license or special permit to operate facilities that provide nonmedical board, room, and care for 6 or fewer children, and child day care facilities that serve 6 or fewer clients, but makes an exception to these prohibitions for fiscal years 2003–04, 2004–05, and 2005–06.

This bill would extend these exceptions through the 2006–07 and 2007–08 fiscal years.

Existing law provides that certification of alcohol and other drug treatment recovery programs shall be granted by the State Department of Alcohol and Drug Programs regardless of the source of the program's funding.

This bill would revise the procedures for granting the certification, and would limit the certification to a period of not more than 2 years.

Existing law requires a narcotic treatment program authorized to use replacement narcotic therapy to be licensed by the State Department of Alcohol and Drug Programs, except as specified. Existing law requires the department to set the licensing fee at a level sufficient to cover all departmental costs associated with licensing incurred by the department. Under existing law, the licensing fee is prohibited from increasing at a rate greater than the Consumer Price Index plus 5%, except as specified.

This bill would limit the rate by which the department may increase this fee to the Consumer Price Index.

The Comprehensive Drug Court Implementation Act of 1999 provides grants to counties under which the county alcohol and drug program administrator and the presiding judge in the county develop and submit a plan for local drug court systems. Existing law repeals the act as of January 1, 2007.

This bill would delete the repeal date of the act, thereby extending its provisions indefinitely.

The Substance Abuse and Crime Prevention Act of 2000, enacted by initiative statute (Proposition 36), established the Substance Abuse Treatment Trust Fund within the State Treasury to be continuously appropriated for carrying out the purposes of the act relating to diverting from incarceration into community-based substance abuse treatment programs, nonviolent defendants, probationers, and parolees charged with simple drug possession or drug use offenses. Under existing law, counties are required to annually report information relating to individuals served as a result of funding required by the act. The act requires that any amendment to the act pass with a  $\frac{2}{3}$  vote of the membership of both houses of the Legislature, and requires amendments to be consistent with the act's purposes.

This bill would revise the methodology by which funds are allocated to counties by the department, by allowing the department to withhold from a county's allocation an amount that the department projects will remain unencumbered. This bill would require the department to allocate 75% of the withheld funds in accordance with existing law, and to reserve 25% of the withheld funds to adjust for actual, rather than projected unencumbered funds, as specified. The bill would require the department to adjust its allocations, as necessary, if the department determines that more funds should have been withheld from a county, and would authorize the department to exclude a nonreporting county from allocations under the bill.

This bill, subject to an appropriation in the annual Budget Act, would establish the Substance Abuse Offender Treatment Program, pursuant to which the State Department of Alcohol and Drug Programs would distribute funds to counties that meet designated eligibility criteria, for the purpose of improving county treatment practices with respect to substance abuse offenders, as provided in the bill. The bill would require a participating county to provide matching funds in order to participate in the program, and to submit an application to the department containing specified information, documenting the county's eligibility for the program. The bill would set forth the department's duties with respect to the program, including auditing county expenditures of funds under the program, and would require that expenditures not made in accordance with the program be repaid to the state.

This bill would make the program inoperative 2 years after its implementation, and would repeal these provisions as of July 1, 2009.

Existing law, the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983, requires the Office of Statewide Health Planning and Development to assume prescribed duties relating to construction and alteration of hospital buildings, including, but not limited to, review and approval of construction plans, in order to ensure that the buildings would be reasonably capable of providing services after a disaster.

This bill would additionally require the office, contingent upon an appropriation in the annual Budget Act, to establish a program for Fire and Life Safety Officers, to perform duties of the office related to the review of plans and specifications pertaining to the design and observation of hospital buildings, as specified. The bill would require the office to prepare

a comprehensive report on the Fire and Life Safety Officer training program, and to include specified information in the report. The bill would require the office to submit the report to the Joint Legislative Budget Committee by April 1, 2007.

Existing law authorizes the appropriation in the Budget Act of 2005 of a specified amount from the Employment Training Fund to fund the local assistance portion of welfare-to-work activities under the CalWORKs program.

This bill instead would apply this provision to any annual Budget Act, and would provide that the amount of the appropriation shall be specified in that annual Budget Act.

Existing federal law provides for allocation of federal funds through the federal TANF block grant program to eligible states. Existing law provides for the CalWORKs program for the allocation of federal funds received through the TANF program, under which each county provides cash assistance and other benefits to qualified low-income families.

Existing law requires the State Department of Social Services to annually allocate appropriated funds to each federally recognized American Indian tribe with reservation lands or rancherias in the state that administers a federal tribal TANF grant program.

This bill would revise the provisions relating to state funding for the Tribal TANF grant program by basing state funding on the caseload used to develop Tribal Family Assistance Grant negotiated with the Administration for Children and Families and the state. The bill would also revise related reporting and auditing requirements.

Existing law provides for various county-administered public social services, including, among others, adoption and child welfare services, foster care services, the CalWORKs program, the Food Stamp Program, adult protective services, and the In-Home Supportive Services program, which are subject to state administration and oversight by the State Department of Social Services.

This bill would require the department to estimate the costs for county administration of human services programs, as specified, using a county survey process, which would be jointly developed by the department and the County Welfare Directors Association no later than November 1, 2006, in accordance with criteria set forth in the bill.

Existing law requires each county to develop a plan consistent with state law that describes how the county intends to deliver the full range of activities and services necessary to move CalWORKs recipients from welfare to work.

This bill would require the State Department of Social Services to establish a CalWORKs county peer review process, as specified, and to initially implement the process on a pilot county basis, and then statewide, by July 1, 2007. The purpose of the peer review process would be to assist counties in implementing best practices to improve their performance and make progress toward meeting established state performance goals.

This bill would require each county to perform a comprehensive review of its existing CalWORKs plan, and to prepare and submit to the department an addendum to the plan, detailing how the county will meet goals related to the improvement of public social services outcomes, as prescribed under existing law. The bill would require the county plan to be reviewed and updated for these purposes no less than once every 3 years.

By increasing county duties with respect to the administration of the CalWORKs program, this bill would impose a state-mandated local program.

Notwithstanding any other provision of law, this bill would provide that of the amount appropriated to the State Department of Social Services in a specified item in the Budget Act of 2006, \$90,000,000 in federal TANF block grant funds for the CalWORKs program shall remain eligible for expenditure until June 30, 2008.

Existing law requires the State Department of Social Services to ensure that performance outcomes under the CalWORKs program are monitored at the state and county levels, as specified. Under existing law, if the state does not achieve the outcomes required by federal law, and is therefore subject to a fiscal penalty, that penalty shall be shared equally by the state and the counties, after the exhaustion of available federal administrative remedies.

Beginning no later than April 1, 2007, this bill would require the department to periodically publish available data, reported by county, regarding specified performance outcomes. The bill would require the department to consult with designated entities when developing the data sources, methodology, and format for the data to be published.

This bill would revise the methodology by which the county share of the federal penalty is calculated and assessed, and the circumstances under which a county may be provided relief from a previously imposed penalty. The bill would provide that a county that fails, without good cause, to submit accurate and timely data required by the department shall be deemed to have failed to meet applicable federal requirements.

This bill would declare the Legislature's intent that the department to prepare and submit to the Legislature a master plan for CalWORKs data, by April 1, 2007, and would specify the required contents of the master plan.

Existing law requires each county to provide child welfare services, and provides for the administration of various child welfare services pursuant to regulations and procedures adopted by the State Department of Social Services.

Existing law requires the department to contract with an appropriate and qualified entity to conduct an evaluation of the adequacy of current child welfare services budgeting methodology, and to convene an advisory group. Pursuant to existing law, the Director of Social Services has convened an advisory group, the Child Welfare Services Stakeholders Group, to address concerns facing the child welfare system.

This bill would, commencing with the Budget Act of 2006, annually designate \$98,000,000 from specified Budget Act items for county child welfare services system improvement. This bill would require the State Department of Social Services to work with the County Welfare Directors Association, among others, to develop and submit to the Legislature by February 1, 2007, a proposed methodology for budgeting these child welfare services program funds, to be applicable commencing with the 2007–08 fiscal year, as specified.

Notwithstanding any other provision of law, this bill would limit the expenditure of federal TANF block grant funds or state maintenance of effort funds outside of the CalWORKs program to circumstances when the expenditure does not result in additional caseload to be included in the calculation of the state's TANF program caseload reduction credit. This bill would prohibit the amount of federal TANF block grant funds authorized for any program except the CalWORKs program from being increased above the amount appropriated in the annual Budget Act.

This bill would require the State Department of Social Services to administer a voluntary Temporary Assistance Program (TAP), to provide cash assistance and other benefits, commencing no later than April 1, 2007, to specified current and future CalWORKs recipients who meet the exemption criteria for participation in welfare-to-work activities, and are not single parents who have a child under the age of one year. The bill would allow the department to suspend implementation of the TAP until October 1, 2007, under specified circumstances. This bill would require the TAP to be funded by designated General Fund resources.

Existing law requires the imposition of sanctions, as specified, if an individual has failed or refused to comply with CalWORKs program requirements. Under existing law, the length of time that financial sanctions reduce a family's grant increases is based on the number of instances of noncompliance that have occurred.

This bill would eliminate the above provisions increasing the length of time that the financial sanctions are imposed, and instead would provide that a sanction shall terminate at any point if the noncomplying participant performs the activity or activities the individual previously refused to perform.

Existing law, through the Kinship Guardianship Assistance Payment Program, which is a part of the CalWORKs program, provides aid on behalf of eligible children who are placed in the home of a relative caretaker, and limits the application of the program to children who

have been adjudged a dependent child of the juvenile court and whose dependency has been dismissed on or after January 1, 2000, concurrently or subsequent to the establishment of the kinship guardianship. The program is funded by state and county funding and available federal funds.

This bill would revise the methodology for calculating the state share of benefits and administration under the Kin-GAP Program.

This bill would require the State Department of Social Services, by October 1, 2006, to establish the Kin-GAP Plus Program, which would be an optional alternative to the Kin-GAP program, with similar eligibility and administrative provisions. The Kin-GAP Plus Program would additionally apply to certain delinquent children who have been declared wards of the juvenile court and whose wardships have been terminated, and would include payments for a specialized care increment and clothing allowance, under certain circumstances. The bill would require the department to adopt implementing regulations for the Kin-GAP Plus Program by February 1, 2007, and to report to the Legislature regarding the program at a specified time. The bill would allow the department to suspend the voluntary enrollment of Kin-GAP beneficiaries into the Kin-GAP Plus Program until October 1, 2007, under specified circumstances. The bill would extend benefits under the Kin-GAP Program to certain wards of the juvenile court, and would provide for the payment of clothing allowances and specialized care increments to the Kin-GAP recipients, as prescribed, if the department suspends voluntary enrollment or the Kin-GAP beneficiaries into the Kin-GAP Plus Program in accordance with these provisions.

Existing law relating to the CalWORKs program provides that after a family has used all available liquid resources in excess of \$100, the family shall be entitled to receive an allowance for nonrecurring special needs, including homeless assistance, under specified circumstances.

This bill would revise the purposes for which the homeless assistance payment may be provided, to include payment of up to 2 months of rent arrearages when these payments are a reasonable condition of preventing eviction. The bill would also include within the circumstances pursuant to which homeless assistance would be available, when a family receives a notice to pay rent or quit. The bill would increase the amount of assistance available to a family, from \$40 per day to \$65 per day for a family of 4 or fewer, plus \$15 per day for each additional family member up to a daily maximum of \$125. This bill would also revise the manner of calculation of the nonrecurring special need of permanent housing assistance for last month's rent and security deposits.

This bill would impose a state-mandated local program by requiring each county to perform additional administrative duties under the CalWORKs program.

Existing law provides funding for various child welfare services, including foster care services such as the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which counties provide payments to foster care providers on behalf of qualified children in foster care. The program is funded by a combination of federal, state, and county funds. Existing law requires that a child be in one of 7 designated placements in order to be eligible for AFDC-FC, and also limits eligibility for federal financial participation to children who meet certain criteria.

Existing law, pursuant to the AFDC-FC program, requires that foster care providers licensed as group homes have rates established by classifying each group home program and applying the standardized schedule of rates. Existing law establishes a standardized schedule of rates for the 2002–03, 2003–04, 2004–05, and 2005–06 fiscal years.

This bill would extend the standardized schedule of rates to the 2006–07 fiscal year, and would make related changes.

This bill would authorize the department to conduct a demonstration project in up to 20 counties, to allow flexible use of certain federal and state foster care funds, using a federal capped allocation model over a 5-year period. The bill would require state approval for a county to participate in the demonstration project, and would require a participating county

to enter into a memorandum of understanding (MOU) with the department setting forth the terms and conditions of participation in the demonstration project, as specified, including, among other provisions, procedures to allow a county to opt out of the demonstration project. It would also prescribe the allocation methodology for the federal funds and the county's share of cost.

Existing law authorizes payment for certain transitional housing services to eligible foster youth between 16 and 18 years of age from available moneys in the Transitional Housing for Foster Youth Fund, which is continuously appropriated, or the annual Budget Act. Existing law extends eligibility for these transitional housing placement program services to a person less than 24 years of age who has emancipated from the foster care system in a county that has elected to participate in a transitional housing placement program for youths between 18 and 24 years of age, provided that the person has not received these services for more than a total of 24 months.

Existing law provides that the state shall pay 40%, and the county shall pay 60%, of the share of costs for these transitional housing services.

This bill would revise applicable sharing ratios, to eliminate the requirement for the county to pay a share of the cost for transitional housing services for persons between 18 and 24 years of age, and would limit funding for these services to the amount appropriated in the annual Budget Act.

Existing law provides for the State Supplementary Program for the Aged, Blind and Disabled (SSP), which requires the State Department of Social Services to contract with the United States Secretary of Health and Human Services to make payments to SSP recipients to supplement supplemental security income (SSI) payments made available pursuant to the federal Social Security Act.

Under existing law, benefit payments under the SSP program are calculated by establishing the maximum level of nonexempt income and federal (SSI) and state (SSP) benefits for each category of eligible recipient. The state SSP payment is the amount, when added to the nonexempt income and SSI benefits available to the recipient, that would be required to provide the maximum benefit payment.

Existing state law provides, except in certain calendar years, for the annual adjustment of the total level of combined state and federal benefits as established by statutory schedule to reflect changes in the cost of living, as defined.

Existing law provides that, for the 2006 and 2007 calendar years, no cost-of-living adjustment shall be made to the state portion of SSI/SSP benefits. Existing law provides that, commencing with the 2004 calendar year and thereafter, in any calendar year in which no cost-of-living adjustment is made to the payment schedules, there shall be a pass along of any cost-of-living increases in federal SSI benefits.

Existing law further provides, with certain exceptions, that for the 2006 calendar year, the federal pass along shall not become effective until April 1, 2006, and for the 2007 calendar year, the federal pass along shall not become effective until April 1, 2007.

This bill would delete the delay of the federal pass-along for the 2007 calendar year.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, through employment by the recipient, by or through contract by the county, or by the creation of a public authority or pursuant to a contract with a nonprofit consortium, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Existing law allows an IHSS recipient who hires and pays his or her service provider, and who has been a recipient for at least one year, to receive his or her IHSS grant by direct deposit through an electronic transfer. Existing law requires the Controller and the State Department of Social Services to determine the cost of developing and implementing the direct deposit program, as specified.

This bill instead would require the department to establish a program of direct deposit by electronic fund transfer, and would give providers the option of receiving payments via the direct deposit system. The bill would require the State Department of Social Services, the

Controller, and the California Health and Human Services Agency to make all necessary automation changes to allow for direct deposit payments.

Existing law establishes the Pay for Performance Program to provide additional funding for counties that meet specified standards in implementing welfare-to-work programs under the CalWORKs program, that would apply to the 2006–07, 2007–08, and 2008–09 fiscal years and would be contingent upon a Budget Act appropriation.

This bill would delete the specific fiscal years to which the Pay for Performance Program generally applies, would revise performance measures, standards, outcomes, and payments to counties in certain fiscal years, and would require the department to periodically publish the outcomes measured by the program, identified by county.

Existing law provides for the Adoption Assistance Program, to be established and administered by the State Department of Social Services or the county, for the purpose of benefitting children residing in foster homes by providing the stability and security of permanent homes. The program provides for the payment by the department and counties, of cash assistance to eligible families that adopt eligible children, and bases the amount of the payment on the needs of the child and the resources of the family to meet those needs.

This bill, upon appropriation by the Legislature of funds for this purpose, would require the State Department of Social Services to establish a 3-year project in 4 counties, including San Francisco and Los Angeles Counties, and one state district office, and would provide that funding to those counties from appropriations in the annual Budget Act would be used to provide funding for preadoption and postadoption services to ensure the successful adoption of a targeted population of children who have been in foster care 18 months or more. The bill would require the department to work with counties to develop requirements for the project, and to provide information on the results of the project to the Legislature, by November 30, 2010. This bill would encourage the participating counties to create public-private partnerships with private adoption agencies to maximize success in improving permanency outcomes for older foster children, as specified. To the extent that it places new requirements on participating counties, this bill would impose a state-mandated local program.

Existing law requires the State Department of Social Services to conduct a Kinship Support Services Program that is a grants-in-aid program providing startup and expansion funds for local kinship support services programs that provide community-based family support services to kinship caregivers and the children placed in their homes by the juvenile court or who are at risk of dependency or delinquency. Under existing law, the counties participating in the program must meet specified requirements, including the requirement that 40% or more of dependent children in the county be in relative care placements.

This bill would revise the provisions applicable to the operation of the Kinship Services Support Program by eliminating the requirement that a participating county have 40% or more of dependent children in relative care placements and imposing additional requirements on these counties. The bill would require specified information be provided by counties that elect to participate in the program, including the number of relative caregivers residing in the county, and the county's outcome improvement goals for the program, as specified.

Under existing law, the Department of Community Services and Development in the California Health and Human Services Agency has various duties and responsibilities with respect to low-income individuals, including coordinating and establishing linkages between governmental and other social services programs to ensure the effective delivery of services to those individuals.

This bill would establish the Naturalization Services Program within the department, which would provide funding to community-based organizations to assist legal permanent residents in obtaining citizenship. These provisions would be implemented only to the extent that funds are appropriated for this purpose.

Existing law requires the Department of Alcohol and Drug Programs, among other duties, to administer certain programs and studies related to alcohol and drug abuse recovery and to license, certify, and regulate alcoholism or drug abuse recovery or treatment facilities.

This bill would require the department to submit to the Legislature a methamphetamine prevention plan, with specified components, by April 1, 2007. The bill would also require the department to report its efforts at budget hearings in 2007 and 2008.

This bill would authorize certain provisions to be implemented by the State Department of Social Services by all-county letters or similar instructions, pending the adoption of emergency regulations, as prescribed.

This bill would provide that its provisions are severable, and that if any provision of the bill or its application is held invalid, that invalidity shall not affect other provisions or applications of the bill that can be given effect without the invalid provision or application.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 76 (SB 1448) Kuehl Health care: Medi-Cal: uninsured persons.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and which provides health care services to qualified low-income recipients. The Medi-Cal program is partially governed and funded by federal Medicaid provisions. Existing law, the Hospital/Uninsured Care Demonstration Project Act, implements that portion of a specified federally approved Medicaid demonstration project waiver relating to hospital funding.

Existing law establishes the Health Care Support Fund, which is continuously appropriated to the department for specified purposes related to the implementation of the above demonstration project waiver.

This bill would implement that portion of the federally approved demonstration project waiver relating to the expansion of Medi-Cal managed care enrollment and the extension of health care coverage to individuals currently uninsured. The bill would, in implementation of that waiver and subject to federal financial participation, enact the Health Care Coverage Initiative for the purpose of extending health care coverage to those individuals. The bill would require that the initiative be designed and implemented to achieve specified outcomes, including expanding the number of Californians who have health care coverage. It would require the department to allocate the federal funds available to be claimed, and to select participating programs that best meet the requirements and desired outcomes of the initiative. The bill would provide that a county, city and county, consortium of more than one county, or health authority is eligible to apply for the initiative funds, would specify application requirements, and would require the department to select at least 5 entities and to seek to balance the allocations throughout geographic areas of the state. Allocations would be made for a 3-year period, and selected entities would be required to provide local funds or intergovernmental transfers necessary to claim federal funds. The bill would require that federal funds under the initiative supplement, and not supplant, funds that would otherwise be used for health care services, and would limit the amount of funds that may be used for program administration.

The bill would require the department, in consultation with any of specified entities, to evaluate the initiative, and would require the department to monitor the programs funded under the initiative for compliance with applicable requirements.

The bill would provide that the provisions governing the initiative shall become inoperative on the date that the director executes a declaration stating that the federal

demonstration project waiver has been terminated by the federal Centers for Medicare and Medicaid Services, and shall, 6 months after the date the declaration is executed, be repealed.

This bill would appropriate \$200,000 from the General Fund and \$200,000 from the Federal Trust Fund to the State Department of Health Services for these purposes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 77 (AB 1803) Committee on Budget Public resources.

(1) Existing law requires the Department of Pesticide Regulation to publish a financial report each year that describes the amount and source of funding of, and the cost to operate, each branch of the department, and the funding of the major programs within those branches.

This bill would instead require the department to report the amount and source of funding for the major programmatic functions of the department.

(2) Existing law, with certain exceptions, prohibits a person from sport fishing in the tidal waters of the San Francisco Bay-Delta and the main stem of the Sacramento and San Joaquin Rivers, including major tributaries, below the most downstream dam, unless the person obtains, in addition to a specified license and other applicable stamp or validation, a Bay-Delta Sport Fishing Enhancement Stamp or validation and affixes that stamp or validation to a specified license. Existing law establishes a base fee of \$5 for that stamp or validation, provides for the annual adjustment of that amount in a specified manner, and requires the funds generated by the imposition of these fees to be deposited in a separate account in the Fish and Game Preservation Fund. Existing law requires the department to expend those funds for the long-term, sustainable benefit of the primary Bay-Delta sport fisheries in a manner that is consistent with specified laws and practices.

This bill would require the expenditure of those funds to be consistent with the ecosystem restoration component of the CALFED Programmatic Record of Decision dated August 28, 2000.

(3) Existing law requires all moneys collected under the provisions of the Fish and Game Code to be deposited in the Fish and Game Preservation Fund, unless otherwise provided.

This bill would require the Department of Fish and Game to prepare annually, for inclusion in the Governor's Budget, a fund condition statement for the Fish and Game Preservation Fund that displays information relating to revenues and expenditures with regard to the moneys in the fund, as specified. The bill would require the department to prepare, for posting on its Internet Web site on or before January 10, of each year, a fund condition statement for each account or subaccount in the fund.

(4) Existing law specifies that all moneys collected under the Fish and Game Code are deposited into the Fish and Game Preservation Fund, unless otherwise provided. Existing law provides that 33 $\frac{1}{3}$ % of the fees derived from the issuance of all sport fishing licenses, with a specified exception, are to be deposited into the Hatchery and Inland Fisheries Fund to be used, upon appropriation, to support programs related to the management, maintenance, and capital improvement of fish hatcheries, the Heritage and Wild Trout Program, and other eligible activities. Existing law sets forth production and restoration goals for trout, as provided. Existing law permits the Department of Fish and Game to utilize federal funds to meet these production and restoration goals. Existing law requires the department, by July 1, 2008, and biennially thereafter, to report back to the fiscal and policy committees in the Legislature on the implementation of these and other provisions relating to trout.

This bill would delete the provision permitting the department to utilize federal funds to meet the production and restoration goals, and instead would specify that the department may utilize federal funds to meet the 33 $\frac{1}{3}$ % requirement described above if those funds are otherwise legally available for that purpose.

(5) Existing law requires the Resources Agency in conjunction with specified entities within the agency to develop and maintain a database of lands and easements that have been acquired by the those entities.

This bill would require the Resources Agency to identify, for future conservation, key buffer properties adjacent to large ecologically valuable working landscapes that provide significant economic benefits to the state whose future viability could be threatened by encroachment of incompatible land use. The bill would require that an acquisition of a land or conservation easement for use as a buffer property occur with a willing seller.

(6) Existing law requires that, of cancellation fees paid in connection with the cancellation of a land conservation contract transmitted to the Controller, the 1st \$2,036,000 paid in the 2004–05 fiscal year shall be paid into the Soil Conservation Fund, which is available for specified purposes upon appropriation by the Legislature.

This bill would increase the amount to be paid into the Soil Conservation Fund from fees paid in the 2004–05 fiscal year to \$2,536,000.

(7) Existing law, contained in the bistate Tahoe Regional Planning Compact, among other things, establishes the Tahoe Regional Planning Agency, as a separate legal entity composed of a California and a Nevada delegation, each composed of members appointed by local entities and state officials, as prescribed. Existing law requires the agency to adopt all necessary ordinances, rules, and regulations to effectuate the long-term general plan for the development of the Lake Tahoe region, as described.

Existing law creates the California Tahoe Regional Planning Agency and requires the agency to annually submit a request for state funds to the Legislature.

This bill would, for purposes of the annual California budget process, require that the agency be provided a baseline adjustment equivalent to fund California's  $\frac{2}{3}$  share for any increase in employee compensation or cost-of-living adjustment, in the same manner as applied to state agencies.

(8) Existing law requires any person generating hazardous waste that is transported, or submitted for transportation, for offsite handling, treatment, storage, disposal, or any combination thereof, to complete a manifest prior to the time the waste is transported or offered for transportation and to submit the manifest to the Department of Toxic Substances Control. Existing law requires any person who transports hazardous waste in a vehicle to have a manifest in his or her possession. Existing law defines the term manifest for purposes of those provisions. A violation of the laws regulating hazardous waste is a crime.

This bill would define the term "California Uniform Hazardous Waste Manifest" as a manifest document printed by the State of California for a shipment initiated on and before September 4, 2006, or the Uniform Hazardous Waste Manifest printed by a source registered with the United States Environmental Protection Agency for a shipment initiated on or after September 5, 2006. The bill would specify the date for determining when a shipment is initiated and would make conforming changes with regard to the use of the Uniform Hazardous Waste Manifest.

The bill would impose a state-mandated local program by creating a new crime with regard to the use of a manifest.

(9) Existing law creates the Toxic Substances Control Account in the General Fund and requires that specified funds be deposited in that account, including the charge imposed on corporations handling hazardous materials. The funds deposited in the Toxic Substances Control Account are appropriated to the Department of Toxic Substances Control for specified purposes, including, among other things, the administration and implementation of the provisions governing hazardous substance response actions, railroad safety, emergency planning and response, unreimbursed removal and remedial action costs, for allocation to the Office of Environmental Health Hazard Assessment, and for the payment of the principal of, and interest on, bonds sold pursuant to the Johnston-Filante Hazardous Substance Cleanup Bond Act of 1984.

Existing law provides for the (A) Hazardous Substance Account in the General Fund, the (B) Hazardous Substance Clearing Account, which is used to pay the principal of, and interest on, those bonds, (C) the Hazardous Substance Cleanup Fund, in which the proceeds

of those bonds are deposited, and (D) the Superfund Bond Trust Fund, which is a sinking fund to ensure the payment of principal of, and interest on, those bonds.

This bill would make those accounts and funds specified in (A) to (D) above, inoperative on July 1, 2006, and would repeal those accounts and funds on January 1, 2007. The bill would provide that the Toxic Substances Control Account is the successor fund of those accounts and funds, and would provide that the assets, liabilities, and surplus of those accounts and funds be transferred to, and become a part of the Toxic Substances Control Account. The bill would require all appropriations from those repealed accounts and funds, to the extent encumbered, to continue to be available for the same purposes and periods from the Toxic Substances Control Account. The bill would make conforming changes with regard to the repeal of those accounts and funds and would delete obsolete provisions with regard to that bond act.

(10) Existing law requires the department to provide specified information annually with regard to certain expenditures made pursuant to the Toxic Substances Control Account, including oversight and implementation of remedial and removal actions.

This bill would also require the department to submit a report to the Governor and the Legislature on the prior fiscal year's expenditures from the account.

(11) The existing Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) requires 50% of the penalties collected pursuant to the hazardous waste control laws act be deposited in the Hazardous Substance Account, 25% are to be paid to the prosecuting office or the person who brought the action in the public interest, and 25% are required to be used to fund the activities of certain local health officers.

This bill would require the 50% of the penalties to be deposited in the Toxic Substances Control Account instead of the Hazardous Substance Account.

The bill, in conformance with the requirements of Proposition 65, would make a legislative finding and declaration that these changes would further the purposes of the act.

(12) Existing law requires the department, on or before November 1 of each year, to provide the State Board of Equalization with a schedule of codes that consist of the types of corporations that use, generate, store, or conduct activities in this state related to hazardous materials, as defined. Existing law imposes a tax upon those corporations and requires the revenues to be expended for response actions to hazardous substance releases. A violation of the hazardous waste control laws, including a failure to pay this tax, is a crime.

This bill, instead, would require the department to provide the board with a schedule of codes that consists of the types of organizations, as defined, that use, generate, store, or conduct activities in this state related to hazardous materials, as defined. The bill would impose the tax upon organizations that are not subject to the tax under existing law, thereby imposing a tax for purposes of Article XIII A of the California Constitution.

The bill would impose a state-mandated local program by creating a new crime with regard to the payment of the tax.

(13) Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission) to update the inventory of greenhouse gas emissions from all sources located in the state, as identified in a specified report and to perform related duties. Existing law requires the Secretary of the Resources Agency to establish a nonprofit public benefit corporation known as the California Climate Action Registry with prescribed functions relating to greenhouse gas emissions.

This bill would, on January 1, 2008, repeal these provisions. The bill would require the State Air Resources Board to prepare, adopt, and update that inventory of greenhouse gas emissions, as specified.

(14) Existing law requires the State Board of Forestry and Fire Protection to classify all lands within the state to determine areas in which the financial responsibility of preventing and suppressing fires is primarily the responsibility of the state. Existing law provides that the responsibility of preventing and suppressing fires in areas that are not classified as state responsibility areas is that of the local or federal government. Existing law authorizes a

county, with the concurrence of the Director of Forestry and Fire Protection and except as provided otherwise, to assume responsibility for the prevention and suppression of all fires on all land in the county, including land in state responsibility areas, as specified. Existing law authorizes the Department of Forestry and Fire Protection or the director to enter into a contract with a city, county, or other specified entity, for the department to provide fire prevention and suppression services, as specified.

This bill would require the department, on or before January 10 of each year, to provide a report to the Legislature regarding the department's increased fire prevention activities. The bill would require the report to include certain information, including the percentage of fire prevention activities that occurred in state responsibility areas, the percentage of fire prevention activities that occurred in counties where, pursuant to a contract with the department, the county has agreed to provide fire protection services in state responsibility areas within county boundaries on behalf of the department, the percentage of fire prevention activities that were undertaken pursuant to a contract with a local government for the department to provide local fire protection and emergency services, the percentage of fire prevention activities that occurred on other lands, and a listing of fire prevention performance measures that the department tracks annually, as specified.

(15) Under existing law, money in the Forest Resources Improvement Fund may be expended, upon appropriation, only for specified programs and purposes relating to forest resources, including state lands operated or demonstration state forests if those lands are managed so they produce revenue to offset the management costs, and to reimburse the General Fund for the costs of operation of state forests administered by the Director of Forestry and Fire Protection.

The bill instead would provide that money in the Forest Resources Improvement Fund may be expended, upon appropriation by the Legislature, only for the cost of operations associated with the management of state lands operated as demonstration state forests by the Department of Forestry and Fire Protection. The bill would require all money in the fund, in excess of the amount needed to support those operations, to be deposited in the General Fund.

(16) Under existing law, the Department of Parks and Recreation is required to operate, manage, and maintain units of the state park system. Existing law regulates the sale of surplus state property.

This bill would authorize the Director of the Department of Parks and Recreation to grant to the City of Malibu, subject to specified conditions, all of the rights, title, and interest of the State of California in an approximately 10.81-acre portion of the Malibu Bluffs unit of Malibu Lagoon State Beach, known as Malibu Bluffs Community Park in the County of Los Angeles. The bill would require that the real property conveyed be operated, maintained, and improved by the City of Malibu for park purposes. The bill would require Attorney General review and approval of the deposit of the net proceeds, as specified.

(17) Existing law, the Off-Highway Motor Vehicle Recreation Act of 2003, provides for the acquisition, operation, and funding of state off-highway vehicular recreation areas and trails. Specified taxes imposed upon the distribution of motor vehicle fuel and certain fees, fines, forfeitures, and reimbursements are required to be deposited in the Off-Highway Vehicle Trust Fund for allocation, upon appropriation by the Legislature, by the Off-Highway Motor Vehicle Recreation Commission.

All of the above provisions in existing law are to be repealed on January 1, 2007, except that the statute creating the commission is to become inoperative on July 1, 2007, and is to be repealed on January 1, 2008.

This bill would extend the January 1, 2007, repeal date until January 1, 2008, delete the July 1, 2007, inoperative date, and would extend a January 1, 2007, repeal date, currently applicable to the collection and disposition of certain related fees, to January 1, 2008. This bill would delete obsolete provisions regarding a 2004 Off-Highway Vehicle Fuel Tax study and report.

(18) Existing law, the Keene-Nejedly California Wetlands Preservation Act, authorizes the Department of Fish and Game and the State Coastal Conservancy to acquire interests in real property in furthering the public's interest in the protection, preservation, restoration, and enhancement of wetlands. Existing law provides that wetlands protection, preservation, restoration, and enhancement projects are eligible for funding from the Resources Account in the Energy and Resources Fund.

This bill would establish the Coastal Wetlands Fund in the State Treasury and would require the fund to be an interest-bearing fund administered by the Department of Fish and Game. The bill would prohibit the principal of the Coastal Wetlands Fund from being expended, and require it to be maintained, so that the interest earned on the fund would provide a continuous funding source for wetlands maintenance. The bill would provide that interest in the fund is available only upon appropriation in the annual Budget Act, and would require that 60% of the interest appropriated be allocated to the Department of Fish and Game for expenditure of coastal wetlands owned by the department, and the remaining 40% be allocated to the State Coastal Conservancy for expenditure in the form of grants for maintenance of coastal wetlands property owned by the state, a conservancy of the state, a local government agency, or a nonprofit organization, as specified. The bill would authorize the department and the conservancy to accept contributions to the Coastal Wetlands Fund, as specified.

(19) Existing law establishes the School Land Bank Fund, as a continuously appropriated fund, in order that the State Lands Commission, acting as the School Land Bank Trustee, may acquire real property or any interest in real property for the purposes of facilitating management of school lands for generating revenues. Existing law authorizes the trustee, in addition to the purchase price, to pay from the fund the costs and expenses attributable to the acquisition.

This bill would expand the purposes for which money from the fund may be used to include the expenses attributable to management and remediation efforts on state school lands, thereby making an appropriation.

(20) Under existing law, the California Coastal Commission has developed a public coastal access program. Existing law requires the commission and the State Coastal Conservancy to report annually to the Governor and the Legislature on progress in implementing the public coastal access program.

This bill would require that report to include progress in facilitating the acceptance of outstanding offers to dedicate and to identify new offers to dedicate, as specified.

(21) Existing law requires a person who purchases a new tire, as defined, on or after January 1, 2005, to pay a California tire fee of \$1.75 per tire, and requires a person who purchases a new tire on or after January 1, 2007, to pay a California tire fee of \$1.50 per tire. Existing law reduces the California tire fee to \$0.75 per tire on and after January 1, 2015.

This bill would delete the reduction of the California tire fee to \$1.50 per tire on and after January 1, 2007, and, instead, maintain the California tire fee at \$1.75 per tire until January 1, 2015.

(22) Existing law imposes a California tire fee amount on every person who purchases a new tire for use for prescribed purposes related to disposal and use of used tires. Existing law requires, until December 31, 2006, that an amount equal to \$0.75 per tire on which the tire fee is imposed be deposited in the Air Pollution Control Fund for use by the State Air Resources Board and the air pollution control districts and air quality management districts to fund programs and projects that mitigate or remediate air pollution caused by tires in the state, as specified. Existing law decreases that amount, commencing January 1, 2007, to an amount equal to \$0.50 per tire, and repeals the requirement that those amounts be deposited in the Air Pollution Control Fund on January 1, 2015.

This bill would repeal the requirement that the amount deposited in the Air Pollution Control Fund after January 1, 2007, be decreased to \$0.50, therefore continuing the deposit of an amount equal to \$0.75 per tire in that fund, until January 1, 2015.

(23) Under existing law, the Department of Water Resources operates the State Water Project and undertakes various activities to manage the state's water resources.

This bill would require the department to proceed with the construction of the South Delta Improvements Program, but would prohibit the department from commencing the operational phase of the program until the Director of Water Resources certifies, in writing, to the Legislature that the department has completed specified studies and that a prescribed environmental review includes specified matters.

(24) The California Bay-Delta Authority Act establishes the California Bay-Delta Authority in the Resources Agency. The act requires the authority and the implementing agencies to carry out programs, projects, and activities necessary to implement the Bay-Delta Program, defined to mean those actions that address the goals and objectives of the CALFED Bay-Delta Programmatic Record of Decision, dated August 28, 2000, or as it may be amended. The act designates specific state and federal agencies as implementing agencies for program elements established in the act, including designating the authority as the implementing agency for the science program element. The act requires the authority, with the advice of the director of the authority, to appoint a lead scientist to carry out specified duties under the act. The act, until January 1, 2008, authorizes the lead scientist of the authority to enter into contracts with scientific experts to conduct studies of delta fisheries, terminating no later than January 1, 2008.

This bill would require the Secretary of the Resources Agency to administer the contracts, grants, leases, and agreements under the act, excluding the contracts, grants, leases, and agreements that relate to the implementation of the ecosystem restoration program under the act, which the bill would require the Department of Fish and Game to administer. The bill would provide that the exercise of this authority by the secretary and the Department of Fish and Game is not subject to review or approval by the Department of General Services.

The bill would require the secretary to have the possession and control of all records, papers, equipment, supplies, contracts, leases, agreements, and other property connected with the administration of the act, or held for the benefit of the authority. The bill would require the secretary to provide staff support to the authority to assist the authority in exercising its duties under the act. The bill would require the Department of Forestry and Fire Protection to provide administrative support to assist the secretary in carrying out the duties assigned to the secretary under the bill's provisions.

The bill would require the Resources Agency to be the implementing agency for the science program element and, with the advice of the authority and the director of the authority, would require the secretary to appoint the lead scientist for the purposes of the act. The bill would authorize the secretary, instead of the lead scientist, to enter into a contract with scientific experts to conduct studies of delta fisheries and for carrying out the mission of the California Bay-Delta Program. The bill would extend that contracting authority until January 1, 2009.

(25) Existing law requires the California Bay-Delta Authority and certain implementing agencies to carry out programs, projects, and activities necessary to implement a prescribed Bay-Delta Program.

This bill would require the Secretary of the Resources Agency, in collaboration with the Secretary of Business, Transportation and Housing, to develop a strategic plan, with specified components, to achieve a sustainable Sacramento-San Joaquin Delta.

(26) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(27) The bill would declare that it is to take effect immediately, as an urgency statute.

Ch. 78 (AB 1805) Committee on Budget Local government: finances.

(1) Under the California Constitution, whenever the Legislature or a state agency mandates a new program or higher level of service on any local government, including school districts, the state is required to provide a subvention of funds to reimburse the local government, with specified exceptions. Under the California Constitution, when a mandate for which the costs of a local government except for a school district have been determined in a preceding fiscal year to be payable by the state, the Legislature is required to either appropriate, in the annual Budget Act, the full payable amount that has not been previously paid, or suspend the operation of the mandate for the fiscal year for which the annual Budget Act is applicable. Existing law imposes various duties on the Commission on State Mandates, with respect to the reimbursement of state-mandated local costs.

This bill would specify, with respect to that determination, that a mandate determined in a preceding fiscal year to be payable by the state means all mandates for which the commission adopted a statewide cost estimate during a previous fiscal year or that were identified as mandates by a predecessor agency to the commission, unless the mandate has been repealed or otherwise eliminated.

(2) Existing law authorizes counties, cities and counties, and cities to impose, among other criminal justice service fees, a fee upon local law enforcement agencies for costs incurred in processing and booking persons arrested by the agency and brought to the local facilities for booking or detention.

This bill would, instead, as of July 1, 2007, provide that counties, cities and counties, and certain cities may apply to the Controller to receive funding for local detention facilities and related equipment when an appropriation is made for that purpose. When an appropriation of \$35,000,000 is available, counties, cities and counties, and cities would be prohibited from collecting the fees authorized by current law. If the full appropriation is not available, the counties, cities and counties, and cities may collect a portion of the fees, as specified. This bill would also authorize counties, cities and counties, and cities to collect jail access fees for the cost of booking and processing persons arrested for nonfelony offenses, as specified, in addition to any funds received from the state appropriation.

(3) Existing law requires a redevelopment agency, for the 2004–05 and 2005–06 fiscal years, to make a specified payment to a county Educational Revenue Augmentation Fund (ERAF). Under existing law, each city, county, and city and county receives a Vehicle License Fee Adjustment Amount (VLFAA), as defined, for each fiscal year. Existing law reduces, for the 2004–05 and 2005–06 fiscal years, each entity's VLFAA by a specified amount, and requires that this amount be transferred to the county ERAF for allocation to school entities in the county. Existing law authorizes a county redevelopment agency that meets certain conditions to loan funds to the county to make a payment to the county ERAF, which payment is credited against that portion of the county's VLFAA that is required to be transferred to the county ERAF for the 2004–05 and 2005–06 fiscal years. Existing law requires a county to repay these loans, with interest, to the redevelopment agency within 3 fiscal years.

This bill would authorize a redevelopment agency and a county, by mutual agreement, to modify these loan agreements to provide for a repayment period that extends through the 2020–21 fiscal year and to provide that specified county payments offset the county's loan repayment obligation.

(4) The Vehicle License Fee Law establishes, in lieu of any ad valorem property tax upon vehicles, an annual license fee for any vehicle subject to registration in this state. Under that law, amounts collected as a result of procedures developed for greater compliance with vehicle license fee laws are required to be deposited in the Vehicle License Collection Account of the Local Revenue Fund, which is a continuously appropriated fund. If revenues in this account exceed \$14,000,000 in any fiscal year, existing law requires that these revenues exceeding \$14,000,000 be allocated to cities and cities and counties, as specified.

This bill would require that moneys in this account that exceed \$14,000,000 for the 2004–05 fiscal year and each fiscal year thereafter be allocated among cities, cities and

counties, and counties based upon population, as provided. By requiring that moneys in this account from a continuously appropriated fund be additionally allocated to counties, this bill would make an appropriation.

(5) Existing law imposes a \$4 fee for the issuance or renewal of identification for each off-highway motor vehicle that is subject to identification. Beginning January 1, 2006, existing law requires the Controller to allocate proceeds from this fee to cities, counties, and cities and counties based upon the proportional off-highway motor vehicle usage estimates within each city, county, and city and county, as specified.

This bill would, for these fees that were collected before January 1, 2006, and that have not been allocated as of the operative date of this bill, require the Controller, on or before June 30, 2007, to allocate proceeds from these fees to counties, cities and counties, and cities based upon population, as specified.

(6) Under the California Constitution, whenever the Legislature or a state agency mandates a new program or higher level of service on any local government, including school districts, the state is required to provide a subvention of funds to reimburse the local government, with specified exceptions. Existing law establishes a procedure for local governmental agencies to file a test claim for reimbursement of these costs with the Commission on State Mandates.

This bill would require the commission to reconsider its statement of decision and parameters and guidelines for specified mandates relating to peace officers and firefighters. It would require the Department of Industrial Relations, in consultation with the Department of Finance, to submit relevant information to the commission for purpose of these reconsiderations.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 79 (AB 1802) Committee on Budget Education: programs: finance. <sup>3</sup>

(1) Existing law requires a revenue limit to be calculated for each county superintendent of schools, and requires the revenue limit to be adjusted for various factors and to be reduced, as specified. Existing law further reduces the revenue limit for the 2005–06 and 2006–07 fiscal years by a deficit factor of 0.898%.

This bill would delete the reduction of the revenue limit for the 2006–07 fiscal year.

(2) Existing law designates a source of funds and requires the State Allocation Board to expend those funds, up to a specified maximum amount, for the acquisition of portable school and classroom buildings.

This bill would authorize the board to allocate any amount of those funds that is in excess of the amounts needed for the administration of those provisions to any of several specified state funds related to school facilities.

(3) Existing law provides specified funding for eligible pupils, as defined, who are required to pass the high school exit examination, to be used for intensive instruction and services for those pupils. Existing law provides that, for the 2005–06 fiscal year, an eligible pupil does not include a pupil who receives services related to passage of that examination pursuant to a specified statute. Existing law requires the Superintendent of Public Instruction to rank schools on the basis of the percentage of eligible pupils and to apportion \$600 per eligible pupil to school districts on behalf of those ranked schools until the funds are exhausted.

This bill would, instead, require the Superintendent to determine and apportion to each school district a per pupil rate of funding for pupils enrolled in grade 12, as specified. The bill would require the Superintendent, if the funds are not exhausted after the apportionment for pupils in grade 12, to determine and apportion to each school district a per pupil rate of funding for pupils enrolled in grade 11, as specified. The bill would provide that the per pupil rate for either of grades 11 or 12 may not exceed \$500. The bill would provide that the amount per eligible pupil be increased annually by the percentage determined pursuant to

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

a specified provision. The bill would delete the provision regarding an eligible pupil not including a pupil who receives specified services.

(4) Existing law requires, for the 1990–91 fiscal year and each fiscal year thereafter, that moneys to be applied by the state for the support of school districts and community college districts be distributed in accordance with certain calculations governing the proration of those moneys among the 3 segments of public education. Existing law makes this provision inapplicable to the fiscal years between the 1992–93 and 2005–06 fiscal years, inclusive.

This bill would, in addition, make this provision inapplicable to the 2006–07 fiscal year.

(5) Existing law requires the county superintendent of schools to determine a revenue limit for each school district in the county. Existing law requires the base revenue limit for a fiscal year to be determined by adding to the base revenue limit for the prior fiscal year certain amounts.

This bill would require a specified equalization adjustment to be added for the 2006–07 fiscal year.

(6) Existing law requires a revenue limit to be calculated for each school district and each county superintendent of schools and requires the amount of the revenue limit to be adjusted for various factors.

This bill would, for the 2006–07 fiscal year, require the Superintendent to compute an equalization adjustment for each school district so that the prior year base revenue limit per unit of average daily attendance of a school district is not less than the prior year base revenue limit per unit of average daily attendance above which fall not more than 10% of the total statewide units of average daily attendance for the appropriate size and type of school district.

The bill would appropriate \$200,000,000 from the General Fund to the Superintendent for the 2006–07 fiscal year for the purposes of this equalization, to be allocated to school districts on a prorated basis. The bill would provide that for the purposes of making the computations required by Section 8 of Article XVI of the California Constitution, these amounts are General Fund revenues appropriated for school districts for the 2006–07 fiscal year.

(7) Existing law requires, for the 2005–06 and 2006–07 fiscal years, the revenue limit for each school district to be reduced by a deficit factor of 0.892%. Existing law requires the revenue limit computation for the 2007–08 fiscal year to be made as if the revenue limits for the 2003–04, 2004–05, 2005–06, and 2006–07 fiscal years had been determined without being reduced.

This bill would delete the requirement to reduce the revenue limit for a school district for the 2006–07 fiscal years by a 0.892% deficit factor, and would require the revenue limit computation for the 2006–07 fiscal year to be made as if the revenue limits for the 2003–04, 2004–05, and 2005–06 fiscal years had been determined without being reduced.

(8) Existing law authorizes the Committee of Credentials to conduct an initial review, as provided, regarding an allegation of misconduct of an applicant for, or holder of, a credential. Existing law requires a formal review to be held no later than 6 months after the commencement of the initial review and requires the committee to make its recommendation in writing and to deliver a copy of the recommendation to the credentialholder or applicant personally or sent to him or her by mail within 14 days after the formal review.

This bill would instead require that the mailing of a copy of the recommendation to the credentialholder or applicant, if applicable, be done by certified mail, as specified.

(9) Existing law requires an applicant, as defined, seeking a credential, who is subject to investigation by the Committee of Credentials, to receive notice of the investigation and an opportunity to respond to the allegations in writing. Existing law requires a summary of the alleged misconduct and any response from the applicant, as defined, to be presented to the Committee of Credentials. Existing law requires the Committee of Credentials to grant or recommend denial of the application based on the information discovered during the investigation and the response of the applicant, if any. Existing law authorizes the applicant to appeal the recommendation of the committee to deny the application.

This bill would repeal those provisions.

(10) Existing law authorizes the county superintendent of schools of each county, with the consent of the State Board of Education, to establish and maintain, or with one or more counties to establish and maintain, a regional occupational center or regional occupational program to provide education and training in career technical courses.

This bill would establish the Supplemental School Counseling Program and require the governing board of a school district that maintains any of grades 7 to 12, inclusive, as a condition of receiving funds appropriated for purposes of that program, to adopt a counseling program at a public meeting that includes, among other things, a provision for a counselor to meet with each pupil, as specified, to explain the academic and department records of the pupil, his or her educational options, the coursework and academic progress needed for satisfactory completion of middle or high school, and the availability of career guidance activities. The bill would provide that the educational options explained at the meeting may include vocational programs, including regional occupational centers and programs. The bill would require that a school district that adopts a program pursuant to that authority to assign first priority for counseling services to pupils who have failed the high school exit examination, are at risk of failing the examination, or are not earning credits at a rate that will enable them to graduate from high school with their class. The bill would require that funds appropriated in the annual Budget Act for purposes of that program be allocated to school districts according to specified criteria.

(11) Existing law increases the reimbursement a school receives for free and reduced price meals sold or served to pupils in elementary or middle schools to \$0.23, contingent upon the appropriation of moneys on or before January 1, 2004, for that purpose. Existing law provides that each elementary and middle school shall receive a reimbursement of \$0.10 for meals sold at full price.

This bill would, instead, increase the reimbursement for free and reduced price meals to \$0.21 and would delete the provision that makes the increase contingent upon the appropriation of moneys for that purpose. The bill would delete the provision regarding reimbursement for meals sold at full price.

(12) Existing law authorizes the allocation of economic impact aid funding to support educationally disadvantaged youth programs and bilingual education. Existing law provides that those provisions become inoperative on June 30, 1987.

This bill would repeal and replace the existing provisions regarding the calculation and allocation of economic impact aid to require the Superintendent to determine an economic impact aid-eligible pupil count and calculate an amount of economic impact aid for each school district for the 2006–07 fiscal year and each fiscal year thereafter, as specified. The bill would delete that inoperative date with regard to those provisions. The bill would, in addition to the calculation and allocation of economic impact aid, require the Superintendent to calculate and allocate a supplemental adjustment for the 2006–07 fiscal year and to add to the economic impact aid per pupil amount for the 2007–08 fiscal year, as specified.

(13) Existing law provides for the calculation and allocation of additional funds to supplement the economic impact aid for a limited number of school districts with high concentrations of limited- and non-English-speaking pupils and pupils in poverty to ensure funding for appropriate educational services.

This bill would repeal those provisions.

(14) Existing law adjusts funding for individuals with exceptional needs based on an incidence multiplier, as defined, for each special education local plan area.

This bill would continue the current special education incidence factor formula through the 2006–07 fiscal year.

(15) Existing law requires the State Department of Education to administer an extraordinary cost pool to protect special education local plan areas from the extraordinary costs associated with single placements in nonpublic, nonsectarian schools, as specified.

This bill would recast that provision and authorize special education local plan areas to submit claims for the costs of special education and related services for pupils who reside in licensed children's institutions.

(16) Existing law requires the State Department of Education and the California State University to enter into an interagency agreement under which the Center for the Study of Correctional Education, would provide technical assistance to the department regarding compliance with state and federal laws and regulations regarding special education at the Department of the Youth Authority. Existing law requires the department, by December 1, 2006, to submit a report to the Legislature on the usefulness of the services received from the center pursuant to the interagency agreement. Existing law provides that these provisions become inoperative on January 1, 2007, and repeals them on that date.

This bill would extend those inoperative and repeal dates to July 1, 2007.

(17) Existing law establishes the State Nursing Assumption Program of Loans for Education (SNAPLE), administered by the Student Aid Commission, under which any person enrolled in an institution of postsecondary education and participating in that loan assumption program is eligible to receive a conditional warrant for loan assumption, to be redeemed upon becoming employed as a full-time nursing faculty member at a California college or university.

The existing SNAPLE act establishes, among other things, eligibility requirements, including the receipt of a graduate degree from an accredited, participating institution before loan assumption payments may be made, limits each participant in the program to one loan assumption agreement, and provides for a progressive assumption of the amount of the loan over 3 consecutive years of teaching, up to a total loan assumption of \$25,000. The existing SNAPLE act requires the commission to report annually to the Legislature, and states the intent of the Legislature that, commencing with the 2006–07 fiscal year, funding necessary for the administration of the program shall be included within the annual budget of the commission.

This bill would amend the SNAPLE act to authorize the award of loan assumption agreements under the program to undergraduate students and to authorize the making of loan assumption payments to applicants who have taught on a part-time basis for the equivalent of 3 full-time academic years. The bill would authorize the extension of the term of a loan assumption agreement if a natural disaster prevents a program participant from completing one of the years of required teaching service.

(18) Existing law establishes the Student Aid Commission as the primary state agency for the administration of state-authorized student financial aid programs available to students attending all segments of postsecondary education. Existing law establishes the Public Interest Attorney Loan Repayment Program, under the administration of the commission, as a student loan repayment program for licensed attorneys who practice or agree to practice in public interest areas of the law, as defined, and who meet other designated criteria. Under the program, the Public Interest Attorney Loan Repayment Endowment Account, consisting of funds appropriated by the Legislature for the program and private contributions to the program, is established in the State Treasury. Existing law authorizes the Treasurer to invest, reinvest, manage, contract, sell, or exchange money in the account, as specified.

This bill would require the commission to submit an annual written report to the Legislature, including specified data, regarding the program. The bill would delete the provisions establishing the Public Interest Attorney Loan Repayment Endowment Account and authorizing the Treasurer to invest, reinvest, manage, contract, sell, or exchange money in the account. The bill would make various nonsubstantive technical and conforming revisions in provisions relating to the program.

(19) Existing law requires the governing board of each community college district to charge each student a fee of \$26 per unit per semester, effective with the fall term of the 2004–05 academic year.

This bill would reduce that fee to \$20 per unit per semester, effective with the spring term of the 2006–07 academic year.

(20) Existing law establishes the California State University under the administration of the Trustees of the California State University. Existing law requires the chief fiscal officer of the university to deposit and maintain in trust accounts specified moneys that the university receives.

This bill would require the chief fiscal officer of the university to deposit and maintain in these trust accounts moneys collected, pursuant to a provision of existing law that authorizes the trustees to require persons to pay fees, rents, deposits, and charges for services, facilities, or materials provided by the trustees to these persons, as a higher education fee or other income from students of any campus of the university, or from other persons. The bill would grant the Controller the authority to audit the expenditure of those fees and income.

(21) This bill would appropriate \$388,283,000 from the General Fund to the State Department of Education for expenditure during the 2007–08 fiscal year according to a specified schedule. The bill would provide that for purposes of satisfying the minimum annual funding obligation for school districts and community college districts required under the California Constitution, those funds are General Fund revenues appropriated for school districts.

(22) This bill would appropriate \$200,000,000 to the Board of Governors of the California Community Colleges for apportionments to community college districts, for expenditure during the 2007–08 fiscal year, to be expended in accordance with the requirements specified in a schedule of a local assistance appropriation for community colleges in a prescribed item of the Budget Act of 2006. The bill would provide that the amount of this appropriation would be applied, as specified, for the 2007–08 fiscal year, for the purposes of the minimum funding requirement for school districts and community college districts in Section 8 of Article XVI of the California Constitution.

(23) This bill would make specified funds appropriated pursuant to the Budget Act of 2006 available for liquidation through July 31, 2009. The bill would revert the funds unexpended after that date to the Proposition 98 Reversion Account.

(24) Existing law, commencing with the 2006–07 fiscal year, annually appropriates \$150,000,000 from the General Fund to the Controller for allocation to school districts and community college districts for the purpose of discharging in full the outstanding balance of the state minimum funding obligation to school districts and community college districts, as provided.

This bill, notwithstanding that provision, would provide that \$16,811,000 of the funds appropriated in a specified statute and \$133,189,000 appropriated in this bill are in lieu of the \$150,000,000 that would have otherwise been appropriated for the 2006–07 fiscal year and that specified amounts appropriated in this bill are in lieu of the \$150,000,000 that would have otherwise been appropriated for the 2007–08 fiscal year.

(25) This bill would provide that the cost-of-living adjustment for specified items of the Budget Act of 2006 is 5.92%, and that all funds appropriated in those items are in lieu of the amounts that would otherwise be appropriated pursuant to any other law.

(26) This bill would appropriate \$350,000,000 from the General Fund to the Superintendent for the 2006–07 fiscal year for purposes of a specified provision to be allocated to school districts on a prorated basis. The bill would provide that for purposes of satisfying the minimum annual funding obligation for school districts required under the California Constitution, those funds are General Fund revenues appropriated for school districts for the 2006–07 fiscal year.

(27) This bill would appropriate \$2,305,695,000 from the General Fund for the 2005–06 fiscal year according to a specified schedule. The bill would provide that for purposes of satisfying the minimum annual funding obligation for school districts and community college districts required under the California Constitution, those funds are General Fund

revenues appropriated for school districts and community college districts for the 2005–06 fiscal year.

(28) This bill would appropriate \$283,189,000 from the General Fund for transfer to the Controller to pay claims, including interest, for the reimbursement of costs mandated by the state submitted by school districts, county offices of education, and community college districts for the 1995–96 to 2004–05 fiscal years, inclusive, according to a specified order of priority. The bill would provide that for purposes of satisfying the minimum annual funding obligation for school districts and community college districts required under the California Constitution, those funds are General Fund revenues appropriated for school districts and community college districts for specified fiscal years.

(29) This bill would make other technical, clarifying, and conforming changes.

(30) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 80 (AB 1203) Mullin Manufactured housing: sales.

Existing law, the Mobilehomes-Manufactured Housing Act of 1980, sets forth conditions and requirements regarding the transaction by or through a dealer to sell or lease with the option to buy a new or used manufactured home or mobilehome.

This bill would set forth requirements applicable only to the sale of a new or used manufactured home or multiunit manufactured housing or used mobilehome sold by a dealer and to be installed by the buyer on a foundation system, as specified. The bill would deem the sale of these homes to be complete at the close of escrow and would deem escrow to be closed when a prescribed document containing a declaration of delivery sale and specifying the expiration date of the manufacturer's warranty is executed, all funds in the escrow accounts are disbursed, and the buyer takes delivery of the home.

#### Ch. 81 (AB 1781) Mountjoy Highways: victim signs.

Existing law requires, until January 1, 2007, that the Department of Transportation design, place, and maintain, or cause to be designed, placed, and maintained, "Please Don't Drink and Drive" signs on state highways in memory of accident victims killed in accidents involving another party who was convicted of drunk driving or various other offenses and in certain other cases, if such a sign is requested or consented to by a family member of the accident victim and the requester pays a fee to cover the department's costs, as specified.

This bill would delete the January 1, 2007, sunset date for this program, thereby extending the program indefinitely.

#### Ch. 82 (AB 1787) Cohn Protective orders: service.

Existing law authorizes the courts to issue emergency protective orders protecting victims from domestic violence. Existing law provides the procedure for the issuance and service of the protective order.

This bill would provide that an emergency protective order is valid only if it is issued by a judicial officer after making specified findings and pursuant to a specific request by a law enforcement officer.

#### Ch. 83 (AB 1834) Garcia The California Date Commission.

Existing law establishes in state government the California Date Commission, the members and alternate members of which are individuals or partners who have, or are, employees representing a handler who has a financial interest in handling dates for market. Existing law specifies the length of the term of office of all members and alternates and specifies that their terms of office shall be limited to 4 consecutive terms.

This bill would remove provisions that limit the term of office of each member and alternate member of the commission to 4 consecutive terms.

#### Ch. 84 (AB 2042) Spitzer Trustees: removal.

Existing law sets forth the grounds for the removal of a trustee by the court.

This bill would expand the grounds for the removal of a trustee specifically to authorize removal by the court if the trustee is substantially unable to manage the trust's financial resources or is otherwise substantially unable to execute properly the duties of the office or the trustee is substantially unable to resist fraud or undue influence.

Ch. 85 (AB 2083) Vargas Emergency medical services: automatic external defibrillators.

Existing law, the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act, permits each county to establish an emergency medical services program under which the county is required to designate a local emergency medical services agency (EMS agency). The act authorizes the local EMS agency to implement a trauma care system if the system meets the minimum standards set forth in the regulations established by the Emergency Medical Services Authority and the authority has approved a plan.

Existing law authorizes the authority to establish minimum training and other standards for the use of automatic external defibrillators and requires persons or entities that acquire the defibrillators to comply with maintenance, testing, and training requirements, which are scheduled to change on January 1, 2008. Existing law, until January 1, 2008, provides immunity from civil damages for those persons or entities, and sets forth tenant notice and other requirements for building owners in which an AED is placed.

This bill would extend the January 1, 2008, termination date of these provisions to January 1, 2013.

Ch. 86 (AB 2126) Lieu Enforcement of judgments.

(1) Existing law provides that certain types of relief may not be granted in a limited civil case, including enforcement of an order under the Family Code.

This bill would remove the enforcement of an order under the Family Code from the listed types of relief that may not be granted in a limited civil case.

(2) Under existing law, a judgment or order for possession or sale of property made or entered pursuant to the Family Code is subject to a specified period of enforceability and a procedure for renewal. Existing law also provides that a judgment for child, family, or spousal support is enforceable until paid in full and is exempt from any requirement that judgments be renewed, but may be renewed as specified.

This bill would revise and recast these provisions to provide, instead, that a money judgment or judgment for possession or sale of property that is made or entered under the Family Code, including a judgment for child, family, or spousal support, is enforceable until paid in full or otherwise satisfied. The bill would provide that these judgments are exempt from any requirement that a judgment be renewed, but may be renewed as specified.

(3) The bill would require the Judicial Council, on or before January 1, 2008, to develop self-help materials that include a description of the remedies available for enforcement of a judgment under the Family Code, and practical advice on how to avoid disputes relating to the enforcement of a support obligation.

Ch. 87 (AB 2164) La Suer Local law enforcement: supplemental services.

Existing law authorizes the county board of supervisors on behalf of the sheriff, and the legislative body of any city on behalf of the chief of police, to contract to provide supplemental law enforcement services to private individuals, private entities, and private corporations in specified circumstances and subject to certain conditions. Among those conditions are that the contract services provided shall be rendered by regularly appointed full-time peace officers, as defined.

This bill would additionally provide that services provided in connection with special events or occurrences, as specified, may be rendered by Level I reserve peace officers, as defined, who are authorized to exercise the powers of a peace officer, if there are no regularly appointed full-time peace officers available to fill the positions as required by the contract.

Ch. 88 (AB 2236) Ruskin Los Trancos County Water District.

(1) Existing law, the Bay Area Water Supply and Conservation Agency Act, governs the formation and operation of the Bay Area Water Supply and Conservation Agency. That act authorizes the agency to acquire water and water rights, develop, store, transport, and deliver water, and acquire, construct, operate, and maintain facilities on behalf of San Francisco's regional water system. That act requires each member public entity, which includes Los Trancos County Water District, to appoint one member to the board of the agency. That act authorizes the agency to impose assessments on each member public entity and certain private entities to pay the operating expenses of the agency in an amount that reflects prescribed water delivery amounts received from San Francisco.

This bill would delete Los Trancos County Water District from the list of member public entities for the purposes of that act. The bill would delete a reference to those water delivery amounts received by Los Trancos County Water District and revise those amounts specified for the California Water Service Company.

(2) Existing law, the San Francisco Bay Area Regional Water System Financing Authority Act, establishes the San Francisco Bay Area Regional Water System Financing Authority and grants certain powers and duties to the authority, including the authority to issue revenue bonds to improve the reliability of San Francisco's regional water system. That act defines the members of the authority to include Los Trancos County Water District.

This bill would delete Los Trancos County Water District from the list of members of the authority.

Ch. 89 (AB 2257) Committee on Business and Professions Psychologists: records retention.

Existing law, the Psychology Licensing Law, provides for the licensure and regulation of the practice of psychology. A violation of that law is a crime.

This bill would require a licensed psychologist to retain a patient's health service records for a minimum of 7 years from the patient's discharge date, and would also require a minor patient's health service records to be retained for a minimum of 7 years from the date the patient reaches 18 years of age. Because a violation of the bill would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 90 (AB 2439) Klehs Taxation: refunds: direct deposit.

The Personal Income Tax Law imposes taxes on taxable income and is administered by the Franchise Tax Board. Existing law authorizes the Franchise Tax Board to electronically deposit a taxpayer's refund into the taxpayer's checking or savings account.

This bill would authorize the Franchise Tax Board to allow an individual taxpayer to request that his or her refund be electronically deposited into more than one checking or savings account.

Ch. 91 (AB 2559) Benoit Vehicles: driving under the influence: manslaughter.

Existing law defines as one type of vehicular manslaughter, the unlawful killing of a human being while driving a vehicle in violation of specified driving under the influence of alcohol or drugs (DUI) provisions and in the commission of an unlawful act, not amounting to a felony, but without gross negligence. Existing law defines as another type of vehicular manslaughter, the unlawful killing of a human being while driving a vehicle in violation of those specified DUI provisions and in the commission of a lawful act that might produce death, in an unlawful manner, but without gross negligence.

This bill would require the killing to be the proximate result of the commission of the unlawful act or the proximate result of the commission of the lawful act.

This bill would also reorganize the provisions relating to vehicular manslaughter, including provisions relating to manslaughter involving vessels and specified water devices.

Ch. 92 (AB 2615) Tran Information relating to victims of sex offenses.

Current law provides that the victim of a sex offense may request that his or her name and address not be a matter of public record. Current law further provides that the name of a person who is the victim of a sex offense may be disclosed to certain law enforcement officials for the purpose of conducting official business even if the victim requested to keep his or her name and address confidential.

This bill would add county probation officers to the list of law enforcement officials who may obtain the name and address of a victim of a sex offense for the purpose of conducting official business as specified.

Ch. 93 (AB 2648) Matthews Pesticides.

Existing law authorizes the Director of the Department of Pesticide Regulation to rely upon any evaluations of previously submitted data with respect to an application for registration, an amendment to a registration, or to maintain a registration of a registered pesticide if certain criteria are met including that the applicant either obtain written permission from the owner to rely on the data or irrevocably offer to pay the owner a share of the cost of producing the data, as specified.

This bill would make technical-clarifying amendments to those provisions.

Ch. 94 (AB 2705) Spitzer Victims of crime: information card.

Existing law provides for the rights of victims of crime, as specified.

This bill would provide that whenever there has been a crime committed against a victim, the law enforcement officer assigned to the case may provide the victim of the crime with a "Victim's Rights Card," as specified. The bill would provide that its provisions shall be operative in a city or county only upon the adoption of a resolution by the city council or board of supervisors to that effect and that any act or omission covered by this section is a discretionary act, as specified.

Ch. 95 (AB 2885) Plescia Medi-Cal: benefits: prescribed drugs.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

Existing law establishes a schedule of benefits that are covered under the Medi-Cal program, including outpatient services that include the purchase of prescription drugs subject to the Medi-Cal List of Contract Drugs and utilization controls.

This bill would specify that drugs used to treat erectile dysfunction or any off-label uses of those drugs are covered benefits only to the extent that federal financial participation is available. The bill would authorize the department to implement these provisions by provider bulletins or similar instructions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 96 (AB 886) Committee on Business and Professions Human remains: disposition.

Existing law provides that specified persons who otherwise have the right to control the disposition of a decedent's remains and arrange for funeral goods and services fail to act or cannot be found within 7 days of the death, or in the case of a competent surviving spouse who fails to act or cannot be found within 10 days of the death, the right to control the

disposition shall pass to the next person or persons in accordance with the order of succession provided by statute.

This bill would instead provide that if the person or persons who have the right to control the disposition of a decedent's remains and arrange for funeral goods and services fail to act or cannot be found within 7 days from the date when this right devolves to the person or persons, or in the case of a competent surviving spouse within 10 days of when the right devolves to him or her, the right shall pass to the next person in accordance with the order of succession provided by statute.

**Ch. 97 (AB 1708) DeVore State employees.**

Existing law requires the Director of the Department of Personnel Administration to determine the fair and reasonable value of maintenance, living quarters, housing, lodging, board, meals, food, household supplies, fuel, laundry, and other services furnished by the state as an employer of its employees. Existing law provides that the value so determined constitutes the charges to be made to the state employees for any such maintenance or services furnished by the state, unless the employee is entitled to these benefits as compensation for his or her services or as actual and necessary expenses incurred in the performance of the state's business.

This bill would revise that provision to specify that the director shall determine, by rule, the fair and reasonable value of these items and services. The bill would further require the director, by rule, to provide instruction for the administration of all lodging, maintenance, and other services furnished by the state as an employer to its employees. The bill would also specify that compliance with all the rules associated with these services is the responsibility of each director of each state department possessing lodging or supplying maintenance or other services to its employees. The bill would make other related changes to that provision.

**Ch. 98 (AB 1893) Salinas Redevelopment.**

Existing law prohibits a redevelopment agency from using tax increment funds for the construction or rehabilitation of a city hall or county administration building.

This bill would extend this prohibition to the acquisition of land upon which a city hall or county administration building is to be constructed, and related site clearance and design costs.

**Ch. 99 (AB 1907) Lieu Office of Child Abuse Prevention: multidisciplinary personnel.**

Under existing law, the Office of Child Abuse Prevention is established in the State Department of Social Services. The office is authorized to allocate funding for child abuse treatment and prevention projects, including multidisciplinary services. Existing law defines "multidisciplinary personnel" for purposes of child abuse prevention services as a team of 3 or more persons trained in the prevention, identification, and treatment of child abuse and neglect cases and who are qualified to provide a broad range of services related to child abuse. Under existing law, a multidisciplinary personnel team may include, among others, psychiatrists, psychologists, and other trained counseling personnel.

This bill would revise the definition of multidisciplinary personnel to include marriage and family therapists.

**Ch. 100 (AB 1994) Leslie Health records: minors: access.**

Existing law, with specified exceptions, authorizes any adult patient of a health care provider, any minor patient authorized by law to consent to medical treatment, and any patient representative, to be entitled to inspect patient records, upon presenting to the health care provider a written request for those records, and payment of reasonable clerical costs incurred in locating and making the records available. Under existing law, the representative of a minor patient is not entitled to inspect or obtain copies of the minor's patient records under certain circumstances, including when the minor's health care provider determines

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

that access to the requested patient records would be detrimental to the provider's professional relationship with the minor patient or the minor's physical safety or psychological well-being. Existing law exempts the health care provider from liability for making the decision as to whether the minor's records are available for inspection, except in cases of bad faith.

This bill would specify that the exemption from liability would also apply with respect to a health care provider's decision whether to make the minor patient's records available for copying.

**Ch. 101 (AB 2007) Nava Education finance: Montecito Union Elementary School District.**

Existing law provides for apportionments to school districts based on average daily attendance computations.

This bill would require that, notwithstanding any other law, the average daily attendance for the 2nd principal apportionment for the 2003–04 fiscal year for the Montecito Union Elementary School District is 95.51% of the district's October 2003 California Basic Educational Data System enrollment. The bill would specify how that percentage was determined.

The bill would specify, for the purposes of apportionments based upon annual units of average daily attendance, that the 2003–04 annual units of average daily attendance for the Montecito Union Elementary School District equal the same number of average daily attendance units as its 2nd principal apportionment for the 2003–04 fiscal year.

This bill would declare that due to the unique circumstances relating to the Montecito Union Elementary School District, a general statute cannot be made applicable.

This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 102 (AB 2056) Aghazarian Public health: exposure to communicable diseases.**

Existing law requires prehospital emergency medical care personnel, as defined, who have provided emergency medical or rescue services and have been exposed to a person afflicted with a disease or condition listed as reportable, which can, as determined by the county health officer, be transmitted through oral contact or secretions of the body, including blood, to be notified that they have been exposed to the disease, in accordance with specified procedures.

Existing law separately provides that the blood or other potentially infectious material of a person receiving health care services that has been the source of a significant exposure to an individual, including, but not limited to, a health care provider, or first responder, may be tested and the exposed individual may be informed of the communicable disease status of that patient if certain conditions are met.

This bill would make technical clarifying amendments to the above provisions.

**Ch. 103 (AB 2091) Berg The Coast Life Support District Act: district powers.**

Existing law establishes the Coast Life Support District, which defines the district's boundaries, specifies the election of a board of directors, and its powers as well as the purposes and powers of the district. The powers of the district include, the right to establish, impose and collect fees.

This bill would authorize the district's board of supervisors to charge a fee to cover the cost of any service that the district provides or the cost of enforcing any regulation for which the fee is charged. This bill would also allow the district's board of directors to charge residents or taxpayers of the district a lower fee than it charges nonresidents or nontaxpayers, and would allow the district's board of directors to waive any fee by adoption of a resolution.

This bill would state the findings and declarations of the Legislature concerning the need for special legislation.

**Ch. 104 (AB 2136) Vargas Insurance: military service.**

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law provides that an insurer shall not be prohibited from limiting the issuance or renewal of automobile liability insurance to persons who engage in or have engaged in military service or their families, as specified.

This bill would expand the definition of “military service” as used in these provisions to specifically include officers, warrant officers, and enlisted persons.

Ch. 105 (AB 2403) DeVore Large family day care homes: permits.

The California Child Day Care Facilities Act provides for the licensing and regulation of child day care facilities, including family day care homes, by the State Department of Social Services. The act prohibits a city, county, or city and county from prohibiting large family day care homes on lots zoned for single-family dwellings, but requires a city, county, or city and county to either (1) classify large family day care homes as a permitted use of residential property for zoning purposes, (2) grant a nondiscretionary permit to use a lot zoned for a single-family dwelling to any large family day care home that complies with certain local ordinances, or (3) require any large family day care home to apply for a permit to use a lot zoned for single-family dwellings. Under the 3rd possible action by a city, county, or city and county, the act requires the permit to be granted if the large family day care home complies with certain local ordinances and the local government is required to process the permit as economically as possible, with fees charged for review not to exceed the costs of the review and permit process.

This bill, with respect to the 3rd possible action, would require the local government, upon request, to provide an applicant with a written fee verification, within 45 days of the applicant’s request. The bill would, beginning July 1, 2007, require that the application form for large family day care permits include a statement of the applicant’s right to request the written fee verification.

This bill would, with respect to the 2nd and 3rd possible action, require a city, county, or city and county, upon the request of an applicant, to provide prescribed information on the permit process and permit fees.

By imposing additional requirements upon local agencies, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 106 (AB 2457) Nakanishi Contractors.

The Contractors’ State License Board licenses and regulates contractors. Under existing law, the board is required to report certain statistical information to the Legislature annually, including violations of specified provisions relating to home improvement contracts.

The bill would change the information on which the board is required to report.

Existing law requires certain persons to register as a home improvement salesperson, as defined, and makes it a crime for a person to engage in the occupation without being registered. Existing law exempts from the registration requirement, among others, a corporate officer of a licensee and a qualifying person, as defined.

This bill would also exempt from registration a general partner of a licensee and would make the exemption, as it applies to such a general partner or a corporate officer or qualifying person, applicable only in specified circumstances. By changing the scope of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason. The bill would make other nonsubstantive changes.

Ch. 107 (AB 2602) Lieu Real estate brokers: deposits.

Under existing law, a real estate broker, who accepts funds belonging to others, is required to deposit those funds into a specified trust fund account. However, existing law also provides that benefits accruing from the placement in a noninterest bearing account of a commercial bank of funds received by a real estate broker who collects payments or provides services in connection with certain loans shall inure to the broker, unless otherwise agreed by the broker and lender.

This bill would instead provide that those benefits shall inure to the real estate broker if they are derived from the placement of those funds in a noninterest bearing account of a financial institution, as defined. The bill would also provide that benefits accruing from the placement in an interest bearing account of a financial institution of funds received by a real estate broker who collects payments or provides services for an institutional investor in connection with a loan secured by commercial real property may inure to the broker, if agreed to in writing by the broker and investor.

Ch. 108 (AB 2684) Montanez Pupils: insurance for athletic teams.

Existing law requires the governing board of each school district to provide for each member of an athletic team specified amounts of insurance protection for medical and hospital expenses resulting from accidental bodily injuries. Existing law requires that the costs of that insurance be paid out of funds of the school district or funds of the student body in the event that the governing board of a school district determines that a member of an athletic team or the parent, guardian, or other person having charge or control of a member of an athletic team is financially unable to pay the costs of the insurance. Existing law provides that the governing board is not required to provide that insurance protection if an individual team member has health insurance or a reasonable equivalent of health benefits coverage provided for him or her in any other way or manner, including, but not limited to, the purchase of coverage by himself or herself, or by his or her parent or guardian.

The bill would require school districts that elect to operate an interscholastic athletic team or teams to include a specified statement regarding no-cost or low-cost local, state, or federally sponsored health insurance programs in offers of insurance coverage and in other letters and printed materials regarding insurance protection that are sent to team members and in any other related letters and printed materials that are sent to team members, as specified.

Existing law requires that, when 15% or more of the pupils enrolled in a public school that provides instruction in kindergarten or any of grades 1 to 12, inclusive, speak a single primary language other than English, as specified, all notices, reports, statements, or records sent to the parent or guardian of any pupil that speaks one of those primary languages be written in, and be capable of being responded to in, that language.

This bill would declare the applicability of that requirement to all notices regarding insurance protection for members of athletic teams that are sent to team members.

Ch. 109 (AB 2764) Wyland County property.

Existing law authorizes a county board of supervisors to delegate to a purchasing agent or other appropriate county official the authority to lease real property for use by the county for a term not to exceed 3 years and for a rental not to exceed \$7,500 per month and to amend those leases for improvements or alterations, as specified.

This bill would also permit the purchasing agent or other official to obtain the use of real property for the county by license and to extend the term of the lease or license to 5 years. The bill also would make other conforming changes.

Ch. 110 (AB 2903) Huff Department of Motor Vehicles: employees.

Existing constitutional provisions require the State Personnel Board to enforce the civil service provisions and to prescribe probationary periods and classifications, adopt other rules authorized by statute, and review disciplinary actions.

Existing civil service provisions apply to the Department of Motor Vehicles and its employees.

This bill would authorize the Department of Motor Vehicles to conduct competitive examinations on a position-by-position basis for specified managerial and supervisory classifications as agreed to by the State Personnel Board, as specified. The bill would also make legislative findings and declarations with regard to a related demonstration project.

Ch. 111 (AB 2932) Chan California Children and Families Program.

(1) Existing law, the California Children and Families Act of 1998, an initiative measure, requires that the California Children and Families Program, established by the act, be funded by surtaxes imposed on the sale and distribution of cigarettes and tobacco products and deposited into the California Children and Families Trust Fund, and that the fund be used for the implementation of comprehensive early childhood development and smoking prevention programs. Existing law establishes a state commission, First 5 California, with powers and duties relating to the administration of the act on a state level, and authorizes a county's board of supervisors to establish a county children and families commission to administer the act on a county level.

Existing law requires as a condition of receiving an allocation under the act, that the county commissions, in a public hearing, adopt certain policies regarding conflict of interest of commission members and commission contracting and procurement, in comportment with state law.

This bill would make technical changes to these provisions to clarify which state laws the county commission must adhere to when it adopts its policies of conflict of interest and contract and procurement.

(2) The California Constitution provides that the Legislature may amend an initiative statute by another statute that becomes effective only when approved by the voters unless the initiative statute permits amendment without voter approval. The act provides that it may be amended only by a vote of  $\frac{2}{3}$  of the membership of both houses of the Legislature and that all amendments pursuant to this provision shall be to further the act and must be consistent with its purposes.

This bill, in conformance with those requirements, would declare that its provisions further the act and are consistent with its purposes.

Ch. 112 (AB 3072) Committee on Insurance California Insurance Guarantee Association.

Existing law establishes a workers' compensation system to compensate an employee for injuries incurred arising out of or in the course of employment.

Existing law further establishes the California Insurance Guarantee Association (CIGA) for specified purposes related to the payment of obligations of insurers. Under existing law, any bonds issued at the request of CIGA to provide funds for payment workers' compensation claims must be issued prior to January 1, 2007.

This bill would extend the date for bond issuance to January 1, 2009.

Ch. 113 (AB 782) Mullin Redevelopment: project area.

The Community Redevelopment Law authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in those communities. That law also specifies both the physical and economic conditions that cause blight and defines a project area as a "predominantly urbanized" area of a community that is a blighted area. One criterion of blight is that the land in the project area is characterized by the existence

of subdivided lots of irregular form and shape and inadequate size for proper usefulness and development that are in multiple ownership.

This bill would delete this criterion from the definition of “blight” for purposes of these provisions.

Ch. 114 (AB 2073) Matthews Home improvement: exemption for fire alarm installation.

Existing law licenses and regulates contractors by the Contractors’ State License Board. Existing law imposes certain requirements on home improvement contracts. Existing law also regulates alarm company operators by the Bureau of Security and Investigative Services.

This bill would exclude the sale, installation, and servicing of a fire alarm sold in conjunction with an alarm system from the requirements imposed on home improvement contracts if the cost of making the fire alarm operable does not exceed \$500 and other specified terms and conditions are satisfied.

Ch. 115 (AB 2087) Benoit Workers’ compensation: claimant information.

Existing law establishes a workers’ compensation system, administered by the Administrative Director of the Division of Workers’ Compensation, to compensate an employee for injuries sustained in the course of his or her employment. Existing law requires that all employers secure incurred liabilities by making a deposit based upon estimated future liability for compensation, and provides that, in determining the amount of the deposit, the administrative director shall offset estimated future liabilities for the same claims covered by a self-insured plan under the Longshore and Harbor Workers’ Compensation Act, as specified. Existing law requires that all self-insured employers file a self-insurer’s annual report in a form prescribed by the administrative director.

This bill would require the administrative director to additionally prepare an aggregated summary of all self-insured employers’ liability to pay compensation reported on those self-insured employers’ annual reports, including a separate summary for public and private employer self-insurers. The bill would require that the summaries be made available to the public on the self-insurance section of the Department of Industrial Relation’s Internet Web site. The bill would also authorize the administrative director to release a copy, or make available an electronic version, of specified data, excluding certain individually identifiable claimant information, contained in any public sector employer’s self-insurer’s annual reports received from an individual public entity self-insurer or from a joint powers authority employer and its membership.

Ch. 116 (AB 2120) Liu Vehicles: disabled persons: disabled veterans: parking placards.

Existing law authorizes the Department of Motor Vehicles to issue distinguishing placards to disabled persons or disabled veterans and temporary distinguishing placards to temporarily disabled persons, to be used for parking purposes, as described. Prior to issuing the parking placard or temporary placard, the Department of Motor Vehicles requires the submission of a certificate, signed by an authorized health care professional, providing a full description substantiating the applicant’s disability, unless the disability is readily observable and uncontested. Under existing law, the authorized health care professional that signs the certificate is required to retain information sufficient to substantiate the certificate, and make the information available to certain entities, upon request of the department.

This bill would expand the health care professionals authorized to sign the certificate substantiating the applicant’s disability to include, to the extent that it does not cause a reduction in the receipt of federal aid highway funds, nurse practitioners, certified nurse midwives, and physician assistants. The bill would make conforming and technical changes.

Ch. 117 (AB 2240) Committee on Public Employees, Retirement and Social Security County employees' retirement: additional retirement credit.

Existing law, the County Employees Retirement Law of 1937, establishes noncontributory retirement plans for employees in specified counties. Retirement benefits under those plans are calculated, in part, based upon a member's years of service credit. Under existing law, if approved by the county board of supervisors, a member of those plans in the Counties of Santa Barbara and Los Angeles may receive service credit for time that would not otherwise be recognized, including prior service with another public agency, and upon payment by the member of specified contributions to the retirement fund.

This bill would additionally provide that the board of supervisors in the Counties of Santa Barbara and Los Angeles may provide that a member of a noncontributory plan may receive up to 5 years of service credit for additional retirement credit, as defined, upon payment of additional contributions prior to retirement, or in certain circumstances, within 120 days after retirement, by lump sum or by installment payments over a period of up to 10 years and subject to other conditions, as specified.

Ch. 118 (AB 2244) Committee on Public Employees, Retirement and Social Security Public Employees' Retirement System: retirement benefits.

(1) Existing law permits a local agency that contracts with the Public Employees' Retirement System for retirement services to classify certain local safety members as "local sheriff" members. Under existing law, that local agency may not establish different retirement benefits for some, but not all, members in specified local safety positions.

This bill would revise these provisions to include a local sheriff member as a specified local safety position.

(2) Under existing law, the retirement benefits of a member are based, in part, on the compensation earnable received by that member. Existing law provides that "compensation earnable" includes the payrate of a member in a group or class that is the same as the amount paid to similarly situated members of the same group or class.

This bill would clarify that the payrate of members in a group or class shall correspond to publicly available pay schedules.

(3) Under existing law, a member employed by a local agency may receive credit for prior service with that local agency on the effective date of the contract for retirement services between that local agency and the Public Employees' Retirement System.

This bill would additionally provide that a member may receive credit for prior service on the effective date of an amendment to that contract.

(4) Existing law prescribes a normal retirement age for members, and if an existing benefit formula is modified or a new benefit formula is enacted, the Public Employees' Retirement System may determine a normal retirement age by regulation. Existing law permits certain state and local miscellaneous members to permanently retire at 55 years of age. Under existing law, that member may retire under the partial service retirement program at 50 years of age, as specified.

This bill would revise and recast the provisions for the partial service retirement program to be consistent with the normal retirement age for permanent retirement.

(5) Existing law permits, if a member is permanently incapacitated from performing his or her duties in the state service, to retire for disability. Under existing law, "state service," for purposes of compensation, includes service with a local agency.

This bill would revise that provision to permit, instead, a member in the state service, if he or she is permanently incapacitated from performing his or her duties, to retire for disability.

(6) Existing law authorizes a retired member to work for a state agency or other employer under the system without reinstatement from retirement or loss or interruption of retirement benefits, as specified. Under existing law, that authorization is inapplicable to a retired member who is employed by an employer under the system and who, within 12 months prior

to that employment, received unemployment insurance compensation following the termination of an appointment with the same employer.

This bill would additionally provide that the authorization is inapplicable to a retired member who receives unemployment insurance compensation and is employed with the California Schools for the Deaf and Blind, a California community college, the California State University, or the University of California.

(7) This bill would make other technical changes to provisions of the Public Employees' Retirement Law and the Judges' Retirement Law.

Ch. 119 (AB 2292) Montanez Workers' compensation: death benefits.

Existing workers' compensation law requires employers to secure the payment of workers' compensation, including medical treatment, for injuries incurred by their employees that arise out of, or in the course of, employment. Existing law prescribes statutory death benefits required to be paid to the dependents, or, if there are no dependents, to the personal representative of the deceased employee, heirs, or other persons entitled to a deceased employee's accrued and unpaid compensation under specified workers' compensation laws.

This bill would specify that those death benefits shall be paid to a surviving dependent, personal representative, heir, or other person entitled to compensation under specified workers' compensation laws, notwithstanding any amount of the deceased employee's accrued and unpaid compensation that is paid or owing to a surviving dependent, personal representative, heir, or other person entitled to a deceased employee's accrued and unpaid compensation.

Existing law provides that whenever any fatal injury is suffered by an employee under circumstances that would entitle the employee to compensation benefits, but for his or her death, and the employee does not leave surviving any person entitled to a dependency death benefit, the employer shall pay a sum to the Department of Industrial Relations equal to the total dependency death benefit that would be payable to a surviving spouse with no dependent minor children.

Existing law provides that when the deceased employee leaves no surviving person entitled to the accrued and unpaid compensation, the accrued unpaid compensation shall be paid by the employer to the department.

Existing law provides that in the case of an employee who has no total dependents or partial dependents, for injuries occurring on or after January 1, 2004, \$250,000 shall be paid to the estate of the deceased employee.

This bill would specify that those requirements to pay the department, when the employee does not leave surviving any person entitled to a dependency death benefit, shall not be applicable if a death benefit or accrued and unpaid compensation is paid to the estate of the deceased employee.

Ch. 120 (AB 2366) Sharon Runner County employees' retirement: reinstatement of county retirees.

Under the County Employees Retirement Law, if a county board of supervisors adopts a resolution by majority vote, a safety member of a county or district within that county may be required to retire at a specified age. That law permits a retired member to be reemployed by the county or a district and reinstated to active membership in the retirement system, as specified. That law requires the retirement system to cancel the retirement allowance of the member as of the date of reemployment of that member. That law permits the member to earn an additional retirement benefit for that period of service after the reinstatement and reemployment of the member. That law further provides that the retirement allowance of the member resumes only upon the subsequent termination of employment by that member.

This bill would additionally permit a retired safety member in Los Angeles County who was required to retire because of age to be reemployed by the county and reinstated to active

membership, as specified. This bill would permit that safety member to earn an additional retirement benefit for the period of service after reinstatement and reemployment pursuant to the formula applicable to that member prior to his or her reinstatement.

Ch. 121 (AB 2438) Chu Public employees' retirement: compensation.

The Public Employees' Retirement Law defines the term "compensation" for purposes of determining required contributions and benefits. That law generally requires certain miscellaneous members and school members to pay a specified percent of compensation as his or her normal retirement contribution to the Public Employees' Retirement System. Member contributions are made to the Public Employees' Retirement Fund, a continuously appropriated fund.

This bill would additionally define compensation to include, if the member is a school employee of a school district or community college district, industrial disability leave paid to that member. Because this bill would expand the definition of compensation of a member who receives industrial disability leave and thereby increase member contributions to the Public Employees' Retirement Fund, this bill would make an appropriation.

Ch. 122 (AB 2456) Nakanishi Contractors: licenses.

Under existing law, the Contractors' State License Board licenses and regulates contractors, and authorizes the registrar of the board to suspend a license for failure of the licensee to resolve outstanding final liabilities.

This bill would prohibit a qualifying person and personnel of record of a licensee whose license has been suspended for this purpose from serving in any capacity that is subject to licensure under the Contractors' State License Law other than a nonsupervising bona fide employee, until the covered debts are satisfied. The bill would also provide for suspension of a licensee's license if he or she employs any personnel of record that have been assessed an outstanding liability, until the debt has been satisfied or the personnel of record disassociate themselves from the licensee.

Ch. 123 (AB 2658) Harman Contractors.

Under existing law, the Contractors' State License Board may suspend or revoke a contractor's license upon specified grounds, and as a condition of reinstatement, the contractor may be required to fully satisfy any resulting monetary obligation or debt, except if the obligation or debt was adjudicated in a bankruptcy proceeding.

This bill would instead provide that the contractor may not be required to satisfy the monetary obligation or debt to the extent it was discharged in a bankruptcy proceeding.

Existing law makes it a cause for discipline if a contractor avoids or settles an obligation for less than the full amount of the obligation, except if the contractor avoids or settles in bankruptcy, or by composition, arrangement, or reorganization with creditors under federal law for less than the full amount.

This bill would also require the contractor to satisfy that obligation to the extent it is not discharged under federal law.

Ch. 124 (AB 2796) Mountjoy Cemeteries: public notice.

Existing law requires that a cemetery authority post prescribed public notices on the premises of a cemetery containing, among other things, the address of the Cemetery and Funeral Bureau.

This bill would, instead, require that the notice provide either the address of the Cemetery and Funeral Bureau or a statement that the address of the Cemetery and Funeral Bureau is available at the office of the cemetery. The bill would make additional changes of a technical, nonsubstantive nature.

Existing law requires an endowment care cemetery to post a notice identifying it as an endowment care cemetery in its sales office or offices and at or near its entrance or its administrative building.

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would delete the requirement that the notice be posted in the sales office or offices and would, instead, require that the notice be posted at or near its entrance and at its administrative building.

Ch. 125 (AB 2811) Plescia California State Lottery: prizes.

(1) The California State Lottery Act of 1984, an initiative measure, requires that the payment of moneys to, or on behalf of, a prizewinner by an assignee in consideration for the assignment of the future prize payment or payments to another person pursuant to a court order, be made in full prior to the time when, under the terms of the assignment, the lottery is required to make the 1st prize payment to the assignee, or be made in 2 installments, the 1st being paid prior to the time when, under the terms of the assignment, the lottery is required to make the 1st prize payment to the assignee and the 2nd installment within 11 months thereafter.

This bill would provide that, notwithstanding that provision, any other installment payment schedule is permitted if the installment obligation relating to the installments is guaranteed by a financial institution, as defined, or a brokerage firm that is a member of the Securities Investor Protection Corporation, as required by federal law.

(2) Existing law provides that if a lottery prizewinner elects to accept the consideration to be paid for the assignment in 2 installments, as specified, the prizewinner shall have a special lien for the balance of any payment due, effective without any further action, agreement, or notice, on any of the prize payments assigned by the prizewinner for the payment of moneys from the assignee. Under existing law, this lien terminates upon the prizewinner receiving actual payment of the moneys and the tendering of a check, payment instrument, or recital of payment does not constitute actual payment of moneys.

This bill would provide that, notwithstanding that provision, if a prizewinner accepts an installment obligation guaranteed by an FDIC or SIPC insured entity, then the lien created shall automatically terminate upon deliver of the installment obligation.

(3) The Lottery Act provides that none of its provisions may be changed, except to further its purpose by a bill passed by a 2/3 vote of each house of the Legislature and signed by the Governor.

This bill would declare that its provisions further the purposes of the act.

Ch. 126 (AB 2872) Huff School districts: organization: governing board trustees.

Existing law authorizes a county committee on school district organization, except as specified, to establish, rearrange the boundaries of, and abolish school district trustee areas and community college district trustee areas, and to increase or decrease the number of members of the governing boards, as specified, or to adopt one of the alternative methods of electing governing board members, as specified. Existing law authorizes a county committee on school district organization to establish or abolish a common governing board for a high school district and an elementary school district within the boundaries of the high school district by presenting the issue to the qualified registered voters within those boundaries, as specified.

Existing law provides that a proposal to make any of the changes described above may be initiated by the county committee on school district organization or made to the county committee on school district organization either by a petition signed by a certain number of qualified registered voters residing in the district, as provided, or by resolution of the governing board of the district.

This bill would revise the number of qualified registered voters, as provided, whose signatures are required for purposes of submitting the petition to the county committee on school district organization.

This bill would correct erroneous cross-references and make various technical, nonsubstantive changes to these provisions of existing law.

Ch. 127 (AB 272) Parra Peace officers: county custodial officers.

Existing law defines various persons as peace officers, including, among others, custodial officers in certain counties.

This bill would include custodial officers, as specified, in the Counties of Inyo, Kings, and Tulare within the definition of peace officer.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 128 (AB 1744) Committee on Health Health care.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care. Existing law provides for basic health care for qualified individuals under the Medi-Cal program.

This bill would make nonsubstantive changes by renumbering a provision and deleting a duplicate provision.

Ch. 129 (AB 2407) Salinas Vehicles: mature driver program.

(1) Existing law requires the Director of Motor Vehicles to establish standards and develop criteria for the approval of a mature driver improvement course. Existing law requires the course to include not less than 400 minutes of instruction. Existing law provides that upon the satisfactory completion of the course, the mature driver shall receive a certificate that may be renewed every 3 years from the date of completion by successfully completing a subsequent mature driver improvement course.

This bill would provide that a mature driver improvement course to renew the certificate include not less than 240 minutes of instruction.

(2) Existing law authorizes a course provider to charge a fee not to exceed \$20.

This bill would authorize a course provider to charge a tuition not to exceed \$30.

Ch. 130 (AB 2853) Salinas Family law: counselors.

Existing law permits a superior court to establish the family conciliation court and to appoint supervising and associate counselors of conciliation, as specified. Existing law permits a superior court to appoint a child custody evaluator or mediator in a contested proceeding regarding child custody or visitation rights. Existing law requires those counselors, evaluators, and mediators to participate in programs of continuing instruction in domestic violence, as specified, that are established under the authority of the Administrative Office of the Courts.

This bill would revise and recast those provisions related to programs of continuing instruction for counselors, evaluators, investigators, and mediators, as specified. This bill would require those counselors, evaluators, investigators, and mediators to have 16 hours of additional advanced training in domestic violence issues and 4 hours of updated training annually, as approved by the Administrative Office of the Courts.

Ch. 131 (AB 2950) Daucher Medi-Cal billing reductions.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons receive health care services from providers enrolled in the program. Under existing law, a bill submitted by a provider for a service provided under the Medi-Cal program is required to be submitted not more than 6 months after the month in which the service is rendered, with specified exceptions. Existing law requires that reimbursement for an original claim, submitted for payment between 6 and 12 months after the month of service, and which does not meet an exception, be reduced by 25% to 50%, as specified.

This bill would provide that the reductions in reimbursement specified under the above provisions do not apply with respect to certain Medi-Cal programs for which there is no state General Fund match.

Ch. 132 (SB 1) Murray Electricity: solar energy: net metering.

(1) Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission) to expand and accelerate development of alternative sources of energy, including solar resources. Existing law requires the Energy Commission to develop and adopt regulations governing solar devices, as defined, designed to encourage the development and use of solar energy and to provide maximum information to the public concerning solar devices.

This bill would require beginning January 1, 2011, a seller of production homes, as defined, to offer the option of a solar energy system, as defined, to all customers negotiating to purchase a new production home constructed on land meeting certain criteria and to disclose certain information. The bill would require the Energy Commission to develop an offset program that allows a developer or seller of production homes to forgo the offer requirement on a project by installing solar energy systems generating specified amounts of electricity on other projects. The bill would require, not later than July 1, 2007, the Energy Commission to initiate a public proceeding to study and make findings whether, and under what conditions, solar energy systems should be required on new residential and nonresidential buildings and to periodically update the study thereafter.

(2) Under existing law, the Public Utilities Commission (PUC) has regulatory authority over public utilities, including electrical corporations. Existing law required the PUC, on or before March 7, 2001, and in consultation with the Independent System Operator, to take certain actions, including, in consultation with the Energy Commission, adopting energy conservation demand-side management and other initiatives in order to reduce demand for electricity and reduce load during peak demand periods, including differential incentives for renewable or super clean distributed generation resources. Pursuant to this requirement, the PUC has developed a self-generation incentive program to encourage customers of electrical corporations to install distributed generation that operates on renewable fuel or contributes to system reliability. Existing law requires the PUC, in consultation with the Energy Commission, to administer, until January 1, 2008, a self-generation incentive program for distributed generation resources in the same form that existed on January 1, 2004, subject to certain air emissions and efficiency standards. In a PUC decision, the PUC adopted the California Solar Initiative, which modified the self-generation incentive program for distributed generation resources and provides incentives to customer-side photovoltaics and solar thermal electric projects under one megawatt.

This bill would require the PUC, in implementing the California Solar Initiative, to authorize the award of monetary incentives for up to the first megawatt of alternating current generated by an eligible solar energy system, that meets the eligibility criteria established by the Energy Commission. The bill would authorize the commission, prior to the establishment of eligibility criteria by the Energy Commission, to determine the eligibility of a solar energy system, as defined, to receive monetary incentives. The bill would require that awards of monetary incentives decline at a rate of an average of at least 7% for each year following implementation, and be zero by December 31, 2016. The bill would require the PUC, by January 1, 2008, to adopt a performance-based incentive program, as specified. The bill would require that the PUC, by January 1, 2008, and in consultation with the Energy Commission, require reasonable and cost-effective energy efficiency improvements in existing buildings as a condition of providing incentives for eligible solar energy systems. The bill would require the commission to require time-variant pricing for all ratepayers with a solar energy system. The bill would prohibit costs of the program from being recovered from certain customers and would require the commission to ensure that the total cost over the duration of the program does not exceed \$3,350,800,000, consisting of 3 specified program components. The bill would authorize the PUC to award monetary incentives for solar thermal and solar water heating devices, in a total amount up to \$100,800,000. The bill would prohibit the PUC from allocating more than \$50,000,000 for certain research, development, and demonstration. The bill would require that by June 30, 2009, and by June

30 of every year thereafter, the PUC submit to the Legislature an assessment of the success of the California Solar Initiative program, that includes specified information.

This bill would require the Energy Commission, by January 1, 2008, and in consultation with the PUC, local publicly owned electric utilities, and interested members of the public, to establish and thereafter revise eligibility criteria for solar energy systems and to establish conditions for ratepayer funded incentives that are applicable to the California Solar Initiative. The bill would require the Energy Commission to adopt guidelines for solar energy systems receiving ratepayer funded incentives at a publicly noticed meeting. The bill would, upon establishment of eligibility criteria by the Energy Commission, prohibit ratepayer funded incentives from being made for a solar energy system that does not meet the eligibility criteria. The bill would require the Energy Commission to make certain information available to the public, to provide assistance to builders and contractors, and to conduct random audits of solar energy systems to evaluate their operational performance.

This bill would require all local publicly owned electric utilities, as defined, that sell electricity at retail, on or before January 1, 2008, to adopt, implement, and finance a solar initiative program, as prescribed, for the purpose of investing in, and encouraging the increased installation of, residential and commercial solar energy systems. The bill would require a local publicly owned electric utility to make certain program information available to its customers, to the Legislature, and to the Energy Commission on an annual basis beginning June 1, 2008. By imposing additional duties upon local publicly owned electric utilities, the bill would thereby impose a state-mandated local program.

(3) Existing law requires all electric service providers, as defined, to develop a standard contract or tariff providing for net energy metering, and to make this contract available to eligible customer generators, upon request. Existing law requires all electric service providers, except the San Diego Gas and Electric Company (SDG&E), upon request, to make available to eligible customer generators contracts for net energy metering on a first-come-first-served basis until the time that the total rated generating capacity used by eligible customer generators exceeds 0.5% of the electric service provider's aggregate customer peak demand. Existing law establishes a separate limit of 50 megawatts for SDG&E.

This bill would require the PUC to order all electric service providers, including SDG&E, to expand the availability of net energy metering so that it is offered on a first-come-first-served basis until the time that the total rated generating capacity used by all eligible customer-generators exceeds 2.5% of the electric service provider's aggregate customer peak demand. The bill would require the PUC, by January 1, 2010, in consultation with the Energy Commission, to submit a report to the Governor and Legislature on the costs and benefits of net energy metering, wind energy co-metering, and co-energy metering to participating customers and nonparticipating customers and with options to replace the economic costs of different forms of net metering with a mechanism that more equitably balances the interests of participating and nonparticipating customers.

(4) Existing law, the Contractors' State License Law, provides for the licensure and regulation of contractors by the Contractors' State License Board.

This bill would require the board to review and, if needed, revise its licensing classifications and examinations to ensure that contractors authorized to perform work on solar energy systems, as specified, have the requisite qualifications to perform the work.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 133 (SB 1232) Runner Division of Licensing: out-of-state physicians and surgeons.

Existing law, the Medical Practice Act, establishes the requirements for issuance of a physician and surgeon's certificate by the Division of Licensing of the Medical Board of California. Under existing law, the Division of Licensing may determine that an applicant who holds an unlimited and unrestricted license as a physician and surgeon in another state and who meets other specified criteria satisfies the curriculum, clinical instruction, and examination requirements for a physician and surgeon's certificate.

This bill would require that the applicant be licensed by the other state for a period of at least 4 years and would require the applicant to satisfy other criteria before the division could determine his or her compliance with the curriculum, clinical instruction, and examination requirements.

Ch. 134 (SB 1652) Vincent Community colleges: facilities: leases.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state.

Existing law authorizes the governing board of a community college district to lease certain property not needed for school classroom buildings for a period not exceeding 5 separate or consecutive calendar days, or portions of those days, in each fiscal year. Existing law also authorizes the governing board to lease certain property not needed for academic activities, for a period of more than 5 days but less than 5 years, as determined by the governing board.

This bill would revise the provision relating to leases for a period not exceeding 5 separate or consecutive calendar days or portions of those days, to instead authorize the lease of property not needed for school classroom buildings for a period not exceeding 14 separate or consecutive calendar days, or portions of those days, in each fiscal year.

Ch. 135 (SB 1846) Committee on Natural Resources and Water Public resources: underwater salvage operation.

(1) Under existing law, the State Lands Commission administers the Shipwreck and Historic Maritime Resources Program, as defined, regulating salvage operations over and upon all tide and submerged lands of the state. Existing law requires a person conducting a salvage operation, as defined, on tide and submerged lands to obtain a permit from the commission, and authorizes the commission to designate persons, paid for by the permitholder, to observe all salvage operations. Existing law authorizes the commission to revoke the permit, after notice to the permitholder, if the commission finds that the permitholder failed to comply with the terms of the permit or other applicable provision of law.

This bill would, in addition, authorize the commission to issue a permit for the search, exploration, or recovery of nonhistoric vessels, aircraft, or submerged objects, and for the search, archaeological investigation, and recovery of historic vessels, aircraft, or other submerged historic resources, as defined, on tide and submerged lands. The bill would require the commission to issue a permit based on the commission's evaluation of the project and its probable impact on the site or objective, and the impact on the state submerged lands. The bill would authorize the commission to require the permitholder to provide a reliable communication system for the observer to communicate with the commission. The bill would authorize the executive officer of the commission, after notice to the permitholder and time to correct, to issue a stop work order if the observer determines that activities conducted on the project are not within the terms of the permit. The bill requires the executive officer to hold a hearing within 3 business days of the issuance of a written notice of the stop work order.

(2) Existing law authorizes the commission to grant a permit for salvage operations to specified entities that demonstrate the capability to carry out salvage operations. Existing law requires a person proposing to conduct a salvage operation to provide to the commission a detailed plan for the protection and preservation of the site or objects, or materials removed from the site consistent with contemporary professional standards of archaeological data recovery.

This bill would, instead, authorize the commission to grant a permit when the proposed activity is justified by an educational, scientific, or cultural purpose, or the need to protect the integrity of the site or the resource and grant a permit to specified entities that demonstrate the capability of properly carrying out archaeological investigations. The bill would require a person proposing such activity to submit a detailed project design that provides information, as specified.

**Ch. 136 (AB 733) Nation Psychotherapists: duty to warn.**

Existing law provides that no monetary liability and no cause of action shall arise against a psychotherapist, as defined, for failing to warn and protect from a patient's threatened violent behavior except where the patient has communicated to the psychotherapist a serious threat of physical violence against a reasonably identifiable victim or victims. Existing law also specifies that if there is a duty to warn and protect under the limited circumstances specified above, that duty is discharged by the psychotherapist making reasonable efforts to communicate the threat to the victim or victims and to a law enforcement agency.

This bill would revise that latter provision to instead specify that there is no monetary liability and no cause of action shall arise against a psychotherapist who, under the limited circumstances described above, discharges his or her duty to warn and protect by making reasonable efforts to communicate the threat to the victim or victims and to a law enforcement agency.

**Ch. 137 (AB 1946) Nava Residential property insurance.**

Existing law requires that residential property insurance policies do not become effective unless the named insured is provided with a copy of the California Residential Property Disclosure, as specified. Existing law further requires that this disclosure be provided prior to, or concurrent with, the application for or initial renewal of the policy.

This bill would revise that disclosure procedure.

Existing law specifies the required content of the declarations page of a residential property insurance policy.

This bill would provide that the declarations page of residential property insurance purchased by tenants or unit owners that do not provide coverage for the structure of the insured premises need not contain statements regarding the limits of liability for that structure, and specified information regarding cost estimates to rebuild the structure. {N1 }

**Ch. 138 (AB 2517) Tran Minor children: visitation rights.**

Existing law authorizes the court, on petition by a grandparent of a minor child, to grant reasonable visitation rights to the grandparent if the court both finds that there is a preexisting relationship between the grandparent and grandchild, as specified, such that visitation is in the child's best interest, and the court balances the interest of the child in having visitation with the grandparent against the rights of parents to exercise their parental authority.

Existing law further prohibits a petition for visitation from being filed while the natural or adoptive parents are married, unless the parents are currently living separately and apart, one parent has been absent for more than one month without the other spouse knowing the whereabouts of the absent spouse, one of the parents joins in the petition with the grandparents, or the child is not residing with either parent.

This bill would also authorize a petition for visitation to be filed when the child has been adopted by a stepparent.

Ch. 139 (SB 604) Aanestad Charter schools: funding.

Existing law provides that a charter school in its first year of operation is eligible to receive funding for a specified advance apportionment based on an estimate of average daily attendance for the current fiscal year, as specified.

This bill would permit advance apportionment for a charter school in its 2nd or later year of operation that is adding one or more grade levels. The bill would base the apportionment on the part of the average daily attendance at the 2nd principal apportionment for the prior year that was attributable to pupils in the highest grade served by the charter school.

The bill would make additional, nonsubstantive changes to provisions in existing law.

Ch. 140 (SB 1179) Morrow Recreational activities: skateboarding.

Existing law, effective until January 1, 2008, provides that skateboarding at a public skateboard park is a hazardous recreational activity, if all of specified conditions are met, including if the person skateboarding is 14 years of age or older.

This bill would reduce that age limit to 12 years of age or older. The bill would also extend the operative dates of those provisions until January 1, 2012, and would make other conforming changes to that provision.

Existing law, operative on January 1, 2008, prohibits an operator of a skateboard park from permitting any person to ride a skateboard in the park unless that person is wearing a helmet, elbow pads, and knee pads. Existing law, operative on January 1, 2008, further describes how those requirements may be satisfied with respect to a recreational skateboard facility owned and operated by a local public agency, as specified.

This bill would instead make those provisions operative on January 1, 2012.

Ch. 141 (SB 1247) Runner Fingerprinting: certification.

Existing law requires the Department of Justice to establish and implement a certification program in the Department of Justice for processing fingerprint-based criminal background clearances on individuals who roll fingerprints. Under existing law, law enforcement personnel and state employees are exempt from the requirements of that program if they have received certain training and have undergone a criminal offender record information background investigation.

This bill would add employees of a tribal gaming agency or operation, under certain circumstances, to those who are exempt from the aforementioned requirements.

This bill would make additional technical and conforming changes.

Ch. 142 (SB 1296) Kehoe San Diego Consolidated Transportation Agency: governance.

Existing law provides for the consolidation of certain regional transportation planning, programming, and related functions from various existing agencies, including the San Diego Association of Governments (SANDAG), the San Diego Metropolitan Transit Development Board (MTDB), and the North County Transit District (NCTD). Existing law provides for a board of directors of 20 members to govern the consolidated agency, with a specified weighted voting formula required for the taking of action on certain items.

This bill would instead provide for a board of directors of 21 members by adding a second representative from the San Diego County Board of Supervisors. The bill would specify the selection of the two supervisor representatives from substantially incorporated and unincorporated areas of the county, respectively. The bill would make other related changes.

Ch. 143 (SB 1294) Ducheny Geothermal wastes: exemption.

(1) Existing law regulates the management of hazardous waste and requires the Department of Toxic Substances Control to develop criteria and guidelines for the identification of hazardous waste. Existing law exempts geothermal waste resulting from drilling for geothermal resources from those management requirements. A violation of the hazardous waste control laws is a crime.

This bill would exempt from the hazardous waste control laws geothermal waste generated from the exploration, development, or production of geothermal energy that does not result from drilling for geothermal resources, if the geothermal waste meets specified management requirements and conditions, including that the waste is a hazardous waste that is exempt from the federal Resource Conservation and Recovery Act of 1976 (RCRA). Since a violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program.

The bill would declare that its provisions are to take effect immediately as an urgency statute.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 144 (SB 1344) Chesbro Recycling: plastic packaging containers.**

Existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, requires every rigid plastic packaging container, as defined, sold or offered for sale in this state, to generally meet one of specified criteria, including being made of 25% postconsumer material. Existing law provides that a manufacturer is in compliance with that 25% requirement criteria if the manufacturer makes a demonstration with regard to the consumption of a volume of postconsumer material in the manufacture of a rigid plastic packaging container, whether or not that container is subject to those criteria, that results in the consumption of an equivalent volume of post consumer material or a demonstration regarding the exportation of an equivalent volume of that material to another state or country.

The bill would revise the conditions by which a manufacture may demonstrate compliance with that 25% requirement, to delete the requirement that the volume of the post consumer material be used in determining eligibility for that alternative requirement. The bill would include the consumption or export of postconsumer materials used for the manufacture of other plastic products and plastic packaging and would delete the inclusion of postconsumer material that is exported to another country.

**Ch. 145 (SB 1462) Cox Insurance information and privacy protection: service of process.**

Existing law provides for the regulation of insurers by the Insurance Commissioner. Existing law, the Insurance Information and Privacy Protection Act, regulates the disclosure of information gathered in connection with insurance transactions by insurance institutions, agents, or insurance-support organizations. Existing law requires the commissioner, when he or she has reason to believe that an insurance institution, agent, or insurance-support organization is violating the act, to issue and serve a statement of charges and notice of hearing. Existing law provides that an insurance-support organization transacting business outside the state that has an effect on a person residing in this state is deemed to have appointed the commissioner to accept service of process on its behalf, if the commissioner causes a copy of the service to be immediately mailed by registered mail to the insurance-support organization at its last know principal place of business.

This bill would authorize the commissioner to complete service of process or to provide the copy of service by using a third party mailing service with tracking capability as specified.

**Ch. 146 (SB 1714) Margett Interception of communications: order: application.**

Existing law requires certain information to be included in an application for an order authorizing interception of electronic communication, including the oath or affirmation of the Attorney General, Chief Deputy Attorney General, or Chief Assistant Attorney General,

Criminal Law Division, or of a district attorney, or the person designated to act as district attorney in the district attorney's absence.

This bill would require the judge to accept a facsimile copy of the signature of the Attorney General, Chief Deputy Attorney General, or Chief Assistant Attorney General, Criminal Law Division, or of a district attorney, or the person designated to act as district attorney in the district attorney's absence as an original signature.

Ch. 147 (AB 49) Benoit Teacher credentialing: CBEST: exemption.

(1) Existing law requires the Commission on Teacher Credentialing to issue a 2-year nonrenewable preliminary specialist instruction credential, solely for the purpose of instructing deaf or hearing-impaired pupils, to any prelingually deaf candidate, as defined, if the candidate meets certain minimum requirements for the credential. The credential is limited to teaching pupils who are enrolled in state special schools or in special classes for pupils with hearing impairments.

Existing law requires the commission to issue a 2-year services credential with a specialization in pupil personnel services, solely for the purpose of providing services as a school counselor, school psychologist, or school social worker for deaf and hearing-impaired pupils, to any prelingually deaf candidate, as defined, if the candidate meets specified minimum requirements. Existing law limits the holder of the credential to providing these services at all grade levels to pupils who are enrolled in state special schools or in special classes for pupils with hearing impairments.

This bill, instead, would require the commission, upon the recommendation of a preliminary credential preparation program sponsor, approved by the commission, to issue a 2-year preliminary teaching credential or preliminary services credential to a candidate who is prelingually deaf and meets all of the requirements in law for the full, pertinent 5-year teaching or services credential, except that the candidate would be exempted from compliance with certain state basic skills proficiency testing requirements. The bill would limit the holder of the credential to teaching or providing services to deaf and hearing-impaired pupils who are enrolled in state special schools or in special classes for pupils with hearing impairments.

The bill would require the commission to develop criteria to verify the proficiency of persons credentialed under the bill. The bill would require the employing school district, county office of education, or state special school to appoint a 3-person panel, as specified, to verify the proficiency of holders of these credentials using the criteria the commission develops. The bill thereby would establish a state-mandated local program by imposing new requirements on school districts and county offices of education. The bill would require the commission, upon the employing local or state education entity's verification of proficiency, to issue a teaching credential for the remainder of the preliminary period and, limited to the instruction of deaf and hearing-impaired pupils enrolled in state special schools or in special classes, or a services credential for the remainder of the preliminary period, limited to the provision of services to deaf and hearing-impaired pupils enrolled in state special schools or in special classes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 148 (AB 1382) Nakanishi Prescription lenses.

Existing law requires the State Department of Health Services, the State Board of Optometry, and the Division of Licensing and Division of Medical Quality of the Medical

Board of California to prepare and adopt quality standards and adopt regulations relating to prescription ophthalmic devices, including, but not limited to, contact lenses. A violation of these regulations is a misdemeanor.

The existing Sherman Food, Drug, and Cosmetic Law regulates the packaging, labeling, and advertising of food, drugs, and cosmetics. Existing law prohibits a person, other than a physician and surgeon or optometrist from measuring the powers or range of human vision or determining the accommodative and refractive status of the human eye or scope of its functions in general or prescribe ophthalmic contact lenses, or plano contact lenses.

This bill would, instead, prohibit a person, other than a physician and surgeon or optometrist from measuring the powers or range of human vision or determining the accommodative and refractive status of the human eye or scope of its functions in general or prescribe ophthalmic devices, as defined.

Existing law specifies that a prescription lens is any device ordered by a physician and surgeon or optometrist, that alters or changes the visual powers of the human eye, including, but not limited by, ophthalmic and contact lenses.

This bill would, instead, specify that a prescription ophthalmic device includes specified types of contact lenses and plano contact lenses.

Existing law provides that it is a deceptive marketing practice for any licensed physician and surgeon, licensed optometrist, or registered dispensing optician to publish or cause to be published any advertisement or sales presentation relating to contact lenses representing that contact lenses may be obtained without confirmation of a valid prescription.

This bill would also make a deceptive marketing practice for any individual or entity who offers for sale plano contact lenses, as defined, to represent by any means that those lenses may be lawfully obtained without an eye examination or confirmation of a valid prescription, or may be dispensed or furnished to a purchaser without complying with prescribed requirements.

Because a violation of regulations related to contact lenses is a crime, this bill would expand the scope of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 149 (AB 1793) Bermudez Barbering and cosmetology: threading.

The Barbering and Cosmetology Act regulates barbering, cosmetology, skin care, nail care, and electrolysis. Existing law, until July 1, 2007, excludes threading, as defined, from the practice of barbering and cosmetology.

This bill would revise the definition of threading to include the incidental trimming of eyebrow hair. The bill would extend the operation of those provisions until July 1, 2008.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 150 (AB 2455) Nakanishi Small claims court: jurisdiction.

Existing law specifies that the jurisdiction of the small claims court includes various actions in which the demand does not exceed \$5,000, with specified exceptions. This jurisdiction includes actions against defendant guarantors who are required to respond based upon the default, actions, or omissions of another, if the demand does not exceed \$2,500, or, on and after January 1, 2000, \$4,000, if the defendant guarantor charges a fee for its services or the defendant guarantor is the Registrar of the Contractors' State License Board. Existing law also provides that the small claims court has jurisdiction in an action brought by a natural person if the demand does not exceed \$7,500, except as specified.

This bill would revise and recast these provisions to provide that the jurisdiction of the small claims court includes (1) any action brought by a natural person against the Registrar of the Contractors' State License Board as the defendant guarantor if the demand does not

exceed \$7,500, except as specified, (2) any action against a defendant guarantor that does not charge a fee for its guarantor or surety services, if the amount of the demand does not exceed \$2,500, and (3) any action against a defendant guarantor that charges a fee for its guarantor or surety services or an action brought by an entity other than a natural person against the Registrar of the Contractors' State License Board as the defendant guarantor, if the amount of the demand does not exceed \$4,000.

Ch. 151 (AB 2875) Pavley Confidential settlement agreements: sex offenses.

Existing law provides that it is the policy of the state that in any civil action the factual foundation for which establishes a cause of action for a violation of the Elder Abuse and Dependent Adult Civil Protection Act, confidential settlement agreements are disfavored, and require a showing, as specified, before a confidentiality agreement in this type of proceeding may be recognized or enforced by the court.

This bill would prohibit a confidential settlement agreement in any civil action the factual foundation for which establishes a cause of action for civil damages for an act that may be prosecuted as a felony sex offense. Notwithstanding that provision, the bill would not preclude an agreement preventing the defendant from disclosing any medical information or personal identifying information, as defined, regarding the victim of the felony sex offense or their relationship, and would not apply to or affect the ability of the parties to enter into an agreement that requires the nondisclosure of the amount of money paid in a settlement.

Ch. 152 (SB 1258) Battin Congressional candidates: extension of time.

(1) Existing law requires that if the nomination documents for an incumbent state Senator, Member of the Assembly, state constitutional officer, or the Insurance Commissioner are not delivered by 5 p.m. on the 88th day before the direct primary election, any person other than the person who was the incumbent on the 88th day has until 5 p.m. on the 83rd day before the election to file nomination documents for that elective office.

This bill would add congressional candidates to these provisions. By increasing the duties of local elections officials, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 153 (SB 1285) Aanestad Speech-language pathology.

Existing law, the Speech-Language Pathologists and Audiologists Licensure Act, licenses and regulates the practices of speech-language pathology and audiology by the Speech-Language Pathology and Audiology Board in the Department of Consumer Affairs. Existing law defines the practice of speech-language pathology for purposes of the act.

This bill would include in that definition the performance of suctioning in connection with a speech-language pathologist's scope of practice, after compliance with a medical facility's training protocols.

Existing law authorizes a speech-language pathologist to perform flexible endoscopic procedures, as specified, only in an acute care setting that has protocols for emergency medical backup procedures, as specified.

This bill would instead authorize a speech-language pathologist to perform those procedures in any facility that has these protocols.

Ch. 154 (SB 1298) Murray State claims.

Existing law requires the California Victim Compensation and Government Claims Board to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate \$274,453.55 from the General Fund to the Executive Officer of the California Victim Compensation and Government Claims Board to pay claims accepted by the board. It would require the Controller, upon request of the board, to transfer surcharges and fees as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 155 (SB 1579) Committee on Elections, Reapportionment and Constitutional Amendments Political Reform Act of 1974: disclosures

The Political Reform Act of 1974, an initiative statute, requires a candidate to deposit all campaign contributions into a campaign account, and provides that contributions deposited into the campaign account shall be deemed to be held in trust for expenses associated with the election of the candidate or for expenses associated with holding office. The act generally provides that an expenditure to seek office is within the lawful execution of that trust if it is reasonably related to a political purpose, an expenditure associated with holding office is within the lawful execution of the trust if it is reasonably related to a legislative or governmental purpose, and expenditures that confer a substantial personal benefit shall be directly related to a political, legislative, or governmental purpose. The act provides more specific guidance relating to certain types of expenditures, including expenditures related to travel expenses, and the reporting of those expenditures.

This bill would correct an erroneous cross-reference in these provisions.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a 2/3 vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a 2/3 vote.

Ch. 156 (SB 1654) Ortiz Voting: absentee ballot.

Existing law authorizes eligible voters to vote by absentee ballot and authorizes a county elections official to deliver an absentee ballot to the absent voter's spouse or parent.

This bill would additionally authorize delivery of an absentee ballot to the absentee voter's child, parent, grandparent, grandchild, or sibling, or a person residing in the same household as the absent voter, who is 16 years of age or older.

Ch. 157 (SB 1801) Ducheny Municipal hospitals: closed meetings.

Existing law authorizes the board of trustees that manages a municipal hospital to meet in closed session to discuss reports of hospital trade secrets, as defined, with specified exceptions.

This bill, in the case of a municipal hospital with a board of trustees appointed by a mayor, would similarly authorize the city council to meet in closed session to discuss reports of that hospital's trade secrets.

This bill would also state findings and declarations of the Legislature for limiting the public's right of access to specified meetings of a legislative body of a local agency.

Ch. 158 (AB 2581) Yee Postsecondary education: student conduct.

Existing law prohibits the Regents of the University of California, upon their adoption of a specified resolution, and the Trustees of the California State University and the governing board of a community college district, from making or enforcing any rule subjecting a student to disciplinary sanction solely on the basis of conduct that is speech or other communication that, when engaged in outside a campus is protected from governmental restriction by specified provisions of the California Constitution or the United States Constitution. Existing law provides that nothing in this provision shall be construed to authorize any prior restraint of student speech.

This bill would additionally prohibit any administrator of any campus of those institutions from making or enforcing any rule subjecting a student to disciplinary sanction solely on the

basis of conduct that is speech or other communication that, when engaged in outside a campus, is protected from governmental restriction by specified provisions of the California Constitution or the United States Constitution. The bill would also prohibit its provisions from being construed to authorize any prior restraint of the student press.

Ch. 159 (AB 2613) Mullin Employment: overtime compensation: teachers.

Existing law provides that 8 hours of labor constitutes a day's work. Under existing law, any work in excess of 8 hours in one workday and any work in excess of 40 hours in any one workweek and the first 8 hours worked on the 7th day of work in any one workweek is required to be compensated at the rate of no less than 1½ times the regular rate of pay for an employee.

Existing law authorizes the Industrial Welfare Commission to establish exemptions from the requirement that an overtime rate of compensation be paid for executive, administrative, and professional employees primarily, as defined, engaged in exempt duties and if certain conditions are met.

This bill would provide that these overtime compensation requirements not apply to an individual employed as a teacher, as defined, at a private elementary or secondary academic institution teaching students in kindergarten or grades 1 to 12, inclusive, and would further provide that this exemption not otherwise modify the exemptions from overtime compensation established by the Industrial Welfare Commission for professional, executive, and administrative employees.

Ch. 160 (SB 1390) Poochigian Crime statistics.

Existing law requires the Department of Justice to present to the Governor an annual report containing the criminal statistics of the preceding calendar year. Existing law also requires that the report be printed or otherwise prepared so as to enable the Attorney General to send a copy to public officials dealing with criminals and to distribute them generally in channels where they will add to the public enlightenment.

This bill would require that report to contain information on arrests for identity theft crimes.

Ch. 161 (AB 773) Mullin Redevelopment: referendum.

The Community Redevelopment Law authorizes the establishment of redevelopment agencies in communities in order to address the effects of blight, as defined, in those communities and prescribes certain requirements applicable to referendum petitions circulated in cities or counties with over 500,000 in population, relating to a redevelopment plan that is subject to a referendum, including, among other things, that the petition be submitted to the clerk of the legislative body within 90 days of the adoption of the ordinance.

Existing law generally requires that referendum petitions, together with all sections thereof, be filed in municipal elections within 30 days from the date of the adoption of the ordinance to which it relates.

This bill would, notwithstanding any other provision of law, make this 90-day requirement applicable to all cities and counties.

Ch. 162 (AB 959) Frommer Medi-Cal: health facilities: reimbursement.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits.

Existing law provides that a health facility is eligible to receive supplemental reimbursement under the Medi-Cal program if the facility provides services to Medi-Cal beneficiaries, is a distinct part of an acute care hospital providing skilled nursing services, and is owned by any of certain local entities.

This bill would, in addition, allow for the payment of supplemental reimbursement to a facility described above that is owned by the state. The bill would, for the department's rate

year beginning August 1, 2006, and for subsequent rate years, expand this supplemental reimbursement provision to apply to a state veterans' home.

Existing law provides for the payment of supplemental reimbursement to acute care hospitals owned by certain local entities, or by the University of California, that provide outpatient services to Medi-Cal beneficiaries.

This bill would, in addition, commencing with the 2006–07 fiscal year, allow for the payment of supplemental reimbursement to publicly owned or operated health clinics that are enrolled as Medi-Cal providers.

The bill would require an eligible facility under these provisions, as a condition of receiving supplemental reimbursement, to enter into, and maintain, an agreement with the department for the purposes of implementing these provisions and reimbursing the department for the costs of administering them.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 163 (AB 1784) Chu State claims.

Existing law requires the Attorney General to report to the Legislature when there is not a sufficient appropriation available for the payment of a claim against the state.

This bill would appropriate specified sums of money from the General Fund to various state agencies to pay a judgment and settlement claims in specified cases. The bill would specify that any funds appropriated in excess of the amounts actually required for these purposes would revert to the General Fund on June 30 of the fiscal year in which the final payment is made.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 164 (AB 1794) DeVore Local government: investments.

(1) Existing law, until January 1, 2007, authorizes a county or a city and county to invest its funds pursuant to specified criteria, including authority to invest its funds in short-term unsecured promissory notes issued by corporations for maturities of 270 days or less. These commercial paper investments are further limited to maturities for eligible commercial paper not exceeding 270 days and not representing more than 10 percent of the outstanding paper of any one issuing corporation.

This bill would eliminate the 10% maximum on this investment and would extend the repeal date to January 1, 2011, for the overall investment authorization.

(2) Existing law provides that a county, a city and county, or other local agency that pools money with other agencies may invest in commercial paper. No more than 10% of the local agency's money may be invested in any single issuer.

This bill would limit the investment in any single issuer of commercial paper to no more than 10% of the total assets of the investments held by a local entity.

(3) Existing law provides that no more than 10% of the outstanding commercial paper of a single issuer may be purchased by the local agency.

This bill would eliminate this limitation.

#### Ch. 165 (AB 2301) Committee on Judiciary State Bar: legal services to the poor.

Existing law, the State Bar Act, provides for the licensing and regulation of attorneys by the State Bar of California. Existing law authorizes the State Bar to collect annual membership fees and specified voluntary fees and donations.

This bill would also authorize the State Bar to collect voluntary financial support for nonprofit organizations providing free legal services to persons of limited means. In order to implement these provisions, the bill would require the State Bar, in consultation with the Chief Justice, to appoint a task force to analyze other programs and propose a method for collection and distribution of voluntary contributions, as specified. The bill would require that the method and any recommended voluntary contribution amount adopted by the Board of Governors be implemented for the 2008 fiscal year. The bill would require periodic review

and adjustment of the method and any voluntary contribution amount, in consultation with affected service providers and other key stakeholders.

Ch. 166 (AB 2335) Saldana Medical waste.

(1) The existing Medical Waste Management Act prescribes procedures for the regulation, hauling away, and disposal of various types of medical waste. A violation of the act is a crime.

Existing law defines “infectious agent,” for purposes of the act, to mean a type of microorganism, bacteria, mold, parasite, or virus that normally causes, or significantly contributes to the cause of, increased morbidity or mortality of human beings.

This bill would also specify that the definition of “infectious agent” includes, but is not limited to, those organisms classified as Biosafety Level II, III, or IV by the federal Centers for Disease Control and Prevention.

Existing law requires that small quantity generators, as defined, of medical waste who are not required to register with the State Department of Health Services pursuant to specified provisions of the act maintain specified records of any medical waste transported offsite for treatment and disposal, for not more than 2 years.

This bill would require that those records be maintained for not less than 2 years.

Existing law requires a person to take specified actions to containerize biohazard bags. In that connection, it authorizes a person to store certain biohazardous waste at an onsite location for not longer than 90 days without obtaining prior written approval from the enforcement agency or the State Department of Health Services, except as provided.

This bill would provide that the containment and storage time for wastes consolidated in a common container, as provided, shall not exceed the storage time for any category of waste set forth under the above provisions of the act.

The bill would require that medical waste that is stored in an area prior to transfer to a designated accumulation area, as defined, be stored in an area that is either locked or under direct supervision or surveillance. The bill would also make various other changes to the requirements for the containment, storage, and labeling of medical waste, as provided. Since a violation of the bill’s requirements for the containment, storage, and labeling of medical waste would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 167 (AB 2618) Berg Small claims court: actions.

(1) The Small Claims Act provides that the jurisdiction of the small claims court includes actions brought by a natural person, if the amount does not exceed \$7,500, with specified exceptions.

Existing law limits the jurisdiction of the small claims court to actions for damages, not to exceed \$5,000, for specified acts of discrimination, boycotting, or blacklisting, or the refusal to buy or sell to a person; for violence, threat of violence, or intimidation based on specified characteristics of a person; for denial or interference with the right of access of a disabled person to specified public accommodations; and related civil rights actions, as specified.

This bill would change that \$5,000 limitation to the jurisdictional limit of the small claims court, as specified, thereby conforming that provision to the existing limit of the Small Claims Act.

(2) Existing law relating to common interest developments authorizes specified enforcement actions for declaratory, injunctive, or writ relief, or for relief in conjunction with a claim for monetary damages not in excess of \$5,000, as specified.

This bill would increase that \$5,000 limitation to the jurisdictional limit of the small claims court.

(3) Existing law relating to tenancy authorizes specified actions in small claims court not to exceed \$5,000.

This bill would change that \$5,000 limit to the jurisdictional limit of the small claims court, as specified, thereby conforming that provision to the existing limit of the Small Claims Act.

(4) Existing law provides specified procedures with regard to filing a claim or counterclaim in a class action not to exceed certain jurisdictional limits, and provides that the small claims court shall give judgment for damages or equitable relief, or both, within specified jurisdictional limits.

This bill would increase those jurisdictional limits to that of the small claims court, thereby conforming those provisions to the existing limit of the Small Claims Act.

(5) Existing law requires the Public Utilities Commission to provide on its Internet Web site the means by which consumers may submit informal complaints through electronic means if the dollar amount does not exceed the jurisdictional limit of a small claims court.

This bill would change that jurisdictional limit to that of the small claims court, thereby conforming that provision to the existing limit of the Small Claims Act.

(6) Existing law requires the Public Utilities Commission to entertain complaints against any electrical, gas, water, heat, or telephone company under specified provisions if the amount of money claimed does not exceed the jurisdictional limit of the small claims court, as specified.

This bill would conform that provision to the existing limit of the Small Claims Act.

(7) Existing juvenile law relating to a minor’s cleanup, repair, or replacement of damaged property and the liability of the minor’s parents for associated costs and damages, grants the judge of the juvenile court jurisdiction in a limited civil case, and further specifies that if the demand is \$5,000 or less, the judge has the powers of a small claims court judge.

This bill would change that jurisdictional limit from \$5,000 to the jurisdictional limit of the small claims court, thereby conforming those provisions to the existing limit of the Small Claims Act.

Ch. 168 (AB 2652) Laird Commission on State Mandates: claim reductions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement. These procedures require the Controller to pay claims approved by the Commission on State Mandates, authorize the Controller to reduce claims in specified circumstances, and authorize a claimant to challenge a reduction by filing an incorrect reduction claim with the commission. Existing law declares the intent of the Legislature that the commission review its processes by which local agencies may appeal the reduction of reimbursement claims for state-mandated local programs.

This bill would provide for the consolidation of claims alleging an incorrect reduction at the initiative of an individual claimant or the commission if the claims involve common questions of law or fact that predominate over any matter affecting only an individual claim and the consolidation would result in consistent decisionmaking by the commission. In the case of an individual claimant seeking to consolidate claims, the bill would require the Controller to provide the commission and the claimant with a list of claimants who have filed similar incorrect reduction claims under the same mandate. It also would require the commission, on or before January 15, 2007, and on or before each January 15 thereafter, to report to the Legislature the number of individual and consolidated incorrect reduction claims decided during the preceding calendar year and whether and why the reduction was upheld or overturned.

Ch. 169 (AB 2736) Niello Vehicles: apportioned registration.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

(1) Under existing law and except as otherwise provided a vehicle registration and registration card expires at midnight on the expiration date designated by the Director of Motor Vehicles and is required to be renewed prior to the expiration of the registration year under a year-round registration scheme. Under existing law, a vehicle registered pursuant to the International Registration Plan and a vehicle registered under the Partial Year Registration Program expire at midnight of December 31 of the registration year.

This bill would delete the provision requiring a vehicle that is registered under the International Registration Plan be assigned a midnight December 31 registration expiration date. Instead, in order to implement a year-round registration, the bill, on or before January 1, 2009, would require the Director of Motor Vehicles to assign or reassign dates for the expiration of registration for these vehicles. The bill would allow the director to implement this change to use the practices and procedures currently applicable to the registration of other vehicles.

The bill would require the Director of Motor Vehicles to adjust annual registration fees, as specified, when, by reason of the assignment or reassignment of a renewal registration date, the registration year is less than, or more than, 12 months.

(2) Existing law provides for apportioned registration of vehicles.

This bill would require an application for apportioned registration received on and after January 1, 2008, to contain the United States Department of Transportation number, and taxpayer identification number which consists of the federal employer identification number or the social security account number.

The bill would provide that the taxpayer identification number is confidential and would prohibit its disclosure by the department except to law enforcement or a federal agency, or as required by law.

The bill would specify grounds for the department to refuse an application for apportioned registration, and would provide for the suspension of the apportioned registration of a vehicle or fleet, when the person responsible for the safety of the vehicle or fleet is prohibited from operating in interstate commerce by a federal agency. The bill would restrict, as specified, the operation of a vehicle or fleet when the apportioned registration is suspended.

The bill would require, among other things, that before an apportioned registration may be reissued after a suspension has been terminated, there shall, in addition to any other fees required, be paid a fee of \$150.

Because a violation of these provisions would be crimes under related provisions of existing law, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 170 (AB 2850) Spitzer DNA testing.

(1) Existing law requires persons who are arrested for, charged with, or convicted of specified crimes to provide biological samples for law enforcement identification, as specified. Existing law provides that these provisions shall apply retroactively to specified offenders and that collection of required specimens, samples, and print impressions shall occur regardless of when the crime charged or committed became a qualifying offense and regardless of when the person was convicted of the qualifying offense or a similar crime.

This bill would exclude from retroactive application the requirement to collect a sample from any person upon the arrest of the person for any felony offense, as specified.

(2) Existing law provides that specified accredited laboratories are authorized to analyze crime scene samples and perform anonymous analysis of specimens and samples for forensic identification, as specified.

This bill would change the accreditation required of these laboratories, as specified. This bill would also provide that laboratories of the Department of Justice and designated public

law enforcement crime laboratories may upload to available DNA and forensic identification databanks, as specified.

(3) Existing law provides that authorized law enforcement, custodial, or corrections personnel, including peace officers, may employ reasonable force to collect biological samples from individuals who refuse to provide those samples, as required by law.

This bill would include the officers of a state mental hospital among those peace officers who may collect those samples as described above.

**Ch. 171 (AB 2897) Daucher Contractors: revoked licenses.**

Under existing law, the Contractors' State License Law, the Contractors' State License Board licenses and regulates contractors, and authorizes the board to revoke a license for specified reasons.

This bill would prohibit an individual who was a member, officer, director, owner, or partner of a license that was revoked and who meets specified criteria from performing acts regulated by the law on behalf of a licensee, except as a bona fide nonsupervising employee, as defined. The bill would require those individuals to notify a prospective employer of the license revocation prior to becoming employed by an entity subject to licensure by the board. The bill would also prohibit a licensee from knowingly hiring those individuals, except as bona fide nonsupervising employees. Because a violation of this bill's provisions would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 172 (AB 3074) Committee on Local Government Local government: reorganization.**

(1) Existing law defines "district" or "special district" for the purposes of the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, to exclude a zone of a fire protection district, a mosquito abatement and vector control district, a public cemetery district, a recreation and park district, and community services district.

This bill would define "district" or "special district" to exclude a zone of any special district, including, but not limited to, a zone of a fire protection district, a mosquito abatement and vector control district, a public cemetery district, a recreation and park district, and community services district.

(2) Existing law defines "landowner" for purposes of the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000.

This bill would make a technical change in that definition.

(3) Existing law defines "service" for the purposes of the act, as a class established within, and as a part of, a single function, as provided by regulations adopted by the commission.

This bill would correct an incorrect cross-reference within this provision.

(4) Existing law, for the purposes of the act, provides the procedures for and conditions of an application for a change of organization. Existing law provides that if no application for a change of organization is made to the commission, or if the commission, in passing upon an application, does not determine that the applicant is not a district or special district the act shall provide the sole and exclusive authority for the initiation, conduct, and completion for a change of organization or reorganization by the district, agency, or authority.

This bill would eliminate an inoperative cross-reference within this provision.

(5) Existing law requires the executive officer of a local agency commission to provide notice of any hearing by the commission to the Director of Forestry and Fire Protection if the proposal includes the formation of, or annexation of territory to, a fire protection district formed pursuant to the Fire Protection District Law of 1987, and all or part of the affected territory has been classified as a state responsibility area.

This bill would require the executive officer of a local agency commission to provide notice of any hearing by the commission to the Director of Forestry and Fire Protection if the proposal includes a change of organization or reorganization of a city or special district that provides or would provide structural fire protection services and all or part of the affected territory is a state responsibility area.

(6) Existing law provides that the commission may waive protest proceedings entirely for a petition for change of organization or reorganization in the case of an uninhabited territory if all the owners of land within the affected territory have given their written consent to the change of organization or reorganization and all subject agencies have not submitted written opposition to a waiver of protest proceedings.

This bill would provide that the protest proceedings may be waived if all the owners of land within the affected territory have given their written consent to the change of organization or reorganization and no subject agency has submitted written opposition to a waiver of protest proceedings.

Existing law provides that the commission may waive protest proceedings entirely for a petition for change of organization or reorganization in the case of an inhabited city and district annexations or detachments, or both, if the commission has provided written notice of commission proceedings to all registered voters and landowners within the affected territory and no written opposition from registered voters or landowners within the affected territory is received prior to the conclusion of the commission meeting, and all subject agencies have not submitted written opposition to a waiver of protest proceedings.

This bill would provide that the proceedings may be waived if the commission has provided written notice of commission proceedings to all registered voters and landowners within the affected territory and no written opposition from registered voters or landowners within the affected territory is received prior to the conclusion of the commission meeting, and no subject agency has submitted written opposition to a waiver of protest proceedings.

(7) Existing law specifies the factors to be considered in the review of a proposal including the comments of any affected local agency.

This bill would also include the comments of other public agencies.

(8) Existing law requires that within 35 days following the adoption of the commission's resolution making determinations, the executive officer shall set the proposal for hearing for not less than 21 days or more than 60 days after the date the notice is given. However, for any proposal that includes an incorporation, the proposal shall be set for hearing within 15 days following adoption of the resolution making determinations and may be continued for periods not to exceed 35 days, rather than the 60-day continuances permitted for other proposals.

This bill would delete those provisions relating to proposals that include incorporations.

(9) Existing law provides that the local agency formation commission, in approving either a consolidation of districts or the reorganization of 2 or more districts into a single county sanitation district may increase the number of directors to serve on the board of directors of the consolidated or reorganized district to 7, 9, or 11, who shall be members of the board of directors of the districts to be consolidated or reorganized as of the effective date of the consolidation or reorganization.

This bill would correct an incorrect cross-reference within this provision.

(10) Existing law provides that the local agency formation commission, in approving either a consolidation of districts or the reorganization of 2 or more districts into a single sanitary district may increase the number of directors to serve on the board of directors of the consolidated or reorganized district to 7, 9, or 11, who shall be members of the board of directors of the districts to be consolidated or reorganized as of the effective date of the consolidation or reorganization.

This bill would correct an incorrect cross-reference within this provision.

(11) Existing law provides that the local agency formation commission, in approving either a consolidation of districts or the reorganization of 2 or more districts into a single

hospital district, or into a single regional park district, may increase the number of directors to service on the board of directors of the consolidated or reorganized district to 7, 9, or 11, who shall be members of the board of directors of the districts to be consolidated or reorganized as of the effective date of the consolidation or reorganization.

This bill would correct an incorrect cross-reference within this provision.

(12) Existing law provides that the local agency formation commission, in approving either a consolidation of districts or the reorganization of 2 or more districts into a single resource conservation district may increase the number of directors to serve on the board of directors of the consolidated or reorganized district to 7, 9, or 11, who shall be members of the board of directors of the districts to be consolidated or reorganized as of the effective date of the consolidation or reorganization.

This bill would correct an incorrect cross-reference within this provision.

(13) Existing law provides that the local agency formation commission, in approving either a consolidation of districts or the reorganization of 2 or more districts into a single irrigation district may increase the number of directors to serve on the board of directors of the consolidated or reorganized district to 7, 9, or 11, who shall be members of the board of directors of the districts to be consolidated or reorganized as of the effective date of the consolidation or reorganization.

This bill would correct an incorrect cross-reference within this provision.

(14) Existing law provides that the local agency formation commission, in approving either a consolidation of districts or the reorganization of 2 or more districts into a single county water district, or into a single public utility district, may increase the number of directors to serve on the board of directors of the consolidated or reorganized district to 7, 9, or 11, who shall be members of the board of directors of the districts to be consolidated or reorganized as of the effective date of the consolidation or reorganization.

This bill would correct an incorrect cross reference within those provisions.

(15) Existing law provides that the local agency formation commission, in approving either a consolidation of districts or the reorganization of 2 or more districts into a single municipal water district may increase the number of directors to serve on the board of directors of the consolidated or reorganized district to 7, 9, or 11, who shall be members of the board of directors of the districts to be consolidated or reorganized as of the effective date of the consolidation or reorganization.

This bill would correct an incorrect cross-reference within this provision.

#### Ch. 173 (SB 221) Runner Data analysis: Antelope Valley.

Existing law requires the Employment Development Department and the Department of Finance, in the preparation and maintenance of any statistical analyses by county, to make a separate breakdown of the Antelope Valley.

This bill would instead require these departments to make a separate breakdown of the Antelope Valley for any statistical analysis performed by city, rather than by county. It would require the departments to make this separate breakdown only to the extent that data is available from federal, state, or local sources, and specifies that the departments are not required to develop or collect data for this purpose. It also would prescribe parameters for the use of data developed for federal programs.

#### Ch. 174 (SB 1122) Committee on Local Government Validations.

This bill would enact the Second Validating Act of 2006, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 175 (SB 1123) Committee on Local Government Validations.

This bill would enact the Third Validating Act of 2006, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

Ch. 176 (SB 1461) Florez Health care: primary care: grants in aid.

Existing law requires the State Department of Health Services to select certain primary care clinics to be reimbursed for delivering medical services, including preventative health care, and smoking prevention and cessation health education to program beneficiaries, based upon specified criteria.

This bill would delete obsolete provisions governing the reimbursement of those services during prior fiscal years. Existing law requires each primary care clinic, applying for funds pursuant to the program, to demonstrate that it meets specified conditions, including, among other things, that it is located in an area federally designated as a medically underserved area, or medically underserved population.

This bill would revise those conditions to require that a primary care clinic be located in an area or a facility federally designated as a health professional shortage area, medically underserved area, or medically underserved population, and would make related changes.

Ch. 177 (SB 1583) Kuehl Marvin Braude Bikeway.

(1) Existing law regulates various aspects of parks and recreation in counties and cities.

This bill would require that the beach bicycle path in the County of Los Angeles, as described, be named in honor of Marvin Braude, a former member of the City Council of the City of Los Angeles. The bill would require that signage for the Marvin Braude Bikeway be placed at appropriate locations to commemorate the many conservation accomplishments of Marvin Braude. The bill would provide that costs for the signage shall be funded by agreements made by the managing local governments and private sources.

This bill would impose a state-mandated local program by establishing a new duty on local governments by requiring the signage and requiring managing local governments to make agreements with private sources for the funding of the signage.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 178 (SB 1760) Bowen Voting systems.

Existing law specifies the requirements for approval of voting systems and inspection of approved voting systems.

This bill would prohibit the Secretary of State from approving any voting system, including a direct recording electronic voting system, unless the paper used for its voter verified paper audit trail is of sufficient quality that it maintains its integrity and readability throughout the required retention period.

Ch. 179 (SB 3) Torlakson Highways: Safety Enhancement-Double Fine Zones.

Under existing law, until January 1, 2006, the segment of State Highway Route 101 between Eureka Slough Bridge and the Gannon Slough Bridge in Arcata is designated a Safety Enhancement-Double Fine Zone.

This bill would, until January 1, 2010, designate, upon approval of 2 county resolutions, as a Safety Enhancement-Double Fine Zone a segment of Vasco Road between the Interstate 580 junction in Alameda County and the Walnut Boulevard intersection in Contra Costa County. The bill would also establish standards for a designation of a highway or road segment as a Safety Enhancement-Double Fine Zone, including a 4-year duration limit, and would require an evaluation by the Department of Transportation of designated segments. The bill would impose an increased penalty for certain traffic violations committed in a Safety Enhancement-Double Fine Zone.

**Ch. 180 (SB 532) Torlakson BB devices.**

Except as otherwise authorized by law, any person who willfully discharges a firearm in a grossly negligent manner that could result in injury or death to a person is guilty of a public offense punishable by imprisonment in a county jail not exceeding one year, or by imprisonment in the state prison.

This bill would expand the scope of that offense to include a BB device, as defined, and would make the offense involving a BB device punishable by imprisonment in a county jail, not exceeding one year.

By expanding the scope of an existing crime this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 181 (SB 1198) Florez Local gambling.**

(1) Existing law, the Gambling Control Act, provides for the licensure and regulation of various legalized gambling activities and establishments by the California Gambling Control Commission and the investigation and enforcement of those activities and establishments by the Division of Gambling Control within the Department of Justice.

The act requires any amendment to an ordinance that would result in an expansion of gambling, as defined, in a city, county, or city and county that permits controlled gambling, to be approved by a majority of the voters of the city, county, or city and county, unless the change results in an increase of less than 25% of, among other things, the maximum amount permitted to be wagered in a game.

This bill would revise the definition of “expansion of gambling” to remove an increase of 25% or more in the amount permitted to be wagered in a game from the definition. The bill would also apply the definition of “expansion of gambling” used in that provision to additional provisions of the Gambling Control Act.

(2) The Gambling Control Act provides that until January 1, 2010, an ordinance in effect on January 1, 1996, that authorizes legal gaming within a city, county, or city and county is prohibited from being amended to expand gaming in that jurisdiction beyond that permitted on January 1, 1996.

This bill would revise that provision to prohibit an ordinance that authorizes legal gaming from being amended to provide for an expansion of gambling, as defined in a related provision within the Gambling Control Act. The bill would also authorize any city, county, or city and county to amend its ordinance regarding wagering limits.

**Ch. 182 (SB 1441) Kuehl Discrimination: state programs and activities: sexual orientation.**

Existing law prohibits discrimination on the basis of, among other things, race, national origin, ethnic group identification, religion, age, sex, color, or disability, against any person in any program or activity conducted, operated, or administered by the state or by any state agency, or that is funded directly by the state, or that receives any financial assistance from the state. Existing law also requires, with respect to disability, that these programs and activities meet the protections and prohibitions contained in certain provisions of the federal Americans with Disabilities Act of 1990, and the federal rules and regulations implementing that act, or state law if the state protections and prohibitions are stronger.

This bill would add sexual orientation to these provisions and define for these purposes “sex” and “sexual orientation.”

The bill would also expand the definition of discrimination under these provisions to include a perception that a person has any of these enumerated characteristics or that the

person is associated with a person who has, or is perceived to have, any of these characteristics.

Ch. 183 (SB 1605) Margett Public contracts: public works.

Existing law requires any public works contract of a local public entity that involves digging trenches or other excavations that extend deeper than 4 feet below the surface contain a clause that provides: (1) that the contractor is required to notify the public entity of specified conditions concerning hazardous waste, subsurface or latent conditions, or unknown physical conditions, (2) that the public entity is required to promptly investigate the conditions and if it makes certain findings regarding the conditions, a change order shall be issued under the procedures described in the contract, and (3) that, as specified, in the event a dispute arises between the public entity and the contractor, the contractor shall not be excused from performance.

This bill would specify that the contractor notify in writing the local public entity of any subsurface or latent physical conditions that differ from the conditions indicated by information about the site made available to bidders prior to the deadline for submitting bids.

Ch. 184 (SB 1842) Migden San Francisco sports stadium project validation.

Existing law authorizes the board of supervisors of a county to construct, expand, lease, build, rebuild, furnish, refurbish, or repair buildings for various public purposes, including, a stadium, coliseum, sports arena, or sports pavilion, or other building for holding sports events, athletic contests, contests of skill, exhibition, spectacles, and other public meetings. Existing law sets forth the procedures pursuant to which a public agency may bring or respond to an action in the superior court to determine the validity of matters undertaken by the public agency and generally authorized to be determined by the court. Existing law permits a validation action only when bonds, warrants, contracts, and other obligations are authorized, which occurs when a governing body adopts the measure authorizing the issuance of the bonds or warrants, or approving the contract.

This bill would authorize the City and County of San Francisco to bring an action before final authorization of the proposed sports stadium project, to determine the validity of any sports stadium project matter, as specified. This bill would not apply to an action to determine the validity of specified lease revenue bonds of the proposed sports stadium project or to an action after final authorization of the proposed sports stadium project.

This bill would make legislative findings and declarations regarding the need for special legislation.

Ch. 185 (AB 588) Goldberg Statistical districts: Hollywood.

Existing law requires any state agency or department that develops and maintains data and statistics on the municipal level, to make a separate breakdown of the San Fernando Valley, in the preparation and maintenance of any statistical analyses by city, and authorizes state agencies to require the City of Los Angeles to provide all necessary data in this regard, except that an alternate method may be used to determine the separate breakdown of the San Fernando Valley if a tax area code is used in the statistical analysis.

This bill would similarly require designated state entities to make a separate breakdown of statistical data regarding the community of Hollywood, as described.

Ch. 186 (AB 1333) Frommer Grease waste haulers.

(1) Existing law generally regulates haulers of grease. Under existing law, the funds in the Environmental Enforcement and Training Account may be expended annually by the California Environmental Protection Agency, upon appropriation by the Legislature, to provide for statewide education and training programs in the enforcement of environmental laws and establish enhanced local environmental enforcement efforts.

This bill would prohibit a grease waste hauler from removing grease from a grease trap or grease interceptor unless the hauler removes all grease, greasy liquid, water, and solids from

the grease trap or grease interceptor each time of removal, except as specified. The bill would subject a grease waste hauler to a civil penalty for a violation of these provisions and would allow for the enforcement of these provisions only against the grease waste hauling company.

The bill would require the civil penalties collected to be apportioned in a specified manner, of which 50% would be deposited in the Environmental Enforcement and Training Account and 50% to the local health officer or other local public officer or agency that investigated the matter that led to bringing the action.

The bill would make it an offense for a grease waste hauler to reinsert, except as specified, or otherwise improperly deposit grease materials into a grease trap, manhole, or sewer appurtenance, discharge it in or on any waters of the state, or to transport grease removed from a grease trap or grease interceptor in the same vehicle used for transporting other waste. The bill would make the offenses punishable by imprisonment in a county jail for not more than 6 months, and a fine of \$10,000 for a first offense, or one year imprisonment and a fine of \$25,000 for a 2nd or subsequent offense. A court would be authorized to bar the defendant from engaging in grease hauling for up to 5 years, and could order, as a condition of probation, that the defendant remove or pay the cost of removing grease dumped in violation of these provisions, as specified.

By creating new offenses, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 187 (AB 1995) Koretz Trial court employees: personnel files.

Existing law requires each trial court to permit an employee to inspect his or her official personnel files that are used, or have been used, to determine that employee's qualifications for employment, promotion, additional compensation, or termination or other disciplinary action.

This bill would make that requirement applicable to any personnel files.

#### Ch. 188 (AB 2100) Laird Common interest developments: reserve funding.

(1) Existing law requires the association of a common interest development to prepare and distribute to all members a pro forma operating budget that includes, among other things, a summary of the association's reserves, a statement regarding the mechanism or mechanisms by which the board of directors will fund reserves to repair or replace major components, and a statement addressing the procedures used for the calculation and establishment of those reserves to defray the future repair, replacement, or additions to those major components that the association is obligated to maintain.

This bill would require the pro forma operating budget to also include the current deficiency in reserve funding expressed on a per unit basis, a statement as to whether the board of directors of the association has determined to defer or not undertake repairs or replacement of any major component, and a statement whether the association has any outstanding loans, as specified.

(2) Existing law requires the board of directors, at least once every three years, to conduct a visual inspection of the major components that the association is obligated to repair, replace, restore, or maintain as part of a study of the reserve account requirements of the common interest development, as specified. The study is required to include, among other things, an estimate of the total annual contribution necessary to defray the cost to repair, replace, restore, or maintain the major components identified, after subtracting total reserve funds as of the date of the study.

This bill would require the study to also include a reserve funding plan that indicates how the association plans to fund the annual contribution to meet the association's obligation for

the repair and replacement of all major components, as specified. This bill would require, if the board of directors determines an assessment increase is required to fund the reserve funding plan, any assessment increase the board adopts to be approved in a separate board action from the action to adopt a reserve funding plan. The bill would require, commencing January 1, 2009, a summary of the reserve funding plan to be distributed to all members.

(3) Existing law requires the association of a common interest development to distribute a disclosure regarding assessment and reserve funding in a certain form.

This bill would revise that form, as specified.

(4) Existing law provides that no contract or other transaction between a corporation and one or more of its directors, or any corporation, firm, or association in which any of its directors has a material financial interest or are directors thereof, is either void or voidable because the director or directors, or the other corporation, firm, or association, are parties or present at the meeting of the board or a committee that authorizes, approves, or ratifies the contract or transaction, if certain disclosures are made and other specified conditions are met. Existing law also provides that interested or common directors may be counted in determining the presence of a quorum at a meeting of the board or a committee that authorizes, approves, or ratifies a contract or transaction.

This bill would make these provisions applicable to any contract or other transaction authorized, approved, or ratified by the board of directors of an association or a committee of the board, regardless of whether the association is a corporation.

#### Ch. 189 (AB 2154) Goldberg Parking: car share vehicle.

Existing law regulates the stopping, parking, and standing of vehicles on the public streets. This bill would allow a city or county, by ordinance or resolution, to designate certain streets or portions of streets for the exclusive parking privilege of motor vehicles participating in a car share vehicle program or ridesharing program. The bill would provide that under a car share vehicle program or ridesharing program a car share vehicle or ridesharing vehicle would be assigned a permit by the local authority that allows that vehicle to park in the exclusive designated parking areas. The bill would provide that the ordinance or resolution does not apply until signs or markings giving adequate notice thereof have been placed. The bill would allow the local ordinance or resolution to contain provisions that are reasonable and necessary to ensure the effectiveness of the programs.

#### Ch. 190 (AB 2293) Nava Unemployment compensation: false information: employees of educational institutions.

Existing unemployment insurance law provides that if the Director of the Employment Development Department finds that any employer or any employee, officer, or agent of any employer, in submitting facts concerning the termination of a claimant's employment pursuant to specified provisions of that law, willfully makes a false statement of representation or willfully fails to report a material fact concerning that termination, the director shall assess a penalty against the employer in an amount not less than 2, nor more than 10 times the weekly benefit amount of that claimant.

This bill would also authorize the director to assess a similar penalty, for deposit into a specified fund, against an employer if the director finds that the employer or any employee, officer, or agent of that employer, in submitting facts concerning the termination of a claimant's employment, where the claimant was performing services for an educational institution, as defined, willfully makes a false statement or representation or willfully fails to report a material fact regarding any week during which the services were performed or any time granted to the claimant for professional development during his or her employment with that employer.

This bill, by requiring these penalties to be deposited into the Employment Development Contingent Fund, a continuously appropriated general fund, would make an appropriation.

Ch. 191 (AB 2358) Saldana Absentee ballots: identification envelope.

Existing law requires an elections official to count only those absentee ballots returned by mail that are received by the elections official or delivered to a polling place by the close of the polls on the day of the election that contain specified information on the identification envelope.

This bill would prohibit an absentee voter's party affiliation from being stamped or printed on the identification envelope except at a primary election for partisan office.

Ch. 192 (AB 2372) Pavley Public projects: sanction for noncompliance.

Under existing law a public agency can elect to be subject to the California Uniform Public Construction Cost Accounting Act, which authorizes bidding procedures for public projects, as specified. Existing law requires the California Uniform Construction Cost Accounting Commission, upon the request of an interested party, to review the bidding practices of a participating public agency to determine if the agency has violated the act.

This bill would provide that a participating public agency, for which the commission has, on 3 occasions within a 10-year period, determined that the agency has not complied with the bidding procedures authorized by the act, is prohibited from using those bidding procedures for a period of 5 years, as specified.

Ch. 193 (AB 2753) De La Torre Local government: cities: recall of governing officers.

Existing law specifies the terms of office for the governing officers and employees of cities, including the election and removal, term, and compensation.

This bill would specify that during the period between the commencement of a recall election of an elective officer of a city and the certification of the election results, or if the recall prevails, upon the qualification of a successor, the elective officer sought to be recalled shall not expend, or participate in any action that would commit to expend, city funds.

Ch. 194 (AB 2751) Wyland Development project fees: use.

The Mitigation Fee Act authorizes a local agency to charge a variety of fees, dedications, reservations, or other exactions in connection with the approval of a development project, as defined. Existing law provides that in specified actions imposing a fee as a condition of approval of a development project by a local agency, the local agency shall determine how there is a reasonable relationship between the amount of the fee and the cost of the public facility or portion of the public facility attributable to the development on which the fee is imposed.

This bill, except as specified, would prohibit a fee from including the costs attributable to existing deficiencies in public facilities.

Ch. 195 (AB 2755) Blakeslee All-terrain vehicles: operating violations.

(1) Existing law prohibits a person under 14 years of age from operating an all-terrain vehicle on public lands of this state unless that person satisfies specified safety conditions and, in addition, is accompanied by and under the direct supervision of a parent or guardian, or is accompanied by and under the direct supervision of an adult who is authorized by the parent or guardian to provide that supervision. Existing law makes a violation of the above an infraction punishable by a specified fine.

This bill would prohibit a parent or guardian of a child who is under 14 years of age and an adult who is authorized by the parent or guardian to supervise that child, from granting permission to, or knowingly allowing, that child to operate an all-terrain vehicle in a manner that violates the above-described prohibition, thereby imposing a state-mandated local program by creating a new crime. The bill would require a court, upon a 1st conviction, to either impose a fine of \$125 or order the person to take or retake and complete an all-terrain vehicle safety training course, and would authorize the court to order the child to also attend and complete that course, as specified. The person or child who is so ordered would be

required, upon completion of the course, to provide the court with a copy of the all-terrain vehicles safety certificate issued as a result of that completion. The bill would impose fines upon a 2nd or subsequent conviction.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 196 (AB 2815) Bogh Service contracts: definitions.

Existing law provides that the primary manufacturer is the obligor for the purposes of a warranty that covers damage to a automobile due to failure of the lubricant.

This bill would require that specified factors used to define “manufacturer” be used to produce the product.

Existing law, for purposes of service contracts, defines the circumstances under which a contract covers defects in materials and workmanship in motor vehicles and watercraft, as defined.

This bill would change the definition of “motor vehicle” to include motor vehicles operated off-road and “watercraft” to include certain trailers and to revise provisions that exclude certain large vehicles.

Existing law requires that a vehicle service contract be filed with, and approved by, the Insurance Commissioner before it is used. The commissioner may authorize the use of the filed policy if, among other factors, the company maintains a ratio of direct written premiums to surplus as to policyholders and paid-in capital of not less than 3 to 1.

This bill would change the ratio to not more than 3 to 1.

Ch. 197 (AB 2882) De La Torre Infrastructure financing districts.

Existing law authorizes the legislative body of a city to designate one or more proposed infrastructure financing districts and prescribes the procedures, including elections, necessary to establish those districts.

This bill would provide that if a city that is a member of the Orangeline Development Authority establishes an infrastructure financing district for the purpose of providing funding for public transit facilities, that city may provide some or all of this funding to the Orangeline Development Authority for the purposes of furthering public transit facilities within the Orangeline Development Authority, including those facilities related to magnetic levitation.

Ch. 198 (AB 3073) Committee on Utilities and Commerce Public utilities: telecommunications.

Under existing law, the Federal Communications Commission licenses and partially regulates providers of commercial mobile radio service, including providers of cellular radiotelephone service (cellular), broadband Personal Communications Services (PCS), digital Specialized Mobile Radio (SMR) services (collectively, mobile telephony service providers), providers of mobile data access to handheld devices and laptop computers, and paging carriers offering services on pagers and two-way messaging devices (collectively, mobile data services), and certain mobile satellite services. Under existing law, no state or local government may regulate the entry of, or the rates charged by, any commercial mobile radio service, but a state or local government is generally not prohibited from regulating the other terms and conditions of commercial mobile radio service.

Existing law authorizes the Public Utilities Commission to regulate telecommunications services and rates of telephone corporations, except to the extent regulation of commercial mobile radio service conflicts with specified federal law, and to require telephone corporations to provide customer services. The existing Public Utilities Act authorizes the commission to exempt commercial mobile radio service, as defined, from any tariff-filing

requirement if the rates for commercial mobile radio service are not subject to regulation pursuant to a specific federal law and provides that any provision of the act that is in conflict with a specified federal law does not apply to commercial mobile radio service to the extent of the conflict.

This bill would define the terms “commercial mobile radio service,” “mobile data service,” “mobile paging service,” “mobile satellite telephone service,” and “mobile telephony service” within the Public Utilities Act. The bill would replace certain references to commercial mobile radio service, with mobile telephony service. The bill would replace certain references to wireless and cellular telephone corporations, with providers of mobile telephony and mobile satellite telephone service. The bill would renumber certain definitions within the Public Utilities Act to place them in alphabetical order. The bill would make other conforming and nonsubstantive changes.

#### Ch. 199 (AB 790) Yee Real estate licensees.

Existing law, the Real Estate Law, provides for the licensing and regulation of real estate licensees by the Real Estate Commissioner, and makes a willful violation of the law a crime. Existing law authorizes the commissioner to suspend, revoke, or deny a license to a person who commits certain acts, including the willful use of specified terms, including “realtor,” without authority to do so.

This bill would also prohibit a person from knowingly authorizing, directing, conniving at, or aiding in the publication, advertisement, distribution, or circulation of any material false statement or representation concerning his or her designation or certification of special education, credential, or trade organization membership.

Because a willful violation of the bill would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 200 (AB 2165) La Suer Postsecondary education: intercollegiate athletics.

(1) Existing law, the Donahoe Higher Education Act, sets forth, among other things, the missions and functions of California’s public and independent segments of higher education. Provisions of the act apply to the University of California only to the extent that the Regents of the University of California, by resolution, act to make them applicable. Existing provisions of the act prohibit a person from offering, promising, or attempting to give any money or other thing of value to a student athlete to induce, encourage, or reward the student athlete’s application, enrollment, or attendance at a public or private institution of higher education.

Existing law authorizes the governing board of a community college district to enforce rules and regulations relating to eligibility for and participation in intercollegiate athletics.

This bill, notwithstanding the provision that authorizes community college district governing boards to enforce rules and regulations relating to intercollegiate athletics or any other provision of law, would prohibit any student athlete enrolled at any campus of the University of California, the California State University, or the California Community Colleges from participating as a member of any intercollegiate athletic team, or as a participant in any intercollegiate athletic event, if he or she, at any time after his or her enrollment as a college or university student, is prosecuted as an adult and is convicted of any of several specified crimes.

The bill would provide that an institution to which the bill applies may rely upon the declaration of a student athlete to determine his or her eligibility for participation in intercollegiate athletics with respect to the requirements of the bill. The bill would authorize specified disciplinary action against a student who knowingly provides a false declaration,

and would require any declaration obtained from a student athlete pursuant to the bill to contain a notice advising the student that he or she may be subject to disciplinary action if the student knowingly provides false information in the declaration. The bill would also authorize an institution to which the bill applies to seek, at the discretion of its appropriate administrators, independent confirmation of the truth of any and all of the statements of a student athlete taken pursuant to the bill.

The bill would provide that a student convicted of a violation of any of the crimes set forth in the bill is eligible to participate as a member of an intercollegiate athletic team after he or she successfully completes the entire term of his or her probation or successfully completes his or her assigned prison term and parole period, if any.

Pursuant to existing law, the bill would apply to the University of California only to the extent that the regents act, by resolution, to make the bill applicable.

To the extent that the bill would create new duties for community college districts with respect to determining the eligibility of students for intercollegiate athletics, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 201 (AB 2890) Ridley-Thomas Lenders: employees.

The California Finance Lenders Law provides for the regulation and licensure of finance lenders and brokers by the Commissioner of Corporations. The California Residential Mortgage Lending Act provides for the regulation and licensure by the commissioner of persons engaging in the business of making residential mortgage loans or servicing residential mortgage loans.

This bill would authorize the commissioner to suspend or bar a person from being employed by a licensee under the California Finance Lenders Law or the California Residential Mortgage Lending Act if the commissioner finds that the person has committed certain acts for the purpose of misleading the public regarding his or her qualifications or experience.

#### Ch. 202 (SB 1609) Simitian Reverse mortgages: annuities.

Existing state and federal law regulate the activities of financial institutions. Existing state law defines and regulates reverse mortgage loans and provides a disclosure notice that a lender must provide an applicant, which informs the applicant that a reverse mortgage is a complex financial arrangement and advises the applicant of the wisdom of seeking financial counseling before entering the agreement.

This bill would prohibit a lender from requiring the purchase of an annuity as a condition of obtaining a reverse mortgage loan. The bill would prohibit a reverse mortgage lender or a broker arranging a reverse mortgage loan from offering an annuity to the borrower or referring the borrower to anyone for the purchase of an annuity prior to the closing of the loan or before the expiration of the borrower's right to rescind. The bill would, among other things, require a lender to refer a prospective borrower to a housing counseling agency for counseling, as specified, prior to accepting a final and complete application for a reverse mortgage or assessing any fees, and would prohibit a lender from accepting a full and complete application for a reverse mortgage loan or assessing any fees without receiving certification, as specified, that the borrower had received this counseling. The bill would make changes to the disclosure notice provided to an applicant for a reverse mortgage and would require a lender to provide a specified list of independent loan counselors.

Existing law requires any person engaged in a trade or business who negotiates primarily in Spanish, Chinese, Tagalog, Vietnamese, or Korean in the course of entering into specified contracts to deliver to the other party, prior to the execution of a contract or agreement, a translation of it in the language in which it was negotiated.

This bill would include contracts for reverse mortgages within these provisions. The bill would require a lender to ensure compliance with these provisions in the case of brokered loans.

Ch. 203 (AB 1910) Aghazarian Disabled person and disabled veteran license plates.

(1) Under existing law, the Department of Motor Vehicles is required, upon application and without additional fees, to issue a special license plate or plates to a disabled person or disabled veteran, in accordance with procedures adopted by the department. Existing law also provides that organizations and agencies involved in the transportation of disabled persons or disabled veterans may apply for a distinguishing placard for each vehicle that is used for the purpose of transporting disabled persons or disabled veterans.

This bill would allow organizations or agencies that are involved in the transportation of disabled persons or disabled veterans to be issued a special license plate or plates for each vehicle that is used solely for the purpose of transporting those persons. The bill would limit the issuance of distinguishing placards, as described above, to each vehicle that is used solely for the purpose of transporting disabled persons or disabled veterans.

(2) Existing law requires a person who parks a vehicle in a space reserved for disabled individuals, upon request, to present to a peace officer or person authorized to enforce parking laws, identification and evidence of the issuance of a disabled placard or plate to that individual. A failure to present such identification and evidence is an infraction.

This bill, in addition, would require that person to present identification and evidence of the issuance of a disabled placard or plate to the vehicle if that vehicle is used by an organization or agency for the sole purpose of transporting disabled persons or disabled veterans. By expanding the scope of a crime, the bill would impose a state-mandated local program.

(3) This bill also would incorporate additional changes in Section 5007 of the Vehicle Code proposed by AB 2120, to be operative only if AB 2120 and this bill are both enacted and become effective on or before January 1, 2007, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 204 (AB 2002) La Malfa Highway signs: veterans.

Existing law authorizes local authorities, with respect to highways under their respective jurisdictions, to place and maintain, or cause to be placed and maintained, signs to recognize the sponsors of the Adopt-A-Riverway Program.

This bill would authorize county officials, with respect to any state or county highway within their respective jurisdictions and upon a resolution adopted by the respective county board of supervisors, to place and maintain, or cause to be placed and maintained, at or near the county line and at county expense, signs stating, or to add to their existing signs, the statement "Where We Honor Veterans." The bill would require the approval of the Department of Transportation if those signs are on a state highway.

Ch. 205 (AB 2740) La Malfa School facilities: usage on Veterans Day.

Existing law requires that the public schools close on specified holidays, including Veterans Day, to be observed on November 11, except as specified. Existing law authorizes the governing board of a school district, by adoption of a resolution, to revise the date upon which the schools of the district close in observance of any of those specified holidays, except

Veterans Day. Existing law prohibits the governing board of a school district from requesting a waiver of the requirement to close on Veterans Day from the State Board of Education.

This bill would provide that those provisions do not prohibit a school district from authorizing its facilities or grounds to be used in accordance with a specified provision on those days on which the public schools are closed.

Existing law permits specified citizens, organizations, clubs, and associations formed for recreational, educational, political, economic, artistic, or moral activities of the public school districts to engage in supervised recreational activities or to meet and discuss, from time to time, as they may desire, any subjects and questions which in their judgment pertain to the educational, political, economic, artistic, and moral interests of the citizens of the applicable communities, at a civic center located at a public school facility or grounds. Existing law authorizes the governing board of a school district to grant the use of school facilities or grounds as a civic center upon the terms and conditions the board deems proper, subject to the limitations, requirements, and restrictions of the applicable law, for specified purposes. Existing law vests the management, direction, and control of school facilities, as specified, in the governing board of the applicable school district and requires the board to promulgate all necessary rules and regulations, as specified.

This bill would add veterans' organizations, as defined, to the list of organizations that may meet at a civic center located at a public school facility. The bill would add a ceremony, patriotic celebration, or related educational assembly conducted by a veterans' organization to the list of purposes for which a school district is permitted to grant use of the school facilities or grounds.

Ch. 206 (AB 2777) Huff Military and veterans: veterans' organizations.

(1) Existing law prohibits the sale, representation, or manufacture of poppies, badges, or labels represented as being sponsored, endorsed, or offered by a veterans' organization, as defined, when the poppy, badge, or label is not sponsored, endorsed, or offered by a veterans' organization. Existing law also makes it unlawful for any person to represent, directly or indirectly, that an act of solicitation is sponsored, endorsed, or made by or at the request of a veterans' organization, when it is not sponsored, endorsed, or made by a veterans' organization. Any person who violates these prohibitions is guilty of a misdemeanor.

This bill would expand the definition of a veterans' organization, as provided, thereby imposing a state-mandated local program by expanding the definition of a previously existing crime.

(2) Existing law prohibits the willful wearing or use of a badge, lapel button, rosette, or other recognized insignia, as provided, of the American Legion, Disabled American Veterans, or Veterans of Foreign Wars, unless the person is entitled to wear or use the badge, lapel button, rosette, or other insignia under the rules and regulations and with the express permission of the American Legion, Disabled American Veterans, or Veterans of Foreign Wars. Violation of this prohibition is punishable as a misdemeanor, as described.

This bill would expand the list of veterans' organizations included in the prohibition, thereby imposing a state-mandated local program by expanding the scope of an existing crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 207 (AB 2893) Mountjoy Sex offenders: child custody and visitation.

Existing law requires a person convicted of certain sex offenses to register with the local law enforcement officer of the city or county where he or she resides or is located, as specified.

Existing law prohibits a person from being granted physical or legal custody of, or unsupervised visitation with, a child if the person is required to be registered as a sex offender if the victim was a minor or if anyone residing in the person's household is required to register as a sex offender because of a felony conviction in which the victim was a minor, unless the court finds that there is no significant risk to the child and states its reasons in writing or on the record.

This bill would provide that the child may not be placed with the person unless the court states, in writing or on the record, the reasons for its finding that there is no significant risk to the child.

Ch. 208 (AB 2196) Spitzer Child day care: information: registered sex offenders.

The existing California Child Day Care Facilities Act provides for the licensure and regulation of specified types of child day care facilities and day care homes responsible for the regular care of children. Existing law requires each child day care facility to post a written notice accessible to parents and guardians. A willful violation of these provisions is a crime.

This bill would require the notice to include information stating that the registered sex offender database is available to the public via a specified Internet Web site maintained by the Department of Justice. The bill would require the licensee to provide a copy of the Family Child Care Home Notification of Parents' Rights prepared by the State Department of Social Services, and would grant the provider immunity from liability.

By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 209 (AB 1369) Nunez State employees: memoranda of understanding.

(1) Under existing law, a provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees that requires the expenditure of funds does not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of memoranda of understanding entered into between the state employer and State Bargaining Units 1, 3, 4, 11, 14, 15, 17, 20, and 21, and would provide that these provisions will become effective even if these provisions are approved by the Legislature in legislation other than the annual Budget Act.

The bill would provide that provisions of the memoranda of understanding approved by this bill that require the expenditure of funds will not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would authorize either party to reopen negotiations on all or part of the memoranda of understanding if the Legislature does not approve or fully fund any provision of the memoranda of understanding that requires the expenditure of funds.

(2) The Public Employees' Retirement Law provides a comprehensive set of rights and benefits based upon age, service credit, and final compensation. Existing law defines final compensation variously for different member classifications and bargaining units and, in this regard, defines final compensation for a state member for the purpose of calculating retirement benefits as the highest annual average compensation earnable by the member during a designated 12-month period.

This bill would provide that final compensation for a person who becomes a state member, as specified, on or after January 1, 2007, and who is represented by State Bargaining Unit 1, 3, 4, 11, 14, 15, 17, 20, or 21 means the highest annual average compensation earnable by the member during a designated 36-month period.

(3) The annual Budget Act appropriates specified amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds, for state employee compensation.

This bill would appropriate \$343,635,000 from those funds for state employee compensation, in augmentation of the Budget Act of 2006.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 210 (SB 357) Perata State employees: memoranda of understanding: State Bargaining Units 12 and 13.

(1) Under existing law, a provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees that requires the expenditure of funds does not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of memoranda of understanding entered into between the state employer and State Bargaining Units 12 and 13, and would provide that these provisions will become effective even if these provisions are approved by the Legislature in legislation other than the annual Budget Act.

This bill would further provide that provisions of the memoranda of understanding approved by this bill that require the expenditure of funds will not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would authorize the state employer and the affected employee organization to reopen negotiations on all or part of the memoranda if funds for those provisions are not specifically appropriated by the Legislature.

(2) The Public Employees' Retirement Law provides a comprehensive set of rights and benefits based upon age, service credit, and final compensation. Existing law defines final compensation variously for different member classifications and bargaining units and, in this regard, defines final compensation for a state member for the purpose of calculating retirement benefits as the highest annual average compensation earnable by the member during a designated 12-month period.

This bill would provide that final compensation for a person who becomes a state member, as specified, on or after January 1, 2007, and who is represented by State Bargaining Units 12 or 13 means the highest annual average compensation earnable by the member during a designated 36-month period.

(3) Existing law entitles the survivor of a state miscellaneous member in State Bargaining Unit 12 employed by the Department of Transportation who is killed as a result of injury arising out of, and in the course of, his or her duties, to a special death benefit.

This bill would instead allow for that special death benefit only if the member's death occurred as a direct result of injury arising out of, and in the course of, those duties while working on the California highway system performing highway maintenance.

(4) This bill would also appropriate \$47,756,000 from the General Fund and other unallocated funds for expenditure for the 2006–07 fiscal year for state employee compensation in augmentation of the Budget Act of 2006, as specified.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 211 (AB 172) Chan Child care: state preschool programs.

Existing law, the Child Care and Developmental Services Act, establishes various full- and part-time programs for a comprehensive, coordinated, and cost-effective system of developmental services for children to age 13 and their parents. Other existing law, the Kindergarten Readiness Pilot Program, permits, until January 1, 2014, school districts to participate in the program to provide kindergarten preparedness opportunities to increase a child's readiness for school. Existing law requires the Superintendent of Public Instruction to administer state preschool programs including part-time day and preschool appropriate programs for prekindergarten children 3 to 5 years of age.

This bill would require the Superintendent of Public Instruction and the State Department of Education to administer prekindergarten and family literacy programs in accordance with specified funding and other requirements. The bill would require a participating program to provide specified child development and family literacy services as a condition of receiving funding. The bill would require a local educational agency on behalf of one or more participating programs to select a program coordinator who may be assigned one or more specified duties. The bill would make an appropriation by making \$50,000,000 of the funds appropriated in a specified provision of the Budget Act of 2006 for child development and preschool programs available for expenditure by the Superintendent for purposes of prekindergarten and family literacy programs, as specified. The bill would require the Superintendent to conduct an evaluation of the effectiveness of those programs, as specified. The bill would also make an appropriation by making \$5,000,000 of unearned contract funds appropriated in a specified provision of the Budget Act of 2005 for general child care programs available for expenditure by the Superintendent to provide direct child care services for children in participating classrooms, as specified. The bill would require the Superintendent to encourage participating providers to offer full-day services through a combination of part-day preschool slots and part-day general child care and development programs.

This bill would appropriate \$150,000 from the General Fund to the State Department of Education for the 2006–07 fiscal year to administer specified child development and preschool programs.

Ch. 212 (AB 326) Blakeslee Telephone corporations: universal service.

Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including telephone corporations. Existing law authorizes the commission to fix just and reasonable rates and charges. Existing law establishes the California High-Cost Fund-A Administrative Committee Fund in the State Treasury and requires that the moneys in the fund be expended, upon appropriation, only to accomplish a specified telecommunications universal service program. Existing law provides that moneys in the fund are the proceeds of rates and are held in trust for the benefit of ratepayers and to compensate telephone corporations for their costs of providing universal service.

This bill would make legislative findings and declarations that, because maintenance of universal public switched telephone network service throughout the state and maintenance of public safety answering points in high-cost areas of the state rely on appropriations from the fund, maintaining adequate funding levels for the fund is critical to public health and safety.

Ch. 213 (AB 1482) Canciamilla School district bonds.

Existing law allows a school district governing board to sell bonds at a negotiated sale or by competitive bidding. Existing law requires the issuer of a proposed or actual new debt issue of state or local government to report specified information to the California Debt and Investment Advisory Commission (CDIAC).

This bill would require a school district governing board, prior to selling bonds, to adopt a resolution, as an agenda item at a public meeting, that includes several specified items, including, among others, express approval of the method of sale. The bill would require, after the sale of the bonds, the governing board to present and disclose the actual cost information at its next scheduled public meeting and to submit an itemized summary of the costs of the bond sale to the CDIAC. The bill would require the governing board to ensure that all necessary information and reports regarding the sale or planned sale of bonds by the school district it governs are submitted to the CDIAC in compliance with a specified provision.

Ch. 214 (AB 1959) Tran Corporations.

Existing law sets forth requirements for the governance of various business entities, including, but not limited to, corporations, partnerships, limited liability companies, and capital access companies. Existing law requires specified corporations, partnerships, and limited liability companies to prepare a specified annual report, consisting of, but not limited to, a balance sheet, an income statement, and a statement of changes in financial position accompanied by any report of independent accountants. Existing law requires capital access companies to prepare a specified audit report consisting of, but not limited to, financial statements, including balance sheets, statements of income or loss, statements of changes in capital accounts, and statements of changes in financial position prepared by an independent certified public accountant.

This bill would instead require the specified annual report to consist of a balance sheet, an income statement, and a statement of cashflows accompanied by any report of independent accountants. The bill would specify that, with regard to the specified audit report for capital access companies, financial statements also include statements of cashflows. The bill would make related, conforming, and technical changes.

Ch. 215 (AB 2034) Spitzer Donative transfers.

Existing law provides that, except as specified, no provision or provisions of an instrument are valid to make a donative transfer to certain disqualified persons. Existing law provides that the above provision does not apply if the instrument is reviewed by an independent attorney who counsels the client about the nature and consequences of the intended transfer, attempts to determine if the intended consequence is the result of fraud, menace, duress, or undue influence, and signs and delivers to the transferor a certificate of independent review.

This bill would require the California Law Revision Commission to study the operation and effectiveness of provisions restricting donative transfers to certain classes of individuals, and to recommend revisions and improvements to those provisions. The bill would require the commission to report its findings to the Legislature on or before January 1, 2009.

Ch. 216 (AB 2241) Committee on Public Employees, Retirement and Social Security State civil service: skills-based certification.

Existing civil service law provides that eligible employment lists shall be established as a result of free competitive examinations open to persons who lawfully may be appointed to any position within the class for which these examinations are held and who meet the minimum qualifications, as specified.

This bill would permit the State Personnel Board to authorize the use of skills-based certification, as defined, for information technology classifications, if specified conditions are satisfied. The bill would also require the board to promulgate regulations specifying how skills-based certification shall be implemented.

Ch. 217 (AB 2390) Committee on Utilities and Commerce Public Utilities Commission: reporting requirements: rehearings and judicial review.

(1) Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations, as defined. Under the Public Utilities Act, the commission requires electrical corporations to identify a separate rate component to fund programs that enhance system reliability and provide in-state benefits. This rate component is a nonbypassable element of local distribution and collected on the basis of usage. The funds are collected, in part, to support cost-effective energy efficiency and conservation activities.

This bill would require the commission to report to the Legislature by July 15, 2009, and triennially thereafter, on the energy efficiency and conservation programs overseen by the commission, as specified. This bill would also recast various requirements that the commission prepare and submit a specified account, work plan, and report at various times

to require the plan, accounting, and report to be submitted annually to the Governor and the Legislature no later than February 1 of each year, as specified.

(2) Existing law, after any order or decision has been made by the Public Utilities Commission, authorizes any party to the action or proceeding, or any stockholder or bondholder or other party pecuniarily interested in the public utility affected, to apply for a rehearing with respect to any matter determined in the action or proceeding and specified in the application for rehearing. Existing law prohibits a cause of action arising out of any order or decision of the commission from accruing in a court to a corporation or person unless the corporation or person has filed an application to the commission for a rehearing within a specified amount of time after the date of issuance of an order or decision. Existing law defines date of issuance, for the purposes of these provisions, to mean the date on which the commission mails the order or decision to the parties to the action or proceeding.

This bill would require the commission to notify the parties of the issuance of an order or decision by either mail or, with the consent of an affected party, by electronic transmission, as specified. The bill would revise the definition of "date of issuance" to mean the mailing or electronic transmission date that is stamped on the official version of the order or decision.

(3) Existing law generally authorizes an aggrieved party to petition for a writ of review of an order or decision of the commission within 30 days after the commission issues its decision denying an application for a rehearing, or, if the commission grants the application, within 30 days after the commission issues its decision on rehearing. Existing law specifies that the issuance of a decision or the granting of an application, for the purposes of these provisions, is to be construed to have occurred on the date on which the commission mails the decision or the granting of the application to the parties to the action or proceeding. Existing law requires the petition for review to be served on the executive director of the commission.

This bill would specify that the issuance of a decision or the granting of an application is to be construed to have occurred on the date of issuance, as defined, for the purposes of these provisions and certain other provisions setting forth judicial review procedures for specified orders or decisions of the commission. The bill, in addition, would require the petition for review to be served on the general counsel of the commission.

#### Ch. 218 (AB 2619) Daucher Orange County Water District.

(1) The Orange County Water District Act requires the Board of Directors of the Orange County Water District to appoint an assessor and tax collector and authorizes the board to appoint the county assessor and county tax collector of the County of Orange (county) to perform those functions on behalf of the district. The act authorizes the board of directors to appoint and employ attorneys, engineers, and such other officers and employees for the district that the board deems necessary, to prescribe their duties, powers, and compensation, and provides that officers and employees of the district hold office at the pleasure of the board.

This bill would require the county assessor and county tax collector to perform the duties of those respective officers on behalf of the district. The bill would delete the provision relating to the service of the officers and employees at the pleasure of the board.

(2) The act requires the board of directors of the district to furnish the board of supervisors and auditor of the county, by the first meeting of the board of supervisors in August of each year, with an estimate in writing of the amount of money needed for the initiated or authorized purposes of the district for the current fiscal year. The act provides that this estimate, less available funds on hand, shall be deemed sufficient to provide the necessary funds to carry out the purposes of the district, excluding those projects or works that the board of directors of the district deems advisable or necessary to be financed by bonded indebtedness.

This bill would delete the provision declaring that the estimate, less available funds on hand, shall be deemed sufficient to provide the necessary funds to carry out the purposes of

the district, excluding those projects or works that the board of directors of the district deems advisable or necessary to be financed by bonded indebtedness.

(3) The act requires the board of directors of the district, before certain purposes and projects are instituted and carried out, to determine whether the purpose or project is feasible and necessary and of general benefit to the lands in the district, and to estimate and determine the amount of money necessary to be raised for each purpose or project.

This bill would delete acquiring water and water rights from the purposes or projects subject to this requirement and would add acquiring water treatment or purification facilities, pumping stations, injection wells, and other facilities, to those purposes or projects subject to this requirement.

(4) The act requires the board of directors of the district to cause engineering investigations, surveys, examinations, drawings, plans, and reports to be made to furnish the proper basis for assessing the purposes or projects and estimating the cost of the purposes or projects. The act requires that all engineering investigations, surveys, examinations, drawings, plans, and reports be made under the direction of, and certified by, a competent engineer selected by the directors.

This bill would require that all engineering investigations, surveys, examinations, drawings, plans, and reports be made under the direction of, and certified by, a licensed engineer or geologist. The bill would require that all engineering investigations, surveys, examinations, drawings, plans, and reports be included in a report of a licensed engineer or geologist, and be approved by the board of directors prior to the beginning of work on the purpose or project.

By establishing requirements on the district, the bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 219 (AB 2664) Houston Health studio contracts.

Existing law regarding contracts for health studio services authorizes the consumer to cancel a health studio services contract within certain timeframes, based on the amount of payment required by the contract, as specified. Existing law also exempts from those provisions a health studio entering into a contract for health studio services that does not require payment in excess of \$1,000, including initiation or initial membership fees and exclusive of interest or finance charges.

This bill would revise the amount of the above exemption limitation by increasing it to \$1,500.

#### Ch. 220 (AB 2720) Spitzer Radiologic technology.

Existing law requires any person who performs nuclear medicine technology to meet the standards of competence established by the State Department of Health Services. Nuclear medicine technology is defined to mean the technology applied under the supervision of a physician and surgeon or a licensed clinical bioanalyst, when performing in vitro procedures, that pertains to the utilization of radiopharmaceuticals for the diagnosis and treatment of disease in humans. Existing law exempts specified persons from these standards.

This bill would also exempt from these standards a person who holds a current, valid certificate in diagnostic radiologic technology and performs a positron emission tomography scan only on a dual mode machine on which both a nuclear medicine procedure, including a positron emission tomography scan, and a computerized tomography scan may be performed if specified conditions are met. This bill would make the violation of these conditions a misdemeanor.

Existing law requires the State Department of Health Services to provide for the certification of radiologic technologists. Existing law makes it unlawful for any person to administer or use diagnostic or therapeutic X-ray on human beings in the state unless the person is certified as a radiologic technologist or is granted a permit by the department to conduct radiologic technology, as specified, is acting within the scope of the certificate or permit, and acts under the supervision of a licentiate of the healing arts.

This bill would authorize a person who meets the standards of competence for the performance of nuclear medicine to perform a computerized tomography scan only on a dual mode machine on which both a positron emission tomography scan and a computerized tomography scan may be performed if specified conditions are met. This bill would make the violation of these conditions a misdemeanor.

By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 221 (AB 2864) Harman Civil actions: time of commencing.

Existing law establishes a time limitation for commencing an action for liability against a person after that person's death, if the cause of action survives, and sets that time limitation within one year after the date of death. This limitations period may not be tolled or extended for any reason, except for certain claims, including creditor claims, payment of claims, debts, and expenses from revocable trusts, and no contest clauses.

Under existing law, if a person has a claim that arises from a promise or agreement with a decedent to distribution from an estate or trust or under another instrument, whether the promise or agreement was made orally or in writing, an action to enforce the claim to distribution may be commenced within one year after the date of death, and the limitations period that would have been applicable does not apply. This limitations period may not be tolled or extended for any reason, except as provided in relation to a no contest clause.

This bill would clarify that these limitations periods may be extended if the last day of the period falls on a holiday, as specified.

#### Ch. 222 (AB 2868) Bogh Physical therapists.

Existing law, the Physical Therapy Practice Act, provides for the licensure and regulation of physical therapists by the Physical Therapy Board of California in the Department of Consumer Affairs, and makes a violation of the act's provisions a crime. Existing law prohibits a physical therapist from using the prefix "Dr.," the word "doctor," or any suffix or affix indicating that the person is a doctor or a physician and surgeon.

This bill would authorize a licensed physical therapist holding a doctoral degree in physical therapy or in a related health science, after that term is defined in regulations adopted by the board, to use the term "doctor" and doctoral degree abbreviations, as specified, with the licensee's name if certain requirements are met.

#### Ch. 223 (SB 1438) Figueroa Healing arts: reporting requirements.

Existing law creates the Medical Board of California (Medical Board) and the Osteopathic Medical Board of California (Osteopathic Board), which issue physician and surgeons' certificates to qualified applicants and regulate their practice. Existing law also creates the California Board of Podiatric Medicine (Podiatric Board) within the jurisdiction of the Medical Board, and the Division of Licensing of the Medical Board issues a certificate to practice podiatric medicine to qualified applicants while the Podiatric Board regulates their practice. Existing law requires an insurer providing professional liability insurance to a physician and surgeon and a governmental agency that self-insures a physician and surgeon or, if uninsured, the physician and surgeon himself or herself, to report information

concerning settlements, arbitration awards, and judgments in malpractice actions to the practitioner's licensing board. Under existing law, those parties and a podiatrist are also required to report this information to the practitioner's licensing board if the settlement, arbitration award, or judgment is entered against, or paid by, the practitioner's employer, as defined.

This bill would recast these reporting provisions and would specify their application to actions or claims involving a podiatrist, requiring that they be reported to the Podiatric Board.

Existing law requires a physician and surgeon to report to his or her licensing board the bringing of an indictment or information charging a felony against him or her, but only requires the reporting of misdemeanor convictions that are substantially related to the qualifications, functions, or duties of the licensee.

This bill would require that all misdemeanor convictions be reported. The bill would also impose the reporting requirement on podiatrists.

Existing law requires the clerk of a court that renders a judgment that a physician and surgeon either committed a crime or is liable for any death or personal injury caused by negligence, error or omission in practice, or the rendering of unauthorized professional services to report the judgment to the person's licensing agency.

This bill would delete this requirement with regard to a judgment that a licensee committed a crime, and would also impose the requirement with respect to a judgment against a podiatrist.

Existing law provides for study of the peer review process of healing arts practitioners by an independent entity, to be completed by July 31, 2007.

This bill would classify the case files and other information obtained by the independent entity as confidential, and would provide that information obtained or generated by the independent entity is not subject to discovery or admissible in a court proceeding. The bill would require the independent entity and its employees and contractors to assert these protections. The bill would also require the independent entity to notify the peer review body of actions taken by that body that the entity determines should have been reported to the appropriate licensing agency. The bill would extend the completion date of the study by the independent entity to July 31, 2008.

Existing law prohibits the exclusion of relevant evidence in a criminal proceeding except as provided by a statute enacted by a  $\frac{2}{3}$  vote of the Legislature.

Because this bill would provide that certain information is not admissible in a court proceeding, it requires a  $\frac{2}{3}$  vote of the membership of each house of the Legislature.

Existing law requires, to the extent funds are available, the Little Hoover Commission to study the role of public disclosure of physician misconduct.

This bill would instead require the California Research Bureau to conduct the study, and would specify additional requirements for that study.

Existing law requires the Medical Board of California to post certain information on the Internet, including misdemeanor convictions that are substantially related to the qualifications, functions, or duties of a physician and surgeon. The posting requirement does not become operative until legislation is enacted that defines or identifies misdemeanor convictions that are substantially related.

This bill would delete that contingency, and would require the board to post a misdemeanor conviction that results in a disciplinary action or an accusation that is not subsequently withdrawn or dismissed.

Existing law requires the Joint Legislative Audit Committee to select an independent entity to conduct a review of the Medical Board's financial status by January 1, 2007.

This bill would instead require the Bureau of State Audits to conduct the review by July 1, 2007.

Ch. 224 (SB 1607) Machado Property taxation.

(1) The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, “full cash value” is defined as the assessor’s valuation of real property as shown on the 1975–76 tax bill under “full cash value” or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. The California Constitution and existing property tax law exclude from a “change in ownership” specified property transfers between parents and their children and grandparents and their grandchildren. Existing law states the intent of the Legislature that the statute excluding from a “change in ownership” property transfers between parents and their children be liberally construed, as specified.

This bill would state the intent of the Legislature that the statute excluding from a “change in ownership” property transfers between grandparents and their grandchildren also be liberally construed, as specified.

(2) Existing property tax law, in accordance with the California Constitution, provides for a “welfare exemption” for property that is used exclusively for religious, hospital, or charitable purposes if certain conditions are met. Existing law specifies that exempt property does not lose that status under the welfare exemption because another organization also uses the property, if the other organization meets certain conditions, including a condition that the other organization’s owner submit an organizational clearance certificate with the county assessor, as specified.

This bill would instead require either the owner of the exempt property or the other organization that uses the exempt property to submit to the assessor a letter or ruling from the Franchise Tax Board or the Internal Revenue Service regarding the tax-exempt status of the organization under state or federal income tax laws, as provided.

(3) Existing law specifies that the property of a limited liability company may qualify for the welfare exemption if that company and its property meet all of the requirements set forth for that exemption.

This bill would clarify that a limited liability company that has a governmental entity or a nonprofit organization as a member may qualify as an exempt entity. This bill would also specify that each nonprofit tax-exempt member of a limited liability company is to submit to the State Board of Equalization a letter or ruling from the Franchise Tax Board or the Internal Revenue Service regarding the tax-exempt status of the member under state or federal income tax laws, as provided. This bill would also make technical changes regarding limited liability companies and the welfare exemption.

(4) Existing law establishes a veterans’ organization property tax exemption. Existing law prohibits the county assessor from approving a claim for the veterans’ organization exemption or welfare exemption until the claimant has received an organizational clearance certificate, as specified, from the State Board of Equalization. Existing law requires board staff to issue an organizational clearance certificate to an entity that qualifies for the property tax welfare exemption, but does not expressly require the board staff to issue an organizational clearance certificate to an organization that seeks the veterans’ organization exemption.

This bill would similarly require board staff to issue an organizational clearance certificate to an entity that qualifies for the veterans’ organization exemption. This bill also would make conforming changes to related provisions.

(5) The California Constitution generally exempts property that is owned by a local government from property taxation, except in certain instances. Existing law authorizes a county, city and county, or municipal corporation that owns taxable property to apply to the State Board of Equalization for a review, equalization, or adjustment of a property tax assessment relating to this property. Existing law requires that this application be submitted to the board on or before the later of either the 3rd Monday in July or within 2 weeks of the date upon which a county assessor delivers that assessment to the county auditor.

This bill would instead require that this application be submitted to the board on or before the later of either July 20 or within 2 weeks of the date upon which a county assessor delivers the assessment to the county auditor.

(6) By changing the manner in which county officials process claims for the veterans' organization exemption, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 225 (AB 1996) Bogh Testimony: sexual offenses: witnesses.

Existing law sets forth the procedure required in any prosecution for rape or other specified offenses, with certain exceptions, if evidence of sexual conduct of the complaining witness is offered to attack the credibility of the complaining witness. This procedure involves, among other things, the filing of a written motion by the defendant, accompanied by an affidavit filed under seal stating an offer of proof, and, if the court determines that the offer is sufficient, a hearing out of the presence of the jury regarding the offer of proof. At the conclusion of the hearing, the court may make an order stating what evidence may be introduced by the defendant.

This bill would extend the procedure described above to witnesses who are testifying as alleged victims of certain sexual offenses pursuant to specified evidence provisions.

#### Ch. 226 (AB 2135) Vargas Emergency services: liability.

Existing law provides that any person who is under the influence of an alcoholic beverage, any drug, or the combination of an alcoholic beverage and any drug, whose negligent operation of a motor vehicle, a boat or vessel, or a civil aircraft caused by that influence proximately causes any incident resulting in an appropriate emergency response, and any person whose intentionally wrongful conduct proximately causes an incident resulting in an appropriate emergency response, is liable for the expense of an emergency response by a public agency to the incident.

This bill would provide that any person 18 years of age or older who is convicted of making a false police report, and that false police report proximately causes an appropriate emergency response by a public agency, is liable for the expense of the emergency response made by the responding public agency to the incident. The bill would specify that a public agency shall be entitled to satisfaction for any judgment for expenses for an emergency response under specified conditions.

#### Ch. 227 (AB 2225) Mountjoy Amber alerts.

Existing law requires the activation of the Emergency Alert System if it has been reported to law enforcement that a child 17 years of age or younger or a person with a physical or mental disability has been abducted and it is determined that he or she is in imminent danger of serious bodily injury or death, as specified. Existing law also provides that any individual who reports an emergency that results or could result in the response of a public official of any city, county, or city and county, knowing that the report is false, is punishable by a fine not exceeding \$1,000, imprisonment in a county jail, or by both that fine and imprisonment.

This bill would expand these provisions to include an emergency that results in or could result in activation of the Emergency Alert System with the exception of reports made in good faith by a parent, legal guardian, or lawful custodian of a child.

Because this bill would change the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 228 (AB 2612) Plescia Crime.**

Existing law defines petty theft and provides that if the value of the money, labor, real or personal property taken is \$50 or less, the crime may be punishable by a fine not exceeding \$250, or by a fine not exceeding \$1,000, imprisonment in a county jail for a period not exceeding 6 months, or both that fine and imprisonment.

This bill would provide that it is a crime to take more than 25 copies of the current issue, as defined, of a free or complimentary newspaper if done to recycle, barter, or to deprive others of the opportunity to read the newspaper, or to harm a business competitor, punishable by a fine not to exceed \$250 for a 1st violation, and for a 2nd or subsequent violation by that fine or by a fine not exceeding \$500, imprisonment of up to 10 days in a county jail, or by both fine and imprisonment. This bill would provide exceptions to these provisions for owners, publishers, printers, deliverers, advertisers and others, as specified.

Because this bill would create a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 229 (AB 1165) Bogh State employees: State Bargaining Unit 8.**

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

Existing law requires any side letter, appendix, or other addendum to a properly ratified memorandum of understanding that requires the expenditure of \$250,000 or more related to salary and benefits and that is not already contained in the original memorandum of understanding or the Budget Act, to be provided by the Department of Personnel Administration to the Joint Legislative Budget Committee. Existing law requires the Joint Legislative Budget Committee to determine within 30 days after receiving the side letter, appendix, or other addendum if it presents substantial additions that are not reasonably within the parameters of the original memorandum of understanding and thereby requires legislative action to ratify the side letter, appendix, or other addendum.

This bill would approve provisions of an addendum to a memorandum of understanding entered into between the state employer and State Bargaining Unit 8, and would provide that those provisions that require the expenditure of funds shall not become effective unless funds for those provisions are specifically appropriated by the Legislature. The bill would provide that if funds for those provisions are not specifically appropriated by the Legislature, the state employer and the affected employee organization shall meet and confer to renegotiate the affected provisions.

This bill would further provide that the provisions of the addendum to the memorandum of understanding that require the expenditure of funds shall become effective even if those provisions are approved by the Legislature in legislation other than the annual Budget Act.

This bill would also appropriate \$23,667,000 from the General Fund to the Department of Forestry and Fire Protection for expenditure for the 2006–07 fiscal year for employee compensation in augmentation of the Budget Act of 2006, as specified, and would reduce a specified appropriation to that department by \$12,621,000.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 230 (AB 1835) Lieber Minimum wage.

Existing law requires establishment of a minimum wage for all industries of not less than \$5.75 per hour on and after March 1, 1998. Under existing law, the Industrial Welfare Commission is authorized to determine minimum wages in accordance with a prescribed procedure that includes the selection of wage boards to consider and make recommendations regarding wage issues. The current minimum wage for all industries is \$6.75 per hour.

This bill would increase the minimum wage to \$7.50 per hour, effective on and after January 1, 2007, and to \$8.00 per hour, effective on and after January 1, 2008.

This bill would require the Department of Industrial Relations to adjust upwards the permissible meals and lodging credits by the same percentage as the increases in the minimum wage and to amend and republish the Industrial Welfare Commission's wage orders to be consistent with this bill.

This bill would require every employer that is subject to an amended republished order required under the bill to post in a specified manner a copy of the order.

Ch. 231 (SB 750) Soto State employees: State Bargaining Unit 3.

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

Existing law requires any side letter, appendix, or other addendum to a properly ratified memorandum of understanding that requires the expenditure of \$250,000 or more related to salary and benefits and that is not already contained in the original memorandum of understanding or the Budget Act, to be provided by the Department of Personnel Administration to the Joint Legislative Budget Committee. Existing law requires the Joint Legislative Budget Committee to determine within 30 days after receiving the side letter, appendix, or other addendum if it presents substantial additions that are not reasonably within the parameters of the original memorandum of understanding and thereby requires legislative action to ratify the side letter, appendix, or other addendum.

This bill would approve provisions of an addendum to a memorandum of understanding entered into between the state employer and State Bargaining Unit 3, and would provide that those provisions that require the expenditure of funds shall not become effective unless funds for those provisions are specifically appropriated by the Legislature. The bill would provide that if funds for those provisions are not specifically appropriated by the Legislature, the state employer and the affected employee organization shall meet and confer to renegotiate the affected provisions.

This bill would further provide that the provisions of the addendum to the memorandum of understanding that require the expenditure of funds shall become effective even if those provisions are approved by the Legislature in legislation other than the annual Budget Act.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 232 (AB 2330) Arambula Small businesses: Office of Small Business Advocate.

Existing law provides for the Office of Small Business Advocate. The duties of the Office of Small Business Advocate include counseling small businesses regarding the relationship of small business to state government, as well as acting as an advocate on behalf of small businesses. Among other duties, the Office of Small Business Advocate is also required to consult with experts and authorities in the field of small business and is required to issue reports to the Governor and the Legislature.

This bill would require the Office of Small Business Advocate to commission a study of the costs of state regulations on small businesses that is parallel to the study on the impact of regulatory costs on small firms conducted by the federal Small Business Administration, and that would examine successful models from other states on identifying regulatory costs and developing potential alternative approaches. The office would also be required to make recommendations in this regard as well as to convene a small business advisory committee to provide advice on the study. The office would be required to submit the completed study, including the recommendations, to specified state entities no later than October 1, 2007.

This bill would appropriate \$85,000 from the General Fund to the Office of Small Business Advocate for the 2006–07 fiscal year, and would permit the Office of Small Business Advocate to carry forward any unused funds into the 2007–08 fiscal year, for purposes of this study.

Ch. 233 (AB 3058) Committee on Jobs, Economic Development, and the Economy Business disaster preparedness: small businesses.

Existing law sets forth the duties of the Office of Small Business Advocate.

This bill would amend the duties of the Office of Small Business Advocate to include advocacy on state policy and programs related to small businesses regarding disaster preparedness and recovery, including providing technical assistance.

This bill would also require the Office of Small Business Advocate to develop a Web-based handbook for small businesses on emergency preparedness, responses to emergencies, and recovery strategies.

This bill would also require the Office of Small Business Advocate to conduct at least 3 meetings before July 1, 2008, and annual meetings thereafter, to share best practices for small business disaster preparedness. The meetings would be held in consultation with small business organizations and would take place at different locations throughout the state.

The bill would appropriate \$100,000 to the Office of Small Business Advocate to implement the responsibilities imposed by this bill.

This bill would make various technical, nonsubstantive changes to correct obsolete cross-references.

Ch. 234 (SB 1436) Figueroa Small business: state agency information.

Existing law generally sets forth the procedures for the adoption and enforcement of regulations by state agencies, including regulations affecting small businesses in the state.

Governor's Reorganization Plan No. 2 of 2005 establishes the Department of Technology Services, and sets forth the duties of the department in overseeing the technology services of the state.

This bill would require the department to create a link to state agency Web sites at the State of California Internet portal specifically for the use of small businesses in accessing information regarding startup requirements and regulatory compliance applicable to the particular business.

The bill would require each state agency that significantly regulates small business or significantly impacts small business, to designate at least one individual who shall serve as a small business liaison for the agency, with specified duties that include reviewing and updating content on the agency Web site that is accessible through the small business link at the State of California Internet portal, and assisting the agency secretary, department director, or executive officer in ensuring that the procurement and contracting processes of the applicable entity are administered in order to meet or exceed the 25% small business participation goal.

Ch. 235 (AB 2226) Garcia Diabetes screening.

Existing law requires the governing body of each county or counties to establish a community child health and disability prevention program for the purpose of providing early

and periodic assessments of the health status of children in the county or counties. Existing law requires the health screening and evaluation part of each program to include for each child screening tests for vision, hearing, anemia, tuberculosis, diabetes, and urinary tract conditions. Existing law requires the governing board of each school district to exclude from school, for not more than 5 days, any 1st grade pupil who has not provided either a certificate documenting that the child has received the appropriate health screening and evaluation services or a waiver signed by the child's parents or legal guardian indicating that they do not want, or are unable, to obtain these services.

Existing law establishes, until January 1, 2008, a 3-year pilot program and requires any school district that volunteers to participate in the program to screen pupils for the risk of developing type 2 diabetes mellitus in conjunction with a screening program for scoliosis. Existing law specifies individuals who may perform and supervise the screenings, and prescribes procedures for the screening process, including, but not limited to, compliance with standards and procedures developed by the State Department of Education. The program provides for parent or legal guardian notification of any pupil suspected of being at elevated risk of developing type 2 diabetes mellitus, as described.

This bill would, on and after July 1, 2010, require each school district to provide a type 2 diabetes information sheet developed by the State Department of Education to the parent or legal guardian of incoming 7th grade pupils.

By increasing the duties of local officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 236 (AB 2384) Leno Nutrition: Healthy Food Purchase Pilot Program.

Existing law requires the State Department of Health Services to establish and implement, to the extent funds are available that are other than state general funds, a "5 A Day—For Better Health" program for the purpose of promoting public awareness of the need to increase the consumption of fruits and vegetables as part of a low-fat, high-fiber diet in order to improve health and prevent major chronic diseases, including diet-related cancers.

This bill would require the department to develop a "Healthy Food Purchase" pilot program to increase the sale and purchase of fresh fruits and vegetables in low-income communities, as specified.

The bill would condition implementation of the program in any fiscal year upon appropriation by the Legislature of federal or other funds for that purpose, and would repeal these provisions on January 1, 2011.

#### Ch. 237 (AB 386) Lieber State employees: memoranda of understanding: State Bargaining Units 16 and 19.

(1) Under existing law, a provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees that requires the expenditure of funds does not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of memoranda of understanding entered into between the state employer and State Bargaining Units 16 and 19, and would provide that these provisions will become effective even if these provisions are approved by the Legislature in legislation other than the annual Budget Act.

This bill would further provide that provisions of the memoranda of understanding approved by this bill that require the expenditure of funds will not take effect unless funds

for these provisions are specifically appropriated by the Legislature, and would authorize the state employer and the affected employee organization to reopen negotiations on all or part of the memoranda if funds for those provisions are not specifically appropriated by the Legislature.

(2) The Public Employees' Retirement Law provides a comprehensive set of rights and benefits based upon age, service credit, and final compensation. Existing law defines final compensation variously for different member classifications and bargaining units and, in this regard, defines final compensation for a state member for the purpose of calculating retirement benefits as the highest annual average compensation earnable by the member during a designated 12-month period.

This bill would provide that final compensation for a person who becomes a state member, as specified, on or after January 1, 2007, and who is represented by State Bargaining Units 16 or 19 means the highest annual average compensation earnable by the member during a designated 36-month period.

(3) The Public Employees' Retirement Law prescribes the rights and benefits of the members of the Public Employees' Retirement System. The law requires that a state safety member retire when he or she reaches 65 years of age, unless employed as a physician, dentist, or podiatrist.

This bill would instead except from that retirement requirement, any state safety member represented by State Bargaining Unit 16 or 19.

(4) This bill would also appropriate \$32,774,000 from the General Fund and other unallocated funds for expenditure for the 2006-07 fiscal year for state employee compensation in augmentation of the Budget Act of 2006, as specified.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 238 (AB 1458) De La Torre State employees: memoranda of understanding: State Bargaining Units 10 and 18.

(1) Under existing law, a provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees that requires the expenditure of funds does not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of the memoranda of understanding entered into between the state employer and State Bargaining Units 10 and 18, and would provide that these provisions will become effective even if these provisions are approved by the Legislature in legislation other than the annual Budget Act.

This bill would further provide that provisions of the memoranda of understanding approved by this bill that require the expenditure of funds will not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would authorize the state employer and the affected employee organization to reopen negotiations on all or part of the memoranda if funds for those provisions are not specifically appropriated by the Legislature.

(2) The Public Employees' Retirement Law provides a comprehensive set of rights and benefits based upon age, service credit, and final compensation. Existing law defines final compensation variously for different member classifications and bargaining units and, in this regard, defines final compensation for a state member for the purpose of calculating retirement benefits as the highest annual average compensation earnable by the member during a designated 12-month period.

This bill would provide that final compensation for a person who becomes a state member, as specified, on or after January 1, 2007, and who is represented by State Bargaining Unit 10 or 18 means the highest annual average compensation earnable by the member during a designated 36-month period.

(3) The Public Employees' Retirement Law prescribes increased death or disability benefits to state miscellaneous members employed by the State Department of

Developmental Services at the Porterville Developmental Center whose death or disability arises out of specified circumstances.

This bill would extend those benefits to state miscellaneous members employed by the State Department of Developmental Services at Canyon Springs Community Facility and Sierra Vista Community Facility, as specified.

(4) This bill would also appropriate \$23,469,000 from the General Fund and other unallocated funds for expenditure for the 2006–07 fiscal year for state employee compensation in augmentation of the Budget Act of 2006, as specified.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 239 (AB 2930) Laird State employees: memorandum of understanding: State Bargaining Unit 7.

(1) Under existing law, a provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees that requires the expenditure of funds does not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of a memorandum of understanding entered into between the state employer and State Bargaining Unit 7, the California Union of Safety Employees, and would provide that these provisions will become effective even if these provisions are approved by the Legislature in legislation other than the annual Budget Act.

This bill would further provide that provisions of the memorandum of understanding approved by this bill that require the expenditure of funds will not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would authorize the state employer and the affected employee organization to reopen negotiations on all or part of the memorandum if funds for those provisions are not specifically appropriated by the Legislature.

(2) The Public Employees' Retirement Law provides a comprehensive set of rights and benefits based upon age, service credit, and final compensation. Existing law defines final compensation variously for different member classifications and bargaining units and, in this regard, defines final compensation for a state member for the purpose of calculating retirement benefits as the highest annual average compensation earnable by the member during a designated 12-month period.

This bill would provide that final compensation for a person who becomes a state member, as specified, on or after January 1, 2007, and who is represented by State Bargaining Unit 7 means the highest annual average compensation earnable by the member during a designated 36-month period.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 240 (AB 2936) Ridley-Thomas State employees: excluded employees: memorandum of understanding: State Bargaining Unit 5.

(1) Under existing law, a provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees that requires the expenditure of funds does not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of the memorandum of understanding entered into between the state employer and State Bargaining Unit 5, and would provide that these provisions will become effective even if these provisions are approved by the Legislature in legislation other than the annual Budget Act.

This bill would further provide that provisions of the memorandum of understanding approved by this bill that require the expenditure of funds will not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would authorize the

state employer and the affected employee organization to reopen negotiations on all or part of the memorandum if funds for those provisions are not specifically appropriated by the Legislature.

(2) The Public Employees' Retirement Law provides a comprehensive set of rights and benefits based upon age, service credit, and final compensation. Existing law defines final compensation variously for different member classifications and bargaining units and, in this regard, defines final compensation for a state member for the purpose of calculating retirement benefits as the highest annual average compensation earnable by the member during a designated 12-month period.

Existing law provides that final compensation for certain patrol members, including patrol members in State Bargaining Unit 5, for specified patrol service shall be increased by 4% if the member retires or dies on or after July 1, 2001, but prior to July 1, 2004, and shall be increased by 8% if the member retires or dies on or after July 1, 2004.

This bill would provide that final compensation for these patrol members shall be increased by 6% if the member retires or dies on or after July 1, 2007, but prior to July 1, 2008, by 4% if the member retires or dies on or after July 1, 2008, but prior to July 1, 2009, and by 2% if the member retires or dies on or after July 1, 2009, but prior to July 1, 2010.

(3) Under existing law, a patrol member shall receive, upon retirement for industrial disability, a disability retirement allowance of 50% of his or her final compensation plus an annuity purchased with his or her accumulated additional contributions, if any, or, if qualified for service retirement, he or she shall receive his or her service retirement allowance if the allowance, after deducting the annuity, is greater.

This bill instead would provide, upon retirement of a patrol member for industrial disability as the result of a single event that results in serious bodily injury, the member shall receive the higher of the allowance provided above, or, except as specified, a disability allowance equal to 3% of his or her final compensation multiplied by the number of years of patrol service credited to him or her plus an annuity purchased with his or her accumulated additional contributions, if any. The bill would provide that the cumulative benefit provided pursuant to this provision, when combined with other specified service, shall not exceed 90% of final compensation.

(4) Under existing law, whenever any state agency is authorized by statute to fix the salary or compensation of an employee or officer, and the salary is payable in whole or in part out of state funds, the salary is subject only to the approval of the Department of Personnel Administration before it becomes effective and payable, except as specified.

This bill would authorize the department to set and adjust, as needed, the annual compensation of various state commissioners and directors and other state officers, as specified. The bill would require the department to notify the Legislature of the compensation level implemented within 30 days of the effective date of the proposed compensation adjustment.

(5) The bill would include related findings and declarations.

(6) This bill would also appropriate \$173,103,000 from the General Fund and other unallocated funds for expenditure for the 2006–07 fiscal year for state employee compensation for State Bargaining Unit 5 and the State of California excluded pay program and mileage adjustment for various collective bargaining units that have been previously approved or pending approval, in augmentation of the Budget Act of 2006, as specified.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 241 (SB 162) Ortiz State Department of Public Health.

Existing law establishes the scope of functions and responsibilities of the State Department of Health Services.

This bill would enact the California Public Health Act of 2006, which would establish the State Department of Public Health, to be headed by the State Public Health Officer to be appointed by the Governor, subject to confirmation by the Senate and would rename the

State Department of Health Services as the State Department of Health Care Services. The bill would transfer the responsibility for certain programs from the State Department of Health Services to the State Department of Public Health, and would require the State Public Health Officer to convene the Public Health Advisory Committee. The bill would retain responsibility for the remaining programs within the renamed State Department of Health Care Services, and would make conforming changes.

These provisions would become operative July 1, 2007.

The bill would establish the Office of Change Management within the State Department of Health Services to provide planning and guidance for transition activities prior to July 1, 2007.

Ch. 242 (SB 372) Margett Vehicles: size, weight, and load: local authorities: issuance of variance permits.

Existing law imposes limits on the size, weight, and load of vehicles that may be operated on the highway and authorizes the Department of Transportation and local authorities, with respect to highways under their respective jurisdictions, to issue permits to operate vehicles exceeding the specified size, weight, and load limits.

Existing law authorizes a local authority to charge a fee for the issuance of the specified permits, if the fee is established by ordinance or resolution after notice and hearing.

Existing law requires that special services necessitated by unusually large or heavy loads requiring engineering investigations, escorts, tree trimming, or other services be billed separately for each permit.

This bill would exclude from the list of special services that are required to be billed separately any services necessary to provide the notification required under these provisions and services that are within the scope of the local authority's ordinary duty to provide. This bill would also require a local authority, for the purposes of determining whether special services are necessitated by an unusually large or heavy load, to be governed by specific regulatory criteria adopted by the department for highways under its jurisdiction.

Ch. 243 (SB 511) Hollingsworth County water authority.

(1) Existing law, the County Water Authority Act, provides for the formation of a county water authority and prescribes the powers and duties of a county water authority. The act requires the board of directors of a county water authority to act by ordinance or resolution for the purpose of administering the affairs of the district.

This bill would require a county water authority to prepare and submit, at its own expense, a report to the Legislature, not before January 1, 2008, and not later than January 1, 2009, regarding the implementation of the procedures governing the meetings and actions of the standing committees of its board of directors that were adopted by that board in 2004 or 2005. By imposing reporting duties on a county water district, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 244 (SB 535) Runner Design-build contracts: City of Victorville.

Existing law requires public entities to comply with certain procedures in soliciting and evaluating bids and awarding contracts for the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement. Existing law, until January 1, 2011, permits cities in the Counties of Solano and Yolo, with the approval of the appropriate city council, to enter into specified design-build contracts, as defined, in accordance with specified provisions. Existing law requires any city that elects to use the design-build method to make a specified report to the Legislative Analyst's Office

before December 1, 2009, and requires the Legislative Analyst's Office to report to the Legislature regarding the use of the design-build method by each city, as provided.

This bill, until January 1, 2011, would permit the City of Victorville, with the approval of the city council, to enter into design-build contracts, as defined, in accordance with specified provisions. This bill would require the City of Victorville, if it elects to use the design-build method, to make a specified report to the Legislative Analyst's Office before December 1, 2009, and would require the Legislative Analyst's Office to report to the Legislature regarding the effectiveness of the design-build method. This bill would make a legislative finding and declaration of the necessity to enact special legislation with respect to the City of Victorville.

This bill would require specified information to be verified under oath, thus imposing a state-mandated local program by expanding the scope of the existing crime of perjury.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 245 (SB 710) Torlakson Surplus residential property.

Existing law establishes priorities and procedures that any state agency disposing of certain surplus residential property acquired and owned by the state on January 1, 1980, or on the date the properties were declared to be surplus, whichever date occurs later, is required to follow. Single-family residences are required to be offered for sale to present occupants meeting specified conditions and then to housing-related private and public entities under specified conditions.

This bill would add an asset limitation to the conditions that present occupants are required to meet to qualify to purchase those single-family residences. It would also prohibit a single-family residence from being offered to present occupants who are not the former owners of the property if the present occupants have had an ownership interest in real property in the last 3 years.

#### Ch. 246 (SB 775) Cox Watermasters: court appointments.

Existing law provides for the establishment of watermaster service areas by the Department of Water Resources for the purpose of ensuring the most practical and economic supervision of the distribution of water. Existing law permits the appointment by the department of a watermaster in a service area upon the written request of owners or governing bodies of at least 15% of the conduits lawfully entitled to directly divert water in that service area.

This bill would specify that, upon a petition, made to a court in which a relevant judicial decree has been entered, by the owners or governing bodies of at least 15% of the conduits lawfully entitled to directly divert water in a service area subject to that decree, the court may appoint a public agency as a watermaster to replace the watermaster appointed by the department. The bill would provide that a watermaster appointed pursuant to this provision would have the powers and duties prescribed by the court pursuant to the exercise of its judicial authority. The bill would provide that specified provisions apply to the service area for which a watermaster is appointed pursuant to this provision only to the extent determined by the court. The bill would provide that upon the appointment of the new watermaster by a court becoming effective, the department is not responsible for carrying out any of the duties and obligations of a watermaster for the service area. The bill would provide that upon the appointment of the new watermaster by a court becoming effective, and in the discretion of the department, any fixed waterflow measuring device and fixed distribution structure installed by the department would either be removed from the service area by the department, or transferred at no charge to the new watermaster appointed by the court. The bill would require that with respect to any waterflow measuring device or fixed distribution structure

transferred to the new watermaster, all rights, duties, and obligations of the department would accompany the transfer and would be assumed by the new watermaster, and the new watermaster would hold the department harmless for any and all claims or causes of action relative to the items transferred that arise subsequent to the transfer.

Ch. 247 (SB 1052) Kehoe Subdivisions: appeals.

The Subdivision Map Act authorizes a subdivider, or any tenant of the property, in the case of a proposed conversion of residential real property to a condominium project, community apartment project, or stock cooperative project, to file an appeal from any action with respect to a tentative map to the appeal board established by local ordinance or, if none, to the legislative body. The act also requires that the appeal be filed with the clerk of the appeal board, or if there is none, with the clerk of the legislative body within 10 days after the action of the advisory agency from which the appeal is being taken and requires the appeal board or the legislative body to set the matter for hearing within 30 days after the date of filing the appeal.

The act also applies these provisions to an appeal from the action of the appeal board to the legislative body and to an appeal from any interested person adversely affected by a decision of the advisory agency or the appeal board concerning any decision of the advisory agency or appeal board.

This bill would recast these provisions to provide that the hearing be held within 30 days after the date of a request filed by the subdivider or the appellant and would instead require, for appeals to the legislative body, that if there is no regular meeting of the legislative body within the next 30 days for which specified notice can be given, the appeal may be heard at the next regular meeting for which the specified notice can be given, or within 60 days from the date of the receipt of the request, whichever period is shorter.

The bill would also restate the requirement that each decision made pursuant to these provisions be supported by specified findings and would also make other conforming changes to these provisions.

Ch. 248 (SB 1169) Cox Municipal utility districts: purchases.

The Municipal Utility District Act generally requires the purchase of supplies and materials by a municipal utility district to be let by contract to the lowest responsible bidder when the expenditure is in excess of \$25,000, or, in any district with a population of 250,000 or more, in excess of \$50,000, with annual adjustments to those dollar limits.

The act also establishes an alternative acquisition process under which, if the purchase of supplies and materials by a district exceeds \$50,000, and the district determines that ratepayers reasonably can expect a net benefit in the cost of district services, the district may provide for the purchase of the supplies and materials by contract let in accordance with best value at the lowest cost acquisition policies adopted by the district's board. The act requires a district that elects to purchase supplies and materials by contract let in accordance with those policies to submit a specified report to the Legislative Analyst on or before January 1, 2006, and requires the Legislative Analyst to report to the Legislature on or before April 1, 2006. Those alternative acquisition process provisions are repealed on January 1, 2007.

This bill would delete that January 1, 2007, repeal date, thereby making those alternative acquisition process provisions operative indefinitely for districts that purchase supplies and materials by contract let pursuant to a best value at the lowest cost of acquisition policy before January 1, 2006. The bill would require that the best value at the lowest cost acquisition policy adopted by the district include specified provisions. For any district that did not purchase supplies and materials by contract let pursuant to best value at the lowest cost acquisition policy prior to January 1, 2006, and that thereafter elects to purchase supplies and materials pursuant to a best value at the lowest cost acquisition policy, the district would be required to submit a specified report to the Legislative Analyst on or before January 1, 2011. The bill would require the Legislative Analyst to report to the Legislature on or before April

1, 2011. The bill would prohibit a district that did not purchase supplies and materials by contract let pursuant to best value at the lowest cost acquisition policies prior to January 1, 2006, from purchasing supplies and materials by contract let pursuant to these provisions after January 1, 2012.

Ch. 249 (SB 1307) Poochigian Medical information: confidentiality.

(1) Existing law requires, if a patient's representative requests medical information regarding the patient, a physician or other health care provider to disclose the information to the representative.

This bill would include an agent under a power of attorney for health care, to the extent necessary for the agent to fulfill his or her duties, as specified, within the definition of patient's representative.

(2) Existing law permits an agent under a power of attorney for health care to make certain decisions effective after the death of the principal who executed the power of attorney.

This bill would additionally permit an agent, if necessary to fulfill the duties of that agent under a power of attorney for health care and after the death of the principal, to release the records of that principal.

(3) Under existing law, an agent under a power of attorney for health care may consult with and obtain information from a person, as defined, to carry out the agent's duties, as specified. Existing law requires the person to comply with the agent's request.

This bill would additionally permit the agent to consult with and obtain information from a supervising health care provider.

Ch. 250 (SB 1367) Ducheny Coachella Valley Unified School District: funding.

Existing law requires the Superintendent of Public Instruction to apportion to each school district on a yearly basis state aid funds in an amount that is determined by multiplying the district's total revenue limit, which is computed as specified, by the district's average daily attendance, which is computed as specified. Existing law requires the total revenue limit to be increased by specified amounts for each school that is located in a school district with an average daily attendance of less than 2,501 and meets the definition in existing law of "necessary small high school." Existing law prohibits the designation of a high school as a necessary small high school from being changed unless a review of the determinative factors supporting the designation indicates that the designation should be changed. Existing law requires the specified review to be conducted every 5 years.

Existing law authorizes, until June 30, 2006, the Coachella Valley Unified School District to include the Sea View Elementary School, or the West Shores High School, or both, in its total revenue limit calculation as a necessary small high school, if the amount of average daily attendance of the school included is 286 or less. Existing law requires, after the specified date, the State Department of Education to review the average daily attendance number of each of the specified schools on a biennial basis to determine whether the district is authorized to continue including the school in its total revenue limit calculation as a necessary small high school.

This bill, instead, would revise the definition of "necessary small high school" to include either or both of the specified schools if the amount of average daily attendance of the school is 286 or less. The bill would prohibit that status from being changed except as a review of the determinative factors made every 2 years following the date of the determination indicates that the determination should be changed.

Ch. 251 (SB 1400) Kehoe Property taxation: military housing.

Existing property tax law requires that all property subject to tax be assessed at its full value, and includes certain possessory interests among those property interests that are subject to tax. Existing property tax law defines a taxable possessory interest to be a use that is independent, durable, and exclusive. Existing property tax law specifies that, for purposes

of the definition of a taxable possessory interest, a possession or use is not independent if it is pursuant to a contract that includes, but is not limited to, a long-term lease for the private construction, renovation, rehabilitation, replacement, management, or maintenance of housing for active duty military personnel and their dependents, if the housing units and the private contractor constructing the housing meet specified criteria. Among this criteria is a requirement that the military family housing constructed by the private contractor is situated on a military facility under military control.

This bill would define military facility under military control as a military base that restricts public access to the military base.

Ch. 252 (SB 1449) Migden Sales and use tax fraud.

The Sales and Use Tax Law imposes penalties for failure to file returns and for failure to remit the total taxes owed.

This bill would provide that any person who knowingly collected sales tax reimbursement or use tax, and who fails to timely remit that sales tax reimbursement or use tax to the State Board of Equalization, is liable for a penalty of 40% of the amount not timely remitted, except under certain circumstances.

Ch. 253 (SB 1474) Figueroa State Board of Barbering and Cosmetology.

Existing law, the Barbering and Cosmetology Act, provides for the licensure and regulation of the practice of barbering and cosmetology. Existing law establishes the State Board of Barbering and Cosmetology until July 1, 2007, and provides for its membership.

This bill would extend the provisions creating the board until July 1, 2008. This bill would also require the board to elect officers annually from among its members, each of whom would hold office for a term of one year.

Under existing law, a licensee that uses an X-ray appliance, apparatus or machine in the treatment of any human being is guilty of a misdemeanor.

The bill would make it a misdemeanor for any licensee to use a laser in the treatment of any human being. By creating a new crime, the bill would impose a state-mandated local program.

Existing law allows the board to grant a license to practice to a person holding a license in another state with proof that the applicant has not been subject to disciplinary action in that state or upon review of the disciplinary action taken.

This bill would revise the application requirements for out-of-state license holders, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 254 (SB 1481) Poochigian Commercial transactions.

(1) Existing provisions of the Commercial Code generally govern commercial transactions.

This bill would revise those provisions generally in accordance with the revisions of Uniform Commercial Code Article 1 proposed by the National Conference of Commissioners on Uniform State Law.

Specifically, the bill would revise various definitions, including the definitions for “bill of lading,” “document of title,” and “security interest.” The bill would revise the definition of “good faith” to also mean the observance of reasonable commercial standards of fair dealing. The bill would expand the definition of “purchase” to include taking by lease. The bill would revise the definition of “bank” to include savings banks, savings and loan associations, credit unions, and trust companies. The bill would make various other definitional changes relating to commercial transactions.

The bill would also modify, limit, and supersede specified portions of the federal Electronic Signatures in Global and National Commerce Act as it relates to the Commercial Code. The bill would revise provisions governing waiver or renunciation of a claim or right after breach by requiring agreement of the aggrieved party. The bill would make conforming changes.

(2) Existing law sets forth principals governing documents of title, including bills of lading and warehouse receipts, and governs the rights, duties, and liabilities of a warehouseman or carrier as well as of the holder of the document and other parties to a transaction involving the document of title.

This bill would revise those provisions generally in accordance with the revision of Uniform Commercial Code Article 7 proposed by the National Conference of Commissioners on Uniform State Laws.

Specifically, the bill would revise those provisions to apply to electronic documents of title. The bill would also revise terms used in those provisions, substituting “warehouse” for “warehouseman” and adding definitions for certain terms relating to documents of title. The bill would clarify the circumstances making a document of title nonnegotiable and the requisite terms for a valid warehouse receipt. The bill would delete references to tariffs or filed classifications and make other changes and would expand the liability limitation a warehouse may impose in a warehouse receipt. The bill would also revise the warehouse and carrier lien provisions.

This bill would also revise the provisions governing documents of title to conform with those in the Uniform Commercial Code. The conforming changes would be made by the bill to certain definitional provisions and negotiability characteristics of documents of title. The bill would also make conforming changes by deleting a provision that limits a warehouse’s liability to the actual value of the goods in designated circumstances and by deleting a provision in a warehouse receipt relating to the storage and handling rate for goods in a public utility warehouse. The bill would make other conforming changes by describing the obligations of a bailee under a delivery order and the defeasance of title through an unaccepted delivery order. The bill would also make conforming changes to warehouse lien provisions.

**Ch. 255 (SB 1536) Cox State property: City of Folsom.**

Existing law authorizes the Director of General Services to dispose of state surplus property, subject to specified conditions, including authorization by the Legislature.

This bill would authorize the director to sell, lease, convey, or exchange at current fair market value to the City of Folsom, subject to terms, conditions, reservations, and exceptions determined by the director, a specified part of the facility known as the California Department of Corrections, Correctional Facility, Folsom, and a specified part of the facility known as the California Department of Parks and Recreation, Folsom Lake State Park. The net proceeds of the conveyance would be paid into the Deficit Recovery Bond Retirement Sinking Fund Subaccount, which is a continuously appropriated subaccount in the Budget Stabilization Account, thereby making an appropriation. The bill would require reimbursement to the Department of General Services for any cost or expense incurred in the disposition of the property from the net proceeds of the disposition.

This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 256 (SB 1629) Speier Public contracts: the Federal Laboratory Contracting Act.**

The State Contract Act governs contracting between state agencies and private contractors, and sets forth requirements for the procurement of materials, supplies, equipment, and services by state agencies. Existing law sets out the various responsibilities of the Department of General Services, and other state agencies in overseeing and implementing state contracting procedures and policies.

This bill would enact the Federal Laboratory Contracting Act to modify the existing contracting procedures and policies to authorize a state agency that contracts with a federally funded research and development center, as defined, or a field center, as defined, to make contract payments in advance. This bill would not allow a state agency that enters into a prime contract with a federally funded research and development center or a field center to indemnify the center with respect to products liability, intellectual property, and general liability claims, as specified. This bill would not allow a state agency to audit the records of any federally funded research and development center or field center, but instead would authorize a state agency to rely on the services of any cognizant federal audit agency, as defined. This bill would also require the Governor to designate the Secretary of State and Consumer Services as the state representative for purposes of communicating and negotiating with the representatives of the United States Department of Energy, the National Aeronautics and Space Administration (NASA), federally funded Department of Energy and NASA research and development centers, and NASA field centers, as provided. This bill would specify that the Regents of the University of California would not be considered a state agency for the purposes of this act, as provided.

This bill would set forth legislative findings and declarations regarding existing policies and procedures governing state contracts with federally funded Department of Energy and NASA research and development centers and NASA field centers located in California.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 257 (SB 1742) Machado Juvenile justice.

Existing law establishes the Youth Authority and requires it to accept a person committed to it if it believes that the person can be materially benefited by its reformatory and educational discipline and if it has adequate facilities to provide that care.

This bill would instead make the Division of Juvenile Justice the entity responsible for these duties and would make related changes to that provision.

Existing law requires the Youth Authority to accept a person committed to it, provided that the Director of the Youth Authority certifies that staff and institutions are available if that person is a borderline psychiatric or borderline mentally deficient case, sex deviate, as specified, or if he or she suffers from a primary behavior disorder. Existing law prohibits a person to be transported to a facility under the jurisdiction of the Youth Authority until the director of that agency has notified the committing court of the place to which the person is to be transported and the time at which that person can be received.

This bill would delete those provisions.

Existing law requires the Director of the Youth Authority and the Director of the State Department of Mental Health to annually confer and establish policy with respect to the types of cases that should be the responsibility of each department.

This bill would instead provide that to determine who is best served by the Division of Juvenile Justice and who would be better served by the State Department of Mental Health, the Chief Deputy Secretary of the Division of Juvenile Justice shall confer with the Director of the State Department of Mental Health regarding these duties.

#### Ch. 258 (SB 1749) Migden Transit fare evasion.

Existing law provides that it is an infraction, punishable by a fine not to exceed \$250 and by specified community service, to evade the payment of any fare of, or engage in passenger misconduct on or in a described facility or vehicle.

This bill would authorize the City and County of San Francisco and the Los Angeles County Metropolitan Transportation Authority to adopt and enforce an ordinance, which would not apply to minors, to impose and enforce civil administrative penalties for fare evasion or passenger misconduct on or in a facility or vehicle, as described, in lieu of the criminal penalties. The bill would specify the administrative adjudication procedures for the imposition and enforcement of the administrative penalties.

The bill would make legislative findings and declarations regarding the inapplicability of a general statute within the meaning of Section 16 of Article IV of the California Constitution.

Ch. 259 (SB 1850) Committee on Health Health care: training; reporting.

Existing law, the Song-Brown Family Physician Training Act, provides for specified training programs for certain health care workers, including family physicians, nurses, nurse practitioners, and physician's assistants.

This bill would change the name of this act to the Song-Brown Health Care Workforce Training Act.

Existing law, the Health Data and Advisory Council Consolidation Act (HDACCA), requires certain types of health care facilities to report specified information to the Office of Statewide Health Planning and Development. Existing law requires each hospital and freestanding ambulatory surgery clinic to file with the office an ambulatory surgery data record, containing specified information, for each patient encounter during which at least one ambulatory surgery procedure is performed.

This bill would expressly provide that the types of hospitals that are subject to this requirement are general acute care hospitals.

Existing law requires the office to collect, among other things, Hospital Discharge Abstract Data Records from any organization that operates, conducts, owns, or maintains a health facility, and to make that data available to the State Department of Health Services under specified conditions.

This bill would require the office to collect and make available to the State Department of Health Services, in addition to those reports, hospital Emergency Care Data Records and Ambulatory Surgery Data Records.

Existing law requires that all reports filed under the HDACCA be posted on the office's Internet Web site, and be produced and made available for inspection upon the demand of any person, with the exception of hospital discharge abstract data if the office determines that an individual patient's rights of confidentiality would be violated.

This bill would change this exception to apply to discharge and encounter data.

Existing law requires the reports filed under the HDACCA to include certain elements, and to be disseminated as widely as practical to interested parties.

This bill would apply these requirements only to risk-adjusted outcome reports published pursuant to specified provisions of law.

Existing law requires the office, for the purpose of public disclosure, to compile and publish summaries of the data that is required to be disclosed under the HDACCA.

This bill would instead require the compilation and publication of summaries of individual facility and aggregate data that do not contain patient-specific information required to be disclosed under the HDACCA, and would require that the summaries be posted on the office's Internet Web site.

Existing law requires the office to continue the publication of aggregate industry and individual health facility cost and operational data published by the California Health Facilities Commission under specified provisions of law, and to submit the publication to the Legislature no later than March 1 of each year.

This bill would eliminate that requirement.

Existing law provides that any health facility that does not file with the office any report required by the HDACCA is liable for a civil penalty, except as specified.

This bill would also apply this provision, in addition, to a freestanding ambulatory surgery clinic.

Ch. 260 (AB 343) Huff Transportation: public officers.

Existing law generally regulates public transportation systems.

This bill would authorize the governing board of Foothill Transit, a joint powers agency, to resolve to contract with designated persons to act as its agents in the enforcement of specified provisions of law relating to the operation of a public transportation system.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 261 (AB 350) Houston Fire protection district boards: contract bidding procedures.

Existing law permits a fire protection district board to contract for special services in specified fields and other services incidental to the district's operation. Existing law requires fire protection districts with a final budget less than \$1,000,000 to award contracts for special services exceeding \$10,000 to the lowest responsible bidder after notice. Existing law allows fire protection districts the option to award special services contracts pursuant to the contracting and purchasing procedures that apply to their principal county's government.

This bill would increase the threshold amount for special services contracts from \$10,000 to \$25,000.

Ch. 262 (AB 372) Nation Public contracts: transit design-build contracts.

Existing law authorizes transit operators to enter into a design-build contract, as defined, according to specified procedures. Existing law repeals these provisions on January 1, 2007. Existing law requires a transit operator, which includes any transit district, included transit district, municipal operator, included municipal operator, or transit development board, as specified, to prepare a set of documents to describe a project that will be let to a design-build entity, but does not identify any specifically required document. Existing law requires a transit operator that undertakes a design-build project to establish a labor compliance program, as defined. Existing law requires a transit operator to select the design-build entity based on either the lowest responsible bidder or best value, as provided. Existing law prohibits a transit operator from utilizing the design-build method of procurement for a rail project, unless that project costs more than \$50,000,000.

This bill would extend the duration of these provisions until January 1, 2011. This bill would expand the definition of a transit operator to include a consolidated agency, as specified. This bill would specify that a transit operator is required to establish a labor compliance program only for a design-build contract and only if the transit operator does not already have a labor compliance program, as specified. This bill would require a transit operator to select the design-build entity, for nonrail transit projects that exceed \$2,500,000, based on either the lowest responsible bidder or best value. This bill would authorize the design-build method of procurement for a capital maintenance or capacity-enhancing rail project with project costs of \$25,000,000, or more. This bill would also require a transit operator to prepare specific documents regarding a project that will be let to a design-build entity.

Ch. 263 (AB 463) Tran Subsurface installations: excavation.

Existing law authorizes an excavator to determine the exact location of subsurface installations that are in conflict with the excavation before using any vacuum excavation devices or power-operated or power-driven excavating or boring equipment within the approximate location of the subsurface installation, provided there is an express written mutual agreement, as specified, and with a specified exception. If there is no express agreement, the excavator is required to use handtools to determine the location of subsurface installations, as specified.

This bill would instead provide that, if documented notice of the intent to use vacuum excavation devices, or power-operated or power-driven excavating or boring equipment has been provided to the subsurface installation operator or operators and it is mutually agreeable to the operator or operators of the subsurface installation and the excavator, the excavator

may use vacuum excavation devices or power-operated or power-driven excavating or boring tools within the approximate location of the subsurface installation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 264 (AB 1319) Liu Adult education: joint data systems: California Community Colleges: State Department of Education.

Existing law provides for adult educational programs offered by school districts and community colleges.

This bill would make specified findings and declarations and would express the intent of the Legislature to enact legislation that develops a coordinated adult education data system.

The bill would require the Chancellor of the California Community Colleges and the Superintendent of Public Instruction, using existing resources, to convene a working group of adult education and data experts to review the separate, existing adult education and noncredit instruction data systems, and report to the Legislature and the Governor by July 1, 2007, on the feasibility, design, and cost of a common data set in adult education.

Ch. 265 (AB 1423) Bogh Department of Forestry and Fire Protection.

Under existing law, the Department of Forestry and Fire Protection in the Resources Agency is responsible for, among other things, providing fire protection, fire prevention, forest and range protection, and enhancement implements and apparatus as necessary.

This bill would, on and after January 1, 2007, permit reference to the department, where appropriate and as determined by the Director of Forestry and Fire Protection, as CAL-FIRE. The bill would also prohibit any existing supplies, forms, insignias, signs, or logos from being destroyed or changed as a result of the reference authorization and would require that they continue to be used until exhausted or unserviceable.

Ch. 266 (AB 1553) Evans Arbitration.

Existing law provides that written agreements to submit controversies to arbitration are valid and enforceable.

This bill would provide, if an arbitration agreement requires that arbitration of a controversy be demanded or initiated within a period of time, the commencement of a civil action within that period of time shall toll the applicable time limitations contained in the arbitration agreement with respect to that controversy from the date the civil action is commenced until 30 days after a final determination by the court that the controversy must be arbitrated, or 30 days after the final termination of the civil action, whichever date occurs first.

Ch. 267 (AB 1688) Niello Illegal dumping enforcement officers.

Existing laws provides that certain persons are not peace officers but may exercise the powers of arrest of a peace officer, as specified, during the course and within the scope of their employment, if they receive a course in the exercise of those powers.

This would add to this list of persons, illegal dumping enforcement officers, as specified.

The bill would also provide that nothing in its provisions may be construed to award peace officer retirement benefits to illegal dumping enforcement officers.

This bill would incorporate additional changes to Section 830.7 of the Penal Code, proposed by AB 1980, to be operative only if this bill and AB 1980 are enacted and become effective on or before January 1, 2007, and this bill is enacted last.

Ch. 268 (AB 1859) Leslie Placer County integrated health and human services pilot project.

Existing law authorizes Placer County, with the assistance of the appropriate state departments, to implement a pilot program, upon the approval of the county, for the funding and delivery of services and benefits through an integrated and comprehensive county health

and human services system. Under existing law, these provisions become inoperative on July 1, 2006, and are repealed on January 1, 2007.

This bill would extend by 5 years the dates upon which the provisions relating to the Placer County health and human services pilot project would become inoperative and would be repealed.

Ch. 269 (AB 1895) Coto Surplus school property: use of proceeds.

Existing law, the Leroy F. Greene School Facilities Act of 1998 (the Greene Act of 1998), requires the State Allocation Board to allocate to applicant school districts, prescribed per-unhoused-pupil state funding for construction and modernization of school facilities, including hardship funding, and supplemental funding for site development and acquisition.

Existing law requires a school district to use the funds derived from the sale of surplus property for capital outlay or for costs of maintenance of school district property that the governing board of the school district determines will not recur within a 5-year period. Existing law authorizes a school district having an average daily attendance of less than 10,001 in any fiscal year to deposit any and all interest earned on those funds into the general fund of the school district if the school district meets certain conditions.

This bill would, notwithstanding any other provision of law, and until January 1, 2010, authorize the Oak Grove Elementary School District to sell certain surplus real and personal property and to use the proceeds from that transaction for any one-time general fund purpose. The bill would prohibit, if any of the purchases of the property were made using the proceeds of a local general obligation bond act or revenue derived from developer fees, the amount deposited into the general fund from exceeding the difference between the purchase price of the property and the proceeds of the transaction divided by the amount of the proceeds of the transaction, as defined.

The bill would declare that, due to the special circumstances applicable to the Oak Grove Elementary School District, a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution, and the enactment of a special statute is therefore necessary.

Ch. 270 (AB 1920) Chan Medi-Cal: hospital funding.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits, including hospital services. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

Existing law establishes the Medi-Cal Hospital/Uninsured Care Demonstration Project Act, which revises hospital reimbursement methodologies under the Medi-Cal program in order to maximize the use of federal funds consistent with federal Medicaid law and stabilize the distribution of funding for hospitals that provide care to Medi-Cal beneficiaries and uninsured patients. This demonstration project provides for funding, in supplementation of Medi-Cal reimbursement, to various hospitals, including designated public hospitals, as defined, and sets forth a methodology for allocating those funds among the designated public hospitals for services provided during the 2005–06 project year.

Existing law provides for the payment of stabilization funding to various hospitals, including designated public hospitals, pursuant to the demonstration project. Existing law requires that, for services provided during the 2005–06 project year, the amount of stabilization funding be allocated in a specified manner among the designated public hospitals.

This bill would require, in addition, that the amount of stabilization funding be allocated in that specified manner among the designated public hospitals for services provided during the 2006–07 project year.

This bill would incorporate additional changes in Section 14166.75 of the Welfare and Institutions Code, proposed by SB 1520, to be operative only if SB 1520 and this bill are both chaptered and take effect on or before January 1, 2007, and this bill is chaptered last.

Ch. 271 (AB 1980) Bass Powers of arrest.

Existing law provides that certain persons are not peace officers but may exercise the powers of arrest of a peace officer, as specified, during the course and within the scope of their employment if they receive specified training.

This bill would include within those provisions, persons regularly employed by any department of the City of Los Angeles who are designated as security officers and authorized by local ordinance to enforce laws related to the preservation of peace in or about the properties owned, controlled, operated, or administered by any department of the City of Los Angeles and authorized by a memorandum of understanding with the Chief of Police of the City of Los Angeles permitting the exercise of that authority.

This bill would incorporate additional changes to Section 830.7 of the Penal Code, proposed by AB 1688, to be operative only if this bill and AB 1688 are enacted and become effective on or before January 1, 2007, and this bill is enacted last.

Ch. 272 (AB 2137) Niello Sacramento Regional Transit District.

(1) Existing law creates the Sacramento Regional Transit District, with specified powers and duties relative to providing transit services in the Sacramento region. The district is governed by a board of directors, appointed by cities and counties within the boundaries of the district, with provision made for jurisdictions that are not annexed to the district to appoint a director under certain conditions.

This bill would revise the membership of the board of directors to provide for member entities and participating entities, and would establish a weighted voting system based on financial contributions to the district by those entities, thereby imposing a state-mandated local program. The bill would establish standards to determine the amount of financial contributions made from various funding sources. The bill would increase the compensation of directors from \$50 to \$100 per meeting, for up to 4 noticed meetings per month. The bill would make other related changes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 273 (AB 2181) Salinas Truants: parents: court authority.

(1) Existing law, until January 1, 2006, specifically authorizes a court to order the parent, guardian, or other person having control or charge of a pupil, who is convicted of failing to comply with compulsory attendance laws, as specified, to immediately enroll the child in the appropriate school or educational program and provide proof of enrollment to the court. Existing law provides that a willful violation of that order is punishable as civil contempt with a fine of up to \$1,000.

This bill would delete the January 1, 2006, limitation thereby extending indefinitely the authority of a court over a person who fails to comply with the compulsory attendance laws, as specified.

The bill would also delete an obsolete provision of existing law.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 274 (AB 2272) Parra Writ of habeas corpus: notice to prosecuting agency.

Existing law generally specifies the procedure to be used in a habeas corpus action and requires that a person held in custody who is applying for a writ of habeas corpus to give 24-hour notice of the application to the district attorney of the county wherein the person is held in custody.

This bill would specify order and notice procedures that shall be complied with when an application for the writ challenges a denial of, or suitability for parole or when a petition is filed in a superior court other than the court in which the judgment was rendered.

Ch. 275 (AB 2324) Canciamilla Tidelands and submerged lands: City of Pittsburg: conveyance.

Under existing law, various grants of tidelands and submerged lands have been made in trust to local agencies, including several legislative grants of specified lands to the City of Pittsburg.

This bill would repeal the existing legislative grants to the City of Pittsburg, and would enact a new grant of tidelands and submerged lands, as described, subject to specified conditions, to the City of Pittsburg in trust for purposes of commerce, navigation, and fisheries, and for other public trust purposes, including, but not limited to, preservation of the lands in their natural state for scientific study, open space, wildlife habitat, and recreational and visitor-oriented uses.

The bill would provide that revenue from those lands, that are currently leased by the state and designated as specified state lease numbers, shall remain revenue of the state and be transmitted to the state by the trustee.

The bill would impose a state-mandated local program by requiring, among other things, that the city submit to the State Lands Commission for its approval a trust lands use plan, as prescribed. The bill would require the city to file each year with the commission a detailed statement of revenue from the administration of the lands and the expenditure thereof, and would prescribe related matters.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 276 (AB 2342) Nakanishi Voluntary services: malpractice insurance.

Existing law, the Medical Practice Act, creates the Medical Board of California and makes it responsible for issuing a physician and surgeon's certificate to qualified applicants and for regulating the practice of physicians and surgeons. Existing law waives the fee for issuance and renewal of this certificate for a physician and surgeon who provides voluntary unpaid services, as specified, to indigent patients in medically underserved or critical need population areas of the state.

This bill would require the board, in conjunction with the Health Professions Education Foundation, to study the issue of its providing medical malpractice insurance for physicians and surgeons who provide these services and report its findings to the Legislature on or before January 1, 2008. The bill would make implementation of its provisions contingent on an appropriation of funds for that purpose, as specified.

Ch. 277 (AB 2369) La Suer Civil warrants.

(1) Existing law permits a court, in specified circumstances in civil actions for attachment and enforcement of judgments, to issue a warrant when a person fails to appear for an examination as ordered by the court and permits the court to punish that person for contempt. Existing law establishes fees for serving and executing these bench warrants.

This bill would revise these provisions to provide an alternative to issuing a warrant and punishing a person for contempt, pursuant to which a court may issue an arrest warrant, and would provide for a schedule of the fees that may be charged pursuant to this process. The bill would authorize the sheriff to release the person arrested upon his or her promise to appear, would set forth the conditions under which the person arrested may not be released, and would specify the civil assessment for failure to appear upon a promise to appear. By

imposing new duties on local law enforcement, the bill would impose a state-mandated local program. This bill would also make technical changes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 278 (AB 2429) Negrete McLeod Real estate salespersons: licensure.**

Existing law, the Real Estate Law, provides for the licensure and regulation of real estate salespersons by the Department of Real Estate. Under that law, a person may apply to take the real estate salesperson license examination upon demonstrating, as specified, to the Real Estate Commissioner enrollment in, or completion of, a real estate principles course and, after passing the examination, is required to submit to the commissioner evidence of the successful completion of specified courses in real estate either prior to issuance of the license or within 18 months after its issuance.

This bill would require a person whose application for the licensure examination or for both the examination and license is received by the commissioner on or after October 1, 2007, to demonstrate, as specified, completion of the real estate principles course as well as the other specified real estate courses required for licensure before taking the real estate salesperson license examination. The bill would waive these requirements for members of the State Bar of California and applicants who qualified to take the original real estate broker licensure examination by satisfying certain requirements. The bill would also specify requirements for persons whose applications are received by the commissioner prior to October 1, 2007.

**Ch. 279 (AB 2435) Coto Santa Clara Valley Water District.**

(1) Existing law, the Santa Clara Valley Water District Act, establishes the Santa Clara Valley Water District and grants to that district specified powers and duties, including the management of water for all beneficial uses and protection from flooding with Santa Clara County (county). The act requires the board of directors of the district (district board) to consist of 7 members, 5 of whom are elected from county supervisorial districts and 2 of whom are appointed by the board of supervisors of the county. The act requires the board of supervisors of the county to appoint a person to fill a vacancy in the office of an appointed director.

This bill would authorize the district to take action to preserve open space in the county and to support the county park system in a manner that is consistent with specified powers of the district. The bill would require the district board to appoint a person to fill a vacancy in the office of an appointed director. The bill, on and after January 1, 2010, would require the district to consist of 5 board members who are elected from county supervisorial districts. The bill would prescribe requirements for the filling of a vacancy in the office of any of those elected board members.

(2) The act requires various county officials or employees to serve ex officio as officials or employees of the district. The act authorizes the county and the district to enter into agreements to perform additional services for each respective entity.

This bill would repeal those provisions.

(3) The act requires the board of supervisors of the county to review and adopt the budget submitted by the district.

This bill would require the district board, on or before June 15 of each year, to hold a noticed public meeting with regard to the proposed budget and, after the meeting and not later than June 30 of each year, to adopt, by resolution, the budget. The bill would make additional conforming and technical changes and would repeal an obsolete provision.

By establishing requirements on the district, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 280 (AB 2568) Harman Wills: personal property.

Existing law establishes provisions for the disposition of a testator's property by will, as specified. Under existing law, a writing in existence when a will is executed may be incorporated by reference if the language of the will manifests this intent and describes the writing sufficiently to permit its identification. Existing law also authorizes a will to dispose of property by reference to acts and events that have significance apart from their effect upon the dispositions made by the will, regardless of whether the acts occur before or after the execution of the will or the testator's death.

This bill would authorize a will to refer to a writing that directs disposition of tangible personal property, as defined, not otherwise specifically disposed of by the will, except for property used primarily in a trade or business. The bill would provide that a writing that meets the conditions and requirements set forth in that provision shall be given effect as if the writing were actually contained in the will itself, except as specified. The bill would require the writing to be filed with the court at the time of the filing of the inventory and appraisal or, if the writing has not been found or is not available at the time of filing the inventory and appraisal, no later than 60 days prior to filing the petition for final distribution.

This bill would require tangible personal property with a value in excess of \$5,000 to be disposed of by the will. The bill would also prohibit the disposal of tangible personal property by a writing if the total value of that tangible personal property exceeds \$25,000.

Ch. 281 (AB 2533) Leno Sales and use taxes: exemption: public art.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property.

Existing law provides various exemptions from that tax, including an exemption for original works of art purchased to become part of a permanent collection, as specified, items which have value as museum pieces, as specified, and certain purchases of public art by the state or any local government entity for display to the public in public places, as specified.

This bill would expand the exemption for original works of art to include those leased from one nonprofit organization to another nonprofit organization for 35 years or more. This bill would also expand the exemption to include public art that is leased by the state or any local government from another entity for display in public places. This bill would also expand the definition of work of art to include a costume, dress, clothing, or personal adornment. This bill would also clarify that a permanent collection, as it applies to leases of original works of art, means a collection with a lease term of 35 years or more.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 282 (AB 2542) Daucher Driver assessment.

Existing law requires the Department of Motor Vehicles to ensure that a person granted driving privileges is competent to legally operate a motor vehicle.

This bill would require the department, if it receives funds from the Office of Traffic Safety in the Business, Transportation and Housing Agency, to conduct a pilot study on a 3-tier assessment system, as specified, to determine the effectiveness of the 3-tier assessment system in identifying functional impairments, reducing crashes, and prolonging safe driving years of all drivers regardless of age. The bill would require the department, on or before December 31, 2011, to submit to the Legislature a final report of the pilot study containing specified information. The bill would be repealed, by its own term, on January 1, 2012.

Ch. 283 (AB 2582) Mullin CALGOLD program.

Existing law requires a business or entity to obtain various environmental permits prior to undertaking any project that may have an impact on the environment.

Existing law requires the Secretary for Environmental Protection to establish an electronic online permit assistance center, the CALGOLD program, to provide businesses and other entities with assistance in complying with the laws and regulations implemented by the boards, departments, and offices within the agency.

This bill would require the CALGOLD program to be reviewed periodically and, when necessary, updated to assist businesses in the state that would benefit from information on permitting and regulatory compliance, including emerging industries and life sciences industries.

Ch. 284 (AB 2939) Wolk Sacramento-Yolo Port District.

(1) Existing law provides for the formation of a river port district that is governed by a port commission, which consists of 5 members, as specified. Existing law provides for additional commissioners for the Sacramento-Yolo Port Commission.

This bill would reestablish the boundaries of the Sacramento-Yolo Port District. The bill would eliminate the requirement for additional commissioners for the Sacramento-Yolo Port Commission, and instead specify the membership of the Sacramento-Yolo Port Commission and define and limit certain powers of the Sacramento-Yolo Port District.

The bill would prohibit the Sacramento-Yolo Port District from selling or dismantling certain property without the prior consent of specified local governmental entities, or selling or leasing for nonmaritime purposes, land in excess of 10 acres located in a designated area unless the board of port commissioners makes a written finding that the proposed sale or lease is necessary to maintain the financial viability of the port.

The bill would require that moneys in the Riverfront Enhancement Fund, created by the Joint Port Governance Agreement dated January 15, 2006, shall be expended exclusively on projects related to the Sacramento and American Rivers, as specified. The bill would provide that net proceeds from the liquidation of certain properties in the Sacramento-Yolo Port District would be distributed to the fund.

Existing law permits an elected official of an appointing authority to be a member of a port commission.

This bill would additionally permit an employee of an appointing authority to be a member of a port commission.

By requiring local agencies to undertake new duties, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 285 (AB 2958) Committee on Agriculture Food and agricultural programs.

Existing law requires that every lot, parcel, or package of commercial feed distributed within this state have affixed to it, or be accompanied by, a label that contains certain specified information, including the net weight of the contents of the lot or parcel, as specified.

This bill would provide that a lot, parcel, or package of commercial feed may have affixed to it, or be accompanied by a label that includes the net weight or volume of its contents.

Existing law requires that a license be obtained from the Secretary of Food and Agriculture for each location where commercial feed is manufactured, distributed, sold, or stored for later sale. Existing law requires the application for a license to be accompanied by a \$100 fee. Existing law also requires the license to be renewed each odd-numbered year and provides that if a license is not renewed within a month of its expiration, a penalty of \$40 shall be added to the fee.

This bill would provide that the department may specify a fee to obtain a license upon recommendation of the Feed Inspection Advisory Board of at least \$100, but not exceeding \$600. This bill would provide that commencing January 1, 2010, the license fee shall be \$100. This bill would specify uses to which new revenue generated by the fees is to be allocated. This bill would also specify that licenses are to be renewed annually and that the fee for failure to renew a license within one month of its expiration is \$100.

Because manufacture or distribution of commercial feed without a valid license is a crime, this bill would change the definition of a crime and thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 286 (AB 2986) Mullin Controlled substances: prescription requirements.

(1) Existing law provides that no person shall prescribe a controlled substance, nor shall any person fill, compound, or dispense such a prescription unless the prescription complies with specified requirements; the prescription must be printed with specified features and must set forth specified information. Unless otherwise specified, a violation of any of these provisions is a misdemeanor, punishable as specified.

This bill would require the prescription forms to also include the name of the ultimate user or research subject, or the contact information as determined by the U.S. Secretary of Health and Human Services; check boxes so that the prescriber may indicate the number of refills ordered.

(2) Existing law provides for the electronic monitoring and reporting of the prescribing and dispensing of Schedule II and Schedule III controlled substances pursuant to the Controlled Substance Utilization Review and Evaluation System (CURES) program.

This bill would provide that the CURES program shall also monitor and report on the prescribing and dispensing of Schedule IV controlled substances.

(3) Existing law provides that every practitioner, other than a pharmacist, who prescribes or administers a Schedule II controlled substance shall make a record of the transaction and shall provide the Department of Justice with information relating to the transaction on a monthly basis, as specified.

This bill would provide that every practitioner other than a pharmacist, who prescribes or administers a Schedule II, Schedule III, or Schedule IV controlled substance shall make a record of the transaction and would require the information to be provided to the Department of Justice, as specified.

(4) The bill would make conforming changes to related provisions. By revising existing crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 287 (AB 3017) Mullin Changes of venue: reimbursement.

Existing law provides that change of venue costs, as defined, shall be considered to be county costs to be paid by the transferring county to the receiving county.

This bill would provide that these county costs include, but are not limited to, rental of furniture or equipment, inmate transportation, security and media information services, as specified.

Ch. 288 (AB 3011) Benoit Vehicles.

(1) Existing law provides that it is unlawful to fail or refuse to comply with a lawful out-of-service order issued by a peace officer, as defined, when that peace officer is in uniform and is performing duties pursuant to the Vehicle Code and the order complies with specified requirements.

This bill would include an authorized employee of the Department of the California Highway Patrol (department) as a person whose order it is unlawful to fail or refuse to comply with, and change the requirements with which the order is required to comply. By changing the definition of a crime, the bill would impose a state-mandated local program.

The bill would also provide that it is unlawful to fail or refuse to comply with a lawful out-of-service order issued by a peace officer or a commercial vehicle inspector, of a state, Province of Canada, or Federal Government of the United States, Canada, or Mexico, if specified requirements are met.

(2) Existing law prohibits a foreign motor carrier or foreign private motor carrier required to have a specified certificate of registration from operating without the certificate in the vehicle, operating beyond the limitations of the certificate, or refusing to show the certificate upon request by a peace officer.

The bill additionally would prohibit that foreign motor carrier or foreign private motor carrier from providing point-to-point transportation services, including express delivery services, within the United States for goods other than international cargo. The bill also would prohibit a motor carrier that is required to be registered as specified from operating in the state without the registration, operating beyond the limitations or restrictions specified in the registration, or operating in the state without the required operating authority. The bill would make a violation of the existing prohibitions and the new prohibitions an infraction punishable by a fine of \$1,000, thereby imposing a state-mandated local program. The bill would authorize a member of the department to impound a vehicle operating in violation of these prohibitions, and its cargo, until the citation and all charges related to the impoundment are cleared, and would provide that the impoundment charges are the responsibility of the owner. The bill, except as otherwise provided, would prohibit a motor carrier granted permanent operating authority as specified from operating a vehicle on a highway, unless the vehicle is inspected every three months and displays a current safety inspection decal, as specified.

(3) Existing law authorizes the Department of Motor Vehicles (DMV) to suspend, cancel, or revoke the registration of a vehicle or certificate of ownership, registration card, license plate, or permit, under specified circumstances.

The bill would authorize the DMV to suspend the registration of all vehicles registered in the name of a person, under specified circumstances, including when the United States Secretary of the Department of Transportation or his or her designee issues a lawful out-of-service order as specified, when the DMV suspends or revokes a motor carrier of property permit, or when the Public Utilities Commission suspends or revokes operating authority or private registration.

(4) Existing law requires a driver and an owner of a motor vehicle to be able to establish financial responsibility, as specified. Existing law specifies the documents that constitute

evidence of financial responsibility, including an identifying number issued by a specified federal agency, if certain requirements are met.

The bill would delete that document from the list of documents constituting evidence of financial responsibility.

The bill would require a motor vehicle from another country in which there is no evidence of financial responsibility required as specified, to be denied entry into the state.

(5) Existing law authorizes a peace officer, as defined, to impound a vehicle and its cargo, as specified.

The bill would authorize a member of the department to impound a vehicle and its cargo, as specified.

(6) Existing law requires the department to adopt and enforce regulations relating to the safe loading, securement, and transporting of logs and poles, as specified; safe loading, securement, and transporting of lumber and lumber products, as specified; safe loading, securement, and transporting of baled hay and baled straw, as specified; proper loading and securing of metal products, as specified; safe loading, securement, and transportation of loads consisting of baled cotton, baled paper, and baled jute, as specified; and safe loading, securement, and transportation of loads of wooden boxes, as specified. Existing law provides that it is a crime to fail to comply with those regulations. Existing law prohibits a vehicle upon which a trailer is loaded from being driven or moved on a highway unless the trailer is securely bound to the vehicle, as specified. Existing law requires logging dollies being carried on a truck to be secured, as specified.

The bill would repeal those provisions.

The bill would require the department to adopt rules and regulations that are designed to promote the safe operation of vehicles, regarding cargo securement standards, as specified.

(7) Existing law requires the department to regulate the safe operation of specified vehicles, including buses, schoolbuses, and general public paratransit vehicles.

The bill would include in that list of vehicles the safe operation of which the department is required to regulate, farm labor vehicles, as defined.

(8) Existing law requires certain vehicles to prominently display a distinctive identifying symbol, as specified.

The bill would expand the vehicles to which that requirement applies and change the distinctive identifying symbol a vehicle is required to display.

(9) Existing law requires the carrier identification number assigned to the motor carrier under whose operating authority or motor carrier permit a vehicle or combination of vehicles is being operated to be displayed on both sides of each vehicle, or on both sides of at least one motor vehicle in each combination of specified vehicles while engaged in intrastate commerce.

The bill would delete the intrastate commerce limitation for that requirement.

(10) The bill would delete obsolete references to the Interstate Commerce Commission and instead refer to the United States Secretary of the Department of Transportation.

(11) The bill would make related changes.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 289 (AB 3063) Committee on Elections and Redistricting Elections.

(1) Existing law authorizes or requires, as specified, the governing board of a school district or community college district or a school facilities improvement district, to order an election and submit to the electors of the district the question of whether the bonds of the district shall be issued and sold for the purpose of raising money for certain, listed purposes. Existing law prohibits the election from being held within 45 days before or after a statewide

election unless it is held at the same time as the statewide election or on an established election date, as defined.

This bill would, additionally, authorize the election to be held on an established mailed ballot election date, as defined.

(2) Existing law authorizes the governing board of a school district or community college district, as an alternative to authorizing and issuing bonds through the local election described in (1) above, to pursue the authorization and issuance of bonds pursuant to certain provisions of the California Constitution. Existing law limits these bond elections to primary or general elections, regularly scheduled local elections, and statewide special elections.

This bill would provide that the local election shall be one at which all of the electors of the school district, community college district, or school facilities improvement district, as appropriate, are entitled to vote.

The bill would make other, technical changes in related provisions of existing law.

(3) Existing law specifies time periods by which documents for nomination and candidacy for a direct primary election must be made available and filed with the county elections official.

This bill would require the elections official, in the event that no candidate files for a party's nomination for any partisan office that would appear on the ballot in a county or a political subdivision within that county, to refrain from printing a partisan ballot for that party in which there are no candidates for that political party's nomination, and to send notification to those registered voters affiliated with a party for which there were no qualified candidates for that primary election, together with a nonpartisan ballot, unless a petition is filed for a write-in candidate, as specified. By increasing the duties of local elections officials, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 290 (SB 1613) Simitian Vehicles: wireless telephones.

Under existing law, motor vehicle operation is regulated, and drivers must follow many legal requirements or face criminal sanctions. Under existing law, it is a crime for a person to drive a schoolbus or transit vehicle while using a wireless telephone, except for certain work-related or emergency purposes.

This bill would make it an infraction, operative July 1, 2008, to drive a motor vehicle while using a wireless telephone, unless that telephone is designed and configured to allow hands-free listening and talking operation, and is used in that manner while driving. This offense would be punishable by a base fine of \$20 for a first offense and \$50 for each subsequent offense.

The bill would provide that this prohibition does not apply to a person who is using the cellular telephone to contact a law enforcement agency or public safety entity for emergency purposes, or to an emergency services professional while he or she operates an authorized emergency vehicle, as specified. The bill also would prohibit the assignment of a violation point for a violation of the above.

The bill, until July 1, 2011, also would provide that this prohibition does not apply to a person when using a digital 2-way radio service that utilizes a wireless telephone that operates by depressing a push-to-talk feature and does not require immediate proximity to the ear of the user, and that person is driving a motor truck or truck tractor, as respectively defined, a listed or described implement of husbandry, a listed farm vehicle, a tow truck, or a commercial vehicle, as defined, used in commercial agricultural operations.

The bill would specify that these provisions do not apply to a person driving a schoolbus or transit vehicle that is subject to certain existing wireless telephone usage restrictions, and would specify that the restrictions contained in this bill do not apply to a person while driving a motor vehicle on private property.

By creating a new infraction, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 291 (AB 3035) Laird California Central Coast State Veterans' Cemetery.

(1) Existing law provides for the establishment and operation of veterans' cemeteries. Existing law requires the Department of Veterans Affairs, in voluntary cooperation with the Monterey County Board of Supervisors, to develop a master plan for a state-owned and state-operated California Central Coast Veterans' Cemetery to be located on the grounds of the former Fort Ord in Monterey County.

This bill would repeal that provision and instead provide for the establishment of the California Central Coast State Veterans' Cemetery at Fort Ord Endowment Fund, as provided, and would require that all moneys deposited therein be allocated, upon appropriation by the Legislature, to the Department of Veterans Affairs for the annual administrative and oversight costs of a California Central Coast State Veterans' Cemetery at Fort Ord and to generate funding through interest for that cemetery. This bill would also require the Controller, on or before July 1, 2007, after consultation with the department, to report to the Assembly and Senate Committees on Veterans Affairs, and other specified entities, on the status of the fund, as provided.

This bill would allow the California Central Coast State Veterans' Cemetery at Fort Ord Endowment Fund to receive donations of personal property, including cash or other gifts, to be used for the maintenance or beautification of the veterans' cemetery, upon appropriation by the Legislature, as provided.

This bill would additionally require the department, once a determination has been made by specified parties that the fund can cover the annual administrative and oversight costs, as defined, of the veterans' cemetery, to develop and submit a federal State Veterans' Cemetery Grant Program application to the United States Department of Veterans Affairs for an amount representing 100% of the estimated cost for designing, developing, constructing, and equipping the veterans' cemetery. This bill would authorize the Secretary of Veterans Affairs to act as the official representative of the state for purposes of the application process, as specified.

(2) Existing law establishes the Central Coast Veterans' Cemetery Master Development Fund.

This bill would rename the fund the California Central Coast State Veterans' Cemetery at Fort Ord Operations Fund, and would require that all moneys in the fund be allocated, upon appropriation by the Legislature, to the Department of Veterans Affairs for the annual administrative and oversight costs of the veterans' cemetery. This bill also would authorize the Endowment Fund to be reimbursed for the costs of developing and submitting the State Veterans' Cemetery Grant Program application.

(3) Existing law provides for the burial of veterans and veterans' widows and widowers, and the veterans' children, and establishes fees for the interment of specified individuals.

This bill would require the Department of Veterans Affairs to adopt regulations to specify the eligibility requirements for interment in the California Central Coast State Veterans' Cemetery at Fort Ord, including providing for the imposition of specified fees.

(4) Existing law provides for proposals for the construction, placement, or donation of monuments and memorials to specified veterans' cemeteries, subject to review by advisory committees and approval of the Secretary of Veterans Affairs.

This bill would allow the California Central Coast State Veterans' Cemetery at Fort Ord, once established, to receive proposals for the construction, placement, or donation of monuments and memorials to the cemetery, subject to review by an advisory committee and approval of the Secretary of Veterans Affairs, as provided. This bill would require the Department of Veterans Affairs to establish regulations regarding these proposals.

Ch. 292 (SB 497) Simitian Vessels: releases.

(1) The existing Marine Invasive Species Act (the act), among other things, requires the master, owner, operator, or person in charge of a vessel, as defined, carrying or capable of carrying ballast water, as defined, that operates in the waters of the state to take specified actions to minimize the uptake and release of nonindigenous species, as defined. The act required the State Lands Commission, on or before January 31, 2006, to submit to the Legislature and make available to the public, a report that recommends specific performance standards for the discharge of ballast water into the waters of the state or into waters that may impact waters of the state.

This bill would require the commission, on or before January 1, 2008, to adopt regulations that require an owner or operator of a vessel carrying, or capable of carrying, ballast water that operates in the waters of the state to implement certain interim and final performance standards for the discharge of ballast water, as specified. The bill would require the commission to disseminate, to the public, specified information regarding experimental ballast water treatment systems.

The bill would require the commission to prepare, or update, and submit to the Legislature reviews of the efficacy, availability, and environmental impacts of currently available technologies for ballast water treatment systems on a specified schedule. The bill would require the commission, if technologies to meet the performance standards are determined in a review to be unavailable, to include in that review an assessment of why the technologies are unavailable.

(2) The act authorizes the commission, if an owner or operator of a vessel applies to install an experimental ballast water treatment system, and the commission approves the application, to subsequently deem the system to be in compliance with any future treatment standard adopted, as specified.

The bill would instead require the commission to deem the system in compliance with any future treatment standard adopted, for a period not to exceed 5 years from the date of the application of interim performance standards pursuant to the bill, and the bill would limit that authority to systems approved by the commission on or before January 1, 2008.

(3) The act provides that it does not restrict a state agency from enforcing the act.

The bill, instead, would provide that the act does not restrict a state or local agency, board, commission, or department, or a subdivision of one of those entities, from enforcing the act if the total fines imposed by those entities do not exceed a specified amount.

(4) The act requires the Department of Fish and Game, in consultation with the commission and the United States Coast Guard, to collect data necessary to establish and maintain an inventory of the location and geographic range of nonindigenous species in specified waters. The act requires the department to make the inventory and accompanying analysis available to the public on or before January 1, 2007, and to provide the public an update of that inventory no later than July 1, 2008. The act requires the department, in consultation with the commission and the United States Coast Guard, to assess the effectiveness of the ballast water controls implemented pursuant to the act, as specified, and to submit a report presenting the assessment to the Legislature and the public on or before January 1, 2009.

The bill, instead of requiring the department to update the inventory no later than July 1, 2008, would require the department to annually provide the public an update of the inventory. The bill, in addition to the assessment report required on or before January 1,

2009, would require the department to present an assessment report to the Legislature and the public every 3 years after that date.

(5) The act provides that a person who intentionally or negligently fails to comply with the act may be liable for an administrative civil penalty not to exceed \$5,000 for each violation. The act provides that a person who fails to comply with specified reporting requirements may be liable for an administrative civil penalty not to exceed \$500 per violation. The act also provides that a person who, knowingly and with intent to deceive, falsifies a ballast water control report form, or, knowingly and with intent to deceive, tampers with or disables a system for controlling the release of nonindigenous species, required by the act, may be liable for an administrative civil penalty not to exceed \$5,000 per violation. A specified violation of the act is a crime. Existing law repeals the act as of January 1, 2010.

The bill would increase the amount of those administrative civil penalties to not more than \$27,500 per violation.

The bill would delete the repeal of the act and make conforming changes. Because extending the act indefinitely would change the definition of a crime, the bill would impose a state-mandated local program.

(6) Existing law requires the owner or operator of a large passenger vessel, as defined, or an oceangoing ship, as defined, that releases specified substances into the marine waters of the state, as defined, or a marine sanctuary, as defined, to immediately, but no later than 24 hours after the release, notify the State Water Resources Control Board of the release.

This bill, instead, would require the owner or operator to notify the Office of Emergency Services immediately, but not longer than 30 minutes, after discovery of a release of one of those specified substances. The bill would require the Office of Emergency Services to transmit the notification to the board and the Department of Fish and Game immediately, but not longer than 30 minutes, after receiving the notification.

(7) This bill would make other technical, nonsubstantive changes related to the release of sewage, as defined, and sewage sludge, as defined, in the marine waters of the state and marine sanctuaries.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 293 (SB 729) Simitian Water quality.

(1) Under the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board (state board) and the California regional water quality control boards (regional boards) are the principal state agencies with primary authority over water quality matters. The act authorizes a regional board to investigate the quality of state waters, and grants to a regional board certain authority in connection with those investigative functions. The act authorizes a regional board to administratively impose civil liability in connection with violations of certain water quality provisions.

This bill would authorize the state board to carry out this authority if, after consulting with the appropriate regional board, the state board determines that it will not duplicate the efforts of the regional board.

(2) The act requires a regional board to obtain coordinated action in water quality control, including the prevention and abatement of water pollution and nuisance.

This bill would require that each regional board coordinate with the state board and other state agencies with respect to water quality matters and report rates of compliance with the act. The bill would require the state board and each regional board to post on the Internet certain water quality-related information, including, with regard to a regional board, a summary list of enforcement actions undertaken by that regional board and the dispositions of those actions.

Ch. 294 (SB 1843) Committee on Natural Resources and Water Natural resources: California Coastal Act: San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy.

(1) The California Coastal Act of 1976 provides for the planning and regulation of development, under a coastal development permit process, within the coastal zone, as defined, that shall be based on various coastal resources planning and management policies set forth in the act. Existing law allows the diking, filling, or dredging of open coastal waters, wetlands, estuaries, and lakes, within the coastal zone, in specified areas and under prescribed conditions.

This bill would eliminate the authority for these activities in wetland areas for entrance channels for boating facilities and in a degraded wetland for boating facilities.

(2) Existing law requires each local government lying within the coastal zone to prepare a local coastal program for that portion of the coastal zone within its jurisdiction. Existing law requires a person who is to perform or undertake a development, as defined, to obtain from a local government and, under certain circumstances, from the California Coastal Commission, a coastal development permit authorizing the development.

This bill would authorize the commission to process and act upon a consolidated coastal development permit application if a proposed project requires a coastal development permit from both a local government with a certified local coastal program and the commission, and if the applicant, local government, and commission agree to consolidate the permit action, provided public participation is not substantially impaired.

(3) The bill would also delete various obsolete provisions in the act.

(4) Existing law establishes the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy (conservancy) to, among other purposes, acquire and manage public lands, provide open space, provide the public low-impact recreational and educational uses, water conservation, wildlife and habitat restoration, and watershed improvement. The conservancy is required to prepare a San Gabriel and Lower Los Angeles Parkway and Open Space Plan to be approved by specified entities.

This bill would replace the San Gabriel Valley Watermaster, as one of the entities from which the conservancy is required to gain approval for a San Gabriel and Lower Los Angeles Parkway and Open Space Plan, with the San Gabriel Valley Water Association. The bill would allow the conservancy board member from the Board of Supervisors of the County of Los Angeles to have a designee represent that supervisor on the conservancy board.

Ch. 295 (SB 1845) Kuehl Natural resources: Ocean Protection Council.

(1) The California Ocean Protection Act establishes the Ocean Protection Council in state government. The act provides that the council consists of the Secretary of the Resources Agency, the Secretary for Environmental Protection, and the Chair of the State Lands Commission. The act requires the council, among other things, to coordinate activities of state agencies, that are related to the protection and conservation of coastal waters and ocean ecosystems, and to establish policies to coordinate the collection and sharing of scientific data related to coast and ocean resources between agencies.

This bill would provide that the council additionally consists of 2 members of the public appointed by the Governor for a specified term, and with specified qualifications. The bill would provide for reimbursement for actual and necessary expenses incurred in the performance of a member's duties and compensation for each day during which a member is engaged in the performance of official duties of the council, as specified.

(2) Existing law requires the council to take into account the research, findings, recommendations, and determinations of the State Interagency Coordinating Committee and a specified scientific review panel.

This bill would eliminate that requirement.

Ch. 296 (AB 2485) Jones Fish and game: sea otters.

(1) Existing law prohibits the taking of any marine mammal, including any sea otter, whale, dolphin, porpoise, seal, and sea lion, except in accordance with the federal Marine Mammal Protection Act of 1972 and specified federal regulations. Existing law prohibits the taking or possession of any fully protected mammal, including any southern sea otter. Existing law imposes a specified misdemeanor fine or imprisonment for these regulations.

This bill would state the Legislature's intent to establish a research program focused on reducing sea otter mortality from nonpoint source pollution, and developing water and wastewater treatment technologies for pathogens or other causes affecting sea otter mortality. The bill would modify the fines and penalties for a violation of the above described existing laws relating to marine mammals and fully protected mammals to provide for the imposition of a fine of up to \$25,000 for each unlawful taking in violation of those provisions. The bill would also make legislative findings and declarations relating to cat feces and sea otter mortality, and would require any cat litter offered for sale in the state to contain one of 2 alternative statements regarding the proper disposal of cat feces. Because a violation of this requirement would be a crime under other, existing provisions that generally make violations of the Fish and Game Code a crime, the bill would create a state-mandated local program by creating a new crime.

(2) Under existing law, a person who deposits in, or permits to pass into, or place where it can pass into, the waters of this state specified substances, including any substance or material deleterious to fish, plant life, or bird life, is subject to specified civil penalties.

This bill would include in those provisions any substance or material deleterious to mammals.

(3) Under the existing Personal Income Tax Law, taxpayers are allowed to contribute amounts in excess of their tax liability for the support of specified funds.

This bill would additionally allow taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the California Sea Otter Fund, which would be created by this bill. The bill would require money in that fund, upon appropriation by the Legislature, to be allocated to the Department of Fish and Game for the purposes of establishing a sea otter fund, as prescribed, and to the California Coastal Conservancy for research and programs related to improving the near-shore ocean ecosystem, including, but not limited to, program activities to reduce sea otter mortality.

The bill would require the Franchise Tax Board, when another voluntary contribution designation is removed, to revise the form of tax returns to provide for the designation created by this bill, and would allow, upon appropriation by the Legislature, the Franchise Tax Board and the Controller to receive a portion of the funds designated to cover costs incurred in collecting and administering the funds.

The bill would provide that these provisions shall remain in effect only until January 1 of the 5th taxable year following the first appearance of the California Sea Otter Fund on the tax return, unless a later enacted statute deletes or extends that date. If the Franchise Tax Board determines that the amount of contributions estimated to be received during a calendar year will not equal or exceed the minimum contribution amount, as defined, for the calendar year, these provisions would be repealed with respect to taxable years beginning on or after January 1 of that calendar year.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 297 (AB 2773) Berg Fish and game: steelhead trout: Dungeness crab.

(1) Existing law requires any person taking steelhead trout in inland waters to have in his or her possession a steelhead trout catch report-restoration card issued by the Department of Fish and Game. Existing law requires cardholders to record certain information on the catch report-restoration card relative to fishing, and requires the cardholder to return the catch

report-restoration card to the department on a schedule or date established by the department. Existing law requires the base fee for the catch report-restoration card to be \$5 for the 2004 license year, and requires the fee to be adjusted annually thereafter pursuant to a specified index. Existing law requires revenue received pursuant to the catch report-restoration card to be expended, upon appropriation by the Legislature, for specified purposes, and requires the department to perform various functions, including, but not limited to, submitting all proposed expenditures to the Advisory Committee on Salmon and Steelhead Trout for review and comment prior to submitting a request for inclusion of the appropriation in the annual Budget Bill. Existing law requires the department to report to the Legislature on or before July 1, 2007, regarding the implementation of the catch report-restoration card program, the projects undertaken using revenues derived pursuant to that program, the benefits derived, and its recommendation regarding whether the catch report-restoration card requirement should be continued. Existing law makes these provisions relating to steelhead trout inoperative on July 1, 2007, and repeals them as of January 1, 2008.

This bill would change the name of the steelhead trout catch report-restoration card to the steelhead trout fishing report-restoration card. The bill would revise the provision requiring the department to report to the Legislature on its recommendation regarding whether the report-restoration card requirement should be continued to instead require the department to report its recommendations for revising the fishing report-restoration card requirement, if any. The bill would require that the month, day, and location fished be recorded before the cardholder begins fishing for the day and when the cardholder moves to another location listed on the back of the report-restoration card. The bill would require cardholders to immediately record catch information upon keeping a steelhead trout and immediately record catch information regarding released steelhead whenever the cardholder finishes fishing for the day, or moves to another location. The bill would also provide that the provisions relating to steelhead trout would become inoperative on July 1, 2012, and be repealed on January 1, 2013.

Because this bill would revise and extend the operation of the report-restoration card requirements, the violation of which would be a crime under other provisions, it would impose a state-mandated local program.

The bill would appropriate \$800,000 from steelhead trout fishing report-restoration card revenues deposited in the Fish and Game Preservation Fund to the department for specified purposes relating to steelhead trout resources and the report-restoration card program. The money would be available for expenditure by the department through June 30, 2009, as specified.

(2) Existing law prohibits any person from using a vessel to take, possess, or land Dungeness crab for commercial purposes using Dungeness crab traps, unless the owner of that vessel has a Dungeness crab vessel permit for that vessel.

This bill would provide that Dungeness crab vessel permits are valid only in the waters of the state and in the Pacific Ocean in federal waters south of the border with Oregon.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 298 (AB 2972) Nava Oil and gas leases: state waters.

Existing law authorizes the State Lands Commission to lease tide and submerged lands and beds of navigable rivers and lakes for the extraction of oil and gas, as specified.

This bill would require, if an application for oil and gas development in state waters that is determined to be incomplete by the commission continues to remain incomplete one year after the date of the first incomplete notice sent to the applicant by the commission, the application to be considered withdrawn. The bill would authorize, if an application has been withdrawn in that manner, the applicant to submit a new application.

Ch. 299 (AB 1381) Nunez School district governance: Los Angeles Unified School District: Gloria Romero Educational Reform Act of 2006.

(1) Existing law authorizes the Inspector General of the Los Angeles Unified School District to conduct specified audits, investigations, and related activities.

This bill would authorize the Los Angeles Unified School District Board of Education to appoint the inspector general and to make all employment decisions related to the inspector general in a manner consistent with any existing contracts under which the inspector general is employed. The bill would prohibit the dismissal of the inspector general, except for good cause. The bill would require the inspector general to be appointed for a term of 3 years.

The bill would require the inspector general to have access to all contracts and contracting processes conducted as specified to enable review for violations of law or conflicts of interest. The bill would require the inspector general to report quarterly to the Los Angeles Unified School District Board of Education regarding any findings arising from the review of contracts and contracting processes and would require that the reports also be provided to the council of mayors established as specified. The bill also would make the reports public records subject to disclosure under the California Public Records Act.

(2) Existing law requires every school district to be under the control of a board of school trustees or a board of education. Existing law requires any unified school district which is coterminous with or includes within its boundaries a chartered city or city and county to be governed by the board of education provided for in the charter of the city or city and county. Existing law authorizes the governing board of any school district employing 8 or more teachers to employ a district superintendent for one or more schools and to define the duties of the superintendent.

Existing law authorizes the governing board of a school district or a county board of education, on a districtwide or countywide basis or on behalf of one or more of its schools or programs, after a public hearing on the matter, to request the State Board of Education to waive all or part of any provision of the Education Code or any regulation adopted by the state board that implements a provision of that code, except for specified provisions. Existing law requires that a properly submitted waiver request be deemed granted and approved for one year, commencing the 1st day of the following month, if the state board fails to take action on the request by its 2nd regular meeting after the receipt of the request.

Existing law, the California Constitution, requires the state board to adopt instructional materials for grades 1 to 8, inclusive. Existing statutory law requires the governing board of a school district to adopt instructional materials for use in the high schools under its control. Existing law requires the state board to adopt content standards in defined curricula, as specified.

Existing law requires the governing board of each school district to develop and cause to be implemented for each school in the school district a School Accountability Report Card.

This bill would permit the Superintendent of the Los Angeles Unified School District to request, after a public hearing, that the state board waive all or part of any section of the Education Code, except as specified, and would deem the waiver granted for 2 years, commencing the 1st day of the following month, if the state board fails to take action on the request by its 2nd regular meeting after, or 60 days after, receipt of the request, whichever is sooner. The bill would require a request for a waiver to include specified written statements if the exclusive representative of employees responds with its position on the proposed waiver within 30 days of its receipt of the request from the district superintendent.

This bill would authorize the district superintendent to make employment decisions related to all certificated and classified management personnel of his or her office, and to assign and reassign a principal of a school within the Los Angeles Unified School District (LAUSD), and to consult with parents of pupils enrolled at the school to which the principal is assigned, community leaders, and schoolsite personnel regarding the appointment and dismissal of the school principal. The bill would set forth certain requirements regarding the assigning or reassigning of local district superintendents by the district superintendent. The

bill would authorize the board of the LAUSD to employ a pool of administrative staff to serve all members of the board, subject to budget approval; would require the staff to report to the board as a whole; and would prohibit an individual member of the board from employing individual staff. The bill would grant the LAUSD board the power to make employment decisions related to the staff that do not violate any applicable law, written agreement, or contract under which the staff are employed. The bill would require the district superintendent to make all employment decisions for all nonrepresented LAUSD personnel. The bill would require the district superintendent to establish an Office of Parent Communication, as provided, to assure the LAUSD complies with specified matters.

This bill would grant the district superintendent authority over the contracting operations of the LAUSD, including, but not limited to, the negotiation and execution of contracts, except as specified and subject to all other requirements of law. The bill would require the district superintendent to provide public notice, as provided, of his or her intent to award any contract in excess of \$250,000 at least 45 days, or 30 days if there is urgency as provided, before the execution of the contract. The bill would require the district superintendent to report all executed contracts to the LAUSD board, as provided. The bill would require the district superintendent to have the approval of the LAUSD board and to comply with specified provisions if he or she decides to contract with private parties regarding the personal services that, as of January 1, 2007, are provided by employees of the LAUSD, as specified. The bill would require the district superintendent to provide not less than 30 days of written notice of the intent to renew or rebid a personal services contract entered into prior to January 1, 2003, to each exclusive representative of district employees.

This bill would require the district superintendent to annually present a proposed budget for the LAUSD for the succeeding fiscal year to the council of mayors established by this bill for its review and comment and to the LAUSD board for final approval. The bill would require any budget revisions during the fiscal year also be presented to the council of mayors for review and comment and to the LAUSD board for final approval. The bill would require the budget and budget revisions be provided to the council of mayors at least 30 days before the consideration and adoption of the budget or budget revision by the LAUSD board. The bill would limit the budgetary information prepared and presented by the district superintendent to information that is no more detailed than the fund, resource code, and major object code level, as defined in the California School Accounting Manual, as specified. The bill would authorize the council of mayors to hold a public hearing and review and comment on the proposed budget and any budgetary revision at least 15 days prior to the consideration and adoption of the budget or budget revision by the LAUSD board. The bill would require the district superintendent to be responsible for fiscal reporting requirements to the county superintendent of schools, the State Department of Education, and the Superintendent of Public Instruction. The bill would also require the district superintendent to annually provide, for review and comment, the budget to a specified coalition of cities.

This bill would require the LAUSD, when selecting curriculum and instructional materials for the district, to ensure that parents, teachers, and other staff have an authentic and central role; a majority of the participants of each of the advisory curriculum and textbook and instructional materials selection committees of the district are classroom teachers selected by classroom teachers; basic instructional materials for kindergarten and grades 1 to 8, inclusive, purchased with state categorical funds for instructional materials are state board-adopted materials; basic instructional materials for grades 9 to 12, inclusive, are aligned to state content standards, if content standards exist for the applicable subjects; there is a wide selection of supplemental instructional materials that are consistent with the needs of pupils and available for use; and, consistent with those other requirements, each schoolsite, with the participation of its principal, its classroom teachers, and parents of its pupils, are authorized to develop a plan for implementing curriculum that meets the individual needs of its pupils. The bill would authorize principals and teachers at individual schools, with the input of

parents, to develop professional development programs supportive of the individual needs of pupils at their respective schoolsites.

This bill requires the district superintendent to develop and manage the facilities program for the LAUSD, as specified. The bill requires the council of mayors to provide input to the district superintendent regarding the facilities program, but requires that the district superintendent retain all decisionmaking power regarding the facilities program. The bill expresses the intent of the Legislature that the district superintendent take over and be responsible for all district-level, rather than school-level, requirements related to facilities, and that the LAUSD, through the district superintendent, remain subject to all laws regarding the review and approval of decisions of the district by state agencies regarding school facilities of the district. The bill provides that any eminent domain proceedings related to school facilities of the LAUSD require approval by the LAUSD board.

This bill would establish the council of mayors, composed of certain city mayors and city council members, unless the city elects not to participate by adopting a resolution to that effect, and county board of supervisors within the boundaries of the LAUSD, unless the county supervisor elects not to participate, as specified, that would act by 90% of the weighted vote of the membership of the council, as specified. The bill would authorize the council of mayors to select a representative and have that representative participate in all aspects of the selection and evaluation by the LAUSD board of the district superintendent, as provided, except that the representative would not have the right to vote with the board on any matter; would require the appointment, contract term, contract renewal, or involuntary removal of the district superintendent to be ratified by the council of mayors, as provided; would require the council of mayors to communicate through its representative in closed session the reason for any refusal to ratify the appointment, contract term, contract renewal, or removal of the district superintendent; and would require the district superintendent to provide, as specified, each School Accountability Report Card for each school of the district to the council of mayors on an annual basis for review and comment. The bill would also require the council of mayors and the district superintendent to negotiate and finalize memoranda of understanding by March 1, 2007, to establish an efficient and effective process to ensure that the LAUSD and each county or city have every opportunity to consult and agree based on good faith participation upon joint-use projects between the district and each city or the county to permit youth, children, and families to access and use school resources at times other than during the regular schoolday; to ensure that each city or county supervisorial district in which a new school is proposed to be constructed by the LAUSD has the opportunity to provide feedback to the district superintendent and to propose alternative sites or modified construction options, and to follow whatever consultative process the city or supervisorial district may devise in arriving at such feedback, without unreasonably delaying the completion and opening of a newly constructed school; and for the council of mayors and the LAUSD to jointly conduct and complete, by January 1, 2008, the first periodic comprehensive identification, mapping, and assessment of available services, including public safety services, for children and youth in each school community, and to jointly consult about creating and maintaining new community services for children and youth to fill gaps identified in the assessment, in order to support the education and increased achievement of pupils in each school community. The bill would require the LAUSD and council of mayors to cooperate to identify private resources to fund the assessment to the greatest extent possible. The bill would authorize the council of mayors, in the course of conducting its duties, to create a committee of parents of pupils in the LAUSD, to provide input on the selection of a superintendent and other education related matters considered by the council of mayors and on the effective delivery of services to children and youth by the district and municipalities, and would require the district to assist the council of mayors in conducting outreach to parents in the creation of that committee.

This bill would require, upon authorization by the county superintendent of schools, the Mayor of the City of Los Angeles, in partnership with the LAUSD, parent and community

leaders and organizations, and school personnel and employee organizations, to, as part of a demonstration project, exercise specified powers regarding 3 clusters of the lowest performing schools in different geographic areas within the City of Los Angeles. The bill would require each cluster to include a high school that is ranked in decile 1 or 2 of the Academic Performance Index and its feeder middle and elementary schools and other programs, including, but not limited to, early childhood programs and centers, continuation schools, and adult education programs. The bill would require participation by the LAUSD in the partnership through a full-time district employee appointed by the district superintendent for each of the 3 clusters. The bill would require the Los Angeles Mayor to ensure that each cluster is represented in the partnership from at least 2 representatives from parent organizations, at least 2 community leaders, one classroom teacher, one classified employee, and one school administrator, as specified. The bill would require the high schools for each cluster to be selected by the Los Angeles Mayor and the district superintendent, in consultation with the other members of the partnership, within specified timelines, and would require the county superintendent of schools to make that selection if the selection is not made within the deadline. The bill would specify the purposes of the demonstration project. The bill would require all authority exercised by the LAUSD board and the district superintendent with respect to the schools in the demonstration project to be transferred to the partnership, except as specified. The bill would provide that the schools in the demonstration project continue to exist as district schools, that the employees at the schools in the demonstration project be deemed to be district employees, and that the schools in the demonstration project continue to be funded with existing resources and private donations. The bill would require that the partnership schools receive the same benefit from increased funding that they would receive if not participating in the partnership and would prohibit the LAUSD from taking actions that have negative fiscal consequences for partnership schools due to their participation in the partnership. The bill would require the partnership schools and the LAUSD to develop a budget and cost system, as specified.

The bill would permit the community partnership to request that the Los Angeles County Superintendent of Schools authorize the demonstration project and would prohibit the project from proceeding without that authorization. The bill would require the county superintendent to act upon the request within 20 days of his or her receipt of the request. The bill would require the county superintendent to grant the request unless the county superintendent determines that any of the specified conditions exist. The bill would permit the county superintendent to withdraw authorization of the demonstration project, after the specified progress report is completed, by concluding and certifying that the progress report demonstrates that any of the specified conditions exist.

This bill would require the State Department of Education to contract, from funds appropriated for this purpose, for an evaluator to develop a progress report on the implementation of the specified LAUSD programs to be completed on or before January 1, 2008; conduct a final evaluation to be completed by January 1, 2011; and report to the Legislature and the Governor on the final evaluation, including recommendations to continue, modify, or terminate the programs, by January 1, 2011, based upon the results in meeting specified measurements of the effectiveness of the programs based on a comparison of the LAUSD and its component schools and pupils in 2006 relative to the time of the evaluation of the LAUSD and its component schools and pupils. The bill would require the evaluation to include, but not be limited to, whether schools participating in the Los Angeles Mayor's Community Partnership for School Excellence, other schools in the LAUSD, and the LAUSD as a whole accomplished, and, in specified instances, to what degree they accomplished, specific goals.

This bill would repeal these provisions as of January 1, 2013.

To the extent this bill would impose additional duties on officials of local agencies and local educational agencies, this bill would impose a state-mandated local program.

(3) This bill would declare that, due to special circumstances applicable to the LAUSD, a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution, and the enactment of a special statute is therefore necessary.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 300 (SB 369) Simitian Solid waste: tire recycling: rubberized asphalt concrete.

(1) Existing law authorizes the California Integrated Waste Management Board to implement a program to award grants of up to \$50,000 to cities, counties, districts, and other local governmental agencies for the funding of public works projects that use rubberized asphalt concrete and meet specified qualifications, including that the project will use between 2,500 and 20,000 tons of rubberized asphalt concrete and 20 pounds or more of crumb rubber per ton of rubberized asphalt concrete. The grants are funded by an appropriation in the annual Budget Act from the California Tire Recycling Management Fund. Existing law became inoperative on June 30, 2006, and is repealed on January 1, 2007.

This bill would revise the eligibility qualifications for those public works grants to instead require the project to use at least 1,250 tons of rubberized asphalt concrete. The bill would require the board to annually calculate the amount of a grant, based on the amount of rubberized asphalt concrete used on a project, and would increase the maximum amount of grant money that can be awarded to \$250,000. This bill would recommence the grant program on January 1, 2007, and would make the program inoperative on June 30, 2010. The bill would extend the repeal date to January 1, 2011.

(2) Existing law authorizes funding for certain activities that reduce, or are designed to reduce or promote the reduction of, the landfill disposal of used whole tires.

This bill would revise and increase the types of activities eligible for funding to delete the use of used tires for artificial reefs and to include rubberized asphalt, as specified, and tire-derived aggregate applications, as specified.

(3) Existing law requires the Integrated Waste Management Board to submit a 5-year plan to the appropriate policy and fiscal committees of the Legislature that includes, until June 30, 2006, a description of the effectiveness of the grant program to encourage the use of rubberized asphalt concrete technology in public works projects.

This bill would extend the requirement for the inclusion of that description until June 30, 2010.

Ch. 301 (SB 562) Torlakson Physical education: California Interscholastic Federation.

Existing law provides the State Department of Education the authority to exercise general supervision over courses of physical education and specified authority over interscholastic athletics. Existing law grants the governing board of a school district authority to regulate interscholastic athletics, including, but not limited to, the authority to enter into associations or consortia with other boards relating to interscholastic athletics, with certain requirements. Existing law repeals these provisions on January 1, 2007.

This bill would extend the operation of these provisions indefinitely.

Existing law also describes the California Interscholastic Federation, provides the intent of the Legislature regarding its policies, and requires it to report to the Legislature by January 1, 2005. Existing law repeals these provisions on January 1, 2007.

This bill would extend the operation of these provisions to January 1, 2012. The bill would require the California Interscholastic Federation to report to the Legislature on or before

January 1, 2010, with certain requirements, and would provide the intent of the Legislature regarding public comment relating to the California Interscholastic Federation.

Ch. 302 (SB 579) Aanestad Optometry: licenses: advertisements.

(1) Under existing law, the Optometry Practice Act, the State Board of Optometry licenses and regulates persons engaged in the practice of optometry and makes a violation of the act a crime. Existing law authorizes the board to issue a certificate of registration to a person licensed in another state who, among other things, is a full-time faculty member of a specified accredited California school or college of optometry. Existing law authorizes the board to adopt regulations requiring licensees to maintain current certification in cardiopulmonary resuscitation. The act directs the deposit of all revenue collected by the board into the Optometry Fund, in which funds, other than penalty revenue, are continuously appropriated.

This bill would authorize the board also to issue a license to a person that, among other things, has passed a licensing examination for an optometric license in another state, submits proof of licensure in good standing, as defined, submits proof of active practice for a minimum of 5,000 hours, pays an application fee, and files an application with an acknowledgment executed under penalty of perjury, as specified. The bill would authorize the board, in cases where the person has been displaced by a federally declared emergency, to approve an application where the person's time in active practice is less than 5,000 hours. The bill would eliminate the board's authority to adopt regulations requiring licensees to maintain current certification in cardiopulmonary resuscitation. By increasing that part of the revenue in the Optometry Fund that is continuously appropriated, the bill would make an appropriation. By expanding the crime of perjury, the bill would impose a state-mandated local program. The bill would also make technical, nonsubstantive, and conforming changes.

(2) Existing law makes it unlawful to advertise optometric services as being free or without cost.

This bill would instead make it unlawful to advertise as being free or without cost the furnishing of optometric services where the services are contingent upon payment or other exchange of consideration unless the contingency is fully disclosed.

Because a violation of this provision would be a crime, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 303 (SB 896) Runner Inmates: health care services.

Existing law authorizes the Department of Corrections and Rehabilitation, county sheriffs, and police chiefs to contract with providers of emergency health care services.

This bill would, in addition, allow other public agencies that contract for emergency health services to contract with providers for emergency health care services for care to local law enforcement patients.

Existing law provides that specified associations convene a working group to address fiscal issues relating to the provision of this contracted emergency medical health services. This bill would provide that to the extent that these contracts result in a disproportionate share of local law enforcement inmates being treated at any one hospital or system of hospitals, this working group shall address this issue.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 304 (SB 933) Machado Teacher credentialing: district interns.

Existing law authorizes the Commission on Teacher Credentialing, until January 1, 2008, to issue district intern credentials authorizing persons employed by any school district to

provide classroom instruction to pupils with mild and moderate disabilities in special education classes.

This bill would require the commission, until January 1, 2010, to participate in a pilot program, which may include the San Joaquin County Office of Education and up to 5 school districts or consortia, to provide teacher preparation programs for teachers of pupils with disabilities in special education classes and would authorize the commission to issue district intern credentials authorizing participants in the programs to provide classroom instruction to pupils with disabilities in special education classes.

This bill would require the commission to prepare and submit a report to the Legislature on or before January 1, 2009, on the effectiveness of the pilot program.

Ch. 305 (SB 1229) Florez Horse racing: advertising.

Existing law authorizes parimutuel wagering on horse racing. Existing law prohibits any other form of wagering or betting on the result of a horse race.

This bill would make it unlawful for any person to advertise, or to facilitate the advertisement of, nonparimutuel wagering on horse races. Because the bill would create a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 306 (SB 1261) McClintock Criminal justice statistics.

Under current law the Department of Justice is required to collect specified criminal justice information from local law enforcement agencies and prepare an annual report presenting the collected data.

This bill would require the department to maintain a data set, updated annually, relating to crimes reported, number of clearances, and clearance rates reported by local law enforcement agencies. This bill would further require that this report shall be accessible by a hypertext link on the department's Internet Web site, as specified.

Ch. 307 (SB 1273) Soto Public Employees' Retirement System: area agency on aging.

The Public Employees' Retirement Law permits various public agencies, as defined, to enter into contracts to participate in the Public Employees' Retirement System, upon obtaining a specified advisory opinion from the United States Department of Labor. Member contributions are deposited in the Public Employees' Retirement Fund, a continuously appropriated fund.

An area agency on aging is a private nonprofit or public agency that provides community planning, program development and services for older Californians.

This bill would permit a private nonprofit area agency on aging to enter into a contract to participate in this system upon obtaining that advisory opinion. By increasing member contributions to that fund, this bill would make an appropriation.

Ch. 308 (SB 1324) Lowenthal School buildings: relocatable buildings.

Existing law, the Field Act, requires that an owned relocatable building that is to be used for school purposes is subject to certain provisions requiring approval of plans and relating to the structural safety of school buildings. The existing Field Act provides that, notwithstanding those provisions, an owned or leased relocatable building that does not meet those requirements may be used until September 30, 2007, as a school building, if certain conditions are met, including, among others, that the relocatable building was manufactured and in use for classroom purposes on or before May 1, 2000, and bears a commercial coach insignia of approval from the Department of Housing and Community Development.

This bill would authorize the use of those owned or leased relocatable buildings as a school building until September 30, 2015, if the specified conditions are met. The bill would also include, as additional conditions, that the relocatable building be anchored to the ground to resist earthquake and wind loads and that the school district has certified to the Department of General Services that the relocatable building complies with the conditions.

Existing law requires, for each relocatable building used as a school building, the governing board of a school district to adopt a resolution by October 30, 2007, certifying to the State Allocation Board that commencing September 30, 2007, the relocatable building is no longer being used as a school building.

This bill would instead require, for each relocatable building used as a school building, the governing board of a school district to adopt a resolution by October 30, 2015, certifying to the board that commencing September 30, 2015, the relocatable building is no longer being used as a school building. The bill would also delete an obsolete provision.

Ch. 309 (SB 1347) Machado Water: solar evaporators.

(1) Existing law requires the State Water Resources Control Board (state board), on or before April 1, 2003, to adopt emergency regulations that establish minimum requirements for the design, construction, operation, and closure of a solar evaporator, as defined. Existing law requires that the regulations include specified requirements. Existing law prohibits a California regional water quality control board (regional board), on and after January 1, 2008, from issuing a written notice of authority to operate a solar evaporator, as specified. Existing law regulates the operation of solar evaporators, and defines terms for that purpose.

This bill would delete the date reference for the state board's adoption of emergency regulations for a solar evaporator, revise the requirements required to be included in the regulations, and make related changes with respect to the adoption or amendment of regulations relating to solar evaporators. The bill would delete the prohibition of a regional board, on and after January 1, 2008, issuing a written notice of authority to operate a solar evaporator, as specified. The bill would revise the definition of certain terms for purposes of regulation of solar evaporators.

(2) Existing law requires a person who intends to operate a solar evaporator to file a notice of intent with the regional board, using a form prepared by the regional board. Existing law requires that the form require the person to provide specified information.

The bill would revise the information that the person is required to provide.

(3) Existing law provides specified timeframes and procedures for the regional board to approve or disapprove a notice of intent to operate a solar evaporator, and to approve or disapprove operation of a solar evaporator.

The bill would revise and recast those timeframes and procedures.

(4) Existing law requires a person operating a solar evaporator to annually submit groundwater monitoring data and any other information that the regional board deems necessary to ensure compliance with specified requirements. Existing law requires a regional board to adopt a schedule for the submission of that data and information.

The bill, instead, would require a person operating a solar evaporator to submit to the regional board, in April and October of each year, specified information related to waterflow, water quality, and groundwater monitoring. The bill would require the waterflow and water quality data to be collected bimonthly and the groundwater monitoring data to be collected semiannually, except as specified.

(5) The bill would require a person operating a solar evaporator as specified to manage the collection and removal of evaporite salt from the solar evaporator, as specified.

(6) The bill would authorize an aggrieved person, within 30 days of any action or failure to act by a regional board as specified, to petition the state board to review the action or failure to act, as specified.

Ch. 310 (SB 1560) Battin Common interest developments: governance.

(1) The Davis-Stirling Common Interest Development Act governs the establishment and management of common interest developments. These provisions require that a common interest development be managed by an association and that elections related to the governance or administration of the common interest development conform to specified requirements. Existing law authorizes a member of an association to bring a civil action to enforce his or her rights and authorizes a court to impose a civil penalty of up to \$500 for a violation of the provisions governing elections.

This bill would revise provisions governing the conduct of elections in a common interest development. Among other things, the bill would require an association to adopt rules to allow one or more inspectors to appoint or oversee independent 3rd parties to verify signatures and count and tabulate votes, specify that a quorum shall be required in certain elections only if so stated in the governing documents of the association or other provision of law, permit a ballot received by the inspector of elections to be treated as a member present for purposes of a quorum, and impose other requirements relating to proxies and ballots, as specified.

(2) Existing law also requires the association of a common interest development to make the accounting books and records and the minutes of proceedings of the association available for inspection and copying by a member of the association, or the member's designated representative. The act prohibits the association or an officer, director, employee, agent or volunteer of the association from being liable for damages for failing to withhold or redact information unless the failure to withhold or redact information was intentional or negligent.

This bill would prohibit a 3rd party from being liable for damages for failing to withhold or redact information unless the failure to withhold or redact information was intentional or negligent. This bill would permit the association to deliver documents by electronic transmission or machine-readable storage if those records are transmitted in a redacted format, as specified.

(3) The bill would declare that it is to take effect immediately as an urgency statute, but its provisions would become operative on July 1, 2006.

Ch. 311 (SB 1586) Lowenthal Government: eminent domain and inverse condemnation: public service easements: vehicles.

(1) Existing law defines "apportionment rate" for the purposes of computing interest when awarding compensation in eminent domain and inverse condemnation proceedings.

This bill would revise the definition of "apportionment rate" for these purposes to require the computation to be based on a calendar quarter time period.

(2) Existing law authorizes the legislative body of a local agency to summarily vacate a public service easement, under specified circumstances.

This bill would authorize a legislative body of a local agency to summarily vacate a public easement when the easement has been determined to be excess by the easement holder, and there are no other public facilities located within the easement.

(3) Existing law requires the Department of Motor Vehicles to make available to the public, under certain circumstances, abstracts of convictions and accident reports required to be sent to the department in Sacramento, for 7 years where a violation is designated as 2 points, as specified, and for 3 years for accidents and all other violations.

This bill would extend the time that the department is required to make available to the public the abstracts of convictions, under specified sections prohibiting operation of a motor vehicle under the influence of drugs, alcohol, or both, from 7 to 10 years.

(4) Existing law imposes on the employer of a driver who drives one of several specified vehicles, including a vehicle for the operation of which the driver is required to have a schoolbus or school pupil activity bus certificate, as specified, several requirements related to the driver's public record. A violation of those requirements is a crime.

This bill would delete from that list of vehicles an erroneous cross-reference, and include in that list of vehicles a vehicle for the operation of which the driver is required to have an

ambulance driver's certificate, as specified. By changing the definition of a crime, the bill would impose a state-mandated local program.

(5) Existing law generally requires an applicant for an original certificate to drive a schoolbus, school pupil activity bus, youth bus, or general public paratransit vehicle, as defined, to be fingerprinted by the Department of the California Highway Patrol, as specified, and those fingerprints to be processed as specified.

This bill would authorize the Commissioner of the California Highway Patrol to utilize the California Law Enforcement Telecommunications System to conduct a preliminary criminal and driver history check to determine an applicant's eligibility to hold an original or renewal certificate to drive a schoolbus, school pupil activity bus, youth bus, or general public paratransit vehicle.

(6) Existing law requires that an application for a driver's license or identification card contain a space for an applicant, age 16 years or older, to give his or her consent to be an organ or tissue donor upon death.

This bill would delete the requirement that the applicant be age 16 years or older to give his or her consent to be an organ or tissue donor.

(7) Existing law requires, with limited exceptions, that, during darkness and inclement weather, a motor vehicle, other than a motorcycle, be equipped with at least 2, specifically located, lighted headlamps.

This bill would clarify and recast this offense to make clear that it applies when the vehicle is being operated in the dark or in inclement weather, or both.

(8) This bill would make other technical changes to the Vehicle Code.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 312 (SB 1810) Dunn Long-term care insurance.

(1) Existing law provides for the regulation of long-term care insurance by the Insurance Commissioner.

This bill would authorize the commissioner to require administration by an insurer of the contingent benefit upon lapse, as specified, as a condition to approving or acknowledging a rate adjustment for a block of business for which that benefit is not otherwise available.

(2) Existing law, until January 1, 2008, requires the commissioner to disapprove a premium rate schedule increase request if it exceeds a specified amount, except under specified circumstances.

This bill would delete the provision terminating this particular rate increase prohibition thereby extending its operation indefinitely.

#### Ch. 313 (AB 307) Chavez Education technology: grants: requirements.

Existing law requires the State Department of Education to administer the California Technology Assistance Project to provide a regionalized network of technical assistance to schools and school districts on the implementation of education technology. Existing law requires the department to administer provisions governing education technology and authorizes school districts, county offices of education, and state special schools to apply to the State Board of Education to participate in grant programs related to education technology. Existing law requires a school district to have a current 3-to-5 year education technology plan as a precondition to receiving a technology grant administered by the department, unless this requirement is waived by the board.

This bill would, on or before July 1, 2007, require the Superintendent to develop guidelines and criteria for inclusion in the education technology plan. The bill would require the guidelines and criteria to include a component to educate pupils and teachers on the appropriate and ethical use of information technology in the classroom, Internet safety,

avoiding plagiarism, the concept, purpose, and significance of a copyright so that pupils can distinguish between lawful and unlawful online downloading, and the implications of illegal peer-to-peer network file sharing. The bill would exempt a school district that, on July 1, 2008, has a 3-to-5 year education technology plan from compliance with this requirement until that plan expires or is voluntarily replaced, at which time the school district would be subject to the requirement.

Ch. 314 (AB 1316) Salinas Hospital districts: hospital rules: indemnification.

The existing Local Health Care District Law prescribes procedures for the formation and organization of hospital districts, and specifies the powers and duties of those districts. The law requires that the rules of a hospital, established by the board of directors, include specified provisions pertaining to the operation of the hospital and appointment of hospital medical staff, as provided.

This bill would authorize the board of directors to indemnify for damages and for costs associated with the legal defense of any nonemployee member of the medical staff when named as a defendant in a civil action directly arising out of opinions rendered, statements made, or actions taken as a necessary part of participation in the medical peer review activities of the district, as specified. The bill would authorize a district to pay that part of a judgment that is for punitive or exemplary damages against a nonemployee member of the medical staff arising out of participation in peer review activities, if the board of directors of the district, in its discretion, makes specified findings. By imposing new duties on hospital districts with respect to the implementation of new rules in hospitals, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 315 (AB 1858) McCarthy State Highway Routes 58, 178, and 204: relinquishment.

Existing law gives the Department of Transportation full possession and control of all state highways. Existing law describes the authorized routes in the state highway system and establishes a process for adoption of a highway on an authorized route by the California Transportation Commission. Existing law also authorizes the commission to relinquish certain state highway segments to local agencies.

This bill would authorize the commission to relinquish to the City of Bakersfield the portions of State Highway Routes 178 and 204 that are located within the city limits of that city under certain conditions. The bill would also authorize the commission to relinquish to the City of Bakersfield or the County of Kern the portion of State Highway Route 58 that is located within the city limits of the City of Bakersfield under certain conditions.

Ch. 316 (AB 1880) Blakeslee State hospitals: care of the mentally disordered.

Under existing law, the State Department of Mental Health has jurisdiction over 5 hospitals, including Atascadero State Hospital, for the care, treatment, and education of the mentally disordered.

This bill would require the Atascadero State Hospital director to develop a hospitalwide strategic plan that includes strategies to improve the health, safety, therapeutic, and workplace environment with relation to the presence or use of tobacco products, as specified, to improve staff and patient safety, to decrease violent incidents and reduce future violent incidents, to better utilize staff resources, and to increase local recruitment and improve staff retention. This bill would require the hospital director to develop this plan through the

hospital's strategic planning process, and to invite participation in that process from stakeholders within and outside of the hospital organization, and to include representatives from specified entities. The bill would require the director to provide this report to the Atascadero State Hospital Advisory Board on or before June 30, 2007, 2008, and 2009.

This bill would repeal these provisions on January 1, 2010.

Ch. 317 (AB 1890) Mountjoy Property taxation: transfer of base year value: disaster relief.

Existing property tax law provides, pursuant to a requirement of the California Constitution, that the property tax base year value of real property that is substantially damaged or destroyed by a disaster, as declared by the Governor, may be transferred to a comparable property located within the same county that is acquired or newly constructed within 3 years after the disaster as a replacement property.

This bill would, for disasters occurring on or after July 1, 2003, expand this transfer authorization to allow a comparable replacement property to be acquired or newly constructed within 5 years, rather than 3 years, after a disaster.

This bill would take effect immediately as a tax levy.

Ch. 318 (AB 1938) Bogh State highways: relinquishment.

Existing law provides that the Department of Transportation has full possession and control of all state highways. Existing law describes the authorized routes in the state highway system and establishes a process for adoption of a highway on an authorized route by the California Transportation Commission. Existing law authorizes the commission to relinquish certain state highway segments to local agencies.

This bill would authorize the commission to relinquish any portions of State Highway Route 79 in the City of San Jacinto to that city under certain conditions.

Ch. 319 (AB 2156) Niello Clinical laboratories.

Existing law provides for the licensure and regulation of clinical laboratories and their personnel by the State Department of Health Services. Existing law makes a violation of these provisions a crime.

Existing law defines a "laboratory director" as any person that is a duly licensed physician and surgeon or is licensed to direct a clinical laboratory and who meets specified qualifications. Existing law makes laboratory directors responsible for the overall operation and administration of clinical laboratories which includes, among other things, the reporting of results.

This bill would require a laboratory director or a licensed authorized designee appointed by the laboratory director to establish, validate, and document explicit criteria by which clinical laboratory tests or examination results are autoverified, as defined. The bill would also require a laboratory director or an authorized designee, annually, to revalidate the criteria. The bill would require specified licensed persons to be physically present onsite in the clinical laboratory and to have documented competency in all tests being autoverified, and it would make these specified licensed persons responsible for the accuracy and reliability of the results when they are autoverified and reported.

Existing law defines a "histocompatibility laboratory director" as any person who is (1) a duly licensed physician, (2) a bioanalyst, or (3) a person who has earned a doctoral degree in a biological science and has completed, as specified, 4 years of experience in immunology, 2 of which have been in histocompatibility testing. Existing law also defines and sets forth qualifications for a "clinical laboratory bioanalyst."

This bill would add to the requirements of a histocompatibility laboratory director (1) a requirement that a physician and surgeon be qualified as a laboratory director, (2) a requirement that a bioanalyst be qualified as a clinical laboratory bioanalyst and as a laboratory director, and (3) a requirement that, on and after January 1, 2007, a person who

has earned a doctoral degree in biological science successfully complete a written exam administered by the American Board of Histocompatibility and Immunogenetics and an oral exam administered by the department.

Under existing law, unlicensed laboratory personnel are authorized to perform specified activities, in a licensed clinical laboratory, under the direct and constant supervision of a physician and surgeon or another licensed person if certain criteria are met. Existing law authorizes these unlicensed laboratory personnel to perform specimen labeling, handling, preservation or fixation, processing or preparation, transportation, and storing.

This bill would authorize a certified pathologists' assistant, within the specialty of pathology, demonstrating specified competency, to perform specified activities under the supervision and control of a pathologist. The bill would authorize a pathologists' assistant, a histologic technician, and a histotechnologist to prepare human surgical specimens for gross description and dissection under the direct supervision, as defined, of a qualified pathologist, if he or she meets specified requirements. The bill would authorize the department, on and after January 1, 2011, to adopt regulations establishing additional qualification requirements to perform the duties specified in these provisions.

Because the bill would revise requirements pertaining to clinical laboratories and their personnel, a violation of which would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 320 (AB 2309) Negrete McLeod Payments to public agencies.

Existing law authorizes a public agency to accept payment for designated obligations by credit card, debit card, or electronic funds transfer, subject to approval by the governing body of the agency or other appropriate entity, as specified.

This bill would authorize, subject to approval of the county board of supervisors, the acceptance by credit card, debit card, or electronic funds transfer of any moneys payable to the sheriff pursuant to a levy under a writ of attachment or writ of execution.

#### Ch. 321 (AB 2400) Benoit Reinsurance.

Existing law provides that the Insurance Commissioner regulates the business of reinsurance.

This bill would make minor changes in the law regarding credit for reinsurance, insolvency of a ceding company, assets or deductions for reinsurance, and foreign ceding insurers.

This bill would also provide that during an examination of a reinsurance intermediary, all documents disclosed may be used by the commissioner, and given confidential treatment, as specified. This bill would further provide that the examination shall be at the expense of the insurance intermediary, and that the commissioner may revoke the license of the insurance intermediary for a refusal to promptly pay the examination expense when due. This bill would also provide the manner in which insurance intermediaries must comply with court or arbitration panel orders regarding production of documents or witnesses, as specified.

#### Ch. 322 (AB 2401) Karnette Vehicles: autoettes.

(1) Existing law requires operating motor vehicles to be registered by the Department of Motor Vehicles. Existing law makes it a crime to violate any provision of the Vehicle Code.

This bill would require the department to register autoettes, as defined, as motor vehicles. The bill would also require the owner of the autoette to remove the license plates from the

vehicle and return them to the department if the vehicle is removed from a natural island, as described.

Because the failure to remove the license plates would create a new crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 323 (AB 2479) Cogdill Noxious and invasive weeds.

Existing law provides that within the Department of Food and Agriculture Fund there is the Noxious Weed Management Account, the funds in which are made available to eligible weed management areas or county agricultural commissioners for the control and abatement of noxious weeds according to an approved integrated weed management plan. Existing law provides that only 5% of the funds in the account shall be made available to the Department of Food and Agriculture for carrying out provisions relating to management of noxious and invasive weeds, developing noxious weed strategies, seeking new biological control agents, conducting workshops, and appointing a noxious weed coordinator and weed mapping specialist.

This bill would make various findings and declarations regarding the impact of noxious and invasive weeds on California. This bill would increase the percentage of Noxious Weed Management Account funds that shall be made available to the department to 10%.

Ch. 324 (AB 2588) Sharon Runner Business entities: reinstatement.

Existing law requires that a business entity file with the Secretary of State a document, as specified, to effect its termination.

This bill would require the Secretary of State to reinstate a business entity to active status upon a court finding that factual representations in support of the termination document are materially false or the submission of the termination document for filing with the Secretary of State is fraudulent or upon other grounds warranting reinstatement of the business entity.

Ch. 325 (AB 2717) Walters Charter school finance.

The California School Finance Authority Act establishes the California School Finance Authority for the purpose of assisting school districts and community college districts by providing financing for working capital, as defined, and capital improvements.

This bill would, in addition, provide that charter schools are eligible for assistance under the act, and would revise various definitions and procedures contained in the act accordingly.

Ch. 326 (AB 3041) Pavley Public employees' health benefits: prescription drug plans.

The Public Employees' Medical and Hospital Care Act requires the Board of Administration of the Public Employees' Retirement System to approve health benefit plans for certain public employees and annuitants, and authorizes the board to contract with carriers offering health benefit plans. The act prohibits an employee, annuitant, or family member enrolled in a prescription drug plan under Part D of Medicare from enrolling in a board-approved health benefit plan, unless enrolled in an approved Medicare Advantage health benefit plan.

This bill would instead exempt from that prohibition an employee, annuitant, or family member enrolled in a board-approved or offered health benefit plan that provides a prescription drug plan or qualified prescription drug coverage under Part D of Medicare as part of its benefit design.

Ch. 327 (AB 3070) Committee on Health Medi-Cal: demonstration project: hospital funding.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

Existing law establishes the Medi-Cal Hospital/Uninsured Care Demonstration Project Act, which revises hospital reimbursement methodologies under the Medi-Cal program in order to maximize the use of federal funds consistent with federal Medicaid law and stabilize the distribution of funding for hospitals that provide care to Medi-Cal beneficiaries and uninsured patients. This demonstration project provides for funding, in supplementation of Medi-Cal reimbursement, to various hospitals, including designated public hospitals, nondesignated public hospitals, and private hospitals, as defined in accordance with certain provisions relating to disproportionate share hospitals.

Existing law requires the department, with respect to each project year beginning after the 2005–06 project year, to determine an adjusted baseline funding amount for each designated public hospital to reflect any increase or decrease in volume.

This bill would make specified changes to the calculation of this adjusted baseline funding amount.

Existing law provides for the payment of safety net care pool funds to designated public hospitals, or governmental entities with which they are affiliated, pursuant to the demonstration project. Existing law requires that the department claim safety net care pool funds using the optimal combination of hospital certified public expenditures and certified public expenditures of a hospital that operates nonhospital clinics or provides physician, nonphysician practitioner, or other health care services that are identified as hospital services under the demonstration project.

This bill would, in addition, include certified public expenditures of a governmental entity with which a hospital described above is affiliated among the expenditures that the department may use to claim safety net care pool funds. The bill would make other changes regarding the expenditures that the department may use to claim those funds.

Existing law provides for the payment of stabilization funding to certain disproportionate share hospitals under the demonstration project. Existing law specifies the payments required to be made to private hospitals under the demonstration project.

Existing law establishes the Private Hospital Supplemental Fund, and allows the California Medical Assistance Commission to distribute certain amounts from the fund to private hospitals that satisfy specified criteria. Existing law authorizes the payment of the amount of any stabilization funding transferred to the Private Hospital Supplemental Fund with respect to a project year for services furnished in the same project year, regardless of when the stabilization funds become available, provided the payment is consistent with other applicable federal or state law requirements and does not result in a hospital exceeding any applicable reimbursement limitations.

This bill would, in addition, apply this payment authorization to the amount of intergovernmental transfers deposited to the fund pursuant to specified provisions, together with the associated federal reimbursement.

The bill would prohibit a private hospital that receives payment from the fund for a particular project year from submitting a notice for the termination of its participation in a certain selective provider contracting program until the later of specified dates.

This bill would include among the payments required to be made to private hospitals any stabilization funding payable to project year private DSH hospitals for a project year.

Existing law requires the Director of Health Services, with respect to each project year, to determine a baseline funding amount for each base year private DSH hospital that is also a project year private DSH hospital, as defined. Existing law requires, with respect to each project year beginning after the 2005–06 project year, an aggregate project year private hospital adjusted baseline funding amount be determined.

This bill would make specified changes to the calculation of the aggregate project year private hospital adjusted baseline funding amount.

Existing law requires the department to compute payment adjustment amounts and supplemental payment adjustment amounts for each nondesignated public hospital that is an eligible hospital for the project year, and to make interim payments, as specified.

This bill would, instead, require the department to pay to each nondesignated public hospital that is an eligible hospital for the project year disproportionate share hospital payment adjustments, as specified. The bill would make certain changes to the calculation of those adjustments, and would require the payment of interim payments to certain nondesignated public hospitals on October 1 and December 1 of each project year.

Existing law requires the department to add to specified payment adjustments for a nondesignated public hospital a pro rata share of any stabilization funding to be allocated and paid based on those payment adjustments.

This bill would prohibit the federal share of any stabilization funding allocated and paid under these provisions from being drawn from the allotment of federal funding for Medicaid disproportionate share hospital payment adjustments for California specified under certain provisions of federal law.

Existing law establishes the Nondesignated Public Hospital Supplemental Fund for distribution to nondesignated public hospitals that satisfy specified criteria. Existing law requires that each nondesignated public hospital that meets specified criteria receive no less from the Nondesignated Public Hospital Supplemental Fund for the project year than 100 percent of the amount the hospital received from the prior supplemental funds for the 2002–03 fiscal year.

This bill would require, instead, that such a hospital receive no less than that amount, minus the total amount of intergovernmental transfers made by or on behalf of the hospital pursuant to specified provisions of law for the same fiscal year.

Existing law requires the director, with respect to each project year, to determine a baseline funding amount for each nondesignated public hospital that was an eligible hospital under specified provisions of law for both the 2004–05 fiscal year and the project year.

This bill would require that the baseline funding amount for each nondesignated public hospital reflect a reduction for the total amount of intergovernmental transfers made pursuant to specified provisions of law for the 2004–05 state fiscal year by the nondesignated public hospital, or on its behalf by the governmental entity with which it is affiliated.

Existing law requires that, with respect to each project year beginning after the 2005–06 project year, an aggregate nondesignated public hospital adjusted baseline funding amount be determined, as specified.

This bill would make specified changes to the calculation of the aggregate nondesignated public hospital adjusted baseline funding amount.

The bill would prohibit a nondesignated public hospital that receives payment of baseline funding amounts pursuant to these provisions for a particular project year from submitting a notice for the termination of its participation in a certain selective provider contracting program until the later of specified dates.

Existing law requires that, with respect to each project year, the total amount of stabilization funding be the sum of certain amounts, including specified state general funds.

This bill would allow those state general funds to be used to calculate the total amount of stabilization funding only to the extent that the funds are in excess of specified amounts.

Existing law requires that, with respect to the 2005–06 and 2006–07 project years, the stabilization funding be allocated in a specified manner, including \$8,000,000 to San Mateo Medical Center, and an amount equal to 0.56% of the total stabilization funding amount to nondesignated public hospitals.

This bill would provide that all or a portion of the \$8,000,000 to San Mateo Medical Center may be paid as disproportionate share hospital payments in addition to the hospital's allocation that would otherwise be determined under specified provisions of law, and would

require that this amount be disregarded in the application of certain limitations on disproportionate share hospital payments and safety net care pool payments. The bill would change the amount of stabilization funding to be paid to nondesignated public hospitals to 0.64% of the total stabilization funding amount.

The bill would prohibit the allocation and payment of stabilization funding from reducing the amount otherwise paid or payable to a hospital under these provisions or any other provision of law, except as specified.

Existing law establishes the Distressed Hospital Fund, and provides for payments from the fund to hospitals that meet specified criteria. Existing law requires that, after April 1, 2007, in the event that funding under these provisions is insufficient to make payments to hospitals pursuant to specified provisions of law, funds in the Distressed Hospital Fund first be available for use under contracts negotiated by the California Medical Assistance Commission for hospitals contracting under a specified selective provider contracting program, to the extent funds are available.

This bill would make this requirement applicable every April 1 after April 1, 2007, to the extent funds are available on or after April 1 for the particular project year.

Existing law establishes the Health Care Support Fund, and requires that amounts in the fund be paid as specified, including to hospitals for services rendered to Medi-Cal beneficiaries and the uninsured in an amount necessary to meet certain minimum funding levels, taking into account all other payments under these provisions.

This bill would require that certain payments made to distressed hospitals not be considered in the total payments used to determine whether these minimum funding levels have been met.

#### Ch. 328 (SB 437) Escutia Health care coverage.

(1) Existing law establishes various public programs to provide health care coverage to eligible children, including the Medi-Cal program administered by the State Department of Health Services and county welfare agencies, and the Healthy Families Program administered by the Managed Risk Medical Insurance Board. Children through 18 years of age are eligible for health care coverage under these programs if they meet certain household income and other requirements.

This bill would declare the intent of the Legislature that all children in the state have health care coverage by December 1, 2010.

(2) Existing law creates the Medi-Cal-to-Healthy Families Bridge Benefits Program (Medi-Cal Bridge Program), which is administered by the Managed Risk Medical Insurance Board as part of the Healthy Families Program, and continuously appropriates the Healthy Families Fund to the board for purposes of the Healthy Families Program. Under existing law, the Medi-Cal Bridge Program provides a child who meets specified eligibility requirements, including having a family income at or below 200% of the federal poverty level, one calendar month of health care benefits while applying for the Healthy Families Program.

This bill, if federal financial participation is available, and the Healthy Families Program has sought and obtained federal approval, would cease implementation of the Medi-Cal Bridge Program and instead would provide for presumptive eligibility benefits until the person's eligibility for the Healthy Families Program has been determined by the board. This bill would require the board to enroll an eligible person in the Healthy Families Program and to terminate presumptive eligibility benefits for ineligible persons.

The bill, by January 1, 2008, would require the board to implement processes for the self-certification of income by Healthy Families applicants, as specified.

(3) Existing law, the California Special Supplemental Food Program for Women, Infants, and Children (WIC), authorizes establishment of a statewide program, administered by the State Department of Health Services, for providing nutritional food supplements to low-income pregnant women, low-income postpartum and lactating women, and

low-income infants and children under 5 years of age, who have been determined to be at nutritional risk. The program, which implements a program authorized under existing federal law, provides for the redemption of nutrition coupons by recipients at any authorized retail food vendor.

This bill would require the Managed Risk Medical Insurance Board and the State Department of Health Services, in collaboration with WIC program offices and other designated entities, to design, promulgate, and implement policies and procedures for an automated enrollment gateway system to obtain presumptive eligibility for, and to facilitate application for enrollment in, the Medi-Cal program and the Healthy Families Program for children applying to the WIC program. The bill would require the department to seek approval of any amendment to the state plan required to implement these provisions, and would require that all necessary approvals be obtained before the provisions are implemented. It would also provide for modifications in WIC program eligibility requirements.

(4) Existing law requires the state, to the extent authorized by federal law, to administer the Medi-Cal to Healthy Families Accelerated Enrollment program. Under existing law, the program provides temporary health benefits for a child who meets specified eligibility requirements, including being eligible for full scope Medi-Cal with a share of cost and consenting to sharing specified information with the Healthy Families Program.

This bill would cease implementation of this program, and instead would establish the Medi-Cal to Healthy Families Presumptive Eligibility Program, with revised eligibility requirements. The bill would provide presumptive eligibility benefits for qualifying children until the last day of the month of the child's effective date of Healthy Families coverage, or determination of ineligibility. The bill would make these provisions inoperative 3 years after the Director of Health Services executes a declaration relating to the statewide implementation of the presumptive eligibility program, at which time implementation of the Medi-Cal to Healthy Families Accelerated Enrollment program would resume.

This bill would authorize the State Department of Health Services, by July 1, 2007, to implement a process for self-certification of the amount and nature of assets and income of Medi-Cal applicants and beneficiaries without submitting income or asset documentation, as specified, to the extent federal financial participation is available. The bill would prohibit implementation of these provisions if Proposition 86 is approved by the voters at the November 7, 2006, statewide general election, except as specified.

(5) This bill would authorize the Managed Risk Medical Insurance Board to adopt emergency regulations to implement the bill, as specified.

(6) This bill would provide that it shall be implemented only to the extent that funds for its purposes are appropriated in the annual Budget Act or another statute.

(7) Because counties are responsible for making eligibility determinations under the Healthy Families Program and the Medi-Cal program, by revising eligibility requirements for these programs, this bill would impose a state-mandated local program.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 329 (AB 576) Wolk Immunizations.

Existing law regulates the sharing of a patient's or client's immunization information between a health care provider, local health department, the State Department of Health Services, and other agencies. Existing law prescribes the process by which a patient or client, or parent or guardian of a patient or client, may refuse to allow the information to be shared.

This bill would, after the patient or client, or parent or guardian of a patient or client refuses the sharing of immunization information, allow the patient's or client's physician to maintain access to this information for the purpose of patient care or protecting the public health, and would allow the local health department and the department to maintain access to this information for the purpose of protecting the public health, as specified. The bill would also allow local health departments and the department to share the name of a patient or client, or parent or guardian of a patient or client, with a state, local health department, health care provider, immunization information system, or any representative of an entity designated by federal or state law to receive this information, and would authorize the department to enter into written agreements to share this information with other states for specified purposes, unless the patient or client, or parent or guardian of the patient or client, refuses to allow the information to be shared.

Existing law requires the State Department of Health Services to submit a biennial report to the Legislature on the immunization levels of children in the state, steps taken to increase immunization levels and immunization education, and recommendations of a strategy and the funding that would be necessary to immunize all children in the state.

This bill would require the department to submit by January 31, 2008, a sustainability plan for full funding of a statewide immunization information system, as specified.

Ch. 330 (AB 1745) Chan Medi-Cal: pediatric palliative care benefit.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits, including hospice benefits. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

This bill would require the department to develop, as a pilot project, a pediatric palliative care benefit to evaluate whether, and to what extent, such a benefit should be offered under the Medi-Cal program. It would require that the pilot project be implemented only to the extent that federal financial participation is available, and would require the department to submit a waiver application for federal approval.

The bill would require that beneficiaries eligible to receive the pediatric palliative care benefit be under 21 years of age, and would allow the department to further limit the population served by the project to make the above evaluation. It would require that the services available under the project include those types of services that are available through the Medi-Cal hospice benefit, and certain other services. The bill would provide that authorized providers under the pilot program shall include licensed hospice agencies and home health agencies licensed to provide hospice care, subject to criteria developed by the department for provider participation.

The bill would appropriate \$75,000 from the General Fund to the department for these purposes.

Ch. 331 (AB 1851) Coto Healthy Families Program: application assistance.

Existing law establishes the Healthy Families Program, administered by the Managed Risk Medical Insurance Board, to arrange for the provision of health services to an eligible person. Under the program, eligibility is based upon an application submitted to the board. Existing law authorizes a participating health, dental, or vision plan that is in good standing to provide application assistance directly to an applicant acting on behalf of an eligible person who telephones, writes, or contacts the plan in person, as specified, and requests application assistance. Existing law, which became inoperative on January 1, 2006, also authorized a participating health, dental, or vision plan to provide application assistance directly to an applicant under certain conditions, including when the assistance is provided upon referral from a government agency, school, or school district.

This bill would delete the January 1, 2006, inoperative date and thereby authorize a participating health, dental, or vision plan to provide application assistance directly to an

applicant under those conditions, including when the assistance is provided upon referral from a government agency, school, or school district.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 332 (AB 1948) Montanez Medi-Cal program: Healthy Families Program: Child Health and Disability Prevention (CHDP) program.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits.

Existing law establishes the Healthy Families Program, administered by the Managed Risk Medical Insurance Board, to arrange for the provision of health services to an eligible person.

Existing law establishes the Child Health and Disability Prevention (CHDP) program, administered by the department, to provide early and periodic assessments of the health status of children.

Under existing law, benefits under the Medi-Cal program provided to an individual pursuant to a preliminary determination end, without the necessity for any further review or determination by the department, on or before the last day of the month following the month in which the preliminary determination was made, unless an application for medical assistance is filed on or before that date. If an application for medical assistance is filed before this deadline, preliminary benefits continue until the regular eligibility determination based on the application has been completed.

Existing law requires the department to develop an electronic application to serve as the application for preenrollment into the Medi-Cal program or the Healthy Families Program and to also serve as an application for the CHDP program.

This bill would require the department to conduct, or contract for the conducting of, a technological feasibility study report of technological requirements for modifying the above electronic application to allow a person applying on behalf of a child the option to simultaneously preenroll and apply for enrollment in the Medi-Cal program or the Healthy Families Program over the Internet without submitting a followup paper application. The bill would require the results of the feasibility study report to be provided to the fiscal and health policy committees of the Legislature on or before March 1, 2008.

Ch. 333 (AB 2379) Chan Medi-Cal: managed care.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and other low-income persons. Existing law provides for the department to enter into contracts with managed care systems, hospitals, and prepaid health plans for the provision of various Medi-Cal benefits. Existing law prohibits services covered by the California Children's Services program from being incorporated into a Medi-Cal managed care contract entered into after August 1, 1994, until September 1, 2008, except with respect to contracts entered into for county organized health systems in specified counties.

This bill would extend to January 1, 2012, the termination of the prohibition against CCS covered services being incorporated into a Medi-Cal managed care contract entered into after August 1, 1994.

Ch. 334 (AB 2560) Ridley-Thomas Public School Health Center Support Program.

Existing law requires the State Department of Health Services to implement and administer various child health and disease prevention programs.

This bill would require the State Department of Health Services, in cooperation with the State Department of Education, to establish a Public School Health Center Support Program to perform specified functions relating to the establishment, retention, or expansion of school

health centers in California, in collaboration with the State Department of Education. This bill would require the State Department of Health Services to establish standardized data collection procedures and collect specified data from school health centers on an ongoing basis. This bill would require the State Department of Education, in collaboration with the State Department of Health Services, to coordinate programs within the State Department of Education and programs within other specified departments to support public school health centers and to provide technical assistance to facilitate and encourage the establishment, retention, and expansion of public school health centers. The bill would require the program to provide a biennial update to the appropriate policy and fiscal committees of the Legislature containing specified information regarding public school health care centers, beginning on or before January 1, 2009.

Ch. 335 (AB 2651) Jones Newborns: hearing screening.

The existing Newborn and Infant Hearing Screening, Tracking, and Intervention Act requires that every California Children's Services (CCS)-approved general acute care hospital with licensed perinatal services offer all parents of a newborn, upon birth admission, a hearing screening test for the identification of hearing loss, using protocols approved by the State Department of Health Services or its designee.

This bill would, instead, require that this hearing screening be offered to every newborn, upon birth admission, by every general acute care hospital with licensed perinatal services, and would make related changes to the program. It would require certain hospitals that have not been approved by the CCS program, to contract for the provision of this service.

This bill would provide that its provisions shall become operative on January 1, 2008.

Ch. 336 (SB 1178) Speier Sex offenders: continuous electronic monitoring.

Existing law requires a person convicted of any specified sex offense to register as a sex offender.

This bill would require every person required to register as a sex offender to be subject to assessment using the State-Authorized Risk Assessment Tool for Sex Offenders (SARATSO). The bill would establish the SARATSO Review Committee, as specified. Commencing January 1, 2008, the SARATSO for adult males would be the STATIC-99 risk assessment scale. The committee could be required to research risk assessment tools for female and juvenile offenders, and to advise the Legislature and Governor of their recommendation. The committee would also develop and administer a training program for persons designated to administer the SARATSO to offenders.

The bill would require the Department of Corrections and Rehabilitation to assess every eligible person who is incarcerated or on parole for the risk of reoffending, using the SARATSO. The bill would also require each probation department to assess every eligible person who is under their supervision for the risk of reoffending, using the SARATSO.

Existing law requires persons placed on probation by a court to be under the supervision of the county probation officer who shall determine both the level and type of supervision consistent with the court-ordered conditions of probation.

This bill would require every adult male who is convicted of an offense that requires him to register as a sex offender who is assessed to have a high risk of reoffending to be continuously electronically monitored while on probation, unless the court determines that such monitoring is unnecessary for a particular person. The bill would require each probation department to report to the Legislature and to the Governor on the effectiveness of mandatory electronic monitoring of offenders, as specified.

Existing law authorizes the parole authority to require, as a condition of release on parole or reinstatement on parole, or as an intermediate sanction in lieu of return to prison, that an inmate or parolee agree in writing to the use of electronic monitoring or supervising devices.

This bill would require every adult male who is convicted of an offense that requires him to register as a sex offender who is assessed to have a high risk of reoffending to be

continuously electronically monitored while on parole, unless the Department of Corrections and Rehabilitation determines that such monitoring is unnecessary for a particular person. The bill would require the Department of Corrections and Rehabilitation to report to the Legislature and to the Governor on the effectiveness of mandatory electronic monitoring of offenders, as specified.

The bill would specify that the monitoring device used for these purposes shall be identified as one that employs the latest available proven effective monitoring technology.

Because the bill would impose new duties on local agencies, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 337 (SB 1128) Alquist Sex Offender Punishment, Control, and Containment Act of 2006.

Existing law sets forth timelines for the retention of court records, depending upon the subject matter or criminal offense. Records relating to felonies are required to be kept for 75 years.

This bill would require courts to keep all records relating to misdemeanor actions resulting in a requirement that the defendant register as a sex offender for 75 years. The bill also would require every district attorney's office and the Department of Justice to retain records relating to a registered sex offender for 75 years after disposition of the case. Because the bill would impose new responsibilities on local agencies, the bill would impose a state-mandated local program.

Under existing law, the punishment for kidnapping with the intent to commit any of several specified sexual acts is imprisonment in the state prison for life with the possibility of parole.

This bill would add rape committed in concert and committing lewd and lascivious acts to the above specified sexual acts.

Under existing law, the punishment for assault with intent to commit any of several specified sexual acts is imprisonment in the state prison for 2, 4, or 6 years.

This bill would provide that the punishment for assaulting another person with the intent to commit any of several specified sexual acts while in the commission of a first degree burglary is imprisonment in the state prison for life with the possibility of parole.

Under existing law, a person who commits any of several sexual acts upon a child who is under 14 years of age and 10 or more years younger than the person, is guilty of aggravated sexual assault of a child.

This bill would change the age elements of the crime to 14 years of age and 7 or more years younger than the perpetrator, and would expand the types of sex offenses to which it would apply. The bill would require the court to impose a consecutive sentence for each offense that results in a conviction under this provision.

This bill would create new offenses for persons who arrange a meeting with a minor or person he or she believes to be a minor for the purpose of exposing his or her genitals or pubic or rectal area, having the child expose any of these areas, or engaging in lewd or lascivious behavior; and for persons who actually go to that arranged meeting.

Under existing law, continuous sexual abuse of a child is a felony punishable by imprisonment in the state prison for 6, 12, or 16 years. Existing law prohibits any other felony sex offense involving the same victim from being charged in the same proceeding, except as specified.

This bill would change that provision to prohibit any other act of substantial sexual conduct with a child under 14 years of age, or lewd and lascivious acts, involving the same victim, from being charged in the same proceeding, except as specified.

Under existing law, the punishment for annoying or molesting a child is a maximum fine of \$1,000 and imprisonment in the county jail.

This bill would increase the maximum fine to \$5,000 and would create a new crime for persons who, motivated by an unnatural or abnormal sexual interest in children, engages in conduct with an adult whom he or she believes to be a child, which conduct, if directed toward a child, would be a violation of the above provision.

Under existing law, lewd or lascivious conduct with a minor is a felony. Under existing law, any person who engages in unlawful sexual intercourse with a minor who is more than 3 years younger than the perpetrator is guilty of either a misdemeanor or felony, and may also be liable for civil penalties.

The bill would provide that any adult who engages in sexual intercourse or sodomy with a child who is 10 years of age or younger is guilty of a felony and shall be punished by imprisonment in the state prison for 25 years to life, and that any adult who engages in oral copulation or sexual penetration with a child who is 10 years of age or younger is guilty of a felony punishable by imprisonment in the state prison for 15 years to life. Because the bill would create new crimes, the bill would impose a state-mandated local program.

Existing law requires a person convicted of any specified sex offense to register as a sex offender.

This bill would add the above new crimes to the list of crimes that require a person to register as a sex offender, and would also add murder in the perpetuation of or attempt to commit certain sex crimes to the list, and would add conspiracy to commit any of the offenses to the list. The bill would make findings and declarations regarding the need for a comprehensive system of risk assessment, supervision, monitoring, and containment for registered sex offenders. The bill would require every person required to register as a sex offender to be subject to assessment using the State-Authorized Risk Assessment Tool for Sex Offenders (SARATSO). The bill would establish the SARATSO Review Committee, the purpose of which is to ensure that the SARATSO reflects the most reliable, objective, and well-established protocols for predicting sex offender risk of recidivism. Commencing January 1, 2007, the SARATSO for adult males would be the STATIC-99 risk assessment scale. The committee would be required to research risk assessment tools for female and juvenile offenders, and to advise the Legislature and Governor of their recommendation. The committee would also periodically evaluate the SARATSO for each population and make any recommendations for changes, and develop and administer a training program for officers who would administer the SARATSO. Persons who administer the SARATSO would be required to be trained at least every 2 years.

The bill would require the Department of Corrections and Rehabilitation to assess every eligible person who is incarcerated or on parole, using the SARATSO. The bill would also require each probation department to assess every eligible person who is under their supervision.

This bill would authorize the Department of Corrections and Rehabilitation, subject to an appropriation, to establish and operate a specialized sex offender treatment pilot program for inmates whom the department determines pose a high risk to the public of committing violent sex crimes.

Under existing law, the court is required to impose a fine of \$200 for the first conviction of a person who is convicted of a sex offense for which registration as a sex offender is required, and \$300 for a subsequent conviction.

This bill would increase those fines to \$300 and \$500, respectively, and would allocate \$100 from each fine to the Governor's Office of Emergency Services to fund SAFE teams.

Existing law requires the Department of Justice to make available to the public information regarding registered sex offenders via an Internet Web site.

This bill would modify the information to be made available to the public, and would require the Attorney General to develop strategies to assist members of the public in understanding how to use the information on the Web site to further public safety. The bill would require the Department of Justice to renovate the Violent Crime Information Network, as specified.

Under existing law, a person who possesses, prepares, publishes, produces, develops, duplicates, or prints any data or image with the intent to distribute, exhibit, or exchange the data or image with a person 18 years of age or older, knowing the data or image depicts a person under 18 years of age personally engaging in or personally simulating sexual conduct is guilty of a misdemeanor.

This bill would increase the punishment for that crime to a misdemeanor or felony.

Under existing law, a person who uses a minor to assist in the production or distribution of child pornography is guilty of a misdemeanor upon a first offense.

This bill would increase the punishment for the first conviction of that crime to a misdemeanor or felony.

Under existing law, the first conviction for possession of child pornography is punished as a misdemeanor.

This bill would make the punishment for a conviction either a misdemeanor or a felony and would provide for additional punishment for a person previously convicted of certain crimes.

Under existing law, it is a misdemeanor for any person without any lawful business thereon, including any specified sex offender, to remain on school grounds, or to reenter school grounds, or any public way adjacent thereto, after being asked to leave, as specified.

This bill would increase the penalties for a violation of that crime if the person is a registered sex offender, and would make related changes. Because the bill would increase the scope of an existing crime, the bill would impose a state-mandated local program.

This bill also would make it a misdemeanor for a person who is required to register as a sex offender where the victim was an elderly or dependent person to enter or remain on the grounds of a day care facility where elderly or dependent persons reside or regularly are present, without lawful business thereon or written permission from the facility administrator.

Existing law, added by initiative acts that require amendments to its provisions to be approved by  $\frac{2}{3}$  of the membership of both houses of the Legislature, defines "violent felony" for purposes of various provisions of the Penal Code.

This bill would include in that definition various sex offenses committed against a child who is under 14 years of age and more than 10 years younger than the perpetrator, or committed in concert.

Existing law provides for an enhanced prison term of 5 years for a person convicted of committing any of several specified sex offenses who had a prior conviction for any of several other specified sex offenses. The enhanced term for a person with 2 or more previous convictions of any of those sex offenses is 10 years. The enhanced term does not apply if that person has not been in custody for, or committed a felony during, at least 10 years between the instant and prior offense. Existing law requires the person to receive credits for time served or for work, to reduce his or her sentence.

This bill would expand the types of sex crimes to which these provisions apply, delete the 10-year exception, and would eliminate the possibility of the person receiving credit to reduce his or her sentence.

Under existing law, persons who are convicted of committing certain sex offenses who have previously been convicted of other sex offenses, including habitual sexual offenders, as defined, or who are convicted of certain sex offenses during the commission of another offense, are eligible for credit to reduce the minimum term imposed.

This bill would eliminate that eligibility for those persons.

Under existing law, the punishment for a conviction of certain sex offenses is 25 years to life if the offense was committed in the course of a kidnapping or burglary, the victim was tortured, or the defendant had previously been convicted of one of these sex crimes.

This bill would add continuous sexual abuse of a child to those sex offenses.

Under existing law, a court is prohibited from granting probation to, or suspending the execution or imposition of sentence for, any person who, with the intent to inflict the injury, personally inflicts great bodily injury on another person during the commission of any of several crimes.

This bill would eliminate the intent requirement of that provision.

Under existing law, prosecution for an offense punishable by imprisonment in the state prison for 8 years or more is required to be commenced within 6 years after the commission of the offense.

This bill would extend the statute of limitations for prosecuting possession of child pornography for commercial purposes and for using a minor in the production of a representation of sexual conduct to 10 years from the date of production.

Existing law, added by an initiative statute which provides for amendment of its provision by  $2/3$  vote of the Legislature, prohibits plea bargaining in certain felony cases, except as specified.

This bill would state the intent of the Legislature that district attorneys prosecute violent sex crimes under statutes that provide sentencing under “one strike,” “3 strikes” or habitual sexual offender laws instead of engaging in plea bargaining, and would require a district attorney to state on the record why a sentence should not be prosecuted under those provisions, if he or she engages in plea bargaining despite the stated intent.

Existing law establishes a county probation system.

This bill would require probation officers trained in the use of the SARATSO to perform a presentencing risk assessment of every person convicted of an offense that requires him or her to register as a sex offender. The bill would require each probation department to compile a Facts of Offense Sheet for those offenders, as specified. The bill would require each county to designate certain probation officers to be trained to administer the SARATSO. The bill would require those probationers who are deemed to be a high risk to the public, as determined by the SARATSO, to be placed on intensive and specialized probation supervision. Because the bill would impose additional duties on probation officers, it would impose a state-mandated local program.

Existing law requires a probation officer to prepare a report for the court for each person convicted of a felony.

This bill would require a probation officer to also use the SARATSO on each person convicted of a felony that requires him or her to register as a sex offender, in order to determine the person’s risk of reoffending, and to include that assessment in the presentencing report. The bill would require the results of that assessment to be considered by the court in determining suitability for probation.

Existing law provides for a 3-year maximum period of parole for persons who are convicted of a felony, except that the maximum period of parole for persons who are convicted of certain violent felonies is 5 years.

This bill would set the maximum period of parole for persons who are convicted of certain sex offenses at 10 years.

Under existing law relating to sexually violent predators, parole tolls from evaluation through the period of commitment, if any.

This bill would provide that parole tolls through any period of commitment and conditional release under court monitoring.

Existing law requires the Department of Corrections and Rehabilitation to ensure that all parolees under active supervision and deemed to pose a high risk to the public of committing a violent sex crime are placed on an intensive and specialized parole supervision caseload.

This bill would instead require those parolees who are deemed to pose a high risk to the public of committing any sex crime, as determined by the SARATSO, to be placed on intensive and specialized supervision, and to be required to report frequently to designated parole officers. The bill would authorize the department to place any other parolee on intensive and specialized supervision, as specified.

Existing law provides for an enhanced penalty of 3 years for any person who administers a controlled substance to another person against his or her will, for the purpose of committing a felony.

This bill would create an additional enhancement of 5 years if that felony is any of several specified sex offenses.

Existing law authorizes counties to establish sexual assault felony enforcement (SAFE) teams to reduce violent sexual assaults through proactive surveillance of habitual sexual offenders.

This bill would require the Office of Emergency Services to establish standards by which grants are awarded on a competitive basis to counties for SAFE teams.

This bill would appropriate \$495,000 from the General Fund to the Office of Emergency Services, Division of Criminal Justice Programs for child abuse and abduction programs that provide prevention education to children in schools.

Existing law defines "sexually violent offense" for purposes of the sexually violent predator law.

This bill would include prior convictions for certain offenses convicted as a juvenile or that resulted in an indeterminate sentence in that definition, and would otherwise expand that definition to include additional crimes.

Under existing law, any finding made that a person is a sexually violent predator, as specified, shall not toll, discharge, or otherwise affect that person's period of parole, as specified.

This bill instead would provide that such a finding shall toll his or her period of parole.

Under existing law, if a person is determined to be a sexually violent predator, he or she is committed to the State Department of Mental Health for 2 years for appropriate treatment and confinement. Confinement may not be extended except by court order.

This bill would change that commitment to an indeterminate term.

This bill would incorporate additional changes made in AB 1849, to be operative only if this bill and AB 1849 are enacted and this bill is enacted last.

This bill would provide that its provisions are severable.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 338 (AB 1015) Chu Sex Offender Management Board.

Existing law requires persons convicted of certain sex offenses to register as a sex offender, as specified. Violations of certain of the registration requirements are crimes, as specified.

This bill would create the Sex Offender Management Board, as specified, under the jurisdiction of the Department of Corrections and Rehabilitation. The purpose of the board would be to address any issues, concerns, and problems related to the community management of the state's adult sex offenders, with a goal of safer communities and reduced victimization. The board would be required to conduct a thorough assessment of current management practices for adult sex offenders, and to submit a report to the Legislature on

that assessment. The board would also be required to develop recommendations to improve management practices for those offenders, as specified. The board also would serve as a resource for the Legislature and the Governor.

The provisions creating the board would be repealed as of January 1, 2010.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 339 (AB 1683) Shirley Horton Sex offenders.

Existing law requires the Director of Corrections and Rehabilitation, prior to the release of a person from custody convicted of certain crimes of a sexual nature against 2 or more victims, to refer the person to the State Department of Mental Health for evaluation. The law authorizes civil commitment for a 2-year term, as a sexually violent predator, if the person is adjudicated to be likely to engage in sexually violent criminal behavior if discharged.

Under existing law, if the Director of Mental Health determines that the committed person's diagnosed mental disorder has so changed that the person is no longer likely to commit acts of predatory sexual violence while under supervision and treatment in the community, the director is required to forward a report and recommendation for conditional release, and if the court determines that the person does not pose a danger, it is required to order a one-year community placement with an appropriate forensic conditional release program operated by the state. The law authorizes the department to contract with the county or private providers for community supervision and treatment.

Existing law, with certain exceptions, requires a nonparolee who is conditionally released under these provisions to be placed in the county of domicile. The law requires the department to notify certain persons of the proposed community placement, including, but not limited to, the sheriff or chief of police.

This bill would require the department to provide the court with a copy of the written contract entered into with any public or private person or entity to monitor or supervise the patient's outpatient placement and treatment program and would authorize the court to order the department to provide copies of the agreement to prescribed local officials.

This bill would, with certain exceptions, prohibit the department or its designee from altering any of the terms and conditions of outpatient treatment without court approval.

Ch. 340 (AB 1900) Lieu Sex offenders: registration.

Existing law requires that persons convicted of certain sex-related offenses register with designated local officials in the county of their residence upon release from custody.

Existing law prohibits a person who is required to register as a sex offender for a crime where the victim was a minor under 16 years of age from being an employee or volunteer with any person, group, or organization where the person would be working directly and in an unaccompanied setting with minor children on more than an incidental and occasional basis or have supervision or disciplinary power over minor children.

This bill would add employers and independent contractors to this prohibition and make other minor changes, as specified.

This bill would incorporate additional changes to Section 290.95 of the Penal Code proposed by AB 2263 contingent on the prior enactment of that bill.

Because this bill would change the definition of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 341 (AB 2263) Spitzer Sex offenders: working with minors.

Under existing law, a person who is required to register as a sex offender who applies or accepts a position as an employee or volunteer with any person, group, or organization where

he or she would be working directly and in an unaccompanied setting with minor children on a regular basis, is required to disclose his or her registrant status. A violation of that provision is a misdemeanor.

This bill would require every person required to register as a sex offender who applies for or accepts a position as an employee or volunteer with any person, group, or organization where the applicant would be working directly and in an accompanied setting with minor children, and the applicant's work would require him or her to touch the minor children on more than an incidental and occasional basis, to disclose his or her status as a registrant, upon application or acceptance of the position, to that person, group, or organization.

This bill would incorporate additional changes to Section 290.95 of the Penal Code proposed by AB 1900 contingent on the prior enactment of that bill.

Because the bill would expand the scope of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 342 (AB 117) Cohn Tax Equity Allocation formula: County of Santa Clara.

Existing property tax law requires the county auditor, in each fiscal year, to allocate property tax revenue to local jurisdictions in accordance with specified formulas and procedures, and generally requires that each jurisdiction be allocated an amount equal to the total of the amount of revenue allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, and that jurisdiction's portion of the annual tax increment, as defined. Existing property tax law also reduces the amounts of ad valorem property tax revenue that would otherwise be annually allocated to the county, cities, and special districts pursuant to these general allocation requirements by requiring, for purposes of determining property tax revenue allocations in each county for the 1992–93 and 1993–94 fiscal years, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance with certain formulas. It requires that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund (ERAF) in that county for allocation to school districts, community college districts, and the county office of education.

Existing property tax law requires the auditor of each county with qualifying cities, as defined, to make certain property tax revenue allocations to those cities in accordance with a specified Tax Equity Allocation (TEA) formula established in a specified statute and to make corresponding reductions in the amount of property tax revenue that is allocated to the county. Existing law reduces the amount required to be allocated under the TEA formula to qualifying cities in the County of Santa Clara by an amount that is determined by reference to other local taxes, as specified. Existing law also specifies that the amount of revenue allocated under these provisions to a qualifying city in the County of Santa Clara shall not exceed 55% of the amount that otherwise would be allocated to each of these cities under the TEA formula.

This bill would, for the 2006–07 fiscal year and for each fiscal year thereafter, repeal these required reductions and limitations for a qualifying city in the County of Santa Clara and thereby require that these cities be allocated the TEA formula amount determined under the specified statute. This bill would also require the auditor of Santa Clara County, for those same fiscal years, to reduce the amount of property tax revenue allocated to qualified cities in that county by the ERAF reimbursement amount, as defined, and to commensurately increase the amount of property tax revenue allocated to the county ERAF, as specified. This bill would make legislative findings regarding the necessity of a special statute.

By increasing the amount of ad valorem property tax revenue allocated from the county to qualifying cities in the County of Santa Clara, this bill would change the pro rata shares

in which ad valorem property tax revenues are allocated among local agencies in a county, within the meaning of paragraph (3) of subdivision (a) of Section 25.5 of Article XIII of the California Constitution, and thus would require for passage the approval of  $\frac{2}{3}$  of the membership of each house of the Legislature.

By imposing new duties in the allocation of ad valorem property tax revenues in the County of Santa Clara, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 343 (AB 970) Torrico Tax administration: tax returns: nonresident directors.

Existing income tax laws authorize the Franchise Tax Board to provide for the filing of a group return for electing nonresident partners, as specified.

This bill would authorize the board to provide for the filing of a group return for electing nonresident directors of a corporation, as specified, and to adjust the income of those taxpayers to properly reflect income, as provided.

Ch. 344 (AB 1813) Committee on Budget Public resources: hazardous materials tax.

Existing law imposes a tax on organizations, as defined, that use, generate, store, or conduct activities related to hazardous materials. This tax, which is collected annually, is due on the last day of February of each year.

The bill would specify that specified amendments to existing law described above shall apply for the 2007 calendar year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 345 (AB 1909) Vargas Motor vehicle insurance coverage.

Existing law provides that where 2 or more insurance policies apply to the same loss and one policy affords coverage to a named insured engaged in the business of renting or leasing motor vehicles without operators, it is conclusively presumed, subject to specified conditions, that the policy to the named insured shall be excess to the other valid and collectible insurance policy.

This bill would instead provide that where 2 or more insurance policies apply to the same loss and one policy affords coverage to a named insured who in the course of his or her business rents or leases motor vehicles without operators, it is conclusively presumed, subject to specified conditions, that the policy to the named insured shall be excess to the other valid and collectible insurance policy.

This bill would also provide that when 2 or more insurance policies apply to the same loss and one policy affords coverage to a person engaged in the business of a trucker, as defined, that policy shall be primary for both power unit and trailer or trailers, and the insurance afforded by the other policy shall be excess.

Ch. 346 (AB 1986) De La Torre Public contracts: California State University: auxiliary organizations.

(1) Existing law establishes the California State University under the administration of the Trustees of the California State University. Existing law authorizes the establishment of auxiliary organizations, as defined, of the university for various purposes consistent with the mission of the university. The California State University Contract Law (CSU contract law) sets forth a process through which contracts for projects, as defined, that are entered into with respect to the California State University may be competitively bid, entered into, and

executed. The CSU contract law requires that a project be under the sole and direct control of the trustees pursuant to the administrative authority granted to them by existing law. The CSU contract law authorizes the trustees and the Department of General Services to enter into an agreement under which the department will carry out any of the functions of the trustees under the law, upon terms that are mutually agreed upon. The CSU contract law requires that any subcontractor or agent, or employee of any contractor or subcontractor, who has knowledge of any work done in violation of any contract under the CSU contract law, and does not immediately notify the trustees or the inspector or resident engineer upon the project of the violation, is guilty of a felony.

This bill would require that any construction project located on property of the California State University that is performed by an auxiliary organization of the California State University and funded in whole or in part by public funds is subject to the CSU contract law, and would deem that construction project to be under the sole and direct control of the trustees for the purposes of the CSU contract law. The bill would authorize the trustees to enter into an agreement under which the auxiliary organization may carry out any of the functions of the trustees under the CSU contract law, upon terms that are mutually agreed upon. Because the bill would extend the scope of the CSU contract law, the bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 347 (AB 2367) La Suer Criminal penalties.

Existing law generally provides that a criminal offender shall, upon conviction, be subject to a determinate sentence, as specified. However, specified offenses relating to alcoholic beverage control, the price fixing of commodities, escrow agents, California desert native plants, oath or affirmations required of public officers and employees, the Elder California Pipeline Safety Act of 1981, hazardous waste, vehicular air pollution control of used direct import vehicles, environmental laboratories, drinking water, military and veterans, public utilities, revenue and taxation, and water pollution provide for indeterminate sentences instead.

This bill would revise the above provisions providing for indeterminate sentences to make those sentences determinate, and, in some instances, explicitly providing that they are also punishable by imprisonment in a county jail, as specified. Because the provisions relating to hazardous waste were added by an initiative statute that may only be amended by the Legislature by a 2/3 vote, the bill would require that vote for enactment.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

#### Ch. 348 (AB 2059) Berg County Medical Services Program.

Existing law provides that the board of supervisors of a county that contracted with the State Department of Health Services pursuant to a specified provision of law during the 1990–91 fiscal year and any county with a population under 300,000, as determined in accordance with the 1990 decennial census, by adopting a resolution to that effect, may elect to participate in the County Medical Services Program (CMSP) for state administration of health care services to eligible persons in the county.

Existing law, until January 1, 2008, authorizes counties that participate in the CMSP to establish the CMSP Governing Board, to be comprised of various officers of participating counties, to govern the CMSP and to establish eligibility and benefit levels.

Existing law provides that, if the CMSP Governing Board contracts with the department to administer the CMSP, the contract shall include specified provisions.

This bill would revise these required provisions. The bill would provide that, if the governing board does not contract with the department for administration of the CMSP, the board may contract with the department for specified services to assist in the administration of that program. The bill would provide that any such contract shall require that the board reimburse the state costs of providing administrative support.

Existing law establishes a County Medical Services Program Reserve Account in the County Health Services Fund, containing projected savings transferred from the program account.

This bill would eliminate this reserve account, and would instead require the governing board to establish a reserve account for the purpose of depositing funds for the payment of claims and unexpected contingencies.

Existing law requires counties to pay participation fees as established by the governing board, and requires that these fees be deposited in the program account.

This bill would instead require these fees to be deposited in the program account unless otherwise directed by the governing board.

Existing law requires the governing board to establish uniform eligibility criteria and benefits for the CMSP.

This bill would require that these eligibility criteria and benefits apply only to specified counties, and would provide that, for counties not so specified, the eligibility criteria and benefit structure may vary. The bill would allow the governing board to establish and maintain pilot projects to identify or test alternative approaches for determining eligibility or for providing or paying for benefits under the CMSP, and to develop and implement alternative products with varying levels of eligibility criteria and benefits outside of the CMSP.

Existing law requires that counties and the state share the risk of cost increases of the CMSP not funded through other sources. Existing law provides for specified limitations on the amount of risk of cost increases in the CMSP that specified counties must bear. Existing law requires that the limitation applicable to counties that did not contract with the department pursuant to specified provisions of law include certain additional amounts.

This bill would make various changes to these risk limitation amounts.

Existing law allows the department to reimburse hospitals under the CMSP at the rates negotiated for the Medi-Cal program if a specified condition is met.

This bill would eliminate this provision.

Existing law requires counties to pay specified amounts to the department as a condition of participation in the CMSP.

This bill would make various changes to these participation amounts.

Existing law sets forth the powers of the CMSP Governing Board.

This bill would provide the governing board with certain additional powers relating to monitoring and enforcing billing and the payment of fees, investigating improper billing, pursuing 3rd-party and estate recoveries, establishing pilot projects, and developing alternative products outside of the CMSP.

Existing law requires that, before initiating any proceeding to challenge any action by the governing board, any prospective claimant 1st notify the board of the nature and basis of the challenge and the amount claimed. Existing law requires the board to consider the matter within 60 days after receiving the notice and to promptly thereafter provide written notice of the board's decision. Existing law provides that these requirements do not apply to provider audit appeals conducted pursuant to certain provisions of law, and apply to all claims not reviewed pursuant to other provisions of law.

This bill would provide that these requirements would not apply to provider audit appeals conducted pursuant to the provisions of law referenced above, and would apply to all claims not reviewed pursuant to the other provisions of law referenced above, only if the governing board contracts with the department for administration of the CMSP.

Existing law requires the governing board to comply with specified procedures for public meetings held to eliminate or reduce the level of services, restrict eligibility for services, or adopt regulations, including holding those meetings in the county seats of at least 4 regionally distributed CMSP participating counties. Existing law requires that the governing board locate those meetings in a specified manner to ensure that each member of the target population may reach at least one meeting by a drive of 4 hours or less.

This bill would, alternately, allow the governing board to hold 2 of the above meetings in Sacramento County, and would impose specified requirements for the conduct of meetings held outside Sacramento County.

The bill would eliminate the January 1, 2008, expiration date for these provisions, thereby extending them indefinitely.

**Ch. 349 (AB 2147) Harman Solid waste: plastic food and beverage containers.**

Existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, requires every rigid plastic packaging container, as defined, sold or offered for sale in this state, to generally meet one of specified criteria.

Existing law prohibits a person from selling a plastic bag that is labeled as “biodegradable,” “compostable,” “degradable,” or as otherwise specified, unless, at the time of the sale, the plastic bag meets a current American Society for Testing and Materials (ASTM) standard specification for the term used on the label. Existing law requires a manufacturer or supplier, as defined, upon the request of a member of the public, to submit to that member, within 90 days of the request, information and documentation demonstrating compliance with these labeling requirements.

This bill would impose similar requirements, with regard to plastic food or beverage containers, as defined, for purposes of prohibiting a person from selling a plastic food or beverage container that is labeled as “biodegradable,” “compostable,” “degradable,” or as otherwise specified, unless, at the time of the sale, the container meets the ASTM standard specification for compostable plastics, as specified, for the term used on the label.

**Ch. 350 (AB 2198) Houston Health care: controlled substances and dangerous drugs.**

Existing law makes it unprofessional conduct for specified health care providers to engage in repeated acts of clearly excessive prescribing or administering of drugs or treatment, subject to specified penalties. Existing law prohibits disciplinary action under these provisions against a physician and surgeon who is acting lawfully in compliance with the California Intractable Pain Treatment Act.

This bill would, in addition, make it unprofessional conduct to engage in repeated acts of clearly excessive furnishing or dispensing of drugs or treatment and would prohibit disciplinary action or prosecution under these provisions against a practitioner who has a medical basis for prescribing, furnishing, dispensing, or administering a dangerous drug or prescription controlled substance.

Existing law, the Medical Practice Act, provides for the licensing and regulation of physicians and surgeons by the Medical Board of California, and the violation of specified provisions of the act is a crime. The California Intractable Pain Treatment Act, in the Medical Practice Act, authorizes a physician and surgeon to prescribe or administer controlled substances to a person in the course of treatment for a diagnosed condition causing intractable pain, except in certain circumstances, and prohibits disciplinary action against a physician and surgeon for such action.

This bill would delete these provisions and would instead authorize a physician and surgeon to prescribe for, or dispense or administer to, a person under his or her treatment for a medical condition, drugs or prescription controlled substances for the treatment of pain or a condition causing pain, including intractable pain. The bill would require the physician and

surgeon to exercise reasonable care in determining whether a particular patient or condition, or complexity of the patient's treatment, including, but not limited to, a current or recent pattern of drug abuse, requires consultation with, or referral to, a more qualified specialist. A violation of this requirement would be a crime. Although the bill would exempt a physician and surgeon acting in accordance with these provisions from disciplinary action for the prescribing, dispensing, or administering of dangerous drugs or prescription controlled substances, it would expressly provide that the power of the board to take certain disciplinary actions not be affected with regard to specified misconduct and that the governing body of a hospital not be prohibited from taking certain disciplinary actions against a physician and surgeon.

Existing law, except as specified, prohibits a person from prescribing, administering, or dispensing a controlled substance to an addict or habitual user or a person representing himself or herself as an addict or habitual user. Existing law generally makes it unprofessional conduct for a physician and surgeon to prescribe, sell, furnish, give away, or administer certain drugs to an addict or habitué, or to offer to do so, except as specified.

This bill would delete the provision making it unprofessional conduct for a physician and surgeon to prescribe, sell, furnish, give away, or administer certain drugs to an addict or habitué, or to offer to do so. The bill would authorize a physician and surgeon to prescribe, dispense, or administer prescription drugs, including prescription controlled substances, (1) to an addict under his or her treatment for a purpose other than maintenance on, or detoxification from, prescription drugs or controlled substances and (2) under specified conditions to an addict for purposes of maintenance on, or detoxification from, prescription drugs or controlled substances. The bill would also authorize prescription drugs or controlled substances to be administered or applied by a physician and surgeon, or by a registered nurse acting under his or her instruction and supervision, in certain circumstances. A violation of these requirements would be a crime. The bill would also revise the prohibition against prescribing, administering, or dispensing a controlled substance to an addict or habitual user to delete the reference to a habitual user, and to exempt activity pursuant to the above authorization. The bill would define addict for purposes of these provisions.

Existing law makes it unprofessional conduct for a physician and surgeon to prescribe, dispense, or furnish dangerous drugs without a good faith prior examination and medical indication. Existing law also, with specified exceptions, prohibits a person or entity from prescribing, dispensing, or furnishing, or causing to be prescribed, dispensed, or furnished, dangerous drugs or dangerous devices on the Internet for delivery to a person in California without a good faith prior examination and medical indication.

This bill would, for purposes of these provisions, require an appropriate prior examination instead of a good faith prior examination. The bill would make related legislative findings.

Because this bill would create new crimes, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 351 (AB 2223) Salinas Local government annexation.

Existing law requires a local agency formation commission to approve, after notice and hearing, an annexation to a city of unincorporated island territory if the annexation is initiated on or after January 1, 2000, and before January 1, 2007, and other conditions are met.

This bill would delete the January 1, 2007, limitation and extend this date to January 1, 2014, and would make other conforming changes.

By extending the time that this duty is imposed on local governments, this bill would impose a state-mandated local program.

Existing law requires a commission to develop and determine the sphere of influence of each local governmental agency within the county. Existing law requires, until January 1, 2007, that at least 30 days prior to submitting an application to the commission for a determination of a new sphere of influence or to update an existing sphere of influence for a city, representatives from the city meet with county representatives to discuss the proposed sphere and its boundaries, and to explore methods to reach agreement on the boundaries, development standards, and zoning requirements within the sphere, as specified. If an agreement is reached it is required to be submitted to the commission, which shall give it great weight in the final determination of the city's sphere of influence. If no agreement is reached, the commission shall consider the applicant city's sphere of influence consistent with specified policies of the commission.

This bill would extend the operation of those requirements until January 1, 2008.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 352 (AB 2239) Emmerson Vehicles: sales and use taxes.**

The Sales and Use Tax Law imposes a tax on the gross receipts from the storage, use, or other consumption in this state of tangible personal property. Under existing law, there is a presumption that a vehicle, vessel, or aircraft shipped or brought into this state within 12 months from the date of its purchase was purchased from a retailer for storage, use, or other consumption in this state, under specified circumstances, until June 30, 2007. On and after July 1, 2007, the rebuttable presumption applies within 90 days from the date of the vehicle, vessel, or aircraft purchase, under specified circumstances.

This bill would provide that the presumption may be controverted by documentary evidence, as specified, for a vehicle brought into this state for the exclusive purpose of warranty or repair service where the vehicle is in this state for that purpose for 30 days or less, as provided. This bill would require the owner of the vehicle to make statements specifying the date of travel to and from the warranty or repair facility, as provided.

This bill would take effect immediately as a tax levy.

**Ch. 353 (AB 2291) Evans Vehicles: dealer: data security.**

(1) Existing law prohibits any motor vehicle manufacturer, manufacturer branch, distributor, or distributor branch that is licensed under the Vehicle Code from engaging in certain conduct involving a dealer having a franchise for the sale of new vehicles or vehicle parts including prohibiting those manufacturers, branches, and distributors from competing with a dealer, as specified, or engaging in unfair discrimination in favor of any dealership owned or controlled by those entities.

This bill would additionally prohibit a motor vehicle manufacturer, manufacturer branch, distributor, or distributor branch from accessing, modifying, or extracting information from a confidential dealer computer record, as specified, or using electronic, contractual, or using other means to prevent or interfere with the lawful efforts of a dealer to comply with specified data security and privacy laws, to ensure that the accessed data is within the scope of consent, or to monitor data accessed from the dealer's computer system. The bill would provide that these prohibitions do not limit a duty that a dealer may have to safeguard the security and privacy of records maintained by the dealer.

Because a violation of these provisions would be a crime, the bill would impose a state-mandated local program.

(2) Existing law regulates the handling of customer records and requires that a business take all reasonable steps to destroy a customer's records in its custody or control when they are no longer to be retained. Existing law requires a person or business that owns or licenses

computerized data that includes personal information, as defined, to disclose any breach of the security of its system, as specified.

This bill would prohibit a computer vendor from accessing, modifying, or extracting information from a confidential dealer computer record, as defined, or personally identifiable consumer data, as defined, from a dealer without first obtaining an express written consent from the dealer and without maintaining specified safeguards to protect the information. The bill would prohibit requiring a dealer, as a condition of doing or continuing to do business, to give express consent, except under specified circumstances.

Since a violation of the Vehicle Code is a crime, by proscribing certain activities related to a confidential dealer computer record or personally identifiable consumer data, this bill would create a new crime, thereby imposing a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 354 (AB 2348) Laird Flood control: Pajaro River.

Existing law provides for state cooperation with the federal government in the construction of specified flood control projects, and prescribes requirements to be met prior to state authorization of flood management projects that receive state financial aid.

This bill would authorize the state to provide subvention funds, as prescribed, to the Counties of Monterey and Santa Cruz, or to local agencies in those counties, for a flood control project on the Pajaro River, as described, at an estimated cost to the state of the sum that may be appropriated for state cooperation by the Legislature upon the recommendation and advice of the department and upon a determination by the department that the project meets those financial aid requirements. The bill would provide that the state assumes no liability for damages that may result from the project by authorizing the provision of subvention funds, or by the appropriation of those subvention funds, as specified.

#### Ch. 355 (AB 2351) Maze Retirement: elected public officers: service credit.

Existing law provides for the creation and regulation of cities, counties, and cities and counties. Existing law permits these agencies to form retirement and pension systems, and also permits these agencies to become contracting members of the Public Employees' Retirement System. The Public Employees' Retirement System and the County Employees Retirement Law of 1937 permit certain members, under specified circumstances, to elect to receive additional service credit upon making required contributions. In this regard, the County Employees Retirement Law of 1937 permits a governing body to make portions of the required contributions on behalf of officers and employees.

This bill would prohibit the governing body of a city, county, or a city and county from granting credit for service to an elected officer or member for service that the elected officer or member has not performed. The bill would further prohibit these governing bodies from paying contributions for credit for service if an elected officer or member has not performed the service, as specified. This bill would permit an elected officer to purchase additional service credit at his or her own expense, as specified. The bill would also make conforming changes.

#### Ch. 356 (AB 2416) Torrico Consumer loans: automated valuation model fees.

Existing law, the California Finance Lenders Law, provides for the licensure and regulation by the Commissioner of Corporations of those engaged in making consumer loans and makes a willful violation of the law a crime. Under existing law, an appraisal fee may be charged by a licensee on any loan made that is secured by real property if specified requirements are satisfied. Existing law provides that only one fee for appraising the same

real property may be collected unless the borrower has obtained a new or additional loan and more than one year has elapsed since the prior appraisal.

This bill would authorize a licensee to collect a fee for use of an automated valuation model result prepared by a 3rd party not to exceed the actual cost paid to the 3rd party for a written automated valuation model result in lieu of an appraisal, as specified. The bill would also authorize a licensee to charge a reduced appraisal fee for appraising the same real property one year after collecting a fee for an automated valuation model result if the borrower has obtained a new or additional loan. The bill would require a licensee in a loan transaction secured by real property to provide notice, as specified, to a borrower that, upon request, the borrower is entitled to receive a copy of the automated valuation model result, provided he or she has paid for the automated valuation model result.

Because a willful violation of the bill's requirements by a licensee would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 357 (AB 2482) Harman Arbitration: legal representation.**

Existing law, effective until January 1, 2007, permits persons admitted to the bar of any other state to represent a party in an arbitration proceeding in this state, or to render legal services in this state in connection with an arbitration proceeding in another state. Existing law requires out-of-state attorneys representing a party in a California arbitration proceeding to serve upon the arbitrator, the State Bar of California, the parties, and counsel, a certificate containing specified information prior to the first scheduled hearing in the arbitration. Existing law also permits any party to an arbitration arising under certain collective bargaining agreements to be represented by any person.

This bill would revise those provisions to require out-of-state attorneys to serve upon the arbitrator, the parties, the State Bar of California, and counsel, a certificate containing specified information within a reasonable period of time after the attorney expresses his or her intent to appear in an arbitration. The bill would require, if the certificate of that attorney is approved by the arbitrator, to file the approved certificate with the State Bar of California. The bill would require the State Bar of California to report findings and recommendations, as specified, regarding the appearance of out-of-state attorneys in arbitration hearings or proceedings in this state to the Legislature by December 31, 2009. The bill would also require the State Bar of California to promptly notify the Chairs of the Senate and Assembly Committees on Judiciary if the State Bar finds a pattern of noncompliance with or abuse of those provisions, as specified.

This bill would revise the January 1, 2007, repeal date, thereby extending those provisions until January 1, 2011, and make related, conforming changes.

**Ch. 358 (AB 2579) Sharon Runner Military courts-martial.**

The Military and Veterans Code provides that general, special, and summary courts-martial have the power to try and adjudge specified members of the military. The authority to adjudge includes specified types of punishment.

This bill would provide that those courts have the power to adjudge any punishment authorized for a court-martial handling analogous charges under the Uniform Code of Military Justice and the federal Manual for Courts-Martial, as provided. This bill would include within the powers of special courts-martial the power to try commissioned officers, and within the powers of summary courts-martial the power to try members of the active militia unless they object.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 359 (AB 2650) Laird Monterey Peninsula Airport District.

(1) Existing law, the Monterey Peninsula Airport District Act, establishes the Monterey Peninsula Airport District and prescribes its powers and purposes. The act authorizes the district to incur indebtedness and to issue bonds pursuant to specified provisions of law. Under the act, the total amount of outstanding bonds issued under these provisions may not exceed \$15,000,000 at any one time.

This bill would delete that limitation.

The bill would authorize the district to incur indebtedness using securitized limited obligation notes pursuant to specified existing law, and incur other types of indebtedness pursuant to specified existing laws.

(2) The act authorizes the district to maintain a police department, to adopt ordinances, resolutions, and regulations to protect the peace, health, and safety of the public in an airport of the district, as specified, and to prescribe penalties for the violation of those ordinances, resolutions, and regulations. The act makes a violation of any ordinance, resolution, or regulation a misdemeanor. The act specifies that the police powers granted to the district by these provisions are solely for the purposes of carrying out these provisions.

This bill would delete the reference to the district's police powers, and specify that the district's authority to adopt ordinances, resolutions, and regulations is for the protection of the public's peace, health, or safety in an airport of the district. The bill would make any violation of an ordinance, resolution, or regulation a misdemeanor unless, by ordinance, the district designates the violation as an infraction.

(3) The act requires the district to conduct a district election in the manner provided by law for general municipal elections and general laws, as applicable.

This bill would require the district to conduct a district election in the manner provided by the Uniform District Election Law. By establishing duties on county elections officials in connection with district elections, the bill would impose a state-mandated local program.

(4) The act, with exceptions, requires the district to undertake, by ordinance, certain actions, including actions approving the expenditure of more than \$10,000, the acquisition or disposition of real property, and the granting of any franchise. The act requires all ordinances to be signed by the chairperson of the board of directors and to be attested to by the secretary. The act requires all members of the board of directors who are present at any meeting to vote with regard to a proposed ordinance or resolution that is pending before the board.

This bill would delete that requirement relative to those described district actions, and would require all ordinances to be signed by the chairperson or acting chairperson of the board of directors and attested to by the secretary or the acting secretary. The bill would delete the voting requirement.

(5) The act provides that the members of the board of directors, the secretary of the board, a general manager, an auditor, and district counsel are the officers of the district.

This bill would include one or more assistant managers among those district officers.

(6) The act authorizes the board of directors to grant to each of its members compensation in an amount not to exceed \$100 for attendance at each regular or special meeting of the board held within the district. The act prohibits each director from receiving compensation for more than 4 meetings in any calendar month.

This bill, instead, would authorize the board of directors to grant that amount of compensation to each director for each regular or special meeting of the board attended, or for each day's service rendered as a director at the request of the board, and would prohibit each director from receiving compensation for more than 4 days in any calendar month.

(7) The act requires a vacancy on the board of directors to be filled by appointment, and requires a successor to be elected for the unexpired term of his predecessor at the next general election.

This bill would require a vacancy to be filled pursuant to a specified provision of the Government Code.

(8) The act specifies various powers and duties that the district has in relation to levying taxes.

This bill would delete these provisions, and instead allow the district to levy benefit assessments, consistent with the California Constitution, and special taxes, pursuant to existing laws, as specified.

(9) The act requires the district auditor to draw warrants to pay demands made against the district if the demands have been approved by at least 3 members of the board of directors, and provides for the payment of those demands from depositories designated by the district for the custody of district funds.

This bill would revise those provisions to also apply to the payment of demands made against the district in the form of checks, electronic fund transfer authorizations, or other specified means, and would exempt the payment of certain claims or demands from approval by one or more members of the board of directors.

By establishing various requirements on the district, the bill would impose a state-mandated local program.

(10) The bill would make various technical, nonsubstantive changes to the act.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

The bill would also provide that no reimbursement shall be made pursuant to these statutory provisions for any other costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

#### Ch. 360 (AB 2701) Blakeslee San Luis Obispo County.

(1) Existing law authorizes the establishment of community services districts for the provision of various services to the geographic area within a district, including the collection, treatment, or disposal of sewage, wastewater, recycled water, and stormwater.

This bill would authorize the County of San Luis Obispo to undertake any efforts necessary to construct and operate a wastewater collection and treatment system to meet the needs of the Los Osos Community Services District, as specified, and to impose and collect user fees and other charges to cover the reasonable costs of any wastewater collection or treatment services provided pursuant to these provisions.

The bill would also require the Board of Supervisors of San Luis Obispo County to prepare and submit a proposed assessment to pay for the facilities, and, if certain requirements are met, to decide whether to proceed with construction of the project. The district would retain the powers to provide all other services to a designated zone. After a minimum of 3 years and when the district and the county mutually apply for, and are granted, a modification to the waste discharge permit issued by the Regional Water Quality Control Board, responsibilities would be transferred back to the district.

#### Ch. 361 (AB 2711) Parra Traveler's checks: payment instruments.

(1) Existing law, the Travelers Checks Act, requires a person to obtain a license from the Commissioner of Financial Institutions before engaging in the business of issuing traveler's checks. Existing law prohibits a licensee from issuing any form of traveler's check in this state unless a certified copy of the traveler's check is first filed with the commissioner.

This bill would instead require traveler's checks that a licensee issues in this state to meet specified requirements, including that a traveler's check clearly identify the licensee issuing the check. The bill would also require that, before a new licensee issues its first traveler's check for sale in this state, it file a certified copy of the form of that traveler's check with the commissioner.

(2) Existing law, the Payment Instruments Law, governs the sale of payment instruments, as defined. Existing law, among other things, prohibits a licensee, as defined, or its agents, as defined, from selling any payment instrument unless the payment instrument is approved as to form by the Commissioner of Financial Institutions. Existing law requires the commissioner to approve an application as to form of a payment instrument to be issued by a licensee if the commissioner makes specified findings.

This bill would revise these provisions to remove the requirement that the commissioner approve those payment instruments as to form. The bill would prohibit a licensee from selling any payment instrument unless the payment instrument meets specified requirements. The bill would also require that, before a new licensee issues its first payment instrument for sale in this state, it file a certified copy of the form of that payment instrument with the commissioner.

#### Ch. 362 (AB 2733) Leslie State Highway Route 193.

Existing law gives the Department of Transportation full possession and control of all state highways. Existing law describes the authorized routes in the state highway system and establishes a process for adoption of a highway on an authorized route by the California Transportation Commission. Existing law authorizes the commission to relinquish certain state highway segments to local agencies.

This bill would authorize the commission to relinquish to the City of Lincoln the portion of State Highway Route 193 that is located within the city limits of that city under certain conditions.

#### Ch. 363 (AB 2867) Torrico Land use: public hearings: notice.

(1) The Planning and Zoning Law and the Subdivision Map Act require local governments to hold public hearings regarding various land use actions contemplated by those governments. If public notice of the hearing is required, that notice is required to be given in specified ways, among which is the delivery or mailing, within 10 days before the hearing, of the notice to the owner of the subject real property or the owner's duly authorized agent.

This bill would require that the notice be mailed to the owner of the subject real property as shown on the latest equalized roll, but would authorize the use of records of the county assessor or tax collector if those records contain more recent information than the information contained on the assessment roll. The bill would provide that, for purposes of the Subdivision Map Act notice requirements, notice shall also be given to an owner of a mineral right pertaining to the subject real property who has given notice of intent to preserve a mineral right, as specified. By requiring local governments to give notice to these additional owners, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 364 (AB 3076) Committee on Revenue and Taxation Taxation.

(1) The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975-76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased,

newly constructed, or a change in ownership has occurred. For purposes of these provisions, existing law specifies that taxable real property has changed ownership when that property is leased for 35 years or more, including renewal options. Existing law conclusively presumes that all homes that are eligible for the homeowners' exemption, other than specified manufactured homes, and that are on leased land are under a lease that have a renewal option of at least 35 years.

This bill would exclude floating homes from the conclusive presumption that homes eligible for the homeowners' exemption that are on leased land are under a lease that has a renewal option of at least 35 years.

(2) The California Constitution and existing property tax law authorize taxpayers that meet certain conditions to transfer the base year value, as defined, of property to replacement property. Existing law requires a taxpayer that seeks to transfer the base year value of property to replacement property to file a claim for this transfer within 3 years of purchasing or constructing the replacement property.

This bill would require the assessor to consider a base year value transfer application that is filed after that deadline and make conforming changes. This bill would also specify how the base year value of the replacement property described in the application would be determined.

(3) Existing property tax law authorizes counties to adopt ordinances that allow assesses whose property was damaged or destroyed to apply for a reassessment of that property if certain conditions, including the filing of an application for reassessment, are met. Existing law requires the assessor of a county that has adopted such an ordinance to notify the last known owner of property that the assessor has determined has been damaged or destroyed, but for which an application for reassessment was not filed. Existing law requires an assessee that received this notice from the assessor and that seeks to have the property reassessed to file an application for reassessment within 60 days of receiving the notice, but prohibits the assessee from submitting this application more than 12 months after the damage occurred.

This bill would eliminate this 60 day filing requirement to instead require that assesses file applications for base year value reductions within 12 months of the damage to the property.

(4) By changing the manner in which county assessors determine changes in ownership and process claims for base year value transfers and reassessments, this bill would impose a state-mandated local program.

(5) The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax, including an exemption for symbolic, impermanent lapel pins that memorialize United States military veterans killed in foreign wars, as provided.

This bill would correct an obsolete cross-reference in this provision.

(6) The Motor Vehicle Fuel Tax Law allows a supplier, as defined, to claim a refund of the license tax paid for the motor vehicle fuel under specific circumstances, including, but not limited to, where the supplier buys and uses the fuel for purposes other than operating motor vehicles upon the public highways of the state, exports the fuel, sells the fuel to a consulate officer or employee, or delivers the tax-paid fuel to a terminal and removes the fuel from the terminal, as provided. Under this law, a supplier entitled to a refund may elect to take a credit in lieu of a refund where the fuel was purchased for use off highway, exported, sold to a consulate officer or employee, or delivered and removed from a terminal, as specified.

This bill would consolidate the procedures for a supplier who chooses to claim a credit in lieu of a refund where the supplier exported, removed, sold or used the tax-paid motor vehicle fuel, as provided, and would make nonsubstantive changes to the heading of that law.

(7) The Use Fuel Tax Law, the Cigarette and Tobacco Products Tax Law, the Alcoholic Beverage Tax Law, the Energy Resources Surcharge Law, the Emergency Telephone Users Surcharge Law, the Hazardous Substances Tax Law, the Integrated Waste Management Fee

Law, the Oil Spill Response, Prevention, and Administration Fees Law, the Underground Storage Tank Maintenance Fee Law, the Fee Collection Procedures Law, and the Diesel Fuel Tax Law establish specified limitation periods for the approval by the State Board of Equalization for any refund for an overpayment.

This bill would provide that, notwithstanding those provisions, a refund of an overpayment of any tax, penalty, or interest collected by the board by means of a levy or by other enforcement procedures, shall be approved if the claim is filed within 3 years of the date of the overpayment.

(8) Existing law requires specified organizations that use, generate, store, or conduct activities in this state related to hazardous materials to pay a specified annual fee and file a return with the State Board of Equalization.

This bill would clarify that every limited liability company, limited partnership, limited liability partnership, general partnership, and sole proprietorship is subject to those filing provisions, as specified.

(9) The State Board of Equalization, as part of its administrative functions, is authorized to enter into settlement agreements for civil tax, or fee, or surcharge liability if it is determined that the settlement amount is consistent with a reasonable evaluation of the costs and risks associated with litigation, as provided. Existing law requires that whenever a reduction in tax, or fee, or surcharge in excess of \$500 is approved by the State Board of Equalization and the Franchise Tax Board, a public record containing specified information with regard to the settlement shall be placed on file in the office of the executive officer.

This bill would authorize the executive director and the chief counsel of the board to approve jointly the settlement of any tax, or fee, or surcharge matter in dispute involving a reduction of tax, or fee, or surcharge or penalties in settlement of \$5,000 or less. This bill would require that whenever a reduction of tax, or fee, or surcharge or penalties, or total tax, or fee, or surcharge and penalties in excess of \$500 is approved, a public record be kept at the executive director's office, as provided. This bill would also conform and clarify public record requirements.

(10) Existing law requires the State Board of Equalization to administer the Cigarette and Tobacco Products Tax Law, the Alcoholic Beverage Tax Law, the Timber Yield Tax Law, the Energy Resources Surcharge Law, the Emergency Telephone Users Surcharge Law, the Hazardous Substances Tax Law, the Integrated Waste Management Fee Law, the Oil Spill Response, Prevention, and Administration Fees Law, the Fee Collection Procedures Law, and the Diesel Fuel Tax Law. Under these laws, when a liability is not paid when due, the board is authorized to use various procedures to collect the amounts due.

This bill would authorize the board to accept offers in compromise on a final tax, surcharge, or fee liability, as defined, under the various fee, surcharge, and tax programs, as provided. This bill would require a taxpayer, fee payer, or a surcharge payer, under specified circumstances, to file a statement under penalty of perjury and would additionally provide that the willful concealment or withholding of information, as specified, in connection with an offer of compromise is a felony, and would thereby impose a state-mandated local program.

(11) The Diesel Fuel Tax Law prohibits any person from operating or maintaining a motor vehicle on the public highway with dyed diesel fuel, except if dyed diesel fuel is used in a manner that is lawful under the Internal Revenue Code by a person who is registered in a specific capacity under the Diesel Fuel Tax Law, including an intercity bus operator, as provided.

This bill would remove that exception.

(12) The Diesel Fuel Tax Law imposes specified taxes with respect to diesel fuel and authorizes one taxpayer to pay another taxpayer's tax liability on fuel removed from the terminal rack, operative only if authorized by the IRS.

This bill would make technical, nonsubstantive changes to those provisions.

(13) Under the existing Diesel Fuel Tax Law, a customer who has failed to pay for diesel fuel when the supplier of the diesel fuel has been allowed a credit on the fuel, as specified, is liable for the fuel tax as an unlicensed supplier, as provided. Existing law further provides that the tax, penalties, and interest owed by the unlicensed supplier become immediately due and payable.

This bill would require the board to give the customer notice of the determination of tax liability within 3 years after the date the credit was taken or the date on which a refund was paid.

(14) The Diesel Fuel Tax Law requires specified persons that are involved in the sale, removal, transportation, or storage of diesel fuel to keep and maintain specified records, including highway vehicle operator/refuelers.

This bill would change this reference to highway vehicle operator/fuelers to conform with existing provisions.

(15) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, with regard to certain mandates, no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 365 (SB 432) Alquist County fees.

Existing law specifically authorizes the county board of supervisors to increase or decrease fees and charges with specified exceptions, such as fees for the performance of services by the sheriff.

This bill, commencing January 1, 2008, would increase from \$30 to \$35 sheriffs' fees for serving a summons for an action commenced in superior court and related documents and notices, and, commencing January 1, 2008, would increase from \$25 to \$30 the fee for serving an earnings withholding order.

#### Ch. 366 (SB 490) Lowenthal Local government finance.

Existing law authorizes school entities, among others, to sell, assign, pledge, or otherwise transfer to a joint powers authority their right, title, and interest in and to the enforcement and collection of delinquent and uncollected property taxes, assessments, and other receivables that have been levied by or on behalf of the school entity for collection on the secured, unsecured, or supplemental property tax rolls.

Existing law requires, for each fiscal year, that each city, county, and city and county receive a portion of the countywide vehicle license fee adjustment amount, as defined, from a Vehicle License Fee Property Tax Compensation Fund (VLFPTCF) established in the treasury of each county to receive amounts from a county Educational Revenue Augmentation Fund (ERAF). Existing law also requires, for each fiscal year during the fiscal adjustment period, as defined, that each city, county, and city and county receive a portion of the countywide adjustment amount, as defined, from a Sales and Use Tax Compensation Fund (SUTCF) established in the treasury of each county to also receive amounts from a county ERAF.

This bill would, on and after January 1, 2007, prohibit an ERAF from transferring, and a joint powers authority from obtaining, delinquent and uncollected receivables from a county ERAF, as specified. This bill would also prohibit the auditor of a county from allocating to the VLFPTCF and SUTCF delinquent and uncollected property tax revenues on the secured roll that have been pledged or contractually obligated to debt service repayment, as specified. This bill would also require county auditors to proportionally increase the amount of the ad valorem property tax reduction for school entities in the county to ensure that the total

amount of the countywide vehicle license fee adjustment amount and the countywide adjustment amount is not reduced, as specified.

By changing the manner in which ad valorem property tax revenues are allocated in a county, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 367 (SB 667) Migden Public contracts: competitive bidding: University of California.

(1) Existing law requires the Regents of the University of California to give public notice of a project to bidders by publication once a week for at least 2 consecutive weeks next preceding the day set for the receiving of bids.

This bill would instead require the regents to give public notice of a project by publication twice within the 60-day period preceding the day set for the receiving of bids.

(2) Existing law authorizes the Regents of the University of California to enter into contracts for the erection, construction, alteration, repair, or improvement of a university structure and requires the regents to award contracts for projects to the lowest responsible bidder.

This bill would, until January 1, 2012, establish the Best Value Construction Contract Pilot Program, which authorizes a single University of California campus located in the City and County of San Francisco to award contracts based on the best value, to the university, as defined. This bill would require the university to observe specified procedures when awarding best value contracts, as provided. This bill would require, on or before January 1, 2010, the Regents of the University of California to submit a report to the appropriate policy committees of the Legislature and the Joint Legislative Budget Committee regarding the pilot program, to include specified information.

(3) This bill requires bidders to verify specific information under oath, thereby imposing a state-mandated local program by expanding the scope of an existing crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 368 (SB 746) Vincent Horse racing.

Existing law gives the California Horse Racing Board the authority to regulate horse racing and parimutuel wagering on horse races in California. The board sets the standards for the types of races that may be run and the types of horses that may be run, within statutory guidelines. Existing law allows the board to grant licenses to an association only for races between horses of a single breed, but allows some thoroughbred and Appaloosa horses to run in races shorter than 5 furlongs with other breeds, subject to specified conditions.

This bill would restrict the number of thoroughbred horses in these races to less than half unless given the consent of the quarter horse horsemen's association that is contracting with the association running the race.

Existing law requires satellite facilities to show and accept wagers on all other live horse races in the state.

This bill would require a quarter horse racing association in the southern zone to show races of a harness racing association in the northern zone, and would require a harness racing association in the northern zone to show races of a quarter horse racing association in the southern zone, as specified. The bill would require each racing association to pay the other

an additional 5% of the amount wagered on the satellite races at their respective facilities, as specified.

Ch. 369 (SB 777) Soto County employees' retirement.

(1) Under existing law, counties and districts, as defined, may provide retirement benefits to their employees pursuant to the County Employees Retirement Law of 1937.

This bill would include the retirement system established in San Bernardino County within the definition of a "district" for purposes of providing retirement benefits to those systems' employees, subject to resolution by the board of retirement making that provision applicable to the county.

(2) The County Employees Retirement Law of 1937 establishes noncontributory retirement plans for employees in specified counties. Existing law, upon approval by the county board of supervisors, authorizes members of noncontributory retirement plans in the Counties of Santa Barbara and Los Angeles to receive service credit for time that would not otherwise be recognized, upon payment by the member of specified contributions to the retirement fund.

This bill would clarify that the amount of those contributions payable by the member is the same as the amount payable by a member of the contributory plan, as specified. The bill would further make related and conforming changes with regard to previously purchased service.

(3) The County Employees Retirement Law of 1937 authorizes the board of retirement of Orange County to appoint specified management, investment, and legal personnel. These appointees are not classified as county employees and are therefore not subject to the civil service system, but are employees of that retirement system, subject to the terms of employment determined by the board of retirement.

This bill would authorize the board of retirement of San Bernardino County to adopt, by resolution, those provisions classifying specified personnel of their respective systems as employees of the retirement system.

(4) The County Employees Retirement Law of 1937 prescribes benefits for members of county and district retirement systems subject to the act. Those benefits are based, in part, on a calculation of the member's final compensation, as defined. Management of each of those retirement systems is vested in a board of retirement, except in specified circumstances.

This bill would prohibit the governing bodies of retirement systems in Orange County and San Bernardino County from exercising specified authority to make a benefit formula applicable to employees of the retirement system unless the board of supervisors has made the formula applicable to personnel of the retirement system who are employees of the county.

Ch. 370 (SB 974) Committee on Environmental Quality CEQA: exemption: rural infrastructure economic development projects.

The existing California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on a project, as defined, that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect. CEQA exempts from its provisions any activity or approval necessary for, or incidental to, project funding, or the authorization for the expenditure of funds for the project, by the Rural Economic Development Infrastructure Panel, as provided. The provisions of law establishing that panel were repealed by Chapter 229 of the Statutes of 2003.

This bill would repeal those provisions relating to that exemption under CEQA.

Ch. 371 (SB 1131) Committee on Budget and Fiscal Review Education funding.

(1) Existing law provides for funding of certain education programs through categorical education block grants and requires the amount of funds allocated under those grants to be adjusted for inflation and growth pursuant to certain formulas.

This bill would specify that the amount of the adjustment for inflation and growth for certain categorical education block grants is subject to provisions in the annual Budget Act.

(2) Existing law establishes the Supplemental School Counseling Program and requires the governing board of a school district that maintains any of grades 7 to 12, inclusive, as a condition of receiving funds appropriated for purposes of that program, to adopt a counseling program at a public meeting that includes, among other things, a provision for a counselor to meet with each pupil, as specified, to explain the academic and department records of the pupil, his or her educational options, the coursework and academic progress needed for satisfactory completion of middle or high school, and the availability of career guidance activities. Funds appropriated in the annual Budget Act for the purposes of the program are required to be allocated to school districts based on an equal amount per unit of average daily attendance in grades 7 to 12, inclusive, with certain minimum-grant exceptions.

This bill, instead, would require the appropriation to be based on an equal amount per pupil enrolled in the district in the prior fiscal year based on the fall California Basic Educational Data System (CBEDS) enrollment data in grades 7 to 12, inclusive, with certain minimum-grant exceptions.

(3) Existing law provides economic impact aid to school districts for the support of programs serving economically disadvantaged pupils, as defined, and English language learners, as defined. Existing law requires the Superintendent of Public Instruction to determine an economic impact aid-eligible pupil count and calculate an amount of economic impact aid for each school district for the 2006–07 fiscal year and each fiscal year thereafter, as specified.

This bill would revise the data collection process for determining the economic impact aid-eligible pupil count for charter schools and small districts, as defined.

(4) The bill would revise certain allocations in the Budget Act of 2005 for CalSAFE academic and supportive services and nonconverting pregnant minors programs.

(5) Existing law appropriates \$500,000,000 from the General Fund to Section A of the State School Fund for allocation by the Superintendent of Public Instruction to school districts, charter schools, and county offices of education on the basis of an equal amount per unit of average daily attendance, and limits expenditure of those funds to the acquisition of art, music, and physical education supplies and equipment.

This bill, additionally, would authorize the funds to be expended for professional development in arts, music, or physical fitness, and thereby would make an appropriation by expanding the purposes for which the funds may be expended.

(6) Existing law provides that county superintendents may apply for funding for consideration of a school district's plan concerning outstanding long-term fiscal obligations concerning retired employee nonpension benefits during the course of reviewing the budget of the school district.

This bill would provide that the amount of funding for the above purpose is not to exceed \$1,000,000.

(7) The bill would make various technical changes in certain provisions of existing law enacted under Chapter 79 of the Statutes of 2006, relating to education funding.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 372 (SB 1276) Committee on Elections, Reapportionment and Constitutional Amendments Omnibus elections bill.

(1) Existing law requires that a special election shall be conducted to fill a vacancy in the office of Representative in Congress, State Senator, or Assembly Member on a Tuesday at

least 112 days, but not more than 119 days, following the issuance of an election proclamation by the Governor, except as specified.

This bill would extend the time period for holding a special election from at least 112 days to no more than 126 days following the issuance of an election proclamation by the Governor.

(2) Existing law specifies the procedures for processing absentee ballot return envelopes during the 29-day period before any election and authorizes any jurisdiction having the necessary computer capability to start processing absentee ballots on the 7th day prior to the election.

This bill would revise this authorization to apply to the 7th business day prior to the election.

Ch. 373 (SB 1341) Cedillo Sales and use tax exemption: charitable thrift stores.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. The law provides various exemptions from this tax, including an exemption for retail items sold by thrift stores operated by nonprofit organizations, if the purpose of that thrift store is to obtain funding for medical, hospice, or social services provided to individuals with HIV disease or AIDS by the nonprofit organization. This exemption will be repealed January 1, 2007.

This bill would change the repeal date of the exemption to January 1, 2012, and would require a thrift store claiming the tax exemption for retail items to have at least 75% of its net income derived from operations of the thrift store.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy.

Ch. 374 (SB 1425) Kuehl Groundwater extraction.

Existing law, with certain exceptions, requires a person who, after 1955, extracts groundwater in excess of 25 acre-feet in any year in the Counties of Riverside, San Bernardino, Los Angeles, and Ventura to file with the State Water Resources Control Board an annual notice of extraction. Existing law, with certain exceptions, provides that, after 1959, the failure to file a notice for any calendar year within 6 months after the close of that calendar year is equal to nonuse of the groundwater in those counties for that calendar year by each person failing to so file. Existing law requires each person who extracts groundwater in a board-designated local area and who is otherwise subject to these described provisions, to file the required notice with a local public agency or court-appointed watermaster that has been designated by the board to receive the notice (local agency), instead of the board. Existing law defines "board-designated local area" as the area entirely within the jurisdiction of the local agency that the board has determined is to be subject to these provisions. Existing law authorizes the board to designate an entity as a local agency for those purposes if the board determines the local agency meets specified requirements, including a requirement that the entity has volunteered to be designated. Existing law requires the local agency to make the extraction information available to the public.

This bill would modify the definition of "board-designated local area" to include any area for which the local agency has formally agreed to accept the required notice. The bill would

require the board to designate an entity as a local agency if the board determines the local agency meets the specified requirements. The bill would require the local agency to make the extraction information available to governmental agencies instead of the public.

Ch. 375 (SB 1610) Simitian Vehicles: emergency vehicles.

(1) Existing law requires the driver of a vehicle, upon the immediate approach of an authorized emergency vehicle, as defined, that is sounding a siren and has at least one lighted lamp exhibiting red light, as specified, to yield the right-of-way and immediately drive to the right-hand edge or curb of the highway, clear of an intersection, and thereupon stop and remain stopped until the authorized emergency vehicle has passed, except as otherwise directed by a traffic officer.

This bill would prohibit a person from operating a vehicle in an unsafe manner, as defined, within an emergency incident zone, as defined. The bill would thereby impose a state-mandated local program by creating a new crime.

(2) This bill, until January 1, 2010, would require a person driving a vehicle on a freeway approaching a stationary authorized emergency vehicle that is displaying emergency lights, or a stationary tow truck that is displaying flashing amber warning lights, to approach with due caution and, before passing in a lane immediately adjacent to the authorized emergency vehicle or tow truck, absent any other direction by a peace officer, proceed to either make a lane change into an available lane, as specified, or, if that maneuver would be unsafe or impracticable, slow to a reasonable and prudent speed that is safe. The bill would thereby impose a state-mandated local program by creating a new crime.

(3) Existing law requires tow trucks used to tow disabled vehicles to be equipped with flashing amber warning lamps, and authorizes tow trucks to display flashing amber warning lamps while providing service to a disabled vehicle.

This bill, until January 1, 2010, would prohibit a tow truck from displaying flashing amber warning lamps on a freeway except when an unusual traffic hazard or extreme hazard exists. Because a violation of this prohibition would be a crime, under provisions of existing law, this bill would impose a state-mandated local program.

(4) The bill would require the Department of the California Highway Patrol to submit a report to the Legislature regarding the effects the statutory changes made by this bill had on the safety of emergency responders and the motoring public.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 376 (AB 2038) Tran Escrow agents.

The Escrow Law provides for licensing and regulation of escrow agents, other than certain exempt persons, by the Commissioner of Corporations. Existing law requires licensees to apply for membership in the Escrow Agents' Fidelity Corporation, a nonprofit mutual benefit corporation, which is established to indemnify its members against loss of trust obligations, which indemnification may be accomplished through a fund established by the corporation or a fidelity bond or insurance policy approved by the commissioner or a combination thereof. Existing law requires a Department of Justice background check relative to each employee, shareholder, or other person to be compensated by a member of Fidelity Corporation and provides for the corporation to deny the application or suspend or revoke the certificate of that person on specified grounds, including criminal convictions for certain financial crimes.

This bill would require Fidelity Corporation to provide a copy of the fidelity bond or insurance policy, if any, to all members and to the commissioner. The bill would define conviction for purposes of application denial or certificate revocation, and would, under

certain conditions, require, rather than authorize, the corporation to suspend the certificate. The bill would make other related changes.

Existing law requires a person seeking employment with an escrow agent to complete a specified employment application that asks certain questions, including whether the person has been convicted of a crime, as specified.

This bill would modify the definition of “convicted” in that regard.

Under existing law, the escrow agent’s employment application provides that any person who provides false information is guilty of a felony and shall, upon conviction, be fined, imprisoned, or both.

This bill would delete that provision.

Ch. 377 (SB 1348) Battin Voter registration: paid circulators.

(1) Existing law requires any person who, in exchange for money or other valuable consideration, assists another to register to vote by receiving the completed affidavit of registration from the elector, to sign his or her name and to provide other specified information, including the name and telephone number of the person, company or organization that agrees to pay money or other valuable consideration for the completed affidavit of registration.

This bill would, except as specified, make it a misdemeanor for any person, as specified above, to knowingly misrepresent himself or herself as having helped register another to vote on a registration form, and would impose a fine not exceeding \$10,000, imprisonment in the county jail not to exceed one year, or both, for a 3rd or subsequent conviction.

By creating a new crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 378 (AB 2430) Umberg Ballot materials: translations.

Existing federal law, the Voting Rights Act of 1965, requires every state or political subdivision meeting certain criteria to provide bilingual voting materials to citizens of language minorities to ensure their full participation in the electoral process.

The California Constitution and existing state law require the Legislature to prohibit improper practices that affect elections, including a citizen’s right to vote.

This bill would require the Secretary of State to provide a translation of the ballot title and the condensed statement of the ballot title in a language other than English to the local elections official whenever a city, county, or city and county is required to provide a translation of ballot materials in a language other than English by the federal Voting Rights Act of 1965 for each state measure submitted to the voters in a statewide election not later than 68 days prior to that election.

The bill would also require the local elections official to use that translation, as specified, and would prohibit him or her from selecting or contracting with another person to provide translations of the same text.

Ch. 379 (AB 3061) Committee on Elections and Redistricting Voter registration index.

Existing law requires county elections officials to furnish either one electronic or 2 printed copies of the index of registration for the primary and general elections or for any special election at which a partisan office is to be filled to a requesting state or county party central committee.

This bill would also require county elections officials to furnish the index of registration for any statewide special election to a requesting state or county party central committee, thus imposing a state-mandated local program by creating a new duty.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 380 (SB 638) Torlakson Before and after school programs.

(1) Existing law, the 21st Century High School After School Safety and Enrichment for Teens program (ASSETs act), provides that the purpose of the program is to create incentives for establishing locally driven after school enrichment programs that partner schools and communities to provide academic support and safe, constructive alternatives for high school pupils in the hours after the regular schoolday. The ASSETs act, commencing with the 2006–07 fiscal year, requires a program to comply with the State Department of Education’s requirements for hours and days of program operation. Existing law requires an applicant for a grant to run a program pursuant to the ASSETs act to meet specified requirements.

This bill would provide that an additional purpose of the program is to assist pupils in passing the high school exit examination. The bill would require a program to operate for a minimum of 15 hours per week. The bill would revise the requirements that a grant applicant is required to meet.

The bill would require the department to provide notice to schools eligible for grants, as specified, and would impose additional requirements on the department with respect to review of grant applications. The bill would require a specified committee to make recommendations to the department and the Legislature with respect to reporting requirements for high school programs operating pursuant to the ASSETs act, as specified. The bill would require the department to review the recommendations and present them to the State Board of Education, and would require the state board to adopt regulations for program evaluation and review, as specified.

(2) The ASSETs act imposes requirements for priority funding, and requires the department to consider specified criteria in awarding grants pursuant to the ASSETs act.

This bill would revise those priorities and criteria.

(3) The ASSETs act provides that a grantee that establishes a program pursuant to the ASSETs act is eligible to receive a 5-year grant, subject to annual reporting and recertification as required by the department, for upfront payments of up to \$250,000 per year per program.

This bill, instead, would provide that a grantee that establishes a program is eligible for a 5-year grant of up to \$250,000 per year per site in a program, subject to semi-annual attendance reporting, as specified. The bill would impose additional requirements on the department and recipients, with respect to the grants.

(4) The ASSETs act requires a high school after school program established pursuant to the ASSETs act to submit to the department annual outcome-based data for evaluation, as specified.

This bill would revise and increase the amount of data that is required to be submitted.

(5) The bill would make additional, related changes to the ASSETs act.

(6) Existing law, the After School Education and Safety Program Act of 2002 (existing act), enacted by initiative statute, establishes the After School Education and Safety Program to serve pupils in kindergarten and grades 1 to 9, inclusive, at participating public elementary, middle, junior high, and charter schools. The existing act provides a formula for determining an amount to be continuously appropriated from the General Fund to the department for purposes of the program.

The existing act imposes requirements on applicants for grants made pursuant to the existing act, with respect to their applications and the programs receiving grants pursuant to the applications.

This bill would substantially revise those requirements.

The bill would require the department to review applications submitted pursuant to the existing act to determine whether specified requirements have been met, and would require the department to use specified formulas to determine the appropriate grant amount. The bill would impose requirements on the department with respect to timing of grants and grant notifications. The bill would require the department to provide notice to schools eligible for grants, as specified. The bill would also impose certain other related requirements concerning grant awards.

The bill would require a specified committee to submit to the department recommendations on reporting requirements, as specified, and would require the department to review the recommendations and present them to the state board, as specified. The bill would require the state board to adopt requirements for program evaluation and review, as specified.

(7) The existing act requires that grants made to public schools under the program for the 2003–04 fiscal year continue to be funded in each subsequent fiscal year at the 2003–04 fiscal year level before any other grants are funded under the act, if those schools continue to make application for the grants and are otherwise qualified under the act. The existing act imposes grant maximums for after school programs, as specified.

This bill, additionally, would give priority to recipients of grants made during the 2006–07 grant year under a specified provision of existing law that the bill would modify, relating to community learning centers, as specified. The bill would provide an exception to grant maximums, as specified, for a recipient of such a grant. The bill would increase grant maximums for after school programs, as specified.

(8) The existing act exempts the grants described in (7) above from a requirement that priority for funding under the act be given to schools where a minimum of 50% of the pupils in elementary schools and 50% of the pupils in middle and junior high schools are eligible for free and reduced-price meals through the school lunch program of the United States Department of Agriculture.

This bill would delete that exemption.

(9) The existing act requires a before school component of a program to begin at or before 6:00 a.m. or 2 hours before the beginning of a regular schoolday, but authorizes a program to operate less than 2 hours, but no less than 1 1/2 hours, per regular schoolday. The existing act provides that a school is not eligible to receive funds for a pupil who attends less than 1/2 of the daily program hours.

This bill would delete the requirement that a before school component of a program begin at or before 6:00 a.m. or 2 hours before the beginning of a regular schoolday. The bill, instead of providing for that ineligibility in (8) above, would prohibit a pupil who attends less than 1/2 of the daily program hours from being counted for the purposes of attendance. The bill would require a before school component of a program to offer a breakfast meal, as specified.

(10) The existing act requires a program electing to operate both a before and after school component of a program for the same pupils during specified periods to operate these programs for a minimum of 5 hours per day, as specified.

This bill would reduce that amount of time to 4 1/2 hours per day.

(11) The existing act requires the department to consider specified criteria when selecting schools to participate in the program, as specified.

This bill would modify those criteria.

(12) The existing act provides a formula for determining an amount to be continuously appropriated from the General Fund to the department for purposes of the program. The existing act allows the department to spend 1.5% of the appropriated funds to cover evaluation costs, to provide training and support, and to pay its costs of awarding and monitoring grants.

This bill would provide that, beginning with the 2006–07 fiscal year, 1.5% of the funds appropriated are to be made available to the department for purposes of providing technical assistance, evaluation, and training services, and for providing local assistance funds to

support program improvement and technical assistance. The bill would require that the training and support provided by the department include, but not be limited to, the development and distribution of voluntary guidelines for physical activity programs, as specified. The bill would require the department to contract for an independent statewide evaluation of the programs funded pursuant to the existing act to be prepared and submitted to the Legislature and the Governor, as specified.

(13) The existing act requires that all funds remaining from the continuous appropriation after certain grants have been funded to be distributed as 3-year renewable incentive grants under certain provisions of existing law. The existing act provides that a school that receives one of those grants is subject to annual reporting and recertification as required by the department.

This bill would revise the funding formulas and maximums for the grants, and provide that a school is subject to semiannual attendance, rather than annual, reporting and requirements once every 3 years, as provided. The bill would authorize the department to adjust the amount of a direct grant, awarded to a new applicant pursuant to those provisions, on the basis of the program start date, as determined by the department.

The bill would authorize and require the department to reduce grant amounts for reasons related to attendance, as specified, and authorize the department to terminate the grant for a site or program that does not comply with specified reporting requirements, fails to demonstrate measurable program outcomes, as specified, or has a specified attendance level. The bill would impose priority requirements for the grants and would revise matching fund requirements.

(14) The existing act provides that a school with a certain before school program is eligible for a 3-year renewable grant, that is subject to annual reporting. The existing act provides that the school receiving the grant may choose one of 2 funding formulas for the grant.

This bill would provide that a school is subject to semiannual attendance, rather than annual, reporting, and would revise the funding formulas and maximums for the grants. The bill would revise matching fund requirements.

(15) The existing act requires programs to submit annual outcome-based data for evaluation, as specified.

This bill would modify and specify the data required to be submitted.

(16) Existing law provides for the funding of specified community learning center programs.

This bill would revise the amounts required to be made available for those programs.

(17) The bill would make additional, related changes to the existing act.

(18) Because this bill would make money that is continuously appropriated specifically available for these new purposes, the bill would make an appropriation.

(19) The existing act authorizes the Legislature to amend certain of its provisions to further its purposes by majority vote of each house.

Certain other provisions of the existing act relating to funding priorities, as described in (7) above, may be amended by the Legislature only by a  $\frac{2}{3}$  vote of each house and signed by the Governor if the amendment furthers the purposes of the act.

This bill would set forth a legislative finding and declaration that the proposed amendments further the purposes of the existing act.

(20) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 381 (AB 409) Yee Disciplinary actions: suspension.

Existing law, the Barbering and Cosmetology Act, provides for the licensure and regulation of cosmetologists, barbers, estheticians, manicurists, and electrologists by, until July 1, 2007, the State Board of Barbering and Cosmetology. Under the act, the board may revoke or suspend a license it has issued and it may assess an administrative fine for a violation of the act or of a rule or regulation adopted by the board pursuant to the act.

This bill would authorize the board's executive officer, or his or her designee, to suspend without a hearing a license issued by the board if required to protect the public's health and safety. The bill would immediately stay the suspension and place the license on probation for one year, subject to specified terms and conditions. The bill would provide the licensee with appeal rights to the disciplinary review committee established by the board and would require the board to reinstate the license upon the licensee's completion of all probationary terms and conditions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 382 (AB 1979) Bass Community care facilities: criminal record information: fees.

Existing law, the California Community Care Facilities Act, provides for the licensure and regulation of community care facilities by the State Department of Social Services. A violation of these provisions is a crime.

Existing law requires that, before issuing any of specified documents allowing for the operation or management of a community care facility, the department or other approving authority secure from an appropriate law enforcement agency a criminal record with respect to the applicant and specified employees and volunteers who will have contact with children. Existing law requires the submission of the fingerprints of an applicant or other person who is not otherwise exempted from fingerprinting to the Department of Justice for the purpose of providing criminal record information, and requires the Department of Justice to provide notice of the criminal record information within 14 days of receiving the fingerprints. Existing law allows the Department of Justice to charge a fee sufficient to cover the cost of providing these services. These requirements also apply to prospective employees and volunteers subsequent to the commencement of operation by the facility.

This bill would specify that candidates for mentoring foster children shall be subject to a criminal background investigation prior to having unsupervised contact with the children. This bill would prohibit the Department of Justice and the State Department of Health Services from charging a fee for a state-level criminal offender record information search and criminal background investigation.

By imposing additional requirements upon community care facility programs, this bill would create a crime, thus imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 383 (AB 2195) Bass Foster caregivers: placement options.

(1) Existing law provides for the placement of dependent children by the juvenile court according to specified procedures. Existing law separately establishes the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which counties provide payments to foster care providers on behalf of qualified children in foster care. The program is funded by a combination of federal, state, and county funds, with moneys from the General Fund being continuously appropriated to pay for the state's share of AFDC-FC costs.

Under existing law, a child who has been taken into temporary custody is detained and an able and willing relative or nonrelative extended family member is available and requests a temporary placement of the child pending the detention hearing, the county welfare department is required to assess the relative's or nonrelative extended family member's suitability, and may place the child in the relative's or nonrelative extended family member's home upon completion of the assessment. Existing law further requires the county welfare department to evaluate and approve or deny the home for AFDC-FC eligibility.

This bill would establish similar procedures for assessment and approval of a relative's or nonrelative extended family member's home when the sudden unavailability of a foster

caregiver requires a temporary change in placement on an emergency basis for a child who is under the jurisdiction of the juvenile court, including provision for making these placements eligible for payments under the AFDC-FC program.

(2) By giving county welfare agencies new duties with respect to the placement of dependent children, this bill would impose a state-mandated local program. In addition, by expanding AFDC-FC eligibility, the bill would result in an appropriation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 384 (AB 2216) Bass Child Welfare Leadership and Performance Accountability Act of 2006.

Existing law provides for oversight by various state and local entities of certain populations of children, including those who are wards of the juvenile court, and those who are in foster care, or are otherwise under the supervision of county welfare departments. Existing law provides for a system of child welfare services administered by each county, with oversight by the State Department of Social Services.

Existing law also provides for the California Child and Family Service Review System, established by the Child Welfare System Improvement and Accountability Act of 2001, in order to review all county child welfare systems, covering child protective services, foster care, adoption, family preservation, family support, and independent living. Under the act, the California Health and Human Services Agency established a workgroup, comprised of representatives of specified entities and organizations, to establish a work plan by which to conduct these reviews.

This bill, the Child Welfare Leadership and Performance Accountability Act of 2006, would establish within the California Health and Human Services Agency the California Child Welfare Council, an advisory body that would be responsible for improving the collaboration and processes of the multiple agencies and courts that serve children and youth in the child welfare and foster care systems. The bill would provide for the composition of the council, including as cochairs the Chief Justice of the California Supreme Court or his or her designee, and the Secretary of California Health and Human Services. The bill would require the secretary to ensure that current federal and state level outcome measures, among other information, are posted on the State Department of Social Services' Internet Web site.

The bill would state the Legislature's intent to inspect other state child welfare and foster care systems over the course of the 2007–08 Legislative Session, for the purpose of examining effective administrative structures of leadership, and to conduct hearings and review recommendations of other commissions and bodies to determine if a reconfigured administrative structure would provide the statewide leadership and coordination between departments and agencies essential to improving outcomes for current and former foster children and youth throughout the state.

This bill would require the Judicial Council to adopt outcome measures consistent with the outcome indicators specified above, by April 1, 2008.

Ch. 385 (AB 2480) Evans Dependent children: counsel.

Existing law authorizes a child or counsel for a child, with the informed consent of the child if the child is found by a court to be of sufficient age and maturity to consent, to invoke the psychotherapist-client privilege, physician-patient privilege, and clergy-penitent privilege.

This bill would provide that a child over 12 years of age shall be presumed to be of sufficient age and maturity to consent, subject to rebuttal by clear and convincing evidence.

Existing law requires the court to appoint counsel for a child in dependency proceedings at the trial level, unless the court finds that the child would not benefit from the appointment of counsel.

This bill would require the court of appeal, in any appellate proceeding in which the child is an appellant, to appoint separate counsel for the child. The bill would also require the court of appeal, if the child is not an appellant, to appoint separate counsel for the child if the court of appeal determines, after considering recommendations of the trial counsel or guardian ad litem for the child, that appointment of counsel would benefit the child. The bill would require the Judicial Council to implement this provision by promulgating a rule of court by July 1, 2007, as specified.

The bill would also require the Judicial Council to report to the Legislature, by July 1, 2008, information regarding the status of appellate representation of dependent children, the results of implementing those provisions, and other recommendations regarding the representation of dependent children in appellate proceedings.

The bill would incorporate additional changes to Section 317 of the Welfare and Institutions Code made by SB 678 and this bill to take effect if both bills are enacted and this bill becomes operative last.

#### Ch. 386 (AB 2488) Leno Adoption.

Existing law authorizes the State Department of Social Services or an adoption agency, as defined, that joined in an adoption petition to release the names and addresses of biological siblings to one another if both siblings have attained 21 years of age and have filed a specified request and waiver of rights with respect to the disclosure with the department or agency.

This bill would further authorize the disclosure of the names and addresses of an adoptee and his or her half-sibling or step-sibling to one another, if the above-described requirements are met. The bill would also lower the age of consent to 18 years of age, and would authorize an adoptee or sibling, as defined, who is under 18 years of age to file that request with the consent of his or her adoptive parents or, if a sibling, with the consent of the sibling's legal parent or guardian, or the dependency court under specified circumstances. If an adoptee or sibling has not filed a waiver with the department or adoption agency, the bill would also authorize the adoptee or sibling to petition the court to appoint a confidential intermediary, as specified, which would have the authority to contact the adoptee and his or her adoptive parents or the sibling with regard to disclosure. The bill would require the confidential intermediary to inform those persons that consent is optional, and, upon denial, would prohibit the intermediary from making any further attempt at disclosure.

By imposing additional duties on, among others, licensed county adoption agencies to act as a confidential intermediary, as described above, and by increasing the number of sibling and adoptee requests, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 387 (AB 2985) Maze Foster youth: identity theft.

Existing law requires the placement of dependent children by the juvenile court according to specified procedures. Existing law requires the State Department of Social Services to administer every phase of the administration of public social services, except as specified. Existing law also requires the state, through the department and county welfare departments, to establish and support a system of statewide child welfare, which includes services related to foster care placement of dependent children and adoption.

This bill would require a county welfare department to request a consumer disclosure, pursuant to federal law, on behalf of a youth in a foster care placement in the county, when the youth reaches his or her 16th birthday, in order to ascertain whether the youth has been the victim of identity theft. If the consumer disclosure reveals any negative items, or evidence that identity theft has occurred, the bill would require the county welfare department to refer the youth to an approved organization that provides services to victims of identity theft. The bill would require the department to develop a list of approved organizations for this purpose, in consultation with the County Welfare Directors Association and others. By requiring county welfare departments to perform new duties with respect to children in foster care placement, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 388 (SB 1641) Soto Foster care providers.

Existing law provides for the licensure and regulation of community care facilities, including foster family agencies, foster family homes, small family homes, and group homes as defined, by the State Department of Social Services.

This bill would require the Director of Social Services to report to the Legislature on the progress of the department's children's residential regulation review workgroup, including recommendations being considered for statutory, regulatory, and policy changes, and any workplan for the implementation of those recommendations.

Under existing law, when a placement agency has placed a child with a foster family agency, the foster family agency is required to place the child in a licensed foster family home or certified family home that best meets the needs of the child.

This bill would expand this provision to include instances when a placement agency places a child with a relative caregiver, a nonrelative extended family member, a licensed foster family home, or a group home. The bill would define a home that meets the best needs of the child to include a home that meets the child's health, safety, and well-being needs, is the least restrictive and most family-like environment, and allows the child to engage in reasonable, age-appropriate day-to-day activities, as specified. The bill would require the foster child's caregiver to use a reasonable and prudent parent standard, as defined, to determine these age-appropriate activities.

Violation of the provisions relating to the licensing and regulation of community care facilities is a misdemeanor. By revising the requirements applicable to placement agencies and foster care providers, the bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 389 (SB 1667) Kuehl Dependent children.

Existing law authorizes the juvenile court to adjudge a minor who has been abused or neglected, or who meets other specified criteria, to be a dependent child of the court. Existing law requires a social worker or probation officer to give notice of review hearings relating to the adoption or legal guardianship of the minor to specified persons. Among others, the social worker or probation officer is required to give notice to the foster parents, Indian custodian, relative caregivers, community care facilitator or foster family agency having

physical custody of the child, if a child is removed from the physical custody of the parents or legal guardian.

This bill would authorize any foster parent, Indian custodian, relative caregiver, community care facilitator, or foster family agency who is notified, as described above, to attend all hearings and to submit any information he or she deems relevant to the court in writing.

Existing law specifies the procedure for conducting hearings to determine the status of a dependent child of the juvenile court, including notice requirements and report filing deadlines. Existing law requires a social worker, in specific circumstances, to file a summary of his or her recommendations with the juvenile court at least 10 days prior to the hearing. Existing law further requires a social worker, at least 10 days prior to a status hearing, to file a summary of his or her recommendations for disposition to a child's foster parents, relative caregivers, or foster parents approved for adoption, if the child is removed from the physical custody of his or her parent prior to the hearing.

This bill also would require a social worker to include with his or her summary of recommendations a copy of the Judicial Council Caregiver Information Form, in the caregiver's primary language when available, along with instructions on how to file the form with the court. By requiring social workers to perform additional duties, this bill would impose a state-mandated local program.

Existing law authorizes a foster parent, relative caregiver, or certified foster parent, as defined, prior to any hearing involving a child over whom he or she has custody, to file with the juvenile court a report containing his or her recommendation for disposition.

This bill would authorize a foster parent, relative caregiver, or certified foster parent, in the alternative, to use a Judicial Council Caregiver Information Form containing his or her recommendation.

This bill would incorporate additional changes in Section 295 of the Welfare and Institutions Code proposed by SB 678 to become operative only if this bill and SB 678 are enacted and become operative on or before January 1, 2007, and this bill is enacted last, in which case Section 295 of the Welfare and Institutions Code, as amended by SB 678, shall remain operative only until the operative date of this bill.

This bill would incorporate additional changes to Section 366.21 of the Welfare and Institutions Code proposed by AB 1774 to become operative only if this bill and AB 1774 are enacted and become effective on or before January 1, 2007, and this bill is enacted last, in which case Section 366.21 of the Welfare and Institutions Code, as amended by AB 1774, shall remain operative only until the operative date of this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 390 (SB 56) Dunn Trial court judges and officers.

(1) Existing law requires a member of the State Bar to maintain specified information on the official membership records of the State Bar.

This bill would require the State Bar to adopt procedures to facilitate reporting of mandatory and voluntary information by providing members with a centralized mechanism for reporting information online at the State Bar Internet Web site.

(2) Existing law requires the Governor to submit to a designated agency of the State Bar of California the names of all potential appointees or nominees for a vacant judicial office for evaluation of their judicial qualifications. Existing law requires the State Bar to evaluate and determine the qualifications of each candidate with regard to his or her ability to

discharge the judicial duties of the office and to report its recommendation in confidence to the Governor within 90 days.

This bill would require, on or before March 1, 2007, and annually on or before each March 1 thereafter, all of the following: (a) the Governor to disclose aggregate statewide demographic data provided by all judicial applicants relative to ethnicity and gender, (b) the designated agency of the State Bar responsible for evaluation of judicial candidates to collect and release statewide demographic data provided by judicial applicants reviewed and the statewide summary of the recommendations of the designated agency by ethnicity and gender, and (c) the Administrative Office of the Courts to collect and release the demographic data provided by justices and judges relative to ethnicity and gender by specific jurisdiction. The bill would make other technical, nonsubstantive changes to these provisions.

(3) Existing law specifies the number of judges of the superior court for each county.

This bill would authorize 50 additional judges to be allocated, upon appropriation by the Legislature in the 2006–07 fiscal year, to the various county superior courts, pursuant to uniform criteria approved by the Judicial Council. The bill would require the Judicial Council to report biennially to the Legislature and the Governor on the factually determined need for new judgeships in each superior court, as specified.

The bill would require the Judicial Council, on or before November 1, 2007, to adopt, and report to the Legislature annually thereafter upon, judicial administration standards and measures that promote the fair and efficient administration of justice.

#### Ch. 391 (SB 258) Chesbro State hospitals: deaths: memorials.

Existing law sets forth the powers and duties of the State Department of Mental Health, including, but not limited to, the administration of the state hospitals for the mentally disordered. Existing law requires the department, among other things, to assist the California Memorial Project in developing a plan for the restoration of gravesites and cemeteries at state hospitals and developmental centers and gravesites not located on state lands, but designated by the state for burial of state hospital or developmental center residents, and to develop a protocol for the future interment of patients who die while residing at a state hospital or developmental center and are unclaimed by a family member.

Existing law also requires the department to assist and cooperate with the California Memorial Project in conducting research regarding the records of deaths and burials of persons at state hospitals and developmental centers.

This bill would, notwithstanding specified provisions governing patient confidentiality, with respect to any monument or memorial erected consistent with specified provisions, authorize the department to include, if available prescribed information identifying any person being memorialized who died while in residency at a state hospital or developmental center and who was buried by the state. The bill would, with respect to the plan required to be developed with the California Memorial Project, also require the department to seek funding from the California Cultural and Historical Endowment, in addition to any other available resources that may be available to the department, excluding General Fund moneys, to restore, purchase, preserve, and memorialize the gravesite located at Napa State Hospital.

#### Ch. 392 (SB 420) Simitian Public contracts: procurements: recycled products.

(1) Existing law provides various procedures for the procurement of goods and services by local public entities. Existing law also requires local public entities to purchase recycled products instead of nonrecycled products according to various procedures and requirements.

This bill would make a technical, nonsubstantive change to correct an erroneous reference to a “state agency” in the local public entity provisions regarding the procurement of recycled products.

(2) Existing law requires the State Procurement Officer, when purchasing materials to be used in paving or paving subbase for use by the Department of Transportation and any other

state agency that provides road construction and repair services, to make contracts available for those items that utilize paving materials that include recycled materials, except as provided.

This bill would require the State Procurement Officer to contract for those items that utilize recycled material in those materials, rather than requiring the State Procurement Officer to make those contracts available, and would make that requirement to contract applicable in purchasing those materials for use by the department and any other state agency that provides construction and repair services.

Ch. 393 (SB 475) Runner Drinking water: residential self-regenerating water softeners: Santa Clara River.

Existing law authorizes a residential water softening or conditioning appliance to be installed only if certain conditions are met. Existing law further provides, notwithstanding the above authorization, that a local agency may, by ordinance, limit the availability of, or prohibit the installation of, residential water softening or conditioning appliances that discharge to the community sewer system if the local agency makes certain findings and includes them in the ordinance.

This bill would provide, notwithstanding that authorization, that the Santa Clarita Valley Sanitation District, or any successor district, may, by ordinance adopted subsequent to an ordinance adopted pursuant to the aforementioned provisions, require the removal of all installed residential self-regenerating water softeners, as defined, that discharge to the community sewer system, if the sanitation district makes specified findings and includes them in the ordinance.

The bill would require the sanitation district, prior to the effective date of any ordinance adopted pursuant to those provisions, to make available to owners of residential self-regenerating water softeners within its service area a voluntary program to compensate the resident for 100% of the reasonable value of the removed appliance, and the reasonable cost of the removal and disposal of the appliance, both of which shall be as determined by the sanitation district, as provided. The bill would require the sanitation district, on and after the effective date of any ordinance adopted pursuant to those provisions, to make available to owners of residential self-regenerating water softeners within its service area a program to compensate the resident for 75% of the reasonable value of the removed appliance, and the reasonable cost of removal and disposal of the appliance, both of which shall be determined by the sanitation district, as provided. The bill would provide that any ordinance adopted and approved pursuant to those provisions shall not take effect until January 1, 2009.

The bill would declare that, due to the unique circumstances related to the Santa Clara River Chloride Maximum Daily Load requirements for substantially reduced chloride levels in wastewater discharged by the Saugus and Valencia Reclamation Plans to the Santa Clara River that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

Ch. 394 (SB 559) Torlakson Health facilities: general acute care hospitals: consolidated permits.

Existing law provides for the licensure and regulation by the State Department of Health Services of health facilities, including general acute care hospitals, as defined. Existing law prohibits the department from issuing a single consolidated license to a general acute care hospital that has 2 or more physical plants at more than one site that are more than 15 miles apart unless the hospital meets certain criteria.

This bill would, notwithstanding that prohibition, authorize the Director of Health Services to issue a single consolidated license for a general acute care hospital to Children's Hospital Oakland and the John Muir Medical Center, Concord campus.

Existing law provides for the Medi-Cal program, which is administered by the department and under which qualified low-income persons receive health care benefits, including hospital services. Existing law establishes the Medi-Cal Hospital/Uninsured Care Demonstration Project Act, which revised hospital reimbursement methodologies in order to maximize the use of federal funds consistent with federal Medicaid law to stabilize the distribution of funding for hospitals that provide care to Medi-Cal beneficiaries and uninsured patients.

This bill would require, to the extent permitted by federal law, the adjustment of those payments made pursuant to the act to Children's Hospital Oakland, as prescribed.

The bill would declare that, due to the unique circumstances pertaining to Children's Hospital Oakland and the John Muir Medical Center, Concord campus, that the bill is intended to remedy, a general statute within the meaning of specified provisions of the Constitution cannot be made applicable and a special statute is necessary.

Ch. 395 (SB 1040) Dunn Public postsecondary education: fees and tuition: waiver: survivors of deceased law enforcement and firefighting personnel.

Existing law requires the Regents of the University of California, the Board of Directors of the Hastings College of the Law, and the Trustees of the California State University to excuse the mandatory systemwide tuition and fees of any surviving spouse or surviving child, natural or adopted, of a deceased person who was a resident of the state, who was employed by a public agency, or who was a contractor, or who was an employee of a contractor, as defined, whose principal duties consisted of active law enforcement service or active fire suppression and prevention, and who was killed in the performance of those duties.

Under existing law, a surviving stepchild living or domiciled with the deceased person at the time of his or her death or at any time while that stepchild was a minor, and claimed on a tax form filed by or on behalf of the deceased person also qualifies for the waiver of mandatory systemwide fees or tuition.

This provision is applicable to the Regents of the University of California only if the regents, by resolution, make it applicable.

This bill would instead require that, to be eligible for the waiver of mandatory systemwide fees or tuition under this provision, a surviving stepchild live or be domiciled with the deceased person at the time of his or her death. The bill would also require that the surviving stepchild be claimed on the tax form most recently filed by the deceased person prior to that person's death, or receive 50% or more of his or her support from that deceased person in the tax year immediately preceding the death of the deceased person, or both.

Ch. 396 (SB 1200) Hollingsworth Hunting: commercial hunting club licenses.

Existing law establishes the Department of Fish and Game in the Resources Agency. Existing law authorizes the department to regulate commercial hunting clubs. Existing law requires a person in possession or control of property who imposes or collects a fee for the privilege of taking birds or mammals on that property, or who imposes or collects a fee for any type of entry or use permit that includes the privilege of taking birds or mammals on that property, to obtain a commercial hunting club license from the department, as prescribed. Existing law requires that license to be issued to any person upon the payment of a fee, as specified. Existing law exempts from the application of these provisions any hunting club or program licensed under other provisions of the Fish and Game Code and any person who receives less than \$50 per entrant to the club and an annual total of fees that is less than \$500.

This bill would recast those provisions to require a person, including, but not limited to, a renter or lessee, in possession or control of property on or with respect to which a fee for the privilege of taking birds or mammals is imposed or collected, or on or with respect to which a fee for any type of entry or use permit that includes the privilege of taking birds or mammals on the property is imposed or collected, unless exempted as described above, to

obtain a commercial hunting club license. The bill additionally would exempt from having to obtain a commercial hunting club license any landowner who rents or leases his or her property to a commercial hunting club and is not involved in the operation of the club. The bill also would authorize the department to permit a commercial hunting club that leases or rents more than one property for hunting purposes to submit one application listing each of the properties for which they are seeking a license, but would require the department to assess a separate license fee for each property to be licensed.

Ch. 397 (SB 1270) Chesbro Developmental services: service methods.

Existing law establishes the State Department of Developmental Services and sets forth its duties and responsibilities, including, but not limited to, administration and oversight of the state developmental centers and programs relating to persons with developmental disabilities.

This bill would require the department to provide to regional centers, and make available on the Internet, specified information related to employment options for persons with developmental disabilities. This bill would also require the department, in consultation with regional centers, to assess the need and develop a plan for the training of regional center staff on employment issues faced by persons with a developmental disability.

Existing law requires the development of an individual program plan for an individual with developmental disabilities eligible for regional center services.

This bill would require a regional center, as a part of this plan, to provide information relevant to individuals with developmental disabilities in making informed choices about employment.

Existing law provides for the Developmental Disabilities Program Development Fund to provide resources needed to initiate new programs that are consistent with approved priorities for program development in the state plan.

This bill would instead provide that the fund shall provide resources needed to initiate new programs and to expand or convert existing programs, and would specify that all program development funds shall promote services and supports that increase opportunities for self-determination and independence of persons with developmental disabilities, as specified.

This bill would also require the State Council on Developmental Disabilities, with the support of the department, to convene a workgroup, as specified, that will develop alternative and expanded options for nonresidential services and supports for persons with developmental disabilities. The bill would require the workgroup to develop and submit their recommendation to the Governor and appropriate committees of the Legislature by May 1, 2007, and incorporated into the state plan, thereafter.

Existing law makes regional centers responsible for expanding opportunities for consumers through activities, including, but not limited to, providing technical assistance to and coordinating with, community support facilitators.

This bill would also include providing services of information relevant to making choices about employment options.

This bill would incorporate additional changes in Section 4677 of the Welfare and Institutions Code, proposed by SB 1283 to be operative only if SB 1283 and this bill are both chaptered and become operative effective January 1, 2007, and this bill is chaptered last.

Ch. 398 (SB 1277) Alquist Emergency services and care: reimbursement.

Existing law, the Emergency Medical Services System and Prehospital Emergency Medical Care Personnel Act (EMS Act), establishes the Emergency Medical Services Authority within the California Health and Human Services Agency to provide statewide coordination of local county EMS programs.

Existing law authorizes a county to establish an emergency medical services fund for reimbursement of EMS related costs, and requires each county to establish within its

emergency medical services fund various accounts into which each county is required to deposit funds appropriated by the Legislature for purposes of these accounts, including a Physician Services Account and Hospital Services Account. Existing law authorizes a county to allow the State Department of Health Services to administer the county's emergency medical services fund if the county also elects to have the department administer its medically indigent services program.

Existing law requires a county to adopt a fee schedule to establish a uniform, reasonable, level of reimbursement from the Physician Services Account for reimbursable services provided pursuant to the medically indigent services program.

This bill would require the State Department of Health Services to adopt a single fee schedule to establish a uniform, reasonable, level of reimbursement for use when a county contracts with the state for the administration of the Physician Services Account and the Hospital Services Account. This bill would permit the department to develop, contract for the development of, or adopt by reference, the required fee schedule, and would permit the department to be reimbursed for development or adoption of the fee schedule, as specified. This bill would also permit the department to implement the provisions of the bill by provider bulletins or similar instruction.

#### Ch. 399 (SB 1283) Chesbro Area Boards on Developmental Disabilities.

Existing law, the Lanterman Developmental Disabilities Services Act, requires the State Department of Developmental Services to allocate funds to private nonprofit regional centers for the provision of community services and support for persons with developmental disabilities and their families, and sets forth the duties of the regional centers, including, but not limited to, development of individual program plans and the monitoring of services.

This bill would change from 6 to 7, the length of years within an 8-year period that a member of a regional center governing board may serve.

Existing law provides for the establishment of the State Council on Developmental Disabilities and sets forth its duties and responsibilities, including, but not limited to, development of the California Developmental Disabilities State Plan in accordance with federal law. Existing law establishes the area boards on developmental disabilities under the jurisdiction of the council and sets forth their powers and duties including, but not limited to, assisting the council and advocating for, and protecting the rights of, persons with developmental disabilities.

This bill would require the Governor to appoint a deputy director for area board operations upon the recommendation of the executive director of the council, rather than upon recommendation of the council. The bill would require the Governor to appoint to the council the executive director of the California advocacy agency, as required under federal law, rather than a member of that agency's board of directors. The bill would require the council to request information from regional centers regarding available and needed services and supports at least once every 5 years rather than every 3 years, would require the request to be made in conjunction with the area boards, would specify the information to be considered in making the needs assessment, and would require the council to work collaboratively with the department and the Association of Regional Center Agencies to develop standardized forms and protocols in connection with collecting and reporting this information. The bill would require that the assessment be updated annually, be provided to the department and the Legislature, and be made available to the public. The bill would make other changes of a technical, nonsubstantive nature.

This bill would incorporate additional changes in Section 4677 of the Welfare and Institutions Code, proposed by SB 1270 to be operative only if SB 1270 and this bill are both chaptered and become operative effective January 1, 2007, and this bill is chaptered last.

#### Ch. 400 (SB 1396) Denham Horse racing: licensing.

Existing law sets forth procedures for the application and granting of a license to conduct horse racing meetings.

This bill would state that the withdrawal of an application for a license shall not deprive the California Horse Racing Board of its authority to institute or continue a proceeding against the applicant for the denial of the license upon any lawful grounds, or to enter an order denying the license. The bill would state that the suspension, expiration, or forfeiture of a license issued by the board shall not deprive the board of its authority to institute or continue a disciplinary proceeding against the licensee, as specified.

Existing law requires the board to contract with persons licensed as stewards to perform the duties of stewards at horse racing meets. Under existing law, stewards and other racing officials, while performing their official duties, are entitled to the same rights and immunities granted to public employees. Stewards are not civil service employees.

This bill would similarly require the board to contract for official veterinarians.

#### Ch. 401 (SB 1490) Ducheny Cemetery regulation.

Existing law establishes the Cemetery and Funeral Bureau within the Department of Consumer Affairs and sets forth its powers and duties, including, but not limited to, licensing and regulating a cemetery manger, salesperson, or broker, and requires the bureau to provide specified information about its licensees on its Internet Web site.

This bill would require the bureau to disclose additional information regarding cemeteries on its Internet Web site.

Existing law establishes certain requirements for administration of private endowment care cemeteries and establishes maintenance and investment requirements applicable to the endowment care trust funds.

This bill would require the bureau to adopt regulations that establish minimum standards of maintenance for endowment care cemeteries under its jurisdiction. The bill would require the bureau to obtain information from each of its licensees to determine if the endowment care fund levels of the licensee's cemetery are sufficient to cover the cost of future operation. The bill would require the bureau to report its findings and recommendations to the Legislature by January 1, 2008.

#### Ch. 402 (SB 1577) Romero Schools: accreditation.

(1) Existing law requires a school district governing board to give official notice at a regularly scheduled school board meeting if a public school within the district that has elected to be accredited by the Western Association of Schools and Colleges (WASC) or any other chartered accrediting agency loses its accreditation status. Existing law requires a school district, if a school loses its accreditation status, to notify each parent or guardian of the pupils in the school that the school has lost its accreditation status, in writing, and requires this notice to indicate the potential consequences of the school's loss of accreditation status.

This bill would require this notice to also be posted on the school district's Internet Web site and the school's Internet Web site, if any.

The bill would require a school district that has within its jurisdiction a school that has elected to be accredited by WASC or any other chartered accrediting agency to require that school to publish all results of any inspection of the school by the accrediting agency not later than 60 days after the results are made available to the school. The bill would require publication to be either by notifying each parent or guardian in writing or by posting the information on the school district's Internet Web site or the school's Internet Web site, or by any combination of these methods, as determined by the school district.

Because these requirements would impose additional duties upon school districts and schools, the bill would establish a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 403 (SB 1701) Migden Tidelands and submerged lands: Richardson Bay.

Existing law grants to Marin County certain lands within Richardson Bay to be used for specified purposes in which there is a general statewide interest. Existing law provides that if the lands are not used for the specified purposes within a specified time period, the ownership of the land reverts to the state.

This bill would authorize the State Lands Commission to enter into agreements with Marin County and with private parties that own privately owned tidelands subject to the public trust in Richardson Bay for the sale or exchange of lands, the settlement of boundaries, confirmation of title, and establishment of an agreed ordinary high water mark upon a finding and declaration of specified conditions by the commission. The bill would make legislative findings and declarations regarding the inapplicability of a general statute within the meaning of Section 16 of Article IV of the California Constitution.

Ch. 404 (SB 1733) Aanestad Water quality.

(1) Under existing law, the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board and the California regional water quality control boards are the principal state agencies with authority over matters relating to water quality. The act requires the state board to provide guidance to the regional boards in matters of procedure, to undertake a review of the regional boards' public participation procedures, and to report to the Legislature regarding its findings and recommendations regarding the regional boards' public participation processes. The act, during fiscal years in which funding is provided, requires the state board to provide annual training to regional board members to improve public participation procedures at the regional level.

This bill, during fiscal years in which funding is provided, would also require the state board to provide annual training to regional board members to improve adjudication procedures at the regional level. The bill would make related legislative findings and declarations.

(2) The act imposes civil penalties for certain violations of the act relating to waste discharge requirements. The act authorizes the state board or a regional board, in lieu of assessing specified mandatory minimum penalties against a publicly owned treatment works (POTW) serving a small community, as defined, to elect to require the POTW to spend an equivalent amount towards the completion of a compliance project if the state board or a regional board makes a specified determination.

This bill would revise requirements relating to the determination that the state board or a regional board is required to make before electing to require a POTW serving a small community to spend funds toward the completion of a compliance project, in lieu of imposing mandatory minimum penalties. The bill would revise the definition of "small community" for the purposes of that provision.

Ch. 405 (SB 1847) Committee on Banking, Finance and Insurance Insurance: privacy.

Under current law the Insurance Commissioner investigates certain matters and makes reports to the Legislature by 2001 and 2002.

This bill would repeal those provisions.

Under existing law, if a life agent offers to sell an elder any life insurance or annuity product, the agent must provide a written disclosure, as specified, to the elder.

This bill would add disclosure language, as specified, regarding the Medi-Cal Recovery Program, which may apply to annuities purchased after September 1, 2004.

Under existing law an insurance institution, agent, or insurance-support organization shall not disclose any personal or privileged information about an individual collected or received in connection with an insurance transaction unless the disclosure comes within specified exceptions generally designed to facilitate the legitimate transaction of insurance.

This bill would add an exception to the general rule of nondisclosure when the disclosure is to an insured when the information disclosed is from an accident report, supplemental report, investigative report or the actual report from a government agency or is an exact copy of an accident report or other report which the insured is entitled to obtain under other specified provisions of law.

Existing law requires the Insurance Commissioner and the Department of Insurance to submit various reports to the Governor and the Legislature. Existing law also requires the Insurance Commissioner to submit an annual report to the Governor.

This bill would require, instead, that the information required in those various reports be provided in the commissioner's annual report to the Governor which would also be provided to the Legislature and to the committees of the Senate and Assembly having jurisdiction over insurance.

Existing law requires certain persons to receive instruction in proper methods for estimating the replacement value of structures and provides that others shall not estimate the replacement value of a structure.

This bill would specifically provide that these provisions shall not be construed to preclude licensed appraisers, contractors, and architects from estimating the replacement value of a structure, as specified.

This bill would declare that it is to take effect immediately as an urgency statute. However, only the provisions relating to estimating the replacement value of structures would become operative immediately. The remainder would become operative January 1, 2007.

#### Ch. 406 (AB 87) Bermudez Trapping licenses: exemptions.

Existing law requires every person, other than a fur dealer, who traps fur-bearing mammals or nongame mammals, designated by the Fish and Game Commission or who sells raw furs of those mammals, to procure a trapping license from the Department of Fish and Game.

Existing law provides for the licensing by the Structural Pest Control Board of individuals who practice structural pest control. Existing law also provides for the licensing by the Department of Pesticide Regulation of various persons and businesses who apply pesticides.

This bill would exempt a structural pest control operator licensed by the Structural Pest Control Board and a person or business licensed or certified by the Department of Pesticide Regulation from the licensing requirement for trapping specified mammals, as provided.

#### Ch. 407 (AB 162) Leslie School facilities: Department of General Services: California Community Colleges.

Existing law establishes the public school system in this state. Existing law also establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of school districts and county offices of education, as well as community college districts, and authorizes these districts to provide instruction at public elementary and secondary schools and community college campuses throughout the state.

Existing law requires the Department of General Services to supervise the design and construction of certain school buildings, including elementary and secondary schools, as well as specified community college facilities, to ensure that plans and specifications comply with specified structural safety standards and to ensure that the work of construction has been performed in accordance with the approved plans and specifications, for the protection of life and property. Existing law also requires the department to pass upon and approve or reject all plans for the construction of, and in some cases, the alteration of, any school building subject to those provisions, and to inspect the school buildings and work of construction or

alteration to an extent that in its judgment is necessary or proper for the enforcement of these requirements and the protection of the safety of the students, the instructors, and the public. Existing law requires the department to take specified action, as necessary, to expedite review of the applicant's plans. These requirements are part of the body of law known as the Field Act.

This bill would require the department, as it deems necessary to expedite review of the applicant's plans, to make a good faith effort to hire state employees. The bill would require the department to establish procedures and requirements governing the use of the collaborative process for project development and review, as an alternative to the traditional plan review and approval process, to ensure the public safety of school buildings serving kindergarten and grades 1 to 12, inclusive, as well as community college buildings, through a collaborative, consistent, and timely project development and review process. The bill would require the department, in consultation with participating school districts and community college districts, to establish mutually determined timeframe goals for a project's plan review, district and consultant response, response review, and final approval. The bill would require the timeframe goals to reflect the project's estimated construction cost, complexity, and size, and other requirements of the collaborative process for project development and review.

The bill would require the department to establish model statewide timeframe goals by February 1, 2007, and to submit a preliminary report to the Legislature by July 1, 2008, and a final report by July 1, 2009, that address whether the implementation of the collaborative process for project development and review has assisted the department, the school districts, and the community college districts in meeting their timeframe goals.

The bill would authorize the department to establish a procedure for the payment and collection of a specified filing fee that would be imposed by the department in connection with the submission of an application for the collaborative process for project development and review. The bill would authorize the department to assess a fee on a participating district to cover the unreimbursed costs of the department incurred pursuant to that district's participation in the collaborative process if the department deems the assessment of the fee to be necessary for the support of its operations and establishes a procedure for the determination, payment, and collection of the fee. The bill would authorize the proceeds of the fee to be paid into the State Treasury and credited to the continuously appropriated Public School Planning, Design, and Construction Review Revolving Fund, and thus the bill would make an appropriation.

The bill would establish alternative procedures pursuant to which the department, at its discretion, may advertise and award contracts for a qualified plan review firm for assistance in performing the plan review required by existing law. Under these alternative procedures, the bill would authorize the department to request statements of qualifications from interested plan review firms. The bill would require the department to announce the statements of qualifications through specified means, and would require those statements to describe the general scope of services to be provided within each generic project category for plan review services that the department anticipates may be awarded during the period covered by the announcement. The bill would require the department to evaluate the statements of qualifications and develop a list of qualified firms that meet certain requirements. The bill would require the department to contact firms on a rotational basis to distribute the work in a fair and equitable manner and to determine that the firm has sufficient staff and is available for the performance of the project. Upon selecting a qualified firm, the bill would require the department to negotiate a contract for the services that includes a price and timeframe that it determines to be fair and reasonable.

The bill would also make various nonsubstantive technical and conforming changes.

Ch. 408 (AB 368) Evans Technical Education: equipment: sales.

Existing law establishes various programs for vocational and career technical education in the public schools.

This bill would require the State Department of Education to develop and maintain a registry of career technical education equipment that is listed for sale and make the registry accessible to school districts via an Internet Web site. The bill would authorize a school district that intends to offer for sale any career technical education equipment, including table saws, drafting equipment, or auto diagnostic tools, to list the equipment in the registry established by the department. The bill would require the equipment listed in the registry to be offered for sale in the first instance to other school districts and maintained in the registry for a period of no less than 4 months unless the equipment is purchased, as specified. The bill would require on or before March 1, 2010, the Legislative Analyst to report to the Legislature on the efficacy of the registry and would authorize the Legislative Analyst to submit the report to the Legislature by including it in its annual analysis of the Budget Bill.

The bill would repeal those provisions on January 1, 2012.

Ch. 409 (AB 393) Frommer Agriculture: California Walnut Commission.

Existing law provides for the creation of the California Walnut Commission.

This bill would define “handle,” “handling,” “marketing research,” and “pack” for the purpose of these provisions, would change various references from “market” to “handle,” and would make other conforming changes.

This bill would delete provisions relating to the nomination and election of persons to the committee by producers who are not affiliated with any cooperative handling walnuts, independent producers, and cooperative handlers, as specified.

Existing law provides that the marketing year or fiscal year for the purpose of these provisions means the period of August 1, of any year to July 31, inclusive, of the next year.

This bill would instead provide that, beginning September 1, 2008, this period runs from September 1, of any year, to August 31, inclusive, of the next year.

Existing law provides that the commission shall be composed of 13 members, including producers who are not handlers or producer-handlers, and walnut producer-handlers.

This bill would delete the term “producer-handler” from these provisions and make other conforming changes, as specified.

This bill would specify additional duties for the executive committee of the commission for the 2006 marketing year.

Existing law provides that implementation of the provisions relating to the California Walnut Commission shall depend upon the outcome of a referendum vote of walnut producers. Existing law provides that the vote of any nonprofit agricultural cooperative marketing association authorized by members shall be considered as being the approval or rejection of those members.

This bill would remove provisions permitting a nonprofit agricultural cooperative marketing association to vote on behalf of its members.

Existing law relating to the California Walnut Commission provides that any cooperative handler who represents at least 30% of the producers shall be subject to specified rights and responsibilities, including serving on the commission as the cooperative handler member and being entitled to select 4 producers and one producer-handler who are affiliated with the handler to serve on the commission.

This bill would remove these provisions.

Existing law provides that these provisions shall be continued in existence if, after holding a hearing that shall occur every 6 years, the secretary finds that a substantial question exists among producers whether it should continue and a referendum is held at which a majority of producers vote in favor of its continuance.

This bill would remove the distinction between producers who are not affiliated with a cooperative handling walnuts and those who are, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 410 (AB 594) Karnette Personal property: rental-purchase agreements.

(1) Existing law defines and regulates the terms of personal property rental-purchase agreements. Existing law requires that the lessor in a rental-purchase agreement maintain records that establish that the price disclosed as the cash price of the rental property is the same as the cash price required by law. Existing law specifies certain items that may be evidence of the cash price of new rental property for these purposes. Existing law provides that any willful violation of these provisions is a misdemeanor.

This bill would revise and recast provisions relating to personal property rental-purchase agreements. The bill would redefine “cash price” for these purposes and would establish definitions of “lessor’s cost” and “total of payments,” among others. The bill would revise disclosures contained in rental-purchase agreements and add new provisions that would be prohibited from appearing in these agreements. The bill would provide a consumer the right to acquire ownership of property that is the subject of a rental-purchase agreement within 3 months of the execution of the agreement by tendering a specified amount, and would require the lessor of the property to notify the consumer of this right within 10 days of executing the agreement, as specified. The bill would limit the maximum cash prices, pursuant to certain formulas, that a lessor would be permitted to charge on a first rental of property, and second and subsequent rentals, and would limit the maximum total of payments in relation to these cash price limits. The bill would also include provisions intended to make specified sections revised by the bill apply, as specified. By changing the definition of a crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 411 (AB 861) Bass Barbering and cosmetology: licensure.

Under existing law, the State Board of Barbering and Cosmetology licenses and regulates the practice of barbering and cosmetology. Existing law authorizes the board to deny, suspend, or revoke a license for specified reasons. Existing law requires the board in certain circumstances to provide a notice to a person that states the board’s reason for denying the license, and to comply with other requirements upon denying a license to an applicant. Existing law also requires the board to conduct a hearing within 60 days of an applicant’s request for a hearing.

This bill would require the board to give specified additional information to a person who has been denied a license. The bill would require the board to conduct a hearing within 90 days of receiving an applicant’s request for a hearing for a license denial, and for all other hearings, would authorize the board to determine when the hearing shall be conducted. The bill would authorize the board to issue a probationary license to an applicant, subject to specified terms and conditions. The bill would also require the board to study the effects of law, regulations, and policy that may create unnecessary barriers to employing people with criminal records, and would require the board to report its findings to the Legislature on or before September 1, 2007.

Ch. 412 (AB 1122) Wyland Auto insurance: total loss.

Under existing law, following a total loss settlement on a total loss salvage vehicle and receipt of a certificate of ownership or other evidence of title, the license plates, and a specified fee, the Department of Motor Vehicles is required to issue a salvage certificate for the vehicle.

This bill would authorize an insurance company, an occupational licensee of the department authorized by the insurance company, or a salvage pool authorized by the insurance company, that is unable to obtain a properly endorsed certificate of ownership or other evidence of ownership within 30 days following oral or written acceptance by the

owner of an offer of an amount in settlement of a total loss, on a form provided by the department and signed under penalty of perjury, to request the department to issue a salvage certificate for the vehicle. The request would be required to include and document that the requester has made at least 2 written attempts to obtain the certificate of ownership or other acceptable evidence of title.

The bill would require the department to issue a salvage certificate upon receipt of a properly executed request, the license plates, and the fees.

Because this bill would expand the scope of the crime of perjury, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 413 (AB 1433) Emmerson Pupil health: oral health assessment.**

Existing law requires the governing board of any school district to make rules for the physical examination of pupils that will ensure proper care of the pupils and proper secrecy with regard to any defect noted. Existing law allows the parent or legal guardian having control or charge of any child enrolled in a public school to file annually a statement in writing, signed by the parent or legal guardian, that he or she will not consent to an examination of his or her child. Existing law exempts a child from physical examinations once such a statement is filed with the principal.

This bill would require a pupil, while enrolled in kindergarten in a public school, or while enrolled in first grade in a public school if the pupil was not previously enrolled in kindergarten in a public school, to present proof, no later than May 31 of the school year, of having received an oral health assessment by a licensed dentist or other licensed or registered dental health professional operating within his or her scope of practice that was performed no earlier than 12 months prior to the date of the initial enrollment of the pupil. The bill would excuse a parent or legal guardian from complying with the above requirement by indicating on a specified form that the oral health assessment could not be completed because of one or more specified reasons. The bill would require public schools to send a notification of the assessment requirement to the parent or legal guardian of the pupil subject to that requirement, including a standardized form that can be used for an assessment or on which the parent or legal guardian can indicate one of several specified reasons why an assessment cannot be completed. The bill would require all public schools, after receiving completed assessments, and by December 31 of each year, to send a report, as specified, to the local health officer of the county office of education in which the school is located. The bill would not preclude a school district or county office of education from developing a schoolsite-based oral health assessment to comply with these provisions. The bill would require the Office of Oral Health of the Chronic Disease Control Branch of the State Department of Health Services to conduct an evaluation of the requirements imposed by the bill and prepare and submit a report to the Legislature by January 1, 2010, that discusses any improvements in the oral health of children resulting from the imposition of those requirements. The bill would authorize the Office of Oral Health to receive private funds and contract with the University of California to fulfill those duties.

By requiring public schools to perform additional duties, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The bill would require that funds from a specified item of the Budget Act of 2006 be used to offset any reimbursement to local educational agencies provided pursuant to those provisions regarding costs mandated by the state pursuant to the bill.

Ch. 414 (AB 1667) Saldana Pupil health: individuals with exceptional needs: specialized physical health care services.

Existing law provides that any individual with exceptional needs who requires specialized physical health care services, as defined, during the regular schoolday, may be assisted by certain specified individuals.

This bill would, instead, provide that any individual with exceptional needs who requires specialized physical health care services, during the regular schoolday, may be assisted by certain specified individuals, including designated school personnel, as provided.

The bill would declare the intent of the Legislature that none of the provisions of the bill cause the placement of individuals with exceptional needs at schoolsites other than those they would attend but for their needs for specialized physical health care services.

The bill would also make technical, nonsubstantive changes to those provisions.

Ch. 415 (AB 1681) Pavley Lead-containing jewelry.

Existing hazardous waste control laws regulate the disposal of discarded appliances, lead acid batteries, small household batteries, recyclable latex paint, and household hazardous waste, except as provided in the hazardous waste control laws and regulations. The Department of Toxic Substances Control (department) is required to enforce those hazardous waste control laws. Existing law provides for the Hazardous Waste Control Account in the General Fund and authorizes the funds deposited in that account to be expended, upon appropriation by the Legislature, for specified purposes, including the administration and implementation of the hazardous waste control laws by the department.

This bill would prohibit a person, on and after March 1, 2008, from manufacturing, shipping, selling, or offering for sale jewelry for retail sale in the state, unless the jewelry is made entirely from specified materials. The bill would also prohibit any person, on and after September 1, 2007, from taking those actions with regard to children's jewelry, as defined, unless the children's jewelry is made entirely from certain specified materials.

The bill would also prohibit a person, on and after March 1, 2008, from manufacturing, shipping, selling, or offering for sale body piercing jewelry, as defined, for retail sale in the state unless it is made from specified materials.

The bill would provide that a party to a specified amended consent judgment or to a consent judgment entered in a specified consolidated action is deemed to be in compliance with the bill's provisions, and would require any action brought against that party to be subject to the amended consent judgment.

The bill would exclude a person who violates these prohibitions from the criminal penalties imposed pursuant to the hazardous waste control laws and would instead provide that a person who violates those prohibitions would be liable for a civil penalty not to exceed \$2,500 per day for each violation. The bill would require all civil penalties collected be deposited in the Hazardous Waste Control Account, for expenditure by the department, upon appropriation by the Legislature, to implement and enforce those prohibitions.

The bill would specify the testing methods and protocols for determining compliance with these prohibitions and would authorize the department to adopt regulations that modify these testing protocols as it deems necessary to further the purposes of the bill.

Ch. 416 (AB 1992) Canciamilla Solid waste: dumping.

(1) Existing law provides that a person who places, deposits, or dumps, or who causes to be placed, deposited, or dumped, or who causes or allows to overflow, sewage, sludge, cesspool or septic tank effluent, or accumulation of human excreta, or garbage, in or upon specified public property, or upon private property into or upon which the public is admitted

by easement, license, or otherwise, is guilty of a misdemeanor. Existing law provides that this prohibition does not apply to the placing, depositing, or dumping of garbage upon private property by the owner, or a person authorized by the owner, of the private property, except that such action is prohibited from creating a public health and safety hazard or a fire hazard, as determined by specified entities. Existing law defines "garbage" for these purposes. Existing law requires a state fish and game warden, city police officer, sheriff, sheriff's deputy, and other peace officers of the state, to enforce these provisions.

This bill would repeal the definition of garbage and instead use the term "solid waste," as the bill would define that term. The bill would provide that the placing, depositing, dumping, or overflow of solid waste and the other described substances on private property, without the owner's consent, rather than, into or upon private property which the public is admitted by easement, license, or otherwise, is a misdemeanor. The bill would prohibit placing, depositing, or dumping of solid waste upon private property by the owner or a person authorized by the owner, of the private property, from creating a nuisance, as determined by specified entities. The bill would include in the list of entities that determine whether the placing, depositing, or dumping of solid waste is a public health and safety hazard, nuisance, or fire hazard, a local enforcement agency. If AB 1688 is enacted and becomes effective on or before January 1, 2007, the bill also would include in the list of persons who are required to enforce these provisions, a person regularly employed as an investigator or inspector for illegal dumping enforcement, as specified. Because the bill would change the definition of a crime, the bill would impose a state-mandated local program.

(2) Existing law provides that it is an infraction for a person to dump or cause to be dumped waste matter or other specified matter in or upon specified public or private property, or for a person to litter or cause to be littered in or upon public or private property, and imposes a range of specified fines for a first, 2nd, or 3rd or subsequent conviction for violating those provisions, as specified.

This bill would revise the conditions with regard to the dumping of materials upon a road or highway, and would increase some of those fines, as specified.

(3) Existing law imposes a range of specified fines for a first, 2nd, or 3rd or subsequent conviction for littering or dumping of waste matter into specified bodies of water or property adjacent to a body of water, as specified.

This bill would increase some of those fines, as specified.

(4) Existing law provides for a reward for information leading to the arrest and conviction of a person for unlawful dumping of waste on specified public or private property, or for the unlawful shooting of a firearm from or upon a public road or highway.

This bill would, in addition, reward a person for giving information leading to the arrest and conviction of a person for the malicious release of a substance capable of causing substantial harm to the operation of a public sewer sanitary facility or littering.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 417 (AB 2182) Mullin Property taxation: assessment.

Existing law requires the State Board of Equalization to prescribe rules and regulations regarding the assessment of property for purposes of property taxation.

This bill would require the State Board of Equalization, if funds are appropriated for this purpose, to conduct a study in consultation with the California Assessors' Association and industry representatives regarding the property tax assessment factors used to value nonproduction computers, semiconductor manufacturing equipment, and biopharmaceutical industry equipment and fixtures. To the extent the board conducts these studies, this bill would also require the board to publish revised valuation factors. However, if the board determines that an update is not warranted after reviewing the data, this bill would

provide that the existing factors shall remain in effect. This bill would establish a rebuttable presumption that the full cash value of nonproduction computers, semiconductor manufacturing equipment, and biopharmaceutical industry equipment and fixtures is the value determined using the assessment factors published by the board after the study. This bill would also provide that the assessor or the taxpayer may overcome the presumption, as specified. This bill would also specify that this presumption does not apply after 6 years, unless the assessment factors are reviewed by the board.

Ch. 418 (AB 2318) Calderon Repossessors.

(1) Existing law, the Collateral Recovery Act, provides for the licensing and regulation of repossession agencies by the Department of Consumer Affairs. Existing law sets forth a procedure for the removal, inventory, and storage of personal effects from repossessed collateral. Existing law requires a licensee to prepare an inventory of the personal effects and to label and store the personal effects as specified for a minimum of 60 days in a secure manner.

This bill would require the licensee to note on the inventory if it cannot be determined whether the property is a personal effect or a part of the collateral. The bill would provide that, in this circumstance, the licensee or its agent would not be obligated to remove the item from the collateral, unless the item can be removed without the use of tools. The bill would also require a licensee or its agent to notify a debtor that if the debtor takes the position that an item is a personal effect, then the debtor is required to contact the legal owner to resolve the issue.

(2) Existing law authorizes the Director of Consumer Affairs to assess administrative fines against any repossession agency licensee, qualified certificate holder, or registrant for specified prohibited acts, such as, but not limited to, failing to register registrants within 15 days. Under existing law, the fine is \$25 dollars for each of the first 2 violations and \$100 for each subsequent violation.

This bill would raise these fines to \$250 for each of the first 2 violations and \$1000 for each subsequent violation. The bill would specify that the money attributable to these administrative fines shall not be continuously appropriated.

(3) Existing law provides that a peace officer or, in certain other cases, a magistrate, may cause the removal and seizure of a vehicle, as specified. Existing law provides that a vehicle so seized may be impounded for 30 days. Under existing law, a vehicle removed and seized may be released to the legal owner or the legal owner's agent prior to the end of 30 days' impoundment, if certain conditions are met, including, but not limited to, the requirement that the legal owner or the legal owner's agent present either a lawful assignment, as defined, or an affidavit of repossession for the vehicle, and a security agreement or title showing proof of legal ownership for the vehicle.

This bill would instead require the legal owner or the legal owner's agent to present a copy of the assignment, as defined, and any one of the following: a certificate of repossession for the vehicle, a security agreement for the vehicle, or title showing proof of legal ownership for the vehicle.

(4) Existing law defines assignment, among other things, as a written authorization by the legal owner, lienholder, lessor or lessee to skip trace, locate, or repossess or to collect money payment in lieu of repossession of, any collateral, including, but not limited to, collateral registered under the Vehicle Code that is subject to a security agreement that contains a repossession clause.

This bill would specify that an assignment also means, among other things, a written authorization by the agent of any of those persons, to take any of those actions with respect to any collateral. The bill would make technical, nonsubstantive, and conforming changes.

Ch. 419 (AB 2557) Huff Transportation.

(1) Existing law permits the State Air Resources Board to adopt a regulation to prohibit the sale and registration of a new motor vehicle certified by the state board, to which there has not been conspicuously affixed on the driver's side window or, if it cannot be so placed, to the windshield, a decal disclosing specified emissions information.

This bill would instead permit that regulation when the specified decal has not been conspicuously affixed on a side window to the rear of the driver, or if it cannot be so placed, to the windshield.

(2) Existing law defines the term "registration service" for purposes of the Vehicle Code and excludes from that definition certain activities.

This bill would exclude from the definition of "registration service" the acts by an employee of one or more dealers or dismantlers, or a combination thereof, when performing transactions on behalf of a qualified private industry partner that is in compliance with the Department of Motor Vehicles Business Partner Automation Program, as specified.

(3) Existing law imposes liability upon a person who willfully or negligently damages a street or highway, or its appurtenances, including, but not limited to, guardrails, signs, traffic signals, snow poles, and similar facilities for the reasonable cost of the repair or replacement of those facilities.

This bill would specify that for a person who willfully damaged or destroyed a memorial sign placed by the Department of Transportation, the amount of liability is the actual replacement or repair cost, whichever is applicable, or \$1,500, whichever amount is highest.

**Ch. 420 (AB 2630) Benoit Grade separation project funding.**

Existing law requires the Public Utilities Commission to adopt a priority list for railroad-highway grade separation projects and requires the California Transportation Commission to allocate available funding to projects pursuant to that priority list. Existing law generally limits to \$5,000,000 an allocation to a single project; except that if the project meets certain criteria it may receive an allocation up to \$20,000,000. Existing law prohibits an agency that receives an allocation pursuant to that exception from receiving an allocation for another project pursuant to that exception for a period of 10 years.

This bill would provide that an agency that receives an allocation pursuant to that exception may be eligible for an allocation for another project if the Department of Transportation determines that funds are available for allocation.

**Ch. 421 (AB 2675) Strickland Community care facilities: continuing education: online courses.**

Existing law, the California Community Care Facilities Act and the California Residential Care Facilities for the Elderly Act, provides for the licensing and regulation by the State Department of Social Services of community care facilities, including group homes and adult residential facilities, and residential care facilities for the elderly. The act requires administrators of group home facilities, adult residential facilities, and residential care facilities for the elderly to successfully complete department-approved certification programs prior to employment. Certificates issued under these provisions are required to be renewed every 2 years, and renewal is conditional upon the certificate holder submitting documentation of completion of 40 classroom hours, in the case of group home administrators, and 40 hours, in the case of adult residential facility and residential care facilities for the elderly administrators, of continuing education related to specified areas of knowledge. The act allows the department to inspect these certification training programs and continuing education courses to determine if content and teaching methods comply with regulations. A violation of the provisions regulating community care facilities and residential care facilities for the elderly is a crime.

This bill would provide, with respect to group homes, adult residential facilities, and residential care facilities for the elderly, that no more than one-half of the required 40 hours of continuing education necessary to renew the above certificates may be satisfied through

online courses. It would require all other continuing education hours to be completed in a classroom setting. It would require a vendor of online continuing education programs for these certificates related to group homes and adult residential facilities, with a specified exception, to ensure that each online course contains certain elements, including a final screen displaying a printable statement, to be signed by the participant, certifying that the identified participant completed the course. The bill would provide that a false certification on this screen regarding any material matter would be a misdemeanor. By creating a new crime, the bill would impose a state-mandated local program. The bill would allow the department to conduct inspections of these certification training programs and continuing education courses, including online courses, at no charge to the department.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 422 (AB 2685) Cogdill Sport fishing: license revenues: reports.

Existing law specifies that all moneys collected under the provisions of the Fish and Game Code are deposited into the Fish and Game Preservation Fund, unless otherwise provided. Existing law provides that, of the moneys collected from fees for lifetime sportsman's licenses, lifetime hunting licenses, and lifetime sport fishing licenses,  $33\frac{1}{3}\%$  of the fees derived from the issuance of all sport fishing licenses, with a specified exception, is to be deposited into the Hatchery and Inland Fisheries Fund to be used, upon appropriation, to support programs related to the management, maintenance, and capital improvement of fish hatcheries, the Heritage and Wild Trout Program, and other eligible activities. Existing law requires the Department of Fish and Game, by July 1, 2008, and biennially thereafter, to report to the Legislature on the implementation of those provisions relating to the revenue generated by sport fishing license fees.

This bill would instead require the department to report, by July 1, 2008, and annually thereafter, on the provisions relating to the revenue generated by sport fishing license fees.

Ch. 423 (AB 2715) Sharon Runner Government.

Existing law authorizes an agency, as defined, that creates a state tax lien, as defined, with respect to real property to record notice of that lien with the county recorder. Existing law authorizes an agency creating a state tax lien with respect to personal property to file a notice of that lien with the Secretary of State.

This bill would authorize the transmission, recording, and indexing of notices of these liens and related documents by electronic or magnetic means, as provided.

Existing law requires a county board of supervisors, upon request of the county assessor or sheriff, to contract with legal counsel to assist the assessor or sheriff with duties for which the assessor or sheriff would have a conflict of interest.

This bill would apply this requirement to matters brought after an assessor or sheriff leaves office if certain conditions are met. By requiring county boards of supervisors to contract for legal counsel under these conditions, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 424 (AB 2770) Wyland Precinct vote results.

Existing law requires elections officials to keep an accurate list of all voters who have received and voted an absentee ballot at each election, as specified.

This bill would require that, for any statewide election or certain special elections, votes cast by absentee ballot and votes cast at the polling place be tabulated by precinct. By imposing additional duties upon county elections officials, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

**Ch. 425 (AB 2804) Salinas Air resources: Sacramento Metropolitan Air Quality Management District.**

(1) Existing law establishes the Sacramento Metropolitan Air Quality Management District, and provides for its governance by a district board with specified membership and duties.

This bill would require that each member of the Sacramento district board receive actual and necessary expenses incurred in the performance of board duties, and would authorize these members to receive compensation, to be determined by the Sacramento district board, not to exceed \$100 for each day attending the board meetings and committee meetings of the board, or upon authorization of the board, while on official business of the district. The bill would prohibit this compensation from exceeding \$6,000 in any one year. The bill would require the compensation authorized pursuant to the bill to be fixed by ordinance. Because the bill would create new duties for the Sacramento district, it would constitute a state-mandated local program.

(2) An existing provision of the California Constitution requires that a local or special statute is invalid in any case where a general statute can be made applicable.

This bill would express the finding and declaration of the Legislature that, due to the unique circumstances relating to the Sacramento district, a general statute cannot be made applicable and the enactment of the above is therefore necessary.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 426 (AB 2914) Leno Limited liability partnerships: architecture.**

Existing law, the Uniform Partnership Act of 1994, authorizes the formation of foreign limited liability partnerships and registered limited liability partnerships to engage in the practice of architecture. This provision is repealed as of January 1, 2007. Existing law requires that every registered limited liability partnership and foreign limited liability partnership provide specified security for claims arising out of the practice of architecture. Under existing law, the total aggregate limit of liability under the policy or policies of insurance or the amount of security required to be provided by those partnerships providing architectural services is \$100,000 multiplied by the number of licensed persons, but not less than \$500,000 and not more than \$5,000,000.

This bill would extend the repeal date to January 1, 2012. This bill would provide that, on and after January 1, 2008, the total aggregate limit of liability under the policy or policies of insurance or the amount of security for those partnerships providing architectural services with 5 or fewer licensed persons shall be \$1,000,000, and for partnerships with more than

5 licensees, shall be an additional \$100,000 for each additional licensee, up to the \$5,000,000 maximum.

This bill would incorporate additional changes to Section 16101 of the Corporations Code, proposed by AB 339, to be operative only if AB 339 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

Ch. 427 (AB 2945) Spitzer Open meetings: multijurisdictional law enforcement agencies.

Existing law authorizes the legislative or advisory body of a multijurisdictional drug law enforcement agency to hold a closed session to discuss the case records of any ongoing criminal investigation, to hear testimony from persons involved in the investigation, and to discuss courses of action in particular cases. Existing law defines "multijurisdictional drug law enforcement agency" for these purposes as a joint powers entity, formed pursuant to specified provisions of existing law, which provides drug law enforcement services for the parties to the joint powers agreement.

This bill would redesignate a multijurisdictional drug law enforcement agency as a multijurisdictional law enforcement agency, and would permit a multijurisdictional law enforcement agency to instead hold a closed session to discuss any ongoing criminal investigation of that agency. This bill would also define a multijurisdictional law enforcement agency as a joint powers entity, as specified, that provides law enforcement services for the parties to the joint powers agreement for the purpose of investigating criminal activity involving drugs; gangs; sex crimes; firearms trafficking or felony possession of a firearm; high technology, computer or identity theft; human trafficking; or vehicle theft.

This bill includes legislative findings that any limitation on the public's right of access made by this bill is necessary to serve the public interest.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 428 (AB 2962) Benoit Taxation: real estate withholding requirements.

Existing law requires the transferee of a California real property interest, in specified circumstances, to withhold  $3\frac{1}{3}\%$ , for income tax purposes, of the sales price of the property when the property is acquired from either an individual or a corporation, as specified.

This bill would, at the election of the transferor pursuant to a certification made under penalty of perjury, as provided, require withholding of the amount certified by the transferor, but not less than the gain required to be recognized under the Corporation Tax Law or the Personal Income Tax Law, as provided. By requiring a certification under penalty of perjury, this bill would create a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 429 (AB 3020) Montanez Real estate: time-share developments.

Existing law, the Vacation Ownership and Time-share Act of 2004, requires time-share developers and exchange companies to disclose certain information to purchasers and prospective purchasers of time-share plans and exchange programs, as defined, and requires specified time-share plans offered for sale in this state or created and existing in this state to comply with specified fee, registration, notice, and disclosure requirements with respect to oral and written communications, including the issuance of a public report by the Real Estate Commissioner.

This bill would require any person offering to sell or lease any interest in a time-share interest or time-share plan to make a copy of specified documents available for a prospective purchaser or examinee and give a copy of those documents to each purchaser or lessee as soon as practicable before the transfer of the interest being acquired. The bill would specify

when regular and special assessments are delinquent, the costs that may subsequently be charged, and how an association shall provide notice of any increase in a regular or special assessment. The bill would make other related changes.

Existing law requires an estimated operating budget for the time-share plan to be filed with the commissioner and requires it to include a certification by an expert in the preparation of time-share plan budgets, including, at the discretion of the Real Estate Commissioner, a qualified individual or entity.

This bill would prohibit the acceptance of an individual or entity for purposes of obtaining this certification from being considered an endorsement by the commissioner of a proposed budget.

The bill would require a developer to certify the budget in a specified manner and submit the certified budget to the commissioner. The bill would authorize the commissioner to review a budget to confirm the accuracy of the certification if the budget is not certified by an independent certified public accountant or an employee of the developer who is a licensed certified public accountant.

Existing law obligates the developer for expenses associated with unsold inventory held by the developer and requires the developer to furnish assurances that the obligation will be fulfilled.

This bill would authorize the amount of the assurance to be adjusted annually and would specify the maximum amount by which it may be adjusted. If the developer is paying a buy down subsidy, the bill would require the developer to provide an additional assurance in an amount acceptable to the commissioner, but not more than a specified amount.

The bill would also require for any buy down subsidy agreements entered into after July 1, 2005, and for the assurances required by the developer under these provisions, that any dispute between the developer and the association with respect to the satisfaction of the conditions for exoneration or release of the security, at the request of either party, be submitted to arbitration, as specified.

The bill would also provide that the assurances required by the developer under these provisions be subject to specified escrow instructions.

This bill would declare that it is to take effect immediately as an urgency statute, but would delay the operation of specified provisions.

#### Ch. 430 (SB 1349) Soto Animal fighting exhibitions.

Existing law generally prohibits persons from causing or permitting specified animals to engage in fighting, and prohibits owning or training specified animals for those purposes. Existing law provides that these offenses are misdemeanors with various penalties, and that subsequent violations of these provisions are misdemeanors with additional specified penalties.

This bill would increase the penalties for the misdemeanors and would provide that subsequent violations of these provisions shall be misdemeanors or felonies with prescribed penalties. The bill would make related legislative findings.

By changing the definition of existing crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 431 (SB 1806) Figueroa Animals: abuse.

Existing law provides that any person who subjects any animal to needless suffering, or inflicts unnecessary cruelty upon an animal, or in any manner abuses any animal or fails to provide an animal with proper food, drink, or shelter or protection from the weather is guilty

of a crime punishable by a fine not exceeding \$20,000, imprisonment in a county jail, imprisonment in the state prison, or both fine and imprisonment.

This bill would state findings and declarations regarding the consequences of leaving companion animals unattended inside closed vehicles in the heat. This bill would provide that leaving or confining an animal in any unattended motor vehicle under conditions that endanger the health or well-being of an animal due to heat, cold, lack of adequate ventilation, or lack of food or water, or other circumstances that could reasonably be expected to cause suffering, disability, or death to the animal is a crime punishable by a fine, imprisonment in a county jail, or both fine and imprisonment, as specified. Because this bill would create a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 432 (AB 2190) Benoit Vehicles: reckless driving and motor vehicle speed contests.

(1) Existing law requires a person convicted of reckless driving that proximately causes great bodily injury, as defined, to a person other than the driver, who has previously been convicted of a violation of one of specified provisions related to reckless driving, motor vehicle speed contests, and driving under the influence of an alcoholic beverage or drug or the combined influence of an alcoholic beverage and drug, to be punished by imprisonment in the state prison, by imprisonment in a county jail for not less than 30 days nor more than 6 months, or by a fine of not less than \$220 nor more than \$1,000, or by both the fine and imprisonment.

This bill would require a person convicted of reckless driving that proximately causes one or more of various specified injuries to a person other than the driver to be punished in the same manner. By creating a new crime, the bill would impose a state-mandated local program.

(2) Existing law requires that if a person is convicted of engaging in a motor vehicle speed contest on a highway for an offense that occurred within 5 years of the date of a prior offense that resulted in a conviction for engaging in a motor vehicle speed contest on a highway, and the perpetration of the most recent offense proximately causes serious bodily injury, as defined, to a person other than the driver, the convicted person to be imprisoned in the state prison, or in a county jail for not less than 30 days nor more than one year, and by a fine of not less than \$500 nor more than \$1,000.

This bill would require a person convicted of engaging in a motor vehicle speed contest that proximately causes one or more of various specified injuries to a person other than the driver to be punished by imprisonment in the state prison, or by imprisonment in a county jail for not less than 30 days nor more than 6 months, or by a fine of not less than \$500 nor more than \$1,000, or by both that fine and imprisonment. By creating a new crime, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 433 (SB 1542) Migden Vehicles: key information access.

(1) Existing law imposes various requirements upon manufacturers of motor vehicles sold or leased in this state with regard to disclosing information and providing equipment. A violation of the laws regulating motor vehicles is a crime.

This bill would require a motor vehicle manufacturer of a new motor vehicle sold or leased in this state on or after January 1, 2008, except as specified, to provide a means whereby the

registered owner of that motor vehicle or a family member, through a registered locksmith, can access information, and only that information, that is necessary to permit the production of a replacement key or other functionally similar device, by a registered locksmith, that will allow the registered vehicle's owner or family member to enter, start, and operate the vehicle. The bill would require a vehicle manufacturer to retain and make the information available for at least 25 years from the date of manufacture. The bill would exempt a make that sold fewer than 2,500 vehicles in the prior calendar year in the state from this requirement. The bill would exempt, until January 1, 2013, a vehicle line of a motor vehicle manufacturer that sold between 2,500 and 5,000 vehicles in the prior calendar year from this requirement.

This bill would require the registered locksmith to follow certain identity and vehicle verification procedures before he or she could request the information from the manufacturer, to turn over certain information to the registered owner or family member, and to destroy all information accessed from the manufacturer after completing the reproduction of the key or other functionally similar device. A manufacturer would be required to make this information available by telephone or electronically 24 hours a day and 7 days a week and to retain this information for at least 25 years from the date of manufacture. A manufacturer would also be required to include a security process to verify the identity of the registered locksmith.

Since a violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 434 (AB 2923) Calderon Crimes: graffiti and vandalism: driver's license.

Existing law requires a court to suspend for one year or delay for one year the driving privilege of a person convicted of committing specified acts of graffiti or vandalism, except as specified.

This bill instead would require a court to suspend that driving privilege for not more than 2 years. The bill also would require, that where the person convicted does not yet have the privilege to drive, the court is required to delay that driving privilege for not less than one year nor more than 3 years.

#### Ch. 435 (SB 1308) Battin Bribery.

Existing law subjects a person who offers to give a bribe to a Member of the Legislature or a person on the member's behalf, or who attempts through specified corrupt means to influence the vote of a member, to imprisonment in the state prison.

This bill would, in addition, subject a person who offers to give a bribe to any member of the legislative body of a city, county, city and county, school district, or other special district, or a vote on the member's behalf, or who attempts through specified means to influence the vote of any member of a legislative body of a city, county, city and county, school district, or other special district, to imprisonment in the state prison.

Existing law subjects any Member of the Legislature who asks for or receives a bribe in exchange for influence over his or her official action to imprisonment in the state prison.

This bill would, in addition, subject any member of the legislative body of a city, county, city and county, school district, or other special district who asks for or receives a bribe in exchange for influence over his or her official action to imprisonment in the state prison.

Existing law requires any Member of the Legislature convicted of a crime involving bribery to forfeit his or her office and disqualifies him or her from ever holding office again.

This bill would, in addition, require any member of the legislative body of a city, county, city and county, school district, or other special district who is convicted of a crime involving

bribery to forfeit his or her office and would disqualify him or her from ever holding office again.

Because this bill would expand the applicability of certain crimes, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that is to take effect immediately as an urgency statute.

Ch. 436 (SB 1442) Escutia Schools: examination fees.

Existing law establishes a 5-year pilot grant program, administered by the State Department of Education, for the purpose of awarding grants to cover the costs of advanced placement examination fees. Existing law authorizes school districts to apply to the department for grant funding under the program based on the number of economically disadvantaged pupils in the district who will take the next offered advanced placement examinations. Existing law repeals those provisions on January 1, 2008.

This bill would amend the program to authorize the department to award grants to cover the costs of International Baccalaureate examination fees, as specified, in addition to the costs of advanced placement examination fees for certain eligible high school pupils, as defined. The bill would require funding priority be given to advanced placement examination fees if there is insufficient funding allocated to the grant program in a given fiscal year. The bill would require the department to make every effort to obtain and allocate federal funding for the purposes of the program prior to expending any state funds and require all federal and state funds obtained by the department for the purposes of the program to be expended for those purposes only and prohibit those funds from being used to fund any other program. The bill would also extend the repeal date of the program to January 1, 2013.

Ch. 437 (AB 1535) Nunez School instructional gardens: pupil nutrition.

(1) Existing law establishes the Instructional School Gardens Program for the promotion, creation, and support of instructional school gardens by eligible educational agencies, as defined. Existing law requires that the program be administered by the State Department of Education through the allocation of one-time grants and technical assistance to applicant eligible educational agencies. Existing law authorizes the department to consult with the California Integrated Waste Management Board (CIWMB) and public institutions of higher education, regarding curriculum development and evaluation of any program established pursuant to the Instructional School Gardens Program.

This bill would revise those provisions to make grants and technical assistance available to charter schools as well as school districts and county offices of education. The bill, instead of requiring the department to consult with specified entities, would require the Superintendent of Public Instruction to convene an interagency working group on instructional school gardens, which would include, but not be limited to, representatives of the State Department of Education, the Department of Food and Agriculture, the State Department of Health Services, and the CIWMB. The bill would require that interagency working group to advise the Superintendent on, among other things, effective and efficient means of encouraging school districts, charter schools, and county offices of education to develop and maintain instructional school gardens. The bill would authorize the Superintendent to establish an advisory group involving other agencies and groups with expertise in instructional school gardens, which would include, but not be limited to, the California Environmental Education Interagency Network. The bill would provide that the purpose of that advisory group is to support program efforts, as specified. The bill would require the Superintendent to use existing resources to establish the interagency working group and advisory group and would require the Department of Food and Agriculture, the

State Department of Health Services, and the CIWMB to use existing resources for their participation in the working group.

The bill would authorize a school district, charter school, or county office of education to apply to the Superintendent for funding for a 3-year grant in a manner determined by the Superintendent in order to develop and maintain an instructional school garden program. The bill would require applications, at a minimum, to indicate the school or schools at which the instructional school gardens are, or are to be, located; the grade level or grade levels to be targeted; the potential number of classes within the grade levels and number of pupils who would use the instructional school gardens; and the intended items of expenditure for any funds received. The bill also would require the application to include an explanation of the specified 6-month reporting requirement. The bill would limit the grants to a maximum of \$2,500 per schoolsite, except that a school district, charter school, or county office of education that applies on behalf of one or more schoolsites with an enrollment of 1,000 or more pupils would be eligible for a grant of a maximum of \$5,000 per schoolsite with an enrollment of 1,000 or more pupils. The bill would permit the Superintendent to award a grant during the period from the 2006&minus;07 fiscal year to the 2008&minus;09 fiscal year, inclusive, for instructional school garden equipment or supplies to a school district, charter school, or county office without requiring that district, charter school, or county office to have received a grant for instructional school garden professional development. The bill would require a school, school district, or county office of education, as a condition of receiving funding, within 6 months of the final expenditure of the instructional school garden funds received to report to the Superintendent, in a manner prescribed by the Superintendent, in conjunction with the interagency working group, regarding the use of the funds and the manner in which the instructional school garden or gardens are used to complement the academic program of the participating school or schools. The bill would permit a school district or county office of education to submit one report for all of the schools receiving grants that are under the jurisdiction of the district or county office.

(2) Existing law provides that the program will be implemented only if funds are available for it.

This bill would repeal that provision.

(3) Existing law reappropriates \$15,000,000 to supply schools with garden supplies and equipment. Existing law requires the department to allocate a minimum of \$500 to each school, as specified, and allocates the balance of remaining funds to school districts on a per-pupil basis.

This bill, instead, would reappropriate those funds to supply school districts, charter schools, and county offices of education with garden equipment, supplies, and professional development related to the establishment and operation of a 3-year instructional school garden program, as specified.

#### Ch. 438 (AB 1759) Umberg Campaign expenditure disclosures.

(1) Existing provisions of the Political Reform Act of 1974 require committees receiving or making contributions or expenditures above specified threshold amounts to report those contributions and expenditures, as well as other specified information, at times and places specified in the act. The act requires certain of these committees, by virtue of receiving or making contributions or expenditures above generally higher threshold amounts, to file the reports required by the act online or electronically. Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would require committees that receive contributions totaling more than \$1,000 in a calendar year and that are required under existing law to file online or electronically to also file a report online or electronically disclosing contributions or independent expenditures totaling \$5,000 or more to support or oppose the qualification or passage of a single state ballot measure, and disclosing other specified information, within 10 business days of making the contributions or independent expenditures. The bill would specify that

reports required by this provision are not required to be filed by a committee primarily formed to support or oppose the qualification or passage of a state ballot measure for expenditures made on behalf of the ballot measure or measures for which it is formed. It would also exempt from disclosure pursuant to these provisions independent expenditures disclosed pursuant to other specified provisions.

(2) Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate certain provisions of this bill.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act by a bill that furthers the act's purposes with a  $2/3$  vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a  $2/3$  vote.

Ch. 439 (AB 2275) Umberg Political Reform Act of 1974: campaign expenditures: telephone advocacy.

Existing provisions of the Political Reform Act of 1974 prohibit candidates, committees, and slate mailer organizations from sending certain mailings unless the name, street address, and city of the candidate, committee, or slate mailer organization is shown on the outside of each piece of mail in the mailing and on at least one of the inserts included within each piece of mail.

This bill would prohibit a candidate, committee, or slate mailer organization from expending campaign funds, directly or indirectly, to pay for telephone calls that are similar in nature and aggregate 500 or more in number, made by an individual, or individuals, or by electronic means and that advocate support of, or opposition to, a candidate, ballot measure, or both, unless during the course of each call the name of the organization that authorized or paid for the call is disclosed to the recipient of the call, except as specified. The bill would provide that it shall not apply to telephone calls made by the candidate, the campaign manager, or individuals who are volunteers.

This bill would require a candidate, committee, or slate mailer organization that pays for telephone calls to maintain a record of the script of the call, or a copy of a recorded message, for a specified period of time.

The bill also would prohibit campaign and ballot measure committees from contracting with any phone bank vendor that does not disclose the information required to be disclosed by this bill.

Existing law makes a violation of the Political Reform Act of 1974 subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing potential criminal penalties on persons who violate its provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a  $2/3$  vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a  $2/3$  vote.

**Ch. 440 (AB 2676) Committee on Agriculture Farmers' markets.**

Existing law, until January 1, 2007, provides that California farmers may transport for sale and sell California-grown fresh fruits, nuts, and vegetables that they produce directly to the public at a certified farmers' market, as specified. Existing law provides that it is unlawful for any person operating under these provisions to commit certain acts related to the conduct of farmers' markets.

This bill would extend these provisions until January 1, 2012. Because this bill would extend the existence of provisions that define crimes, this bill would impose a state-mandated local program.

Existing law requires, until January 1, 2007, that every operator of a certified farmers' market remit to the Department of Food and Agriculture a fee equal to the number of agricultural producers participating on each market day for the entire previous quarter which shall be used by the department upon appropriation, as specified.

This bill would extend these provisions until January 1, 2012.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 441 (AB 2179) Leslie Public postsecondary education: indemnification: Regents of the University of California.**

Existing law establishes the University of California, under the administration of the Regents of the University of California, as one of the 3 segments of public postsecondary education in this state.

This bill would, notwithstanding any other provision of law, indemnify current or former regents, officers, and employees of the university, current or former investment managers under contract with the university, and current or former officers, directors, trustees, agents, or employees of university foundations from all claims, demands, suits, actions, damages, judgments, costs, charges, and expenses, including court costs and attorney's fees, and all liability, losses, and damages of any nature whatsoever that these persons may at any time sustain by reason of any decision of the regents not to invest in any firm or firms with business operations in Sudan or with the Sudanese government.

**Ch. 442 (AB 2941) Koretz Public retirement systems: investments: Sudan.**

The California Constitution provides that the Legislature may by statute prohibit retirement board investments where it is in the public interest to do so and providing that the prohibition satisfies specified fiduciary standards.

This bill would prohibit the Public Employees' Retirement System and the California State Teachers' Retirement System from investing public employee retirement funds in a company with active business operations in Sudan, as specified. The bill would require the Board of Administration of the Public Employees' Retirement System and the Teachers' Retirement Board of the State Teachers' Retirement System to sell or transfer any investments in a company with active business operations in Sudan.

This bill would require those boards to report to the Legislature any investments in a company with business operations in Sudan and the sale or transfer of those investments, subject to the fiduciary duty of those boards, by January 1, 2008, and every year thereafter.

This bill would indemnify from the General Fund and hold harmless the present, former, and future board members, officers, and employees of and investment managers under contract with those retirement systems.

**Ch. 443 (SB 1524) Speier Limitation of actions: Armenian Genocide victims.**

Existing law authorizes any Armenian Genocide victim, as defined, or an heir or beneficiary of that victim, who resides in this state and has a claim arising out of an insurance

policy or policies purchased or in effect in Europe or Asia between 1875 and 1923 from a specified insurer to bring a legal action to recover on that claim in a court of this state, as specified, and provides that any such action shall not be dismissed for failure to comply with the applicable statute of limitations, if the action is filed on or before December 31, 2010.

Existing law also authorizes any owner, or heir or beneficiary of the owner, of Holocaust-era artwork, as defined, to bring an action in superior court to recover that artwork from any museum or gallery, and provides that any action brought under these provisions shall not be dismissed for failure to comply with the applicable statute of limitation, if the action is commenced on or before December 31, 2010.

This bill would enact similar provisions applicable to any Armenian Genocide victim, as defined, or an heir or beneficiary of that victim, who resides in this state and has a claim arising out of a failure of a bank, as defined, to pay or turn over deposited assets, or to turn over looted assets, and would provide that any action brought under these provisions shall not be dismissed for failure to comply with the applicable statute of limitation, if the action is commenced on or before December 31, 2016.

#### Ch. 444 (SB 10) Dunn Trial court facilities.

(1) Existing law requires the Judicial Council, in consultation with the superior court of each county and the county to enter into agreements concerning the transfer of responsibility for court facilities from that county to the Judicial Council. However, neither title to, nor responsibility for, court facilities deemed deficient shall transfer to the state or the Judicial Council, unless provision is made in the agreement for correction of the deficient items. Prior to the completion of the negotiations concerning the transfer of responsibility for court facilities in a building, the state is required to provide for a licensed structural engineer to inspect and evaluate the building for seismic safety, as specified.

This bill would, until January 1, 2010, provide, if responsibility for court facilities is transferred from the county to the state pursuant to a negotiated agreement, and the building containing those court facilities is rated as a “level V seismic rating,” as defined, that the county shall be responsible for any seismic-related damage and injury only to the same extent that the county would be liable if responsibility was not transferred to the state, and the county shall indemnify, defend, and hold the state harmless from those claims, except as specified. The bill would require the county, in the event that seismic-related damage occurs, to either make repairs or provide funds to the state sufficient to make those repairs, as specified. The bill would authorize the county and the Judicial Council to agree on a method to address the seismic issue so that the state does not have a financial burden greater than it would have had if the court facilities initially transferred were court facilities in buildings rated as a level IV seismic rating.

(2) Existing law requires each county to pay to the state the amount that county historically expended for operation and maintenance of court facilities for deposit in the Court Facilities Trust Fund as a source of funding for the ongoing operations and maintenance of court facilities, as specified.

This bill would authorize the California State Association of Counties, the Judicial Council, and the Director of Finance to agree to alternative methods for calculating the county facilities payment amount to be used by any county meeting the criteria set forth in those alternative methods.

#### Ch. 445 (SB 51) Migden Horsemen’s organizations.

Existing law provides for the recognition of horsemen’s and horsewomen’s organizations by the California Horse Racing Board. Each organization, except for the thoroughbred horsemen’s and horsewomen’s organizations, and except an organization that solely represents owners, or solely represents trainers, is required to provide for the representation of owners and trainers on its board of directors. Each thoroughbred horsemen’s and

horsewomen's organization, except one that solely represents trainers, is required to provide for the representation of owners and owner-trainers on its board.

Existing law provides that the organization representing owners who are also licensed as trainers, and their spouses who are licensed as owners, shall comprise a class of owner-trainers, which may elect 3 of its members to the board of directors of the owner's organization, while all other directors shall be owners and not owner-trainers. The law prohibits the board of the thoroughbred owners' organization from exceeding 15 members and requires all members to have qualified as owner-trainers, to the board of the thoroughbred owners' organization. These provisions will be repealed as of January 1, 2007.

This bill would instead require 3 members of the class of owner-trainers to be elected to the board of directors of the organization representing owners. The bill would require the organization representing owners to provide in its bylaws that all members of the organization shall have the right to vote in the election of all members of its board of directors, and that at least 3 of the 12 directors who represent owners and at least one who represents owner-trainers shall reside and race in the northern zone. The bill would further require the owners organization to provide in its bylaws that a subcommittee be formed to specifically address purse schedules in the northern zone, as specified.

This bill would maintain these provisions in effect until January 1, 2009.

Ch. 446 (SB 463) Ducheny Toll roads: State Highway Route 125.

Existing law, until January 1, 2003, authorized the Department of Transportation to solicit proposals and enter into agreements for the construction and lease of no more than 2 toll road projects, and specified the terms and requirements applicable to those projects. Existing law provides that the toll roads constructed under these provisions shall be owned by the state, but leased to a private entity for up to 35 years under the agreement.

This bill, with respect to the agreement entered into by the department under these provisions for State Highway Route 125 in San Diego County, would allow tolls to be collected for that project for a period of up to 45 years, rather than 35 years, under specified terms and conditions. The bill would also authorize the San Diego Association of Governments (SANDAG) to continue the collection of tolls thereafter subject to a  $2/3$  vote of the SANDAG board, with excess toll revenues to be used for various projects that improve the operation of the SR 125 corridor.

Ch. 447 (SB 503) Figueroa Accountants: peer review: fees.

Existing law provides for the licensure and regulation of accountants by the California Board of Accountancy, in the Department of Consumer Affairs. Existing law requires a firm that provides attest services, as defined, other than a sole proprietor or a small firm, to meet specified peer review requirements prior to the first registration expiration date after July 1, 2008. Existing law requires the board to review whether to implement the peer review program in light of changes in federal and state law or regulations or professional standards, and to report its findings to the Legislature by September 1, 2005. Existing law sets specified fees to be charged by the board.

This bill would require those firms to meet the peer review requirements within 3 years of the commencement of the peer review program, rather than prior to the first registration expiration date after July 1, 2008. The bill would revise the board's review and reporting requirement to instead require the board to review and evaluate whether to implement the program and to report its findings and recommendations to the Legislature and the department no later than September 1, 2011. The bill would require the board, if it determines that the peer review program should be implemented, to identify the resources necessary for implementation and to recommend a date for commencement of the program. The bill would revise the fees to be charged by the board.

Because this bill may increase fees deposited into the Accountancy Fund, a continuously appropriated fund, it would make an appropriation.

This bill would incorporate additional changes to Section 5134 of the Business and Professions Code proposed by AB 1868, to be operative only if AB 1868 and this bill are both chaptered and become effective on or before January 1, 2007, each bill amends Section 5134 of the Business and Professions Code, and this bill is chaptered last.

Ch. 448 (SB 727) Lowenthal Safety in employment: special purpose personnel elevators.

Existing law prohibits the construction, erection, installation, material alteration, testing, maintenance, repair, or service of specified conveyances by any person, firm, or corporation, unless that person, firm, or corporation is certified by the Division of Occupational Safety and Health as a certified qualified conveyance company. Existing law also generally requires that any person who, without supervision, erects, constructs, installs, alters, tests, maintains, services or repairs, removes, or dismantles specified conveyances be certified as a certified competent conveyance mechanic by the division.

This bill would provide that a person, firm, or corporation that maintains and repairs solely special purpose personnel elevators, as defined, on cranes that utilize a rack and pinion system in marine terminals, as defined, as part of crane maintenance activities, qualifies as a certified qualified conveyance company provided that the individual qualifying individually or on behalf of the firm or corporation meets certain experience requirements. This bill would provide that a person may qualify as a certified competent conveyance mechanic by meeting specified experience requirements. This bill would also provide that the certifications obtained pursuant to these provisions are limited to the purpose of maintaining and repairing special purpose personnel elevators on cranes that utilize a rack and pinion system in marine terminals, do not authorize the performance of other specified procedures, and do not require an examination.

Ch. 449 (SB 1224) Chesbro Vehicles: limitations of access.

Existing law exempts from established limitations of access, licensed carriers of livestock when engaged in travel necessary and incidental to the shipment of livestock on specified portions of State Highway Route 101. This exemption is repealed on January 1, 2007. Existing law requires the Department of the California Highway Patrol (CHP), in consultation with the Department of Transportation and in accordance with recommendations from the CHP's study issued on May 1, 2003, of the effect of the exemption, to continue the comprehensive study of the effect of the exemption on public safety, as specified, and to report the findings of the additional study to the Legislature on or before January 1, 2006.

This bill would extend the January 1, 2007, repeal date, to January 1, 2012, thereby extending the exemption. This bill would also delete obsolete language regarding the study, and require the CHP, in consultation with the Department of Transportation and in accordance with recommendations from the CHP's study issued March 20, 2006, on the effect of the exemption, to continue the comprehensive study of the effect of the exemption on public safety, as specified, and make recommendations on future exemptions, including the creation of a permitting system for cattle truck and trailer combinations meeting the applicable provisions of the federal Surface Transportation Assistance Act of 1982, and appropriate safety improvements. The bill would require the CHP to report the findings and recommendations to the Governor and the Legislature on or before January 1, 2011.

Ch. 450 (SB 1237) Maldonado Vehicles: combination length.

(1) Existing law prohibits any combination of vehicles coupled together, including any attachments, from exceeding a total length of 65 feet, with certain, specified exceptions. Existing law, which becomes inoperative on January 1, 2007, exempts a combination of vehicles from the specified length limitation, and authorizes the combination to have a total length of not more than 75 feet, if the combination (1) consisted of a motortruck and 2 trailers;

(2) a trailer in the combination does not exceed 28 feet 6 inches in length; (3) the combination was used exclusively to transport agricultural products from the field to the first point of handling and return, and each direction of transport did not exceed 80 miles; and (4) the combination was not operated on a highway that is designated as a national network route.

This bill additionally would require the combination of vehicles, in order for the exemptions described above to apply, to not exceed 50 miles per hour when operating on the highway, to successfully complete a commercial vehicle safety alliance inspection conducted by the Department of the California Highway Patrol, and to operate on the highways only after the development of safe routing techniques, as specified. The bill would limit the application of this exemption to the Counties of San Luis Obispo and Santa Barbara and to cities in those counties that adopt the exemption. The bill would also delete obsolete language. The bill would repeal this exemption on January 1, 2009.

The bill would require the Department of the California Highway Patrol, in consultation with the Department of Transportation, to conduct a study as to the exemption and to report the results of the study to the Legislature and Governor on or before April 1, 2008.

(2) This bill would make legislative findings and declarations regarding the need for special legislation.

Ch. 451 (SB 1282) Ducheny Transportation: federal funds: border infrastructure program.

Existing law generally provides for programming by the California Transportation Commission of state and federal transportation funds pursuant to the state transportation improvement program process, subject to various funding distribution and fair share formulas. Existing federal law, the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) apportions federal transportation funds to the states for various purposes, including funds for a coordinated border infrastructure program.

This bill would require federal funds apportioned to the state under the coordinated border infrastructure program of SAFETEA-LU to be programmed, allocated, and expended in the same manner as other federal transportation capital funds in the state transportation improvement program, except that these federal funds would be exempt from being included in the transportation funds subject to the distribution and fair share formulas. The bill would also authorize these funds to be used for projects located in Mexico. The bill would authorize any nonfederal funds needed to match these federal funds to be programmed from any available local source or any available state transportation funding source, with the concurrence of the applicable regional transportation planning agency.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 452 (SB 1452) Speier State audits.

(1) Existing law requires that the Controller, the Director of Finance, and the respective staffs of all state agencies that have their own internal auditors or that conduct internal audits or internal audit activities, and all city, county, city and county, and district employees that conduct internal audits or internal audit activities of those respective agencies, utilize the general and specified standards of internal auditing specified in a publication of the Institute of Internal Audits.

This bill would, with respect to cities, counties, cities and counties, and district employees, delete the references to internal auditors, internal audits, and internal audit activities, and instead refer to auditors, audits, and audit activities. It would require state and local entities to instead conduct their work under the general and specified standards prescribed by the Institute of Internal Auditors or the Government Auditing Standards issued by the Comptroller General of the United States, as appropriate, and except as specified.

(2) Existing law sets forth the duties and authority of the State Auditor generally in conducting audit activities on behalf of the state.

This bill would require the State Auditor to request that any state or local agency, or any publicly created entity, that is the subject of an audit conducted under these provisions to provide updates on its progress in implementing the recommendations made by the State Auditor, at intervals prescribed by the State Auditor. It would require state agencies to provide these updates to the State Auditor.

This bill would enact the Omnibus Audit Accountability Act of 2006, to require the State Auditor to, by January 15th of each year, report to specified entities with respect to each state agency audit recommendation it has made that is more than one year old and that has not been implemented by the affected agency. It would require any state agency that is notified by the State Auditor that it has not implemented a recommendation made pursuant to this chapter more than one year prior, to provide specified information in that regard.

(3) Existing law requires all state and local agencies with an aggregate spending of \$50,000,000 or more annually to consider establishing an ongoing internal audit function.

The bill instead would require state and local agencies with that aggregate annual spending amount to consider establishing an ongoing audit function, and would require any governing body that oversees a state agency that performs or reviews internal audits to establish an audit committee, subject to specified criteria. It would set forth the requirements for reporting audit findings and recommendations by chief internal auditors, and specifically provide that an individual reporting certain information under these provisions is protected under provisions of law protecting state employees from retaliation for reporting waste, fraud, or abuse.

(4) Existing law exempts the State Compensation Insurance Fund from certain provisions of law applying to state agencies, with specified exceptions.

This bill would specify that the fund is subject to the provisions of law governing audits by the State Auditor.

#### Ch. 453 (SB 1724) Runner California State University.

Existing law prohibits, except under specified circumstances, a state department or agency, as defined, from contracting with a vendor, contractor, or an affiliate of a vendor or contractor, unless that vendor or contractor, and all of its affiliates that make sales for deliveries into California, are holders of a California seller's permit issued as prescribed. Existing law defines "state department or agency," for these purposes, to include every state office, department, division, bureau, board, commission, and the California State University, and to exclude the University of California, the Legislature, the courts, and any agency in the judicial branch of government.

This bill would also exclude the California State University from this prohibition.

#### Ch. 454 (AB 84) Leslie Vehicles: specialized license plates.

Existing law requires the Department of Motor Vehicles to issue certain special interest license plates, including specific special environmental design license plates, in accordance with a specified procedure. Existing law requires, before special interest license plates may be issued, at least 7,500 applications for the special interest license plates to be received by the department.

This bill would prohibit the department from accepting an application for participation in a special interest license plate program and from issuing license plates for a new special interest license plate program.

The bill would establish a new specialized license plate program that would require the issuance of those license plates to have a design or contain a message that publicizes or promotes a state agency, as defined, or the official policy, mission, or work of a state agency. The bill would subject the issuance of those license plates to requirements, similar to certain of the requirements in current law governing special interest license plates. The bill would prohibit the department from issuing specialized license plates for state vehicles that are exempt from paying registration fees. The bill would require the department, after deducting its administrative costs under these provisions, to deposit the additional revenue derived

from the issuance, renewal, transfer, and substitution of the specialized license plates in the Specialized License Plate Fund, which the bill would establish in the State Treasury. Upon appropriation by the Legislature, the moneys in that fund would be allocated to each sponsoring agency, in proportion to the amount in the fund that is attributable to the agency's specialized license plate program. The bill would also require the sponsoring agency to expend all funds received under these provisions exclusively for projects and programs that promote the state agency's official policy, mission, or work, except as specified, and would penalize the sponsoring agency that does not comply with those requirements.

**Ch. 455 (AB 573) Wolk Design professionals: indemnity.**

Existing law provides that agreements contained in or affecting any construction contract that purport to indemnify the promisee against liability for damages for death or bodily injury to persons, injury to property, or any other loss, damage, or expense arising from the sole negligence or willful misconduct of the promisee or the promisee's agents, servants, or independent contractors who are directly responsible to the promisee, or for defects in design furnished by those persons, are against public policy and are void and unenforceable, except as specified. Existing law also provides that provisions, clauses, covenants, or agreements relating to construction contracts with a public agency that purport to impose on the contractor, or relieve the public agency from liability for the active negligence of the public agency, are void and unenforceable.

This bill would provide, for all contracts, and amendments thereto, entered into on or after January 1, 2007, with a public agency for design professional services, that all provisions, clauses, covenants, and agreements contained in, collateral to, or affecting any such contract, and amendments thereto, that purport to indemnify, including the cost to defend, the public agency by a design professional against liability for claims against the public agency, are unenforceable, except for claims that arise out of or relate to the negligence, recklessness, or willful misconduct of the design professional.

**Ch. 456 (AB 925) Ridley-Thomas Insurance: community investments.**

Existing law generally regulates the investments of insurers.

This bill would define "Community Development Investments" and "Community Development Infrastructure Investments," as specified. This bill would also impose specified reporting requirements on participating insurers to the Department of Insurance and require the commissioner to provide certain information on these investments to the public.

This bill would also require insurers that did not comply with the voluntary community investment data call issued by the commissioner in May 2005 to provide the information requested therein to the commissioner on or before February 28, 2007, and that specified information be posted on the department Internet Web site. This bill would provide that its provisions would remain in effect only until January 1, 2011, as specified.

**Ch. 457 (AB 1293) Oropeza Transcript Reimbursement Fund.**

Existing law establishes the Court Reporters Board of California and makes it responsible for issuing a certificate to practice shorthand reporting to qualified applicants. Under existing law, until July 1, 2011, excess funds, as specified, generated by the initial certificate fee collected by the board are used to provide shorthand reporting services for indigent persons, as defined, and are transferred from the Court Reporters' Fund into the Transcript Reimbursement Fund for expenditure for that purpose. Existing law requires that the Transcript Reimbursement Fund be maintained in an amount no less than \$300,000 for each fiscal year.

This bill would revise the definition of indigent person for these purposes. The bill would require the establishment of the fund in the amount of \$300,000 at the beginning of each fiscal year and would prohibit the board from transferring funds exceeding that amount if the

transfer would reduce the balance of the Court Reporters' Fund to an amount less than 6 months' operating budget. This bill would make the provisions establishing the Transcript Reimbursement Fund inoperative on July 1, 2009, and would repeal them on January 1, 2010, unless a later enacted statute changes those dates.

Existing law provides that applications for reimbursement from the Transcript Reimbursement Fund that cannot be paid from the fund due to insufficiency of the fund shall be held over until the next fiscal year to be paid out of the renewed fund.

This bill would give priority standing to those applications in the next fiscal year.

Ch. 458 (AB 1868) Bermudez Accountancy: licensure.

Existing law provides for the licensing and regulation of accountants by the California Board of Accountancy in the Department of Consumer Affairs. Existing law prohibits a person from engaging in the practice of public accountancy in this state unless he or she holds either a valid permit issued by the board or a practice privilege, as specified. A violation of this provision is a crime.

This bill would provide that the prohibition against practicing accountancy in California without a license does not apply to a person who holds a valid and current license, registration, certificate, permit, or other authority to practice public accountancy from a foreign country to the extent that he or she is temporarily practicing in this state incident to an engagement in that country, provided that the temporary practice is regulated by the foreign country and performed under the accounting or auditing standards of that country and that the person does not hold himself or herself out as being the holder of a California license or practice privilege. The bill would also, until January 1, 2011, provide that the prohibition against practicing accountancy in California without a license does not apply to a certified public accountant, a public accountant, or a public accounting firm lawfully practicing in another state to the extent that the practice is temporary and incident to practice in that state, provided that the person or firm does not solicit clients in California, does not assert or imply licensure in California, and does not engage in the development, implementation, or marketing to California consumers of any abusive tax avoidance transaction.

Existing law authorizes an individual whose principal place of business is not in California and who has a valid and current license, certificate, or permit to practice public accountancy from another state to engage in the practice of public accountancy in California under a practice privilege if certain conditions are met, including notification to the board of intent to practice.

This bill would, until January 1, 2011, permit a certified public accounting firm authorized to practice in another state that does not have an office in this state to practice public accountancy in California through the holder of a practice privilege if certain conditions are met. The bill would require a notification of intent to practice under a practice privilege to include the name of the firm, its address and telephone number, and its federal taxpayer identification number.

This bill would provide that a person who engages in accountancy in California is deemed to have consented to the jurisdiction of the board and is deemed to have appointed the regulatory agency of his or her state or foreign jurisdiction as the person's agent for a service of process in actions or proceedings by or before the board. The bill would, until January 1, 2011, authorize the board to revoke, suspend, issue a fine, or otherwise restrict an authorization to practice granted to a foreign accounting firm or discipline the holder of that authorization for any act that would be a violation of, or would be grounds for discipline against a licensee or holder of a practice privilege or denial of an accountancy license or practice privilege under, the Business and Professions Code. The bill would allow an application for reinstatement to practice, as specified, and would allow the board to administratively suspend an authorization to practice. The bill would also require the board to amend certain regulations, as specified.

Existing law sets specified fees to be charged by the board, including an annual fee for a practice privilege to be fixed by the board at up to 50% of the biennial renewal fee for an accountant.

This bill would instead require an annual fee for a practice privilege with an authorization to sign attest reports to be set by the board at up to \$125, and for a practice privilege without an authorization to sign attest reports at up to 80% of that fee. The bill would declare the intent of the Legislature that the board adopt emergency regulations providing for a lower fee or no fee for out-of-state accountants who do not sign attest reports for California clients under the practice privilege, as long as the practice privilege program is adequately funded.

Because this bill may increase fees deposited into the Accountancy Fund, a continuously appropriated fund, it would make an appropriation.

Because this bill would subject additional persons to requirements within the accountancy licensing provisions, the violation of which are a crime, and because the bill would create new requirements and prohibitions within the licensing provisions, the violation of which would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

This bill would incorporate additional changes in Section 5134 of the Business and Professions Code proposed by SB 503, to be operative only if SB 503 and this bill are both chaptered and become effective on or before January 1, 2007, but this bill becomes operative first, both bills amend Section 5134 of the Business and Professions Code, and this bill is chaptered last.

#### Ch. 459 (AB 2011) Vargas Local agency investments.

Existing law prescribes the instruments in, and criteria by, which local agencies, as defined, may invest surplus funds.

This bill would authorize, until January 1, 2012, the investment of up to 30% of those funds in certificates of deposit at a commercial bank, savings bank, savings and loan association, or credit union that uses a private sector entity that assists in the placement of certificates of deposit under specified conditions.

#### Ch. 460 (AB 2259) Salinas Local agency formation: extension of services.

Existing law, the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, authorizes a local agency formation commission, until January 1, 2007, to review and approve a proposal that extends services into previously unserved territory within unincorporated areas and to review the creation of new service providers to extend urban type development into previously unserved territory within unincorporated areas to ensure that the proposed extension is consistent with the policies of the commission and certain policies under state law.

This bill, until January 1, 2013, would instead permit the commission to review and comment on the extension of services into previously unserved territory within unincorporated areas and the creation of new service providers to extend urban type development into previously unserved areas to ensure that the proposed extension is consistent with the policies of the commission and certain policies under state law.

#### Ch. 461 (AB 2289) Ruskin Plastic bulk merchandise containers.

Existing law makes it a crime for an unauthorized person, as defined, to possess a bakery tray, bakery basket, or merchandise pallet. Under existing law, a purchaser or lessee of a bakery tray, bakery basket, or merchandise pallet is required to retain a copy of the bill of sale or other evidence that supports the sale.

This bill would require any person or entity purchasing plastic bulk merchandise containers who is in the business of recycling, shredding, or destruction of plastic bulk merchandise containers, as defined, to obtain a proof of ownership record and other identifying information from a person selling 5 or more containers, and to retain the required record for a specified time. A violation of these provisions would be a misdemeanor. By creating a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 462 (AB 2497) Laird Public resources: Resources Agency.

Existing law requires the Resources Agency in conjunction with specified entities within the agency to develop and maintain a database of lands and easements that have been acquired by those entities. Existing law requires the Wildlife Conservation Board to review and approve the acquisition of resource lands and easements for the Department of Fish and Game. Existing law requires the State Public Works Board to review and approve the acquisition of resource lands and easements for other state agencies and departments, including the Department of Parks and Recreation and the state conservancies.

This bill would require the Secretary of the Resources Agency and the Director of Finance to jointly convene a workgroup consisting of representatives from specified state agencies and natural resource organizations to evaluate and develop options for improving the efficiency of state resource land acquisition transactions for those departments and conservancies subject to the jurisdiction of the State Public Works Board. The bill would require the workgroup to address, at a minimum, issues raised by the California Performance Review in 2004 regarding the State Public Works Board's review and approval process for resource land acquisition. The bill would require the agency and department to report to the Governor and the Legislature, on or before January 1, 2008, on the outcomes of the workgroup.

Ch. 463 (AB 2105) Emmerson Human remains: permits: transportation.

Existing law prohibits a person from disposing of human remains unless a death certificate has been obtained and filed with a local registrar and a permit for disposition has been obtained from a local registrar. Under existing law, it is a crime to remove any remains, other than cremated remains, from the primary registration district in which the death or incineration occurred or the body was found, without the authority of a burial or removal permit issued by the local registrar. Existing law provides for certain exemptions from these criminal provisions, including an exemption for the removal of remains by a funeral director in a funeral director's conveyance to another registration district or county.

This bill would provide that neither a death certificate nor a permit for disposition shall be required to transport human remains from California to an adjacent state for disposition in that state when specified circumstances exist.

The bill would also authorize the coroner to release the remains to an out-of-state licensed funeral establishment without a death certificate or permit for disposition when he or she determines that specified conditions exist. The bill would require the coroner with jurisdiction over the area in which the remains were found who releases the remains to an out-of-state funeral establishment, within 72 hours after the remains were found, to file a death certificate with the local registrar. The bill would provide that, notwithstanding the above criminal provisions, a funeral director of an out-of-state licensed funeral establishment may transport human remains out of this state when acting in compliance with these provisions.

Ch. 464 (SB 107) Simitian Renewable energy: Public Interest Energy Research, Demonstration, and Development Program.

(1) Existing law expresses the intent of the Legislature, in establishing the Renewable Energy Resources Program, to increase the amount of renewable electricity generated per year, so that it equals at least 17% of the total electricity generated for consumption in California per year by 2006.

This bill would revise and recast that intent language so that the amount of electricity generated per year from eligible renewable energy resources is increased to an amount that equals at least 20% of the total electricity sold to retail customers in California per year by December 31, 2010. The bill would make conforming changes related to this provision.

(2) The Public Utilities Act imposes various duties and responsibilities on the California Public Utilities Commission (CPUC) with respect to the purchase of electricity and requires the CPUC to review and adopt a procurement plan and a renewable energy procurement plan for each electrical corporation pursuant to the California Renewables Portfolio Standard Program. The program requires that a retail seller of electricity, including electrical corporations, community choice aggregators, and electric service providers, but not including local publicly owned electric utilities, purchase a specified minimum percentage of electricity generated by eligible renewable energy resources, as defined, in any given year as a specified percentage of total kilowatthours sold to retail end-use customers each calendar year (renewables portfolio standard). The renewables portfolio standard requires each electrical corporation to increase its total procurement of eligible renewable energy resources by at least an additional 1% of retail sales per year so that 20% of its retail sales are procured from eligible renewable energy resources no later than December 31, 2017.

This bill would instead require that each retail seller, as defined, increase its total procurement of eligible renewable energy resources by at least an additional 1% of retail sales per year so that 20% of its retail sales are procured from eligible renewable energy resources no later than December 31, 2010.

(3) Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission) to certify eligible renewable energy resources, to design and implement an accounting system to verify compliance with the renewables portfolio standard by retail sellers, and to allocate and award supplemental energy payments to cover above-market costs of renewable energy.

This bill would require the Energy Commission, if it provides funding for a regional accounting system to verify compliance with the renewables portfolio standard by retail sellers, to recover all costs from user fees. The bill would require the Energy Commission to develop tracking, accounting, verification, and enforcement mechanisms for renewable energy credits, as defined. The bill would specify that facilities located out of state shall not be eligible for supplemental energy payments unless certain requirements are met, and would limit awards to those facilities to 10% of funds available. The bill would require that deliveries of electricity from an eligible renewable energy resource under any electricity purchase agreement with a retail seller executed before January 1, 2002, be tracked and included in the baseline quantity of eligible renewable energy resources of the purchasing retail seller. The bill would require that electricity generated pursuant to a prescribed federal act and pursuant to a purchase contract executed on or after January 1, 2002, count towards the renewables portfolio standard requirements of the retail seller. The bill would provide for the tracking of deliveries under these purchase contracts through a prescribed accounting system. The bill would make other technical and conforming changes.

Existing law provides that if supplemental energy payments from the Energy Commission, in combination with the market prices approved by the CPUC, are insufficient to cover any above-market costs of eligible renewable energy resources, the CPUC is required to allow a retail seller to limit its annual procurement obligation to the quantity of eligible renewable energy resources that can be procured with available supplemental energy payments.

This bill would require the CPUC to adopt flexible rules allowing a retail seller to limit its annual procurement obligation to the quantity of eligible renewable energy resources that can be delivered by existing transmission if the CPUC finds that the retail seller has undertaken all reasonable efforts to utilize flexible delivery points, ensure the availability of any needed transmission capacity, and, if an electric corporation, to construct needed transmission facilities.

(4) The Public Utilities Act permits the Energy Commission to consider an electric generating facility that is located outside the state to be an eligible renewable energy resource if it meets specific criteria.

This bill would delete that provision within the act and would amend the definition of an “in-state renewable electricity generation facility” within related provisions prescribing duties of the Energy Commission to encompass certain facilities located outside the state.

(5) Under existing law, the governing board of a local publicly owned electric utility is responsible for implementing and enforcing a renewables portfolio standard that recognizes the intent of the Legislature to encourage renewable energy resources, while taking into consideration the effect of the standard on rates, reliability, and financial resources and the goal of environmental improvement. Existing law requires the governing board of a local publicly owned electric utility to annually report certain information relative to renewable energy resources to its customers.

This bill would additionally require that the governing board of a local publicly owned electric utility annually report the utility’s status in implementing a renewables portfolio standard and progress toward attaining the standard to its customers and to report to the Energy Commission the information that the governing board is required to annually report to their customers. These additional reporting requirements would thereby impose a state-mandated local program.

(6) Under the Public Utilities Act, the CPUC requires electrical corporations to identify a separate rate component to fund programs that enhance system reliability and provide in-state benefits. This rate component is a nonbypassable element of local distribution and collected on the basis of usage. The funds are collected to support cost-effective energy efficiency and conservation activities, public interest research and development not adequately provided by competitive and regulated markets, and renewable energy resources (renewable energy public goods charge). Existing law requires the Energy Commission to transfer funds collected from the renewable energy public goods charge into the Renewable Resource Trust Fund and establishes certain accounts in the fund to carry out certain renewable energy purposes.

This bill would require the Energy Commission, in carrying out the renewable energy resources program, to optimize public investment and ensure that the most cost-effective and efficient investments in renewable energy resources are vigorously pursued with a long-term goal of achieving a fully competitive and self-sustaining supply of electricity generated from renewable sources. The bill would state that a near term objective of the program is to increase the quantity of electricity generated by in-state renewable electricity generation facilities, while protecting system reliability, fostering resource diversity, and obtaining the greatest environmental benefits for California residents with an additional objective to identify and support emerging renewable energy technologies that have the greatest near-term commercial promise and that merit targeted assistance. The bill would make legislative recommendations for allocations among specified renewable energy resources.

(7) Under existing law, 51.5% of the money collected as part of the renewable energy public goods charge is required to be used for programs designed to foster the development of new in-state renewable electricity generation facilities, and to secure for the state the environmental, economic, and reliability benefits that operation of those facilities will provide. Existing law also provides that any of those funds used for new in-state renewable electricity generation facilities are required to be expended in accordance with a specified

report of the Energy Commission to the Legislature, subject to certain requirements, including the awarding of supplemental energy payments.

This bill would require that these funds be awarded only to a project that is selected by an electrical corporation pursuant to a competitive solicitation procedure found by the CPUC to comply with the California Renewables Portfolio Standard Program and that the project participant has entered into an electricity purchase agreement resulting from that solicitation that is approved by the CPUC. The bill would authorize certain projects supplying electricity to retail sellers, as defined, to the extent the retail seller is servicing load that is within the distribution area of an electrical corporation and subject to the renewable energy public goods charge, to receive supplemental energy payments under certain circumstances. The bill would prohibit the Energy Commission from awarding supplemental energy payments for the sale or purchase of renewable energy credits or to service load that is not subject to the renewable energy public goods charge. The bill would incorporate the modified definition of an “in-state renewable electricity generation facility.”

(8) Existing law requires that 20% of the funds collected as part of the renewable energy public goods charge be used for a program designed to improve the competitiveness of existing in-state renewable electricity generation facilities and to secure for the state specified benefits.

This bill would reduce that amount to 10% of the funds collected and specify conditions under which certain facilities would be eligible for funding.

(9) Existing law requires that 17<sup>1</sup>/<sub>2</sub>% of the funds collected as part of the renewable energy public goods charge be deposited into the Emerging Renewables Resources Account, and be used for a multiyear, consumer-based program to foster the development of emerging renewable technologies in distributed generation applications.

Existing law requires the Energy Commission, by January 1, 2008, and in consultation with the CPUC, local publicly owned electric utilities, and interested members of the public, to establish and thereafter revise eligibility criteria for solar energy systems, as defined, and to establish conditions for ratepayer funded incentives that are applicable to the California Solar Initiative, as defined.

This bill would require that the Energy Commission, in allocating and using moneys in the Emerging Renewables Resources Account and the Renewable Resource Trust Fund to fund photovoltaic and solar thermal electric technologies, to utilize the eligibility criteria and conditions for solar energy systems that are applicable to the California Solar Initiative.

(10) Existing law establishes the Customer-Credit Renewable Resource Purchases Account in the Renewable Resource Trust Fund, requires that 10% of the money collected under the renewable energy public goods charge be deposited into the account and be used for credits to customers that entered into a direct transaction on or before September 20, 2001, for purchases of electricity produced by registered in-state renewable electricity generating facilities.

This bill would delete these provisions.

(11) Existing law requires the use of standard terms and conditions by all electrical corporations in contracting for eligible renewable energy resources.

This bill would require that those terms and conditions include the requirement that, no later than 6 months after the CPUC’s approval of an electricity purchase agreement, the following information about the agreement be disclosed by the CPUC: party names, resource type, project location, and project capacity.

(12) This bill would require an electrical corporation or local publicly owned electric utility to adopt certain strategies in a long-term plan or a procurement plan, as applicable, to achieve efficiency in the use of fossil fuels and to address carbon emissions, as specified.

(13) This bill would delete certain obsolete and duplicative provisions and make technical and conforming changes.

(14) This bill would require the CPUC, in consultation with the Energy Commission, to review the impact of allowing supplemental energy payments to be applied toward contracts

for the procurement of eligible renewable energy resources that are of a duration of less than 10 years, and, by June 30, 2007, to report to the Legislature with the results of the review, including certain matters. The bill would require the PUC to report to the Legislature, on or before January 1, 2008, on the feasibility, desirability, and design of performance-based incentives for solar energy systems of less than 30 kilowatts.

(15) Existing law establishes the Public Interest Research, Development, and Demonstration Fund in the State Treasury, and provides that the money collected by the public goods charge to support public interest research and development not adequately provided by competitive and regulated markets, be deposited in the fund for use by the Energy Commission to develop, implement, and administer the Public Interest Research, Development, and Demonstration Program to develop technologies which will improve environmental quality, enhance electrical system reliability, increase efficiency of energy-using technologies, lower electrical system costs, or provide other tangible benefits. The Energy Commission is required to adopt a portfolio approach for the program that accomplishes specified objectives.

This bill would state that the general goal of the program is to develop, and help bring to market, energy technologies that provide increased environmental benefits, greater system reliability, and lower system costs, and that provide tangible benefits to electrical utility customers through specified investments. The bill would require that the portfolio approach used by the Energy Commission additionally ensure an open project selection process, encourage the awarding of research funding for a diverse type of research as well as a diverse award recipient base, equally considers research proposals from the public and private sectors, and be coordinated with other related research programs.

(16) Existing law makes a violation of the Public Utilities Act or a violation of an order of the CPUC a crime.

Certain of the provisions of this bill are a part of the act and an order of the CPUC would be required to implement these provisions. Because a violation of the provisions of the bill that are part of the act or of any CPUC order implementing these provisions would be a crime, this bill would impose a state-mandated local program by creating new crimes.

(17) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 465 (SB 247) Perata The Boxing Act.

Existing law, the Boxing Act, creates the State Athletic Commission and makes it responsible for licensing and regulating boxing, kickboxing, and martial arts matches. A violation of the act is a crime.

Existing law gives the commission specified duties and powers, including requiring the commission to appoint an executive officer. Under existing law, the provisions creating the commission become inoperative on July 1, 2006, and are repealed on January 1, 2007. Existing law also provides for the Boxers' Pension Fund, a continuously appropriated fund, into which contributions to the boxers' pension plan are deposited.

This bill would provide that the Boxing Act may also be referred to as the State Athletic Commission Act. The bill would, as of January 1, 2007, reestablish the commission and provide for the appointment of an executive officer, and would make these provisions inoperative and repeal them on July 1, 2009, and January 1, 2010, respectively. The bill would provide for the bureau chief on December 31, 2006, to serve in the executive officer position through June 30, 2007, and would specify the appointment procedure for that

position. The bill would decrease the membership of the commission to 7 and would revise the composition and membership requirements for the commission.

Existing law requires the commission to furnish annually to the Senate Committee on Business and Professions and the Assembly Committee on Governmental Organization a report indicating the amount of assessment collected from each promoter and the purposes for which the moneys were expended.

This bill would instead require the commission, on or before July 30, 2010, to make a specified report to the Governor and the Legislature on the condition of the State Athletic Commission Neurological Examination Account and the Boxers' Pension Fund. The bill would also require the commission to adopt and then submit to the Governor and the Legislature a strategic plan with specified information by September 30, 2008, and to submit a report on the status of the adoption of the strategic plan during the next regularly scheduled sunset review after January 1, 2007. The bill would also require the commission to report on the implementation of the strategic plan to the Director of Consumer Affairs, the Governor and the Legislature on or before September 30, 2009.

Existing law requires certain physical examinations to be made upon an athlete regulated by the act as a condition of licensure and prior to a contest or match.

This bill would revise those provisions related to the physical examinations of licensees and contestants, including certain examination requirements, as specified.

Existing law requires every person conducting a contest or wrestling exhibition to, within 72 hours after the determination of a contest or exhibition for which admission is charged and received, furnish the commission with a report under penalty of perjury that includes specified information regarding the receipts and price for the event. Existing law imposes specified fees with respect to athletic contests or matches regulated by the commission, including a fee of up to 5% of the gross price for the sale, lease, or other exploitation of broadcasting or television rights for a contest or wrestling exhibition, with specified exceptions. Existing law also imposes a \$1 per ticket fee for persons admitted free of charge if the complimentary passes exceed 25% of the total number of spectators.

This bill would instead require the report by a person conducting a contest or wrestling exhibition to be made within 5 working days of the event. The bill would require that the fee of up to 5% of the gross price paid for the broadcasting rights be no less than \$1,000 or more than \$25,000, would allow the commission to promulgate regulations to periodically update the amount of the fee, as specified, raise to 33% the number of spectators that may be admitted free of charge without paying the additional fee, and would make other related changes. The bill would require fees for a contest in excess of \$70,000 to be paid to the commission and the Boxer's Pension Fund, if certain conditions exist. The bill would allow the commission to enter into a contract to sanction, supervise, or provide other services for a contest under the act for which these fees do not apply only if the contract provides for appropriate compensation to the commission. The bill would also limit the administrative costs associated with the Boxers' Pension Fund to no more than 20% of the average annual contribution to the fund in the previous 2 years, as specified, and would require the commission to report on the impact of this provision during the next regularly scheduled sunset review after January 1, 2007.

Existing law provides that a license under the act may be renewed any time prior to December 31 of the year it was issued.

This bill would provide that a license issued on and after January 1, 2007, shall expire one year from the date of issue, and would provide for additional requirements for license renewal.

Because this bill would revise certain requirements of the act, the violation of which would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 466 (SB 506) Poochigian Public officials.

(1) Existing law provides, until January 1, 2008, that participants in the “Address Confidentiality for Victims of Domestic Violence and Stalking” program and the “Address Confidentiality for Reproductive Health Care Service Providers, Employees, Volunteers, and Patients” program who complete an application containing specified information in person at a community-based victims’ assistance program may have certain personal information, including the program participant’s voter registration, remain confidential and not disclosed to the public.

This bill would require a local elections official to extend this confidentiality of voter registration information to specified public safety officials, upon application, as specified, for a period of no more than two years, if the local elections official is authorized to do so by his or her county board of supervisors. The application of a public safety official would be a public record.

This bill would also include the signature of a voter on a voter registration card as part of the voter registration information entitled to confidentiality.

(2) Existing law prohibits a state or local agency from posting on the Internet the home address or telephone number of any elected or appointed official. It also prohibits, and makes punishable as a misdemeanor or felony, as specified, any person from knowingly posting this information or that of the official’s residing spouse or child on the Internet knowing that person is an elected or appointed official and intending to cause imminent bodily harm to that individual. For this purpose, an elected or appointed official is variously defined and includes specified public safety officials, as separately defined.

This bill would add to the definition of public safety officials state and federal judges and court commissioners. By expanding an existing crime, this bill would impose a state-mandated local program.

(3) This bill would make technical and conforming changes to existing law.

(4) Existing law establishes the procedures by which candidates for judicial office are nominated and requires that specified filing fees be paid for filing nomination papers for all candidates for judicial office.

Existing law does not require a candidate for judicial office to file a declaration of intention to become a candidate.

This bill would require each candidate for judicial office to file a declaration of intention to become a candidate and to pay the appropriate filing fee for filing the declaration.

The bill would also make other conforming changes to these provisions.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate additional changes in Section 6254.24 of the Government Code proposed by AB 2005, that would become operative only if AB 2005 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

Ch. 467 (SB 585) Kehoe Protective orders: firearms.

Existing law prohibits a person subject to a protective order, as defined, from owning, possessing, purchasing, or receiving a firearm while that protective order is in effect and makes a willful and knowing violation of a protective order a crime. Existing law also requires the court, upon issuance of a protective order, to order the respondent to relinquish any firearm in that person’s immediate possession or control, or subject to that person’s immediate possession or control, within 24 hours of being served with the order, by either surrendering the firearm to the control of local law enforcement officials, or by selling the

firearm to a licensed gun dealer. Under existing law, a person ordered to relinquish any firearm is required to file with the court a receipt showing the firearm was surrendered or sold within 72 hours after receiving the order.

This bill would instead require the person ordered to relinquish a firearm to immediately surrender the firearm in a safe manner, upon request of any law enforcement officer, or within 24 hours as specified above. The bill also would require the person to file a receipt with the court within 48 hours after being served with the order and would provide that the failure to timely file a receipt constitutes a violation of the protective order. Because a willful and knowing violation of a protective order is a crime, the bill would expand the scope of an existing crime, resulting in a state-mandated local program.

The bill would also require application forms for protective orders adopted by the Judicial Council and approved by the Department of Justice to be amended to require the petitioner to describe the number, types, and locations of any firearms presently known by the petitioner to be possessed or controlled by the respondent. The bill would additionally include recommendations for written policies and standards for law enforcement officers who request relinquishment of firearms.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 468 (SB 1184) Cedillo Crimes: attempted murder: nonsworn uniformed employee of a sheriff's department: custody assistant.

Existing law defines a custodial officer as a public officer, not a peace officer, employed by a law enforcement agency of specified counties. The duties of the custodial officer may include the serving of warrants, court orders, writs, and subpoenas in a detention facility or under circumstances arising directly out of maintaining custody of prisoners and related tasks.

This bill would similarly define a custody assistant as a person who is a full-time employee, not a peace officer, employed by a sheriff's department who assists peace officer personnel in maintaining order and security in a custody detention, court detention, or station jail facility of the sheriff's department, as specified; custody assistants would have specified powers and duties with respect to inmates under the jurisdiction of the sheriff's department; would have to meet specified state and local training and selection requirements; but would not be conferred any authority except while on duty and would not be granted any additional retirement benefits. The provisions relating to custody assistants would apply only in Los Angeles County, but would not be operative in that county until adopted by resolution of the board of supervisors.

Existing law provides that an attempt to commit willful, deliberate, and premeditated murder, as defined, is punishable by imprisonment in the state prison for life with the possibility of parole. Existing law further provides that an attempted murder of a peace officer, firefighter, or custodial officer, as defined, committed under specified circumstances, is punishable by imprisonment in the state prison for life with the possibility of parole, or by 15 years to life if it is also proven that the attempt was willful, deliberate, and premeditated.

This bill would provide that the elements defining the crime of attempted murder of a police officer, firefighter, or custodial officer and the penalties therefor, shall also apply to the attempted murder of a custody assistant, as defined above, or a nonsworn uniformed employee of a sheriff's department whose job entails the care or control of inmates in a detention facility, as defined. By expanding the scope of an existing crime this bill would impose a state-mandated local program upon local government.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 469 (SB 1686) Kuehl Wildlife conservation: project impact on greenhouse gases.

Under the Wildlife Conservation Law of 1947, the Wildlife Conservation Board may authorize the Department of Fish and Game or the State Public Works Board to acquire real property, rights in real property, water, or water rights for the benefit of wildlife. Under that law, money in the Wildlife Restoration Fund, which is continuously appropriated, is available for expenditure for those purposes. Existing law requires the Secretary of the Resources Agency to establish the California Climate Action Registry (registry) as a public benefit nonprofit corporation, and makes legislative findings and declarations relating to the registry. Existing law requires the registry to perform various functions, including, among other things, the adoption of procedures and protocols for the reporting and certification of greenhouse gas emission reductions resulting from a project or an action of a participant in the registry.

This bill would authorize the board, when it prioritizes the use of available funds for proposed acquisitions, with regard to the priority of a proposal to acquire forestland, to consider and take into account the potential of that proposed acquisition to beneficially reduce or sequester greenhouse gas emissions. The bill would authorize the board to use information developed by the registry as a basis for determining a project's potential to reduce or sequester greenhouse gas emissions.

Ch. 470 (AB 1144) Harman Playground safety standards.

Existing law requires the State Department of Health Services, in consultation with specified other agencies and entities, to adopt regulations for the design, installation, maintenance, inspection, supervision where appropriate, and training of personnel involved in the design, installation, and maintenance, of playgrounds either operated by public agencies or operated by any entity where the playground is open to the public.

The bill would repeal the laws governing playground safety standards on January 1, 2008. As of January 1, 2008, this bill would continue to require the State Department of Social Services to convene a working group to make recommendations to the Legislature for minimum safety requirements for playgrounds, as specified. This bill would also require all new playgrounds open to the public and all playgrounds open to the public which were installed between January 1, 1994, and December 31, 1999, to conform with playground-related standards set by the American Society for Testing and Materials and the playground-related guidelines set by the United States Consumer Product Safety Commission, as specified. Equipment or modification of components inside existing playgrounds would also have to conform to the playground-related standards set by the American Society for Testing and Materials and the playground-related guidelines set by the United States Consumer Product Safety Commission, as specified.

Ch. 471 (AB 1925) Blakeslee Energy: electricity: carbon dioxide.

Existing law imposes various duties on the State Energy Resources Conservation and Development Commission, including requiring the commission to undertake a continuing assessment of trends in the consumption of electrical energy and other forms of energy and to analyze the social, economic, and environmental consequences of these trends, and to recommend to the Governor and the Legislature new and expanded energy conservation measures, as specified.

Existing law also requires the commission to adopt an integrated energy policy report that contains an overview of major energy trends and issues facing the state, including supply, demand, pricing, reliability, efficiency, and impacts on public health and safety, the economy, resources, and the environment.

This bill would require the commission, on or before November 1, 2007, and in coordination with the Division of Oil, Gas, and Geothermal Resources of the Department of Conservation and the California Geological Survey, to submit a report to the Legislature containing recommendations for how the state can develop parameters to accelerate the adoption of cost-effective geologic sequestration strategies for the long-term management of industrial carbon dioxide. The bill would require the commission, in formulating those recommendations, to meet with specified individuals and groups. The bill would require the study for the report to be conducted using existing resources and to include specified information. The bill would require the commission to include the report in its 2007 integrated energy policy report.

The bill would require the commission to support specified research and development efforts concerning storage, capture, and sequestration of carbon dioxide.

Ch. 472 (AB 2005) Emmerson Public records: confidentiality.

(1) The California Public Records Act prohibits, among other things, and makes punishable as a misdemeanor or felony, as specified, a person who knowingly posts certain information as to an elected or appointed official on the Internet or that of the official's residing spouse or child knowing that person is an elected or appointed official and intending to cause imminent bodily harm to that individual. For this purpose, an elected or appointed official is variously defined and includes specified public safety officials, as separately defined.

This bill would add to the definition of a public safety official an employee of the Attorney General, a district attorney, or a public defender who submits verification from the Attorney General, district attorney, or public defender that the employee represents the Attorney General, district attorney, or public defender in matters that routinely place that employee in personal contact with persons under investigation for, charged with, or convicted of, committing criminal acts. This bill would also add to the definition of a public safety official an attorney employed by the United States Attorney or the Federal Public Defender, state and federal judges and court commissioners, a nonsworn employee of the Department of Justice or a police department or sheriff's office with certain specified duties in the course of his or her employment, a sworn employee who supervises inmates, and a probation officer, as specified. By expanding an existing crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 473 (AB 2022) Ruskin Product safety: portable gasoline containers.

Existing law makes it a misdemeanor for any person to violate a provision of fire and safety regulations made by the State Fire Marshal pursuant to specified provisions of law.

This bill would prohibit, with specified exception, the sale, or possession for sale, portable gasoline containers that are not designed according to specified child-resistant standards and approved and listed by the State Fire Marshal.

Because this bill would create a new crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 474 (AB 2129) Spitzer Restraining orders: relinquishment of firearms.

Existing law requires a person who is subject to a temporary restraining order or injunction that prohibits certain forms of harassment, violence, harm, intimidation, or abuse to relinquish a firearm. If the person is present in court at a duly noticed hearing, the court must order that person to relinquish the firearm, by either surrendering the firearm to the control of local law enforcement or selling the firearm to a licensed gun dealer, within 24 hours of the order. If the person is not present in court, the respondent is required to relinquish the firearm within 48 hours after being served with the order. The person must file a surrender receipt with the court within 72 hours after receipt of the order.

The bill would instead require the person to surrender the firearm within 24 hours of being served with the order without regard to whether the person is present in court. This bill would also require the person to present a surrender receipt to the court within 48 hours after receipt of the order.

Ch. 475 (AB 2169) Montanez Public records: confidentiality.

(1) Existing law establishes a program until January 1, 2008, known as "Address Confidentiality for Victims of Domestic Violence and Stalking," which authorizes specified persons to complete an application containing specified information in person at a community-based victims' assistance program to be approved by the Secretary of State for the purpose of enabling state and local agencies to respond to requests for public records without disclosing a program participant's residence address contained in any public record, including the program participant's voter registration, and requires the Secretary of State to act as that person's agent for service of process and to designate a substitute mailing address for program participants pursuant to specified procedures that state and local agencies are required to use at the request of a program participant.

Existing law establishes a similar program until January 1, 2008, entitled the "Address Confidentiality for Reproductive Health Care Services Providers, Employees, Volunteers, and Patients" to protect the confidentiality of home address information of reproductive health care services providers, employees, volunteers, and patients.

This bill would extend the operation of these programs until 2013. By extending the duties on local agencies for an additional period of time, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 476 (AB 2695) Goldberg Domestic violence: probation conditions.

(1) Existing law, until January 1, 2007, provides that there is no fee for the service of process of certain protective orders, restraining orders, or injunctions or for a subpoena filed in connection with a petition alleging that a person has inflicted or threatened violence or stalked the petitioner. The Judicial Council is required to prepare and develop application forms for applicants who wish to avail themselves of the service of process.

This bill would make that provision operative indefinitely, expand the provision providing that there is no fee for the service of process of certain orders and injunctions to include additional protective orders, restraining orders, and injunctions, as specified, and require the Judicial Council to prepare and develop application forms for applicants who wish to avail themselves of the service of process.

(2) Existing law, in effect until January 1, 2007, provides that there is no fee for a subpoena filed in connection with an application, responsive pleading, or order to show cause that seeks to obtain, modify, or enforce a protective order or other, related order.

This bill would make that provision effective indefinitely.

(3) Existing law, effective January 1, 2007, excepts orders and injunctions relating to harassment and workplace violence from a provision authorizing a sheriff or marshal to require the prepayment of fees prior to the performance of any official act.

This bill would make that provision effective indefinitely and expand the exception to include orders and injunctions relating to domestic violence and elder abuse.

(4) Existing law provides that any employer whose employee has suffered unlawful violence or a credible threat of violence, that can reasonably be construed to be carried out or to have been carried out at the workplace, may seek a temporary restraining order and an injunction on behalf of the employee, as specified.

This bill would allow an employer to seek a restraining order or an injunction on behalf of any of his or her employees. This bill would also provide that a temporary restraining order or an injunction issued under these provisions may include persons employed at any of the plaintiff's workplaces, at the discretion of the court. The bill would also provide that no fee shall be paid for a subpoena filed in connection with a petition alleging the acts described above.

(5) Existing law provides, beginning January 1, 2007, that upon application of the petitioner, there is no fee for the service of process of a protective order, restraining order, or injunction if that order or injunction is based upon specified acts or threats. Existing law provides for specified conditions to be required of persons granted probation on a domestic violence case, including a minimum payment of \$200 for specified purposes, which can be waived by a court for inability to pay.

This bill would increase that minimum payment from \$200 to \$400, until January 1, 2010, subject to the same court waiver provisions.

(6) Existing law provides that 1/3 of this money shall be retained by the county for specified purposes and that the remainder shall be transferred to the Controller for deposit into specified accounts.

This bill would provide instead that, until January 1, 2010, 2/3 of the money should be retained by the county for those purposes and the reduced remainder be transferred to the Controller in an amount not less than \$133 for each defendant. However, if the court orders the defendant to pay less than \$200 because of his or her inability to pay, the state would receive 2/3 of the payment.

Because this bill would require county treasurers to account for the allocation of this money to specific purposes, it would impose a state-mandated local program.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 477 (AB 2861) Ridley-Thomas Lead abatement.

Existing law requires the State Department of Health Services to implement and administer a program that meets federal requirements regarding lead-based paint hazards, and requires the adoption of regulations regarding, among other things, the accreditation of providers of health and safety training to employees who engage in or supervise lead-related construction work.

Existing law authorizes the department or a local enforcement agency, whenever it determines that a condition at a location or premises, or the activity of any person at the location or premises, is creating or has created a lead hazard at the location or premises, to order the owner of the location or premises to abate the lead hazard or to order the person whose activity is creating or has created the hazard, to cease and desist. A violation of these provisions is an infraction punishable by a fine of not more than \$1,000.

This bill would clarify that the violation relates to a violation of an order issued under these provisions. It would make the 2nd or subsequent violation a misdemeanor punishable by a fine not to exceed \$5,000, or by imprisonment for not more than 6 months in the county jail, or by both that fine and imprisonment. By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 478 (AB 2977) Mullin Swimming Pool and Spa Safety Act of 2006.

Existing law, the Swimming Pool Safety Act, generally provides that, on and after January 1, 1998, whenever a building permit is issued for construction of a new swimming pool at a private, single-family home, the pool shall be equipped with at least one of 5 specified safety features, including: (1) a pool enclosure; (2) a safety pool cover; (3) exit alarms on doors providing direct access to the pool; (4) self-closing, self-latching device with a release mechanism on doors providing direct access to the pool; or (5) other means of protection, if the degree of protection afforded is equal to or greater than any of the specified devices, as specified.

This bill would revise the above provision to provide that, on and after January 1, 2007, whenever a building permit is issued for construction of a new swimming pool or spa, or for the structural remodeling of an existing pool or spa, at a private, single-family home, the pool shall be equipped with at least 1 of the 7 drowning prevention safety features, including the 5 devices specified above, except that a device as specified by an ordinance governing child access to pools would no longer be an authorized device and a spa must also be covered with a lockable or latchable cover, plus (6) removable mesh fencing meeting standards of the American Society for Testing and Materials (ASTM); and (7) swimming pool alarms meeting ASTM standards. The bill would provide that prior to the issuance of any final approval for the completion of permitted construction or remodeling work, the local building official shall inspect to ensure that the above standards are met and that the drowning prevention safety features are in good working condition.

Existing law provides that any person entering into an agreement to build a swimming pool shall give the consumer notice of the requirements of the Swimming Pool Safety Act.

This bill would require this consumer notice to also be given when the person enters into an agreement to build a spa or to engage in permitted work on a pool or spa.

Existing law provides that whenever a construction permit is issued for the construction of a new swimming pool or spa, the pool or spa shall meet specified requirements, including that any backup safety system that an owner of a new swimming pool or spa may choose to install shall meet specified standards of the United States Consumer Product Safety Commission issued in January 1998.

This bill would update the citation to the backup safety system standards by referring to those issued by the commission in March 2005 and would also provide that whenever a building permit is issued for the modification of a single family home with an existing swimming pool, toddler pool, or spa, the permit shall require that the suction outlet of the existing swimming pool, toddler pool, or spa be upgraded so as to be equipped with an antientrapment cover meeting the current standards of the American Society for Testing and Materials or the American Society of Mechanical Engineers.

This bill would require the Building and Standards Commission to incorporate the provisions of this act in to the California State Building Standards Code no later than January 1, 2010.

By imposing new duties on local building officials, this bill would impose a state-mandated local program upon local governments.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 479 (AB 2139) Garcia Emergency protective orders.

Existing law authorizes a law enforcement officer to seek an emergency protective order when the officer asserts reasonable grounds to believe that a person is in immediate and present danger of domestic violence, that a child is in immediate and present danger of abuse by a family or household member, that a child is in immediate and present danger of being abducted by a parent or relative, that an elder or dependent adult is in immediate and present danger of abuse, or that a person is in immediate and present danger of stalking as specified. An emergency protective order expires at the earlier of the 5th court day or 7th calendar day following the date of issuance.

This bill would require a law enforcement officer who responds to a situation in which the officer believes that there may be grounds for the issuance of an emergency protective order, to inform the person for whom the order may be sought or, if the person is a minor, his or her parent or guardian, as specified, that he or she may request the officer to request an emergency protective order. The bill would require an officer to request an emergency protective order if the officer believes that the person requesting an emergency protective order is in immediate and present danger.

By requiring a local law enforcement officer to request an emergency protective order under those circumstances, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 480 (SB 246) Figueroa Human milk.

Existing law provides that the procurement, processing, distribution, or use of human milk for human consumption constitutes the rendition of a service, and not a sale of the human milk for any purpose.

Existing law provides for the licensure and regulation of tissue banks by the State Department of Health Services.

This bill would require a hospital that collects, processes, stores, or distributes human milk collected from a mother exclusively for her own child to comply with specified standards until or unless the department approves alternative standards. It would also exempt a hospital from the tissue bank licensure and regulation requirements for the purpose of collecting, processing, storing, or distributing human milk collected from a mother exclusively for her own child. The bill would exempt from any screening test requirement human milk collected from a mother exclusively for her own child.

This bill would not apply to any hospital that collects, processes, stores, or distributes milk from human milk banks or other outside sources.

Ch. 481 (SB 603) Ortiz Law enforcement: anti-reproductive rights crimes.

Existing law requires the Attorney General to assume specified duties relating to planning, information gathering, and analysis with respect to anti-reproductive-rights crimes, as defined, including consultation with specified subject matter experts. Existing law also required the Attorney General to make a report to the Legislature in 2005 on the issue of anti-reproductive-rights crimes. Existing law is to be repealed as of January 1, 2007, unless a later enacted statute deletes or extends that date.

This bill would add and delete specified organizations from the list of subject matter experts. This bill would also require the Commission on the Status of Women to convene an advisory committee that would be responsible for reporting, as specified, to the Legislature and specified agencies on the implementation of the Reproductive Rights Law Enforcement Act and the effectiveness of the plan developed by the Attorney General.

Because the bill would extend the operative date of provisions that would impose reporting requirements on local governments, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 482 (SB 1245) Figueroa Health care coverage: cervical cancer screening test.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care and makes a willful violation of the act a crime. Existing law also provides for the regulation of health insurers by the Department of Insurance. Under existing law, a plan and a health insurer that include coverage for the treatment or surgery of cervical cancer are deemed to provide coverage for an annual cervical cancer screening test that includes the conventional Pap test and the option of a cervical cancer screening test approved by the federal Food and Drug Administration.

This bill would expand the coverage for an annual cervical cancer screening test provided by a health care service plan or a health insurance policy to include the human papillomavirus screening test, as specified.

Because the bill would specify an additional requirement for a health care service plan, the willful violation of which would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 483 (SB 1260) Ortiz Reproductive health and research.

The California Stem Cell Research and Cures Act, an initiative measure approved by the voters at the November 2, 2004, general election (Proposition 71), establishes the California Institute for Regenerative Medicine, the purpose of which is, among other things, to make grants and loans for stem cell research, for research facilities, and for other vital research opportunities to realize therapies, protocols, and medical procedures that will result in the cure for, or substantial mitigation of, diseases and injuries. Existing law establishes the Independent Citizen's Oversight Committee (ICOC), composed of appointed members, that is required to perform various functions and duties with regard to the operation of the institute, including, but not limited to, establishing standards applicable to research funded by the institute.

Existing law prohibits amendment of Proposition 71 by the Legislature unless the amendment is approved by the voters, or the amendment is accomplished by a bill introduced after the first 2 full calendar years and approved by a vote of 70% of both houses.

Existing law, which is not applicable to research funded under Proposition 71, and which would be repealed on January 1, 2007, requires the State Department of Health Services to, among other things, develop guidelines for research involving the derivation or use of embryonic stem cells, and to report annually to the Legislature.

This bill would delete the repeal date of those provisions, thus indefinitely extending their duration. The bill would also revise the department's reporting duties, by requiring biennial reviews rather than annual reports to the Legislature.

Existing law requires research projects involving the derivation or use of human embryonic stem cells to be reviewed and approved by an institutional review board established in accordance with federal regulations.

This bill would revise a related declaration of state policy, would require these research projects to instead be reviewed and approved by a stem cell research oversight committee established substantially in accordance with specified guidelines, and would make these provisions applicable also to research projects involving human adult stem cells.

Existing law applicable to fertility treatment requires that a physician and surgeon provide a patient with prescribed information and obtain the patient's informed consent prior to providing the fertility treatment.

This bill, with certain exceptions, would require a physician and surgeon, prior to obtaining informed consent from a subject for assisted oocyte production, as defined, or other method of ovarian retrieval for purposes of retrieving eggs for research or for developing medical therapies, to provide the subject with a standardized written summary of health and consumer issues and to obtain the subject's written and oral informed consent for the procedure.

Existing law prohibits a person from knowingly, for valuable consideration, purchasing or selling embryonic or cadaveric fetal tissue for research purposes.

This bill would prohibit human oocytes or embryos from being acquired, sold, offered for sale, received, or otherwise transferred for valuable consideration for medical research or development of medical therapies, and would prohibit payment in excess of the amount of reimbursement of expenses to be made to any research subject to encourage her to produce human oocytes for the purposes of medical research.

The bill would declare that it is not to be construed to amend Proposition 71.

Ch. 484 (SB 1555) Speier Umbilical cord blood banking: education: prenatal screening.

(1) Existing law imposes various responsibilities upon the State Department of Health Services and prenatal care providers with respect to prenatal care, screening, and counseling.

This bill would require the department to conduct the Umbilical Blood Community Awareness Campaign, which would require the department to, among other things, provide awareness, assistance, and information regarding umbilical cord blood banking options, as specified. This bill would authorize a primary prenatal care provider, as defined, to provide to a woman who is known to be pregnant, during the first prenatal visit, information developed by the department pursuant to this bill regarding her options with respect to umbilical cord blood banking.

This bill would require the department to also provide this information, available in Cantonese, English, Spanish, and Vietnamese, about umbilical cord blood donation as specified. The bill would require that the information be made available on the Internet Web sites of the licensing boards or agencies that oversee primary prenatal care providers. The bill would specify that those provisions requiring the department to develop that information only be implemented, upon a determination by the Director of Finance, that sufficient private donations have been collected and deposited into the Umbilical Cord Blood Education Account, which the bill would create. The bill would require that the moneys in the account be available for expenditure, upon appropriation by the Legislature, for that purpose.

(2) Existing law, administered by the State Department of Health Services, contains provisions governing the licensure of blood banks. A violation of these provisions is a misdemeanor.

This bill would, notwithstanding any other provision of law, provide that a blood bank may provide umbilical cord blood banking storage services, only if it is licensed pursuant

to these provisions. This bill would also authorize the department to adopt regulations, as specified, in order to implement any additional standards for blood banks to store umbilical cord blood.

Because a violation of this provision would create a new crime, this bill would impose a state-mandated local program.

(3) Existing law, the Hereditary Disorders Act, declares the intent of the Legislature that the state's hereditary disorders program activities are to be fully supported by fees collected for services provided by the program, unless otherwise provided. Existing law requires the State Department of Health Services to charge a fee to all payers for any tests or activities performed pursuant to provisions relating to genetic disorder prevention services, including the Hereditary Disorders Act. Existing law requires that any fee charged for screening and followup services provided to Medi-Cal eligible persons, health care service plan enrollees, or persons covered by disability insurance policies are to be paid directly to the Genetic Disease Testing Fund, a continuously appropriated fund, to be used for the purposes of the Hereditary Disorders Act.

This bill would authorize the expenditure of funds from the Genetic Disease Testing Fund for the expansion of the Genetic Disease Branch Screening Information System to include the expansion of prenatal screenings through the amendment of the Genetic Branch Screening Information Systems contracts, and would exempt that expansion from specified requirements governing public contracts and contracts for information technology projects. By expanding the purposes for which moneys from the fund may be expended, the bill would make an appropriation.

(4) Existing law requires the department to administer a statewide program for prenatal testing for genetic disorders and birth defects, including, but not limited to, ultrasound, amniocentesis, chorionic villus sampling, and blood testing for genetic disorders and birth defects.

This bill would require the department to expand prenatal screening to include all tests that meet or exceed the current standard of care as recommended by nationally recognized medical or genetic organizations, including, but not limited to, inhibin, would authorize the department to charge a prescribed fee for this testing and would require the department, not later than July 1, 2007, to report to the Legislature on the progress of this expansion, including an estimate of the costs for screening, followup, and treatment as compared to costs and morbidity averted by this testing under the program. Because these fees are deposited in the continuously appropriated Genetic Disease Testing Fund, the bill would constitute an appropriation.

(5) Existing law, the Birth Defects Monitoring Program, requires the Director of Health Services to maintain a system for the collection of prescribed information on birth defects.

This bill would make the Birth Defects Monitoring Program part of the department's maternal, child and adolescent health program. This bill would also provide for an increase in prenatal screening fees to support a variety of Birth Defects Monitoring Program activities and specify the steps for release of pregnancy blood samples for research purposes. Because these fees are deposited in the continuously appropriated Genetic Disease Testing Fund, the bill would constitute an appropriation.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 485 (SB 1851) Committee on Health Cancer: informed consent.

Existing law requires physicians and surgeons to inform patients being treated for breast cancer about alternative efficacious treatments. Violation of these requirements constitutes unprofessional conduct and is a crime. Existing law requires the State Department of Health Services to develop a summary of alternative efficacious methods of treatment for breast

cancer and requires the Medical Board of California to provide the summary to physicians and surgeons.

Existing law requires every health facility, clinic, and physician and surgeon's office to post a prescribed notice where outpatient breast cancer screening or biopsy is performed, informing patients that the physician and surgeon has a duty to provide a copy of the department's summary to the patient prior to performance of a biopsy. Existing law further requires the physician and surgeon to note on the patient's written record that the summary was so provided.

This bill would, instead, require the physician and surgeon, upon a diagnosis of breast cancer, to provide the summary. It would permit the physician to choose to provide the summary prior to performance of a screening or biopsy and would require conforming changes to the notice. The bill would require the department and the Medical Board of California to each post the summary on its Internet Web site.

Existing law requires the department to approve a standardized written summary containing specified information about prostate cancer treatment options, and requires the Medical Board of California to provide the summary to physicians and surgeons.

This bill would require the department and the Medical Board of California to each post the summary on its Internet Web site for public use.

Ch. 486 (AB 2251) Evans Reproductive health care services: confidentiality of personal information.

(1) Existing law, to be repealed on January 1, 2008, establishes the Address Confidentiality for Reproductive Health Care Services Providers, Employees, Volunteers, and Patients program to protect the confidentiality of home address information of reproductive health care services providers, employees, volunteers, and patients. The program authorizes specified persons to complete an application to be filed with the Secretary of State for the purpose of enabling state and local agencies to respond to requests for public records without disclosing a program participant's residence address contained in any public record. Under existing law, any person who makes a false statement in an application is guilty of a misdemeanor.

This bill would prohibit any person, business, or association from knowingly publicly posting or displaying on the Internet the home address or home telephone number, of any provider, employee, volunteer, or patient of a reproductive health care services facility or of persons residing at the same home address of those persons with the intent to incite a 3rd person to cause imminent great bodily harm to the person identified in the posting or display, or to a coresident of that person, where the 3rd person is likely to commit this harm, or to threaten the person identified in the posting or display, or a coresident of that person, in a manner that places the person identified or the coresident in objectively reasonable fear for his or her personal safety. The bill would establish a cause of action for damages and declaratory relief for violations.

(2) This bill would, in addition, prohibit the public posting or displaying on the Internet of a home address or home telephone number after a written demand and would permit injunctive and declaratory relief in such a case. The bill would prohibit the Internet sale or trade of this information with the intent specified in paragraph (1) above, and would authorize recovery of money damages for violations.

Ch. 487 (AB 2583) Nation Dispensing prescription drugs and devices: refusal to dispense.

Existing law prohibits a health care licentiate from obstructing a patient in obtaining a prescription drug or device, and requires the licentiate to dispense drugs and devices pursuant to a lawful prescription or order, except in specified circumstances, including on ethical, moral, or religious grounds asserted by the licentiate if certain requirements are met. Existing law authorizes the California State Board of Pharmacy to issue a citation for a violation of

these provisions and authorizes its executive officer to issue a letter of admonishment for their violation. Existing law, the Pharmacy Law, requires every pharmacy to prominently post a notice to consumers provided by the board concerning the availability of prescription price information, the possibility of generic drug product selection, and the types of services provided by pharmacies. A violation of the Pharmacy Law is a crime.

This bill would require the consumer notice posted in pharmacies to also contain a statement describing patients' rights relative to access to prescription drugs or devices. By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 488 (AB 32) Nunez Air pollution: greenhouse gases: California Global Warming Solutions Act of 2006.

Under existing law, the State Air Resources Board (state board), the State Energy Resources Conservation and Development Commission (Energy Commission), and the California Climate Action Registry all have responsibilities with respect to the control of emissions of greenhouse gases, as defined, and the Secretary for Environmental Protection is required to coordinate emission reductions of greenhouse gases and climate change activity in state government.

This bill would require the state board to adopt regulations to require the reporting and verification of statewide greenhouse gas emissions and to monitor and enforce compliance with this program, as specified. The bill would require the state board to adopt a statewide greenhouse gas emissions limit equivalent to the statewide greenhouse gas emissions levels in 1990 to be achieved by 2020, as specified. The bill would require the state board to adopt rules and regulations in an open public process to achieve the maximum technologically feasible and cost-effective greenhouse gas emission reductions, as specified. The bill would authorize the state board to adopt market-based compliance mechanisms, as defined, meeting specified requirements. The bill would require the state board to monitor compliance with and enforce any rule, regulation, order, emission limitation, emissions reduction measure, or market-based compliance mechanism adopted by the state board, pursuant to specified provisions of existing law. The bill would authorize the state board to adopt a schedule of fees to be paid by regulated sources of greenhouse gas emissions, as specified.

Because the bill would require the state board to establish emissions limits and other requirements, the violation of which would be a crime, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 489 (SB 1578) Lowenthal Dogs: tethering prohibition.

Existing law contains various provisions relating to the health, safety, and humane treatment of animals, such as birds, horses and other equines, and animals performing in traveling circuses and carnivals.

This bill, with specified exceptions, would prohibit a person from tethering, fastening, chaining, tying, or restraining a dog to a dog house, tree, fence, or other stationary object.

This bill would make a violation of its provisions an infraction or a misdemeanor. This bill would also permit animal control, as defined, to issue a correction warning in lieu of an infraction or misdemeanor, as specified. By making a violation of its provisions a crime, this

bill would impose a state-mandated local program. This bill would provide that it is not to be construed to prevent a person from walking a dog with a hand-held leash.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 490 (SB 1116) Scott Conservatorships.

(1) Existing law generally authorizes a guardian or conservator to fix the residence of a conservatee or ward within the state without permission of the court, by selecting the least restrictive appropriate setting, as specified, that is in the best interests of the conservatee. Existing law requires the guardian or conservator to promptly give notice of all changes in the residence of a conservatee or ward.

This bill would revise and recast this provision to permit a guardian or conservator to select the least restrictive appropriate residence of a conservatee or ward. The bill would require a presumption that the least restrictive appropriate residence for the conservatee is the personal residence of that conservatee, except if proven otherwise at a hearing by a preponderance of the evidence. The bill would require a conservator to evaluate the level of care and measures necessary to keep the conservatee in his or her personal residence or explain the limitations or restrictions regarding a return of the conservatee to his or her personal residence. The bill would exempt from these provisions conservatees with developmental disabilities for whom the Director of the Department of Developmental Disabilities or a regional center for the developmentally disabled acts as a conservator, as specified. The bill would require this determination to be made in writing under penalty of perjury. Because the bill would change the definition of the crime of perjury, the bill would impose a state-mandated local program. The bill would require the guardian or conservator to file notice of the change of address for a ward or conservatee in 30 days. The bill would permit the court to waive notice of the change of address in order to prevent harm to the conservatee or ward. The bill would require the Judicial Council to develop one or more forms consistent with this provision by January 1, 2008. If a ward or conservatee is being removed from his or her personal residence, the bill would require the guardian or conservator to give notice 15 days prior to removal, except in an emergency, as specified.

(2) Existing law provides that sales of real or personal property of the estate of a conservatee are subject to authorization, confirmation, or direction of the court, except as otherwise provided and except for the sale of a conservatee's personal residence. In seeking authorization to sell a conservatee's present or former personal residence, the conservator is required to notify the court that the personal residence is proposed to be sold and that the conservator has discussed the proposed sale with the conservatee, among other requirements.

This bill would revise the provisions for the proposed sale of the personal residence of a conservatee and require a conservator to publish and post a notice of sale, reappraisal for sale, minimum offer price, and other information related to the sale of the personal residence, as specified. The bill would delete restrictions regarding the sale of the personal residence of the conservatee related to contracts with and compensation of agents, brokers, and auctioneers, and restrictions regarding the sale of personal property.

(3) Under existing law, the court, in its discretion, may make an order granting a conservator one or more powers, as specified, for the advantage, benefit, and best interest of the estate of the conservatee. These powers include the sale of real property of the estate.

This bill would additionally require that the sale of the personal residence of a conservatee, including the terms of sale, price, and commissions to be paid from the estate, to be in the best interest of the conservatee, that the sale of that personal residence shall comply with requirements for appraisal and minimum offer price, and other conditions, as specified. The bill would prohibit a court from waiving specified requirements regarding appraisals.

(4) This bill would make related, nonsubstantive and clarifying changes.

(5) This bill would become operative only if SB 1550, SB 1716, and AB 1363 are enacted and become effective on or before January 1, 2007.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 491 (SB 1550) Figueroa Professional Fiduciaries Act.

Existing law requires all private professional conservators, private professional guardians, and private professional trustees to file a specified annual statement, under penalty of perjury, with the clerk of the court. Existing law prohibits a court from appointing a person as a conservator, guardian, or trustee, unless he or she is registered in the Statewide Registry maintained by the Department of Justice and has filed the annual statement with the court.

This bill would enact the Professional Fiduciaries Act, which would create the Professional Fiduciaries Bureau in the Department of Consumer Affairs and would require the bureau to license and regulate professional fiduciaries, as specified. The bill would also create the Professional Fiduciaries Advisory Committee with specified membership and duties. On and after July 1, 2008, the act would require a person acting or holding himself or herself out as a professional fiduciary to be licensed as a professional fiduciary, unless he or she is licensed as an attorney or a certified public accountant or is enrolled as an agent to practice before the Internal Revenue Service, as specified, and would require a licensee to meet certain other requirements, including filing an application for licensure signed under penalty of perjury, passing a licensing examination, payment of licensing fees set by the bureau, submission of fingerprints for a criminal background check, and annually filing a statement containing specified information under penalty of perjury. The act would provide for the deposit of licensing fees in the Professional Fiduciary Fund, which the bill would create and which would be the successor fund to certain fees in the Statewide Registry. The bureau would become inoperative on July 1, 2011, and be repealed on January 1, 2012, and its responsibilities and jurisdiction would be transferred to the Professional Fiduciaries Advisory Committee.

This bill would also make inoperative, as of July 1, 2008, the provisions of the Probate Code that relate to the registration of private professional conservators and guardians.

This bill would only become operative if SB 1116, SB 1716, and AB 1363 are enacted and become effective on or before January 1, 2007.

Because this bill would require the filing of documents signed under penalty of perjury, it would expand the crime of perjury and thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 492 (SB 1716) Bowen Conservatorships.

Existing law requires the court to review each conservatorship one year after the appointment of the conservator and biennially thereafter, except as specified. Existing law also requires the court investigator to visit the conservatee when the court review of the conservatorship is required, and to determine, among other things, whether the present conservator is acting in the best interests of the conservatee.

This bill would authorize the court, on and after July 1, 2007, to take appropriate action, including, but not limited to, ordering a review of the conservatorship, on its own motion or upon request by any interested person.

The bill would also require, on and after July 1, 2007, the court investigator, in determining whether the conservator is acting in the best interest of the conservatee, to include an examination of the conservatee's placement, quality of care, and finances.

The bill would also prohibit, commencing January 1, 2008, and except as specified, ex parte communications between any party or attorney for the party and the court concerning a subject raised in pleadings filed pursuant to the Probate Code, and in proceedings to establish a conservatorship for persons who are gravely disabled as a result of a mental disorder or chronic alcoholism. The bill would require the Judicial Council to adopt a rule of court to implement these provisions by January 1, 2008.

The bill would incorporate additional changes to Sections 1850 and 1851 of the Probate Code proposed by both this bill and AB 1363, to take effect only if both bills are enacted and this bill is enacted last.

The bill would become operative only if AB 1363, SB 1116, and SB 1550 are enacted and become effective on or before January 1, 2007. These acts would be known as the Omnibus Conservatorship and Guardianship Reform Act of 2006.

Ch. 493 (AB 1363) Jones Omnibus Conservatorship and Guardianship Reform Act of 2006.

(1) Existing law governs the establishment of conservatorships and guardianships.

The bill would require the Judicial Council, among other things, to adopt specified rules of court relating to conservatorships and guardianships and to develop educational programs for nonlicensed conservators and guardians. The bill would also require the Judicial Council to establish qualifications and educational requirements for any court-employed staff attorney, examiner, and investigator or court-appointed attorney, to require educational classes for these attorneys, and probate judges, to report to the Legislature regarding a study measuring court effectiveness in conservatorship cases, and to develop forms to provide notice regarding free assistance provided by the court to conservators and how to file an objection to an inventory and appraisal of the estate. The bill would require public guardians to comply with specified continuing education requirements by January 1, 2008. The bill would revise the notice requirements regarding a petition for the appointment of a temporary guardian or temporary conservator, except as specified. The bill would also require the Judicial Council to adopt a rule of court to implement a specified provision, effective January 1, 2008, requiring guardians and conservators to provide a bond.

(2) Existing law requires conservators and guardians to present a biennial accounting of the assets of the conservatee or ward and requires a biennial review of each conservatorship.

The bill would require a review of conservatorships at a noticed hearing, and impose new requirements governing the accounting. The bill also would prohibit a court from reducing the amount of a bond in conservatorship proceedings without good cause, impose new duties on court investigators and prohibit the compensation of a guardian or conservator from the estate for costs or fees incurred in unsuccessfully opposing a petition, among other changes. The bill would also specify the circumstances under which a guardian or conservator that is a trust company is required to obtain the authorization of a court prior to exercising its powers.

(3) Existing law authorizes the public guardian to apply for appointment as guardian or conservator of the person, estate, or both, of any person domiciled in the county requiring a guardian or conservator if there is no one else who is qualified and willing to act and whose appointment would be in the best interest of the person. The public guardian is required to apply for appointment if ordered by the court.

This bill additionally would require the public guardian to apply for appointment as guardian or conservator if there is an imminent threat to the person's health or safety or the person's estate. The bill would require the court to order the public guardian to apply for appointment on behalf of any person domiciled in the county who appears to require a guardian or conservator, if it appears that there is no one else who is qualified and willing to act, and if that appointment as guardian or conservator appears to be in the best interests of the person, as specified.

Because the bill would impose new duties and educational requirements on the public guardian, a county officer, the bill would impose a state-mandated local program.

(4) The bill would incorporate additional changes to Sections 1850 and 1851 of the Probate Code proposed by both this bill and SB 1716, to take effect only if both bills are enacted and this bill is enacted last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(6) The bill would become operative only if SB 1116, SB 1550, and SB 1716 are enacted and become effective on or before January 1, 2007.

#### Ch. 494 (AB 2550) Blakeslee National Guard: benefits.

Existing civil service law requires that veterans be allowed preference points for civil service employment.

This bill would require that any member of the California National Guard or a widow, widower, or spouse of a member, who meets specified requirements, be awarded preference points, as provided, for any civil service employment. This bill would also make various conforming changes.

#### Ch. 495 (AB 339) Harman Limited partnerships and limited liability companies.

Existing law sets forth rules of organization and governance for limited partnerships.

This bill would revise and recast these provisions by enacting the Limited Partnership Act of 2008 and would repeal the existing provisions for limited partnerships on January 1, 2010. The bill would make other related changes.

Existing law authorizes a person who sells all or substantially all of the assets of, or the goodwill of, a business entity, including a limited liability company, to agree to refrain from carrying on a similar business within a specified geographic area, as specified. Existing law similarly authorizes a member of a limited liability company to make such an agreement upon or in anticipation of a dissolution of the company.

This bill would make a technical change to these provisions with respect to limited liability companies.

This bill would incorporate additional changes to Section 16101 of the Corporations Code, proposed by AB 2914, to be operative only if AB 2914 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

This bill would incorporate additional changes to Sections 1107.5, 1113, 6019.1, 6020.5, 8019.1, 8020.5, 12540.1, 12550.5, 16915.5, and 17554.5, of the Corporations Code, proposed by AB 2341, to be operative only if AB 2341 and this bill are both chaptered and become effective on or before January 1, 2007, but AB 2341 becomes operative first, and this bill is chaptered last.

#### Ch. 496 (AB 402) Dymally Family law court: marriage.

Existing law establishes procedures related to proceedings for dissolution of marriage, nullity of marriage, and legal separation, as specified.

This bill would enact the Collaborative Family Law Act, which would allow the parties to those proceedings, by written agreement, to utilize a collaborative law process, as specified, rather than an adversarial judicial proceeding to resolve those disputes.

The bill would also require a court to issue a statement explaining the factual and legal basis for its custody decision upon the trial of a question of fact in a proceeding to determine the custody of a minor, upon the request of either party.

The bill would also require the Judicial Council to create an information sheet for parties involved in child custody and visitation matters, as specified, on or before January 1, 2008.

The bill would also request the Committees on the Judiciary of the Senate and Assembly to study and make recommendations for a comprehensive statute governing the practice of collaborative law, as specified.

**Ch. 497 (AB 1172) Chu Claims against the state: appropriation.**

Existing law requires the Attorney General to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state.

This bill would appropriate \$950,000 from the General Fund to the Attorney General, and \$880,000 from the General Fund to the California Department of Veteran's Affairs, for payment of specified claims.

This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 498 (AB 1559) Frommer Urban Park Act of 2006.**

Existing law establishes the Urban Park Act of 2001, which requires the Department of Parks and Recreation to establish a local assistance program to offer grants, on a competitive basis, to various local entities and nonprofit organizations, as defined, for the acquisition or development, or both, of urban parks and recreational areas and facilities. For purposes of the act, the term, "facilities" is defined. Existing law requires the department, in evaluating applications for grants, to assign priority to applications for projects that meet certain criteria.

This bill would change the name of the act to the Urban Park Act of 2006. The bill would revise the definition of "facilities" to include community gardens. The bill would modify the criteria for awarding grants, and modify the criteria that the department is required to consider in assigning a higher priority to a grant application. The bill would also require the department to maintain an application and grant award schedule as long as funding is available.

**Ch. 499 (AB 1598) Committee on Agriculture Agriculture omnibus changes.**

Existing provisions of the Food and Agricultural Code specify that, in lieu of specified civil actions, and except as specified, the Secretary of Food and Agriculture or a county agricultural commissioner may levy a civil penalty against a person violating any provision in that code or any regulation adopted pursuant thereto relating to plant quarantine and pest control, not to exceed \$2,500 for each violation.

This bill would further authorize a county agricultural commissioner to file a certified copy of a final decision with the court that directs the payment of a civil penalty pursuant to the above-described provisions, as specified. The bill would require the court to enter judgment immediately upon that filing, and at no cost.

Existing law provides that in order to provide for the enforcement of provisions relating to the drugging of horses, the event manager of every event shall charge and collect a fee of not more than \$3 for each horse entered or exhibited in the event, as determined by the Secretary of Food and Agriculture to be necessary to carry out those provisions. Existing law provides that under certain circumstances the secretary may set the fee at a rate in excess of \$3 per horse, but no greater than \$5 per horse.

This bill would instead provide that the event manager shall charge and collect a fee that the secretary determines to be necessary to carry out the provisions relating to the drugging of horses, as specified.

This bill would increase the fees that may be charged and collected for the purposes of enforcing the provisions relating to the drugging of horses. These fees would be deposited into the Department of Food and Agriculture Fund, and would be continuously appropriated to the department for the purposes for which they are collected. Therefore, this bill would make an appropriation by increasing the money in a continuously appropriated fund.

Existing law, the California Seed Law, generally regulates seed sold in California to ensure that seed purchased by the consumer-buyer is properly identified and of the quality represented on the tag or label. Existing law defines agricultural seed as not including any variety that is generally known and sold as vegetable seed, for these purposes. Existing law provides that vegetable seed sold in a container<sup>1/2</sup> pound or less that is for sowing purposes shall bear upon it the year in which it is intended for planting.

This bill would remove these provisions and would instead provide that any vegetable seed sold in a container<sup>1/2</sup> pound or less bear upon it at the time of retail sale for nonfarm use the viability assurance statement "Packed for the (year) season." This bill would make numerous other nonsubstantive, conforming changes.

Because a violation of these provisions would be a crime, this bill would impose a state-mandated local program.

Pursuant to provisions relating to the licensure and regulation of produce dealers a procedure is provided whereby an aggrieved grower or licensee may file a complaint with the Department of Food and Agriculture subject to expedited review and settlement. If the dispute is not resolved through informal consultation, the complainant may pursue arbitration by following specified procedures including that he or she pay a fee for the arbitration to the department. Existing law also requires the respondent to pay a fee for any counterclaim that is filed.

This bill would provide that those fees shall be submitted to the department made payable to the arbitrator, arbitration service, or payee designated by the department.

Existing law provides that the term of office of members of the California Walnut Commission, except ex officio members, shall be 2 years from the beginning of the marketing season in the year of their election and until qualified successors are elected, as specified.

This bill would provide that, for the 2006 marketing year, the term of office of members of the commission shall be from the beginning of the marketing year that commences in the year of their election and until qualified successors are elected for the 2009 marketing year.

This bill would provide that this provision shall only become operative if AB 393 of the 2005–06 Regular Session is also enacted and becomes operative on or before January 1, 2007.

Existing law establishes the California Tomato Commission in state government with a prescribed membership comprised of producers and handlers representing 8 districts, and it specifies the powers, duties, and responsibilities of the commission.

This bill would reduce the number of districts to 7 by eliminating the district consisting of Baja California (Mexico) and eliminate the member representing California tomato handlers who exclusively handle tomatoes produced in Baja California (Mexico). This bill would also increase the membership of the commission by adding one at-large handler from District 7 which consists of all counties of the state.

Existing law provides that the commission shall establish an assessment against tomato handlers, as specified.

This bill would remove provisions relating to the assessment of handlers who receive tomatoes produced outside the state.

Existing law provides that there is in state government the California Sea Urchin Commission composed of members, as specified, including 5 elected by handlers from among persons qualified to engage in sea urchin fishery. Existing law requires persons nominated for election as a diver member be nominated by a petition signed by at least 10 divers, as specified.

This bill would instead require a petition signed by at least 5 divers, as specified.

This bill would also change the counties from which a diver member of the commission is elected.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 500 (AB 1693) Berg Cut Flower Commission: assessments.

Existing law provides for the establishment of the Cut Flower Commission and gives the commission the power to collect moneys from cut flower producers, as defined, for marketing, research, and other activities.

This bill would cap the annual amount paid by any single producer at \$100,000 unless that producer has failed to comply with the collections procedures as established by the applicable statutes and regulations.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 501 (AB 1749) Jerome Horton Cigarettes and tobacco products.

(1) The California Cigarette and Tobacco Products Licensing Act of 2003 provides, until January 1, 2010, for the licensure by the State Board of Equalization of manufacturers, distributors, wholesalers, importers, and retailers of cigarettes or tobacco products that are engaged in business in California.

This bill would require manufacturers and importers of specified tobacco products engaged in business in this state to obtain and maintain a license. This bill would require that the provisions related to obtaining and maintaining a manufacturers and importers license become operative May 1, 2007. This bill would require these manufacturers or importers to provide the board with specified information, submit a license application to the board, as described, pay a one-time license fee of \$2,000 or \$10,000, as specified, and submit a monthly report to the board providing information regarding sales of tobacco products, including the wholesale cost of the tobacco products, subject to suspension or revocation of the license, as provided. This bill would provide that the information provided to the board is confidential and shall not be disclosed to the public, except in specified situations. Additionally, this bill would provide that the information and records provided to the board are not a public record, and makes findings demonstrating the interest protected by that limitation and the need for protecting that interest. This bill would require an applicant to verify the accuracy of the application and to affirm that the applicant has not been convicted of a felony and has not and will not violate or cause or permit to be violated the licensing requirement, subject to the imposition of criminal penalties as a misdemeanor, thus imposing a state-mandated local program.

(2) Existing law defines an “importer” as any purchaser in the United States of cigarettes manufactured outside of the United States.

This bill would also redefine “importer” to be any purchaser for resale in the United States of cigarettes or tobacco products manufactured outside of the United States for the purpose of making a first sale or distributing within the United States.

(3) The California Cigarette and Tobacco Products Licensing Act of 2003 prohibits manufacturers from selling cigarettes to distributors, wholesalers, importers, retailers, or any other person who is not licensed, as specified. The act further prohibits retailers, distributors, wholesalers, or importers from purchasing packages of cigarettes from any person unless he or she is in compliance with these licensure requirements, as specified. A violation of any of these provisions is a misdemeanor.

This bill would expand the above prohibitions by also providing that a manufacturer or importer shall not sell tobacco products to retailers, distributors, wholesalers, or any other person who is not licensed, as provided, and would prohibit a retailer, distributor, or wholesaler from purchasing packages of cigarettes or tobacco products from any person who is not licensed or whose license has been suspended or revoked. This bill would provide that a manufacturer or importer who uses the information provided on the board’s Web site to

determine a person's licensing status is presumed to be in compliance with these provisions. This bill would provide that these provisions shall become operative May 1, 2007.

By expanding the scope of an existing crime, this bill imposes a state-mandated local program.

(4) The act, in addition to providing for the licensing and regulation of manufacturers, distributors, wholesalers, importers, and retailers of cigarettes or tobacco products that are engaged in business in California, prohibits a manufacturer, distributor, wholesaler, importer, retailer, or any other person from selling counterfeit cigarette and tobacco products and provides that a violation of that prohibition is a crime. The act imposes specified fines or imprisonment for possessing, selling, or buying false or fraudulent cigarette tax stamps. The act also requires manufacturers and importers of cigarette products that provide those products to distributors or wholesalers to pay the board a fee for cigarettes sold in this state. Under existing law, the act is repealed, by its own terms, January 1, 2010.

This bill would delete the repeal date specified in current law, extending indefinitely the operation of the California Cigarette and Tobacco Products Licensing Act of 2003.

(5) The California Cigarette Fire Safety and Firefighter Protection Act prohibits the sale of cigarettes, as defined, unless the manufacturer of those cigarettes certifies to the State Fire Marshal that the cigarettes they manufacture comply with specified provisions.

This bill would provide that, for the purposes of the California Cigarette Fire Safety and Firefighter Protection Act, the definition of a cigarette does not include a little cigar, as defined.

(6) Existing law regulates the distribution and sales of various types of tobacco products in the state, and specifies civil and criminal sanctions for violations of that regulatory scheme. Existing law prohibits any person from selling, giving, or furnishing specified tobacco products to a person under the age of 18 years, as provided. Existing law makes a violation of this prohibition a misdemeanor or makes that person subject to civil action.

This bill would expand this prohibition to include tobacco products commonly referred to as "blunt wraps," as defined, and thus impose a state-mandated local program by changing the definition of an existing crime. This bill would clarify that persons who violate this prohibition are subject to both criminal and civil liability.

(7) Existing law prohibits specific types of displays of tobacco paraphernalia and products, subject to specified civil penalties. Existing law also requires specified labels on retail packages of cigars.

This bill would additionally prohibit the self-service display of blunt wraps, as provided. This bill states the intent of the Legislature that all manufacturers or importers of blunt wraps place, or cause to be placed, a specified label on retail packages of blunt wraps, as required by federal law.

(8) Existing law requires the State Board of Equalization to administer various taxes and fees, including taxes with respect to cigarettes and tobacco products, alcoholic beverages, motor vehicle fuel, and diesel fuel, among others. Existing law authorizes, until January 1, 2010, persons designated by the Executive Director of the State Board of Equalization to exercise the arrest powers of a peace officer in the enforcement of the taxes and fees administered by the State Board of Equalization.

This bill would delete the repeal date specified in existing law, extending the ability of designated persons to exercise the specified arrest powers indefinitely.

(9) Existing law establishes procedures under the Cigarette and Tobacco Products Tax Law for imposing taxes on sellers of black-market cigarettes and tobacco products, and procedures for the seizure and sale of property secured by liens for delinquencies under the Cigarette and Tobacco Products Tax Law. Existing law repeals these provisions, effective January 1, 2010.

This bill would delete the repeal date specified in current law, extending the authorization for these procedures indefinitely.

(10) The Cigarette and Tobacco Products Tax Law authorizes, until January 1, 2010, employees of the State Board of Equalization, under specified conditions, to enter and inspect a building, facility, site, or place, as described, where cigarettes or tobacco products are sold, produced, or stored, where there is evidence of tax evasion, or where there is failure to comply with the Master Settlement Agreement, a settlement entered into by states' attorneys general and various tobacco product manufacturers that provides for the allocation of moneys to the states and certain territories. Refusal of the inspection is subject to penalty.

This bill would delete the repeal date of this authorization, thereby extending the ability of specified board employees to enter and inspect the locations under the specific circumstances indefinitely.

(11) The Cigarette and Tobacco Products Tax Law requires distributors and wholesalers of cigarette and tobacco products to be licensed by the State Board of Equalization. That law requires a tax imposed by that law, with respect to distributions of cigarettes, to be paid by distributors through the use of stamps or meter register settings, and requires that these stamps or meter register settings be affixed to each package of cigarettes sold. That law prohibits the false or fraudulent making, altering, reuse, or counterfeiting of cigarette tax stamps or meter impressions by providing that a violation of that prohibition is a felony subject to imprisonment as specified, or to a fine of not less than \$1,000 and not more than \$10,000, or to both fine and imprisonment. That law prohibits the sale of unstamped or unmetred cigarettes, as specified, the violation of which is punishable by a fine of up to \$1,000, imprisonment in a county jail for not more than one year, or by both fine and imprisonment. That law authorizes, until January 1, 2010, the seizure and destruction of counterfeit cigarettes or tobacco products, as defined, and imposes misdemeanor punishment on the sale or possession thereof. That law imposes specified fines or imprisonment, or both, on a transporter who transports 40,000 or more cigarettes or tobacco products with a value of \$5,000 or more with the intent to defeat or evade the taxes imposed by that law under described conditions.

This bill would delete the repeal date and extend authorization for the seizure and destruction of counterfeit cigarettes or tobacco products and for the imposition of a misdemeanor for the sale and possession thereof. This bill would increase the fine for the sale of unstamped or unmetred cigarettes to \$25,000. This bill would also increase the fine imposed for falsely or fraudulently making a cigarette tax stamp or meter impression to \$25,000, and would increase the fine imposed on a transporter of cigarettes to \$25,000, for deposit into specified funds and accounts.

By increasing the penalties for existing crimes, this bill imposes a state-mandated local program.

(12) Existing law requires all distributors of cigarette and tobacco products that are required to be licensed by the State Board of Equalization to furnish a \$1,000 security deposit. Existing law, beginning January 1, 2007, requires a distributor, that defers payments for stamps or meter register settings and elects to make those payments on a monthly or a twice-monthly basis, to furnish a security deposit of at least 70% of, or 50% of, respectively, but not more than twice the amount of, stamps and meter register settings, for which payment is deferred.

This bill would provide that for a distributor who elects to make payments on a weekly basis, as specified, the amount of the security deposit would be 25% of the amount of, but not more than twice the amount of, stamps and meter register settings for which the payment is deferred. This bill would provide that distributors would not have to make an additional security deposit if the distributor's average monthly purchase of stamps or meter register settings for the previous 12 months does not exceed 72,000 stamps or meter register settings and if the distributor meets specified conditions.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 502 (AB 1889) Nava California Emergency Council.

Existing law creates the California Emergency Council, consisting of a specified membership and specified duties, including duties with regard to the certification of local disaster councils and the classification of disaster service workers.

This bill would also require the membership of the council to include a representative of a local public health agency, to be appointed by the Governor, would require the council to have 2 advisory committees with specified memberships and duties, and would include the encouragement of certain community, business, and school preparedness efforts and the publication of a biennial report on emergency preparedness, among the council's duties. It would require the Office of Emergency Services to provide staff support to the Emergency Council as necessary, and to perform the duties currently performed by the council with respect to the certification of local disaster councils and the classification of disaster service workers. It would also require the Office of Emergency Services to provide notice to Emergency Council members with respect to any state of emergency declared by the Governor when the council is not meeting.

Ch. 503 (AB 2237) Karnette Harbors and ports: security.

Existing law requires the Director of Homeland Security in collaboration with the State Department of Health Services to submit an annual report to the budget committees of each house of the Legislature regarding their respective expenditures of federal homeland security and bioterrorism funds.

This bill would require the report to include information on policies, projects, and funding necessary to protect the state's harbor facilities, port facilities, and the commercial marine transportation sector from terrorist attack. The bill would require the director to consult with individuals and businesses connected to harbors and ports, and would specify the contents of the report as it relates to harbors and ports.

The bill would require the director also to submit the report to the transportation committees of each house of the Legislature.

Ch. 504 (AB 2296) Montanez Solid waste: landfill: standards: closure and postclosure maintenance.

(1) Existing law, the California Integrated Waste Management Act, requires the California Integrated Waste Management Board (board) to adopt regulations setting forth the minimum standards for solid waste disposal, including standards for the design, operation, maintenance and ultimate reuse of solid waste facilities.

This bill would require the board to conduct a study, by January 1, 2008, to define the conditions that potentially affect solid waste landfills, in order to identify potential long-term threats, as specified. The bill also would require the board to study various financial assurance mechanisms that would protect the state from long-term postclosure maintenance or corrective action costs if a landfill owner or operator fails to meet its legal obligation to fund postclosure maintenance or corrective action during the postclosure period. The bill would require the board to consult with specified representatives when conducting the study. The bill would require the board to adopt regulations and develop recommendations, by July 1, 2009, based upon the studies.

(2) The act requires a person owning or operating a solid waste landfill to submit to the board, the appropriate California Regional Water Quality Control Board (regional water board), and the local enforcement agency, a closure plan and a postclosure maintenance plan for the solid waste landfill. The act requires that person to also submit to the board evidence of financial ability in an amount, as specified, to provide for closure and postclosure maintenance contained in the closure and postclosure maintenance plans for the landfill.

The bill would require the board to adopt regulations on or before January 1, 2008, that would require closure and postclosure maintenance cost estimates to be based on reasonably foreseeable costs the state may incur if the state would have to assume responsibility for those activities due to the failure of the owner or operator, as specified.

Ch. 505 (AB 2343) Committee on Agriculture Milk producers' security trust fund.

Existing law confers upon the Secretary of Food and Agriculture the ability to establish and administer the Milk Producers Security Trust Fund to protect producers against loss of payment for bulk milk. Existing law provides that security charges may be collected by the secretary until he or she determines that the value of the fund approximates 110% of the dollar amount of the total purchases of milk being paid for and received in one month by the handler with the largest payment obligation to producers for that month.

This bill would instead provide that security charges shall only be collected until January 1, 2007, and that the fund cash shall be maintained at \$30,000,000. If the fund cash falls below \$30,000,000, the secretary may resume collecting security charges in order that the fund cash is maintained at that level. This bill would also provide that if in any month 110% of a handler's average monthly milk purchases exceed the higher of either the fund cash or \$30,000,000 the secretary shall require that handler to provide acceptable securities, as defined, within 10 business days of notice. This bill would provide that when acceptable securities in the required amount, as specified, are provided, the secretary shall not collect security charges from that handler. This bill would provide that shipments to handlers who fail to provide acceptable securities will be charged enhanced security charges, and may have their license suspended, revoked, or conditioned. The bill would make related changes. The bill would provide that the additional acceptable securities and any enhanced security charges would be deposited into the Milk Producers Security Trust Fund, a continuously appropriated fund.

By authorizing additional funds to be paid into a continuously appropriated fund, this bill would make an appropriation.

Existing law specifies the amount of security charges in mills per pound of product each handler is obligated to pay into the Milk Producers Security Trust Fund.

This bill would decrease the mills per pound paid by handlers, as specified.

Existing law provides that any handler subject to any milk pooling plan, as specified, that receives milk that is not subject to the calculation of producer prices, as specified, shall be obligated to pay the security charges for any portion of that milk that is assigned to class 1, class 2, and class 3 usage.

This bill would change these provisions to also include milk that is assigned to class 4a and class 4b usage.

Existing law provides that any handler receiving milk that is not subject to any pooling plan, as specified, shall be obligated to remit security charges for class 1, class 2, and class 3 products, and may deduct the security charges from the minimum prices to be paid to producers.

This bill would change these provisions to also include class 4a and 4b products.

Existing law makes it unlawful for any retailer, and other specified entities to sell milk, cream or any dairy products at less than cost. Existing law further provides that it is unlawful for a handler to directly or indirectly pay less than the minimum producer price established under the applicable stabilization and marketing plan.

This bill would provide that these prohibitions do not apply to sales of bulk milk between handlers.

Ch. 506 (AB 2591) Keene State agencies: accounts: reports.

Existing law requires state agencies to submit various reports to the Department of Finance regarding state agency operations and expenditures.

This bill would, until July 1, 2010, require specified state agencies to submit to the department an annual report on the status of that agency's liquidated and delinquent accounts as of the end of the previous fiscal year and efforts made by the agency to collect those accounts. It would define liquidated and delinquent accounts for this purpose as any loans, accounts receivable, fines, assessments, penalties, or other monetary obligation owed to a state agency that is unpaid for 180 or more days after the obligation was first due to that state agency. It would require the director of the department, by no later than February 28 of each year, to submit to the Legislature a report on the status of liquidated and delinquent accounts of state agencies. It would specify that these requirements apply only if sufficient existing resources of the agencies and department are available for this purpose.

Ch. 507 (AB 3030) Emmerson State Highway Routes 66 and 83.

Existing law provides the Department of Transportation full possession and control of all state highways. Existing law establishes State Highway Route 66 from Route 210 near San Dimas to Route 215 in San Bernardino. Existing law provides for the relinquishment of a portion of Route 66 to the Cities of Fontana and Rancho Cucamonga under specified conditions. Existing law also establishes State Highway Route 83 from Route 71 to Route 210 near Upland.

This bill would provide for the relinquishment of a portion of State Highway Route 66 to the City of Upland under specified conditions. The bill would also provide for the relinquishment of a portion of State Highway Route 83 to the City of Upland under specified conditions.

Ch. 508 (AB 3062) Committee on Elections and Redistricting Elections omnibus bill.

(1) Existing law requires the Secretary of State to annually provide voter registration forms and information to students in all high schools, community colleges, and campuses of the California State University and University of California. Existing law requires that the number of forms be consistent with the number of students enrolled at each school.

This bill would instead require that the number of forms be consistent with the number of students enrolled at each school who are of voting age or will be of voting age by the end of the year and would require the Secretary of State to provide additional forms to any school, free of charge, if so requested by a school.

(2) Existing law specifies procedures applicable to the preparation, submittal, and printing of arguments for, against, and rebuttal arguments to, a measure appearing on the ballot of a city, county, district, or school district election.

Existing law authorizes persons filing an initiative petition in a municipal election to file a written argument in favor of the ordinance and provides that the legislative body may submit an argument against the ordinance pursuant to specified procedures. Existing law also provides that the persons filing the initiative petition may prepare and submit a rebuttal argument not exceeding 250 words and that the legislative body may prepare and submit a rebuttal to the argument in favor of the ordinance not exceeding 250 words pursuant to specified procedures.

This bill would delete these provisions and recast them to provide that persons filing the initiative petition may file a written argument in favor of the ordinance, and the legislative body may submit an argument against the ordinance not exceeding 300 words and that, for measures placed on the ballot by the legislative body, the legislative body may file a written argument for or against any city measure.

(3) The California Constitution and state law provide that judicial, school, county, and municipal offices are nonpartisan offices. Existing law also defines a nonpartisan office as an office for which no party may nominate a candidate and requires candidates for elective office to file a declaration of candidacy for a particular office.

This bill would prohibit a candidate for a municipal office from filing nomination papers for more than one municipal office or term of office for the same municipality in the same election.

(4) Existing law provides that the order of candidates' names on the ballot of the 5 major election dates is determined by a randomized alphabet drawing conducted by the Secretary of State, with certain requirements, and requires that the 1st drawing take place on the 82nd day before the April general law city elections and any other elections held at the same time.

Existing law requires that the 4th drawing take place on the 82nd day before the 1st Tuesday after the 1st Monday in June of each odd-numbered year, that the 5th drawing take place on the 82nd day before the 1st Tuesday after the 1st Monday in November of the odd-numbered year, and that these dates apply to all candidates on the ballot in the elections held on that date.

This bill would instead require 6 drawings and would require that the 1st drawing take place on the 82nd day before the April general law city elections of any even-numbered year. The bill would also require that the 4th drawing take place on the 82nd day before the March general law city elections of each odd-numbered year, the 5th drawing take place on the 82nd day before the 1st Tuesday after the 1st Monday in June of each odd-numbered year, and the 6th drawing take place on the 82nd day before the 1st Tuesday after the 1st Monday in November of the odd-numbered year.

(5) Existing law provides that the order of candidates' names on the ballot of a special district, school district, charter city, or other local government body election, occurring on other than one of the 4 major election dates is determined by a special randomized alphabet drawing conducted by the Secretary of State on the 1st weekday following the last possible day of filing for the election according to specified requirements.

This bill would revise these provisions to require that the Secretary of State conduct a randomized alphabet drawing on the 1st weekday following the last possible day of filing in the event there is an extension for the election.

**Ch. 509 (SB 682) Migden Postsecondary education facilities.**

Existing law appropriates \$10,487,000 to the California State Library and \$85,035,000 to the California State University from the Public Buildings Construction Fund for preliminary plans, working drawings, construction, and equipment for the J. Paul Leonard Library and Sutro Library joint project. The State Public Works Board is authorized to issue lease-revenue bonds or bond anticipation notes to finance the design or construction, or both, of the joint project and other specified projects. The funds appropriated for the joint project and other specified projects are available for encumbrance until June 30, 2008.

This bill would instead appropriate \$12,421,000 to the California State Library from the Public Buildings Construction Fund for preliminary plans, working drawings, construction, and equipment, and \$104,132,000 to the California State University for preliminary plans, working drawings, and construction of the J. Paul Leonard Library and Sutro Library joint project on the San Francisco Campus. The bill would provide that the funds appropriated for the joint project and other specified projects are available for encumbrance until June 30, 2010.

**Ch. 510 (SB 989) Committee on Environmental Quality Hazardous material: bona fide ground tenant: remedial actions.**

Existing law, the California Land Reuse and Revitalization Act of 2004, provides that an innocent landowner, a bona fide purchaser, or a contiguous property owner, as defined, qualifies for immunity from liability from certain state laws for pollution conditions caused by a release or threatened release of a hazardous material, if the innocent purchaser, bona fide purchaser, or contiguous property owner meets specified conditions. The act also prohibits an agency from requiring an innocent landowner, bona fide purchaser, or contiguous property owner to take a response action under certain state laws. The act defines the term

“agency” as the Department of Toxic Substances Control, the State Water Resources Control Board, or a California regional water quality control board. Existing law repeals the act on January 1, 2010.

The act defines the term “applicable law” as meaning certain state statutory and common laws that impose liability on an owner or occupant of property for pollution conditions caused by a release or threatened release of hazardous material on, under, or adjacent to the property.

The bill would require a bona fide ground tenant, as defined, who seeks to qualify for immunity to make all appropriate inquiries, and enter into an agreement with an agency along with one or more specified entities that agree to take responsibility for implementation of a site assessment and response plan.

The bill would provide that the immunity provided under these provisions would be from an applicable statute. The bill would authorize a party to an agreement to request an agency to issue a certification of immunity and would require the agency to provide this certification within 60 days after the agency makes certain specified determinations. The bill would authorize an agency to withdraw the certification if the agency, after providing the bona fide ground tenant notice and an opportunity to cure, determines that the bona fide ground tenant materially deviated from the agreement or induced the agency to issue the certificate by fraud or intentional misrepresentation.

Ch. 511 (SB 1134) Committee on Budget and Fiscal Review Appropriation for Court Order.

Existing law requires the Department of Corrections and Rehabilitation to administer the state prison system.

This bill would appropriate \$35,446,000 from the General Fund to the department to implement the Revised Program Guide for the Mental Health Services Delivery System as required by a specified court order.

This bill would specify that the amount appropriated shall be used only to establish specified positions, and conduct a one-time workload funding study, as specified. It would require the department to submit 2 reports to legislative committees and to the Legislative Analyst’s Office.

This bill would also require the department to complete a workload study no later than April 1, 2007.

This bill would take effect immediately as an urgency statute.

Ch. 512 (SB 1250) Perata Energy: cost-effective energy efficiency programs: renewable energy resources.

(1) Under existing law, the Public Utilities Commission (PUC) has regulatory authority over public utilities, including electrical corporations. Existing law requires the PUC to require Pacific Gas and Electric Company, San Diego Gas and Electric, and Southern California Edison to identify a separate electrical rate component to fund programs that enhance system reliability and provide in-state benefits. This rate component is a nonbypassable element of local distribution and collected on the basis of usage. Existing PUC resolutions refer to the nonbypassable rate component as a “public goods charge.” The public goods charge moneys are collected to support cost-effective energy efficiency and conservation activities, public interest research and development not adequately provided by competitive and regulated markets, and renewable energy resources. The moneys collected by the public goods charge for renewable energy are required to be transferred to the State Energy Resources Conservation and Development Commission (Energy Commission), for deposit in the Renewable Resource Trust Fund, for use for the renewable energy resources program. Some of the money in the fund, and in the accounts in the fund, is continuously appropriated to the Energy Commission for specified purposes related to renewable energy resources. The moneys collected by the public goods charge for public interest research and

development are required to be transferred to the Energy Commission, for deposit in the Public Interest Research, Development, and Demonstration Fund, for use for specified purposes, including the public interest energy research, demonstration, and development program.

(2) Under the Reliable Electric Service Investments Act, the Energy Commission is required to hold moneys collected for renewable energy and deposited in the Renewable Resource Trust Fund and moneys collected for public interest research, development, and demonstration and deposited in the Public Interest Research, Development, and Demonstration Fund, until further action by the Legislature. The act requires the Energy Commission to create an initial investment plan, in accordance with specified objectives, to govern the allocation of funds in the Renewable Resource Trust Fund and Public Interest Research, Development, and Demonstration Fund, collected between January 1, 2002, and January 1, 2007. The act requires the Energy Commission, on or before March 31, 2006, to prepare an investment plan proposing the application of moneys collected between January 1, 2007, and January 1, 2012, in accordance with specified objectives.

The bill would revise and recast the public interest energy research, demonstration, and development program, and the renewable energy resources program, including the purposes for which money in the Renewable Resource Trust Fund may be used, thereby making an appropriation. The bill would make other related changes, including in the Reliable Electric Service Investments Act.

(3) The Reliable Electric Service Investments Act requires the Governor to appoint an independent review panel to prepare and submit to the Legislature and Energy Commission, by January 1, 2005, a report evaluating the energy efficiency, renewable energy, and research, development, and demonstration programs funded by the public goods charge and to make recommendations relative to specified matters.

This bill would delete these requirements.

(4) The Reliable Electric Service Investments Act was enacted in 2 separate bills, each containing identical language.

This bill would repeal duplicative sections of the act.

(5) Existing law requires the PUC, in evaluating energy efficiency investments under its existing statutory authorities, to ensure that no energy efficiency funds are used to provide incentives for the purchase of new energy-efficient refrigerators.

This bill would delete that refrigerator purchase restriction.

(6) Existing law establishes a surcharge on all natural gas consumed in the state to fund certain low-income assistance programs, cost-effective energy efficiency and conservation activities, and public interest research and development (natural gas public goods charge). Existing law requires a public utility gas corporation, as defined, to collect the natural gas public goods charge from natural gas consumers, as specified. The money from the natural gas public goods charge is deposited in the Gas Consumption Surcharge Fund, and is continuously appropriated to specified entities, including to the PUC, or to an entity designated by the PUC, to fund low-income assistance programs, cost-effective energy efficiency and conservation activities, and public interest research and development not adequately provided by the competitive and regulated markets. Existing law authorizes the Energy Commission, if it is designated by the PUC to receive funds for public interest research and development, to administer the program pursuant to the Public Interest Energy Research, Demonstration, and Development Program.

This bill would, if the Energy Commission is so designated, require the Controller to transfer funds to a separate subaccount in the Public Interest Research, Development, and Demonstration Fund to pay the Energy Commission for specified costs.

(7) Existing law requires that 10% of moneys collected pursuant to the renewable energy public goods charge are to be used to provide customer credits to consumers who entered into a direct transaction on or before September 1, 2001, for purchases of electricity produced by a registered in-state renewable electricity generating facility.

This bill would repeal that provision.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 513 (SB 1374) Cedillo Tax administration: taxpayer information: disclosure.

Existing law authorizes the Franchise Tax Board, until December 31, 2008, to disclose to tax officials of any city, subject to certain specified requirements, a taxpayer's name, address, social security or taxpayer identification number, and business activity code, as provided, but limits the use of that information to employees of the taxing authority of a city.

Existing law specifies that a person that makes an unauthorized disclosure of this information or that makes an unauthorized inspection of this information is guilty of a misdemeanor.

This bill would extend, until December 31, 2011, the Franchise Tax Board's authorization to disclose this information.

By extending the repeal date of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 514 (AB 2470) Ridley-Thomas Health care master plan: Los Angeles County.

Existing law establishes programs at the state and local level for the provision of health care benefits to low-income persons and other eligible persons.

This bill would authorize the Los Angeles County Board of Supervisors to develop a master plan for the provision of health care in the county and to assemble a task force to address specified issues and to report to the board according to a schedule established by the board.

Ch. 515 (AB 2060) De La Torre Naturalization services.

Existing law sets forth the duties of the Department of Community Services and Development respecting certain community programs in the state. The Budget Act of 2005 appropriates \$1,500,000 to the department for purposes of the Naturalization Services Program.

This bill would establish the Naturalization Services Program and require the department to implement the program to the extent funds are appropriated for this purpose in the annual Budget Act. The bill would require the department to seek input from stakeholders in designing the methodology for the distribution of funds appropriated for purposes of the program.

Ch. 516 (SB 1135) Committee on Budget and Fiscal Review Agricultural Worker Transportation Program.

Existing law, pursuant to Proposition 116 of 1990, establishes the Public Transportation Account in the State Transportation Fund as a trust fund, with revenues derived from a portion of the sales tax on fuels, to be used for mass transportation and transportation planning purposes authorized by the Legislature. Existing law, the Budget Act of 2006, appropriates \$20 million from the Public Transportation Account for an agricultural worker transportation program to be enacted by the Legislature.

This bill would, until July 1, 2010, establish the Agricultural Worker Transportation Program to be administered by the Department of Transportation. The bill would allocate available funding to public agencies for the provision of agricultural workers transportation services and associated capital expenditures. The bill would require the department to establish a specified committee and to report to the Legislature on implementation of the program.

Ch. 517 (SB 1209) Scott Teachers: teacher credentialing: out-of-state teachers: professional growth programs: teacher compensation.

(1) Existing law establishes the teacher credentialing block grant and requires the Superintendent of Public Instruction to apportion block grant funds to a school district offering approved programs, as specified, based on the number of eligible participants in each of those programs. Existing law, commencing with the 2006-07 fiscal year, requires the amount of funding a school district receives through the grant be adjusted for inflation and for growth, as specified.

This bill would, in addition, require the Superintendent to apportion block grant funds to a charter school offering approved programs, as specified. The bill would, instead of being adjusted for inflation and growth, require that the amount of funding a school district receives be adjusted based on changes in the number of participating credential candidates, with the amount per candidate adjusted annually for inflation.

(2) Existing law authorizes the Commission on Teacher Credentialing to issue preliminary teaching and services credentials and professional clear teaching and services credentials if the applicant for the credential meets certain minimum requirements relating to professional preparation. Existing law makes a preliminary teaching or services credential valid for 5 years, pending completion of a 5th year of study and a professional clear multiple or single subject teaching credential valid for the life of the holder, if the holder meets certain requirements relating to professional growth.

This bill would delete the requirements relating to professional growth, and, instead, would provide that a clear or professional clear teaching or services credential is valid for the life of the holder if the holder submits an application and fee for renewal to the commission every 5 years and meets certain professional fitness requirements relating to good moral character. The bill would delete certain provisions in existing law relating to teacher professional growth programs. The bill also would delete the provision permitting an emergency permit to be issued or reissued for validity periods not to exceed one year.

(3) Existing law prohibits the commission from issuing, except as specified, a credential, permit, certificate, or renewal of an emergency credential to any person to serve in the public schools unless the person has demonstrated proficiency in basic reading, writing, and mathematic skills in the English language, as specified.

This bill would delete the exemption from having to repeat the basic skills proficiency test in order to obtain a renewal of the emergency credential for an emergency credential holder who has passed that test. The bill would add an alternative method for satisfying the proficiency requirement and would require the Superintendent to perform specified duties associated with that method. The bill would add to the persons that the commission is required to exempt from the basic skills proficiency test requirement, as specified.

This bill would require the commission, by July 1, 2007, to ensure that the California Subject Examinations for Teachers (CSET): Multiple Subjects be modified to assess basic writing skills similarly to the state basic skills proficiency test and would provide that achieving the necessary passing score on the revised test be considered equivalent to passing the state basic skills proficiency test.

The bill would require the commission, by July 1, 2009, to examine the feasibility of incorporating the assessment related to effective reading instruction that is currently included in the Reading Instruction Competence Assessment (RICA) within the teacher performance assessment and report its findings to the Legislature and the Governor. The bill would require the commission, by July 1, 2009, to ensure that the single subject CSET in English and the single subject CSET in mathematics and their related scoring protocols are modified to assess basic writing skills similarly to the state basic skills proficiency test. The bill would also require the commission, no later than July 1, 2009, to report to the Legislature on the feasibility, validity, and costs of modifying the remaining single subject CSET in single subjects to assess basic skills in certain subjects, as provided.

(4) Existing law authorizes the commission to issue a certificate that authorizes the holder to provide certain services to limited-English-proficient pupils, if the applicant for the certificate meets certain minimum requirements, including possession of certain prerequisite credentials or permits, passage of certain knowledge and skills examinations, and completion of specified coursework in a second language.

This bill would authorize a teacher who possesses a credential or permit, as required under existing law, and is able to present an out-of-state credential or certificate that authorizes the instruction of English language learners, to qualify for the specified certificate by submitting an application and fee to the commission.

(5) Existing law provides that the requirements for a preliminary multiple or single subject teaching credential include, among other things, completion of an accredited program of professional preparation, as specified. Existing law provides that the minimum requirements for the professional clear multiple or single subject teaching credential include, among other things, preparation, in accordance with commission standards, that addresses certain education and experience.

This bill would eliminate the contingency that each teacher preparation program include a specified teaching performance assessment only if funds are available in the annual Budget Act for this purpose. The bill would make revisions to the minimum requirements for the professional clear multiple or single subject teaching credential.

(6) Existing law requires the commission to waive the requirements for completion of a program of professional preparation for any individual with a minimum of 6 years of full-time teaching experience in an accredited private school in the subject and level of the credential sought if the individual complies with certain requirements.

This bill would also require the individual to comply with satisfying the requirement for preparation in the instruction of pupils who are English language learners, as specified.

(7) Existing law establishes the requirements for credentials for teaching specialties and requires the commission to ensure that, in adopting the rules and regulations establishing the requirements for the special education specialty, teachers have sufficient knowledge and experience, as specified.

This bill would require the commission, by December 1, 2007, to report to the Legislature and the Governor on the process and requirements for obtaining a specialist credential in special education and recommend modifications to enhance and expedite these procedures.

(8) Existing law requires the commission to issue a 5-year preliminary multiple subject teaching credential, a 5-year preliminary single subject teaching credential, or a 5-year preliminary education specialist credential authorizing instruction of special education pupils to any out-of-state prepared teacher who meets certain requirements.

This bill would substantially revise the requirements for issuance of the specified credentials to out-of-state prepared teachers. The bill would delete certain requirements in existing law relating to credentialing of out-of-state teachers.

(9) Existing law establishes certain requirements regarding individual programs of professional growth for teachers. Existing law permits a holder of a clear teaching credential to appeal an adverse action by a school principal, specified mentor teacher, or other district designee related to professional growth, as specified.

This bill would substantially revise the requirements regarding individual programs of professional growth for teachers. The bill would delete the provision relating to the appeal of an adverse action.

(10) Existing law prohibits the commission from issuing to the holder of an invalidated clear teaching credential another teaching credential of the same type and, instead, provides that the holder of the invalidated credential is eligible for reinstatement of the credential, as specified, if the holder has met certain requirements.

This bill would delete these provisions.

(11) Existing law establishes the voluntary California Beginning Teacher Support and Assessment System, also known as the Marian Bergeson Beginning Teacher Support and

Assessment System, that includes providing an effective transition into the teaching career for first- and second-year teachers, and ensuring that an individual induction plan is in place for each participating teacher.

This bill would require the Superintendent and the commission to report to the Legislature and the Governor on the system by December 1, 2007, as specified. The bill would require the Superintendent and the commission to review and revise, as necessary, the Standards of Quality and Effectiveness for Professional Teacher Induction Programs of March 2002 by July 1, 2008, as provided.

(12) Existing law requires a program of professional preparation to include a teaching performance assessment, as specified, in order to meet the requirements for a preliminary multiple or single subject teaching credential. Existing law requires the commission to undertake specified duties regarding the performance assessment, subject to the availability of funds in the annual Budget Act.

This bill would change the performance assessment requirement to begin July 1, 2008, and would delete certain provisions in existing law relating to performance assessments. The bill would change the requirement that assessments conducted pursuant to specified provisions be subject to the annual Budget Act to a statement of legislative intent that the assessments conducted pursuant to specified provisions be fully funded.

(13) Existing law requires the commission to award incentive grants to qualifying school districts or county offices of education for alternative certification programs from funds appropriated for this purpose but excludes certain participants in specified intern programs from being eligible for the funding.

This bill would authorize the commission to award funding up to a total of \$4,000 per intern per year, in addition to specified incentive grants, to any school district or county office of education that agrees to enhance internship programs and to address the distribution of teacher interns as specified from funds appropriated for this purpose.

(14) Existing law requires each school with a substantial population of pupils of diverse ethnic backgrounds to provide an in-service preparation program designed to prepare teachers and other professional school service personnel to understand and effectively relate to the history, culture, and current problems of these pupils and their environment, as specified.

This bill would delete this and the related provisions.

(15) Existing law includes various requirements for teacher and credential candidate training.

This bill would establish the Certificated Staff Mentoring Program to encourage excellent, experienced teachers to teach in staff priority schools and to assist teacher interns during their induction and first years of teaching. The bill would require the Superintendent to apportion funds appropriated for the program and would permit certain school districts to apply for reimbursement under the program for the costs of \$6,000, or another amount as specified in the Budget Act of the appropriate fiscal year, stipends to experienced teachers who meet certain criteria.

(16) Existing law establishes various programs related to teacher recruitment and training.

This bill would require the Superintendent to designate up to 6 regions of the state and place school districts within those regions. The bill would require the Superintendent to select, from among the county offices of education that apply, an office within each region that is most likely to have the capacity to serve all school districts within the region, to establish and house a personnel management assistance team to assist and serve school districts within that region, as specified. The bill would permit the Superintendent to grant funds to the selected offices from funds appropriated for those purposes and to provide further technical assistance to the offices. The bill authorizes the Superintendent to select one of the county offices with a team to serve as a clearinghouse of effective personnel management and hiring practices.

(17) Existing law requires each person employed by a school district in a position requiring certification qualifications, except as specified, to be classified on the salary schedule on the basis of uniform allowance for years of training and years of experience, except if a public school employer and the exclusive representative negotiate and mutually agree to a salary schedule based on other criteria, as specified. Existing law prohibits placing employees in different classifications on the schedule or paying different salaries solely based on the respective grade levels in which the employee serves.

This bill would permit a public school employer and the exclusive representative of credentialed teachers to jointly apply to the Superintendent for technical assistance and planning grant funding to facilitate the planning of a salary schedule for teachers based on criteria in addition to years of training and years of experience and would permit the Superintendent to make grants from funds appropriated for these purposes.

(18) Existing law authorizes charter schools that elect to receive their funding directly to apply individually for federal and state categorical programs that are not specifically excluded by that provision. Existing law, for the 2006–07 fiscal year and each fiscal year thereafter, prohibits charter schools from applying for any of several specified categorical programs, including, among others, the teacher credentialing block grant.

This bill would delete the teacher credentialing block grant from that list of categorical programs.

(19) This bill would correct cross-references and make conforming and other technical changes.

#### Ch. 518 (SB 1655) Scott Teachers: voluntary transfers.

Existing law authorizes the superintendent of a school district, upon adoption by the governing board of the school district of a policy concerning transfers of teachers from one school to another school within the district, to transfer teachers consistent with that policy.

This bill would, notwithstanding that authority, prohibit a superintendent from transferring a teacher who requests to be transferred to a school offering kindergarten or any of grades 1 to 12, inclusive, that is ranked in deciles 1 to 3, inclusive, on the Academic Performance Index if the principal of the school refuses to accept the transfer. The bill would prohibit the governing board of a school district from adopting a policy or regulation, or entering into a collective bargaining agreement, that assigns, after April 15 of the school year prior to the school year in which the transfer would become effective, priority to a teacher who requests to be transferred to another school over other qualified applicants who have applied for positions requiring certification qualifications at that school. The bill would provide that, if its prohibitions are in direct conflict with the terms of a collective bargaining agreement in effect on January 1, 2007, those prohibitions become operative with regard to the employees governed by that agreement upon its expiration.

#### Ch. 519 (SB 1690) Romero Unemployment insurance: disability compensation and employment training contracts.

(1) Existing unemployment compensation disability law provides a formula for determining benefits available to qualifying disabled individuals. For an individual who has quarterly base wages of greater than \$1,749.20, the weekly benefit is calculated by multiplying base wages by 55% and dividing the result by 13. For a benefit that is not a multiple of \$1, existing law provides that the benefit shall be computed to the next higher multiple of \$1. However, existing law provides that this amount may not exceed the maximum workers' compensation temporary disability indemnity weekly benefit amount.

This bill would provide that, notwithstanding the limitation placed on the workers' compensation disability indemnity weekly benefit amount, any benefit that is not a multiple of \$1 shall be computed to the next higher multiple of \$1. Because this bill would increase the amount payable from the Unemployment Compensation Disability Fund, a continuously appropriated special fund, this bill would make an appropriation.

(2) Under existing law, the Employment Training Panel has specified duties, including the duty to make contracts for training in job-related vocational skills, as specified. Existing law permits the panel, subject to certain requirements, to allocate a specified percentage of annual training funds for the purpose of funding special employment training projects to improve the skills of frontline workers, as defined.

This bill would authorize the panel to allocate funds for training in job-related vocational skills to increase the productivity and extended retention of workers in the state's major seasonal industries, as defined, and would authorize the panel to waive certain requirements contained in existing law under specified conditions.

Ch. 520 (SB 1802) Ducheny Farmworker housing.

(1) The Employee Housing Act deems employee housing consisting of no more than 12 beds in a group quarters or 12 units or spaces designed for use by a single family or household, an agricultural land use for designated purposes.

This bill would revise this number to no more than 36 beds in a group quarters or 12 units or spaces, as specified above. By increasing the duties of local public officials, the bill would impose a state-mandated local program.

(2) Existing law prohibits an area or tract of land zoned for agricultural purposes where 2 or more lots are rented, leased, or held out for rent or lease to accommodate owners or users of 12 or fewer recreational, manufactured homes, or mobilehomes from being deemed a recreational vehicle park or mobilehome park.

This bill would extend this prohibition to employee housing that obtains a permit to operate pursuant to the Employee Housing Act, meets criteria specified in that act, and is comprised of 2 or more lots or units held out for lease or rent or provided as a term or condition of employment.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 521 (AB 2043) Committee on Banking and Finance Debt collection: businesses: identity theft.

Existing state and federal law regulate the collection of debts, and existing state law requires a debt collector to stop collecting a consumer debt when an alleged debtor provides the debt collector certain information, including, but not limited to, information relating to the alleged debtor's status as a victim of identity theft. Existing law permits the debt collector to recommence collection activities only upon a review of the information and upon the making of a good faith determination, as specified, that the information provided by the debtor does not establish that the debtor is not responsible for the debt.

This bill would extend the debtor protections described above to a natural person, firm, association, organization, partnership, business trust, company, corporation, or limited liability company from which a debt collector seeks to collect a debt that is due and owing or alleged to be due and owing from the person or entity.

Ch. 522 (AB 2886) Frommer Crime.

Existing law provides that every person who, with the intent to defraud, acquires, transfers, or retains possession of the personal identifying information of another person is guilty of a crime punishable by a fine, by imprisonment in a county jail not to exceed one year, or by both a fine and imprisonment.

This bill would instead provide that every person who, with the intent to defraud, acquires or retains possession of the personal identifying information of another person, and who has

previously been convicted of a violation of provisions proscribing identity theft, or who, with the intent to defraud, acquires or retains possession of the personal identifying information of 10 or more other persons, shall be punished by a fine, by imprisonment in a county jail not to exceed one year, or by both a fine and imprisonment, or by imprisonment in the state prison. This bill would also provide that any person who, with intent to defraud, sells, transfers, or conveys the personal identifying information of another person shall be punished by a fine, by imprisonment in a county jail not to exceed one year, or by both a fine and imprisonment, or by imprisonment in the state prison. This bill would also provide that any person who, with actual knowledge that the personal identifying information of a specific person will be used in violation of identity theft provisions who sells, transfers, or conveys that personal identifying information shall be punished by a fine or by both a fine and imprisonment, or by imprisonment in the state prison.

This bill would specify that, for purposes of these provisions, "person" includes natural persons living and deceased, and organizations, associations, business relationships and other legal entities, expand the definition of "personal identifying information" to include any form of identification equivalent to those already listed, and make other conforming changes.

Because this bill would expand the definition of existing crimes and create new crimes, it would impose a state-mandated local program.

Existing federal law provides that mail theft is punishable by a fine, imprisonment for a period not exceeding 5 years, or by both.

This bill would provide that mail theft, as defined, is punishable by a fine, imprisonment in a county jail for a period not exceeding one year, or by both a fine and imprisonment. Because this bill would create new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 523 (SB 354) Escutia Hazardous materials release: remediation.

Existing law, the California Land Environmental Restoration and Reuse Act (CLERRA), specifies a procedure for the selection of an oversight agency for a property subject to a phase I environmental assessment by representatives of the Department of Toxic Substances Control (department) and the State Water Resources Control Board. The act authorizes a local agency to issue a notice requiring the owner or operator to conduct a phase I environmental assessment of certain property, in response to the release or the threat of a release of a hazardous material and to protect human health and the environment, as specified. The act also authorizes the local agency to require the owner or operator to prepare a preliminary endangerment assessment under specified conditions and require or initiate an investigation and remedial action. The act defines the term "property" as meaning real property, but excludes from that definition, among other things, a site that is or becomes subject to a specified enforcement action or order issued by a California regional water quality control board (regional board) or a specified enforcement action by the department; and a site that is or becomes subject to a corrective action requirement or for which a no-further-action determination has been issued by a regional board or a local oversight program as specified, unless a specified finding is made.

This bill would delete those exclusions from the definition of "property" in the act, and would thus include in the act, as "property," a site that is described in one of those exclusions. The bill also would correct an erroneous cross-reference.

The bill also would correct the definition of "environmental assessor" in the act to mean, among others, a class II environmental assessor registered by the Department of Toxic Substances Control instead of the Office of Environmental Health Hazard Assessment.

Ch. 524 (SB 472) Alquist Instructional programs: Mathematics and Reading Professional Development Program.

Existing law establishes the Mathematics and Reading Professional Development Program, which is administered by the Superintendent of Public Instruction with the approval of the State Board of Education. Under this program, a local education agency, as defined, receives incentive funding to provide training in mathematics and reading to teachers and to provide training to instructional aides and paraprofessionals, as defined, who directly assist with classroom instruction in mathematics and reading. Under existing law, the program becomes inoperative on July 1, 2006, and is repealed on January 1, 2007.

This bill would extend the operation of the program until July 1, 2012, when the program would become inoperative. The bill would provide for the repeal of these provisions on January 1, 2013.

This bill also would remove the authority of the Superintendent of Public Instruction to allocate funding for training at a California Professional Development Institute. The bill would repeal the provisions granting priority for participation in the program to teachers who have not participated in professional development at a California Professional Development Institute, or have received this training but have not participated in supplemental training regarding the math and English language arts content standards and curriculum frameworks adopted by the State Board of Education.

This bill would add, to the subjects of provider-contracted professional development training and in-house professional development that a local education agency must certify that its proposal satisfies as a condition of receiving specified funding, training using instructional strategies to teach essential content to address the varied learning needs of pupils, with an emphasis on English language learners and pupils with exceptional needs. The bill would specify that the 40 hours of the professional development that a local education agency must certify has occurred has been based on the statewide academic content standards and related adopted or standards-aligned instructional materials.

This bill would remove the provisions allowing a school district, charter school, or county office of education to claim funding under a program that has been repealed. This bill would repeal the provisions requiring the State Board of Education to determine whether professional development programs not operated pursuant to the California Professional Development Institute meet minimum criteria. The bill would also repeal the provision authorizing the State Board of Education to contract for the review of certified assurances by local education agencies regarding training.

The bill would require the State Department of Education to provide funding to local education agencies, with the approval of the State Board of Education, to provide professional development in reading language arts and mathematics to teachers of English language learner pupils. The bill would require the training providers, as defined, to have knowledge of the English language arts content standards, the mathematics content standards, the English language development standards, second language acquisition skills, and a thorough knowledge of specified instructional materials.

The bill would require the Superintendent of Public Instruction to provide funding, from a specified item of the Budget Act of 2006, to provide eligible elementary and secondary teachers with 40 hours of instruction, followup instruction, and support in specified areas. The bill would authorize the provision of funding under this program to all local education agencies, and would establish priorities and eligibility standards for the provision of this funding.

The bill would require the Superintendent of Public Instruction to appoint an advisory committee, consisting of at least 8 members, in order to ensure the quality and effectiveness of specified training provided under the bill. The bill would specify the qualifications required of the members of the advisory committee, as well as the general subject matter of the recommendations to be received by that committee.

This bill would delete a provision requiring cooperation between the State Department of Education and the University of the California and the California Professional Development Institute regarding a report by the State Department of Education on the effectiveness of the program. The bill would add survey data regarding program effectiveness and preprogram and postprogram pupil achievement, as well as retention rates of teachers, instructors, and paraprofessionals who participated in the program training, to the requirements for the report contents.

This bill would repeal the provisions authorizing professional development through this program to be provided through the California Professional Development Institute and related funding. The bill would also repeal a provision providing authority for this professional development to be provided at sites not located on a college or university campus.

This bill would express the intent of the Legislature to ensure that specified program training does not solely rely on state-adopted instructional materials to teach statewide academic content standards, and also express the intent of the Legislature to work with the State Board of Education and State Department of Education to achieve these goals.

The bill would also make various technical and conforming changes to the statutes governing the program.

The bill would appropriate \$120,000, without regard to fiscal year, from the General Fund to the Superintendent of Public Instruction for the purposes of the administration, by the State Department of Education, of the program, and would authorize the establishment of a position in the department for these purposes.

**Ch. 525 (SB 676) Ashburn Medi-Cal: pharmacy reimbursement.**

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits, including prescription drugs, are provided to public assistance recipients and certain other low-income persons.

This bill would authorize the department to establish per diem or bundled reimbursement rates for pharmacies that provide home infusion supplies and services for eligible pharmacies.

**Ch. 526 (SB 739) Speier Hospitals: infection control.**

Existing law provides for the licensure and regulation by the State Department of Health Services of health facilities, including general acute care hospitals, as defined. A violation of these provisions by a health facility is a crime. Existing law requires health facilities to implement various measures to protect against the spread of infection in health facilities.

This bill would establish the Hospital Infectious Disease Control Program, which would require the department and general acute care hospitals to implement various measures relating to disease surveillance and the prevention of health care associated infection (HAI). In that regard, the bill would require the department, by July 1, 2007, to appoint a Healthcare Associated Infection (HAI) Advisory Committee, composed of specified members, that would be required to make recommendations related to methods of reporting cases of hospital acquired infections occurring in general acute care hospitals, as provided.

The bill would require each general acute care hospital, in collaboration with infection prevention and control professionals, and with the participation of senior health care facility leadership, as a component of its strategic plan, at least once every 3 years, to prepare a written report that examines the hospital's existing resources and evaluates the quality and effectiveness of the hospital's infection surveillance and prevention program, including specified information. The bill would require each general acute care hospital that uses central venous catheters (CVCs) to implement policies and procedures to prevent occurrences of HAI, as recommended by specified guidelines and other evidence.

The bill would require the department, by July 1, 2007, to require that each general acute care hospital, in accordance with specified guidelines, implement specified measures

designed to prevent the spread of influenza in those hospitals, and would require the department, by January 1, 2008, to take specified actions to protect against HAI in general acute care hospitals statewide, as provided.

The bill would require each general acute care hospital, on and after January 1, 2008, to implement and annually report to the department on its implementation of infection surveillance and infection prevention process measures that have been recommended by the Centers for Disease Control and Prevention (CDC) Healthcare Infection Control Practices Advisory Committee. It would require the department to make this information public within a specified period. The bill would require the department, by January 1, 2009, to require each general acute care hospital to develop, implement, and periodically evaluate policies and procedures to prevent secondary surgical site infections, and to implement the current CDC guidelines and other prescribed process measures designed to prevent ventilator associated pneumonia, as specified. It would require the department, during surveys, to evaluate the facility's compliance with existing policies and procedures to prevent HAI, as specified.

By increasing the duties of local health officials with respect to service on the advisory committee, and imposing various new duties on acute care hospitals with respect to disease surveillance and prevention, a violation of which would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

**Ch. 527 (SB 470) Ducheny Tribal gaming: compact ratification.**

Existing federal law, the Indian Regulatory Act, provides for the negotiation and execution of tribal-state gaming compacts for the purpose of authorizing certain types of gaming on Indian lands within a state. Existing state law ratifies a number of tribal-state gaming compacts between the State of California and specified Indian tribes.

This bill would ratify the amendment of a tribal-state gaming compact entered into on June 26, 2006, between the State of California and the Quechan Tribe of the Fort Yuma Indian Reservation. The bill would provide that the terms of each compact apply only to the State of California and the tribe that has signed it, and the terms of these compacts do not bind any tribe that is not a signatory to any of the compacts. The bill would acknowledge the right of federally recognized tribes to exercise their sovereignty to negotiate and enter into compacts with the state that are materially different from the compacts ratified pursuant to these provisions.

**Ch. 528 (SB 1130) Committee on Budget and Fiscal Review Human services.**

(1) Existing law establishes within the Special Deposit Fund the State Department of Health Services Licensing and Certification Program Account, and specifies that revenues collected for the licensing of specified health care providers shall be deposited in the account, for allocation, upon appropriation by the Legislature, to support the department's licensing and certification program.

This bill would redesignate this account as a separate fund in the State Treasury, to be known as the State Department of Health Services Licensing and Certification Program Fund, and would make related technical changes.

(2) Existing law provides that if the State Department of Social Services finds that a county is experiencing significantly worsened CalWORKs outcome plans, it shall report this

finding to the Chairs of the Senate Committee on Budget and Fiscal Review, the Assembly Committee on Budget, the Senate Committee on Health and Human Services, and the Assembly Committee on Human Services.

Existing law also provides that if a county fails, without good cause, to submit accurate and timely data used to measure work participation, as required by the department, it shall be deemed to have failed to meet applicable federal requirements, and to the extent that there are differences between state and federal program requirements, the degree of success in meeting state participation.

This bill would eliminate the requirement that the extent to which there are differences between state and federal requirements shall be used in determining the degree of success in meeting state participation requirements.

This bill would also state the change made by Chapter 75 of the Statutes of 2006 to these provisions is declarative of existing law.

(3) Existing law, through the Kinship Guardianship Assistance Payment Program, which is a part of the CalWORKs program, provides aid on behalf of eligible children who are placed in the home of a relative caretaker, and limits the application of the program to children who have been adjudged a dependent child of the juvenile court and whose dependency has been dismissed on or after January 1, 2000, concurrently or subsequent to the establishment of the kinship guardianship. The program is funded by state and county funding and available federal funds.

This bill would revise the methodology for calculating the state share of funding of benefits and administration under the Kin-GAP Program.

(4) This bill would authorize specified statutory changes made by the bill to be implemented by the State Department of Social Services by all-county letters or similar instructions, pending the adoption of emergency regulations, as prescribed.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 529 (SB 1212) Torlakson Continuing care retirement communities: provider financial requirements.

Existing law provides for the regulation by the State Department of Social Services of activities relating to continuing care contracts that govern care provided to an elderly resident in a continuing care retirement community for the duration of the resident's life or a term in excess of one year.

Existing law requires that a continuing care contract shall contain specified elements, including requirements for procedures and conditions under which a resident of a continuing care retirement community may be transferred.

This bill would revise those elements.

Existing law also requires that a continuing care contract shall contain a provision indicating whether a resident's rights under the contract include any proprietary interest in the assets of the provider or in the continuing care retirement community, or both.

This bill would specify that any statement in a contract concerning an ownership interest shall appear in a large-sized font or print.

Existing law requires an applicant for construction of a new continuing care retirement community, or for a construction project to add new units to an existing continuing care retirement community, before beginning construction, to obtain a written acknowledgment from the department that certain prerequisites have been met, including that the applicant has deposits equal to at least 20% of each depositor's applicable entrance fee placed into escrow for at least 50% of the number of residential living units to be constructed. Existing law requires an applicant seeking a release of escrowed funds to petition in writing to the department to certify, among other things, that at least 20% of the total of each applicable entrance fee has been received and placed in escrow for at least 60% of the total number of residential living units.

This bill would reduce the percentages of each depositor's applicable entrance fee required to be placed into escrow by an applicant from 20% to 10%.

Existing law requires each continuing care provider to submit an annual report of its financial condition, consisting of audited financial statements and required reserve calculations.

This bill would also require that the report shall include the disclosure of any funds accumulated for identified projects or purposes and any funds maintained or designated for specific contingencies.

**Ch. 530 (SB 1248) Alquist Long-term health care facilities: resident rights.**

Existing law provides for the licensure and regulation by the State Department of Health Services of skilled nursing and intermediate care facilities. Existing law requires that written policies regarding the rights of patients be established and made available by such a facility to the patient, to any guardian, next of kin, sponsoring agency, or representative payee, and to the public. Existing law requires those policies and procedures to ensure that each patient admitted to the facility has certain rights and is notified of certain facility obligations, in addition to those specified by regulation.

This bill would require, as of July 1, 2007, that those written policies and procedures ensure, in addition, that specified federal regulations regarding the rights of residents in long-term care facilities and the duties of those facilities toward their residents are applied to the skilled nursing facility or intermediate care facility, regardless of a resident's payment source or the Medi-Cal or Medicare certification status of the facility in which the resident resides, except as specified.

**Ch. 531 (SB 1360) Kehoe County records: conservation easement registry.**

(1) Existing law requires the county recorder in each county to develop and maintain, within the existing indexing system, a comprehensive index of conservation easements on land in that county. Existing law also requires the county recorder, with respect to conservation easements affecting property within the county, recorded on or after January 1, 2002, to include the conservation easement in the index, if the document is properly labeled, or if a Notice of Conservation Easement is also recorded. Existing law authorizes specified parties to conservation easements to fill out and record a Notice of Conservation Easement for conservation easements recorded prior to January 1, 2002. The Notice of Conservation Easement states that no fee is required for recording the document pursuant to a provision exempting state and local officials from such fees.

This bill would delete from the Notice of Conservation Easement the statement that no fee is required by that provision.

(2) Existing law authorizes various agencies to acquire land for purposes related to conservation. Existing law specifies certain requirements and procedures for the acquisition of conservation lands.

This bill would require the Secretary of the Resources Agency to establish a central public registry of all conservation easements, as defined, held or required by the state, or purchased with state grant funds provided by any agency, department, or division of the state on or after January 1, 2006. The bill would provide that the registry shall be available for use by the general public, on or before January 1, 2009. The bill would require the registry to include, and the secretary to provide on the Internet, information on these conservation easements, as specified.

**Ch. 532 (SB 1278) Alquist Alfred E. Alquist Seismic Safety Commission.**

The Seismic Safety Commission Act creates the Seismic Safety Commission in state government and requires it to report annually to the Governor and Legislature on its findings, progress, and recommendations relating to earthquake hazard reduction. Members of the

commission are paid per diem expenses of \$50 for each day's attendance at a commission meeting.

This bill would rename the commission the Alfred E. Alquist Seismic Safety Commission. It would place the commission within the State and Consumer Services Agency as an independent unit.

Existing law establishes the membership of the commission to consist of 17 members.

This bill would increase the membership of the commission to 20 members.

The commission is authorized to conduct a specific comprehensive investigation of a May 2, 1983, earthquake involving Coalinga, provide funding and expert technical assistance to the people of Coalinga for planning and reconstruction, and prepare and publish a comprehensive report on the Coalinga earthquake.

This bill would increase the commission member's per diem to \$100, with certain exceptions, and would delete the commission's duties specific to the 1983 Coalinga earthquake.

This bill would make technical corrections.

Ch. 533 (SB 834) Figueroa Department of General Services: information technology.

(1) Existing law, the Governor's Reorganization Plan No. 2 (GRP No. 2), effective July 9, 2005, established the Department of Technology Services in state government, under the Director of Technology Services, within the State and Consumer Services Agency, and the Technology Services Board, with a specified membership, within the department. That plan authorized the department to acquire, install, equip, maintain, and operate new or existing business telecommunications systems and services and requires it to coordinate all matters affecting statewide business telecommunications policy and planning. The plan also limited the authority of the Department of General Services to acquire, install, equip, maintain, and operate communications systems and facilities to public safety agencies.

The plan consolidated and transferred the functions of the Stephen P. Teale Data Center, the California Health and Human Services Agency Data Center, and the Telecommunications Division of the Department of General Services to the department and required the director to administer the department pursuant to a written plan of operations developed with the advice of the board.

The plan also created the Department of Technology Services Revolving Fund within the State Treasury, which is continuously appropriated and available for encumbrance without regard to fiscal years.

Existing law requires the Legislative Counsel to prepare for introduction not later than the next Regular Session of the Legislature occurring more than 90 days after the effective date of GRP No. 2, a bill effecting these changes in the statutes to reflect the changes made by the plan.

This bill would make the statutory codification changes made necessary by the plan taking effect on July 9, 2005, except that it would instead provide that the Department of Technology Services Revolving Fund would be subject to appropriation by the Legislature.

(2) Existing law sets forth the requirements for the acquisition of information technology goods and services by the state, and requires all contracts for the acquisition of those goods and services to be made by or under the supervision of the Department of General Services, with expenditures in this regard subject to the review and approval of the Department of Finance.

This bill would establish in state government the office of State Chief Information Officer, to be appointed by the Governor, subject to Senate confirmation, and set forth the duties of the State Chief Information Officer in the coordination of state information technology services.

(3) This bill would incorporate additional changes to Section 12804 of the Government Code, proposed by AB 1278, to be operative only if AB 1278 and this bill are enacted, both bills amend the respective section, and this bill is enacted after AB 1278.

Ch. 534 (SB 1568) Dunn Law schools and law degree programs.

Existing law provides for the regulation of the practice of law by the State Bar of California, and authorizes the Committee of Bar Examiners to fulfill certain functions. Under existing law, until July 1, 2007, the committee is responsible for the approval, regulation, and oversight of accredited degree-granting law schools that exclusively offer specified degrees in law, and are not otherwise exempt due to national accreditation. This provision does not apply to unaccredited law schools, which, until July 1, 2007, remain subject to the jurisdiction of the Bureau for Private Postsecondary and Vocational Education. Existing law authorizes an unaccredited law school to refer to itself as a university or part of a university and requires the bureau and the Attorney General to take specified action with regard to this provision. Existing law requires unaccredited law schools to meet specific requirements, and exempts correspondence schools from certain of those requirements.

This bill would delete the date on which the provision making the Committee on Bar Examiners responsible for the approval, regulation, and oversight of those accredited degree-granting law schools becomes inoperative, and would, on and after January 1, 2008, additionally apply those provisions to unaccredited law schools. The bill would require the committee to adopt rules, which would take effect January 1, 2008, for the regulation and oversight of unaccredited law schools and nonlaw school legal programs leading to a J.D., LL.B., or other law study degree. The bill would require the committee, commencing January 1, 2008, to assess and collect a fee from the schools and programs in an amount sufficient to fund these regulatory and oversight responsibilities and would, effective January 1, 2008, delete the duties imposed on the Bureau for Private Postsecondary and Vocational Education and on the Attorney General related to unaccredited law schools. The bill would also delete the exception for correspondence schools from specified unaccredited law school requirements.

Ch. 535 (SB 1574) Kuehl Sacramento-San Joaquin Delta.

Existing law establishes the Resources Agency in state government and grants to that agency various supervisory powers over the state's resources. Existing law requires the Department of Water Resources and the Department of Fish and Game to identify, evaluate, and comparatively rate the principal options available to implement certain objectives that relate to the Sacramento-San Joaquin Delta or the Sacramento and San Joaquin river systems. Existing law requires the departments to jointly report to the Legislature and the Governor the results of their evaluations and comparative ratings, as specified, no later than January 1, 2008.

This bill additionally would require the Secretary of the Resources Agency to convene a committee, with membership as prescribed, to develop and submit to the Governor and the Legislature, on or before December 31, 2008, a Strategic Vision for a Sustainable Sacramento-San Joaquin Delta, with specified components. The bill would authorize the committee, its members, and state agencies represented on the committee to enter into specified contracts.

Ch. 536 (SB 1638) Figueroa Midwives: advisory council: annual report.

Existing law, the Licensed Midwifery Practice Act of 1993, provides for the licensing and regulation of midwives by the Board of Licensing of the Medical Board of California. A violation of the act is a crime.

This bill would provide for the creation of a Midwifery Advisory Council, as specified. The bill would also require each licensed midwife who assists, or supervises a student midwife in assisting, in childbirth occurring in an out-of-hospital setting to annually report

to the Office of Statewide Health Planning and Development certain information regarding his or her practice for the previous year. The bill would require the office to maintain the confidentiality of the information submitted pursuant to this requirement. The bill would require the office to report annually to the board those licensees who have complied with the bill's requirements, and would require the board to send a notice of noncompliance to those licensees who have not. The bill would require the office to report the aggregate information to the board, and would require the board to report that aggregate information to the Legislature in its own annual report. The bill would provide that a violation of these requirements is not a crime, but failure by the midwife to comply with the requirements would preclude renewal of the midwife's license.

Ch. 537 (SB 1670) Aanestad Radiologic technology.

Existing law requires the State Department of Health Services to adopt regulations for the granting, with certain exceptions, of radiologic technology certificates to persons to perform procedures or applications of X-rays without limitation, except as specified by law, and of limited permits to persons to conduct radiologic technology limited to the performance of certain procedures or the application of X-rays to specific areas of the human body, and to prescribe minimum training, experience, and examination standards and procedures. Violation of these provisions is a crime. Existing law requires the department to appoint a certification committee to make recommendations pertaining to these regulations.

This bill would require the department to provide, upon recommendation of the committee, that a radiologic technologist who operates digital radiography equipment devote continuing education credit hours to digital radiologic technology. This bill would also authorize specified limited permitholders with at least 20 hours of instruction in digital radiologic technology, to perform digital radiography. The bill would require the department to provide, upon recommendation of the committee, that a limited permit X-ray technician who has completed this education also devote continuing education credit hours to additional instruction in digital radiologic technology. It would also require that an applicant for approval as a limited permit X-ray technician have at least 50 hours of education in radiological protection and safety.

Existing law requires the department to provide for approval of schools for radiologic technologists.

This bill would require those schools to include 20 hours of instruction in digital radiography, except as specified.

By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 538 (SB 1852) Committee on Judiciary Maintenance of the codes.

Existing law directs the Legislative Counsel to advise the Legislature from time to time as to legislation necessary to maintain the codes.

This bill would make technical, nonsubstantive changes in various provisions of law to effectuate the recommendations made by the Legislative Counsel to the Legislature.

Ch. 539 (AB 105) Cohn Victims' compensation.

Existing law provides that crime victims may be awarded compensation by the California Victims Compensation and Government Claims Board from the state Restitution Fund for the pecuniary losses they suffer as a direct result of criminal acts. The awarding of compensation is subject to application procedures, eligibility requirements, and specified limits on the amount of compensation. Existing law specifically authorizes the board to

authorize a cash payment or reimbursement not to exceed \$2,000 for relocation expenses to a victim for a single crime.

This bill would permit the board to authorize expenses to a victim for more than one relocation per crime, but would prohibit the total cash payment or reimbursement for all relocations due to the same crime from exceeding \$2,000.

Ch. 540 (AB 120) Cohn Physical therapy: continuing education.

Existing law, the Physical Therapy Practice Act, licenses and regulates the practice of physical therapy by the Physical Therapy Board of California, and establishes educational requirements for licensure of physical therapists and approval of physical therapist assistants. Existing law requires that all fees and penalties collected by the board be credited to the Physical Therapy Fund, a continuously appropriated fund, to pay for expenses of administering the act. It makes a violation of the act's provisions a crime.

This bill would require a person who renews his or her physical therapy license or physical therapy assistant approval to submit proof of completion of continuing education hours or other proof of continuing competency, as established by the board, and would require the board to adopt and administer regulations to ensure continuing competency of physical therapists and physical therapy assistants, as specified.

This bill, by allowing the board to fund the license renewal program through license fees and fees assessed on the continuing education providers, which would be credited to the Physical Therapy Fund, would make an appropriation. The bill would also clarify that holders of approvals are required to disclose criminal convictions upon application for renewal.

Because a violation of this bill's provisions would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 541 (AB 371) Goldberg Water recycling.

(1) The Water Recycling Law regulates recycled water. That law requires each California regional water quality control board, after consulting with and receiving the recommendations of the State Department of Health Services and any party who has requested in writing to be consulted, and after any necessary hearing, if in the judgment of the board, it is necessary to protect the public health, safety, or welfare, to prescribe water reclamation requirements for water that is used or proposed to be used as reclaimed water.

This bill would require a recycled water producer to notify the Department of Transportation and the Department of General Services if the recycled water producer determines that, within 10 years, it proposes to provide recycled water for use for state landscape irrigation that meets certain conditions and would require all pipe installed by those state agencies for landscape irrigation within the area identified by the notice to meet prescribed requirements.

The bill, subject to the appropriation of funds for that purpose, would require the Department of Water Resources, in consultation with the State Department of Health Services, on or before July 1, 2008, to adopt and submit to the California Building Standards Commission regulations to establish a state version of Appendix J of the Uniform Plumbing Code to provide design standards to safely plumb buildings with both potable and recycled water systems.

(2) This bill would require that its provisions be known as the Water Recycling Act of 2006. The bill would make related legislative findings and declarations.

Ch. 542 (AB 521) Sharon Runner Transportation facilities: public-private partnerships.

Existing law, as amended by Chapter 32 of the Statutes of 2006, authorizes the Department of Transportation and regional transportation agencies, as defined, until January 1, 2012, to enter into up to 4 comprehensive development lease agreements with public and private entities, or consortia of those entities, for certain transportation projects that may charge certain users of those projects tolls and user fees, subject to various terms and requirements. Under these provisions, all negotiated lease agreements must be submitted to the Legislature for approval or rejection, with approval to be achieved by enactment of a statute.

This bill would modify these provisions to instead provide that the Legislature has 60 legislative days to act after submittal of a negotiated lease agreement. The agreement would be deemed approved unless both houses of the Legislature concur in the passage of a resolution rejecting the agreement.

Ch. 543 (AB 530) Plescia Medi-Cal: withholding payments or suspension: informal hearing.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care services.

Existing law authorizes the department to suspend a provider of service from further participation in the Medi-Cal program in order to protect the health of recipients and the funds appropriated to carry out the Medi-Cal program. The suspension may be for an indefinite or specified period of time, with or without conditions, or imposed with the operation of the suspension stayed or probation granted.

Existing law authorizes the department to withhold payment for any goods, services, supplies, or merchandise upon receipt of reliable evidence of fraud or willful misrepresentation by the provider or the commencement of suspension proceedings.

This bill would require the department to develop, in consultation with provider representatives, including, but not limited to, physician, pharmacy, and medical supplies providers, a process that enables a provider to meet and confer with the appropriate department officials within 30 days after the issuance of a letter notifying the provider of a temporary withhold of payments or a temporary suspension sanction for the purpose of presenting and discussing information and evidence that may impact the department's decision to initiate the sanction or modify or terminate the sanction.

Ch. 544 (AB 631) Leno Narcotic treatment programs: mobile service units.

Existing law requires the State Department of Alcohol and Drug Programs to license narcotic treatment programs to use replacement narcotic therapy in the treatment of drug addicted persons and prohibits a program from operating without a license. Existing law requires the department to, among other things, establish and enforce narcotic treatment program operation guidelines, inspect programs to ensure that they are operating in accordance with the law and adopted regulations, and charge and collect an annual license fee. Existing law authorizes licensed narcotic treatment programs to use methadone in replacement narcotic therapy.

This bill would require the department, until January 1, 2010, to establish a program for the operation and regulation of mobile narcotic treatment programs. The bill would require a mobile narcotic treatment program to hold a primary narcotic treatment program license or be affiliated and associated with a primary licensed narcotic treatment program.

Ch. 545 (AB 633) Benoit Child day care facilities: licensing.

(1) The California Child Day Care Facilities Act provides for the licensing and regulation of child day care facilities, including day care centers, by the State Department of Social

Services. The act makes it a misdemeanor to willfully or repeatedly violate certain provisions or certain rules or regulations.

The act requires each licensed child day care facility to make accessible to the public a copy of any licensing report pertaining to the facility that documents a facility visit or a substantiated complaint investigation.

This bill would require each licensed child day care facility to make accessible to the public a copy of any licensing report or other public licensing document pertaining to the facility that documents a facility visit, a substantiated complaint investigation, a conference with a local licensing agency management representative and the licensee in which issues of noncompliance are discussed, or a copy of an accusation indicating the department's intent to revoke the facility's license. By expanding the definition of a crime, this bill would impose a state-mandated local program.

(2) The act requires every child care resource and referral program and every alternative payment program to advise every person who requests a child care referral of his or her right to the licensing information of a licensed child day care facility required to be maintained at the facility and to access any public files pertaining to the facility that are maintained by the State Department of Social Services Community Care Licensing Division. The act prescribes the text of a written or oral advisement that will comply with those requirements.

This bill would revise the text of the advisement that will comply with those requirements.

(3) When the department establishes a date for a licensee to correct a deficiency, the act requires the department to provide the licensee with a licensing report or other document verifying compliance or noncompliance. The act authorizes a licensee to make that documentation available to the public.

This bill would require the licensee to make that documentation available to the public.

(4) The act requires each licensed child day care facility to post certain documents and makes failure to comply with posting requirements subject to a civil penalty of \$100.

This bill would require a licensed child day care facility to provide to the parents or legal guardians of each child receiving services in the facility copies of any licensing report that documents a complaint investigation that results in a citation that represents an immediate risk to the health, safety, or personal rights of children in care and copies of any licensing document pertaining to a conference conducted by a local licensing agency management representative with the licensee in which issues of noncompliance are discussed. Upon enrollment of a new child in a facility, the bill would require the licensee to provide to the parents or legal guardians of the newly enrolling child copies of any licensing report or document that the licensee has received during the prior 12-month period pertaining to the above type of complaint investigation or conference. The bill would require the licensee to require each recipient of the above reports and documents to sign a statement indicating that he or she has received the document and the date it was received, and to keep verification of receipt in each child's file.

(5) Whenever the director temporarily suspends the license, registration, or special permit of a child day care facility, the act requires the director or the local licensing agency to send written notification to the parent or legal guardian of each child receiving services in the facility and to post a written notice of the temporary suspension at the facility in a place readily visible and accessible to the parents or legal guardians of children receiving services at the facility. The act makes removal of the posted notice while the temporary suspension is in effect a violation punishable by a fine of \$500.

Upon receipt of an accusation indicating the department's intent to revoke a facility's license, this bill would require the licensee to provide copies of a summary of the accusation to the parent or legal guardian of each child receiving services in the facility until that accusation is either dismissed or resolved through the administrative hearing process or stipulated agreement. Upon enrollment of a new child in a facility, the bill would require the licensee to provide to the parents or legal guardians of the newly enrolling child copies of a summary of any accusation that the licensee has received during the prior 12-month period

that indicates the department's intent to revoke the facility's license. In both circumstances, the bill would require the licensee to require each recipient of the summary of the accusation to sign a statement indicating that he or she has received the document and the date it was received, and to keep verification of receipt in each child's file. The bill would require the department to provide the licensee with the summary of the accusation.

(6) Within 90 days of employing a facility director, this bill would require a licensee to secure verification that the facility director has completed an orientation given by the department.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 546 (AB 768) Nation Touch-screen devices.

Under existing law, individuals with certain disabilities are entitled to equal access rights to various facilities. Existing law requires certain existing point-of-sale systems that include a video touch-screen or nontactile keypad to be equipped, on or before January 1, 2010, with a tactually discernible numerical keypad meeting specified requirements that enables a visually impaired person to enter personal information necessary to process a transaction.

This bill would require, on and after January 1, 2009, a manufacturer or distributor of touch-screen devices used for the purpose of self-service check-in at a hotel, as defined, or at a facility providing passenger transportation services to offer for availability touch-screen self-service check-in devices that enable a person with a visual impairment to enter any personal information, as specified, and to use the device independently and without the assistance of others in the same manner afforded to those without visual impairments.

#### Ch. 547 (AB 797) Wolk Sacramento-San Joaquin Delta.

(1) Existing law authorizes a city or county, upon petition by a landowner, to enter into an agreement with the landowner to rescind a contract, in accordance with specified procedures, in order to place other land within that city, the county, or the county where the contract is rescinded under an agricultural conservation easement.

The bill would, for the purposes of facilitating long-term agricultural land conservation in the Sacramento-San Joaquin Delta, authorize an agricultural conservation easement located within the primary or secondary zone of the delta to be related to contract rescissions in any other portion of the secondary zone without respect to county boundary limitations, as specified.

(2) Existing law creates the Delta Protection Commission consisting of 19 members and specifies that the membership includes various individuals. Existing law provides that a person aggrieved by an action taken by a local government or other local agency in implementing a resource management plan may file an appeal to the commission.

This bill would increase the membership of the commission to 23 members, and would additionally include the public member of the California Bay-Delta Authority who represents the delta region, and 3 public members who are delta residents or delta landowners and who represent various interests in the delta region, as specified, who are appointed by the Governor.

The bill would revise provisions with respect to local government or agency actions and appeals from these actions.

#### Ch. 548 (AB 798) Wolk Delta levee maintenance.

(1) Existing law establishes the Delta Flood Protection Fund in the State Treasury and states the intent of the Legislature that \$12,000,000 be annually appropriated from the fund each year through fiscal year 1998-99, for local assistance under the delta levee maintenance

subventions program and for special delta flood protection projects, as specified. Existing law abolishes the Delta Flood Protection Fund on July 1, 2008.

This bill would additionally state the intent of the Legislature to appropriate from the fund additional moneys as they may become available from proceeds from the sale of bonds issued by the state. The bill would abolish the Delta Flood Protection Fund on July 1, 2010.

(2) Existing law establishes a delta levee maintenance program pursuant to which a local agency may request reimbursement for costs incurred in connection with the maintenance or improvement of project or nonproject levees in the Sacramento-San Joaquin Delta. Existing law declares legislative intent to reimburse eligible local agencies under this program in an amount that equals 50% of those costs that are incurred in excess of \$1,000 per mile of levee and provides that the maximum total reimbursement from the General Fund shall not exceed \$2,000,000 annually.

This bill, instead, would declare legislative intent, in accordance with specified requirements, to reimburse up to 75% of those described costs until July 1, 2010, and on and after that date, to reimburse 50% of those described costs, subject to that \$2,000,000 annual maximum total reimbursement limit. The bill would require the Department of Water Resources, upon completion of a specified evaluation, to recommend to the Legislature and the Governor by January 1, 2008, funding priorities under the program.

(3) Until July 1, 2006, the Reclamation Board was authorized to provide funds to an eligible local agency under this program in the form of an advance in an amount that does not exceed 75% of the estimated state share.

This bill would grant that same authority to the board until July 1, 2010.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 549 (AB 937) Wyland Instruction: science.

Existing law requires the adopted courses of study for grades 1 to 6, inclusive, to include, among other courses, a course in science, as specified.

This bill would authorize the governing board of a school district to designate a credentialed teacher as a science coach at each elementary school, or provide staff development to teachers, in order to develop, coordinate, and provide instruction in an experimental science curriculum, as specified, and coach other teachers in the provision of that curriculum.

#### Ch. 550 (AB 1160) Lieber Crime.

Existing law, Judicial Council of California Criminal Jury Instruction No. 200, provides that is the duty of the trier of fact not to let "bias, sympathy, prejudice, or public opinion" influence its decision.

This bill, the Gwen Araujo Justice for Victims Act, would state legislative findings and declarations regarding the influence of a defendant's bias against the victim upon the trier of fact in a criminal proceeding and defendants' use of panic strategies based upon discovery or knowledge of an actual or perceived characteristic of their victim to decrease criminal culpability for crime.

This bill would also provide that a party may request that the jury receive an instruction that defines bias as inclusive of bias against the victim or victims based upon disability, gender, nationality, race or ethnicity, religion, gender identity, or sexual orientation, in any criminal trial.

This bill would also require the Office of Emergency Services, to the extent funding becomes available for that purpose, to develop practice manuals, as specified, for district attorneys' offices explaining how panic strategies are used to encourage jurors to respond to societal bias and providing best practices for preventing bias from affecting the outcome of a trial.

#### Ch. 551 (AB 1207) Yee Code of Fair Campaign Practices.

Existing law requires that, at the time an individual is issued his or her declaration of candidacy, nomination papers, or other paper evidencing an intention to be a candidate for public office, the elections official provide the individual with a form that the individual may voluntarily sign, titled the "Code of Fair Campaign Practices." Among other things, the Code of Fair Campaign Practices sets forth specified conduct in which the individual pledges not to engage in his or her election campaign.

This bill would revise the pledge contained in the Code of Fair Campaign Practices to provide that the individual shall not, in the conduct of his or her campaign, use a candidate's actual or perceived race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, age, sexual orientation, sex, including gender identity, or any other specified characteristic.

Ch. 552 (AB 1228) Daucher Internet connectivity.

(1) Existing law establishes the Digital High School Education Technology Grant Program of 1997, consisting of one-time installation grants and ongoing technology support and staff training grants, to provide all high school pupils with basic computer skills, to improve pupil achievement in all academic subjects, and to increase collaboration among high schools, private industry, postsecondary educational institutions, and community organizations. The existing Archie-Hudson and Cunneen School Technology Revenue Bond Act authorizes the California School Finance Authority to issue bonds to finance, among other things, the establishment of computer-based networks and telecommunications systems for instructional purposes by school districts.

This bill would establish the K-12 High-Speed Network, as specified, for the purpose of enriching pupil educational experiences and improving pupil academic performance by providing high-speed, high-bandwidth Internet connectivity to the public schools. The bill would require the Superintendent of Public Instruction to use a competitive grant process to select a local educational agency to serve as the Lead Education Agency to administer the network on behalf of the Superintendent. The bill would require the Superintendent to establish a K-12 HSN advisory board to include the Superintendent, the county superintendent of schools of the Lead Education Agency, the Secretary for Education, and other officers of local educational agencies, as specified. The bill would specify the duties of the Lead Education Agency with regard to the administration of the network, including, among other things, contracting for an independent evaluation of the network to be completed by March 1, 2009, and provided to the Superintendent. The bill would require the Superintendent to report the results of that evaluation, as specified, to the Governor and the Legislature by April 30, 2009.

The bill would require the membership of the advisory board to include county superintendents of schools of certain counties and school district superintendents. To the extent that this bill would impose additional duties on those counties and school districts, the bill would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 553 (AB 1245) Wolk West Sacramento Area Flood Control Agency.

Existing law authorizes a joint powers entity created pursuant to an agreement entered into by the City of West Sacramento and specified reclamation districts to exercise the authority granted to reclamation districts under specified provisions of law.

This bill additionally would grant the joint powers entity the authority to accomplish the purposes and projects necessary to achieve and maintain at least a 200-year level of flood

protection and, prior to January 1, 2009, to issue debt to finance those purposes and projects and thereafter continue to levy special assessments to repay that indebtedness, as specified.

Ch. 554 (AB 1286) Evans Community college districts: property: sale or lease.

(1) Existing law authorizes the governing board of any community college district to sell or lease, under specified conditions, real property, as defined, that the community college district owns. Existing law requires state and local agencies, including community college districts, to comply with specified requirements prior to the disposal of surplus land. Existing law excludes from provisions governing the construction of community college facilities and the disposal of property owned by community college districts certain transactions involving the sale or lease of property owned by a community college district if the proceeds of these transactions are expended for capital outlay purposes relating to qualified community college facilities, as defined, and if the district complies with other specified conditions. Existing law includes as one of the specified conditions a requirement that the community college district shall authorize the chancellor and Controller to withhold from its annual apportionment the amount of funds necessary to satisfy its annual payment obligation under the sale contract or lease, including authorization to withhold this amount and specify the amount to be withheld. Existing law states that this authorization shall have precedence over other expenditure obligations of the community college district.

This bill would require the authorization to have precedence over other expenditure obligations of the community college district, with the exception of any obligations the community college district has incurred through the State Public Works Board's issuance of lease revenue bonds under specified provisions of existing law, which shall be met first. The bill would also specify that these provisions, including the provision that certain transactions are excluded from provisions governing the construction of community college facilities and the disposal of property owned by a community college district if specified requirements of existing law are met, would be repealed as of January 1, 2009.

(2) Existing law provides that various requirements relating to the sale or lease of public school property are not applicable to the sale or lease of community college district real property in certain circumstances, including situations in which a district sells and simultaneously repurchases the same property (sale-sale back) or in which a district leases and simultaneously leases back the same property (lease-lease back).

This bill would require the Chancellor of the California Community Colleges to submit a report, on or before April 1, 2008, to the Legislature and the Governor relating to the impact of authorizing the sale-sale back or lease-lease back of energy efficient community college facilities and the extent to which these options have been used by community college districts.

Ch. 555 (AB 1505) La Suer Victim restitution.

Existing law prohibits deductions from being made from an inmate's wages and trust account for a restitution order if the victim has not filed an application with the Victim Compensation Program.

This bill would not require a victim to file an application with the Victim Compensation Program in order to receive money from the program.

Ch. 556 (AB 1602) Laird Local government finance.

The Vehicle License Fee (VLF) Law establishes, in lieu of any ad valorem property tax upon vehicles, an annual license fee for any vehicle subject to registration in this state. Under existing law, the Controller is required to allocate vehicle license fee revenues in the Motor Vehicle License Fee Account (MVLFA) first to the County of Orange, then to cities for which the population was computed under a specified statute on August 5, 2004, and then to all cities and counties on a monthly basis in the amounts determined under specified formulas. Existing law requires that these VLF Law allocations to cities and counties and

counties be based upon population, as provided. Existing law also requires that a portion of the revenues derived under the Motor Vehicle Fuel Tax (MVFT) Law, the Use Fuel Tax (UFT) Law, and the Diesel Fuel Tax (DFT) Law be allocated to cities and counties based upon population.

For purposes of allocating these VLF, MVFT, UFT, and DFT Law revenues to cities and counties and for purposes of certain revenue allocations from the Transportation Investment Fund, existing law requires for specified time periods that the population of cities that meet certain criteria be the greater of either the city's actual population or an amount equal to 300% of the city's registered voters, as specified.

This bill would change the manner in which the population of a city or a city and county that meets certain criteria is determined for purposes of each of these allocations, but would require that the allocations from the Transportation Tax Fund be based upon population determined in the manner required under existing law. This bill would specify that a population determination based upon 300% of a city's registered voters would be available only to cities that were incorporated before August 5, 2004. This bill would specify that the population of a city that is incorporated on or after August 5, 2004, and before July 1, 2009, is that city's actual population, as defined, increased by specified percentages for the first 60 months following the city's incorporation. This bill would specify that the population of a city that incorporates on or after July 1, 2009, is that city's actual population, as defined.

This bill would also change the manner in which allocations are made from the MVLFA to instead provide that, following the allocations first to the County of Orange and then to cities for which the population was computed under a specified statute on August 5, 2004, allocations be made to cities that are incorporated after August 5, 2004, but before July 1, 2009, as specified, and then to cities that were incorporated before August 5, 2004, as specified. This bill would also make conforming changes to related provisions.

#### Ch. 557 (AB 1852) Yee Licensed Mental Health Service Provider Education Program.

Existing law requires the Office of Statewide Health Planning and Development to establish a nonprofit public benefit corporation known as the Health Professions Education Foundation to perform various duties with respect to implementing health professions scholarship and loan programs.

Existing law establishes the Licensed Mental Health Service Provider Education Program, and requires the foundation to develop the program to provide grants to licensed mental health service providers, as defined, who provide direct patient care in a publicly funded facility or a mental health professional shortage area, as defined.

Existing law requires the foundation to solicit the advice of representatives of specified agencies and officials, including, but not limited to, the Board of Behavioral Sciences.

This bill would revise the definition of "licensed mental health care service provider" for this purpose to, among other things, additionally include a registered psychologist, postdoctoral psychological assistant, postdoctoral psychology trainee employed in an exempt setting or employed pursuant to a State Department of Mental Health waiver, marriage and family therapist intern, and an associate clinical social worker, and would make a technical, nonsubstantive change. The bill would also specify that "licensed mental health service provider" includes a mental health service provider who is employed at a publicly funded mental health facility or a public or nonprofit private mental health facility that contracts with a county mental health entity or facility to provide mental health services.

#### Ch. 558 (AB 1864) Matthews Park lands: Fahrens Creek Park.

The existing Roberti-Z'berg-Harris Urban Open-Space and Recreation Program Act (urban open-space act), administered by the Department of Parks and Recreation, authorizes grants to be made by the department to cities, counties, and districts for recreational or open-space purposes. The urban open-space act requires property acquired or developed

pursuant to the urban open-space act to be used by the grant recipient only for the purposes for which the grant moneys were requested and prohibits any other use of the area, except as authorized by the Legislature.

The existing California Wildlife, Coastal, and Park Land Conservation Act (conservation act) authorizes grants to be made by the department to cities, counties, districts, and nonprofit organizations for specified purposes, including purposes related to parks. The conservation act requires property acquired, developed, rehabilitated, or restored pursuant to the conservation act to be used only for purposes of the conservation act and prohibits any other use of the property, except as authorized by the Legislature.

Existing federal law, the Land and Water Conservation Fund Act of 1965, requires the state to comply with specified conversion requirements for park lands acquired or developed with monies received under the act.

This bill would authorize the City of Merced to transfer to the Merced City School District up to 3 acres of park land in Fahrens Creek Park if certain conditions are met. The bill would require the transferred property to be used only for an elementary school.

Ch. 559 (AB 1881) Laird Water conservation.

(1) Existing law, the Davis-Sterling Common Interest Development Act, defines and regulates common interest developments, which include community apartment projects, condominium projects, planned developments, and stock cooperatives.

This bill would provide that the architectural guidelines of a common interest development shall not prohibit or include conditions that have the effect of prohibiting the use of low water-using plants as a group.

(2) The Water Conservation in Landscaping Act requires the Department of Water Resources to appoint an advisory task force to work with the department to draft a model local water efficient landscape ordinance that local agencies may adopt, requires the task force to submit the ordinance to the department on or before May 1, 1991, and requires the task force to cease to exist on the date the department adopts the model ordinance or January 1, 1992, whichever occurs first. The act requires the department, not later than January 1, 1992, to adopt a model local water efficient landscape ordinance which each local agency may adopt. The act makes the model local water efficient landscape ordinance adopted by the department applicable within the jurisdiction of a local agency if that local agency, by January 1, 1993, has not adopted a water efficient landscape ordinance or has not adopted certain findings that the adoption of the ordinance is unnecessary.

This bill would specify that the provision making the model ordinance applicable to a local agency on and after January 1, 1993, does not apply to chartered cities. The bill would require the department, to the extent funds are appropriated, not later than January 1, 2009, by regulation, to update the model ordinance in accordance with specified requirements. The bill would require the department to prepare and submit to the Legislature a prescribed report before the adoption of the updated model ordinance. The bill would require a local agency, not later than January 1, 2010, to adopt the updated model ordinance or other water efficient landscape ordinance that is at least as effective in conserving water as the updated model ordinance. The bill would make the updated model ordinance applicable within the jurisdiction of a local agency, including a chartered city, if, by January 1, 2010, the local agency has not adopted its own water efficient landscape ordinance or the updated model ordinance. The bill would require each local agency, not later than January 31, 2010, to notify the department as to whether the local agency is subject to the department's updated model ordinance and, if not, to submit to the department a copy of the water efficient landscape ordinance adopted by the local agency, among other documents. The bill would require the department, to the extent funds are appropriated, not later than January 31, 2011, to prepare and submit a report to the Legislature relating to the status of water efficient landscape ordinances adopted by local agencies.

By imposing requirements on local agencies in connection with the adoption of water efficient landscape ordinances, the bill would impose a state-mandated local program.

(3) Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission), after one or more public hearings, to take specified action to reduce the wasteful, uneconomic, inefficient, or unnecessary consumption of energy. Existing law requires the Energy Commission, by January 1, 2004, to amend specified regulations to require that residential clothes washers manufactured on or after January 1, 2007, be at least as water efficient as commercial clothes washers, and to take certain other related action.

This bill would require the Energy Commission, in consultation with the department, to adopt, to the extent funds are available, by regulation performance standards and labeling requirements for landscape irrigation equipment, including irrigation controllers, moisture sensors, emission devices, and valves to reduce the wasteful, uneconomic, inefficient, or unnecessary consumption of energy or water. The bill would require the Energy Commission to adopt those requirements for landscape irrigation controllers and moisture sensors by January 1, 2010, and, on and after January 1, 2012, would prohibit the sale or installation of an irrigation controller or moisture sensor for landscape use unless the controller or sensor meets those adopted requirements. The bill would require the Energy Commission, on or before January 1, 2010, to prepare and submit to the Legislature a report that sets forth a proposed schedule for adopting performance standards and labeling requirements for emission devices and valves.

(4) Existing law generally requires an urban water supplier to install water meters on all municipal and industrial service connections located within its service area on or before January 1, 2025.

This bill would require a water purveyor as defined, to require as a condition of new retail water service on and after January 1, 2008, the installation of separate water meters to measure the volume of water used exclusively for landscape purposes. The bill would make this requirement applicable to specified service connections.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 560 (AB 1968) Leslie Community colleges: transportation fees.

(1) Existing law establishes the California Community Colleges, under the administration of the Board of Governors of the California Community Colleges, as one of the segments of public postsecondary education in this state. Existing law establishes community college districts throughout the state, and authorizes them to maintain campuses at which instruction is provided to students. Existing law authorizes the governing boards of community college districts to charge various fees, including fees charged to students and employees at a campus of the district for purposes of partially or fully recovering transportation costs incurred by the district or of reducing fares for services provided by common carriers or municipally owned transit systems to these students and employees, in accordance with a prescribed procedure. With respect to these transportation fees, existing law requires a governing board maintaining transportation services to adopt rules and regulations governing the exemption of low-income students from these fees and authorizes the governing board to adopt rules and regulations that provide for the exemption of others.

This bill would specify that its provisions relating to these transportation fees apply only to the Los Rios and Rio Hondo community college districts. The bill would provide that, notwithstanding the existing provision relating to the adoption of the rules and regulations governing the exemption of low-income students and other students from these fees, the

governing board of a community college district to which this bill applies may adopt rules and regulations to exempt low-income students from this fee, or to require low-income students to pay all or part of this fee.

The bill would prohibit the governing board of a community college district to which this bill applies from entering into, or extending, a contract for transportation services, funded by the proceeds of a transportation fee and provided by a common carrier or a municipally owned transit system, unless and until a majority of students of that district who vote in an election, held no more than 10 years prior to the date of the expiration of the contract proposed to be entered into or no more than 10 years prior to the date to which it is proposed that an existing contract be extended, have approved the payment of the fee for this purpose. The bill would require that an election held pursuant to this provision be held in accordance with regulations adopted by the board of governors of a district to which this bill applies to ensure that the election is publicly noticed and that all students, including full-time, part-time, evening, and weekend students, have an opportunity to vote in the election. The bill would require that, if the governing board decides to seek to terminate or alter the arrangements under which the district receives transportation services from a common carrier or municipally owned transit system, the governing board provide at least 12 months' notice of that intention to the provider of transportation services.

(2) An existing provision of the California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

The bill would express a finding and declaration of the Legislature that, due to unique circumstances relating to the transportation services utilized by the communities served by the Los Rios and Rio Honda community college districts, a general statute cannot be made applicable, and the enactment of this bill as a special statute is therefore necessary.

#### Ch. 561 (AB 2117) Coto English language learners: pilot project.

Existing law establishes the English Language Acquisition Program for pupils in grades 4 to 8, inclusive, and requires the Superintendent of Public Instruction to allocate \$100 per school year to each participating local educational agency for each pupil enrolled in any of those grades who is identified as eligible to participate in the program.

This bill would require the State Department of Education to establish and administer a competitive grant pilot project to be conducted during the 2007&minus;08 to 2009&minus;10, inclusive, school years to identify existing best practices regarding topics including, but not limited to, curriculum, instruction, and staff development for teaching English language learners and promoting English language acquisition and development. The bill would prohibit the use of more than 5% of the total funding for the program for administrative, data collection, evaluation, or reporting activities. The bill would authorize a local educational agency, as defined, to apply on behalf of the eligible school or schools to the department for a grant of \$200 per English language learner for each year of the pilot project. The bill would require the department to require each local educational agency that is selected to receive a grant to match the funds provided in the grant, as specified.

The bill would require the Superintendent to establish a 13 to 20 member advisory committee, as specified. The bill would require the department, with advice from the advisory committee and in consultation with the Office of the Secretary for Education, to establish criteria for evaluating applications and selecting applicant school districts to receive grants. The bill also would require the Superintendent, to the extent practicable, to utilize the advisory committee for the purposes for which an advisory committee would otherwise be required to be utilized pursuant to a specified provision, if that provision is added as specified. The bill would require the department to contract with an independent research organization to perform an evaluation of the pilot project, which would be funded from separate funding, as specified. The bill would require a report summarizing the findings of the evaluation be submitted to the Superintendent, the Governor, and the Legislature by November 1, 2011. The bill would require the Superintendent to review the report and

submit an additional report to the Legislature and the Governor that makes recommendations as specified.

The bill would specify that \$20,000,000 appropriated to the Superintendent in another act for local assistance costs of a multiyear research pilot project to identify best practices for improving the academic achievement and English language development of English language learners pursuant to legislation enacted during the 2005–06 Regular Session of the Legislature be used to implement the pilot project.

The bill would allocate \$100,000 of specified federal funds for the use of the department for purposes of its administration of the project.

Ch. 562 (AB 2144) Montanez Hazardous materials: land use.

(1) Existing law, the California Land Reuse and Revitalization Act of 2004, until January 1, 2010, provides that an innocent landowner, a bona fide purchaser, or a contiguous property owner, as defined, qualifies for specified immunity from liability for response costs or damage claims with regard to a site in an urban infill area, if the innocent landowner, bona fide purchaser, or contiguous property owner meets specified conditions. The act defines the term “agency” as meaning the Department of Toxic Substances Control, the State Water Resources Control Board, or a California regional water quality control board.

The act requires a bona fide purchaser, innocent landowner, or contiguous property owner who seeks to qualify for the immunity provided by the act to enter into an agreement with an agency, including the performance of a site assessment, and if the agency determines that a response plan is necessary, the preparation and implementation of a response plan. The act requires the response plan to include an opportunity for the public, other agencies, and the host jurisdiction to participate in decisions regarding the response action, and requires the regional board, if a regional board is the agency, to undertake specified actions for public participation and information. The act requires the department, if it is the agency, to undertake other specified actions for public participation and information.

This bill would revise the public participation procedures that are required to be included in the response plan, including requiring the agency, 30 days before taking action on the response plan, to notify all other appropriate governmental entities and local agencies, including, but not limited to, the department, the regional board, or a redevelopment agency, that is not party to the response plan regarding the proposed response action. The bill would also require the agency to place a notice in a newspaper of general circulation, as specified, and post notice of the proposed response plan on the site.

The bill would delete the different requirements for a regional board and the department, depending on which entity is the agency, and would require the same actions for public participation and information, regardless of which entity, including a regional board or the State Water Resources Control Board, is the agency.

The bill would require the agency to consider the issue of environmental justice, as defined, for communities most impacted, including low-income and racial minority populations and to provide certain information regarding the site decision process.

(2) Existing law, the Porter-Cologne Water Quality Control Act, requires a California regional water quality control board to give due notice of any hearing relating to investigating the quality of the waters of the state, prescribing waste discharge requirements, issuing cease and desist orders, requiring the cleanup or abatement of waste, or imposing administrative civil liabilities or penalties. The act requires a person who has discharged or discharges waste into the waters of the state, as specified, or who has caused or permitted, causes or permits, or threatens to cause or permit, waste to be discharged into the waters of the state, as specified, to, upon order of a regional board, clean up the waste or abate the effects of the waste, or take other necessary remedial action, as specified.

This bill would require a regional board to take specified actions when reviewing or approving a cleanup proposal from a primary or active responsible discharger with respect to a site issued a cleanup and abatement order, if the site meets the definition of a site under

the California Land Reuse and Revitalization Act of 2004. The bill would require these actions to include providing notice of the proposed decision to approve a cleanup proposal for the site, providing timely access to written material, as specified, providing not less than 30 days to comment on the cleanup proposal regarding the site, and conducting a public meeting in the area of the site during the public comment period if certain conditions apply. The bill would authorize the regional board to develop and use specified means for public communications and input, to disseminate information and to assist the regional board in gathering public input regarding a site, if the regional board makes certain determinations.

(3) Existing law requires certain reports to be submitted to the Department of Toxic Substances Control.

The bill would authorize the Department of Toxic Substances Control to require a person submitting a report to the department or a unified program agency to submit the report in electronic format. The bill would require the department to adopt standards for the electronic submission of reports, including analytical and environmental compliance data, and would require the department, when adopting the format, to consider only formats that meet specified criteria. The bill would require the department, in adopting the standards, to ensure the security of electronically submitted information.

The bill would authorize the department to adopt the standards as emergency regulations and would provide that these emergency regulations would be repealed one year after the effective date of the regulations, unless the Department of Toxic Substances Control readopts those regulations. The bill would also provide that until the effective date of those regulations, the department would be authorized to implement those standards using specified regulations adopted by the State Water Resources Control Board or the Secretary for Environmental Protection for the electronic submission of reports.

Ch. 563 (AB 2161) Klehs Child welfare services: resource family pilot program.

The Community Redevelopment Law requires a redevelopment agency to replace dwelling units housing persons and families of low or moderate income that are destroyed or removed from the low- and moderate-income housing market as part of a redevelopment project that is subject to a written agreement with the agency or where financial assistance is provided by the agency. Existing law also requires that specified percentages of new and substantially rehabilitated dwelling units within a project area that are developed by public or private entities or by persons other than the redevelopment agency be affordable to and occupied by persons of low and moderate income. These replacement, new, or rehabilitated dwelling units are required to remain available at affordable housing cost to, and occupied by, persons and families of low-income, moderate-income, and very low income households for at least 55 years for rental units and 45 years for homeownership units.

This bill would, until January 1, 2012, authorize the Redevelopment Agency of the County of Alameda to count the new construction of units outside the project area, but within the City of Hayward towards satisfaction of these housing obligations if certain conditions are met. This authorization would apply only to the Mt. Eden Sub-Area of the Eden Area Redevelopment Project Area.

This bill would declare that because of the unique circumstances applicable to the Redevelopment Agency of Alameda County with respect to local housing requirements, a statute of general applicability could not be enacted within the meaning of subdivision (b) of Section 16 of Article IV of the California Constitution, thus necessitating the enactment of a special statute.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 564 (AB 2256) Committee on Business and Professions Professions and vocations.

(1) Existing law, the Optometry Practice Act, provides for the licensure and regulation of optometrists by the State Board of Optometry and makes a violation of the act a crime. Under

the act, an optometric corporation is required to obtain a certificate of registration from the board and file specified reports with it.

This bill would delete the provisions requiring an optometric corporation to obtain this certificate from the board and file these reports with it.

Existing law gives the board the same powers of suspension, revocation, and discipline against an optometric corporation as it has against individual licensees.

This bill would delete that provision, and would also delete a provision requiring the board to comply with the Administrative Procedure Act. The bill would make it unprofessional conduct and a misdemeanor for a person licensed under the act to violate the Moscone-Knox Professional Corporation Act.

(2) Existing law provides for the licensing and regulation of architects by the California Architects Board. Existing law requires a licensee to report to the board any civil action judgment, settlement, arbitration award, or administrative action resulting in a judgment, settlement, or arbitration award against the licensee if the action alleges fraud, deceit, negligence, incompetence, or recklessness by the licensee in the practice of architecture and the amount or value of the judgment, settlement, or award is \$5,000 or more. A licensee who fails to comply with this requirement is subject to disciplinary action.

This bill would provide that a licensee who fails to comply with this requirement may also be subject to a civil penalty, as specified, as an additional intermediate sanction.

(3) Existing law provides for the licensure and regulation of landscape architects by the California Architects Board, and defines a person who practices landscape architecture as a person who performs specified professional services.

This bill would also include in that definition a person who offers to perform those services.

Existing law requires an insurer that provides professional liability insurance to a landscape architect to report certain information to the board within a specified time after a settlement or arbitration award in specified claims or actions. Existing law also requires an uninsured landscape architect or his or her counsel to report to the board after a settlement or arbitration award of certain claims or actions, and makes a failure to do so a misdemeanor.

This bill would require an insurer or a governmental agency that self-insures a landscape architect to report specified information to the board within 30 days of payment of a civil action judgment, settlement, or arbitration award in specified actions. The bill would also require a landscape architect to report specified information to the board within 30 days after he or she has knowledge of a civil action judgment, settlement, or arbitration award against him or her in specified actions and would eliminate the reporting requirement with respect to his or her counsel. Failure to comply with these requirements would subject a landscape architect to civil penalties, as specified, and disciplinary action. The bill would also authorize the board to adopt regulations relating to these reporting requirements and require a landscape architect to respond to inquiries from the board concerning the reportable events.

(4) Existing law establishes the State Public Works Board, which includes the Director of Finance, the Director of Transportation, and the Director of General Services.

This bill would authorize the Director of Transportation and the Director of General Services to appoint a representative to act in their place on the board.

(5) Because the bill would expand existing crimes, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 565 (AB 2260) Negrete McLeod Approvals and certificates of registration: special faculty permits.

(1) Existing law, the Medical Practice Act, prohibits the practice of medicine without a physician's and surgeon's certificate issued by the Medical Board of California through its Division of Licensing. The act, however, authorizes a foreign physician who seeks postgraduate study in an approved medical school to apply to the division for approval to participate in the school's professional activities. Under the act, a foreign physician may apply to the division for 2 extensions of the approval granted to him or her. The act also authorizes a person who does not immediately qualify for a physician's and surgeon's certificate and has been offered a medical school faculty position to apply to the division for a certificate of registration to engage in the practice of medicine. Under the act, a certificate of registration may be renewed for a total period of 5 years, and renewal may be denied if the registrant is a graduate of a foreign medical school, as specified. The act directs the deposit of all revenue collected by the board into the Contingent Fund of the Medical Board of California, where funds other than penalty revenue are continuously appropriated.

This bill would revise the renewal provisions for approvals granted to foreign physicians, limiting the duration of those approvals to 3 years, and would also revise the renewal provisions for certificates of registration, allowing 2 renewals and an additional extension, at the division's discretion, upon a showing of continued progress towards licensure and issuance of a certificate by the Educational Commission for Foreign Medical Graduates for graduates of foreign medical schools, other than those located in Canada. The bill would require additional information on the applications for approval and for certificates of registration. The bill would require a foreign physician and a registrant to provide identifying information to their patients and would prohibit a registrant from billing individually or receiving compensation for the medical services he or she provides and would prohibit the medical school from charging patients for those provided by a foreign physician. The bill would require the division to notify the medical school and the foreign physician or registrant of a complaint, would authorize the division to terminate its approval of an appointment or a registration for any act that would be grounds for discipline if done by a licensee, and would authorize the foreign physician or registrant to appeal the termination. The bill would authorize the division to charge application and renewal fees for the approval and the certificate of registration. By increasing that part of the revenue in the Contingent Fund of the Medical Board that is continuously appropriated, the bill would make an appropriation.

(2) Under existing law, any person who meets certain eligibility requirements, including, but not limited to, the requirement that the person is academically eminent, as defined, may apply for a special faculty permit that authorizes the holder to practice medicine, without a physician's and surgeon's certificate, within the medical school itself and certain affiliated institutions. Existing law defines "academically eminent" as holding a full-time, full professor appointment in a tenure track position, or its equivalent, at a medical school approved by the Division of Licensing, or being offered such a position, and authorizes the division to exercise its discretion in determining whether an applicant qualifies as academically eminent. Existing law also establishes procedures for application for, and renewal of, the permit, and the grounds for denial or discipline. Existing law requires the Medical Board of California to report to the Legislature, by December 31, 2002, on the implementation and status of the special faculty permit program.

This bill would modify the eligibility requirements by changing the definition of academically eminent to also include an applicant who is clearly outstanding in a specific field of medicine or surgery and who has been offered by the dean of a medical school in this state a full-time academic appointment as a full or associate professor, and a great need exists to fill that position. The bill would authorize the division to exercise its discretion in determining whether an applicant meets these requirements. The bill would also require the division to establish a review committee, with a specified composition, to review and make recommendations to the division regarding the applicants applying pursuant to these provisions. The bill would prohibit a medical school from appointing the holder of a special faculty permit to certain positions without authorization from the division. The bill would

require the board to report to the Legislature, by December 31, 2011, on the status of the special faculty permit program.

(3) Under existing law, the board through its Division of Medical Quality may take disciplinary action against a physician and surgeon for violating the Medical Practice Act. The act also makes a violation of its regulatory provisions a crime.

This bill would prohibit a physician and surgeon from including certain provisions in an agreement to settle a civil dispute arising from his or her practice that interferes with communications, as specified, between the board and another party to the dispute. The bill would make the violation of this requirement subject to disciplinary action by the board and because it would also be punishable as a crime, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 566 (AB 2285) Committee on Business and Professions Point-of-sale systems.

Existing law requires for automated checkout systems that all price reductions, surcharges, and taxes be displayed for the consumer at least once before the consumer is required to pay for the goods or services. Other provisions of existing law make any violation of these requirements a misdemeanor.

This bill would delete that display requirement, but would require the price, and in the instance of an advertised price reduction or discount, the discounted price or regular price and credit or reduction of advertised savings, to be displayed. The bill would recharacterize these provisions to apply to point-of sale-systems.

This bill would make other conforming changes.

By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 567 (AB 2303) Committee on Judiciary Judiciary: omnibus bill.

(1) Existing law requires all paralegals, as defined, to certify completion every 3 years of 4 hours of mandatory continuing legal education in legal ethics.

This bill would instead require all paralegals to certify completion every 2 years of 4 hours of mandatory continuing legal education in legal ethics and 4 hours of mandatory continuing legal education in general law or an area of specialized law.

(2) Existing law sets forth standards for determining liability in an action seeking the recovery of damages arising out of, or related to, deficiencies in residential construction, design, and related issues, as specified, including standards governing shower and bath enclosures and ceramic tile with respect to water issues.

This bill would instead set forth standards governing showers, baths, and related waterproofing systems, and governing the waterproofing system behind or under ceramic tile, as specified.

(3) The Information Practices Act of 1977 prohibits specified state agencies from disclosing any personal information in a manner that would link the information disclosed to the individual to whom it pertains, except under specified circumstances, including disclosure to the University of California or a nonprofit educational institution conducting scientific research, provided the request for information is approved by the Committee for the Protection of Human Subjects of the California Health and Human Services Agency.

This bill would make a clarifying change to that exception.

(4) The Car Buyer's Bill of Rights requires a conditional sale contract for a motor vehicle to include, and a dealer to display, a specified notice to inform the buyer of a used vehicle with a purchase price of less than \$40,000 of his or her right to obtain a contract cancellation option agreement. Existing law excepts specified vehicles from that contract cancellation option requirement, including motorcycles and recreational vehicles. Existing law also requires a seller to provide to a buyer a written disclosure containing specified information prior to the execution of a conditional sale contract.

This bill would require the notice provisions in a conditional sale contract, or displayed by a dealer, to provide that a recreational vehicle is excepted from that contract cancellation option requirement. The bill would also make a technical, nonsubstantive change to a related provision. The bill would also except motorcycles and off-highway vehicles, as specified, from the written disclosure requirement.

(5) Existing law sets forth the procedures for filing a writ of mandate to review the question of the disqualification of a judge. Existing law requires that petition to be filed within 10 days of notice to the parties of the decision.

This bill would instead require that petition to be filed and served within 10 days after service of written notice of entry of the court's order determining the question of disqualification, or as specified if served by mail.

(6) Under existing law, a prospective trial juror who has been summoned for jury service and fails to attend as directed or respond to the court may be compelled to attend, as specified. In addition, after an order to show cause hearing, the court may find the prospective juror in contempt of court, which is punishable by fine, incarceration, or both. Until January 1, 2007, existing law permits the court, in lieu of imposing penalties for contempt, to impose reasonable monetary sanctions of no more than \$250 for a first violation, \$750 for a 2nd violation, and \$1,500 for the 3rd and any subsequent violation, upon a prospective juror who has failed to respond and who has not been excused, after first providing the prospective juror with notice and an opportunity to be heard, as specified. Existing law also requires the Judicial Council, by December 31, 2005, to report to the Legislature regarding the effects of the implementation of these provisions.

This bill would extend the operative date of those provisions to January 1, 2010, and would also provide that the Judicial Council report to the Legislature by December 31, 2008, regarding that implementation.

(7) Existing law prescribes procedures for serving a summons on a corporation and specifies the persons to whom a copy of the summons and the complaint may be delivered.

This bill would include among those persons who may receive that service and delivery a chief executive officer, a controller, and a chief financial officer.

(8) Existing law provides that an appeal is to the court of appeal, and, in a limited civil case, to the appellate division of the superior court. Existing law provides that an appeal may be taken from an order granting a motion to quash service of summons or granting a motion to stay or dismiss the action on the ground of inconvenient forum.

This bill would instead provide that an appeal may be taken from a written order of dismissal following the order granting a motion to dismiss the action on the ground of inconvenient forum.

(9) Existing law sets forth the procedures for a change of name, including requiring an application for a name change to be made to the superior court of the county where the person whose name is proposed to be changed resides, by petition signed by the person, or if the person is under 18 years of age, signed by one of the person's parents, if living, or if both parents are dead, then by the guardian of the person.

This bill would revise and recast these provisions to, among other things, modify the procedures for persons objecting to a name change and the notice thereto, as specified.

(10) Until January 1, 2007, existing law provides that a licensee in ordinary course of business, as defined, takes its rights under a nonexclusive license free of a security interest

in the intangible created by the licensor and takes its leasehold interest free of a security interest in the goods created by the lessor, as specified.

This bill would extend the operation of that provision to January 1, 2010.

(11) The Nonprofit Public Benefit Corporation Law prohibits a director of a nonprofit public benefit corporation from being elected for terms greater than 3 years, as fixed in the articles or bylaws.

This bill would instead allow those directors to be elected for terms no greater than 4 years, as fixed in the articles or bylaws.

(12) Existing law requires a charitable organization, unincorporated association, or a trustee holding property for charitable purposes to register its articles of incorporation with the Attorney General's Registry of Charitable Trusts within 30 days of receiving the property.

This bill would instead require these entities to file an initial registration form with the Attorney General, and would require the Attorney General to adopt rules and regulations as to the contents of that form and related procedures. The bill would make other procedural changes relating to the means of payment of the annual registration or renewal fee by other entities required to register with the Attorney General's Registry of Charitable Trusts.

(13) Existing law authorizes the Commission on Judicial Performance to, among other things, disqualify, suspend, retire, or censure a judge for specified reasons. Existing law authorizes the commission to exercise discretionary jurisdiction with regard to the oversight and discipline of subordinate judicial officers.

This bill would provide the Commission on Judicial Performance access to nonpublic and confidential records relevant to the performance of judges, former judges, and subordinate judicial officers, and would provide a mechanism for the public disclosure thereof, as specified.

(14) Existing law imposes specified conditions upon the construction of court facilities in Merced County.

This bill would require Merced County to reimburse the state for the construction costs of certain court facilities upon a failure to transfer those facilities' responsibilities and titles to the state by April 1, 2007.

(15) Existing law allows a criminal prosecution to be commenced by filing an accusatory pleading in electronic form with the magistrate, or in a court having authority to receive it, under specified conditions. Existing law also authorizes a court to receive and file a notice of parking violation or a notice to appear in electronic form under certain conditions.

This bill would revise and recast those conditions for the receipt and filing of an accusatory pleading or a notice to appear in electronic form.

(16) Existing law requires the juvenile court to conduct periodic status review hearings every 6 months, and, in certain cases, to terminate the parental rights to, and to order a permanent plan of adoption or legal guardianship for, a dependent child of the juvenile court.

This bill would allow the court to conduct those status review hearings at any time earlier than 6 months, if the court determines that an earlier review is in the best interest of the child.

(17) Existing law provides for emergency protective orders with respect to elder abuse, as specified. For those purposes, existing law requires the respondent to be personally served at least two days before the hearing on the protective order.

This bill would instead require at least five days service before that hearing.

(18) This bill would incorporate additional changes to Section 1277 of the Code of Civil Procedure proposed by this bill and SB 1743 to take effect if both bills are chaptered and this bill is chaptered last.

#### Ch. 568 (AB 2332) Committee on Agriculture Cattle.

Existing law generally provides for the inspection of cattle whenever they are sold or their ownership is transferred and prior to their movement into or out of specified areas. Existing law provides that the Secretary of Food and Agriculture shall establish and maintain

modified point-of-origin and full point-of-origin inspection stations whenever cattle producers owning cattle in the affected area request this action, as specified. Existing law requires that the secretary hold a statewide hearing to determine what areas wish to consider establishing a modified point-of-origin inspection area.

This bill would remove provisions that require the secretary hold an annual meeting to determine what areas wish to consider establishing a modified point-of-origin inspection station and instead provide that such a meeting would be held upon written request or petition of 25 cattle producers in an affected area. This bill would also provide that upon written request or petition, cattle producers in an affected area may request that the secretary repeal regulations establishing a modified point-of-origin or a full point-of-origin inspection area created pursuant to these provisions.

Existing law regulates the disposition of dead animals.

This bill would permit dead animal haulers to transport dead animals to a destination in another state, as specified. This bill would also authorize the state veterinarian to approve temporary research projects, as defined, regarding alternative methods of animal tissue disposal.

Existing law establishes various per head inspection fees for cattle in the amounts of \$0.30, \$0.45, and \$0.90, as specified. These fees are deposited into the Department of Food and Agriculture Fund, a continuously appropriated fund.

This bill would increase those fees to \$0.36, \$0.54, and \$1.05, respectively, as specified.

By increasing fees that are deposited into a continuously appropriated fund, this bill would make an appropriation.

Existing law generally regulates cattle brand inspections.

This bill would authorize the Bureau of Livestock Identification to enter into, and prescribe the form of, a Memorandum of Understanding with cattle producers regarding brand inspection of purebred cattle and project calves, as specified.

#### Ch. 569 (AB 2347) Harman Trusts: distributions.

Existing law governs the distribution of income from a trust after an income interest in a trust ends. Existing law also specifies the distribution of interest and accrued income on a specific devise under a will where the intention of the testator is not otherwise indicated by the will.

This bill would provide that a specific gift distributable under a trust shall carry with it the same benefits and burdens as a specific devise under a will. The bill would provide that a general pecuniary gift, an annuity, or a gift of maintenance distributable under a trust carries with it income and bears interest in the same manner as a general pecuniary devise, an annuity, or a gift of maintenance under a will. The bill would both expand the definition of, and revise the provisions governing the allocation of, payments received by a trustee. The bill would specify and clarify the allocation of receipts from interests owned by a trust in specified natural resources and limit trustee liability for making that allocation, as specified. The bill would also set forth a priority of sources from which distributions from a trust payable to beneficiaries would be made, except as otherwise provided by the governing instrument, as determined by the trustee, or as ordered by the court.

#### Ch. 570 (AB 2362) Jerome Horton Public contracts: job order contracting: school districts.

Existing law provides various procedures, including competitive bidding, for different types of contracts involving state and local public entities, including school districts. Existing law authorizes, until December 1, 2007, job order contracting, as defined, by the Los Angeles Unified School District, and required the district to submit a report to the Legislature and the Office of Public School Construction in the Department of General Services regarding all job order contracting projects completed by December 31, 2004, and a report regarding the implementation of the job order contracting process for each job order

procured, and the work completed on or before November 1, 2007. Under existing law, the Legislature has stated its intent to place a moratorium on the enactment of additional legislation authorizing school districts to use job order contracting until the Legislature has received that report.

This bill would extend the operative date of the job order contracting project to December 1, 2012. This bill would also require all participating school districts to submit, before December 1, 2011, a report to certain legislative committees and the Office of Public School Construction in the Department of General Services regarding the implementation of the job order contracting process for each job order procured, and the work completed on or before November 1, 2011.

Ch. 571 (AB 2413) Spitzer Victims of crime: compensation.

Existing law provides for the indemnification of victims of specified types of crimes by the California Victim Compensation and Government Claims Board, subject to specified criteria for losses incurred as a result of specified types of crimes. Payment is made under these provisions from the Restitution Fund, which is continuously appropriated to the board for these purposes.

Existing law authorizes reimbursement for the expense of installing or increasing residential security with respect to a crime that occurred in the victim's residence, upon verification by either law enforcement to be necessary for the personal safety of the victim or by a mental health treatment provider to be necessary for the emotional well-being of the victim.

This bill would authorize reimbursement to the victim claimant for the expense of installing or increasing residential security, upon either verification by law enforcement to be necessary for the personal safety of the victim or, if the victim is deceased, other persons residing in the residence at the time of the crime or upon verification by a mental health treatment provider to be necessary for the emotional well-being of the victim or, if the victim is deceased, other persons residing in the residence at the time of the crime.

Existing law authorizes, when a victim dies as a result of a crime in a residence, reimbursement to any individual who voluntarily, and without anticipation of personal gain, pays or assumes the obligation to pay the reasonable costs to clean the scene of the crime in an amount not to exceed \$1,000.

This bill would authorize, whenever a crime occurs in a residence, reimbursement to any individual who voluntarily, and without anticipation of personal gain, pays or assumes the obligation to pay the reasonable costs to clean the scene of the crime in an amount not to exceed \$1,000.

This bill would also authorize, until January 1, 2010, reimbursement for licensed child care expenses necessarily incurred by a victim or derivative victim as a direct result of a crime that caused physical injury or death if specified conditions are met.

By expanding the scope of services for which continuously appropriated funds are available, this bill would make an appropriation.

This bill would incorporate additional changes in Section 13957 of the Government Code proposed by AB 105, that would become operative only if AB 105 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

Ch. 572 (AB 2448) Hancock Regional occupational centers and programs: administration.

(1) Existing law permits the governing board of a school district that maintains a junior high or high school to schedule classes so that each pupil attends classes for at least 1,200 minutes during any 5-school day period. Existing law permits a pupil to be authorized to attend school for less than the total number of days in which the school is in session per week as long as the pupil attends the required number of minutes per 5-school day period.

This bill also would permit a school to schedule classes so that each pupil attends 2,400 minutes during any 10-school day period and would permit a pupil to attend school fewer days per week to accommodate career technical education and regional occupational center and program courses and block or other alternative school class schedules as long as the pupil attends the required minutes per 10-school day period.

(2) Existing law authorizes the county superintendent of schools of each county, with the consent of the State Board of Education, to establish and maintain at least one regional occupational center, or regional occupational program, in the county to provide education and training in career technical courses.

Existing law requires the county superintendent of schools or school districts sponsoring the regional occupational center or program to conduct a job market study in the labor market area in which it proposes to establish the center or program to ensure that the anticipated employment demand for trainees justifies the establishment of the proposed courses of instruction.

This bill, instead, would require the governing board of each regional occupational center or program, on or before July 1, 2010, to ensure that at least 90% of all state-funded courses offered by the center or program are part of occupational course sequences that target high-skill occupations that are in demand, as specified. The bill would make compliance with this and related requirements a condition of receiving funds provided under the federal Carl D. Perkins Vocational and Applied Technology Education Act of 1998. The bill would require the State Department of Education, with the assistance of the Office of the Chancellor of the California Community Colleges to meet with each program or center in the region during the 2009–10 fiscal year to validate that the required course sequences have been developed, to provide specified assistance, and to waive certain requirements as specified. The bill would require school districts, regional occupational centers or programs, and community college districts that do not develop course sequences on or before the specified dates, and have not received a waiver, as specified, to enter into a corrective action plan with the department and to meet any timelines established by the Superintendent of Public Instruction.

(3) Existing law includes providing individual counseling and guidance in career technical matters, providing a curriculum that includes skill training in occupational fields having current and future needs for the training, and providing an opportunity for pupils to acquire entry level career technical skills that may lead to a combination work-study schedule as some of the purposes of a regional occupational center or program.

This bill would require the governing board of each regional occupational center or program to establish and maintain an employer advisory board or boards pursuant to guidelines developed by the State Department of Education, as specified.

(4) Existing law requires every career technical course or program offered by a school district or county superintendent sponsoring a regional occupational center or program to be reviewed every 2 years, as specified, and requires any course or program that does not meet the requirements and specified standards to be terminated within one year.

This bill would delete the requirement that the review process include review and comments by a specified local private industry council and would delete the limitation that the review only apply to courses or programs that began subsequent to the effective date of the provisions.

The bill would require the department to conduct monitoring reviews of each regional occupational center or program at least once every 4 years, within existing resources, as specified.

(5) Existing law requires a regional occupational center or program to do specified things, including providing skill training.

This bill would revise the requirements to include a sequence of academic and skill instruction leading to an employer-endorsed skill certificate and vocational degree or certificate programs at a community college.

(6) Existing law authorizes a regional occupational center to provide, on an individual referral basis, academic and personal development instruction for adult students enrolled in a career technical education course conducted by the regional occupational center when it is determined that it is essential for this instruction to be given to ensure the employability of the adult student.

This bill would make that provision inoperative on June 30, 2010, and repeal it as of January 1, 2011.

(7) Existing law prohibits regional occupational centers or programs from claiming more than 3% of average daily attendance based on the enrollment of pupils who are under the age of 16, but law does not include similar limitations with regard to claims for adult students.

This bill would, on or before July 1, 2008, prohibit a regional occupational center or program from claiming more than 50% of the state-funded average daily attendance for which the center or program is eligible for services provided to students not enrolled in grades 9 to 12, inclusive. The bill would, on or before July 1, 2009, prohibit a regional occupational center or program from claiming more than 30% of that average daily attendance. The bill would, on or before July 1, 2011, prohibit a regional occupational center or program from claiming more than 10% of that average daily attendance. The bill would, on or before July 1, 2010, allow a regional occupational center or program to claim an additional 5% of the state-funded average daily attendance for which the center or program is eligible for services provided to CalWORKs, Temporary Assistance Program, or Job Corps participants and participants under the federal Workforce Investment Act of 1998, as specified. The bill would require a regional occupational center or program that claims more than 40% of the state-funded average daily attendance for which the center or program is eligible for services provided to student not enrolled in grades 9 to 12, inclusive, to report to the Superintendent of Public Instruction each year on its plans to reduce the number of adult students in order to comply with those limits. The bill would allow regional occupational centers and programs operated in a rural county of the sixth, seventh, or eight class, as defined, to claim an additional 10% of average daily attendance for the attendance of adult students. The bill would allow the governing boards of a community college district and a regional occupational center or program to enter into contractual agreements under which the center or program provides services to adult students of the community college district affected by those limits if specified conditions are satisfied.

(8) Existing law limits attendance at a regional occupational center or program to pupils who are 16 years of age or older, with certain exceptions.

This bill would revise the specified exceptions to include pupils who are less than 16 years of age and are referred to the center or program as part of a comprehensive high school plan that has been approved by a school counselor or school administrator and the pupils' parents or guardians and who have individualized education programs that prescribe occupational training for which their enrollment in a regional occupational center or program is deemed appropriate. The bill would also allow the attendance of a pupil who is enrolled in grade 10 and has an approved comprehensive high school plan and whose admission will not result in the denial of admission or displacement of pupils in grades 11 and 12 that would otherwise participate in the regional occupational center or program. The bill also would prohibit adult students from enrolling in regional occupational center or program courses during the schoolday on a high school campus unless specifically authorized by the policy of the governing board of the school district.

(9) Existing law requires the average daily attendance claimed for pupils admitted to a regional occupational center or program is calculated in specified ways.

This bill would remove specified provisions related to average daily attendance calculations. The bill also would eliminate the provision specifying that a minimum day in a regional occupational center is 180 minutes and that a minimum day in a regional occupational program is 60 minutes. The bill would revise the maximum daily attendance that may be claimed for students not enrolled in grades 9 to 12, inclusive. The bill would

require each regional occupational center or program, commencing with the 2007–08 fiscal year, and each fiscal year thereafter, to use all growth average daily attendance, as specified, exclusively to serve pupils in grades 9 to 12, inclusive. The bill would also repeal various obsolete provisions of law governing the calculation of the average daily attendance generated by a regional occupational center or program in prior years.

The bill would require a regional occupational center or program to report annually to the department the academic progress of its secondary pupils, as specified, in order to receive specified, additional average daily attendance. The bill would condition the operation of this provision on the ability to disaggregate relevant data from the California longitudinal pupil achievement data system database.

(10) Existing law authorizes any regional occupational center or program to budget and accumulate an amount necessary to meet its cashflow needs known as a general reserve and budget and accumulate amounts known as the designated fund balance and as the unappropriated fund balance. Existing law authorizes regional occupational centers or programs established and maintained by school districts or joint powers agencies to budget an amount necessary to meet long-term program needs of the regional occupational center or program known as capital outlay expenditures or equipment replacement.

This bill, instead, would authorize any regional occupational center or program to budget and accumulate amounts necessary to meet its long-term program needs in a separate account known as the capital outlay and equipment replacement reserve account, which is part of the designated fund balance. The bill would make other changes related to these accounts and to the ending balances of certain accounts. The bill would require the Superintendent of Public Instruction to require an annual certification by school districts, county superintendents of schools, and joint powers agencies commencing in the 2007–08 fiscal year that the regional occupational center or program funds have been expended as provided, and requires the Superintendent to withhold certain funds, as provided.

(11) Existing law establishes community college education programs.

This bill would require a community college, upon receiving federal funds provided under the federal Carl D. Perkins Vocational and Applied Technology Act of 1998, or any successor thereof, to develop a plan for enabling the development of course sequences that span courses provided in grades 7 to 12, inclusive, courses provided by regional occupational centers or programs, and courses provided by community college vocational education programs. The bill would require the plan to be adopted by the governing board of the community college district on or before July 1, 2008. Copies of the plan would be required to be submitted to the appropriate school districts and regional occupational centers or programs, and the chancellor.

#### Ch. 573 (AB 2515) Ruskin Water conservation: report.

Existing law authorizes the Public Utilities Commission (PUC) to regulate public utilities, including water corporations.

This bill would require the PUC to prepare and submit to the Legislature, by June 30, 2008, a report that describes the progress achieved toward implementing the policy objectives of the PUC's Water Action Plan, adopted December 15, 2005, and to include specified matter in the report.

#### Ch. 574 (AB 2520) Committee on Transportation Transportation.

(1) Existing law requires that the purchase of all supplies, equipment, and materials, when the expenditure required exceeds \$25,000, by the Santa Clara Valley Transportation Authority be by contract let to the lowest responsible bidder.

This bill would authorize the board of directors of that authority, by a  $\frac{2}{3}$  vote, to purchase tunnel boring machines by competitive negotiation, as defined, pursuant to specified procedures.

(2) Existing law provides that moneys in the Recreational Trails Fund are available, upon appropriation by the Legislature, to the Department of Parks and Recreation for competitive grants to cities, counties, districts, state agencies, and nonprofit organizations with management responsibilities over public lands to acquire and develop recreational trails.

This bill would include federal agencies among the listed entities entitled to participate in these competitive grants.

(3) Existing law creates the San Diego Metropolitan Transit Development Board (MTDB) with various powers and duties relative to the construction and operation of transit systems in a portion of San Diego County. Existing law provides for MTDB to be governed by a board with a membership of, among others, city and county elected officials appointed by specified city councils or the County of San Diego Board of Supervisors, and provides for the appointment of alternate members.

This bill would authorize a city council or the county board of supervisors to appoint a second alternate member to serve on the board if a member and the alternate member are not able to attend a meeting of the board. The bill would provide that alternate members and second alternate members are subject to the same restrictions and have the same powers as a member when serving on the board.

(4) Existing law provides for a certificate of nonoperation for a vehicle and provides for a collector, as defined, of certain vehicles to maintain those vehicles, whether licensed or unlicensed or operable or inoperable, in outdoor storage on private property under specified conditions.

This bill would delete an obsolete cross-reference from these provisions.

(5) Existing law prohibits a person from operating a transit bus transporting passengers unless that person is properly certified.

This bill would correct a cross-reference in that provision.

(6) Existing law requires the Department of Motor Vehicles to immediately suspend the privilege of a person to operate a motor vehicle for specified listed reasons.

This bill would add to that listing cases when a person was driving a vehicle that requires a commercial driver's license and the person had 0.04% or more, by weight, of alcohol in his or her blood.

(7) Existing law contains provisions in the Vehicle Code that are intended to comply with federal law in order to reduce or prevent commercial motor vehicle accidents, fatalities, and injuries by permitting drivers to hold only one license, disqualifying drivers for certain criminal offenses and serious traffic violations, and strengthening licensing and testing standards.

This bill would require the Department of Motor Vehicles to report, as specified, each conviction occurring within this state of a person who holds a commercial driver's license from another state to the licensing authority of the home state of the licensee.

This bill would also revise certain definitions in this existing law.

(8) Existing law prohibits a driver of a commercial motor vehicle from operating a commercial motor vehicle for one year if the driver is convicted of a first violation of specified vehicle-related offenses, including driving while under the influence of any alcoholic beverage or drug, or both, or when the person had 0.08%, by weight, of alcohol in his or her blood, or when the person leaves the scene of an accident involving a commercial motor vehicle operated by the driver, or when the driver causes a fatality involving conduct defined as crimes in federal law.

This bill would recast these provisions as follows: to additionally apply the sanction when the person is convicted of driving while addicted to any drug, specify that the driving under the influence offense applies to operating a motor vehicle, include leaving the scene of an accident involving a motor vehicle, rather than only a commercial motor vehicle, and specify that causing a fatality involves the offense of gross vehicular manslaughter while intoxicated and vehicular manslaughter, as those offenses are defined in the Penal Code.

(9) Existing law prohibits a driver of a commercial motor vehicle from operating a commercial motor vehicle for life if convicted of more than one violation of specific vehicle-related offenses.

This bill would include in those listed offenses the same additional offenses and changes made under paragraph (8).

(10) Under existing law, the Department of Motor Vehicles is authorized to issue a restricted driver's license to a person under certain circumstances whose driver's license is suspended.

This bill would make these provisions inapplicable to a commercial driver's license holder, unless that person surrenders his or her commercial driver's license and is issued a noncommercial class C or M driver's license.

(11) Existing law places certain restrictions on the operation of specified vehicles under certain conditions.

This bill would require the driver of a certain commercial motor vehicle, upon approaching a railroad grade crossing, to drive that vehicle at a rate of speed that allows the commercial vehicle to stop before reaching the nearest rail of the crossing and prohibits it from being driven upon, or over, the crossing until due caution is taken to ascertain that the course is clear. Because a violation of this provision, under existing law, would be a crime, this bill would impose a state-mandated local program.

(12) This bill would also make numerous conforming and technical changes.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 575 (AB 2624) Houston Common interest developments: nonjudicial foreclosure.

(1) The Davis-Stirling Common Interest Development Act defines and regulates common interest developments and authorizes the association that manages the development to levy assessments to fulfill its obligations. The act provides that a regular or special assessment of the association, late charges, reasonable costs of collection, attorney's fees, and interest, as specified, are a debt of the owner of the separate interest at the time the assessment or other sums are levied, and are a lien on the owner's separate interest when the association records a notice of delinquent assessment and follows a specified process. The act permits the association to enforce the lien in any manner permitted by law including a sale by a trustee, also known as nonjudicial foreclosure, however it prohibits the fees of a trustee from exceeding amounts set forth in specified provisions.

This bill would revise the above language to also authorize the trustee to receive as part of those fees the cost of service of either a notice of default or the decision by the board of a common interest development to foreclose upon the separate interest of an owner, as specified.

(2) The Davis-Stirling Common Interest Development Act requires, in cases of a default, that a notice of default be served by the association on the owner of the separate interest's legal representative in accordance with specified provisions.

This bill would provide that the owner's legal representative shall be the person whose name is shown as the owner of a separate interest in the association's records, unless another person has been previously designated by the owner as his or her legal representative in writing and mailed to the association, as specified.

(3) Existing law provides that a nonjudicial foreclosure by an association of a common interest development to collect upon a debt for delinquent assessments is subject to a right of redemption. The redemption period within which the separate interest may be redeemed from a foreclosure sale ends 90 days after the sale.

This bill would revise that provision to also require a notice of sale in connection with an association's foreclosure of a separate interest in a common interest development to include a statement that the property is being sold subject to the right of redemption. The bill would make other conforming changes.

(4) Existing law provides for the use of a mortgage or a deed of trust as security in a transfer of real property, provides for a power of sale upon breach of the obligation that a mortgage or deed of trust secures, and establishes specified procedures that a mortgage or trustee is required to follow when exercising a power of sale. Under existing law, the mailing, publication, and delivery of a notice and the performance of procedures that are required when exercising a power of sale constitute privileged communications.

This bill would additionally provide that performing the functions or procedures necessary to carry out the duties regarding a sale of a separate interest in a common interest development constitute privileged communications.

(5) Existing law provides that if the terms of a trust or deed of trust confer a power of sale upon the trustee, the attorney for the trustee may conduct the sale and act in the sale as the auctioneer for the trustee.

This bill would also authorize a duly authorized agent to conduct the sale and act in the sale as the auctioneer for the trustee. The bill would revise and recast other provisions relating to nonjudicial foreclosure sales and the right of redemption of a separate interest within a common interest development.

(6) Existing law requires, if a person purchases an interest in real property subject to a right of redemption and pays the amount due on that real property, the levying officer to execute and deliver a certificate of sale. Existing law requires that certificate of sale to include specified information.

This bill would revise and recast those provisions to require certain information for judicial foreclosures and nonjudicial foreclosures on the certificate of sale.

Ch. 576 (AB 2671) Salinas Pupil attendance: precinct board membership.

Existing law authorizes a pupil who is a high school senior and who meets other specified criteria to be excused from school for specified reasons, including for the purpose of serving as a member of a precinct board during an election.

This bill would delete the requirement that a pupil be a high school senior in order for him or her to be excused from school for the purpose of serving as a member of a precinct board during an election.

Ch. 577 (AB 2746) Blakeslee Natural resources: mitigation for adverse impacts.

Existing law authorizes, under various provisions of law, certain state agencies or entities to acquire fee title in land or conservation or open-space easements from property owners to mitigate any adverse impact resulting from the development of a project or facility.

This bill would, notwithstanding any other provision of law, allow a state or local public agency to authorize a nonprofit organization to hold title to and manage an interest in real property that the state or local public agency requires a property owner to transfer to the agency to mitigate any adverse impact upon natural resources caused by permitting the development of a project or facility, provided the nonprofit organization meets certain requirements.

Ch. 578 (AB 2800) Laird Housing: discrimination.

Various provisions of existing law prohibit discrimination in housing and housing related areas, including real estate licensure, mortgage lending, club membership, development projects, and community redevelopment. The prohibited discrimination includes discrimination based on specified categories, including the race, color, sex, religion, and marital status of a person.

The Fair Employment and Housing Act declares that the practice of discrimination because of race, color, religion, sex, marital status, national origin, ancestry, familial status, disability, or sexual orientation in housing accommodations is against the public policy of the state.

This bill would amend provisions that prohibit discrimination in housing and specified housing related areas to instead prohibit discrimination on the same characteristics as in the Fair Employment and Housing Act.

This bill would incorporate additional changes to Section 10177 of the Business and Professions Code proposed by AB 790 to be operative only if this bill and AB 790 are both enacted and become effective on or before January 1, 2007, and this bill is enacted last.

This bill would incorporate additional changes to Section 65008 of the Government Code proposed by AB 2511 to be operative only if this bill and AB 2511 are both enacted and become effective on or before January 1, 2007, and this bill is enacted last.

**Ch. 579 (AB 2805) Blakeslee Advanced health care directives.**

Existing law provides that a written advanced health care directive is legally sufficient if it meets certain requirements, including the requirement that the directive is signed either by the patient or in the patient's name by another adult in the patient's presence and at the patient's direction. Existing law also requires that the directive be acknowledged by a notary public or signed by two witnesses, as specified.

This bill would provide that an electronic advance health care directive or a power of attorney for health care is legally sufficient if the existing requirements for directives are satisfied, the directive is acknowledged before a notary public, and any digital signatures used meet specified requirements.

This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 580 (AB 2831) Ridley-Thomas Insurance, income, and corporation tax credits: CDFI.**

Existing insurance tax law, the Personal Income Tax Law, and the Corporation Tax Law, authorize, until January 1, 2007, a credit in an amount equal to 20% of a qualified investment, as defined, made into a community development financial institution, as defined, but not to exceed, in the aggregate amount under all those laws, \$10,000,000 per year.

The bill would extend the operation of the credits until January 1, 2012, make changes relating to certification in connection with the credits, and make legislative findings and declarations in connection thereto, and require reports to various entities, as specified. This bill would also require the Legislative Analyst to prepare an analysis, on or before December 31, 2010, on the fiscal impact and various effects of the specified tax credits in California.

This bill would take effect immediately as a tax levy.

**Ch. 581 (AB 2837) Baca Medi-Cal: local educational agency services: speech-language pathologists.**

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to eligible low-income persons. Existing law covers specified local educational agency services under the Medi-Cal program, including speech pathology and audiology services, and certain targeted case management services for children with an individualized education plan (IEP), an individualized family service plan (IFSP), or an individualized health and support plan (IHSP) provided on and after July 1, 1997, are covered under the Medi-Cal program.

This bill would revise the authorization for providing speech pathology services to specify the qualifications required for a provider of these services. The bill would also revise the provisions relating to targeted case management services, to delete the reference to the IHSP, and to delete the July 1, 1997, date after which the remaining programs were required to be provided. The bill would also remove the reference to the IHSP in a related billing provision.

Existing law establishes in state government the Commission on Teacher Credentialing and requires the commission, among other things, to issue teaching and services credentials.

This bill would require the commission, commencing January 1, 2007, to issue preliminary and professional clear credentials in speech-language pathology to qualified individuals, in accordance with criteria specified in the bill. The bill would give the holder of a credential issued on or before January 1, 2007, the option of renewing the existing credential or updating the credential to satisfy the requirements of the bill. The bill would make the credentialing provisions operative when the Attorney General issues an opinion holding that the credential requirements in the bill are equivalent to the requirements of a specified provision of federal law.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 582 (AB 2869) Leno Crime victims: compensation: burial expenses.

Existing law provides for the indemnification of victims of specified types of crimes by the California Victim Compensation and Government Claims Board, subject to specified criteria. A person is generally eligible for compensation if he or she is a victim or derivative victim of a crime, as defined, or he or she voluntarily paid the funeral and burial expenses of a victim of a crime. Existing law provides that no person who is convicted of a felony may be granted compensation by the board until after discharge from probation or release from a correctional institution and discharge from parole.

This bill would specify that the provisions authorizing reimbursement for funeral and burial expenses apply without respect to any felon status of the victim.

This bill would also make other technical, conforming changes.

Ch. 583 (AB 2871) Huff Pupil records: inspection and reproduction.

(1) Existing law authorizes parents of currently enrolled or former pupils access to any and all pupil records related to their children which are maintained by school districts or private schools. Existing law requires each school district to adopt procedures for the granting of requests by parents for copies of all pupil records or to inspect and review records during regular school hours, provided that the requested access is granted no later than 5 days following the date of the request.

This bill would instead require the requested access no later than 5 business days following the date of the request.

(2) Existing law establishes a right of individuals with exceptional needs to receive free and appropriate public education and ensures the right to special education and related services needed to meet their unique needs, in conformity with federal law. Existing law requires all procedural safeguards under the federal Individuals with Disabilities Education Act to be established and maintained by each noneducational and educational agency that provides education, related services, or both, to children who are individuals with exceptional needs. Existing law provides, as part of procedural safeguards relating to special education, that a parent has the right and opportunity to examine all school records of the child and to receive copies within 5 days after the request is made by the parent.

This bill would instead specify that a parent has the right to examine and receive copies of those records within 5 business days after the request is made by the parent and before any meeting regarding an individualized education program of the parent's child or any hearing or resolution session, as provided. The bill would provide that the parent has the right to a response from the public education agency to reasonable requests for explanations and interpretations of the records. The bill would provide that if any school record includes information on more than one pupil, the parent has the right to inspect and review only the information relating to their child. The bill would require a public education agency to provide a parent, on the request of the parent, a list of the types and locations of school records collected, maintained, or used by the agency, thereby imposing a state-mandated local program. The bill would also make conforming changes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 584 (AB 2906) Committee on Agriculture Agriculture.

Existing law provides that a dairy exemption number issued by the Secretary of Food and Agriculture shall be evidence of ownership of specified cows and bulls presented for sale at a registered or posted salesyard, or licensed slaughter plant for immediate slaughter and it shall be written on the bill of consignment when the cattle are presented to an inspector.

This bill would provide that every 5 years the secretary may charge a fee, not exceeding \$50, to cover the cost of issuing a dairy exemption number. Because the fee would be deposited into the continuously appropriated Food and Agriculture Fund, it would make an appropriation. This bill would specify that the secretary may refuse to issue a dairy exemption number to, or revoke the dairy exemption number of, any person who has violated specified provisions of law or has been convicted of livestock theft. This bill would also provide that it is a crime for any person who buys cattle with a dairy exemption number at a public auction to fail to send those cattle directly to slaughter, as specified. Because this bill would create a new crime, this bill would impose a state-mandated local program.

Existing law requires that various persons engaged in the business of producing, processing, distributing, or transporting market milk to obtain a permit from the Secretary of Food and Agriculture, as specified. Existing law provides that prior to issuance of that permit, an inspection of the dairy, milk products plant, business, or tanker truck, for which a cost-related inspection fee shall be paid.

This bill would require persons engaging in the business of cleaning or sanitizing bulk milk tanker trucks to obtain a permit from the secretary. This bill would provide that bulk milk tanker trucks shall only be cleaned or sanitized at a facility holding such a license or at a licensed milk products plant or dairy farm. This bill would require bulk milk tanker truck cleaners or sanitizers to be inspected and would provide that the secretary may establish a cost-related fee for inspection.

Because it is a crime to interfere with the enforcement of these provisions this bill would increase the scope of an existing crime, thereby imposing a state-mandated local program.

This bill would make numerous other technical, nonsubstantive, and conforming changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 585 (AB 2947) Goldberg School facilities: school building capacity: transfer of special education programs.

Existing law, the Leroy F. Greene School Facilities Act of 1998, requires the State Allocation Board to allocate to applicant school districts, as defined, prescribed per-unhoused-pupil state funding for construction and modernization of school facilities, including hardship funding, and supplemental funding for site development and acquisition.

Existing law requires the calculation of existing pupil capacity to be made on a one-time basis as a baseline for eligibility determinations, and requires each school district that elects to participate in the new construction program to submit to the board a one-time report of existing school building capacity. Existing law requires ongoing eligibility for new construction funding to be determined by completing a series of calculations based on projected enrollment compared to existing school building capacity.

This bill would require the existing school building capacity calculation used to determine new construction eligibility to be reduced by the number of pupils that were housed in facilities to which the school district or county office of education relinquished title,

including a lease interest with a duration of greater than 5 years, as the result of a transfer of a special education program between a school district and a county office of education or special education local plan area, if applicable. The bill would authorize the board, for purposes of calculating projected enrollment as specified, to adopt regulations to ensure that the enrollment calculation of individuals with exceptional needs receiving special education services is adjusted in the enrollment reporting period in which the transfer occurs and 3 previous school years as a result of any transfer of a special education program between a school district and a county office of education or a special education local plan area. The bill would limit the adjustment of the projected enrollment calculation of a county office of education to instances in which a transfer of title for the special education program facilities has occurred. The bill would require the regulations, if adopted, to ensure that if a transfer of title to special education program facilities constructed with state funds occurs within 10 years after initial occupancy of the facility, the receiving school district or school districts shall remit to the state a proportionate share of any financial hardship assistance provided for the project as specified, if applicable.

Ch. 586 (AB 2989) Karnette Pupils: mandatory supplemental instruction.

Existing law requires the governing board of each school district maintaining any or all of grades 2 to 9, inclusive, to offer, and authorizes a charter school to offer, programs of direct, systematic, and intensive supplemental instruction to pupils enrolled in grades 2 to 9, inclusive, who have been recommended for retention or who have been retained, and authorizes a school district or charter school to require a pupil who has been retained to participate in supplemental instructional programs.

This bill would authorize the Long Beach Unified School District to require pupils, who are identified pursuant to a policy adopted by the governing board of the school district at a regularly scheduled board meeting, to participate in supplemental instruction programs, as specified.

The bill would also authorize any other school district to require pupils, who are identified pursuant to a policy adopted by the governing board of the school district at a regularly scheduled board meeting, to participate in those supplemental instructional programs.

The bill would require the school district to provide a mechanism for a parent or legal guardian to decline to enroll his or her child in a program.

The bill would specify that attendance in a program is not compulsory within the meaning of a specified provision of existing law.

Ch. 587 (AB 3046) Chavez Alcoholic beverages: advertising.

Existing law generally prohibits a manufacturer of alcoholic beverages and a winegrower from paying, crediting, or compensating a retailer for advertising or paying or giving anything of value for the privilege of placing a sign or advertisement with a retail licensee. It authorizes, as an exception, the holder of a winegrower's license, a California winegrower's agent, a beer manufacturer, a distilled spirits rectifier, a distilled spirits manufacturer, or a distilled spirits manufacturer's agent, to purchase advertising space and time from, or on behalf of, an on-sale retail licensee, under certain conditions, if the on-sale retail licensee is the owner, manager, agent of the owner, assignee of the owner's advertising rights, or major tenant of specified facilities, including specified facilities located in the Counties of Los Angeles and Orange.

This bill would expand these exceptions to include additional facilities located in Santa Clara County, as specified. This bill would allow, with respect to the specified facilities located in Santa Clara County, advertising space to be purchased from, or on the behalf of, a lessee or manager of the facilities.

This bill would make findings regarding the need for special legislation.

Ch. 588 (AB 3059) Committee on Elections and Redistricting Local elections: conforming changes.

Existing law establishes the procedures for submitting a proposed county ordinance without a petition for the repeal, amendment, or enactment of an ordinance, for submitting a proposed county or district ordinance by the filing of an initiative petition, and for filing a petition protesting the adoption of an ordinance. Existing law also establishes the procedures for consolidating 2 or more elections, including bond elections, of any legislative or congressional district, public district, city, county, or other political subdivision.

Existing law also specifies the established election dates in each year and requires the elections official of the principal county at least 90 days, and not more than 120 days, before the day fixed for a general district election, to publish notice of the election in a newspaper of general circulation, as specified. Existing law also defines “voter” and “district” for purposes of the Elections Code and requires each county elections official to send to the Secretary of State specified voter information.

Existing law also requires the precinct board to enclose and seal in one or 2 packages, as determined by the elections official, specified voting information.

This bill would make various, technical, nonsubstantive, and conforming changes to statutes related to these provisions.

Ch. 589 (AB 699) Chan Vaccines: influenza.

Existing law requires the State Department of Health Services to provide appropriate flu vaccine to local governmental or private, nonprofit agencies at no charge in order that the agencies may provide the vaccine, at a minimal cost, at accessible locations first for all persons 60 years of age or older in this state, and then to any other high-risk groups identified by the United States Public Health Service. The department and the California Department of Aging are required to prepare, publish, and disseminate information regarding the availability of the vaccine, and the effectiveness of the vaccine in protecting the health of older persons.

This bill would require any manufacturer or distributor of the influenza vaccine, or nonprofit health care service plan that exclusively contracts with a single medical group in a specified geographic area, to provide, or arrange for the provision of, medical services to its enrollees to report specified information regarding the supply of the vaccine upon notice from the department. It would require that, within each county or city health jurisdiction, entities that have possession of, or have a legal right to obtain possession of, the influenza vaccine, or entities that are conducting or intend to conduct influenza clinics for the public, their residents, or their employees, with certain exceptions, shall cooperate with the local health officer in determining local inventories of influenza vaccine, including providing copies of invoices and distribution lists as specified.

Ch. 590 (AB 2387) Vargas Insurance agents: education.

Existing law provides for the licensing of fire and casualty broker-agent, personal lines broker-agents, and life agents. An applicant for a fire and casualty broker-agent license who is licensed as a personal lines agent is required, among other things, to complete a minimum of 20 hours of prelicensing classroom study as a prerequisite.

This bill would delete the requirement that the 20 hours of prelicensing study be conducted in a classroom. This bill would also provide that prelicensing courses not conducted in the classroom are subject to review and approval, as specified.

The bill would further provide that prelicensing certificates of completion expire 3 years from completion of the course, whether or not a license is issued.

Ch. 591 (SB 53) Kehoe Redevelopment.

The Community Redevelopment Law authorizes the establishment of redevelopment agencies in communities in order to address the effects of blight, as defined, in those

communities and requires those agencies to prepare, or cause to be prepared, and approve a redevelopment plan for each project area. Existing law requires that a redevelopment plan contain certain provisions and authorizes a plan to provide for the agency to acquire by gift, purchase, lease, or condemnation all or part of the real property in the project area. Existing law permits an agency to extend the time limitation for commencement of eminent domain proceedings to acquire property within the project area only by amending the redevelopment plan.

This bill would require redevelopment plans to contain a description of the agency's program to acquire real property by eminent domain, including prohibitions, if any, on the use of eminent domain. The bill would require a redevelopment agency to find, based on substantial evidence, that significant blight remains in the project area and cannot be eliminated without the use of eminent domain before amending a redevelopment plan to extend the time limitation for the commencement of eminent domain proceedings to acquire property within the project area.

By requiring a redevelopment agency that has adopted a final redevelopment plan on or before January 1, 2007, to amend that plan, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 592 (SB 611) Speier Meat and poultry recalls.

The existing Sherman Food, Drug, and Cosmetic Law establishes requirements for the identification and branding of food, and provides for the administration of those requirements by the Food and Drug Branch of the State Department of Health Services, and, upon request of local agencies, for the administration of certain requirements by local health officers. Violation of this law is a crime.

This bill would require a meat or poultry supplier, distributor, broker, or processor that sells a meat- or poultry-related product in California that meets the criteria for a Class I or Class II recall according to the United States Department of Agriculture (USDA) guidelines to immediately notify the State Department of Health Services and to provide the department with a list of all customers, as specified, that have received or will receive any product subject to recall that the supplier, distributor, broker, or processor has handled or anticipates handling.

The bill would authorize the department to notify appropriate local health officers and environmental health directors that a supplier, distributor, broker, processor, or retailer in the local jurisdiction has handled or received, or anticipates handling or receiving, a meat- or poultry-related product that is subject to a voluntary recall requested or issued by the USDA.

This bill would provide that if the department makes that notification, the department, local health officers, and environmental health directors may notify the public regarding recalled meat- and poultry-related products. The bill would require the exclusion from that requirement of the name or identifying features of the retailer if the retailer is a restaurant and it is determined that the contaminated product has not been served to the public and has been permanently removed from the restaurant's food supply.

By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 593 (SB 988) Migden Safety Awareness Zones: Golden Gate Bridge.**

Existing law makes the Department of Transportation responsible for improving and maintaining the state highway system. Existing law does not provide for the designation of a specified segment of a highway as a Safety Awareness Zone.

This bill would designate the Golden Gate Bridge as a Safety Awareness Zone, upon the satisfaction of specified requirements that the bill would also establish for a designation of a highway segment as a Safety Awareness Zone. The bill would authorize a Safety Awareness Zone to be in effect for 3 years and would authorize renewal of a Safety Awareness Zone for an additional 3 years. The bill would require the approval of the Director of Transportation and the Commissioner of the Department of the California Highway Patrol for a 3-year renewal of the Safety Awareness Zone that is a state highway. The bill would require the Department of Transportation to develop and place signs to notify motorists of the presence of a Safety Awareness Zone. The bill would enact related provisions applicable to the establishment of Safety Awareness Zones.

**Ch. 594 (SB 1210) Torlakson Eminent domain.**

(1) Existing law governing settlement offers in eminent domain proceedings authorizes the recovery of litigation expenses under certain circumstances. Existing law provides that if a court finds, on motion of the defendant, that the offer of the plaintiff was unreasonable and the offer of the defendant was reasonable in light of the evidence admitted and the compensation awarded in the proceeding, then the costs allowed shall include the defendant's litigation expenses.

This bill would define litigation expenses to mean the party's reasonable attorney's fees and costs, including reasonable expert witness and appraiser fees.

(2) Existing law authorizes the plaintiff to make an ex parte application to the court to take possession of property prior to judgment and sets forth the procedures the plaintiff must follow. Existing law authorizes any defendant or occupant of the property to move for relief from the order if the hardship to the defendant of having possession taken at the time specified is substantial.

This bill would revise and recast those provisions. Among other changes to those provisions, the bill would authorize a plaintiff to make an ex parte application to the court for possession when the record owner cannot be located, would authorize the plaintiff to make a motion to the court for possession and would provide for a noticed hearing. The bill would require the plaintiff to serve a copy of the motion on the record owner and on the occupants of the property within specified time periods. The bill would authorize a defendant or occupant of the property to oppose the motion and seek a hearing on the motion regardless of whether the hardship of having possession taken at the time specified in the order is substantial. The bill would require the written opposition to be signed under penalty of perjury, thereby expanding the scope of an existing crime and creating a state-mandated local program. The bill would require the court to make an order for possession if the motion is not opposed and the court makes specified findings. The bill would also authorize a court to issue an order of possession upon an ex parte application by a utility if an emergency exists, as specified. The bill would make other, related changes.

(3) The Eminent Domain Law requires a condemnor to have the property appraised by an expert before depositing with the State Treasury the probable amount of compensation that will be awarded in a condemnation proceeding.

This bill would require a public entity to offer to pay the reasonable costs, not to exceed \$5,000, of an independent appraisal ordered by the owner of a property that the public entity offers to purchase under a threat of eminent domain, as specified, at the time the public entity makes the offer to purchase the property. This appraisal would be required to be conducted by an appraiser licensed by the Office of Real Estate Appraisers.

(4) Existing law prohibits public officers and employees from being financially interested in any contract made by them in their official capacity or by any body or board of which they are members.

This bill would prohibit an officer who is also a member of the governing body of an organization that has an interest in, or to which the public agency may transfer an interest in, property that the public agency may acquire by eminent domain from voting on any matter affecting that organization.

(5) Existing law requires that a redevelopment plan contain time limits, not to exceed 12 years, for the commencement of eminent domain proceedings to acquire property within the redevelopment project area.

This bill would provide that the time limitation may only be extended by amendment of the redevelopment plan after the redevelopment agency finds, based on substantial evidence, that significant blight remains within the project area and that the blight cannot be eliminated without the use of eminent domain.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 595 (SB 1206) Kehoe Redevelopment.

(1) The Community Redevelopment Law authorizes the establishment of redevelopment agencies in communities in order to address the effects of blight in those communities and defines a blighted area as one that is predominantly urbanized and characterized by specified conditions.

This bill would revise the definition of “predominantly urbanized” and revise the conditions that characterize a blighted area. The bill would prohibit the inclusion of nonblighted parcels in a redevelopment project area for the purpose of obtaining property tax revenue from the area without substantial justification for their inclusion.

(2) Under existing law, county officials are charged with the responsibility of allocating taxes levied upon the taxable property in a redevelopment project each year by or for the benefit of specified state or local taxing agencies and are required to prepare and deliver to the redevelopment agency and each of the taxing agencies a specified report that contains, among other information, the total assessed valuation of all taxable property within the redevelopment project area as shown on the base year assessment roll, the identifications of each taxing agency levying taxes in the project area, and the amount of tax revenue to be derived by each taxing agency from the base year assessment roll from the project area, including state subventions for homeowners, business inventory, and similar subventions. Existing law also requires a redevelopment agency to reimburse a county for costs incurred by the county in preparing the reports.

This bill would require these county officials to prepare and deliver a specified report to the Department of Finance that would, in addition to the information specified above, contain specified projections of these tax revenues and would also require the redevelopment agency to prepare and deliver an additional, specified report to the Department of Finance when the agency transmits the map of the project area, as specified. By increasing the duties of local public officials, the bill would impose a state-mandated local program.

The bill would require that the redevelopment agency also reimburse a school district, a county office of education, or a community college district for the preparation of any of these specified reports.

(3) Existing law requires that every redevelopment plan submitted by a redevelopment agency to the legislative body of the local agency contain a report with specified information, including a description of the physical and economic conditions that cause the project area to be blighted.

This bill would require that the description contain specific, quantifiable evidence that documents specified physical and economic conditions in the project area.

(4) Existing law requires the legislative body to consider the adoption of a redevelopment plan submitted by the redevelopment agency at a public hearing.

This bill would require the redevelopment agency, no later than 45 days prior to the hearing, to deliver a copy of the preliminary report and notice of the date of the hearing to the Department of Finance and the Department of Housing and Community Development for an estimate of the proposed plan's effect upon the General Fund.

(5) Existing law specifies the contents of the ordinance adopting a redevelopment plan, including the findings and determinations of the legislative body about the blighted area that is to be redeveloped.

This bill would require the findings to be based on clearly articulated and documented evidence, and would add an additional finding and determination that the implementation of the redevelopment plan will improve the physical and economic conditions of blight in the project area.

(6) Existing law makes an ordinance that adopts, modifies, or amends a redevelopment plan subject to referendum and requires the referendum petitions circulated in cities and counties over 500,000 population be submitted to the clerk of the legislative body within 90 days of the adoption of the ordinance subject to referendum.

This bill would, notwithstanding any other provision of law, make this 90-day requirement applicable to all cities and counties.

(7) Existing law prohibits a redevelopment agency from using tax increment funds for the construction or rehabilitation of a city hall or county administration building.

This bill would include land acquisition, related site clearance, and design costs in the prohibition against using tax increment funds for the construction of a city hall or county administration building.

(8) Existing law requires the redevelopment agency to hold a public hearing on a proposed amendment of the redevelopment plan before recommending the amendment.

This bill would require the agency, no later than 45 days prior to the public hearing, to notify the Department of Finance and the Department of Housing and Community Development of the hearing and the proposed amendment and to prepare a report containing specified information about the proposed amendment. The bill would also require the Department of Finance to estimate certain effects of the proposed amendment. These requirements would apply only if the proposed amendments would make any one of 6 specified changes to the redevelopment plan.

(9) Existing law authorizes a redevelopment agency to merge project areas under its jurisdiction without regard to contiguity of the areas.

This bill would require the legislative body of the redevelopment agency that intends such a merger to find, based on substantial evidence, that significant blight remains within one of the project areas and that the blight cannot be eliminated without the merger.

(10) Existing law authorizes the bringing of a civil action to determine the validity of proceedings taken by a legislative body related to the establishment of a redevelopment agency and specified actions taken by a redevelopment agency and makes the Department of Finance an interested person in action brought with regard to the validity of an ordinance adopting a redevelopment plan.

This bill would permit the civil action to be commenced within 90 days from the date of the decision of the legislative body or redevelopment agency and would also make the Attorney General an interested person in a civil action brought to determine the validity of these matters. The bill would authorize the Attorney General to intervene as of right in these civil actions.

The bill would prohibit an action from being brought against a redevelopment agency or legislative body unless the grounds for noncompliance with the Community Redevelopment

Law are presented to the agency or legislative body orally or in writing before the close of the required public hearing.

The bill would require any party filing a pleading or brief in an action challenging the validity of a finding and determination that the project area is blighted to serve a copy of the pleading or brief on the Attorney General and would prohibit a court from granting relief to a party unless proof is filed with the court that the party has complied with this requirement.

The bill would prohibit a redevelopment agency or legislative body from permitting or requiring a property owner or real party in interest to indemnify the agency or legislative body against these civil actions as a condition of adopting or amending a redevelopment plan.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 596 (SB 1222) Ackerman Crime: criminal gangs.

Existing law, as amended by initiative, provides that any person who participates in any criminal street gang with knowledge that its members engage in a pattern of criminal gang activity and who promotes felonious criminal conduct shall be punished, as specified. Existing law defines a pattern of criminal gang activity as the commission, attempt to commit, conspiracy to commit, solicitation for, or conviction of 2 or more listed offenses, as specified. Existing law authorizes the Legislature to amend these provisions with a 2/3 vote of each house.

This bill would add various crimes relating to prohibited possession of a firearm, carrying a concealed firearm, and carrying a loaded firearm, to those offenses which if committed by members of the criminal street gang establish a pattern of criminal gang activity for purposes of these provisions, as specified.

Because this bill would change the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 597 (SB 1244) Soto National Guard: volunteers: travel and uniform allowance.

Existing law specifies certain pay and allowances for members of the National Guard.

This bill would express the intent of the Legislature to enact legislation to defray costs of service that volunteers must bear as members of the State Military Reserve and Naval Militia. This bill would authorize an allowance, as specified, to volunteers in the State Military Reserve and Naval Militia for reimbursement of uniform and travel costs. This bill would make an appropriation of \$75,000 from the General Fund to the Military Department for the purposes of providing the allowance.

#### Ch. 598 (SB 1368) Perata Electricity: emissions of greenhouse gases.

(1) Under existing law, the Public Utilities Commission (PUC) has regulatory authority over public utilities, including electrical corporations. Existing law authorizes the PUC to establish rules for all public utilities, and the Legislature has established procedures for rulemaking proceedings before the PUC. Existing law requires the PUC to review and adopt a procurement plan and a renewable energy procurement plan for each electrical corporation pursuant to the California Renewables Portfolio Standard Program.

Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission) to certify eligible renewable energy resources, to design and implement an accounting system to verify compliance with the renewables portfolio standard by retail sellers, and to allocate and award supplemental energy payments to cover the above-market costs of electricity generated by eligible renewable energy resources.

Under existing law the governing board of a local publicly owned electric utility is responsible for implementing and enforcing a renewables portfolio standard that recognizes the intent of the Legislature to encourage renewable resources, while taking into consideration the effect of the standard on rates, reliability, and financial resources and the goal of environmental improvement. Existing law requires the governing board of a local publicly owned electric utility to report certain information relative to renewable energy resources to its customers.

Existing law defines an “electric service provider” as an entity that offers electrical service to customers within the service territory of an electrical corporation, excluding electrical corporations, local publicly owned electric utilities, and certain cogenerators. Provisions of the existing Public Utilities Act restructuring the electrical services industry require that electric service providers register with the PUC and require the PUC to authorize and facilitate direct transactions between electric service providers and retail end-use customers. However, other existing law suspends the right of retail end-use customers other than community aggregators, to acquire service through a direct transaction, until the Department of Water Resources no longer supplies electricity under that law.

Existing law defines a “community choice aggregator” and authorizes customers to aggregate their electric loads as members of their local community with community choice aggregators.

The existing restructuring of the electrical industry within the Public Utilities Act provides for the establishment of an Independent System Operator (ISO) as a nonprofit public benefit corporation. Existing law requires the ISO to ensure efficient use and reliable operation of the transmission grid consistent with achieving planning and operating reserve criteria no less stringent than those established by the Western Electricity Coordinating Council and the American Electric Reliability Council.

Under existing law, the State Air Resources Board, the Energy Commission, and the California Climate Action Registry all have responsibilities with respect to the control of emissions of greenhouse gases, as defined, and the Secretary for Environmental Protection is required to coordinate emission reductions of greenhouse gases and climate change activity in state government.

This bill would prohibit any load-serving entity, as defined, and any local publicly owned electric utility, from entering into a long-term financial commitment, as defined, unless any baseload generation, as defined, complies with a greenhouse gases emission performance standard. The bill would require the PUC, by February 1, 2007, through a rulemaking proceeding and in consultation with the Energy Commission and the State Air Resources Board, to establish a greenhouse gases emission performance standard for all baseload generation of load-serving entities. The bill would require the Energy Commission, by June 30, 2007, at a duly noticed public hearing and in consultation with the PUC and the State Air Resources Board, to establish a greenhouse gases emission performance standard for all baseload generation of local publicly owned electric utilities. The bill would require that the greenhouse gases emission performance standard not exceed the rate of emissions of greenhouse gases for combined-cycle natural gas, as defined, baseload generation. The bill would prohibit the PUC from approving any long-term financial commitment by an electrical corporation unless any baseload generation supplied under the long-term commitment complies with the greenhouse gases emission performance standard. The bill would authorize the PUC to review any long-term financial commitment proposed to be entered into by an electric service provider or community choice aggregator in order to enforce the bill’s requirements. The bill would require the PUC to adopt rules to enforce these

requirements for load-serving entities and would require the PUC to adopt procedures, for all load-serving entities, to verify the emissions of greenhouse gases from any baseload generation supplied under a contract subject to the greenhouse gases emission performance standard. The bill would require the PUC, through a rulemaking proceeding and in consultation with the Energy Commission and the State Air Resources Control Board, to reevaluate and continue, modify, or replace the greenhouse gases emissions performance standard when an enforceable greenhouse gases emissions limit is established and in operation, that is applicable to load-serving entities.

The bill would require the Energy Commission to adopt regulations for the enforcement of the greenhouse gases emission performance standard with respect to a local publicly owned electric utility. The bill would require the Energy Commission, in a duly noticed public hearing and in consultation with the PUC and the State Air Resources Board, to reevaluate and continue, modify, or replace the greenhouse gases emission performance standard when an enforceable greenhouse gases emissions limit is established and in operation, that is applicable to local publicly owned electric utilities.

(2) Under existing law, a violation of the Public Utilities Act or an order or direction of the commission is a crime.

Because certain of the provisions of this bill are within the act and require action by the commission to implement its requirements, a violation of these provisions would impose a state-mandated local program by creating a new crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 599 (SB 1379) Perata Biomonitoring.

Existing law establishes various programs for the protection of the public from exposure to toxins, including, but not limited to, the Childhood Lead Poisoning Prevention Act, administered by the State Department of Health Services, which imposes a fee upon manufacturers or persons who are responsible for lead contamination and applies the proceeds of the fee to reduction or elimination of the harm caused by the lead contamination.

This bill would require the department in collaboration with the California Environmental Protection Agency to establish the California Environmental Contaminant Biomonitoring Program to monitor the presence and concentration of designated chemicals, as defined, in Californians.

This bill would require the department and the agency to establish a Scientific Guidance Panel to assist the department and the agency. The bill would require the department to provide public access to information, and to report to the Legislature and the public.

#### Ch. 600 (SB 1451) Kehoe Emergency preparedness: disabled community.

Existing law provides for emergency services, as specified.

This bill would require the Governor's Office of Emergency Services to ensure representation of the disabled community on all pertinent Standardized Emergency Management System Specialist Committees, as specified. The bill would require the Director of Emergency Services to report to the Legislature, not later than January 1, 2009, recommendations regarding preparedness, planning, procedures and other items, as specified, to prepare and disseminate sample brochures on those matters, and to make those brochures available in accessible formats, as specified. The bill would require the director and the State Fire Marshal's office to seek research funds to assist in the development of new technologies and information systems that will assist in the evacuation of disabled persons, as specified. The bill would express the intent of the Legislature that funds be used from funds received from the federal Department of Homeland Security, as specified.

**Ch. 601 (SB 1454) Torlakson Crimes: hazing.**

Existing law codifies within the Education Code the definition of hazing and imposes criminal penalties on persons who haze.

This bill would repeal the Education Code hazing provisions and instead codify within the Penal Code a new definition of hazing and prescribe misdemeanor and felony penalties, as specified. This bill would also allow a person to bring a civil action for injury or damages against individuals who participate in the hazing or organizations who authorize, request, command, participate in, or ratify the hazing.

Because this bill would change the definition of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 602 (SB 1650) Kehoe Eminent domain.**

Existing law requires the governing body of a public entity to adopt a resolution of necessity, as specified, and send related notices before commencing an eminent domain proceeding. Existing law provides that an owner of property taken by eminent domain is entitled to compensation, including compensation for goodwill.

This bill would require the governing body of a public entity, before the public entity may use property that is subject to a resolution of necessity, as specified, for a public use other than the public use stated in the resolution to adopt a resolution authorizing a different use of the property by a vote of at least 2/3 of all members of the governing body of the public entity or a greater vote as required by statute, charter, or ordinance. The bill would also require a public entity to sell property that is not used for the public use stated in the resolution within 10 years of the adoption of the resolution unless the governing body adopts a resolution authorizing a different use or reauthorizing the existing stated public use by a vote as described above. The bill would require specified property subject to the new resolution procedure to be offered back to the person or persons from whom the property was acquired, subject to certain requirements, if the public entity fails to adopt a new resolution or a resolution reauthorizing the stated public use, and that property was not used for the public use stated in the original resolution of necessity or a new resolution authorizing a different use or reauthorizing the existing stated public use between the time of the property's acquisition and the time of the public entity's failure to adopt a new resolution. The bill would require the Department of Housing and Community Development to provide specified information to a public entity in connection with property that is a single-family residence.

This bill would also require a public entity acquiring property under specified circumstances to offer the owner of the property a one-year leaseback agreement for that property owner's continued use, subject to the property owner's payment of fair market rents and compliance with other specified conditions, unless the public entity states in writing that the development, redevelopment, or use of the property is scheduled to begin within two years of its acquisition. With regard to the calculation of compensation for the property taken, the bill would prohibit additional goodwill value from accruing during the leaseback.

The bill would apply prospectively, as specified.

**Ch. 603 (SB 1809) Machado Redevelopment: eminent domain.**

Existing law governs eminent domain proceedings including those initiated by community redevelopment agencies. Existing law requires a description of the land within a redevelopment project area and a statement that proceedings for the redevelopment of the project area have been instituted to be recorded with the county recorder of the county in which the project area is situated after the legislative body adopts a redevelopment plan.

Existing law authorizes amendments to a redevelopment plan to be recorded as promptly as practicable following their adoption by the legislative body.

This bill would require the statement to be recorded not later than 60 days following adoption of a redevelopment plan or amendments to a redevelopment plan. The statement regarding plan adoption, if the plan authorizes the agency to acquire property by eminent domain, and the statement regarding amendments to the plan, if a plan amendment adds territory to the project area, would be required to contain a prominent heading in boldface type noting that the property that is the subject of the statement is located within a redevelopment project, a description of the provisions of the redevelopment plan that authorize the agency to use of the power of eminent domain, and a general description of any limitations on the use of the power of eminent domain contained in the redevelopment plan. For a redevelopment plan adopted on or before December 31, 2006, that authorizes the acquisition of property by eminent domain, the bill would require the agency, on or before December 31, 2007, to cause a revised statement to be recorded with the county recorder of the county in which the project area is situated containing all the above information. The bill would prohibit an agency from commencing an action in eminent domain until this statement is recorded with the county recorder. By imposing new duties on local government, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 604 (AB 450) Yee Standardized emergency management system: animals.

Existing law requires the Office of Emergency Services, in coordination with all interested state agencies with designated response roles in the state emergency plan and interested local emergency management agencies, to jointly establish by regulation a standardized emergency management system for use by all emergency response agencies, to include specified components.

This bill would require the office to approve and adopt, and incorporate the California Animal Response Emergency System program into the standardized emergency management system. The bill would require the office and the Department of Food and Agriculture, and other interested parties, to enter into a memorandum of understanding to incorporate the CARES program into their emergency planning.

#### Ch. 605 (AB 630) Chu Immigration consultants.

Existing law provides for the regulation of a person engaged in the business or acting in the capacity of an immigration consultant. Existing law requires an immigration consultant to file a bond with, and submit a disclosure form and a copy of a photograph identification to, the Secretary of State. Existing law requires the Secretary of State to post on its Internet Web site information demonstrating that an immigration consultant is in compliance with the bond requirement.

This bill would also require a person engaged in the business or acting in the capacity of an immigration consultant to submit to the Department of Justice (DOJ) fingerprint images and other information required by DOJ to obtain the person's criminal history information, as specified. The bill would require DOJ to forward the person's fingerprint images and other information to the Federal Bureau of Investigation to obtain federal criminal history information and would require DOJ to report the criminal history information to the Secretary of State. The bill would require an immigration consultant to pass a background check, and would require his or her disqualification for specified reasons. The bill would require the Secretary of State to post on its Internet Web site information, other than criminal history information received from DOJ, demonstrating that an immigration consultant has passed the background check and a copy of his or her photograph, and would only allow

posting of this information and the information regarding bond compliance if he or she has met those requirements. The bill would require the Secretary of State to issue a cease and desist order to a person who has failed to maintain a valid bond or to pass the background check, after giving the person notice and an opportunity to demonstrate that grounds do not exist for the order, and to give notice of the failure to the Attorney General.

Existing law requires an immigration consultant to provide a client with a written contract prior to providing services. Existing law makes it unlawful for a person to disseminate any statement that the person acts or proposes to act as an immigration consultant without having a bond on file with the Secretary of State.

This bill would require an immigration consultant to include information in the written contract regarding reporting complaints to the California Department of Justice and the State Bar of California. The bill would also make it unlawful for a person to disseminate a statement that the person acts or proposes to act as an immigration consultant without having a disclosure statement on file with the Secretary of State.

Existing law makes a violation of the provisions regulating immigration consultants a misdemeanor, subject to specified fines.

This bill would specify that an action for a violation of those provisions must be commenced within 4 years after discovery of the commission of the offense.

Because this bill would create a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 606 (AB 1407) Lieber State-owned Bay Area toll bridges: HOV lanes.

(1) Existing law specifies the respective powers and duties of the Bay Area Toll Authority and the Department of Transportation relative to the operation of the state-owned Bay Area toll bridges and the allocation of toll bridge revenues. Existing law establishes an expenditure plan that includes a project list for the toll revenues derived from increasing the bridge tolls from \$2 to \$3.

This bill would modify certain of the duties required of local and regional agencies relative to that expenditure plan, thereby imposing a state-mandated local program.

(2) Existing law provides for the Department of Transportation to designate certain lanes for the exclusive use of buses and high-occupancy vehicles (HOVs), which lanes may also be used by certain low-emission and hybrid vehicles not carrying the requisite number of passengers otherwise required for use of an HOV lane if the vehicles display a valid identifier issued by the Department of Motor Vehicles until January 1, 2008. Existing law authorizes, but does not require, the Bay Area Toll Authority to grant toll-free or reduced-rate passage on the state-owned Bay Area toll bridges to buses and specified carpool vehicles. Existing law requires the same toll-free or reduced-rate passage to be extended to certain low-emission vehicles and hybrid vehicles displaying the identifier issued by the Department of Motor Vehicles, subject to various conditions. Under these conditions, residents of the 9-county Bay Area with hybrid vehicles are first required to enroll in the automatic vehicle identification and payment system, known as FasTrak, before they may apply to DMV for an identifier and before they may travel in any HOV lane without having the requisite number of passengers otherwise required for use of an HOV lane. To the extent that residents of the 9-county Bay Area with hybrid vehicles travel on a Bay Area state-owned toll bridge without the requisite number of passengers required for toll-free or reduced-rate passage, those persons are required to pay the regular applicable toll through the FasTrak system. Residents of other counties with hybrid vehicles are not required to first enroll in FasTrak, in order to apply to DMV for an identifier.

This bill would instead require residents of the 9-county Bay Area with hybrid vehicles to obtain and maintain an active FasTrak, account in order to apply to DMV for an identifier and before they may travel in any HOV lane without having the requisite number of passengers otherwise required for use of an HOV lane.

This bill would also require a local authority, until January 1, 2008, if it authorizes or permits exclusive or preferential use of highway lanes or highway access ramps for high-occupancy vehicles, to also extend the use of those lanes or ramps to vehicles that have been issued distinctive decals, labels, or other identifiers because the vehicles meet specified conditions for low-emission vehicles. This bill would require the local authorities to suspend the high-occupancy vehicle lane access privilege during periods of peak congestion to the above-described vehicles if a periodic review of lane performance discloses certain factors.

(3) This bill would incorporate additional changes in Section 21655.9 of the Vehicle Code, proposed by AB 2600, to become operative only if AB 2600 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 607 (AB 2085) Parra Income taxes: designations: California Military Family Relief Fund.

Under existing Personal Income Tax Law, taxpayers are allowed to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the California Military Family Relief Fund. Upon appropriation by the Legislature, the moneys in this fund are to be allocated to the Military Department to provide financial aid grants to eligible members of the California National Guard who are California residents, who have been called to active duty for at least 100 consecutive days, and whose military salary has decreased by 30% or more from the member's civilian salary.

This bill would instead require a member to have been called to active duty for at least 60 consecutive days, and would require either that the member's salary, combined with any ongoing partial receipt of civilian salary, to have decreased by 10% or more from the member's civilian salary, or the household income of the member's family to have decreased by 10% or more from the member's household income prior to deployment, in order for the member to be eligible to receive a grant.

Ch. 608 (AB 2102) Saldana Military dependents: records.

Existing law prescribes certain courses of study for pupils enrolled in public school and requires specific courses be completed in order to receive a diploma of graduation from high school. Existing law permits a school district to specify additional coursework for a pupil to complete in order to receive a diploma of graduation from high school.

This bill would require the State Department of Education to establish a formal liaison with the United States Department of Defense and school districts and county offices of education that enroll military dependents to examine course credit transfer issues and establish guidelines for course credit transfer, to develop procedures to facilitate the integration of military dependents into new schools, to establish procedures to assist military dependents in meeting local graduation requirements, and to create model memorandums of agreement between military bases and school districts or county offices of education. The bill also would permit the governing board of a school district and a county office of education to establish a course credit transfer policy for schoolage military dependents provided that the military dependents would still substantially meet the graduation requirements prescribed by the governing board; and to provide early entry transfer, pretranscript evaluation, pupil

support services, and other similar assistance to aid schoolage military dependents in meeting graduation requirements. The bill, however, would limit the authority of a school district to make the specified accommodations for military dependents to situations in which the parent or legal guardian of the military dependent is serving on active duty or has been discharged from military service within the last year and the transfer of the military dependent to a new school is the direct result of a military transfer or discharge of the parent or legal guardian of the dependent.

Ch. 609 (AB 2210) Goldberg Tow trucks: regulating.

(1) Existing statutory law authorizes a city or county to adopt rules and regulations by ordinance or resolution regarding, among other things, licensing and regulating the operation of tow truck service or tow truck drivers whose principal place of business or employment is within the jurisdiction of that local authority, except as specified.

This bill would express certain legislative findings regarding the safety and welfare of the general public as being promoted in allowing local authorities to license and regulate tow truck service companies and their operators.

(2) Existing law requires a towing company to remove a vehicle parked on private property to the nearest public garage under specific circumstances if, among other things, the property owner or lessee's prior written authorization is obtained and imposes certain duties on the property owner or lessee, the tow truck company, and the storage facilities and their operators. Under existing law, civil causes of action are established for violating these provisions and it is an infraction, under the Vehicle Code, for a person to violate, or fail to comply with the Vehicle Code or a local ordinance adopted pursuant to the Vehicle Code.

This bill would substantially recast these provisions by requiring, among other things, that the property owner or lessee include the name and telephone number of each towing company that is a party to a written general towing authorization with that person, that the described written authorization from the property owner or the lessee contain certain specific information, and that the tow truck operator, notify the registered and legal owner of the fact of the removal of a vehicle, the grounds for the removal, and the place where the vehicle has been removed, under specified conditions. The bill would also require the towing company to provide a photocopy, as specified, of the written authorization to the vehicle owner or an agent of that owner, when that person claims the vehicle and prior to payment, would prohibit a towing company from removing or commencing the removal of a vehicle from certain private property unless the towing company has made a good faith inquiry to determine that the owner or the property owner's agent complied with certain statutory restrictions regarding the removal of a vehicle from certain private property. The bill would require a towing company to maintain certain records. The bill would make a violation of these provisions, an infraction or a misdemeanor, thereby imposing a state-mandated local program by creating new crimes, and subject to civil actions.

The bill would require, upon a vehicle owner's request, a towing company or its driver to immediately and unconditionally release a vehicle that is not yet removed from private property and in transit. The bill would make it a misdemeanor to violate this requirement and to knowingly charge a vehicle owner a towing, service, or charge that exceeds statutorily imposed rates, thereby imposing a state-mandated local program by creating new crimes.

This bill would require a towing operator to make available for inspection and copying, his or her rate approved by the California Highway Patrol within 24 hours of a request to specified entities. The bill would make it a misdemeanor to violate this requirement, thereby imposing a state-mandated local program by creating new crimes.

The bill would require an owner or the owner's authorized agent of a vehicle that has been released, as described above, to immediately move that vehicle to a lawful location. Because the failure to comply with this requirement would be a crime, this bill would impose a state-mandated local program.

This bill would require a person operating or in charge of a storage facility to conspicuously display in that portion of the office where business is conducted with the public a notice advising that all valid credit cards, as defined, and cash are acceptable means of payment.

The bill would make the failure to comply with these display requirements or to fail to accept valid credit card or cash payments a misdemeanor, thereby, imposing a state-mandated local program by creating new crimes.

This bill would require a towing company that removes a vehicle from private property to notify the local law enforcement agency of the tow after the vehicle is removed from the private property and is in transit. The bill would subject the towing company to civil liability to the registered owner of the vehicle, or his or her agent, if the towing company fails to notify the local law enforcement agency within 30 minutes of the removal. The bill would provide that a towing company is guilty of a misdemeanor if the towing company fails to notify the local law enforcement agency within 60 minutes after that removal or 15 minutes after the towed vehicle arrives at a storage facility, whichever is less, thereby imposing a state-mandated local program by creating a new crime. The bill would provide a towing company with an affirmative defense if the required notification is impracticable, in which case the time for notification is tolled for the period in which the notification is impracticable.

The bill would express the intent of the Legislature regarding vehicle possession and promoting the safety of the general public, and would specify that the remedies, sanctions, restrictions, and procedures provided in these provisions are not exclusive and are in addition to other remedies, sanctions, restrictions, or procedures that may be provided in other provisions of law.

This bill would require that a vehicle removed from private property be stored in a storage facility that meets specified requirements. Because the failure to comply with these requirements would be a crime, the bill would impose a state-mandated local program.

(3) Existing law authorizes a peace officer, as defined, or a regularly employed and salaried employee who is engaged in directing traffic or enforcing parking laws and regulations of the jurisdiction in which a vehicle is located, to immobilize the vehicle that is located on a highway or public lands located within the territorial limits in which the officer or employee may act, if the vehicle is found upon a highway or the public lands and certain factors are known to exist regarding the vehicle or the registered owner.

This bill would expressly provide that the above-described authorization does not authorize a person, other than a person expressly authorized above, to immobilize a vehicle.

(4) Existing law limits a towing company to imposing a charge of not more than  $1/2$  of the regular towing charge for the towing of a vehicle at the request of the owner of private property or that owner's agent if the owner of the vehicle or the vehicle owner's agent returns to the vehicle before it is removed from the private property.

This bill would recast that provision to limit a towing company to  $1/2$  of the regular towing charge of a vehicle that is towed at the request of the owner, the owner's agent, or the person in lawful possession of the private property if the owner of the vehicle or the vehicle owner's agent returns to the vehicle after the vehicle is coupled to the tow truck, as specified, or is lifted off the ground by means of conventional trailer, and before it is removed from the private property.

(5) Existing law prohibits an owner or person in lawful possession of private property that is held open to the public, or a discernible portion thereof, for parking of vehicles at no fee, from towing or removing, or causing the towing or removal, of a vehicle within one hour of the vehicle being parked, except as excluded.

This bill would exclude from this prohibition a vehicle that is parked in a manner that interferes with an entrance to, or exit from, the private property.

This bill would also express legislative intent regarding promoting the safety of the general public, and would allow for a civil cause of action upon a violation of the above prohibition.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 610 (AB 2214) Tran Asian food: study.

Existing law, the California Uniform Retail Food Facilities Law (CURFFL), provides for the regulation of health and sanitation standards for retail food facilities by the State Department of Health Services, and is primarily enforced by local health agencies.

Existing law also contains various provisions governing food labeling and safety.

This bill would require the department to conduct a study in connection with these standards and their effect on the sale and consumption of specified food at traditional Asian ceremonies and cultural events. This bill would require the department to present its findings to the Legislature no later than January 1, 2008.

Ch. 611 (AB 2242) Committee on Public Employees, Retirement and Social Security Public employee health benefits: vision care: annuitants.

Existing law provides in the State Treasury the State Annuitants' Vision Care Benefits Fund that is, upon appropriation by the Legislature, available to the Board of Administration of the Public Employees' Retirement System for expenditure solely for the provision of vision care benefits to state annuitants.

This bill would additionally establish a vision care program for specified state annuitants and their dependents. The bill would require the Department of Personnel Administration to administer the program, and would create the Vision Care Program for State Annuitants Fund that is available, upon appropriation by the Legislature, for those purposes. The bill would also require the department to report to the Legislature with regard to the economic sustainability of the program, and would allow for the termination of the program upon a specified circumstance.

Ch. 612 (AB 2283) Oropeza Physicians and surgeons: cultural background and foreign language proficiency.

The Medical Practice Act provides for the licensure by the Medical Board of California of physicians and surgeons as well as other healing arts practitioners. The act requires each licensed physician to complete a questionnaire sent to him or her at the time of license renewal that seeks specified information. Existing law authorizes a physician to report to the board, and requires the board to collect, information regarding his or her cultural background and foreign language proficiency. Existing law permits this information to be placed on the board's Internet Web site.

This bill would require the information regarding cultural background and foreign language proficiency to be aggregated on an annual basis based on categories utilized by the board in the collection of the data, and to be aggregated into both statewide totals and ZIP Code of primary practice location totals. The bill would also require this information to be compiled and reported on the board's Internet Web site on or before October 1 of each year.

Ch. 613 (AB 2433) Negrete McLeod National Guard Family Resource Center Act.

Existing law establishes the Military Department comprised of the Office of the Adjutant General, the California National Guard, the State Military Reserve, the California Cadet Corps, and the Naval Militia. The department has specified powers and duties relating to military and veterans.

This bill would appropriate from the General Fund to the department the sum of \$99,000 for the 2006–07 fiscal year to provide upgraded armory facilities and access at specified battalion headquarters armory locations to support the creation of Family Resource Centers, as provided.

This bill would require the department to make a report to the Legislature regarding the program and make specified legislative findings and declarations in connection thereto.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 614 (AB 2600) Lieu Vehicles: HOV lanes.

(1) Existing law provides for the Department of Transportation to designate certain lanes for the exclusive use of high-occupancy vehicles (HOVs), which lanes may also be used by certain low-emission and hybrid vehicles not carrying the requisite number of passengers otherwise required for use of an HOV lane if the vehicles display a valid identifier issued by the Department of Motor Vehicles until January 1, 2008. Existing law requires the department to make available for issuance, no more than 75,000 distinctive decals, labels, and other identifiers for certain hybrid or alternative fuel vehicles meeting specified mileage and emission standards. Existing law authorizes, but does not require, the Bay Area Toll Authority to grant toll-free or reduced-rate passage on the state-owned Bay Area toll bridges to any vehicle. Existing law requires that if such authority is exercised the same toll-free or reduced-rate passage be extended to certain low-emission vehicles and hybrid vehicles displaying the identifier issued by the Department of Motor Vehicles, until January 1, 2008, subject to various conditions.

This bill would extend these provisions until January 1, 2011, or until the Director of Transportation determines that federal law does not authorize the state to allow these low-emission and hybrid vehicles to so operate in HOV lanes, whichever occurs first.

This bill would increase the number of described distinctive decals, labels, and other identifiers that are required to be issued by the department to no more than 85,000, rather than no more than 75,000.

(2) Existing law prohibits, until January 1, 2008, a person from operating or owning a vehicle that displays a decal, label, or other identifier if that identifier was not issued to that vehicle. Existing law provides that a violation of this prohibition is a misdemeanor.

This bill would extend this prohibition to January 1, 2011 or until the Director of Transportation makes a determination regarding federal law, as specified. Because a violation of this prohibition is a crime, this bill would create a state-mandated local program.

(3) This bill would incorporate changes made to Sections 5205.5 and 21655.9 of the Vehicle Code proposed by AB 1407 to become operative only if AB 1407 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 615 (AB 2609) Evans Residential facilities for the elderly: employee training.

Existing law, the California Residential Care Facilities for the Elderly Act, provides for the licensure and regulation of residential care facilities for the elderly by the State Department of Social Services. Under existing law, a violation of any of these provisions is punishable as a misdemeanor.

This bill would require, beginning January 1, 2008, that a licensed residential care facility for the elderly ensure that each employee of the facility who assists residents with the self-administration of medications meet specified employee training requirements set forth in the bill. The bill would require these employees to pass an examination subsequent to completion of the training. The bill would require that each residential care facility that provides employee training pursuant to these provisions maintain certain records and documentation related to that training. It would also provide that a facility, licensed to provide care for 16 or more persons, maintain documentation that demonstrates that a consultant pharmacist or nurse has reviewed the facility's medication management program

and procedures at least twice a year. By creating a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 616 (AB 2719) Houston Property tax postponement.**

The Senior Citizens and Disabled Citizens Property Tax Postponement Law allows senior citizens and disabled persons to postpone their payment of ad valorem property taxes, special assessments, and fees and other charges due on a residential dwelling, where household income, as defined, does not exceed either \$34,000 or \$24,000, as applicable.

This bill would, for the 2007 calendar year and each subsequent calendar year, and for approved fiscal years commencing within any of those calendar years, allow senior citizens and disabled persons to postpone the payment of ad valorem property taxes, special assessments, and fees and other charges, where household income, as defined, does not exceed specified amounts. This bill would provide for the annual adjustment of that household income amount for inflation, commencing with the 2010 calendar year and fiscal years commencing within that calendar year.

**Ch. 617 (AB 2778) Lieber Electricity: self-generation incentive program.**

Under existing law, the Public Utilities Commission (PUC) has regulatory authority over public utilities, including electrical corporations. Existing law requires the commission, in consultation with the State Energy Resources Conservation and Development Commission (Energy Commission), to administer, until January 1, 2008, a self-generation incentive program for distributed generation resources in the same form that exists on January 1, 2004, subject to certain air emissions and efficiency standards. In a decision, the PUC adopted the California Solar Initiative, which modified the self-generation incentive program for distributed generation resources and provides incentives to customer-side photovoltaics and solar thermal electric projects under one megawatt.

This bill would require the commission, in consultation with the Energy Commission, to administer, until January 1, 2012, a self-generation incentive program for distributed generation resources. The program in its currently existing form, would be applicable to all eligible technologies, as determined by the commission, until January 1, 2008, except for solar technologies, which the commission would be required to administer separately, after January 1, 2007, pursuant to the California Solar Initiative. The bill, commencing January 1, 2008, until January 1, 2012, would limit eligibility for nonsolar technologies to fuel cells and wind distributed generation technologies that meet or exceed the emissions standards required under the distributed generation certification program adopted by the State Air Resources Board. The bill would require the Energy Commission, on or before November 1, 2008, in consultation with the commission and the board, to evaluate the costs and benefits of providing ratepayer subsidies for renewable and fossil fuel "ultraclean and low-emission distributed generation," as defined, as part of the Energy Commission's integrated energy policy report.

**Ch. 618 (AB 2844) Nation Mental health: veterans' eligibility for services.**

Existing law authorizes a county to appoint a county veterans service officer and to prescribe the duties of that office. Existing law sets forth the primary goals of the mental health account of a local mental health trust fund, including, but not limited to, services for seriously emotionally disturbed children and adolescents, and adults and older adults who have a serious mental disorder, including veterans in need of mental health services who are not eligible for federal health care coverage. Existing law requires the county to refer the veteran to the county veterans service officer, if any, prior to denying eligibility.

This bill would require veterans, who are eligible for both federal and county mental health services, to utilize the services provided through their federal health care coverage. However, this bill would prohibit counties from denying mental health services to eligible veterans based solely on their status as veterans, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 619 (AB 2911) Nunez California Discount Prescription Drug Program.

Under existing law, the State Department of Health Services administers the Medi-Cal program, and is authorized, among other things, to enter into contracts with certain drug manufacturers. Under existing law, the department is entitled to drug rebates in accordance with certain conditions, and drug manufacturers are required to calculate and pay interest on late or unpaid rebates.

This bill would establish the California Discount Prescription Drug Program within the department, applicable only to prescription drugs dispensed to recipients on an outpatient basis. The bill would require the department to negotiate drug discount agreements with drug manufacturers, as specified. The bill would authorize any licensed pharmacy and any drug manufacturer, as defined, to participate in the program. The bill would authorize the department, on August 1, 2010, to require prior authorization in the Medi-Cal program for any drug of a manufacturer if specified conditions are met. The bill would establish eligibility criteria and application procedures for eligible Californians to participate in the program.

The bill would establish the California Discount Prescription Drug Program Fund into which all payments received under the program would be deposited. The bill would provide that moneys in the fund shall be made available, upon appropriation, to the department for purposes of the program.

#### Ch. 620 (AB 2990) Levine Senior centers: emergency operations plans.

Existing law establishes the Multipurpose Senior Services Program, administered through the California Department of Aging, to provide specified services to frail elderly individuals 65 years of age and older who are certifiable for placement in a nursing facility. Under existing law, the department contracts with nonprofit organizations and local public entities for the establishment of Multipurpose Senior Services Program sites.

Existing law also provides for the Senior Center Bond Act Fund, which is administered through the department and provides funds to public or private nonprofit agencies for, among other things, the purpose of expanding senior center programs, and purchasing and acquiring equipment.

This bill would require each multipurpose senior center, and each senior center, to develop an emergency evacuation plan that meets specified criteria, no later than June 30, 2007.

#### Ch. 621 (AB 3021) Nunez California-Mexico relations.

(1) Existing law generally provides for programs administered by various state agencies regarding issues of concern between California and Mexico.

This bill would set forth certain findings and declarations of the Legislature in that regard.

(2) Existing law establishes in state government the Office of California-Mexico Affairs to further and develop favorable relations with the State of Baja California, the State of Baja California Sur, other Mexican states bordering on the United States, and the remaining states and territories of the Republic of Mexico necessary for the completion of the office's tasks.

This bill would establish the California-Mexico Border Relations Council to consist of specified state officials. The bill would require the council to, among other things, coordinate

activities of state agencies that are related to cross-border programs, initiatives, projects, and partnerships that exist within state government. The bill would, beginning January 1, 2008, require the council to annually submit a report on its activities to the Legislature.

Ch. 622 (AB 2884) Baca Military service: benefits.

Existing law provides certain protections for specified members of the United States Military Reserve and National Guard including the provision that any insurer, which was providing health or medical insurance to a reservist, as defined, at the time the reservist was ordered to active duty, shall reinstate the health or medical insurance without waiting periods or exclusion of coverage for preexisting conditions.

The Knox-Keene Health Care Service Plan Act of 1975 provides for the regulation and licensing of health care service plans by the Department of Managed Health Care and imposes administrative penalties, as provided, on the violations of its provisions. Existing law also permits the Insurance Commissioner to impose administrative penalties for various violations of provisions of the Insurance Code.

This bill would apply these administrative penalties to include health care service plans offered to specified members of the United States Military Reserve and National Guard, by providing that any entity, which was providing any type of health care coverage, including, but not limited to, health care service plans, specialized health care service plans, and health insurance, would be required to reinstate the health care coverage without waiting periods or exclusion of coverage for preexisting conditions.

This bill would provide that the application of these administrative penalties would apply only to members of the United States Military Reserve and National Guard called to active duty on or after January 1, 2007.

This bill also would provide that any person or entity subject to regulation under the Knox-Keene Act that violates these provisions would be subject to disciplinary administrative action by the Department of Managed Health Care, and any person or entity subject to regulation under the Insurance Code would be subject to any applicable penalties under the Insurance Code.

Ch. 623 (SB 44) Torlakson Vehicles: dealer document preparation charges.

Existing law makes it a violation of the Vehicle Code for the holder of a vehicle dealer's license to commit specified actions, including, among other things, to advertise the total price of a vehicle without including all costs to the purchaser at the time of sale, except taxes, vehicle registration fees, the California tire fee, as defined, emission testing fees not exceeding \$50, actual fees charged for certificates, finance charges, and a dealer document preparation charge. Existing law prohibits the dealer document preparation charge from exceeding \$45.

This bill would increase to \$55 the maximum dealer document preparation charge.

Ch. 624 (SB 145) Murray Political Reform Act of 1974: contributions.

(1) Existing law, the Political Reform Act of 1974, provides that a contribution for an election may be accepted by a candidate for elective state office after the date of the election only to the extent that the contribution does not exceed net debts outstanding from the election and the contribution does not otherwise exceed the applicable contribution limit for that election.

This bill would authorize an elected state officer to accept contributions after the date of the election to the office presently held for the purpose of paying expenses associated with holding office, subject to certain limitations. The bill would set limits on the amount of these contributions that may be made to an elected state officer in a calendar year and on the aggregate amount of these contributions that a state officer may receive in a calendar year. The bill would provide that each of these specified contributions is deemed to be a contribution to that candidate for election to any state office that he or she may seek during

the term of office to which he or she is currently elected, including reelection to the office he or she currently holds, and that, for any of these specified contributions that exceeds the allowable contribution limit for the office sought, the amount exceeding the limit be returned to the contributor on a basis to be determined by the commission.

(2) Existing law requires the Fair Political Practices Commission to, among other things, adjust contribution and expenditure limitations set forth in the act.

This bill would require the commission, in January of every odd-numbered year, to adjust the contribution limitations set forth in this bill to reflect any increase or decrease in the Consumer Price Index.

(3) Existing law makes a violation of this act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of this bill.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a  $2/3$  vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a  $2/3$  vote.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 625 (SB 148) Scott Alcoholic beverages: licenses.

The Alcoholic Beverage Control Act authorizes the Department of Alcoholic Beverage Control to impose reasonable conditions on the exercise of retail privileges under the act. The department may impose conditions on certain license transfers at the request of a local governing body in whose jurisdiction a license is located. Existing law requires the local governing body to make the request for imposition of conditions, which shall be supported by substantial evidence, as provided, if the license to be transferred is located in an area of undue concentration, as defined.

This bill would authorize the department to also impose conditions that it determines are reasonable pursuant to its investigation.

Existing law specifies the grounds that constitute a basis for the suspension or revocation of an alcoholic beverage license, including a licensee's failure, within a reasonable time, after specified notice from a district attorney, city attorney, county counsel, or the department to take reasonable steps to correct objectionable conditions on the licensed premises, as provided.

This bill would provide additional bases for the suspension or revocation of an alcoholic beverage license, when a licensee fails to take reasonable steps to correct objectionable conditions on the licensed premises or on any public sidewalk abutting a licensed premises, as provided, after specified notice from the district attorney, city attorney, or a county counsel. This bill would also impose a continuing obligation on the licensee, after correcting the objectionable conditions that constitute a nuisance, as provided.

#### Ch. 626 (SB 202) Simitian Privacy: telephone calling pattern record or list.

Existing law prohibits a telephone or telegraph corporation, with certain exceptions, from making available to any other person or corporation, without first obtaining a residential subscriber's consent in writing, the subscriber's personal calling patterns, including any listing of the telephone or other access numbers called by the subscriber.

Existing law pertaining to the protection of privacy, makes it a crime, punishable by fine or imprisonment or both, with certain exceptions, to wiretap, eavesdrop, or otherwise intercept telephone or telegraph communications without authorization.

This bill would make it a crime, punishable by fine, imprisonment, or both, to purchase, sell, offer to purchase or sell, or conspire to purchase or sell, without the written consent of the subscriber, or procure through fraud or deceit, a telephone calling pattern record or list. Because a violation of the bill's provisions would be a crime, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 627 (SB 225) Soto Carl Moyer program.

Existing law establishes the Carl Moyer Memorial Air Quality Standards Attainment Program (Carl Moyer program), which provides grants to offset the incremental cost of eligible projects that reduce oxides of nitrogen from heavy-duty mobile sources in the state. Existing law, until January 1, 2015, prohibits grants for projects with a cost-effectiveness of more than \$13,600 per ton of NO<sub>x</sub> reduced in California, and on and after that date reduces that dollar amount to \$12,000.

This bill would allow the State Air Resources Board to determine a higher value that reflects state consumer price index adjustments.

Existing provisions of the Carl Moyer program specify a scheme for allocation of program funding to air pollution control districts and air quality management districts and limit how much of the allocations may be used for certain expenses.

This bill would revise or limit the percentages of program funding that may be allocated to air pollution control districts and air quality management districts for specified purposes, with different limits for districts with a population of less than 1,000,000 and for districts with a population of 1,000,000 or more. The bill would increase the percentages of the allocation to districts that are based on population and severity of the air quality problems, would award severity points based, in part, upon the annual diesel particulate emissions in an air basin, and would reduce the percentage of the allocation that is based on other specified criteria. These changes would remain in effect only until January 1, 2015.

Ch. 628 (SB 263) Speier Sellers of travel: regulation.

(1) Existing law regulates sellers of travel, as defined, and requires their registration with the Attorney General. Under existing law, a violation of those provisions is a crime, and certain violations are punishable as a felony.

This bill would revise the definition of seller of travel to include sellers of land or water vessel transportation, as specified. The bill would also revise regulatory requirements pertaining to disclosure and refund obligations of a seller of travel. The bill would allow a seller of travel, in lieu of a registration renewal, to file an attestation that no change has occurred to the information provided in its last filed complete registration statement. Because the attestation is made under penalty of perjury, the bill would impose a state-mandated local program by expanding the crime of perjury. The bill would prohibit a person from selling a travel business discount program, as defined, unless specified requirements are met. The bill would also prohibit a seller, as defined, from selling a seller of travel discount program, as defined, unless specified requirements are satisfied. Because a violation of these provisions would be a crime under the seller of travel regulatory provisions, the bill would impose a state-mandated local program. The bill would require the Attorney General to suspend the registration of a person convicted of a felony violation of the provisions regulating sellers of travel and would also prohibit the person from registering as a seller of travel and from participating in the Travel Consumer Restitution Fund for 7 years.

(2) Existing law provides for the Travel Consumer Restitution Corporation that is required to provide restitution for a claim filed by a person aggrieved, defined as a person meeting certain conditions who has sustained a loss because a seller of travel failed to refund payments for travel services that were not provided to the person. Under existing law, this restitution is secondary to any other compensation or reimbursement to which the person aggrieved is entitled.

This bill would specify that the restitution provided by the Travel Consumer Restitution Corporation is secondary only to specified sources of compensation or relief to which the person aggrieved may be entitled.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 629 (SB 267) Romero California High School Exit Examination: pupils with disabilities.

(1) Existing law requires the Superintendent of Public Instruction, with the approval of the State Board of Education, to develop a high school exit examination in English language arts and mathematics in accordance with state academic content standards. Existing law requires, commencing with the 2003–04 school year, each pupil completing grade 12 to successfully pass the high school exit examination as a condition of receiving a diploma of graduation or a condition of graduation from high school. Existing law requires that the high school exit examination be offered to individuals with exceptional needs, and that individuals with exceptional needs be administered the examination with appropriate accommodations, where necessary.

Existing law requires a school principal, at the request of the parent or guardian, to submit a request for a waiver of the requirement to successfully pass the high school exit examination to the governing board of the school district for a pupil with a disability who has taken the examination with modifications that alter what the test measures and has received the equivalent of a passing score on one or both subject matter parts of the examination. Existing law authorizes the governing board of a school district to waive the requirement to successfully pass one or both parts of the high school exit examination for a pupil with a disability if specified requirements are met. Existing law requires a school district to report to the state board, in a manner and by a date determined by the Superintendent, the number and characteristics of these waivers reviewed, granted, and denied, and any additional information, as provided.

Existing law, until December 31, 2006, requires a school district or state special school, as specified, to grant a high school diploma to a pupil with a disability who is scheduled to graduate from high school in 2006, has not passed the high school exit examination, has not received a high school exit examination waiver, and meets other specified criteria. Existing law requires a school district or state special school that fails to grant a high school diploma to that pupil to submit certain documentation to the state board within 15 days after its determination that the pupil does not meet the specified criteria, and requires the board to review that failure to grant a high school diploma, as provided. Existing law authorizes the state board to direct the school district or state special school to grant a high school diploma to the pupil if the state board finds that the pupil meets the specified criteria. Existing law also requires the school district and state special school to report to the Superintendent certain information, including the number of pupils granted diplomas in this manner.

This bill would extend the above provisions relating to the granting or denial of a high school diploma by a school district or state special school to pupils with disabilities who are scheduled to graduate from high school in 2007, have not passed the high school exit examination or are eligible for a high school exit examination waiver, have not received a high school exit examination waiver, and meet other specified criteria. The bill would repeal

these extended provisions on December 31, 2007. The bill would also require the pupil, parent, or legal guardian of the pupil to be notified that the pupil is entitled to receive a free appropriate public education, as specified, no later than 30 days prior to the receipt of a diploma in 2007. By extending the date on which school districts and state special schools must comply with the above requirements, the bill would impose a state-mandated local program.

The bill would require the Superintendent, by June 1, 2007, and with the approval of the state board, to recommend to the Legislature a course of action to adopt regarding pupils with disabilities who have met all other state and local graduation requirements, but who are unable to satisfy the high school exit examination requirement or obtain a waiver of the requirement, as specified under current law.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 630 (SB 293) Ducheny Workforce Training Act: education, training, and investment.

The federal Workforce Investment Act of 1998 provides for workforce investment activities, including activities in which states may participate. Existing law contains various programs for job training and employment investment, including work incentive programs, as specified.

This bill would restructure and revise those provisions relating to the state administration of, and educational services under, the federal Workforce Investment Act of 1998 by a California Workforce Investment Board.

This bill would restructure those provisions relating to state workforce investment boards and local workforce investment boards, with respect to various local workforce investment programs. This bill would provide certain job security protections for state employees affected by the reorganization of workforce development programs, as specified.

Existing law requires various local job training plans to be prepared by local educational agencies and counties with respect to welfare-to-work programs, as specified.

This bill would authorize a unified local plan prepared by the local workforce investment board to be submitted instead of the individual local plans. This bill, by imposing duties on local government with respect to the implementation of these local programs, would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 631 (SB 361) Scott Community colleges: funding.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state. Existing law establishes a system for the apportionment of state funding to community college districts. This system is generally based on calculations related to the number of full-time equivalent students (FTES) in attendance at each district.

This bill would delete, as of October 1, 2006, the provision that establishes the current community college funding system for allocating state general apportionment revenues and

the provision that governs the allocation of equalization funds to community college districts.

The bill would establish, as of October 1, 2006, a new community college funding system. The bill would require the board of governors to develop criteria and standards to effectuate this system in accordance with prescribed statewide minimum requirements. These statewide minimum requirements would include an acknowledgment of the need for community college districts to receive an annual allocation based on the number of colleges and comprehensive centers in the district, plus funding received based on the number of credit and noncredit FTES.

The bill would specify that, commencing with the 2006–07 fiscal year, the marginal amount of credit revenue allocated per credit FTES would be not less than \$4,367, as adjusted by subsequent cost-of-living adjustments funded through the annual Budget Act. The bill would further specify that, beginning in the 2006–07 fiscal year, noncredit instruction would be funded at a uniform rate of \$2,626 per FTES, adjusted for the change in cost-of-living provided in the annual Budget Act for subsequent fiscal years. The bill would specify that, beginning in the 2006–07 fiscal year, career development and college preparation would be funded at a rate of \$3,092 per FTES, as specified.

The bill would specify the calculations required to determine the minimum statewide requested increase in budgeted workload FTES.

The bill would specify the career development and college preparation courses and classes for which no credit is given, and which are offered in a sequence of courses leading to a certificate of completion, leading to improved employability or job placement opportunities, leading to a certificate of competency in a recognized career field by articulating with college-level coursework, completion of an associate of arts degree, or for transfer to a 4-year degree program, that are eligible for funding under the bill.

The bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 632 (SB 368) Escutia English language tutoring.

Proposition 227, an initiative statute approved by the voters at the June 2, 1998, statewide primary election, requires the state to encourage family members and others to provide personal English language tutoring to children coming from backgrounds of limited English proficiency.

This bill would require each school district, as a condition for receiving funding under the bill for the 2007–08 fiscal year, to develop a plan, to be approved by the school district governing board, certifying that the agency will accomplish certain objectives relating to providing personal English language tutoring to children from backgrounds of limited English proficiency.

The bill would require a school district, as a condition for receiving funding under the bill for any fiscal year, to collect certain data for use in revising and updating the plan.

The bill would require the governing board of the school district, as a condition for receiving funding under the bill for the 2008–09 fiscal year and each fiscal year thereafter, to review, revise as necessary, and approve the plan. The bill would require the plan to be reviewed, and revised as necessary, not less than once every three years. The bill would require the governing board to consider, during its review, the specified data collected by the school district.

#### Ch. 633 (SB 524) Torlaxson Retirement: Contra Costa County.

The County Employees Retirement Law of 1937 authorizes the Contra Costa County Board of Supervisors and the governing boards of districts within that county, if authorized by the board of supervisors, to negotiate with a recognized employee organization representing safety members regarding the conditions, as specified, to be required of employees who are or may become subject to the 3% at age 50 formula.

This bill would, until January 1, 2012, further authorize the Contra Costa County Board of Supervisors to establish different retirement benefits for different bargaining units of safety employees represented by the Contra Costa County Deputy Sheriffs' Association, and the unrepresented groups of safety employees in similar job classifications and the supervisors and managers of those employees, as specified, pursuant to a resolution making those provisions applicable to that county. The bill would also make related and conforming changes to the above-described provision.

Ch. 634 (SB 763) Lowenthal Economic development.

The Enterprise Zone Act prescribes the duties and responsibilities of the Department of Housing and Community Development in connection with the establishment of enterprise zones and manufacturing enhancement areas. The act authorizes the department and local governments to charge and collect fees in connection with its provisions, and to assess each enterprise zone a fee of not more than \$10 for each application it accepts for the issuance of a specified tax certificate issued by a local government.

Existing law also requires the Department of Housing and Community Development to administer the targeted tax area program and to rank and designate applicant communities that meet specified criteria as targeted tax areas. Existing law also requires the department to administer the Local Agency Military Base Recovery Area Act and to designate a military base or a former military base as eligible to be a local agency military base recovery area (LAMBRA).

This bill would authorize the department to charge a fee in connection with the costs of administering provisions relating to the targeted tax area program and the Local Agency Military Base Recovery Area Act and would require the department to also assess an enterprise zone, a manufacturing enhancement area, and a local agency military base recovery area (LAMBRA) the same fee of not more than \$10, as specified above. It would make specified findings and declarations with respect to the imposition of these fees.

The bill would also require the department to develop regulations for the issuance of specified tax certificates and would make other conforming and technical changes to these provisions.

Ch. 635 (SB 968) Torlakson Domestic violence: Contra Costa County.

Existing law requires the collection of fees for certified copies of fetal death or death records and marriage or birth certificates. Existing law authorizes the board of supervisors of a county that has established a county children's trust fund to increase the fee for a certified copy of a birth certificate for purposes of the fund.

Existing law authorizes the Board of Supervisors of Contra Costa County, until January 1, 2007, to increase fees, for certified copies of marriage certificates, birth certificates, fetal death records, and death records, up to a maximum increase of \$2, and to annually increase these fees, as prescribed, authorizes the retention of specified administrative costs, and specifies that the purpose of the fee increase is to provide funding for governmental oversight and for the coordination of domestic violence prevention, intervention, and prosecution efforts in the county.

This bill would delete the repeal date of that authorization, and would, in addition to the existing authorization for annual increases, authorize the Board of Supervisors of Contra Costa County to increase these fees by up to \$4.

This bill would make specified legislative findings regarding the need for special legislation.

Ch. 636 (SB 983) Lowenthal Subdivision Map Act.

(1) Existing law provides that the Subdivision Map Act shall be inapplicable to a lot line adjustment between 4 or fewer existing adjoining parcels, where the land taken from one parcel is added to an adjoining parcel, and where a greater number of parcels than originally

existed is not thereby created, if the lot line adjustment is approved by the local agency or advisory agency. That act also requires a local agency or advisory agency to limit its review and approval to a determination of whether or not the parcels resulting from the lot line adjustment will conform to the local general plan, any applicable coastal plan, and zoning and building ordinances.

This bill would additionally require that this determination includes whether or not the parcels resulting from the lot line adjustment will conform to any applicable specific plan.

(2) The Subdivision Map Act requires a subdivider prior to the filing of a tentative map to give a 60-day notice in a specified form to each tenant of the subject property and to each person applying after the date for rental of a unit of the subject property immediately prior to the acceptance of any rent or deposit from the prospective tenant by the subdivider. The act also requires a subdivider who fails to give the required notice to pay each prospective tenant his or her actual moving expenses and the first month's rent in an amount not to exceed \$500 for each expense.

This bill would increase this maximum expense amount to \$1,100 for each expense.

Ch. 637 (SB 1032) Hollingsworth Antelope and elk hunting.

Existing law authorizes a resident of the state to obtain a license tag for the taking of antelope or elk if certain requirements are met. Existing law fixes the fee for an antelope license tag at \$55 per person and the fee for an elk license tag at \$165 per person, and specifies that only a resident of the State of California possessing a valid hunting license may obtain a license tag for the taking of antelope or elk, as provided. Existing law requires the Fish and Game Commission to annually direct the Department of Fish and Game to authorize the sale of a specified number of antelope, elk, and deer license tags that may be sold at auction to residents or nonresidents, as provided.

This bill would authorize any person generally, without regard to residency, to obtain an antelope or elk license tag if certain requirements are met. The bill would also require the commission on or before July 1, 2007, and by regulation, to fix the antelope license tag fee for a nonresident of the state at not less than \$350 and to fix the elk license tag fee for a nonresident of the state at not less than \$1050. The bill would limit the number of tags issued annually to nonresidents to one antelope tag and one elk tag.

Ch. 638 (SB 1059) Escutia Electric transmission corridors.

(1) Existing law requires the State Energy Resources Conservation and Development Commission to adopt a strategic plan for the state's electric transmission grid using existing resources. Existing law requires that the plan identify and recommend actions required to implement investments needed to ensure reliability, relieve congestion, and to meet future growth in load and generation, including, but not limited to, renewable resources, energy efficiency, and other demand reduction measures.

This bill would authorize the commission to designate a transmission corridor zone on its own motion or by application of a person who plans to construct a high-voltage electric transmission line within the state. The bill would provide that the designation of a transmission corridor shall serve to identify a feasible corridor where a future transmission line can be built that is consistent with the state's needs and objectives as set forth in the strategic plan adopted by the commission. The bill would prescribe procedures for the designation of a transmission corridor zone, including publication of the request for designation and request for comments, coordination with federal agencies and California Native American tribes, informational hearings, and requirements for a proposed decision.

The bill would require the commission, after designating a transmission corridor zone, to identify that transmission corridor zone in its subsequent strategic plans and to regularly review and revise its designated transmission corridor zones as necessary, but not less than once every 10 years.

The bill would require a city or county, after receiving a notice from the commission of a transmission corridor zone, to consider the designated transmission corridor zone, as specified, when making a determination regarding a land use change within or adjacent to the transmission corridor zone that could affect the continuing viability to accommodate a transmission line planned within the transmission corridor zone.

The bill would require a city or county, within 10 days of accepting as complete an application for a development project within a designated transmission corridor zone that the city or county determines would threaten the potential to construct a high-voltage electric transmission line, to notify the commission of the proposed development project. The bill would require the commission, upon making a specified finding regarding the proposed development project, to provide written comments to the city or county and would require the city or county to consider the commission's comments.

The bill would impose a state-mandated local program by imposing new duties upon local agencies.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 639 (SB 1062) Bowen Victims of crime: domestic violence and sexual assault.

(1) Existing law authorizes victims of domestic violence or stalking to complete an application in person at a community-based victims' assistance program to be approved by the Secretary of State for the purpose of enabling state and local agencies to respond to requests for public records without disclosing a program participant's residence address contained in any public record and otherwise provide for confidentiality of identity for that person, subject to specified conditions. Any person who makes a false statement in an application is guilty of a misdemeanor.

This bill would include victims of sexual assault within these provisions. By including a new category of eligible persons, this bill would impose new duties on local public officials and expand the scope of an existing crime, thereby creating a state-mandated local program.

(2) Existing law provides that there is in the Office of Emergency Services a Comprehensive Statewide Domestic Violence Program that provides financial and technical assistance to domestic violence shelter service providers. Existing law also provides that the Maternal and Child Health Branch of the State Department of Health Services shall administer a comprehensive shelter-based grant program to battered women's shelters.

This bill would provide that if an agency receives funding from both programs during any grant cycle, the Comprehensive Statewide Domestic Violence Program and the Maternal and Child Health Branch shall coordinate agency site visits and share performance assessment data to reduce administrative costs. This bill would make other conforming changes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates, no reimbursement is required by the bill for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(4) This bill would incorporate additional changes in Section 124250 of the Health and Safety Code, and in Section 13823.15 of the Penal Code, proposed by AB 2051, to be

operative only if AB 2051 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

Ch. 640 (SB 1136) Committee on Budget and Fiscal Review State bonds: financing and hedging contracts.

(1) Existing law sets forth the duties and authority of the Treasurer generally in the sale of state bonds.

Existing law authorizes state government to enter into certain kinds of financing and hedging contracts in connection with, or incidental to, the issuance or carrying of bonds. Moneys are continuously appropriated from the General Fund in an annual amount necessary to pay all obligations, including principal, interest, fees, costs, indemnities, and all other amounts incurred by the state under or in connection with any credit enhancement or liquidity agreement entered into by the state as specified, for bonds payable pursuant to an appropriation from the General Fund.

This bill would specify that in addition to any other authorization provided by law, the Treasurer may enter into and manage on behalf of the state specified financing and hedging contracts with respect to any state bonds for which the Treasurer acts as the agent for sale.

(2) The State General Obligation Bond Law generally provides for a procedure that may be adopted by other acts, with any necessary modifications, in authorizing the issuance and sale of state general obligation bonds and providing for the repayment of those bonds, including the determination of interest rates the bonds shall bear.

This bill would, for bonds approved by the voters after January 1, 2006, provide that payment of any amounts owed by the state to a counterparty pursuant to any interest rate hedging agreement entered into by the state, after any offset for payments owed to the state as specified, would be deemed to be included within the appropriation for interest on the bonds contained in the applicable bond act, subject to the limitations on interest rates set forth in the provisions of law described above and other specified conditions.

(3) The Treasurer is required to annually prepare a debt affordability report, to be presented to the Governor and the Legislature, to include specified components.

This bill would additionally require the report to include a description of the percentage of the state's outstanding general obligation bonds constituting fixed rate bonds, variable rate bonds, bonds that have an effective fixed interest rate through a hedging contract, and bonds that have an effective variable interest rate through a hedging contract, subject to specified criteria.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 641 (SB 1141) Committee on Budget and Fiscal Review Tobacco assets: sales.

Under existing law, the Infrastructure and Economic Development Bank is authorized to sell for, and on behalf of, the state all or any portion of the state's tobacco assets, which are the tobacco lawsuit moneys required to be allocated to the state under the Master Settlement Agreement, to a special purpose trust to provide collateral and security for the issuance of bonds, as specified.

This bill would specify that the pledge of any of these assets, or any residual interests therein, shall have priority in accordance with its terms and shall not be subject to certain laws relating to secured transactions and the perfection of transfer of rights in certain actions and instruments. It would provide that the proceeds of the sale of any residual interests in the assets would be deposited in the Tobacco Asset Sales Revenue Fund, which would be created by the bill, for the purpose of maintaining a separate account for the investment of proceeds received from the sale of any residual interests in tobacco assets.

Existing law limits the amount of proceeds the state may receive from the sale of these assets to provide up to \$5,000,000,000 in bonds.

This bill would eliminate that limitation.

Ch. 642 (SB 1168) Chesbro Rural Health Care Equity Program.

Until January 1, 2008, or earlier, as specified, the Rural Health Care Equity Program, as administered by the Department of Personnel Administration, provides subsidies and reimbursements for certain health care premiums and health care costs incurred by state employees and annuitants in rural areas in which there is no board-approved health maintenance organization plan available for enrollment. Moneys in the program are disbursed to reimburse eligible employees for, among other things, a portion or all of his or her deductible, coinsurance, and other out-of-pocket health-related expenses that would otherwise be covered if the employee and his or her family members were enrolled in a board-approved health maintenance organization.

This bill would extend the operation of the Rural Health Care Equity Program to January 1, 2012, or as specified. The bill would delete the provision that continuously appropriates funds to reimburse eligible employees for out-of-pocket health-related expenses, and would instead make the Rural Health Care Equity Program contingent upon funding in the annual Budget Act or another statute.

Ch. 643 (SB 1196) Committee on Local Government Local Government Omnibus Act of 2006.

(1) Existing law establishes the California Debt and Investment Advisory Commission and requires it to perform specified activities relating to state and local debt issuance and other governmental financing matters. Existing law requires state and local bond issuers to send certain information about their bond issues to the commission by mail.

This bill would also authorize that information to be submitted by any other method approved by the commission.

(2) Existing law defines "special district" for purposes of state subventions to compensate for property tax revenue reductions.

This bill would correct an incorrect cross-reference in that definition.

(3) Existing law requires the county auditor to perform, at least quarterly, a review of the treasurer's statement of assets in the county treasury in accordance with the Statements on Standards for Accounting and Review Standards issued by the American Institute of Certified Public Accountants.

This bill would instead require the county auditor to perform, or cause to be performed, a review of the treasurer's statement of assets in the county treasury in accordance with the appropriate professional standards, as determined by the county auditor, and would require each county to fund and allocate the cost of the review.

(4) Existing law prohibits the county treasurer from receiving money into the treasury or for deposit unless it is accompanied by the certificate of the auditor, but permits the auditor and the treasurer to establish alternate control procedures. Existing law requires the treasurer to give a receipt to any person who pays money to the treasurer and requires the receipt to be deposited with the auditor who then gives a receipt to the person paying the money. Existing law requires county treasurers to give county supervisors a monthly report of funds received and disbursed.

This bill would require the alternate control procedures to permit the treasurer to receive or deposit money without the certificate of the auditor, and would require only the treasurer to give a receipt to each person who deposits money into the county treasury. The bill would repeal the requirement of the monthly report by the county treasurer to the county supervisors.

(5) Existing law makes references to city assessors although county assessors now assess property values.

This bill would delete those obsolete references.

(6) Existing law requires local officials, as designated by the legislative body of a local agency, to take ethics training courses.

This bill instead would specify that the local officials are to be designated by the governing body of a local agency and would make a technical change.

(7) Existing law limits local official's compensation and imposes certain requirements on their claims for reimbursing expenses.

This bill would expressly provide that a local official may pay additional costs above the allowed limits, at his or her expense.

(8) Existing law requires each local agency official in local agency service as of January 1, 2006, except for those officials whose term of office ends before January 1, 2007, to receive specified ethics training.

This bill would revise that exception to include local officials whose term of office ends before January 9, 2007.

(9) Existing law requires local officials to report specified information concerning the sale of Mello-Roos Community Facilities Act bonds to the California Debt and Investment Advisory Commission by mail.

This bill would specify additional information to be included in the reports that may also be provided by any other method approved by the commission.

(10) Existing law, the Community Services District Law cross-references laws governing the reimbursements of local government officials except for travel costs.

This bill would cross-reference those provisions governing reimbursement of travel costs.

(11) The Planning and Zoning Law specifies the requirements for adopting and implementing specific plans.

This bill would delete an obsolete cross-reference in that law to a provision of the California Environmental Quality Act relating to environmental impacts for residential development projects and would declare that this is not a substantive change in that law.

(12) The Mitigation Fee Act specifies how local governmental officials impose fees to recover the costs of processing applications for the costs of processing applications for development projects.

This bill would delete an obsolete cross-reference to a fee that has been consolidated with other fees and revise another cross-reference.

(13) The Subdivision Map Act regulates how counties and cities approve the conversion of large landholdings into separate parcels. In those procedures, the Legislature generally employed the term "local agency" to refer to counties and cities.

This bill would conform a provision of that act concerning the posting of security by subdividers to delete the term "public entity" and instead use "local agency."

(14) Under the Subdivision Map Act, where a parcel map is required, the parcel map, if not based on a field survey conforming to the Land Surveyors Act, may be based on the compilation of recorded or filed data when sufficient survey information exists on filed maps to locate and retrace the exterior boundary lines of the parcel map.

This bill instead would require that compilation be from recorded or filed data when sufficient recorded or filed survey monumentation exists to enable the retracement of exterior boundary lines of the parcel map and the establishment of the interior parcel or lot lines of the parcel map.

(15) Existing law limits local officials' compensation and imposes certain restrictions on claims for reimbursement.

This bill would make an additional cross-reference to that law in the Mosquito and Vector Control District Law.

(16) Existing law requires that redevelopment officials send specified information concerning a preliminary redevelopment plan to the county auditor, county assessor, and county tax collector.

This bill would revise those provisions to require the information to be sent to the county auditor and county assessor.

(17) Existing law governing the composition of the Sacramento Metropolitan Air Quality Management District's Board of Directors requires city representatives to be appointed by the city selection committee.

This bill, instead, would require generally that the city representatives shall be selected by the city council of the city that they represent, thereby imposing a state-mandated local program.

(18) The Public Contract Code provides procedures that local agencies are required to follow when they build public works projects. When local agencies voluntarily use the Uniform Public Construction Cost Accounting Act, they may use their own employees for projects worth \$25,000 or less, while projects worth \$100,000 or less require informal bids and those worth more than \$100,000 require formal bids. With respect to projects worth less than \$100,000, if all the informal bids received are in excess of \$100,000, the governing board of the public agency may adopt a resolution by a  $\frac{4}{5}$  vote to award the contract at \$110,000 to the lowest responsible bidder, as specified.

This bill would increase those limits from \$25,000 to \$30,000, from \$100,000 to \$125,000, and from \$110,000 to \$137,500, respectively.

(19) The Recreation and Park District Law was recently repealed and reenacted.

This bill would repeal 2 obsolete provisions of that law that were not repealed at that time. The bill would also allow a consolidated recreation and park district to have a temporarily larger governing board of 7, 9, or 11 members subject to the approval of the local agency formation commission.

(20) Existing law defines special district for purposes of reimbursement of costs mandated by the state in terms of its statutory authority to levy a property tax rate.

This bill would additionally specify, for those purposes, that a special district is also one that is statutorily authorized to receive an allocation of property tax revenues.

(21) The bill would correct various drafting errors relating to local government.

(22) This bill would incorporate additional changes to Section 53359.5 of the Government Code proposed by SB 1432 to be operative only if this bill and SB 1432 are both enacted and become effective on or before January 1, 2007, and this bill is enacted last.

(23) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

Ch. 644 (SB 1231) Dunn Mobilehomes: park inspections.

(1) The Mobilehome Parks Act regulates the conditions in mobilehome parks and special occupancy parks, as defined, and, until January 1, 2007, requires the Department of Housing and Community Development, and local government entities that assume enforcement duties, to inspect the parks pursuant to specified criteria and to issue notices of violations. Existing law, until January 1, 2007, establishes a fee structure for permits for constructing and operating mobilehome parks and special occupancy parks and provides a different fee structure to take effect on and after January 1, 2007.

This bill would extend the January 1, 2007, repeal date to January 1, 2012, thereby extending the operation of the provisions described above until that date.

(2) The Mobilehome Parks Act also requires the Department of Housing and Community Development to convene a specified task force at least once a year to provide input to the department on the conduct and operation of the mobilehome park maintenance inspection program.

This bill would instead require the task force to meet at least twice a year and would require its input to the department on the conduct and operation of the mobilehome park maintenance inspection program to include, but not be limited to, frequency of inspection, program formation, and recommendations for program changes.

(3) The Mobilehome Parks Act requires an annual operating permit fee of \$25 and an additional \$2 per lot or camping party, as specified. In addition, existing law requires, except for a special occupancy park, an additional annual fee of \$4 per lot and requires this additional \$4 fee to be used exclusively for the inspection of mobilehome parks and mobilehomes. Existing law repeals the additional \$4 fee per lot on January 1, 2007.

This bill would extend the January 1, 2007, repeal date to January 1, 2012, thereby extending the imposition of the additional \$4 fee per lot until that date.

(4) This bill would incorporate additional changes in Sections 18400.1 and 18400.3 of the Health and Safety Code, to be operative only if AB 2250 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

#### Ch. 645 (SB 1249) Alquist Taxation: contributions.

Under the Personal Income Tax Law, individual taxpayers are allowed to contribute amounts in excess of their tax liability for the support of specified funds or accounts, including, among others, the California Fund for Senior Citizens, the California Military Family Relief Fund, the State Children's Trust Fund for the Prevention of Child Abuse, the Rare and Endangered Species Preservation Program Fund, the California Alzheimer's Disease and Related Disorders Research Fund, the California Breast Cancer Research Fund, the California Peace Officer's Memorial Foundation Fund, the Veterans' Quality of Life Fund, the California Prostate Cancer Research Fund, the California Sexual Violence Victim Services Fund, the California Colorectal Cancer Prevention Fund, and the Emergency Food Assistance Program Fund. That law generally provides for the repeal of the contribution provisions for these funds and accounts on either January 1 of a specified year or on January 1 of an earlier calendar year if the Franchise Tax Board estimates that the annual contribution amount will be less than \$250,000 for the year, or an adjusted amount calculated from an inflation factor, based on the percentage change in the California Consumer Price Index, multiplied by the prior year's estimated contribution amount, as described.

This bill would require the Franchise Tax Board to make its minimum contribution estimates by September 1 of each year, as provided, and would specify the years in which the contribution provisions to these funds and accounts are subject to early repeal. This bill would also require the minimum contribution amount for calendar year 2006, for any voluntary contribution checkoff that appeared on the state income tax return for 2005, to be the same as the minimum contribution amount for calendar year 2005.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 646 (SB 1299) Speier Controlled substances: precursors: phencyclidine or methamphetamine.

(1) Existing law generally makes it a felony punishable by 2, 4, or 6 years in the state prison for a person to possess specified substances at the same time with the intent to manufacture phencyclidine or methamphetamine.

This bill would reorganize these provisions.

This bill would also make it a felony, punishable by 16 months, 2, or 3 years in state prison, for any person to possess specified chemicals with the intent to sell, transfer, or otherwise furnish those chemicals to another knowing that they will be used to manufacture phencyclidine or methamphetamine.

By revising existing crimes and creating new crimes, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 647 (SB 1301) Alquist Health facilities: reporting and inspection requirements.

Existing law provides for the inspection, licensure, and regulation of health care facilities by the State Department of Health Services, including, among other facilities, general acute care hospitals, acute psychiatric hospitals, special hospitals, and long-term health care facilities, some of which are collectively referred to as nursing homes. Existing law requires that all licensed general acute care hospitals maintain a medical records system, as specified, that organizes all medical records for each patient under a unique identifier, and develop and implement policies and procedures to ensure that relevant portions of patients' medical records can be made available within a reasonable period of time to respond to the request of a treating physician, other authorized medical professionals, authorized representatives of the department, or any other person authorized by law to make such a request, taking into consideration the physical location of the records and hours of operation of the facility where those records are located, as well as the interests of the patients.

Existing law establishes licensing and certification fees applicable to various clinics, health care providers, and health facilities, for the 2006–07 fiscal year, and requires the department, commencing February 1, 2007, and every February 1 thereafter, to publish a list of estimated fees, based on specified calculations and cost estimates. Existing law also requires the department, by February 1 of each year, among other reports, to prepare and make available to interested persons a staffing and systems analysis to ensure efficient and effective utilization of fees collected, proper allocation of departmental resources to licensing and certification activities, survey schedules, complaint investigations, enforcement and appeal activities, data collection and dissemination, surveyor training, and policy development, including specified information.

This bill would require that information on the number and timeliness of adverse event investigations related to reports of adverse events also be included in that analysis.

This bill would require the department to take various actions related to the reporting to, and the investigation by, the department of any adverse event, as defined, that occurs at a general acute care hospital, acute psychiatric hospital, or special hospital. The bill would require a general acute care hospital, acute psychiatric hospital, or special hospital to report to the department any adverse event, as defined, within 5 days of its discovery, unless the adverse event is an ongoing urgent or emergent threat to the welfare, safety, or health of patients, personnel, or visitors, in which case the event shall be reported to the department within 24 hours of its discovery. The bill would authorize the department to assess specified civil penalties against a licensee for failure to report an adverse event as required by the bill.

This bill would require the department to conduct an onsite inspection or investigation within 48 hours or 2 business days of a complaint that indicates an ongoing threat of imminent danger of death or serious bodily harm at a general acute care hospital, an acute psychiatric hospital, or a special hospital. The bill would require information about the reported adverse event and the outcome of investigations or inspections of substantiated adverse events reported conducted in accordance with these provisions to be posted on the department's Internet Web site and available in written form, by January 1, 2015. The bill would require the department to make this information readily accessible to consumers between January 1, 2009, and January 1, 2015. The bill would require the department to make related data available to entities deemed appropriate by the department, to be posted on the entities' Internet Web sites.

The bill would require the costs of administering and implementing certain of its provisions to be paid from funds derived from licensing fees paid by general acute care, acute psychiatric, and special hospitals.

This bill would make its provisions operative on July 1, 2007.

Violation of provisions relating to the operation of health facilities is a crime. Therefore, by imposing new and revised requirements on health facilities, this bill would impose a state-mandated local program.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 648 (SB 1303) Runner Pupils: concurrent enrollment: high school: community college.

(1) Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state.

Existing law authorizes the governing board of a school district, upon recommendation of the principal of a pupil's school of attendance, and with parental consent, to authorize a pupil who would benefit from advanced scholastic or vocational work to attend community college as a special part-time student to undertake one or more courses of instruction at the community college level in order to provide educational enrichment opportunities for a limited number of eligible pupils.

Existing law prohibits a principal from recommending, for any particular grade level, for community college summer session attendance, more than 5% of the total number of pupils who completed that grade immediately prior to the time of recommendation. Existing law exempts from the specified 5% a pupil recommended by his or her principal for enrollment in a college-level advanced scholastic summer session course or vocational community college summer session course, if all of the specified criteria are met.

This bill, instead, would exempt from the 5% limitation a pupil recommended by his or her principal for enrollment in a course that does not offer college credit in English language arts or mathematics, but is necessary to assist specified pupils pass the California High School Exit Exam, and the principal who makes the recommendation provides certain data to the Chancellor of the California Community Colleges, as specified.

Existing law requires the Chancellor of the California Community Colleges, on or before January 1, 2007, and on or before January 1 of each year thereafter, to report to the Department of Finance the number of pupils recommended pursuant to the above exemption who enroll in community college summer session courses.

This bill would require the chancellor, on or before November 1, 2007, and on or before January 1 of each year thereafter, to also report to the Department of Finance the number of pupils who receive a passing grade in the above community college summer session courses.

(2) Existing law repeals the exemption and related provisions as of January 1, 2011.

This bill would change the repeal date to January 1, 2009.

Ch. 649 (SB 1304) Runner Community colleges: facilities.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Throughout the state, community college districts operate campuses and provide instruction to students. Existing law provides standards and procedures for the construction of school facilities by community college districts.

This bill would authorize state funds provided for the capital outlay financing needs of the California Community Colleges to be used to acquire an existing government-owned or privately-owned building and for the necessary costs of converting that building to community college use. The bill would provide that a community college district that is eligible for state funding for capital outlay financing may purchase such a building and convert it to community college use with state funds if it meets specified criteria.

The bill would specify that funding for buildings purchased under the bill would not supersede funding for community college facilities that have previously been prioritized by

the board of governors and are awaiting state funding. The bill would also specify that a community college district that purchases an existing building under the bill is authorized to request state funding for instructional equipment, as specified.

Ch. 650 (SB 1318) Cedillo Controlled substances: sales near drug treatment center or homeless shelter.

Existing law makes it a felony, punishable by imprisonment in the state prison, to engage in specified unlawful activities involving heroin, cocaine, cocaine base, methamphetamine, or phencyclidine (PCP).

This bill would provide that any person who is convicted of trafficking, as defined, in any of these controlled substances, or of a conspiracy to traffic in any of these controlled substances, in addition to the punishment imposed for the conviction, shall be imprisoned in the state prison for an additional one year if the violation occurred upon the grounds of, or within 1,000 feet of, a drug treatment center, detoxification facility, or homeless shelter. The bill would provide for exceptions to the imposition of this enhanced sentence under certain circumstances. The bill would set forth legislative findings, declarations, and intent relating to its provisions. By creating a new enhancement for existing crimes, this bill would impose a state-mandated local program upon local governments.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 651 (SB 1359) Torlakson Subsurface installations: excavations.

(1) Existing law requires planned excavations near subsurface installations to be conducted in a specified manner that protects the subsurface installations from damage. Existing law requires an excavator to determine the exact location of subsurface installations using specified tools. If the excavator still cannot locate the exact position of the installation, existing law then requires the excavator to request the operator to provide specified additional information to help determine the exact location of the installation. Existing law provides that an excavator who has failed to comply with regulations, as provided, is liable for any damages unless the owner or operator has not complied with regulations, as provided.

This bill would require the operator, if the excavation is within 10 feet of a high-priority subsurface installation, as defined, to notify the excavator of the installation, as specified, and to hold an onsite meeting with the operator to verify the location of the installation. This bill would allow only a qualified person, as defined, to perform subsurface installation locating activities, require a qualified person performing subsurface installation locating activities to use specified locating activities and devices, and require the operator to maintain plans for the subsurface installations. This bill also would require the regional notification center to provide an excavator with the operator's contact information and require an excavator to immediately notify the operator or 911 emergency services, if the operator cannot be contacted, when an excavator discovers or causes damage to a subsurface installation. This bill would also provide that any operator who fails to provide the position of a subsurface installation will be liable for any resulting costs, as specified, that the excavator may encounter as a result of the discrepancy. This bill would provide that an excavator will be liable for any resulting costs, as specified, for damages to a subsurface installation, for which the operator provided the position of, that are caused by the excavator.

(2) Existing law authorizes an excavator to determine the exact location of subsurface installations that are in conflict with the excavation before using any vacuum excavation devices or power-operated or power-driven excavating or boring equipment within the approximate location of the subsurface installation, provided there is an express written mutual agreement, as specified, and with a specified exception. If there is no express

agreement, the excavator is required to use hand tools to determine the location of subsurface installations, as specified.

This bill would instead provide that, if documented notice of the intent to use vacuum excavation devices, or power-operated or power-driven excavating or boring equipment has been provided to the subsurface installation operator or operators and it is mutually agreeable to the operator or operators of the subsurface installation and the excavator, the excavator may use vacuum excavation devices or power-operated or power-driven excavating or boring tools within the approximate location of the subsurface installation.

Ch. 652 (SB 1383) Ortiz Student financial aid: Ortiz-Pacheco-Poochigian-Vasconcellos Cal Grant Program.

(1) Existing law, the Ortiz-Pacheco-Poochigian-Vasconcellos Cal Grant Act, establishes the Cal Grant A and B Entitlement awards, the California Community College Transfer Cal Grant Entitlement awards, the Competitive Cal Grant A and B awards, the Cal Grant C awards, and the Cal Grant T awards under the administration of the Student Aid Commission, and establishes eligibility requirements for awards under these programs for participating students attending qualifying institutions. Among the existing eligibility requirements established under the act for the Cal Grant A and B Entitlement awards is a requirement that a student must have graduated from high school or its equivalent during or after the 2000–01 academic year and that the student has submitted a completed financial aid application no later than March 2 of the academic year, as defined to mean a year commencing on July 1 and ending on June 30, of high school graduation or its equivalent. Among the existing eligibility requirements established under the act for the California Community College Transfer Cal Grant Entitlement awards is a requirement that a student must have graduated from a California high school or its equivalent during or after the 2000–01 academic year.

This bill would specify that a student who does not meet the requirements for a high school diploma or its equivalent in the academic year immediately preceding the award year, but who meets the requirements for a high school diploma or its equivalent by December 31 of the academic year immediately following the date of application, satisfies the requirement of obtaining high school graduation or its equivalent for the purposes of the act, as specified.

(2) Existing law requires the Student Aid Commission to report, on or before April 1 of each year, statistical data examining the impact and effectiveness of state-funded student aid programs.

This bill would require this annual report, to the extent practicable, to include the number and the demographic characteristics of the students who qualify for a Cal Grant award based on obtaining high school graduation or its equivalent pursuant to the bill.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 653 (SB 1446) Perata Charter schools: funding.

Existing law requires the county superintendent of schools to determine a revenue limit for each school district in the county pursuant to a prescribed formula, and requires, for purposes of that apportionment, that average daily attendance be calculated, as prescribed.

Existing law requires a school district to compute the fiscal year average daily attendance, as specified.

Existing law requires a sponsoring school district to compute its average daily attendance by computing the sponsoring school district's regular average daily attendance in the current year, excluding all attendance of pupils in charter schools, and by computing the sponsoring school district's 2nd principal apportionment regular average daily attendance for the prior year, excluding all attendance of pupils who either attended a charter school in the prior year or who attended one or more noncharter schools of the school district between July 1 and the last day of the 2nd period, inclusive, in the prior year, and attended a charter school sponsored

by the school district between July 1 and the last day of the 2nd period, inclusive, in the current year.

This bill, commencing on July 1, 2007, would provide that for the purposes of the above computation, a pupil enrolled in a grade at a charter school sponsored by the school district will not be counted if the school district does not offer classes for pupils enrolled in that grade. The bill would also, for the purpose of that computation, prohibit the amount of the attendance counted for any pupil to be greater than the attendance claimed for that pupil by the charter school in the current year.

The bill would compute the attendance of pupils who attended a charter school sponsored by the school district in the prior year and who attended one or more noncharter schools of the school district in the current year. The bill would, for the purposes of that computation, prohibit the amount of the attendance counted for any pupil to be greater than the attendance claimed for that pupil by the school district in the current year.

The bill would make additional specified calculations and findings based upon the above computation, as specified.

Ch. 654 (SB 1465) Soto State teachers' retirement.

(1) Under existing law, the compensation earnable for a member of the State Teachers' Retirement System employed by a community college prior to July 1, 1996, is defined by a specified number of hours based on provisions in effect on June 30, 1996.

This bill would permit the Teachers' Retirement Board to establish and implement certain factors and assumptions to determine the compensation earnable of a member employed by a community college prior to July 1, 1996.

(2) Existing law requires the Teachers' Retirement Board to employ a certified public accountant or public accountant, who is not in public employment, to annually audit the financial statements of the State Teachers' Retirement System. Existing law requires the board to file a copy of the audit report with the Governor, the Secretary of the Senate, and the Chief Clerk of the Assembly.

This bill would instead require that the audit report be incorporated into the annual report filed with the Governor and the Legislature.

(3) Existing law requires the Teachers' Retirement Board to give first priority to investing not less than 25% of all funds of the plan that become available in a fiscal year for new investments in specified real estate investments. Upon a specified determination, the board is permitted to substitute higher yielding investments, to the extent these are actually available for acquisition. In this case, the board is required to provide certain information regarding estimates to the Governor and the Joint Legislative Audit Committee, as specified.

This bill would eliminate the requirement that this information be provided upon the substitution of higher yielding investments.

(4) Existing law permits a member of the Defined Benefit Program of the State Teachers' Retirement System to receive credit for specified service.

This bill would permit a member of the Defined Benefit Program of the State Teachers' Retirement System to receive up to 2 years' service credit for time served as a member of the Peace Corps, as specified.

(5) Existing law authorizes a state agency, upon authorization of the Franchise Tax Board, to forego collection of taxes, licenses, fees, or money owing to the state for any reason if the amount to be collected is \$250 or less.

This bill would permit the board to establish a specified amount or amounts below which the State Teachers' Retirement System may dispense with adjustments of benefit payments, not to exceed \$10.

(6) Existing law allows a member of the State Teachers' Retirement System to purchase service credit for out-of-state service credited in a public retirement system for service performed in public education in another state or territory of the United States, as specified.

This bill would revise these provisions to eliminate the requirement that the out-of-state service be credited in a public retirement system. The bill would apply these provisions to service for teaching performed while employed by a public educational institution, as specified, or as an employee of the United States.

(7) The State Teachers' Retirement System provides for certain death benefits to be paid to the spouse, registered domestic partner, children, and the beneficiary of eligible members under specified circumstances. If a surviving spouse or registered domestic partner elect to receive a lump-sum return of a members' accumulated contributions, then a survivor benefit allowance is not paid.

This bill would provide that, if there is not an eligible surviving spouse or domestic partner, each eligible dependent child or children, if any, shall receive the child's portion of the survivor benefit allowance, subject to certain limits.

(8) This bill would make additional conforming, technical, and nonsubstantive changes to these provisions.

This bill would also appropriate \$290,000 from the Teachers' Retirement Fund to the Teachers' Retirement Board to fund the expenditures required by this act.

Ch. 655 (SB 1466) Committee on Public Employment and Retirement State Teachers' Retirement System: benefits.

(1) The State Teachers' Retirement Law permits a member or participant of the Defined Benefit Plan, the Defined Benefit Supplement Program, and the Cash Balance Benefit Program, to elect from among several forms of retirement benefit and annuity payments. That law prohibits the member, if he or she elects a joint and survivor annuity and retires, from changing his or her beneficiary unless the beneficiary is the spouse or domestic partner of the member or participant and a judgment of dissolution, legal separation, or nullity is entered. That law further permits the member or participant, after that judgment is entered, to elect a new annuity beneficiary and, if that new beneficiary predeceases the member or participant, the member or participant may further change his or her beneficiary. That law further prohibits a member of the Defined Benefit Supplement Program from further changing his or her beneficiary if the member elects a modified retirement allowance with a "pop-up" feature, as specified. Existing law establishes the Teachers' Deferred Compensation Fund, a continuously appropriated fund, as a repository for funds received by the Teachers' Retirement System pursuant to administering funds received in administering specified deferred compensation plans. Existing law requires the Teachers' Retirement Board to establish a vendor registration process for the purposes of providing information about tax-deferred retirement investment products.

This bill would delete that restriction for the member of the Defined Benefit Supplement Program who elects a modified retirement allowance with a "pop-up" feature and permit that member, if he or she is otherwise eligible, to change his or her beneficiary.

This bill would further revise and recast those provisions of the Defined Benefit Plan, the Defined Benefit Supplement Program, and the Cash Balance Benefit Program for a member or participant who retires on or after January 1, 2007, who elects a joint and survivor annuity, subject to specified restrictions.

This bill would prohibit a member from designating a beneficiary who is a specified number of years younger than the member.

This bill would further permit a retired member or participant to elect a new benefit, subject to specified restrictions. This bill would require a member or participant who elects a new benefit to declare under penalty of perjury that his or her beneficiary is not afflicted with a known terminal illness. By creating a new crime, this bill would impose a state-mandated local program.

This bill would provide that premium and fee revenues and compensation deferrals from specified annuity and custodial accounts and from the vendor registration process described above, be deposited into trust accounts in the Teachers' Deferred Compensation Fund. By

depositing additional fee revenues into a continuously appropriated fund, this bill would make an appropriation.

(2) Under that law, the Cash Balance Benefit Program provides a retirement plan for persons who perform creditable service, as defined. Existing law permits a person who performs trustee service for an employer, if that employer elects to provide benefits under the Cash Balance Benefit Program, to elect to participate in that program for his or her trustee service.

This bill would additionally define creditable service under the Cash Balance Benefit Program as trustee service for an employer.

(3) That law requires an employer to report all other information required by the retirement system to provide benefits under the Cash Balance Benefit Program.

This bill would clarify that an employer shall retain a copy of and mail the original election form of an employee participating in that program to the retirement system.

(4) That law requires a county superintendent of schools or an employing agency, and permits a school district or community college district to submit a monthly report that includes information the board of the State Teachers' Retirement System requires to administer that retirement system. That law also requires an employer to report contributions paid on behalf of each participant in the Cash Balance Benefit Program.

This bill would require an employer, a county superintendent of schools, an employing agency, and a school district or community college district to submit that monthly report or contribution report electronically in an encrypted format that ensures the security of the transmitted member data. The bill would also permit a penalty to be assessed for reports that are submitted late or in an unacceptable form.

(5) That law permits a member who has retired to reinstate from retirement and earn additional service credit. That law requires the State Teachers' Retirement System to calculate the member's benefit based on the retirement allowance the member was receiving prior to retirement and the service credit and compensation earnable by the member after he or she reinstated from retirement for purpose of calculating his or her subsequent retirement benefit.

This bill would prohibit a member who was employed by a community college prior to July 1, 1996, who reinstates from retirement from using the compensation earnable he or she earned prior to July 1, 1996, for purposes of calculating his or her subsequent retirement benefit.

(6) That law requires the board of the State Teachers' Retirement System to issue an annual statement to members of the Defined Benefit Program and the Defined Benefit Supplement Program. That law requires the board of the State Teachers' Retirement System to issue a statement to each participant of the Cash Balance Benefit Program.

This bill would permit the board to issue that statement to the member or participant by secured access through the Web site of the State Teachers' Retirement System, as specified.

(7) That law permits a member of the Defined Benefit Plan to elect to purchase additional service credit, nonqualified service credit, and out-of-state service credit if specified contributions are paid to the State Teachers' Retirement System.

This bill would, if a member fails to make a payment within 120 days of the due date, require the board of the State Teachers' Retirement System to cancel the election to purchase that additional service credit, nonqualified service credit, and out-of-state service credit, as specified.

(8) The bill would also make various technical and clarifying changes to the Teachers' Retirement Law.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 656 (SB 1468) Alarcon Car washes.

Existing law, until January 1, 2007, regulates the industry of car washing and polishing by providing specific recordkeeping requirements that employers of car washers must implement with regard to car washer wages, hours, and working conditions.

This bill would extend that repeal date to January 1, 2010.

The bill would also require the Labor Commissioner to report to the Legislature not later than December 31, 2008, on the status of labor law violations and enforcement in the car washing and polishing industry.

Ch. 657 (SB 1469) Cedillo Medi-Cal: eligibility: juvenile offenders.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, and under which qualified low-income persons receive health care benefits. The Medi-Cal program is governed, in part, by federal Medicaid provisions.

Existing law places specified juvenile offenders in county juvenile detention facilities.

This bill, commencing January 1, 2008, would require a county juvenile detention facility to provide specified information relating to a ward of the county who is scheduled to be released to the appropriate county welfare department, and would require the county to initiate an application and determine the individual's eligibility for the Medi-Cal program, as specified. The bill would require the county, if the ward is a minor, to give a parent or guardian the opportunity to opt out of this eligibility determination. The bill would require a county welfare department to provide sufficient documentation to enable the ward to receive medical care upon his or her release from custody, as specified.

This bill would require the department, by June 1, 2007, in consultation with designated entities, to establish the protocols and procedures necessary to implement the bill. The bill would require the department to implement its provisions by means of all-county letters or similar instructions, and thereafter to adopt implementing regulations, as necessary. The bill would require the department to seek any federal waivers necessary for its implementation.

By increasing the duties of counties administering the Medi-Cal program and of county juvenile detention facilities, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 658 (SB 1476) Figueroa Professions and vocations.

(1) Existing law regulates various professions and vocations by various boards within the Department of Consumer Affairs. Existing law requires those boards, and the State Bar of California and the Department of Real Estate, to require a licensee, at the time of issuance or renewal of a license, to provide the licensee's federal employer identification number, if the licensee is a partnership, or his or her social security number.

This bill would instead impose that requirement only when a license is issued.

(2) Existing law provides for the licensing and regulation of dentists by the Dental Board of California, and authorizes the board to appoint an executive officer. These provisions will become inoperative on July 1, 2008, and will be repealed on January 1, 2009.

This bill would make nonsubstantive changes to those provisions.

(3) Existing law provides for the licensing and regulation of dental auxiliaries by the Committee on Dental Auxiliaries, and makes those provisions inoperative on July 1, 2008, and repeals them on January 1, 2009.

This bill would instead make those provisions inoperative on July 1, 2009, and would repeal them on January 1, 2010, if SB 1472 is not enacted.

If SB 1472 is enacted and becomes effective on or before January 1, 2007, it would, among other things, rename the Committee on Dental Auxiliaries the Committee on Dental Assistants and revise the membership of the committee, and would create the California Dental Hygiene Bureau in the Department of Consumer Affairs and the Dental Hygiene Advisory Committee in the bureau.

This bill would make those provisions operative on January 1, 2008, instead of January 1, 2007, and would make other conforming changes, if SB 1472 is enacted.

(4) Existing law provides for the licensure and regulation of psychologists by the Board of Psychology, requires the board to employ necessary personnel, and authorizes the board to employ an executive officer. Existing law provides for the licensure and regulation of acupuncturists by the Acupuncture Board and requires the board to employ necessary personnel, including an executive officer. Existing law provides for the licensure and regulation of geologists and geophysicists by the Board for Geologists and Geophysicists and for the licensure and regulation of court reporters by the Court Reporters Board of California. Existing law provides for the licensure and regulation of contractors by the Contractors' License Board. These provisions will become inoperative on July 1, 2008, and will be repealed on January 1, 2009.

This bill would instead make these provisions inoperative on July 1, 2009, and would repeal them on January 1, 2010.

(5) Existing law provides for the licensing and regulation of podiatrists by the California Board of Podiatric Medicine, within the jurisdiction of the Medical Board of California. Existing law provides for the licensure and regulation of registered nurses by the Board of Registered Nursing, in the Department of Consumer Affairs, and requires the board to appoint an executive officer. Existing law provides for the licensure and regulation of optometrists by the State Board of Optometry, in the Department of Consumer Affairs, and authorizes the board to appoint an executive officer. These provisions will become inoperative on July 1, 2008, and will be repealed on January 1, 2009.

This bill would instead make these provisions inoperative on July 1, 2010, and would repeal them on January 1, 2011.

(6) Existing law, the Occupational Therapy Practice Act, provides for the licensing and regulation of occupational therapists and the certification and regulation of occupational therapy assistants by the California Board of Occupational Therapy. These provisions will become inoperative on July 1, 2007, and will be repealed on January 1, 2008.

This bill would instead make these provisions inoperative on July 1, 2013, and would repeal them on January 1, 2014.

Existing law exempts certain persons from the requirements of the act, including a licensee from a state with commensurately stringent requirements, if the services are performed for less than 45 days in a calendar year and are performed in association with an occupational therapist licensed under the act.

This bill would instead require a licensee from a state with commensurately stringent requirements to have filed with the board an application for licensure as an occupational therapist or certified occupational therapy assistant and would require that his or her services be performed for no more than 60 days from the date on which the application is filed. The bill would delete the requirement that the services be performed in association with an occupational therapist licensed in the state. This bill would also restrict the practice of occupational therapists and occupational therapist assistants who have previously been denied a license in this state.

(7) Existing law provides for the licensure and regulation of physical therapists and physical therapist assistants by the Physical Therapy Board of California. These provisions will become inoperative on July 1, 2007, and will be repealed on January 1, 2008.

This bill would instead make these provisions inoperative on July 1, 2013, and would repeal them on January 1, 2014.

Existing law provides for a diversion program for the rehabilitation of physical therapists and physical therapist assistants abusing drugs or alcohol, and authorizes the board to charge a fee of up to \$100 for participation in the program. Existing law requires persons convicted of certain sex offenses to register as sex offenders, as specified.

This bill would change the fee for participation in the diversion program to the amount necessary to cover the actual cost of administering the program. Because this bill could increase the fee revenue deposited into the Physical Therapy Fund, a continuously appropriated fund, the bill would make an appropriation. The bill would also require the board to deny licensure as a physical therapist or approval as a physical therapist assistant if the applicant is required to register as a sex offender, unless the registration is required as a result of a misdemeanor conviction for indecent exposure.

(8) Existing law provides for the licensure and regulation of physician assistants by the Physician Assistant Committee of the Medical Board of California. Existing law requires the committee to employ necessary personnel, including an executive officer. Existing law prohibits a physician who provides services in a medically underserved area from supervising more than 4 physician assistants at one time. Existing law establishes within the Department of Consumer Affairs a State Board of Guide Dogs for the Blind that licenses schools for the training of guide dogs for the blind. Existing law also establishes a pilot project for the arbitration of disputes between guide dog users and guide dog schools relating to the continued physical custody and use of the guide dog when the dog user is not the legal owner of the dog. All of these provisions will become inoperative on July 1, 2008, and will be repealed on January 1, 2009.

This bill would instead make these provisions inoperative on July 1, 2011, and would repeal them on January 1, 2012.

(9) Existing law, the Naturopathic Doctors Act, provides for the licensure and regulation of the practice of naturopathic medicine, and establishes the Bureau of Naturopathic Medicine, in the Department of Consumer Affairs, which is responsible for the administration of the act. A violation of certain provisions of the act is a crime. The act will become inoperative on July 1, 2009, and will be repealed on January 1, 2010.

This bill would instead make the act inoperative on July 1, 2010, and would repeal it on January 1, 2011.

Because this bill would extend the application of certain provisions, the violation of which would be a crime, it would impose a state-mandated local program.

(10) Existing law, the Respiratory Care Practice Act, provides for the licensure and regulation of respiratory professionals by the Respiratory Care Board of California, and authorizes the board to appoint an executive officer. These provisions will become inoperative on July 1, 2008, and will be repealed on January 1, 2009.

This bill would instead make these provisions inoperative on July 1, 2010, and would repeal them on January 1, 2011.

Existing law defines the practice of respiratory therapy, and prohibits its practice without a license issued by the board, subject to certain exceptions.

This bill would specify that a person employed by a home medical device retail facility or a licensed home health agency is not prohibited by the act from performing respiratory care or related services authorized by the board.

(11) Existing law, the Pharmacy Law, provides for the licensure and regulation of the practice of pharmacy and the sale of dangerous drugs or dangerous devices by the California State Board of Pharmacy, in the Department of Consumer Affairs. Existing law authorizes the board to appoint an executive officer. These provisions will become inoperative on July 1, 2008, and will be repealed on January 1, 2009.

This bill would instead make these provisions inoperative on July 1, 2010, and would repeal them on January 1, 2011.

On and after January 1, 2007, existing law prohibits a wholesaler or pharmacy from selling, trading, or transferring a dangerous drug without a pedigree, as defined, and

prohibits a wholesaler or pharmacy from acquiring a dangerous drug without receiving a pedigree, unless the compliance date is extended. Existing law authorizes the board to extend the compliance date to January 1, 2008, in specified circumstances.

This bill would instead impose the prohibition against selling, trading, transferring, or acquiring a dangerous drug without a pedigree on January 1, 2009, and would extend the board's authority to extend the compliance date. The bill would also impose additional requirements with respect to information required to be contained in a pedigree and would make other conforming changes.

Existing law requires a surety bond to secure payments of fines by resident and nonresident dangerous drug wholesalers. These provisions are repealed on January 1, 2011.

This bill would instead repeal those provisions on January 1, 2015.

(12) Existing law provides for the licensure and regulation of veterinarians by the Veterinary Medical Board in the Department of Consumer Affairs, and authorizes the board to appoint an executive officer. Existing law provides for the licensure and regulation of architects by the California Architects Board and authorizes the board to appoint an executive officer. Existing law provides for the creation of the Landscape Architects Technical Committee to assist the board with specified functions. These provisions will become inoperative on July 1, 2009, and will be repealed on January 1, 2010.

This bill would instead make these provisions inoperative on July 1, 2011, and would repeal them on January 1, 2012.

(13) Existing law provides for a certification process for interior designers, and repeals those provisions on January 1, 2008.

This bill would instead repeal those provisions on January 1, 2010.

(14) Existing law provides for the licensure and regulation of professional engineers and land surveyors by the Board for Professional Engineers and Land Surveyors, in the Department of Consumer Affairs. Existing law requires the board to appoint an executive officer. These provisions will become inoperative on July 1, 2008, and will be repealed on January 1, 2009.

This bill would instead make these provisions inoperative on July 1, 2011, and would repeal them on January 1, 2012.

The bill would change the date on which board member terms expire. The bill would revise certain voting requirements for actions taken by the board. The bill would revise provisions relating to the use of a person's name in the name of an engineering business or a land surveying business. The bill would require all businesses engaged in civil, electrical, or mechanical engineering services to file a current organization record with the board.

Existing law authorizes the board to give one year of credit as qualifying experience for a postgraduate degree in a school of engineering.

This bill would instead authorize the board to give up to 5 years of credit as qualifying experience. The bill would authorize the board to make arrangements with an organization to conduct examinations for licensure. The bill would revise other related provisions and make technical changes.

(15) Existing law requires the body that certifies interior designers to report by September 1, 2005, on the effectiveness of the California Code and Regulation Examination for interior design professionals.

This bill would extend the reporting date to September 1, 2008.

(16) Existing law imposes various requirements on tax preparers. Existing law recognizes the California Tax Education Council as an organization representing various interested organizations in the tax return preparation industry and that performs certain functions pursuant to law. Existing law requires the council to establish a process for 2 individual tax preparers to be appointed to the council with full voting privileges.

The bill would increase the number of individual tax preparers to be appointed to 6.

(17) This bill would incorporate additional changes in Section 101 of the Business and Professions Code, proposed by AB 2821, to be operative only if AB 2821 and this bill are

chaptered and become effective on or before January 1, 2007, SB 1472 is chaptered and amends Section 101 of the Business and Professions Code, and this bill is chaptered last.

(18) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 659 (SB 1475) Committee on Business, Professions and Economic Development Healing arts.

(1) Existing law makes repeated acts of clearly excessive prescribing or administering of drugs or treatment, repeated acts of clearly excessive use of diagnostic procedures, or repeated acts of clearly excessive use of diagnostic or treatment facilities unprofessional conduct for a physician and surgeon, dentist, podiatrist, psychologist, physical therapist, chiropractor, or optometrist. Existing law also requires various healing arts boards to separately create and maintain a central file, to provide an individual historical record for each licensee, of the names of all persons who hold a license, certificate, or similar authority from that board.

The bill would also make these provisions applicable to, respectively, speech-language pathologists and audiologists and the Speech-Language Pathology and Audiology Board.

(2) Existing law creates the Board of Behavioral Sciences and makes it responsible for the licensure and regulation of clinical social workers and educational psychologists. Under existing law, moneys received by the board are deposited into the Behavioral Sciences Fund and are continuously appropriated to the board, other than the revenue from fines and penalties. Existing law makes a violation of the provisions regulating these practitioners a crime.

This bill would recast the provisions creating the board. The bill would name provisions regulating social workers the Clinical Social Worker Practice Act and would modify licensure requirements with respect to experience gained outside this state. The bill would also establish the Educational Psychologist Practice Act, which would continue the licensure and regulation of educational psychologists by the board. The bill would revise the provisions defining and regulating the practice of educational psychologists and would require licensees to complete continuing education as a prerequisite for licensure renewal. The bill would authorize the board to require those continuing education providers to pay fees to fund the administration of this requirement. Because the bill would direct their deposit into the Behavioral Sciences Fund, it would make an appropriation by increasing the amount of funds in a continuously appropriated fund. The bill would continue to make the violation of provisions regulating educational psychologists punishable as a crime and, because it would prohibit the commission of additional types of conduct, the bill would expand that crime and thereby impose a state-mandated local program.

(3) Existing law, the Pharmacy Law, provides for the licensure and regulation of pharmacists by the California State Board of Pharmacy and makes a violation of the act a crime.

Existing law authorizes a pharmacist filling a prescription order for a drug product prescribed by its trade or brand name to select another drug product with the same active chemical ingredients, as specified, and of the same generic drug name, as specified, of those drug products having the same active chemical ingredients. Existing law prohibits a selection from being made if the prescriber personally indicates, either orally or in his or her own handwriting, "Do not substitute," or words of similar meaning.

This bill would specify that, with respect to an electronic data transmission prescription, a prescriber may indicate "Do not substitute," or words of similar meaning, in the prescription as transmitted by electronic data, or may check a box marked on the prescription "Do not substitute."

Existing law requires every pharmacy to have written policies and procedures for detecting certain impairments or drug-related acts among licensees employed by or with the pharmacy.

This bill would instead require every pharmacy to have written policies and procedures for addressing those impairments or acts by those licensees.

Existing law prohibits a pharmacy from compounding injectable sterile drug products in this state unless the pharmacy has obtained a license from the board.

This bill would authorize the board to issue a temporary license to compound injectable sterile drug products when the ownership of a pharmacy that is licensed to compound injectable sterile drug products is transferred from one person to another.

Existing law requires an applicant for a wholesaler license or a nonresident wholesaler license to submit a surety bond or other security to the board, as specified, with certain exceptions.

This bill would exempt a government-owned and operated wholesaler and a holder of a United States Food and Drug Administration biologics license application meeting certain criteria from that requirement.

Under existing law, specified clinics, including surgical clinics, may purchase drugs at wholesale for administration or dispensing to the clinic's patients. Existing law requires these clinics to maintain certain records for at least 7 years for inspection and to obtain a license from the board. Existing law specifies that each license is to be issued to a specific clinic and for a specific location. Existing law requires those clinics, when applying for a license, to show evidence that a professional director, as defined, is responsible for the provision of pharmacy services. Existing law also requires those clinics, other than surgical clinics, to retain a consulting pharmacist to perform specified tasks, including certifying in writing, at least twice a year, that the clinic is or is not operating in compliance with specified requirements, and requires the most recent certification to be submitted with the clinic's license renewal application.

This bill would instead require those clinics to maintain those records for at least 3 years and would require a separate license for each clinic location. The bill would expand the definition of "professional director" to include a dentist or podiatrist in certain circumstances. The bill would require a clinic to notify the board of any change of address and, in the case of a surgical clinic, any proposed change in ownership, as specified, and any change in professional director. The bill would require surgical clinics also to retain a consulting pharmacist to perform those specified tasks. The bill would require a consulting pharmacist to provide the certification, with any recommended corrective actions, in writing quarterly and to keep the certification on file for 3 years. Because the bill would specify additional requirements under the Pharmacy Law, a violation of which would be a crime, it would impose a state-mandated local program. The bill would make other technical changes.

(4) Existing law, the Psychiatric Technicians Law, provides for the licensure and regulation of psychiatric technicians by the Board of Vocational Nursing and Psychiatric Technicians, imposes specified fees in connection with the issuance of licenses by the board, and authorizes the board to fix certain of those fees within specified minimums and maximums. Existing law requires the board to pay all revenue received into the State Treasury for credit to the Vocational Nursing and Psychiatric Technicians Fund. Existing law prohibits the board from maintaining a reserve balance greater than 3 months of the appropriated operating expenditures of the board in any fiscal year.

This bill would delete that prohibition and reduce the minimum amount of certain fees fixed by the board.

(5) Existing law provides for the registration of telephone medical advice services with the Telephone Medical Advice Services Bureau of the Department of Consumer Affairs, and prohibits a business entity from providing those services to a patient at a California address unless the person is registered. Under existing law, any business entity that submits proof of accreditation by certain specified health committees and organizations is deemed provisionally registered.

This bill would delete that provision and modify the application requirements for registration.

(6) Existing law, the Dental Practice Act, authorizes a physician and surgeon, until January 1, 2007, to administer general anesthesia to a dental patient under specified conditions in the office of a dentist who does not possess a general anesthesia permit.

This bill would extend the operation of those provisions until January 1, 2008.

(7) This bill would incorporate additional changes to Section 725 of the Business and Professions Code, proposed by AB 2198, to be operative only if AB 2198 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

(8) This bill would incorporate additional changes to Section 4190 of the Business and Professions Code, proposed by AB 2308, to be operative only if AB 2308 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 660 (SB 1485) Hollingsworth Protected animals.

Existing law provides that it is a misdemeanor to import into this state for commercial purposes, to possess with intent to sell, or to sell within the state, the dead body, or any part or product thereof, of any of a list of specified animals, including alligators and crocodiles.

This bill would revise these provisions to provide that, commencing January 1, 2010, it shall be unlawful to engage in these acts with respect to alligators and crocodiles. The bill would state the intent of the Legislature in this regard.

#### Ch. 661 (SB 1488) Hollingsworth Surplus school property: use of proceeds.

Existing law, notwithstanding any other law, and subject to specified limitations, authorizes the Santee School District and the Capistrano Unified School District to sell certain surplus real and personal property, as specified, to deposit the proceeds into the general fund of the school district or the county office of education, and to use the proceeds from that transaction for any one-time general fund purpose. Existing law repeals those provisions on January 1, 2007.

This bill would, in addition, grant that authority to the Valley Center-Pauma Unified School District. The bill would also extend the repeal date for those provisions to January 1, 2010.

This bill would declare that, due to the special circumstances uniquely applicable to the Valley Center-Pauma Unified School District, a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution, and the enactment of a special statute is therefore necessary.

#### Ch. 662 (SB 1500) Speier Drug programs.

Existing law requires the Department of Alcohol and Drug Programs to administer certain programs and studies related to alcohol and drug abuse recovery and to license, certify, and regulate alcoholism or drug abuse recovery or treatment facilities.

This bill would require the department to develop and implement a statewide campaign designed to deter initial and continued use of methamphetamine in California, and would authorize the department to accept voluntary contributions, in cash or in-kind, for purposes of this bill. The bill would require that the department develop and implement the campaign established under the bill only if the Director of Finance determines that sufficient private donations, as defined to be at least \$12,000,000, have been collected and deposited into the California Methamphetamine Abuse Prevention Account, which the bill would create in the

State Treasury, and would appropriate money from the account to the department for the 2006–07 fiscal year for the purposes of this bill.

This bill would authorize the department to develop and implement a limited campaign to deter the abuse of methamphetamine for the 2006–07 fiscal year if the Director of Finance determines that at least \$500,000 of private donations have been collected and deposited into the account.

Ch. 663 (SB 1513) Romero California International Trade and Investment Act.

(1) Existing law provides for various international trade and investment activities in the state, and authorizes the Secretary of Business, Transportation and Housing to accept private sector moneys for the purposes of promoting international trade and investment, subject to specified criteria.

Existing law, until January 1, 2008, requires the Governor to direct the secretary to establish, on a contract basis, and to the extent funds are available for that purpose, an international trade and investment office in Yerevan, in the Republic of Armenia.

This bill would enact the California International Trade and Investment Act. It would specify that the agency shall be the primary state agency responsible for international trade and investment activities in the state, subject to specified conditions. It would also require the secretary to develop an international trade and investment policy, complete a study on the potential role of the state in global markets, and develop an international trade and investment strategy for the state, subject to specified requirements. It would require the secretary to convene or join a statewide business partnership for international trade and investment to advise on business needs and priorities in that regard. It would also require the secretary to develop an international trade and investment office strategy and authorize the establishment of international trade and investment offices by the agency, subject to specified conditions.

This bill would additionally require the Office of Planning and Research to maintain, and update, a full and comprehensive list of all state agreements made with foreign governments, as provided. It would, with specified exceptions, require all state and legislative employees, as specified, to provide to their respective oversight entity, within 30 days of traveling out of the country on official state business, a memorandum with specified information regarding the trip.

(2) Existing law sets forth the duties and authority of the Governor and various state officers and agencies with respect to international relations generally.

This bill would require the state point of contact for the United States Trade Representative, within the executive branch, to perform specified duties with regard to the effect of federal trade policy on the state. It would also reiterate the duties and authority of the Governor and the various state officers and agencies with respect to international relations.

Ch. 664 (SB 1519) Bowen Voting systems: recounts

Existing law requires the Secretary of State to study and adopt regulations governing the use of voting machines, voting devices, and vote tabulating devices. Existing law also authorizes the Secretary of State to approve only those voting systems that meet specified requirements.

This bill would require the Secretary of State, within the Secretary of State's existing budget, to adopt regulations no later than January 1, 2008, for each voting system approved for use in the state, and to specify procedures for recounting ballots, including absentee and provisional ballots, using those voting systems.

Ch. 665 (SB 1520) Ducheny Medi-Cal: hospital funding demonstration project: University of California.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

Existing law establishes the Medi-Cal Hospital/Uninsured Care Demonstration Project Act, which revises hospital reimbursement methodologies under the Medi-Cal program in order to maximize the use of federal funds consistent with federal Medicaid law and stabilize the distribution of funding for hospitals that provide care to Medi-Cal beneficiaries and uninsured patients. This demonstration project provides for funding, in supplementation of Medi-Cal reimbursement, to various hospitals, including designated public hospitals, as defined in accordance with certain provisions relating to disproportionate share hospitals, and which include specified University of California hospitals. Existing law requires the Director of Health Services, with respect to each project year, to determine a baseline funding amount for each designated public hospital, and, with respect to each project year after the 2005–06 project year, to determine an adjusted baseline funding amount for each of these hospitals to reflect any increase or decrease in volume.

Existing law provides that, for the 2005–06 project year and subsequent project years, each designated public hospital shall be eligible to receive an allocation of federal Medicaid funding from the applicable federal disproportionate share hospital allotment. Existing law requires that this allocation to a designated public hospital, in combination with other specified funding sources, not exceed the baseline funding amount or adjusted baseline funding amount, as appropriate, for that hospital.

Existing law provides that, with respect to each project year, designated public hospitals, or governmental entities with which they are affiliated, shall be eligible to receive specified safety net care pool payments from the Health Care Support Fund. Existing law requires that the total amount of these payments to a hospital, in combination with other specified funds, not exceed the hospital's baseline funding amount or adjusted baseline funding amount.

Existing law requires that each designated public hospital receive quarterly interim payments of its disproportionate share hospital allocation and safety net care pool payments during the project year, and requires the department to adjust those payments as specified.

This bill would require the department, prior to the distribution of the above quarterly interim payments and payment adjustments to a designated public hospital that is part of a hospital system containing multiple designated public hospitals licensed to the same governmental entity, to consult with the applicable governmental entity. It would require the department to implement any adjustments to the payment distributions for the hospitals in that hospital system as requested by the governmental entity if the net effect of the requested adjustments for those hospitals is zero. The bill would require that any such adjustments be disregarded in the application of the limitations on a hospital's receipt of federal disproportionate share hospital allocations and safety net care pool payments based on its baseline funding amount or adjusted baseline funding amount, as described above.

Existing law provides for the payment of stabilization funding to, among other entities, designated public hospitals. Existing law requires that stabilization funding for services provided during the 2005–06 project year be distributed to designated public hospitals in accordance with a specified formula based, in part, on the amount of federal financial participation received by each designated public hospital, and by certain affiliated entities, based on certified public expenditures, from the federal disproportionate share hospital allotment and from the safety net care pool payments.

This bill would require that, if a payment adjustment for a hospital has been made pursuant to the above provisions, the amount of federal financial participation received by the hospital based on certified public expenditures be determined for the purposes of the above formula as though no such payment adjustment had been made.

This bill would also require that those payment redistributions recognize the level of care provided to Medi-Cal and uninsured patients and maintain the viability and effectiveness of the hospital system.

This bill would incorporate additional changes in Section 14166.75 of the Welfare and Institutions Code, proposed by AB 1920, to be operative only if AB 1920 and this bill are both chaptered and take effect on or before January 1, 2007, and this bill is chaptered last.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 666 (SB 1528) Bowen Medi-Cal: covered services: pregnancy.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits, including certain perinatal services.

This bill would provide that home infusion treatments with tocolytic agents for pregnant women are covered under the Medi-Cal program, subject to utilization controls and guidelines or protocols, as prescribed, until January 1, 2010. The bill would require the department, by October 1, 2009, to prepare, or contract for the preparation of, a report evaluating the medical effectiveness and cost-effectiveness of these treatments, as specified.

Ch. 667 (SB 1535) Kuehl Fish and game.

(1) The California Constitution creates the Fish and Game Commission. Existing law establishes the commission in the Resources Agency to perform specified functions. Existing law permits the commission to employ a secretary, and to hold specified meetings relating to commission regulations as to fish, amphibians, reptiles, mammals, and resident game birds.

This bill would permit the commission to employ a staff, including an executive director, to assist the commission in conducting its operations. The bill would require the commission to adopt and approve a conflict of interest code, and would prohibit a former commissioner from acting as an agent or attorney for any person for a period of 12 months after leaving office, as provided. The bill would delete the requirement that the commission hold specified meetings relating to commission regulations as to fish, amphibians, reptiles, mammals, and resident game birds, and instead would require the commission to hold no fewer than 10 regular meetings per calendar year. The bill would permit the commission to hold special meetings or hearings to receive additional input from the department and the public. The bill would require the commission to consider and adopt specified regulations relating to birds, mammals, fish, amphibians, and reptiles at a series of no fewer than 3 meetings, as provided.

(2) Existing law establishes the Department of Fish and Game in the Resources Agency, administered through the Director of Fish and Game. Existing law requires the department to impose and collect a filing fee to defray the costs of managing and protecting fish and wildlife trust resources, and specifies the amount to be levied. Existing law exempts from filing fees projects that fulfill specified conditions. Existing law also makes various findings and declarations relating to lack of department funding, user fees, and funding instability.

This bill would increase the amounts of filing fees collected by the department, and require the department to adjust the fees annually according to a specified index. The bill would require that a project have no effect on fish and wildlife to be eligible for the fee exemption and would additionally exempt otherwise eligible projects, the costs of which are payable from the California Ocean Resource Enhancement Account. The bill would require the director and the Secretary of the Resources Agency to submit a report relating to all accounts and subaccounts within the Fish and Game Preservation Fund, and require the department to update its cost allocation plan to reflect the cost of program activities. The bill would require the county clerk of each county and the Office of Planning and Research to maintain an electronic and paper record of all environmental documents received, as provided. The bill would also modify various findings and declarations relating to lack of department funding, user fees, and funding instability.

(3) Existing law generally provides that a violation of regulations and laws relating to fish and game is a crime.

Because this bill would create a new crime by prohibiting former commissioners from performing specified functions, the bill would create a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 668 (SB 1538) Scott Firearms.

Existing law regulates the transfer of firearms. Existing law requires the purchaser of any firearm shall be required to present clear evidence of his or her identity and age, to the dealer, and the dealer shall require him or her to sign his or her current legal name and affix his or her residence address and date of birth to the register, as required. Existing law provides that any person furnishing a fictitious name or address or knowingly furnishing any incorrect information or knowingly omitting any information required to be provided for the register is guilty of a misdemeanor.

This bill would also provide that any person who is prohibited from obtaining a firearm, as specified, who knowingly furnishes a fictitious name or address or knowingly furnishes any incorrect information or knowingly omits any information required to be provided for the register would be punished by imprisonment in a county jail not exceeding one year or imprisonment in the state prison for 8, 12 or 18 months.

By expanding an existing crime, this bill would impose a state-mandated local program.

This bill incorporates additional changes to Section 12076 of the Penal Code, proposed by AB 2521 and SB 1239, to become effective if this bill and either or both of those bills are enacted and become effective on or before January 1, 2007, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 669 (SB 1543) Alarcon High school curriculum: high school coursework requirements.

Existing law, the Donahoe Higher Education Act, sets forth, among other things, the missions and functions of California's public and independent segments of higher education, and their respective institutions of higher education. Existing law establishes the University of California, under the administration of the Regents of the University of California, and the California State University, under the administration of the Trustees of the California State University, as 2 of the public segments of postsecondary education in this state. Provisions of the Donahoe Higher Education Act apply to the University of California only to the extent that the regents act, by resolution, to make those provisions applicable.

A provision of the act requires the California State University, and requests the University of California, to establish model academic standards for high school courses for pupils who wish to attend those institutions.

Existing law requires the Superintendent of Public Instruction to coordinate the development, on a cyclical basis, of model curriculum standards for a high school career technical course of study. Existing law also requires the superintendent to develop a career technical curriculum framework based on prescribed criteria.

This bill would add to the Donahoe Higher Education Act a provision providing that if, by July 1, 2008, either the University of California or the California State University has not adopted, in accordance with the criteria in existing law, model uniform academic standards for career technical education that will satisfy the completion of a general elective course requirement for the purposes of admission to their respective universities, the regents are

requested to, and the trustees are required to, recognize the completion of all high school career technical education courses that meet the model curriculum standards developed by the superintendent as satisfying the completion of a general elective course requirement for the purposes of admission to their respective universities. The bill would request the regents, and would require the trustees, to make publicly available, upon their adoption, any model curriculum standards for career technical education courses.

The bill would not apply to any career technical education courses that, as of January 1, 2007, are approved as satisfying the admissions requirements of the University of California or the California State University.

Ch. 670 (SB 1548) Murray Alcoholic beverages: tastings.

The Alcoholic Beverage Control Act authorizes any person holding a manufacturer's agent's, rectifier's, importer's, or wholesaler's license to give away samples of the alcoholic beverages that are authorized to be sold under that license. Existing law provides that a retail license does not authorize the furnishing or giving away of any free samples of alcoholic beverages.

The Alcoholic Beverage Control Act permits an on-sale retail licensee of wine or distilled spirits to instruct retail consumers regarding wine or distilled spirits. Under existing law this instruction may include the furnishing of up to 3 tastings of wine or distilled spirits, in limited quantities, to any individual in one day.

This bill would additionally permit beer manufacturers, licensed beer and wine importers general, and licensed beer and wine wholesalers to instruct consumers regarding beer, respectively. This bill would allow the instruction to include the furnishing of tastings under specified conditions. This bill would limit the amount of instructions that include tastings per year and require the beer manufacturers, licensed beer and wine importers general, and licensed beer and wine wholesalers to maintain a record of each instruction that included tastings for 3 years, as provided.

This bill would additionally provide that the failure to comply with these requirements shall be a presumed violation of specific tied-house restrictions within the Alcoholic Beverage Control Act. By expanding the definition of an already existing crime, this bill imposes a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 671 (SB 1557) Ducheny Coachella Valley Water District: nonpotable water use.

Existing law prohibits a person or public agency from using water from a source that is suitable for potable domestic use for nonpotable uses if suitable recycled water is available, as determined by the State Water Resources Control Board, after notice to any person or entity who may be ordered to use recycled water or to cease using potable water and a prescribed hearing is held. Existing law, the County Water District Law, governs the operations of the Coachella Valley Water District.

This bill would prohibit a person or local public agency from using, within the district's service area, water from any source that is suitable for potable domestic use for specified nonpotable uses if the board of directors of the district determines, after notice and an opportunity for hearing, that suitable nonpotable water is available, as specified, and other requirements are met.

The bill would specify that these provisions only apply to a use of water within the district's service area that is not the subject of a specified determination by another public agency.

Ch. 672 (SB 1569) Kuehl Human services: immigrants.

Under existing law, the State Department of Social Services is required, after setting aside necessary administrative funds, to allocate all federal social services funds derived from the federal Refugee Act of 1980, which are required to be used for certain training of eligible refugees, to each eligible county, in the same proportion that refugees receiving aid in each eligible county bear to the total refugees receiving aid in all eligible counties. Services provided to persons covered by these federal provisions include employment-related and English language training services.

Existing law also provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons, including noncitizens who meet specific qualifications under the Cuban-Haitian Entrant Program and the Refugee Resettlement Program for health care services.

Existing federal law also prohibits the provision of state or local public benefits, as defined, to certain noncitizens unless specifically provided for in state law.

This bill would extend eligibility for certain public social services, including, but not limited to, refugee cash assistance, Medi-Cal, and employment social services, as well as Healthy Families Program benefits to qualified noncitizen victims of trafficking, domestic violence, and other serious crimes, as defined, who can demonstrate their eligibility for these programs, and who are taking steps to meet the eligibility conditions for certain federal benefits. By increasing counties' responsibility for administering and determining eligibility for various services, programs, and benefits, this bill would create a state-mandated local program.

This bill would require the State Department of Social Services to adopt regulations, which may be emergency regulations, as specified, to implement these provisions no later than July 1, 2008.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 673 (SB 1587) Lowenthal Transportation planning: federal funds.

(1) Existing law requires transportation planning agencies to adopt and submit an updated regional transportation plan to the California Transportation Commission and the Department of Transportation every 3 years, except that a transportation planning agency that does not contain an urbanized area may, at its option, submit an updated plan every 4 years.

This bill would instead require a transportation planning agency to submit an updated regional transportation plan every 4 years, except that a transportation planning agency located in a federally designated air quality attainment area or that does not contain an urbanized area could, at its option, submit an updated plan every 5 years.

(2) Existing federal law provides appropriations of congestion mitigation and air quality program funds for certain transportation purposes. Existing law requires the Department of Transportation to apportion these funds by federal formula to metropolitan planning organizations or transportation planning agencies for expenditure on eligible projects, and these funds are available for expenditure during 3 federal fiscal years, including the year of apportionment.

This bill would require the department to provide specific apportionments for the 2007 and 2008 federal fiscal years for the Monterey Bay and Santa Barbara regions.

(3) The bill would make other related changes.

#### Ch. 674 (SB 1592) Romero Pupils: high school exit examination.

Existing law requires the Superintendent of Public Instruction, with the approval of the State Board of Education, to develop a high school exit examination in English language arts and mathematics in accordance with state academic content standards. Existing law requires, commencing with the 2003–04 school year and each school year thereafter, each pupil completing grade 12 to successfully pass the high school exit examination as a condition of receiving a diploma of graduation or graduation from high school.

This bill would require the Superintendent of Public Instruction, by June 30, 2007, to report to the Legislature and the Governor on the number and percentage of pupils who failed to receive a diploma of graduation from high school in 2006 due to the failure of those pupils to pass the high school exit examination, aggregated by ethnicity, English learner status, and other information as may be determined to be necessary to understanding the meaning and consequences of the failure to pass the high school exit examination.

Ch. 675 (SB 1626) Ashburn Juvenile crime.

Existing juvenile law, enacted by Proposition 21 of the 2000 statewide primary election, provides that if a minor consents and waives his or her right to a speedy jurisdictional hearing, the court may refer the case to the probation department or summarily grant deferred entry of judgment if the minor admits the charges in the petition and waives time for the pronouncement of the judgment and meets other eligibility criteria. This provision does not apply if the minor has committed any one of various, specified serious or violent offenses.

Existing law provides that, upon the agreement of the prosecuting attorney, the public defender or the minor's private defense attorney, and the presiding judge of the juvenile court or his or her designee, the procedure for deferred entry of judgment shall be completed as soon as possible after the initial filing of the petition. If they do not agree, existing law requires that the minor's case be heard according to procedures generally governing juvenile cases.

The bill would delete the latter provisions described above requiring the agreement of the attorneys and the judge and would instead provide that upon a finding that a minor is suitable for deferred entry of judgment and would benefit from education, treatment, and rehabilitation efforts, the court may grant deferred entry of judgment. The bill would require the court to make findings on the record that a minor is appropriate for deferred entry of judgment in any case in which it is granted. Because the bill would amend an initiative statute, it would require a  $2/3$  vote.

Ch. 676 (SB 1627) Kehoe Wireless telecommunications facilities.

(1) The Planning and Zoning Law authorizes the legislative body of any county or city to adopt ordinances that, among other things, regulate the use of buildings, structures, and land as between industry, business, residences, and open space.

This bill would require a city, including a charter city, or county to administratively approve an application for a collocation facility on or immediately adjacent to a wireless telecommunications collocation facility, as defined, through the issuance of a building permit or a nondiscretionary permit, as specified.

(2) The Permit Streamlining Act defines the term "development project" to include projects involving the issuance of a permit for construction or reconstruction but not a permit to operate.

This bill would prohibit a city or county from taking certain actions as a condition of approval of an application for a permit for construction or reconstruction for a development project for a wireless telecommunications facility, and would specify that a development project for a wireless telecommunications facility is not subject to a permit to operate.

By imposing new duties on local agencies, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 677 (SB 1637) Committee on Veterans Affairs Property taxation.

(1) Existing law, with respect to supplemental property tax assessments, specifies various limitation periods for assessments on the supplemental tax roll. Existing law provides for the application of property tax exemptions to those supplemental assessments provided, among other things, that an assessee file an exemption application within a specified time. Existing property tax law allows taxes, penalties, and interest imposed for late filings of property tax exemption applications for the supplemental roll that exceed \$250 in total to be reduced by 85% or 90%, as applicable, in the case of the exemption for a college, cemetery, church, religious, exhibition, or veterans' organization, as specified. In the case of the property tax exemption for disabled veterans, existing property tax law reduces by 80% the taxes, penalties, and interest imposed for certain late filings of these exemption applications. If the late filing was because the person had not yet received a disability rating from the United States Department of Veterans Affairs (USDVA) or because the property was acquired after the lien date or was not occupied as the principal residence of the veteran, existing law reduces all taxes, penalties, and interest imposed for the late filing.

This bill would additionally authorize an 85% or 90%, as applicable, reduction in the taxes, penalties, and interest imposed for late filings of property tax exemption applications for the supplemental roll in the case of the disabled veterans' exemption, regardless of whether those amounts exceed \$250. This bill would also specify that this exemption applies beginning on the date that the claimant receives a disability rating from the United States Department of Veterans Affairs and applies to all property taxes on the property that serve as a lien against that property, as specified. This bill would also specify the manner in which the exemption is to be prorated in the case of the property becoming eligible for the disabled veterans' exemption after the lien date, as specified.

This bill would also require that claims for the disabled veterans' exemption contain the claimant's social security number or other personal identifying number. This bill also would, pursuant to legislative findings, specify that these claim forms are not public documents open to public inspection.

By changing the manner in which local officials process claims for the disabled veterans' property tax exemption, this bill would impose a state-mandated local program.

(2) Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 678 (SB 1659) Cox Hospital seismic retrofit.

(1) Existing law, the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983, requires the Office of Statewide Health Planning and Development to assume prescribed duties relating to construction and alteration of hospital buildings, including, but not limited

to, review and approval of construction plans, in order to ensure that the buildings would be reasonably capable of providing services after a disaster.

Existing law sets forth the facilities plan application requirements, including, but not limited to, that the application be accompanied by the plans and full, complete, and accurate specifications.

This bill would authorize the office to permit electronic submission of plans.

(2) Existing law requires that all related regulatory submissions by the office to the California Building Standards Commission be adopted as emergency regulations.

This bill would require the office to propose to the commission regulations facilitating construction of toilet rooms accessible to persons with disabilities in hospitals and skilled nursing facilities, and would deem them to be emergency regulations.

Ch. 679 (SB 1661) Cox Health facilities: seismic safety: construction.

Existing law, the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983, establishes, under the jurisdiction of the Office of Statewide Health Planning and Development, a program of seismic safety building standards for certain hospitals constructed on and after March 7, 1973.

Existing law requires, after January 1, 2008, any general acute care hospital building that is determined to pose a potential risk of collapse or pose a significant risk of loss of life to be used only for nonacute care hospital purposes. Existing law authorizes the Office of Statewide Health Planning and Development to extend the January 1, 2008, deadline for certain hospital buildings of a general acute care hospital, if specified conditions are met.

This bill would authorize the office to grant an additional extension of up to 2 years, of the January 1, 2013, deadline if the hospital building subject to the extension meets prescribed requirements, including that it is under construction at the time of the request for this extension, and that the hospital has made reasonable progress in meeting the deadline, but for reasons beyond its control it is impossible for it to meet the deadline. The bill would authorize the office to revoke this extension for abandonment or suspension of construction as specified, unless the hospital can demonstrate that the abandonment or suspension was caused by a condition beyond the hospital's control.

The bill would also require an owner of a general acute care hospital who either has or has not submitted an extension request pursuant to the bill to submit, under specified circumstances, prescribed reports to the office, and would require the office to make these reports.

Ch. 680 (SB 1697) Soto Military service: benefits.

Existing law provides certain benefits and protections for members of the state militia, as specified.

This bill would require the Military Department to comply with the provisions of Section 4301 of Title 38 of the United States Code, the Uniformed Services Employment and Reemployment Rights Act (USERRA), and would provide that Military Department personnel, as specified, shall be considered employees and provided the same federal reemployment protections and benefits given to other employees under USERRA.

Ch. 681 (SB 1698) Ashburn Military and aerospace enterprise development.

Existing law, until January 1, 2007, establishes the Office of Military and Aerospace Support in the Business, Transportation and Housing Agency, and sets forth its duties and authority with respect to developing and recommending to the Governor and the Legislature a strategic plan for state and local defense retention and conversion.

This bill would additionally require the office to conduct outreach to entities and parties involved in the aerospace industry and associated basic and applied research, and to provide a specified network designed to, among other things, increase aerospace enterprise in California.

This bill would extend the operation of these provisions to January 1, 2009.

Ch. 682 (SB 1699) Bowen Financial transactions: privacy.

Existing law, applicable to electronically printed receipts, prohibits a person who accepts credit cards for the transaction of business from printing more than the last 5 digits of the credit card account number or the expiration date upon any receipt provided to the cardholder.

This bill, under the circumstances described above, would prohibit printing more than the last 5 digits of the credit card account number or the expiration date upon any receipt retained by the person, firm, partnership, association, corporation, or limited liability company, which is printed at the time of the purchase, exchange, refund, or return, and is signed by the cardholder or any receipt retained by the entities listed above, which is printed at the time of the purchase, exchange, refund, or return, but is not signed by the cardholder, because the cardholder used a personal identification number to complete the transaction.

Ch. 683 (SB 1702) Speier Health care coverage.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care and makes a willful violation of the act a crime. Existing law also provides for the regulation of health insurers by the Department of Insurance. Under existing law, a health care service plan and a health insurer are required to offer a standard benefit plan, as specified, pursuant to a pilot program ending on September 1, 2007. Existing law requires the Managed Risk Medical Insurance Board to make payments from the Major Risk Medical Insurance Fund, which is continuously appropriated, to plans and insurers for the provision of health care services under the standard benefit plan.

This bill would extend the duration of the pilot program to December 31, 2007, and would add a provision to the Budget Act of 2006 to transfer \$4,000,000 from the unallocated account in the Cigarette and Tobacco Products Surtax Fund to the Major Risk Medical Insurance Fund. Because the bill would increase the amount of revenue in the fund and extend the time during which the board would make payments from it, the bill would make an appropriation. The bill would also impose a state-mandated local program by extending the requirements of the pilot program with respect to health care service plans.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 684 (SB 1704) Kuehl Health care benefits.

Existing law requests the University of California to assess legislation proposing a mandated health benefit or service, as defined, to be provided by health care service plans and health insurers, and to prepare a written analysis in accordance with specified criteria.

This bill would, instead, request the University of California to establish the California Health Benefit Review Program to assess legislation proposing to mandate a benefit or service, as defined, and legislation proposing to repeal a mandated service or benefit, as defined, that, if enacted, would become effective on or after January 1, 2008, and to prepare a written analysis in accordance with specified criteria.

Existing law further requests the University of California to develop and implement conflict-of-interest provisions that would prohibit a person from participating in any analysis in which he or she knows or has reason to know he or she has a material financial interest.

Existing law requests the University of California to submit a report to the Governor and the Legislature no later than January 1, 2006, regarding the implementation of the aforementioned provisions.

This bill would request the University of California to submit another such report to the Governor and the Legislature by January 1, 2010.

Existing law provides funding for the University of California's implementation of these provisions from fees imposed upon health care service plans and health insurers, which would not exceed a total of \$2,000,000, and are to be deposited in the Health Care Benefits Fund.

This bill would extend to January 1, 2011, the repeal date of those provisions, and would authorize the continued imposition of that fee through the 2009–10 fiscal year.

Ch. 685 (SB 1719) Cedillo Payment of wages.

Existing law provides that generally if an employee is discharged or laid off, statutory time limits exist within which wages earned by the employee are due and payable.

This bill would permit specified employees working in the entertainment industry and their employers to enter into a collective bargaining agreement to establish a time limit for payment of wages after an employee is discharged or laid off.

Ch. 686 (SB 1720) Chesbro Armed Forces: uranium screening.

Existing law provides for certain rights and privileges for active members of the Armed Force, reservists, and veterans of the Armed Forces, including members of the California National Guard.

This bill would require the Secretary of the California Department of Veterans Affairs, or his or her designee, to assist an eligible member, as defined, or veteran in obtaining a best practice health screening for exposure to depleted uranium, as described. A member or veteran would be eligible to receive the assistance when he or she returns to this state after service in specified combat zones if he or she has been assigned a risk level I, II, or III for depleted uranium exposure, has been referred by a military physician, or has reason to believe that he or she was exposed to depleted uranium during their service. This bill would require the Secretary of the California Department of Veterans Affairs, or his or her designee, to develop a plan for outreach to eligible members and veterans, as described, regarding depleted uranium.

This bill also makes findings regarding the health risks of exposure to depleted uranium and the purpose of the bill to assist California's veterans in obtaining federal treatment services to detect exposure to depleted uranium.

Ch. 687 (SB 1725) Bowen Absentee ballots: online information.

(1) Existing law requires an elections official to count only those absentee ballots returned by mail that are received by the elections official or delivered to a polling place by the close of the polls on the day of the election that contain specified information. Existing law also requires the elections official to establish procedures to ensure the secrecy of any absentee ballot returned to a precinct polling place.

This bill would require an elections official, on or before March 1, 2008, to establish procedures to track and confirm the receipt of voted absentee ballots and to make this information available by means of online access using the county's elections division Internet Web site, or if none is available, by means of a toll-free telephone number for this purpose.

The bill would require the elections official to establish procedures to ensure the security, confidentiality, and integrity of any personal information collected, stored, or otherwise used in tracking absentee ballots. By increasing the duties of local elections officials, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 688 (SB 1735) Cox Vehicles: police pursuits.

(1) Existing law makes it a misdemeanor for a person operating a motor vehicle to willfully flee or otherwise attempt to elude a pursuing peace officer's motor vehicle under certain conditions. If the pursued vehicle is driven in a willful or wanton disregard for the safety of persons or property, or where that unlawful act proximately causes death or serious bodily injury, the offense is punishable as a misdemeanor or a felony, as specified.

This bill would make it a misdemeanor or felony if a person willfully flees or attempts to elude a pursuing peace officer and the person operating the pursued vehicle willfully drives that vehicle on a highway in a direction opposite to that in which the traffic lawfully moves upon that highway. By creating a new crime this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 689 (SB 1743) Bowen Victims of crime.

(1) Existing law provides that where a petition to the court for a change of name alleges that the reason for the petition is to avoid domestic violence or stalking, as defined, and the petitioner is a participant in the address confidentiality program, the petition, the order of the court, and the copy of the order to show cause that is required to be published shall, in lieu of reciting the proposed name, indicate that the proposed name is confidential and will be on file with the Secretary of State pursuant to the provisions of the program.

This bill would additionally apply these provisions to a petitioner who is, or who is filing on behalf of, a victim of sexual assault. It would also specify that the action for the change of name is exempt under these provisions from the requirement of publication of the order to show cause.

(2) Existing law permits a person to claim an evidentiary privilege for confidential communications between that person and a specified individual, including, but not limited to, a sexual assault counselor, a domestic violence counselor, and a human trafficking counselor.

This bill would make various semantic, conforming, technical, and nonsubstantive changes to these provisions.

(3) The bill would incorporate additional changes to Section 1277 of the Code of Civil Procedure proposed by this bill and AB 2303 to take effect if both bills are chaptered and this bill is chaptered last.

Ch. 690 (SB 1747) Bowen Elections: counting votes.

Existing law provides that the county central committee of each qualified political party may employ and may have present at the central counting place or places, not more than 2 qualified data processing specialists or engineers to check and review, among other things, the preparation and operation of the tabulating devices, and be in attendance at any or all phases of an election.

This bill would instead authorize each qualified political party and any bona fide association of citizens or a media organization to employ not more than 2 representatives to be present at the central counting place or places. The bill would also authorize the county elections official to limit the total number of representatives to no more than 10, as specified.

Ch. 691 (SB 1755) Chesbro Medi-Cal: adult day health care services.

The California Adult Day Health Care Act provides for the licensure and regulation of adult day health centers, with administrative responsibility for this program shared between the State Department of Health Services and the California Department of Aging pursuant to an interagency agreement.

The Adult Day Health Medi-Cal Law establishes adult day health care services as a Medi-Cal benefit for Medi-Cal beneficiaries who meet certain criteria. Under existing law, participation in an adult day health care program requires prior authorization by the State Department of Health Services.

This bill would revise the eligibility criteria for adult day health care services.

The bill would allow initial and subsequent treatment authorization requests to be granted for up to six calendar months. It would require that treatment authorization requests be initiated by the adult day health care center and include specified elements, and that authorization or reauthorization of a treatment request be granted only if the participant meets certain medical necessity criteria.

The bill would require that a participant's personal health care provider, as defined, have and retain responsibility for the participant's care. The bill would impose specified duties on an adult day health care center with respect to a participant who does not have a personal health care provider.

Existing law requires adult day health centers to offer, and provide directly on the premises, specified services.

This bill would require adult day health centers to offer, and provide directly on the premises, in accordance with the participant's individual plan of care, and subject to authorization, specified core services to each participant during each day of the participant's attendance at the center, including nursing services, personal care or social services, therapeutic activities, and one meal.

Existing law requires the department to develop a rate methodology for adult day health care services. Existing law requires the department to establish a reasonable rate for the initial assessment.

This bill would require that the rate for the initial assessment be separately billable and that it take into account specified factors. It would require that subsequent assessments be billed at a lesser amount and that the department establish utilization controls for assessment days to ensure the appropriate use of assessment and reassessment activity.

This bill would require the department, in addition, effective August 1, 2010, to establish a reimbursement methodology and a reimbursement limit for adult day health care services on a prospective cost basis for services that are provided to each participant, pursuant to his or her individual plan of care, as specified. The bill would require that these provisions be implemented only to the extent that federal financial participation is available.

The bill would require that federally qualified health centers be reimbursed on a prospective payment system rate basis pursuant to specified provisions of law for the provision of adult day health care services.

The bill would require the department to report annually to the relevant policy and fiscal committees of the Legislature, as part of the budget submitted by the Governor to the Legislature each January, on the implementation of the changes described above to the adult day health care program, including the impact of those changes on the number of centers and participants.

Ch. 692 (SB 1756) Migden Vehicles: driving under the influence: driver's license suspension: restricted driver's license.

(1) Existing law requires the Department of Motor Vehicles to immediately suspend or revoke the privilege of a person to operate a motor vehicle upon receipt of an abstract of the record of a court showing that the person has been convicted of specified provisions prohibiting driving under the influence (DUI). If the person has been convicted of a first offense, without causing bodily injury to another, existing law prohibits the reinstatement of

that privilege for a period of 6 months and until the person complies with certain conditions. In a county where the board of supervisors has approved, and the State Department of Alcohol and Drug Programs has licensed one or more driving-under-the-influence programs, as defined, existing law requires a court that places a person on probation who is a first time offender whose blood alcohol concentration was 0.20% or more, by weight, or who refused to take a chemical test, and who is punished under a specified provision of law, to refer the person to participate for at least 9 months in a licensed driving-under-the-influence program.

This bill would increase the period of driver's license suspension, for a person convicted of a first DUI offense, without causing bodily injury to another, whose blood alcohol concentration was 0.20% or more, by weight, or who refused to take a chemical test, from 6 months to 10 months, if the person is placed on probation, as specified.

(2) This bill would make conforming changes.

Ch. 693 (SB 1838) Perata Health facilities: construction plans.

The existing Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983 requires design and construction standards for hospital buildings that house patients who have less than the capacity of normally healthy persons to protect themselves. Existing law also requires that those standards specify that hospitals must be reasonably capable of providing services to the public after a disaster. Existing law requires the Office of Statewide Health Planning and Development (OSHPD) to approve or reject all plans for the construction or alteration of a hospital building. Existing law specifically requires the office, contingent upon an appropriation in the annual Budget Act, to establish a program for training fire and life safety officers to facilitate the timely performance of the office's duties and responsibilities relating to the review of plans and specifications pertaining to the design and observation of construction of hospital buildings, as specified.

This bill, in addition, would authorize the office to establish other training programs as necessary to ensure that a sufficient number of qualified persons are available to facilitate the timely performance of the office's duties and responsibilities, as specified.

The bill would authorize the office to exempt from its plan review process construction or alteration projects for hospital buildings and certain other buildings with estimated construction costs of \$50,000 or less if specified criteria are met. The bill would require a presubmittal meeting between the office and the design professionals for construction or alteration projects for those buildings with estimated construction costs of \$20,000,000 or more.

This bill would require the department to submit comprehensive reports on the training program, and would, until January 1, 2012, also require the office to assess processing time for plan review and to provide an update of this assessment to the Legislature no later than February 1, 2007, and no later than February 1 of each year thereafter.

Ch. 694 (SB 1840) Committee on Energy, Utilities and Communications Public safety: State 911 Advisory Board: passenger stage corporations: charter-party carriers of passengers: certificates to provide service.

(1) Existing law establishes in state government the State 911 Advisory Board, comprised of designated members appointed by the Governor, with the duty of advising the Telecommunications Division of the Department of General Services on matters related to the California 911 emergency telephone system.

This bill would, notwithstanding any other provision of law, authorize any member of the advisory board to designate a person to act as that member in his or her place and stead for all purposes, as though the member were personally present.

(2) The California Constitution establishes the Public Utilities Commission, composed of 5 members appointed by the Governor and approved by the Senate, with jurisdiction over all public utilities, including common carriers. The Constitution authorizes the Legislature,

unlimited by the other provisions of the Constitution, to confer additional authority and jurisdiction upon the commission that is cognate and germane to the regulation of public utilities. Passenger stage corporations are subject to the jurisdiction and control of the commission under the Public Utilities Act. The act requires every passenger stage corporation to obtain a certificate of public convenience and necessity from the commission before operating over any public highway in the state and sets forth requirements relating to the issuance and transfer of these certificates. Existing law authorizes the commission to issue a certificate in a territory already served by a certificate holder only when the existing passenger stage corporation serving the territory will not provide the service to the satisfaction of the commission and requires the commission to consider the effect of the applicant's proposed operations on the services furnished by any public transit operator before issuing a certificate.

This bill would delete the provision authorizing the commission to issue a certificate in a territory already served by a certificate holder only when the existing passenger stage corporation serving the territory will not provide the service to the satisfaction of the commission and would delete the requirement that the commission, before issuing a certificate, consider the applicant's proposed operations on the services furnished by any public transit operator. The bill would require the commission to require the applicant to establish reasonable fitness and financial responsibility to initiate and conduct or continue to conduct the proposed transportation services, before a certificate is issued or transferred. The bill would require a passenger stage line to meet all state and federal regulations and would authorize the commission to delegate the authority to issue or transfer certificates and to make specified findings, to its executive director. The bill would extend certain existing requirements for the issuance of a certificate pertaining to mandatory controlled substance and alcohol testing certification programs, to a transfer of the certificate.

Under existing law, a violation of the Public Utilities Act or an order or direction of the commission is a crime.

Because the provisions of this bill relating to passenger stages would be a part of the act and because a violation of an order or decision of the commission implementing its requirements would be a crime, the bill would impose a state-mandated local program by creating a new crime.

(3) Charter-party carriers of passengers are subject to the jurisdiction and control of the commission pursuant to the Passenger Charter-Party Carriers' Act. Existing law requires each charter-party carrier of passengers to hold a permit or certificate in order to perform services, as provided. Existing law requires that the commission hold a hearing before granting a certificate if the applicant desires to operate in a territory already served by the holder of a certificate. The commission is prohibited from granting the certificate unless it is shown that the existing charter-party carrier of passengers serving the territory is not providing services that are satisfactory to the commission and adequate for the public. Existing law permits persons holding class A, B, and C driver's licenses to apply for a charter-party carrier of passengers certificate or permit.

This bill would delete the requirement that the commission hold a hearing before granting a certificate if the applicant desires to operate in a territory already served by the holder of a certificate and would delete the prohibition upon granting the certificate unless it is shown that the existing charter-party carrier of passengers serving the territory is not providing services that are satisfactory to the commission and adequate for the public. The bill would delete certain legal requirements that differentiate between class A, B, and C driver's licenses.

(4) Existing law prohibits a city, county, or city and county from imposing a fee upon charter-party carriers operating limousines, but authorizes the governing body of a city, county, or city and county to impose a business license fee on, and to adopt and enforce any reasonable rules and regulations pertaining to operations within its boundaries for, any charter-party carrier domiciled or maintaining a business office within that city, county, or city and county. Existing law authorizes the governing board of an airport to require a

charter-party carrier operating limousines to obtain an airport permit for operating authority at the airport, and to adopt and enforce reasonable and nondiscriminatory local airport rules, regulations, and ordinances pertaining to access, use of streets and roads, parking, traffic control, passenger transfers, trip fees, and occupancy, and the use of buildings and facilities, that are applicable to charter-party carriers operating limousines on airport property. Existing law defines a “limousine” for these purposes, as including any luxury sedan, of either standard or extended length, with a seating capacity of not more than 9 passengers including the driver, used in the transportation of passengers for hire on a prearranged basis within this state.

This bill would instead define a “limousine” as including any sedan or sports utility vehicle, of either standard or extended length, with a seating capacity of not more than 10 passengers including the driver, used in the transportation of passengers for hire on a prearranged basis within this state.

(5) Existing law prohibits a charter-party carrier of passengers from operating a limousine, incorporating the above described definition, unless the limousine is equipped with special license plates issued and distributed by the Department of Motor Vehicles and requires the commission to issue a permit or certificate to each charter-party carrier operating limousines for the number of vehicles verified by the carrier as employed in providing limousine service. Under existing law, a violation of the Passenger Charter-Party Carriers’ Act or an order or direction of the commission pursuant to the act is a crime.

By expanding the definition of a limousine for these purposes, the bill would impose a state-mandated local program by expanding the definition of a crime.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 695 (AB 44) Cohn Crime.

Existing law provides that any person who unlawfully and maliciously damages any wireless communication device with the intent to prevent the use of the device to summon assistance or to notify law enforcement of a crime is punishable by a fine not exceeding \$500, by imprisonment in a county jail for a period not exceeding one year, or by both that fine and imprisonment.

This bill would provide that these provisions are also violated when one obstructs the use of that equipment, and that this crime is punishable as a misdemeanor.

By expanding the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 696 (AB 103) Cohn Pupil safety: disaster preparedness.

Existing law makes each school district and county office of education responsible for the overall development of all comprehensive school safety plans for its schools operating kindergarten or any of grades 1 to 12, inclusive. Existing law requires a school safety plan to include disaster procedures, including, among others, an earthquake emergency procedure system and a school building disaster plan.

This bill would require the State Department of Education to electronically distribute disaster preparedness educational materials and lesson plans that are currently available to local school districts and county offices of education. This bill would require the State Department of Education to ensure that the materials are available in at least the 3 most dominant primary languages spoken by English learners in California.

This bill would further require the department to coordinate with the Office of Emergency Services to make sure that all materials are reviewed and updated annually.

Ch. 697 (AB 158) Bermudez Railroads: safety study.

Existing law establishes the safety division of the Public Utilities Commission. The safety division is responsible for inspection, surveillance, and investigation of the rights-of-way, facilities, equipment, and operations of railroads and public mass transit guideways, and for enforcing state and federal laws, regulations, orders, and directives relating to transportation of persons or commodities, or both, of any nature or description, by rail. Existing law requires every railroad corporation that transports hazardous materials, as defined, in the state to provide a system map of the state to the Office of Emergency Services and to the commission showing certain information, to annually submit a copy of its emergency handling guidelines to the office, and to provide specified information in the event of an incident where there is a release or threatened release of a hazardous material. Under existing law, the commission is required to annually report to the Legislature regarding sites on railroad lines in the state that it finds to be hazardous, including a list of all commodities transported on railroad lines that could pose a hazard to the public or the environment in the event of a train derailment or other accident, a description of the quantities of these commodities, and the locations and routes over which these materials are transported, and a list of all railroad derailment accident sites in the state on which accidents have occurred within at least the previous 5 years.

This bill would create the Special Railroad Safety Task Force, comprised of specified members. The bill would require the task force to meet monthly from January 2007 to December 2007, inclusive, and to study certain railroad safety issues, and make recommendations for improving railroad safety measures. The bill would require the task force, no later than 90 days after its last meeting, to submit a written report to the commission setting forth its findings and recommendations relating to railroad safety issues. The bill would require the commission to include the findings and recommendations of the task force in its July 1, 2008, report to the Legislature on sites on railroad lines that are found to be hazardous. These provisions would become inoperative on July 1, 2008, and would be repealed on January 1, 2009, unless a later enacted statute deletes or extends that date.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 698 (AB 225) Negrete McLeod Electronic prescription information.

Existing law relative to insurance fraud makes it a crime for healing arts practitioners to receive money or other consideration for, or to engage in various related activities with respect to, the referral of patients, clients, or customers to any person, with certain exceptions.

This bill would, upon the effective date of specified regulations adopted by the Secretary of the United States Department of Health and Human Services pursuant to the Medicare Prescription Drug, Improvement and Modernization Act of 2003, exempt from these provisions specified entities that receive nonmonetary remuneration necessary and used solely to receive and transmit electronic prescription information, under certain conditions. The bill would require the California Health and Human Services Agency to, if necessary, adopt emergency regulations to ensure that implementation of this exemption is consistent with the regulations adopted by the United States Department of Health and Human Services.

This bill would incorporate additional changes to Section 650 of the Business and Professions Code, proposed by AB 2282, to be operative only if AB 2282 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

Ch. 699 (AB 289) Chan Chemicals: testing methods.

Existing law required the California Environmental Protection Agency to initiate a scientific peer review of screening levels for certain contaminants and to complete the process by December 31, 2004. The agency was required to publish, by March 1, 2004, a list of screening numbers determined for specified contaminants, and to conduct public workshops in establishing and revising those levels.

This bill would authorize a state agency, as defined, to request a manufacturer, as defined, of a chemical, as defined, to provide the state agency with specified information regarding the chemical. The bill would provide that the information that a state agency may request, includes, but is not limited to, an analytical test method for that chemical in a specified matrix, the octanol-water partition coefficient and bioconcentration factor for humans for the chemical, and other information relevant to the fate and transport of the chemical into the environment. The bill would require the manufacturer to provide the requested information within one year, and would specify actions that a state agency is required to take before making the request. The bill would provide a procedure for when a manufacturer believes that information provided pursuant to a state agency request involves the release of a trade secret.

Ch. 700 (AB 2987) Nunez Cable and video service.

(1) Existing law provides that any city, county, or city and county may authorize by franchise or license the construction and operation of a community antenna television system and prescribe rules and regulations to protect the subscribers. Existing law requires that cable and video service providers comply with specified customer service standards and performance standards.

This bill would enact the Digital Infrastructure and Video Competition Act of 2006 and would establish a procedure for the issuance of state franchises for the provision of video service, which would be defined to include cable service and open-video systems, that would be administered by the Public Utilities Commission. The commission would be the sole franchising authority for state franchises to provide video services. The bill would require any person or corporation that seeks to provide video service in this state to file an application with the commission for a state franchise with specified information, signed under penalty of perjury. By creating a new crime, the bill would impose a state-mandated local program.

The bill would provide that cities, counties, cities and counties, or joint powers authorities would receive state franchise fees in exchange for the use of public rights-of-way for the delivery of video services provided within their jurisdictions, based on gross revenues, pursuant to a specified formula. The bill would prescribe the extent of the obligation of state franchise holders to provide public, educational, and governmental access (PEG) channels. The bill would also authorize local entities to establish a fee to support the costs of PEG channel facilities, in the amount of 1% of gross revenues, or more in specified circumstances.

The bill would also require these local entities to permit the installation of networks by holders of state franchises. The bill would also prohibit a holder of a state franchise from discriminating against or denying access to service to any group of potential residential subscribers because of their income and would provide that this provision is satisfied if certain conditions are met by holders or their affiliates with 1,000,000 or more telephone customers or if alternative conditions are met by a holder or its affiliates with 1,000,000 or fewer telephone customers in California.

The bill would require the holder of a state franchise to notify a local entity that it will provide video service in the entity's jurisdiction at least 10 days before offering service. The bill would also require the local franchising entity to enforce customer service and protection standards and to enact an ordinance or resolution providing a schedule of penalties for any material breach of those standards by a holder of a state franchise, thereby imposing a state-mandated local program.

The bill would also require that any state franchise holder employing more than 750 employees in California make an annual report of specified information to the commission.

The bill would also require that all state franchise holders make an annual report to the commission regarding availability of and subscription to broadband and video service.

The bill would provide that a state franchise is valid for 10 years and would require a provider to apply to the commission for renewal of the franchise for any additional 10-year period.

The bill would authorize the commission's Division of Ratepayer Advocates to advocate on behalf of video service customers in connection with state franchise renewal and enforcement of service standards.

The bill would prohibit the commission from permitting a telephone corporation that is providing video service pursuant to a state franchise to authorize an increase in rates for residential basic service until January 1, 2009, unless that corporation is regulated under rate of return regulation, subject to specified exceptions.

(2) Existing property tax law specifies the manner in which local tax assessors determine the value of cable television possessory interests that are created in a cable television franchise or license that is granted by a local government.

This bill would specify that this valuation method also applies to possessory interests created in a cable franchise or license or a franchise to provide video services that is granted by the state under the bill.

(3) Existing law provides for the Public Utilities Commission Utilities Reimbursement Account. Existing law authorizes the commission to annually determine a fee to be paid by every public utility providing service directly to customers or subscribers and subject to the jurisdiction of the commission, except for a railroad corporation. Existing law requires the commission to establish the fee, with the approval of the Department of Finance, to produce a total amount equal to that amount established in the authorized commission budget for the same year, and an appropriate reserve to regulate public utilities, less specified sources of funding.

This bill would establish a Video Franchising Account in the commission's Utilities Reimbursement Account, require the commission to annually determine a fee to be paid by an applicant or holder of a state franchise, and authorize the commission to take various actions to collect the fees.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

#### Ch. 701 (AB 525) Chu Child abuse reporting.

Existing law defines the term "child abuse or neglect" for purposes of mandatory reporting of suspected instances of child abuse or neglect. Existing law specifies certain agencies to which mandated reports of suspected child abuse or neglect shall be made. Existing law requires those agencies to forward those reports that are determined not to be unfounded to the Department of Justice. Existing law also authorizes, but does not require, the reporting of instances where a child suffers or is at substantial risk of suffering serious emotional damage, as specified.

This bill would generally conform the procedures for authorized reporting of instances of child abuse or neglect involving emotional damage, as specified, to certain existing procedures applicable to mandated child abuse reporting.

By increasing the reporting burden on local law enforcement agencies, this bill would impose a state-mandated local program.

Existing law requires a representative of a child protective services agency performing an investigation resulting from a required report of suspected child abuse or neglect to inform the individual who is the subject of the investigation, at the 1st contact, of the complaints or allegations against that person, as specified.

This bill would apply that requirement in the context of reports of child abuse or neglect involving serious emotional damage that are authorized to be reported.

By increasing the duties of local government entities in connection with investigating certain instances of suspected child abuse, this bill would impose a state-mandated local program.

Existing law requires the investigating agency investigating suspected child abuse or neglect, upon completion of the investigation or after there has been a final disposition of the matter, to inform the mandated reporter of the results of the investigation and of any action the agency is taking with regard to the child or family.

This bill would apply that requirement to the context of reports of child abuse or neglect involving serious emotional damage that are authorized to be reported.

This bill would also correct an obsolete cross-reference.

By increasing the duties of local government entities in connection with investigating certain instances of suspected child abuse, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 702 (AB 569) Garcia Pupil nutrition: school meals: school breakfast study.

(1) Existing law requires each school district or county superintendent of schools maintaining any kindergarten or any of grades 1 to 12, inclusive, to provide one nutritionally adequate free or reduced-price meal for each needy pupil during each schoolday, except as specified. Existing law permits a school district or county office of education to use funds made available through any applicable federal or state program or to use its own funds to provide the required meals.

Existing law requires the State Department of Education to award grants, as specified, to school districts and county offices of education for the initiation and expansion of school breakfast programs and summer food service programs. Existing federal law provides additional funding, the lesser of specified meal reimbursement rates or 100% of the operating costs of a breakfast program, for school districts that meet certain qualifications deemed to indicate severe need and that are operating or desire to initiate a school breakfast program.

This bill would require the department to conduct a study on or before March 31, 2007, on certain matters relating to the feasibility of requiring schools that meet the qualifications for the federal severe need reimbursement to offer breakfast. The bill would require the department to report the results of the study to the Legislature on or before April 30, 2007.

(2) This bill would appropriate \$170,000 from the General Fund to the department for purposes of performing the specified study regarding the offering of school breakfast.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 703 (AB 586) Negrete McLeod Medical disaster mobilization.

Pursuant to the Emergency Medical Services System and Prehospital Emergency Medical Care Personnel Act, the Emergency Medical Services Authority is established within the California Health and Human Services Agency to administer the emergency medical services system to coordinate and integrate effective and efficient emergency medical services throughout the 58 counties of the state.

The EMS Act, in part, requires that the authority develop planning and implementation guidelines for emergency medical services systems, receive implementation plans from local EMS agencies, assess each EMS area, and provide technical assistance to local agencies for the purpose of developing the components of the EMS systems.

The EMS Act provides for coordination of services with other state agencies, establishes the Interdepartmental Committee on Emergency Medical Services to advise the authority, provides personnel standards, and provides for local administration of county EMS programs.

Existing law requires the authority, in consultation with the Office of Emergency Services, to respond to any medical disaster by mobilizing and coordinating emergency medical services mutual aid resources to mitigate health problems.

Existing law, the California Emergency Services Act, subdivides the state emergency services organizations into mutual aid regions, as defined, for the purpose of facilitating the coordination of mutual aid and other emergency operations. The law defines an operational area for this purpose as an intermediate level of state emergency services organization, consisting of a county and all political subdivisions within a county.

This bill would authorize the county health officer and the local EMS agency administrator to jointly act as the medical health operational area coordinator. It would, if an operational area has a medical health operational area coordinator, designate the medical health operational area coordinator, in cooperation with various agencies, as the entity responsible for ensuring the development of a medical and health disaster plan, and would set forth the contents of the plan. The bill would authorize appointment of another person to perform that role, if the county health officer and the local EMS agency are unable to do so.

#### Ch. 704 (AB 607) Goldberg School Facilities Emergency Repair Account.

(1) Existing law requires a county superintendent of schools, among other things, to visit and examine each school in the county to observe its operation and learn of its problems. Existing law requires the county superintendent to annually present a report to the governing board of each school district under his or her jurisdiction, and to the board of supervisors of the county, describing the state of the schools in the county that are ranked in deciles 1 to 3, inclusive, of the 2003 base Academic Performance Index (API).

This bill would require the annual report to be submitted in November at a regularly scheduled meeting of the governing board. The bill would require the report to include certain determinations for each school and teacher misassignments and teacher vacancies and would require the county superintendent, or his or her designee, to use a standardized template to report those details, unless those details are already being reported by the county superintendent, or his or her designee.

The bill would require commencing with the 2006–07 fiscal year, certain funds appropriated pursuant to the Budget Act of 2006 to county offices of education for site visits to be allocated to elementary, middle or junior, and high schools, as specified. The bill would provide an additional allocation, as specified, to county offices of education that are responsible for visiting more than 150 schoolsites. The bill would set \$10,000 as the minimum amount for allocation to county offices of education.

The bill would require the State Department of Education to review the actual costs of 2005–06 fiscal year site visits conducted and if the department determines that a county office of education did not expend the funds allocated, the amount that exceeds the amount spent shall revert to a certain fund and would be available to cover certain extraordinary costs incurred by county offices of education. The bill would require the department to allocate the funds to county offices of education by June 30, 2007.

(2) Existing law, the Leroy F. Greene School Facilities Act of 1998, requires the State Allocation Board to allocate to applicant school districts, prescribed per-unhoused-pupil state funding for construction and modernization of school facilities, including hardship funding, and supplemental funding for site development and acquisition. Existing law

requires a school district that receives funding pursuant to the act to submit to the board a summary report of expenditure of state funds and district matching funds annually until all state funds and district matching funds are expended and then to submit a final report, and authorizes the board to require an audit of these reports or other district records to ensure all funds received under the act are expended in accordance with program requirements. Existing law provides that, if the board, after the review of expenditures or the audit, determines that a school district failed to expend funds in accordance with the act, the Department of General Services is required to notify the school district of the amount that must be repaid within 60 days and to notify the Controller and the school district if the district fails to make that payment, and requires the Controller to deduct that amount from the district's next principal apportionment of state funds, as specified.

This bill would require the board to approve a plan of equal annual payments, with interest, as specified, over a period of up to 5 years if the board determines that repayment of the full liability within 60 days after the board's action would constitute a severe financial hardship, as defined by the board, for the school district. The bill would require the Controller to withhold certain amounts pursuant to the plan.

(3) Existing law establishes the School Facilities Emergency Repair Account in the State Treasury, to be administered by the State Allocation Board, for the purpose of reimbursing school districts with schools ranked in deciles 1 to 3, inclusive, on the API, as specified, for emergency facility repairs, as provided.

This bill would provide that, commencing with the 2006–07 fiscal year, the money in the account is also available to fund grants for certain, listed necessary repairs that meet certain conditions. The bill would require the board to establish a process for schools to apply for the grants and provide certification of the completion of the projects. The bill would require the board to post the grant application form on its Internet Web site.

(4) Existing law requires a school district to use its uniform complaint process to help identify and resolve any deficiencies related to instructional materials, conditions of facilities that are not maintained in a clean and safe manner or in good repair, and teacher vacancy or misassignment. Existing law requires a notice to be posted in each classroom in each school in the school district notifying parents and guardians that there should be sufficient textbooks or instructional materials, school facilities must be clean, safe, and in good repair, and there should be no teacher vacancies or misassignments, as defined. Existing law also requires the notice to inform parents of the location to obtain a form to file a complaint in case of a shortage. Existing law authorizes a complaint to be filed anonymously. If a complainant identified himself or herself, the complainant is entitled to a response if he or she indicates that a response is requested.

This bill would require, if certain conditions are met, the report and response, if requested, to be written in English and the primary language in which the complaint was filed, thereby establishing a state-mandated local program.

(5) This bill would make other technical, nonsubstantive changes to existing law.

(6) This bill would make an appropriation by requiring the remaining unencumbered balance of certain funds appropriated to county offices of education for certain reviews and monitoring of schools and to conduct and report on site visits, as specified, to remain available for expenditure through June 30, 2008, for purposes of certain site visit reports on the state of certain schools.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 705 (AB 618) Cogdill Crime.

Existing law provides that when any police or sheriff's department, or district attorney in this state certifies to a bank, credit union, or savings association in this state, or doing business in this state, that a crime report has been filed that involves the alleged fraudulent use of drafts, checks, or other orders, and so requests, the institution must furnish specified information, with the consent of the accountholder in the case of an institution doing business in the state, including account statements and a copy of the signature card.

This bill would provide that a law enforcement agency may also request, and a bank, credit union, or savings association must then provide, surveillance photographs and video recordings of a person accessing the crime victim's financial account via an ATM or from within the financial institution, as specified.

**Ch. 706 (AB 680) Chan English language learners.**

Existing law provides that, when 15% or more of the pupils enrolled in a public school speak a single primary language other than English, all notices, reports, statements, or records sent to the parent or guardian of any such pupil by the school or school district shall, in addition to English, be written in the primary language, and may be responded to either in English or the primary language.

This bill would require the State Department of Education to monitor adherence to that requirement as part of its regular monitoring and review of public schools and school districts, to make certain related determinations, and to notify school districts of certain related information by August 1 of each year. The bill would require the department to make that notification using electronic methods. The bill would require the department to use existing resources to comply with those provisions.

**Ch. 707 (AB 839) Torrico Gambling Control Act: nonprofit organization fundraisers.**

The Gambling Control Act provides for the licensure and regulation of various legalized gambling activities and establishments by the California Gambling Control Commission and the enforcement of those activities by the Division of Gambling Control within the Department of Justice. The act also requires all fees and revenues collected under the act to be deposited in the Gambling Control Fund, which funds are available, upon legislative appropriation, for the division and commission in carrying out their duties under the act.

This bill would revise that act to permit a nonprofit organization to conduct fundraisers using controlled games as a funding mechanism to further the purposes and mission of the nonprofit organization. The bill would prohibit a nonprofit organization holding a fundraiser from conducting more than one fundraiser per calendar year, except as specified, and would require that each fundraiser be limited to no more than 5 consecutive hours. The bill would also prohibit cash prizes or wagers from being awarded to participants, but would allow winners of controlled games to receive prizes from those donated, subject to certain cash value limitations. The bill would also require at least 90% of revenue from fundraisers to go directly to the nonprofit organization and would prohibit more than 10% of the gross receipts of a fundraiser from being paid as compensation to the entity or persons conducting the fundraiser for the nonprofit organization, excluding facility rental fees, as specified. The bill would define "nonprofit organization" to include various organizations qualified to conduct business in California for at least 3 years prior to conducting a controlled game that are exempt from taxation pursuant to specified provisions of the Revenue and Taxation Code.

This bill would further prohibit an eligible nonprofit organization from conducting a fundraiser using controlled games unless it has been in existence and operation for at least 3 years and registers annually with the Division of Gambling Control. The bill would require the division to furnish registration forms to nonprofit organizations, as specified, collect certain information from nonprofit organizations conducting fundraisers, and adopt regulations in accordance with those provisions. The bill would additionally permit the division to charge eligible organizations an annual registration fee to cover the costs of

administration and enforcement and would specify that those fees be deposited into the Gambling Control Fund.

The bill would also authorize the division to require specified suppliers of equipment used in the playing of controlled games by a nonprofit organization, to register with the division.

Ch. 708 (AB 874) Wolk Avian influenza wildlife surveillance.

Existing law creates the Fish and Game Commission in the Resources Agency, and provides for the regulation by the Department of Fish and Game of the taking of various bird species, including prohibiting the taking of certain nongame birds. Existing law also provides for the preservation of certain bird species.

This bill would enact the Avian Influenza Wildlife Surveillance Act to require the Resources Agency, in consultation with the department, the Department of Food and Agriculture, the State Department of Health Services, the Office of Emergency Services, and the University of California, to develop and implement a plan for the surveillance, monitoring, sampling, diagnostic testing, and reporting of avian influenza in wild birds and animals in the state. The bill would require the Secretary of the Resources Agency to establish the Avian Influenza Working Group, composed of specified members and chaired by the Director of Fish and Game, to assist in the development of the plan. The bill would require the director, on or before October 1, 2006, to submit a status report, and on or before July 1, 2007, to compile and submit an updated report, on the development and implementation of an avian influenza detection and response plan for wild birds. The bill would require these reports to be submitted to the Legislature, the Chair of the Assembly Committee on Water, Parks and Wildlife, and the Chair of the Senate Committee on Natural Resources and Water.

The bill would make an appropriation by requiring that up to \$1,088,000 be available, from specified funds appropriated from the General Fund to the department by the Budget Act of 2006, to implement the provisions of the bill and to carry out other authorized activities relating to the implementation of plans to detect and respond to avian influenza in the state's wild birds.

The bill would make legislative findings and declarations relating to avian influenza. The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 709 (AB 971) Jerome Horton Corrections: superintendents.

Existing law requires the Inspector General to review all candidates for warden and to advise the Governor as to their qualifications for the position.

This bill would require the Inspector General to also review all candidates for appointment as superintendent of a juvenile correctional facility.

Ch. 710 (AB 984) Laird Tamarisk plant control.

Existing law grants to the Department of Water Resources various duties relating to the supervision of the state's water resources.

This bill would authorize the department, in collaboration with other entities, to cooperate with the federal government, other Colorado River Basin states, and other entities for the purpose of preparing a plan to control or eradicate tamarisk plants in the Colorado River watershed. The bill would require the department, the Department of Food and Agriculture, the Department of Fish and Game, and the Colorado River Board of California to seek to collaborate with affected California water agencies and other appropriate entities in that preparation.

The bill would require the department, in collaboration with other entities, to implement the plan within California upon the appropriation of funds for that purpose. The bill would require the department, the Department of Food and Agriculture, the Department of Fish and Game, and the Colorado River Board of California to seek to collaborate with affected California water agencies and other appropriate entities in that implementation.

Ch. 711 (AB 1189) Bermudez Vehicles: motorcycles: motorcyclist safety training programs.

Existing law authorizes the Commissioner of the California Highway Patrol, through contracts with other public agencies or with private entities, to provide financial or other support to projects aimed at enhancing motorcycle operation or safety, including rider training programs.

This bill, additionally, would authorize the commissioner to provide financial or other support to projects aimed at enhancing both motorcycle operation and safety. The bill would authorize the commissioner, through contracts with other public agencies or with private entities, to adopt specified standards for a premier motorcyclist safety training program, and, on and after January 1, 2008, would prohibit the commissioner from imposing a maximum amount for course fees for courses provided under one of those programs. The bill would require motorcycle training safety courses offered under one of those programs to meet specified requirements, and would require all administrative costs of those programs to be paid for by the provider, and not by the state.

Ch. 712 (AB 1282) Mullin Income taxes: credits: child care.

The existing Personal Income Tax and Corporation Tax Law provide tax credits for startup expenses for child care programs or constructing a child care facility, costs for child care information and referral services, and costs paid or incurred for contributions to a qualified care plan. Under existing law these credits are only available for certain taxable years beginning before January 1, 2007.

This bill would extend the credits to taxable years beginning before January 1, 2012. This bill would also require the Franchise Tax Board to report to the Legislature on the effectiveness of these credits, as specified.

This bill would take effect immediately as a tax levy.

Ch. 713 (AB 1302) Jerome Horton Office of Administrative Law: regulations.

Existing law provides that, if a state agency makes a finding that the adoption of a regulation or order of repeal is necessary for the immediate preservation of the public peace, health and safety or general welfare, the regulation or order of repeal may be adopted as an emergency regulation or order of repeal. Under existing law, a regulation, amendment, or order of repeal adopted as an emergency regulation remains in effect no more than 120 days unless the adopting agency and the Office of Administrative Law comply with certain requirements.

This bill would require an agency that is adopting an emergency regulation to send, at least 5 working days prior to submission of an emergency regulation to the office, a notice of proposed emergency action to every person who has filed a request for notice of regulatory action with the agency unless the emergency situation clearly poses such an immediate, serious harm that delaying action to allow public comment would be inconsistent with the public interest. The bill would extend to 180 days the maximum period of time a regulation, amendment, or order of repeal initially adopted as an emergency regulation would remain in effect. The bill would authorize the office to approve not more than 2 readoptions of an emergency regulation, each for a period not to exceed 90 days, as specified. The bill would require the office, after posting a notice of the filing of a proposed regulation on its Internet Web site, to allow interested persons 5 calendar days to submit comments on the proposed emergency regulations unless delaying action to allow public comment would be inconsistent with the public interest. It would make these changes applicable to emergency regulations first submitted to the office on or after January 1, 2007.

Existing law authorizes the Secretary of Corrections and Rehabilitation to prescribe rules and adopt regulations for the administration of the prisons and administration of paroles. Existing law provides that, in general, these regulations shall be adopted pursuant to the

Administrative Procedure Act, but exempts emergency adoption, amendment, or repeal of a regulation by the secretary from certain requirements of that act.

This bill would exempt the emergency adoption, amendment, or repeal of a regulation by the secretary from certain notice requirements, as specified.

Ch. 714 (AB 1341) Committee on Environmental Safety and Toxic Materials Financing authorities: grants and loans.

(1) The California Educational Facilities Authority Act, the Health Facilities Financing Authority Act, and the California Pollution Control Financing Authority Act each establish an authority to finance facilities as specified in the act. Each of those acts are deemed to provide a complete, additional, and alternative method for doing the things authorized in the respective act, and those acts are required to be regarded as supplemental and additional to powers conferred by other laws. Under those acts, except as otherwise provided, the issuance of bonds and refunding bonds are exempt from other laws applicable to the issuance of bonds, including, but not limited to, the California Environmental Quality Act (CEQA), but a project that is financed in accordance with the act is not exempt from any law that is otherwise applicable to the project.

This bill would amend those acts to require a project applicant to provide documentation, before the authority approves the issuance of bonds for the project, that the project has complied with CEQA, or is not a project under CEQA.

The California Pollution Control Financing Authority Act, until January 1, 2007, authorizes the California Pollution Control Financing Authority to provide grants and loans, not to exceed \$5,000,000, to cities and counties deemed eligible by the authority, to assist in the development of various programs and policies to, among other things, reduce pollution hazards and the degradation of the environment, or promote infill development to revitalize communities. The authority is required, until that date, to annually report to the Legislature regarding the grant and loan program.

This bill would extend the operation of these provisions until January 1, 2012, and would increase the amount of the grants and loans under the program to \$7,500,000. It would also repeal an obsolete provision of law.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 715 (AB 1387) Jones CEQA: residential infill projects.

The California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on a project, as defined, that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect.

CEQA prohibits a public agency from approving or carrying out a project for which an environmental impact report has been certified that identifies one or more significant effects on the environment that would occur if the project is approved or carried out unless the public agency makes specified findings with respect to each significant effect, including, among other things, that (1) the changes or alterations have been required in, or incorporated into, the project that mitigate or avoid the significant effect on the environment or (2) those changes or alterations are within the responsibility and jurisdiction of another public agency and have been, or can and should be, adopted by that other agency.

The bill would provide that, except as specified, if a residential project, not exceeding 100 units, with a minimum residential density of 20 units per acre, and within one-half mile of the transit stop, on an infill site in an urbanized area is in compliance with the traffic, circulation, and transportation policies of the general plan, applicable community plan, applicable specific plan, and applicable ordinances of the city or county, and the city or county with jurisdiction over the area where the project is located requires that the mitigation measures approved in a previously certified project area environmental impact report, as the bill would define that term, applicable to the project be incorporated into the project, the city

or county is not required to comply with specified requirements with respect to the making of any findings regarding the significant environmental effects from impacts of the project on traffic at intersections, or on streets, highways, or freeways.

Ch. 716 (AB 1418) Jerome Horton Tax: public disclosure of tax delinquencies.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. The sales taxes due under these provisions are generally the obligation of the seller of the personal property. The seller must file a return with the State Board of Equalization and pay all taxes due.

This bill would require the board to make publicly available each quarter a list of the 250 largest tax delinquencies in excess of \$100,000. The quarterly list would contain specified identifying information about the delinquencies. This bill would require the board, prior to placing a person's name on the list, to provide written notice that the person's name will appear on the list if the delinquency is not satisfied. The board would be required to remove certain delinquencies that meet specified criteria within 5 business days, including, among others, those where payment arrangements have been made or a bankruptcy proceeding has been initiated. This bill would also provide that, if a delinquency has been removed pursuant to a resolution of the delinquency, but the terms of the resolution are not complied with, the board shall list the tax delinquency without providing prior written notice.

The Personal Income Tax Law and the Corporation Tax Law authorize the Franchise Tax Board to administer and collect taxes imposed by those laws and require that those taxes be paid at the time and place, as provided.

This bill would require the Franchise Tax Board to make publicly available each calendar year a list of the 250 largest tax delinquencies in excess of \$100,000, as specified. The annual list would contain specified identifying information about the delinquencies. This bill would require the Franchise Tax Board, prior to placing a person's name on the list, to provide written notice that the person's name will appear on the list if the delinquency is not satisfied. The Franchise Tax Board would be required to remove certain delinquencies that meet specified criteria within 5 business days, including, among others, those where payment arrangements have been made or a bankruptcy proceeding has been initiated.

Ch. 717 (AB 1548) Pavley Instructional materials: electronic format.

Existing law requires the State Board of Education to adopt basic instructional materials for use in kindergarten and grades 1 to 8, inclusive, as specified. Other existing law requires the governing board of each school district maintaining one or more high schools to adopt instructional materials for use in the high schools under its control. Existing law establishes the State Instructional Materials Fund and continuously appropriates the moneys in the fund to the State Department of Education. Existing law authorizes a school district to use allowances received from the fund to purchase instructional materials adopted by the state board, to purchase instructional materials from any source, to purchase tests, to bind basic textbooks, to fund in-service training related to instructional materials, and to purchase classroom library materials for kindergarten and grades 1 to 4, inclusive.

This bill would, as a pilot program and until January 1, 2016, require the department to authorize 12 schools to request a publisher that makes basic instructional materials available to a school district in a hard copy format to make instructional materials available in an electronic multimedia format upon adoption of instructional materials after January 1, 2000, by the state board or by the governing board of a selected school district that maintains a high school. The bill would grant authority to the state board to authorize a participating school to use alternate instructional materials in an electronic multimedia format, as described, if a publisher is unable to provide adopted instructional materials in an electronic multimedia format, as specified. The bill would require the department, before authorizing a school to participate in the pilot program, to certify that the school district that is applying on behalf

of the school has no unmet needs for instructional materials. The bill would provide for other requirements relating to the pilot program. By expanding the purposes for which moneys from the State Instructional Materials Fund may be used, the bill would make an appropriation.

The bill would require the department, by December 31, 2011, to evaluate the effectiveness of the pilot program and report on the results of the evaluation to the appropriate committees of the Legislature and to the Governor.

Ch. 718 (AB 1550) Arambula Economic incentive areas.

Existing law provides for the designation and oversight by the Department of Housing and Community Development of various economic development areas in the state, including enterprise zones, up to 2 Manufacturing Enhancement Areas, a targeted tax area, and local agency military base recovery areas, or LAMBRAs, pursuant to which qualifying entities in those areas may receive various tax and regulatory incentives.

This bill would make various revisions in the requirements for designating and administering enterprise zones generally. It would provide for the administration and oversight of geographically targeted economic development areas, known as G-TEDAs, which would include enterprise zones, Manufacturing Enhancement Areas, the targeted tax area, and LAMBRAs, by the department, subject to specified criteria. It would also apply various requirements applicable to those entities to the G-TEDAs.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 719 (AB 1591) Chan Medi-Cal: nurse practitioners.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. Existing law provides that services provided by a certified nurse practitioner are covered under the Medi-Cal program to the extent mandated by federal law, and requires the department to permit a certified family nurse practitioner or a certified pediatric nurse practitioner to bill Medi-Cal independently for his or her services.

This bill would provide, instead, that these services are covered to the extent authorized by federal law, and would require that the department permit any certified nurse practitioner to bill for these services.

Ch. 720 (AB 2877) Frommer Prescription drugs: importation: procurement.

(1) Existing law authorizes the Department of General Services to enter into exclusive or nonexclusive contracts on a bid or negotiated basis with manufacturers and suppliers of single source or multisource drugs. Existing law requires specified state agencies to participate in the prescription drug bulk purchasing program. Existing law requires the department to submit a report to the appropriate policy and fiscal committees of the Legislature on activities that have been, or will be, undertaken pursuant to these provisions.

This bill would, among other things, require the department to develop strategies for the state to achieve savings through greater use of generic drugs and would revise the reporting requirements.

(2) Existing law, the Sherman Food, Drug, and Cosmetic Law, provides for the regulation of the packaging, labeling, and advertising of food, drugs, devices, and cosmetics, under the administration of the State Department of Health Services.

Existing law, the Pharmacy Law, provides that any pharmacy located outside of this state that delivers, in any manner, controlled substances, dangerous drugs, or dangerous devices into this state is considered a nonresident pharmacy and requires a nonresident pharmacy to register with the California State Board of Pharmacy and comply with all lawful directions of, and requests for information from, the state in which it is a resident.

Existing federal law requires any establishment within any foreign country engaged in the manufacture, preparation, propagation, compounding, or processing of a drug that is imported or offered for import into the United States to register with the federal Secretary of Health and Human Services, report a list of each drug introduced for commercial distribution, and provide required information and statements.

This bill would establish the California Rx Prescription Drug Web Site Program. The bill would require the State Department of Health Services to administer the program. It would also require the department to establish a Web site on or before July 1, 2008, to provide information to California residents about options for obtaining prescription drugs at affordable prices. The bill would, except as specified, require that the Web site, at a minimum, provide information about, and establish electronic links to, certain federal, state, and pharmaceutical manufacturer programs, and other Web sites.

This bill would authorize the department to assess a fee on international pharmacies that the department reviews for possible inclusion on the Web site to offset the cost of reviewing those pharmacies. The bill would require the department's Web site to include price comparisons of prescription drugs, including prices charged by licensed pharmacies in the state. The bill would provide that the implementation of the program shall be contingent upon an appropriation, if the department determines that the requirements of the program cannot be implemented without additional funding, in which case the bill would require the department to request an appropriation from the Legislature for that purpose.

#### Ch. 721 (AB 1620) Klehs Gambling license fees.

Existing law establishes the Gambling Control Fund within the State Treasury for the receipt and deposit of fees and revenue collected pursuant to the Gambling Control Act. Under the act, specified licensing fees are required to be paid for the issuance or renewal of a state gambling license, as specified. Under existing law, the fee for initial issuance of a state gambling license is determined by the Division of Gambling Control and the fee for the renewal of a state gambling license is determined pursuant to specified schedules.

This bill would revise those provisions to instead specify that the fee for initial issuance of a state gambling license shall be determined by the California Gambling Control Commission in accordance with regulations adopted pursuant to that act, and that the fee for renewal of a state gambling license shall be determined based on the amounts set forth in 2 payment schedules, as specified. The bill would also require the holder of a provisional license to pay an annual fee according to a specified schedule.

This bill would also provide that it is the Legislature's intent that the fees paid pursuant to that provision are sufficient to enable the Division of Gambling Control and the California Gambling Control Commission to fully carry out their duties and responsibilities pursuant to that law.

#### Ch. 722 (AB 1632) Blakeslee Energy: planning and forecasting.

The Warren-Alquist State Energy Resources Conservation and Development Act requires the State Energy Resources Conservation and Development Commission to prepare an integrated energy policy report every 2 years. The act requires the commission, in its report, to consider electricity and natural gas forecasting and assessment activities, as specified, in reporting on electricity and natural gas markets.

This bill would require the commission, as part of its electricity and natural gas forecasting and assessment activities, to compile and assess existing scientific studies, as specified, to determine the potential vulnerability, to a major disruption due to aging or a major seismic event, of large baseload generation facilities of 1,700 megawatts or greater, including a specified analysis of the impact of a major disruption on system reliability, public safety, and the economy. The bill would also require the commission, in absence of a long-term nuclear waste storage facility, to assess the potential state and local costs and impacts associated with accumulating waste at California's nuclear powerplants, and to further assess other key

policy and planning issues affecting the future role of nuclear powerplants in the state. The bill would require the commission to adopt the assessment by November 1, 2008, and include the assessment in the 2008 energy policy review.

Ch. 723 (AB 1634) McCarthy Special statewide election expenses.

The Budget Act of 2005 appropriated specified amounts from the General Fund for support of election-related costs.

This bill would appropriate \$38,818,310 from the General Fund to the Controller to reimburse counties for the state's share of special election costs.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 724 (AB 1643) Jones Public employees: long-term care.

The Public Employees' Long-Term Care Act authorizes the Board of Administration of the Public Employees' Retirement System to contract with carriers offering long-term care insurance plans. Active and retired members and annuitants of specified counties and public agencies, and certain relatives of those individuals, are authorized to enroll in those long-term care insurance plans if they meet eligibility and underwriting criteria.

This bill would require the California Institute on Human Services at Sonoma State University, with assistance from the Board of Administration of the Public Employees' Retirement System, to contract with an organization experienced in disability policy and demographic research to conduct a study concerning long-term care, as specified, and submit a report on the study to the Legislature by December 31, 2008.

Ch. 725 (AB 1752) Levine Environmental quality.

The existing Porter-Cologne Water Quality Control Act (the act) imposes civil penalties for certain violations of the act relating to waste discharge requirements. The act authorizes the State Water Resources Control Board or a California regional water quality control board, in lieu of assessing specified mandatory minimum penalties against a publicly owned treatment works (POTW) serving a small community, as defined, to elect to require a POTW to spend an equivalent amount towards the completion of a compliance project if the state board or a regional board makes a specified determination.

SB 1733 of the 2005–06 Regular Session would revise requirements relating to the determination that the state board or a regional board is required to make before electing to require a POTW serving a small community to spend funds toward the completion of a compliance project, in lieu of imposing mandatory minimum penalties.

This bill, if SB 1733 is enacted and becomes operative, would provide that those changes made by SB 1733 shall become operative on July 1, 2007, and would require the POTW, prior to the state board or regional board making its determination, to demonstrate to the satisfaction of the state board or the regional board that a specified financing plan is designed to generate sufficient funding to complete the compliance project within a specified time period.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 726 (AB 1774) Committee on Human Services Child welfare services: criminal record checks.

(1) Existing law requires the establishment and support of a public system of statewide child welfare services. Under existing law, a child welfare agency is authorized to secure from an appropriate governmental agency state summary criminal history information through the California Law Enforcement Telecommunications System (CLETS), for 4 designated purposes, including to assess the appropriateness and safety of placing a child in the approved home of a relative or nonrelative extended family member. Existing law further requires a child welfare agency to ensure initiation of a state- and federal-level fingerprint check within 5 judicial days of the initiation of the CLETS criminal background check.

This bill would require the child welfare agency to ensure initiation of the fingerprint check only when the criminal background check is initiated for the purpose of assessing the appropriateness and safety of placing a child, and not when the background check is initiated for the other designated purposes. This bill would limit the initiation of the criminal record check to the state level, and would further extend the time period to initiate fingerprint checks to 10 calendar days, and make other, technical changes.

By adding to the duties of local child welfare agencies with regard to the above, this bill would impose a state-mandated local program.

The bill would also authorize a state or county welfare agency, commencing July 1, 2007, to submit fingerprint images and specified related information required by the Department of Justice in connection with determining the suitability of a parent or legal guardian for reunification with a dependent child of the juvenile court, for the purpose of obtaining specified criminal record information relating to the parent or legal guardian.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

(4) This bill would incorporate additional changes to Section 366.21 of the Welfare and Institutions Code proposed by SB 1667 to become operative only of this bill and SB 1667 are enacted and become operative on or before January 1, 2007, this bill becomes operative first, and this bill is enacted last.

#### Ch. 727 (AB 1799) McCarthy Elections: payment of expenses.

Existing law provides that all expenses authorized and necessarily incurred in the preparation for and conduct of elections are to be paid from the county treasuries.

This bill would provide, until January 1, 2007, that expenses incurred on or after January 1, 2006, for elections proclaimed by the Governor to fill a vacancy in the office of State Senator or Member of the Assembly, or to fill a vacancy in the office of United States Senator or Representative in Congress, are to be paid by the state. Where an election proclaimed by the Governor is consolidated with a local election, the state would pay only those additional expenses directly related to the election proclaimed by the Governor.

This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 728 (AB 1848) Bermudez Homeland security: interoperable public safety communication network.

Existing law provides for the coordination of state and local public safety agencies and emergency response teams to respond to emergencies. Existing law administered by the Federal Communications Commission authorizes public safety agencies or entities to operate radio communication systems on specified frequencies of the radio spectrum and directs states to oversee the interoperability of the public safety spectrum.

Existing law also establishes the Public Safety Radio Strategic Planning Committee responsible for implementing a statewide integrated public safety communication system using federally specified frequencies to facilitate interoperability among specified public safety departments and requires the committee to report annually to the Legislature regarding the committee's progress.

This bill would designate the annual report to serve as the state strategic plan for establishing a statewide integrated interoperable public safety communications network and would require the report to include implementation strategies and timelines.

#### Ch. 729 (AB 1942) Nava Arrests.

Existing law generally regulates the conditions of arrest.

This bill would express the intent of the Legislature regarding the development of protocols by law enforcement and other entities, pertaining to arresting caretaker parents or guardians of minors, to ensure the safety and well-being of the minor. The bill would also state that the Legislature encourages the Department of Justice to apply for a federal grant to train local law enforcement agencies and assist them in developing protocols pertaining to child safety when a caretaker parent or guardian is arrested.

Existing law establishes the Commission on Peace Officer Standards and Training and charges it with various responsibilities.

This bill would require the commission to develop guidelines and training for use by state and local law enforcement officers to address issues related to child safety when a caretaker parent or guardian is arrested, as specified.

#### Ch. 730 (AB 1967) Committee on Education Education.

(1) Existing law requires the Superintendent, if at any time during the fiscal year he or she determines that the county office of education may be unable to meet its financial obligations for the current or 2 subsequent fiscal years or if the county office has qualified for certification, as specified, to notify the county board of education and the county superintendent of schools, in writing, of that determination and the basis for the determination.

This bill would require a county office of education, or a school district for which the county board of education serves as the governing board, to provide the Superintendent with a copy of a study, report, evaluation, or audit regarding evidence of fiscal distress, as specified. The bill would require the Superintendent to review and consider those studies, reports, evaluations, or audits and any additional studies, reports, evaluations, or audits that contain a finding by an external reviewer that more than 3 of the 15 most common predictors of school agencies needing intervention, as determined by the County Office Fiscal Crisis and Management Assistance Team, are present. The bill would require the Superintendent, if those findings are made, to investigate the financial condition of the county office of education and determine if the county office of education may be unable to meet its financial obligations for the current or 2 subsequent fiscal years, or whether the county office should receive a qualified or negative interim financial certification, as specified.

(2) Existing law provides that the resolution of a county committee on school district organization approving a proposal to establish or abolish trustee areas or to increase or decrease the number of members of the governing board constitutes an order of election. Existing law requires that the proposal be presented to the electors of the school district not later than the next succeeding election for members of the governing board.

This bill would provide that those provisions also apply to the resolution of a county committee approving a proposal to recommend one of the alternative methods of electing governing board members, as specified.

(3) Existing law prescribes the liability for the outstanding bonded indebtedness of a school district when it is created, annexed, or abolished, or when the boundaries of the school district are changed. Existing law makes these provisions applicable only to reallocation of bonded indebtedness of a school district on general obligation bonds if the bonded indebtedness was approved by the voters prior to July 1, 1978, or if the bonded indebtedness was incurred for the acquisition or improvement of real property and was approved on or after July 1, 1978 by  $\frac{2}{3}$  of the votes cast by the voters voting on the proposition.

This bill would make those provisions applicable also if the bonded indebtedness was incurred for the acquisition or improvement of real property and was approved on or after January 1, 2001 by 55% of the votes cast by the voters voting on the proposition at a regularly scheduled election or a statewide special election.

(4) Existing law authorizes a county superintendent of schools to call an election, based on a petition to transfer territory of a school district, at the next regularly scheduled election

pursuant to existing law governing elections for the transfer of territory of a school district or in accordance with existing law that authorizes a local special, or consolidated election to be conducted wholly by mail if specified conditions are met.

This bill would authorize the above matter to be called at the next election, of any kind, pursuant to existing law governing elections for the transfer of territory of a school district or in accordance with existing law that authorizes a local special, or consolidated election to be conducted wholly by mail if specified conditions are met.

(5) Existing law requires the base revenue limit calculated for newly organized school districts to be equal to the total of the amount of blended revenue limit of affected school districts, as specified.

This bill would revise that calculation, as specified.

(6) Existing law requires the Secretary of the State Board of Education to set for hearing, and provide notice of, a petition for the reorganization of a school district at a regular or special board meeting, as specified.

This bill would require the withdrawal of a petition and would authorize the withdrawal of a resolution for the reorganization of a school district, as specified, from consideration by the state board if specified conditions are satisfied.

(7) Existing law requires the county superintendent of schools, within 35 days of receiving a specified notice from the state board, to call an election to be conducted at the next regularly scheduled election pursuant to existing law governing elections for the transfer of territory of a school district or in accordance with existing law that authorizes a local special, or consolidated election to be conducted wholly by mail if specified conditions are met.

This bill would authorize the above matter to be conducted at the next election, of any kind, pursuant to existing law governing elections for the transfer of territory of a school district or in accordance with existing law that authorizes a local special, or consolidated election to be conducted wholly by mail if specified conditions are met.

(8) Existing law requires a county superintendent of schools to provide for an audit of all funds under his or her jurisdiction and requires the governing board of a local educational agency to either provide for an audit of the books and accounts of the local educational agency or make arrangements with the county superintendent of schools having jurisdiction over the local educational agency to provide for that auditing. Existing law requires a county superintendent of schools to be responsible for reviewing the audit exceptions contained in an audit of a local educational agency under his or her jurisdiction related to attendance, inventory of equipment, internal control, and any miscellaneous items, and determining whether the exceptions were either corrected or an acceptable plan of correction was developed. Existing law requires, commencing with the 2004–05 audit of local educational agencies, the county superintendent of schools to include in the review of audit exceptions those audit exceptions related to use of instructional materials, program funds, teacher misassignments, and information reported on the school accountability report card and to determine whether the exceptions are either corrected or an acceptable plan of correction is developed.

This bill would require for a specified auditing condition, commencing with the 2004–05 audit of local educational agencies, the county superintendent of schools to include in the review of audit exceptions the above audit exceptions relating to the use of instructional materials program funds, teacher misassignments, and information reported on the school accountability report card, and to determine whether the exceptions are either corrected or an acceptable plan of correction is developed.

(9) Existing law authorizes a school district and county office of education to expend in a fiscal year up to 15% of the amount apportioned for, among others, the School and Library Improvement Block Grant for any other programs, as specified. Existing law prohibits a school district or county office of education from expending more than a specified amount of those transferred funds, if any.

This bill would require a school district that transfers funds from the amount apportioned for the School and Library Improvement Block Grant to utilize no less than 85% of the amount remaining after the transfer for direct services to pupils.

(10) Existing law requires the governing board of a school district to adopt an annual budget, and requires the county superintendent of schools who has jurisdiction over that school district to approve, conditionally approve, or disapprove the adopted budget. Existing law requires the governing board of a school district to select a budget review committee, as specified, if the county superintendent of schools disapproves the school district's adopted annual budget, unless the governing board of the school district and the county superintendent of schools agree to waive the required budget review committee.

This bill would, if the above waiver is made, grant the county superintendent of schools specified authority and responsibility. The bill would instead require the county superintendent of schools to, among other things, develop and adopt a school district fiscal plan and budget until a specified report is certified.

(11) Existing law limits expenditures from the juvenile court and community school account maintained by a county superintendent of schools to certain expenditures.

This bill would add specified deferred maintenance contributions to the list of allowed expenditures from the juvenile court and community school account.

(12) Existing general law establishes programs within the Santa Cruz High School attendance area that provide fiscal incentives to the Santa Cruz High School District, Live Oak Elementary School District, Scotts Valley Union Elementary School District, and the Soquel Union Elementary School District in order to provide enrollment options for pupils in grades 7 and 8.

This bill would delete Scotts Valley Union Elementary School District from those provisions and would codify the above programs, as specified, in the Education Code.

(13) Existing law requires the Superintendent to allocate a certain amount of money for supplemental summer school programs in each school district for which the prior fiscal year enrollment was less than 500 and meets other criteria.

This bill would repeal that provision of law.

(14) Existing law requires the Superintendent to annually compute a general purpose entitlement, as defined, and a categorical block grant amount, as defined, for each charter school, pursuant to a specified formula.

Existing law requires, for purposes of computing eligibility for, and entitlements to, revenue limit funding, that the average daily attendance of a unified school district, other than a unified school district that has converted all of its schools to charter status, as specified, include all attendance of pupils who reside in the unified school district and who would otherwise have been eligible to attend a noncharter school of the unified school district if the unified school district was a basic aid school district in the prior fiscal year, or if the pupils attended a charter school of a unified school district that converted to charter status on or after July 1, 2005. Existing law requires that only these pupils be included in a specified calculation to determine revenue limits of each school district.

Existing law also subjects to different funding provisions, as specified, a charter school in a unified school district that was established through the conversion of an existing public school on or after July 1, 2005, and that would otherwise be subject to the provisions of existing law described in the above paragraph.

This bill would require the above calculation to be included in the calculation to determine revenue limits of each school district, as specified.

(15) Existing law authorizes the governing board of a school district to grant any public corporation or agency the authority to lease or purchase personal property for the district, as specified. Existing law also authorizes a school district to issue warrants to that public corporation or agency for the amount of the approved invoice and all reasonable costs of the leased or purchased personal property, as specified.

This bill would authorize a school district to authorize the lease or purchase of personal property directly from a vendor by contract, lease, requisition, or purchase order and make payment, as specified, for the property directly to that vendor if there is an existing contract between a public corporation or agency and that vendor for the property.

(16) This bill would also make technical, nonsubstantive and conforming changes to existing law.

(17) This bill would incorporate additional changes to Section 47634.4 of the Education Code proposed by SB 1209, to become operative only if both bills are chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

Ch. 731 (AB 1969) Yee Electrical corporations: water agencies.

(1) The Public Utilities Act requires the Public Utilities Commission to review and adopt a procurement plan and a renewable energy procurement plan for each electrical corporation pursuant to the California Renewables Portfolio Standard Program. The program requires that a retail seller of electricity, including electrical corporations, community choice aggregators, and electric service providers, but not including local publicly owned electric utilities, purchase a specified minimum percentage of electricity generated by eligible renewable energy resources, as defined, in any given year as a specified percentage of total kilowatthours sold to retail end-use customers each calendar year (renewables portfolio standard).

Existing law, except as specified, requires every electric service provider, as defined, to develop a standard contract or tariff providing for net energy metering, and to make this contract or tariff available to eligible customer generators, upon request, on a first-come-first-served basis until the total rated generating capacity used by eligible customer generators exceeds 0.5% of the electric service provider's aggregate customer peak demand.

This bill would require every electrical corporation to file with the commission a standard tariff for renewable energy output produced at an electric generation facility, as defined, that, among other things, is an eligible renewable energy resource. The bill would require the electrical corporation to make this tariff available to public water or wastewater agencies that own and operate an electric generation facility within the service territory of the electrical corporation, upon request, on a first-come-first-served basis, until the combined statewide cumulative rated generating capacity of those electric generation facilities equals 250 megawatts. The bill would specify that each electrical corporation would only be required to offer service or contracts under the bill until that electrical corporation meets its proportionate share of the 250 megawatts based on the ratio of its peak demand to the total statewide peak demand of all electrical corporations.

The bill would provide that, upon approval by the commission, any tariff or contract authorized by the bill may be made available to an electric generation facility that has an effective capacity of not more than 1.5 megawatts if that electrical generation facility otherwise complies with the bill.

(2) Under existing law, the failure to file a required tariff, or a violation of an order or direction of the commission, including a commission-approved tariff, is a crime.

Because the bill would require electrical corporations to file new tariffs, the bill would impose a state-mandated local program by creating new crimes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 732 (AB 1998) Chan Parole: prerelease program: Alameda County.

Existing law authorizes the Department of Corrections and Rehabilitation to establish 3 pilot programs that provide training and counseling for female parolees to assist in their successful reintegration into the community.

This bill would require the department to contract for the establishment and operation of a 3-year prerelease parole pilot program in Alameda County for male and female offenders who were convicted of a nonviolent offense, in order to provide coordination between departmental and community service providers to ensure that offenders transition smoothly from services during incarceration through reentry programs. The bill would require the contractee to report to the Legislature and the Governor on the cost-effectiveness of the program by January 1, 2010.

Ch. 733 (AB 1812) Committee on Budget Budget Act of 2006. <sup>4</sup>

The Budget Act of 2006 made appropriations for the support of state government for the 2006–07 fiscal year.

This bill would amend and supplement the Budget Act of 2006 by revising items of appropriation relating to the Office of Emergency Services, the Department of General Services, the Department of Forestry and Fire Protection, the State Water Resources Control Board, and the State Department of Social Services.

The bill would declare that it is to go into immediate effect as an urgency statute.

Ch. 734 (AB 2021) Levine Public utilities: energy efficiency.

(1) The Warren-Alquist State Energy Resources Conservation and Development Act establishes the State Energy Resources Conservation and Development Commission (Energy Commission) and requires it to prepare an integrated energy policy report on or before November 1, 2003, and every 2 years thereafter. Under that act, the Energy Commission also administers existing law with respect to energy conservation.

Existing law authorizes the Public Utilities Commission to regulate public utilities, including electrical and gas corporations. The Public Utilities Act requires the commission to review and adopt a procurement plan for each electrical corporation. Under existing law, the commission, in consultation with the Energy Commission, is required to identify all potentially achievable cost-effective electricity efficiency savings and to establish efficiency targets for an electrical corporation to achieve pursuant to its procurement plan. Existing law requires that an electrical corporation's procurement plan include a showing that the electrical corporation will first meet its unmet resource needs through all available energy efficiency and demand reduction resources that are cost effective, reliable, and feasible. Existing law requires the commission, in consultation with the Energy Commission, to identify all potentially achievable cost-effective natural gas efficiency savings and to establish efficiency targets for the gas corporation to achieve these targets and to require that a gas corporation first meet its unmet gas resource needs through all available natural gas efficiency and demand reduction resources that are cost effective, reliable, and feasible.

This bill would require the Energy Commission, on or before November 1, 2007, and every 3 years thereafter, in consultation with the commission and local publicly owned electric utilities, in a public process that allows input from other stakeholders, to develop a statewide estimate of all potentially achievable cost-effective electricity and natural gas efficiency savings and establish statewide annual targets for energy efficiency savings and demand reduction over 10 years. The bill would require the commission to base its estimate at least in part on the most recent targets established by the commission and local publicly owned electric utilities. The bill would require the Energy Commission to include in the integrated energy policy report, for each electrical corporation and each gas corporation, a comparison of the public utility's annual energy efficiency targets, and the public utility's actual energy efficiency savings and demand reductions.

(2) The bill would require the Energy Commission to investigate options and develop a plan to improve the energy efficiency of, and to decrease the peak electricity demand of,

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

air-conditioners in the state. The bill would require the Energy Commission, on or before January 1, 2008, to prepare and submit to the Legislature a report on that plan.

(3) Existing law requires each local publicly owned electric utility, in procuring energy, to first acquire all available energy efficiency and demand reduction resources that are cost effective, reliable, and feasible. Existing law requires each local publicly owned electric utility to report annually to its customers and to the Energy Commission, its investment in energy efficiency and demand reduction programs, as specified.

This bill would require a local publicly owned electric utility, on or before June 1, 2007, and every 3 years thereafter, to identify all potentially achievable cost-effective electricity efficiency savings and to establish annual targets for energy efficiency savings and demand reduction over 10 years. The bill would require a local publicly owned electric utility to report those targets to the Energy Commission within 60 days of the date of adoption. The bill would require an annual report by a local publicly owned electric utility to its customers and the Energy Commission on its investments, programs, expenditures, cost-effectiveness, and results, as prescribed. The bill would also require an annual report to the Energy Commission on investment funding, cost-effectiveness methodologies, and an independent evaluation. The bill would require the Energy Commission to include a summary of the information reported by local publicly owned electric utilities and a comparison of each utility's energy efficiency targets and actual results in the integrated energy policy report. The bill would require the Energy Commission, if it determines that improvements can be made in setting or meeting annual targets, to provide recommendations to the local publicly owned electric utility, the Legislature, and the Governor on those improvements. The bill, by establishing new requirements for local publicly owned electric utilities, would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 735 (AB 2049) Spitzer Sex offenders: parole.

Existing law generally regulates the parole of sex offenders and the terms and conditions of parole that may be placed on those offenders upon release from prison.

This bill would provide that any person who has been convicted of an offense that requires him or her to register as a sex offender would, as determined to be appropriate by the Department of Corrections and Rehabilitation, as a term of parole be prohibited from contacting or communicating with the victim, or victims or any of their immediate family members. The bill would also provide that the district attorney of the prosecuting county may be available for assisting the victim in a determination of the appropriateness of imposing that condition of parole, as specified.

#### Ch. 736 (AB 2067) Oropeza Smoking: enclosed spaces of buildings.

Existing law prohibits smoking of tobacco products inside public buildings, as defined, but excludes covered parking lots from this prohibition. Existing law additionally prohibits smoking in all enclosed spaces of places of employment, as defined.

This bill would define "covered parking lot," for purposes of the exclusion from the prohibition with respect to public buildings, to exclude lobbies, lounges, waiting areas, elevators, stairwells, and restrooms that are a structural part of the covered parking lot, thereby making these areas subject to the smoking prohibition.

This bill would also add a definition of "enclosed space" to the law that prohibits smoking in enclosed spaces of certain places of employment to include lobbies, lounges, waiting areas, elevators, stairwells, and restrooms that are a structural part of the building that is the place of employment. The violation of the prohibition against smoking in enclosed spaces

of places of employment is an infraction punishable by a specified fine. By expanding the scope of an infraction, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 737 (AB 2095) Niello Employment practices.

Existing law makes certain specified employment practices unlawful, including the harassment of an employee directly by the employer or indirectly by agents of the employer with the employer's knowledge. Existing law additionally requires employers with 50 or more employees to provide, by January 1, 2006, at least 2 hours of training and education regarding sexual harassment to all supervisory employees, as specified, who have been employed as of January 1, 2005, unless the employer has provided that training and education to these employees after January 1, 2003. This training must be provided to all supervisory employees once every 2 years and to all new supervisory employees within 6 months of their assumption of supervisory duties.

This bill would limit the training requirement to supervisory employees within California. The bill would also make technical, nonsubstantive changes to these provisions.

Under existing law, all wages earned by a person in any employment are due and payable twice during each calendar month, except as specified. Existing law provides that this requirement shall be deemed satisfied if the wages are paid not more than 7 calendar days following the close of the payroll period, and further provides that the payment of wages for labor in excess of the normal work period must be made no later than the payday for the next regular payroll period. Existing law further requires an employer to furnish each employee semimonthly or at the time of each payment of wages with an accurate itemized statement showing, among other things, the total hours worked by the employee, with a specified exception.

This bill would provide that an employer has complied with the latter requirement if overtime hours worked in the current pay period are itemized as corrections on the paystub for the next regular pay period. This bill would further require that corrections included in a subsequently issued paystub identify the dates of the pay period to which they refer.

Ch. 738 (AB 2104) Lieber Energy: California Alternate Rates for Energy program.

(1) Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations and gas corporations. Existing law requires the commission to establish a program of assistance to low-income electric and gas customers, referred to as the California Alternate Rates for Energy (CARE) program.

Existing law requires, when gas or electric service is provided by a master-meter customer to users who are tenants of a mobilehome park, apartment building, or similar residential complex, that the master-meter customer charge each user at the same rate as would apply if the user were receiving gas or electricity directly from the gas or electrical corporation.

This bill would require the commission, by December 31, 2007, to improve the CARE application process for tenants of a mobilehome park, apartment building, or similar residential complex receiving electric or gas service from a master-meter customer through a submetered system by developing processes whereby electrical corporations and gas corporations are able to directly accept CARE applications from those tenants and to directly notify and provide renewal applications to tenants that are existing CARE customers. These requirements would be repealed on January 1, 2008.

(2) The existing Public Utilities Act requires the commission to require every electrical and gas corporation to notify each master-meter customer of its responsibilities to submetered customers.

This bill would require the commission, by December 31, 2007, to improve the CARE program by developing processes whereby every electrical corporation and gas corporation is required to timely provide each master-meter customer with a list of tenants who are approved to receive discounts pursuant to the CARE program, which list specifically identifies those tenants added to or deleted from CARE program eligibility since the previous billing cycle. These requirements would be repealed on January 1, 2008.

(3) Under existing law, a violation of an order, decision, rule, direction, demand, or requirement of the commission is a crime.

Because the bill would require commission action to implement its requirements upon electrical corporations and gas corporations, and because a violation of any of the actions of the commission described above implementing its requirements would be a crime, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 739 (AB 2140) Hancock General plans: safety element.

(1) The California Disaster Assistance Act limits the state share for any eligible project to no more than 75% of total state eligible costs, except that the state share shall be up to 100% of total state eligible costs connected with certain events.

This bill would prohibit the state share for any eligible project from exceeding 75% of total state eligible costs unless the local agency is located within a city, county, or city and county that has adopted a local hazard mitigation plan in accordance with the federal Disaster Mitigation Act of 2000 as part of the safety element of its general plan, in which case the Legislature may provide for a state share of local costs that exceeds 75% of total state eligible costs.

(2) The Planning and Zoning Law requires that a city, county, or city and county general plan contain specified elements, including a safety element for the protection of the community from any unreasonable risks associated with the effects of seismically induced surface rupture, ground shaking, ground failure, tsunami, seiche, and dam failure; slope instability leading to mudslides and landslides, subsidence, liquefaction, and other seismic, geologic, and fire hazards.

This bill would authorize a city, county, or a city and county to adopt with its safety element a federally specified local hazard mitigation plan that includes specified elements, and require the Office of Emergency Services to give preference to local jurisdictions that have not adopted a local hazard mitigation plan with respect to specified federal programs for assistance in developing and adopting a plan.

#### Ch. 740 (AB 2125) Vargas Insurance.

Existing law regulates the business of insurance, including worker's compensation insurance.

This bill would make numerous changes in the law regulating insurance including workers' compensation insurance.

Among other things, this bill would revise provisions relating to the authority of the Insurance Commissioner to revoke or suspend the State Compensation Insurance Fund's authority to transact workers' compensation insurance. This bill would provide that the fund shall be subject to the powers and authority of the commissioner to the same extent as any other insurer transacting workers' compensation insurance, except where specifically exempted by reference in the provisions of law regulating insurance. This bill would, however, provide that the commissioner may not revoke or suspend the fund's authority to transact workers, compensation insurance. This bill would also exempt the fund from the requirement that a court issue an order vesting title to an insurer's assets in the commissioner

under specified circumstances. It would instead require the commissioner to issue a report, as specified, authorize the Governor, in consultation with the Legislature, to replace the fund's president with a recovery administrator, as specified, and require the Governor to direct a course of action to be implemented by the fund's board of directors. This bill would also exempt the fund from delinquency proceedings for insurers and prohibit the commissioner from imposing administrative supervision on it unless it consents. This bill would also allow the fund's board to appoint up to 12 positions, as specified, and fix the salaries of those positions.

As to other types of insurance, the bill would, among other things, revise provisions relating to cancellation and reinstatement of financed insurance, codify current policy of the Department of Insurance regarding agents of nonresident licensees, as specified, modify insurer liquidation procedure, and change the definition of "commercially domiciled insurer" for purposes of regulating insurance holding companies. The bill would also provide that the Insurance Commissioner may approve a name using the words "savings bank" if the entire title shows that the insurer is engaged in the business of insurance and is not a savings bank. Further, the bill would modify the definition of "insolvent insurer" and modify the California Insurance Guarantee Association refund policy. This bill would also allow the commissioner to create an examination for life agents solely for funeral and burial policies, as specified. This bill would also provide for the merger of foreign and domestic mutual holding companies and require surplus lines brokers who make late monthly payments of premium taxes to pay interest, as specified. This bill would also revise provisions that require the commissioner to prepare and propose a plan regarding low-cost automobile insurance to the relevant Senate and Assembly committees, as specified.

This bill would also make technical, nonsubstantive changes in the law.

Ch. 741 (AB 2155) Wolk Hazardous waste: treatment: pharmaceutical activities.

(1) Existing law requires hazardous waste facilities, including, but not limited to, treatment facilities, to operate under hazardous waste facilities permits or other grants of authorization issued by the Department of Toxic Substances Control. Existing law exempts from the requirements relating to generators, tanks, and tank systems imposed pursuant to the hazardous waste control laws, and from the requirement to obtain a hazardous waste facilities permit, biotechnology elementary neutralization activities, as defined. A violation of the hazardous waste control laws is a crime.

This bill would additionally exempt pharmaceutical neutralization activities from those requirements, if specified conditions are met with regard to the pharmaceutical manufacturing or process development activities that generate or use the hazardous waste subject to the neutralization treatment and if the owner or operator of the pharmaceutical neutralization unit complies with specified requirements. The bill would require the owner or operator to establish and maintain documentation substantiating its compliance and would require the documentation to be available for inspection upon the request of the department or the Certified Unified Program Agency.

Since a violation of the requirements imposed by the bill upon the owner or operator of a pharmaceutical neutralization unit would be a crime, the bill would impose a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 742 (AB 2160) Lieu State buildings: green building.{N1}

Existing law requires that new public buildings be models of energy efficiency and be designed, constructed, and equipped with energy efficiency measures, materials, and devices, subject to specified criteria, and that existing buildings be retrofitted to meet

specified standards when renovated or remodeled. In addition, certain executive orders require state agencies to implement certain energy and resource efficiency standards in this regard.

This bill would require the Department of General Services to define a life cycle cost analysis model to be used with respect to certain state building design and construction decisions. It would require the State Energy Resources Conservation and Development Commission, in consultation with specified state entities, to identify and develop appropriate financing and project delivery mechanisms to facilitate state building energy and resource efficient projects, including the use of the life cycle cost analysis model, and, in consultation with the state entities and specified private entities, identify obstacles to private sector commercial energy and resource efficient projects, and identify and recommend financial and other incentives to facilitate private sector commercial building energy and resource efficient projects. The bill would also require the commission to report its findings and recommendations to the Green Action Team established to further the goals of a specified executive order.

Ch. 743 (AB 2167) Arambula Pupil achievement: measurement, tracking, reporting, and analyzing.

Existing law requires school districts to report certain information to the State Department of Education relating to, among other things, pupils, pupil attendance, and staff. Existing law requires the department to collect certain information from school districts and, pursuant to this law, the department gathers data from school districts on school staff and pupil enrollment in the annual California Basic Educational Data System (CBEDS) report.

Existing law requires the Superintendent of Public Instruction to develop the Academic Performance Index (API), which consists of a variety of indicators currently reported to the department, to track the achievement of schools and their pupils.

This bill would establish the specific calculation for graduation rates to be included within the API and would require the Superintendent to provide an annual report to the Legislature on the graduation and dropout rates in California and to make the same report available to the public, as specified. The bill would prohibit graduation rates from dropout recovery high schools, as defined, from being included in the API.

Ch. 744 (AB 2174) Villines Criminal procedure: defendant's appearance.

Existing law provides that a person charged with a misdemeanor offense may appear by counsel except, under specified circumstances, if the accused is charged with an offense involving domestic violence.

This bill would provide that in an appropriate case involving a person accused of a specified misdemeanor driving under the influence offense, the court may order the defendant to be present for arraignment, at the time of plea, or at sentencing.

Ch. 745 (AB 2177) Aghazarian Fire alarm systems: standards.

Existing law requires the State Fire Marshal, with the advice of the State Board of Fire Services, to adopt regulations and standards to control the quality and installations of fire alarm systems and devices, as specified.

Existing law makes it a misdemeanor for any person to market, distribute, offer for sale, or sell any fire alarm system or fire alarm device in this state unless the system or device has been approved and listed by the State Fire Marshal.

This bill would require the State Fire Marshal to convene a working group, as specified, to develop a statutory and regulatory approach to update and modernize the building material listing process to expedite listing with the State Fire Marshal.

The bill would require that the working group be appointed no later than October 1, 2006, and that the working group convene for their first meeting no later than November 1, 2006.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 746 (AB 2184) Bogh Residential facilities: land use regulations.

Existing law specifies that no conditional use permit, zoning variance, or other zoning clearance is required of a residential facility, as defined, which serves 6 or fewer persons if such a permit, variance, or zoning clearance is not required of a family dwelling of the same type in the same zone. Existing law provides that those provisions shall not be construed to forbid the application to a residential care facility of any local ordinance that deals with health, safety, building standards, environmental impact standards, or any other matter within the jurisdiction of a local public entity if the ordinance does not distinguish residential care facilities that serve 6 or fewer persons from other family dwellings of the same type in the same zone, and if the ordinance does not distinguish residents of the residential care facilities from persons who reside in other family dwellings of the same type in the same zone.

This bill would additionally provide that the above prohibition shall not be construed to limit the ability of a local public entity to fully enforce a local ordinance, including, but not limited to, the imposition of fines and other penalties associated with violations of local ordinances covered by the above provisions.

Ch. 747 (AB 2189) Blakeslee Energy: renewable energy resources.

Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations. The Public Utilities Act imposes various duties and responsibilities on the commission with respect to the purchase of electricity and requires the commission to review and adopt a procurement plan and a renewable energy procurement plan for each electrical corporation pursuant to the California Renewables Portfolio Standard Program. The program requires that a retail seller of electricity, including electrical corporations, community choice aggregators, and electric service providers, but not including local publicly owned electric utilities, purchase a specified minimum percentage of electricity generated by eligible renewable energy resources, as defined, in any given year as a specified percentage of total kilowatthours sold to retail end-use customers each calendar year (renewables portfolio standard). The renewables portfolio standard requires each electrical corporation to increase its total procurement of eligible renewable energy resources by at least an additional 1% of retail sales per year over its baseline amount so that 20% of its retail sales are procured from eligible renewable energy resources no later than December 31, 2017. Pursuant to the existing definition of an “eligible renewable energy resource,” the electricity generated by a small hydroelectric generation facility of 30 megawatts or less procured or owned by an electrical corporation as of January 1, 2003, is eligible only for purposes of establishing the baseline of renewable energy resources procured by the electrical corporation and not for purposes of meeting the renewables portfolio standard.

This bill would provide that a small hydroelectric generation facility that is an eligible renewable energy resource retains eligibility if efficiency improvements at the facility undertaken after January 1, 2003, cause the generating capacity of the facility to exceed 30 megawatts, and the efficiency improvements do not result in a new or increased appropriation or diversion of water from a watercourse.

Ch. 748 (SB 257) Chesbro Special needs housing.

Existing law creates the California Housing Finance Fund in the State Treasury, and authorizes the transfer of construction loan funds to the construction lender or to the contractor as necessary to meet draws for progress payments pursuant to rules and regulations of the California Housing Finance Agency. Existing law prescribes the powers and duties of the agency with regard to providing loans and subsidizing housing for persons and families of low or moderate income and authorizes the agency to utilize federal subsidies available to provide housing for those families and persons.

This bill would additionally authorize the agency to make loans to finance affordable housing, including residential structures, housing developments, multifamily rental housing, special needs housing, as defined, and other forms of housing permitted by provisions regulating housing and community development. The bill would authorize the agency, in addition to any other power conferred pursuant to specified laws governing housing and community development, to issue revenue bonds, in accordance with specified requirements, for the purpose of financing the acquisition, construction, rehabilitation, refinancing, or development of special needs housing, as defined.

Existing law requires the agency to be administered by a board of directors, and requires the board to determine the compensation for the executive director of the agency. Existing law prohibits the compensation for the executive director to exceed the salary of the Secretary of Business, Transportation and Housing.

This bill would also require the board to determine the compensation for all key exempt management, as prescribed, and would remove the limitation on the executive director's compensation as it relates to the salary of the Secretary of Business, Transportation and Housing. This bill would require the board to establish the compensation in the agency's annual budget, and would require the Department of Personnel Administration to review the board's methodology in establishing the compensation.

This bill would require the California Housing Finance Agency to present a plan to the Legislature for the development, acquisition, construction, and rehabilitation of supportive housing. The bill would require the Legislative Analyst's Office to comment on the plan.

**Ch. 749 (SB 423) Simitian Electricity: charges: charitable organizations.**

Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations. Existing law defines an "electric service provider" as an entity that offers electrical service to customers within the service territory of an electrical corporation, excluding electrical corporations, local publicly owned electric utilities, and certain cogenerators. Provisions of the existing Public Utilities Act restructuring the electrical services industry require that electric service providers register with the commission, and provide for the authorization of direct transactions between electric service providers and retail end-use customers. The act requires the commission, pursuant to electrical restructuring, to authorize and facilitate direct transactions between electricity suppliers and retail end-use customers. However, other existing law suspends the right of retail end-use customers other than community aggregators, as defined, to acquire service from certain electricity suppliers, after a period of time to be determined by the commission, until the Department of Water Resources no longer supplies electricity under that law.

This bill, until January 1, 2010, notwithstanding that suspension, would authorize a nonprofit charitable organization, as defined, to acquire electric commodity service through a direct transaction with an electric service provider if electric commodity service is donated free of charge without compensation. The bill would require the organization to pay for certain related costs.

**Ch. 750 (SB 1070) Kehoe Water quality information.**

(1) Existing law, the Porter-Cologne Water Quality Control Act, requires the State Water Resources Control Board, in conjunction with the California regional water quality control boards, to implement a public information program on matters involving water quality and to maintain an information file on water quality research and other pertinent matters.

This bill would require the state board, with the assistance of the regional boards, to implement a public information program on water quality matters and to place and maintain on its Internet Web site a public information file on water quality monitoring, assessment, research, standards, regulation, enforcement, and other pertinent matters, as prescribed.

(2) The act requires the state board and the regional boards to carry out various monitoring functions. The act requires the state board, to the extent that funds are available, to prepare

and complete, on or before January 1, 2000, an inventory of existing water quality monitoring activities within state coastal watersheds, bays, estuaries, and coastal waters. The federal Clean Water Act prohibits the Environmental Protection Agency from approving certain grants for state pollution control programs in the absence of a determination that the state has provided or is carrying out an appropriate monitoring and reporting program, as specified.

This bill would repeal the provision relating to the preparation of an inventory and would require the California Environmental Protection Agency and the Resources Agency, on or before December 1, 2007, to enter into a memorandum of understanding for the purposes of establishing the California Water Quality Monitoring Council, which the state board would be required to administer. The bill would require the monitoring council to review existing water quality monitoring, assessment, and reporting efforts and to recommend specific actions and funding needs necessary to coordinate and enhance those efforts. The bill would require the memorandum of understanding to describe the means by which the monitoring council shall formulate recommendations to (a) reduce redundancies, inefficiencies, and inadequacies in existing water quality monitoring and data management programs and (b) ensure that water quality improvement projects financed by the state provide specific information necessary to track project effectiveness with regard to achieving clean water and healthy ecosystems. The bill would require the monitoring council to undertake various actions relating to water quality data collection. The bill would require the Secretary of the California Environmental Protection Agency, commencing December 1, 2008, to conduct a triennial audit of the effectiveness of a comprehensive monitoring program strategy, which the state board would be required to develop in accordance with the Clean Water Act.

Ch. 751 (SB 1133) Torlakson School districts and community college districts: minimum funding.<sup>5</sup>

(1) Existing provisions of the California Constitution require the state to apply a minimum amount of funding for each fiscal year for the support of school districts and community college districts. Existing law provides that, for purposes of those minimum funding requirements for school districts and community college districts, appropriations for deficiencies and prior year adjustments are deemed appropriations in the fiscal year in which the deficiencies or prior year adjustments occurred, unless otherwise provided by law.

Existing law requires that all determinations of percentages, amounts, revenues, appropriations, allocations, proceeds of taxes, increases in cost of living, or enrollments for the purposes of the minimum state education funding requirement be based upon the best available estimate until actual data becomes available, and then upon actual data when it is available.

This bill would substantially revise the procedure for making the determinations regarding data to be used to provide the minimum state educational funding.

(2) Existing federal law, the No Child Left Behind Act of 2001, requires a local educational agency to identify for program improvement any elementary or secondary school that fails, for 2 consecutive years, to make adequate yearly progress, as defined by the state. Existing federal law requires a school that continues to fail to make adequate yearly progress after being identified for program improvement to take additional corrective action or meet specified restructuring requirements.

Existing law, the Public Schools Accountability Act of 1999, establishes the Public School Performance Accountability Program, a statewide school accountability system that consists of the Academic Performance Index (API), the Immediate Intervention/Underperforming Schools Program, and the Governor's High Achieving/Improving Schools Program. Existing law authorizes the Superintendent of Public Instruction to require a school district that fails to meet specified academic growth targets to enter into a contract with a school assistance and intervention team, as specified.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

This bill would enact the Quality Education Investment Act of 2006, which would authorize school districts and other local educational agencies to apply to the Superintendent to receive funding to allocate to elementary and secondary schools and charter schools that are ranked in either decile 1 or 2 on the 2005 API for use in performing various specified measures to improve academic instruction and pupil academic achievement. The bill would impose various duties on the Superintendent, the Secretary for Education, and the State Board of Education regarding the review and approval of applications, the allocation of funds to applicant school districts and other local educational agencies, and other related matters, as specified. The bill would require participating schools, as defined, that receive funding to comply with various interim and program requirements. The bill would require county superintendents of schools to annually review participant schools and their data to determine compliance with the interim and program requirements and to notify the Superintendent if schools fail to satisfy those requirements. The bill would provide for the termination of funding following that notification under certain conditions. The bill would authorize a school district or other local educational agency that includes a participating school or schools for which funding is terminated to appeal that termination. The bill would authorize a school district or other local educational agency to apply to the Superintendent for permission to use alternative program requirements in lieu of those interim and program requirements, as specified. The bill would provide specified amounts of funding each school year based on grade level for each enrolled pupil at participating schools.

(3) This bill would appropriate \$300,000,000 from the General Fund for purposes of the Quality Education Investment Act of 2006, among other things, for the 2007–08 fiscal year, to be allocated as specified. The bill would appropriate \$450,000,000 from the General Fund for purposes of the act, among other things, for each of the 2008–09 to 2013–14 fiscal years, inclusive, to be allocated as specified. The bill would provide that those appropriations are for the purpose of discharging in full the outstanding balance of the maintenance factor resulting from Chapter 213 of the Statutes of 2004, as specified. The bill would provide that, for purposes of making the computations required by Section 8 of Article XVI of the California Constitution, the first \$1,620,928,000 of those amounts is General Fund revenues appropriated for school districts and community college districts for the 2004–05 fiscal year. The bill would provide that, for purposes of making those computations, the remainder of those amounts is General Fund revenues appropriated for school districts and community college districts for the 2005–06 fiscal year.

(4) This bill would appropriate the sum of \$1,117,000 from the General Fund to the department to fund 9.0 positions to implement the Quality Education Investment Act of 2006.

(5) This bill would require that funds not allocated to public elementary and secondary schools, charter schools, or community colleges pursuant to the bill in any fiscal year or funds resulting from program termination, as specified, in any fiscal year be available for reappropriation only in furtherance of the purposes of the bill. The bill would require that first priority for those funds be given to providing cost-of-living increases and growth-in-pupils adjustments to participating schools, as defined.

(6) By imposing additional duties on county superintendents of schools as part of the Quality Education Investment Act of 2006, this bill would impose a state-mandated local program.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 752 (SB 1292) Scott Teachers: limited-English-proficient pupils.

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

Existing law permits a teacher with a basic teaching credential to be assigned to provide specially designed content instruction delivered in English, as defined, to limited-English-proficient pupils only if certain conditions are met, including that the teacher be, as of January 1, 1999, a permanent employee of a school district, a county office of education, or a school administered under the authority of the Superintendent of Public Instruction and that the teacher complete, before January 1, 2008, 45 clock hours of staff development in methods of specially designed content instruction delivered in English. Existing law requires the Commission on Teacher Credentialing to file a related report with the Legislature by December 4, 2007.

This bill would authorize a teacher with a designated subjects teaching credential or a service credential with a special class authorization to be assigned to provide specially designed content instruction delivered in English, as defined, if the teacher completes, or enrolls in, specified staff development training. The bill would require the Commission on Teacher Credentialing, in consultation with the Superintendent of Public Instruction, to establish guidelines, as specified. The bill would require the commission to review staff development programs to determine whether they comply with the established guidelines. The bill would require that a certificate of completion be given to a teacher who completes staff development training, as specified. The bill would require a teacher who receives a certificate or certificates of completion, as specified, to be deemed certificated for specified purposes.

The bill would also make conforming, nonsubstantive changes to a related provision of law.

#### Ch. 753 (SB 1552) Scott California Community Colleges Economic and Workforce Development Program.

Existing law provides for the California Community Colleges Economic and Workforce Development Program. Existing law provides for the awarding of grants by the Board of Governors and the Chancellor of the California Community Colleges to community college districts for leadership in accomplishing the mission and goals of this program. Existing law provides that this program is to be implemented only during those fiscal years for which funds are appropriated for these purposes in the annual Budget Act. Existing law provides for the repeal of the program on January 1, 2008.

This bill would extend the operation of the program 5 years by delaying the repeal date of the program until January 1, 2013.

The bill would add to the program a provision requiring the chancellor to contract for an independent performance evaluation of the program. The bill would express legislative intent with respect to the funding of this evaluation. The bill would require that the final draft of the report produced pursuant to the performance evaluation be submitted to the chairpersons of the appropriate legislative policy and fiscal committees, the Director of Finance, and the Legislative Analyst prior to February 1, 2012. Pursuant to the bill, this provision would be repealed on January 1, 2013.

#### Ch. 754 (SB 1758) Figueroa Adoption facilitators.

(1) Existing law provides a comprehensive scheme regarding adoption regulation, and also provides for the regulation of adoption facilitators, as defined. Existing law requires a person, prior to engaging in the business of or acting in the capacity of an adoption facilitator, to obtain a business license in the appropriate jurisdiction and be bonded in the amount of \$10,000.

This bill would instead require a person to post a bond in the amount of \$25,000, executed by a corporate surety admitted to do business in this state, with the State Department of Social Services. The bill would also require a person, whenever there is recovery from a bond, to replenish the bond or file a new bond if the former bond cannot be replenished before that person may conduct further business as an adoption facilitator. The bill would require the

adoption facilitator to notify the department in writing within 30 days when a surety bond is renewed, and provide the department with changes in personal information, as specified.

The bill would also require the State Department of Social Services to establish and adopt regulations for a statewide registration process for adoption facilitators and to establish and adopt regulations to require adoption facilitators to post a bond. The bill would authorize the department to adapt the process it uses to register adoption service providers in order to provide a similar registration process for adoption facilitators. The bill would authorize the department to deny inclusion in the registry to an applicant who has been convicted of a crime for which the department may deny a license to an adoption agency. The bill would also require an adoption facilitator, when posting a bond, to file with the department a disclosure form containing specified information about the person's educational background and identity, including fingerprint cards. Certain of these requirements would extend to staff members who provide direct adoption services. The bill would authorize the department to submit fingerprint images to the Department of Justice in order to obtain criminal offender information and to impose fees for covering the costs of processing fingerprint cards and recovering all other costs associated with the bill's requirements. The bill would require the Department of Justice to forward the request for information to the Federal Bureau of Investigation, to review the information received in response, and to disseminate that information to the State Department of Social Services.

The bill would also require the State Department of Social Services to post on its Internet Web site information that shows if an adoption facilitator is in compliance with the registration and bond requirements, as specified. The bill would also authorize the department to create an Adoption Facilitator Account for the deposit of fees received and would require the department to make recommendations for the registry program to the Legislature on or before January 1, 2008. The bill would provide that the adoption facilitator registry shall become operative upon receipt of an appropriation, as specified.

(2) Existing law prohibits an adoption facilitator from misleading a person into believing that the adoption facilitator is a licensed adoption agency or representing to a person that he or she is able to provide services for which the facilitator is not properly licensed.

This bill would also prohibit an adoption facilitator from making use of photolisting to advertise minor children for placement in adoption and from advertising specific information about particular minor children available for adoption.

(3) Existing law authorizes a person aggrieved by a violation of the provisions regarding adoption facilitators to bring a civil action for damages, rescission, or any other civil or equitable remedy.

This bill would revise that provision to specifically authorize a person to bring a civil action for injunctive relief. The bill would also provide that if the court finds a person has violated those provisions, it shall award actual damages plus an amount equal to treble the amount of the actual damages or \$1,000 per violation, whichever is greater. The bill would also authorize the Attorney General, a district attorney, or a city attorney to bring a civil action for injunctive relief, restitution, or other equitable relief against the adoption facilitator in the name of the people of the State of California. The bill would further authorize any other person claiming a violation of those provisions to bring a civil action for injunctive relief on behalf of the general public.

(4) Existing law also authorizes a party, in any action to revoke or enforce a contract with an adoption facilitator, to recover reasonable attorneys' fees and costs.

This bill would expand that provision to apply to all civil actions regarding adoption facilitators. The bill would also set forth related findings and declarations.

Ch. 755 (AB 774) Chan Hospitals: fair pricing policies.

Existing law provides for the Office of Statewide Health Planning and Development, which is charged with the administration of health policy and planning relating to health

facilities, including hospitals. Existing law also provides for the licensure and regulation of health facilities by the State Department of Health Services.

This bill would require each hospital, as a condition of licensure, to maintain written policies about discount payment and charity care for financially qualified patients, as defined. The bill would require these policies to include, among other things, a section addressing eligibility criteria, as prescribed. The bill would require each hospital to perform various functions in connection with the hospital charity care and discount pay policies, including providing patients with notice that contains information about the hospital's discount payment and charity care policies, including information about eligibility and attempting to determine the availability of private or public health insurance coverage for each patient. The bill would also specify billing and collection procedures to be followed by a hospital, its assignee, collection agency, or billing service.

This bill would require each hospital to submit to the office a copy of the hospital's discount payment and charity care policies, eligibility procedures, review process, and the application for charity care or discounted payment.

This bill would also require the director to ensure that a hospital that overcharges a patient shall reimburse that patient, as described.

This bill would provide that to the extent that certain of the bill's requirements result in a specified federal determination relating to the hospital's established charge schedule, the requirement in question shall be inoperative with respect to all general acute care hospitals.

#### Ch. 756 (AB 2012) Emmerson Orthotic and prosthetic devices.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the regulation of health care service plans by the Department of Managed Health Care, and makes a willful violation of the act a crime. Existing law provides for the regulation of health insurers by the Department of Insurance. Existing law requires health care service plans and health insurers to provide coverage for orthotic and prosthetic devices under terms and conditions that may be agreed upon between the subscriber and plan or policyholder and insurer, and requires that the device be prescribed by a physician or ordered by a licensed health care provider acting within the scope of his or her license.

This bill would specify that a doctor of podiatric medicine, acting within the scope of his or her license, may prescribe the orthotic or prosthetic devices covered by the plan or insurer. The bill would, on and after July 1, 2007, require the amount of the benefit for orthotic and prosthetic devices and services to be, for health care service plans, no less than the annual and lifetime benefit maximums applicable to basic health care services and, for insurance policies, no less than the annual lifetime benefit maximums applicable to all benefits in the policy. The bill would also limit out-of-pocket amounts for covered orthotic and prosthetic devices and services.

Because a willful violation of this bill's provisions relating to health care service plans would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 757 (AB 2030) Haynes Charter schools: revocation.

(1) Existing law, the Charter Schools Act of 1992, requires a charter school to comply with the provisions of its charter and the laws pertaining to charter schools and exempts charter schools from the laws governing school districts, with specified exceptions. Existing law authorizes the revocation of a charter for specified violations. Existing law requires the chartering authority to notify the charter school of any violation and allow the school a reasonable opportunity to cure the violation prior to revoking the charter unless the authority determines, in writing, that the violation constitutes a threat to pupils, as specified.

This bill would require a chartering authority to provide a written notice of intent to revoke and notice of facts in support of revocation to a charter school prior to revoking its charter. The bill would require the chartering authority to hold a public hearing, as specified, no later than 30 days after the notice of intent to revoke is issued. The bill would require the authority to issue a decision to revoke or decline to revoke the charter no later than 30 days after the public hearing, unless the chartering authority and the charter school agree to a 30-day extension. The bill would require the chartering authority to make written factual findings, specific to the charter school, prior to revoking its charter.

The bill would, if the chartering authority is a school district, authorize a charter school to appeal the decision of the chartering authority to the county board of education within 30 days following the decision of the chartering authority. The bill would authorize the county board to reverse the revocation decision if the county board makes a specified determination. The bill would authorize a charter school to seek state board review of the revocation decision if the county board does not issue a decision on the appeal within 90 days of receipt, or the county board upholds the revocation.

The bill would, if a county office of education is the chartering authority and the county board revokes a charter, as specified, authorize a charter school to appeal the decision of the chartering authority to the state board within 30 days following the decision of the chartering authority. The bill would also provide that if the revocation decision of the chartering authority is reversed on appeal, the agency that granted the charter would continue to be regarded as the chartering authority.

The bill would provide that during the pendency of an appeal for specified violations, a charter school would continue to qualify as a charter school for funding and for all other purposes under the Charter Schools Act of 1992. The bill would also require that the revocation decision or the decision of an appeal be reported to specified entities.

Because this bill would impose additional requirements on school districts and county boards of education, this bill would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 758 (AB 2667) Baca Health care providers and insurers: considerations.

The Public Employees' Medical and Hospital Care Act requires the Board of Administration of the Public Employees' Retirement System to approve health benefit plans for certain public employees and annuitants, and authorizes the board to contract with carriers offering health benefit plans.

This bill would authorize the board to consider specified factors with respect to any entity that seeks to contract with the system for the provision of health benefits.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care. Existing law requires each application for licensure as a health care service plan or specialized health care service plan under these provisions to be accompanied by specified information.

This bill would require that each application, in addition, be accompanied by information relating to the applicant's history of providing, or arranging to provide for, certain health care services or benefits and the applicant's history of noncompliance with specified laws, regulations, and requirements.

This bill would require the department to consider any relevant information concerning misconduct with respect to any application for an initial license for any entity that seeks to contract with the system for the provision of health benefits.

Existing law provides for the licensure and regulation of health insurers by the Department of Insurance. Existing law prohibits any class of insurance business in the state without first being admitted of that class by procuring a certificate of authority from the insurance Commissioner. The commissioner is required to issue a certificate of authority upon consideration of specified qualifications of the applicant.

This bill would require the commissioner to consider specified factors with respect to any application for a certificate of authority, or amended certificate of authority to transact health insurance.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions. Existing law contains provisions governing the enrollment or reenrollment or contracting with entities for the provision of health care benefits under the Medi-Cal program of Medi-Cal providers. Medi-Cal services may also be obtained under specified types of contractual arrangements.

This bill would authorize the department to consider specified factors with regards to contracting with any entity for the provision of health care services under the Medi-Cal program.

Ch. 759 (AB 2995) Nunez California Tahoe Conservancy: acquisition of real property.

Existing law establishes the California Tahoe Conservancy as a state agency within the Resources Agency and authorizes the conservancy to select and acquire real property or interests therein in the name of and on behalf of the state for the purposes of protecting the natural environment, providing public access or public recreational facilities, preserving wildlife habitat areas, or providing access to or management of acquired lands.

Existing law provides that an acquisition of real property or an interest in real property by the conservancy is subject to the Property Acquisition Law when the value of the property is in excess of \$250,000 per lot or parcel.

This bill would increase that amount to \$550,000 per lot or parcel.

Existing law authorizes the conservancy to initiate, negotiate, and participate in agreements for the management of land under its ownership or control with specified agencies and entities or individuals, and to enter any other agreement authorized by state or federal law.

This bill would require the conservancy to take whatever actions are reasonably necessary and incidental to the management of lands and facilities under its ownership or control and authorize the conservancy to adopt and enforce regulations governing the use of those lands and facilities.

Ch. 760 (SB 1849) Committee on Business, Professions and Economic Development Professions and vocations.

(1) Existing law requires the Cemetery and Funeral Bureau to conduct a comprehensive study on the need to regulate third-party casket retailers and on the need for the regulation of proprietary employees of religious corporations, churches, religious societies, and religious denominations, and to report to the Department of Consumer Affairs and to the Joint Committee on Boards, Commissions and Consumer Protection by September 1, 2004.

This bill would repeal these provisions.

(2) Existing law, the Proprietary Security Services Act, requires a person who meets the definition of a proprietary private security officer to register with the Department of Consumer Affairs.

This bill would authorize a person registered with the department as a proprietary private security officer to request a review by the private security disciplinary review committee,

which is established in the Private Security Services Act, to contest the assessment of an administrative fine or to appeal a denial, revocation, or suspension of registration.

(3) Existing law, the Private Security Services Act, provides for the licensing and regulation of private security services and establishes two private disciplinary review committees to perform specified functions relative to various private security services.

This bill would require those private disciplinary review committees to expand their functions to include reviews of registered proprietary private security officers.

(4) Existing law provides for the licensing and regulation of professional engineers and land surveyors by the Board of Professional Engineers and Land Surveyors in the Department of Consumer Affairs. Existing law specifies that a person practices land surveying when he or she does or offers to do, among other things, certain acts regarding the earth's surface or relative fixed objects and geodetic or cadastral surveying. Existing law makes practicing or offering to practice engineering or land surveying without legal authorization a crime.

This bill would revise the acts that constitute the practice of civil engineering to include determining the configuration of the earth's surface or the position of fixed objects above, on, or below the surface of earth by applying the principles of trigonometry or photogrammetry. The bill would revise the acts that constitute the practice of civil engineering or the practice of land surveying to include rendering a statement regarding the accuracy of maps or measured survey data. The bill would also revise the definition of geodetic or cadastral surveying.

Because this bill would expand the definitions of civil engineering and land surveying, the unauthorized practice or offer to practice of which is a crime, it would impose a state-mandated local program.

(5) Existing law, the Automotive Repair Act, establishes in the Department of Consumer Affairs a Bureau of Automotive Repair under the supervision and control of the Director of Consumer Affairs. Existing law authorizes the director to refuse to validate, or to temporarily or permanently invalidate, the registration of an automotive repair dealer for specified acts or omissions related to the conduct of the business of the automotive repair dealer.

This bill would make technical changes to those provisions.

(6) Existing law, the Real Estate Law, exempts personal property brokers, commercial finance lenders, and consumer finance lenders from certain reporting and disclosure requirements relative to loans secured by real property.

This bill would delete personal property brokers, commercial finance lenders, and consumer finance lenders from these exemptions and instead provide that finance lenders are exempt from the reporting and disclosure requirements.

(7) Existing law, the Home Furnishings and Thermal Insulation Act, requires all mattresses and box springs manufactured for sale in this state to be fire retardant. Existing law requires the Bureau of Home Furnishings and Thermal Insulation to adopt regulations by January 1, 2004, requiring that fire retardant mattresses and box springs meet a specified resistance to open flame test.

This bill would, effective July 1, 2007, change the criteria for fire retardant mattresses and mattress sets to the standards for resistance to open-flame test adopted by the United States Consumer Product Safety Commission. The bill would require that other bedding products that the bureau determines contribute to mattress fires comply with regulations adopted by it.

(8) Existing law requires process servers to be registered with the county clerk of the county in which he or she resides or has a principal place of business. Existing law requires a process server, at the time of filing an initial certificate of registration, to also submit 2 completed fingerprint cards for submission to the Department of Justice and the Federal Bureau of Investigation in order to verify that the process server has not been convicted of a felony.

This bill would require a process server, at the time of filing an initial certificate of registration, to submit a completed Request for Live Scan form instead of the fingerprint cards, and would make related changes.

(9) Existing law requires the Department of Consumer Affairs to compile and maintain statistical and emission profiles of motor vehicles that are subject to the motor vehicle inspection program. Existing law authorizes the department to conduct a pilot program to except specified vehicles from certain biennial certification requirements. Existing law requires the department as part of the pilot program to, by June 30, 2000, evaluate standards for the operation of remote sensing equipment.

Existing law requires the department to offer a repair assistance program for certain individuals who have failed a smog check inspection. Existing law requires the department to collect data, develop information, and report to the Legislature by April 1, 1999, on the repair assistance program.

This bill would delete these provisions that were required to be completed by June 30, 2000, and April 1, 1999.

(10) This bill would incorporate additional changes in Section 44062.1 of the Health and Safety Code proposed by AB 1870, that would become operative only if AB 1870 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 761 (AB 1870) Lieber Air pollution: motor vehicle inspection and maintenance.

(1) Existing law establishes a motor vehicle inspection and maintenance (smog check) program, developed, implemented, and administered by the Department of Consumer Affairs. The duty of enforcing and administering the program is vested in the Chief of the Bureau of Automotive Repair within the department. Existing law prohibits the operation of a motor vehicle in a manner that results in the escape of excessive smoke, flame, gas, oil, or fuel residue.

This bill would require the Department of Consumer Affairs to incorporate a visible smoke test into the motor vehicle inspection and maintenance program by January 1, 2008, so that any visible smoke from the tailpipe or crankcase of a motor vehicle during an inspection would result in a failure of the test. The bill would provide that steam resulting from condensation by itself shall not lead to an inspection failure. The bill would authorize a motor vehicle owner who disputes the failure of a visible smoke test to seek resolution of the matter by contacting the state-designated referee. The bill would require the department, in consultation with the State Air Resources Board and interested parties, to adopt regulations to implement these provisions.

(2) Existing law establishes the Inspection and Maintenance Review Committee to analyze the effect of the improved inspection and maintenance program on motor vehicle emissions and air quality, as specified. Existing law requires the review committee to submit periodic written reports to the Legislature and the Governor on the performance of the program, including quantification of the reduction in emissions and improvement in air quality attributed to the program, and make recommendations on program improvements at least every 12 months.

This bill would require the review committee, on or before July 1, 2010, to include a discussion of the effectiveness of the visible smoke test component of the inspection and maintenance program in its periodic reports to the Legislature and the Governor, as specified.

(3) Existing law provides for a repair cost waiver for a vehicle that has been properly tested but does not meet the applicable emission standards, if it is determined that no

adjustment or repair can be made that will reduce emissions from the inspected vehicle without exceeding specified repair cost limits.

This bill would require that no repair cost waiver be issued where a motor vehicle has failed the visible smoke test unless specified exceptions apply.

(4) Existing law provides for a repair assistance program available to an individual whose maximum income level is 200 percent of the federal poverty level and is the owner of a motor vehicle that has failed a smog check inspection or received a notice to correct, as specified, or an individual who has failed a smog check inspection and is directed to a test-only facility, as specified. Existing law provides that the department may increase its contribution toward the repair of a motor vehicle in excess of \$450, if the department determines that the expenditure is cost effective.

This bill would require the department to consider a failure of the visible smoke test and the costs associated with repairing a smoking vehicle in making this determination.

(5) Existing law provides that the department may specify the amount of money that may be paid to an owner of a high-polluting motor vehicle who voluntarily retires the vehicle. Existing law requires that the department base the amount on the cost-effectiveness and the air quality benefit of retiring the vehicle, as determined by the department.

This bill would allow the owner of a motor vehicle that has failed its most recent smog check inspection to retire the vehicle from operation at a dismantler under contract with the Bureau of Automotive Repair, and would require the department to pay this person up to \$1,500, or more as specified.

#### Ch. 762 (AB 2211) Karnette Solid waste disposal site cleanup.

The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. The act requires the board to initiate a program for the cleanup of solid waste disposal sites and for cleanup of solid waste at codisposal sites where no responsible party is available to pay for timely remediation, and where cleanup is needed to protect public health and safety or the environment. Existing law provides that all expenses incurred by the board in carrying out the program are to be paid from the Solid Waste Disposal Site Cleanup Trust Fund, which is continuously appropriated to the board for the direct cleanup of solid waste disposal sites and the cleanup of solid waste at codisposal sites and for emergency actions at solid waste disposal sites and solid waste at codisposal sites. Existing law authorizes the board, in administering the program, to expend funds for specified purposes, including loans to private parties and providing matching grants to public entities. The board is also authorized to provide grants to public entities for the abatement of illegal disposal sites. The board is required, to the extent possible, to seek reimbursement from responsible parties or the amounts expended under the cleanup program.

This bill would additionally include, as eligible for emergency action funding, solid waste facilities and sites involving solid waste handling. The bill would authorize the board to expend funds directly for the cleanup of a publicly owned site only if the board determines that the public entity lacks resources or expertise to timely manage the cleanup itself. The bill would require the board to consider additional specified factors in considering partial grants that provide greater than 50% of the funds directly for the cleanup. The bill would delete the requirement that the grants provided be matching grants and would instead authorize the board to provide partial grants to public entities, to assist in site cleanup.

The bill would specify, for purposes of expending funds to abate illegal disposal sites, that activities to remove or abate solid waste disposed into a municipal storm sewer system are eligible to receive partial grants, if the grant is used for solid waste cleanup, abatement, or any other activity that mitigates the impact of solid waste and an ongoing program is established to prevent recurring solid waste disposal into the municipal storm sewer.

The bill would instead require the board to seek reimbursement to the extent feasible.

The bill would make an appropriation by changing the terms and conditions under which the funds in a continuously appropriated account may be expended.

Ch. 763 (AB 2220) Vargas Household goods carriers.

(1) Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including transportation companies. Household goods carriers are subject to the jurisdiction and control of the commission under the Household Goods Carriers Act. The act prohibits a household goods carrier from engaging, or attempting to engage, in the business of the transportation of used household goods and personal effects, by motor vehicle over any public highway in the state, including advertising, soliciting, offering, or entering into an agreement, without a permit issued by the commission authorizing transportation entirely within the state, or a valid operating authority issued by the Federal Motor Carrier Safety Administration, for interstate transportation.

Except as specified, a household goods carrier in compliance with this act has a lien on used household goods and personal effects to secure payment of an amount, determined as specified, for transportation and additional services ordered by the consignor, as defined. The act requires any person having possession or control of used household goods or personal effects, who knows, or through the exercise of reasonable care should know, that the household goods carrier has been tendered that amount, to release the household goods and personal effects upon the request of the consignor or consignee.

This bill would also impose a similar release requirement on any person having possession or control of used household goods or personal effects, who knows, or through the exercise of reasonable care should know, that a household goods carrier transported those household goods or personal effects in violation of that permit or valid operating authority requirement. The bill would, with respect to both release requirements, authorize a peace officer, as defined, if the person fails to release the household goods and personal effects, to take custody of the household goods and personal effects and release them to the consignor or consignee.

(2) Existing law, known as the Uniform Commercial Code-Secured Transactions, prescribes the rights of a secured party after a default. Those provisions require a notification of disposition in a consumer goods transaction to meet specified requirements.

This bill would authorize a household goods carrier to enforce a lien on household goods and personal effects in accordance with specified provisions of the Household Goods Carriers Act and the Uniform Commercial Code-Secured Transactions. The bill would require a household goods carrier to provide a notification of disposition at least 30 days prior to any disposition to each consignor and consignee, as specified.

(3) The Household Goods Carriers Act requires an application for a transportation permit to be in writing, verified under oath, and to be in a form, contain information, and be accompanied by proof of service upon those interested parties, as required by the commission.

This bill would require the commission to require the applicant to attest in the application to facts demonstrating that the applicant is not barred by law or court order from acting as a household goods carrier.

(4) The act requires the commission to establish or approve rates to be charged by household goods carriers for the transportation of used household goods and personal effects and for related services, as prescribed.

This bill would prohibit a household goods carrier from advertising, quoting, or charging a rate or an amount for the transportation of used household goods and personal effects that is based on the amount of cubic feet or other volumetric unit measurement of those household goods and effects. Under the bill, a household goods carrier that violates that prohibition would not be entitled to any compensation for the transportation of the household goods and effects and would be required to make restitution to the shipper of any compensation collected.

(5) The act authorizes the commission to amend or revoke, in whole or in part, the permit of any household goods carrier, upon application of the permitholder, or to suspend, change, or revoke, in whole or in part, such a permit, upon complaint or on the commission's own initiative, after notice and opportunity to be heard, for failure to comply with the act, any order, rule, or regulation of the commission, or any term, condition, or limitation of the permit. The act authorizes the commission to cancel, suspend, or revoke the permit of any carrier upon the conviction of the carrier for any misdemeanor or for listed felonies.

This bill would authorize permit suspension, change, or revocation for providing false or misleading information on a permit application, and would expand the listed felonies. Under the bill, if a carrier is convicted of a prescribed felony, as defined, the permit of the carrier would be deemed automatically revoked, and if an officer, director, or managing agent is so convicted, the permit would be deemed automatically suspended for 5 years. The bill would authorize the commission, in the case of automatic suspension, to reinstate the permit, extend the suspension, or revoke the permit, as prescribed. The bill would prohibit an officer, director, managing agency, or employee of the carrier convicted of a prescribed felony from serving in any other capacity with a carrier.

(6) Under the act, every household goods carrier and every officer, director, agent, or employee of any household goods carrier who violates or who fails to comply with, or who procures, aids, or abets any violation by any household goods carrier of the act, or who fails to obey, observe, or comply with any order, decision, rule, regulation, direction, demand, or requirement of the commission, or of any operating permit issued to any household goods carrier, or who procures, aids, or abets any household goods carrier in its failure to obey, observe, or comply with any such order, decision, rule, regulation, direction, demand, requirement, or operating permit, is guilty of a misdemeanor, punishable as prescribed.

This bill would make it a violation of the act to hire, retain, or otherwise allow a person who has been convicted of a prescribed felony to serve in any capacity with the carrier.

(7) By establishing new violations of the act, which would be a misdemeanor, this bill would create new crimes, thereby imposing a state-mandated local program.

(8) The act authorizes the commission, as an alternative to the cancellation, revocation, or suspension of an operating permit, to impose a fine not to exceed \$20,000.

This bill would raise the authorized fine limit to \$30,000.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 764 (AB 2231) Pavley Accessibility of emergency services information: working group.

Existing law requires the Office of Emergency Services to perform various activities concerning preparedness for, and the provision of services during, emergencies. These activities include coordination with state and local agencies.

This bill would require the Director of the Office of Emergency Services to convene a working group consisting of a specified membership to consider and make recommendations with respect to a system for the transmission of emergency alerts to the public through a public-private partnership, subject to specified criteria. It would require the director to report the working group's findings and recommendations to the Legislature within one year of the date the working group is convened.

The bill would appropriate \$150,000 for the term of the 2006–07 and 2007–08 fiscal years from specified funds in the Federal Trust Fund to the Office of Emergency Services for the purposes of the bill.

#### Ch. 765 (AB 2253) Hancock Vehicles: illegal dumping.

Existing law prohibits the dumping of various matters upon the highways. Existing law makes it an infraction for a person to dump or cause to be dumped waste matter in or upon specified public or private property and a misdemeanor for a person to dump or cause to be dumped a commercial quantity of waste matter in or upon specified public or private property. Existing law makes it either a misdemeanor or felony for a person to knowingly cause the dumping of hazardous substance on specified property.

This bill would authorize a court to impound a vehicle used in the illegal dumping of waste matter, as defined, or harmful waste matter, as defined, for a time period of up to 6 months, upon the misdemeanor or felony conviction of a person for the illegal dumping of waste matter or harmful waste matter, if the person is the registered owner of the vehicle or registered owner's agent, and has one or more prior convictions, for illegally dumping waste matter or harmful waste matter, that are not infractions. The bill would make this impoundment procedure inapplicable, if there is a community property interest in the vehicle that is owned by a person other than the defendant under specified circumstances.

The bill would also authorize the court in a criminal action against a person, who is charged with a misdemeanor or felony violation of illegally dumping harmful waste matter, on the motion of the prosecutor or county counsel, to declare a vehicle used in the commission of the violation, upon conviction, to be a nuisance and to order it sold, if the person has 2 or more prior convictions that are not infractions, for illegally dumping waste matter, and the person is the registered owner or the registered owner's agent or employee. The bill would require the legal and registered owners be provided with a specified notice regarding the sale of the vehicle. The bill would specify the distribution of the proceeds from the sale of the vehicle. The bill would prohibit the sale of the vehicle under specified circumstances.

Ch. 766 (AB 2254) Goldberg Low performing schools: grant programs.

(1) Existing law establishes the Immediate Intervention/Underperforming Schools Program that invites schools that score below the 50th percentile on certain achievement tests to participate in the program, and provides specified funding to those schools. Existing law requires the Superintendent of Public Instruction to take specified actions with regard to a school that is state-monitored under this program if the school has not met certain growth targets.

This bill would permit the use of state and local funding, in addition to the federal funding that is currently permitted to be used, if a school is required by the Superintendent to contract with an outside entity to provide supplemental instruction to high-priority pupils, as specified.

(2) Existing law establishes the High Priority Schools Grant Program under which funds are made available to eligible low performing schools for implementation of a school action plan that includes specified components.

This bill would revise the grant program substantially to (a) require the Superintendent to invite a 2nd cohort of schools to participate in the grant program beginning in the 2005–06 fiscal year; (b) revise the application procedure for the grant program; (c) revise the conditions requiring state monitoring of schools in the grant program; and (d) revise the procedures for establishment of school assistance and intervention teams for certain schools in the grant program.

The bill would make other, conforming changes in existing law.

Ch. 767 (AB 2264) Pavley Purchases: vehicles: state fleet.

Existing law makes it the policy of the state to minimize the economic and environmental costs due to the use of petroleum-based fuels and other transportation fuels by state agencies. Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission), the Department of General Services (department), and the State Air Resources Board, in consultation with other state agencies as specified, to develop and adopt fuel-efficiency specifications governing the purchase by the state of motor

vehicles and replacement tires. Existing law requires the Energy Commission and the department, in developing the specifications, to jointly conduct a study to examine state vehicle purchasing patterns and to analyze the costs and benefits of reducing the energy consumption of the state fleet by no less than 10% on or before January 1, 2005.

Existing law required each state office, agency, and department, on or before December 31, 2005, to review its vehicle fleet and, upon finding it is fiscally prudent, cost effective, or otherwise in the public interest to do so, to dispose of nonessential sport utility vehicles and four-wheel drive trucks from its fleet and replace those vehicles with more fuel efficient front-wheel drive passenger cars and trucks.

This bill would require, on or before June 1, 2007, the department in consultation with the Energy Commission to establish a minimum fuel economy standard, as specified, for the purchase of passenger vehicles and light duty trucks for the state fleet that are powered solely by internal combustion engines utilizing fossil fuels. The bill would require that on or after January 1, 2008, new state fleet purchases of these vehicles by all state entities, as defined, would have to meet this minimum fuel economy standard. The bill would exempt authorized emergency vehicles and certain other identified vehicles from this requirement. The bill would also exempt vehicles modified for the purpose of providing services to disabled individuals, as specified, or as a reasonable accommodation to a disabled employee, as defined. The bill would exempt the University of California from its provisions, except to the extent that the Regents of the University of California, by appropriate resolution, make those provisions applicable.

Ch. 768 (AB 2265) Nava Emergency medical services.

Under existing law, until January 1, 2007, Santa Barbara County is authorized to collect additional revenue penalties to pay for emergency medical services, as specified.

This bill would authorize Santa Barbara County to collect additional revenue penalties to pay for emergency medical services until January 1, 2009, thereby imposing additional duties on local officials. This bill would also make related legislative findings and declarations.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 769 (AB 2268) Saldana Sport fishing: licenses: fees: exceptions.

Existing law requires every person over the age of 16 years who takes any fish, reptile, or amphibia for any purpose other than profit to first obtain a license for that purpose and to have that license on his or her person or in his or her immediate possession when engaged in carrying out any activity authorized by the license, as provided. Existing law provides for specified exceptions to the license requirement, including a provision requiring the Department of Fish and Game to issue a reduced fee sport fishing license to specified applicants, including, but not limited to, disabled veterans having a 50% or greater service-connected disability, if certain requirements are met.

This bill would authorize the department, upon application, to issue, free of any charge or fee, a sport fishing license to an eligible nonprofit organization for day-fishing trips that provide recreational rehabilitation therapy for active duty members of the United States military who are currently receiving inpatient care in a military or Veterans Administration hospital and veterans with service-connected disabilities.

Ch. 770 (AB 2276) Pavley Ozone: indoor air cleaning devices.

(1) Existing law imposes various limitations on emissions of air contaminants for the control of air pollution from vehicular and nonvehicular sources, including emissions of volatile organic compounds from consumer products. Existing law generally designates the

State Air Resources Board as the state agency with the primary responsibility for the control of vehicular air pollution, and air pollution control districts and air quality management districts with the primary responsibility for the control of air pollution from all sources other than vehicular sources. Existing law requires each district to attain ambient air standards for specified air pollutants, including, but not limited to, ozone. Existing law classifies emissions of ozone in nonattainment areas as moderate, serious, severe, or extreme. Existing law generally sets forth crimes and penalties for violations of air pollution laws and any rule, regulation, permit, or order of the state board.

This bill would require the state board, on or before December 31, 2008, to develop and adopt regulations, consistent with federal law and including specified elements, to protect public health from ozone emitted by indoor air cleaning devices, including both medical and nonmedical devices, used in occupied spaces. Because a violation of these regulations would come within the existing provision making a violation of state board regulations a crime, this bill would create a state-mandated local program by expanding an existing crime. The bill would make related legislative findings and declarations. The bill would authorize the state board to seek a preemption waiver from the federal government to authorize the state board to adopt regulations that are more stringent than federal law.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 771 (AB 2280) Leno Sexually transmitted diseases.

Existing law permits a physician or nurse practitioner, who diagnoses a sexually transmitted chlamydia infection, to prescribe, dispense, furnish, or otherwise provide prescription antibiotic drugs to that patient's sexual partner or partners without examination of that patient's partner or partners.

This bill would extend these provisions to cover gonorrhea or other sexually transmitted disease infection, as determined by the department.

#### Ch. 772 (AB 2282) Oropeza Federally-qualified health centers.

Existing law, with certain exceptions, prohibits the offer, delivery, receipt, or acceptance by any healing arts licensee regulated by the Business and Professions Code or under the Chiropractic Initiative Act of any rebate, refund, commission, preference, patronage dividend, discount, or other consideration, as compensation or an inducement for referring patients, clients, or customers to any person. A violation of this provision is a crime.

This bill would provide that the offer, delivery, receipt, or acceptance of any consideration between a federally-qualified health center, as defined, and any individual or entity providing goods, items, services, donations, loans, or a combination thereof to the health center is permitted only if the transaction is consistent with federal law.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits.

Existing law provides that any person who solicits or receives any remuneration in return for the referral, or promised referral, of any individual to a person for the furnishing or arranging for the furnishing of any service or merchandise for which payment may be made under the Medi-Cal program, or in return for the purchasing, leasing, ordering, or arranging for, or recommending the purchasing, leasing, or ordering of any goods, facility, service, or merchandise for which payment may be made under that program, is guilty of a crime, except as specified. Existing law further provides that any person who offers or pays any remuneration to refer any individual to a person for the furnishing or arranging for furnishing of any service or merchandise for which payment may be made under the Medi-Cal program, or to purchase, lease, order, or arrange for or recommend the purchasing, leasing, or ordering

of any goods, facility, service, or merchandise for which payment may be made under that program, is guilty of crime, except as specified.

This bill would exempt from the above criminal provisions practices or transactions between a federally-qualified health center, as defined, and any individual or entity only to the extent sanctioned or permitted by federal law.

This bill would incorporate additional changes to Section 650 of the Business and Professions Code, proposed by AB 225, to be operative only if AB 225 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

Ch. 773 (AB 2341) Villines Tax clearance certificate: minimum franchise tax: relief.

Existing law provides that every corporation incorporated in this state, qualified to transact intrastate business in this state, or doing business in this state is subject to the minimum franchise tax. Liability for the minimum franchise tax begins on the earlier of the date of incorporation, qualification, or commencement of business within this state. The annual obligation to pay the franchise tax ends on the effective date of dissolution or withdrawal or, if later, the date the corporation ceases to do business within the state.

Existing law requires a dissolving or withdrawing corporation subject to tax in this state to pay a tax for the year it ceases to do business in California. The amount of tax owed is measured by the corporation's net income for its final taxable year, but cannot be less than the minimum franchise tax.

Existing law requires, prior to the dissolution of a corporation, that the corporation is required to obtain a Tax Clearance Certificate from the Franchise Tax Board certifying that its tax liabilities, if any, have been paid, assumed, or guaranteed by bond or otherwise.

Existing law also provides that every limited partnership, limited liability partnership, and limited liability company registered in this state, qualified to transact intrastate business in this state, or doing business in this state is subject to an annual tax equal to the minimum franchise tax. Liability for the annual tax begins on the date of registration with the Secretary of State, qualification, or commencing to do business within this state. The obligation to pay the annual tax ends on the effective date of cancellation of the entity or the date the entity ceases to do business in the state.

This bill would eliminate the requirement that, prior to dissolution of a corporation, the corporation obtain a tax clearance certificate and instead provide that the Secretary of State notify the Franchise Tax Board of the dissolution.

This bill would provide that the minimum franchise tax and the annual tax, as applicable, would not be assessed against these entities in the year that a final return is filed if the entity did not thereafter do business in California and dissolution, surrender, or cancellation of the entity is completed before the end of 12-month period following the date the final tax return was filed.

This bill would permit certain suspended corporations to seek dissolution without requiring payment of the accrued tax liability for years in which the corporation was inactive and not doing business.

This bill would also make conforming changes to existing law.

This bill would incorporate specified changes proposed by AB 339 if both this bill and AB 339 are enacted.

This bill would take effect immediately as a tax levy.

Ch. 774 (AB 2357) Karnette Assisted outpatient mental health treatment.

Existing law, Laura's Law, establishes a demonstration project in which a county may elect to participate in an assisted outpatient mental health treatment program. Under Laura's Law a court may order an adult to obtain assisted outpatient treatment if prescribed criteria are met, including, but not limited to, that the person suffers from mental illness, that there has been a clinical determination that the person is unlikely to survive safely in the community without

supervision, and that the person has a history of not complying with treatment. Existing law repeals these provisions on January 1, 2008.

This bill would extend the repeal date to January 1, 2013.

The bill would also require the State Department of Mental Health to submit a report and evaluation to the Governor and the Legislature by July 31, 2011.

Ch. 775 (AB 2373) Aghazarian Automated drug delivery system.

Existing law provides for skilled nursing and intermediate care facilities that use an automated drug delivery system to store and distribute drugs to accurately track the movement of drugs into and out of the system.

This bill would include nursing facilities within the scope of that requirement.

Under existing law, after the pharmacist reviews the prescriber's order, access by licensed personnel to the automated drug delivery system is limited to the drug as ordered by the prescriber and reviewed by the pharmacist and that is specific to the patient.

This bill, until January 1, 2012, would permit access by licensed personnel to multiple drugs that are not patient specific only if the automated drug delivery system has both electronic and mechanical safeguards in place to ensure that only the drugs delivered to the patient are specific to that patient. The bill would require each facility using such an automated drug delivery system to notify the department in writing prior to utilization of the system, as provided. The bill would require the department, as part of its oversight of those facilities, to review a facility's medication training, storage, and security, and its administration procedures related to its use of an automated drug delivery system.

Existing law requires that a pharmacist stock an automated drug delivery system, unless the system utilizes removable pockets, drawers, or similar technology, in which case stocking may be done outside the facility and delivered to the facility under specified conditions.

This bill would specify that this exception applies to the use of removable pockets, cards, drawers, or similar technology.

Existing law exempts drugs dispensed from an automated drug delivery system that meets specified requirements from certain drug container labeling requirements if, among other things, those drugs are contained in unit dose packaging.

This bill would include within the definition of unit dose packaging drugs packaged in blister pack cards.

Existing law makes a violation of statutory requirements applicable to licensing of the above facilities a crime. By expanding the scope of the application of the above requirements to include nursing facilities that have an automated drug delivery system, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 776 (AB 2393) Levine Telecommunications: emergency service.

(1) Existing law authorizes the Public Utilities Commission to supervise and regulate every public utility, including telephone corporations, and to do all things necessary and convenient in the exercise of its power and jurisdiction. The existing Public Utilities Act requires the commission to prescribe rules for the performance of any service or the furnishing of any commodity of the character furnished or supplied by any public utility and requires the public utility to furnish the commodity or render the service within the time and upon the conditions provided in the rules of the commission.

This bill would require the commission, in a single rulemaking or other appropriate proceeding, not to exceed 18 months in duration, to consider the need for performance reliability standards, and to develop and implement performance reliability standards, for

backup power systems installed on the property of residential and small commercial customers by a facilities-based provider of telephony services, upon determining that the benefits of the standards exceed the costs. The bill would require the commission, before January 1, 2008, to prepare and submit to the Legislature a report on the results of the proceeding.

Under existing law, a violation of an order or direction of the commission is a crime.

Because the provisions of this bill are part of the act and require action by the commission to implement its requirements, a violation of these provisions would impose a state-mandated local program by creating a new crime.

(2) Existing law authorizes the commission to control and regulate the use of automatic dialing-announcing devices, which are automatic equipment that incorporates a storage capability of telephone numbers to be called or a random or sequential number generator capable of producing numbers to be called and that, working alone or in conjunction with other equipment, can disseminate a prerecorded message to the telephone number being called. Existing law exempts from that commission regulation law enforcement agencies, fire protection agencies, public health agencies, public environmental health agencies, city or county emergency services planning agencies, or any private for-profit agency operating under contract with, and at the direction of, one or more of these agencies, placing calls through automatic dialing-announcing devices to provide public service information relating to public safety, information concerning police or fire emergencies, or warnings of impending or threatened emergencies.

This bill would require the commission, in consultation with the Office of Emergency Services and the Department of General Services, to open an investigation to determine whether standardized notification systems and protocol should be utilized by the above-described entities to facilitate notification of affected members of the public of local emergencies. The bill would prohibit the commission from establishing standards for notification systems or standard notification protocol unless it determines the benefits of the standards exceed the cost. The bill would require the commission, before January 1, 2008, to prepare and submit to the Legislature a report on the results of the proceeding, including recommendations for funding notification systems and any statutory modifications needed to facilitate notification of affected members of the public of local emergencies.

(3) Existing provisions of the Warren-911-Emergency Assistance Act establishes the number "911" as the primary emergency telephone number for use in the state.

This bill would require the commission, in consultation with the Office of Emergency Services and the Department of General Services, to open an investigative or other appropriate proceeding to identify the need for telecommunications service systems not on the customer's premises to have backup electricity to enable telecommunications networks to function and to enable the customer to contact a public safety answering point operator during an electrical outage, to determine performance criteria for backup systems, and to determine whether certain recommendations for backup systems have been implemented by telecommunications service providers operating in California. The bill would require the commission to develop and implement performance reliability standards if it determines doing so is in the public interest and determines that the benefits of the standards exceed the costs. The bill would require the commission to determine the feasibility of the use of zero greenhouse gas emission fuel cell systems to replace diesel backup power systems. The bill would require the commission, before January 1, 2008, to prepare and submit to the Legislature a report on the results of the proceeding.

(4) The bill would appropriate \$596,719 from moneys derived from regulatory fees deposited in the Public Utilities Commission Utilities Reimbursement Account in the General Fund for costs incurred by the commission in the implementation of the bill.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 777 (AB 2408) Negrete McLeod Pharmacies.

Existing law, the Pharmacy Law, provides for the licensing and regulation of pharmacists and pharmacies by the Board of Pharmacy in the Department of Consumer Affairs. A violation of the Pharmacy Law is a crime.

Existing law defines a pharmacist and a pharmacy, requires pharmacists and pharmacies to be licensed by the board, and authorizes a licensee to engage in certain activities. Existing law also sets forth activities that constitute unprofessional conduct for a pharmacist to engage in.

This bill would require a pharmacist to be a natural person, and would entitle a licensed pharmacist to practice pharmacy within or outside of a licensed pharmacy. The bill would revise the activities in which a pharmacist may engage, including the adjustment of prescriptions, would revise the pharmacist's responsibilities and requirements with regard to certain activities, and would make certain additional acts or omissions unprofessional conduct.

Existing law defines a nonresident pharmacy and requires a nonresident pharmacy to meet certain criteria, including registration with the board. Existing law authorizes the board to deny, revoke, or suspend a nonresident registration for failure to comply with specified requirements or for conduct that causes serious bodily or psychological injury to a California resident, in specified circumstances.

This bill would delete the authorization for the board to deny, revoke, or suspend a nonresident registration for failure to comply with specified requirements or for conduct causing serious bodily harm or psychological injury to a California resident, and would instead authorize the board to deny, revoke, or suspend a nonresident pharmacy registration, issue a citation or letter of admonishment, or take any other action against a nonresident pharmacy that it may take against a resident pharmacy on any of the same grounds upon which the action might be taken against a resident pharmacy, if action may be taken against the nonresident pharmacy in its own state for the conduct. The bill would also authorize the board to report violations of laws or regulations by a nonresident pharmacy to any appropriate state or federal regulatory or licensing agency.

This bill would revise and recast related provisions of the Pharmacy Law.

Because this bill would create new requirements and prohibitions under the Pharmacy Law, the violation of which would be a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 778 (AB 2419) Wyland School facilities: new construction and modernization: career technical education facilities.

Existing law, the Leroy F. Greene School Facilities Act of 1998, requires the State Allocation Board to allocate to applicant school districts, prescribed per-unhoused-pupil state funding for construction and modernization of school facilities, including hardship funding, and supplemental funding for site development and acquisition. The existing act requires a school district, as part of its application for large construction and modernization projects, to certify, in consultation with the career technical education advisory committee, that it has considered the need for vocational and career technical facilities to adequately meet its program needs.

This bill would require the career technical education advisory committee of a school district, in conjunction with an application of the district for funding of any construction or modernization project, and as a condition of the district receiving funds for the project, to

provide written confirmation that the need for vocational and career technical facilities is being adequately met within the district, as specified.

**Ch. 779 (AB 2436) Ruskin Imprisonment: parole: programs.**

Existing law requires the Department of Corrections and Rehabilitation to establish 3 pilot programs to provide intensive training and counseling to female parolees to help the parolees reintegrate into society.

This bill would require the Department of Corrections and Rehabilitation to establish a pilot program in East Palo Alto for parolees returning to East Palo Alto which would conduct needs-based assessments of the individual parolees, partner with East Palo Alto police officers, and blend enforcement and programming services, as specified. The bill would require the department to maintain information on the effectiveness of the program, as specified, and report to the Legislature on request. The bill would state its operation is contingent upon consent by the City of East Palo Alto to participate in the pilot program. The bill would also provide that these provisions would be repealed on January 1, 2010.

**Ch. 780 (AB 2462) Mullin State teachers' retirement.**

(1) The State Teachers' Retirement Law prescribes the rights and benefits of the members of the Defined Benefit Program of the State Teachers' Retirement Plan. The law requires participating employers to contribute a specified percentage of creditable compensation of members of the program to the system, and these contributions are deposited in the Teachers' Retirement Fund, as specified. Existing law creates the Teachers' Health Benefits Fund, a continuously appropriated trust fund, for the purpose of developing health care benefit programs, which is funded by employer contributions, as specified.

This bill would create the Teachers' Retirement Program Development Fund, to be continuously appropriated, to pay any costs determined by the board to be related to the development of programs authorized by statute that the board determines directly or indirectly enhance the financial security of members, participants, or beneficiaries of the State Teachers' Retirement Plan, upon a specified resolution by the Teachers' Retirement Board. The Teachers' Retirement Program Development Fund would be funded by employer contributions in an amount to be determined by the board. The bill would require an amount equal to these employer contributions together with interest, as specified, to be deposited in the Teachers' Retirement Fund from moneys generated from the programs receiving development funds pursuant to these provisions, on terms and conditions established by the board.

(2) The State Teachers' Retirement Law requires that an annuity contract and custodial account, as described in Section 403(b) of the Internal Revenue Code, be offered to specified employees who perform creditable service subject to coverage by the Defined Benefit Program of the State Teachers' Retirement Plan. The annuity contract and custodial account may be administered by a qualified 3rd-party administrator. The law permits deferred compensation plans, as described in Section 457 of the Internal Revenue Code, to be offered to participating employers for the employers to establish and offer to their employees, and these plans may also be administered by a 3rd-party administrator. Existing law requires the governing board of a school district when drawing orders for salary payments to make, without charge, certain reductions connected to participation in various programs, including deferred compensation plans.

This bill would additionally provide for deferred compensation plans and annuity contracts and custodial accounts that permit the employer to enter into a contract with the system or a 3rd-party administrator to provide administrative or compliance services for those plans, contracts, and accounts, and would specify the rights and obligations of employers, the system, and 3rd-party administrators in this regard. The bill would also specify that the State Teachers' Retirement System may provide employers services to ensure compliance with federal law, and to provide for cost recovery, as specified.

(3) Existing law permits a community college employee to deduct from his or her salary payments for participating in specified programs, including, but not limited to, deferred compensation, group life or disability insurance, legal expense insurance, and hospital service contracts.

This bill would additionally provide for deferred compensation plans and annuity contracts and custodial accounts that permit a community college district to enter into a contract with the system or a 3rd-party administrator to provide administrative or compliance services for those plans, contracts, and accounts and would specify the rights and obligations of the community college district and 3rd-party administrators in this regard.

Ch. 781 (AB 2466) Daucher CalWORKs eligibility: welfare-to-work activities and excluded assets.

Existing federal law provides for allocation of federal funds through the federal Temporary Assistance for Needy Families (TANF) block grant program to eligible states, with California's version of this program being known as the California Work Opportunity and Responsibility to Kids (CalWORKs) program.

Under the CalWORKs program, each county provides cash assistance and other benefits to qualified low-income families and individuals who meet specified eligibility criteria, including limitations on income and assets generally applicable to public assistance programs.

Under existing law, with certain exceptions, every individual, as a condition of eligibility for aid under the CalWORKs program, is required to participate in welfare-to-work activities. Under existing law, these activities in which a recipient may engage include, among others, job search and job readiness assistance, as described.

This bill would include financial management education within the definition of job search and job readiness assistance.

Existing law exempts from consideration when determining public assistance program eligibility the principal and interest in an individual development account, which is a savings account established in accordance with federal law that may only be used for specified purposes.

This bill would similarly exclude the principal and interest in a 401(k) plan, a 403(b) plan, an IRA, a 457 plan, a 529 college savings plan, or a Coverdell ESA, as these terms are defined in the bill, from consideration as property only when determining eligibility and the amount of CalWORKs assistance for CalWORKs recipients, and not for new program applicants.

Because state funds are continuously appropriated to pay for a share of county aid grant costs, this bill would, by expanding the potential pool of CalWORKs recipients, make an appropriation. In addition, because each county is required to administer the CalWORKs program, by giving counties new responsibilities, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 782 (AB 3064) Committee on Public Safety Corrections: Reentry Advisory Committee.

Existing law authorizes the Secretary of the Department of Corrections and Rehabilitation to contract for the establishment and operation of community correctional reentry centers and work furlough programs.

This bill would require the secretary to establish a Reentry Advisory Committee, comprised as specified, to advise the secretary on matters related to the successful planning,

implementation, and outcomes of all reentry programs and services in the department, with the goal of reducing recidivism. This requirement would be repealed on January 1, 2011.

Ch. 783 (AB 2513) Pavley Pupils: autism: training and information.

Existing law requires every individual with exceptional needs, as defined, who is eligible to receive educational instruction, related services, or both, under existing law to receive educational instruction, related services, or both, at no cost to his or her parents or, as appropriate, to him or her.

This bill would require the Superintendent of Public Instruction to convene, with input from the University of California, the California State University, relevant fiscal and policy committees of the Legislature, the Legislative Blue Ribbon Commission on Autism, the State Department of Developmental Services, and other appropriate entities, an advisory committee, as specified. The bill would require the advisory committee to develop specified recommendations that would identify the means by which public and nonpublic schools, including charter schools, may better serve children with autism.

The bill would declare that the recommendations of the advisory committee are not to be construed or applied as state-imposed standards or binding on any individualized education program (IEP) team, special education official, or child with autism. The bill also would declare that its provisions do not prescribe or define an appropriate educational or rehabilitative program for a child with autism. The bill would declare that the recommendations developed by the advisory committee do not govern the services and supports provided pursuant to the Lanterman Developmental Disabilities Services Act. The bill also would declare that its provisions do not prescribe or define an appropriate individualized family service plan or an individual program plan, as specified, for a child with autism. The bill would require, on or before November 1, 2007, the advisory committee to submit its recommendations to the Legislature and to the Governor.

The bill would appropriate \$100,000 from the General Fund to the Superintendent for purposes of this act.

Ch. 784 (AB 2521) Jones Firearms.

Existing law requires persons who hold a federal firearms license to either obtain a verification number from the Department of Justice when delivering, transferring, or selling a firearm to another federal firearms licensee, or show proof of exemption from local licensing requirements. Violation of these provisions is a misdemeanor.

This bill would revise those provisions by removing the option of showing proof of exemption from local licensing and require the transferors to obtain a verification number. The department would then determine if an exemption applies, as specified. The bill would expand the use of the verification number by the department for certain purposes. Violation of these provisions would be punishable as a misdemeanor.

By changing the definition of an existing crime, this bill would impose a state-mandated local program.

Existing law requires a person who as a dealer, importer, manufacturer, or collector of firearms holds a federal firearms license, and whose licensed premises are within the state, to provide a copy of the license to the Department of Justice, as specified. A violation of these provisions is an infraction.

This bill would repeal those provisions and instead provide, commencing January 1, 2008, for a centralized list of federal firearms licensees who are exempt from obtaining a firearms dealer license pursuant to state law. Among other things, to be on the centralized exempted federal firearms licensee list, the licensees would have to provide the basis for their exemption to the department. The bill would provide that supplying a fictitious name, knowingly supplying false information, or knowingly omitting information from the declaration would be punishable as a misdemeanor.

By creating a new crime, this bill would impose a state-mandated local program.

The bill would authorize, commencing January 1, 2008, the department to assess an annual fee upon those licensees for purposes of maintaining the list and for other enforcement and compliance costs. The bill would provide that those licensees may not import or receive firearms unless they are listed on the centralized list of exempted federal firearms licensees or exempted firearms manufacturers.

A violation of that requirement would be punishable as a misdemeanor.

The bill would require certain records be kept for specified periods of time by the exempted federal licensees.

A violation of those provisions would be punishable as a misdemeanor.

By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 785 (AB 2572) Emmerson Housing element: colleges.

Existing law requires each city, county, or city and county to prepare and adopt a general plan for its jurisdiction that contains certain mandatory elements, including a housing element. As part of a revision of a general plan, each council of governments or delegate subregion is required to survey each of its member jurisdictions regarding specified housing factors for use in developing a methodology for distributing existing and projected regional housing need.

This bill would require each council of governments or delegate subregion to include among factors to develop this methodology the housing needs generated by the presence of a private university or a campus of the California State University or the University of California within any member jurisdiction.

This bill would incorporate additional changes in Section 65584.04 of the Government Code, proposed by AB 802 and AB 2158, to become operative only if this bill and either AB 802 or AB 2158, or all 3 bills, are chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

#### Ch. 786 (AB 2573) Leno Electricity: Hetch Hetchy Water and Power solar generation.

(1) Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations. Existing law authorizes the City and County of San Francisco to elect to designate specific photovoltaic electricity generation facilities meeting specified conditions as Hetch Hetchy Water and Power (HHWP) solar generation facilities, and upon election and the filing and acceptance of an advice letter with the commission establishing rates, Pacific Gas and Electric Company (PG&E) is required on a monthly basis, to credit the City and County of San Francisco for certain electricity generated and delivered to the electric grid by HHWP solar generation in accordance with specified rate criteria. Existing law provides that the HHWP solar generation may not exceed 5 megawatts of peak generation capacity in total. Existing law provides that no single photovoltaic generation project may exceed one megawatt of peak generation capacity. Existing law provides that where, after a true-up process is completed, the total electricity delivered to the site by PG&E is less than the total electricity delivered to the grid by the HHWP photovoltaic electricity generation facility at the site, the City and County of San Francisco is a net energy producer at that site and receives no credit or offset for the excess electricity exported to the grid from the site.

This bill would authorize 2 different HHWP photovoltaic electricity generation mechanisms. The existing authorization, as modified, would apply to HHWP at-site solar generation, as defined. The bill would provide that HHWP at-site solar generation may not, exclusive of qualifying remote load, as defined, exceed 15 megawatts of peak generation

capacity in total. The bill would additionally authorize the City and County of San Francisco to use HHWP remote solar generation, as defined, to supply electricity to qualifying remote load by designating those facilities to be served by HHWP remote solar generation. The bill would delete the provision that no single photovoltaic generation project may exceed one megawatt of peak generation capacity. The bill would require that PG&E accept any electricity exported to the grid by HHWP remote solar generation, up to the amount of electricity contemporaneously being used by the qualifying remote load, and to treat the electricity accepted as behind the meter generation that offsets the electrical usage of qualifying remote load. The bill would make the City and County of San Francisco responsible for scheduling the electricity exported to the grid from HHWP remote solar generation. The bill would require that HHWP remote solar generation sites and qualifying remote load sites have meters capable of measuring exports and usage of electricity sufficient to determine credits or offsets and would make the City and County of San Francisco responsible for the cost of those meters. The bill would require that the appropriate regulatory agency ensure that the delivery of electricity by HHWP remote solar generation to qualifying remote load, and the granting of offsets to the City and County of San Francisco, not result in a shifting of costs to bundled service customers.

Existing law provides that if the City and County of San Francisco engages in retail sales to customers within the service territory of PG&E, the above described provisions relative to HHWP solar generation become inoperative.

This bill would delete this provision.

(2) The bill would declare that, due to the special circumstances applicable only to HHWP solar generation facilities, a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution, and the enactment of a special statute is therefore necessary.

(3) Under existing law, a violation of the Public Utilities Act, a filed tariff, or an order of the commission is a crime.

Because the provisions of this bill would require the filing of a new tariff, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 787 (AB 2576) De La Torre Public utilities: California Alternate Rates for Energy program.

(1) Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations and gas corporations, as defined. Existing law authorizes the commission to fix the rates and charges for every public utility, and requires that those rates and charges be just and reasonable. Existing law requires the commission to establish a program of assistance to low-income electric and gas customers, referred to as the California Alternate Rates for Energy (CARE) program.

The commission has authorized the state's 3 largest investor-owned electrical corporations to adopt and administer Family Electric Rate Assistance (FERA) programs to provide rate reductions for certain households.

This bill would require the commission to ensure that an electrical corporation or gas corporation with a commission-approved program to provide discounts based upon economic need in addition to the CARE program, including FERA programs, utilize a single application form, to enable an applicant to alternatively apply for any assistance program for which the applicant may be eligible. The bill would make a statement of legislative intent that the commission evaluate and make recommendations regarding the CARE program, as specified.

(2) Under existing law, a violation of the Public Utilities Act or an order or direction of the commission is a crime.

Because a violation of an order or decision of the commission implementing the requirements of the bill would be a crime, the bill would impose a state-mandated local program by creating a new crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 788 (AB 2586) Parra Sentencing: veterans: treatment programs.

Under existing law, if a convicted defendant was a member of the military forces of the United States who served in combat in Vietnam and who suffers from substance abuse or psychological problems resulting from that service, the court may, under specified circumstances, order the defendant committed to the custody of federal correctional officials for incarceration for a term equivalent to that which the defendant would have served in state prison.

This bill would instead provide that if a person is convicted of a criminal offense and alleges that he or she committed the offense as a result of post-traumatic stress disorder, substance abuse, or psychological problems stemming from service in combat in the United States military, the court shall hold a hearing prior to sentencing to make a determination about that allegation. If the court finds that the defendant's crime was committed as a result of one of those factors related to serving in combat, and the court places the person on probation, the bill would authorize the court to place the person into a treatment program, as specified.

Ch. 789 (AB 2587) Liu Contaminated property: methamphetamine cleanup: mobilehomes: recreational vehicles.

(1) Existing law, the "Methamphetamine Contaminated Property Cleanup Act of 2005" requires a local health officer to take specified actions after receiving notification from a law enforcement agency of potential contamination, or of known or suspected contamination, of property by methamphetamine laboratory activity. For purposes of the act, the term "property" is defined as excluding, until January 1, 2008, a mobilehome park, a manufactured housing park, or a manufactured housing community, and also a mobilehome or manufactured housing located in those parks or communities. Existing law also defines the term "designated local agency" as the city or county and agency designated by the local health officer to carry out the act.

This bill would repeal the exclusion of those parks, communities, mobilehomes, and manufactured homes from the act and would instead specify that property, for purposes of the act, includes those parks and communities and a mobilehome or manufactured home located in a mobilehome park or a special occupancy park, as defined, and a recreational vehicle that is sited in a mobilehome park or special occupancy park.

The bill would additionally include, as a designated local agency, a city or county agency authorized by the local health officer in that jurisdiction, thereby imposing a state-mandated local program by imposing new duties upon local agencies. The bill would revise the inspection and notice provisions of the methamphetamine cleanup act, with regard to mobilehomes, manufactured homes, and recreational vehicles. The bill would require the local health officer to determine who is responsible for the remediation required by the act when the local health officer conducts an inspection of a mobilehome, manufactured home, or recreational vehicle and the mobilehome park or special occupancy park on which it is located.

The bill would authorize a mobilehome park owner or special occupancy park owner, as defined, to take specified actions, if the registered owner of a mobilehome, manufactured

home, or recreational vehicle does not take the action required by an order issued by a local health officer pursuant to the act or does not pay the city or county for specified costs of remediation. The bill would specify that the actions the mobilehome park owner or special occupancy park owner may take under those circumstances include the remediation of the mobilehome, manufactured home, or recreational vehicle, or causing an authorized contractor to remove and dispose of the mobilehome, manufactured home, or recreational vehicle.

The bill would also make conforming changes to the act with regard to vacating the affected property, and the recording for, and release of, a lien, restraint, or vehicle license stop, as defined, for the costs of remediation.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 790 (AB 2592) Leno California Travel and Tourism Commission.

(1) Existing law, the California Tourism Marketing Act, provides for the California Travel and Tourism Commission, a nonprofit mutual benefit corporation, and provides for a 37-member board of the commission, including the Secretary of Business, Transportation and Housing, 12 members appointed by the Governor, and 24 elected members. The 12 appointed members are required to represent the 12 officially designated tourism regions.

This bill would specify that each appointed member of the commission shall represent only one of those designated tourism regions. The bill would also specify that appointed members are not limited to persons who are employed by or represent assessed businesses. The bill would provide that elected commissioners shall serve 4-year terms and that an appointed or elected commissioner would cease to be a commissioner 90 days following the date on which he or she ceases to meet the criteria for appointment or election as a commissioner, except as specified.

(2) Existing law authorizes the commission to accept voluntary assessments from any person in a travel and tourism related business, except persons whose primary business is gaming.

This bill would delete that exception.

(3) Existing law establishes procedures for imposing assessments on businesses within various tourism industry categories or segments by means of referendum called by the Secretary of Business, Transportation and Housing. Existing law exempts from assessment a small business, defined as a business location with less than \$1,000,000 in California gross annual revenue.

This bill would require the secretary to identify, if possible and provide an opportunity to vote to, businesses that would be newly assessed due to a referendum, and would set forth specified methods by which a business or person sharing common ownership, management, and control of more than one assessed business may calculate the assessment. The bill would also allow the exemption threshold amount to be lowered to not less than \$500,000 by referendum.

This bill would require the commission to submit a referendum to the passenger rental car industry as soon as possible, but not later than March 31, 2007, proposing an assessment level, as specified, upon the passenger rental car industry, as an industry category, for the 2006–07, and 2007–08 fiscal years. The bill would require the commission to report to the secretary if the referendum and assessment rates are agreed to. The bill would require the secretary to provide notice of that agreement to the Legislature and the Secretary of State and to post notice on its Internet Web site.

The bill would make other changes relating to elections of commissioners, voting rights, and assessments that would be operative only if the referendum submitted to the passenger rental car industry, and assessment rates, as specified, have been agreed to.

(4) Under existing law, a passenger vehicle rental company is required to only advertise, quote, and charge a rental rate that includes the entire amount except taxes, a customer facility charge, and a mileage charge, which a renter must pay to hire or lease a vehicle for the period of time to which the rental rate applies. Existing law prohibits a rental company from additionally charging any fee that must be paid by the renter as a condition of renting the vehicle.

This bill would require a rental company, in connection with the rental of a passenger vehicle, to only advertise a rental rate that includes the entire amount, except taxes, a customer facility charge, and a mileage charge, that a renter must pay to rent a vehicle. The bill would specify that when a rental company provides a quote or imposes a charge, it may separately state the rental rate, taxes, customer facility charge, airport concession fee, tourism commission assessment, as defined, and mileage charge. The bill would require a rental company, imposing customer facility charges, airport concession fees, or tourism commission assessments, to provide the person receiving the quote with a specified good faith estimate. The bill would also require a rental company, imposing these charges and fees to clearly and conspicuously disclose, in the rental contract, the specified total for the entire rental. The bill would authorize a renter to bring an action against a rental company for specified damages and equitable relief for a violation of these provisions. The bill would make these provisions operative only if the referendum submitted to the passenger rental car industry, and assessment rates, as specified in (3) above, have been agreed to.

(5) The Budget Act of 2006 (Chapter 47 of the Statutes of 2006; amended by Chapter 48 of the Statutes of 2006), appropriated to the Secretary of Business, Transportation and Housing from the General Fund certain amounts for support of its operations during the 2006–07 fiscal year, and allocated \$7,300,000 of that amount for use by the California Travel and Tourism Commission for promoting California tourism to potential visitors.

This bill would amend the Budget Act of 2006 by reverting the sum of \$6,300,000 to the General Fund from the amounts allocated for use by the California Travel and Tourism Commission if the referendum submitted to the passenger car rental industry, as assessment rates, as specified in (3) above, have been agreed to.

Ch. 791 (AB 2670) Aghazarian Property taxation: regulated railway companies.

(1) The California Constitution requires the State Board of Equalization to assess the property, other than franchises, of a regulated railway company. Existing property tax law provides for the allocation of the assessed value of the unitary property of a regulated railway company that is assessed by the State Board of Equalization among the several tax rate areas within a county where the property is located. Existing property tax law also provides for an annual adjustment of the allocation of this assessed value among tax rate areas for changes in track mileage, and defines track mileage as the number of miles of track, adjusted to reflect the relative importance of mainline, branch, and other track.

This bill would, for the 2007–08 fiscal year and for each fiscal year thereafter, establish a single countywide tax rate area within each county to which the assessed value of specified unitary property of a regulated railway company would be allocated. This bill would require that the revenues derived from the tax on this value be allocated among local entities in the county pursuant to a specified formula. This bill would also require, with respect to a qualified facility, as defined, that 80% of the value of the facility and the revenues derived from taxing this value be allocated in the manner previously described, and would require that the remaining 20% of this value and resulting revenues be allocated exclusively to the local tax rate areas in the county in which the property is located. This bill also would change the definition of track mileage for purposes of these provisions to instead mean the total miles

of track in each county without regard to the relative importance of the track mileage. This bill also would make technical and conforming changes to related provisions.

(2) By imposing new property tax allocation duties upon local officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would change the pro rata shares in which ad valorem property tax revenues are allocated among local agencies in a county, within the meaning of paragraph (3) of subdivision (a) of Section 25.5 of Article XIII of the California Constitution, and thus would require for passage the approval of  $\frac{2}{3}$  of the membership of each house of the Legislature.

(4) This bill would incorporate additional changes to Section 100 of the Revenue and Taxation Code, proposed by SB 1317, to be operative only if SB 1317 and this bill are both enacted, both bills amend the respective section, and this bill is enacted after SB 1317.

#### Ch. 792 (AB 2631) Laird Medi-Cal: injectable drugs: utilization.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits, including prescription drug benefits.

Existing law allows the department to impose utilization controls on certain Medi-Cal benefits, including prescription drug benefits.

Existing law allows the department to enter into contracts for fiscal intermediary services in connection with processing the payment of claims submitted by Medi-Cal providers.

This bill would require the department, with respect to a drug product in an injectable form that is not administered by the patient, to develop and publish a medical benefit drug utilization policy within 180 days of being notified by the manufacturer of approval of the product by the federal Food and Drug Administration, and publish the policy in the Medi-Cal provider bulletin immediately following that 180-day period. The bill would provide that, if the department is unable to complete and publish the policy within that period, the department shall, until completion of the policy, allow providers to use the utilization standards approved by the federal Food and Drug Administration that are contained in the official package circular or insert for the product when the department reviews a provider's submission for utilization of the product. The bill would require the department to allow the product to be billed and reimbursed using a miscellaneous billing code until the permanent code is assigned and published. The bill would require the department to evaluate the necessity of utilization controls, and publish all utilization controls in both the final drug utilization policy and the Medi-Cal provider bulletin. It would further require the department to ensure that the fiscal intermediary enters into the Medi-Cal database the code assigned to the drug product within a specified period.

#### Ch. 793 (AB 2728) Klehs Firearms.

Existing law provides a judicial procedure for declaring a firearm an assault weapon, as specified.

This bill would repeal those provisions.

Existing law authorizes the Attorney General to declare a firearm an assault weapon.

This bill would provide that authorization ends January 1, 2007.

Existing law generally regulates the possession of assault weapons and .50 BMG rifles.

This bill would provide that possession of any assault weapon or of any .50 BMG rifle in violation of specified provisions of law would be a public nuisance. The bill would authorize the Attorney General, any district attorney, or any city attorney to bring an action in superior

court, in lieu of criminal prosecution, to enjoin the possession of the assault weapon or .50 BMG rifle and seek civil fines of up to \$300 for the first assault weapon or .50 BMG rifle that is a public nuisance, and up to \$100 for each additional assault weapon or .50 BMG rifle that is a public nuisance. The bill would further provide that any assault weapon or .50 BMG rifle possessed in violation of specified provisions of law would, subject to exception, be destroyed, as specified. The bill would also provide that upon conviction of any misdemeanor or felony involving an assault weapon, the assault weapon would be deemed a nuisance and disposed of as specified.

Ch. 794 (AB 2745) Jones Hospitals: discharge plans: homeless patients.

Existing law provides for the licensure and regulation of health facilities by the State Department of Health Services. A violation of these provisions is a crime. Existing law requires each hospital to have in effect a written discharge planning policy and process that requires appropriate arrangements for posthospital care and a process that requires that each patient be informed, orally or in writing, of the continuing care requirements following discharge from the hospital, as specified.

This bill would require each hospital to be represented, as specified, in regional planning meetings, convened regionally as defined by the 3 regional hospital associations or through smaller geographic sections comprised of groups of hospitals in one or more counties, to improve the posthospital transition of homeless patients, as specified. The bill would require each regional hospital association, or smaller geographic grouping of hospitals, to invite the county board of supervisors, law enforcement, and others to participate. The bill would require, by January 1, 2008, the development of a specified document based upon the regional planning meetings.

The bill would also prohibit a hospital from causing the transfer of homeless patients from one county to another county for the purpose of receiving supportive services from a social services agency, health care service provider, or nonprofit social service provider within the other county, without prior notification to, and authorization from, the social services agency, health care service provider, or nonprofit social service provider.

By creating a new crime, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 795 (AB 2757) Evans Primary care clinics.

Existing law provides for the licensure and regulation of clinical laboratories and of primary care clinics by the State Department of Health Services. Under existing law, the department is required to approve a licensure application submitted by a primary care clinic meeting specified criteria for its affiliate clinic if, among other matters, both have the same corporate officers and are owned and operated by the same nonprofit organization with the same board of directors.

This bill would authorize a primary care clinic that submits an application for license with the department to, prior to that submission, or concurrent therewith, also apply for licensure or registration of a clinical laboratory that would be operated by the primary care clinic. This bill would permit a primary care clinic that is operating within a network of primary care clinics, as defined, to be issued a license to operate a clinical laboratory pursuant to those provisions, which authorizes the conduct of clinical laboratory tests and examinations from its network of primary care clinics if specified conditions are met.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits.

Existing law generally regulates the reimbursement of providers for Medi-Cal program services.

This bill would provide that for services that are performed at a central laboratory pursuant to the above provisions, the department shall provide Medi-Cal reimbursement directly to the laboratory performing the services and submitting the claim for reimbursement. The bill would prohibit the department from denying payment to a laboratory created pursuant to provisions of the bill if the clinic and the laboratory are owned and operated by the same nonprofit corporation, and the laboratory services are performed on a specimen collected at the clinic for a clinic patient.

The bill would authorize the department to implement utilization controls or other cost-control measures to ensure that medically necessary services are appropriately rendered.

This bill would, until June 30, 2007, also authorize a licensed primary care clinic that is affiliated with a network of primary care clinics to submit to the Medi-Cal program claims for laboratory services until such time that the primary care clinic receives a provider number for the central laboratory if specified requirements are met.

Ch. 796 (AB 2776) Yee Mental health: community treatment facilities: seclusions and restraints.

Under existing law, community treatment facilities are residential facilities that are licensed by the State Department of Social Services and the State Department of Mental Health to provide residential care and mental health treatment services to children in a group setting, and that have the capacity to provide secure containment.

Existing law requires the State Department of Mental Health to adopt regulations establishing program standards for any facility licensed as a community treatment facility. These regulations are required to include standards for treatment, staffing, and for the use of psychotropic medication, discipline, and restraints.

Until January 1, 2007, existing law prohibits the department from requiring 24-hour onsite nursing staff at community treatment facilities. Until January 1, 2007, existing law requires these facilities to retain at least one full-time, or full-time equivalent, registered nurse onsite, in specified circumstances, to have other medical or nursing staff available on call within one hour when necessary, and to have all direct care staff trained in providing first aid and other emergency services. Until January 1, 2007, existing law permits the department to adopt emergency regulations as necessary to implement these provisions.

This bill would extend the termination date of January 1, 2007, to January 1, 2010.

Ch. 797 (AB 2781) Leno Child support collectors.

Existing law governs the collection of child support by local child support agencies, or by means of a writ of execution, a notice of levy, or an earnings assignment order.

This bill would enact provisions regulating the activities of private child support collectors, as defined. Among other things, the bill would require a private child support collector to provide specified notices and disclosures to the child support obligee in a written contract and additional information about child support payments during the term of the contract, authorize the obligee to cancel any contract entered into with that entity in certain circumstances, prescribe the rights of the parties with respect to child support agencies and other governmental entities, and prescribe procedures and remedies for enforcement of the provisions of the act. The bill would also require that every court order for child support issued on or after January 1, 2010, and every child support agreement providing for the payment of child support approved by the court on or after January 1, 2010, include a separate money judgment owed by the child support obligor to pay a fee not to exceed a specified amount. This money judgment would be in favor of the private child support collector and the child support obligee, jointly, as specified. The bill would also establish requirements relating to the conduct and compensation of attorneys who are private child support collectors.

Ch. 798 (AB 2843) Saldana Air pollution.

(1) Existing law grants primary authority for the control of air pollution from vehicular sources to the State Air Resources Board. Existing law authorizes the state board to adopt and implement motor vehicle emissions standards and motor vehicle specifications. Existing law provides for the existence of various clean air programs, including the Carl Moyer Air Quality Standards Attainment Program.

Existing law, notwithstanding a specified provision of the Budget Act of 2001, requires any air quality management district or air pollution control district with a population of 1,000,000 residents or greater, in consultation with the state board, to expend not less than 50% of the moneys appropriated for the Carl Moyer Air Quality Standards Attainment Program, programs to fund the purchase of reduced-emissions schoolbuses, and diesel mitigation programs, in a manner that directly reduces air contaminants or the public health risks associated with air contaminants, in communities with the most significant exposure to air contaminants or localized air contaminants, or both, including communities of minority populations or low-income populations, or both. Existing law makes these provisions inapplicable to those districts with fewer than 1,000,000 residents, but, notwithstanding a specified provision in the Budget Act of 2001, encourages those districts to apply similar funding approaches to the extent each district determines feasible. Existing law repeals these provisions as of January 1, 2007.

This bill would delete the requirement that these provisions are repealed as of January 1, 2007. By imposing additional duties on districts, this bill would impose a state-mandated local program. The bill would delete the obsolete references to the provision in the Budget Act of 2001.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 799 (AB 2858) Leno Trials: mental competence: defendant.

Existing law requires a court to order a defendant who has been found incompetent to stand trial to be delivered to a state hospital or treatment facility or be placed in an outpatient treatment program to promote the restoration of competency. Existing law requires that if a defendant charged with a violent felony is placed in an outpatient program, the court must make certain findings.

This bill would, in addition, require a court that places a defendant charged with a violent felony in an outpatient program to give notice to the sheriff and the district attorney of the county in which the criminal charges are pending and defendant's counsel.

Existing law also requires that if the defendant has not regained competency after 3 years or the maximum term of imprisonment provided by law for the most serious charged offense, whichever is shorter, he or she will be returned to the committing court. If the committing court finds that the defendant is gravely disabled, existing law requires the court to initiate conservatorship proceedings and give notice of the proceedings to the community program director.

This bill would require, in addition, the court to give notice of the proceedings to the sheriff and the district attorney of the county in which the criminal charges are pending and defendant's counsel.

Existing law provides procedure for the appointment of a conservator for a person who is determined to be gravely disabled, as specified.

This bill would forbid a court from appointing a conservator if the appointment would not result in adequate protection of the public.

Ch. 800 (AB 2870) De La Torre Correctional institutions: communicable diseases.

Existing law provides for the confidential testing of inmates and other enumerated persons for HIV and AIDS under specified circumstances. The test is initiated by a request from a law enforcement employee, as defined, or another inmate, to the chief medical officer of the facility, when the requesting person has come into contact with the bodily fluids of an inmate or other specified persons in a correctional institution, as defined.

This bill would allow testing for hepatitis B and C as well as HIV and AIDS. This bill would add prosecutors and public defender staff to the list of persons who may request testing, and include court facilities in the locations where the contact with bodily fluids may be made. This bill would further provide that the person making the request shall be informed of the results of the tests. Because the bill would impose additional duties on local agencies, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 801 (SB 1534) Ortiz Public benefits.

Federal law, Section 411 of the federal Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA), provides that certain persons are not eligible for defined state and local public benefits unless a state law is enacted subsequent to the effective date of the act, August 22, 1996, that affirmatively provides for that eligibility.

Existing law establishes programs to provide aid or health care, or a combination thereof, to persons who meet eligibility requirements.

Existing law requires each county or city and county to provide aid to its indigent population not supported by other means, and those county programs are commonly referred to as general assistance programs.

This bill would declare the intent of the Legislature to affirm the ability of counties, cities, and hospital districts, at their own discretion, to provide health care and other services to all residents. The bill would authorize any city, county, city and county, or hospital district to provide aid, including health care, to persons who, but for the above-referred to provision of the federal PRWORA, would meet the eligibility requirements for any program of that entity.

#### Ch. 802 (SB 1827) Migden Taxation: domestic partners.

The Personal Income Tax Law imposes tax on taxable income and provides, among other things, that specified definitions govern the construction of that law. Existing law allows married couples to file joint or separate state tax returns, as specified.

This bill would allow registered domestic partners to file joint or separate state tax returns, as specified.

#### Ch. 803 (SB 156) Soto Public safety: firefighting.

Existing law directs the State Fire Marshal to establish training requirements and a curriculum that include criteria recommended by the Emergency Response Training Advisory Committee, as specified.

This bill would require the State Fire Marshal to contract with the California Firefighter Joint Apprenticeship Program for the development of curriculum criteria.

This bill would also provide that these training requirements are to be implemented only when federal funds are received for that purpose.

#### Ch. 804 (SB 652) Scott Public postsecondary education: transfer of community college students to the University of California.

Existing law establishes the University of California, under the administration of the Regents of the University of California, and the California Community Colleges, under the administration of the Board of Governors of the California Community Colleges, as 2 of the segments of public postsecondary education in the state.

Existing law, known as the Donahoe Higher Education Act, states the intent of the Legislature that the segments of higher education shall pursue the development of transfer agreement programs that specify the curricular requirements that must be met, and the level of achievement that must be attained, by community college students in order for those students to transfer to the campus, undergraduate college, or major of choice.

This bill would add a provision to the act that requests the University of California (UC) to address deficiencies in the articulation of major preparation courses between the California Community Colleges and the campuses of UC to make it easier for prospective transfer students to identify which community college courses meet major preparation requirements across the various campuses of the university. The bill would request UC to identify commonalities and differences in similar majors across all UC campuses in order to accomplish specified goals.

The bill would request the Academic Senate of the University of California to notify the California Community Colleges when an articulation request is denied, to provide information that will enable the California Community Colleges to achieve course comparability with UC, and to review the existing differences in lower division major preparation in each major across UC campuses.

The bill would require the California Community Colleges, and request the University of California, in consultation with the Academic Senate of the California Community Colleges, on or before January 1, 2008, to facilitate the articulation of those lower division, baccalaureate-level courses at each campus of the California Community Colleges that meet the lower division transfer path requirements for each major specified by UC in the bill. The bill would request UC to annually review, and update as appropriate, the lower division transfer paths and articulation to ensure that they reflect current UC campus degree requirements and community college curricula.

The bill would request the University of California, as allowed by enrollment demand and available space, to develop transfer admission agreement programs for students who demonstrate intent to meet the requirements of the transfer process established by the bill, including the declaration of a major and identification of a choice of a destination campus. The bill would require the transfer admission agreement to guarantee admission to the campus and major identified in the agreement and transfer of all units specified in the agreement, subject to the student's successful completion of the requirements of the agreement. The bill would specify that the paths to transfer specified in the bill would be available to all community college students who desire to transfer to UC and not be limited to those students who secure a transfer admission agreement as specified in the bill.

The bill would request UC, and require the California Community Colleges, on a 3-year periodic cycle, to jointly conduct a review of a random representative sample of transcripts of students who have transferred to UC and of students preparing for transfer to determine the effectiveness of the transfer preparation pathways referenced in this bill.

#### Ch. 805 (SB 683) Aanestad Dentistry: licensure.

Existing law, the Dental Practice Act, provides for the licensure and regulation of dentists by the Dental Board of California. The act makes the practice of dentistry by an unlicensed person unlawful, but exempts from this prohibition dentistry students meeting certain requirements. The act requires an applicant for licensure as a dentist to meet specified requirements, including passage of a dental licensure examination, with specified exceptions, and a law and ethics examination.

This bill would authorize the board to grant a license to an applicant who passes specified national examinations in dentistry and an examination in California law and ethics, meets

certain education requirements, and has completed a clinically based advanced education program in general dentistry or an advanced education program in general practice residency, as specified. The bill would revise the licensure exemption requirements applicable to dental students. The bill would also require the Department of Consumer Affairs to regularly review an advanced education program's compliance with specified requirements, and would require the board to report to the Joint Committee on Boards, Commissions and Consumer Protection and the department on complaints received for dentists who have obtained licensure by passing the state clinical examination and for dentists who have obtained licensure through an advanced education program.

This bill would appropriate \$20,000 from the State Dentistry Fund to the Department of Consumer Affairs for these purposes for the 2006–07 fiscal year.

Ch. 806 (SB 1325) Scott Adoption.

(1) Existing law requires a person who may have conceived a child by an act of intercourse to submit to the jurisdiction of the courts of this state and specifies the venue where an action may be filed by or against that person. Existing law permits a child, a child's natural mother, a presumed father or other interested party, as specified, to bring an action to determine the existence or nonexistence of a father and child relationship.

This bill would additionally require a person who causes conception through assisted reproduction in this state to submit to the jurisdiction of the courts of this state. This bill would additionally permit a person who enters an assisted reproduction agreement, as specified, to bring an action to establish a parent and child relationship.

(2) Under existing law, an action to determine a parent and child relationship may be brought before the birth of that child.

This bill would permit the court to enter an order or judgment based on that action before the birth of the child. This bill would further prohibit enforcement of that order or judgment until the birth of the child.

(3) Under existing law, if a parent is convicted of a felony, a proceeding to terminate parental rights may be filed.

This bill would additionally permit the court, as part of a proceeding to terminate parental rights, to consider a parent's criminal record prior to the felony conviction, as specified, in making a finding that a parent is unfit to have future custody or control of his or her child.

(4) Under existing law, if a proceeding to terminate the parental rights of a presumed father has been filed, an action to determine the parent and child relationship between the presumed father and child is required to be consolidated with the termination proceeding.

This bill would require an action to determine the existence or nonexistence of a parent and child relationship between a presumed father and child to be consolidated with a proceeding that has been filed for the emancipation of the child.

(5) Under existing law, a birth parent may relinquish a child to a licensed adoption agency for the adoption of that child. Existing law requires the licensed adoption agency to forward a written relinquishment signed by the birth parent to the Department of Social Services. Under existing law, that relinquishment is final within 10 business days after the relinquishment is filed with the department, unless a longer period of time is necessary, as specified.

This bill would require the relinquishment to be final 10 business days after the relinquishment is filed with the department unless the department sends written acknowledgment of receipt of the relinquishment before that date.

(6) Under existing law, if a prospective adoptive parent is in military service or service for another recognized entity, as specified, and shows by satisfactory evidence that it is impossible or impracticable to appear in court for an adoption proceeding, the prospective adoptive parent may make his or her appearance at the proceeding through an attorney.

This bill would additionally permit a prospective adoptive parent to appear at an adoption proceeding through an attorney if the prospective adoptive parent shows by satisfactory evidence that it is impossible or impracticable to appear at the adoption proceeding.

**Ch. 807 (SB 1376) Chesbro Community Services Block Grant Program: funding.**

Under the Community Services Block Grant Program, a community action agency is a public or private nonprofit agency that fulfills specified requirements, including being recognized by the Department of Community Services and Development as a community action agency. Among the functions of a community services agency are planning for and evaluating the community action program, including developing information as to the problems and causes of poverty in the community and determining how much and how effectively assistance is being provided, and initiating and sponsoring projects responsive to the needs of the poor that are not otherwise being met. Existing law sets forth a method for allocating federal assistance to agencies.

This bill would revise the method by which federal assistance is allocated to agencies to establish a base amount for each agency that increases, as provided, and to provide for additional allocations. If the amount of federal assistance declines by more than 20% below the 2005 federal fiscal year amount, the bill would require the Director of Community Services to convene the network of agencies receiving grant funds to determine whether changes to the allocation system should be contemplated and referred to the Legislature for consideration.

**Ch. 808 (SB 1384) Kuehl Los Angeles-Exposition Metro Line light rail project.**

Existing law establishes the Los Angeles County Metropolitan Transportation Authority (LACMTA) as the single successor agency to the Southern California Rapid Transit District and the Los Angeles County Transportation Commission. The LACMTA is responsible for most transit guideway projects in Los Angeles County and has specified duties and responsibilities with regard to transportation. Existing law also establishes the Exposition Metro Line Construction Authority for the purpose of awarding and overseeing final design and construction contracts for completion of the Los Angeles-Exposition Metro Line light rail project, as specified. Existing law requires, upon allocation of federal and local funds by the LACMTA for these purposes, the construction authority to conduct the financial studies and the planning and engineering necessary for completion of the project. Existing law requires the LACMTA to identify and expeditiously enter into an agreement with the construction authority to hold in trust with the construction authority all real and personal property, and any other assets, accumulated in the planning, design, and construction of the project. Existing law requires the authority to be dissolved upon completion of the project and requires the LACMTA to assume responsibility for operating the project upon dissolution of the authority.

This bill would require the construction authority, upon allocation of federal and local funds by the LACMTA for these purposes, to conduct environmental studies in addition to the financial studies and the planning and engineering necessary for completion of the project. The bill would authorize members or employees of certain local government authorities that appoint members to the construction authority to also be appointed as members of the board of the construction authority. The bill would revise the provisions requiring the LACMTA to enter into an agreement with the construction authority to hold in trust certain property and assets. The bill would require the LACMTA to assume responsibility for operating the project upon completion of the project or any of its phases. The bill would make other related changes.

Because this bill would impose additional duties on the LACMTA and the construction authority, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 809 (SB 1393) Florez Intercountry adoptions.**

Existing law authorizes, and in some cases requires, a state resident who has adopted a child in a foreign country through an adoption that is finalized in a foreign country to readopt the child in this state. Existing law requires that the readoption include at least one postplacement in-home visit, the filing of the adoption petition, the intercountry adoption court report, accounting reports, and the final adoption order. Existing law prohibits a court from granting a readoption order unless the court receives a specified report from an adoption agency authorized to provide intercountry adoption services.

This bill would revise standards for a petition to readopt by a state resident who adopts a child through an intercountry adoption finalized in a foreign country and would require that the readoption include a home study report. The bill would provide for alternative requirements regarding the filing of the adoption petition if the foreign country in which the adoption was finalized has adoption standards that meet or exceed those of this state. The bill would require the Department of Social Services to certify whether the adoption standards in specified countries meet or exceed those of this state. The bill would provide that, in that case, the petition may be granted, if the adoption was finalized in accordance with the foreign country's laws and certain documents are filed with the petition. If a court denies the petition, the bill would require the court to summarize the reasons for its denial on the record.

Existing law requires the State Registrar to establish a new birth certificate upon receipt of a report of adoption, as specified.

The bill would also require the State Registrar to establish a new birth certificate upon receipt of a readoption order, as specified.

**Ch. 810 (SB 1415) Scott Surplus school property: use of proceeds.**

Existing law allows the governing board of any school district to sell any real property belonging to the district or to lease for a term not exceeding 99 years, any real property, together with any personal property located thereon, belonging to the district, subject to specified requirements and limitations. Existing law requires a school district to use the funds derived from the sale of surplus property for capital outlay or for costs of maintenance of school district property that the governing board of the school district determines will not recur within a 5-year period. Existing law allows a school district to deposit the proceeds from the sale or lease with an option to purchase of school district property in the general fund of the district for any general fund purpose if the school district governing board and the State Allocation Board have determined that the district has no anticipated need for additional sites or building construction for the 5-year period following the sale or lease, and the district has no major deferred maintenance requirements.

This bill would delete the authority of a school district to use those proceeds for any general fund purpose. The bill would increase from 5 to 10 years the time period following the sale or lease with option to purchase for which the school district governing board and the State Allocation Board are required to determine that the district has no anticipated need for additional sites or building construction. The bill would require that the proceeds from the sale or lease with option to purchase of school district property be used for one-time expenditures. The bill would prohibit a school district from using those proceeds for ongoing expenditures including, but not limited to, salaries and other operational expenses. The bill would require the State Allocation Board, in consultation with the State Department of Education, to adopt regulations that govern the use of those proceeds for one-time expenditures and define ongoing expenditures for purposes of that prohibition. The bill would also delete obsolete provisions.

Ch. 811 (SB 1428) Scott Unemployment compensation: employer: motion picture industry.

Existing law requires that the determination of the employer-employee relationship be made pursuant to common-law principles, with specified exceptions. Existing law provides that when an individual or entity contracts to supply an employee to perform services for a customer or client, and is a leasing employer or a temporary services employer, as defined, the individual or entity is the employer of the employee who performs the services, provided that certain requirements are satisfied.

This bill would provide that, notwithstanding those provisions and until January 1, 2012, any employing unit that is a motion picture payroll services company, as defined, shall be treated as an employer of a motion picture production worker, as defined. This bill would require any employing unit operating as a motion picture payroll services company to report that status to the Employment Development Department. This bill would also require any employment unit operating as a motion picture payroll services company that quits business, to file with the director, a final return and report of wages, as provided, and to notify the motion picture production companies and allied motion picture services of its intent to quit business, as provided. This bill would also provide that the employing unit's status would be applied to its affiliated entities, as defined, and would require specified actions by those affiliated entities and the motion picture payroll services company when acquired or created by the motion picture payroll services company. This bill would also require the director to notify an entity, as provided, that does not satisfy the requirements of a motion picture payroll services company, as provided, of the facts and circumstances upon which the determination was made.

This bill makes statements with regard to its impact on employing units who do not elect to be considered motion picture payroll services companies.

Ch. 812 (SB 1562) Maldonado Inmates: State Hospitals: reimbursement of costs.

Existing law provides that a city, county, or superior court shall be entitled to reimbursement for reasonable and necessary costs connected with state prisons or prisoners in connection with any crime committed at a state prison, whether by a prisoner, employee, or other person.

This bill would provide that a city, county, or superior court shall also be entitled to reimbursement for reasonable and necessary costs connected with state prisons or prisoners in connection with any crime committed at a state hospital for the care, treatment, and education of the mentally disordered, as specified, by a state inmate.

Existing law provides that cities and counties are entitled to reimbursement from the state for expenses they have incurred with respect to state prisons or prisoners for specified crimes committed by, or hearings relating to, a prisoner at a state prison, and for prisoner costs relating to extradition, the coroner, and transportation, as specified.

This bill would provide that a county shall be entitled to reimbursement from the state for reasonable and necessary costs incurred by the county with respect to inmates housed at a state hospital in that county, including, but not limited to, trial costs.

Existing law requires the appropriate financial officer of a county to make out a statement of all mental health treatment costs incurred and a separate statement of all nontreatment costs incurred in certain additional judicial hearings involving extended commitments and continued involuntary treatment of certain prisoners, parolees, and outpatient defendants in order to seek reimbursement of those costs, as specified.

This bill would make reimbursable under this provision the mental health treatment costs and nontreatment costs incurred in hearings to determine if a prisoner is eligible for treatment by the state Department of Mental Health as a condition of parole, as specified.

Ch. 813 (SB 1668) Bowen Child death: review teams.

Existing law permits counties to establish interagency child death review teams to assist local agencies in identifying and reviewing suspicious child deaths and facilitating communication between persons who perform autopsies and the various persons and agencies involved in child abuse or neglect cases.

Existing law also allows interagency child death review teams to develop protocol for performing autopsies on children to assist coroners, as specified and identifies the persons who may be consulted in developing the protocol.

This bill would provide that interagency child death review team records that are exempt from disclosure to third parties pursuant to state or federal law remain exempt from disclosure when they are in the possession of a child death review team. The bill would also contain confidentiality provisions for child death review teams, as specified. The bill would further provide that no less than once each year, each child death review team shall make available to the public findings, conclusions and recommendations of the team, including aggregate statistical data on the incidences and causes of child, as specified.

Ch. 814 (SB 1687) Murray Los Angeles County Metropolitan Transportation Authority: San Francisco Bay Area Rapid Transit District.

Existing law establishes various regional transportation authorities, including the Los Angeles County Metropolitan Transportation Authority (MTA) and the San Francisco Bay Area Rapid Transit District (BART). Existing law provides that, with respect to MTA and BART, the purchase of all supplies, equipment, and materials, when the expenditure required exceeds \$40,000, shall be by contract let to the lowest responsible bidder.

This bill instead would require those purchases, when the expenditure required exceeds \$100,000, adjusted annually as provided under federal law, to be by contract let to the lowest responsible bidder or to the responsible bidder who submits a proposal that provides the best value, as defined. The bill would make related, conforming changes.

Ch. 815 (AB 827) Goldberg Private postsecondary education: consumer credit regulations.

Existing law, known as the Private Postsecondary and Vocational Education Reform Act of 1989, generally sets minimum standards of instructional quality, ethical and business practices, health and safety, and fiscal responsibility for private postsecondary and vocational educational institutions, as defined. The act establishes the Bureau for Private Postsecondary and Vocational Education, which, among other things, is required to review and investigate all institutions, programs, and courses of instruction approved under the act. A provision of the act renders it inoperative on July 1, 2007, and provides for its repeal on January 1, 2008.

An existing provision of the act prohibits a private postsecondary or vocational institution that is subject to the act from taking any of various specified actions or from failing to comply with federal requirements relating to the disclosure of information to students regarding vocational and career training programs. A violation of this provision is punishable as a crime.

This bill would also prohibit a private postsecondary or vocational institution that is subject to the act from failing to comply with a specified federal regulation relating to the notices required to be contained in a consumer credit contract, and would require a specified statement to be included in prescribed consumer credit contracts, but would specify that violation of the provision added by this bill is not punishable as a crime.

Ch. 816 (AB 1102) Hancock Marriage.

Existing law provides that marriage is a personal relation arising out of a civil contract between a man and a woman, and requires the licensure and solemnization thereof. Existing law provides for the issuance of marriage and confidential marriage licenses and sets the fees thereof. Existing law further imposes duties on county clerks in that connection, as specified.

This bill would, operative January 1, 2008, revise and recast those provisions and related terms. Among other things, the bill would conform various statutory provisions of law to those changes. The bill would further regulate the issuance of confidential marriage licenses based upon an inability of the parties to appear, as specified, and would make related changes with regard to notaries public and the State Registrar. In issuing a duplicate marriage license or confidential marriage license, the bill would allow the county clerk to charge any fee to cover the actual costs of issuing that duplicate license, and would change the fee charged notaries public for approval to issue confidential marriage licenses to \$300. Operative January 1, 2007, the bill would also allow an applicant, witness, or person solemnizing or performing a marriage ceremony to use his or her business address or post office box for purposes of the certificate of registry or marriage license.

By adding to the duties of county employees to comply with the above-described changes, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 358 of the Family Code, proposed by AB 2051, to be operative January 1, 2007, only if AB 2051 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 817 (AB 1943) Nava Community colleges: credit courses of instruction.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law specifies the duties of the board of governors, among which is the review and approval of all courses of instruction that are not offered as part of an educational program approved by the board of governors. Existing law establishes community college districts, and requires each district to be under the control of a governing board. Existing law specifies the duties of community college district governing boards, among which is the submission, to the board of governors for review and approval, of courses of instruction that are not offered in educational programs approved by the board of governors.

This bill would express legislative intent with respect to allowing community college districts to offer credit courses that are not part of an approved educational program without prior approval by the board of governors. The bill would, until January 1, 2013, delete the provision that requires the board of governors to review and approve courses of instruction that are not offered as part of an educational program approved by the board of governors. The bill would instead, until January 1, 2013, authorize community college district governing boards to offer credit courses of instruction without the approval of the board of governors only under conditions authorized by regulations adopted by the board of governors.

The bill would require the Chancellor of the California Community Colleges to prepare and submit, on or before January 1, 2012, a report describing, to the chairpersons of the appropriate policy and fiscal committees of the Legislature, the results of monitoring of these courses undertaken pursuant to regulations developed by the board of governors under the bill and the extent to which community college districts have complied with those regulations.

Ch. 818 (AB 2098) Liu State government: electronic payment system: Electronic Funds Transfer Task Force.

Existing law generally authorizes state agencies to accept alternate payment devices, subject to specified conditions.

This bill would establish the Electronic Funds Transfer Task Force, as specified, to study and report to the Legislature on or before April 1, 2008, a plan for development and

implementation of a new payment dispersal system utilizing electronic funds transfer technology, to include specified components.

Ch. 819 (AB 2068) Nava Workers' compensation: designation of physician.

(1) Existing workers' compensation law generally requires employers to secure the payment of workers' compensation, including medical treatment, for injuries incurred by their employees that arise out of, or in the course of, employment.

Existing law, until April 30, 2007, provides an employee with the right to be treated by his or her personal physician from the date of injury if specified conditions are met, including a requirement that the physician agrees to be predesignated. Existing law limits the maximum percentage of employees who are covered by this provision of law that may be predesignated in the state to 7%.

This bill, until December 31, 2009, would provide that a personal physician includes a medical group that meets specified requirements. This bill would also delete the April 30, 2007, repeal date and the limit on the maximum percentage of employees that may be predesignated.

(2) This bill would incorporate additional changes in Section 4600 of the Labor Code contained in AB 2287, with the changes in each bill to become operative only if that section is amended by each bill, and if this bill is enacted after AB 2287.

Ch. 820 (AB 2440) Klehs Child support obligations: liability.

Existing law imposes joint and several liability upon a parent or guardian having custody and control of a minor for the injury done to another person by that minor under certain circumstances.

This bill would impose liability upon any person or business entity that knowingly assists a child support obligor who has an unpaid child support obligation to escape, evade, or avoid current payment of those unpaid child support obligations. The bill would also include a related statement of legislative findings and declarations.

Ch. 821 (AB 2538) Wolk Transportation funds: planning and programming: regional agencies.

Existing law generally provides for programming and allocation of funds for transportation capital improvement projects through the state transportation improvement program process administered by the California Transportation Commission. Existing law requires 25% of available funds to be programmed and expended on interregional improvement projects nominated by the Department of Transportation, and 75% of available funds to be programmed and expended on regional improvement projects nominated by regional transportation planning agencies or county transportation commissions, as applicable, through adoption of a regional transportation improvement program. Existing law authorizes a transportation planning agency or county transportation commission to request and receive up to 1% of regional improvement fund expenditures for the purposes of project planning, programming, and monitoring, but authorizes an amount up to 5% of those expenditures for a transportation planning agency or county transportation commission not receiving federal metropolitan planning funds.

This bill would instead authorize each transportation planning agency or county transportation commission to request and receive up to 5% of those funds for the purposes of project planning, programming, and monitoring. The bill would change the references to "regional improvement funds" to instead refer to "county share." The bill would make other conforming changes.

Ch. 822 (AB 2813) De La Torre Student financial aid: Ortiz-Pacheco-Poochigian-Vasconcellos Cal Grant Act.

Existing law, the Ortiz-Pacheco-Poochigian-Vasconcellos Cal Grant Act, establishes the Cal Grant A and B entitlement awards, the California Community College Transfer Cal

Grant Entitlement awards, the Competitive Cal Grant A and B awards, the Cal Grant C awards, and the Cal Grant T awards under the administration of the Student Aid Commission, and establishes eligibility requirements for awards under these programs for participating students attending qualifying institutions.

Under the existing California Community College Transfer Cal Grant Entitlement Program, the eligibility criteria include a requirement that the student not meet the federal definition of independent student, with the exception of students who are 24 years old or older and who are orphans or wards of the court, veterans of the United States Armed Forces, married, have dependents other than a spouse, or for whom a financial aid administrator makes a documented determination of independence by reason of other unusual circumstances.

This bill would eliminate that requirement and those exceptions, and, instead, would limit eligibility to students who are not 28 years old or older by December 31 of the award year.

Ch. 823 (AB 2915) Saldana Veterinary medicine: licensure.

Existing law, the Veterinary Medicine Practice Act, provides for the licensure and regulation of the practice of veterinary medicine.

Existing law provides that the laws regulating the practice of veterinary medicine do not apply to, among others, unlicensed personnel employed by the Department of Food and Agriculture or the United States Department of Agriculture when, in the course of their duties, they are directed by a veterinarian supervisor to conduct an examination, obtain biological specimens, apply biological tests, or administer medications or biological products as part of government disease or condition monitoring, investigation, control, or eradication activities.

This bill would also, until January 1, 2011, exempt from the laws regulating the practice of veterinary medicine veterinarians employed by a city, city and county, or county who meet specified criteria and who are conducting activities, under direct supervision, related to pathology and epidemiology on dead animals as part of specified government programs.

Ch. 824 (AB 3051) Koretz Employment: wages of motion picture employees.

Existing law provides generally that wages earned and unpaid at the time an employee is discharged or laid off are due and payable immediately.

Existing law provides that an employer who lays off an employee engaged in the production of motion pictures, whose unusual or uncertain terms of employment require special computation in order to ascertain the amount due, shall be deemed to have made immediate payment of wages if the wages of the employee are paid by the next regular payday. If the employee is discharged, payment of wages is required to be made within 24 hours after discharge. Existing law defines layoff and discharge for purposes of this provision.

This bill would repeal and recast this provision. The bill would provide that an employee who is engaged in the production or broadcasting of motion pictures, as defined, whose employment terminates, whether by discharge, lay off, resignation, completion of employment, or otherwise, is entitled to receive payment of the wages earned and unpaid at the time of termination by the next regular payday.

Ch. 825 (AB 2543) Bermudez The Board of Directors of the California Exposition and State Fair.

Existing law provides that there is in state government the Board of Directors of the California Exposition and State Fair which is the policymaking body for the California Exposition and State Fair and has full responsibility for the year-round management and operation of all facilities of the California Exposition and State Fair.

Existing law provides that 2 members of the Legislature shall meet with and advise the board, as specified.

This bill would provide that the chairperson and vice chairperson of the Joint Committee on Fairs Allocation and Classification shall also meet with and advise the board.

Existing law provides that 3 officers of the California State Fair, a deputy general manager, program manager, and a marketing manager, appointed by the Governor, may each select a deputy, as specified.

This bill would repeal provisions allowing each of the officers to select a deputy and instead provide that the officers shall serve at the pleasure of the board under the direction of the general manager.

Existing law provides that the board may appoint all necessary marshals and police to keep order and preserve peace at the California Exposition and State Fair premises on a year-round basis. Existing law provides that 25% of the officers so employed may be appointed if they have completed a Peace Officer Standards and Training-certified academy or possess a Level One Reserve Certificate, as specified.

This bill would provide that the 25% may also include probation officers, as specified. This bill would provide that probation officers so appointed have limited peace officer authority, as specified. The bill would revise provisions relating to this appointment.

This bill would declare that it is to take effect immediately as an urgency statute.

**Ch. 826 (AB 2889) Frommer Health care coverage: individual market.**

Existing law, the Knox-Keene Health Care Service Plan Act of 1975 (the Knox-Keene Act), provides for the licensure and regulation of health care service plans by the Department of Managed Health Care and makes a willful violation of the act a crime. Existing law also provides for the regulation of health insurers by the Department of Insurance. Under existing law, a health care service plan and a health insurer are required to include specified coverage provisions in their plan contracts and policies.

This bill would require a health care service plan and a health insurer to permit, at least once each year, an individual who has been covered for at least 18 months under an individual plan contract issued by the health care service plan or an individual health benefit plan issued by the insurer to transfer without medical underwriting, as defined, to another individual plan contract or individual health benefit plan offered by the health care service plan or insurer having equal or lesser benefits, as specified. The bill would require a plan and an insurer to rank its products for these purposes and post the ranking on its Internet Web site or make the ranking available upon request. The bill would also require a plan and an insurer to notify its enrollees or insureds of their transfer rights under these provisions. The bill would specify that these requirements do not apply with respect to a federally eligible defined individual enrolled in certain health care coverage, an individual offered conversion coverage, as specified, or an individual enrolled in certain public health care programs.

Because the bill would specify additional requirements under the Knox-Keene Act, the willful violation of which would be punishable as a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

**Ch. 827 (AB 2900) Plescia California Natural Landmarks Program.**

Existing federal law establishes the National Natural Landmarks Program to focus attention on areas of exceptional natural value to the nation. Existing federal law requires the National Parks Service to administer the National Natural Landmarks Program and establishes procedures and requirements for designating an area as a national natural landmark.

This bill would enact a similar program, called the California Natural Landmarks Program. The bill would establish a procedure for designating, modifying, and rescinding the designation of, California natural landmarks, and would require the owner of the property so designated to initiate or agree to that designation, as specified. The bill would require an owner who initiates a request to designate his or her property as a California natural landmark to pay for the costs of determining that designation, as specified. The bill would require those revenues to be deposited in the Natural Landmarks Program Administration Fund, which this bill would establish as a special fund in the State Treasury, and would authorize the moneys in that fund to be expended by the department, upon appropriation by the Legislature, to administer the program. The bill would provide that designation as a California natural landmark does not change the property's ownership; does not dictate activity; and does not require, mandate, or authorize, under state law, any further state or local planning, zoning, or other land-use action or decision. The bill would provide that an owner who agrees to have his or her property designated as a California natural landmark does not give up, without his or her consent, under state law, any legal rights or privileges of ownership or use of the property.

This bill would provide that the designation of a property as a California natural landmark shall not constitute a change in the environment or a project pursuant to the California Environmental Quality Act, as specified.

The bill would require the Department of Parks and Recreation to administer the program. The bill would require the department to comply with specified procedural and substantive requirements for designation of California natural landmarks, to prepare a specified annual report relating to California natural landmarks, and to maintain the California Registry of Natural Landmarks.

The bill would exempt actions taken under the California Natural Landmarks Program from the requirements of CEQA.

#### Ch. 828 (AB 2907) De La Torre Electrician apprenticeship.

Existing law authorizes the Division of Apprenticeship Standards, through the California Apprenticeship Council, to adopt training criteria for certain apprenticeship programs, until January 1, 2007.

This bill would continue the council's authority to adopt training criteria through January 1, 2012. This bill would also extend the sunset provisions for review of wage and penalty assessments by the Labor Commissioner until January 1, 2009.

Existing law requires that the division establish an electrical certification curriculum committee comprised of members from the State Department of Education, community colleges, and the Division of Apprenticeship Standards to establish written curriculum and standards for enrollees in the training program.

This bill would require the committee to review curriculums and designate approved educational providers. The bill also requires educational providers in the program to submit an annual report to the committee.

This bill would authorize the committee to grant approval to educational providers that offer only a partial curriculum, subject to certain disclosures, if the provider intends in the future to offer, or cooperates with other providers to offer, a full curriculum.

Existing law provides a time limit for a person to become certified as an electrician, and permits the Division of Apprenticeship Standards to establish different certifications for different types of electrical work.

This bill would extend the time in which a person may become certified as an electrician and would require the division to establish different certifications for specified types of electrical work.

Existing law provides for the performance of electrical work by uncertified persons as long as they are registered with the Division of Apprenticeship Standards, are under the direct supervision of a certified electrician, and are currently enrolled in a curriculum of classroom

instruction approved by a curriculum committee and provided by an institution under the jurisdiction of the State Department of Education or the Board of Governors of the California Community Colleges.

This bill would extend the entities under whose jurisdiction instruction may be provided to include the Bureau for Private Postsecondary and Vocational Education.

**Ch. 829 (AB 2920) Leno Seniors.**

Existing law, the Mello-Granlund Older Californians Act, establishes the California Department of Aging in the California Health and Human Services Agency. Existing law sets forth the duties and powers of the department.

This bill would require the department to ensure that programs and services provided through the Older Americans Act and the Mello-Granlund Older Californians Act in each planning and service area are available to all older adults regardless of specified characteristics or circumstances, or by association with a person or persons with one or more of these actual or perceived characteristics or circumstances, that restrict an individual's ability to perform normal daily tasks or that threaten his or her capacity to live independently.

The bill would require the department to require that each area agency on aging includes the needs of lesbian, gay, bisexual, and transgender seniors in its needs assessment and area plans and to provide technical assistance to the area agencies on aging regarding the unique needs of the lesbian, gay, bisexual, and transgender seniors. The bill would authorize the department to adopt regulations to implement the bill's provisions, and would require the department to do so if necessary, and only after consultation with specified entities.

This bill would also express the intent of the Legislature that this act not increase General Fund obligations for programs administered by area agencies on aging.

**Ch. 830 (AB 2968) Leno Medi-Cal: community-living support benefit.**

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services and under which qualified low-income persons receive health care benefits, including certain residential care benefits. The Medi-Cal program is, in part, governed and funded by federal Medicaid provisions.

This bill would require the department to develop and implement a program to provide a community-living support benefit to eligible Medi-Cal beneficiaries. It would require the department to submit any federal documentation that is necessary to provide this benefit, and to implement the benefit only to the extent that federal financial participation is available. The bill would require that the benefit include reimbursement for an array of health-related and psychosocial services provided or coordinated at community-based housing sites, and access to certain community-living support services provided or coordinated at those sites. Eligibility for the benefit would be limited to persons who are eligible for Medi-Cal, who are residents of San Francisco who would otherwise be homeless, living in shelters, or institutionalized, and who meet at least one of 2 other criteria. The bill would condition implementation of these provisions upon adoption of a resolution by the Board of Supervisors of the City and County of San Francisco providing for county funds for specified purposes related to the program.

**Ch. 831 (AB 3003) La Malfa Department of Water Resources: administrative expenses.**

Under existing law, the Department of Water Resources administers various water resource programs that are financed by voter-approved general obligation bond funds or revenue bond funds.

This bill would provide that, except as otherwise provided in a general obligation bond act, the maximum amount that shall be allocated for administrative expenses shall not exceed 5% of the total amount of funds that the department is required to administer and that are derived from a general obligation bond act that is approved on or after January 1, 2007. The bill

would also provide that the maximum amount that may be allocated for administrative expenses shall not exceed 5% of the total amount of funds that result from the sale of revenue bonds by the department.

Ch. 832 (AB 3004) Houston Vehicles: enforcement.

Existing law requires, except in certain specified circumstances, a traffic officer on duty for the exclusive or main purpose of enforcing laws related to traffic accidents and rules of the road, to wear a full distinctive uniform, and to use a motor vehicle that is painted a distinctive color, as specified by the Commissioner of the California Highway Patrol.

This bill would express the intent of the Legislature that the Commissioner of the California Highway Patrol should amend a particular regulation regarding distinctively painted motor vehicles, including patrol vehicles and motorcycles, used by police and traffic officers in order to address a particular concern occurring in Alameda County.

Ch. 833 (AB 3013) Koretz Medical information: disclosures.

The state Confidentiality of Medical Information Act prohibits a provider of health care, a health care service plan, contractor, or corporation and its subsidiaries and affiliates from intentionally sharing, selling, or otherwise using any medical information, as defined, for any purpose not necessary to provide health care services to a patient, except as expressly authorized by the patient, enrollee, or subscriber, as specified, or as otherwise required or authorized by law.

Violations of these provisions are subject to a civil action for compensatory and punitive damages, and, if a violation results in economic loss or personal injury to a patient, it is punishable as a misdemeanor.

The federal Health Insurance Portability and Accountability Act of 1996 (HIPAA) prohibits a covered entity that uses electronic means to perform HIPAA-covered transactions, from using or disclosing personal health information except pursuant to a written authorization signed by the patient or for treatment, payment, or health care operations. Notwithstanding those provisions, HIPAA allows a covered entity to maintain a directory of patients in its facility for specified purposes, and disclose the protected health information of a patient to family members, relatives, or other persons identified by the patient, if certain conditions are met. HIPAA further provides that if its provisions conflict with a provision of state law, the provision that is most protective of patient privacy prevails.

The state Confidentiality of Medical Information Act allows a provider of health care, upon an inquiry concerning a specific patient, to release at its discretion a patient's name, address, age, and sex; a general description of the reason for treatment; the general nature of the injury, burn, poisoning, or other condition; the general condition of the patient; and any information that is not medical information, as defined, unless there is a specific written request by the patient to prohibit that release.

This bill would revise that latter provision to have it apply only to a general acute care hospital, as defined, in specified situations, and would add to the state Confidentiality of Medical Information Act, HIPAA provisions related to medical information disclosures to family members, relatives, or other persons identified by a patient, thereby requiring a provider of health care, health care service plan, or contractor to comply with those provisions, as specified.

By expanding the definition of a crime under the Confidentiality of Medical Information Act, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 834 (AB 3033) Lieber Public employees' retirement: service credit: firefighters.

(1) Under the Public Employees' Retirement Law, service retirement allowances are calculated, in part, based on years of credited service. Members may, under existing law, elect to receive service credit for various types of public service. Existing law permits a local agency to contract with the Public Employees' Retirement System for the inclusion of members of the local agency's retirement system in the Public Employees' Retirement System. Member contributions to the Public Employees' Retirement System are deposited in the Public Employees' Retirement Fund, a continuously appropriated fund.

This bill would authorize local members of the Public Employees' Retirement System who are local firefighters to elect to receive service credit for public service as permanent career firefighters, as specified, if the service was terminated as a result of the closure, downsizing, or realignment of a federal military institution, and if these provisions are adopted by their contracting agencies. By increasing the amount of employee contributions to the Public Employees' Retirement Fund, the bill would make an appropriation.

(2) Existing law authorizes members of a retirement system subject to the County Employees Retirement Law of 1937 to receive service credit for prior public service, as defined, if authorized by the governing board of the county or district and subject to the payment by the member of an amount equal to twice the contributions the member would have made for that service, plus interest. If approved by a  $\frac{4}{5}$  vote of the governing body, the county or district may elect to make these contributions.

This bill would authorize specified county firefighters to receive service credit for service as permanent career firefighters performed for another public agency, as defined, if the service was terminated as a result of the closure, downsizing, or realignment of a federal military institution and the governing body of a county or district permits the purchase of that service credit. The bill would require that the member pay an amount equal to the contributions the member would have made for that service, plus interest or, if approved by a majority vote of the governing body, those amounts would be paid by the county or district.

(3) This bill would also incorporate additional changes in Section 31485.7 of the Government Code proposed by AB 2240 that would become operative only if AB 2240 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

Ch. 835 (AB 3045) Koretz Vehicles: license suspension: license revocation: ignition interlock device.

(1) Existing law requires the Department of Motor Vehicles to certify or cause to be certified ignition interlock devices, for use as specified. Existing law makes it a crime to violate any provision of the Vehicle Code.

This bill, which would be known and may be cited as "Adam's Law," would require the department to require that each certified ignition interlock device operate in the manner for which it was certified, prohibit a manufacturer from furnishing an installer, service center, technician, or consumer with technology or information that allows a device to be used in a manner that is contrary to the purpose for which it is certified, and prohibit an installer, service center, or technician from tampering with, changing, or altering the functionality of the device from its certified criteria.

Because this bill would create new crimes, this bill would impose a state-mandated local program.

(2) Existing law prohibits a person from driving a vehicle when his or her driver's license has been suspended or revoked for violating specified provisions relating to DUI. Existing law requires a court to require a person convicted of specified offenses to install a certified ignition interlock device on a vehicle that the person owns or operates.

This bill would prohibit the department from reinstating the privilege to operate a motor vehicle until the department receives specified proof that the certified ignition interlock device has been installed as ordered.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 836 (AB 1368) Karnette Workers' compensation: apportionment: presumptions.

Existing workers' compensation law generally requires employers to secure the payment of workers' compensation, including medical treatment, for injuries incurred by their employees that arise out of, or in the course of, employment.

Existing law provides that, in the case of certain state and local public safety members, the term "injury" includes hernia, heart trouble, and pneumonia that developed or manifested itself during a period while the person is in that service. Existing law further establishes a disputable presumption in this regard and prohibits these medical conditions from being attributed to any disease existing prior to the development or manifestation of that medical condition.

Existing law requires any physician who prepares a report addressing the issue of permanent disability due to a claimed industrial injury to address the issue of causation of the permanent disability.

This bill would exempt the above medical conditions for certain public safety members and employees from the application of this requirement.

Ch. 837 (SB 1309) Scott Nursing education: grants, loan assumptions, and faculty recruiting and retention.

(1) Existing law establishes programs of nursing education at public and private institutions of higher education.

This bill would express legislative intent with respect to expanding the capacity of the state's institutions of higher education to prepare students for nursing careers.

(2) Existing law establishes the State Department of Education under the administration of the State Board of Education and the Superintendent of Public Instruction, and provides the department with numerous duties and responsibilities with respect to statewide administration of public elementary and secondary education programs and services.

This bill would establish a Health Science and Medical Technology Project to provide competitive grant funds to California public schools offering grades 7 to 12, inclusive, to enhance existing or establish new health-related career pathway programs, including programs at California Partnership academies and regional occupational centers and programs, as well as other health science and medical technology pathway programs. The bill would express legislative intent with respect to the funding of this project.

The bill would require the State Department of Education to report to the Legislature and the Governor on the efficacy of this project on or before January 1, 2012. The bill would repeal the program as of January 1, 2014.

(3) Existing law establishes the Student Aid Commission as the primary state agency for the administration of state-authorized student financial aid programs available to students attending all segments of postsecondary education.

Existing law establishes the State Nursing Assumption Program of Loans for Education (SNAPLE), administered by the commission, under which any person enrolled in an institution of postsecondary education and participating in that loan assumption program is eligible to receive a conditional warrant for loan assumption, to be redeemed upon becoming employed as a full-time nursing faculty member at a California college or university.

Among other things, the SNAPLE act establishes eligibility requirements, including the receipt of a graduate degree from an accredited, participating institution before loan assumption payments may be made, limits each participant in the program to one loan assumption agreement, and provides for a progressive assumption of the amount of the loan over 3 consecutive years of teaching, up to a total loan assumption of \$25,000. The SNAPLE act requires the commission to report annually to the Legislature, and states the intent of the Legislature that, commencing with the 2006–07 fiscal year, funding necessary for the administration of the program shall be included within the annual budget of the commission.

This bill would amend the SNAPLE act to authorize the award of loan assumption agreements under the program to undergraduate students and to authorize the making of loan assumption payments to applicants who have taught on a part-time basis for the equivalent of 3 full-time academic years. The bill would authorize the extension of the term of a loan assumption agreement if a natural disaster prevents a program participant from completing one of the years of required teaching service. The bill would express the intent of the Legislature that the amendments made by the bill apply retroactively to existing loan assumption agreements made under the program, and would authorize the commission to amend any existing loan assumption agreements and to issue new loan assumption agreements to conform to this bill. The bill would also make various technical, nonsubstantive changes in the SNAPLE act.

This bill would establish a loan assumption program for employees of specified state facilities within the SNAPLE program. This program would provide loan assumption benefits to persons who fulfill agreements to work full time for 4 consecutive years as clinical registered nurses in state-operated 24-hour facilities, as specified, that employ registered nurses and that, at the time the person commences employment at the facility, have a vacancy rate of greater than 10% in clinical registered nursing positions, as reported, pursuant to the bill, to the commission by the Department of Personnel Administration. The program would provide for a progressive assumption of the amount of a qualifying loan over 4 consecutive years of qualifying clinical registered nursing service, up to a total loan assumption of \$20,000. The bill would require the commission to report specified data about program participants annually to the Legislature. The bill would require the Office of the Legislative Analyst to submit, on or before May 1, 2011, a report to the Legislature that includes the findings and recommendations of the Legislative Analyst with respect to the efficacy of the program.

The bill would provide that this program would become inoperative on July 1, 2012, and would be repealed on January 1, 2013.

(4) Existing law establishes the California Community Colleges, under the administration of the Board of Governors of the California Community Colleges, as one of the segments of public postsecondary education in this state. Existing law requires the board of governors to appoint a chief executive officer, known as the Chancellor of the California Community Colleges. Existing law establishes community college districts throughout the state, and authorizes these districts to provide instruction to students at the community college campuses maintained by the districts.

The bill would establish the California Community Colleges Nursing Faculty Recruitment and Retention Program for purposes of facilitating the recruitment and retention of qualified nursing faculty. The bill would specify the amount of the grants that would be disbursed, under the program, to each participating community college district. The bill would repeal provisions of this program relating to the development of 5 nursing resource centers, contingent upon the receipt of funds from the United States Department of Labor, as of January 1, 2012.

(5) Existing law authorizes the governing board of a community college district to employ any qualified individual as a temporary faculty member for a complete school year, but prohibits the employment of a person under this provision for more than 2 semesters or 3 quarters within any period of 3 consecutive years.

This bill would exempt persons serving as clinical nursing faculty from this limit, and instead limit these persons to employment under this provision for up to 4 semesters or 6 quarters within any period of 3 consecutive academic years between July 1, 2007, and June 30, 2014. The bill would require districts employing persons under this provision to provide specified data to the Chancellor of the California Community Colleges on or before June 30, 2012, and would require the chancellor to report to the Legislature and the Governor on or before September 30, 2012, on specified topics related to this provision. The bill would prohibit a district from employing a person pursuant to this provision if the hiring of that person results in an increase in the ratio of part-time to full-time nursing faculty in that district.

(6) Existing law establishes the California State University under the administration of the Trustees of the California State University, and provides for the operation of 25 component institutions of the university.

This bill would express legislative intent with respect to the expansion and funding of baccalaureate degree nursing programs of the university.

(7) Existing law establishes the University of California under the administration of the Regents of the University of California, and authorizes the provision of instruction at the 10 component institutions of the university.

This bill would express legislative intent with respect to the expansion and funding of baccalaureate and master's degree nursing programs of the university.

#### Ch. 838 (SB 678) Ducheny Indian children.

Existing federal law, the Indian Child Welfare Act, governs the proceedings for determining the placement of an Indian child when that child is removed from the custody of his or her parent or guardian. Existing law authorizes tribes recognized under federal law to intervene in these proceedings.

Existing provisions of state law govern child custody proceedings, adoption proceedings, including postadoption contact agreements, dependency proceedings, including termination of parental rights, the voluntary relinquishment of a child by a parent, and guardianship proceedings. Existing law recognizes that the Indian Child Welfare Act applies if the subject of these proceedings is or may be an Indian child and specifies conforming procedures in these cases with regard to the right to notice and intervention accorded the child's tribe and the standard of proof applied in evaluating the evidence submitted, among other things.

This bill would revise, recast, and expand various provisions of state law to, among other things, apply to certain children who do not come within the definition of an Indian child for purposes of the Indian Child Welfare Act, and would provide that a parent, Indian custodian, or tribe may intervene in child custody proceedings involving children with Indian ancestry, as specified. The bill would also authorize a tribe to participate in dependency proceedings involving an Indian child, as specified. The bill would provide that an Indian child's parent's consent to adoption or guardianship is invalid unless it meets specified standards. The bill would specify that if an Indian custodian or biological parent of an Indian child in guardianship proceedings lacks the financial ability to retain counsel and requests that appointment, certain provisions of the Indian Child Welfare Act regarding court-appointed counsel would apply.

Existing law creates certain notification requirements for probation officers and social workers in child custody cases.

This bill would require probation officers and social workers to provide additional notices in cases involving Indian children.

Because this bill would impose additional duties on social workers and other county employees, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would incorporate additional changes to Section 295 of the Welfare and Institutions Code proposed by SB 1667 to become operative only if this bill and SB 1667 are enacted and become effective on or before January 1, 2007, and this bill is enacted last.

This bill would incorporate additional changes to Section 317 of the Welfare and Institutions Code proposed by AB 2480 to become operative only if this bill and AB 2480 are enacted and become effective on or before January 1, 2007, and this bill is enacted last.

#### Ch. 839 (SB 1556) Torlakson Parks: The Great California Delta Trail System.

Existing law establishes the Delta Protection Commission to preserve, protect, maintain, and enhance the Sacramento-San Joaquin Delta region's environmental resources and quality, including preserving and protecting agriculture, wildlife habitats, open spaces, outdoor recreational activities, public access, and use of public lands.

This bill would additionally require the Delta Protection Commission to establish a continuous recreation corridor, including bicycle and hiking trails, around the delta, as defined. The bill would also require the plan to link the San Francisco Bay Trail system to planned Sacramento River trails in Yolo and Sacramento Counties.

Existing law requires local transportation planning agencies to allocate funds in the local transportation fund, as defined, for establishing and maintaining pedestrian and bicycle trails. Existing law authorizes the Metropolitan Transportation Commission to allocate those funds to establish a recreation corridor, including a bicycle and hiking trail, around the perimeter of the San Francisco and San Pablo Bays.

This bill would authorize the transportation planning agencies that allocate those funds to the cities and counties with jurisdiction or a sphere of influence within the delta, to allocate those funds to the Delta Protection Commission for specified activities around the delta.

#### Ch. 840 (SB 1614) Simitian Teachers: information system: identification number.

(1) Existing law recognizes the development by the State Department of Education of the California Education Information System (CEIS) for the purpose of establishing and maintaining a basic, integrated, statewide information system for education.

This bill would require the department, in collaboration with the Commission on Teacher Credentialing, to contract for the development of a teacher data system to be known as the California Longitudinal Teacher Integrated Data System. The bill would declare that the CEIS includes the new teacher data system and the California Longitudinal Pupil Achievement Data System, as specified. The bill would provide that the purpose of the teacher data system is to serve as the central state repository of information regarding the teacher workforce in the state for purposes of developing and reviewing state policy, identifying workforce trends, and identifying future needs regarding that workforce. The bill would prohibit the system from being used for purposes of employment decisions of individual teachers and from including certain personal information of individual teachers, as specified. The bill would require the Superintendent of Public Instruction to convene a working group, including, but not limited to, representatives from the Commission on Teacher Credentialing, the Department of Finance, the Secretary for Education, the Legislative Analyst's Office, the Employment Development Department, and representatives of local educational agencies, postsecondary educational institutions, researchers, teachers, administrators, and parents, to provide advice and guidance on the development of the teacher data system.

(2) Existing law requires the commission to maintain for public record certain specified information regarding the credentials, certificates, permits, or other documents that it issues and authorizes the commission to disclose that information. Existing law, notwithstanding any other provision of law, prohibits the disclosure by the commission of information other than the information maintained for public record absent an order from a court of competent jurisdiction.

This bill would require the commission to establish a nonpersonally identifiable teacher identification number for each teacher to whom it issues a credential, certificate, permit, or other document authorizing that individual to teach in the public schools.

Ch. 841 (SB 1773) Alarcon Fines and forfeitures.

Existing law establishes an additional penalty to be assessed by each county on fines, penalties, and forfeitures imposed for criminal offenses and parking penalties, to be used for local courthouse construction, criminal justice facilities construction, automatic fingerprint identification funding, forensic laboratory funding, emergency medical services funding, and DNA identification funding, as specified for each county.

This bill would provide that until January 1, 2009, a county board of supervisors may elect to levy an additional penalty in the amount of \$2 for every \$10, upon fines, penalties, and forfeitures collected for criminal offenses, as specified. This bill would require 15% of the funds collected pursuant to these provisions to be expended for pediatric trauma centers and would require use of these funds, not to exceed 10%, for administrative costs.

Ch. 842 (AB 1169) Torrico Real property: rentals.

Existing law governs the hiring of residential dwelling units and establishes provisions for the renewal or termination of a hiring of residential real property for an unspecified term. Provisions of that law, in effect until January 1, 2006, included a requirement that an owner of a residential dwelling give at least 60 days' notice prior to termination or 30 days' notice prior to termination if the tenant had resided in the dwelling for less than one year, or if other enumerated circumstances were satisfied.

This bill would, until January 1, 2010, reenact the provisions described above. This bill would also revise these provisions to provide that an owner may give 30 days' notice if any tenant or resident has resided in the dwelling for less than one year.

Ch. 843 (AB 1796) Bermudez Physicians and surgeons.

Existing law, the Medical Practice Act, creates the Medical Board of California and makes its Division of Licensing responsible for issuing a physician's and surgeon's certificate to qualified applicants. Under the act, an applicant for a physician's and surgeon's certificate is required to include specified information with his or her application and to obtain a passing score on the licensure examination. The act authorizes the division to deny an application and to issue a probationary license that is subject to conditions of probation. Under the act, the fee for a physician's and surgeon's certificate, or to renew the certificate, is waived if the practitioner certifies he or she provides voluntary, unpaid services.

This bill would authorize the board to establish advisory committees consisting of physicians and surgeons and public members, as specified, who are not required to be members of the board.

The bill would require an applicant to obtain a passing score on a specified licensure examination within 4 attempts of taking it. The bill would authorize the Division of Licensing to require payment of the cost of monitoring as a condition of a probationary license. The bill would specify that no applicant is eligible to reapply until 3 years after the date of the decision denying his or her application for a physician's and surgeon's certificate, except under certain conditions.

The bill would specify that the fee for a physician's and surgeon's certificate, or to renew the certificate, is waived only for a practitioner residing in California who certifies his or her services are voluntary and unpaid.

Ch. 844 (AB 2354) Laird Agricultural and seafood industries.

Existing law authorizes any promotional commission or council to petition the Secretary of the Department of Food and Agriculture for the commission or council to adopt and administer any activity authorized pursuant to the California Marketing Act of 1937.

This bill would authorize any promotional commission or council to petition the Secretary of the Department of Food and Agriculture to administer any activity that the commission or council is authorized to engage in and that is authorized pursuant to the California Marketing Act of 1937. This bill would provide that the secretary may waive referendum after a hearing, as specified.

Ch. 845 (AB 2449) Levine Recycling: plastic carryout bags.

The California Integrated Waste Management Act of 1989 establishes an integrated waste management program and establishes requirements for the recycling and reuse of various products, including metallic discards, compost, plastic packaging containers, and newsprint. Existing law requires every manufacturer that manufactures specified plastic trash bags to ensure that at least 10% of the weight of the regulated bags, or that at least 30% of the weight of the material used, in all of its plastic products intended for sale in this state is recycled plastic postconsumer material.

This bill would require the operator of a store, as defined, to establish an at-store recycling program that provides an opportunity for a customer of the store to return clean plastic carryout bags to that store. The bill would require a plastic carryout bag provided by a store to have specified information printed or displayed on the bag, and would require the placement of a plastic carryout bag collection bin in each store that is visible and easily accessible to the consumer. The bill would also require the operator of a store to make reusable bags, as defined, available to customers, for purchase.

The bill would require a manufacturer of plastic carryout bags to develop educational materials to encourage the reducing, reusing, and recycling of plastic carryout bags and to make the materials available to stores, as specified.

The bill would declare that certain matters regarding plastic carryout bags are matters of statewide interest and concern. The bill would prohibit a city, county, or other public agency from adopting, implementing, or enforcing an ordinance, resolution, regulation, or rule that requires a store to collect, transport, or recycle plastic carryout bags or conduct additional auditing or reporting, or imposing a plastic carryout bag fee upon a store, except as specified.

The bill would authorize a city, county, or the state to impose civil liability, in specified amounts, and would require any civil penalties collected to be paid to the office of the city attorney, city prosecutor, district attorney, or Attorney General, whichever office brought the action. The bill would authorize any penalties collected by the Attorney General to be expended by the Attorney General, upon appropriation by the Legislature, to enforce the bill's requirements.

The bill's provisions would become operative on July 1, 2007.

The bill's requirements would be repealed on January 1, 2013, unless a later enacted statute deletes or extends that date.

Ch. 846 (AB 2863) Karnette Public employees: retirement.

(1) The Public Employees' Retirement Law permits a contracting agency of the Public Employees' Retirement System to provide service retirement benefits for local miscellaneous members, as defined, based on a 3% at 60 years of age formula. Under that law, if a contracting agency adopts the 3% at 60 years of age formula, the contribution rate for local miscellaneous members is increased from 7% to 8% of compensation. Member

contributions are deposited in the Public Employees' Retirement Fund, a continuously appropriated fund.

This bill would authorize Riverside County contracting agencies, as defined, to provide retirement benefits to local miscellaneous members based on a 3% at 60 years of age formula. The bill would provide that the 3% at 60 years of age formula shall supersede the previous retirement formula for the current service of existing employees of a contracting agency and the prior service those employees earned with a contracting agency, as specified.

By increasing member contributions to the Public Employees' Retirement Fund, this bill would make an appropriation.

(2) The County Employees Retirement Law permits a retirement board or a board of investments in specified counties to appoint assistant administrators and chief investment officers. Under that law, those assistant administrators and chief investment officers are county employees, are not subject to county charter, civil service, or merit system rules, and serve at the pleasure of, and may be dismissed at the will of, the appointing board or boards.

This bill would additionally permit the retirement board in Marin County to appoint assistant administrators and chief investment officers.

(3) Under the County Employees Retirement Law, a member of a county retirement system may retire after filing a written application with the board of retirement. That law requires the member to select a date that his or her retirement will be effective and that date may not be more than 60 days after the date the application is filed with the board.

This bill would additionally provide that the effective date of a member's retirement may not be earlier than the date the application is filed with the board.

(4) Under the County Employees Retirement Law, if a county board of supervisors adopts a resolution by majority vote, a safety member of a county or district within that county may be required to retire at a specified age. That law permits a retired member to be reemployed by the county or a district and reinstated to active membership in the retirement system. Under that law, operative January 1, 2007, a retired safety member in Los Angeles County who was required to retire because of age may be reemployed by the county and reinstated to active membership, as specified.

This bill would prohibit, under specified conditions, a retired safety member in Los Angeles County from reinstating from retirement to active membership in the retirement system.

(5) The County Employees Retirement Law permits the board of supervisors of a county with a retirement system subject to that law, by resolution, to authorize a county retirement board to provide for payments toward group health insurance for specified members of the retirement system and their beneficiaries.

This bill would revise and recast those provisions to permit a county board of supervisors or the governing body of a district or other public entity that participates in a county retirement system subject to the County Employees Retirement Law to contribute to a Post-Employment Benefits Trust Account as part of the retirement fund to provide for payments towards group health, life, or other welfare benefits for specified members and their beneficiaries. The bill would also permit a board of supervisors of a county, or the governing body of a district, to establish its own trust for the purpose of funding group health, life, or other welfare benefits, and to enter an agreement with a board of retirement and board of investments for those boards to act as trustee, third-party administrator, or investment manager of that county or district trust. The bill would also require a county, governing body, or district in Los Angeles County to fund the provisions of the Post-Employment Benefits Trust Account under the provisions of a ratified collective bargaining agreement. The bill would further provide that a contract between a participating public employer and a board of retirement or board of investments shall not change the obligations of that public employer, board of retirement, or board of investments created under other contracts, laws, ordinances, regulations, or similar actions, as specified.

(6) Existing law provides for the compensation and benefits of court reporters in specified counties.

This bill would provide that the compensation of regular official court reporters in Fresno County shall be determined by collective bargaining between the court reporters and the superior court. The bill would also define, for purposes of retirement, the compensation of a regular official court reporter in Fresno County, as specified.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 847 (AB 159) Salinas Irrigation districts: directors.

Existing law, the Irrigation District Law, with certain exceptions, requires a director of the board of an irrigation district to be a voter and a landowner in the district and a resident of the division that he or she represents, at the time of his or her nomination or appointment and during his or her entire term. The district law requires a director elected at a formation election to be a resident and landowner in the proposed district at the time of his or her nomination and a resident of the division that he or she represents during his or her entire term.

This bill, in the case of a formation election, would require a director to be a resident, landowner, and voter in the proposed district. The bill, under certain circumstances, would exempt a director from the landownership requirement, but a director appointed or elected before January 1, 2007, would continue to be subject to existing qualification requirements until the expiration of his or her term.

Ch. 848 (AB 546) Garcia State computers: prohibited use: obscene matter.

Existing law makes it unlawful and subject to a civil penalty for any elected state or local officer, appointee, employee, or consultant to use or permit others to use public resources for personal or other purposes that are not authorized by law. Existing law also provides that the incidental and minimal use of public resources is not subject to criminal prosecution.

This bill, in furtherance of existing law, would make it unlawful for any elected state or local officer, including any state or local appointee, employee, or consultant, to knowingly use a state-owned or state-leased computer to access, view, download, or otherwise obtain obscene matter, as defined, except for specified purposes.

Ch. 849 (AB 1210) Levine State Capitol Historic Region: international genocide memorial.

Existing law provides for the placement of certain memorials on the grounds of the State Capitol, including a Vietnam Veterans Memorial, and establishes a commission with responsibilities related to the design and construction of that memorial.

This bill would make legislative findings about the need for the creation of an international genocide memorial and provide for the establishment of a commission in that regard. The bill would authorize the construction of the memorial in the Capitol Historic Region, subject to prior approval of the Department of General Services and the Capitol Park Master Plan Group. The bill would prohibit the expenditure of state moneys for these purposes.

Ch. 850 (AB 1334) Salinas Dentistry: registered dental hygienists.

Under existing law, the Dental Practice Act, dental auxiliaries are licensed and regulated by the Committee on Dental Auxiliaries and the Dental Board of California. Existing law authorizes a registered dental hygienist in alternative practice to perform certain functions of a registered dental hygienist, subject to specified conditions.

Existing law authorizes a registered dental hygienist in alternative practice to perform dental hygiene services for a patient who presents a prescription for the services issued by a dentist or physician and surgeon who has performed a physical examination and a diagnosis of the patient prior to the prescription being provided, as specified. The prescription may be valid for a period not to exceed 15 months.

This bill would require a registered dental hygienist in alternative practice to obtain written verification that a patient has been examined by a dentist or physician and surgeon if the

hygienist provides services to the patient 18 months or more after the first date that the hygienist provides services. The bill would require that the verification include a prescription for dental hygiene services, which prescription may be valid for a period not to exceed 2 years. The bill would provide that failure to comply with these provisions would be considered unprofessional conduct.

Existing law authorizes a registered dental hygienist or a registered dental hygienist in extended functions to perform specified procedures in designated settings under the direct supervision of a registered dental hygienist.

This bill would also authorize a registered dental hygienist in alternative practice to directly supervise the performance of these procedures.

#### Ch. 851 (AB 1430) Goldberg Air Contaminants.

Existing law requires the State Air Resources Board to develop and adopt, at a public hearing, a methodology for use by air pollution control districts and air quality management districts to calculate the value of credits issued for emission reductions from stationary, mobile, indirect, and areawide sources, including those issued under market-based incentive programs, when those credits are used interchangeably, with certain requirements. Existing law specifies that the state board shall perform specified functions in developing the methodology. Existing law also requires the state board to periodically update the methodology as it applies to future transactions, if necessary.

This bill would require the state board's environmental justice advisory committee to review each updated methodology.

#### Ch. 852 (AB 1457) Baca State property: transfer restrictions: City of San Bernardino.

(1) In 1991, the state, through the Director of General Services, conveyed certain real property to the City of San Bernardino on the condition that it only be used for park purposes in perpetuity unless the Legislature, by specific act, permitted other use, sale, or disposition of that property. The deed was recorded on January 15, 1992, and transferred to the city 9 specified parcels known as the Seccombe Lake Park within the County of San Bernardino.

This bill would authorize the City of San Bernardino to transfer a portion of the property, not to exceed 12.5 acres, to the Redevelopment Agency of the City of San Bernardino for sale for private development provided that specified conditions are met, including, among other things, that equivalent acreage of replacement parkland is acquired and developed within reasonable proximity to Seccombe Lake Park exclusively for park purposes that the Department of General Services reviews and approves the appraisal, conveyance, and acquisition documents, and that the city adopt a resolution detailing an improvement and maintenance plan for the park.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

#### Ch. 853 (AB 1953) Chan Lead plumbing.

Existing law prohibits the use of any pipe, pipe or plumbing fitting or fixture, solder, or flux that is not lead free in the installation or repair of any public water system or any plumbing in a facility providing water for human consumption, except as specified.

Existing law prohibits the introduction into commerce of any pipe, pipe or plumbing fitting, or fixture that is not lead free, except for a pipe that is used in manufacturing or industrial processing.

This bill would, commencing on January 1, 2010, revise this prohibition to apply to any pipe or plumbing fitting, or fixture intended to convey or dispense water for human consumption, but would exclude from this prohibition specified devices.

Existing law defines lead free as not more than 8% lead when used with respect to pipes and fittings and not more than 4% by dry weight with respect to plumbing fittings and fixtures.

This bill would, commencing on January 1, 2010, revise the term "lead free," for purposes of manufacturing, industrial processing, and conveying or dispensing water for human consumption, to refer not to the lead content of pipes and pipe fittings, plumbing fittings, and fixtures but to a weighted average lead content of the wetted surface area of the pipes, fittings, and fixtures of not more than 0.25%, to be determined pursuant to a prescribed formula.

Existing law requires the State Department of Health Services to adopt building standards to implement the above prohibitions. Appropriate state and local building and health officials are required to enforce these standards.

By increasing the duties of local officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 854 (AB 1973) Bermudez Gambling control.

(1) The Gambling Control Act defines and regulates controlled games and prohibits the conduct of gambling in a city, county, or city and county that does not have an ordinance governing certain aspects of the operation of gambling establishments, including the hours of operation of gambling establishments.

This bill would define hours of operation for these purposes as the period during which a gambling establishment is open within a 24-hour period. The bill would also specify factors for the Division of Gambling Control to consider in determining if there has been an expansion of gambling relating to hours of operation.

(2) Existing law accords the California Gambling Control Commission jurisdiction over the operation, concentration, and supervision of gambling establishments in California. Existing law further provides that this commission shall consist of 5 members appointed by the Governor, subject to Senate confirmation, and requires one member of the commission to be a certified public accountant with auditing experience, and one member to have a background in business with at least 5 years of business experience.

This bill would delete the requirement that the certified public accountant member have auditing experience, would permit the accountant member position to be filled by a person with experience in banking or finance, and would require the member with a background in business to have at least 5 years of business experience or alternatively 5 years of governmental experience.

(3) Existing law establishes the Gambling Control Fund within the State Treasury for the receipt and deposit of fees and revenue collected pursuant to the act. Under the act, specified licensing fees are required to be paid for the issuance or renewal of a state gambling license, as specified. Under existing law, the fee for initial issuance of a state gambling license is determined by the Division of Gambling Control and the fee for the renewal of a state gambling license is determined pursuant to specified schedules based on the authorized number of tables at which games are played.

This bill would require each licensee to pay an additional \$100 for each table for which it is licensed to the Department of Alcohol and Drug Programs for deposit in the Gambling Addiction Program Fund, which would be established by the bill to benefit those who have a gambling addiction problem. These funds would be available, upon appropriation by the Legislature, to community-based organizations that directly provide aid and assistance to those persons with a gambling addiction problem.

(4) The act prohibits, until January 1, 2010, the governing body and the electors of a county, city, or city and county from authorizing or expanding any legal gaming beyond that permitted on January 1, 1996. Additionally, the commission is prohibited, until January 1,

2010, from issuing a gambling license for a gambling establishment that was not licensed to operate on December 31, 1999, except as specified.

This bill would extend the operation of these provisions to January 1, 2015.

Ch. 855 (AB 2041) Nava Public safety: communications.

Under existing law, the Public Safety Radio Strategic Planning Committee, comprised of 13 specified state entities, has primary responsibility in state government to develop and implement a statewide integrated public safety communication system for state government agencies that facilitates interoperability and other shared uses of public safety spectrum with local and federal agencies.

This bill would add the Military Department, State Department of Health Services, and Department of Finance to, and remove the Department of the Youth Authority from, the committee and would require that a representative of the Office of Emergency Services serve as chairperson. It would require that interoperability be developed to include first response agencies, as defined, as the committee deems appropriate. It also would require the committee to meet at least twice a year, with one being a joint meeting with the California Statewide Interoperability Executive Committee.

This bill would incorporate additional changes in Section 8592.1 of the Government Code proposed by AB 2116, that would become operative only if AB 2116 and this bill are both chaptered and become operative on or before January 1, 2007, and this bill is chaptered last.

Ch. 856 (AB 2051) Cohn Domestic violence.

Existing law requires the Secretary of State to establish fees for the costs of processing forms for registering domestic partnerships.

This bill would establish a fee of \$23 to be imposed upon persons registering as domestic partners to develop and support a training curriculum specific to lesbian, gay, bisexual, and transgender domestic abuse support service providers who serve that community in regard to domestic violence, and to provide brochures specific to lesbian, gay, bisexual, and transgender domestic abuse, as specified.

The bill would establish the Equality in Prevention and Services for Domestic Abuse Fund for the deposit and use of those fees.

Existing law requires the Secretary of State to return a copy of the certificate of registration to registered domestic partners.

This bill would also require a brochure specific to lesbian, gay, bisexual, and transgender domestic abuse prepared by the State Department of Health Services to be printed by the Secretary of State and made available to certain domestic partner registrants, as specified, subject to available funding.

Existing law requires the State Department of Health Services to administer a program of grants to support battered women's shelters. Existing law also establishes a council to advise the department for those purposes.

This bill would revise the grant program to include the lesbian, gay, bisexual, and transgender community for certain purposes of the grant program. The bill would also require membership on the council by representatives of the lesbian, gay, bisexual, and transgender community.

Existing law requires specified training for law enforcement officers in regard to domestic violence.

This bill would additionally require that the commission responsible for that training program, consult with a representative of service providers serving victims of domestic violence in the lesbian, gay, bisexual, and transgender community.

Existing law requires the Office of Emergency Services to conduct statewide training workshops on domestic violence for local centers, law enforcement, and other service providers designed to enhance service programs. Existing law also requires that office to develop and disseminate throughout the state information and materials concerning

domestic violence. Existing law also establishes a council to advise the office for these purposes.

This bill would require the training workshops to also include a curriculum component specific to lesbian, gay, bisexual, and transgender domestic abuse. The bill would also require membership on the council by at least one representative of the lesbian, gay, bisexual, and transgender community.

Existing law establishes a grant program administered by the Office of Emergency Services for specified service providers relative to domestic violence.

This bill would establish a similar grant program administered by that and funded by the Equality in Prevention and Services for Domestic Abuse Fund for grants to serve the lesbian, gay, bisexual, and transgender community relative to domestic abuse, as specified.

This bill would incorporate additional changes in Section 358 of the Family Code, to be operative only if AB 1102 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

This bill would incorporate additional changes in Section 124250 of the Health and Safety Code, and in Section 13823.15 of the Penal Code, proposed by SB 1062, to be operative only if SB 1062 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

#### Ch. 857 (AB 2084) Karnette Domestic violence shelter-based programs.

Existing law provides for the funding of county programs to assist victims of domestic violence. Under existing law, a portion of each fee paid at the time of issuance of a marriage license and of authorization for the performance of a marriage is required to be collected for deposit into the county domestic violence programs special fund. Existing law requires the fees collected in the special fund to be disbursed to approved domestic violence programs on a yearly or more frequent basis.

Existing law sets forth the requirements applicable to counties distributing funds to these programs, and also sets forth eligibility, operation, and reporting requirements for the domestic violence programs and centers to which funding is provided. When a county lacks sufficient funds in the county domestic violence programs special fund to finance basic domestic violence shelter services, and community resources are not available, existing law authorizes the county to finance one or more of those basic services.

This bill would redesignate the domestic violence programs and centers as “domestic violence shelter-based programs.” The bill would recast and revise the requirements applicable to these programs and to counties, including, among other provisions, revising the definition of domestic violence for purposes of the bill. The bill would provide that a domestic violence shelter-based program is, to the extent feasible, required to provide services to, or assist in referring, physically disabled victims of domestic violence.

This bill would limit a county’s ability to require information from domestic violence shelter-based programs funded by the bill, and would prohibit a county from requiring information in a manner inconsistent with the federal Violence Against Women Act.

This bill would identify the primary purpose of the process to determine eligibility of a domestic violence shelter-based program for funding is to ascertain that the program meets applicable service requirements. It would specify that domestic violence shelter-based programs funded under the bill would be authorized to use the funds in an unrestricted manner, and that these funds may be used for both direct and indirect costs.

This bill would authorize the county to fund basic domestic violence program services, notwithstanding either the sufficiency of funds in the domestic violence shelter-based program special fund or the availability of community resources. This bill would also require that any fees received by Alameda County, Contra Costa County, Solano County, and the City of Berkeley, in excess of the fee collected at the time of issuance of a marriage license under these provisions, shall be available to that city or county for funding domestic violence programs other than domestic violence shelter-based programs.

By revising the duties applicable to counties providing funding to domestic violence shelter-based programs, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

#### Ch. 858 (AB 2250) Coto Mobilehome Parks Act.

(1) The Mobilehome Parks Act requires the Department of Housing and Community Development or a city, county, or city and county that assumes responsibility for the enforcement of the act to enter and inspect mobilehome parks every 7 years to ensure enforcement of the act and implementing regulations. Existing law requires an enforcement agency to issue notice to correct a violation. Existing law repeals these provisions on January 1, 2007.

This bill would extend the repeal of these provisions to January 1, 2012, would revise standards for determining those mobilehome parks to be inspected, and would set a goal of inspecting at least 5% of the parks per year.

(2) Existing law requires the department to convene a task force of representatives of mobilehome owners, mobilehome park operators, local enforcement agencies that conduct mobilehome park inspections, and the Legislature, at least once a year, to provide input to the department on the conduct and operation of the mobilehome park maintenance inspection program.

This bill would instead require that the input be provided every 6 months, and would require the department to submit a report to the task force semiannually that includes specified elements of the inspection program.

(3) The Mobilehome Parks Act requires an annual operating permit fee of \$25 and an additional \$2 per lot or camping party, as specified. In addition, existing law requires, except for a special occupancy park, an additional annual fee of \$4 per lot and requires this additional \$4 fee to be used exclusively for the inspection of mobilehome parks and mobilehomes. Existing law repeals the additional \$4 fee per lot on January 1, 2007.

This bill would extend the January 1, 2007, repeal date to January 1, 2012, thereby extending the imposition of the \$4 fee per lot until that date.

(4) This bill would incorporate additional changes in Sections 18400.1 and 18400.3 of the Health and Safety Code, to become operative only if SB 1231 and this bill are both chaptered and become effective on or before January 1, 2007, and this bill is chaptered last.

#### Ch. 859 (AB 2274) Karnette Harbors and ports: emergency response and evacuation plans.

Existing law, the California Emergency Services Act (act) provides for mitigation and response efforts to events including states of emergency, as defined, and local emergencies, as defined, and includes sudden and severe energy shortages, as defined, within those emergencies covered under these provisions. The act sets forth the duties of the Office of Emergency Services in overseeing these efforts. The act authorizes counties, cities, and cities and counties to create disaster councils to develop plans for responding to any condition constituting a local or state emergency.

This bill would require local, regional, and statewide agencies responsible for emergency preparation and response activities to work with all harbor agencies, as defined, within their jurisdiction to ensure integration of the harbor agencies' emergency preparation, response, and evacuation procedures with the agencies' activities.

By creating new duties for local and regional agencies responsible for emergency preparation and response activities, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 860 (AB 2415) Nunez Network security.

Existing law, the Consumer Protection Against Computer Spyware Act, provides specified protections for the computers of consumers in this state against certain types of computer software.

This bill would require a device that includes an integrated and enabled wireless access point, if the device is manufactured on or after October 1, 2007, is sold in this state for use in a small office, home office, or residential setting, and is used in a federally unlicensed spectrum, to either include a warning advising the consumer how to protect his or her wireless network connection, a warning sticker, or provide other protection that, among other things, requires affirmative action by the consumer prior to use of the device. The bill would provide that if any part of these provisions or their applications are held invalid, the invalidity would not affect other provisions.

Ch. 861 (AB 2541) Matthews Claims against the state.

Existing law requires a state agency that acquires property or services pursuant to a contract with a business to make payment to the person or business on the date required by the contract, and within 45 days of the state agency's receipt of an undisputed invoice, or be subject to a late payment penalty.

This bill would require a state agency that awards a grant, as defined, to make payment to the person or business that is the recipient of the grant on the date required by the grant, and within 45 days of the state agency's receipt of an undisputed invoice, or be subject to a late payment penalty. The bill would make other conforming changes.

Ch. 862 (AB 2544) Pavley Public employee health benefits: contracting agencies: employer contributions.

Existing law requires the Board of Administration of the Public Employees' Retirement System to administer the Public Employees' Medical and Hospital Care Act. Existing law permits a contracting agency to elect to be subject to the act for its employees and annuitants, provided that employer contributions for annuitants at all times equal employer contributions paid for active employees. Notwithstanding that provision, the act authorizes a contracting agency to establish a lesser monthly employer contribution for annuitants than for employees, provided that the monthly contribution for annuitants is annually increased by an amount not less than 5% of the monthly employer contribution for employees, until the time that the employer contribution for annuitants equals the employer contribution paid for employees.

This bill would instead authorize the establishment of a lesser monthly employer contribution for annuitants only if that contribution is annually increased to equal an amount not less than the number of years that the contracting agency has been subject to that provision multiplied by 5% of the current monthly employer contribution for employees, which increase shall not exceed \$100 annually.

Ch. 863 (AB 2641) Coto Native American human remains and multiple human remains.

Existing law establishes the Native American Heritage Commission ("commission") and authorizes the commission to bring an action to prevent damage to Native American burial grounds or places of worship. Existing law, the California Native American Grave Protection and Repatriation Act of 2001, requires all state agencies and all museums that receive state

---

**NOTE:** Superior numbers appear as a separate section at the end of the digests.

funding to inventory Native American human remains and cultural items in their possession for return to the appropriate tribes.

Existing law requires the commission, once it receives notification of Native American human remains (human remains), from a county coroner, to notify the most likely descendants, and the descendants, with permission of the landowner, or his or her authorized representative, may inspect the site and recommend appropriate dignified disposition of human remains and grave goods, but are required to do so within 24 hours of notification by the commission.

Existing law requires that when the commission is unable to identify descendants, the descendants fail to make a recommendation, or other specified circumstances occur, the landowner shall reinter the human remains, as specified.

The bill would require that the identified descendants make recommendations or preferences for treatment, as described, within 48 hours of being granted access to the site, instead of within 24 hours of the notification by the commission. The bill would also require the landowner, upon discovery of human remains, to ensure that the immediate vicinity, as described, is not damaged or disturbed, until specific conditions are met, including discussing and conferring, as defined, with the descendants regarding their preferences for treatment.

The bill would authorize the parties mutually agreeing to extend the discussions, taking into account the possibility of multiple human remains being located in the project area, providing a basis for additional treatment measures.

The bill would require that when the commission is unable to identify descendants, the descendants fail to make a recommendation, or other specified circumstances occur, and the landowner is required to reinter the human remains, as specified, the landowner is also required to protect the site where the remains are reinterred from further and future disturbance, as specified.

The bill would authorize the landowner, where multiple human remains are found during ground disturbing land development activity, to agree to additional conferral with the descendants, as specified; however, if the parties are unable to agree on appropriate treatment, the remains shall be reinterred, as specified.

Ch. 864 (AB 2723) Pavley Electricity: solar energy: low-income residential housing.

Under existing law, the Public Utilities Commission (PUC) has regulatory authority over public utilities, including electrical corporations and gas corporations, as defined. A decision of the PUC adopted the California Solar Initiative under which the PUC will oversee a program to promote solar energy technologies, administered by electrical corporations and gas corporations, for commercial and residential customers, funded through electrical corporation and gas corporation revenues and collected from gas and electric utility distribution rates.

This bill would prohibit the establishment of the California Solar Initiative from resulting in the diversion of any moneys from any existing programs for low-income ratepayers, or from cost-effective energy efficiency or demand response programs. The bill would require the PUC to ensure that not less than 10% of the funds for the California Solar Initiative are utilized for the installation of solar energy systems, as defined, on low-income residential housing, as defined. The bill would authorize the PUC to incorporate a revolving loan or loan guarantee program into the California Solar Initiative for low-income residential housing.

The bill would require that all moneys set aside for the purpose of funding the installation of solar energy systems on low-income residential housing, that are unexpended and unencumbered on January 1, 2016, and all unencumbered moneys thereafter repaid from loans made for the installation of solar energy systems on low-income residential housing, be utilized to augment existing cost-effective energy efficiency measures in low-income residential housing that benefit ratepayers.

**Ch. 865 (AB 2865) Torrico School safety.**

Existing law, the Healthy Schools Act of 2000 requires that the preferred method of managing pests at schoolsites be to use effective, least toxic pest management practices and requires schoolsites to maintain records of all pesticides used at the schoolsite for a period of 4 years. Existing law requires schools to provide all staff and parents or guardians of pupils enrolled at a school written notification of, among other things, expected pesticide use at that site.

This bill would expand the definition of “schoolsite” as used in these provisions to also include private child day care facilities, as specified. This bill would also require property owners to notify tenants who operate a child day care facility of their pest management practices and to provide a specified notice prior to the application of pesticides. This bill would also require child day care facilities to inform contractors hired to apply pesticide at the schoolsite that the facility must comply with the act and require persons hired to apply pesticides at a child day care facility to provide specified information to the facility. This bill would require the Department of Pesticide Regulation to promote and facilitate the adoption of integrated pest management programs at child day care facilities, as specified. This bill would make other conforming changes.

**Ch. 866 (AB 2951) Goldberg Capital facilities fees.**

(1) Existing law authorizes a public agency that provides public utility service, as defined, to impose a capital facilities fee on any school district, county office of education, community college district, the California State University, the University of California, or state agency, subject to certain restrictions. Existing law defines the terms “capital facilities fee” or “capacity charge” as any nondiscriminatory charge to pay the capital cost of a public utility facility, and defines the term “nondiscriminatory” for these purposes.

This bill would revise the definition of the term “public utility service.” It would revise the definition of the term “capital facilities fee” to mean a nondiscriminatory connection fee, as defined, or a nondiscriminatory capacity charge, as defined, or both.

The bill would require a public agency that provides public utility service to only charge a public agency fees, including rates, charges, or surcharges, for public utility service, other than electricity or gas, that do not exceed the reasonable cost of providing the public utility service. The bill would require that a fee, including a rate, charge, or surcharge for any product, commodity, or service provided to a public agency, be determined on the basis of the same objective criteria and methodology applicable to comparable nonpublic users, subject to specified criteria. The bill would provide that these requirements do not apply to impositions or increases of capital facilities fees on a school district, county office of education, community college district, the California State University, the University of California, or a state agency.

The bill would, until January 1, 2010, require any judicial action or proceeding by a public agency that seeks a refund or challenges the validity of a fee, rate, charge, or surcharge, or increase, or any action by a public agency to validate an ordinance, resolution, or motion imposing or increasing any of these, to be commenced, as specified.

The bill would require a public agency providing public utility service to complete a cost of service study at least once every 10 years that addresses the cost of providing public utility service to public schools, as defined, to include specified components, thus imposing a state-mandated local program on such an agency.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would make specified declarations with respect to its provisions.

**Ch. 867 (AB 3023) Nunez Railroads: safety.**

(1) The existing Federal Rail Safety Act (FRSA) authorizes the Secretary of Transportation to prescribe regulations and issue orders for railroad safety and requires the Secretary of Homeland Security, when prescribing a security regulation or issuing a security order that affects the safety of railroad operations, to consult with the Secretary of Transportation. The FRSA provides for state participation in the enforcement of the safety regulations and orders issued by the Secretary of Transportation or Secretary of Homeland Security, pursuant to an annual certification, and authorizes the respective secretaries to make an agreement with a state to provide investigative and surveillance activities. The FRSA provides that to the extent practicable, laws, regulations, and orders related to railroad safety and laws, regulations, and orders related to railroad security are required to be nationally uniform, but authorizes a state to adopt or continue in force a law, regulation, or order related to railroad safety or security until the Secretary of Transportation (with respect to railroad safety matters), or the Secretary of Homeland Security (with respect to railroad security matters), prescribes a regulation or issues an order covering the subject matter of the state requirement. A state is additionally authorized to adopt or continue in force an additional or more stringent law, regulation, or order related to railroad safety or security, when necessary to eliminate or reduce an essentially local safety or security hazard, that is not incompatible with a federal law, regulation, or order, and that does not unreasonably burden interstate commerce.

Existing law establishes the safety division of the Public Utilities Commission. The safety division is responsible for inspection, surveillance, and investigation of the rights-of-way, facilities, equipment, and operations of railroads and public mass transit guideways, and for enforcing state and federal laws, regulations, orders, and directives relating to transportation of persons or commodities, or both, of any nature or description, by rail. Existing law requires the commission to require every railroad corporation operating in this state to develop a protocol for rapid communications with certain entities in an endangered area if there is a runaway train or any other uncontrolled train movement that threatens public health and safety. Existing law requires a railroad corporation to promptly notify those entities if there is a runaway train or other uncontrolled train movement, in accordance with the communications protocol developed.

This bill would impose certain requirements on a railroad corporation regarding signage, markers, and flagging systems. The bill would require a railroad corporation to notify the commission and the collective bargaining representative of any affected employee of any new utilization of remote control locomotives in the state, on or after January 1, 2007. The bill would require a railroad corporation to provide immediate notification to the Office of Emergency Services (OES) of specified accidents, incidents, and other events that are required to be reported to the Federal Railroad Administration's National Response Center.

(2) Existing law requires the Governor to appoint an executive officer to be the Director of Homeland Security to be in charge of homeland security and to coordinate all homeland security activities, including homeland security strategy, information analysis related to terrorism, and protection of critical infrastructure from terrorism.

This bill would enact the Local Community Rail Security Act of 2006. The act would require every operator of rail facilities, by July 1, 2007, to provide, to the commission, the director, and the OES, a risk assessment of each rail facility in the state that includes specified information. The act would authorize the OES to provide the risk assessment to other law enforcement or emergency personnel. The act would require every rail operator, by January 1, 2008, to develop and implement an infrastructure protection program to protect rail infrastructure in the state from acts of sabotage, terrorism, or other crimes. The act would require each rail operator in the state to provide a copy of its infrastructure protection program to the commission, the director, and the OES and would require the commission, the director, and OES to keep this information confidential. The act would require the commission, in consultation with the OES, to review the infrastructure protection program and would authorize the commission to conduct inspections to facilitate the review and to order a rail

operator to improve, modify, or change its program. The act would authorize the commission to fine a rail operator for failure to comply with these requirements or an order of the commission. The act would adopt specific requirements for facilities that handle hazardous cargo. The act would require that rail operators provide communications capability that can accomplish certain tasks. The act would prohibit a rail operator or other covered person from undertaking any act to punish an employee who reports a violation of the act and would provide that an employee subjected to punishment for reporting a violation may seek civil damages of up to \$1,000,000, in addition to any other remedies the court deems appropriate.

(3) Under the California Public Records Act, certain public records are required to be made available for public inspection.

This bill would exempt from public disclosure a risk assessment or railroad infrastructure protection program filed with the commission, the director, or the OES pursuant to the requirements of the act.

#### Ch. 868 (AB 3068) Jerome Horton Gaming.

(1) Existing law defines "individual tribal casino accounts" for purposes of calculating the distribution of appropriations from the Indian Gaming Special Distribution Fund for grants to local government agencies impacted by tribal gaming.

This bill would make a technical correction to that definition.

(2) The Gambling Control Act regulates specified gambling activities in California and requires that, if the owner of a gambling enterprise is not a person, the owner is not eligible for a gambling license unless specified persons involved in the enterprise obtain a gambling license.

This bill would permit the Gambling Control Commission to exempt specified limited partners in limited partnerships from the licensing requirements described above solely for the purpose of the licensure of a card club located on the grounds of a racetrack that is owned by a limited partnership that also owns the racetrack.

#### Ch. 869 (SB 668) Kuehl Mining.

(1) Existing law establishes the Division of Mines and Geology in the Department of Conservation.

This bill would rename the division as the California Geological Survey in the Department of Conservation.

(2) Existing law requires the Department of Conservation, for purposes of complying with certain provisions regarding public contracts, to publish or otherwise make available, upon request, to the Department of General Services or a state agency, a list identifying certain surface mining operations. Existing law prohibits a state agency from acquiring or utilizing mined material unless the material is produced from a mining operation identified on that list.

This bill would also prohibit a state agency from contracting with a person utilizing these materials, as specified.

(3) Existing law prohibits an operator of surface mines in this state, whose operations are not identified in that list, from selling California mined material to a local agency. Existing law, the Surface Mining and Reclamation Act of 1975, governs surface mining operations and reclamation of mined lands.

This bill would instead prohibit a contractor or a mining operator from selling any minerals to a local agency unless the operation is not subject to the Surface Mining and Reclamation Act of 1975, or unless the contractor or mining operator certifies, under penalty of perjury, that the minerals are from a mining operation identified in the list. Because this certification would be under penalty of perjury, the bill would impose a state-mandated local program by creating a new crime.

(4) Existing law requires the owner, lessor, lessee, agent, manager, or other person in charge of a mining operation to annually submit certain information in a report to the Director

of Conservation, and to submit specified reporting fees to the State Mining and Geology Board. Existing law defines the term “mining operation” for purposes of these requirements, as a surface mine.

This bill would revise the definition of “mining operation” for purposes of these requirements to include any mining operation, including, but not limited to, a mining operation that is classified as a surface mine, and would impose those requirements upon the owner or operator of a mining operation.

The bill would require the owner or operator of a mining operation to allow access to the property to any governmental agency or the agent of any company providing financial assurances in connection with the reclamation plan.

(5) The Surface Mining and Reclamation Act of 1975 prohibits a person from conducting surface mining operations without obtaining a permit from the lead agency for those operations, and submitting and receiving approval for a reclamation plan and financial assurances from the lead agency. The act provides that it does not limit, among other things, the power of any city or county to regulate the use of buildings, structures, and land as between industry, business, residences, open space and other purposes.

The bill would provide that the exemption of the act upon a city or county’s power does not apply to an area classified by the State Geologist or designated by the board as an area that contains mineral deposits and is an area of regional or statewide significance, as specified.

(6) Existing law authorizes the director, with the consultation of appropriate state and local agencies, until January 1, 2007, to remediate or complete reclamation of abandoned mined lands that meet certain requirements. Existing law provides that the operator, landowner, and the person or persons who allowed or caused any pollution or nuisance, are liable for any remediation or reclamation work accomplished, or other necessary remedial action taken by any governmental agency and provides that the amount of the costs are recoverable in a civil action by, and paid to, the governmental agency and the director, to the extent of the director’s contribution to the costs of the remediation, reclamation, cleanup, and abatement or other corrective action.

This bill would delete the repeal of those provisions, thereby continuing indefinitely those remediation and cost recovery provisions.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

#### Ch. 870 (SB 909) Bowen Broadband services.

Existing law establishes the California Teleconnect Fund Administrative Committee to advise the Public Utilities Commission regarding the implementation, development, and administration of a program to advance universal service by providing discounted rates to qualifying schools, libraries, hospitals, health clinics, and community organizations, and to carry out the program pursuant to the commission’s direction, control, and approval (teleconnect program). Existing law establishes the California Teleconnect Fund Administrative Committee Fund in the State Treasury, and requires that moneys from the fund only be expended upon appropriation in the annual Budget Act and requires that the moneys appropriated be utilized exclusively by the commission for the authorized teleconnect programs. Existing law authorizes the commission to expend up to \$3,000,000 for up to an additional 40% of the one-time installation costs of advanced telecommunications services, as defined, for certain entities that do not have access to those services, from the unencumbered difference between what is appropriated and what is expended by the commission from the California Teleconnect Fund Administrative Committee Fund for the 2003–04 and 2004–05 fiscal years.

The Budget Act of 2006 reappropriated \$2,000,000 for the above-described purposes for encumbrance or expenditure until June 30, 2008.

This bill would instead authorize the commission to expend up to \$2,000,000 of the unencumbered amount for the nonrecurring installation costs of high-speed broadband services, as defined, for community organizations that are eligible for discounted rates pursuant to the teleconnect program. By removing the 40% limitation and expanding eligible expenses to nonrecurring installation costs, the bill would make an appropriation.

Ch. 871 (SB 1207) Alarcon Corporations: uncontested election of a listed corporation.

Existing law provides that, in any election of the members of the board of directors of a corporation, the candidates receiving the highest number of affirmative votes of the shares entitled to be voted for them up to the number of directors to be elected by those shares are elected.

This bill would authorize a listed corporation that has eliminated cumulative voting to amend its articles of incorporation or bylaws to provide that, in an uncontested election, as defined, approval by a majority of the shares represented and voting would be required to elect each director and would specify procedures to be followed if an incumbent director fails to be elected at such an election.

Ch. 872 (SB 1317) Torlakson Property tax revenue allocations: public utilities: qualified property.

(1) The California Constitution requires the State Board of Equalization to assess the property, other than franchises, of companies transmitting or selling gas or electricity. Existing property tax law provides for the valuation, as a unit, of properties of a state assessee that are operated as a unit as a primary function of that assessee, and for the allocation of the assessed value of the unit among various counties in which the state-assessee's unitary property is located. Existing law also provides, pursuant to specified formulas, for the application in each county of specified tax rates to unitary assessed value, and for the allocation among jurisdictions in that county of the resulting revenues.

This bill would, for the 2007–08 fiscal year and for each fiscal year thereafter, require that the assessed value of qualified property, as defined, placed in service by a public utility on or after January 1, 2007, be allocated entirely to the county in which the property is located. This bill would also require that the property tax revenues derived from qualified property be allocated among the county, certain special districts, and school entities in the same percentage shares as revenues derived from the utility in the prior fiscal year. This bill would also require that the balance of these revenues remaining after these allocations have been made be allocated to water districts, cities, or the county, as specified. This bill would make findings and declarations that the bill not be construed to require the State Board of Equalization to modify its computerized roll system, as specified.

(2) By establishing new duties with respect to the annual allocation of property tax revenues derived from state-assessed property, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would change the pro rata shares in which ad valorem property tax revenues are allocated among local agencies in a county, within the meaning of paragraph (3) of subdivision (a) of Section 25.5 of Article XIII of the California Constitution, and thus would require for passage the approval of  $\frac{2}{3}$  of the membership of each house of the Legislature.

(4) This bill would incorporate additional changes to Section 100 of the Revenue and Taxation Code, proposed by AB 2670, to be operative only if AB 2670 and this bill are both enacted, both bills amend the respective section, and this bill is enacted after AB 2670.

Ch. 873 (SB 1423) Figueroa Laser procedures.

Existing law, the Medical Practice Act, creates the Medical Board of California that is responsible, through its Division of Licensing, for issuing a physician's and surgeon's certificate to qualified applicants. Existing law also creates the Board of Registered Nursing to license and regulate registered nurses and associated professions.

This bill would require the Medical Board of California, in conjunction with the Board of Registered Nursing, and in consultation with the Physician Assistant Committee and professionals in the field, to review issues and problems surrounding the use of laser or intense light pulse devices for elective cosmetic procedures by physicians and surgeons, nurses, and physician assistants. The bill would also require the Medical Board of California and the Board of Registered Nursing, on or before January 1, 2009, to adopt regulations relating to that practice.

Ch. 874 (SB 1430) Alquist The Local Pandemic and Emergency Health Preparedness Act of 2006.

Existing law authorizes the Director of Health Services and local health officers to issue orders to enforce various public health and safety requirements. Existing law also authorizes local peace officers to enforce orders of the State Department of Health Services and of local health officers issued for the purpose of preventing the spread of any contagious, infectious, or communicable disease and authorizes the Director of Health Services and the local health officer to consider whether a request for enforcement assistance would necessitate advising regarding measures to be taken to prevent infection of enforcement officers when requesting assistance in enforcement of their orders.

This bill would enact the Local Pandemic and Emergency Health Preparedness Act of 2006.

Existing law provides that no provider of health care, health care service plan, or contractor shall disclose medical information regarding a patient of the provider of health care or an enrollee or subscriber of a health care service plan without first obtaining an authorization, with certain exceptions.

This bill would also authorize the disclosure of information to a local health department for the purpose of preventing or controlling disease injury, or disability as authorized by state and federal law.

Existing law provides that whenever a release, spill, escape, or entry of waste occurs as described and the director or the local health officer reasonably determines that the waste is a hazardous waste or medical waste, or that it may become a hazardous waste or medical waste because of a combination or reaction with other substances or materials, and the director or local health officer reasonably determines that the release or escape is an immediate threat to the public health, the director may declare a health emergency and the local health officer may declare a county health emergency in the county or any area thereof affected by the threat to the public health.

This bill would include circumstances where there is an imminent and proximate threat of the introduction of any contagious, infectious, or communicable disease, chemical agent, noncommunicable biologic agent, toxin, or radioactive agent to the scope of that authorization.

Existing law authorizes local health officers, after the declaration of a health emergency, to take certain measures.

This bill would specify the responsibilities of local and state entities after the declaration of a health emergency by a local health officer.

This bill would authorize a local health officer to issue, and authorize a first responder to execute, an order that authorizes a first responder to immediately isolate exposed individuals that may have been exposed to biological, chemical, toxic, or radiological agents that may spread to others, and would make a violation of that provision a crime. By defining a new crime, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 875 (SB 1453) Speier Participation in inprison drug treatment program: mandatory aftercare.

Existing law authorizes the Department of Corrections and Rehabilitation to reduce the prison term of specified inmates for good behavior and participation, as specified.

This bill would provide that certain inmates under the custody of the department, after successful completion of an inprison drug treatment program, upon parole, shall, whenever possible, be entered into a residential aftercare drug treatment program. If the parolee successfully completes 150 days of residential aftercare, he or she shall be discharged from parole, as specified. The bill would also require the department to report annually to the Joint Legislative Budget Committee and the State Auditor on the effectiveness of these provisions.

Ch. 876 (SB 1483) Alquist Child support.

Existing law sets forth provisions by which a child support order may be revised by the court and specifies that a support order may not be modified or terminated as to an amount that accrued before the filing of a motion or an order to show cause to modify, except as specified.

This bill, until January 1, 2010, would establish, if approved by a resolution of a county board of supervisors, a child support pilot project for the Counties of Alameda, Fresno, Orange, San Mateo, and Santa Clara. The bill would authorize the court in those counties to modify a child support order when a local child support agency submits an application for modification of support that complies with specified provisions. The bill would specifically authorize a local child support agency to seek modification of an existing child support order if it has received income information for one or both parents that indicates that an existing order is not in substantial conformity with state child support guidelines, as specified.

The bill would require the Department of Child Support Services to develop and annually review necessary and appropriate forms for implementation of the expedited order modification process and would require the Department of Child Support Services and the Judicial Council to conduct an evaluation of the effectiveness of this pilot project and report the results to the Governor and the Legislature by July 1, 2009.

Ch. 877 (SB 1505) Lowenthal Fuel: hydrogen alternative fuel.

Existing law imposes various limitations on emissions of air contaminants for the control of air pollution from vehicular and nonvehicular sources. Existing law generally designates the State Air Resources Board as the state agency with the primary responsibility for the control of vehicular air pollution. Under existing law, the state board, in conjunction with other state agencies, is required to develop and adopt a state plan to increase the use of alternative fuels, as defined. Existing law also requires retail sellers, as defined, to procure a specified percentage of electricity generated by eligible renewable energy resources, as defined, called a renewables portfolio standard.

This bill would declare the Legislature's intent that, when the California Hydrogen Highway Blueprint Plan is implemented, it be done in a clean and environmentally responsible and advantageous manner. The bill would require the state board to adopt regulations that will ensure that state funding for the production and use of hydrogen fuel,

as described in the California Hydrogen Highway Blueprint Plan, contributes to the reduction of greenhouse gas, criteria air pollutant, and toxic air contaminant emissions, and would require these regulations to meet minimum requirements, as specified.

The bill would also require the state board to adopt regulations that are to apply in any year immediately following a 12-month period in which the mass of hydrogen fuel dispensed in California for transportation purposes exceeds 3,500 metric tons, to ensure that the production and direct use of hydrogen fuels for motor vehicles in the state, including, but not limited to, any hydrogen highway network that is developed pursuant to the California Hydrogen Highway Blueprint Plan, contributes to a reduced dependence on petroleum, as well as reductions in greenhouse gas emissions, criteria air pollutant emissions, and toxic air contaminant emissions, and would require these regulations to meet minimum requirements, as specified. The bill would authorize the state board to increase the 3,500-metric-ton threshold, as specified. The bill would require the California Environmental Protection Agency's Environmental Justice Advisory Committee to meet to discuss the production and distribution of hydrogen fuel in the state, as specified. The bill would require the agency secretary, in consultation with the state board, to recommend to the Legislature and the Governor, on or before January 1, 2010, incentives that could be offered to businesses within the hydrogen fuel industry and consumers to spur the development of clean sources of hydrogen fuel.

The bill would require these regulations to require providers of hydrogen fuel for transportation in the state to report to the state board the annual mass of hydrogen fuel dispensed and the method by which the dispensed hydrogen was produced and delivered, as specified.

Ch. 878 (SB 1596) Runner Nurse-Family Partnership program.

Existing law provides for the implementation of a community-based system of perinatal care for eligible women and infants administered by the State Department of Health Services.

This bill would establish a voluntary nurse home visiting grant program, which would be administered and implemented by the department, for purposes of making grants to eligible participating counties for the provision of voluntary registered nurse home visiting services for expectant first-time low-income mothers, their children, and their families.

This bill would provide that the department shall only distribute these grants if the Director of Finance determines, in writing, that there are sufficient funds from private donations available in the California Families and Children Account, which the bill would create in the State Treasury and which the bill would continuously appropriate to the department, for expenditure for the purposes of the program. The bill would provide that if as of January 1, 2009, the Director of Finance determines there are insufficient funds on deposit in the account to implement the program, the account shall cease to exist.

Ch. 879 (SB 1380) Chesbro Alcoholic beverages: California county wine.

Under existing law, the Department of Alcoholic Beverage Control regulates the licensing, enforcement, and administration of the alcoholic beverage control laws.

This bill would prohibit the sale of wine produced, bottled, or labeled after December 31, 2008, in this state that identifies, in a brand name or otherwise, on any label, packaging material, or advertising, the name "Sonoma," unless the wine meets certain federal regulatory standards, as specified. This bill would not prohibit the use of a brand name, or otherwise, which was the name of the winery owner as established prior to 1950. This bill would not apply to a multicounty appellation, as specified.

Ch. 880 (SB 1710) Ackerman Education: California American Indian Education Center Program.

(1) Existing law establishes within the State Department of Education an American Indian Education Unit to provide administrative oversight of American Indian education

programs established by the state and to study and identify the cultural and educational disadvantages affecting American Indian children in the existing public school system. Existing law requires the Superintendent of Public Instruction to appoint an American Indian Education Unit Coordinator to be responsible for the American Indian Education Unit.

This bill would prescribe duties of the American Indian Education Unit and the department, as specified. The bill would also require the Superintendent to appoint an American Indian Education Oversight Committee, as specified.

(2) Existing law, until January 1, 2007, requires the State Board of Education, upon the advice and recommendations of the Superintendent, to adopt guidelines for the selection and administration of California American Indian education centers. Existing law authorizes a tribal group or unincorporated Indian association to submit an application to the state board in order to establish a California American Indian education center. Existing law requires California American Indian education centers to be designed to meet specified requirements.

This bill would authorize those centers to, among other things, improve the academic achievement of American Indian pupils in kindergarten and grades 1 to 12, inclusive, provide a focus for summer cultural, recreational, and academic experiences, and provide training programs, as specified. The bill would require the department to approve revised amendments and updates to the existing 1975 guidelines, as specified. The bill would establish specified criteria for the ranking and ordering of applications to establish a center and for funding. The bill would require funding to be disbursed in a specified manner. The bill would provide that an approved application for the establishment of a center would be effective for a period of 5 years and would require the department to begin evaluating the center in order to determine whether to renew the application or approve a new application, as specified.

(3) Existing law provides that the California American Indian Education Center Program becomes inoperative on January 1, 2007.

This bill would extend the program until January 1, 2012. The bill would require each center to annually submit a specified report to the department. The bill would require, on or before January 1, 2011, the department to report consolidated results for all centers and supply information that is required for a comprehensive evaluation of those results, and to make recommendations for program improvement. The bill would also require the centers to maintain sound fiscal policies. The bill would require the department to assist the centers in maintaining those policies. The bill would authorize the department to implement an annual program audit or fiscal review, as specified.

(4) This bill would require the department, if the application for a center has been approved by the department and the applicant has received written verification of that approval, to distribute 75% of the grant award for each year of the grant no later than 45 days after enactment of the annual Budget Act or any additional authorizing statute, whichever is later. The bill would require the department to distribute the remaining 25% of the grant award for each year of the grant no later than April 1 of the year following the year in which the initial 75% is distributed, as specified.

Ch. 881 (SB 1726) Lowenthal Vehicles: publicly owned transit system buses: illuminated signs.

(1) Existing law requires buses to be equipped with identification lamps and signs and lighting, as specified.

Existing law makes violation of operating provisions of the Vehicle Code a crime.

This bill would authorize buses, operated by a publicly owned transit system on regularly scheduled service, to be equipped with certain illuminated signs, as specified. The bill would require that the illuminated signs adhere to certain specifications; and would thereby create a new crime and impose a state-mandated local program. The bill would revise "lighting equipment" to include these illuminated signs.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 882 (SB 1814) Torlakson CEQA: schools.

(1) The existing California Environmental Quality Act (CEQA) requires a lead agency to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project, as defined, that it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if it finds that the project will not have that effect. CEQA also generally requires a lead agency to prepare a mitigated negative declaration for a project that may have a significant effect on the environment if revisions in the project would avoid or mitigate that effect on the environment. CEQA authorizes a master environmental impact report to be prepared for specified projects. CEQA defines terms and provides some exemptions from its requirements for specific projects.

This bill would include, as a project for which a master environmental impact report may be prepared, a plan for district projects to be undertaken by a school district, that also complies with applicable school facilities requirements. By imposing new duties on a lead agency, to determine whether a project is subject to these provisions, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 883 (SB 1805) Florez Horse racing: thoroughbred racing: handle.

Existing law provides that every thoroughbred association and fair that conducts a racing meet shall deduct a percentage of the total amount handled in exotic parimutuel pools of thoroughbred races, which shall be distributed to a thoroughbred racing association to defray costs of workers' compensation insurance in connection with thoroughbred horses that race in this state, as specified. Existing law provides for the distribution of funds that are not expended in the calendar year in which they are collected to specified organizations.

This bill would instead provide that any funds that are not used to defray the cost of workers' compensation insurance shall either be carried forward to the subsequent year or used to reimburse racing associations for safety related expenditures, as specified.

This bill would declare that is to take effect immediately as an urgency statute.

Ch. 884 (AB 50) Leno Victim compensation: trauma services.

Statutory provisions that were repealed as of January 1, 2005, authorized the California Victim Compensation and Government Claims Board to enter into an interagency agreement with the University of California, San Francisco, to establish a victims of crime recovery center at the San Francisco General Hospital to demonstrate the effectiveness of providing comprehensive and integrated services to victims of crime.

This bill would make legislative findings about the effectiveness of the services provided by the Trauma Recovery Center established as a pilot project under these provisions. It would reauthorize this interagency agreement for the purpose of actually providing these services not just in a demonstration capacity. It would appropriate for this purpose \$1.3 million from the Restitution Fund to the board for the 2006–07 fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 885 (AB 1935) Bermudez Railroads: maintenance and safety.

(1) The existing Federal Railroad Safety Act (FRSA) authorizes the Secretary of Transportation to prescribe regulations and issue orders for railroad safety and requires the

Secretary of Homeland Security, when prescribing a security regulation or issuing a security order that affects the safety of railroad operations, to consult with the Secretary of Transportation. The FRSA provides for state participation in the enforcement of the safety regulations and orders issued by the Secretary of Transportation or Secretary of Homeland Security, pursuant to an annual certification, and authorizes the respective secretaries to make an agreement with a state to provide investigative and surveillance activities. The FRSA provides that to the extent practicable, laws, regulations, and orders related to railroad safety and security are required to be nationally uniform, but authorizes a state to adopt or continue in force a law, regulation, or order related to railroad safety or security until the Secretary of Transportation (with respect to railroad safety matters), or the Secretary of Homeland Security (with respect to railroad security matters), prescribes a regulation or issues an order covering the subject matter of the state requirement. A state is additionally authorized to adopt or continue in force an additional or more stringent law, regulation, or order related to railroad safety or security, when necessary to eliminate or reduce an essentially local safety or security hazard, that is not incompatible with a federal law, regulation, or order, and that does not unreasonably burden interstate commerce.

Existing law requires the Public Utilities Commission to establish, by regulation, a minimum inspection standard to ensure the inspection of railroad locomotives, equipment, and facilities located in class I railroad yards in California not less frequently than every 180 days, and the inspection of all branch and main line track not less frequently than every 12 months.

This bill would require that the inspection of railroad locomotives, equipment, and facilities occur not less frequently than every 120 days, and commencing July 1, 2008, in addition to those minimum inspections, that the commission conduct focused inspections, as prescribed, of railroad yards and track, either in coordination with the Federal Railroad Administration, or as the commission determines to be necessary.

(2) Existing law establishes the safety division of the commission. The safety division is responsible for inspection, surveillance, and investigation of the rights-of-way, facilities, equipment, and operations of railroads and public mass transit guideways, and for enforcing state and federal laws, regulations, orders, and directives relating to transportation of persons or commodities, or both, of any nature or description, by rail.

This bill would require that existing automatic grade-crossing safety signal equipment that was installed within the previous 10 years that is removed pursuant to a specified provision of federal law, that the commission determines will meet the same performance criteria and inspection standards as new equipment, be made available for use at certain other crossings.

Under existing law, a violation of the Public Utilities Act or an order or direction of the commission is a crime.

Because this provision of the bill would be a part of the act, the bill would impose a state-mandated local program by creating a new crime.

(3) Pursuant to the FRSA, the Secretary of Transportation has adopted regulations to provide for safety at public highway-rail grade crossings, as defined, by requiring use of a locomotive horn, as defined, except in quiet zones, as defined, established and maintained in accordance with those regulations. These regulations expressly preempt any state law, rule, regulation, or order governing the sounding of locomotive horns at public highway-rail grade crossings, but are not intended to affect, nor do they preempt, any state law, rule, regulation, or order governing the sounding of locomotive horns at private highway-rail grade crossings, as defined, or pedestrian crossings, as defined.

Existing state law requires locomotives to be equipped with a bell of specified weight or equivalent sound-producing capability and requires that the bell be sounded from a locomotive engine at least 1,320 feet before the intersection of the railroad and a street, road, or highway with certain exceptions. Existing law imposes a civil fine of \$100 on a railroad corporation that violates these provisions.

This bill would delete existing state law relative to the equipping and sounding of locomotive bells and would instead require that one of several specified audible warning devices be sounded at any public crossing in accordance with the regulations adopted by the Secretary of Transportation, except in a quiet zone. The bill would additionally require that one of the specified audible warning devices be sounded at all rail crossings not subject to the requirements of the regulations adopted by the Secretary of Transportation, except in a quiet zone, in the same manner and circumstances as required at a public crossing. The bill would not restrict the sounding of one of the specified audible warning devices in an emergency, or as otherwise authorized by federal regulation. The bill would impose a civil penalty of \$2,500 for violation of these provisions.

(4) Existing law requires the commission to require every railroad corporation operating in this state to develop, in consultation with, and with the approval of, the Office of Emergency Services, a protocol for rapid communications with that office, the Department of the California Highway Patrol, and designated county public safety agencies in an endangered area if there is a runaway train or any other uncontrolled train movement that threatens public health and safety. Existing law requires a railroad corporation to promptly notify the office, the department, and the public safety agencies, through a communication to the warning center of the office, if there is a runaway train or other uncontrolled train movement threatening public safety, in accordance with the developed communications protocol.
